These sections deal with the Guarantee Association, which is a facility established by Alaskan law to protect workers whose employer has acquired workers' compensation insurance from an insurance facility which ultimately becomes insolvent. The protection is provided through the Guarantee Association's ability to assess all other workers' compensation insurers doing business in the State pro-rata to their workers' compensation insurance writings to provide the funds necessary to pay the claims of the insolvent insurer.

The are two sections in that law referred to in the bill define:

A. Which insurers are protected by the Insolvency Fund and,

B. Which insurers must contribute to the assessment in the event another insurer becomes insolvent.

We pointed out to the Senate Labor and Commerce Committee that either the municipal insurer must be included both as a contributor to the assessment and be protected by the Guarantee Association or excluded from both of those. The Labor and Commerce Committee agreed and elected to exclude the municipality from both the assessability and coverage provisions of the Guarantee Association. We support their choice in this regard, however, in creating the exclusion from the application of the Guarantee Association for reciprocals formed by municipalities they added reciprocals formed by public utilities.

We absolutely oppose the exclusion of a reciprocal formed by any commercial enterprise from the obligation imposed upon any other commercial insurer doing business in the State. There is no reason why a business which is operating in this State owned by stockholders who have formed a company for profit, should be excluded from sharing in the obligations that all other corporations formed for profit are obligated to support. All the insured employers of any other commercial insurer indirectly contribute to the Guarantee Association assessment by virtue of that cost being loaded into their premium. It creates a lack of competitive parity when a reciprocal can be formed by a specially defined group and be excluded from having to share in that cost.

RECOMMENDATION

We would propose that the language "or public utilites" be stricken from both line 6 and line 14 of page 2 of the bill.

As a further matter of clarity, on line 5 and line 14 the language should be modified so that it reads as follows:

"Reciprocal insuer formed by and insuring only municipalities."

We would appreciate your favorable consideration of these recommendations.

Yours cordially,

Richard Block

A policy of service and protection

March 22, 1983

The Honorable Dick Eliason, Senator
Alaska State Senate
Pouch Y
Juneau, Alaska 99811

Attn: Sheila Peterson, Legislative Analyst

Dear Dick:

Sheila was kind enough to send me a working draft of CSSB 66 (L&C) which is marked "Sofo 3-14-83." Shortly after receiving this draft, I was called by Wes Coyner, who indicated that there were some mistakes made in the drafting; and, in fact, numerous portions of that working draft are not intended to be included. The changes which I was given are as follows:

A. From line 10 strike "AS 23.30.075 (b)"

B. From line 16 strike "AS 23.30.075 (b) by the state or a political subdivision" and insert instead "by a municipality"

C. From page 1, line 28 to page 2, line 2 strike all of the definition and instead insert "municipality is defined as provided in AS 29.78.010 (8)"

D. From page 2, line 5 strike "or policital subdivision of the state, public utilities," and insert in line 5 "a municipality of" so that line 5 reads" reciprocal insurer formed by a municipality of the state ...".

E. Strike all of Section 6.

F. Strike all of Section 7.

My comments deal with the bill as modified.

BASIC THRUST OF THE BILL

The bill seems to permit municipalities to form a reciprocal insurer and changes the Reciprocal Law to permit two or more, as opposed to 25 or more persons, to form a reciprocal insurer. These basic policy changes are acceptable.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

The bill goes further, however, and makes three other changes which I find objectionable in various degrees.

1. Allowing the capital and surplus to be satisfied with a bond. Every other insuring entity in the State of Alaska is required to post cash or other admitted assets in order to do business in the State. The reason, of course, is that only cash and immediately liquidable assets can be made available to pay claims to the extent claims and expense exceed premiums. To permit the requirement to be met with a bond, is to work an utmost hardship on claimants and creditors in the event the premiums are not adequate to meet expenses for operations and claims.

   It should be noted that there is already a significant advantage afforded entities utilizing this new statute since any other carrier writing workers' compensation only in the State of Alaska, must have $250,000 more in assets than is required of the municipal reciprocal. To compound the problem, by allowing this minimal capital and surplus to be put up in the form of a bond as opposed to admitted assets, permits both an unreasonably unfair level of competition among insurers and subjects the claimant to questionable protection for their rights under the Workers' Compensation Act.

2. Section 5 attempts to exempt a municipal reciprocal from its obligations to pay an assessment to fund an insolvency by an insurance carrier formed under existing laws. There may be some argument to be made for excluding them from the obligation to pay assessments of the Guarantee Association, but only if the companion provision which is that the claims of an insolvent municipal reciprocal are not covered by the Guarantee Association, is also included.

   Note that your work draft excludes the reciprocal from AS Section 21.80.180 (6) (A), (Who Must Pay an Assessment for an Insolvency) but does not exclude them from AS 21.80.180 (5) (A) (Who's Insolvency Must Be Protected By The Guarantee Association.) It is my position that the municipal reciprocal must be included as part of the Guarantee Association both as to assessability and coverage, or excluded from the Guarantee Association both as to assessability and coverage. Because of the highly political nature of such a program and because I do not believe that the minimum criteria for forming a municipal reciprocal provides adequate protection for the long term growth and stability of such an organization, I would elect to have them not included in the Guarantee Association and exempt them from assessment.

3. For some reason <u>all</u> reciprocals are exempted from assessment to fund the assigned risk pool. I believe that drafting Section 1 to exclude all reciprocals was an inadvertant error on the part of the drafters since there are commercial workers' compensation

reciprocals in this State that certainly should not be exempted from the assigned risk pool. The more pertinent issue is should the municipal reciprocal be exempted from paying assessments for the assigned risk pool. On this point, I restate a portion of my January 21, 1983, letter to Representative Rick Uehling on a similar subject.

IT IS IMPORTANT TO MAINTAIN A PREMIUM BASIS NECESSARY TO PROVIDE SUPPORT FOR SYSTEM OBLIGATIONS

There are several components to the complete workers' compensation system which are funded by assessment of insurance companies, and those assessments are a function of the premiums written. It was recognized that since all employers were required to purchase insurance, assessing insurance companies based on their pro-rata writings of workers' compensation insurance was an equitable and efficient means for funding collateral aspects of the workers' compensation system. If significant shares of premium were allowed to "escape" the system because insurance pools were allowed to exist under the sham name of "group self-insurance", then the assessment base would be reduced placing a larger burden on those employers remaining insured through traditional insurance markets and relieving other employers of their obligation to pay their fair share of these collateral program costs.

It is, of course, true that a truly self-insured employer does escape some of these obligations, and in other states there has been a tendency to require the truly self-insured employer to be subjected to assessment to the same extent they would be had they been insured through an insurance company. Though that is not the current State of Alaska law with respect to true self-insured employers, the problem should not be exacerbated by allowing the fiction of group self-insurance to permit substantial additional premium to be removed from the premium base.

Some of these collateral programs are:

Assigned Risk Pool

Since insurance is required to be carried by all employers, but insurance companies are not legally obligated to provide insurance to a particular employer, it was necessary to create a mechanism for poor risks, or risks that underwriters chose not to write voluntarily, to obtain their workers' compensation insurance. In Alaska an assigned risk pool has been established, and any employer who cannot obtain their insurance through negotiation with an insurance company may obtain their insurance from the assigned risk pool at standard rates. The net cost of operating the assigned risk pool, that is, the amount by which losses from pool risks exceed premium from pool risks, is paid by assessment of all other insurance companies pro-rata to their writings of workers' compensation insurance. In short, the cost of underwriting pool risks is borne by the workers' compensation system.

I very much appreciate your allowing me an opportunity to comment on your work draft and hope that my comments are a value to you.

Yours cordially,

Richard L. Block

DIVISION OF INSURANCE

March 23, 1983

Honorable Richard I. Eliason
Chairman
Committee on Labor and Commerce
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Eliason:

RE: Position Paper SB 66

The Administration has carefully reviewed the ramifications of SB 66 and concludes that the public would best be served by a committee substitute that deletes the content of the current bill and replaces it with the enclosed changes which are similar to those forwarded to you on March 1, 1983.

SB 66 would allow two or more municipalities to pool their workers' compensation liabilities in a self-insured pool. The terms "self-insured pool" and "group self-insured" are anomalous terms. Self-insurance for two or more entities is insurance. The insurance code would normally apply to such situations. The bill as written, however, does not treat the combination of municipalities as an insurer. It would be more consistent with the general approach of the insurance code to treat this combination of municipalities the same as other combinations of other entities.

We recommend that SB 66 be replaced with a CS that would continue the regulation of insurers (group self-insurers) in the insurance code and apply the requirements for formation of an insurer to a group of municipalities. The requirements that would apply to municipalities, as well as public utilities, can be reasonably eased in view of the nature of those entities. The recommended easing would incorporate four changes. These are:

1. Reduction of the financial requirements for municipalities by permitting the use of a bond in lieu of cash surplus and by reducing the amount of operational surplus necessary;

2. Removal of any assigned risk liabilities that might otherwise accrue to an insurer formed by a group of municipalities or public utilities;

3. Reduction of the number of entities required to form a reciprocal insurer; and,

4. Removal of any liabilities in the Alaska Guaranty Association for insolvencies of other insurers if the insurer formed by a group of municipalities or public utilities is an assessable reciprocal insurer.

We believe that this is a reasonable stance which provides adequate public protection for claimants and policyholders.

Very truly yours,

Richard A. Lyon
Commissioner

RAL/cw#2lI3

Enclosure

cc: Art Peterson
Department of Law

Summary of CSSB 66

Section 1 - This section exempts reciprocal insurers from the assigned risk pool. The rationale is that a reciprocal insurers only a specialized group of individuals with similar activities and should be responsible with their own classification of insurance.

Description of an assigned risk pool.

Assigned Risk Pool

Since insurance is required to be carried by all employers, but insurance companies are not legally obligated to provide insurance to a particular employer, it was necessary to create a mechanism for poor risks, or risks that underwriters chose not to write voluntarily, to obtain their workers' compensation insurance. In Alaska an assigned risk pool has been established, and any employer who cannot obtain their insurance through negotiation with an insurance company may obtain their insurance from the assigned risk pool at standard rates. The net cost of operating the assigned risk pool, that is, the amount by which losses from pool risks exceed premium from pool risks, is paid by assessment of all other insurance companies pro-rata to their writings of workers' compensation insurance. In short, the cost of underwriting pool risks is borne by the workers' compensation system.

Section 2 - This section states or allows a municipality to post a bond equal to the amount necessary for capitalization

minus $250,000 which must be cash. The required capital for a domestic stock insurer would be $1 million if only one form of insurance is covered, for example workers' comp, and $1.5 million if two forms of insurance are covered.

Section 3 - The number of persons needed to form a reciprocal was reduced to two.

Section 4 - The new definition of municipality is included. It was felt this definition encompassed the municipalities who could participate, ie those with taxing powers.

Section 5 - Defines "member insurer" to exclude an assessable reciprocal which in turn takes an assessable reciprocal out of the Guaranty Act.

The Guaranty Act is established to protect insurers if an insurance company folds up. An assessable reciprocal is responsible for its own insurers & therefore should not be responsible for others

AS 21.80180 (5) should probably be amended to exclude municipalities, public utilities from "insolvent insurer". If this were done then the municipalities + utilities would neither participate in the Guaranty nor would they be protected by it.

Dick Block
Ak National
Insurance
Company

Note that your work draft excludes the reciprocal from AS Section 21.80.180 (6) (A), (Who Must Pay an Assessment for an Insolvency) but does not exclude them from AS 21.80.180 (5) (A) (Who's Insolvency Must Be Protected By The Guarantee Association.) It is my position that the municipal reciprocal must be included as part of the Guarantee Association both as to assessability and coverage, or excluded from the Guarantee Association both as to assessability and coverage. Because of the highly political nature of such a program and because I do not believe that the minimum criteria for forming a municipal reciprocal provides adequate protection for the long term growth and stability of such an organization, I would elect to have them not included in the Guarantee Association and exempt them from assessment.

ALASKA RURAL ELECTRIC COOPERATIVE ASSOCIATION, INC.

237 E. FIREWEED LANE • SUITE 301
ANCHORAGE, ALASKA 99503 • (907) 276-3235

April 15, 1983

House Labor and Commerce Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Committee Members:

The purpose of this letter is to explain our support for HB 308 and provide you with background information regarding the insurance program our association provides its members.

In 1979, the Alaska Rural Electric Cooperative Association applied to the Workers' Compensation Board for a self-insurance certificate for our member utilities. The certificate was issued effective January 1, 1980, and was renewed for a year effective January 1, 1981. Our program has been completely successful in meeting its obligations to the employees of its participants and in saving the participants substantial sums of money in insurance costs. Other associations, including the Municipal League, expressed interest in adopting group self-insurance programs modeled after ours.

At the beginning of 1982, our certificate was renewed for only a few months, and we were told that the Board was "reviewing the situation." In February 1982, Ms. Jacqueline McClintock of the Department of Labor requested an Attorney General's opinion regarding the legal status of group self-insurance programs in Alaska. In April, the Attorney General's opinion declared that since group self-insurance is not specifically mentioned in the Alaska statutes and it is in some other jurisdictions, it can be interpreted that group self-insurance is not authorized in this state.

Based on this opinion from the Attorney General, the Workers' Compensation Board terminated our certificate effective September 30, 1982. We appealed this action to the Superior Court, and we were successful in obtaining a stay of the Board action pending appeal. At the present time we are self-insured as a group by order of the Superior Court.

In principle, what our program does, is to buy a group insurance policy with a large deductible, and the deductible amount is shared within the group. Our retained risk on worker's compensation claims is $200,000 per occurrence. Above that level, we are insured by an excess insurance company. Corroon & Black/Dawson & Company is our broker and has been since the beginning of our program. Each year they calculate what the commercial insurance premium would be for each of our members, including the individual experience modification for each member. Our Board of Directors then determines what discount, if any, will be allowed to the participants for that year. Discounts in our program have been: 1980-0, 1981-10%, 1982-15%, 1983-15%.

We have an active safety program for our members which is paid for as a cost of our self-insurance program. Claims are administered on a professional basis for us by Scott Wetzel Services. After paying expenses and claims (including reserves for claims not yet paid), we have finished each year with a substantial surplus which is held in trust for our members. This money is retained in the program for a few years in order to make sure we have an adequate reserve on hand, but these savings will be paid back to our members. The ultimate beneficiaries of our program are the electric consumers.

We must have a legislative resolution of our uncertain status this year. We began this session by seeking legislation to specifically authorize group self-insurance. This proposal was vigorously opposed by portions of the insurance industry. The Senate Labor and Commerce Committee fashioned a compromise which was later introduced as HB 308.

The compromise basically provides:

(1) We will give up our status as a self-insured group and become a reciprocal insurer. This will require us to establish and maintain reserves of $1,125,000 and place us under regulation of the Division of Insurance.

(2) The reciprocal insurer statutes would be amended to make it possible for us to qualify as a reciprocal, and reciprocals would be relieved of inappropriate cost factors to which they are now subjected.

Section 1 exempts reciprocals from participating in the assigned risk pool. By its very nature a reciprocal is a mutual enterprise which only serves its members. It is inappropriate that reciprocals should be forced to help provide insurance to the high risk businesses in other industries.

Sections 2 and 4 deal only with reciprocals established by municipalities, so I will make no comment on them.

Section 3 reduces the number of participants required to establish a reciprocal from 25 to 2. This is especially important to us because there are only 14 electric cooperatives in Alaska.

Sections 5 and 6 exempt assessable reciprocals organized by municipalities or public utilities from participation in the insurance company guarantee fund. The purpose of the fund is to protect policy holders against loss in case of financial failure by an insurance company. The financial responsibility of an assessable reciprocal is guaranteed by its participants.

The fund could only be called upon to pay the claims for such a reciprocal in the event of bankruptcy of all of its participants. Section 5 exempts these reciprocals from the "benefits" of the fund, and Section 6 exempts them from the costs of the fund.

We think this is a reasonable compromise, and we give it our full support. Please give this bill a "do pass" recommendation and help get it enacted.

The only change we recommend is the correction of a printing error on page 2, line 15. Only the comma should be underlined, not the word Alaska.

Sincerely,

Dave Hutchens

BY THE LABOR AND COMMERCE COMMITTEE

HOUSE BILL NO. 308

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.39.155(a) is amended to read:

(a) The director may require carriers, except a reciprocal insurer formed under AS 21.75, BY A GROUP OF MUNICIPALITIES as a condition of writing a line of insurance dealing with workers' compensation, to participate in an assigned risk pool if the director finds that mandatory carrier participation is in the public interest.

* Sec. 2. AS 21.75.050 is amended by adding a new subsection to read:

(c) A domestic reciprocal insurer formed under this chapter by two or more municipalities shall (1) comply with (a) of this section or post a bond for an amount equal to the capital that would be required of a domestic stock insurer writing the same lines of insurance for which the reciprocal insurer seeks to be authorized, and (2) maintain a surplus of $250,000 or a surplus sufficient to operate the reciprocal insurer for one year, whichever is greater.

* Sec. 3. AS 21.75.060(a) is amended to read:

(a) Two [TWENTY-FIVE] or more persons domiciled in this state may organize a domestic reciprocal insurer and make application to the director for a certificate of authority to transact insurance.

* Sec. 4. AS 21.75 is amended by adding a new section to read:

Sec. 21.75.340. DEFINITIONS. In this chapter "municipality" means a political subdivision incorporated under the laws of the state that is a home rule or general law city, a home rule or general law

borough, or a unified municipality.

* Sec. 5. AS 21.80.180(5) is amended to read:

(5) "insolvent insurer" means an insurer

(A) authorized to transact insurance in this state, except an assessable reciprocal insurer formed by municipalities ~~or public utilities~~, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88.010 - 21.88.900, either at the time the policy was issued or when the insured event occurred, and

(B) determined to be insolvent by a court of competent jurisdiction;

* Sec. 6. AS 21.80.180(6) is amended to read:

(6) "member insurer" means a person, except an assessable reciprocal insurer formed by municipalities or public utilities, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88.010 - 21.88.900, who

(A) writes any kind of insurance to which AS 21.80.010 - 21.80.190 apply under AS 21.80.020 including the exchange of reciprocal or inter-insurance contracts, and

(B) is licensed to transact insurance in this state;

Honorable Walt Furnace, Chairman
Labor and Commerce Committee
House of Representatives
Pouch V
Juneau, Alaska, 99811

Re: House Bill 308

Dear Representative Furnace,

It has come to my attention that there is some misunderstanding concerning how the workers' compensation assigned risk pool operates in this State, and particularly, how the operation differs from the operation of the automobile assigned risk plan.

The automobile assigned risk plan operates as a mechanism for assigning , in rotation, to all carriers writing automobile insurance, those risks which cannot obtain auto insurance in the voluntary market. The carrier that receives the assignment charges and keeps the premium due in respect of that policy and pays the claims arising out of that policy. The carrier to which that risk is assigned lives with the fortunes of the particular risks assigned to it.

On the other hand, the workers' compensation assigned risk pool operates as a separate insuring facility that takes the premium from all risks using the facility and pays all claims arising out of those risks. The facility is operated by the National Council on Compensation Insurance, an insurance industry funded and managed rating and statistical bureau. The day to day handling of the administrative functions, such as policy issuance, claim handling, audit, collection, etc. is handled by some of the carriers in this state on a contract basis. The carriers doing that work have solicited the right to provide that service at a fee. No carrier is obligated to service workers' compensation assigned risk policies.

At the end of the year, the net difference between claims and expense on the one hand and premiums on the other, paid and received by the pool are charged or paid pro-rata to all insurers writing workers' compensation in the State.

It can thus be seen that a reciprocal insurer seeking to provide its administrative facilities only to its members, is not, by virtue of participating in the workers' compensation assigned risk pool obligated to do more than pay its pro-rata share of the net results in the pool.

It remains our firm position that the reciprocal insurers writing workers' compensation should share in the net cost

of the pool in the same way as do all other carriers doing business in this state.

Thank you for the opportunity to clarify this point.

yours cordially

Richard L. Block

Re: HB 308

Dear Representative Furnace:

This letter is submitted on behalf of the American Insurance Association.

The basic justification for regulation of the insurance industry is to protect buyers of insurance and injured parties against the insolvency or incompetency of insurers, and to assure that benefits will be there when they are needed. Thus, capitalization requirements, guaranty associations and the like are provided as means of protecting those who rely on the insurance, and assigned risk pools are set up to be sure that the insurance is available to all who need it.

The costs of these protective measures are ultimately borne by the insurance-buying public, as they are passed along by insurers as costs of doing business.

When it is suggested that these safety measures should not apply to certain insurers, we have to ask, first whether the insureds and claimants directly involved are adequately protected; and second, whether the bill is fair to the other companies, and their customers, who pay for the guaranty association, assigned risk pool, etc.

The assigned risk pool for workers' compensation does not require that participating insurers take on individual insureds as their own insureds. There is a servicing carrier for the pool, and the residual cost of the pool (the amount not picked up in premium charges) is assessed to the

other insurers. I am not sure what, if any, assessments have been made in recent years; the director of insurance would know. Given that reciprocals are not asked to take assigned risk insureds as members, or even to service them, we must ask what social policy is being served by exempting one form of insurer from the contingent liability of the pool's expense.

The bill also exempts some reciprocals, those who issue assessable policies, from the Guaranty Association. (Sections 5 and 6). To the extent that financial requirements are lessened (as in Section 2 of the bill, relating to municipal reciprocals), they should probably not be included in the Guaranty Association, since that would unfairly burden other members who have had to guard against insolvency by meeting more stringent capitalization standards. Ironically, by recognizing that assessable reciprocals are somewhat better able to stand on their own than non-assessable reciprocals, the bill puts only those who are more likely to have solvency problems on the backs of the solvent insurers. Perphaps a separate solvency mechanism for self-insureds and any others, like the proposed municipal reciprocals, who have lesser financial standards should be considered.

It may be that the special relationship of the Legislature to the municipalities, and their ultimate guarantees of solvency by taxation or state appropriation, makes it possible to allow somewhat lower financial requirements for municipal reciprocals, as is done in this bill. We do not believe it is fair for them to be exempted as well from carrying the other normal burdens of insurance in this state, however, where the result would be to increase the burden on other insureds. We also suggest that, whatever arguments exist to create special exceptions for municipalities, they do not apply to commercial organizations, including public utilities. It is a little difficult to see where the line is next to be drawn - do certificated air carriers occupy the same kind of favored position?

The policies behind the imposition of these burdens are well thought out, and the mechanisms have generally worked well. Any exception to them should stand on strong

policy grounds and be fair to other insureds in this state, and we suggest that Sections 1, 5 and 6 of this bill do not meet those standards.

Thank you for the chance to comment on this bill.

Very truly yours,

M. T. Thomas

TESTIMONY HOUSE BILL 308

The ARECA insurance program was formed to insure member REA's for General Liability, Auto Liability, Worker's Compensation and also to develop broader coverages and stabilize pricing of their insurance coverages.

The insurance cost is limited to reinsurance cost plus claims and loss prevention services. This eliminates the REA's having to purchase insurance from a carrier at cost plus insurance company profit.

Insurance Companies will lose profit and therefore will be opposed to formation of such Reciprocal insurance companies.

Since the reciprocal insurers will be non profit such as ARECA, the savings will ultimately be passed on to consumers in the form of lower and or more stable utility rates.

While we sympathize with the insurance carrier for loss of profit we feel the public interest is best served by allowing public utilities to form a Reciprocal insurance company

By participation in the Assigned Risk Pool, a small reciprocal such as ARECA would be reducing their surplus with no great benefit to the profit structure of standard carrier's. It would appear, therefore, to be an insignificant and minimal benefit for the large participating carrier but at the same time a significant and unnecessary exposure to the reciprocal insuror. We must remember, again, that in the case of ARECA which is comprised of only 13 non-profit REA's, the passage of House Bill 308 in its present form will provide cost savings to approximately 100,000 consumers.

You may hear testimony from insurance companies who want this bill changed to require participation in the workmens compensation assigned risk pool. I submit to the committee that their reasoning is strictly from a selfish nature, and some that come to mind are as follows:

Insurance companies would lose profits because the reciprocal insuror would write business at cost and insurance companies would not have a chance to write these various accounts in the open market.

To synopsis, Insurance companies will state that they believe reciprocal insurors should participate in the Assigned Risk Pool to primarily allow for reduction of their contribution for payment of losses.

This is totally without merit, and we submit the following facts in argument:

(A) The reciprocal insuror percentage would be so small, there would be no significant benefit for their participation.

(B) The statement is meant to create doubt and uncertainty as to a contingent liability of the potential reciprocal member so that the reciprocal will not become a reality.

(C) The end result of a reciprocal not being formed would place each member back into the open market, thus the insurance companies would be able to write business at a profit. This is their ultimate goal.

I urge passage of the bill in its current form.

Respectfully Submitted,

Wayne W. Brown, Jr.

Re: HB #308 An Act relating to insurance.

Dear Mr. Furness:

This measure in its current form is very much opposed by us. On the other hand, the areas of our serious concern can be easily remedied by some amendments, in which case the general thrust of the bill would be acceptable. We, therefore, urge the Committee to adopt the recommended amendments if it intends to proceed with this legislation.

BACKGROUND

For reasons, some of which may be valid, the municipal league, or at least several municipalities, have felt it desirable to have statutory authority to establish a means of exchanging insurance contracts among themselves as an alternative to purchasing insurance from commercial insurance markets. At an early stage in the legislative process when the municipality's interest in establishing their own insurance program first became known to us, we suggested using the reciprocal insurer authority already granted in the Insurance Code. They have accepted this recommendation and House Bill 308 is the result. Unfortunately in the drafting, several specific exceptions from appropriate obligations imposed on insurers were carved out for the municipal reciprocals, and we believe such is wholly inappropriate.

It is the purpose of this letter to indicate these areas and to point out the responsibilities that every other insurer currently has and ought to have in connection with sustaining the workers' compensation system in this State which even a municipal reciprocal should be required to support.

ASSIGNED RISK POOL

[AS21.39.155 (a) - HB 308 Page 1, Line 9 -10]

The proposed amendment would exempt all reciprocals from having to participate in the contributions to the assigned risk pool.

Currently, all commercial insurers writing workers' compensation in the State of Alaska are required to pay an assessment to support the assigned risk pool. The amount of the assessment is a pro-rata charge necessary to cover the extent to which losses and expenses exceed the premium collected in the pool. Assessment based on workers' compensation writings by workers' compensation carriers is a logical way to support the pool since it spreads the cost for supporting the undesirable risks among all other employers in the State. Currently, any employer insured in a commercial insurer, including all municipalities which are insured by commercial insurers, are paying indirectly the assessment to support the assigned risk pool.

To the extent that a group of employers are exempted from having to pay their pro-rata share, the burden falls on a smaller population who must then pay a higher assessment. In effect, by exempting the municipal reciprocal from having to pay the assigned risk pool, all other employers are going to have to pay a slightly higher assessment.

We find it totally inequitable and without justification that the municipalities as employers be relieved of any obligation which any other employer is obligated to pay as part of the cost of hiring employees in this State.

Furthermore, because of the way the provision was drafted, all reciprocals are excluded. As drafted, this means that the Timber Insurance Exchange, which is a private commercial reciprocal insurer owned and operated by the loggers, would also be exempted from supporting the assigned risk pool. I believe this was not intended but is the result of an error in drafting.

RECOMMENDATION

Section 1 of the proposed bill be stricken in its entirety.

ALLOWABLE FUNDING

[Section 2 AS21.75.050 (c) - HB #308 Page 1, Line 15 - 21]

This provision allows only those reciprocals which are formed by two or more muncipalities to post a bond in lieu of otherwise admissible assets to capitalize the reciprocal insurer. Frankly, we believe that places the municipalities in the position of establishing an insurance company with little or none of the capital requirements imposed upon any other commercial insurer and is to that degree inequitable. On the other hand, we recognize that municipalities

have a certain financial capability because of their taxing authority which other commercial employers do not have, and therefore, though we would prefer not to see the statutes drafted with authority to post a bond in lieu of cash, will not object to the bill on that ground alone.

On the other hand, there are two amendments that need to be made to this section in order to limit the authority to the specific concessions intended by the legislature:

A. Arguably, a reciprocal could be formed by two or more municipalities and then insure non-municipalities as part of their business operations. Such ought not to be permitted, thus, I would urge the following recommended amendment; and

B. The bond should be permitted only for the initial capital and not for any of its reserves or surplus.

To meet these points, I would urge the following change in language:

> "A domestic reciprocal insurer formed under this chapter by and insuring only, two or more municipalities shall (1) comply with (a) of this section or post a bond for an amount equal to the capital that would be required of a domestic stock insurer writing the same lines of insurance for which the reciprocal insurer seeks to be authorized, and (2) maintain a surplus in admitted assets of $250,000 or a surplus sufficient to operate the reciprocal insurer for one year, whichever is greater." [Emphasis on language to be added.]

EXEMPTION OF PUBLIC UTILITIES FROM GUARANTEE ASSOCIATION.

[Section 5 AS21.80.180 (5) - Page 2, Line 6 and Section 6 AS21.80.180 (6) - Page 2, Line 14.]

These sections deal with the Guarantee Association, which is a facility established by Alaskan law to protect workers whose employer has acquired workers' compensation insurance from an insurance facility which ultimately becomes insolvent. The protection is provided through the Guarantee Association's ability to assess all other workers' compensation insurers doing business in the State pro-rata to their workers' compensation insurance writings to provide the funds necessary to pay the claims of the insolvent insurer.

The are two sections in that law referred to in the bill define:

A. Which insurers are protected by the Insolvency Fund and,

B. Which insurers must contribute to the assessment in the event another insurer becomes insolvent.

We pointed out to the Senate Labor and Commerce Committee that either the municipal insurer must be included both as a contributor to the assessment and be protected by the Guarantee Association or excluded from both of those. The Labor and Commerce Committee agreed and elected to exclude the municipality from both the assessability and coverage provisions of the Guarantee Association. We support their choice in this regard, however, in creating the exclusion from the application of the Guarantee Association for reciprocals formed by municipalities they added reciprocals formed by public utilities.

We absolutely oppose the exclusion of a reciprocal formed by any commercial enterprise from the obligation imposed upon any other commercial insurer doing business in the State. There is no reason why a business which is operating in this State owned by stockholders who have formed a company for profit, should be excluded from sharing in the obligations that all other corporations formed for profit are obligated to support. All the insured employers of any other commercial insurer indirectly contribute to the Guarantee Association assessment by virtue of that cost being loaded into their premium. It creates a lack of competitive parity when a reciprocal can be formed by a specially defined group and be excluded from having to share in that cost.

RECOMMENDATION

We would propose that the language "or public utilites" be stricken from both line 6 and line 14 of page 2 of the bill.

As a further matter of clarity, on line 5 and line 14 the language should be modified so that it reads as follows:

"Reciprocal insuer formed by and insuring only municipalities."

We would appreciate your favorable consideration of these recommendations.

Yours cordially,

Richard Block
President

Re: House Bill 308

Introductory Analysis

HB308 is the same bill as CSSB66(L&C). SB66 was introduced by the Governor and modified by the Senate Labor and Commerce Committee after public hearings and testimony. The bill is an attempt to allow municipalities and smaller employers to group together for the purpose of workers compensation and take advantage of the concept of "self-insurance". At the same time HB308 is designed to protect the workers and the public from any potential problems of inadequate reserves or improper management by the groups utilizing this approach to providing workers compensation. The present law allows for larger employer to become self-insured for the purpose of workers compensation if they meet the criteria established by the Workers Compensation Board. Smaller employers or a large employer and a number of smaller employers cannot band together and become "group self-insured" under the current law.

The concept of group self-insurance sounds good, but there are problems with it in practice. First, there is the

very real potential that one major accident could bankrupt a number of companies and that, even then, there would be inadequate resources to settle the claims of the injured worker(s) and/or their next of kin. Second, in industries like construction, which are highly competitive and require bidding against one another, if the group excluded any one individual company there is the potential claim of restraint of trade and price fixing. The group could use the workers compensation coverage as leverage against member companies for purposes not related to the insurance or even legal. Third, insurance companies object that group self-insurance allows individual companies to open an insurance company without being subject to any of the regulations, reporting, maintenance of proper reserves and excess insurance.

There is some merit in each of these arguments. The purpose of workers compensation is to provide absolute immunity to the employer from a civil suit for negligence by providing compensation (without requiring proof of negligence) to an employee injured on the job. HB308 attempts to balance the needs of the various interested parties and allow municipalities and smaller employers to take advantage of cost savings without disrupting the framework of the workers compensation system.

The major provision of HB308 is found in the change in Section 3 where the number of persons required to form a reciprocal insurance company becomes 2 instead of 25. The effect is to allow smaller employers to band together and form their own insurnace company for the purpose of workers compensation. The protection to the public, workers, and insurance industry is that they must become, in fact, a bona fide insurance company subject to the same laws, rules, and regulations that all other insurance companies must follow. This address the three objections cited above and would also provide for the reporting of accidents to national rating agencies so that proper statistics would be kept.

In addition, there is a trade off in Section 1 in that these reciprocals would be exempt from participating in the assigned risk pool. This is a compromise. The insurance companies feel that since these persons are in competition with them as an insurance company they should take some of the high risk or bad experience companies. On the other hand, the companies feel that they are not in the business to make a profit and do not hold themselves out to the general public. They believe that they are only trying to cut the cost of workers compensation and can best accomplish their goals by providing their own safety programs and administering their own claims.

The sections of HB308 which deal with municipalities recognize the constitutional provisions allowing for cooperation between local governments. It is also felt that, while they are required to comply with the provisions of being a reciprocal insurer, they can best meet their public responsibilities by posting a bond rather that the required reserves applicable to the private sector.

Finally, passage of HB308 would solve a court case that is in litigation over the issuance of a group self-insurance certificate by the Worker's Compensation Board. When it was pointed out to the Board that there was no authority at law for them to issue a group self-insurance certificate, they cancelled the one they had issued. The group has continued to operate as a group self-insured and the matter is now in court. HB308 would solve the underlying problem and give all parties an acceptable solution. There would be no group self-insured and the current group would immediately qualify (there has never been a question about, or problem with, the performance of the particular group-only the issuance of the certificate) as a reciprocal insurer so they could continue to provide the service.

SUBJECT: Comparison Tables for 80% of Net Spendable vs. Current Schedule of Workers Compensation

From: Elfrieda Mullin, Labor Economist
Research and Analysis

Attached are tables comparing 80 percent of spendable wage and the current schedule of weekly worker's compensation. These tables are quite similar to the ones we provided you last year except that we have used the new table of payroll deductions for income tax. The payroll deductions are in effect only until July 1, 1983. At that time further reductions in the payroll tax will occur.

Last year's comparison used 80 percent of spendable as was provided in HB 159. Since that law had a minimum of $110 and provided for 100% of spendable wages when weekly wages were less than $110, you will notice a significant difference at the low range. We have just observed the 80% of spendable declaration in this year's comparison.

These tables do not take into consideration the Alaska U.I. tax in calculating spendable wage (50 cents per $100 in payroll this year). Additionally, the lack of state income tax in Alaska put spendable wages higher in Alaska than would occur in states with income tax laws.

Compared to last year the spendable wage formula is slightly improved in relation to the comparable compensation for that gross wage under the current law. The low ranges of earnings would receive greater compensation under the spendable wage formula, particularly those with several dependents. On the other hand, the cost to insurance companies would be reduced since high wage earners would receive less than they currently do.

With the absence of state income tax and the reducing federal income taxes a person is less likely to be receiving more in Workers Compensation under the current law than in take home pay, however, it still can occur. Note that a single person with no dependents earning $800 a week or more would receive more in workers compensation than in normal take home pay. (These tables assume standard deduction. In actuality, higher wage earners tend to used itemized deductions and may use additional "dependents" to prevent having too much deducted from wages.)

Using the spendable wage formula would make it difficult for any claimant to be eligible for the maximum of $996. Continuing the attached tables, a single with no dependents would have to have weekly wages of $2,065.54 in order to receive the maximum. A married claimant with two children would have to have weekly wages of $1,966.79. Under the current program the maximum can be reached by any individual earning $1,494 per week.

Attachments

COLUMN NUMBER	HEADING	DESCRIPTION
1	AVERAGE WEEKLY WAGE	Self explanatory
2	FICA	The FICA tax rate for 1983 is 6.7%. The maximum taxable wage is $35,700, however, no adjustments are made for this maximum in these tables.
3	TAXABLE WAGE	This is the average weekly wage in column 1 reduced by $19.23 times the total number of dependents applicable. The amount $19.23 is $1,000/52 (the annual exemption per dependent).
4	1983 TAX DEDUCTION	This column is the amount of Federal income tax an employer will deduct in 1983 (first six months) using the Federal Percentage Method for weekly payroll. The Internal Revenue Service provides specific instructions in Circular E - Employer's Tax Guide - Publication 15. The rates used are in effect until July 1, 1983.
5	SPENDABLE INCOME	This is the Average Weekly Wage in column 1 reduced by FICA and the 1983 tax deduction.
6	80% of SPENDABLE WAGE	Self explanatory.
7	CURRENT LAW	Current law provides that the claimant receive compensation in the amount of two/thirds of his average weekly wage up to a maximum of twice the state average weekly wage ($498 x 2 = 996).
8	80% of SPENDABLE WAGE AS % of CURRENT	Self explanatory.

JUSTIFICATION

The permanent half-time Data Control Clerk I position will provide additional clerical support in the Claims Section to enter and maintain data in the Division's information handling system. This position will handle the increased workload caused by the additional data input necessary for the system to monitor the compensation rate using withholding and average weekly wage information, and the maintenance of two processing systems concurrently.

Bill No. HB 311

Title "An Act relating to Workers' Compensation; and providing for an effective date."

Date April 13, 1983

Contact: J. L. McClintock
465-2790

The Department of Labor and the Alaska Workers' Compensation Board support the provisions of HB 311. This bill is the result of an agreement reached by a committee representing labor and employers in the state and reflects over three years of hearings in which testimony was provided by workers, labor groups, employers, insurers, rehabilitation and medical providers, attorneys and state agency personnel. The Workers' Compensation Board and Division worked very closely with the committee in recommending amendments that provide for a more equitable and efficient workers' compensation system for employees and employers.

The major portions of the bill will result in a redistribution of benefits which will reduce disencentives to return to work and provide long term reductions in workers' compensation costs. This is based on increases in scheduled permanent partial disabilities, the minimum compensation rate, death benefits and new methods to compute gross weekly earnings.

April 19, 1983

Honorable Walter Furnace
Chairman, Labor & Commerce Committee
Alaska State House
Pouch V
Juneau, AK 99811

Re: HB 311

Dear Representative Furnace:

This letter is written on behalf of the American Insurance Association, a trade association of casualty and property insurers. Some of the Association's members write a substantial amount of workers' compensation insurance in Alaska.

As you know, HB 311 represents the culmination of substantial effort by representatives of employers, labor organizations, and insurers, with input from the Division of Workers' Compensation over the past two years or more. It is an important attempt to make the workers' compensation delivery system more efficient and cost effective. The AIA supports the bill and applauds the cooperative effort that went into producing it.

One of the key provisions of the bill, the change to benefit calculations based upon net spendable income, was one of the nineteen major recommendations of the National Commission in 1971. Most of the other recommendations of that commission were implemented in Alaska in 1975. The net spendable income idea is an important one, because it tends to deliver more compensation to those who need it most, and less to those who are presently overcompensated. By avoiding the possibility of paying a high-wage employee as much or more in compensation as his or her take-home pay, the new law would tend to bring those workers back to work.

The members of the Workers Compensation Committee of Alaska and others will be available to explain the sources and intended purpose of the various sections of the bill. We stand ready to try to answer any questions you may have.

The American Insurance Association urges favorable action on this bill.

Very truly yours,

Michael T. Thomas

MTT/gf

HB311

SECTION BY SECTION ANALYSIS

Section 1. This section increases the minimum compensation from $65 to $110 per week and reflects changes necessary because of the reenactment of AS 23.30.220 found in section 10 which makes the spendable weekly wage of an employee the basis of compensation.

Section 2. and 3. See comments to Section 1.

Section 4. This section changes the manner of determining compensation consistent with the repeal and reenactment of AS 23.30.220 found in section 11 which makes the employee's spendable weekly wage the basis for determining compensation.

Eighty percent of the employee's spendable weekly wage minimizes the possibility of an employee receiving more in workers' compensation than his take home pay while working. The change is consistent with recommendations of the 1972 Report of the National Commission on State Workers' Compensation Law which states at page 19:

> The decision fixing the proportion of lost wages to be replaced must balance incentives to employers to improve safety within incentives to the disabled to take full advantage of rehabilitation services and to return to work.
>
> We recommend that cash benefits for [disability compensation] be at least two-thirds of the worker's gross weekly wage. The two-thirds formulation should be used only on a transitional basis until the State adopts a provision making payments at least 80 percent of the workers' spendable weekly earnings.

Section 5. See comments to section 4.

Section 6. See comments to section 4.

Additionally, this section provides for inflationary increases in the maximum paid for "scheduled" and permanent partial disabilities.

Section 7. See comments to section 4.

Section 8. This section reflects changes consistent with the repeal and reenactment of AS 23.30.220 found in section 11.

Section 9. See comments to section 4.

Additionally, this section provides for inflationary increases in funeral expenses on death claims. The current limit for reasonable and necessary funeral expenses are not adequate and result

in a hardship to the family of the deceased or the employer for payment of the additional costs.

Section 10. This section reflects changes consistent with the repeal and reenactment of AS 23.30.220 found in section 11. Additionally, the minimum weekly compensation for a widow or widower is increased from $45 to $75 per week.

Section 11. This section adopts a new basis for computing compensation known as the "spendable weekly wage". The spendable weekly wage is the employee's gross weekly earnings, minus payroll tax deductions, which are defined in section 13. The change is consistent with the 1972 report of the National Commission on State Workers' Compensation Laws.

It is an administratively feasible procedure which can simultaneously take into account the difference between gross and spendable earnings, the virtues of dependents' allowances and the impact of the progressive income tax. This procedure first determines the worker's gross earnings prior to disability (which must be determined under the present Act) and the number of his dependents. The gross earnings and dependency data are then inserted into a formula prepared and published by the Department of Labor to determine the worker's spendable earnings. Once spendable earnings are calculated, workers' compensation benefits for all sizes of families can be calculated as a fixed proportion of spendable weekly earnings. No further allowances for dependents for tax considerations are necessary or appropriate.

This section also adopts a new basis for determining the gross earnings of an injured worker. An injured worker's gross weekly earnings are computed by dividing by 100 the gross earnings of the employee in the two calendar years immediately preceding the injury. Utilizing the preceding two years tends to eliminate the cyclical nature of many industries. Dividing by 100 instead of 104 tends to adjust previous years' earnings for inflation. This section also allows the Board to adjust the average weekly wage calculation if it is unfair to the employee or employer.

Section 12. This section reflects changes consistent with the repeal and reenactment of AS 23.30.220 found in section 11.

Section 13. This section provides for new definitions.

"Gross earnings" includes payments before any authorized or lawfully required deduction such as credit union, dues check off, social security, federal withholding, or deferred compensation which is optional to the employee at the time of his injury. Specifically, deferred compensation which is optional at the time of injury refers to those employees of government and non-profit corporations and associations which may elect to defer income from a particular pay period or pay periods but have the option of terminating the deferral of that income at any time during their employment. Excluded from gross earnings are irregular bonuses, reimbursement of expenses, expense allowances and any benefits not taxable to the employee during the pay period. "Any

benefit not taxable to the employee during the pay period" would include the general items referred to as "fringe benefits" such as: payments providing for health, welfare, retirement, vacation or annual leave and other similar benefits received by the employee for which he is not taxed other than deferred compensation which is optional to the employee at the time of this injury.

The value of room and board may be considered in gross earnings only for those injured workers whose gross weekly earnings otherwise computed are less than the Alaska average weekly wage at the time of injury. The value of room and board may be included only to raise the gross weekly earnings up to the level of the Alaska average weekly wage. The value of room and board that would raise an employee's gross weekly earnings above the Alaska average weekly wage is excluded.

"Payroll taxes" are defined to exclude the amount that would be withheld from an employee's gross weekly earnings under the Internal Revenue code as though he had claimed the maximum number of dependents per actual dependency, blindness, and old age. Also deducted is the amount of earnings subject to the Social Security Act irrespective of whether the employee may have paid the maximum Social Security for the year at the time the injury occurs.

Section 14. This section repeals provisions that are unnecessary or inconsistent with proposed legislation.

Section 15. This section provides that the Act apply only to injuries sustained after the effective date of this Act.

Section 16. This section provides that the Act takes effect January 1, 1984.

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 319

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Municipal Bond Bank Authority; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.25.110(12) is amended to read:

(12) the executive secretary [AND LEGAL COUNSEL] of the Alaska Municipal Bond Bank Authority;

* Sec. 2. AS 39.25.120 is amended by adding a new paragraph to read:

(19) employees and agents, other than the executive secretary, of the Alaska Municipal Bond Bank Authority.

* Sec. 3. AS 44.85.040 is amended to read:

Sec. 44.85.040. OFFICERS, [AND] QUORUM, AND MEETINGS. (a) The directors shall elect one of their number as chairman. The directors shall elect a secretary and a treasurer who need not be directors, and the same person may be elected to serve both as secretary and treasurer. The powers of the bond bank authority are vested in the directors, and three directors of the bond bank authority constitute a quorum. Action may be taken and motions and resolutions adopted by the bond bank authority at any meeting by the affirmative vote of at least three directors. A vacancy in the directorship of the bond bank authority does not impair the right of a quorum to exercise all the powers and perform all the duties of the bond bank authority.

(b) The bond bank authority may meet and transact business by an electronic medium if (1) public notice of the time and locations where the meeting will be held by an electronic medium has been given in the

same manner as if the meeting were held in a single location; (2) participants and members of the public in attendance can hear and have the same right to participate in the meeting as if the meeting were conducted in person; and (3) copies of pertinent reference materials, statutes, regulations, and audio-visual materials are reasonably available to participants and to the public. A meeting by an electronic medium as provided in this subsection has the same legal effect as a meeting in person.

* Sec. 4. AS 44.85.070 is amended to read:

Sec. 44.85.070. STAFF. The bond bank authority shall employ an executive secretary who may with the approval of the bond bank authority select and employ additional staff as necessary. Employees and agents of the bond bank authority other than [LEGAL COUNSEL AND] the executive secretary are in the partially exempt [CLASSIFIED] service under AS 39.25. In addition to its staff of regular employees, the bond bank authority may contract for and engage the services of the bond counsel, consultants, experts, and financial advisors the bond bank authority considers necessary for the purpose of developing information, or conducting studies, investigations, hearings or other proceedings.

* Sec. 5. AS 44.85.100(b) is amended to read:

(b) The bond bank authority shall include in the report required by (a) of this section an estimate of the amount of revenue bonds of the bond bank authority to be issued during the fiscal year following the fiscal year in which the report is submitted [12-month period]. The bond bank authority may not issue revenue bonds, other than refunding bonds during any fiscal year [12 month period] beginning after June 30, 1981, unless the legislature, by law, approves the estimate required by this subsection for that fiscal year [12-month period].

* Sec. 6. AS 44.85.180(c) is amended to read:

(c) Notwithstanding the provisions of (a) and (b) of this section, the total amount of bond bank authority bonds and notes outstanding at any one time, except bonds or notes issued to fund or refund bonds or notes, may not exceed <u>$200,000,000</u> [$150,000,000].

* Sec. 7. This Act takes effect immediately in accordance with AS 01.-10.070(c).

BILL SHEFFIELD
GOVERNOR

HB 319

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 31, 1983

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the Alaska Municipal Bond Bank Authority.

The bill amends AS 39.25.110(12), 39.25.120 and AS 44.85 by deleting the words "legal counsel" and moving the authority's employees, other than the executive secretary (who is in the exempt service, under AS 39.25.110(12)), from the classified service to the partially exempt service (secs. 1, 2, and 4 of the bill), authorizing the authority to hold meetings by an electronic medium (sec. 3), and increasing bonding authorization from $150,000,000 to $200,000,000 (sec. 6).

AS 44.85.100(b) currently requires an estimate of the amount of bonds to be issued for the "following 12-month period." The amendment to that section, in sec. 5 of the bill, makes it clear that the estimate is for the fiscal year following the fiscal year in which the estimate is submitted and not for the 12-month period following the submission of the estimate.

Section 6 of the bill increases the limit on the total amount of outstanding bonds and notes from $150,000,000 to $200,000,000. The authority currently has only $18,000,000 left under its present statutory limitation, and it estimates that at least $60,000,000 worth of issues are now being developed. The increase to a $200,000,000 limit would allow the authority to operate for at least another year without the necessity for an additional adjustment to the statutory limit.

Sincerely,

Bill Sheffield
Governor

HB 319

IV. ANALYSIS:

Page 272

Additional increase in bonding authority from $150 million to $200 million in Section 6 will require an appropriation for funds leveraging. Ten percent of the FY 84 borrowings must be backed up by leveraging reserves. A $30 million bond sale program will require $3.0 million in appropriations.

We have asked for $3.0 million in the Governor's Capital Budget to provide the reserve account for the $30.0 million worth of bonds.

Re: House Bill 319

Introductory Analysis

House Bill 319 was introduced by the Governor and relates to the Muncicipal Bond Bank. The bill increases the bonding authorization by $50 million to $200 million, allow meetings to be conducted electronically, clarify reporting, and placing the employees of the authority in the partially exempt service.

*Section 1 of the bill deletes the words AND LEGAL COUNSEL from the current law. This means that if the authority were to hire (as staff) legal counsel that they would not be in the exempt service, but would be in the partially exempt service of the State Personnel Act.

*Section 2 of the bill places the employees in the partially exempt service.

*Section 3 of the bill provides a new section, AS 44.85.040 (b) which would allow the authority to meet and transact business by an electronic medium. This method of conducting meetings has been used by other agencies,

including Legislative Council, and potentially could be a cost effective and timely method of conducting meetings.

*Section 4 of the bill relates to staff. Last year, the authority requested to have these employee classifications placed in the partially exempt service through HB694. The testimony of the authority was that there were only employees of the authority (executive director and executive secretary) and there was no anticipation by the authority of hiring more employees in the next year. Legal work, financial advising, etc. was all done on contract and the authority was planning on continuing this method.

The legislature did not place the employee classifications in the partially exempt service for three main reasons. First, if employees are performing work which is of a nature to legitimately place them in the partially exempt service there is a mechanism for classifying them partially exempt under AS 39.25.130. Article XII, Section 7 of the Alaska Constitution requires the state to have a personnel system based on merit. Second, in view of declining state revenues, it was felt the authority should not, or have the potential to, become political in nature and scope. It was perceived that if all employees served at the pleasure of the Governor, then <u>all</u> employees would report, analyze, recommend, and testify consistent with the Governor's <u>policy</u> rather than on a sound fiduciary basis. The potential was that if the fiscal experts under contract made recommendations or advised action contrary to the Governor's policy, they could be replaced by in-house employees who serve at the pleasure of the Governor. Third, since there were no employees in these classifications and no stated intent to hire any, the legislature did not want to encourage additions to the bureauacracy, especially by providing positions which could be filled by political patronage.

*Section 5 of the bill is clarifying language which makes it clear that the estimate contained in the required report is for the following fiscal year.

*Section 6 of the bill increases the limit on the total of outstanding bonds and notes to $200,000,000 from $150,000,000.

Re: Application of Little Davis-Bacon Act (AS 36.05) to designated grants
Our file: 366-267-83

Dear Representative Adams:

You have requested our opinion whether construction contracts made by non-governmental entities which are financed by state-funded grants are subject to the provisions of the Little Davis-Bacon Act (AS 36.05) regarding payment of prevailing wages to employees working on public construction. You cite examples of grants made for a day care center, a "human services complex," and a public works facility. These grants were made by appropriations in which the grantees were specifically designated. In each case the grantee is a private non-profit corporation.

The grants to which you refer are commonly known as designated grants and are governed by the provisions of AS 37.05.316 (Grants to Named Recipients). Another category of designated grant which is used to construct capital improvements in unincorporated communities is an Unincorporated Community Grant under AS 37.05.317. Because an unincorporated community is not a legal entity and therefore lacks the capacity to receive and administer a grant of public funds, AS 37.05.317(2) authorizes the Department of Community and Regional Affairs to make the grant to a private non-profit corporation or federally recognized tribal council which is representative of the unincorporated community. We recently expressed our view that construction contracted out by such an organization for an unincorporated community with grant funds provided by the state under AS 37.05.317 is subject to the provisions of the Little Davis-Bacon Act. 1982 Inf. Op.

03-C5LH

Att'y Gen. (October 5) 1/ A third category of grants, Grants to Municipalities under AS 37.05.315, provides state funds for a variety of local projects and activities directly to established political subdivisions of the state. The requirements of Little Davis-Bacon clearly apply to construction projects contracted out under those grants.

You now ask whether construction contracted out by non-governmental entities with grants made under AS 37.05.316 are also subject to that Act. We conclude that the answer to your question will depend upon the nature of the particular project being carried out by the grantee. If the project or improvement involves the undertaking or provision of traditional government facilities, services, or activities it is covered by the Act, despite the non-governmental status of the entity contracting out the work. However, if the work contracted out is not like that traditionally carried out or provided by government, it is not covered by Little Davis-Bacon. In order to define the line between those projects covered by the Act and those which are not, we recommend the adoption by the Department of Labor of regulations setting out the standards applicable to determining whether projects undertaken by affected grantees will be considered as covered or non-covered. By adopting regulations the department will put those entities on notice of their potential obligations under the Act and help assure uniform and consistent determinations of coverage or non-coverage. Our reasoning follows.

The fundamental requirement of the Little Davis-Bacon Act is set out in AS 36.05.010 which provides, in pertinent part, as follows:

> Sec. 36.05.010. WAGE RATES ON PUBLIC CONSTRUCTION. A contractor or subcontractor who performs work on public construction in the state, as defined by AS 36.95.010(3), shall pay not less than the current prevailing wages for work of a similar nature in the region in which the work is done.

1/ We note that our October 5, 1982 opinion incorrectly referred to grants made under AS 37.05.315, which deals with grants to organized municipalities. This was obviously a typographical error as the problem which it addressed involved an Unincorporated Community Grant, which is covered by AS 37.05.317.

"Public construction" is defined in AS 36.95.010(3) as follows:

> (3) "public construction" or "public works" means the on-site field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, highways or other improvements to real property under contract for the state, a political subdivision of the state, or a regional school board with respect to an educational facility under AS 14.08.161;

The answer to your question essentially revolves around whether work carried out with public funds by a designated grantee is "public construction" within the meaning and purpose of the Little Davis-Bacon Act. This is a question which has yet to be addressed by the Alaska courts and, while we believe the courts would follow the analysis which we apply here, we obviously cannot guarantee that our view will ultimately be adopted by them. 2/

In 1982, the Alaska Supreme Court adopted an expansive view of the concept of "public construction" under Little Davis-Bacon. City and Borough of Sitka v. Construction and General Laborers Local 942, 644 P.2d 227 (Alaska 1982). In the Sitka decision, the court expressly stated that "[t]he fundamental purpose of Little Davis-Bacon is to assure that employees engaged in public construction receive at least the prevailing wage." It went on to emphasize that "[t]he focus of the act, quite clearly, is to the benefit of the employees, not the contracting principals." Sitka, 644 P2d at 232.

2/ It is particularly important to keep in mind that our view may or may not be adopted by the courts where, as here, the statutes with which we deal create certain rights and obligations on non-governmental third parties (e.g., contractors and workers) which, unlike state agencies, are not bound to adhere to the advice of the Attorney General. That precise situation arose in City and Borough of Sitka v. Construction and General Laborers Local 942, 644 P.2d 227 (Alaska 1982) where the Alaska Supreme Court expressly rejected an earlier written determination by the Attorney General's Office that the Act did not apply to the facts of that case.

In deciding that the contract at issue in Sitka was subject to Little Davis-Bacon, the Supreme Court expressly rejected the argument that it was not covered because it was not in the form of a traditional construction contract. The City of Sitka had argued that the contract should be viewed in isolation as a timber sale contract, unconnected with the contract for the construction of a dam, even though the timber to be sold and cleared under that contract was to be removed in order to make the site suitable for construction of the dam. The court refused to follow Sitka's argument, however, saying that to do so "unduly exalts form over substance." Sitka, 644 P2d at 232.

Similarly, we believe that the court would reject the application of rigid tests which would only inquire whether a particular project was owned by a governmental entity or whether the project was being carried out under contract with a governmental entity. 3/ Certainly, in most situations it is to be anticipated that a "public work" will be owned by a governmental entity. However, nothing in Little Davis-Bacon expressly requires governmental ownership of the project. While ownership may often be indicative of the "public" nature of a particular project, we do not believe it is necessarily determinative. Similarly, the Act is not limited to projects under contract with the state or a political subdivision. In fact, the statute, at AS 36.95.010(3) expressly defines "public construction" as projects under contract for the state or a political subdivision, indicating that the legislature clearly had in mind application of a broader test for Little Davis-Bacon coverage than a simple mechanical inquiry into the status of the contracting entity.

3/ A rigid application of strict rules for determining whether a project is "public construction" could afford the opportunity to circumvent or evade Little Davis-Bacon simply by funding construction of projects such as roads, fire halls, police stations, or school buildings through designated grants. We do not believe our Supreme Court would permit such a result. "'While the ingenuity of man is apparently limitless, the court has held with unvarying regularity that one may not do by indirection what is forbidden directly.'" Sheldon Jackson College v. State, 599 P.2d 127, 132 (Alaska 1979), quoting Wolman v. Essex, 342 F.Supp. 399, 415 (S.O. Ohio 1972).

As in the Sitka case, the test to be applied in determining whether a particular project is "public construction" subject to the provisions of the Act is a functional one which inquires into the nature of the project under contract and its relationship to the purposes of Little Davis-Bacon. We believe that test is one which looks, among other things, to the nature of the project itself to determine whether it is the kind of project or activity which is traditionally undertaken by government. If it is, and if public monies are utilized, the Act applies, irrespective of questions of "ownership" and contractor status.

We arrive at our conclusion based both on our reading of the Sitka case and because of the similar approach taken by the U.S. Department of Labor in applying the federal Davis-Bacon Act (40 U.S.C. § 276a, et seq.). The definition of "public building" or "public work" for purposes of the federal Act is set out at 29 CFR § 5.2(h) and provides, in pertinent part, as follows:

> (h) The term "public building" or "public work" includes building or work, the construction, prosecution, completion, or repair of which, as defined above, is carried on directly by authority of or with funds of a Federal agency to serve the interest of the general public regardless of whether title thereof is in a Federal agency.

The Alaska Supreme Court expressly stated in Sitka that, because Little Davis-Bacon is modeled after the federal Act and because the federal regulations implementing that Act were adopted before AS 36.95.010(3) defining "public construction" became law in 1972, it "will look to the federal regulations construing Davis-Bacon for assistance in interpreting Little Davis-Bacon." Sitka at 231, n.8.

The test which we have stated, while relatively simple to set out, may prove difficult to apply to some kinds of projects. Obviously, some projects such as roads, airports, sewers, municipal buildings and school buildings are traditionally governmental in nature. Others, such as construction of women's shelters, day care centers, and animal shelters, while serving a "public purpose", 4/ have probably not traditionally been con-

---

4/ Of course, any expenditure of state funds, whether through a governmental entity or a private organization must be made for a "public purpose." Article IX, sec. 6, Alaska Constitution.

structed by government. However, there will undoubtedly remain a "gray area" of projects which cannot be readily characterized as either governmental or non-governmental like health care facilities and power generation and distribution facilities. These kinds of projects are sometimes provided by government, sometimes by private entities, and sometimes by both in the very same community. In order to clarify the gray area and provide a basis for entities who receive designated grants and who may therefore be subject to Little Davis-Bacon to determine whether their project is subject to the requirements of the Act, we recommend to the Department of Labor, by copy of this letter to Commissioner Robison, that it adopt regulations setting out the kinds of tests or factors which it will apply in enforcing the Act. 5/ By doing so, that department will assure that designated grantees have notice of their potential obligations under Little Davis-Bacon and that determinations made by it are uniformly and consistently applied.

If you have any further questions regarding the scope of Little Davis-Bacon, please let us know.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

By: Ronald W. Lorensen
Deputy Attorney General

RWL:vrb

cc: Jim Robison
Commissioner
Department of Labor

5/ The Alaska Supreme Court expressly acknowledged Labor's authority, under AS 36.05.030, to determine whether a contract is subject to Little Davis-Bacon in Sitka at 229. The kinds of factors which might be applied could include, among others, ultimate ownership of the facility, who the intended operator and/or user will be, and who will bear the costs of operating and maintaining the facility.

RE: HB 331

Dear Representative Furnace:

The Alaska Chapter, Associated General Contractors of America, Inc., strongly supports the passage of HB 331. HB 331 clarifies existing law to assure that recipients of State public funds utilize procedures aimed at preserving the free enterprise system.

The proposed amendment to AS 37.05 is quite simple. Section (a) insures that recipients of public funds for the construction or repair of any public facility must advertise these projects and make an award to the lowest responsible bidder. Two unhealthy situations are avoided by utilizing competitive bids: (1) bias in the selection and award process and (2) force account work.

Bias or the appearance of bias in public contract awards should be avoided. The universally accepted method of assuring that no collusion exists between the contracting entity and the contractor is the competitive sealed bid process.

"Force Account" or "day labor" refers to public works construction done by a governmental body using public employees with equipment purchased or rented by that body, as opposed to a "hard dollar" contract.

Alaska Chapter, A.G.C., contends that the public interest is best served by the contract method of construction.

Private industry is ready and willing to provide the public sector with the services it needs, and will do so at a competitive price. Taxpayers will benefit from this healthy competition because their main interest is to save tax dollars, and to get the maximum return for every tax dollar invested. When government decides to produce its own goods and services, it not only prevents the private sector from earning government dollars, but it also denies itself revenue from the taxes private enterprise must pay.

The contract method of construction has numerous advantges. It establishes definite costs before construction begins; it prescribes a date for completion of the work; it ensures quality workmanship and material; and it provides centralized responsibility for the work.

The quality of workmanship and materials is guaranteed by the contract system. The materials which go into the project are prescribed in detail in the specifications and are subject to the approval of the owner. If, in the owner's opinion, the workmanship or the materials are not as specified, the owner can reject the work and order it redone at the contractor's expense.

It is also a practice of many owners to require that the contractor maintain the project in good condition for a period of time after completion. It is, therefore, to the contractor's economic interest -- and to the maintenance of his reputation -- that the quality of his work measure up to the prescribed standards.

Not only does the public receive higher quality construction projects when they are contracted out, but the public also receives more for its money. Through long experience, contractors become specialists in one or more particular fields of construction. They know their sources of supply; they know the capacity of their machines and the capability of their personnel. When preparing a bid, a contractor's competitive incentive requires that he give considerable thought to the problem of devising the best and most economical manner of doing the work. His specialized knowledge and experience obtained in the marketplace have been sharpened and are instrumental in saving the taxpayer money on the project.

The contract provides that the project be completed on a prescribed date. The contractor cannot receive final payment or the release of money that is retained while the work is progressing until the job has been completed and accepted -- all to the satisfaction of the owner. This factor, plus his own economic need to finish and get on to the next project, gives assurance to the public that the job will be completed on time and within contract price. Many times the contract (bid) price is lower than what the government expects to pay.

In addition to providing the most efficient and economical means of producing public works construction, contracting out provides a variety of other benefits to the public in the form of risk shifting, which cannot be obtained under in-house performance. Some of these risks which are allocated when construction is done by contract are:

- The public only pays for what it receives; work actually performed is the basis of payment.

- The price is firm and guaranteed by the contract, and the public has no risk of cost increases. All of the variables of the market place, such as increases in material prices, wages and shortages are borne by the private contractor.

- Timely completion is assured by a liquidated damage provision.

- Faithful performance is backed by performance and payment bonds.

- Risk of damage during construction is borne by the contractor, not the public.

- The contractor must "defend and hold harmless" the public against claims and must provide the public with insurance coverage.

- Quality inspection is at "arm's length" by independent inspectors.

- The final work is warranted and defects must be corrected at no expense to the public.

To take the risks away from the taxpayers and put them on a private contractor who, through his payment and performance bond, guarantees the job will be finished according to the terms of the contract, is worth a great deal in dollars. None of this protection of the public's interest exists when work is performed by a public agency with public equipment and personnel -- all of the risks are on the taxpayer.

Section (b) of HB 331 prohibits a recipient of State public funds from providing for preference to any local bidder unless that preference is established under AS 37.05.230(5). This provision eliminates local preference ordinances that provide preferences to contractors at the ity, city or borough level; however, a preference can be given to an bidders".

e above mentioned reasons, we urge your support of this Bill.

Sincerely,

POSITION PAPER

RE: HB 331

SPONSOR: House Labor and Commerce Committee

Program Effects of the Bill

This bill would make it mandatory that the recipients of all state grants for construction projects solicit bids for construction. It also allows those same recipients to give preference to in-state contractors.

Comments

The Department is concerned that this bill imposes a set of guidelines designed specifically for State Grants upon Municipal Government. In many cases these governments already have appropriate procedures in place.

Additionally, many municipalities currently use municipal employees on construction projects. This enables these municipalities to stretch State grant dollars. This bill would appear to prohibit that practice.

MEMORANDUM January 27, 1983

SUBJECT: Payment of overtime
(HB 338)

TO: House Labor and Commerce Committee
Attn: Ken Johnson

FROM: Thomas A. Sofo
Legislative Counsel

You have asked this office for an analysis of HB 338.

Section 1 of the bill adds a new paragraph to AS 23.10.060, the Alaska statute which addresses the payment for overtime in this state. The numbered paragraphs currently in AS 23.-10.060 contain exemptions for certain employees or types of work from the general overtime law that requires work in excess of 40 hours a week or 8 hours a day to be compensated at one and one-half times the regular rate of pay. HB 338 would add one more exception to the list by exempting work performed by an employee under a trade work plan. Although I am not completely familiar with how these plans work, it is my understanding that employees are able to trade hours, or possibly days worked with one another for their personal convenience. The trading of hours or days under the bill would require the approval of the employer so that work operations were not unnecessarily disrupted. The result of some of these informal "trades" might be that certain employees would be working more than 8 hours in a given day or more than 40 hours in a calendar work week. These extra work days or hours be balanced off by time off on other days or weeks when the subject employee wanted to maximize his nonwork time. In theory the total number of hours worked by two employees who normally work 40 hours a week would not be greater than 80 hours a week, although one of the employees in a given week might have worked 48 of those hours while the other employee with whom he has traded a work day may have worked only 32 hours. As the hypothetical illustrates, the application of this plan has the potential to make an employer liable for overtime payment in a given day or week

even though the cumulative hours worked by the employees involved would not otherwise subject the employer to overtime liability. It is for that reason that an exception to the overtime provisions of AS 23.10.060 was necessary.

This statute would apply to those employees covered by AS 23.10.060. Apparently, the Department of Labor has decided to oppose HB 338 based on their understanding that it was requested by a business identified as Seair. Although the backup material is somewhat confusing on this point, the department believes that this bill would be in violation of the federal Railway Labor Act while at the same time also apparently recognizing that Seair is not necessarily covered by that Act. Because of this confusion you have requested an opinion concerning the relationship of this amendment to the Railway Labor Act, 45 U.S.C. 151 - 188. A good treatment of that subject is contained in the Opinion of the Attorney General, No. 7, April 15, 1980 which is cited following AS 23.10.060. As the opinion states, federal statutes do not expressly preempt the state in the subject matter area of overtime pay for air transportation employees. The federal Fair Labor Standards Act 29 U.S.C. 201 - 219, exempts from the operation of the mandatory overtime provisions of that act air carrier employees subject to the provisions the Railway Labor Act. The question before the attorney general was whether Alaska could pose its own mandatory overtime provisions on employees who were otherwise exempt from the federal mandatory overtime provisions.

As the Alaska Supreme Court has already recognized, provisions of the Alaska Wage and Hour Act which are more favorable to employees than federal law are not preempted by the Fair Labor Standards Act. Webster v. Bechtel, Inc., 621 P.2d 890. However, since 42 U.S.C. 213(b)(3) explicitly exempted employees which were covered by the federal Railway Labor Act, a specific analysis of that Act is necessary. As to the extension of the Alaska mandatory overtime provisions to air transportation employees, I am in agreement with the conclusions reached by the Attorney General in the opinion cited above. Those conclusions are as follows:

> "1. In the case of pilots, flight crews, and other interstate air carrier employees whose activities are directly and substantially related to the transportation activities of the carrier, and who are covered by a valid existing collective bargaining agreement or

agreements with the carrier, the State is precluded from applying its overtime laws due to the preemptive nature of the Railway Labor Act.

"2. In instances where no collective bargaining agreements apply, crews of interestate air carriers are nonetheless beyond the jurisdiction of state overtime law because of the commerce clause implications discussed above.

"3. Non-flight personnel of interstate carriers who are not covered by valid existing collective bargaining agreements are not exempt from state law. As to those individuals the provisions of state overtime law apply.

"4. Air carriers operating solely intrastate would not seem to fall under the exclusionary scope of either the Railway Labor Act or of the Commerce Clause absent unusual fact situations. Accordingly, the protections of the Alaska Wage and Hour Act dealing with overtime extend to those individuals."

Based on the above analysis, certain air transportation employees would be covered by the Alaska law regarding the payment of overtime, as well as the exceptions to that law. Those persons would be ground employees of interstate carriers who are not covered by collective bargaining agreements and all employees of air carriers operating solely intrastate. However, there remains one important issue. Although the above analysis has identified the scope of coverage of the Alaska Wage and Hour Act as it pertains to certain air transportation employees, it has not addressed the basic issue of whether trade work programs are preempted by the federal Fair Labor Standards Act. The Fair Labor Standards Act only requires the payment of overtime for time worked in excess of 40 hours in a work week, 29 U.S.C. 207, while the Alaska statute requires overtime pay for time worked in excess of 40 hours a week or 8 hours a day. To the extent that the state has a higher minimum standard as to hours per day, it is free to tailor an exception to that standard based on trade work plans. However, if under a situation such as the hypothetical above, see page 2, the result of the trade work plan is that an employee works more than 40 hours in a given week without receiving overtime, the plan would violate the federal law as to those workers covered by the federal statute. Guaranteed weekly pay and fluctuating work week plans must meet the standards set

forth in the federal statute and are inapplicable in this instance. 29 C.F.R. 402-778.414 and 29 C.F.R 778.114.

The trade work plan is not preempted by federal law if in its application certain employees work more than 8 hours in a day. The plan is possibly preempted by federal law only to the extent certain employees might work more than 40 hours in a given week without receiving overtime compensation for those hours in excess of 40.

Bill No. House Bill 338

Date January 27, 1984

Title "An Act relating to the payment of overtime; and providing for an effective date."

Contact: Eileen Plate
465-2700
Bob Bacolas
465-4870

This legislation amends the law relating to the payment of overtime to exclude work performed by an employee under a trade work plan from the law requiring the payment of overtime for more than 40 hours of work a week. A trade work plan allows an employee to trade hours or days worked with another employee with the approval of the employer.

This bill does not take into consideration a number of factors. One of the basic principles of premium pay for overtime is to inhibit employees from working excess hours. The federal government, in order to set the standard, enforces the Safety Law, the Eight Hour Law, and the Workweek Law on all government contracts whether they be for construction, service, or manufacturing. These laws are intended to deter the employer from attempting to circumvent the laws designed to protect the employees' rights to healthy and profitable employment.

Even if this law were passed, any employer who attempted to practice a "trade work plan" would find himself in violation of federal law the first time an employee worked more than forty hours in one week, unless overtime were paid or otherwise exempted. If this legislation is intended to permit employees to trade shifts or workdays in the fashion of let's say, "I'll work for you on Tuesday, which is my day off, if you will work for me on Monday, which is your day off," then there is no need for such legislation. If, however, the intent is to allow me to work your shift for you after I have already worked mine on any given day of the week, then we have a situation where an employer can use any number of forms of economic leverage to make an employee work beyond the statutorily permitted number of hours, to the determent of the employee while enriching the employer. Keep in mind that the basic philosophy of the overtime law was to penalize the employer each time he permitted an employee to work past the regular workday or workweek.

Such a scheme has long been recognized as generally detrimental to the work force. The overtime laws were intended as a remedial labor legislation specifically to preclude such schemes in the workplace.

The department is opposed to this legislation. A zero fiscal note has been prepared.

Jeri Robinson
Commissioner

POSITION PAPER/Department of Labor

OPINION NO. 7

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL

420 "L" STREET, SUITE 300
ANCHORAGE, ALASKA 99501
(907) 276-3550

April 15, 1980

The Honorable Edmund Orbeck
Commissioner
Department of Labor
P.O. Box 1149
Juneau, AK 99811

Re: Enforcement of Alaska Overtime Laws with Respect to Air Carriers in Alaska
AS 23.10.060
A66-102-80

Dear Commissioner Orbeck:

You have inquired whether the Department of Labor may enforce the mandatory overtime provision of the Alaska Wage and Hour Act (AS 23.10.060-150) with respect to employees of air carriers operating within the State of Alaska. The answer to your question depends upon the nature of the employer's business, the nature of work performed by the individual employee, the existence or nonexistence of a valid collective bargaining agreement between the employer and its employees, whether the air carrier operates intrastate or interstate, and finally, whether the application of state law would create a burden upon interstate commerce.1/

1/ Specifically not addressed in this memorandum is the question of whether by the use of "flex-time contracts", an employer may avoid the mandatory payment of overtime to those employees who work irregular weekly or daily hours. That issue is currently before the Supreme Court of Alaska in the case of State of Alaska v. Bechtel, Inc., Supreme Court No. 4139. See also, Attorney General's Opinion dated February 10, 1978.

I

THE RELATIONSHIP BETWEEN THE FEDERAL FAIR LABOR STANDARDS ACT AND THE ALASKA WAGE AND HOUR ACT

The Federal Fair Labor Standards Act of 1938, 29 U.S.C. §§ 201-219, specifically exempts from the operation of the mandatory overtime provision (§ 207) "any employee of a carrier by air subject to the provisions of §§ 181-188 of Title 45" 29 U.S.C. § 213(b)(3). The Alaska Wage and Hour Act, AS 23.10.050 et seq. contains no such exemption.2/

In passing the Fair Labor Standards Act Congress did not intend to foreclose all attempts by the individual states to regulate wages and hours. The Act itself states that none of its maximum hours provisions operates to excuse noncompliance by employers with any state law which establishes a higher standard. It is only where the standards set by the FLSA are higher than the comparative state standards that the Act serves to preempt the state activity. H.R. Rep. No. 2182 at 15 (75th Cong.). See also Eastern Sugar Associates v. Pena, 222 F.2d 934 (1st Cir. 1955); Rivera v. Div. of Industrial Welfare, 71 Cal. Rptr. 739 (1968); 29 C.F.R. § 778.5. Thus, merely because the federal law exempts airline employees

---

2/ The Alaska Act, which is based upon the Federal Fair Labor Standards Act, McGinnis v. Stevens, 543 P.2d 1221, 1238 (Alaska 1975), originally contained the airline exemption. (Sec. 3, ch. 171 SLA 1959.) However, the Act was amended in 1970 to eliminate that exemption. (Sec. 1, ch. 243 SLA 1970, effective October 31, 1970.)

from mandatory overtime entitlement, it does not follow automatically that the state law must do likewise. Here, the State seeks to compel air carriers to pay overtime to those employees who have worked in excess of eight hours per day or 40 hours per week. Clearly, the State act has set a standard which is considerably higher than the comparative federal provision since the federal law does not contain an eight hour work day limitation.

Accordingly, in light of the authority recited above, and consistent with the State of Alaska's current position in State of Alaska v. Bechtel, Inc. Supreme Court No. 4139, presently pending before the Alaska Supreme Court, we feel that the Fair Labor Standards Act does not expressly preempt the Alaska Wage and Hour Act on the question of whether airline employees are excluded from the mandatory overtime directive of AS 23.10.060. A substantial question remains, however, as to whether the State Act has been nonetheless preempted through enactment and operation of the Federal Railway Labor Act, 45 U.S.C. §§ 151-188.

II

THE RELATIONSHIP OF THE RAILWAY LABOR ACT TO THE ALASKA WAGE AND HOUR ACT

There are two conflicting lines of reasoning concerning the impact of the Railway Labor Act upon attempted state regulation of wages and hours in industries subject

Railroad Co., 372 U.S. 284 (1963); Baltimore & Ohio Railroad Co. v. Commonwealth of Pennsylvania, 334 A.2d 636 (Pa. 1975), app. dism'd for want of subs. fed. ques., 423 U.S. 806 (1975); Gibbons v. Kansas City Southern Railway Co., 34 CCH Labor Cases, ¶ 71,276, 100 So.2d 319 (La. 1957).

In 1957, the United States Supreme Court had occasion to again examine the relationship between the Railway Labor Act and the regulation by states of working conditions in affected industries. California v. Taylor, 353 U.S. 553 (1957) involved the question of whether the Railway Labor Act operated to require that the terms of a collective bargaining agreement between a state-owned and operated railroad and its employees would prevail over conflicting provisions of state civil service law. The Court held that it did. Terminal Railroad Association v. Brotherhood of Railroad Trainmen, supra, was definitively distinguished. The Court stated that the state regulation in Terminal had withstood challenge because it was directed at the establishment of regulations governing safety and health and was not concerned with the right secured by federally protected collective bargaining. 353 U.S. at 560. Accordingly, it was outside of the scope of the Railway Labor Act. In Taylor, on the other hand, the state was attempting to regulate working conditions not specifically or directly connected to the maintenance of health or safety, in contra-

vention of an express collective bargaining agreement. That practice was not permissible, said the Court, since by means of the Railway Labor Act, Congress had preempted the field of employer-employee bargaining agreements in all "affected industries". The key factor is the existence of a valid collective bargaining agreement. Where such an agreement exists, its terms must prevail over inconsistent state legislation. See also United Airlines, Inc. v. Industrial Welfare Commission, 28 Cal. Rptr. 238 (1963); Railway Employees' Department v. Hanson, 351 U.S. 225 (1951); Pan American World Airways v. Division of Labor Law Enforcement, 203 F. Supp. 324 (N.D. Cal. 1962).

It would seem to us that the Taylor line of cases is more clearly controlling in this instance. In attempting to compel the payment of overtime by interstate air carriers to employees covered by collective bargaining agreements which provide otherwise the State is interfering with an agreement which has "the imprimatur of federal law upon it". Railway Employees' Department v. Hanson, 351 U.S. at 232. In doing so, the State has run afoul of the preemptive provisions of the Railway Labor Act. Insofar as the Alaska Wage and Hour Act operates to require the payment of overtime to affected employees of interstate air carriers covered by valid collective bargaining agreements, that Act is invalid since it

has been preempted by the Railway Labor Act. We must still ascertain, however, which employees are "affected" so as to be exempt from the operation of state law.

III

ACTIVITIES WHICH FALL
WITHIN THE AIR CARRIERS EXEMPTION

The inclusion of air carriers (and their employees) within the scope of the Railway Labor Act is found in subch. II of that Act, 45 U.S.C. §§ 181-188. Section 181 provides:

> All of the provisions of subchapter I of this chapter except section 153 of this title are extended to and shall cover every common carrier by air engaged in interstate or foreign commerce, and every carrier by air transporting mail for or under contract with the United States Government, and every air pilot or other person who performs any work as an employee or subordinate official of such carrier or carriers, subject to its or their continuing authority to supervise and direct the manner of rendition of his service.

Clearly, any commercial airline operating into or out of Alaska falls within the language of the Railway Labor Act. Equally clearly, pilots (expressly) and other members of the flight crew (by implication) are covered by the air carrier provisions of the Railway Labor Act and thus fall outside the purview of the Alaska Wage and Hour Act, at least insofar as the payment of overtime is concerned. However, application of the Railway Labor Act to any other employees of an air carrier depends upon an analysis of sec. 181 of the federal act and specifically upon the definition of the term "employee"

contained therein.

The Railway Labor Act was enacted for the purpose of avoiding the interruption of commerce caused by labor disputes and of assuring unimpeded continuity of transportation operations. Williams v. Jacksonville Terminal Co., 315 U.S. 586 (1942), reh. denied, 315 U.S. 830 (1942); National Airlines, Inc. v. International Association of Machinists & Aerospace Workers, 308 F. Supp. 179 (S.D. Fla. 1970), rev'd on other grounds 430 F.2d 957 (5th Cir. 1970), cert. denied 400 U.S. 992 (1971); Pan Am World Airways, Inc. v. United Brotherhood of Carpenters & Joiners of America, 324 F.2d 217 (9th Cir. 1963), cert. denied 376 U.S. 964 (1964). To that end the Railway Labor Act has direct application only to those employees of the carrier whose work bears a direct relationship to the transportation activities of the carrier. International Longshoremen's Association, AFL-CIO v. North Carolina State Port Authority, 370 F. Supp. 33 (E.D.N.C. 1974), aff'd, 511 F.2d 1007 (4th Cir. 1974); Roland v. United Airlines, Inc., 75 F. Supp. 25 (N.D. Ill. 1947). The mere fact that some of an employer's activities are related to transportation does not automatically subject all of that employer's activities to the Railway Labor Act. Instead, each activity must be scrutinized individually to see if the specific activity bears the necessary relation to transportaion. Jackson v. Northwest

Airlines, 70 F. Supp. 501 (M.D. Minn. 1947), aff'd 185 F.2d 74 (8th Cir. 1950), cert. denied 342 U.S. 812 (1951). Whether a particular employment situation satisfies the requisite nexus test is a question of fact which must be separately examined in each case. Edwards v. Southern Railway Co., 258 F. Supp. 212 (E.D. N.C. 1966).

Therefore, the Department of Labor is well advised to closely investigate and analyze each employee's activity in order to ascertain whether the activity bears a substantial and direct relationship to the transportation activities of the employer. Any employment activities which fail to satisfy this requirement fall outside of the coverage of sec. 181 of the Railway Labor Act and thus are subject to state regulation unless the attempted regulation is otherwise barred by operation of the Commerce Clause of the United States Constitution.

IV

COMMERCE CLAUSE RAMIFICATIONS

Art. I, sec. 8, cl.3 of the United States Constitution confers upon Congress the power "to regulate commerce with foreign nations, and among several states, and with the Indian tribes." Since there is a national interest in the free flow of interstate commerce, Gibbons v. Ogden, 22 U.S. (9 Wheat.) 1 (1824); Bibb v. Navaho Freight Lines, Inc., 359 U.S. 520 (1959), the Supreme Court, under the auspices of the Commerce Clause, will strike down any state law which serves to substantially

impede that national interest. Southern Pacific Company v. Arizona, 325 U.S. 761 (1945). Under the Commerce Clause states have full unbridled regulatory authority over intrastate systems. Gibbons v. Ogden, supra. Interstate, however, a state has no regulatory authority except when exercised for the purpose of advancing a judicially recognized legitimate local interest and only so long as the regulation does not unduly burden interstate commerce. The paramount recognized legitimate state interest is the state's management of the health and safety of its citizens. Smith v. Alabama, 124 U.S. 165 (1888). However, in cases where an impediment to the free flow of commerce results from the state's enforcement of its own laws, the monetary or economic interests of the state of her citizens are not recognized legitimate local interests sufficient to withstand Commerce Clause challenges. Hood & Sons v. Dumond, 336 U.S. 525 (1949).

The impact upon interstate commerce of the regulation of the working hours of pilots and flight crews by individual states is obvious. Since the planes themselves move interstate competing or conflicting state laws governing work hours could result in substantial administrative and operational difficulties. Such problems, in turn, could jeopardize the smooth flow of interstate air carriage. State regulation of support personnel (that is to say employees other than flight

crews), however, would not appear to have such a direct and potentially burdensome impact upon commerce. In situations where the states are not preempted from exercising regulatory authority, the state's interest in the welfare of its citizens is entitled to greater weight. Southern Pacific Company v. Arizona, 325 U.S. at 767. In such a case courts traditionally have balanced the strength of the local interest against the impact upon interstate commerce. Pike v. Bruce Church, Inc., 397 U.S. 137 (1970). Where the state interest is substantial, attempted regulation does not interfere with the national commerce, and no less restrictive alternative exists, the state law may be upheld. Southern Pacific Company v. Arizona, supra; Dean Milk Co. v. City of Madison, 340 U.S. 349 (1951). Such would seem to be the case where non-flight personnel are concerned. For the State to apply the protections of its wage and hour laws to such employees would not appear to result in any undue burden upon interstate commerce.

V.

CONCLUSION

In summary the following principles appear to be valid with respect to the authority of the Alaska Department of Labor to enforce the mandatory overtime provisions of the Alaska Wage & Hour Act in favor of employees of airlines and air carriers operating within the State of Alaska.

1. In the case of pilots, flight crews, and other interstate air carrier employees whose activities are directly and substantially related to the transportation activities of the carrier, and who are covered by a valid existing collective bargaining agreement or agreements with the carrier, the State is precluded from applying its overtime laws due to the preemptive nature of the Railway Labor Act.

2. In instances where no collective bargaining agreements apply, crews of interstate air carriers are nonetheless beyond the jurisdiction of state overtime law because of the commerce clause implications discussed above.

3. Non-flight personnel of interstate carriers who are not covered by valid existing collective bargaining agreements are not exempt from state law. As to those individuals the provisions of state overtime law apply.

4. Air carriers operating solely intrastate would not seem to fall under the exclusionary scope of either the Railway Labor Act or of the Commerce Clause absent unusual fact situations. Accordingly, the protections of the Alaska Wage and Hour Act dealing with overtime extend to those individuals.

Very truly yours,

AVRUM M. GROSS
ATTORNEY GENERAL

MEMORANDUM

TO: Chairman, Alaska Legislative Council

FROM: John W. Abbott, Chairman
Alaska Code Revision Commission

DATE: March 17, 1983

RE: Bill on security interests in real property

Pursuant to the authority granted in AS 24.20.075(c), the Alaska Code Revision Commission has prepared the attached bill on security interests in real property. It was introduced in the legislature through the Legislative Council in 1981 as House Bill 403. That bill did not move out of the House Judiciary Committee, its first committee of reference, and no committee hearings were scheduled on it. The apparent reason was opposition to proposed AS 34.21.060, a section that is deleted from the attached bill. That section dealt with clauses in home purchase contracts that permit the entire balance of purchase price to be declared due when the home is sold. During the commission's work on the draft this "due-on-sale" section of the bill took various forms and received much comment, especially from financial interests. Controversy over the section diverted attention from the main substance of the bill. Without it, the bill should receive consideration from legislative committees on its merits.

The bill covers the relationship, rights, and remedies of debtor and creditor in secured real property transactions. It resulted from the commission's general review of real property law in Title 34 and a conviction that some revision is desirable.

The main sources drawn upon in preparing the bill are the existing Alaska law on deeds of trust, the Uniform Commercial Code, the Washington law on nonjudicial foreclosure, and the Uniform Land Transfers Act. That Act has not been adopted as a whole in any state.

A commentary on the bill as revised is attached also.

MARCH 1983

ALASKA CODE REVISION COMMISSION

COMMENTARY TO ACCOMPANY

DRAFT BILL ON SECURITY INTERESTS IN REAL PROPERTY

BILL NO.

General Features of the Bill

The attached bill prepared by the Alaska Code Revision Commission is an effort to bring into secured real property transactions some of the same principles that govern secured personal property transactions under the Uniform Commercial Code. The bill covers the broad area of relationships, rights, and remedies of debtor and secured creditor. The state law on summary foreclosure of deeds of trust would be superseded, but not drastically changed. In cases where foreclosure under a power of sale is required, the bill makes possible a commercially reasonable resale by listing and sale through a real estate agent, in order to avoid the disasterous forced-sale prices often received at public auction.

The bill was introduced in the Twelfth Legislature as HB 403. Action was not taken on it. All attention focused on a relatively minor part of the bill, a section limiting the use of "due-on-sale" clauses in security agreements for the purchase of a home. That controversial section, readily separable from the body of the bill, is not included in the present form of the bill and has largely been preempted by recent federal and state statutes and regulations (sec. 341, Garn-St. Germain Depository Act of 1982, P.L. 97-320, 12 U.S.C., § 1701 j-3; 12 U.S.C. § 371(g); 12 C.F.R. § 548.8-4(f); AS 06.01.020; AS 18.56.098(e); 15 AAC 118.267).

Persons familiar with the present Alaska law on both

real and personal property should find the bill a natural development. The vast majority of real property sales are now financed by deeds of trust. Most departures in the bill from present practices under deeds of trust are not great. The main changes occur where needed to permit additional kinds of sales of collateral in cases of default. The bill makes deed of trust foreclosure procedures applicable to mortgages and contracts of sale. Under present law mortgages are more difficult to foreclose than deeds of trust, for no logical reason, and there are no statutory guidelines for foreclosing contracts of sale, which has resulted in substantial litigation at both the superior court and supreme court level (e.g., Lonas v. Metropolitan Mortgage and Securities Co., 432 P.2d 603 (1967); Moran v. Holman, 501 P.2d 769 (1972); Curry v. Tucker, 616 P.2d 8 (1980); Wickwire v. McFadden, 633 P.2d (1981); Strack v. Miller, 645 P.2d 184 (1982); additional cases are summarized in Department of Revenue v. Baxter, 486 P.2d 360 365 n.10).

A bill of this kind must specify procedures to be followed and forms to be used in carrying out the procedures. The procedures to be followed before sale in a summary foreclosure are set out in the bill in AS 34.21.110--34.21.150. These sections are followed by AS 34.21.160--34.21.170 which specify the content of forms that are to be used. Since the forms are designed to advise the defaulting debtor of his rights and to inform him of the procedures that will be followed, they cover some of the same material that is set out in the preceding substantive sections. AS 34.21.100 in the bill explains this relationship between the sections.

A contents page and a comparison of time elements and steps from default to sale under existing law and under the bill are attached here for ready reference. (See next 3 pages)

CHAPTER 21. SECURITY INTERESTS IN REAL PROPERTY

Sec. 34.21.270. DEFINITIONS

Other Amendments:

Sec. 06.05.175. DEPOSITOR AND CUSTOMER RECORDS CONFIDENTIAL
Sec. 09.45.170. JUDGMENT ON FORECLOSURE OF LIEN

Repeal of AS 09.45.200 and AS 34.20.010--34.20.135

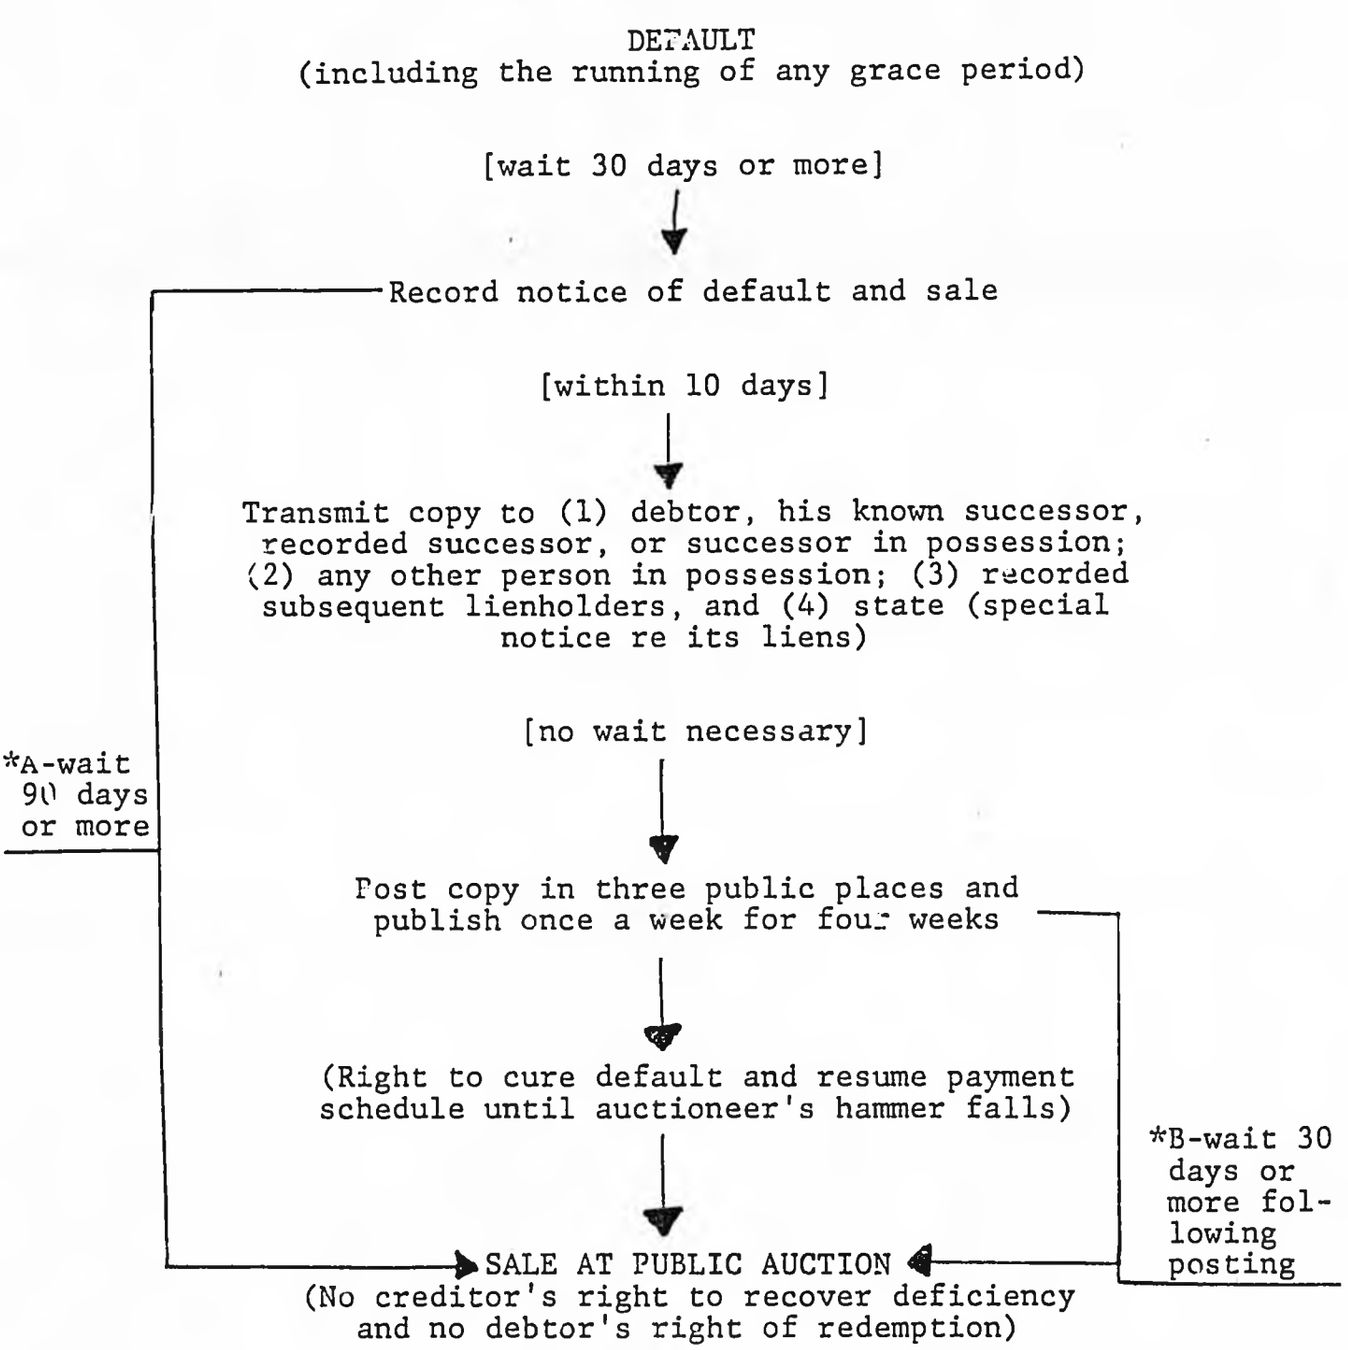
Transitional provisions

Effective date

STEPS IN SUMMARY FORECLOSURE

UNDER EXISTING SECTIONS 34.20.070 - 34.20.135

(Deeds of Trust)



Minimum time between the end of a grace period for receipt of payments and the date of sale: 120 days.

* A and B time lapse is used depending upon which brings one to a later sale date.

STEPS IN SUMMARY FORECLOSURE
UNDER PROPOSED SECTIONS 34.21.090 - 34.21.280

(Any security agreement containing a power of sale)

DEFAULT

[wait 30 days or more]

↓

Transmit notice of default
[to (1) debtor or his successor
and (2) occupants]

[wait 30 days or more]

↓

Record notice of intent to sell

[no wait necessary]

↓

Transmit notice of intent to sell [to (1) debtor and any other person with known or recorded interest in the collateral; (2) an attorney shown in a lis pendens, and (3) the Attorney General with special notice re state liens], post it on the collateral and start publication of it once a week for 3 weeks

*A-wait 60 days or more

[no wait necessary]

↓

Notice of time and place of public sale or time after which private sale will be made (this separate notice is not necessary if it was included in notice of intent to sell)

*B-wait 45 days or more following transmittal posting and start of publication

[wait 10 days or more]

↓

SALE

(No creditor's right to recover deficiency and no debtor's right of redemption)

Minimum time between the end of a grace period for receipt of payments and the date of sale: 120 days.

* A and B time lapse is used depending upon which brings one to a later "sale" date.

The date for "sale" shown here is also the last date for curing a default and resuming the regular payment schedule (a "simple" cure). The sale may be held later as a public sale or a "commercially reasonable" private sale, but after the final date for a simple cure, the sale can be stopped only by paying the full principal, interest and costs.

Section Analysis

Following are source notes and brief comments on the sections, where appropriate. In the source notes and comments the Uniform Commercial Code, AS 45.01--45.09, is referred to as the UCC. The Uniform Land Transactions Act is referred to as the ULTA and the Uniform Simplification of Land Transfers Act is referred to as the USLTA. The Revised Code of Washington Annotated is referred to as RCWA.

Section 1

COMMENT: This section states the general purposes of the Act.

Section 2

AS 34.21.010

SOURCE: (a) is from AS 45.09.102; (b) is from AS 45.09.202; (c) is part of the ULTA § 3-103(7) and USLTA § 1-201.

COMMENT: (a) is intended to allow a court to find a transaction subject to this chapter even though there is no documentary evidence of the parties' intent. The Supreme Court of Alaska has made it clear this is our present law. Brand v. First Fed. Sav. and Loan, 478 P.2d 820 (1970); Dept. of Revenue v. Baxter, 486 P.2d 360, 365 (1971).

The material in (c) was included as part of the definition of "security interest" in the referenced uniform acts. The general subject matter of .010 is covered in ULTA § 3-102.

AS 34.21.020

SOURCE: AS 45.09.104(8).

COMMENT: The exclusion in this section is consistent

with the definition of "security interest" as a "consensual" interest.

AS 34.21.030

SOURCE: AS 45.09.112.

COMMENT: This section is designed to protect the real party in interest. Its effect is similar to that of existing law, which requires the trustee to send a notice of sale "where the trustee or beneficiary has actual notice of the lien or interest." AS 34.20.070(c)(3).

AS 34.21.040

SOURCE: This section was taken from ULTA § 3-209 which is based upon § 9-208 of the UCC (AS 45.09.208). Language is added to allow a debtor to request statements from the bank to which he actually makes his payments.

COMMENT: Existing law makes no provision for such a statement, although the common practice is for statements to be sent even though not requested.

Liability is imposed on the person failing to comply with the request only if he lacks a "reasonable excuse."

The bill gives the holder of a subordinate security interest like a second deed of trust the right to get from the trustee or beneficiary on a first deed of trust a statement of account on the obligation secured by the first deed of trust. The duty placed on the secured party or his agent bank to provide information would create an exception to the strict confidentiality of bank records under AS 06.05.175. Section 3 near the end of the bill specifically amends that section.

AS 34.21.050

SOURCE: AS 45.09.311.

COMMENT: This section is verbatim from the UCC. It is to make clear that in all secured real property transactions the debtor has an interest which the debtor can dispose of and which the creditors of the debtor can reach.

The section does not preclude a security agreement provision which makes a transfer a default but merely prevents such a provision from having the effect of prohibiting transfer. The transfer would be subject to the security interest.

AS 34.21.060

SOURCE: AS 45.09.405(c).

COMMENT: Existing law deals with the subject of this section only by providing that recording an assignment of a mortgage is not in itself notice to the debtor of the assignment. AS 34.20.010. In contrast, AS 34.20.130 provides that recording an assignment of the beneficial interest in a deed of trust is "constructive notice to all persons." (When the assignor acts as the assignee's agent to receive payments following the assignment, this section could be ignored.)

AS 34.21.070

SOURCE: The section is based upon AS 45.09.404(a), § 9-404(1) of the UCC.

COMMENT: The section requires the secured party to pay the debtor both a fixed sum of $500 and his actual damages if he fails to provide the statement within 15 days after demand. This is the UCC provision, substantially, except the UCC requires the statement within 10 days and the dollar penalty is $100.

AS 34.21.080

SOURCE: AS 45.09.501(a), with major changes.

COMMENT: The commission saw no reason to restrict the secured party from proceeding with judicial and nonjudicial remedies simultaneously. The section follows generally UCC sec. 9-501(1) which provides that remedies shall be cumulative.

The section is subject to the court's authority to consolidate actions and to require marshaling of assets. As with existing law on nonjudicial foreclosure, AS 34.21.220(d) in the bill provides that there is no right to recover a deficiency after sale in a nonjudicial foreclosure.

AS 34.21.090

SOURCE: RCWA 61.24.030.

COMMENT: The last phrase, "or another person," in subparagraph (1) is intended to insure that deeds of trust continue to be summarily foreclosed.

All of the requirements of this section are also in existing law. AS 34.20.070(a) and (b).

AS 34.21.100

SOURCE: Original drafting.

COMMENT: This section is a guide to the balance of the chapter. It is to make clear that secs. 110 through 150 cover the pre-sale procedures and time elements for power-of-sale foreclosure, and that secs. 160 and 170 only establish the content of the principal notices, i.e., the notice of default and the notice of intent to sell.

AS 34.21.110

SOURCE: RCWA 61.24.030.

COMMENT: This section repeats the present rule that proceedings cannot begin until 30 days after the default.

As under existing law, notice is sent to the debtor. The requirement of service on an occupant is new to Alaska Statutes, but almost certainly required by common law.

AS 34.21.120

SOURCE: RCWA 61.24.040(1)(a).

COMMENT: Existing law requires a notice of default which includes a notice of time and place of sale. The proposed section requires a simple notice of default followed, if necessary, by a formal notice of intent to sell which is recorded. If a sale becomes necessary, sec. 150 requires that an informal notice giving further information as to the sale be provided to interested parties.

AS 34.21.130

SOURCE: (1)(A) is from RCWA 61.24.040(b); (1)(B) is from RCWA 61.24.040(c); (2) is from AS 34.20.070(d); (3) is from RCWA 61.24.030; and (4) is from AS 09.35.140(2). There are changes from the original forms.

COMMENT: The initial notice of default should be relatively inexpensive for the secured party to send out, unlike the currently used notice of default which requires a record search. The more expensive notice of intent to sell goes out only if the debtor fails to cure within 30 days of the first notice. Since the debtor pays costs and attorneys fees when he cures under both present law and the proposed section, this provision should save the debtor considerable money.

Subparagraph (2) continues the present rule requiring that the state be given particular information as to the liens it has on the collateral.

Posting on the collateral of notice of intent to sell is required.

Subparagraph (d)(3) changes the present publishing requirement which is hidden in AS 09.45.180 and 09.35.140(2) from four to three weeks. But the time between the first publication and the sale must be at least 45 days.

AS 34.21.140

SOURCE: Original drafting.

COMMENT: This section includes provision for giving notice of time and place or manner of sale to all those who received the notice of intent to sell and to all those who have asked to be notified.

AS 34.21.150

SOURCE: Original drafting.

COMMENT: The section clarifies intent.

AS 34.21.160

SOURCE: Paraphrased from RCWA 61.24.030(6).

COMMENT: This section requires that when a secured party declares a debtor in default, he fully informs him the basis of the default, what he must do to cure the default and the consequences if he fails to cure it. It requires a clear warning to the debtor that his rights in the collateral will be cut off under sec. 180(g) if he fails to cure within the required time.

AS 34.21.170

SOURCE: RCWA 61.24.040(f), with many changes.

COMMENT: The notice set out in this section corresponds to the existing notice of sale, except that this notice need not contain the time, place, and manner of the sale. When it does not contain this information, the debtor and interested parties will be advised of specifics as to the sale by a later notice. The later notice will also go

out to all other persons who have written to the person designated in the notice expressing an interest and providing a mailing address.

AS 34.21.180

SOURCE: (a) is from RCWA 61.24.090(b)(1); (b) and (c) are paraphrased from AS 34.20.070(b); (d) is original drafting; (e) is from RCWA 61.24.090(b)(2) and (4); (f) is from RCWA 61.24.090(b)(5); (g) and (h) are original drafting.

COMMENT: Subsection (a) essentially restates existing law, except that it explicitly allows cure by persons other than the debtor.

Subsection (b) sets a time limit within which cure must be made. After the expiration of that time period, cure can only be made by tendering the full amount of indebtedness under (d).

Subsection (c) limits to two the number of times the debtor will be permitted to cure after the second step toward foreclosure has been reached. By subsection (c) the debtor is limited in the number of times he can reinstate the security agreement after defaulting and permitting foreclosure to reach the last stage before sale.

Subsection (d) is intended to ameliorate the harshness of (g), which cuts off the debtor's right to cure in order to maximize the purchase price at the foreclosure sale. The debtor may rescue his home at any time before the sale by paying the entire default, including the accelerated amount.

Subsection (e) applies to cures the rule currently applicable to post-sale redemption, which is that a creditor who rescues the debtor acquires a lien for the amount spent on the rescue.

Subsection (f) is designed to provide a clear record for the title searcher. If the secured party's failure to record the required notice after cure causes a debtor to lose a sale, the debtor may sue for damages under sec. 240.

Subsection (g) is a radical departure from existing law, which allows cure until the auctioneer's hammer falls. The proposed section cuts off the debtor's right to a simple cure so that the collateral can be listed and sold. While the proposed section appears on its face to treat the debtor harshly, it is intended to protect his equity from the usual sacrifice sale. No other state has been found which has eliminated the requirement of a public auction.

Subsection (h) assures that any payment made which stops default proceedings will not be a bogus payment.

AS 34.21.190

SOURCE: (a) is from AS 45.09.904; (b) is original drafting; (c) is on the subject of AS 45.09.904(c); (d) is from AS 45.09.904(c); (e) is from AS 45.09.507(b); and (f) is from AS 45.09.507(b).

COMMENT: Subsection (a) provides for sale following expiration of the cure period.

Subsections (d) and (e) incorporate the UCC standard of the commercially reasonable sale. To insure a high purchase price, a commercially unreasonable sale transfers good title to the buyer (see sec. 220). However, an aggrieved debtor may sue the secured party for damages under sec. 240.

The concept of this section is basic to the UCC and basic to this bill.

AS 34.21.200

SOURCE: Original drafting.

COMMENT: Offset bidding at a sale of collateral at public auction is the norm at present, and continues to be provided for in this section.

This bill permits negotiated sales of the collateral as well as sales at public auction. Subsection (a) prohibits the foreclosing secured party from being a purchaser at a sale that he negotiates as seller.

Subsection (b) authorizes a junior lienholder to set off the amount of his lien if he is a purchaser of the collateral and first pays off or secures the release of superior liens.

AS 34.21.210

SOURCE: AS 34.20.080(c) and (d).

COMMENT: This section requires that there be included in, or attached to, the deed issued by the secured party (1) an affidavit of the manner of giving the required notices and (2) an affidavit of publication of the notice of intent to sell. Existing AS 34.10.080(d) calls for recording of these affidavits by the secured party after the sale.

AS 34.21.220

SOURCE: (a) is from AS 34.20.090(a); (b) is from AS 34.20.090(b); (c) is from AS 34.20.090(c); and (d) is from AS 34.20.100.

COMMENT: This section is little changed from existing law.

Subsection (d) restates the present rule which allows nonjudicial foreclosure only where no deficiency judgment is permitted.

AS 34.21.230

SOURCE: (a) is from AS 45.09.504(a); (b) is original drafting; and (c) is from AS 45.09.504(b).

COMMENT: Subsection (a) is taken from the UCC. The priorities among various types of liens and security interests are left by (a)(3) to case law. Although it is not spelled out in the bill, it is intended that the secured party retains a right to file an interpleader action when priorities are in doubt.

AS 34.21.240

SOURCE: AS 45.09.507.

COMMENT: This section allows for an injunction before sale or damages after sale for failure to comply with this chapter.

AS 34.21.250

SOURCE: AS 45.09.201.

COMMENT: This section is taken from the UCC, and is included principally to contrast with AS 34.21.260.

AS 34.21.260

SOURCE: This section is from AS 45.09.501(c), but is more inclusive.

COMMENT: This section protects debtors from being asked to waive various rights guaranteed by this chapter.

AS 34.21.290

SOURCE: (1) is from AS 45.09.105(3); (2) is from AS 45.09.105(4); (3) is from USLTA § 1-201(19); (4) is from AS 45.09.105(8); (5) is from USLTA § 1-201(25) and ULTA § 3-103(7); and (6) is from AS 45.09.105(9).

COMMENT: All definitions are paraphrased from the UCC or the USLTA, as noted. The terms "governmental agency,"

"receiver," and "trustee in bankruptcy" are added in (6) to clarify intent.

Section 3

AS 06.05.175

COMMENT: This subsection is added to meet the possible reluctance of a financial institution to provide information to the holder of a subordinate security interest.

Section 4

AS 09.45.170

COMMENT: This section substitutes the broader term "security interest" for the term "mortgage" in the long-standing section on judicial foreclosure in the Code of Civil Procedure. No change is made in the judicial foreclosure procedure, but it is made clear by statute that the procedure is available broadly for foreclosure of all security interests.

Section 5

Repeal of AS 09.45.200 and AS 34.20.010--34.20.135

COMMENT: AS 09.45.200, here repealed, provides that an action for foreclosure cannot be maintained while an action is pending for the debt. Reference AS 34.21.080 in the bill.

The other sections repealed are the existing law on deeds of trust.

Section 6

COMMENT: This transitional section takes the conservative approach that the law in effect when a security agreement is entered into shall be the law used in enforcing the security agreement. However, since this Act follows more closely the existing law on deeds of trust than it does the existing law on other security agreements, an exception is made as to deeds of trust. The person foreclosing a deed of trust

is given an option to proceed with foreclosure under this Act if he should wish to.

This transitional section will make it necessary that the statutes repealed or amended by this Act be retained in Alaska Statutes volumes for several years after this Act goes into effect.

Section 7

The effective date of the Act should be several months following enactment to allow time for becoming familiar with its terms.

HB

342

MARCH 22, 1984

TO: JOHN

FROM: KEN

RE: HB 342 "RELATING TO FILING AND RECORDING AND TO RECORDABLE DOCUMENTS"

THE MAIN PURPOSE OF HB 342 IS TO CLARIFY EXISTING ALASKA STATUTES ON FILING AND RECORDING AND TO CENTRALIZE THE THE RECORDING PROCESSES WITHIN STATE GOVERNMENT. THE BILL WOULD CREATE A NEW SECTION UNDER TITLE 40 OF THE ALASKA STATUTES ENTITLED RECORDING IN PUBLIC RECORDS, WHICH LAYS OUT IN DETAIL THIS PROPOSED RECORDING SYSTEM.

QUESTIONS:

1. WHY WAS TITLE 40 CHOSEN AS THE SPOT FOR THIS NEW SECTION ON RECORDING ?

2. WHY HAS THE DEPARTMENT OF NATURAL RESOURCES BEEN MANDATED TO PROVIDE THESE SERVICES IN THIS BILL ?

3. WHAT WOULD THE INITIAL EXPENSE BE TO IMPLEMENT THIS PROGRAM ?

4. DID THE ALASKA CODE REVISION COMMISSION WORK WITH THE DEPARTMENT OF NATURAL RESOURCES IN WRITING THIS BILL ?

5. IS THERE A PROJECTED COST SAVINGS FOR THE STATE AS A RESULT OF THIS BECOMING LAW ?

6. HOW MANY NEW POSITIONS WOULD BE CREATED BY THIS LEGISLATION ?

7. WHAT IS THE ANTICIPATED PAY LEVEL FOR THOSE PEOPLE ? WHAT WOULD BE THE JOB REQUIREMENTS FOR THESE POSITIONS ?

8. HOW DID THE ALASKA CODE REVISION COMMISSION COME TO DECIDE TO UNDERTAKE THIS PROJECT ? WHAT WAS THE IMPETUS FOR THIS BILL ?

9. WHAT ARE THE FEELINGS OF THE DEPARTMENT OF NATURAL RESOURCES ON THIS BILL ? DOES THE DEPARTMENT FEEL IT NECESSARY ?

10. UNDER CURRENT STATUTES, RECORDING COMES UNDER TITLE 34. WHY MOVE IT TO CHAPTER 40 ?

ALASKA CODE REVISION COMMISSION

ALASKA STATE LEGISLATURE
POUCH Y - STATE CAPITOL

MEMORANDUM

TO: Representative John Cowdery, Chairman
House Labor and Commerce Committee

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

DATE: March 22, 1984

RE: HB 342 on Recording

I pencil this memorandum late at night and will have little chance to review it with representatives of the Department of Natural Resources before the scheduled hearing at 8:15 a.m. in the morning.

However, I believe the attached amendments may satisfy questions asked by DNR about HB 342. They are my effort to reach an accord in the hope that the bill can move out of the Labor and Commerce Committee.

The two definitions drafted for insertion on page 23 I affirmatively support.

The balance of the drafted amendments I do not affirmatively support but propose for form. I believe that adopting them would constitute a reasonable compromise and would not seriously conflict with the code revision commission's concepts as expressed in the bill.

A great effort has been made to satisfy all parties on this bill. I hope the appropriate representatives of DNR will join me in offering the attached amendments as a reasonable compromise of the few minor questions DNR has raised about the bill in its present form.

Amendments offered by Ted Farquhar D.N.R. #6 HB 342

neither presumption applies.

Sec. 40.17.100. RECORDING A RECONVEYANCE. When the parties to a recorded conveyance absolute in its terms intend it to serve only as security for repayment of a debt, the conveyance is absolute as to all persons who rely upon it in good faith and for value before a reconveyance is recorded.

Sec. 40.17.110. CLASSES OF DOCUMENTS ELIGIBLE FOR RECORDING. (a) A signed document listed in (b) of this section or included under (c) of this section that meets the requisites for recording under AS 40.17.030 may be recorded as a class A document. The recorder may not record as a class B document a document that would be a class A document except for a technical defect in the document. A document that meets the requisites for recording under AS 40.17.030 and that is not a conveyance or a defective class A document, is a class B document the recording of which is permitted for the safekeeping of a record copy of the document. The effect on title and rights of recording class A and class B documents is set out in AS 40.17.080.

(b) The recorder [~~may~~ shall] record as a class A document only

(1) a conveyance acknowledged or proven under AS 34.15.-150 - 34.15.250 or a certified copy of the conveyance if recording the copy is permitted by AS 40.17.020;

(2) an acknowledged or proven power of attorney or other instrument granting or revoking a power to act as agent or attorney for another person;

(3) a contract for the sale or purchase of real property when acknowledged or proven by all parties to the contract;

(4) an option for the purchase of real property when it is acknowledged by the person granting the option;

(5) a certificate of a public official or an affidavit of

any person that may affect the title to or any interest in real property in the state that is described in the certificate or affidavit, stating facts relating to age, sex, birth, death, capacity, relationship, family history, heirship, names, identity of parties, marital status, possession or adverse possession, adverse use, residence, service in the armed forces, conflicts and ambiguities in description of land in recorded instruments, and the happening of any condition or event that may terminate an estate or interest; a certificate or affidavit recorded under this section must contain the recording information of a recorded document referred to in it;

(6) an instrument by which a real property security agreement is subordinated or waived as to priority;

(7) a document creating a condition, covenant, restriction, or reservation relating to rights in real property;

(8) an assignment of all or part of a security interest in real property;

(9) a release of lien or security interest in real property;

(10) a conformed copy of a ~~document~~ lease, contract, or option to purchase real property that is otherwise recordable as a class A document under this section, when the person offering the document attaches to it an affidavit that

(A) the conformed copy was received by the person in the course of the transaction;

(B) the original is not in the person's possession; and

(C) the instrument offered for recordation is a conformed copy;

(11) a conveyance from the United States of an interest in real property in the state;

executed by the same parties who executed the original document; or and

(57) a master form that can be incorporated by reference in documents later recorded.

(c) A document specifically permitted or required to be recorded by another law of the state or made recordable as a class A document by regulation of the department may be recorded as a class A document.

Sec. 40.17.120. RECORDING MEMORANDUM OF LEASE. (a) Recording a memorandum of lease substantially complying with (b) of this section has the same effect as recording the lease.

(b) A memorandum of lease is a document signed by the lessor and lessee and containing a reference to an unrecorded lease, sublease, or agreement to lease or sublease, and supplying at least the following information:

(1) the names of the parties;

(2) any addresses of the parties set out in the lease;

(3) the date of the lease;

(4) a description of the real property leased or subleased;

(5) the commencement and termination dates of the lease if fixed and, if not fixed, the method by which the dates are to be fixed; and

(6) a statement of the conditions upon which a party may exercise a right to extend or renew the lease or to exercise a right to purchase or refuse to purchase the real property or part of it.

Sec. 40.17.130. ACTIONS AGAINST RECORDER AND STATE. (a) If the recorder fails to record and index a document properly, the recorder may be compelled to record and index the document properly by an action filed in the superior court.

(b) The state is liable to a person injured by the failure of the recorder to perform duties under this chapter. Neither the

Offrd by Dept of Nat. Resource #2 CSS

neither presumption applies.

Sec. 40.17.100. RECORDING A RECONVEYANCE. When the parties to a recorded conveyance absolute in its terms intend it to serve only as security for repayment of a debt, the conveyance is absolute as to all persons who rely upon it in good faith and for value before a reconveyance is recorded.

Sec. 40.17.110. CLASSES OF DOCUMENTS ELIGIBLE FOR RECORDING. (a) A signed document listed in (b) of this section or included under (c) of this section that meets the requisites for recording under AS 40.17.030 may be recorded as a class A document. The recorder may not record as a class B document a document that would be a class A document except for a technical defect in the document. A document that meets the requisites for recording under AS 40.17.030 and that is not a conveyance or a defective class A document, is a class B document the recording of which is permitted for the safekeeping of a record copy of the document. The effect on title and rights of recording class A and class B documents is set out in AS 40.17.080.

(b) The recorder ~~may~~ [shall] record as a class A document only

(1) a conveyance acknowledged or proven under AS 34.15.-150 - 34.15.250 or a certified copy of the conveyance if recording the copy is permitted by AS 40.17.020;

(2) an acknowledged or proven power of attorney or other instrument granting or revoking a power to act as agent or attorney for another person;

(3) a contract for the sale or purchase of real property, when acknowledged or proven by all parties to the contract;

(4) an option for the purchase of real property when it is acknowledged by the person granting the option;

(5) a certificate of a public official or an affidavit of

any person that may affect the title to or any interest in real property in the state that is described in the certificate or affidavit, stating facts relating to age, sex, birth, death, capacity, relationship, family history, heirship, names, identity of parties, marital status, possession or adverse possession, adverse use, residence, service in the armed forces, conflicts and ambiguities in description of land in recorded instruments, and the happening of any condition or event that may terminate an estate or interest; a certificate or affidavit recorded under this section must contain the recording information of a recorded document referred to in it;

(6) an instrument by which a real property security agreement is subordinated or waived as to priority;

(7) a document creating a condition, covenant, restriction, or reservation relating to rights in real property;

(8) an assignment of all or part of a security interest in real property;

(9) a release of lien or security interest in real property;

(10) a conformed copy of a [lease, contract, or option to purchase real property] ~~document~~ that is otherwise recordable as a class A document under this section, when the person offering the document attaches to it an affidavit that

(A) the conformed copy was received by the person in the course of the transaction;

(B) the original is not in the person's possession; and

(C) the instrument offered for recordation is a conformed copy;

(11) a conveyance from the United States of an interest in real property in the state;

executed by the same parties who executed the original document; ~~and~~ or

(57) a master form that can be incorporated by reference in documents later recorded.

(c) A document specifically permitted or required to be recorded by another law of the state or made recordable as a class A document by regulation of the department may be recorded as a class A document.

Sec. 40.17.120. RECORDING MEMORANDUM OF LEASE. (a) Recording a memorandum of lease substantially complying with (b) of this section has the same effect as recording the lease.

(b) A memorandum of lease is a document signed by the lessor and lessee and containing a reference to an unrecorded lease, sublease, or agreement to lease or sublease, and supplying at least the following information:

(1) the names of the parties;

(2) any addresses of the parties set out in the lease;

(3) the date of the lease;

(4) a description of the real property leased or subleased;

(5) the commencement and termination dates of the lease if fixed and, if not fixed, the method by which the dates are to be fixed; and

(6) a statement of the conditions upon which a party may exercise a right to extend or renew the lease or to exercise a right to purchase or refuse to purchase the real property or part of it.

Sec. 40.17.130. ACTIONS AGAINST RECORDER AND STATE. (a) If the recorder fails to record and index a document properly, the recorder may be compelled to record and index the document properly by an action filed in the superior court.

(b) The state is liable to a person injured by the failure of the recorder to perform duties under this chapter. Neither the

SB 245 and HB 342, FISCAL ANALYSIS

Assumptions

1. As stated in the memo from the Code Revision Commission, dated February 22, 1983 and Journal Supplement #10, dated April 8, 1983, the general purpose of the bill is to gather and clarify provisions on recording that are scattered throughout the Alaska Statutes, and lays a suitable framework for future use of technological advances in a centralized recording system. It also establishes two classes of documents, Class A for constructive notice recording and Class B for other documents for safekeeping.

2. Based on a feasibility report, the current recording system, which is computerized in a batch mode system, does not allow for anticipated growth in the workload. The current computerized recording system is in desperate need of having its program rewritten to correct current problems.

3. A new computer program, whether written for the current recording system or the new recording system, would be approximately the same cost and would provide cost savings to the State by reducing data entry, processing, systems maintenance, manhour and paper costs.

4. A new system must have a centrally located data base with on-line access from the three copy centers in Anchorage, Fairbanks, and Juneau.

5. In the forseeable future, the outlying offices will not have this capability due to their remote locations and will continue with the current manual procedures to send the manually written data to one of the three copy centers for entry into the system.

6. The three copy centers will have in-house printers for hard-copy printout, which is required daily. This will eliminate the manual system presently used which, based on manhours, is quite time consuming and costly. These hard-copy printouts are needed and used by title companies, lending institutions, numerous agencies and the public for up-to-date filing and recording information.

7. All assumptions are based on the passage of the bill in FY 84 with an effective date one-and-a-half years after passage of the bill on January 1st. If the bill was passed in FY 84, the effective date of the bill will be January 1, 1986. This would allow funding for implementation to be spread over three fiscal years. Additionally, it would allow timely and quality implementation of the new recording system. Mandated and proper design of separate computer programs for Class A and Class B documents, writing of comprehensive regulations and procedural manuals followed by training of all personnel and users is time consuming.

8. A revised schedule of fees for the department now being considered will generate additional income of $600.0 per year for the Recorder's Office. This does not include fees for Class B documents as none are now recorded. Assuming that 5000 Class B documents, which is only 2% of the total documents now recorded, will be recorded in the first year of operation an additional $50.0 in fees would be generated. As the public becomes familiar with the program, the number of documents recorded will most certainly increase resulting in additional fee income. Over the years the increase in existing fees and fees for Class B documents will offset initial costs of the system.

9. All information presently available in the existing system also must be made available in the new system and data conversion costs as distinct from design costs must be separately considered.

Relationship to FY 85 Budget Presentations and Further Assumptions

1. The Recorder's Office workload has increased approximately 13% per year and is seriously backlogged in most offices. The Governor's FY 85 budget submission requests an increase in operating funds of $494.0 with ten positions statewide. Not included in this figure is a $50.0 one-time cost for writing of comprehensive regulations. On the capital side, with a department priority ranking of 7 out of 13, $350.0 has been requested for study, design, update and expansion of existing or a new computer system whichever is cost effective. Data conversion dollars are not included.

2. Analysis of SB 245 and HB 342 in relationship to FY 85 budget submissions, which appear to be reasonable for approval, indicate there are several areas where the bills will additionally impact the department.

A.	One Time Costs:	
a)	Computer program for Class B documents	$ 50.0
b)	Data conversion, regulation and procedural manual writing, training, reproduction, advertising and associated travel costs	127.0
c)	Equipment costs	5.0
	Total	$ 182.0
	($150.0 FY 85 - $32.0 FY 86)	
B.	Continuing Costs Starting FY 86:	
a)	One permanent full-time position to handle Class B document recording	$ 26.0
b)	Miscellaneous additional supplies	8.0
c)	Travel costs	3.0
	Total	$ 37.0

SB 245 and HB 342, FISCAL ANALYSIS

Assumptions

1. As stated in the memo from the Code Revision Commission, dated February 22, 1983 and Journal Supplement #10, dated April 8, 1983, the general purpose of the bill is to gather and clarify provisions on recording that are scattered throughout the Alaska Statutes, and lays a suitable framework for future use of technological advances in a centralized recording system. It also establishes two classes of documents, Class A for constructive notice recording and Class B for other documents for safekeeping.

2. Based on a feasibility report, the current recording system, which is computerized in a batch mode system, does not allow for anticipated growth in the workload. The current computerized recording system is in desperate need of having its program rewritten to correct current problems.

3. A new computer program, whether written for the current recording system or the new recording system, would be approximately the same cost and would provide cost savings to the State by reducing data entry, processing, systems maintenance, manhour and paper costs.

4. A new system must have a centrally located data base with on-line access from the three copy centers in Anchorage, Fairbanks, and Juneau.

5. In the forseeable future, the outlying offices will not have this capability due to their remote locations and will continue with the current manual procedures to send the manually written data to one of the three copy centers for entry into the system.

6. The three copy centers will have in-house printers for hard-copy printout, which is required daily. This will eliminate the manual system presently used which, based on manhours, is quite time consuming and costly. These hard-copy printouts are needed and used by title companies, lending institutions, numerous agencies and the public for up-to-date filing and recording information.

7. All assumptions are based on the passage of the bill in FY 84 with an effective date one-and-a-half years after passage of the bill on January 1st. If the bill was passed in FY 84, the effective date of the bill will be January 1, 1986. This would allow funding for implementation to be spread over three fiscal years. Additionally, it would allow timely and quality implementation of the new recording system. Mandated and proper design of separate computer programs for Class A and Class B documents, writing of comprehensive regulations and procedural manuals followed by training of all personnel and users is time consuming.

8. A revised schedule of fees for the department now being considered will generate additional income of $600.0 per year for the Recorder's Office. This does not include fees for Class B documents as none are now recorded. Assuming that 5000 Class B documents, which is only 2% of the total documents now recorded, will be recorded in the first year of operation an additional $50.0 in fees would be generated. As the public becomes familiar with the program, the number of documents recorded will most certainly increase resulting in additional fee income. Over the years the increase in existing fees and fees for Class B documents will offset initial costs of the system.

9. All information presently available in the existing system also must be made available in the new system and data conversion costs as distinct from design costs must be separately considered.

Relationship to FY 85 Budget Presentations and Further Assumptions

1. The Recorder's Office workload has increased approximately 13% per year and is seriously backlogged in most offices. The Governor's FY 85 budget submission requests an increase in operating funds of $494.0 with ten positions statewide. Not included in this figure is a $50.0 one-time cost for writing of comprehensive regulations. On the capital side, with a department priority ranking of 7 out of 13, $350.0 has been requested for study, design, update and expansion of existing or a new computer system whichever is cost effective. Data conversion dollars are not included.

2. Analysis of SB 245 and HB 342 in relationship to FY 85 budget submissions, which appear to be reasonable for approval, indicate there are several areas where the bills will additionally impact the department.

A. One Time Costs:

a)	Computer program for Class B documents	$ 50.0
b)	Data conversion, regulation and procedural manual writing, training, reproduction, advertising and associated travel costs	127.0
c)	Equipment costs	5.0
	Total	$ 182.0

($150.0 FY 85 - $32.0 FY 86)

B. Continuing Costs Starting FY 86:

a)	One permanent full-time position to handle Class B document recording	$ 26.0
b)	Miscellaneous additional supplies	8.0
c)	Travel costs	3.0
	Total	$ 37.0

neither presumption applies.

Sec. 40.17.100. RECORDING A RECONVEYANCE. When the parties to a recorded conveyance absolute in its terms intend it to serve only as security for repayment of a debt, the conveyance is absolute as to all persons who rely upon it in good faith and for value before a reconveyance is recorded.

Sec. 40.17.110. CLASSES OF DOCUMENTS ELIGIBLE FOR RECORDING. (a) A signed document listed in (b) of this section or included under (c) of this section that meets the requisites for recording under AS 40.17.030 may be recorded as a class A document. The recorder may not record as a class B document a document that would be a class A document except for a technical defect in the document. A document that meets the requisites for recording under AS 40.17.030 and that is not a conveyance or a defective class A document, is a class B document the recording of which is permitted for the safekeeping of a record copy of the document. The effect on title and rights of recording class A and class B documents is set out in AS 40.17.080.

(b) The recorder [~~may~~ shall] record as a class A document only

(1) a conveyance acknowledged or proven under AS 34.15.150 - 34.15.250 or a certified copy of the conveyance if recording the copy is permitted by AS 40.17.020;

(2) an acknowledged or proven power of attorney or other instrument granting or revoking a power to act as agent or attorney for another person;

(3) a contract for the sale or purchase of real property, when acknowledged or proven by all parties to the contract;

(4) an option for the purchase of real property when it is acknowledged by the person granting the option;

(5) a certificate of a public official or an affidavit of

any person that may affect the title to or any interest in real property in the state that is described in the certificate or affidavit, stating facts relating to age, sex, birth, death, capacity, relationship, family history, heirship, names, identity of parties, marital status, possession or adverse possession, adverse use, residence, service in the armed forces, conflicts and ambiguities in description of land in recorded instruments, and the happening of any condition or event that may terminate an estate or interest; a certificate or affidavit recorded under this section must contain the recording information of a recorded document referred to in it;

(6) an instrument by which a real property security agreement is subordinated or waived as to priority;

(7) a document creating a condition, covenant, restriction, or reservation relating to rights in real property;

(8) an assignment of all or part of a security interest in real property;

(9) a release of lien or security interest in real property;

(10) a conformed copy of a [~~document~~ lease, contract, or option to purchase real property] that is otherwise recordable as a class A document under this section, wher the person offering the document attaches to it an affidavit that

(A) the conformed copy was received by the person in the course of the transaction;

(B) the original is not in the person's possession; and

(C) the instrument offered for recordation is a conformed copy;

(11) a conveyance from the United States of an interest in real property in the state;

executed by the same parties who executed the original document; or

(57) a master form that can be incorporated by reference in documents later recorded.

(c) A document specifically permitted or required to be recorded by another law of the state or made recordable as a class A document by regulation of the department may be recorded as a class A document.

Sec. 40.17.120. RECORDING MEMORANDUM OF LEASE. (a) Recording a memorandum of lease substantially complying with (b) of this section has the same effect as recording the lease.

(b) A memorandum of lease is a document signed by the lessor and lessee and containing a reference to an unrecorded lease, sublease, or agreement to lease or sublease, and supplying at least the following information:

(1) the names of the parties;

(2) any addresses of the parties set out in the lease;

(3) the date of the lease;

(4) a description of the real property leased or subleased;

(5) the commencement and termination dates of the lease if fixed and, if not fixed, the method by which the dates are to be fixed; and

(6) a statement of the conditions upon which a party may exercise a right to extend or renew the lease or to exercise a right to purchase or refuse to purchase the real property or part of it.

Sec. 40.17.130. ACTIONS AGAINST RECORDER AND STATE. (a) If the recorder fails to record and index a document properly, the recorder may be compelled to record and index the document properly by an action filed in the superior court.

(b) The state is liable to a person injured by the failure of the recorder to perform duties under this chapter. Neither the

MEMORANDUM

TO: Representative John Cowdery, Chairman
House Labor and Commerce Committee

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

DATE: March 22, 1984

RE: HB 342 on Recording

I pencil this memorandum late at night and will have little chance to review it with representatives of the Department of Natural Resources before the scheduled hearing at 8:15 a.m. in the morning.

However, I believe the attached amendments may satisfy questions asked by DNR about HB 342. They are my effort to reach an accord in the hope that the bill can move out of the Labor and Commerce Committee.

The two definitions drafted for insertion on page 23 I affirmatively support.

The balance of the drafted amendments I do not affirmatively support but propose for form. I believe that adopting them would constitute a reasonable compromise and would not seriously conflict with the code revision commission's concepts as expressed in the bill.

A great effort has been made to satisfy all parties on this bill. I hope the appropriate representatives of DNR will join me in offering the attached amendments as a reasonable compromise of the few minor questions DNR has raised about the bill in its present form.

BRIEF HISTORY AND ORGANIZATION OF ALASKA RECORDERS OFFICE

State of Alaska

Dept. of Natural Resources

Division of Technical Services

Prepared By
ROSE E. FARREN,
State Recorder
LINDA PLUMB,
Acting Assistant State Recorder

FEBRUARY 1983

PREFACE

The recordation/filing[1]/ of real property and other documents for the purpose of serving constructive notice to the public has had a long and varied history. It is the purpose of this "Brief History and Organization of Alaska Recorder's Office" to acquaint the reader with how it all started, developed over the years and, to some extent, what it all means. There is no attempt to discuss any legal issues.

Credit for some of the material in this paper is given to a document entitled "Recordation and Recording Procedures in Alaska" prepared in 1966 by E.Z. Rehbock, Legal Assistant for the Alaska Court System.

1/ The words "record" and "file" and sometimes the phrase "file for record" are sometimes erroneously used interchangeably. There is a basic difference in the words and they should not be used interchangeably. A recorded document is one that is copied into the records in some manner and returned to the owner. A filed document is placed on file, becomes the property of the State and is not returned to the original owner. The recorder's office handles both types of documents.

Under the territorial form of government in Alaska, the recordation of conveyances, filing of tax liens and recordation of mining claims and other mining instruments was a duty of the United States Commissioners in their respective precincts. The beginning of recording activities in Alaska can be traced to the establishment of civil government for Alaska in 1884 when the Congress provided that Alaska should be governed by the laws of Oregon. Oregon statutes contained copious provision for the recordation of instruments and the commissioners were charged with the administration of these laws. In 1900 Congress enacted a code of laws based mainly on Oregon law and containing detailed and specific rules for a recording system, which is basically still in force and comports with the principles of recordation as used in the majority of jurisdictions.

The early records of Alaska, as found in the various districts, contained meager information on fee title to real property, although this is one of the important types of information desired. The old records contain mining or quitclaim deeds of property (usually unsurveyed) of which there is no pretense of a legal estate. This condition must not be ascribed to "loss" of old records (although in some precincts it unfortunately happened that they were destroyed by fire), but to the fact that the Congress had for a time long neglected to enact legislation for the acquisition of fee titles in Alaska. Legislation authorizing townsite entry was first enacted in 1891. The homestead laws were extended to Alaska only in 1898. The U.S. Survey system was not extended to Alaska until as late as 1899.

An important statute provides that persons "actually in use or occupation" of lands in Alaska at the beginning of civil government on May 17, 1884 shall not be disturbed therein, but that the acquisition of such land is reserved to future legislation of the Congress. This act was intended as a preliminary to the enactment of future legislation by the Congress for the acquisition of land. It served as a temporary protection.

The functions assigned to recorders in Alaska were augmented in the early 1900's by congressional legislation on mining on the federal public domain and by enactment of territorial laws on mechanic's liens, conditional sales and chattel mortgages. The body of territorial law relating to the filing in the

recorder's office of conditional sales, bulk sales, chattel mortgages and other chattel security became obsolete in 1962 when Alaska adopted the chattel filing provisions of Title 9, UCC.

At the time of transition from the territorial U.S. District Court to the integrated Alaska Court System, there existed a great variety of functions concerned with recording. The difficulty of transition was alleviated because the present boundaries of recording districts are essentially oriented by the boundaries of the former recording precincts, and the commissioners were replaced by magistrates upon whom the recording duties evolved.

Under territorial government, instruments submitted for recordation were originally copied into the record book by longhand. The use of typewriters was established around 1915. A photostatic copying method was introduced in the larger cities, mainly in Anchorage and Fairbanks, around 1950. At that time it was a practice of the territorial U.S. District Court, which had jurisdiction over recording, to enter into reproduction contracts with commercial title insurance companies. The companies furnished the cameras, were responsible for adequate reproductions and furnished a copy of each instrument to the court under the terms of the contract. Since these arrangments were on a local basis, the size of the copies and the quality of the product varied from place to place. At that time the functions of the recorders were regulated by statute, but their activity lacked central supervision. The statute had made some provision for maintenance of books, for indexing, for fees and general duties of recorders.

Pursuant to the Session Laws of Alaska of 1959 and effective in 1960, the Alaska Supreme Court, by Order No. 12, established the recording districts and designated District and Deputy Magistrates to act as Recorders. There are fourteen (14) amendments to Order No. 12 which correct descriptions, change places of record and combine recording districts. The last major changes took place on July 1, 1975. Order No. 12 was revised to combine the geographical boundaries of:

McCarthy and Chitina Recording Districts to be known as the Chitina Recording District.
Hyder and Ketchikan Recording Districts to be known as the Ketchikan Recording District.
Whittier and Anchorage Recording Districts to be known as the Anchorage Recording District.
Fairhaven and Cape Nome Recording Districts to be known as the Cape Nome Recording District.
The Barrow Recording District was established.
The Kotzebue Recording District was established.

The Noatak-Kobuk Recording District was merged with the Fairbanks Recording District in 1969. A portion of the Noatak-Kobuk Recording District/Fairbanks Recording District above the 68°N latitude is now the Barrow Recording District and a portion of the Noatak-Kobuk Recording District/Fairbanks Recording District below the 68°N latitude is now the Kotzebue Recording District.

On August 3, 1971, the court created the position of District (State) Recorder with the responsibility for overseeing the operation of recording throughout the state.

On January 1, 1977, the Recording System was transferred to the Department of Administration, Division of General Services and Supply.

On July 1, 1979, the Recording System was transferred to the Department of Commerce and Economic Development, Division of Banking and Securities.

On July 1, 1980, the Recording System was transferred to the Department of Natural Resources, Division of Technical Services, which agency and division now has the responsibility for operation of the recorder's offices.

With each transfer, the department was given authority to establish regulations for establishing, modifying or discontinuing recording districts.

From 1960 until June 16, 1967, the geographical description for each recording district was the offical description of that recording district. Amendment No. 8 of Order No. 12, dated June 16, 1967 changed that by designating the "Alaska Recording Districts' Portfolio", dated September 1, 1964 as the official maps describing the boundaries of all recording districts. The maps and legal descritions were intended to complement each other, but if there were a discrepancy, the boundary as shown on the offical maps would govern. A full set of these maps, as amended, may be found in Anchorage, Fairbanks and Juneau. Each place of recording for the other areas has sets for the recording districts for which they are the place of record. There is also a large Recording District Map in each office, showing boundaries of all recording districts in relation to one another.

Since the last major changes to recording districts on July 1, 1975, there have been thirty-four (34) recording districts serviced through fourteen (14) different offices. Nine (9) of these offices are staffed and managed by the Department of Natural Resources, Division of Technical Services personnel. The remaining five (5) offices are administered through the Alaska Court System personnel on a part or full time basis.

Due to the great expanse of real estate within the State of Alaska and the infrequency of population centers, the functions and scope of separate recording offices will vary. In some instances the volume of recording is not sufficient to warrant an office and full time employee. In five (5) recording districts (Chitina, Kodiak, Seward, Sitka and Valdez) the situation is handled by employing Court System personnel on a part time basis. In other recording districts the volume is so low that part time employment of court employees is not feasible. These areas are handled by larger recording district offices with maintenance of grantor and grantee indices and paper copies of documents supplied to court offices within those districts. Recording districts administered in this manner include: Aleutian Islands, Bristol Bay, Cordova, Haines, Kuskokwim, Kvichak, Nenana, Petersburg, Skagway and Wrangell. Still other small populus districts are administered and maintained in larger offices with no local offices maintained. These districts include: Barrow, Ft. Gibbon, Iliamna, Kotzebue, Manley Hot Springs, Mt. McKinley, Nulato, Rampart, Seldovia and Talkeetna.

After the initial processes of checking for statuatory compliance, clocking in and indexing, all documents must be forwarded to one of the three (3) copy centers for microfilming of the original documents. After microfilming, all documents are returned to their place of reception for proper dispersal. The copy centers are:

ANCHORAGE for: Aleutian Islands, Anchorage, Bethel, Bristol Bay, Chitina, Cordova, Homer, Iliamna, Kenai, Kodiak, Kuskokwim, Kvichak, Palmer, Seldovia, Seward, Talkeetna and Valdez Recording Districts.

FAIRBANKS for: Barrow, Fairbanks, Ft. Gibbon, Kotzebue, Manley Hot Springs, Mt. McKinley, Nenana, Cape Nome, Nulato and Rampart Recording Districts.

JUNEAU for: Haines, Juneau, Ketchikan, Petersburg, Skagway, Sitka and Wrangell Recording Districts.

Photostatic copying was introduced in the larger cities (Anchorage and Fairbanks) around 1950. In 1971 microfilming techniques were instituted and have been refined to the present day use of microfilm reader/printers and 16 and 35mm microfiche and roll microfilm, cataloged through the use of computerized alphabetic grantor, grantee and real property legal description indices. The Anchorage Recording District was the first district with computerized indices. This was started June 22, 1971. The Palmer Recording District began November 1, 1971. Talkeetna, Fairbanks, Kodiak, Kenai and Cape Nome Recording Districts began January 2, 1972, Juneau Recording District began July 1, 1972, Ketchikan and Sitka Recording Districts began August 1, 1972, Homer Recording District began July 1, 1974, Kvichak, Cordova, Aleutian Islands, Nenana, Rampart, Nulato, Mt. McKinley, Manley Hot Springs, Kuskokwim, Bethel, Chitina, Valdez and Seward Recording Districts began January 2, 1975, Petersburg, Wrangell, Seldovia and Bristol Bay Recording Districts began July 1, 1975, Haines and Skagway Recording Districts began January 2, 1976. There are also computerized indices for Fairhaven Recording District from January 2, 1972 until it was merged with Cape Nome July 1, 1975. There are also computerized indices for McCarthy Recording District from January 2, 1972 until it was merged with the Chitina Recording District July 1, 1975. There are computerized indices for the Hyder Recording District from January 2, 1973

until it was merged with Ketchikan Recording District July 1, 1975. All the computerized information is dispersed to the appropriate offices through the Anchorage Recording District office.

The purpose of the Recorder's Offices has always been to provide a secure, impartial place of record for real property documents. In most cases these records are irreplaceable and yet necessary to maintain a chain of title to all real estate within the State of Alaska. The Recorder's Offices also provide a mechanism by which liens, Deeds of Trust and other encumbrances against specific properties may be brought to the public notice.

Illustrations attached indicate the complexity and type of documents filed or recorded. Statistical data has been supplied for years 1975 through 1932. Also a skeleton organizational chart depicting the present day structure of the fourteen State Recorder's Offices.

XIV. TABLE OF COMMON DOCUMENTS

This is a compiled list of legal documents that are most frequently recorded of record: (Must use Book & Page Numbers)

DOCUMENTS RECORDED IN THE DEED BOOK:	INDEX CODE - D
Warranty Deed	AS 34.15.030
Quitclaim Deed	AS 34.15.040
State Police Deed	
Guardian's, Administrator's or Executor's Deed	AS 34.25.050
Trustee's Deed	AS 34.20.080
Patents	
Clerks Deed	
Bill of Sale (when conveyance of real property and requires a full acknowledgement)	
Tax Deed	AS 34.25.080

DOCUMENTS RECORDED IN THE LIEN BOOK:	INDEX CODE - LI
Notice of Right To Lien	AS 34.35.064
Acknowledgement of Right to Lien	AS 34.35.069
Verified Mechanics or Materialmen Lien	AS 34.35.070
Bond	AS 34.35.072
Extension Notice	AS 34.35.080
Release of Lien	AS 34.35.485
Certified Copy of Judgement or Decree of a Court of This State or the United States	AS 09.30.010
Satisfaction of Judgement	AS 09.30.310
Certificate of Attachment or an Order or Proceeding of Record Discharging attachment	AS 09.40.050
Employees Lien for Failure to Make Payments to a Benefit Fund	AS 23.10.047

STATE RECORDER'S OFFICE
TITLE ADMINISTRATION & RECORDS
DIVISION OF TECHNICAL SERVICES
DEPARTMENT OF NATURAL RESOURCES

STATE RECORDER'S OFFICE:

PROGRAM MANAGER: Rose E. Farren

MAJOR PROGRAM: The Recording program is a continuous one and provides constructive notice for real and personal property transactions to the public, which requirement is basic to the American system of land transfer and financial responsibility.

MAJOR RESPONSIBILITIES: In compliance with statutory requirements, maintain in a timely and accurate manner, making same easily useable, properly indexed and readily available to the public and industry, a reliable set of public records of all transfers of real and personal property interests, financial responsibility connected therewith and related documents so as to constitute constructive notice to all.

ACCOMPLISHMENTS FY 84: Based on past statistics, we projected an increase in workload of 13% statewide. This appears to no longer be a viable percentage, as the workload statewide has increased 25% in the first half of FY84 as compared to the first half of FY83. FY83 budget was $1,563,200.00, FY84 budget was $1,592,800.00. $76,000.00 of FY84 budget was appropriated for establishing a new Recording Office in Kotzebue. Target date for opening this office is April 1, 1984.

One employee was added to the Palmer, Talkeetna Recording District office. With the additional employee, this office has brought the indexing (retrieval) system for all recorded or filed real and personal property documents for these two districts, to an acceptable level of one (1) to two (2) days. However, if the workload continues to increase at the rate of 25%, two (2) additional employees will be required to keep the Palmer, Talkeetna office at this level in FY84. Sitka Recording District is now staffed by a Department of Natural Resources employee rather than a Court System employee.

EMPHASIS PLANNED FOR FY85: Develop and maintain new computer program, to reduce data entry time, processing, system maintenance, manhours and paper cost. Present program is obsolete and expensive to maintain.

Move Fairbanks Recorder's Office from Court System building to larger, more adequate space.

Re-establish normal business hours to the public in Anchorage and Kenai offices. Limit the present 60 day delay in creating indexes for title search function for the Anchorage office to 30 days (acceptable time frame is 1 to 2 days). In various other district offices, this process is presently from 10 to 45 days behind. Limit the present 276 days in returning original recorded documents in the Anchorage office to 120 days (acceptable time frame is 14 to 21 days).

FUTURE PROGRAM NEEDS:

There are at least 13 statutes that the recording function operates under on a regular basis. Regulations have needed to be developed and implemented for many years.A fireproof vault for the Statewide Recording Records has also been needed for many years. If these records were damaged or destroyed, many would be irreplaceable and would create insoluable legal problems with respect to re-establishing accurate chain of title for the Anchorage and Iliamna Recording Districts.
The uncontrollable increase in workload makes it difficult to adequately fulfill recording responsibilities and maintain an acceptable level of service to the public without a corresponding increase in resources. There has to be a proportional growth in the number of staff positions and improvements in automation capabilities to maintain the public services required by statute.

STATISTICS:

There are 34 Recording Districts Statewide that are processed through 14 recording offices, four of which are maintained by part time Court System employees. In FY84, four new positions were allocated for nine (9) Department of Natural Resources Recording Offices and one was added to bring the Sitka Recording District under the administration of DNR (Sitka was previously staffed by a Court employee). The establishment of a Kotzebue recording District Office, presently processed through the Fairbanks Recording Office, will bring the total number of Recording Offices statewide to 15, staffed by 43 DNR employees and 4 part time Court System employees.
From FY75 through FY83 there were no increases in staffing levels to accommodate for the growth in the real and personal property transaction volume. In CY75 there were 132,922 real and personal property transactions processed through 14 recording offices, in CY83 there were 271,370 real and personal property transactions an increase of 51%. Until November 1983, these were processed by 38 DNR Recording Office employees and 5 part time Court System employees.

STATE RECORDER'S OFFICE 1/

FUNCTION	BENEFITS
1. Record and/or file a multitude of documents and plats 2/ placing them of record so as to constitute constructive notice.	1. Provides constructive notice to the public which requirement is basic to the American system of land transfer and financial responsibility.
2. Index and cross index and photograph or copy all documents and plats and maintain them in a manner so as to allow public viewing and use and for archival purposes.	2. Allows the public, lending institutions and title companies to readily check chain of title, encumbrances and financial responsibility with limited or incomplete information to begin with and be self serving.
3. Supply copies of documents to public, other state agencies and lesser units of government. Furnish certified copies to the court and/or parties to litigation.	3. Allows for greater geographic distribution and use of record data without forcing public to travel great distances and/or request information in writing. Allows municipalities, boroughs and other taxing entities to maintain current tax roles. Certified copies are acceptable as evidence in a court of law.
4. File and provide searches of documents under the Uniform Commercial Code system involving real and personal property.	4. Provides the business and financial community with informaton that allows them to identify financial responsibility necessary in the conduct of day to day business.

1/ Presently organized with section status within the Division of Technical Services, Department of Natural Resources. Network consists of thirty four (34) recording districts serviced through fourteen (14) different offices. For a brief history and organization of the Alaska Recorder's Office see attached information pamphlet.

2/ For list of documents see appropriate pages in pamphlet attached.

GOVERNOR'S OFFICE USE

Comments:

☐ Position Noted	By	Date

SUMMARY

1. a) Related Bills (Similar or Conflicting	1. b) Other Agencies Affected by Bill
None known	DOT/PF and local government
2. a) Organizational Support for Bill	**2. b) Organizational Opposition to Bill**
It is assumed title, mortgage and banking industry support bill.	None known

3. Program Effects of Bill

Will gather together and clarify provisions on recording that are now scattered throughout the Alaska Statutes and will lay a suitable framework for future use of technological advances in a centralized recording system. When fully implemented and automated will allow for a more cost effective operation of the Recorder's Office.

4. Fiscal Impact: ☐ Non- ☐ Fiscal Note Attached

5. Amendments Proposed:

See detail of bill analysis attached.

6. Comments:

See detail of bill analysis attached.

SB 245 and HB 342 Bill Analysis

General Comments:

1. As stated in the memo from the Code Revision Commission, dated February 22, 1983 and Journal Supplement #10, dated April 8, 1983, the general purpose of the bill is to gather together and clarify provisions on recording that are scattered throughout the Alaska Statutes, and lays a suitable framework for future use of technological advances in a centralized recording system. It also establishes two classes of documents, Class A for constructive notice recording and Class B for other documents to be placed of record for safekeeping.

2. Sections 1-19 deal with plats and maps [illegible]ence to "filing" and "recording" them. The most common disti[illegible]tween the two words or processes with reference to the record[illegible] is that a "filed" document becomes the property of the St[illegible]s not returned to the original owner. A "recorded" document do[illegible] become the property of the State and is returned to the owner. In both instances they are "placed of record" and microfilm copies are available. In the case of plats the original is kept as it is often needed to determine detail not ascertainable on the microfilm copy. Originally they were kept because a plat could not be hand copied into the record book as other types of written documents could be and were. The manner in which they are assigned a retrieval number is different. A recorded document is given a book and page number, i.e., Book 90 Page 225. A filed document such as a plat is given the next sequential number in the series preceded by the last two digits of the year in which filed, i.e. 84-26.

It should be noted that probably because of an inconsistent use of the words "file" and "record" in statutory language other documents have been historically filed and not returned to the owner. Among them are some liens, some lien releases, limited partnership agreements, etc. Like plats, they are numbered within their own series and kept as property of the State. Though not originally done to facilitate retrieval, the system has benefited the retrieval process and is accepted by the industry.

After the consideration of the impacts of Sections 1-19 upon the State Recorder's Office it is the consensus of opinion that there are no objections to Section 1-19 so long as it is clear that filed plats become the property of the State and the legislative history reflects the basic difference between a filed and recorded document. As the new system is implemented all other documents now processed as "filed" and kept will be processed as "recorded" and returned to the owner as provided for in this bill.

Chapter 17 Section by Section Comments

Sec. 40.17.010. Acceptable, no comment.

Sec. 40.17.020(a). Acceptable, no comment.

February ??, 1984

Sec. 40.17.020(b). We have some concern because what we like to think of as two separate subjects are covered here and we believe a third should be added. The three subjects are 1) accepting a certified copy of a conveyance document recorded or filed in another state, 2) accepting a certified copy of a conveyance document filed or recorded with the United States Bureau of Land Management and 3) the proposed addition, accepting a certified copy of certain conveyance documents originating with and of record with the Department of Natural Resources.

1) Comment. This is a desirable feature even to using the broad term "conveyance" as defined in the bill.

2) Comment. This is a desirable feature but should be separated from above with more restrictive language than the word "conveyance". It should be limited to Patents, Quitclaim Deeds, Warranty Deeds, Certificates of Allotment, Clearlists, Tentative Approvals and Interim Conveyances. An affidavit should accompany the certified copy for recording with it setting forth the facts as to why the original is not available for recording. The Recorder's Office now reluctantly accepts certified copies of these documents without an affidavit under the weak authority of an informal opinion in letter form issued by a former legal assistant for the Alaska Court System.

3) Comment. The Department of Natural Resource's system for maintaining copies and records of conveyances under its land disposal program is much the same as that of the Bureau of Land Management's. There is occasionally a bonafide reason why an individual no longer has in his/her possession the original conveyance document it having been lost or destroyed prior to recording. The Recorder's Office does not now accept certified copies of conveyance documents issued by the Department of Natural Resources. As with conveyances issued by the BLM this provision should use more restrictive language than the word conveyance and be limited to Patents, Warranty Deeds, Quitclaim Deeds and Deeds of Title.

It is suggested that sub-section (b) be amended as follows and sub-section (c) and (d) be added.

(b) A certified copy of a conveyance that is eligible for recording as a class A document under A.S. 40.17.030 and 40.17.110 and that has been recorded or filed in a public recorder's office in another state may be recorded only as a class A document, and only in the records of a recording district where land affected by the conveyance is located. When so recorded, it has the same effect from the time it is recorded as though it were the original land conveyance.

(c) A certified copy of a conveyance restricted to a Patent, Quitclaim Deed, Warranty Deed, Certificate of Allotment, Clearlist, Tentative Approval and Interim Conveyance accompanied by an affidavit stating that the original was not recorded and setting forth the fact as to why the original is not available for recording originally issued by the Bureau of Land Management that is eligible for recording as a class A document under AS 40.17.030 and 40.17.110 and that has been recorded, filed or true copies maintained in offices of the Bureau of Land Management may be recorded only as a class A document, and only in the records of a recording where land affected by the conveyance is located.

When so recorded, it has the same effect from the time it is recorded as though it were the original conveyance. (Note: Though concerned generally with the proposal to accept any copies, the State Recorder agrees to this proposed amendment so long as it is restricted to named documents and accompanied by an affidavit as proposed.)

(d) A certified copy of a conveyance restricted to a Patent, Warranty Deed, Deed of Title and Quitclaim Deed accompanied by an affidavit stating that the original was not recorded and setting forth the facts as to why the original is not available for recording originally issued by the Department of Natural Resources that is eligible for recording as a class A document under AS 40.17.030 and 40.17.110 and that has been recorded, filed or true copies maintained in offices of the Department of Natural Resources may be recorded only as a class A document, and only in the records of a recording district where land affected by the conveyance is located. When so recorded, it has the same effect from the time it is recorded as though it were the original conveyance. (Note: The State Recorder has the same concerns here as noted under (c) above.)

Sec. 40.17.030(a)(b). As it now reads the document shall be accompanied by or include the mailing addresses of all persons named in the document who grant or acquire an interest.... The addresses of persons who grant are not necessary but the addresses of persons who acquire are necessary as lesser units of government use this information to post and keep tax roles and other records current.

We suggest the two words "grant or" on line 1 page 11 be deleted.

Sec. 40.17.030(c). For clarification purposes we suggest the word "only" on line 9 be deleted and the following added to the sentence after the last word law, "or by regulation to comply with accepted legal practice."

All other sub-sections acceptable and no comment.

Sec. 40.17.040. Acceptable, no comment.

Sec. 40.17.050. Acceptable, no comment.

Sec. 40.17.060. Acceptable, no comment.

Sec. 40.17.070(d). We have concern with the words "...and a citation of the statute requiring rejection." on lines 3 and 4 page 13. These words place a higher degree of adjudicative responsibility upon the District Recorder's than they now have, however we feel that the process can be adequately covered in regulations.

All other sub-sections acceptable and no comment.

Sec. 40.17.080. Acceptable, no comment.

Sec. 40.17.090. Acceptable, no comment.

Sec. 40.17.100. Acceptable, no comment.

Sec. 40.17.110(10). We have two concerns with (10). There is no definition of "conformed copy" and one or perhaps two are required. See comments under Sec. 40.17.140.

We assume (10) relates to existing Sec. 34.15.340(6) and if it does, it is not definitive enough in that it does not name the documents as named in Sec. 34.15.340(6). They are, lease, contract or option to purchase real property. We object to the fact that (10) as now written includes all documents and feel it should be restricted as Sec. 34.15.340(6) is. Further, wherever used the word "conformed" should be replaced with the word "true". The use of the word confromed in (10) is not consistant with the common definition of the word as it relates to the Recorder's Office. See proposed definition under 40.17.140.

All other sub-sections acceptable and no comment.

Sec. 40.17.120. Acceptable, no comment.

Sec. 40.17.130. Acceptable, no comment.

Sec. 40.17.140(7) to be compatible with the definition of "file", which we will propose be added, the following words should be added to the definition of "record." "After recording a recorded document is returned to the owner or other person so designated."

We suggest the addition of the following definitions to be appropriately arranged in numerical sequence.

(11) "conformed copy" means a true copy of a document upon which the recorder places recording information, usually done at the time the original document is presented for recording or filing. A copy made of a previously recorded document would not need to be conformed as it already contains to the recording information.

(12) "file" means the acceptance of a document for recording otherwise meeting statutory requirements when the document will become the property of the State, such as a plat and is not returned to owner.

Sec. 40.19.010. Acceptable, no comment.

Sec. 40.19.020. Acceptable, no comment.

Sec. 40.19.030. Acceptable, no comment.

Sec. 40.19.040. Acceptable, no comment.

Sec. 40.19.050. Acceptable, no comment.

Sec. 34.15.015. Acceptable, no comment.

Sec. 34.10.041. Acceptable, no comment.

Sec. 43.10.042. Acceptable, no comment.

Sec. 44.37.025. Acceptable, however we agree with the Revisior of Statutes that it should be placed in Title 40.

Sec. 25 of proposed bill. Acceptable, no commment.

Sec. 26 of proposed bill. Acceptable, no comment.

Sec. 27 of proposed bill. For reasons explained in fiscal note the effective date of the Act should be January 1, 1986.

MEMORANDUM State of Alaska

TO: Bud May
Deputy Director
Division of Technical Services

DATE: March 16, 1984

FILE NO:

TELEPHONE NO:

FROM: Edward G. Barber, Jr.
Head, Contract Administration

SUBJECT: SB-245 & HB-342 - Recordation of Certified Copies of State Title Conveyances

HB-245 and HB-342 have been reviewed and we certainly agree that the Department must, through some mechanism provide the periodic recording of State Title Conveyances, when the original document has been lost or destroyed.

The mechanism should be extremely strict and only permitted when there are no other alternatives. Such an action should require the signature of a Director.

One might argue that an individual requesting such an action be required to proceed through Action to Quiet Title , but in many situations it is a subsequent "title" holder that initiates such a request. If we permit recordation of certified copies of title conveyances, but only under very strict guidelines, we may prevent legislation that could quite possibly jeopardize the entire recording system.

SB 245 and HB 342, FISCAL ANALYSIS

Assumptions

1. As stated in the memo from the Code Revision Commission, dated February 22, 1983 and Journal Supplement #10, dated April 8, 1983, the general purpose of the bill is to gather and clarify provisions on recording that are scattered throughout the Alaska Statutes, and lays a suitable framework for future use of technological advances in a centralized recording system. It also establishes two classes of documents, Class A for constructive notice recording and Class B for other documents for safekeeping.

2. Based on a feasibility report, the current recording system, which is computerized in a batch mode system, does not allow f anticipated growth in the workload. The current computerized recording stem is in desperate need of having its program rewritten to corr t current problems.

3. A new computer program, whether written for the current recording system or the new recording system, would be approximately the same cost and ould provide cost savings to the State by reducing data entry, processing, systems maintenance, manhour and paper costs.

4. A new system must have a centrally located data base with on-line access from the three copy centers in Anchorage, Fairbanks, and Juneau.

5. In the forseeable future, the outlying offices will not have this capability due to their remote locations and will continue with the current manual procedures to send the manually written data to one of the three copy centers for entry into the system.

6. The three copy centers will have in-house printers for hard-copy printout, which is required daily. This will eliminate the manual system presently used which, based on manhours, is quite time consuming and costly. These hard-copy printouts are needed and used by title companies, lending institutions, numerous agencies and the public for up-to-date filing and recording information.

7. All assumptions are based on the passage of the bill in FY 84 with an effective date one-and-a-half years after passage of the bill on January 1st. If the bill was passed in FY 84, the effective date of the bill will be January 1, 1986. This would allow funding for implementation to be spread over three fiscal years. Additionally, it would allow timely and quality implementation of the new recording system. Mandated and proper design of separate computer programs for Class A and Class B documents, writing of comprehensive regulations and procedural manuals followed by training of all personnel and users is time consuming.

8. A revised schedule of fees for the department now being considered will generate additional income of $600.0 per year for the Recorder's Office. This does not include fees for Class B documents as none are now recorded. Assuming that 5000 Class B documents, which is only 2% of the total documents now recorded, will be recorded in the first year of operation an additional $50.0 in fees would be generated. As the public becomes familiar with the program, the number of documents recorded will most certainly increase resulting in additional fee income. Over the years the increase in existing fees and fees for Class B documents will offset initial costs of the system.

9. All information presently available in the existing system also must be made available in the new system and data conversion costs as distinct from design costs must be separately considered.

Relationship to FY 85 Budget Presentations and Further Assumptions

1. The Recorder's Office workload has increased approximately 13% per year and is seriously backlogged in most offices. The Governor's FY 85 budget submission requests an increase in operating funds of $494.0 with seven reclassed and three new positions statewide. Not included in this figure is a $50.0 one-time cost for writing of comprehensive regulations. On the capital side, with a department priority ranking of 8 out of 21, $350.0 has been requested for study, design, update and expansion of existing or a new computer system whichever is cost effective. Data conversion dollars are not included. In addition, another capital project with a department ranking of 15 out of 21 provides for skeleton network terminals.

2. Analysis of SB 245 and HB 342 in relationship to FY 85 budget submissions, which appear to be reasonable for approval, indicate there are several areas where the bills will additionally impact the department.

A. One Time Costs:

a)	Computer program for Class B documents	$ 50.0
b)	Data conversion, regulation and procedural manual writing, training, reproduction, advertising and associated travel costs	127.0
c)	Equipment costs	5.0
	Total	$ 182.0
	($150.0 FY 85 - $32.0 FY 86)	

B. Continuing Costs Starting FY 86:

a)	One permanent full-time position to handle Class B document recording	$ 26.0
b)	Miscellaneous additional supplies	8.0
c)	Travel costs	3.0
	Total	$ 37.0

PROJECT NEED, DESCRIPTION, AND EXPLANATION OF MAJOR DIFFERENCES BETWEEN SERVICE LEVELS:

Recorders Office:

The Recording Section has the statutory responsibility of receiving & recording or filing for the public all documents pertaining to real and/or personal property transactions. Copies of these documents & indexes thereto must be maintained permanently. These records provide constructive notice to the public which requirement is basic to the American system of land transfer & financial responsibility. They allow the public, lending institutions & title companies to readily check chain of title, encumbrances & financial responsibility with initially limited or incomplete information. These records provide the business & financial community with information that allows them to identify financial responsibility necessary to conduct day to day business.

FY85

CD1198

SL 1 Will allow for 67% of the functions required by statute to be completed and discontinue services provided but not required by statute to the public. Limit business hours to the public to five hours. Limit the return of documents to 136 days, limit the indexing process for title search function used to establish marketable record title to one month.

SL 2 Will allow for 67% of the functions required by statute to be completed and discontinue services provided but not required by statute to the public. Limit business hours to the public to five hours. Limit the return of documents to 136 days, limit the indexing process for title search function used to establish marketable record title to one month.

SL 3 Will allow for 72% of the functions required by statute to be completed and continue to not provide services to the public that are needed but not required by statute. Limit business hours to the public to five hours. Limit return of documents to the public to four months, limit the indexing process for title search function used to establish marketable title to one month.

SL 4 Will allow for the recording function to return to an acceptable level of proficiency and provide the citizens of Alaska with the quality of service they pay for but presently do not receive. This allows for additional office space, and the creation of DNR recording offices out of the four court offices. (All services required by statute and those not required by statute are stated in the statewide District Recorder's office functions statement). Adverse public reaction to the discontinuance of services provided that are not required by statute is documented. Will establish 1 Recorders Office in Valdez with 2 new positions & 2 microfilm equipment operators positions, 1 for Fairbanks copy Center, 1 for Juneau Copy Center. Establish DNR Recorder's Office in Kodiak with 1 new full-time position & ½ time new position. Establish 2 new recording positions for Kenai office to handle Seward Recording District function and the increased workload in Kenai. Establish seven new recording clerk positions in the Anchorage office to re-establish normal business hours and return the recording process to an acceptable standard of performance. The Statewide recording function generates revenue comparable to SL 4 & could be self supporting if placed on program receipts. Will allow the Kenai & Fairbanks Recorders Office to move from Alaska Court System Buildings & provide additional required office space of 800 square feet for Kenai & 3,000 to 3,500 for Fairbanks Office.

FY85

STATEWIDE DISTRICT RECORDERS OFFICE FUNCTION:

Services Required by Statute: (At current budget level of $1,500,000 80% of required statute work will be completed by eliminating all non-statute as identified below):

1. Record and/or file a multitude of documents, placing them of record so as to constitute constructive notice.

2. Index and cross index and photograph or copy all documents and maintain them in manner so as to allow public viewing and use and for archival purposes.

3. Supply copies of documents to public, other state agencies and lessor units of government. Furnish certified copies to the court and/or parties to litigation. (See attached draft memo dated 7/26/83).

4. File and provide searches of documents under the Uniform Commercial Code System involving real and personal property.

5. Prepare monthly reports and furnish copies of Non-Resident Alien Conveyances, Mining documents, Armed Forces report of separation and Change of Ownership documents.

6. Original recorded/filed documents are reviewed, compared to the computer indexes and returned to requestor.
(Quality Control Function).
Benefit: This ensures that all information is accurate and complete before original documents are returned to the requesting party(s).

SERVICES PROVIDED BUT NOT REQUIRED BY STATUTE:

1. Provide copies of all recorded documents, indexes and cross indexes to ten (10) court offices located throughout the state. (See attached Aniak letter dated 6/29/83. - No fee charged - 5% of total workload).

CO1100

Benefit: This allows for greater geographic distribution and use of record data without forcing public to travel great distances and/or request information in writing. It allows municipalities, boroughs and other taxing entities to maintain current tax roles.

2. Compile copies of the hand written reception and location indexes for private companies who publish financial reports. (Fee charged - 3% of total workload.
   Benefit: This information is used by lending institutions, attorneys, builders and numerous other businesses nationwide.

3. Prepare location indexes which describes the real property associated with a particular document. No fee charged - 12% of total workload.
   Benefit: These indexes provide the information necessary to obtain name(s) of the owner(s) of record, if only the real property description is known to the interested party(s) searching the records.

4. Assist and instruct the public in gathering information from the public records. No fee charged - 5% of total workload.
   Benefit: The general public is less knowledgeable in searching these records than those in the title industry. They must be instructed in the method of retrieving the information required by them.

Listed below are priority projects required to provide a more concise and uniform recording system statewide.

1. Establish ten new positions to handle the forecasted 140,000 documents, at full funding which will include their essential equipment (chair, desk, etc.) and an additional 2,000 square feet of office space. The office space to be contiguous to the existing 5,000 square feet. $480K Yearly.

2. Develop and implement regulations for the present recording function and to enact new legislation. Statutes are not specific in nature and are confusing to both the constituents and the recording section. $50K One-Time Cost.

3. Place the recording function on program receipts and allocate additional funds from the general fund to accommodate the free services provided by this section to other state agencies. $150K Yearly.

EXECUTIVE SUMMARY

A Management Analysis of the Operation of the State of Alaska Recorder's Office

Purpose and Scope

From August 29, through September 9, 1983, the Office of Management and Budget conducted a review of the State of Alaska Recorder's Office. The purpose of the review was to:

1. Improve the operational effectiveness of the Recorder's Office.
2. Identify what steps are needed to reduce an excessive workload backlog.

Background

The recording function is a primary activity of government. The Recorder's Office provides a secure place to accurately record real property documents to insure the security and certainty of title.

The Recorder's Office charges recording fees which are returned to the General Fund. In recent years, these receipts have been more than operational costs. However, the Recorder's Office does not have access to these excess receipts as a means to improving operations.

Between 1979 and 1983, the Recorder's Office document processing volume has grown by 24 percent; however, there has not been any proportional growth in the number of staff positions or improvements in automation capabilities. The current automated system cannot be supported.

Findings

1. Workload bottlenecks -

   We found two steps in the processing of recorded documents which create substantial workload backlog. Both are labor intensive steps:

   Indexing -- this process involves transferring information and preparing it for computer data entry. In various district offices, this process was from 20 to 60 days behind.

   Validation -- This process includes comparing computer reports to source documents to insure accuracy. This process was up to five months behind at one office. Because original source documents must be kept for

validation, the public often must forfeit documents for up to five months or have duplicate copies made.

2. Responsiveness -

The Recorder's Office workload is controlled externally by the public demand for recording; however, the ability to manage the workload is controlled internally as a function of the State's operating budget and the authorized staffing levels.

The Office has little, if any, flexibility to respond quickly to the volume of transactions received from the public. Unless action is soon taken to add staff for the backlog described above, the backlog will continue to grow.

3. Storage -

The Recorder's Office archives storage area is not fire proof. If the Anchorage public records were destroyed, there is a high probability that the archives would also be destroyed. This would create insoluable legal problems with respect to re-establishing accurate chain of title for the Anchorage Recording District.

Conclusions

1. Within the current budget and staffing level constraints, all practical steps have been taken to increase the efficiency of indexing and validation.

2. If the State Recorder's Office could use more of the funds generated by recording public documents, the Office could more easily staff for increased levels of activity. The inability to provide an adequate level of service costs the public about $9 million per year. Under this concept, increased recording fees may be necessary if it is desired that the Recorder's Office contribute a fixed amount of surplus funds to the General Fund.

3. The lack of a fire proof storage area for archival documents presents an unnecessary risk which could have a devastating effect upon the continuity and security of future land title recording activities.

Recommendations

1. Increase the number of full time permanent employees to handle the projected increase in transaction volumes. The estimated cost is $226,000 per year.

2. Hire part time, temporary employees to reduce the current indexing and validation backlog. The one time estimated cost is $4,200 to $13,500.

3. Automate the indexing portion of the document processing workload by using optical scanning equipment or a computer system capable of online data entry or both. The estimated one time cost is $350,000 plus annual maintenance.

4. Use program receipts to fund the suggested automation and staff increases. This would enable the Recorder's Office to better meet the service level demands imposed by the public.

5. Identify two fire proof locations for archive storage. One would serve as the primary storage for archives. The second location would serve as a backup in the event the first archival site was destroyed.

MANAGEMENT ANALYSIS OF THE OPERATION OF THE STATE OF ALASKA RECORDER'S OFFICE

At the request of the Department of Natural Resources, Division of Technical Services, the Office of Management and Budget conducted a management review of the State Recorder's Office from August 29 through September 9, 1983.

The purpose of the review was to determine what actions are needed to improve overall operations of the office and to reduce the workload backlog, dating up to five months. The methodology used to conduct the review involved:

a. reviewing Alaska Statutes regarding Recorder's Office duties;

b. reviewing history and functions;

c. observing operations in the offices at Anchorage, Kenai and Palmer;

d. interviewing title companies and Recorder's Office employees.

BACKGROUND

The Recorder's Office has been affiliated with many State entities. First with the Alaska Court System until transfer to the Department of Administration in January 1977. It next came under the control of the Department of Commerce and Economic Development in July, 1979. In July, 1980 it was finally transferred to the Department of Natural Resources.

The transfers have likely contributed to inadequate support, funding or management attention. These factors could be the causes of the operational problems which currently exist.

In the four year period from 1979 to 1983, there was a 24 percent increase in the number of documents processed by the Recorder's Office. Although the budget for the office increased, there were no increases in staffing levels to account for the growth in transaction volume. The past inadequate staffing has contributed to the backlog, the untimely processing of source documents which belong to the public, and to additional costs for those who are financing land purchases and sales.

There are three areas which require immediate attention.

WORKLOAD BACKLOG

We identified two steps in the document processing cycle which create backlogs. Both of these steps are very labor intensive.

Indexing

The indexing process occurs prior to computer data entry, microfilming and report preparation. This involves transferring information from source documents to data entry forms. This manual transfer of "index information" re-

quires about two minutes per document; however, because of the volume of documents received which require indexing, it may take two staff days to index one day's volume of documents. This condition occurred during our review on September 1, when 550 documents were received.

Because of processing activities which occur before indexing, the past inadequate staff levels, and the high volume of documents received, a three week processing delay now exists. For example, on September 1, 1983 the Anchorage office was indexing documents received August 10. At the Kenai office, the documents being indexed that day included those received during July.

This delay impacts the availability of current reference materials for the public. For example, title companies refer to unvalidated reports to determine if there are liens on property. As a result, the accuracy of their assessments is in doubt.

Validation

Validation is necessary to insure that reports available to the public are accurate. The process involves the comparison of the source document to the computer report. Because the public needs current information, unvalidated reports are placed in the library for public use. On September 1, 1983 the most current report in the Anchorage office was dated August 9. In Kenai, the last validated report was December 16, 1982.

Original source documents cannot be returned until validation is accomplished. During our review, original documents dating back to April 12, 1983 were not yet mailed.

RESPONSIVENESS

The Recorder's Office has no control over the workload it must handle. The workload is controlled externally by public demand for the recording of documents. In contrast, the ability to handle the workload is controlled internally by operating budget and staffing constraints.

Because of the conflict between internal constraints and external demands, the Recorder's Office cannot quickly react to increased public requirements. As a result, backlogs occur causing degraded service to the public.

The time needed to conduct title searches has increased from 1 to 10 days. This delay creates a financial burden to the general public through increased interest charges on every transfer of real estate involving security interest. Based on the number of mortgages being processed in Anchorage, the increased time needed to conduct title searches costs the public about $9 million per year. (See Attachment 1)

ARCHIVE STORAGE IS NOT FIRE PROOF

The Anchorage Recorder's Office maintains the State archives which are kept in a room that is not fire proof. The archives provide the only source of information in the event the public records are lost or destroyed. If the

district records in Fairbanks were destroyed, the archives in Anchorage would be used to replace them. However, if the archives and public records in Anchorage were destroyed, there would be no means to replace the Anchorage records and they would be lost forever.

The archive storage room is also used to store original documents until the computer reports are validated and the originals returned to the public. A fire in the archives room could also destroy these very valuable documents.

CONCLUSIONS

--All possible management efforts have been taken to increase the efficiency of processing documents. These efforts include:

- The dual qualification of personnel to insure that personnel are fully utilized;
- reducing the amount of handling of the documents;
- borrowing personnel from other Department of Natural Resource activities and other state agencies on a short-term basis.

--The Recorder's Office cannot quickly respond to increased public demands for service. The ability to provide an increased level of service to the public is constrained by the operating budget and staff levels. Failure to provide increased service to the public creates a backlog of documents waiting to be processed. This causes public records to be out-of-date which increases the time required for title searches. Costs to the public, in Anchorage alone, are about $9 million per year.

--The lack of a fire proof archive storage area is an unwarranted risk. The loss of archival documents would create untenable legal problems concerning certainty and continuity of title.

RECOMMENDATIONS

Increased Permanent Staff

The Department of Natural Resources should increase the staffing levels in the State Recorder's Office. This increase should include the addition of permanent full time employees to handle projected increases in the workload. The following are our estimates of permanent position requirements.

- Anchorage - 5.0
- Kenai - 1.5
- Palmer - 1.5

It is estimated that personnel, equipment and space rental costs would be about $226,000 per year.

The total number of new full time positions which are required might be reduced through the consolidation of remote Recorder's Offices which DNR considers not cost efficient. A workload analysis of these offices might lead to the transfer of positions to those recording districts where new positions are needed.

Temporary Staff

Temporary part time employees should be hired to work on eliminating the current backlog. These employees could be obtained from temporary employment agencies, students or handicapped personnel. It is estimated this would cost from $4,200 to $13,500.

Automation

The Department of Natural Resources should automate the document recording process as much as possible. Considerations, at a minimum, should include:

- The use of an optical scanner for indexing and validation activities;
- The use of an on-line date entry system; or
- A combination of optical scanner and on-line capabilities.

The advantages of automation are:

- An optical scanner would reduce the time required to enter indexing information by 60-70 percent.
- On-line data entry would be much faster than manually transcribing indexing information.
- On-line entry could automatically compute fees, record book and page data and enter serial number, date and time information.
- Both an optical scanner and on-line system could be tied directly to a computer for data entry purposes. The capabilities of these systems would eliminate much of the manual data entry requirements and improve accuracy.

Development of an automated system should be accomplished using a structured methodology. Department of Natural Resources studies estimates that automation would cost $350,000.

Administration and Use of Program Receipts

Consider establishing a board of directors to manage the State Recorder's Office. The board could represent a cross section of the state and private functions to which services are provided. This board could approve or disapprove all actions relating to the operation of the Recorder's Office. Administrative control should remain under the Department of Natural Resources.

The State Recorder's Office should be provided with the capability to use program receipts for staffing and automation requirements. This would allow the office to more quickly react to public demand for increased service levels without the constraints of the normal budget and staff acquisition processes. In FY 1983, the Recorder's office program receipts were $1.2 million more than the operating budget. This surplus could fund the costs for all previous recommendations. If it is desired to have a fixed amount of surplus receipts deposited to the general fund, then consideration should be given to increasing recording fees.

Archive Storage

The Department of Natural Resources should take immediate action to obtain a fire proof area for the storage of archive documents. In addition, a second fire proof archive repository should be obtained to store second copies of archival documents. This second repository should be located so that any catastrophic event which might destroy one facility would not destroy the second.

ATTACHMENT 1

The estimate of the financial impact to the general public is based upon the delay in processing recorded documents. A real estate purchase is not considered officially closed until it has been recorded. At the closing meeting, all documents are signed and then forwarded for recording. Any delay in recording will mean the seller will not receive the purchase price money until the transaction has been officially closed. During the delay, the seller has lost the interest which could be earned if the purchase price money had been received and invested on the day of the closing meeting.

Mortgages in the Anchorage area are estimated to number at least 30,000 per year. The mortgages average about $100,000 each. At a 12 percent interest rate the daily interest lost is about $1,000,000. A nine-day delay would mean about $9,000,000 lost.

30,000 mortgages x $100,000 per mortgage = $3,000,000,000.

$3,000,000,000 x 12%/360 days = $1,000,000 per day.

$1,000,000 per day x 9 day recording delay = $9,000,000.

Re: Report of the Task Force of the Business Law Section of the Alaska Bar Association regarding HB 343 and SB 246, Corporate Code Revision.

Dear Representative Cowdery:

Enclosed please find the report of the Task Group of the Business Law Section of the Alaska Bar Association. The report is the result of significant efforts by members of the task group who took time out of their busy practices to serve without compensation in providing their expertise on a subject of great importance to the Alaska business community. Each member on the task group has significant experience as a business law practioner.

Admittedly, the accompanying report is a brief review of a lengthy piece of legislation. The drafters have attempted to highlight certain areas of concern and hope that this report will aid the legislature. Listed below are the members who participated in the task group and their addresses and phone numbers. Please feel free to contact the group if we can be of any further assistance.

Very truly yours,

Paul D. Kelly

Re: Report of the Task Force of the Business Law Section of the Alaska Bar Association regarding HB 343 and SB 246, Corporate Code Revision.

Dear Sir:

Enclosed is a review by the Task Force of the Business Law Section of the Alaska Bar Association of Senate Bill 246 and House Bill 343, the Corporate Code Revision.

The Review represents a time-limited study of the bills and was performed for the limited purpose of bringing to your attention some of the possible legal and economic consequences to the business community and the Alaska public that could arise if the bill were adopted in its present form. We urge you, then to consider this only as such and not an exhaustive section by section analysis of proposed amendments or a scholarly attem, opposition or rebuttal to the work product of the Code Revisi Commission.

In our deliberations, we met, both in subcommittees and as a whole Task Force with John Abbott, Chairman of the Code Revision Commission. At some of those meetings, Jerry Kurtz, another member of the Commission, was also present. At these meetings there was candid exchanges of views on the bills. In addition, we were advised that Professor Dan Fessler was available to meet with us, although at a date too late to assist us with this report given the time constraints put on our work by your Committees.

Individual sections of the bills are commented upon in the attached review, but considering the bills as a whole, we would make the following observations:

1. Any major revision of a comprehensive body of law, such as the Corporate Code should include as one of its objectives, making the practice of law and business operations under the Code easier and more explicit.

We believe the proposed bill goes a long way to make the law more explicit than our current Code in many aspects, but not necessarily easier under which to practice or conduct business. For an Alaskan practioner, far more work needs to be done in carefully drafting Articles, By-laws and other documents than is currently the case. While it may be the intent to encourage the preventive practice of law and reduce remedial litigation, in the vast majority of cases, we think it will merely raise the cost of going into business in the corporate form.

For the out-of-state practioner, the problem is compounded, because as more states adopt the revised Model Act, Alaska's unique departures will require special time and study to assure compliance.

2. The Bills contain very material departures from current law in substantive rights and liabilities among corporate management, shareholders, creditors, secondary acquirers of shares and third parties doing business with Alaskan and even foreign corporations in Alaska.

We have two concerns about these departures. First, some substantive changes, such as the proposed limitations on distributions and the proposed direct liability of Officers and Directors to creditors are significant barriers to stimulation of commercial activity in the state and ought not to be adopted as this state's public policy. Second, we believe that passing a law this session with a July 1, 1984, effective date that contains such significant changes will prove to be an unwarranted shock on the practicing bar, the affected business community and the public.

3. Many provisions of the current Alaska Corporations Code merit attention and any thorough revision of the Code should analyze these special provisions to test their current value. Many of these provisions, such as registration of controlling out-of-state shareholders and disclosure of alien ownership, are ripe for elimination.

We found numerous occasions in the bills and the accompanying comments where these provisions were restated in the revision without explanations to their continuing value.

4. In March, 1983, a final exposure draft of the revised Model Business Corporation Act drafted after much careful study, under the auspices of the American Bar Association was released. The revised Model Act is the product of top legal and business professionals from across the nation.

We recognize that Professor Fessler has drawn liberally, in his proposals to the Code Revision Commission version, from the Model Business Corporation Act before its 1983 revision. Submitted herewith for your reference is a copy of the March 1983 Model Act draft. The final version is due to be published in the summer of 1984, with minor changes.

Some members of the Task Force have reviewed the revised Model Act and the accompanying commentary had the benefit of nationwide consideration by practioners and academicians and, to the extent adopted in other states, will enhance interstate corporate commerce. In our opinion if a comprehensive revision is deemed necessary, the revised Model Act is the appropriate vehicle for Alaska to utilize.

Furthermore, we urge consideration of the Model Act because its adoption in many states will provide a body of decisional law upon which Alaskans may draw for guidance in interpreting the Act, something a very unique Act would not have available. In addition, an extensive legal commentary accompanies the Model Act aiding the reader in a clear understanding of the provisions. Finally, as is the case with the old Model Act, the draftmen of the revised Model Act will provide model bylaws and official corporate forms to assist the public. This should significantly reduce legal costs.

We hope that this rather hurried review is useful to your committees in your own deliberations on the bills.

It is our view that there are numerous questions about specific provisions in the that the Committees should require more study.

Since the HB 343 carries such important consequences and there has been no showing of urgency to change the law, nothing is lost by deferring action on a new comprehensive code for Alaska until next session. By so doing, the legislature could accomplish the following:

a. give the Legislature, Code Revision Commission, and the public a meaningful opportunity to fully consider the revised Model Act;

b. give all sectors of the business community an opportunity to consider and propose specific amendments;

c. explain to the non-lawyer business community the Legislature's interest in revising the Code and seek an expression of support or concern from affected economic sectors.

The Task Force is willing to continue working with your Committees and with the Code Revision Commission towards a bill that is the best possible statute for Alaskans.

Yours cordially,

Richard Block
Task Group Chairman

RE: HB 343--RELATING TO THE REVISION OF THE CORPORATIONS CODE

COMMENTS:

This bill of course has been in the works for several years and was first introduced in to the legislative process by the code revision commission in 1982. The bill would revise the states statutes regulating corporations; replacing statutes drafted in the 1950's.

Today in the committee meeting the plan, as we talked about it, is to go over the amendments made by the code revision commission and the Dept. of Commerce. These amendments are rather minor in the overall scope of the bill.

Dick Regan of the commission will be here to answer questions, Senator Rodey will also answer questions and

discuss the Senate's action on the bill. Prof. Fesler has class until 9am. We hope to hook up with him at about 9:15 via the telephone.

QUESTIONS:

CONCERNING THE LIABILITY OF DIRECTORS

1. Can review this section and shed some light to the committee on the liability of directors ?

2. How does the section covering the liability of directors differ from current statutes which covers this liability question ?

Re: House Bill 343
An Act Revising the Alaska Corporations Code

Dear Representative Cowdery:

We are writing to provide you with a summary of our comments regarding H.B. 343, which is an Act revising the Alaska Corporations Code. We are impressed with the thoroughness and thoughtfulness of the proposed revisions. Although lengthy and complex, these revisions will add a great deal of certainty to the law of corporations in the State of Alaska. The present statute is not as detailed as the proposed revisions. Alaska courts have not resolved many of the legal issues which confront corporations.

The official comments accompanying this proposed revision and statements made at public hearings properly summarize the major features of these revisions. For the most part, we are in agreement with those comments. However, as noted herein, the provisions relating to liabilities of officers, directors, and shareholders; the provisions relating to derivative suits; and the provisions relating to dissolution deserve special attention. In addition to our comments on these portions of the proposed revision, we also suggest some technical changes which occurred to us during our review of the proposed bill.

I. Liability of Directors, Officers, and Shareholders to Creditors of a Corporations

In general terms, under existing law in the State of Alaska, officers, directors, and shareholders are not liable to creditors of a corporation. The creditor's claims against a corporation are limited to claims against the assets of the

corporation. Officers and directors are liable to corporations for their wrongful acts which harm the corporation. Shareholders are liable to the corporation to pay for their shares, and are liable to directors to contribute to a director's liability to the corporation in the event a dividend is paid improperly to shareholders.

H. B. 343 continues the liability of officers and directors to the corporation for their wrongful acts. Section 488 of the Bill expands directors' and officers' liability to include liability to creditors for materials, labor and services, up to an amount of Twenty-Five Thousand Dollars ($25,000.00) per creditor. Section 675 of the Bill makes directors liable to the corporation and its creditors for improper distribution of assets during dissolution and winding up.

Section 378 of the Bill creates shareholder liability to creditors in the name of the corporation for their knowing receipt of improper dividend payments. Directors are also liable to the corporation for the same transaction. See, § 480(a).

The expansions of liability contained in §675 and 378 are good. Liability of the directors and shareholders in these provisions is directly related to the wrongful or improper acts. Section 480(a)(1) of the Bill should be amended at page 64, line 15, to read:

> A director who votes for or assents to a distribution to the corporation's shareholders contrary to the provisions of A.S. 10.06.358, 10.06.360, 10.06.363, and 10.06.365, or contrary to a restriction in the articles of the corporation, is liable to the corporation and to creditors in the name of the corporation, jointly and severally with all other directors voting for or assenting to the distribution....

This addition will expand the liability of the directors in these to specifically include liability to creditors. Under the bill as written this liability exists pursuant to Section 488. However, the change to Section 480 is appropriate so that the liability continues even if Section 488 is deleted by the legislature or invalidated by an Alaska court.

Section 488 of H. B. 343 creates secondary liability of directors and officers to creditors of the corporation up to an amount of $25,000 per creditor in the event assets of the corporation prove insufficient. The liability exists only for materials, supplies, inventory or services furnished in Alaska during the period of an officer's or director's service. This provision of the Bill is new and is experimental. It is not based on the concept of wrongdoing by an officer or a director. The provision has the potential of creating conflicts of interest within a corporation and spawning complicated litigation. We believe that the section should be deleted or that alternatives should be considered by the legislature.

If you consider alternatives, these alternatives should be based on the simple principle that liability should not be created unless an officer or director does something wrong. For example, an officer or director should be liable for entering into or authorizing contracts for the provision of services or materials when the officer or director knew or should have known that the corporation would be unable to pay for those services or materials. As presently written, Section 488 creates liability even if a corporation is solvent while receiving material and services. An example illustrates the inequity which may result. Assume that a vice president authorizes a contractor to provide materials to a corporation. At the time the corporation is solvent and intends to pay for the materials. When the materials are delivered, the corporation is not satisfied, believing that the contractor has breached his obligation. A lawsuit results, taking 3 years to resolve, in favor of the contractor. During the interim time, the vice president leaves the corporation and the corporation, as a result of other problems, is unable to pay the contractor's judgment against it. The vice president,

without doing anything improper, would be personally liable to the contractor.

The following is a list of specific problems which you should consider in evaluating the propriety of Section 488.

Many small corporations in Alaska have titular officers and directors in order to meet the statutory requirements of three directors and that there be a separate president and secretary for the corporation. These individuals usually do not take a direct involvement in the activities of the corporation. Arguably, these individuals should not have liability to creditors for acts that they did not participate in.

Secondary liability under Section 488 arises "to the extent that the assets of the corporate entity prove insufficient...." It is not clear from this language whether a creditor is required to sue and obtain judgment against a corporation and unsuccessfully attempt to execute on that judgment against corporate property prior to asserting liability of officers and directors. As Section 488 is presently written, it is likely that if a plaintiff is suing a financially troubled corporation, that plaintiff will include all officers and directors of the corporation as defendants so that he will have judgment against them in the event the corporate assets are not available to satisfy the judgment. If this inclusion of defendants becomes standard practice, it has the potential of complicating lawsuits and increasing the burden on the courts of those lawsuits. Also this practice will harass officers and directors and may discourage their future participation in corporate matters.

A corporation may seek protection of the bankruptcy laws. When a corporation files for bankruptcy a court enters a stay prohibiting further action by creditors against corporate assets. Arguably, at that point in time, corporate assets would prove "insufficient" to satisfy creditors' debts. The question arises whether or not a creditor would then be permitted to proceed against officers and directors pursuant to Section 488.

Chapter 11 bankruptcy proceedings allow corporations to rearrange and delay payment of debts. Sometimes the bankruptcy court will order payment of part but not all of debts. If corporate finances deteriorate to the point where Chapter 11 reorganization is a potential solution for financial problems, officers and directors will be faced with a conflict of interest in that filing Chapter 11 bankruptcy will help the corporation but will potentially affect their own financial liabilities. While the corporation benefits by the rearrangement of its debts, the officers and directors will be required under Section 488 to assume obligation for those debts.

Foreign corporations will enjoy some advantage over domestic corporations in the application of Section 488. In all probability, most of the officers and directors of foreign corporations will not be subject to the jurisdiction of the Alaska courts. Thus, even though the section is intended to apply to foreign corporations, as a practical matter it will be very difficult to sue foreign directors and officers in Alaska.

If an officer of the corporation enters into a contract without corporate authority, the other directors and officers of the corporation should not be personally liable for that act.

Directors do not participate in day to day management of a corporation. They might not be aware of the types of contracts which would create personal liability for them. Section 488 would force directors to participate more directly in day to day management of the corporation.

Even if an officer or director dissents from a decision to enter into a contract, that officer or director would have liability under Section 488.

In addition to the type of conflict of interest previously noted, Section 488 could create conflict when an officer or director personally guaranteed an obligation of the corporation. For example, assume the president of the corporation personally guaranteed a loan from a bank and the corporation ran into finan-

cial trouble. The president would want the corporation to pay the loan he guaranteed. Other officers and the directors would want the corporation to pay creditors protected by Section 488, prior to paying the bank loan.

Subsection (b) permits modification of statutory provision in a written contract. This section would be better if it required this modification to be in bold face type set out from the body of the contract so that it would be clearly visible to anyone reviewing the contract.

Section 488 does not apply to directors appointed by the court pursuant to Section 640 of the Bill to break a deadlock in the board of directors. However, Section 488 does apply to other directors appointed during dissolution and winding up of the corporation pursuant to the court's authority granted in Section 650 of the Bill. If Section 488 remains in the legislation, it should not apply to those individuals appointed by the court pursuant to Section 650.

During dissolution and winding up of a corporation, the corporation may obtain assistance from the courts. See §673. If a creditor fails to appear in a court-ordered dissolution proceeding, that creditor's claims against the corporation are waived. See §653. That section should also provide that the creditor's claims against officers and directors pursuant to Section 488 is waived.

The procedures established for judicial dissolution of a corporation insure that at the time of the distribution of assets all known claimants are bound by the terms of the dissolution. Those claimants are not bound by a non-judicial dissolution. They potentially have a claim against present and prior officers and directors pursuant to Section 488. If the situation arose where creditors made a claim after dissolution against prior officers and directors, those officers and directors could sue the dissolution officers and directors claiming they were negligent in failing to protect them from liability to those creditors. To avoid this potential liability, corporate officers should routinely use the court to supervise dissolution. This would unnecessarily crowd court dockets.

Section 960 exempts officers and directors of Native corporations from the provisions of Section 488. We believe that both corporations and individual officers and directors will be able to challenge this exclusion, arguing that it denies them equal protection of the law. The Fourteenth Amendment to the United State Constitution requires states to treat persons and corporations similarly situated in a similar fashion. A statutory classification which treats people differently based on race or alienage is suspect and will be upheld by a court only if there is a compelling state reason for the classification. If an officer or a director of a non-Native corporation were sued under Section 488, it is probable that individual would contest the constitutionality of Section 488 and Section 960 by arguing that the state has placed greater liability on him than on others who are similarly situated as directors and officers of Native corporations. The individual would argue that the distinction is based on alienage or race and that there is no compelling state reason for the different classification of liability. The official comment to Section 960 does not explain why officers and directors of Native corporations are excluded. We do not know whether there is sufficient justification for this exclusion. Even if the exclusion is justified at present times, its justification might terminate in 1991 when shares of the Native corporations become available to the public.

II. Derivative Actions:

Section 435 of H.B. 343 establishes the right of and procedure for shareholders to maintain a derivative action against the management of a corporation. Unless a majority of the directors of a corporation are implicated in the alleged injury to that corporation, a shareholder must demand corrective action from the board prior to initiating a derivative action. If after a demand is made on the board of directors, the board finds that in its business judgment litigation is not in the best interest of the corporation, the shareholder does not have the right to maintain a derivative suit. The shareholder is barred in this instance unless the shareholder is able to prove to the court that a majority of the directors is implicated in the injury or if the court rejects the board's decision as inconsistent with the directors' duties of care and loyalty to the corporation.

Once a derivative action is properly begun, a court may dismiss it if a disinterested board of directors petitions the court for dismissal and the court agrees that dismissal is in the best interests of the corporation and consistent with public interest.

This procedure makes it more difficult than present to maintain a derivative action in the State of Alaska. The procedure favors management of a corporation which has the authority, so long as it is not implicated in injury to the corporation, to decide whether or not a derivative action shall be maintained. Since the statute allows a disinterested board to petition the court for dismissal of a derivative action, plaintiffs in a derivative action will be forced to undertake two trials. The first trial would be to convince the court that the petition for dismissal should not be granted. Plaintiff in the action would be entitled to an evidentiary hearing to present its information to the court regarding the problem. If the plaintiff succeeded in that evidentiary hearing in avoiding dismissal, the plaintiff would then incur the additional expense of the second evidentiary hearing at trial on the merits.

Subsection (f) of Section 435 (H. B. 343, page 50, lines 17 and 18) allows the directors of the corporation to "petition" a court to dismiss a derivative action. To be consistent with Alaska Rules of Civil Procedure, the statute should require the directors to appear in the derivative action by a third party complaint against the plaintiff shareholders. The plaintiff shareholders would be third party defendants in the action. Subsection (f) could be amended as follows beginning at line 16:

> "Notwithstanding (c) or (e) of this section, disinterested, not involved directors acting as the board or a duly charged board committee may ~~petition~~ intervene in the derivative action as third party plaintiffs against the shareholders and request the court to dismiss the plaintiff's actior on grounds that in their independent, informed business judgment the action is not in the best interest of the corporation.

Section 435(h) (H.B. 343, page 51, line 6) provides that if the plaintiffs in a derivative action represent less than five percent (5%) of the outstanding shares of any class of the corporation, the court may require the plaintiffs to give security

for reasonable expense including attorney fees that may be incurred by the defendant corporation in the action. This section may be unenforceable. A.S. 09.60.060 requires non-resident plaintiffs or foreign corporations to post security as a prerequisite to appearing in Alaska courts. The Alaska Superior Court routinely refuses to apply this statutory prerequisite to a non-resident's or foreign corporation's right to appear as plaintiff in Alaska courts. The Alaska Supreme Court has refused to reverse this position by the Superior Court. The prerequisite to a lawsuit is not enforced because right to appear in court is a fundamental right and there is no sufficient rationale for the distinction which condititions that right against non-resident plaintiffs and foreign corporations.

The requirement in Section 435(h) that a derivative action on behalf of less than 5% of the shareholders of the corporation be conditioned upon those shareholders' ability and willingness to pay a bond for costs likewise interferes with the fundamental right of those individuals to have access to the courts. There is no correlation between the size of the group maintaining the derivative action and the merits of their claim. As a result it is unlikely that a court would enforce this condition for maintaining a lawsuit.

III. Dissolution:

Section 628 (H. B. 343, page 101) allows shareholders representing one-third of the total number of outstanding shares to petition for dissolution on the grounds that those in control of the corporation have been guilty of "persistent unfairness towards shareholders...." This language is new to Alaska statutes. We believe that it is too broad and too vague, allowing too much room for judicial interpretation of what consistutes persistent unfairness to shareholders.

Section 628(b)(5) appears to allow a petition for involuntary dissolution of a corporation having 35 or fewer shareholders of record by a single shareholder on the basis that "liquidation is reasonably necessary for the protection of the rights or interests of the complaining shareholder or shareholders." (H.

B. 343, page 102, lines 10 and 11.) We believe this language may also be too broad, allowing too much room for judicial interpretation.

It is not clear from the comments whether or not the code revision committee considered requiring that suits for involuntary dissolution include all shareholders, or a representative of their interests, as defendants to the action. We believe this alternative should be considered so that the interest of other shareholders will be adequately represented in a suit for involuntary dissolution.

Section 630 specifies how a corporation may avoid involuntary dissolution by purchasing the shares of those plaintiffs seeking involuntary dissolution. The corporation is permitted to appear in the lawsuit for involuntary dissolution and offer to purchase the plaintiffs' shares at fair market value. Section 630 would be improved if it required the corporation to make this purchase offer within 90 days of the date the lawsuit was instituted.

Section 630 provides that if the corporation and the plaintiffs cannot agree on the fair value for the shares, the court may appoint three appraisers to determine that fair value. Subsection (c) of §630 would be improved if it specifies that the date of filing the complaint will be the date of valuation for the shares. In its present form, the date of valuation is not clearly stated.

In passing, we would note that in our copy of the official comments there is no official comment for Section 630. The official comment for Section 633 is erroneously printed as the official comment for Section 630. If the legislature intends to adopt the official comment by reference, this typographical error should be corrected.

Under H. B. 343, if a court is directing winding up of a corporation after its dissolution, creditors and claimants may be barred from participation of general assets of the corporation if they fail to make or present claims and proofs within the time ordered by the court. If Section 488 remains in H. B. 343, Section 653 should be amended to also bar creditors' claims against directors and officers if they fail to appear in the winding up proceedings. The amendment may be accomplished as follows:

> "In a court-directed winding up of a corporation (A.S. 10.06.618, 10.06.635(b) and 10.06.645) creditors and claimants may be barred from participation in a distribution of the general assets of the corporation, and shall be barred from asserting claims against officers and directors of the corporation pursuant to A.S. 10.06.488 if they fail to make or present claims and proofs within the time the court may order.

Section 655 (H. B. 343, page 114) describes the order the court may enter declaring that the affairs of the corporation are completely wound up. Subsection (c) of §655 states:

> "The directors or the persons appointed under A.S. 10.06.648 shall be discharged from their duties and liabilities, except as may be established under A.S. 10.06.488 or except as needed to complete the winding up."

Section 648 allows the court to appoint directors to resolve a deadlock in a board of directors. This provision excepting Section 488 liability for appointed directors should also apply to directors appointed by the court pursuant to its authority under Section 640 and Section 653 of the Bill. We do not believe that any individual appointed by the court to serve as a director or officer for a corporation during dissolution or winding up of the corporation should have personal financial liability for contracts entered into by the corporation during that period of time.

Whenever the Bill permits creditors in the name of the corporation to sue shareholders or directors for improper distribution of dividends (A.S. 10.06.378) or assets (A.S. 10.06.675), the statute should specifically provide that the shareholders and directors may assert any defense to the action available to the corporation.

IV. Miscellaneous Comments:

Section 460 of the Bill permits removal of directors without cause by vote of shareholders. H. B. 343, page 57, line 4. Subsection (a)(2) describes the number of shares which must vote in favor of removal of the director if the corporation has cumulative voting. Subsection 3 describes the number of shares

within a class which must vote in favor of removal if a director is elected by a class. Subsection 460 should be amended to describe the minimum percentage of shares which must vote in favor of removal of a director without cause if the director was not elected by class and the corporation does not have cumulative voting. This may be accomplished by an amendment to H. B. 343, page 57, line 6 and 7 as follows:

> "At a regular or special meeting for which notice is given under A.S. 10.06.410 and this section, any or all of the directors may be removed without reason if the removal is approved by a vote of the majority of the outstanding shares and...."

The Alaska Federation of Natives has proposed an amendment to H. B. 343, page 149 at line 12, as follows:

> "Notwithstanding the provisions of A.S. 10.06.574-586, a plan of merger, consolidation or exchange qualified under this section prior to December 19, 1991 shall not include the right of shareholders to dissent."

This amendment should be improved by the addition of the phrase:

> ".... plan of merger, consolidation or exchange qualified under this section and approved by the proper corporations prior to December 19, 1991 shall not include the right of shareholders to dissent."

This amendement will specify that the merger plan must be approved prior to the specified date; otherwise shareholders will have a right to dissent.

Section 546 provides that a plan of merger, consolidation or exchange for an Alaska corporation must receive approval by a vote of two-thirds of the outstanding shares of each corporation affected. A lower voting requirement applies to corporations established under the Alaska Native Claims Settlement Act. Section 960(c) provides that a plan of merger, consolidation or exchange of ANCSA corporations may be approved by an affirmative vote of holders of a majority of the outstanding shares of each corporation. The official comments do not explain the different

requirements for these corporations. The different requirements are probably permissible. It would be well to explain the different requirements to avoid confusion in future.

We appreciate this opportunity to comment on H. B. 343.

Sincerely yours,

SMITH, ROBINSON & GRUENING

Opinion

1996

"The Olympics is a huge investment over a 12- or 14-year period. But for Anchorage it wouldn't be so much a big financial investment as a human investment. It would take a lot of time and energy." Reyn Bowman, executive director, Anchorage Convention & Visitors Bureau.

Anchorage and the Winter Olympics are a perfect fit.

On the one hand, Anchorage is the right size — not too big, not too small. It has the financial resources, both public and private, to make the venture a success. It's becoming adept at hosting world-class competitions with alpine skiing events at Alyeska Resort, Nordic skiing at Kincaid Park and even the Great Alaska Shootout at Sullivan Arena.

Its lodging accommodations are adequate today and are growing by leaps and bounds. The climate is ideal for winter sports competition. Anchorage is ideally situated for air access both from North America and from Europe and Russia, which provide the vast majority of the athletes participating in Winter Games.

Anchorage would add a new dimension to the cultural aspects of the Olympic Games, and in a state where the number of visitors and tourists annually doubles and triples the population, playing host has become an art more than a chore.

Those are just a few of the things Anchorage has to offer the Winter Olympics. The other side of the question — what does the Olympics have to offer Anchorage, and the entire state of Alaska, for that matter — is equally compelling. And the facts are equally one-sided.

The Winter Games would give Anchorage worldwide exposure and a massive economic boost at the time of year when it needs it most. Tourism, one of the mainstays of the Alaskan economy, always has sagged during the winter; nothing could turn that situation around faster than the Olympics. Officials from the Lake Placid area in New York say that area still is on a high from the 1980 Winter Games, and in the words of one economist, "We don't know how long it will take for that to wear off or if it ever will."

Most important is what would be left behind after the Olympics are gone: world-class winter sports facilities that would establish Anchorage as a winter sports mecca and benefit everyone in Southcentral Alaska who would have easy access to those facilities for years to come.

Unquestionably, construction of some of those facilities would be an expensive proposition. Most notably, those

House Bill 343, pending before the Alaska House of Representatives, is "An act revising the corporation code." This bill was prepared by the Alaska code Revision Commission, and it proposes sweeping changes in Alaska's corporate law.

Rep. John Cowdery has been taking a hard look at the proposed bill. The Alaska Code Revision Commission held extensive hearings and spent a great deal of time and money preparing the revisions.

My review of the proposed revisions indicates they did a good job. Cowdery, however, has quite correctly realized that the revisions are very expansive and may have long-range side effects.

The bill is lengthy and complex. While the proposed revisions may add a degree of certainty to Alaska's Corporation Law, there are some areas of real concern.

For example, the proposed revisions extend personal liability of directors and officers to certain creditors of the corporation up to the amount of $25,000 per officer or director.

Thus if the corporation lacks the assets to pay bills the officers and directors are liable.

The exposure of the directors and officers is irrespective of any wrongdoing, irrespective of the degree of involvement in the affairs of the corporation and irrespective of whether the individual dissented from incurring the debt.

In addition, not all creditors have the same right as the commission decided to only protect the "little guys."

There also is a serious question as to whether the effect of the revisions will be to prefer foreign corporations.

While the code attempts to impose liability on foreign corporations, as a practical matter the corporate codes of the other states will apply to the internal affairs of corporations incorporated in their jurisdictions.

Thus some of the more novel concepts may very well disadvantage Alaska corporations in the long run.

There are other aspects of the proposed bill which have wide-range effects. The Alaska Code Revision Commission has stated it attempted to find a middle ground between pro management and pro shareholder states. In so doing it has developed some rather esoteric concepts.

For example, the bill allows minority shareholders to petition a court to dissolve a corporation on the grounds that those in control have been guilty of "persistent unfairness towards shareholders."

That language may become one of the principal sources of litigation in the State of Alaska.

It is evident that a great deal of thought has been devoted to the proposed revisions. However, Cowdery and others have focused on the danger of attempting to legislate in a broad sweeping manner problems which may or may not exist.

There are some advantages to trying out ideal solutions but I question whether this is the right time or place.

A critical review of House Bill 343 is a real service. The effort to solve all Alaska's potential corporate problems in one piece of legislation appears to open up a Pandora's box.

It would be well if those involved in the business community took the time to familiarize themselves with this important piece of legislation.

Perhaps no other legislation effects the rules of the game as much as Alaska's Corporation Code.

RE: JOINT HOUSE LABOR & COMMERCE AND JUDICIARY COMMITTEE HEARING ON HB 343-REVISE THE CORPORATION CODE VERBATIM TESTIMONY

DATE: MARCH 7, 1984

ATTACHED FOR YOUR INFORMATION AND REVIEW YOU WILL FIND THE VERBATIM TESTIMONY ON HB 343. THIS WAS THE LAST HEARING HELD IN ANCHORAGE, FEBRUARY 24, 1984.

THIS TRANSCRIPT IS PROVIDED FOR US COMPLIMENTS OF THE CODE REVISION COMMISSION AND WAS TYPED BY CATHERINE WALSH OF THE COMMISSION.

JOINT HOUSE LABOR AND COMMERCE AND JUDICIARY
COMMITTEE HEARING ON HB 343/SB 246--FOR PROFIT CORPORATIONS
FEBRUARY 24, 1984 - LEGISLATIVE INFORMATION OFFICE, ANCHORAGE
10:00 a.m.

COWDERY: Will the meeting please come to order. It's 10:07 a.m., February 24th. We are in Anchorage, the Labor and Commerce Committee joining with the House Judiciary Committee. I'd like to make note of those present here in Anchorage is Representative Wendte, Representative Pestinger, Representative Furnace, Representative Uehling and also Representative Koponen is in Fairbanks on the teleconference network and Representative Ringstad is in Juneau. I'd like to check in and make sure that Representative Koponen and Ringstad, first in Fairbanks and then to Juneau. Representative Koponen.

KOPONEN: This is Representative Koponen right here. We have two people in the audience at this time.

COWDERY: Representative Ringstad.

MODERATOR: This is the moderator in Juneau and Representative Ringstad has stepped out for a moment. Can you come back to us?

COWDERY: Yes. O.K. We have a quorum and I would like to maybe turn it over to Representative of the Judiciary Committee to establish his quorum. Representative Bussell.

BUSSELL: Thank you, Mr. Chairman. The Judiciary Committee does have a quorum. Representative Wendte is present with us, Representative Hayes, Representative Liska, Represenative Malone, and Representative Barnes is someplace on her way here.

WENDTE: Mr. Chairman.

COWDERY/BUSSELL: Representative Wendte.

WENDTE: I just want to know as a matter of deference to my dear friend the Chairman of the Judiciary Committee, I've been placed on this side of the table. It's not that I don't care to join the Judiciary Committee today. But since I am the only member of both committees, maybe I should run back and forth.

BUSSELL: You are sitting in the witness chair.

COWDERY: The House Labor Committee meets in the morning and so at noon you can move to the other side. The Judiciary meets . . .

WENDTE: It's probably a good way to do it, Mr. Chairman. Thank you.

COWDERY: We are here this morning to hear HB 343 to revise the corporate code. And we have had a joint hearing on this with the Senate Labor and Commerce in Juneau and we've got quite lengthy testimony, had quite lengthy testimony to review, and it is the intent of this committee to not be critical of the code or the bill, but to bring some areas that are not clear, perhaps help clarify some of the areas and to discuss some of the areas that seem appropriate now that we clear up rather than later if it ever comes to a court decision that perhaps we can by clarifying some of the areas of concern we can maybe keep that later court date to a minimum. I was wondering, I know that Mr. Dick Black of the Alaska Bar Association, or Block. Would you care to comment or have comments. Or I could go on an overview of some of the areas of concern . . .

BLOCK: Mr. Chairman, it's your pleasure. I am prepared to testify if you like or any order you that you would like. Good morning to the Chairmans of both committees. My name is Richard Block. I actually come before you I suppose more officially as a representative of one of the sections of the Alaska Bar Association. And I will refer back to that in a moment. I would also like to say, however, I am an attorney admitted to practice in the State of Alaska and have to only a small or modest degree done corporate work for clients. I also am an owner and investor in a business enterprise in the State of Alaska which is in corporate form, and we have in our corporation five separate corporations. So I believe that from the standpoint of its practical application as well as its legal concerns, I do have some familiarity with what the impact of the bills before us might have in this Alaska community. And I also said from a more official standpoint, I am representing one of the sections of the Alaska Bar Association. About a week and a half ago, I was asked by the chairman of the business law section of the Alaska Bar Association, the chairman of the executive committee, to chair a task force which has just recently been appointed to study and undertake a review of these bills and the work that has been done by the code revision commission and by Professor Fessler. It is the charge of our task force not to engage in an extensive, shall we say academic type review or even a legal analysis of the bill, since we believe that has been extensively done and well done by Professor Fessler and by the code revision commission and by the staffs of the legislature. But we do believe that in the interest of better understanding, the impact that such a bill would have on the business community and on the practice of business and corporate law, that you might say kind of a business impact report is deserving. Exactly what will be, or not exactly but at least to the extent that we can

foresee it, what are some of the economic interests and factors in the state that could be affected by what this bill contains that may not have been brought before your committees. And when I am through here in a few moments, I am going to ask or suggest that the committee in its deliberations at least not move so quickly that our task force would not be given the time to present to you what we regard as our you might say economic legal impact report of this bill. We do not believe it will take a lot of time, we'd like, say, about 30 days to finish our work and present it to you. As I indicated, I think we can do that because we are not going to reinvent the fine work done by those that have gone before us. A very brief review of the bills and the commentary that accompanies the bills would indicate that one of the things you typically find in a significant revision of a law of this type, that is to say that it is a technical revision, it is a language revision, that it is a modernization of tone or tenor is certainly a part of this bill. But this bill really has substantial substantive changes in it, and I think that one of the things that is unfortunate, and I have to say that for myself I take upon myself the responsibility for making some of the same assumptions I am going to charge to a larger class of people and that is I think a lot of people thought that the revision of the law was going to be a revision of the words and not a lot of substantive change. And as you get into it, there are some signficant changes in this bill, and I don't think the business community broadly based is widely aware of it. And I think they need to be and you need to be aware of what that means to them. I think, for example, that my brief reading of the analysis and the bill would seem to change the character of the articles of incorporation from a simple organic document that kind of brings the corporation into existence, which is now and would in the future if this bill were adopted, be its function. But the articles become in addition more or less a disclosure statement, a rather complete disclosure statement to anyone who becomes involved in the corporation. And I gather that notion from the fact that an awful lot of things which today are kind of put into articles by a one line reference or by absence of any reference and then incorporating statutory provisions to the requirement that if certain things are going to be ever done in a corporation, it needs to be specifically allowed for disclosed in the articles of incorporation. Now I am not here nor do I think our section takes a view that that's good or bad, but only that it becomes a fact that's contained in this law and if a lawyer is going to do an adequate job of protecting a corporate client, they are going to have to do a more careful analysis and a more careful job of drafting to make sure the corporation is permitted by its articles of incorporation, or in this disclosure document if you will, to do those things which it now intends to do or might in the future wish to do. And I suggest that one of the things that we would like to measure in our impact report is how much additional legal work is going to be required by lawyers

asked by their clients to form a corporation and what's going to have to be done in order to make sure that they never get into a situation which under this bill would become an ultra vires or an act outside the ambit of their agreed authority. Another significant aspect of this bill is that it clearly seeks to change the relative protections among classes of people involved in a business relationship. I think it's fair to say that the code revision commission and Professor Fessler recognizes that current Alaska law is, if you want to assign an appellation to it, is a vested, corporate ownership protection approach. And I think it is clear that the approach taken in this bill is to move away from that and to provide some protections for creditors and for outside stockholders. Now again, I don't think this is the responsibility of the bar association, or do we wish to take a view that that's good or bad, but only that it is in fact a significant change in our law. It is a substantive change, and the way in which that's done, and the fact that it is being done, I think needs to be recognized by a broader base of the business community and the effect of that, if any, presented to your committee. There are a number of impacts that we see this potentially having. One I've alluded to and that's simply the cost effectiveness. We think there is going to be some significant changes in just legal costs informing the corporation, because I think lawyers are going to have to be a lot more careful and a lot more explicit in what they do. That may not be that, that may be public policy desire that the cost of that needs to be thought out. I suppose there are going to be some changes in trade costs. By trade costs, I mean that if you are going to change the respective protections of creditors and the protections of superiorly postured investors, then there may be changes in interest rates or rates of return to stockholders and to officers and directors and creditors in view of the changing positions. And I would imagine that one of the things that's going to have to be considered by any officer or director of a corporation, that because of one of the provisions in the law subject it to potential personal liability in the event of the failure of the corporation is the possibility of additional indemnification costs in order to attract people to be officers and directors of complex business operations. I think we also want to suggest to the committee the need to evaluate the impact, what I would call the business impacts. For example, would the potential exposure of many, potentially millions of dollars to an individual officer or director, and as I read this there is a right to go against certain officers and directors for up to $25,000 per creditor. So the $25,000 is mulitiplied by as many of these trade creditors as there may be in a corporation. What is it going to take to attract a person to become an officer or director of a corporation when he's got that potential exposure. Now I don't think anyone can quarrel with the proposition advanced by the advocates of this bill that you are trying to encourage responsible action by corporate officers, and the

threat that they may by dissipation in corporate assets or inappropriate business actions leave creditors unprotected and they should be aware of that. That may be a valid public policy. But I do think we need to think out if that is going to chill business entrepreneurship in the State of Alaska or freeze out or preclude access to the most qualified executives to come in and operate corporations because of this concern. And I would be even more particularly concerned if it were necessary to attract a highly qualified person to come in and run a troubled corporation. And if you have a corporation that is salvageable but in financial difficulty and you want to attract someone to come in and involve himself with that enterprise, is he doing so at such a great peril that you cannot attract that kind of individual to your company. Finally, I think I would want to suggest to the committee that one needs to consider the broad based economic impacts. I don't think it, I realize we may be focusing an unwarranted amount of attention on one section of a bill that contains several hundred sections, but nonetheless, when you start getting in to where the dollars go and whose pocketbook is exposed, it becomes important. And the question I would raise with respect to economic impact is we are trying in this state, and I believe it's the professed posture of the legislature, that we are trying to encourage investment in economic activities in the state which so far have proven to be less certain than other types of investments. We don't need to encourage people to get involved in the oil industry. It's a rather certain profitable return on that investment. But what about business enterprises around the fishing industry, around the timber industry, around the agricultural industry, and other industries where we are trying to encourage investment, but where the opportunites for absolute certainty of return are less known to us. Are we going to chill business entrepreneurship because the person is unwilling to commit $100,000 and put that into a corporation and see if I can may a go of it in one of these marginal industries. But if I have to further expose my resources beyond that investment because through circumstances that I may control or may be beyond my control, I expose myself to liability beyond what I am prepared to commit, I am not willing to do it and thus, preclude the type of access, the type of business enterprise that you're trying to encourage in these marginal industries. Those are the kinds of things we need to think about. Again, I know that there is a great amount of good in this bill. Not only do I know it because of the caliber of people who have worked on it, I've gone through it and I know having worked in the existing corporation code, that there is room for improvement and the desirability, just the general advisability of getting into the corporations code and cleaning it up I think is meritorious. But I would urge the committees to move with great caution when you start making substantive changes that aren't well understood by the business community but could have a tremendous economic impact on them, on the economy

generally and on businesses specifically. It is the request of our task force which is just created that you would give us time to more particularly analyze the bill from those kinds of aspects and submit, you might call it our impact report to you for your consideration. Thank you.

COWDERY: Thank you, Mr. Block. It is our intention to hear testimony on this and maybe ask questions and then possibly development some amendments for a substitute bill for review by another committee I think or maybe two more committees to be referred to before final action. I would like to ask one question. In your capacity as knowledge, it is my understanding that many small corporations, particularly small ones, have honorary directors or maybe family members appointed for one reason or another, if I understand some of the language in this bill, that it could possibly maybe even attorneys I understand are noted in some corporations, but I think the attorneys probably have insurance to cover any liability, but some of the other areas I've mentioned may not be aware of this insurance. But it's my understanding the bill reads that even these people could be liable at a later date for some of the liabilities of a corporation that went bad.

BLOCK: Representative Cowdery, I think that's one of the points I am trying to make is that I think there is a lot of people who are maybe sleeping in bliss with respect to this and will some day wake up to the fact that they have exposures they didn't know they had. But that may not be bad. I am not saying that the proposition that officers and directors shouldn't stand behind their actions. That maybe a valid public policy. I am not saying it is or is not. What I am saying is I don't think too many people are aware that that's what you're talking about. Number one. And number two I think we need to go beyond just the consideration of do we need more protection for creditors and less protection for the corporate entrepreneurs and consider what could be the impact once everybody understands this and getting people to go into business and involve themselves in business enterprise. Let me add one further point, since you I think, perhaps, somewhat accidentally touched me in a soft spot when you mentioned insurance. I do not believe at the present time, certainly under most officers and directors policies, and once this bill were changed I am certain there would be amendments to the policies to talk about the exposure of this particular type of exposure. That's not to say that I can tell you we can make anything insurable. Some of the more, I am looking around I think Joe you were the only one who was here in those days, we made a lot of uninsurable things insurable. And this might be one of them. But as a general proposition, I don't think it's contemplated in the risk that for E & O protection for officers and directors.

UEHLING: Thank you, Mr. Chairman. In going back to the liability question on the directors of the corporation and you mentioned another party, the directors and . . .

BLOCK: And certain named officers.

UEHLING: And certain named officers. What about in the case where you have a situation where a corporation is purposely bankrupt and goes down the tubes, and then where is the liability in present law right now? Who holds the liability on that? Then they set up another corporation and then go on and do this as a chain reaction.

BLOCK: Rep. Ueling, you made a comment and I'm not quite sure what you meant by it. I'll try to interpret it when you said deliberately bankrupt, purposely bankrupt. If you are talking about people who with intent to defraud creditors forms a corporation and either fails to properly capitalize it, or capitalizes it incurs the obligations and strips the capital or the assets out of it. There are already remedies, the deliberate fraud of a creditor is already actionable. An improperly capitalized corporation subjects the stockholders of that corporation to the doctrine of piercing the corporate veil to reach behind a corporate shell and get at the individuals. So, if you're really talking about a malicious act to try and fraud the creditors, you have already got existing case and statutory law to protect you. I think the concern here is that this goes beyond that, and we are talking about what happens if you have a properly capitalized, legitimately run operation and either at some point down the road there are some stripping out of assets or maybe not but simply the corporation is just unsuccessful because of economic conditions or for whatever other reason. That's the new impact of this bill.

UEHLING: And then, also, a follow up question. The $25,000 liability question, what about in that case, how does that relate to what we presently have in law right now. There is not a $25,000 per creditor liability right now, is that correct?

BLOCK: Well, as I indicated I think current law does provide that if there is a deliberate or fraudulent, you know, fraud against the creditors, there is a protection, but, of course, then it is unlimited as to amount. You go after them for the full amount of your obligation. For the circumstances that I am concerned about, I don't believe there is anything in the statute. This would be the new provision. It says that these particularly specified officers and directors are exposed for up to $25,000 per creditor in the event the corporation. You have got to, according to the statute that's proposed here, exhaust the assets of the corporation. So it is not relevant if you have a successful corporation. But if the thing, the liabilities

exceed the assets and you paid out all of the assets proratably or whatever other way to creditors and there are moneys left due and owing, then each creditor would be entitled to go against these individuals up to $25,000 as I read the statute.

COWDERY: Rep. Furnace.

FURNACE: Thank you, Mr. Chairman. I have three questions. The first has to do with the secondary liability. In your opinion, should that be an average of $25,0000 rather than a per creditor, is that an alternative?

BLOCK: Well, Rep. Furnace, I think the point I'm making is that I am not sure the concept is valid, and I think that's what we want to look at is whether there should be any statutory exposure for officers and directors beyond obviously in the case that Rep. Uehling talked about, fraud, or the investment that the entrepreneurs put into the corporation. Once you get over that, once you say it is to be the public policy and whatever it may cost in business impact that we are going to make officers and directors responsible, then you are only talking about how much. I haven't really thought out the right way to do that, this may be as good as any.

FURNACE: The second question, often times we say if it's not broke, don't fix it. In your opinion, is the present code broke?

BLOCK: I've got two answers to that. Guess that's why I am a lawyer. One answer is no, it's not broke in the sense that if you look outside you can see the State of Alaska is filled with business enterprises that are operating successfully. Corporations are being formed and business going on all in the context of our existing code. So in that sense I don't see a burning need to jump in and change the law. I do have to acknowledge, however, that our law is like so many of our codes, we just kind of lifted out of another state and plunked it in here without a whole lot of thought as to what it means in the State of Alaska. There are a lot of things in our code that, you know, having worked with it, I find are difficult to interpret and work with. And I would say that it is appropriate that our code be reviewed, modernized, made relevant to the economic conditions in our state, so I certainly don't oppose the effort going forward. My concern isn't that we not review our code, only that we consider what the substantive changes mean to the business community.

FURNACE: The last question, Mr. Chairman, and asking an opinion. I agree that this code revision has a significant impact, philosophically, on commerce in the State of Alaska. In that light, in your opinion, how to we better involve the

business community in understanding the various implications of this bill?

BLOCK: Well, that's perhaps the most fair question and most difficult to answer. I do know there has been a very affirmative effort by the code revision commission and particularly Professor Fessler to reach out and explain the bill. I know that he has given a number of seminars and continuing legal education presentations to the bar, so that most lawyers ought to be aware of it, and hopefully lawyers representing business clients will be passing that information back to their clients. I do not know that there has been an equal effort in the non-bar business community. Now, I am aware, for example, I saw a bulletin issued by the Alaska State Chamber of Commerce very recently bringing the attention of its membership to the existence of this bill. But as far as a lot of education, I am really not sure what's going on. I have to say, Rep. Furnace, the responsibility of the chambers of commerce and the business groups, and the, you might say, the special trade associations to dig in and learn these things. I don't know how much more the legislature can do. I know you've run ads and one thing and another letting people know of this going on, but nonetheless, I still think you may have to reach out a little more and make sure you are getting a true study of what the impact is on the business community. Beyond that I'm not sure I can give you a definitive answer.

FURNACE: Good. Thank you, Mr. Block. Mr. Chairman, I think Mr. Block has made a very valid point. Perhaps what we should do is hold a teleconference specifically with chambers of commerce throughout the State of Alaska. That's probably one of the most direct ways that we can involve the business persons. I am concerned about this here today.

COWDERY: I have one question to touch on and then I'll, Rep. Russell has some questions too. You touched on an area there it seems to me that directors, present day directors or past directors, could obligate a company and then to a point where maybe it proved to be a financial, real difficult for the company, and then the directors could leave and new directors come in. It is my understanding that this bill would, the new directors would assume liabilities, is that your interepretation?

BLOCK: I'm not sure that that's the correct interpretation. I am not sure I could tell you what the correct interpretation is as I read the statute. It says is liable for materials, goods and services provided to the corporation at the time they were in office. I think, it's not the exact wording, but essentially the thrust. How that would be interpreted in practical fact when generally cash flow goes to pay the oldest

debts. I'm not too sure. But, again, that's one of the things that needs to be thought out.

COWDERY: A question that possibly a director could order something that wouldn't be delivered for a year or two or later, and I was wondering that at the time of the delivery if the liability was, the commitment was made earlier, but the time of delivery would the liability incur at that time, and I was just wondering if that would be a grey area in your opinion?

BLOCK: Well, the most I could say to that, Rep. Cowdery, is it would be a grey area. Probably it's more grey in my mind than it may be in Professor Fessler's or in the code commission's mind. They may be able to specifically address that. I'm not sure I know the answer.

COWDERY: Thank you. Rep. Bussell.

BUSSELL: Thank you, Mr. Chairman. Are there members of the Judiciary Committee that wish to ask Mr. Block a question? Rep. Wendte.

WENDTE: Thank you, Mr. Chairman. I gather from your testimony you seem to emphasize two main points in terms of what you call significant or substantive changes in legislation. One being that there will be substantial additional legal work in terms of impact on any corporation and secondly, you particularly focused on the liability between classes of people, particularly the impact on directors. Those are the only two significant changes in this document?

BLOCK: Oh, no, sir. They are not. What I tried to do was sort of classify the changes, but not to delineate them, give some examples. There are other changes. Another very significant area of change is the authority to pay dividends, to distribute corporate assets to the stockholders. There is a significant change in that. There is also a significant change which, incidentally, may be an appropriate and beneficial change, I don't know, but it needs to be thought out. In bringing the corporation code provisions for classification of equity accounts more up to the way that the generally accepted accounting procedures would choose to have those equity accounts relected. And as I say there may be a beneficial change in the code to do that, but it is a significant and substantive change and in so doing, it changes to some degree the permissible opportunities in which to distribute assets or profits to stockholders. So there is a substantive change there. I'd have to tell you that I have not completely analyzed this to exactly see what the true impact is, because I think in order to understand it I need to sit down with an accountant and understand how they interpret it, which I haven't done and one of the things I think would be part of our

study in understanding the economic impact of this. But I think that's a substantive area I didn't mention before.

WENDTE: In the area of director and officer liability, are there major problems in litigation in the state right now that has either not been accommodated by the court or indicate there is need to correct statutes? Are there major changes or volumes of those types of cases within the court system in Alaska right now? I guess what I am trying to get at is it broken . . .

BLOCK: Are you asking me are there a plethora of E & O cases against officers and directors in the State of Alaska? I guess I'd have to say I don't know whether there are or are not. I am not aware of them, but there could well be some that I am unfamiliar with.

WENDTE: The bar through your task force indicates that they need more time to . . . when do you expect to complete that.

BLOCK: It is my expectation we have scheduled our work activities so we could have our impact report back to you in about 30 days.

WENDTE: You are aware, of course, this bill was introduced ten months ago in April of last year. Given the responsibility of the bar to their clients and I guess the relationship between the bar and the state, that has not provided enough time for review?

BLOCK: I am not, I don't wish to try to either explain or try to apologize for the responsiveness of the bar. I would have hoped that the bar association would have taken a more early look at this, and indeed tried to get a better understanding of it by inviting Professor Fessler to conduct continuing legal education program for the business law section I guess it's about a year ago. So we have been studying it, but certainly not directing it toward legislative action, and perhaps we should have been. As far as our task force is concerned, our task force only came into existence as I say about a week, week and a half ago, in response to recognition that the legislature was just now becoming concerned with the bill.

WENDTE: You seem to endorse the concept of the code revision process in terms of reviewing the statutes to bring them into conformity with the reality of the state. One other action to this bill may be to just dump this whole thing and then try and crack individual problems, piecemeal . . . Would you suggest that?

BLOCK: Well, I neither endorse nor oppose or unendorse the code revision concept. That is a way to make a comprehensive revision of a major statute such as the corporation code. I am of the view that it is probably an appropriate time for the corporations code as well as other codes in our statutes to receive a wholesale review, and I am not suggesting that we ought to just scrap this bill. There is a tremendous amount of work involved in putting this together. A lot of very careful thought and ball corporationof ideas from numerous other states which have studied a lot of these other issues and I don't think that should be wasted. And I am not arguing that we ought to scrap the bill, nor am I suggesting let's take out the important points and piecemeal changes throughout the existing corporations code. It may be appropriate to start over. My only suggestion to this committee is that this goes beyond just language and organizational changes and modernization, it makes some significant substantive changes, and we need to be careful that we know what those are and what the impact of that is before we adopt them. That's my only point.

WENDTE: In regard to process and need for additional review, Should we suppose that I pick up my chamber of commerce bulletin Ind it mentions a page, a bill of this magnitude, 150, 160 pages, is it likely that that businessman is going to call his attorney to review? Is it the normal businessman corporate businessman to sit down and then rely on his attorney to address this issue?

BLOCK: My suspicion is, Rep. Wendte, he would probably do neither. He would be overawed by the number of pages and say somebody else must be taking care of this. I think that's unfortunate, but I think it's the fact. I don't think you can expect nor do you really, would it be appropriate for the people engaged in business enterprises say to sit down and do a careful analysis of this bill. I do think it's important that they understand what the significant, substantive impact is on their business, and perhaps address that in a general way. Beyond that, I think you are going to have to look to the technicians for guidance.

WENDTE: With your background, for the most part are small corporations in this state able to get errors and omissions insurance?

BLOCK: I would venture to say that the small the corporation the less necessity there is for it. 1 would imagine few corporations few corporations even try to get it, a few

small corporations try to get it. It is very expensive and really its predominant functions is to protect officers, primarily directors, officers and directors from actions brought by dissident stockholders, and generally where you have a family held or modest size corporation, or a corporation with people who know one another, you generally just assume that risk.

WENDTE: In your judgment, would most of the corporations in the state other than the major corporations be able to obtain coverage to cover the type of liability you have addressed to this legislature?

BLOCK: Would most of them be able to? Well, I am trying to find an analogy to another coverage that may be useful here. I would suppose what you are talking about here is the kind of exposure, probably the most analogous exposure would be surety and performance bonding of contractors. Really what you are talking about is a management and credit risk. And you are indemnifying whoever provides the insurance is indemnifying the insured that all of the bills are going to get paid. And I guess the most analogous existing insurance would be performance and payment bonding. And you should be pretty familiar with who has that, its availability and its costs and complications. And it's not readily available and only certain people can get it and only after a very lengthy qualification process.

WENDTE: I have a number of other questions and I think we are probably going to find, Mr. Chairman, that with all these witnesses we are going to cover them today . . .

BUSSELL: Thank you, Rep. Wendte. Particularly in light of Mr. Block's statement that he's heading the task force that's going to give a report here in a few days, I think it's unfair to grill him too much on what the task force may or may not decide to talk to us about the bill. Rep. Liska.

LISKA: Mr. Block, a lot of the questions I had were partially answered by the other committee. As you know, normally when a piece of legislation has started.

VOICE: We can't hear Rep. Liska here in Fairbanks.

BUSSELL: Turn your mike on.

LISKA: Now, Mr. Block, normally when a piece of legislation is submitted for study, a lot of different people have input into it. Now the way I read into this here, this apparently is directed to the small business. You know there is a $25,000 liability on the insurance and so forth . . . My basic question to you is, you made a statement that we'd have to change the articles of incorporation, and I am not going to ask you what's wrong with it because any attorney can change the law of a corporation if it has to be. Disclosure statement is another

subject atogether, but usually a public or businessman plays a major part in introducing or changing any new piece of legislation.

In your opinion, what does this piece of legislation actually do? I mean is it changing that much to the radical side where it's going to make it inoperative, or are we so far off, for example, from other states. A lot of laws are based on Oregon law. A lot of them have been put on us up here, and we more or less have copied them. Are these other states working under concepts this bill addresses, any ways near it?

BLOCK: Rep. Liska, I really think that I would urge you to put that question to Professor Fessler who is here this morning, because that is his profession is analyzing what's going on in all the states, and he can better answer the degree to which this is a departure from the norm in the other states, the degree to which other states are working on making modifications. And he studies it and I don't. So he's the better expert on that. My brief reading of his commentary, however, is that this is a substantive departure from the current state of law in most other states. There may be two other states, New York and California, which he suggests are rethinking and changing. But, yes, this is a substantive departure from where we are in Alaska and a substantive departure from where the law seems to be currently in most other states, as near as I can tell.

BUSSELL: Are there questions from other Judiciary Committee members of Mr. Block? If not, all right . . . Rep. Koponen.

KOPONEN: Thank you, Mr. Chairman. One question or suggestion. If the task force were to examine the problem with current statutes to see what sort of economic chilling effect it has on investments by passive investors or people who are going to be minority stockholders, I know there is a tendency for people to invest capital that has been created in Alaska and invest them in what are considered more stable . . .[TAPE CHANGE] into that and that's the protection of the minority stockholder, the dispersion of their assets in this city where stockholders up to 49 have been wiped out by the majority under procedures which are legal under the current code and which they felt don't give them sufficient protection.

BUSSELL: Is that a question or statement?

BLOCK: Well, Mr. Chairman, I think Rep. Koponen's points are well taken, and it's not the position of the task force that we want to show you all the negative impacts. We want to show you what the economic impacts are both ways, and I think the points raised by him are very valid.

BUSSELL: Are there other questions of Judiciary Committee members of Mr. Block? If not, Mr. Block, I'd like to ask you just one or two questions in a complete and other vein if I could, although they pertain to this. Are you aware of the membership of the Alaska Code Review Commission?

BLOCK: I can't recite it now. I reviewed it at one time. I know that one of its esteemed members is here, but beyond that I am not sure I know the total composition of it.

BUSSELL: My reasoning for asking you is that you are an active member of the Alaska Bar Association, and this commission does do a variety of things. Are you aware of other work that they have in hand right now that they are doing?

BLOCK: I was led to believe that there was another project that they were considering getting into, but I am not sure they are actually working on it. Beyond this I really don't have a specific knowledge of the activities they are engage in.

BUSSELL: Well, again because of your unique position associated with the bar association, I would think that it would be one of the responsibilities of the code review commission, and since I am a member of that group and we haven't done a very good job of reaching out and telling you and others what they are doing. They do have a . . . in fact, almost everything they do seriously affects the bar association. And I'm somewhat ashamed, at least on my part, of not telling you about it. What connection, or how does the Alaska Bar Association connect with other states' bar associations? Obviously, this present review, or this present portion of the review, affects attorneys that practice in other states. Does the Alaska Bar Association or the Anchorage Bar Association have any connection with bar associations in other states who would be intimately involved in enforcement or work with the code?

BLOCK: I know of no official connection that the Alaska Bar Association would have with the bar associations in other states. Perhaps the most effective interstate communication would be that you would expect most of the lawyers that are in the business law section, for example, which is perhaps the section most affected by this. The business law section of the Alaska Bar are undoubtedly also members of the business or corporate law section of the American Bar Association. And in that way could communicate back and forth with their counterparts in other states.

Now I actually would ask that you address that to Mr. Kelly who is chairman of the business law section this year. He may know of more connections with other states than I am familiar with.

BUSSELL: Thank you. I didn't mean to put you on the

spot there, I just wanted to know because as you were speaking it came to my mind. And that's what happens, of course, when you get sections of state government like the code review commission that are off on a tangent of their own, largely removed not only from you folks, but removed from the legislature too. And I personally am opposed to that kind of thing and think this should have been a matter done by you folks with legislators instead of the way is was handled. And I will immediately as the Judiciary chairman embark on a program of letting other bar associations across the country know what's happened here so we can get their very valuable input.

COWDERY: Rep. Ringstad.

RINGSTAD: I've got a question for Mr. Block if I could, please.

COWDERY: Yes, John, we have about ten witnesses so if you could keep that in mind.

RINGSTAD: Mr. Block, if I understand you correctly in your saying that you feel that most of this isn't a real imminent problem and we should proceed slowly to make sure we get it right rather than having parts of this that need to be done immediately?

BLOCK: Well, I would, I think Rep. Bussell said correctly, I hate to prejudge the outcome of the task force. I would say at least for the next 30 days, I'd adopt that view, yes, sir.

RINGSTAD: Thank you.

COWDERY: Thank you, Mr. Block. Rep. Wendte.

WENDTE: Another question for the witness, but I would have a question for you, Mr. Chairman. We have been requested by the code revision commission and since the topic of other works of the commission has come up, is it your intent to not pursue the nonprofit code revision?

COWDERY: That is true. We have been asked to give our attention to this and that's our primary goal.

VOICE: For information of those present, we do have another document similar to this on nonprofit corporations. We've had hearings throughout the state and they subsequently recommended that we drop that consideration. But I assume we can serve notice that it comes back, we have made the decision apparently to not pursue that, that's it's likely to raise its head again at some point in time. I assume that document would be a working document again, and it might behoove everyone here that deal in that area to begin to look at that as well.

COWDERY: I don't believe it's been referred to at least my committee yet. Thank you. I'd like to ask Mr. Paul Kelly to come forward.

VOICE: We have Commissioner Brown here.

COWDERY: Commissioner Brown.

BROWN: Yes, Mr. Chairman.

COWDERY: Does he want to testify, or observe or what?

BROWN: Yes, Mr. Chairman, this is Fred Brown. I'm here just as an observer as a member of the Alaska Code Revision Commission. If anyone wishes to address any questions to me, may I assume Professor Fessler is also available?

COWDERY: Yes, they are in the audience. Craig Stowers and John Abbott and Dan Fessler in the audience here.

BROWN: They are physically in Juneau?

COWDERY: We're in Anchorage.

BROWN: Well, I'll figure out all these different places in Alaska.

COWDERY: Mr. Paul Kelly.

KELLY: I was considering the number of witnesses, could we go ahead and take two witnesses at this time?

COWDERY: Yes, sure, please come.

KELLY: This is Bruce Frenzel from ARCO.

BUSSELL: Since we are recording electronically, this thing is being done by teleconference, could you state you name for the record and for the committees information prior to proceeding with remarks on the subject.

KELLY: My name is Paul Kelly, speaking this morning on behalf of the, I'm chairman of the business law section of the Alaska Bar Association, and the views I'm expressing are on behalf of that section.

FRENZEL: My name is Bruce Frenzel, and I am an attorney with ARCO Alaska, Inc., here in Anchorage, representing ARCO Alaska, Inc.

KELLY: The first point, just with regard to the history of the bill right here, I do recognize the fact that we are

addressing the issue in February of 1984, ten months after the bill was introduced, and acknowledge that maybe we should have been involved earlier. But the point is that we are trying to provide this body here with the input from the clients we represent, the small corporations mainly the mom and pop corporations are a lot of the ones I represent who are going to be significantly affected who don't have an in-house attorney or attorney on staff as a consultant on a regular basis. And I am trying to work with them right now and explain to them what's going on. But these are the people who do not have that daily input from an attorney to explain to them what's happening, what this code is going to do to them. And there are many more out there who will have that problem, I think.

Secondly, the bill as it's proposed is an excellent, very well thought out obviously bill, and it represents many important changes I think to the code. And many of them are beneficial, and we don't want to represent to the committee today that we are opposed to the bill. The primary purpose of the business law section anyway in appearing here today is to request that we be given a period of time to complete a quick review and an impact report so that you could have that in your file and you can refer to that when decisions are being made at a later time. We are not here this morning to debate the merits and demerits of the proposed code. We are not in a position at this point until we have completed our study. But I think we should address just a couple of points to explain why we have this concern, and why we need this extra time.

With regard to this section 488, section which I think was proposed primarily to deal with the collapsible corporation problem for people who are setting up corporations, conducting a business and then absconding leaving the laborers, materialmen, suppliers without any funds. That is an important aspect which I think needs to be addressed, but I don't think it necessarily needs to be addressed when we are dealing with the broad spectrum of corporations. We're dealing not only with ARCO but Continental Airlines that they're doing business in Alaska, and the corner grocery store and the Native corporations or at least their subsidiary corporations, which are not Native corporations. They are business making corporations and so all of the Native corporations have certain provisions applicable to them, their profit making ventures are going to come under this code. And they are still going to have the officers and directors being liable for activities of their subsidiaries.

Another point that needs to be made is the commentary is the case law on this code right here, and comprises the amalgamation of California case law, Model Business Corporation Act, New York case law and the New York Act. The one point I'd like to make as we've developed it, under the present code that we've got, we've got very few cases since statehood that have explained what a lot of the problems in that law mean. There has

been a very slight development of the case law under the present Business Corporation Act. I doubt if there is going to be any significant expansion of case law development of this new proposed act when it's finally enacted.

So the point is we are developing under this new proposed code a new body of law that's not going to have any concurrently developing case law in other jurisdictions, which you do have, at least we are able to refer to Oregon or Washington as having some similar case law development. And if we were to adopt the Model Business Corporation Act revisions, which are being done at this time, if we were to adopt those we would then have a concurrently developing case law in other jurisdictions. What we are doing here is we are going to have unique case law development in Alaska which is, there has been very little development in Alaska under the present Act anyway.

And finally, one issue that was addressed on sec. 488 as I recall, this was sold as an idea that would protect fishermen and other people dealing say with fish purchasers. And I do a lot of work out in the Bay and I understand that problem. The problem is that I also know there is a contract provision that allows your corporation to contract out of liability by having an exculpation clause that says we are not liable. You are not going to hold us liable, the officers and directors, for the debts of the corporation. You can contract out of the liability, and I can assure you when you've got an unequal bargaining power, like the fisherman versus a fish purchaser. Every contract is going to have an exculpation clause in it.

The problem is that I think the issues put forth probably would be, or the issue more properly addressed, may be in terms of a fisheries bond that we have readily available. We do have a present fisheries tax bond that buyers have to post, and that could be expanded if that's felt to be the solution. So there are other ways of possibly dealing with this issue that would not affect all the corporations from ARCO down to the corner grocery store. And I think that that's something that also should be looked at.

But finally, I guess the bottom line is we would just like to have another 30 days to complete our study and make some report to the committee.

FRENZEL: Good morning, my name is Bruce Frenzel. I am an attorney with ARCO Alaska, Inc. I am also a member of the corporate code revision task force referred to here previously with the business law committee of the Alaska Bar Association. I am speaking today on behalf of ARCO Alaska, Inc., a wholly owned subsidiary of Atlantic Richfield Company.

Proposed HB 343 envisions a completely new corporate code. As noted in the House and Senate Joint Journal Supplement

No. 11, dated April 8, 1983, major portions of this bill are "without major precedent in Alaska law." Any such major changes deserve adequate time for persons affected by this bill to review and comment. We recognize that the bill was introduced last April, but has layed dormant until now.

We especially appreciate the hard work of the Alaska Code Revision Committee which has gone into the preparation of this bill, but are strongly opposed to certain portions of it and are uncomfortable with others. ARCO respectfully requests that consideration of this bill be deferred for 30 days so that specific, constructive comment on the precedent-setting portions of this bill can be made. With constructive changes to the bill, ARCO may be able to support it.

As currently drafted, one specific objectionable provision allows individual liability for corporate officers which destroys the basic purpose of incorporation which is to limit liability for corporate officers and shareholders. For a large corporation such as ours, the proposed provision combined with the very large number of creditors, would amount to completely unlimited liability for a few of our high level employees. Such a provision is also likely to be the more onerous for small or closely held corporations.

We will commit ourselves to recommend specific language changes to make the bill acceptable. Unless consideration is deferred, however, we must strongly oppose the bill as drafted.

COWDERY: Thank you. If that's prepared testimony, could you make that available for the committee. Any questions of the witness? I would like to touch on Paul's area of fishermen, or in the fishing industry it would seem to me that a corporation could have many very quick liabilities and if the runs are heavy could create some problems, if that was what you were alluding to, the $25,000 limit could get very small. The aggregate of limits could actually get very large, if I understood what you were saying. Basically, that possibility . . .

KELLY: Well, under the present bill right now it's $25,000 per creditor so it's an unlimited liability in the sense that one company I dealt with, we have 200 fishermen delivering. I was representing the fishermen on that joint venture. So it's 200 times $25,000, if they caught that much. But speaking of salmon season, that would not be that unusual.

It's an uninsurable risk, I think. According to Mr. Block, he was alluding to it as a performance bond, his analogy. To me it would be an uninsurable risk. I cannot imagine an insurance company unless they put limits on the risk. Obviously, they'd have to. You would have an uninsurable risk because you would have an unknown liability, depending on how large your

company is. An electric company which has a lot of contracts, an engineering company which has tremendous potential liability regarding the projects they are dealing with.

So to me I think it would be technically an uninsurable risk. And it would affect the mom and pop businesses all the way up to ARCO. And, again, when you've got this unequal bargaining power, when you've got a big company that can tell its suppliers you're going to deal with us, we're not going to have liability. But the people on the other end, the suppliers are going to get stuck for the people further down the line because they are not in the same bargaining position. They cannot impose these conditions because they need the business to continue in business.

So these are all problems that need to be dealt with, and I hate to get side tracked by this one issue because I think there are a lot of other issues in the bill, too.

COWDERY: I just wanted to bring that one point up. Rep. Furnace.

FURNACE: Thank you, Mr. Chairman. In your opinion, should the secondary liability be $25,000 aggregate as opposed to per creditor?

KELLY: If that was the only position left, I'd say yes. I think, you know, what I'm looking at right now is what essentially you'd be doing if your corporate officers and directors would be sureties for the corporation debt of $25,000. Maybe the possibility would be to require a minimum funding of $25,000. Minimal capitalization. That might be another possibility. So at least you would have a corporation with a minimum capitalization of $25,000. Maybe that's an issue, would that affect your small mom and pop corporations that are trying to start up and they just want to start a little printing business down the road, or they want to.

There's a lot of small businesses with liability, initial liability, that wouldn't seem to be that much. And they want to start a minimal investment program to see, you know it's an entrepreneurship that Mr. Block was alluding to earlier.

FURNACE: You indicated perhaps a minimum capitalization of the corporation at $25,000. It doesn't appear to properly address the question. The question is, heretofore, we have considered there being a limited liability of corporate officers. And you're indicating that under the present bill, the liability is uncertain. There is no limit on it. It appears there should be some effort to at least cap that in come way. Put a dollar figure so as to make it predictable. Or, if no more, at least make it insurable. That's why my thinking was to have at least an aggregate amount of secondary liability that is

certain and predictable as opposed to having it unlimited all the way through. That would be the major concern.

KELLY: I'd say, yes, you know, that again if the public policy is going to be adopted that we are going to make corporate officers and directors liable for corporate activities. If that's the public policy change we want at this point beyond what our present case law says, there is a present case law liability that goes through the courts. It's going to take extensive lititgation, and I'm aware of all those problems. But aside from that, if our public policy change is going to be we are going to have a $25,000 surety bond by the officers and directors from now on then, yes, that would be much more palatable than an unlimited, unknown liability.

COWDERY: Rep. Uehling.

UEHLING: Thank you, Mr. Chairman. I know you talked about California case law and also New York case law. And if this code revision were passed and becomes part of the statutes, how do you feel, don't you feel that you can take precedent on other states as far as how they followed the same sort of approach that we have in Alaska, as far as other case law in other states. You said you had to have a new, this would be a new precedent, and it would be awfully difficult to be able to guage it because you never had this kind of new effect.

KELLY: Yes, definitely you would be able to refer to other jurisdictions who have a similar statute and try an analogize there and say, well, look what they did over here in California. Yes, there would be that capability all the time. But I am saying that again Alaska is amalgamating this case law from at least three bodies of case law. California, New York and the Model Act. And I am saying that maybe we ought to look, a possibility we are going to explore is maybe adopting the provisions of the Model Act, which has its own commentary and which will be developing in other jurisdictions that are adopting the Model Act at the same time. I am saying you'd have a greater developing case law along those lines.

VOICE: Can you hear me, Anchorage?

COWDERY: Yes, we can hear you. Go ahead.

UEHLING: Another follow up question. If, in fact, we were to clean up this liability section, and considering that the present code is in many people's terms, ambiguous, do you feel that if this particular section was cleaned up that you would have no problem with the rest of the code?

KELLY: You ask a lawyer a question like that? We just need our 30 days. And to be honest with you, I've read through the Act. I've tried to understand a lot of the provisions. I see

some excellent changes, really well thought out changes. And I think we should adopte them today, but there are other things that definitely we need to have further consideration and input from a larger segment of th community.

We have attorneys here representing insurance companies, banks, mom and pop grocery stores, fishermen, oil companies, and to get the input from this broader base might be helpful at this point.

COWDERY: Any more questions of the House Committee? Rep. Bussell.

BUSSELL: Thank you, Mr. Chairman. Are there questions of Judiciary Committee members? Rep. Malone.

MALONE: Thank you, Mr. Chairman. So far it seems like most of the testimony we've heard has focused on two points. One of which is this 30 days, and I'd like to ask of people who are testifying now, is 30 days, when do you envision the starting and when do you envision it ending? As Mr. Wendte pointed out, the bill has been introduced in the legislature for, well, he said ten months. I'd say close to a year, but I can understand it because the committee is seriously getting work on it, it's getting people's attention. When do you envision this 30 days would be completed and this task force report would be finished? Is there a specific date we are looking at, or 30 days from whenever you start on it?

KELLY: Well, we've already started. We had our organizational meeting yesterday morning at seven, in fact. Mr. Block called it. I'd say by the end of March we'll have the report in your hands. That's our goal. We wanted to give the committee a palatable, you know, something they could accept. And I think 30 days, by the end of March, you'll have a written report in your hands. And I hope that doesn't cause any problems with your concerns about this bill, getting it passed this year.

MALONE: I think that with the additional 30 day delay that the likelihood of the legislation be adopted by the legislature this year is, starts to become very remote. Nonetheless, I'd still like to have the information, and if we could have it by the end of March, it might well be worth waiting for.

BUSSELL: Are there other questions or comments by other Judiciary Committee membership?

KOPONEN: Question from Fairbanks, one question. ARCO Alaska. Where is ARCO Alaska and its affiliate corporation organized? What state?

FRENZEL: ARCO Alaska, Inc. is a Delaware corporation,

and Atlantic Richfield Company is a Pennsylvania corporation.

BUSSELL: Are there further questions of other people wanting to talk on the network that are here today. If not, I would like to ask both of you just a brief question. How long have each of you been in Alaska?

FRENZEL: I've been in Alaska almost three years.

KELLY: Continuously since '76.

BUSSELL: Have either of you asked or had conversations with anybody in the legislature to bring about this type of change in the corporation law, or ask any member of the legislature to submit legislation changing corporate law?

KELLY: I, myself, no.

FRENZEL: No, we have not.

BUSSELL: Have either one of you been aware of the code review commission's work on this document, or on this or any other work that the code review commission does?

KELLY: I heard about it last year on this particular bill right here. And then in February I got a call explaining that there was a goal this year I guess to pass this bill. And since that time, in other words, I'm explaining my understanding anyway of what happened. And that's when I called Mr. Block and said we have an obligation I think to provide the commission itself with some type of input right away if they are going to pass this thing this year.

FRENZEL: I was aware last year that the revision of the corporate code was proposed. I was not aware of the director/officer liability issues.

BUSSELL: Do either or both of you know about the other work that the code review commission is doing right now with regard to other corporate law that is contained in statute, i.e., the nonprofit part and the cooperative corporations.

KELLY: I am generally aware that there are proposed code revisions to both of those areas.

FRENZEL: And I was not.

BUSSELL: Thank you, gentlemen. I almost have to apologize to both of you, too. I've been very inactive for this last year. I don't personally attend any of the meetings, but I do have staff that goes to them. As a legislative member, if I don't have any other part of the thing I should be telling people about what they're doing. I am ashamed of my part of it. Thank

you.

KELLY: Let's hope we can also catch up and assist you in providing input on this.

WENDTE: Mr. Chairman.

COWDERY: Rep. Wendte.

WENDTE: Again, to clarify the point on the other work of the commission. The Labor and Commerce Committee does have HB 437 in it dealing with the nonprofit code revision. And it has gone from the commission to the legislature. It was introduced eight months ago, in June of last year. And that's the bill I was referring to, although the chairman didn't seem to recall we had that committee. But that is another piece of legislation, and I would ask, although it's clearly not going to go anywhere this year, it probably would be good for you to keep in contact with with commission or get a copy of that bill. Again it's 437 in the House, and begin a review of that, so we're not caught in a similar situation next year.

KELLY: I'd like to thank the respective committees for their interest, and we hope to be able to be a better source of information and cooperate better with you in the future. Thank you.

COWDERY: The next one, witness up, Mr. Jack Thompson.

THOMPSON: Yes, my name is Jack Thompson. I'm the vice president of Air Van Lines and the secretary-treasurer of Craftsman Associates, Inc. One of the few people here today that's probably not an attorney, so I'll try to keep my remarks short. I'm involved with two companies. One is a fairly good sized moving company and the other is a small furniture repair business. So contrary to what somebody said, I read the whole bill, and being a nonattorney, I didn't understand most of it.

However, I did read carefully sec. 488 because some friends of mine had mentioned it to me. And I guess I'd have to agree with Mr. Block in one respect that this would be a public policy philosophy position. It's either going to be or it's not going to be. I personally believe that officers of corporations should have some kind of responsibility, fiscal responsibilty for their corporations.

In Europe you've got, in some countries, you've got two kinds of limited liability corporations. Some where you have no liability like we do here and some where you have some liability. So I'm not sure how to address the idea that Mr. Furnace has mentioned about the, as an aggregate. That might be an idea. But I certainly think that there should be something in there to make people think twice before they do certain things

with their corporation.

I'd like to remind everybody what happened when the pipeline ended. There was a number of trucking companies that went bankrupt. I guess everybody got stuck with a certain amount of money. I remember one of them that was in the process of selling their assets on the side right here in town, and the courts and the creditors couldn't do anything about it because of the time consumed. Mr. Block alluded to the fact that there are avenues one can go after people if they pirate their corporation. You know, if somebody does something by fraud, trying to prosecute fraud is an exercise in futility I think. If one can get the A.G. to prosecute to start with, which is also doubtful, I'm not trying to denegrate the A.G., but it's just a matter of fact you're not going to get anybody to . . . prosecutorial discretion I guess is the phrase and that stops a lot of things.

I've been involved in workers' comp for the last few years. And I recall three years ago there was a commission set up by Governor Hammond. And I went to all of those meetings. And I recall an individual that worked in a cafe up in Glenallen. And he had injured himself. And after he injured himself, it turned out that that corporation did not have workers' compensation. And his concern now, what happened to him because he couldn't get any money from anybody. There wasn't any. But that he thought it was wrong that this should happen to a working man, and there should be some kind of avenue that it wouldn't happen again.

Two weeks after his testimony, that restaurant went into bankruptcy. Senator Stimson at the time promised that individual that the state would pierce the corporate veil and try to get those people. I don't know if in fact that is a fact. My involvement in workers' comp leads me to the one thing, though, that there are people that form corporations here that either through ignorance or through a nonknowledge of the economics of their business, they don't do certain things. For instance, the procuring of workers' comp.

I'd like to mention my furniture repair business. I have a partner in it that is a young fellow that doesn't understand a lot of these things. And when I told him we had to have workers' comp, and I wouldn't be a party to it unless we were and because I am a partner that's the way it goes, and it is a corporation, we bought workers' comp. I found out that most other people in that business don't even have it, because when I went to find a rating for furniture repairman, it turned out they didn't have one in this state. And the reason they didn't have one in this state is because apparently nobody had ever bought it for this particular profession. Which meant that everybody that practiced that business in the state does not have workers' comp.

So there are a number of people who form corporations for the purpose of tax avoidance. There's all kinds of reasons that I think that corporations, and maybe small ones more than the big ones, should have some form of liability. And I have no idea what the dollar amount should be. I hear a lot of talk today about liability, liability of directors being a problem. I think that the responsibility of directors and officers is equally important. And for me personally I take it personally that any corporation that I'm involved with, that I am going to try and run it ethically and honestly. And if things get bad financially, I'd just better decide to cut my losses and get out of business, and not dump as much as I can on other businessmen around. That's all that I've got.

COWDERY: Thank you. I understand what you said when it was a very complex one hundred and some page bill and a lot of things wasn't understood. And that's what we're trying to make it understandable. It's not that we are trying to cut the bill up, we are just trying to clarify some of the areas that might save some legal problems later on. And you touched on foreign corporations. I was wondering maybe what some of the other witnesses might think about this. That a foreign corporation that operates here, I was wondering if we could penetrate the corporate shield for liability, that's a question that maybe should be thought about, too. You not being an attorney, maybe don't have an answer to that.

THOMPSON: I could probably give you the right answer, but I'll leave it to the attorneys.

COWDERY: Rep. Wendte.

WENDTE: Thank you. This is not a question. I would like to commend you for your attitude in business. It appears to me the Judiciary Committee, it seems to me we deal with a lot of things where you hear a lot, particularly in the crime area, a lot of the horrible things in Alaska and attitudes and things that we have to deal with directly. It's pleasing to have comments such as yours.

COWDERY: Any other questions? Thank you. Representative, Jack.

WENDTE: How did you hear about this bill?

THOMPSON: I have lunch every Wednesday with a number of attorneys because they are friends of mine. And three others of us that pursue honest endeavors. And we talk about a lot of things and this happened to come up. And I also know John Abbott. I don't know about Professor Fessler's background, but I know that he makes the best spaghetti and meatballs in the world. And that's basically, I found out about it some time ago and got a copy of the bill and read it. But I know John Abbott,

and it's just based on conversations with John and other friends that talk together.

WENDTE: You certainly weren't implying that those three attorneys you have lunch with weren't the only honest attorneys in the state.

THOMPSON: There is nine of them.

COWDERY: Thank you. I was hoping that, Rep. Wendte, we have advertised this and we were hoping that some of the people had noticed some of the advertisement in the newspapers.

THOMPSON: I did notice the ad. As a matter of fact, it's probably the largest ad I ever saw and . . .I was looking for the word starring.

COWDERY: Rep. Malone.

MALONE: Mr. Chairman, I also appreciate the testimony, but I wanted to ask a question that hasn't anything to do with this legislation and that is, I would be interested to know, not necessarily now, could get the information later, as to the name of the person involved in this, the worker who was injured in this insurance case . . . sometime I'd like . . .

THOMPSON: It would be a matter of public record because it was in the hearings. And the name of the cafe, the Hub Cafe was the name of the cafe. And this is '84, so it must have been in January or February of '81. It was when Mr. Hammond was still the governor. It was in February of that last year that the hearings were being held because he appointed the commission. And Senator Stimson and Brian Rogers chaired that meeting, and they were both present, as well as Dennis Maloney who was on the committee and Tom O'Keefe of Industrial Indemnity. And the man came in from Glenallen. There was a lot of allegations including the fact that the local magistrate knew about all of this. I mean it was a very serious thing, it sure would leave one with that it's an important thing to make sure that there are no disadvantaged persons that one may not think about. And workers' comp that hit my particular mind because that's my particular advocation bent in that direction.

COWDERY: Thank you. Any more questions? Mr. Henderson, Roger Henderson.

HENDERSON: Ladies and gentlemen. I have spoken before some of you before last year on another matter. I am an attorney in private practice here in Anchorage. And I represent a number of small corporations as general counsel in a wide range of corporate and business activities. And over the years I have also represented hundreds of suppliers outside the state who are on one end of some of this legislation. So I feel that I've got

a rather broad background from both aspects, both creditors and small corporations.

Initially, I would like to say one thing. There has been interest shown by these two committees and the questions asked about the possiblity of insurance. And the two attorneys who testified before me have both analogized any insurance which might be available for this corporate liability to payment and performance bond. Well, as a practical matter, I agree with them, incidentally, that if there were any insurance available to cover this kind of liability for general creditors, it would be in that nature. But as a practical matter, as some of you already know, in order to get a payment and performance bond you've got to pledge personal liability to the bonding company. So you're looking at a full of the wisp. I think this kind of liability as a practical matter not insurable.

I would agree that this proposed legislation does call for substantive changes in both social and economic philosophy. Those changes, not just in Alaska, but changes from the accepted social and economic philosophies that prevail in other states throughout the nation. Now, I'm not going to necessarily criticize all the aspects of this particular legislation. Some of it is very good and probably has been needed for a long time. But I think it is important that you be aware of the potential impact and changes that this bill is likely to bring about should it pass in its present form.

I am going to touch on just a few brief examples that I'll bring to your attention now. I am sure that the committee who is going to be working on this will do a much more, a very thorough job of analyzing this bill in total. For example [TAPE CHANGE] . . . bill would impose an additional requirement for the service of process in the event the registered agent cannot be located or if there is no registered office. Now, I submit that that is an additional imposition upon the creditors of a corporation which I question whether is necessary given the fact that the corporation is the one who is required by law as a condition to coming into existence. To establish a named person as a registered agent and an office where he can be located.

Sec. 310 for example, requires, this has already been mentioned incidentally, requires items to be contained in the articles of incorporation which are presently contained in the bylaws. Here, again, you've heard other witnesses testify as to the increase in costs to start up a corporation. And my estimation is that it probably would increase the initial legal fees either two or three fold.

And one observation I would like to make, and I think it's necessary you keep this in perspective, I have not done a statistical analysis. But it is my opinion that the majority of corporations in this state consist of three or fewer

stockholders. And that the majority of those corporations have a commonality of stockholders, directors and the managers or the officers.

Sec. 230, frankly, I find too complicated for the average person to understand. I read it lightly myself last night. I'm not saying that I couldn't thoroughly comprehend it if I spent the time and went through it line by line. But, sec. 230. There, for example, I suspect that that section if it every raised any issues, that would be resolved by litigation. That the courts would spend quite some time and probably a number of cases would have to be taken up before that could be decided. At the present time the statute is very simple, I don't find anything unworkable about it. It allows the number of directors if less than three to be equal to the number of shareholders in the corporation. The formula is straightforward, and I am not aware of any particular problems with it, at least in the class that I've represented.

Sec. 233, for example, I find that too burdensome. Many corporations at the present time maintain one set of books and records, and it's in the registered agent's office. For about half of the corporations that I represent, I keep the books and records in my office. As a matter of present law, the records are required to be available to any shareholder upon request. If they request the president or the registered agent for a copy or permission to review the corporate records, the person at this time if he doesn't have them is required to tell him where they are. For example, any shareholder who calls my office and says I want to see the records of so and so, is entitled to do so as a matter of law, and he can come in my conference room and do it.

Secs. 358 through 383 are extremely complicated. In my opinion if those sections were enacted, they are basically going to open the door to countless lawsuits as compared to the present law. I am not one of those persons who advocates anything which will cause attorneys to have more work and earn more money from their clients. I like to see the least complicated statutes as possible, and the least amount of litigation. I think these sections are going to open the door to litigation for years to come.

Sec. 450, for example, is another one that is a radical from the existing financial and legal philosophy. Sec. 450, in my interpretation, would impose liability on directors for negligence in judgment. Traditionally, the corporate directors have always been shielded from misjudgment, from mismanagement even, as long as it was not done in bad faith. And I submit that this is going to change the philosophy within the business community and also it's going to open the door for a large number of lawsuits.

Sec. 488, which, of course, is the one that probably has gotten the most attention, the secondary liability allowing the piercing of the corporate veil. I think that the effect of this particular section would be to definitely dampen entrepreneurism. The way it works at the present time is if a small, risky venture started, and many small ventures are risky, and the stockholders are willing to put a certain amount of money into this. As an example, a service that is needed or at least as people perceive is being needed in the community, might require an investment initially of $50,000. Two people who want to start this business are each willing to put up $25,000. But they are certainly not willing to put up any more because they don't know whether the business is going to fly or not. The only way they are going to find out is to get in really and try. But they are willing to make that much of a risk. The business could get started up, for example, and it might do extremely well. It's good for the people who started it, it's good for the community, and it's good for the suppliers that these people deal with. At the present time, if, in fact, it turns out for whatever reason that the business was not there or it was a bad gamble, the risk of that failure is spread among, for example, creditors, many of whom probably include outside suppliers. The type of people who I represent. And just because I represent that type of people, doesn't mean that I'm advocating their position. What I am telling you is that in my opinion you are going to be shifting the risk of failure from the people who supply this operation, and who in fact know the risk they are taking at the present time when they extend credit to a small corporation, to the directors or the managers. And then the question, I think, this group has to ask is whether or not you want to make that radical a change in present philosophies.

So basically, that's all I have to say. I just want members to be aware of the radical changes. In my opinion they are radical departures from existing statutes and philosophies.

COWDERY: Thank you. Rep. Wendte.

WENDTE: You indicated going into your testimony that you've represented both sides of that equasion . . .

HENDERSON: Both the creditors and the small business corporations.

WENDTE: In your judgment, should we make that shift of risk in relation to the creditors.

HENDERSON: In my personal judgment? No.

WENDTE: Your judgment is that the risk should remain with the creditors.

HENDERSON: With some exceptions. Now the workers' comp

problem has been brought out. I would treat that not as a shifting of responsibility, but I think the appropriate place to look at the workers' comp situation is a change in the workers' comp law. It's entirely possible that that is one area where liability should be imposed on directors and managers. But that's a special instance. That's an instance where a form of insurance is required by law to be obtained, and there you would be having a specific sanction for failure to do something that's already required. I see that as a different situation than protection of general creditors.

COWDERY: On my question I asked about the corporate shield of some foreign corporations, do you think that could be penetrated, stockholders of foreign corporations under this?

HENDERSON: Yes, I do. There again this is not based on a thorough reading and a thorough analysis of the bill. The question that should be addressed, in my opinion, is whether or not there is any reason or any need to treat foreign corporations or stockholders of foreign corporations differently from domestic corporations.

FURNACE: Thank you, Mr. Chairman. One of the concerns is that officers and directors of some foreign corporations may be outside of the jurisdiction of the Alaska courts, can you see this as posing a potential problem?

HENDERSON: Not really. They are subject, the foreign corporation is subject to jurisdiction of this court if the corporation is doing business in Alaska.

FURNACE: Excuse me, I'm sorry, I should have referred specifically to the secondary liability in being able to hold the officers and directors of a foreign corporation who may not be subject to the jurisdiction of Alaska courts, I should clarify that.

HENDERSON: Now you are asking a lawyer to do something that he never likes to do, which is to give a legal opinion off the top of his head. My opinion, my initial opinion, is that probably should this statute be passed, Alaska would have jurisdiction over the directors or people personally through our long-arm statute. There again that's going to take some case law to determine specifically, and I'm sure that it would be challenged. And the State Supreme Court ultimately would rule on whether there was personal jurisdiction or not.

COWDERY: Are there further questions? Rep. Liska.

LISKA: Thank you, Mr. Chairman. Mr. Henderson, I sure thank you for your input on this. It's very thorough. The way I read what you're trying to tell us is that this is so radical, this piece of legislation, that we'll have no case law to back it

up. That we're going to end up with a lot, we're inviting a lot of lawsuits. Is the way I'm reading you?

HENDERSON: There again, like my predecessors, I don't claim to be an expert on the corporate codes of the other states. But from reading the comments and the letter of transmittal from the code revision commission to the chairman, I get the impression that even though New York and California are considering revisions to their corporate code, they haven't adopted this statute or this code at the present time. And nobody knows whether they will or not. So at the present time it is my understanding that if this were adopted, many of the exceptions would be new law and would be standing out there for the first time.

COWDERY: Are there other quick questions of the other teleconference sites or other committee members?

KOPONEN: Yes, Mr. Chairman, this is Rep. Koponen in Fairbanks. Does the witness have a copy, or has he read the House and Senate Joint Journal Supplement, dated April 8, 1983, the official commentary of the Alaska Code Revision Commission.

HENDERSON: Not that I am aware of. I've read a lot of things recently, but I don't believe that's one of them.

KOPONEN: I believe there will be a copy there. Page 64. And I'll comment on the statutory restraints and the evasion of corporate assets, which is, of course, you mentioned . . . We've had information about a number of having statutes to govern that is perhaps desirable, whether these are the desirable ones or not. But the absence of this kind of information seems to create just as many suits.

HENDERSON: Well, I think the point that I am trying to make and some of the witnesses before me have been making without coming right out and saying it, is that anytime that you have a statute, certain portions of it are going to be subject to interpretation in the courts.

KOPONEN: Absence in the statutes seems to do the same thing.

HENDERSON: That's true. But case law is, or what we call common law, is basically pretty well established and has been evolved over several hundred years. In a case like this, you're changing what is referred to as the common law, and you're not simply codifying or immortalizing by the legislature existing common law. You are creating law which is contrary to existing common law. And whenever you do that, you create potential court cases where the specific language and the interpretation of the statutes is a matter for the courts to determine.

KOPONEN: Have you read the Western California statutes?

HENDERSON: No, I have not.

KOPONEN: These do seem to be drawn in part from the statutes that we've been . . .

HENDERSON: There again I don't claim to be an expert in the matter, but it's my understanding from reading this single document that portions of the California statute are included in this, but that this does go farther in some respects that the California code as it now exists.

BUSSELL: Are there further questions from any people on the teleconference network or other committee members? If not, just before you leave, Mr. Henderson, can I ask you just a couple of questions? How long have you lived in Alaska and practiced law here?

HENDERSON: I've lived in Alaska 23 years. I've practiced law since 1975.

BUSSELL: And one more question, Roger. Out of all of these, you mentioned you represent a number of corporations. How many of those corporations do you sit on as a board member? And generally, that's the practice of an awful lot of attorneys here.

HENDERSON: It is. It's one that I try to avoid. I give counsel to the board of directors frequently, as a board and individually. And I give legal counsel to the managers and officers. As a matter of my personal practice, I attempt to avoid becoming a board member myself.

BUSSELL: That answer was anticipated. Out of all of these folks that you represent, how many of them, what kind of a percentage would you say have members that carry O & E insurance?

HENDERSON: You mean for the personal liability of officers and directors to creditors?

BUSSELL: No, no. A lot of these, I don't know, you said you represented middle of the road clients, are there a number of these corporations that you represent where O & E insurance is carried?

HENDERSON: I'm not aware of any.

BUSSELL: I think that's an important statement to be made here. And if you represent a large block of what you consider middle corporate, and no one presently carries O & E

insurance?

HENDERSON: Not to my knowledge. There again you must remember the majority of the corporations which I do represent have three or fewer shareholders.

BUSSELL: Where, in your opinion because you've practiced law here so long, is the line generally drawn for O & E insurance? Is it because of the activity of the corporation that it is involved in, or the size of the corporation?

HENDERSON: Generally, the size of the corporation, would be my opinion. I believe that would be more of a determining factor than the nature. The larger corporations would be much more likely to obtain that for their officers and directors than the smaller ones.

BUSSELL: I don't know how far into tax law you go, but is O & E insurance when it's carried by a corporation a tax deductible item?

HENDERSON: Well, I do not have a specialty in taxes, and I think I'd better decline to answer that if you don't mind, Charlie.

BUSSELL: Mr. Henderson, I certainly thank you for taking the time out of your Friday to come down here and share those comments so openly with the committee. I've a lot of questions I could probably ask, but there are an awful lot of people to go. Once again, I really appreciate you coming down.

HENDERSON: Well, I appreciate your members for the opportunity to speak.

COWDERY: Rep. Wendte.

WENDTE: I request that the committee staff get in touch with the Department of Commerce and get the data in terms of the size of corporations. I think that'll be an important aspect of judging the impact of this statute. But I suspect as he said, as a matter fact he was probably conservative when he said just a majority of them are just these three or four people. And I would expect the Department of Commerce would be able to crank that out for us.

COWDERY: We will make that effort. I'm not certain that they have that. . .before, but I'll make that effort. The next person on the list is Mr. John Abbott.

ABBOTT: If I could defer to Professor Daniel Fessler and ask him to make some comments on some of the issues that have been raised.

WENDTE: If we are going to talk time available, I thought the principal purpose of this was to hear the people in Anchorage that wanted to comment essentially on his work. And it might be good to ask if those, I notice people walking out as we've gone through the morning, there may be those who might not be able to testify.

COWDERY: I was just trying to go through the list as it was written down. I didn't mean to preempt anyone. I would leave that discretion to, I think that is true that Mr. Fessler and Mr. Abbott have both been involved, and they're hear to listen as much as [illegible].

ABBOTT: [illegible], Rep. Wendte, we ask to let everybody else testify first [illegible]n . . .

COWDERY: [illegible] just going down through the list, I appreciate your . . .

ABBOTT: We'd like to testify when everybody else has had an opportunity to testify, Mr. Chairman.

VOICE: Any attorney wants the last word, Mr. Chairman.

COWDERY: The next one, Richard Retson.

ROSTEN: Thank you, Mr. Chairman. The name is Richard, Dick Rosten, I'm on the task force for the business law section in the bar also, and have been in private practice here for approximately seven years, representing both large and small corporations, and individuals and partnerships and joint ventures. I think it's a good thing that the code revision commission took a look at our statutes and made several recommendations. There are things which they had recommended which I think should be adopted, and there are other things which I think should at least be thought about some more before a decision is made. So I would join the other members of the task force who have asked for an additional 30 days. There are some things which we've had a chance to focus, and there are some things which we haven't.

I had lunch with one client yesterday and dinner with another client last night and was discussing some of these provisions. And the big one which hits them is this secondary liability issue. I think it potentially has a chilling effect on economic development in the state. People are willing to put up so much capital but perhaps no more. And they are going at risk by putting up that capital to start with. And in some situations if they go to a bank, they probably are going to have to put a personal guarantee down in addition. So they are at risk there. There is risk, different parties are going to have to take the risk. It's a public policy decision just where you want to place the risk. If you put a $25,000 minimum capitalization

requirement into the corporation code, you're effectively denying people who don't have $25,000 the opportunity to utilize a corporation. And I'm not saying it's good or bad necessarily. I just want you to be aware of the impact of that.

The Department of Commerce was mentioned a few minutes ago. I was curious whether anyone on the code revision commission asked the Department of Commerce as to what their thoughts as to what was needed. On the secondary liability, it seems to hit on protecting creditors. Were creditors asked if they felt, where did the initiative come from for that? The body of law, I think it's very good that Alaska be able to draw on a body of case law elsewhere. We are a young state. A lot of the issues that we face have been faced in other states. A lot of people devote a lot of time and money to those, and it's senseless to reinvent the wheel up here. So if we can draw on the law of other states with similar statutory provisions, I think that's far the better.

Some of the people on our task force referred to this thing as the lawyers relief act. Well, we are not looking for ways to make, have more business make more money under this. I think a lot of us, if they are sensible changes, that's fine. But we don't want to make work for ourselves and have our clients spend money on us. That's not what we view our world as a commercial lawyer.

The questions was raised earlier about piercing the corporate veil of a foreign corporation. You can pierce the corporate veil of any corporation if the proper facts are there regardless of whether it's domestic. As a practical matter, it may be more difficult to find out some of the facts and be more expensive to get at the facts. And even if you get a judgment against somebody else and forcing a judgment to another jurisdiction, it can be more difficult, if not impossible. And if you have a $25,000 judgment, for instance, you may or may not be able to find somebody who is going to go chase after their assets in a different state.

Also mentioned earlier was where records, corporate records of the corporations are kept. Some clients I have are very good about keeping up the corporation and they have good record keeping. They keep their corporate books. Other clients of mine say that's what I hire you for, I want you to do it because at least I know where it is. You're organized for that and I've got other things to worry about. I think that's something that should be left in the discretion of the individual client.

I think a lot of the issues as I've looked at this, I first became aware of the bill, by the way, at the bar convention where Professor Fessler made a presentation and quite frankly I think when we heard it wasn't going anywhere last year in the

legislature, we didn't pay that much attention to it. Not unlike the revolutionaries during the American war, until it starts to affect your pocketbook. You don't pay that much attention to change coming down the road. It's here now. I think it does deserve attention, and I think it does deserve the report of the task force so that you have the opportunity to consider that.

There are a number of issues that the code brings to light and leaves up the decision of the individuals involved in the corporation, which I think is a good thing. It says these are issues that need to be considered and under our present statutory scheme, they not, you don't have to consider them. It leaves the option to go one way or the other. I think that's a good thing. On the other hand, I've been in practice here seven years. I represent businesses, and I've not run into insurmountable problems under the present code. But I do think there is a lot of, a lot lacking in the present code, and I would certainly hope that at least some of these provisions would be adopted.

Lastly, I'd just like to mention that as far as the advertisement in the newspaper, I thought that was exceptionally well done as oppose to a tiny legal ad this is something that people would really look at and notice. I commend you for that.

COWDERY: Thank you. Rep. Wendte.

WENDTE: Listening to your comments, you mentioned you met your client at lunch yesterday, I have to acknowledge that some of my corporate records are on dinner napkins, and not particularly well kept. I'd ask the question though, how many are on the task force? How large is the task force?

ROSTEN: We have, I think ten. We've broken it down into different subcommittees to look at different sections. Again, as Dick Block mentioned earlier hitting the economic impact as much as anything else. A scholarly review has already been done. We don't pretend to want to do that again. I think also that two of them would put everyone asleep. One is necessary, two of them would be too much. The particular task force that I'm on is meeting at 7:00 a.m. next Monday morning to go over this. I've asked people to make sure they review this statute before then, all statutes.

WENDTE: Are all ten members from the Anchorage area?

ROSTEN: I believe so.

KELLY: Yes, they are considering the time involved. We had to get a group that would get together immediately . . .

ROSTEN: We talked also about hopefully getting input from the chamber of commerce. At least drawing that to your

attention, I'll recommend that also. We can speak for our client's interests or come to ask questions, but I think it also would be very good if you can get some direct input from business people without having to go through lawyers.

COWDERY: Yes, I had planned, in fact, was going to may contract or had been scheduled to contact the chamber about this matter today, but we will. My intention to hold this, continue this meeting on until 1:00 p.m., and we're going to break for lunch and then come back if we have more people to testify. But we do intend to get a hold of the chamber. Rep. Uehling.

UEHLING: Thank you, Mr. Chairman. Just going over the Journal Supplement here, and a letter that was to Bill Ray from John Abbott, it was stated here that the proposed Alaska Corporations Code is what they call a middle of the road attempt here. Maybe you could comment on that, you had said that there was some problems in what you saw that they had put forward. Maybe you could comment on that.

ROSTEN: I'm not quite sure that I fully understand. It's middle of the road in the sense that it's not all shareholder oriented and it's not all management oriented. I believe that was the intent. And that I think is a good approach. It's a more detailed statute than many states, which may be a good or bad thing from the amount of litigation which may or may not ensue. This means to say, that in the absence of a precise statute sometimes issues don't come to light and you can rely on the common law which has been developed over a couple hundred years. On the other hand, when you put things down in statutes, sometimes they're answered precisely and there is not need to go to the courts. Other times you get a very detailed constitution as it were, and then you worry about well what if something wasn't in there. Was it left out on purpose. Unless I think you're talking about another concept, middle of the road. This is certainly more detailed than a lot of corporation code statutes. But it's hard to predict at this point, whether it's going to mean more or less litigation in the future.

UEHLING: Thank you, Mr. Chairman. And a follow up question, we talked a bit about corporations that were more venture capital intensive, and we also talked about entrepreneurs and getting the more risky ventures. In your opinion do you feel that the proposed changes in the code are really going to limit the venture capitalists, the entrepreneurs and that kind of thing?

ROSTEN: I do think it will as presently constituted. I'm also concerned about the large corporations who are coming in here to do mineral development, who will be subject to these, it may have an impact on them. I'm sensitive to the point where people can track a corporation, they should be paid. One of the risks you have. That's a risk they are generally aware of is

that it is a corporation and you can issue. It depends on the muscle power you have in bargaining. A bank has enough muscle power when you go in to get a loan and make you personally guarantee the loan. Whether you have that capacity when you're making your own contract with a corporation is up to the particular circumstances. So there is no magic answer which is going to protect everybody all the time. My own feeling is one particular issue, and I don't want to place too much emphasis on it, but it is the eyecatcher for everyone, is that it is going to have a chilling effect and it perhaps goes too far in that direction.

COWDERY: Thank you very much. Sec. 960 of the bill exempts officers and directors of many corporations under the provisions of sec. 488. Do you feel that constitution could be, it would seem to me that corporations and officers would certainly challenged that section in a court, if it ever got to court under the Fourteenth Amendment, do you think that could be good job security for attorneys, or how do you look at that?

ROSTEN: Well, I'd say very likely that would be challenged and yes it would created work for attorneys. And no, I don't know how it would come out.

COWDERY: Thank you. Any more, Rep. Bussell.

BUSSELL: Thank you, Mr. Chairman. Are there questions of, if there are none, I'd like to just ask you the same question I've asked most everyone else. How long have you been in Alaska, sir?

ROSTEN: Seven years.

BUSSELL: Seven years. And during your testimony you mentioned that under present statute if you really got a legitimate claim or if a corporation in your opinion has acted improperly, you can pierce the corporate veil and go after it if there is enough money involved in it . . . depending on the action the corporation is involved in.

ROSTEN: Yes, it's a sad fact of life that often times justice is what you can afford. And whether you can pierce the corporate veil, it takes more work than if you have just the individual out there on their own. But if you get a judgment against somebody, it's not worth much unless that person has money too. And the other thing you have to consider is if you pierce the corporate veil, sometimes the person's going to be run on assets and sometimes that person's going to form a coup anyway.

BUSSELL: I've done a little bit of business in Alaska over the years as I've been here too. And oft times as a businessman you have to look at who you're going after and decide

whether it's a risk of continuing your business just how much fuss you stir up. You may lose your shirt going after . . . I've . . . this piece of legislation we've got here, I don't really see changing that, do you?

ROSTEN: No. I think the basic, when clients come into my office and are upset and want to chase after somebody. I warn them that litigation is very expensive, it's a headache to live with no matter which side you're on, and you ought to think very carefully before you pursue that course. Those basic decisions, rules, still need to be made. And I recommend, I do some bankruptcy law also and one of the first questions I ask people is make sure you're not throwing good money after bad. Those sorts of decisions will still need to be made if this code were adopted.

BUSSELL: I don't see anyone on this list from the court system, but being as you've practiced law here seven years, I presume you practiced law . . .can you just give me an estimate from your prospective of what this would do, this piece of legislation's going to do to the case load at the courts, as opposed to present statute?

ROSTEN: It will increase it. It will increase it because any time you adopt a new statute, there is more uncertainty, there is going to be more litigation which will ensue. Whether in five years time there would be more or less case load in the courts is hard to predict because after a certain number of years when things have worked all the way up to the supreme court, decisions have come down, things become clarified, and this code does spell out a lot of things which are not mentioned or otherwise ambiguous under the present code. It's a necessary part of change, and I think if the code overall is a thing worthwhile adopting, that's the price society pays. I'm chuckling because who's going to make money during that. Well, we all know who makes money during that. That is just a price, and that's something you need to consider going into that.

BUSSELL: That answer's about like I thought it would come out, too. But you know I try to avoid saying that this piece of legislation is a a lawyers relief act, although . . .

ROSTEN: Well, this, one of the attorneys in our firm has a cartoon in his office which I find very apt. It shows two farmers arguing over a cow and a lawyer in the middle milking the cow.

BUSSELL: Let me ask you one more question about this $25,000. I don't know exactly how that $25,000 was reached at, whether it was with aid of a dart board or what. After this five years period, let's just say we make up a scenario here, that this thing is adopted tomorrow and we begin this five years. Is

that $25,000 in your opinion going to be $100,000 in five years?

ROSTEN: I think, because it would be increased simply because of inflation or for whatever reason . . .

BUSSELL: Increased as a result of these cases that are going to come forward out of this . . .

ROSTEN: I should say that the five year period, and I guess one exception to that is if this code were adopted in its present form, the number of cases would not decrease after five years under the $25,000. If they can go after somebody for $25,000, you're going to do. And increasing it to $100,000 would increase slightly the number of cases.

BUSSELL: I'm trying to think of the future impact, or impact on future legislatures. If you do this, obviously, or at least if I was out there trying to whack somebody, I would be putting pressure on legislators to increase that amount. And if I were a member of the bar association, I'd be putting pressure on them to increase that turkey so I could get some dough to . . .

ROSTEN: Well, no, not necessarily. I mean I take exception . . . Certainly, speaking as commercial lawyer, my job is to protect my clients. And I represent clients on both sides. And what I think is reasonable is just that. Look at the policy behind the statute, that's a social, philosophical decision to reach what amount, and I think there would be just as many attorneys trying to keep the limit to $25,000 or to decrease it to better protect the corporate clients as there would be on the other side. I think that if you do pass this piece of legislation or something that comes out of this, then it behooves the legislature to stay very closely tuned over the next several years to the good things and the bad things about the legislation as they prove out and to be very willing to take a second look at it. And not say that, well, we've spent a lot of time and effort, now our job is done, and we don't have to worry. And I'm sure there'll be people lobbying you one way or the other.

BUSSELL: Thank you, sir. I don't have any further questions. I do thank you for coming down here and sharing your comments with us. Rep. Wendte.

WENDTE: I just, given the one question that, Rep. Furnace I believe this morning distributed a letter from the court system . . .

BUSSELL: Yes, I have it. And that's the court system's opinion. I'd like an attorney's opinion, practicing here for seven years, and it goes right along with mine. I think that the number of cases would probably quadruple, and I think in five years they would probably double again.

ROSTEN: I don't know that that would necessarily be true in five years.

VOICE: I'm sure Mr. Snowden would not hestitate to point out additional case loads in consideration of his budget, so, they're not known to be too conservative in their budget requests.

BUSSELL: He may want to revise his fiscal note after this . . .

COWDERY: Thank you. Next person up, Mr. Reitman.

VOICE: A question here from Commissioner Brown.

COWDERY: Yes, Mr. Brown.

BROWN: Yes, thank you, Mr. Chairman. What I want to ask Mr. Rosten was one question. Also I would just hope that members of the task force will be in touch both with John Abbott who lives in Anchorage and also Commissioner Jerry Kurtz, because Jerry is the designee of the Alaska Bar Association. In fact, he is their representative on the code revision commission. Mr. Rosten, I hope you know that. You may know Jerry very well. I just wanted to ask about this mention of problems of a burden of requirement of inspection at the place of business. Are you referring to sec. 233 which requires the copy of bylaws to be at the place of business?

ROSTEN: I was referring to what Roger Henderson was referring to. And I don't have the section number right at hand. That would be one instance, yes.

BROWN: O.K. That was the section that he referred to. I'm not really sure how burdensome it is to have a few dozen places for a document has its headquarters office. The other thing, maybe as a footnote either for committee staff or for Professor Fessler or something. I suggest that maybe the response or comment on the Native corporations in 960 might have a different answer after 1991. I don't know if anybody's looked into that. That's all I have, Mr. Chairman.

COWDERY: O.K. Thank you, Mr. Brown. I'm sure the task force will be in contact with the code revision board.

ROSTEN: Yes, we will, and thank you for bringing that to our attention, again.

COWDERY: Stan, is it, it looks like a doctor, no.

REITMAN: My name is Stan Reitman, and I'm an attorney in Anchorage. And I've been here some twenty odd years, and I

have practiced in this area for some length and for some time. I'd just like to make a couple of general observations, if I may, without getting too much in the specifics.

Number one, the existing statute is not broke. It ain't. I think any implication that Alaska picked up something off the shelf that was some sort of absurdity, or some sort of half-baked corporation code is just not true. The genesis of the existing statute was developed in the '50s and has been kept up to date by a series of amendments over the years, which Alaska hasn't kept up with unfortunately. And the people who worked on that statute were, came from a pretty diverse group. There were academics, there were practitioners, there were people in the business world, there were financial types, there were governmental people. And the statute received widespread approval and was picked up by Alaska. [TAPE CHANGE] . . . inovation's sake. You don't want to be different just because you're in Alaska. You want to be like the other jurisdictions. If anything, we want to encourage capital to come in here. We want to encourage lenders to come in. We want entrepreneurs to come in. We don't want to have some special statute in Alaska because we ostensibly have special needs. We have some special needs, but they're not that different than they are in Oregon, or New York, or California. Now admittedly in those two large states, particularly New York and California where there are literally thousands and thousands of competing forces, they have tinkered or developed their own philosophy. But they can do it. They can go it alone to some extent. Alaska doesn't necessarily want to do that. If you've ever dealt with an outside concern that wanted to invest in Alaska, and they want to know something about the climate in which they're going to operate, they want predictibility. That's one of the goals of any law writer or law giver or law academic, or what have you is predictibility. And we want to be able to move freely across state lines.

Now whenever you've had a question or inquiry from somebody in another jurisdiction, whether it was a bank or whether it was an investor, or what have you, we were able to say we have the Model Corporation Act in Alaska. That was recognized and stood us well, in good stead as I say. So just get over the myth that we don't have something that's working because it's not true. It has worked. Now, there are people who, particularly in the last few years, and in regard, I know with the Native corporations who have found some areas which probably need some beefing up or some change or some clarification. And I know that a number of the practitioners who work for the Native corporations have participated in this code, but there are many other people who haven't unfortunately.

Now the second thing that I think is worthy of note is that there definitely has not been adequate consideration to the small corporations or the small group, the ma and pa as it was referred to here. In fact I see in addition to this liability

matter which has been talked about this morning which I think is definitely going to discourage anybody from using a corporation. Just to give you a quick example. If I was going to start an enterprise tomorrow, and I want to hire some talent. And one of the inducements for hiring talent is to make that person an official, an officer, or to give that person some stock in the corporation, you'd be a chump, you'd be a fool, you say, to accept that assignment. I mean you've got to have your head examined. And that's what you'd be foisting on unsuspecting people that are going to go into assisting entrepreneurs. You know the creditors are big boys. If you are in the business of extending credit, whether you're a bank or a materialman or whether you're a lawyer or a lumberman or what have you, you know what it is to grant credit. You're supposed to investigate, you're supposed monitor, you're taking a risk, and that's part of the ball game. So all this great concern about the creditors who are being cheated here in Alaska, I think is just so much poppycock. They're not. We have adequate tools to get at them. And as indicated this morning, if there is any fraud involved, middle-v there is a road to take, that it's dueable. Again, in the small corporation area, or small investor area, one of the tools that's frequently used and very effectively used is a shareholder's agreement. It's a treaty as referred to in the commentary, a treaty if you will. Well, I don't know what's wrong with a treaty. And the treaty, if you will, if there is unanimity among the shareholders is designed to in effect create an operational form that's akin to a partnership, which is very beneficial to the small organization. We are going to have much more difficulty with that. We are going to have a lot more trouble with it that we've got to work through the articles of incorporation as was alluded to this morning.

For example, there has been a swing towards more informality in that if you have less than three shareholders under existing statute, you can have fewer number of directors. In other words, you got two shareholders, you can have two directors. If you have one shareholder, you can have one director. Well, that's been knocked out. And that's symptomatic of what I think is the failure to deal with the small ma and pa corporations, if you will. I think this statute as it stands is going to do a great deal to discourage the use of corporations. If that's what you want to do fine. The movement in the tax law is definitely towards the partnership. I mean, nowadays it isn't as important to use corporations for tax purposes as it used to be. Because to a great extent there is what we call parity now in the law. And many of the advantages that you could procure from a tax standpoint at the corporate level is now available at the unincorporated level. And as also as you know, that for tax purposes now the corporation in the form they call the S corporation is in effect a partnership for all practical purposes. But what you're doing here is you're taking away the corporation in its traditional form as a means of limiting liabity for the investor. And I might add the corporation is a

very useful tool for bringing people in and out of ownership and bringing them in and out of management.

At any rate, I think that the statute does have a number of beneficial provisions in there. But they could have accomplished very much the same thing, ladies and gentlemen, by simply taking the Model Act, which we do have, comparing it with the Model Act as amended at the national level, all right, and seeing those areas where there are deficiencies, and then curing them without sweeping this thing away with one big swoop. And I realize if I were a law writer and I was a law giver, I might want to put my stamp of approval or my name on an auspicious pigce of legislation, but whether or not the public is going to be served is another question.

And I wouldn't be too concerned about this business of the creditors getting put upon. I don't think that's true. I think what you're doing is you're foisting on us without an opportunity for a lot of folk who really work and need the tools that are presently available to have a chance to digest the darn thing. Thank you.

COWDERY: Could you spell your last name.

REITMAN: Yes. R-e-i-t-m-a-n.

COWDERY: Rep. Pestinger.

PESTINGER: Thank you, Mr. Reitman. It looks like we have the opportunity to try to identify the best of the proposed provisions. While we have a practical opportunity which you suggested which is to take our original model act and compare it to how it's been amended on the national level. Can you characterize what kind of a job we would be facing if we took our existing law and compared it to how it's been amended on the national level? Could you characterize what kind of an effort that would be? And could you characterize any particular or identify any particular areas where you d. think we do need to supplement our existing act?

REITMAN: No, well, I wouldn't want to ask a lot of questions. No, I prefer not to get into the detail on that. I think the comparison I'm sure has been done. I'm sure logically and hopefully the revision code committee and Professor Fessler have done this. As to what would be involved in that comparison, I don't think it would be a tremendous undertaking in terms of scholarship or in terms of man days. No, I imagine it could be done in you know less than a week in terms of, less than five days, or something if somebody did it.

PESTINGER: Well, we have this 30 day problem of the task force from the business law section of the Alaska Bar. And I wonder if that task force would be interested in making that

comparison. Now I can't speak for the task force, they're already volunteering as it is. They're taking on a tremendous work load, but I wonder if that may be is a very practical comparison.

REITMAN: I think that's a good suggestion.

COWDERY: Rep. Furnace.

FURNACE: I believe Rep. Pestinger was reading my notes here. No, I appreciate that, I had a question along those same lines. I think you have answered it.

COWDERY: Rep. Bussell.

BUSSELL: Thank you, Mr. Chairman. Mr. Reitman, how long have you been in Alaska?

REITMAN: Twenty-five years.

BUSSELL: I guess I should probably put that on the sheet when everybody signs up so I don't have to ask that question. Thank you.

COWDERY: Thank you. Next person to testify, Mr. Bob Vasquez.

VASQUEZ: Mr. Vasquez. Thank you, Mr. Chairman. Most of the comments, all of the comments, in fact, that I was going to make this morning have already been addressed by the previous witnesses. And in the interests of the committee's valuable time, I will let the comments stay . . .

VOICE: Moderator in Juneau, we have lost the Anchorage transmission for now.

COWDERY: O.K. Fine, we're back on now. Thank you. Mr. David Bendell. State your name and spell your last name for the record, please.

BENDELL: David Bendell, B-e-n-d-e-l-l. And I'm also a member of the Alaska Bar Association's task force. I guess my comments primarily are directed as Mr. Kelly's were, that it is simply difficult, if not impossible, for those members of the task force who at the present time give really any sort of opinion as to the efficacy fo the bill, since we really haven't had that much time to study it. Our organizational meeting was very recently, the other morning. And we're just now in the process of parceling out portions of the bill to be analyzed by various of the volunteers. I'd just like to make a few comments.

The first one is, I guess, a couple of comments have

been made here today that this might be a lawyers relief act. Well, in my case I think that's really quite on point because I'm a bankruptcy lawyer and this is really going to be a relief act for me if this thing gets passed because all these directors and all these officers are going to come knocking on my door. And they're going to say, well, you know I've got all these debts and I've got to get out from under and I'm going to put them under. As to whose benefit that's going to be, I'm not entirely sure. All they're going to say is I'm not really looking for that kind of relief.

The second point, I mentioned I'm practicing in the bankruptcy act, actually practicing in bankruptcy securities. The second concern I have and it's something that we most particularly analyze during the 30 day period, which is why we think it's essential, is the effect that this type of bill is going to have on public offerings of stock in the State of Alaska. As I'm sure many of you are aware, whenever there is a public offering of stock, there has to be a document prepared, a very lengthy document, as an offering statement. And that has to elucidate what is know as risk factors. Risks associated with the offering. I would assume that any offering of any stock of any corporation that's going to operate and do business in the State of Alaska is going to have to have listed as a risk factor for potential stockholders the fact that we have this rather peculiar law in the State of Alaska that in essence does away with limited liability. And my concern is, as I said, my opportunity to review the bill has been minimal. My concern is is what effect this is going to have on the ability to sell such stock. We talk about getting input from the Department of Commerce and from the task force. I think we ought to get some input from people who are securities dealers and find out if they can sell anything from the State of Alaska if we are going to do this. Are the people in New York when they see an offer from the State of Alaska to develop oil and gas or fisheries or anything that's going to make jobs in this state, are they going to say well, we can't sell this, we're not going to touch anything from Alaska because we're concerned that we're going to get sued by investors or stockholders because they end up getting tagged with this liability problems. I think it's an area of concern. I think we'll all have to look at.

And I think the one final comment I was going to make has to do with experience. The people who are affiliated with the business law section are people who work in business all the time. We go into shootouts involving lien priorities and tax liens and adversary proceedings in bankruptcy. And I think the joint experience of the committee will be invaluable to this committee in deciding whether this is a good bill and deciding what type of bill. I think that Mr. Kelly's comment of the essentialness of the 30 days is very valid, and it's something we humbly request.

COWDERY: Thank you. We have, we intend to extend that time. Any questions.

KOPONEN: From Fairbanks.

COWDERY: Rep. Koponen.

KOPONEN: Thank you. Do you think that New York or California corporations have any difficulty in selling stock?

BENDELL: Well, it's my understanding that they have not yet adopted this type of act, and it's something they are talking about . . .

KOPONEN: They are in the statutes.

BENDELL: I'm not entirely sure . . .

KOPONEN: The 1977 revision of the California Code and in New York it goes back to the Dutch . . . and even though . . . did not surrender their limitation on limited liability which most other states did.

BENDELL: I'd like an opportunity to examine that. I'd like to examine what type of effect this has had on public offerings, specifically to the extent limited liability is being done away with respect to shareholders, and that's something I'm not entirely sure of. Like I said, it's difficult for us to comment at this point because I think the business law section was alerted to this just a very short time ago. I got a call from Paul Kelly around two weeks ago. He was very concerned. He was making a flurry of phone calls to various persons who over the years have been involved in the business law committee and our CLE programs. And I just very recently got a copy of the Act, and as to what the effect has been in New York and so forth, I guess that's a real good question. And maybe the best way to answer that question is to call some underwriters in New York and some lawyers in New York and find out what their Act says, and what effect it has had on their offerings, and see if this is something we want to do. You mentioned New York and California, and I haven't seen their enactments, but I think the key thing we have to keep in mind is this is a developing state. This is a frontier. Our needs to have new money and new people to come in here and build this state are much more important than say a state like New York, which is immensely populated and already has very substantial development.

KOPONEN: Can I ask Professor Dessler for the background, I understand he's there. I also understand that he did give a presentation to the bar association. I wonder of the members of the task force, have you been designated by the society of governors, or a part of the business law section of the Anchorage Bar or the State Bar?

BENDELL: We are an ad hoc committee of the business law section of the Alaska Bar Association, which is a, as you may be aware, most bar associations have sections which are committees of lawyers which deal with new developments in the law and put together educational programs for lawyers to educate them in new developments in the law.

KOPONEN: Thank you. That's an ad hoc section of the Anchorage business law section, or is this statewide?

BENDELL: It's statewide. I think Mr. Kelly is the statewide coordinator of the Alaska Bar Association business law section.

KOPONEN: Thank you.

COWDERY: Thank you. Rep. Bussell.

BUSSELL: I have that same question, Mr. Bendell, how long have you lived in Alaska.

BENDELL: I've been here for six years, practicing for five.

BUSSELL: And where did you come from?

BENDELL: New Jersey.

BUSSELL: Did you practice in New Jersey?

BENDELL: No, I didn't.

BUSSELL: Where did you go to law school?

BENDELL: Rutgers.

BUSSELL: Thank you, sir.

BENDELL: Thank you. Thank you for your time.

COWDERY: Next witness up, Mr. Brian Brundin.

BRUNDIN: Thank you, Mr. Chairman. Members of the committee, my name is Brian Brundin and I'm a lawyer with the firm of Huges, Thorsness, Gantz, Powell & Brundin. We practice law in Alaska in Anchorage, Fairbanks, Juneau and Valdez offices. I've been in Alaska 33 years, and I've practiced law for 18 years. I'm a CPA lawyer, and I involve myself primarily in the area you're dealing with today.

I have as I grow older, I have less inhibitions against expressing my own opinions. So I'll do that for you today. Mr.

Reitman said it, I second it. The corporate law of Alaska is not broke. I really didn't know that it needed any particular fixing. My own personal bias for law is this: That if something needs to be done, and there is a public request for it, then there is a reason to do it. And there have been over the years public requests for some changes in our corporate law. But when you come down with a whole brand new one, I'll tell you what the result will be. And that is, and I represent by the way, national, international corporations down to the mom and pop's, the whole range. And the experience will be this, that the national and international ones will hire me and others like them to fix whatever problems exist in here for them. The mom and pop's will get it in the you know where. Because they'll get caught with things that they are not aware of. They don't have lawyers they go to, except when they get in trouble. And when they're in trouble, it'll be too late. Well, didn't you know the law changed and what you were used to is no longer so. Whoops, no I didn't.

I, and many of them, the in betweens, we have in Alaska's business community a lot more in betweens, no mom and pops, no national or international, lots of in betweens. And many of the in betweens have in these recent years found that the wholesale changing of laws costs a lot of money. I'll give you one example that some of you may have experienced. Congress has changed the laws regarding pension/profit sharing plans two or three times in the last five or six years, under URESA, you've heard of that, and so forth. Tax laws have changed constantly, you know that. Every time one of these changes happens, I've clients who have pension and profit sharing plans that had to amend them twice for no good reason. They never were doing anything wrong to begin with, but the law required they amend them. Every corporation will have to be changed if this becomes law. And for those who will have to do the changing, most of them haven't done anything wrong, don't want to do anything different, have never cheated anyone out of anything, and won't. But they will have to incur the cost or run into one of the traps, one of the speed traps down the highway, if they don't change their laws. That's practically what'll happen.

And that goes as well for this one that seems to gather more comment today, and that's the secondary liability. I suspect the other provisions in here are going to cause much more trouble over the years, for the reasons stated that many of them are new. And I think if you stay with model acts you are much better off. But on the liability matter, there really is no difference in my view from saying if a president of a corporation or a secretary is going to be liable, why not a manager of a partnership who is not a partner. Why shouldn't he be liable. Why not the manager of a sole proprietorship. If the reason for making liability is an assumption on your part that the president is the owner and can determine how much money the corporation has to pay its creditors, that's an error, isn't it, because he

doesn't. He doesn't run the corporation. He's hired. Several others, the manager of the grocery store that is not incorporated is hired. He really can't control what the owner does, how much money is in the business. If he's going to be liable because of management decisions, instead of how much money is there, why then I guess any employee of any organization ought to be liable for any of his decisions up to $25,000 to every creditor. It makes just as much sense to me, if that's the reason for it. So I think that passing a law that supposedly fixes this social problem that concentrates on corporations must have some basis other than someone's thought that this is one way to fix something. It goes far more than that, if the reason for it is if you're going to be responsible for your decisions, then everyone in every organization who makes decisions should be responsible. Not just corporate officers.

If I were in your place, I'd put the law aside until someone says section so and so is troubling me, I'd like that changed. And I'd look at section so and so. What you do if you adopt this completely is that the sections that won't raise points today, I expect before this would get passed if it were passed as is, there would be some changes to this liability sections. But there's five or six or seven sections back here that no one's excited about today. They're going to cause someone an awful lot of trouble next year or the year after that nobody thought about or talked about today, or in the next couple of weeks or in the next 30 days for this task force, that weren't broken to begin with and didn't need to get fixed. And you're going to fix somebody, though, for reasons unknown today why it should be done. I'm keeping it short and sweet.

COWDERY: Thank you, Mr. Brundin. Rep. Wendte.

WENDTE: Brian, is it your opinion that every set of articles of incorporation would have to be revised if this bill passes?

BRUNDIN: From the brief reading I've given of this, yes.

COWDERY: Any more House members, anybody on the network care to, any questions? Rep. Furnace.

FURNACE: I just wanted to say Mr. Chairman, I've known Brian for many years and I certainly do respect his opinion.

BRUNDIN: I do have a tax comment I wanted to make, too, if you'd allow. When we put the professional corporation act into law in Alaska, when we first did that, we put a section in that left the professional liable period. We had a tax problem with that so we had to amend it and say, he's liable only for his own malpractice. That's the way the professional corporation act was done. That was done, and I think the same would occur here

on this liability thing. The Internal Revenue Service, if it finds we have a corporation act that says, if you are, as many Alaskans are, the owner, the officer and the director, if you're liable for $25,000 per creditor, friend, you don't have a corporation. And that's what the IRS will say. And so those small corporations, if this law were passed as it now says, who are corporations for tax purposes are going to find they're not.

COWDERY: Thank you. Rep. Bussell.

BUSSELL: Thank you, Brian. That was really my next question, since you said you were a CPA attorney, was about that. And the other question I asked earlier was on the insurance, is that a corporate . . .

BRUNDIN: I guess half of what our law firm does is known as an insurance defense firm. From what I know of it, there is now no director's liability insurance available in the United States. I've looked into that personally. There is not a director's liability policy available. There is one sold which people bought, but there never has been a successful claim made against it. I asked the guy who wrote it whether anyone had ever, it comes out of Chicago, and he said, nope. And that's because it doesn't cover anybody for anything. There is no insurance that I'm aware of which protects businessmen in any shape for their debts, except bonding. And that's not insurance. And when you have bonding, the comment earlier made is quite correct, they'll bond you if you give them your personal assets and the like. In which case, bonding is simply an added, additional cost factor to the liability, since you pay the bill yourself anyway.

BUSSELL: Brian, can I ask you to explain to the committee just what a bond is. I know what it is, but I suspect most of the committee doesn't know what a bond is and how it works if you try and exercise.

BRUNDIN: I think the clearest analogy, it's like you guarantee someone else's debt. You guarantee someone else, borrows from the bank, you guarantee it, and you have to pay it if he doesn't. That's what a bond is only it's done on a more formal basis.

BUSSELL: That's right and they take the bond holder or the guy they sold it to completely to the cleaners before they begin to exercise. That's the important thing about a bond. Thank you, sir.

COWDERY: Rep. Malone.

MALONE: Thank you, Mr. Chairman. I'd like to ask Mr. Brundin, did you see our ad in the newspaper?

BRUNDIN: No, I didn't.

MALONE: Thank you.

BRUNDIN: I missed something pretty good apparently.

COWDERY: Thank you, Mr. Brundin. I think we're going to make the deadline here. We have one more witness, I think, Mr. Bill Cook. Not here, he's left then. So then if we'd like . . .

KELLY: Mr. Chairman, we have one additional witness who was unable to sign up on the sheet. He can come after Mr. Abbott . . .might as well let Mr. Abbott testify.

COWDERY: If you'd like to come forward at this time, we'd appreciate it. State your name and spell your last name, and affiliation.

COPELAND: My name is Mark Copeland. I'm an attorney here in Anchorage. I've been in Anchorage, first came up in 1960, actually came back again in '77 and practiced law since that time. Practiced law since '67. My name is spelled C-o-p-e-l-a-n-d. I would basically concur with Brian Brundin's statements and rather than repeat them, I would like to just add a couple of quick comments.

One is, there has been a lot of concern about unsecured creditors reaching people used corporations to avoid their liabilities. Those same people whether they're incorporated or not will avoid their liabilities Even if they have to move out of state and go in business in another state. So you're not going to catch up with the person who truly desires to avoid his liabilities. I would emphasize that the bill as written is just a trap for the unwary. There are provisions in the bill that we haven't talked about, including provisions with regard to reports as to inside transactions between members of the corporation, shareholders and the corporation. I doubt very much that most people in Alaska would recognize the fact that they have two different businesses that's involving an insider transaction without a lot of discussion and a lot of education by the bar. So those people are going to find that they've failed to meet a statutory requirement. Some way they're going to find foreign corporations as having the same problem.

I find it really amusing that the entire section, or the entire commentary, goes back to New York and California law. I have never heard people who intend to enter into business deliberately seeking out the New York or California codes. Basically, people seek out a Delaware code or another statute that has a long history of business activity and which appears to provide the limited liability that is so important to capital formation and to getting into business.

Someone touched earlier on sec. 450 which provides a negligence standard. You know this is even more extensive than the apparent secondary liability standard of sec. 488. And once you give a lawyer a negligence standard to go after, that's everything. You can sit down and make a business decision and some member of the board of directors, and it turns out that you weren't right. Now it's really a question, were you right because you didn't, because you were negligent, or because you acted in good faith, but you were wrong. And negligence can be anything from you didn't spend enough money to go out and research the new area you were going into, the amount of funding it would take to build your new building, or some other reason. And what you've done is, is you've opened up a very expensive litigation section.

Just one comment, I was reading page 140 of the comments, I guess, and maybe it says it all. It says as early as 1848, the State of New York addressed the interest of employees and others to look at this limited liability question or the secondary liability question. I have now made a survey of the states, and I believe that what we're being asked to look at here is something kind of like the Edsel, it's unique. But this one's been around since 1848, and a large number of other jurisdictions and bodies have looked at it and not rushed out to adopt this proposal. This is a major change in the social and economic philosophy of corporations. And I feel that we should wait and see what happens.

The concept that was talked about earlier about whether or not there is some shareholder liability. There may not be shareholder liability except to the extent that often times an officer, director is also a shareholder. And I thought Mr. Reitman's comment with regard to anyone that accepted the job as a president of a corporation in Alaska if this were passed, would just be out of his mind, is absolutely appropriate. I also wonder about the personal secretary who under this act happens to sign, being the corporate secretary and she's making maybe $24,000 a year and finds out that she's just mortgaged the farm or the house or whatever it is, and to fairly look at this act as a complete act would be very difficult. I favor the other approach which is let's find those sections we don't like and change those.

COWDERY: Thank you. Are there questions from the Labor and Commerce side? Any questions from Fairbanks?

VOICE: Commissioner Brown has a comment.

BROWN: This is Fred Brown in Fairbanks. I'm asking if the next witness or one of the next witnesses is going to be Professor Fessler or some of the attorneys who've just testified have time that they could catch at least some of his remarks. I assume he's going to respond to some of the matters that have

been mentioned here. I know that they have busy schedules, and probably have other engagements, but if th[illegible]'s at all possible, I would hope there would be some kind of . .

COWDERY: O.K. Thank you, Mr. Brown. Any more questions for the witness? Thank you. It's approaching 1:00 p.m., and we had intended to break from 1:00 til 2:30 p.m. now. I'm here for the pleasure of the witnesses here if, I know some of the committee has appointments for lunch with various other people in town, so it would be the pleasure, I would sit here if . . .

VOICE: Mr. Chairman, might I suggest that we invite the witnesses to come back at 2:30 p.m.?

COWDERY: That's what I was getting at. I hope that . .

FESSLER: Mr. Chairman, as somebody who has been working with the code revision commission on this bill . . .

COWDERY: Would you come up to the mike at this time.

FESSLER: Yes, I am Dan Fessler and I've obviously been playing a role in the working on the drafting of this bill for some four years. I'm here from California this afternoon. I'd be very happy to return at 2:30 p.m. You've heard many comments this morning, some of which I think raise questions that are policy questions which only you can address. Some of which because, perhaps of the admitted paucity of time the witnesses have had, have involved statments about the content of the bill which were simply flatly inaccurate, and I would not wish the committee members to be under the illusion that they were. And also, I think that I would like to have the opportunity this afternoon if it is the committee's pleasure to respond to questions from members of the committee. So, of course, I'll be back here at 2:30 p.m. For many of the very busy members of the House, this would be the first time in the three years since this bill has been pending, it was first introduced in March of 1982, that we will have had an opportunity to directly supply information and to answer and respond to questions. So I look forward to that opportunity, sir.

COWDERY: We look forward to seeing you at 2:30 p.m. We'll adjourn this, or recess this meeting until 2:30 p.m.

VOICE: Mr. Chairman, is it your intention to come back with more testimony on this bill, or were you going to go to other subjects at 2:30?

COWDERY: We're going to stay with this and then go to the other subjects as time permits.

VOICE: Do you have any indication as to how many people

are left to testify?

COWDERY: On our list, just the code commission.

VOICE: It's my understanding that the network down here is going to be tied up for something else, so we probably won't be able to tie into that.

COWDERY: O.K. Well, we will certainly have transcripts of all this testimony, so if it's not possible for you to tie in, we'll fill you in Monday. At this time we'll sign off.

COWDERY: . . . to order at this time and three members of the Judiciary Committee are here. Anyway, are we back on? We've reconvened the continuing from the morning meeting, and we had one more witness on the, Mr. Fessler from the code revision commission. If he would come forward at this time, we're dealing with HB 343, an act revising the Alaska Corporate Code. Professor, if you would please identify yourself for the record . . .

FESSLER: Yes, for the record, I'm Dan Fessler. I'm a professor of law at the University of California at Davis and for the past four years have been retained by the code revision commission as its consultant in first surveying the state of existing Alaska law, determining the potential need for revision and then acting as the person who has done the technical work of drafting the value judgments made by the members of the code revision commission. I'm appearing here this afternoon with John Abbott, a member of the Alaska Bar who is the chairman, and with your permission, Rep. Cowdery, Chairman Abbott had some remarks he wished to make before I spoke.

COWDERY: Yes, I would like to announce we have some other people on confirmation that we intend to get right into that as soon as we're through here, so if you'd just please stand by, we'd appreciate it. Mr. Abbott.

ABBOTT: Thank you, Mr. Chairman, members of both of the committees. I'd like to preface my remarks by saying that we are here today, we do have under consideration a rather complex piece of legislation, and it does need to bear full scrutiny as far as the code commission is concerned. What I would like to do, however, is briefly dispel any misapprehension on the part of the committee members as to whether or not this matter was adequately noticed, and I can assure you that it was. The bar association has been represented on the code commission since its inception in 1975.

When this bill was first taken on as a code revision project, the bar association requested, both formally and informally, input from the bar association, and specifically from any business law committee that could be convened to consider

this. In May of 1982 the bar association through its then chairman of the business law committee, Mr. Dick Block who was the first witness to appear here today, specifically requested that the code commission provide Professor Fessler as a speaker to explain the bill that's now in front of the joint committees today. That was 1982. At that time Mr. Dick Block was still the chairman of the business law committee of the business law committee of the bar association. There have been repeated efforts, both formal and informal, to involve the bar association in deliberations in seeking input from them on the drafting, the implementation of this corporation's bill. It's inconceivable to me that anybody could argue that the bar association was not put on notice of what we were doing with the bill, did not have any idea of what was happening with it, or that any of the members could claim that they didn't know or shouldn't have known that this bill was under consideration. Be that as it may, they've asked for a certain amount of time to review the bill. With grave reluctance, I will say on behalf of the commission that we would acquiesce in a 30 day period with review, and we'd hope that the joint committees would hold firm to that 30 day period. As Rep. Malone earlier pointed out, that may or may not be the death knell for this particular bill, and we are pushing hard for consideration of this bill this year.

You've heard a fair amount of testimony concerning the existing Alaska law and the new bill. And I'll let Professor Fessler respond to the claims that it's innovative or radical. It is not. Input on this bill has been provided by me and by Commissioner Jerry Kurtz, who represents the bar association. I have been in Alaska since 1969 and practiced law since that time. Commissioner Kurtz has been in Alaska since 1961 and has practiced law during that time. We both have extensive background in private practice dealing with corporation and corporate abuses. And it was our opinion that there were significant abuses which cried out for [TAPE CHANGE] . . . of the existence of public hearings on a bill. In short, we have taken great pains to contact everybody that might have an interest in this bill. And I think it would be misleading for anyone to claim that they didn't have an opportunity to comment. That opportunity has been present.

At this point in time, if there are no questions, I would turn this over to Professor Fessler.

COWDERY: Yes, I would like to just like comment on your comments, that I think that this morning the question was asked of individuals here if they had known about it, and I think they were expressing their views that maybe they had known about it, but this is the first time they really got serious about listening to it. And under that I think there are 1,400 bills or so that are in the hopper that probably 100 won't become law in the 13th, maybe 150 will become law. So this is in that 1,400 bills, so until it gets down to where there is some action, a lot

of times on bills, people don't get too serious about them until they think there might be some action.

ABBOTT: I appreciate that, Mr. Chairman, and I guess my response would be that I feel there is a professional responsibility on the part of lawyers to participate on bills that will affect them or their clients. And I'm not just talking about notifying the bar association, I'm referring to specific requests for assistance from the bar association to help us, to give us their input as private practitioners in how this law should be drafted. Something we would have welcomed.

COWDERY: I think that's what they expressed this morning, they want to have a part in it. Rep. Wendte.

WENDTE: Could you educate me to the extent of what, could you go through the membership of the commission?

ABBOTT: Yes, I would, Rep. Wendte . . .

WENDTE: And if they represent designated or what their affiliation is.

ABBOTT: Yes, and I'll go just a little further than that. The legislature in 1976 created the Alaska Code Revision Commission due to the success that it felt it had with the subcommission on Title 11, which was the criminal code. Because of the success of that commission enacted a permanent commission, the Alaska Code Revision Commission, gave it a broad mandate to examine all existing laws, statutes, to entertain requests from the court system, the administration, and the legislature as to areas that needed to be looked into. Since that time numerous requests have been entertained from the legislature and from, very few from the private section, some from the administration. The composition of the code commission was such that it fairly represented all three branches of government. There were at that time, one public member appointed by the governor, there was a member from the attorney general's office who also represented the governor through the attorney general's office, there was a representative from the state legislature, there was a senator from the state senate, both appointed by their respective chairs, there was a member of the Alaska Bar Association, and there was a designee of the Alaska Supreme Court chosen by the chief justice. In 1981, I believe it was, that was expanded to include two additional public members, one of whom has been appointed by Governor Sheffield, that's former Representative Fred Brown, the other position is currently vacant. We have as such representation of all three branches of government, and the parties that are readily identifiable as those that would be interested in legislation being passed.

The work of the commission is such that it is transmitted to the legislature in two ways. First, we report on

everything that's done by the commission to the Legislative Council, which is reponsible for oversight of the code revision commission. Secondly, individual materials are sent to individual legislators. You should have just recently received a package of some six bills along with commentary advising you as to what the code commission is doing. We have spread a lot of paper in advising the legislature as to what bills we are considering and what we are doing.

WENDTE: How did this bill been issued, within the commission or administration? How did you begin this review?

ABBOTT: The normal process for consideration of a bill, unless it's a specific request from a legislator or somebody from the administration, is to generally review laws in the State of Alaska, particularly those of a sophisticated nature, since we don't deal with laws that legislatures would normally handle. We deal with those they might not be interested in handling or don't have time to handle. One of the laws that had not been reviewed in quite some time was the corporation code. There was some six months, and that's an estimate, of deliberation in the commission before it was adopted as a formal project to be taken on by the commission. That review indicated that there were some serious needs for revision. So in answer to your question, the bill had its genesis in the code commission itself.

COWDERY: Thank you. Mr. Fessler.

FESSLER: Yes, gentlemen, I'd like if I can to briefly touch on four areas that seem to be sinful to the testimony you heard this morning.

First, I'd like to briefly describe, to clarify for the members, the origin of the bill and at point I'd left the issue of whether or not the bill is radical. Second, what is the state of current Alaska law which comments on the necessity of doing something. Third, sec. 488, the secondary liability of officers and directors, was a matter of great concern this morning. In that connection, I have, I would like to talk about is the bill generally inscrutable, is the drafting such that it cannot be read. And then finally, the issue that was of particular concern to Chairman Bussell, will the bill clog the courts with litigation if you were to enact it into law.

The origin of the bill is as follows: The code commission asked me if I would be interested in doing a survey of existing statutory and decisional law in the business field with a view toward determining whether or not, given the passage of some 23 years since the enactment of the original code, it was time for Alaska to have a code in the corporate field of its own creation. I undertook that by comparing the existing Alaska law to the model corporation act as it has been evolving since that period of time to the corporation experience that had taken place

in New York, which had gone through a similar plenary revision of its law in the late 1960's and to the revision of the California Corporation Act, which had also gone through a some five year, and in that instance, multimillion dollar process of analysis and revision in the early 1970's which culminated in the adoption of the California Corporations Code in the fall of 1972 by that legislature. Now when I reviewed the existing Alaska law, I came back with the following general recommendations.

First, Alaska had adopted at the time of statehood what was then the Oregon version of the model act. And since that time had paid no apparent consistent attention to the corporations code. The Alaska Corporations Code, therefore, was no longer in compliance with the model act. The model act had gone through twenty years of revision and evolution, most of which had not been tracked by amendments to the law here in the State of Alaska.

Second, if one tried to look to decisional law in the Alaska Supreme Court to fill in the gaps, one found there was very little decisional law. The consequence that I drew, or the conclusion I drew, is that a lawyer or citizen in Alaska asking questions the answers to which ought to be ascertainable in very many areas of corporate law, ran up against an absolute blank wall. There was no statutory provision on point, and the Alaska Supreme Court had never spoken to the area at all. Some people today referred to this as the lawyers relief act. The existing Alaska law could only be described as hayday for chiromantists, palm readers, and individuals who stare at crystal balls. If one looks outside of Alaska to the model act on the theory you will find in other states decisional law that readily tell you what Alaska law means, I submit to you that ten minutes of analysis would not support that statement. The model act in various degrees is the law in some 18 to 20 jurisdictions. Their courts over a period of time have reached frequently conflicting interpretation as to the meaning of identical statutory language. And, therefore, it's delightful to sit in a negotiation with a client in which the same statutory language, coupled with a decision that the Supreme Court of West Virginia, of the Court of Appeals in Tennessee, and a federal district court sitting in diversity in Florida is on my side, while on your side you lead off the bidding with a decision of the supreme judicial court of Massachusetts, the Supreme Court of Illinois and a federal district court sitting in New Mexico. Now it is again as to which view would be adopted by an Alaska court, and in a moment I'll talk about the costs both in time and in treasure to citizens of this state in following up that guess with litigation.

It was the philosophy of the code revision commission that the state's economy would be better off if there was in one place a rther thorough expression of basic statutory policy so one did not have to look at a bill supported by a variety of

crutches in order to determine what, exactly, is the answer to a client's question. That is also why the law is organized the way it is. You'll notice it is organized in a manner totally unlike existing Alaska law, which has no organization whatsoever. It is organized in a manner which attempts to restate the area from the beginning of a corporation right on through to dissolution. And to organize it so that it has comprehensive statutory treatment of these important topics in one place and at one time.

The comments which were prepared are an attempt to synthesize in those areas where we continue, and in most areas we continue the policies of the model act, but we have looked at, taken into account, the divergent interpretations and had written the comments in a manner that says that it appears most in concert with our understanding of the law and where this statute as a whole wishes to go, to follow the Tennessee view on this matter and not the Florida view. Now if the legislature were to adopt by concurrent resolution recognition of those comments, you would go a long way toward clearing up the log jam and confusion of outside, lower 48 interpretations of the model act.

This bill hopefully brings to you the best of existing law under the model act. Virtually all provisions of the model act, including the most recent provisions of that act, are contained in this draft. So to the extent that people were wishing this morning that that might happen, gentlemen, it has happened. It also looks to the law of New York for its basic organization. It examined the law of Delaware very carefully, the law of North Carolina with some care because Carolina has gone through a somewhat sweeping although not total reform of its statutory law, and finally the law of California.

Is it a radical bill? Rep. Liska asked the question this morning in several areas. It deserves a very frank answer. Sir, it is not a radical bill. What it attempts to do is to draw a middling, fair, straightline position saying we're not trying to develop a bill that is totally management oriented. Most lawyers would tell you that is the existing law in Delaware. We are not attempting to recommend to you a bill that is totally shareholder oriented. That is the general characterization of the law of California. What we have attempted to do is draw a bill that is more or less neutral on the issue of whether it is to be management overall or shareholders overall, but leave great flexibility to individual Alaskans and their advisors, whether they deem themselves capable of making these decisions or they wish to hire an attorney to structure in the articles of incorporation how this particular corporation will be. There was a lot of complaint this morning that the articles of incorporation would be important for the first time in Alaska if you were to adopt this bill. Since the articles of incorporation function is the very constitutional document in any corporate setting, it seems to me that it is sensible that the basic decisions about the structure of the corporation, prerogatives of

shareholders, limitations, if any, upon the prerogatives of directors and officers, should be stated in that single document. People are not frozen in concrete. The articles may always be amended. The impression was left this morning that you had to be prescient and put it in the original articles, and that is simply not the fact.

Now, there is one area of this bill which is innovative, which has no direct statutory support in any state. And the members of the House Labor and Commerce Committee will recognize this, but for the benefit of those from the Judiciary Committee, that is sec. 488. I might add that we tried to go out of our way to advertise the fact that this is something deserving of your greatest scrutiny. We believe that over a period of time an abuse of the corporation has crept in which it is responsibility of the legislature as the duly elected representatives of the people to think about every 20 or 30 years before it allows it to just go on and on and on. And that is the question as to whether or not merely because someone has achieved corporate status whether they have torn out forms from a book, or if you've been on an airline recently, and you've seen these advertisements for "send me $49.95, and I'll send you something that can show you how without any of your money, without the need of any lawyer, you can reduce your taxes, you can keep all your fortune, and you can be responsible to nobody." Now I submit to you that that is a decision which you must make, but the greatness of this country was never built on premeditated irresponsibility to creditors. And that is being advertised at the present time as a great virtue of the corporate form.

The corporate form with limited liability is a state conferred privilege. It does not exist unless the members of the Alaska Legislature says that it exists. And the question as to whether you have a right from time to time to look at that privilege and to decide whether it's working for the common good or whether it should be fine tuned to rescue any abuse that has crept in, is something which I think you ought not be denied. Now all that sec. 488 does, it does not repeal limited liability to the corporate form. What it does do is this. It recognizes and suggests a solution to the problem if you agree that there is a problem. It recognizes that limited liability is the norm if you have a corporation. It is true, as was stated by some of the attorneys this morning, that there are common law doctrines called "piercing the corporate veil" or disregard of limited liability that theoretically act as a check upon people who abuse limited liability. My survey of Alaska Supreme Court cases in this area reveals two cases in the 25 years that Alaska has been a state. From this we can either conclude that there is simply no problem, and therefore there could not be millions upon millions of dollars in damaging liability under sec. 488, or that the problem is not adequately being addressed under the existing common law doctrine. I suggest that it is likely to be the latter and not the former that is true. To litigate all the

way to the Alaska Supreme Court the issue of piercing the corporate veil requires an individual who has great resources both in time and in treaure. And if you are a creditor who has an $8,000 bill that is owed you, you do not have the money to bring this question to any court. The only individuals that sec. 488 is trying to protect are those individuals with their small claims who have not got, because of the cost of litigation, any attempt to even challenge the question as to whether or not there should be a disregard of limited liability. The solution which is suggested is to impose liability on designated corporate officers and directors. The only other state that has a law in this area, that is remotely comparable, is New York's position, which is limited only in favor of employees. So our recommendation to you goes beyond New York law. And New York fastens the liability upon the ten largest shareholders in the corporation. And that liability cannot be shaken. We did not recommend that you fasten liability on the shareholders on the theory that frequently some shareholders will be totally passive, playing no role in the actual conduct of the business. The suggestion was instead that you place it upon the officers and directors on the theory that they are running the business. Further, we did not follow New York in making this an unshakeable source of liability. Please recognize that sec. 488 says this liability, like any other created here, can be contracted away. That it requires that the corporation obtain in writing the agreement of the potentially advantaged creditor under sec. 488, you employees, etc. That they will not look to the liability which you would have under statute, but instead would release you from that.

We heard two things about that today. First, one of the attorneys who testified this morning that you don't need it because large corporations in dominant market positions will always insist that that be waived. And very small and needy individuals in the marketplace entering contracts are in no market position to resist the demand of waiver. The other was that it doesn't make much difference whether you do go after the owners of these fly by night corporations, because the truth of the matter will be, they, themselves, are going to wind up having no assets. The only analogy I would offer to you is that the same justification could be used if you were out in the waters off the coast of this state in this month and you saw somebody in those waters for not throwing him a rope. First, he might not catch it and second, he might not be able to hold on. But if you at least afford the opportunity to people to have something in lieu of what they now have, which is nothing, you will have gone some distance toward, I think, a useful reform of the law. So that's sec. 488, and any time there are questions, I would be happy to answer.

Rep. Furnace asked several times this morning, would it be wise to reduce the dimension of exposure to an aggregate of $25,000. Rep. Furnace, there are many things you could do. You

could reduce the amount of dollars, you could try and create exemptions, you could wait until the legislature decides that too many people are brought under the umbrella of sec. 488. What I do ask is that you give serious consideration to doing something. Large institutional lenders don't need the protection of 488, and they are not given it by this bill. They will always insist upon the fact that there be personal guarantees, or they should. What we are attempting to do is to offer some hope to people who have no voice and no position because of the de facto costs of litigation. And unless the legislature does something here, that is not the classical American way, to defeat people who cannot afford to take you to court and to try and build the economic future of this state paved on the backs of those individuals. Or if there are thousands or should there be millions of dollars in liability here. Gentlemen, please understand that is already liability in this state. It's just that it is being borne by employees, and it is being borne by materialmen and suppliers. We are not creating a liability here, we are shifting the liability from the creditors. You heard this morning that these creditors should understand that when they do business with a corporation, they are taking that chance. Well, the philosophical question was never better posed. Should it be heads, I win, if there is prosperity as the owner of the business, the prosperity is mine. If, however, the busines should fail, one group of people I will certainly not owe anything to are the people who cannot even afford to sue me for the debts I have incurred to them. That is the only group of people who are the target of sec. 488.

One other matter this morning in this area, is the bill difficult to read. Well, I readily confess that the bill is lengthy. I've attempted to explain why the code revision commission drafted a bill of this nature was recognizing that Alaska has very little common law in the business field. That if questions were to be asked and answered by Alaska sources, not guesstimate, it would be better to have it done by statute in this jurisdiction, rather than wait for 50, 60 or 70 years to build up a large body of common law. Several statements that were made this morning are simply inaccurate in terms of representing to you problems that exist under the bill. I pick out two, because it will not take much of your time to dispel them. And I think that when the gentlemen who testified this morning have greater opportunity to read it, they may conclude that some of the things said this morning are not the problems which through the lack of time they represented them to be.

I would ask you to look at page 54, if you have the bill in front of you. Many of you are not attorneys and therefore I will pose a hypothetical to you. The question was, does this bill require a corporation to have three directors when it may have fewer shareholders than that. Wouldn't that be a ridulous thing. One individual sat in the chair that I'm sitting in this morning and told you that he just found it impossible to

understand this bill's provision on that point. The section is 453, gentlemen, lines 27 and 29. Now if you read that and come away with the conclusion that you don't understand that if a corporation has fewer than three directors, it doesn't need to have any more directors than it does shareholders, then I will be happy to take this and leave. That is not a problem here.

Another statement was made this morning that the bill expands the secondary liability to shareholders. I don't think it takes 30 seconds of attention to page 67, sec. 488, to discover that shareholders have no liability per se under sec. 488 at all. Now there are philosophical problems that many raise with sec. 488, and I would be the last person to try and forestall a clear and vigorous debate on that. And I am the first person to recognize that as the 60 elected representatives of the people of Alaska, the ultimate decision on that point is yours. But I would not want you to make that decision under the influence of misinformation about the bill, no matter how innocent its origin might have been.

Finally, Rep. Bussell was increasingly interested in the issue of would this clog the courts. Rep. Furnace was ahead of him on that question. Rep. Furnace posed that question to the Alaska Court System and has received after their opportunity to review the bill and to comment upon the sections they found of interest and would affect the judiciary, a conclusion which as it is stated very succinctly in the cover letter to the committee. "Reviewed the proposed bill in detail. Our comments are attached". Based upon her comments, the court system concludes that the superior court will not be substantially burdened by passage of this bill. So I suggest to you that the one inquiry to the individuals most likely to be knowledgeable has been lodged by Rep. Furnace and it has been asked. Surely there will be litigation under this bill, but I hope that as the court system recognizes, they will have substantially greater guidance from the legislature as to what the value judgments are that should be brought and not left to the question ultimately of the five appointed members of the Alaska Supreme Court to decide about these matters. The judiciary recognizes that it is desirable that these matters of high public policy be decided by the elected representatives of the people, and I believe that this bill gives you an opportunity to face those questions and to resolve them.

I have volunteered and I wish to simply make it a matter of record to work with the ad hoc group of people who formed themselves at 7:00 a.m yesterday morning who wish 30 days to review the bill. I would because of the press on you and your business have hoped that that would have come earlier. It has not. I addressed that group in May of 1982, the state bar association's annual convention, business law section. In December of 1982 I returned to Anchorage and conducted a two-day seminar on this very bill, and every member of the business law

section in attendance was given a copy of the bill and the comments. This bill, of course, is with very minor revisions nearly identical to the bill that was first introduced in March of 1982. That is the past. In the future in the next 30 days, I will be happy to supply any information. And I reiterate there is a great deal of study of contrasts with the model act, in looking at the Oregon, Washington acts, looking at their decisional law that I will make available to any member of this House or any staff member you designate. You have already spent a great deal of your time and money hiring me and the individuals who serve without any compensation at all, the code revision commissioners, to work on this matter for some four years. We would like to continue to work on the matter and to work with you in the manner that you deem most productive.

If there are any questions, I would welcome the opportunity to respond.

COWDERY: Yes, I'd just like to comment on this bill. How long has this bill been active in the Senate, in the other body? Is that, the point I'm making, this is the second time we've dealt with this bill in the House.

FESSLER: There was a Senate hearing on the bill last year, Mr Chairman, but I would not represent to you and you would have to ask your colleagues in the Senate, that it received extensive attention in the Senate in the last legislature, excuse me, in the first session of the current legislature. The legislature which was immediately passed, had the bill introduced, but it did not hold hearings on it.

COWDERY: Well, the point I'm making, it seems like we've had some criticism, you might have taken it personal, I don't think it was intended to be a personal criticism, but I think we have to hear both sides and the philosophy of the code revision commission is certainly to be commended of this bill. But the philosophy of the legislature will probably be a balance that it has to go through, and these hearings I think are very necessary. And even though we had people that expressed their views, we listened to all sides, including yourself, and respect all the views . . .

FESSLER: The only thing I ask is the opportunity to, if there are areas where through inadvertence or otherwise, misrepresentations are made, you'll spend a great deal of time attempting to acquaint me with the content of this bill. And I would never wish to have you make a judgment that was predicated upon misinformation. That was my, I am offended by little, when it happens, I lose hair, and it's obvious I can't afford much more offense in my life.

COWDERY: One of your comments about creditors that could sign releases, well, I come from, that might sound good in

paper or textbook, but in the real world I've found in my business, I've been in the business for a few years, that when something seems to go sour in creditors, it concerns, the hardest thing you can get them to do is to sign anything that would weaken their chance of getting paid. And any promises or anything in the real world outside of a cashier's check or cash, to get anybody to sign anything, and I think . . .

FESSLER: Yes, most businesses are born in the spirit of optimism. And the time to deal with the creditors on this issue is at that optimistic moment. If you wait until it is evident that the business is going under to ask for releases, it would not be, in the words of one individual, a propitious time.

COWDERY: Yes, well I've worked with companies for years that eventually have something go wrong, so anyway, Rep. Uehling.

UEHLING: Thank you, Mr. Chairman. I just would like to sort of reiterate probably some of the things that you've mentioned here. It's my understanding that when the original code revision code was put into effect in 1953, that we're still under the present Oregon statutes then, I mean we've taken the code question from the Oregon statutes, is that correct?

FESSLER: That is correct and was also the recollection of Judge Stewart who is a member of the commission who was in the first legislature that adopted . . .

UEHLING: And actually there hasn't been any changes in those statutes since that time, but although in Oregon there has been changes that have occurred in that state under the model business act.

FESSLER: There have been amendments to the Alaska act since its original enactment. Some of them as recently as two years ago, when the legislature decided to shift to a biannual reporting as opposed to an annual one. Another one was the requirement, which is an Alaska requirement not in the model act, of identifying individuals who are foreign to the State of Alaska who have a significant interest in the corporation. But Oregon has certainly gone much further. Oregon's law looks less like it did in 1954 than Alaska's does.

UEHLING: And then also another question. If you could, I understand that under the provisions in this code revision, we are talking about value decisions that are made as far as, in regard to shareholders' rights and the board of directors, is there a pretty well of a balance there, maybe you could be more specific about what occurs in this bill regarding that. Because I understand there is a lot of flexibility.

FESSLER: The basic flexibility is in the provision which deals with the mandatory content of the articles and also

with the optional content of the articles. There you decide such basic questions as to whether the shareholders will have along with incumbent directors the right to propose amendments to the bylaws or to the articles, whether or not the shareholder when you have votes on them will vote with simple majorities or whether there will be less than simple majorities or greater than simple majorities. In other words, if you just go down that . . . Chairman Abbott used to have a phrase which was drummed into his brothers and at that time sister on the code revision commission, that he wanted the thing to read like a cookbook, so that a lawyer or a layperson who was setting up a corporation would go right down that matter and begin to discuss. I think one of the great advantages of requiring that they be in the articles is that it provokes the basis of discussion. Even if you're going down a checklist, do you want the shareholders to have the right to vote on amendments to the bylaws. Yes or no. If you're a lawyer, the client may ask well, gee, whether, should we or should we not. And then it's the job of the attorney to explain the advantages and disadvantages. Whether we are going to have cumulative voting, whether there are to be preemptive rights of shareholders are other matters which must be settled.

As statement was made this morning, well, those matters could right now be put in an agreement. Well, under this bill if you enact it, as a side letter of agreement, it wouldn't be effective. It would have to be in the articles. Why did we want that? Because we wanted everybody to focus on that question. We wanted to have a single document which as a prospective shareholder I could ask to examine and see where these basic decisions are. That I couldn't be surprised if there was a letter of agreement that had never come to my attention. We thought that was very important for protecting shareholders, especially shareholders who weren't on board when the corporation was formed, but acquired their shares later.

UEHLING: Then, also, Mr. Chairman, a follow up question, my last question. There was a lot of comment this morning and testimony in regard to case law and evidently there was a real concern about the attorneys and other people who testified that by putting this code revision into effect that we really wouldn't have any kind of a basis to work from. Maybe you could comment on that.

FESSLER: With the exception of sec. 488, every provision in this act is drawn from the statutory law of some other jurisdiction if it is not already existing Alaska law. The whole purpose of the provisions here, which are in the comments, is to point out to people what are the basic decisional laws that you will find out there that have interpreted this or similar language. So that the comments are an attempt to marry this statute to a body of decisional law, far from coming into the world with a law like no other states, I respectfully suggest that that is not accurate. The one major reform that is

conducted here is with regard to accounting, how you go about determining when you can make dividend distributions. That is the law now in the State of California. It is pending in the legislatures of nine other states and the American Bar Association's committee on business law, which is the orator of the content of the model act, has recommended the very provisions in the bill in front of you on the financials of the corporations as being the new provisions of the model act. So in that one other area where there is reform, you are not charting new waters, you have California behind you, you have a number of states ahead of you lining up to get on board, and you have the model act now recommending this to the legislatures of several states.

UEHLING: Now one other follow up question quickly here. Then there was also the question of cost, cost to the people that set up the corporations and costs as far as the mom and pop type of corporations, as it being a very expensive type of operation if we change into this code system, because there would be higher attorney fees, at least I got that sort of feeling. Maybe you could comment very briefly on that . . .

FESSLER: Very briefly I think that the job of anyone setting up a corporation under this code is easier than under existing law because the decisions that are to be made and how they are to be expressed and when the corporation comes into existence and when limited liability obtains, are all set forth here with brightline rules so you know what you're doing. All the problems addressed by statutory provisions in this bill exist in Alaska today. It's just that with regard to half of them, you have no way of knowing what you're doing. I don't regard that as a costless state of affairs when you force people to behave in a world where they are simply surrounded by ambiguity. They may pay now, or pay dearly later. So I think from the vantage point of costs, I have had the privilege in my life of being an attorney since 1966, and of incubating if that can be claimed, it's from my perspective a privilege whether it would be the unanimous consent in this room, I do not know, of thousands of others, but rarely have I seen anything more conducive to handsome livelihood than the ability of a lawyer to conjecture. And we are trying to replace conjecture with learned advice.

COWDERY: Thank you. Rep. Furnace.

FURNACE: Thank you, Mr. Chairman. I've come to the conclusion at lunch today that there's basically nothing wrong with the document as presented. But I think what we're dealing with is somewhat of a philosophical shift within the State of Alaska. It's no great secret that Alaska is still an emerging economy and we go a little slow in some instances. And I guess the main question is, are we ready for such a broad philosophical jump in a number of areas. The legislative body in my opinion often times, should be in a position of responding to changes

that the voters said we need to address, as opposed to heaping upon them massive changes all at one time. And I think that's where some of our indecisions are coming from. You spoke in the bill of the attempt to balance the concerns of the interaction between management and shareholders. I think you've done that. You've shifted, however, the burden from the creditor to the officers and directors of a corporation. That in itself is not bad. A statement was made earlier that creditors are often times very sophisticated, particularly in the State of Alaska. They get all kinds of guarantees and affirmation of debt. They are very selective as to who they will take on as a potential creditor, and whatever. So we do deal with somewhat of a very sophisticated economy in that respect. When we look at sec. 488 and look at the secondary liability which, indeed, is most concerned. It's been my experience that people in the State of Alaska normally in incorporating look to the fact of limited liability whether that's a truism or not, I am aware that you can reach beyond the corporate veil, but it takes some time, but to pass a piece of legislation that somewhat shortens that, that put in the statute perhaps a real firm, the fact that the secondary liability, gives me some concern there. And I'm not saying, I don't think what, simply do away with it, but it's an item that we may not be ready as a community at this point.

One of the other sweeping changes has to do with the serving of process. And surely in the State of Alaska we have a number of persons who are sued daily, under the present act as I recall, a process server must deliver the process to the address of the registered agent. Under the new bill, if he can't find that address or can't find that person, he can simply deliver the process to the commissioner. And I would assume the commission in this instance as being the commissioner of commerce. That the commissioner somewhat acts on behalf of the corporation. Well, indeed that is a sweeping change of taking the responsibility from the corporation, you are putting it back in as a state function and I question if we ought to do that. I mean granted we can amend that out of the bill. The other question that I asked earlier in the deliberation, was it broke, and if it's not broke why fix it. Well, I think we've heard here from some people I respect a great deal, principally Mr. Brundin and Mr. Reitman that I know to be well respected attorneys in this community, and they say basically it's not broke. There are some good sections in this bill that we ought to perhaps endorse and support at this point, but there doesn't appear to be a need to do a sweeping overhaul of our corporate code at this time, and it appears that what this committee is faced with is going through and trying to determine what can we digest at this early stage, what should be phased in over time, and then we do that in concert with the people that we represent. That's the people who have testified and the people, the small business guy that's sitting there. A lot of the realtors are here today, and I would recommend that they read this bill, because a lot of things that they do in a very new area of real estate development could

certainly be affected by this a great deal. They need to know. And I guess I'm concerned too that we've covered the accountants, we've covered the attorneys, we've covered some other persons, but the main persons that will be affected by this, is the little, small business guy. We have not seemed to be able to reach out and make that person aware that we are doing something here that can have a major impact on the way they conduct their business. I'm not saying that's right and I'm not saying that's wrong. But it will affect them and we have not been to date, to my satisfaction . . .committee's satisfaction, been able to reach out and advise these people something is happening that will affect you and you ought to be involved in it.

VOICE: Mr. Chairman, I think that summarizes my concern. Thank you.

COWDERY: Rep. Wendte.

WENDTE: I was very interested in your review of the extent to which you have exposed the bar association to this bill both as it was being formed and then after it was put together. I guess given that background it's not surprising we only have one or two of those who object to this at how it's put together and what your views were bothered to come back to listen to your testimony. I would note though that 100% of the nonattorneys did come back to listen, although he just left, to hear your presentation. The question I would ask, is could you identify by letter I guess if there are extensive, if not you could respnd now, the extent of the sections of this bill that do not match the model act aside from 488.

FESSLER: Yes, sir, if you'll take this commentary . . . the way it works is that with regard to each section in the bill you have a statement under the scope note of exactly what it is to the best of my ability to express it that the bill do. And to the extent that it must interrelate with common law developments, that is done there. Then you have a provision on every section on every section which says change in former Alaska law. There you will find the provisions of Alaska law identified that are affected. You are told the origin of this draft's thing. You'll be told that it's sec. 47 of the model act, or you will be told that it's sec. X of the North Carolina law, or the New York law. And then you will be told as best as I am able to do it, if there is existing statutory law in Alaska, and we didn't simply reenact it, exactly what changes would be made. So you will be able to go through here and identify the source of every provision in this act. Now you will find the model act is here when you get to the area on the "financials", Article 5 of the act. You will find that it is heavily reliant on California law. As I just represented to you that view has now taken hold with the model act, and the revised model act is now in congruence with that provision. It was not when this was written.

The other provisions you will find is that if you look at the model act as it came out originally and as it now exists, it has no organization whatsoever. This act organizes the statutory law in a manner which is taken from New York's act, so it differs from the model act in its organizational format. But I think all for the better, for the existing Alaska Corporations Code would be the Anchorage telephone directory nonalpabetized. And at least it has been set up in an alphabetical manner for you now.

VOICE: Can I gather from that then, that every section with the exception of 488 . . .

FESSLER: Has statutory precedence.

VOICE: Well, is a part of the model act.

FESSLER: No, no, sir. As I say, there are provisions in this act which would, for instance, come from New York or California that might not have exact model act corollaries. The model act itself is not a very comprehensive statutory basis for corporate law, and the reason that the drafters of the model act did that [TAPE CHANGE] . . . And then the legislature having taken the model act is invited to flush it out as it thinks best for the particular jurisdiction. The statement I did make, and I will reiterate, is that the model act and more is here. There are provisions here that go beyond the model act. But I will also tell you that that would not surprise the drafters of the model act. Illinois, which is the state upon whose law the model act was originally adopted, has gone substantially beyond the model act in flushing it out in that state.

VOICE: The identification of those sections is in your memo . . .

FESSLER: Is in your Joint House/Senate Journal, you will find it under the so called change in former Alaska law. The first thing it tells you is where it came from, the second thing it tells you is what the status of existing Alaska law is, and the third thing is it tries to interpret the meaning of that change, if any change there is.

COWDERY: Rep. Malone.

MALONE: Thank you, Mr. Chairman. Question for Mr. Fessler. First I want to see if I understand the explanation you made during your original testimony on how Alaska case law is affected by this new revised version. As I understood the argument, the gist of it was that we have so little case law in Alaska that this legislation in your opinion being clear, and the commentary which further defines it, will give people a better basis for interpretation than our present case law and much

sooner than any case law would ordinarily be developed. Is that right?

FESSLER: That is my belief, sir.

MALONE: The second question I had was that during your testimony you mentioned you found two cases which I think had something to do with trying to . . .

FESSLER: Pierce the corporate veil.

MALONE: Yes, get past the limitation of corporate liability. If those were cases in Alaska, were they successful or . . .

FESSLER: They are Alaska cases. One was and one wasn't. Those cases are identified, Rep. Malone, in the discussion of sec. 488. And so you will find that discussion commencing at page 140 and carrying over to page 143 in which the Alaska cases as well as some cases from other states of interest would be found.

VOICE: A final point, isn't a question, but since we have not had any extensive hearings on this, at least in the Judiciary Committee yet, and since this request made by a group of attorneys in Alaska, I personally would appreciate very much, even if it is at a late date, if Mr. Fessler and the code revision commission would work with the ad hoc group of the Alaska Bar Association on it. Because I don't pretend to be an expert and I would guess that even though I might agree or disagree with various interpretations or proposals, I'll be in a lot better position if there are judgments on the issues.

COWDERY: I would hope, too, and it's my intent that, or interpretation of what was said this morning, it's the intent of the ad hoc group or the other people that testified this morning, to work together to come up with some balance of agreement. And so when it comes back or before we work on it again in this committee, that as it leaves our committee, hopefully, we'll have some agreement that will go on to the next committee of referral for action hopefully.

FESSLER: As I indicated, it would be my pleasure to work with the gentlemen and other interested Alaskans, particularly my office will supply all of the background memoranda and studies that were done over a period of time so that . . . the statement was made this morning by Mr. Block that there was no desire to reinvent the wheel. I can save them the trouble of reconstructing the society that reinvented the wheel. We can and will give them all of that information.

One final point that addressed a concern that Rep. Bussell raised repeatedly this morning. The issue of costs. The

Alaska Federation of Natives appointed a subcommittee to review this bill, and they did it over an extended period of time. One of their interesting conclusions was they felt it would save hundreds of thousands of dollars in legal costs, because they now would be able to ascertain from a statute that originated with the Alaska legislature, rather than from opinions that are, as they put it, frequently expensive guesstimates, not infrequently coming from Washington, D.C. law firms, of what the state of law would be on many areas of great concern to them. And this bill has no more ardent supporters than the AFN at the present time, because they recognize that having had Congress decide for them they should be corporations, they have run a length experiment in exactly what it's like to try and live under existing statutory and common law in the State of Alaska in the corporate field. And they feel that they will save time, not only in litigation, which they will not go through, but on paying lawyers. And the one thing that did come out of everything this morning, is you have an extremely altruistic bar, never have I heard attorneys be so disdainful of future business. Well, there wish will be satisfied if the AFN is correct in its assessment of what would happen should this bill be enacted.

COWDERY: Thank you. We have people on our next committee that have planes to catch and we're running over so I'll, with this comment I hope you'll keep it short.

WENDTE: It is a comment, but I personally have a problem with the second hand expression of reporters, I would request the chairman to specifically invite the AFN, if they had not expressed their opinion.

FESSLER: They were at the hearing, I am reiterating their testimony at the hearing that took place in Juneau, Rep. Wendte, which supports . . .

COWDERY: Like I said, this was the first really hearing that we've had on the bill in the House, but we joined with the hearing of the Senate, but anyway we appreciate your comment.

FESSLER: I thank you very much.

COWDERY: It's the intent, I'm going to recess for about 5 minutes so we can get some of this stuff cleaned off, and we appreciate everybody coming in and being patient with us. And we'll get back to the confirmation. Thank you.

SENATE LABOR & COMMERCE
STANDING COMMITTEE
May 17, 1983
3:00 p.m.

Members Present: Senator Pa[illegible] Rodey

Members Absent: [illegible]enator Dick Eliason, Chairman
Senator Bob Mulcahy
Senator Don Bennett
Senator John Sackett

COMMITTEE CALENDAR

SB 246 Amended Title: An Act revising the corporations code; and providing for an effective date.

WITNESS REGISTER

Professor Dan Fessler, Consultant
Code Revision Commission
University of California, Davis, CA
Phone not provided
Position Statement: Outlined Corporate Code Revision.

Henry Lancaster, Aide
Senator Josephson's Office
Pouch V, Juneau, AK 99811
465-3787
Position Statement: Asked for points of clarification.

Jeff Berry, Aide
House Labor & Commerce Committee
Pouch V, Juneau, AK 99811
465-3892
Position Statement: Asked for points of clarification.

John Abbott, Chairman
Alaska Code Revision Commission
Address and phone not provided
Position Statement: Answered questions from the committee.

Willis Kirkpatrick, Director
Division of Banking, Securities and Corporations
Department of Commerce & Economic Development
Pouch D, Juneau, AK 99811
465-2521
Position Statement: Stated concern regarding the method of keeping the records.

PREVIOUS ACTION

SB 246--There is no previous action to report on this bill.

ACTION NARRATIVE

The meeting of the Senate Labor & Commerce Committee was called to order at 3:00 p.m., with Senator Rodey present. Senators Eliason Chair, Mulcahy, Bennett and Sackett were absent. This meeting was called for the purpose of receiving public testimony on SB 246. The following is a verbatim transcript of the proceedings from a cassette tape of the reel-to-reel tape of the meeting.

SENATOR RODEY: . . . This is a subcommittee meeting of the Labor & Commerce Committee. The task is to review the Code Commission's work on the corporation's statute. We have with us today the Chairman of the Code Revision Commission, Mr. John Abbott, attorney from Anchorage. With us also is Professor Daniel Fessler, who is the author of the corporations code, along with the Code Commission. John, did you have any questions, or rather any comments, you'd like to make? Perhaps the best thing you can do is . . . would be to give everybody here, we have mostly staff people and people from the administration here with us today who, they are the ones that do the real work. And, of course, the legislature . . . this is a complicated matter, the legislature really has to take the opinion of those people who have the time and expertise to work on it.

JOHN ABBOTT: Thank you, Senator Rodey. Just a few preliminary comments before I turn it over to Professor Fessler. The corporations code has been under advisement, so to speak, for about four years now. It has undergone a number of revisions, a lot of thought and a lot of man hours. It is a technical bill. It is the first time that the Alaska Corporations Code will have been substantially revised since its adoption in 1962, at which time it was probably not a very good code. And what the Code Commission has tried to do is to improve it, bring it to modern status as a corporation code governing the activities of people that have acquired a state charter and to fill in a number of voids in areas which the Legislature has not spoken to and which need to be spoken to since a corporate charter is, in effect, a set of directions to anyone wishing to incorporate as to how they are to act as a corporation in the legal diction. That is basically what the Code Commission has done and without further ado, I'll turn it over to Professor Fessler. He'll give you a run down on technical aspects of the code.

PROFESSOR FESSLER: And if it would be helpful, Senator, anytime either, particularly you or any members of the staff that are here have questions, please feel free to interrupt me. I should first begin by identifying myself. I am from the University of California at Davis. I am here in the capacity as a consultant to the Code Revision Commission. I was first retained in the fall of 1979 and asked to review the content of Alaska statutory law on for profit corporations, with a view toward advising the commission as to whether or not I thought that any kind of basic reform

PROFESSOR FESSLER (cont'd): was necessary. I concluded that it was, and I can briefly highlight for you what my thoughts were. When Alaska became a state, the legislature adopted with virtually no modification of what was then the current corporation law of the State of Oregon. The Oregon law in turn was a 1954 version of the model act. Now subsequent to Alaska's adoption of the Oregon act, there have been significant change both in the recommended content of the law. The model act, I should point out parenthetically, is an act which is recommended to the legislatures of the several states by a committee of the American Bar Association. Of necessity, it is a very general act. It pertains to the conditions and experience of no single jurisdiction and over the years it has become the basic act in numerous smaller states. It has never been successful in having much of an impact on the law of those states where any legislature sat down and decided to craft their own corporation's law. The Delaware, New York and California laws, which are the three major approaches to the organization and discipline of corporate activity in the United States, and have reflected very little influence on the model act. We have adopted the model act. Now the model act that was adopted in Oregon in 1954 was obviously not adopted with a view toward any interest that might be in Alaska or in legislatures not be given credit or presence in figuring out their law to become that of another state. Unlike the State of Oregon, which in 1954 had ninety years of common law decisions in the business field, and therefore when the legislature enacted a statute to regulate business activity in Oregon, it could take into account that the Oregon Supreme Court is speaking to these questions for nearly a century. The Alaskan act was brought into our state against a background of a near void of decisional law. And in the years that have intervened, our Supreme Court has had occasion to speak from time to time on business matters. But I think that not even the most optimistic leader of the Alaskan courts would feel that there is today a background of supplemental decisional law. So from a practitioner's vantage point or from a client's vantage point, the corporate law in Alaska starts off as being, bearing no rational relationship to the state. It is subsequent to being enacted here. It has been tinkered with from time to time. There have been some amendments. It has never been thoroughly restated. Amendments to the model act as they have been recommended have some been adopted in Alaska, but most have not. And there is virtually no common law in Alaska, pre-statehood and post-statehood, in this area. So that the biggest problem Alaskans face is that the law with regard to business associations in the state is very sparse, very difficult to determine, and therefore it threatens business with the one thing which business cannot deal with--uncertainty. When questions are raised and business people need legal advice, they need to be told yes or no. The answer maybe isn't very useful at all. For the answer that we may get this eventually decided by the Supreme Court is both an expensive and hideously time consuming period at which to try and predicate corporate decisions or corporate action. So what I have recommended, and over the years what the commission

has evolved, is an extremely comprehensive statute. The bill which is pending in the Senate is Senate Bill 246. It is probably the most elaborately stated corporation's code in the United States. If it has a rival, it would be the California act from the mid-1970's. The reason that this statute speaks on subjects that go considerably beyond the model act is because we are attempting to answer by legislative provision many questions which in other states are answered by well known common law decisions, which decisions we simply do not have in the State of Alaska. So in order to have a thoroughly conceptual and detailed statute, it was felt necessary to begin by looking at some basic philosophical choices. And when the commission looked beyond the State of Alaska it found that the attitude of state government toward corporations varies dramatically from state to state. The most impressive distinction would be between Delaware on the one hand and the State of California, where I come from, on the other. It is sort of surprising to people when they first get into this field that Delaware is the most important American jurisdiction for corporate purposes. If you look at the Fortune list of the 100 largest American corporations, 97 are incorporated in post office boxes in Dover, Delaware. And this is because over the years people in business, in management, have found in the Delaware legislature a very, very receptive and understanding body. Also, the State of Delaware has maintained chancery courts long after they were abolished in all other American jurisdictions with the result that you can get a matter litigated, tried and finally disposed of on appeal in the State of Delaware inside of a 100 days. Again, business cannot stand to be told maybe with regard to a question. Delaware's act is considered a management oriented statute. If there are value judgments to be made giving preference to the prerogatives of shareholders on the one hand, or those of the incumbent management, the officers and directors on the other hand. The Delaware act makes all those value calls in favor of incumbent management. In stark contrast, the State of California has the most pro-shareholder, anti-incumbent management corporations code in the United States. In California, Delaware, excuse me, California directors can serve only one year terms of office. It is illegal to attempt to give a director a longer term of office. The entire board must stand for election at a single meeting held every year. And beyond that, in California shareholders are given the mandatory right to cumulate their votes. The voting scheme designed to maximize the opportunity for minority share interest to gain board representation. Now when one looks at the management oriented Delaware act on the one hand, and the California approach which is to bend everything in favor of shareholders, a decision was made by the Code Revision Commission that we would craft a statute which had no inherent internal bias. Under this proposed bill, it would be possible for individuals desiring to form a corporation, to form a corporation that had all of the prerogatives which California insists upon for a California corporation. In other words, you could choose to have one year terms for directors. You could choose to have no classification of the boards, so that the entire board must stand for

annual elections. You can choose to have cumulative voting, but none of these choices are forced upon you by the state. Therefore, it would be possible under this statute to choose three year terms for directors, to classify the board so that only one-third of the board comes up for election every year, and to deny to the shareholders cumulative voting. What we have attempted to do is to allow people in this state the freedom to make their own business decisions and to make their own decision about what it is they want in terms of management and the rights and prerogatives of the beneficial owners, the shareholders. What we have sought by way of reform, however, is to insure that all of these basic decisions are taken within the context of the articles of incorporation so that there is a single document which shareholders or other interested parties can look to that will you a totally accurate picture of what basic decisions have been made with regard to this specific corporation. For that reason, you will notice that there is important language in the provisions of the act dealing with the articles of incorporation. Two sections, the section that speaks to the mandatory terms which must be covered by the articles and the succeeding section which refers to the optional terms. That has a very important caveat. All of the topics covered in that section are stated by the statute to be effective only if made the object of provision in the articles. Therefore, if you put them in bylaws, if you try to put them in shareholder agreements, statutorily they would be null and void. So that our attempt has been made to make the articles of incorporation and the process of incorporation of a new corporate entity is very much like a cookbook. The statute is a recipe of choices to be made. They are clearly presented. Both the counsel and client should find it very easy to go through the process of incorporation, giving to the clients the opportunity to make basic decisions about the corporation being formed. Thereafter any potential investors will find those decisions clearly reflected in terms of the articles of incorporation. So you have here a statute which is pretty much devoid of any internal bias, in favor of shareholders or in favor of management prerogatives, which has also sought to minimize the role of government. Certain states have recently been adopting acts which have attempted to intrude the government more and more into the area of corporate activity. There is concern about the social responsibility of corporate behavior. There is solicitude about the question as to whether corporate management, the people whom Louis Brandeis once referred to as managing other people's money, the degree to which they were truly, honestly and efficiently exercising their business judgment and what the state's interest ought to be. Our decision has been to recommend to the legislature adoption of a pact which renders certain reporting obligations which must be made to the Department of Commerce and Economic Development which standardizes the reporting obligations, both in terms of their content, their form and their title, so that there will be a habitual pattern of reporting to the state. But beyond that does not seek to give the state a very intrusive role to play in the

operation of for profit corporations. The old pro warranto provision brought by the Attorney General which has never enjoyed much use in the State of Alaska does not come in for much of an enhanced role in statute. Yes?

HENRY LANCASTER: Excuse me, but does your definition of state intrusiveness extend to fiduciary duties and . . . type of shareholders?

PROFESSOR FESSLER: No, when I am speaking now of a statement, I appreciate the opportunity to clarify. I am speaking now of the executive branch of government. I am not speaking now of attempting to minimize the role of the judiciary in the event litigation should take place, but rather to what extent would there be an investigative presence of the Attorney General looking into the operation of corporations. We have two provisions: There is a provision in this act which allows the Attorney General to commence a cause of action designed to seek the dissolution of a corporation. That's the old classical pro warranto procedure for very serious offenses against state law or public policy. There is also a provision for the administrative dissolution of corporations which are merely habitually ignoring the various reporting requirements and tax obligations which the state has created. And those enforcement procedures are placed in the hands of the Commissioner of Commerce and Economic Development. They are administrative procedures. There is a provision in the act which would allow a corporation who just had its charter suspended pursuant to this to appeal to the superior court for a trial de novo on the matter so that the state's role is certainly going to be vindicated in terms of tax obligations or reporting obligations. The prerogatives of the Attorney General of the Department of Law have been protected in this legislation. But basically what we have attempted to do is to force those who control the corporation, especially larger corporations having numerous shareholders, to make annual reports to shareholders. And we assume that the shareholders will be the best source of discipline over the stewardship of people who are managing corporate resources which the shareholders have the beneficial interest in protecting. So for the first time if this act were adopted, there would be mandatory reporting obligations every year on the part of the corporation to its shareholders, giving the shareholders a fairly facile means of gathering what the financial status of the corporation is. Also, you'll be interested in looking at the section on what are called transactions with interested directors and officers. These transactions are specifically defined in the statute, and every year corporate management must disclose to the shareholders the identities, dates and amounts of transactions falling within the statutory definition. The shareholders will have a much better opportunity to decide whether or not there have been abuses of fiduciary obligations. I should also point out the reference to the inquiry about fiduciary obligations, that this statute for the first time gives a clear definition of the duties of care

and loyalty which are owed by a director to the corporation. The statute also specifically delineates the rights of a director to rely on certain information supplied by corporate officers including the opinion of counsel or by committees on which that particular director does not happen to serve. Also for the first time in this statute, fiduciary duties are articulated on behalf of corporate officers. There is no statutory formulation of fiduciary of corporate officers in the State of Alaska today. They would be left intrusive to common law conjecture as to what they were and what the dimension might be. So those are the basic approaches which are taken to this very important question.

HENRY LANCASTER: Does it do anything to relieve the burden or reduce the cost of shareholder litigation in seeking to find that information?

PROFESSOR FESSLER: Well, first, the statute clearly defines the rights in which shareholders will have with regard to inspecting corporate books and records. A distinction is drawn, you'll notice in the provisions of this act, between a shareholder whose basic interest is examining the shareholder list and gaining knowledge of the identity of the other shareholders or even greater interest in trying to figure out how the shares are proportionately handled. We also have created a right of inspection with regard to corporate books and records. The statute specifically includes in that description the books and records of subsidiary corporate entities. Because one of the basic problems that has arisen in jurisdictions in recent times has been that corporations will frequently hide transactions that they know may be objectionable by having those transactions take place within the guise of subsidiary or other affiliated corporate entities. So shareholders are now given statutory rights of inspection, and they are given certain teeth. You'll be interested in the provisions that deal with the consequence to a corporate officer who denies to a shareholder what are that shareholder's statutory rights of inspection, including a $5,000 civil liability to that shareholder in addition to whatever actual damages the shareholder may be able to show by virtue of the denial. In the past, one could simply, in the jargon of the trade, tough it out or stumble when faced with shareholder demands. There were no statutory penalties. There was no legally defined downside risk for such a strategy. There was always the possibility that you might well be sued, but you could take a chance that you could resist any liability on the theory that the shareholder could not show that she had suffered any discreet, provable, ascertainable damages. Those matters have been thought out by the commission, debated at some length, and the commission's recommended positions on that are reflected in this bill. In addition to that, in other words, in addition to the prerogatives which a shareholder who suddenly makes it her business to want to look into these matters, there is as I stated a few moments ago the mandatory

reporting obligations which corporations have. They become more elaborate as the size of the corporation increases, and the inertia of shareholders is thought to require that the corporate management be forced to come to them with annual reports. Some are the twelve pay reports that are required by the Securities and Exchange Commission, so that shareholders would at least be alterted by the basic information imparted in those reports. And then might be well alerted to follow up by inquiries and take advantage of their rights of inspection. And in this regard, there is one other area of Alaska law that I think is shockingly deficient. Alaska is one of two jurisdictions in the United States that has no statutory regulation of the shareholder derivative cause of action. If there has been a reform which has had rough sledding in the United States since the 1940's, it has been the theory that the shareholders could be relied upon like Cincinnatus, at their own expense, to enter lists against those who are managing the corporation and sue using the corporation as the beneficial plaintiff for the litigation. The theory in the 1940's when this became a matter of great vogue in corporate literature was that in this manner corporate responsibility would be returned to corporate. . . The role of government was receding as corporations became more and more, there are more than eight thousand for profit corporations in Alaska already. And that number can only be expected to go up. If the Department of Law were to look into their affairs, they would have to be massively inspected. So the theory was, let the shareholders do it. The difficulty was, of course, the flaw in nature of humankind is nicely reflected in the cross section of individuals who are likely to be shareholders. Therefore, section 435 in the bill is addressed to the statutory regulation of shareholder derivative cause of action. However, it has been to attempt to ferret out the shareholder who was most likely to bring a meritorious cause of action and have the legal resources to stick with that cause of action through a process of prosecution and final adjudication. The basic abuses, of course, over the years have become shareholders would bring what are now . . . referred to as strike suits. The causes of action initiated against the corporation with full knowledge that the corporation could find the expense, both in time and treasury, the adverse publicity of the media picking up that a corporation has been sued for a hundred million dollars or a million dollars, alleging that all of the people who are running the corporation are crooks. And that any individuals who brought these types of action were frequently very interested in having incumbent management simply buy them off with non-judicially supervised, out of court settlements. It is not surprising that the fruits of these non-judicially supervised out of court settlements never went to the corporate treasury, which is a theory in a derivative cause of action, but went to the shareholder who was keeping his peace. All of these types of abuses I think have been prophylactically dealt with in section 435. You will notice that the statute defines standing on the part of

shareholders who will be allowed to bring the derivative cause of action. For the first time the statute clearly settles the issue of when such a shareholder is obliged to exhaust intracorporate remedies by making a demand for the action which the shareholder seeks to have effectuated on the incumbent directors, settles for the first time the question as to what the status of incumbent directors and their business judgment should be, recognizing that the question of whether it is in the best interests of XYZ corporation to engage in litigation for the next two years is not purely a question for lawyers to decide, but for businessmen and businesswomen to decide. And, therefore, unless the directors are themselves accused of being the wrongdoers or under the direct or indirect control of those who are alleged to be the wrondoers, the good faith, independent business judgment of disinterested directors is to be respected and will terminate the cause of action which is created by section 435(a).

HENRY LANCASTER: Yes, (a), I guess that leads me to my next question. I noticed you were expressing corporations for profit. What I am going to ask is what protections does that give public corporations in Alaska. The state oversees some of them against residents claiming themselves to be shareholders who want to take some kind of action.

PROFESSOR FESSLER: Nonprofit corporate entities?

HENRY LANCASTER: Well, AHFC, or any other public corporation.

SENATOR RODEY: This section, this bill we have before us doesn't deal with that question. It's just for profit corporations.

PROFESSOR FESSLER: They are not covered at all.

SENATOR RODEY: Mr. Lancaster is legal counsel with Senator Josephson.

PROFESSOR FESSLER: I see. Well, they are not covered at all. Any government created corporation, either by the state or federal government or any nonprofit corporate entity created, has fallen outside the purview of this particular act. Although the Code Revision Commission has prepared an extensive draft of a not for profit corporations bill which very shortly will be submitted by Chairman Abbott to the Legislative Council with the request that it be introduced.

SENATOR RODEY: Let me ask one question . . .

PROFESSOR FESSLER: Senator.

SENATOR RODEY: . . . particularly since we have the banking director here as well, what impact will this bill have on the banking code?

PROFESSOR FESSLER: Well, basically, you are asking me a question that I am afraid that I cannot answer.

SENATOR RODEY: I always wanted to ask a professor a question that he couldn't answer.

PROFESSOR FESSLER: This does not address banking and corporations.

HENRY LANCASTER: Separate titles also.

SENATOR RODEY: Yes, I know that. Is there, which is the reason I asked, as you know, when you draft corporate articles now as a lawyer you say except for insurance and banking in the State of Alaska is the magic words that you put in. But is there anything in the bill that would affect banking?

PROFESSOR FESSLER: Since banks cannot be formed under the terms of this act, I would say that there would be nothing in this act which would directly affect banking.

SENATOR RODEY: I wanted to put that on the record.

PROFESSOR FESSLER: Well, I think that would be my opinion. I was trying to remember, I think several years ago the commission decided to stick with the basic scheme which was that the current Alaska Corporations Code does not extend to banking. It is receiving discreet statutory treatment, and so it continues to do so.

SENATOR RODEY: That answers my question, and many, many bankers will probably rest easier.

PROFESSOR FESSLER: Well, I assume it will not be because of the enhanced fiduciary obligations that are defined in this code. The bankers will be resting easier, but they are not covered, merely because they would be superfluous . . .

SENATOR RODEY: They become nervous when anybody attempts to change the law.

PROFESSOR FESSLER: If I could generally in terms of suggesting that areas that you might wish to look into for various senators and representatives and committees of the legislature. Article 4 of this act deals with corporate finance. It brings about a suggested reform that I think will be most welcome in the state. One of the most difficult legal issues of the present time is to decide when it is licit for corporate management to make a distribution of corporate assets to the beneficial owners, most commonly in the form of payment of dividends. The difficulty has been that the legal profession in the 1920's began to intrude concepts which were apparently meaningful to lawyers, concepts such as earned surplus, reduction surplus, which had no meaning then or now to

accountants. They also had no meaning then or now to individuals who are in the business world. Consequently, we have the sort of Alice in Wonderland business of the law speaking one language venerating certain very ill defined value judgments with regard to this basic issue, and the accounting profession which was charged with obeying the law or keeping accounting clients within the law, and men and women of good faith desirous of obeying the law in an abysmal state of ignorance as to what exactly it was that the law wanted. Now, California in the 1970's spent a great deal of time and no little treasure attempting to solve this question. They came up with a scheme which is called the ratio/assets surplus test. And with very minor modifications, that is the basis of Article 4 of this proposed bill. It answers the very primitive question of when can a corporation make a licit distribution of assets with a very simple answer. Any time the assets of the corporation exceed its liabilities by a ratio of five dollars of assets to four dollars of liabilities. Any corporate assets beyond that ratio are free to make distributions to shareholders. So that if a corporation has five hundred thousand dollars in assets and four hundred thousand dollars in liabilities, it could make no distribution to shareholders at all. If it had six hundred thousand dollars in assets and four hundred thousand dollars in liabilities, it could make a distribution up to one hundred thousand dollars at which point its assets would have been brought into the statutory equilibrium of liabilities, and no further distribution would be licit. There is a further caveat. The statute does take into account that there is a big distinction between fixed and current assets. If a corporation which had most of its assets tied up in illiquid matters such as land or a factory and had in its liabilities recurrent, short-term money obligations, even though the total ratio of assets to liabilities might meet the so called ratio/assets surplus test, there is a requirement that giving a prospective effect of the proposed distribution that current assets, which is a term of art to accountants, equal current liabilities, another term of art to accountants. The basic scheme here with regard to all accounting concepts is to leave them to the evolved understanding of the accounting profession. You will notice here that the statute does not contain definitions of accounting concepts at all. It simply says that in reckoning the ratio/assets surplus test, that management is to be guided by the decisions or recommendations of members of the Certified Public Accounting field. So as they evolve their various understandings, our act will also beneficially evolve. We will never be wedded to a set of accounting principles which are constantly being eroded as they are being improved by the accounting profession. So that I think that reform will be very deducible in allowing people to be prudentially advised now or frequently to be able to get along without the needed advice, because it is a fairly easy test for accountants to apply. So that in Alaska at the present time, you have a statute which contains elements of two antiquated tests, the so called earned surplus test and

the balance sheet surplus test, are used by various jurisdictions that have a model act. In other words, if you look at our statutory language it doesn't define the test. If you then look at other states that have similar statutory language, you run into a sea of confusion. Since we have no decisional law interpreting our statute, an accountant or businesswoman in this state faces one of the most vexing of all dilemmas. A statute which we have not interpreted which faces divergent and frankly at war interpretations of other jurisdictions. That would all be swept aside and replaced now by fairly easily understood concepts.

SENATOR RODEY: Could you deal with the question of the secondary liability of directors. I think that's an important one. Obviously there are problems in this jurisdiction in that area, and it would probably be one of the more controversial aspects of the bill.

PROFESSOR FESSLER: Yes, one of the most difficult questions that I think the legislature may well wish to face is the idea of corporations being used in a manner which is very, very unlike the classical image of a corporation. Remember now I am talking about limited liability. The corporation is the only vehicle for the conduct of business which carries with it the presumption of limited liability for all participants. For both tort and contract claimants the theory is that the assets of th individual shareholders are not at risk beyond the assets which they have contributed by the way of capitalization of corporation in subscribing for stock. Limited liability was extended to corporations in the United States in the 19th Century on the assumption that this permitted individuals who were risked at first, but who had surplus assets to give those assets over to individuals who were without assets themselves, but who had management talents and were very interested in taking other people's money and developing them into businesses which would later on become manufcturers and employers. And, in other words, major economic entities for the benefit of everybody. Limited liability to those shareholders was thought to be essential because the shareholders almost by definition were going to play an extremely passive role in the corporation. Having large public issue corporations today, that is still generally true. I have inherited fifteen shares of stock in Western Union Corporation, an entity for whatever virtues it may have, I would state on the record has never produced large dividends for me and is an entity which has had some substantial difficulties. There is literally nothing which I as an owner of fifteen shares in Western Union can do to meaningfully influence the business decisions of those in management of Western Union. The notion that I should enjoy limited liability for the debts of Western Union or even the tort claims against Western Union is probably senseless. But since 1950, and there have been several books, if you ever fly on an airliner, you are aware that you see constantly ads in all the airline magazines, how to set up

your own corporation. So you've been bankrupt five times, so you don't have any assets, etc., you, too, can have a great tax dodge. You don't have to put up any money at all, and none of your personal assets are at risk here. The sad part about that forty-nine dollar trap is that it is pretty much true. And I think it became true not because any legislature in any state ever said that that should be what would happen. That I as a one single sole could incorporate myself, or that two or three people could incorporate, put up a few dollars in assets, conduct the business so long as it was to our interests. And when it was no longer to our self advantage to simply walk away from that business in this state and you are not at all unique. You have several thousand more corporations that you haven't heard from in months or years. They were never dissolved. They just went away. And they likely went away owing lots of relatively small people money that to those individuals meant a lot. There were employees who weren't paid, and then they found out that the owner of the business didn't owe them the money because business had been incorporated. There were materialmen and suppliers who were not paid because the business had been incorporated. The same enterpriser not infrequently goes on the start another business in another corporate personna and operate that business so long as it is convenient. In other words, what I am suggesting is that limited liability, just as the airline magazines now advertise, has become a very, very simple means of abusing one's creditors. You can only take bankruptcy once every six years, but you can walk away from a corporation once every six days, and there is nothing illegal about it. Banks aren't too interested in this problem. Insurance companies and other institutional lenders are not too concerned about this problem, because when an individual in a business goes to them and wants to borrow money they always ask for individual cosigners. They ask for the incursion of personal liability. The people who are the fall guys in this situation are the hundreds of small creditors who extend credit on open account. So, one of the questions which was debated at length in the Code Revision Commission was what could be done to make people running corporations have any greater sense of responsibility to creditors. In theory, of course, each of you who is a lawyer well knows, that limited liability has never been guaranteed, and there are numerous common law doctrines for quote piercing the corporate veil. Indeed, in California the idea that the business has been thinly capitalized, a term not well defined but at least well conceptualized, is a ground for a court to overturn the limited liability of some or all the shareholders. But if you are an individual who has a four or five thousand dollar claim against the business, you certainly do not have the assets to prosecute through the court system a suit designed to pierce the corporate veil and gain the personal liability of shareholders who have abusively conducted business in the corporate forum. The time and cost of litigation means this is a fairly availing strategy. Now New York, which was the first major American jurisdiction to

permit corporations to come into existence, has never granted total limited liability. This is not well known outside of New York, but it has been the content of New York statutory law from 1834 until this afternoon. And they appear to have no intention of changing it. In New York with regard to employee claims to compensation, wages owed, etc., the ten largest shareholders in the corporation have always been totally statutorily liable, jointly and severally, in their personal assets. Now the problem isn't limited just to employees, and we felt that putting the liability on the ten largest shareholders was not the best way to go. Most corporations doing business under the Alaska Corporations Code as it exists today would have fewer than ten shareholders. Some of those shareholders would be very active in the conduct of the business but others might be quite passive, either because they have retired, they are the surviving spouses of individuals who were active in the business, or they have inherited stock from parents who were active in the business, or because they never planned to be active in the business to begin with. Therefore, putting liability on those individuals seemed to be putting liability on individuals who have not made the decisions which created the liability to third party claimants. So, the act has come up with this notion of secondary liability of officers and directors. Those are the people who make the business decisions. They incur the liabilities to third parties. They are active. If the legislature were to adopt the Code Revision Commission's recommendations, directors and certain named officers of the corporation, or individuals who were discharging the functions of those offices even if they were given different titles. You can see that if the president of the corporation has statutory liability, you might try to create a corporation that had a great pooh-bah but no president on the theory that nobody would be behind the label to whom the statute can pin the liability. So the persons who would occupy and discharge the functions which were normally to be attributed to the president, vice president, etc., of the corporation are liable to creditors for an amount up to twenty-five thousand dollars. Now, that is per creditor. So there could be very significant liability under this statute. If you have ten creditors then there could be a quarter of a million dollars in total liability here. The liability is joint liability with the right of contribution. The liability extends in favor of a statutorily defined class of creditors. Those creditors include employees, materialmen and suppliers and others who extend credit to the corporation on open account. The liability is not mandatory. The statute specifically says, and some individuals who read this statute have either refused to recognize that this is the way it is written or they just simply don't wish to read it carefully. The statute plainly says that the liability which was created can be contracted away. In other words, in writing any individual who is made the beneficiary of this liability can release

any or all of the individuals who are incurring the liability. Therefore, if the corporation and its officers and directors desire to do business if you ran a restaurant in this town and you habitually bought fresh fish down on the wharves. Almost always that is presently sold to you on open account. You get a little bill at the end of the month. There is nothing in writing. At the present time if you closed the restaurant and walk away from it, the individual to whom you owe five thousand dollars or ten thousand or twelve thousand dollars for fish if you incorporate the business has no tactical recourse against you. He can't afford to get a lawyer, he can't afford to try to pierce the corporate veil, he just eats the loss. Now, you could go to that individual and say do you realize that my restaurant is a corporation, and I would like you to agree that in the event that this business fails, you will right here in writing state and you will not look to any of us for payment, but you will accept whatever payment the corporation is able to make. But unless the corporation takes the precaution to gain the written release of reduction of that liability, it is open to total contractual modification. This statute would create that secondary liability.

JEFF BERRY: Is that provision in the statute?

PROFESSOR FESSLER: It certainly is.

JEFF BERRY: So an employer could go to an employee and say it is a term or condition of your employment that you must release us from any liability if we strip the corporation.

PROFESSOR FESSLER: If we what?

JEFF BERRY: Strip the corporation. In other words, strip all the assets out along the way.

PROFESSOR FESSLER: Well, that would certainly be done in form, sir, but I mean whether or not that contract would stand up against an assault in could would be another question. And there are going to be some problems with allowing this contractual modification. You pose a very difficult one of the employer saying to somebody, I want your conscience, your conscious waiver of this right you have. Not on the theory that I am going to strip the corporation, but that I am not guaranteeing that this business will be successful. And, therefore, I want you to help share the risk with me if the business . . . [END OF FIRST SIDE OF TAPE] of the commission. I would find that this is probably a tolerable pattern of behavior.

JEFF BERRY: I think it would run afoul of some labor laws. The rights of employees cannot be waived of minimum wage, for instance, and that may run afoul to federal labor law statutes which guarantee certain rights to individuals that would be setting a term or condition of employment that cannot be waived . . .

JOHN ABBOTT: Okay, but you have to keep in mind that the present corporation law doesn't provide this cause of action or this liability against officers and directors.

PROFESSOR FESSLER: So they don't have that right today.

JOHN ABBOTT/SENATOR RODEY: They don't right now.

JOHN ABBOTT: We are not talking about doing away with some protection that employees presently have.

PROFESSOR FESSLER: You might want to look into, in terms of the Labor Committee, might wish to look into the question as to whether or not it thinks it's a good idea that employees could be put in a position to be asked to waive this secondary liability. But right now it's a right they don't have. So I doubt that any existing legislation would protect it.

JEFF BERRY: Well, if you put it in this form, it may be a right that they would never have. It would exist only on paper.

JOHN ABBOTT: No, no. You are assuming that there is some right there presently that there is not. There is . . .

JEFF BERRY: Well, we hopefully would be creating that right.

PROFESSOR FESSLER/JOHN ABBOTT: Sure.

PROFESSOR FESSLER: Yes, that's fine.

JEFF BERRY: For potential abuses or for, particular for potential abuses because that is really the only area that it would go into. If a person had started a corporation and it failed, they are not going to have anything anyway. And they are going to take everything that they have traditionally and attempt to satisfy the creditors. I think it is a pretty safe assumption that we could make. The question would be in those cases where they may have transferred the funds for whatever purposes elsewhere and walked away. . . then you may not be creating that right. Maybe as far as wages, certainly it's a different bargaining position, employer and employee as opposed to that. I am willing to open an account with you and everything. I think that there is a balancing effect that we could quite possibly look at as to say, can an employee actually bargain with the employer on an equal footing. And that basis would be really creating a right or a disservice, perhaps.

PROFESSOR FESSLER: Well, again, the section we are referring to, sir, that everyone can look at it later is section 488, which shows up at page 67 of SB 246. The group of individuals who are made liable are defined by section 488(a). They are the president, secretary and treasurer or individuals performing the functions of those offices. Notice that section 488 also extends to foreign

corporations doing business in Alaska. This is necessary if you are going to conclude an end run around whatever the legislature does by the simple expedience of foreign incorporation, and then coming back to Alaska to do business as a Delaware corporation, or as an Oregon corporation, or a Nevada corporation. So that this act is applied to foreign corporations doing business in the state. And then you'll notice that there is language here that says to the extent that the act as a corporate entity prove insufficient. In other words, the person seeking to be covered under section 488 would first have to exhaust the liability of the corporation. You couldn't come after a director just because that individual was a more obvious target as a defendant. Now, you'll notice that the liability is for contract indebtedness, whether formal or otherwise, for materials, supplies, inventory or services furnished, and that's what covers the employees. During the period of service, so if a director wants to know how long would I be liable and for what amount. Well, it would only be for those contract indebtedness claims arising during my period of service on the board. (b) is the point that I was making a few minutes ago. The terms of a written contract, not an oral understanding, but a written contract between a corporation and a third party may modify or preclude the liability. And then (c) is designed to keep a large creditor from dividing the claim and assigning twenty five thousand dollar portions of the claim to friends or family members, etc., in order to get more liability than the legislature intends here. Large creditors were perfectly willing to fend for themselves in dealing with corporations. It is the small person who we are interested in protecting here. And then you'll notice under (d) that a party against whom a claim is asserted under this section is entitled to a contribution from others under (a) so that there is a right of contribution that is created to spread the loss. Yes, sir.

JEFF BERRY: I have a tangential question, since you said the word foreign corporation. A question was asked from the insurance administrator. At the current time the Director of Insurance is the registered agent for all foreign corporations. And they are exempt from registering under the corporation statutes. How would this proposed legislation affect that? Would they then become subject to dual registration for the purpose of legally serving anyone who is an admitted insurer, whether it is excess or insurance for that state. I looked through and I really didn't see it and . . .

PROFESSOR FESSLER: The answer, sir, is clear in section 5, that a corporation may be organized under this chapter for any lawful purpose except for the purposes of banking and insurance. So insurance corporations are totally excluded from this legislation. They would face no dual reporting or . . .

JEFF BERRY: They weren't really too sure.

PROFESSOR FESSLER: Well, I mean, one of the problems which I certainly recognize is that a bill of this complexity which has evolved through drafts, repeated drafts, and hearings, most recently six months work with the Alaska Federation of Natives study subcomittee on this subject. It is itself now, by the time it comes to the members of the House and Senate an extremely lengthy, and I think it does not betray the reality to say, a complex piece of legislation. And even I who find gardening thrilling in my pastoral existence in Davis, would not find this the most exciting reading in the world. But we have to the extent possible attempted to provide very extensive comments that are designed to explain, not only to members of the House and Senate and professional staff, but also to citizens, lawyers, and other interested persons in the greater world that lies outside this building, exactly what the intentions were. You will notice that one of the other things which the official comments seeks to do is to give Alaska an instant common law heritage by taking into account certain of the very major common law decisions in allied areas. And stating whether or not in the commission's view, hopefully in the legislature's view, adherence to those famous decisions in other jurisdictions would or would not be consistent with the rules and philosophies that are being framed legislatively here. This is very important where we have continued provisions of existing law, because they were model act provisions and we felt that they were adequate. But when you went outside of Alaska you found that they were the object of conflicting interpretation. The comments will tell you which line of common law interpretation are being approved and specifically which common law decisions are being disapproved. So that a lawyer now would be able to advise a client as to what the legislative history was and to be able to integrate it with the greater body of common law. Senator, do you have any other specific questions?

SENATOR RODEY: Not any specific questions, no.

PROFESSOR FESSLER: Fine. The other factor which I would commend to the general attention of the members is that the rights of members when a corporation is going through what is called an organic change where there is going to be a merger, corporation (A) merges into corporation (B), a consolidation. Corporations (A) and (B) emerge as new corporation (C), or a sale of all or substantially all corporate assets other than in the usual course of business where a corporation sells virtually all of its assets to (B) corporation which takes them over. These organic changes which are very ill defined in existing Alaska statutory law are now very clearly defined, and the rights of shareholders to be allowed to vote before such a plan is affected and not a fait accompli is guaranteed by this new statute. And also shareholders who vote no on the question of organic change are given the statutory rights which are called dissenter's rights which

is a right to have the new corporation buy the shares of the dissenting stockholders at a fair value which is to be determined on the day before the vote in favor of the organic change is taken. And as we always do, you'll notice consistently here when value comes up, the statute first gives to the shareholder and the corporation made liable to pay the dissenting shares the opportunity to fix the value by mutual agreement. If they are unable to do so, the statute provides that the court may appoint appraisers, and the decision of the appraisers as to the value of the stock is binding both on the dissenting shareholders all of them so no one is paid five dollars, and somebody else is paid three-fifty, and the corporation, and that this matter can be expeditiously settled within sixty days, because the last thing that the corporation which has just gone through an organic change needs is protracted uncertainty as to the dimension of its liabilities to any dissenting shareholders.

JEFF BERRY: What is the ratio of percentage of what a shareholder can buy into this new corporation that's in a sell-out situation. Corporation (C) sells out to a multinational corporation, what percentage do they automatically get to buy. The shareholder can't do that with a multinationational.

PROFESSOR FESSLER: The statute creates the general presumption that they are entitled, in other words, all shares must be treated equally. So that if any of the shares in the corporation are going to be given shares of stock in the multinational purchaser then all of the shareholders must be accorded similar rights. You cannot discriminate between shareholders of the same class of stock and say, we find it very convivial to bring in the family of the new corporation. All of the shareholders in this room, except Fessler, and we really don't want him as a participant in our new business, so we are going to give him a thousand dollars for his stock. That would be discriminatory treatment, and we either have to give everybody money or everybody stock.

JEFF BERRY: But what percentage of stock? What portion of the corporation?

PROFESSOR FESSLER: That would be framed by the boards of directors of the two corporations. In other words, if there is a merger the statute puts upon the board of directors of "X" corporation framing the terms of the merger and upon the board of "Y" corporation consent to those terms. That's done at the board level. Then each corporation is obliged to go to its respective shareholders and bring to those shareholders the terms of the proposed organic change. The statute grants a right to all shareholders to vote on this organic change even if they otherwise hold nonvoting classes of stock. And if the corporation has classified its stock, there is an obligation that before the organic change can be affected it must command a majority, not only of all the shares, but of each class of the shares. So we do not seek to build in any guaranteed

ratio of the shares, but we do seek to have it brought to the attention of the shareholders of the respective corporations. And then by giving everybody voting rights, we are trying to make certain that in their self-interest the shareholders will reject or accede to the request. And as I say, any shareholder who votes no on the organic change is given the right to have the successor corporation buy out those percentage shares at a value that was supposed to be the fair value not taking the organic change into account at all. So it is an elaborate balancing of values, but generally what we are doing is we are saying that we like the result that the Supreme Court of Delaware came up with in the Singer v. Magnavox case, and we don't care for the Panzer decision which came along ten months later. And you'll notice that the comments specifically confer a seal of approval on Singer and Magnavox, both as a result and its reasoning, and indicate that the legislature has adopted and framed this statute to carry into effect the Magnavox decision. And if the legislature would regard a judicial construction of this act in a manner that is consonant with the Panzer case as being contrary to the legislature's intention. So we tried to stay on top of the major decisions that have come along and influenced corporate law. Just as in the area of derivative suits, you will find that we are literally, thoroughly up to date. We know all about Flynn and Muldinaro cases; we know about Barr v. Wackman. And therefore, the commentaries to the provisions on derivative causes of action in section 435 specifically indicates to what extent we are willing to sanction the result and reasoning in Barr v. Wackman, on the opinion of disinterested directors, their business judgment and to what extent we are favoring the Muldinaro case decided by the Supreme Court of Delaware. We specifically indicate that our statute would be subverted by the interpretation of the Delaware law given by the federal district court in some of the instances . . . which said that the opinion of the board of directors that in their business judgment the litigation was not meritorious. This is one of the problems in Alaska, that in so many of these areas counsel just simply cannot advise clients because we don't know what the law is, and none of us has an interest in perpetuating that. And that's not good for business. You take in . . . comments, and that's antithetical to the economic evolution of this jurisdiction. Senator, I have no further observations other than to indicate that at any time I will be, if my schedule at the University permits it, be willing to answer questions in writing or by conference calls or by personal appearances for any of the committees of either house.

SENATOR RODEY: I am very unable to predict exactly the course of the legislation will be, and John is, of course, available to help out on it also. Essentially, the recommendation of staff is very important on this. That's why we have a number of staff people here today, because a complicated corporations code has

to be taken in part on faith because most of the legislators will be unfamiliar with the content. The fact that it has had a broad review in the state, has been signed off on by a variety of interested individuals, I think that speaks well for it. I am going to talk with Senator Ray who is Chair of the Judiciary Committee. I don't know what the Chairman of Labor and Commerce will wish to do with the bill. Hopefully, we will move it out in a very timely fashion so it can go to Judiciary again, having that staff and members look at it. There are a number of attorneys on the Judiciary Committee, which is helpful. I don't know whether we'll pass the corporations code this year, given the amount of time it takes for everybody to become familiar with it. It is a complicated piece of legislation, but a very important piece of legislation for the business community. Perhaps nothing else is as important as the structuring of corporate activity in the State of Alaska. And you very eloquently set forth some of the difficulties we have had in the State of Alaska or the lack of any real corporate history or law. And it, of course, was reflected in the statutes and other areas which is the reason for the code commission. The legislature simply doesn't have the tiem to redraft completely in many cases what is law generally taken from the State of Oregon wholesale at the time it was taken or slightly before. Perhaps the best course is for myself to talk with the Chairman of Labor and Commerce, and at that point talk with Chairman Abbott. We very much appreciate your efforts, and we probably will at some point in time call on you to answer questions or make comments. I think that the only way that the bill will really pass, at least pass comfortably, is with the broadest possible dissemination of information about the bill, and I will try to do that. Are there any other questions from anyone that is here today about the contents of the bill or anything that is attended to the bill? If there are no other comments then the subcommittee meeting is . . . Willis.

WILLIS KIRKPATRICK: I don't know whether I should bring it up now, would there be other hearings on this?

SENATOR RODEY: There probably will, but go ahead.

WILLIS KIRKPATRICK: Let me point out, for the record my name is Willis Kirkpatrick. I am Director of Banking, Securities, Small Loans and Corporations. On the corporation part there are three areas that have come to mind, and I have discussed it with the commission. One of them is that there is a requirement for foreign corporations to file their articles of incorporation with the State of Alaska. We have been in touch with other state jurisdictions, and this is a provision that has been deemed eliminated actively as far as foreign corporations are concerned in filings. We have done some research on it, and prepared a paper in that respect, but we feel that it would be for the amount of usage that it would be, that it would get as far as the

practicing attorney and find out what the articles are. This is probably more current and better obtained when they . . . regardless of whether they are . . . The other thing is that there is a requirement in the proposed act that the department file with the Superior Court some updated records weekly, and we would like to have the intent of the legislature if that is passed to make it a microfische copy acceptable for filing in the division. If we print weekly, the updates are going to be very expensive and very encumbering, a massive paper production. So we would request that microfische be considered as meeting the provisions of that section. The other section that we had some concern about is section 910 that gives the provisions for filing writings with the department, and we would like the writings to be specifically suitable for microfilming. Everything is microfilmed now, and we are totally dependent upon microfilming. So we don't want to be in a position where we have no statutory authority to turn down a filing because it is not legible for microfilming. Those are the only comments that we have at this time, Senator.

SENATOR RODEY: Thank you, Willis. Are there, Professor Fessler, Mr. Abbott, did you have any comments this?

JOHN ABBOTT: Well, the code commission is not opposed to any of those changes. And as to the last two, I don't think there is anything in the statute that precludes these microfilm and microfilming format, so I know of nothing in the act that would preclude the director from promulgating any regulations which would provide for microfische. . . district courts or in the districts or requiring documents be susceptible for microfilming. So we have no objection to the foreign corporation articles.

SENATOR RODEY: Actually it fits in with recordations ideas that the code has expressed in the past.

PROFESSOR FESSLER: I would point out, Senator, that I had hoped that we had accommodated this by the provisions of section 868 which say that the reports required by this chapter to be filed with the department by the commissioner shall be on forms prescribed and furnished by the commissioner.

JOHN ABBOTT: I was under the same opinion.

PROFESSOR FESSLER: We are trying to give you the broadest possible authority to prescribe the forms and say what scheme you want in. Your liability with regard to processing them under section 910 presupposes their conformity under section 890.

WILLIS KIRKPATRICK: We weren't quite sure whether actually under 910 weakened the other section.

PROFESSOR FESSLER: Well, if there is any concern circling what Chairman Abbott has stated, there is nothing in this draft that

was intended to do anything other than what you are now seeking to accomplish. And we didn't want to wed you to microfische if at some point in the future there was some other dazzling means of handling information and you were statutorily burdened with a statement that you had to come to the legislature and get it changed.

WILLIS KIRKPATRICK: We wrestled with the fact that we didn't specifically want you to name microfische in there.

PROFESSOR FESSLER: Oh.

SENATOR RODEY: If you could get the committee a memo on that and perhaps consider artful language that would allow you to do what you've stated, give you the authority to make the administrative decisions. I don't think they will have any difficulty with that. Are there any other questions? If not, the subcommittee meeting is adjourned.

MEMORANDUM

TO: Ken Johnson, Committee Assistant
House Labor & Commerce Committee

Sheila Peterson, Administrative Assistant
Senate Labor & Commerce Committee

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

DATE: January 13, 1984

RE: Profit corporations--HB 343/SB 246

You may wish to include the following background information with materials for the Joint House/Senate Labor and Commerce Committee hearing at 8:30 a.m., Monday, January 23, 1984, in the House Labor and Commerce Committee Room in the Behrends Building.

HB 343/SB 246 would replace the Alaska Business Corporations Act, AS 10.05, with the Alaska Corporations Code (ACC). The bill was introduced in both houses on April 8, 1983, to facilitate joint committee work.

On May 17, 1983, a joint hearing was set up on the bill. However, last minute conflicts developed that prevented the House committee's participation and also prevented most of the Senate members attendance.

The meeting was held, however, as a Senate Labor and Commerce meeting, chaired by Senator Pat Rodey, subcommittee on the bill. Staff of some legislators and other interested persons attended. An overview of the bill was given by Professor Dan Fessler who drafted the bill with the code revision commission, and questions were asked and answered.

A transcript of that hearing is attached. It was retyped in the code revision commission office from a garbled original. The original is available in Senate Labor and Commerce and in the code revision commission office.

The hearing set for Monday, January 23, will be the first hearing on the bill for the House committee and the second hearing on the bill for the Senate committee. However, it is anticipated that the hearing will lead off again with an explanation of the bill by Professor Fessler as in the May 17, 1983 hearing.

A general overview of the bill is also contained in the transmittal letter at the start of a section commentary on the bill in House and Senate Joint Journal Supplement No. 11. That overview is followed by in-depth commentary on the bill.

Attached also is a miniature summary of the bill.

HB 343 SB 246
on
Business Corporations

Summary

The bill provides for replacing the Alaska Business Corporation Act, AS 10.05, with the Alaska Corporation Code (ACC), a comprehensive revision.

The proposed ACC sets minimum requirements that must be met for the privilege of doing business in the corporate form.

Within limits it leaves to incorporators how to divide powers between shareholders and directors.

It standardizes reporting required to shareholders and the state.

It seeks to clearly define in what circumstances it is permissible to pay a dividend.

While maintaining the right of shareholders to sue corporate officers and directors in appropriate circumstances, it seeks to control the misuse of these "derivative suits".

It also seeks to control misuse of the limited liability of officers and directors that the corporate form provides.

In the covering letter at the start of the commentary that follows in this binder, there is an expanded summary of the bill. Following that is a section analysis which includes the background and basis for choices that have been made in drafting the bill.

Status

The bill is introduced in both houses for greater flexibility and for the possibility of joint hearings should that be the choice of the house and senate committees.

Status going into the Second Session of the Thirteenth Legislature: In House and Senate Labor and Commerce Committees, the first committees of reference. Second reference: House and Senate Judiciary Committees.

Draft

January 13, 1984

John Clough, President
Juneau Bar Association
801 W. 10th St., Suite 300
Juneau, Alaska 99801

Dear Mr. Clough:

Please inform persons attending the next Juneau Bar lunch:

Regarding HB 437/SB 313. On Friday, January 20, at 1:30 p.m., in Court Room A, Dan Fessler, a UC Davis law professor and consultant to the code revision commission on corporation law, will review the bill now in the legislature for a revision of law on nonprofit corporations. The attached notice which is going out to nonprofit corporations further explains the purpose of the session. It will be a teleconference.

Regarding HB 343/SB 246. On Monday, January 23, at 8:30 a.m., in the House Labor and Commerce Committee Room in the Behrends Building, a joint hearing of the House and Senate Labor and Commerce Committees will be held on the proposed revision of the business corporation law. Fessler will be on hand there, too, to explain the bill.

Persons interested in corporation law can attend these meetings, get an overview of the proposed codes, and offer testimony on good or bad features of the bills.

Very truly yours,

Dick Regan, Research Director
Alaska Code Revision Commission

Draft

MEMORANDUM

TO: ALL LEGISLATORS

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

DATE: January 12, 1984

RE: Profit and Nonprofit Corporations
Codes ~~Teleconferencing~~

Alaska Nonprofit Corporations Code, HB 437/SB 313.

With the concurrence of the appropriate committee chairmen, the code revision commission will teleconference part of its next meeting to explain and discuss the nonprofit corporations bills, HB 437/SB 313. The teleconferenced part of the meeting will be in the Juneau Court and Office Building, Court Room A, at 1:30 p.m, Friday, January 20.

The attached notice is in the mail to over 3,000 nonprofit corporations. The notice explains the purpose of the teleconference.

Sitting in on the code revision commission teleconference would serve to inform legislators or staff about the purpose and the bill on nonprofit corporations which probably will be coming up for hearings of the House and Senate Labor and Commerce Committees later in the session.

Alaska Corporations Code, HB 343/SB 246.

The Friday, January 20th teleconference of part of the code revision commission's meeting should not be confused with a joint hearing of the House and Senate Labor and Commerce Committees on the for profit code--HB 343/SB 246--scheduled for 8:30 a.m., Monday, January 23rd, in the House Labor and Commerce Committee Room. Professor Fessler will be here for that meeting also, and that, too, would be a chance for staff to hear an outline of the lengthy bill. Of course, the joint committee will take testimony from others who wish to be heard.

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
(907) 465-4078

MEMORANDUM

TO: Nonprofit corporations and interested parties

FROM: Alaska Code Revision Commission

DATE: January 6, 1984

RE: Teleconference on nonprofit corporations law, House Bill 437/Senate Bill 313

This is notice that at 1:30 p.m., Friday, January 20, 1984, the Alaska Code Revision Commission will hold a teleconference concerning a proposed revision of Alaska law on nonprofit corporations.

The proposed revision is in the form of a bill drafted by the commission and introduced as two identical bills, one in each house of the legislature, House Bill 437 and Senate Bill 313. Here we generally refer to them as "the bill".

Although the bill is already in the legislature and referred to the Labor and Commerce Committees of the House and Senate, the teleconference is neither a meeting of those committees nor a substitute for hearings of those committees.

Rather, it is part of a regular meeting of the code revision commission that drafted the bill, an informational hearing and a chance for the commission to hear suggestions about the bill that it will, if it believes warranted, pass on to the Labor and Commerce Committees in the form of proposed changes.

The bill will go through hearings of the legislative committees. However, we expect a bill revising for profit corporation law, as differentiated from nonprofit corporation law, will be treated first by the committees. Legislative committee hearings on the nonprofit bill may be weeks or months away. The early teleconference provides an early look at the bill before the legislature is actively working with it.

We ask that persons who wish to either listen in or testify at the January 20 teleconference notify their local teleconference center as soon as possible, so that center will be included in the teleconference. The list of centers is attached.

We hope and trust the teleconference will be helpful for all that are concerned with the bill.

Senator Richard I. Eliason, Chairman
Senator Labor and Commerce Committee

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

DATE: February 1, 1984

RE: Transcript of joint hearing on
HB 343/SB 246 on profit corporations

Enclosed is a transcript made from the House Labor and Commerce Committee's tape of the joint hearing on HB 343/SB 246 held Monday, January 23, 1984. Catherine Walsh of this office typed it at the request of the code revision commission.

Any members of the House or Senate Labor and Commerce Committees who were absent from the January 23rd meeting may be especially interested in the transcript.

Since the House members had to leave for a floor session before the meeting was concluded, they may be interested in the testimony at the last of the transcript--testimony of Elizabeth Johnston of the Alaska Federation of Natives subcommittee on the bill and Irv Bertram, legal counsel for Alaska Airlines.

JOINT HOUSE /SENATE LABOR AND COMMERCE COMMITTEE
HEARING ON HB 343/SB 246--FOR PROFIT CORPORATIONS
JANUARY 23, 1984
8:30 a.m.

COWDERY: I'd like to call the Labor and Commerce meeting to order. It's January 23, 1984, at 9:50 a.m. (sic) 8:50 a.m. I'd like to note those present: Rep. Ueling, Rep. Pestinger, Rep. Koponen and James Cowdery. And I'd also like to note present Senator Mulcahy. The purpose of this morning's meeting is to have testimony on an act revising the corporate code. At this time I think that we would like to call on John Abbott and anyone that would like to testify sign in. The first one to testify that I believe I'd like to have is John Abbott. State your name and affiliation.

ABBOTT: Thank you, Rep. Cowdery. My name is John Abbott and I am the chairman of the Alaska Code Revision Commission. The code revision commission, for those of you who are unaware of this, was a Title 24 commission created by the legislature in 1976. It is comprised of individuals representing the Alaska Court System, the Attorney General's office representing the Governor, the Alaska Bar Association representative, representatives from both the House and the Senate, at this time, Rep. Charlie Bussell and Senator Patrick Rodey. Myself as an appointment of the Governor, as a layperson and Fred Brown as a representative of Governor Sheffield. We have one vacancy on the commission at the present time. Generally, the purpose of the commission is to entertain requests by the legislature, by any branch of government for that matter, to look into areas of statutory law of a technical nature that are in need of revision for any number of reasons including the fact that they no longer comport with the Alaska life, because we are a more sophisticated state, because they haven't provided for a number of years, that they are out of sync with the present needs of the law. The commission also entertains its own projects and has at any given point in time two major projects at least, plus a number of minor projects for consideration by the legislature. We have at the present time five major bills, some of which will be considered by the legislature this session, others will die and not get consideration. The bill in front of you today has been introduced by the Rules Committee in both the House and the Senate as HB 343 and SB 246. The two bills are identical in what they do and were introduced simultaneously for the purpose of consideration by both the House and Senate without the necessity of going through one and then going through the other. This is the practice the code revision commission has used for the past several years to expedite consideration of the bill. Myself, as chairman, and Jerry Kurtz who represents the Alaska Bar Association have been present on the commission during the entire

period of time the corporations bill has been considered and worked on, and we along with with other members of our staff and other commissioners are most anxious to meet with you or your staff to further explain the bill itself. It's a very large bill; it's complicated; it is a sophisticated bill. It determines all of the areas of responsibility which are taken on when a company seeks a corporate charter and seeks a privilege conferred by the State of Alaska. We have with us today Professor Daniel Fessler. He is a professor of law at the University of Davis, California, who has been the consultant on this bill since its inception and is one of the recognized authorities on corporate law in the United States. He will give you a thumbnail sketch of this bill and attempt to answer any questions that you may have concerning the specific technical aspects of the bill. The bill was the result of concern on the part of members of the code commission, both in private practice and in the other areas represented by the code commission, that some work needed to be done because the basic bill had been, as it were, an off-the-rack bill adopted from Oregon statutes at the time of statehood. Whether or not it was appropriate to Alaska even at the time it was adopted leaves some question. Certainly the existing law does not in any respect really meet the needs of Alaskans for incorporation. The new bill attempts to set out and define all the relationships between the various principals or players in the corporate status. So that one need only look at this bill to determine how you become a corporation; how you act as a corporation; how you terminate as a corporation. The bill that's presently before this committee was introduced, I believe, on April 9, 1983. Since that time, some changes have been made as a result of public hearings held by the code revision commission and input from various different organizations concerning some of the specific features of the bill. And as a result, the code commission will be making some recommendations for changes to the committees considering this bill. The work on sections, written comments to the bill and requests that certain changes be made. These changes address concerns raised by Alaska Airlines, one of probably the state's largest corporations, a special subcommittee of the Alaska Federation of Natives that has worked for quite some time with the code commission, has graciously, generously provided its own time and expertise and its legal staff in various of the corporations and has provided us with some good and needed amendments to the bill. Those, too, will be entertained. We also have worked very closely with Mr. Willis Kirkpatrick, deputy director of corporations in the Commissioner of Commerce office. And he, too, has recommended some changes that if made will reduce any financial impact on his office. So that it was the intent of the commission to draft a bill that would have no financial impact on the Commissioner of Commerce office or the director of corporations. So you will be getting some recommendations for amendments pursuant to our discussions and the exchange of ideas of Alaska Airlines, the Commissioner of

Commerce and the Alaska Federation of Native's subcommittee. I think without further ado I'll ask Professor Daniel Fessler to come up and give you a brief summary, an overview of what the bill does. If there are any questions, we also have signed up as witnesses, Commissioner Jerry Kurtz, Fred Brown to provide additional testimony or comments or, in the event you have some questions, we'll do our best to answer them for you. Thank you.

COWDERY: Thank you. I'd like to note that Senator is present. And at this time, I'd like to have John Abbott . . . then the next one up is . . .

RODEY: Rather than invite any comments, I think that Professor Fessler can do a better job of explaining the material than anybody else I know. Mr. Chairman, I'm the Senate member of the code revision commission, and the code has labored long and hard, particularly Professor Fessler and Chairman Abbott on this particular legislation. And I think it is worthy of the committee's very serious consideration. It is in final form, but it is very near passage.

FESSLER: Gentlemen, I am a school teacher at the University of California at Davis. And the subjects that I teach are contracts and corporations. Four years ago I was approached by the commission and asked if I would be interested in serving as a consultant to first survey the content of existing Alaska statutory law in the business field, and then work with the commission should it determine that there was need for revision. The survey of existing Alaska law was undertaken, and the conclusion was arrived at that the existing Alaska law was not the law that the state would most like to have its citizens functioning under. The law that we currently have in Alaska was adopted by the legislature, the first legislature after statehood, by adopting the then Alaska, excuse me, the then content of the Oregon corporation law. The Oregon corporations law in turn was taken from something called the Model Business Corporation Act, which act was put out by the Business Law Section of the American Bar Assocation in the early 1950's. By the time Alaska adopted the Oregon law, the Oregon legislature was on the verge of changing it. And, subsequently, the Oregon legislature has changed much of the content of the law. So, and this is because the model act, which was the basis of the Oregon law and then became the basis of our sort of stepchild has been in the process of evolution. The commission also noted that in the intervening near quarter of a century, that there have been significant changes in corporate law in three of the most critical jurisdictions to which other states generally look for guidance. And that is that New York had rewritten its corporations laws in the late 1960's; California undertook a similar project in which I was involved on the working committee with the legislature in the mid-1970's. And finally the model

act itself has been recalled and is in the process of a three-year study in which a couple of years from now will result in further recommendations. So there have been changes with regard to the theoretical basis of the law. Further, there are changes in Alaska in a quarter of a century. Changes which suggested that it might be time for the State of Alaska to have a corporation law that is a product of its own deliberate creation, rather than something borrowed from elsewhere. The result of this four-year effort is the bill which you have in front of you. And with the exception of some minor amendments which resulted in final meetings with representatives of the Alaska Federation of Natives subcommittee and various other private parties who have testified before the commission that the bill which the commission is seeking your legislative approval and enactment is now in final form. In addition to the bill, the commission has prepared very lengthy commentaries. These commentaries, hopefully, are designed to explain to members of both the House and Senate the origin of each and every provision of the act, to share the value judgments which caused the members of the code revision commission to recommend that particular content, to disclose to you to the extent that the statute is borrowed or modified from statutory law in other jurisdictions the specific genesis of the law, and then to state what change would be made in existing Alaska law were the legislature to adopt this bill. In addition, your staffs will be furnished, and the members will be invited, to work with another document. I apologize for the prodigious size of these documents, but this document is useful in that if an individual is familiar with the provision of existing Alaska law, this works backwards from existing Alaska law, section by section, and shows how that provision would fare should this particular bill be adopted. So those study aids hopefully will be useful to staffs and will be useful to the various committees of the legislature. What I had hoped to do this morning was to share with you some of the value judgments which the commission has made and which are embodied in the multiple provisions of this act. One of the major disadvantages of existing Alaska law is that if an individual were to pick it up seeking to know the content of the law the individual might follow, existing Alaska corporate law is totally disorganized. Provisions which may relate or surround the problem are scattered throughout the bill. One of the initial impressions that you will gain from looking at this bill is that it is very tightly organized. it is organized by major topical sections with the hope that if an individual has a problem with the formation of a corporation, all provisions of the act that deal with corporate formation will be found in Article 3. If the issue relates to corporate finance, Article 4 contains all the relevant law. So that, in essence, the commission directed me to draft the value judgments which it had made very much in the form of a cookbook, but hopefully getting the ingredients in the right order so that it should be something which an individual, whether

a layperson or a practitioner desirous of knowing the content of the law, will be able to find it. And once in the right area, will find all of the related provisions of the statute rather than have them lying around in land mines some 25 to 30 credit pages later, which is the rather dubious distinction of the current provisions of chapter 5, Title 10. Now the areas wherein significant value judgments are found would be Article 3 which deals with the formation of a corporation. Some states like California have attempted to say that if you are going to form a corporation in California, certain major value judgments have been made by the legislature. And the price for forming a corporation in California is that you comply with the value judgments. They would include such things as the requirement that there be cumulative voting for shareholders; that the board cannot be classified; that the directors can only serve one-year terms. California is a statute which is very pregnant with value judgments that sort of tell citizens this is the only way we are going to permit it to be done. Now the reason that this statute does not do that is first there was a fundamental philosophical disagreement that the State of Alaska should be in the business of making value judgments about how people who enter in the corporate form ought to behave. The value judgment which took precedence over that was that people should be informed by reading the statute what the possibilities are. And that they should be allowed, knowing what the possibilities are, to make their own decisions as to whether there will be cumulative voting; how large a board they will have; whether they will classify the board; whether the board will have terms that exceed one year. But that those value judgments should be layed out, and they are layed out in Article 3 in a manner which an individual determining to form a corporation can quickly see that these are the basic things with which the individuals desirous of entering this association should come to some agreement. Further, there is the advantage that we say that if you are going to make these fundamental decisions, you must put them in the articles of incorporation. So that if a person who is a potential investor desiring to know what the lay of the land is for XYZ corporation need only obtain a copy of the articles of XYZ corporation, and that individual will have a definitive statement of the basic value judgments which citizens forming that corporation have made. And there is a further problem, while California has attempted to make value judgments and impose them on citizens, the scandal is that people then simply leave the state and foreign incorporate. They come back as Oregon corporations. They come back across the state line as Nevada corporations. And so it was deemed that this was probably not the best thing to attempt, and that the attempt in the state that's pursuing it isn't working. So in that respect, although you'll see the California corporation code has had a significant impact on many of the provisions of this recommended legislation, the basic thing that the California corporation code is known for

is not carried forward here. It is possible to form a corporation in Alaska which is every bit as straightlaced as a corporation mandated under California law. That is a value judgment that citizens can make. It is not a value judgment that the legislature would be making for you. Now with regard to Article 4 on corporate finance, Here Alaska law was deemed to be flawed in a manner that is true of virtually every state. Lawyers, at least in my experience of being one and teaching others for a longer period of time than I like to recollect, generally make a career decision to go into law sometime after they learn that they have no aptitude whatsoever for arithmetic, let alone mathematics. The consequence is that most lawyers cannot, including myself, balance a checkbook. And lawyers are horrified by concepts of accounting. Therefore, over the years we have sort of developed our own accounting techniques. Because over the years we have had perhaps a bigger voice than we should have whispering in the ears of elected representatives and people, our versions of the myths of accounting rather than the accounting profession have begun to creep into the law. Alaska's current corporation law suffers from perhaps a terminal case of lawyer-accounting terms. One of the major things which corporations must worry about if they are to behave in a socially responsible manner, since they are given the presumption of limited liability. If I form a corporation, my creditors and even victims of calamaties such as torts must look only to the assets of the corporation, not to my own personal assets. Circumstances are important to the state, all people who come into contact with corporations. Well, then what assets must I leave with the corporate entity? What accounting principles must I observe in keeping the books of the corporation? The law has always been interested in this question. But the problem is that we allowed a gulf to grow between what the law seemed to be suggesting and what accountants were telling people are the intelligent way to parse through matters and to resolve them on the books and records of a corporate entity. California broke new ground in 1977 when it said that it would abolish all concepts of legal accounting. It would substitute some straight, common sense ideas as to when a corporation could pay a dividend. A corporation could pay a dividend within the discretion of the board of directors at any time so long as the assets of the corporation equal the liabilities of the corporation with the protective ratio of $5.00 in assets to every $4.00 in liabilities. A very simple concept to understand. There are no longer reduction surplus, earned surplus, all of the notions which lawyers have invented over the years. It's a very simple idea. If we are going to make distribution, whether we make it in money, whether we make it in corporate property to shareholders, we have what is called the ratio of assets to liabilities which must be maintained. This bill adopts what is turning out to be one of the most successful decomplications of corporate life which was done in California. It also follows both

California and now New York in saying that in complying with the law, that so long as a corporation keeps its books and records in a manner which reflects generally accepted accounting principles, he has complied with the law. So we leave to the accounting profession and not to my brothers and sisters-in-law the determination as to what is the best way for that craft and science to proceed to advise. So accounting is left to accountants, but we make a simple value judgment to protect people. It's this ratio of liabilities to assets. Five dollars in assets to four dollars. You can make any distribution you want so long as you do not go below that floor. That, I think, will make it much easier for people determined to comply with the law to do so and make the detection of those few people who are determined to evade the law much easier. Now with regard to Article 5, a major question has been in existence for many years. What are the proper prerogatives of shareholders as opposed to the directors and officers of the corporations? Is it to be an Athenian democracy, or is the better model that you elect the directors and you vest control and management of the corporate entity during the period of tenure of their terms in the individuals? Article 5 has a default provision that the powers of control and management of the corporation are vested in the board. However, a corporation may by the terms of its articles modify this presumption and confer greater prerogatives upon shareholders. If it is going to do that, however, it must do it by an affirmative provision in the articles of incorporation. The thrust of Article 5 is to ensure that shareholders have acess to reliable and up-to-date information as to the condition and record of accomplishment or failure of the people they have elected to be the directors of the corporation. You will notice that for the first time we would standardize notice requirements. Under current law, one of the defects is that we have no standardization of notice requirements. For certain matters, 30 days' notice is sufficient. For others, 40 days is required. Under this bill, notice requirements are standardized, and it should make people who are determined to evade it much easier to ferret out. So again the act reflects the commission's value judgment that the basic policy or power between shareholders on the one hand and directors on the other that the act should specify what should be that ratio or relationship if the parties don't wish to change it. But if they do wish to make a different arrangement, if they put it in the articles they are free to do so. Article 6 deals with the prerogatives and responsibilities of officers and directors. Here I think you'll be very pleased to see that for the very first time we have a statutory definition of the duties of care and duties of loyalty which directors and officers are expected to obey. At the present time in Alaska, it would be a matter of conjecture what the Alaska Supreme Court would eventually say with the content of those important duties. This makes it difficult for an individual who is embarking upon the career of

being a corporate director, perhaps out of accommodation to friends, and many small corporations know exactly what it is I am expected to do, a peril of later on being held accountable for not having done it. Another important feature of this bill which has received wide support by those people who have read it, is Section 435. Section 435 for the first time in Alaska subjects shareholder derivative causes of action to statutory regulation. Alaska presently has the dubious distinction of being one of two American jurisdictions which has no statutory regulation of the derivative suit. This is a suit in which a shareholder comes forward and brings a cause of action that alleges that not I, the shareholder, have been injured but that the corporation has been injured. And I as a shareholder appoint myself to litigate this matter on behalf of the corporation. The tension between the prerogatives of the incumbent directors of the corporation to make that decision and to control that litigation and the rights of a shareholder to say that I am going to elbow my way into the pilot's seat in this plane for the next several years, is a very important one because it may be that there is corruption at the board level. Maybe there is not. I urge your very careful attention to Section 435 to point out that I believe you would find that you would go from having no statutory regulation on this important subject to having one of the most balanced, comprehensive regulations of the subject in this country. Section 435, therefore, is an important innovation. Article 7 is rather technical in nature. It deals with the question of how we go about making amendments and changes to the articles of incorporation. Again, it standardizes procedures and forces the attention of those who wish to change the basic format of a corporation into doing it by way of amending the articles so that there is regularity. And again so that potential investors interested in the corporate entity can look at the articles of incorporation and have not only an historical impression of what the corporation was like in yesteryear, but an accurate, modern impression of where the power within this corporation is currently being distributed. Article 8 is going to be a matter of great interest to your constituents. It deals with what are called organic changes. In essence, mergers; consolidations; share exchanges; sale of all the corporate assets other than in the usual course of business. As each of us is aware, the United States right now is going through what is called a merger craze. Corporations are appearing to be attractive takeover candidates by individuals who may or may not have legitimate desires or desires which would advance the interest of shareholders should they be in a position to seize control of the board of directors. At the present time, Alaska law is very unclear as to the respective roles of incumbent boards as opposed to shareholders. And, therefore, Alaska corporations look vulnerable to individuals who are determined to launch a takeover bid. Article 8 clearly defines the prerogatives of existing management and the shareholders of a corporation with respect to

framing the content of one of these organic changes and taking it through the shareholder approval level. Essentially, what Article 8 does is vest with the existing board the power to frame the terms of a merger, a consolidation, a share exchange, or sale of assets in an extraordinary transaction. And then require two-thirds approval by the shareholders of the corporation in order to approve. This should bring Alaska corporations into line with California and New York and other major states which have moved to protect the integrity of their corporations from being the victims of an easy takeover in which the will of the shareholders and existing management would simply be subverted and brushed aside. Reform needs to be taken in Alaska in this area. I would hope that you would be satisfied with the commission's recommendations which are embodied in Article 8. Article 9, dealing with dissolution, is very important because of the changes that have been made in the federal bankruptcy law. It coordinates with modern federal bankruptcy law and creates for the Alaska judiciary a far more sensible approach to protecting the rights of creditors as well as the rights of senior shareholders in the event that a corporation goes to either voluntary or involuntary dissolution. It also contains some very innovative, and I think, useful provisions that deal with giving shareholders who are being oppressed or frozen out of the role of management or income where other shareholders are being afforded such prerogativees a right in the final analysis to petition for involuntary dissolution in order that the grievance which would have to rise to the level of a very serious grievance to get the attention of Alaska courts. Again, these are not new ideas. They might be the final decision of the Alaska Supreme Court if someone were to spend $100,000 litigating that. But if you enact this bill, all Alaskans with only the expense of supporting their government will have presumptive answers to these important questions. Those are the basic provisions and value judgments which underlie this bill. Both myself and the law students who have assisted me in working with the technicians in this area will be available to any member of either body and staff members. I am prepared now to answer any questions which any members of the committee may have.

RODEY: Mr. Pestinger.

PESTINGER: Thank you, Senator Rodey. Professor Pessler, to me this is a really excellent articulation of the rights and duties and obligations so that it gives our larger corporate participants a clearer understanding of where they stand, which is so essential to doing business. But what I am wondering about, though, is what burden this approach may place upon the smaller mom and pop family corporation. To me, if I had such a business I could not engage in corporate law comfortably without the assistance of counsel. Do you think that this packet necessitates the assistance of counsel as almost a mandate now

for anyone that does business in the corporate form? In other words, I am wondering, I see the need for this in California and New york, and I see the need for this in Alaska with that level of corporations that we deal with. But how about that other level that are just kind of, they get their articles punched out and they ask their lawyer to help them with the minutes, and they look at the Supreme Court that says that the only way you pierce the corporate veil is with an indicia of fraud. So they are using a whole different standard of operation. I mean this is really substantial. Do you think it might have a negative effect on that small family business?

FESSLER: In terms of cost of doing business in the corporate form, I think it will have the opposite effect. Right now, many small businesses probably are coming into corporate existence without the assistance of counsel at all. People are going out and buying little kits for $49.95 that contain forms that they fill in and send to the state. They are oblivious to the legislature's requirement that they file biannual reports to the legislature. They are not doing so. They are in danger of having their articles and their corporate status dissolved by the commission because the legislature has prescribed that as the penalty for not filing reports. And one of the basic difficulties with this situation will always be people who, to use your example, a two-person corporation, decides for one reason or another that they should do business in the corporate form, and then having done that they forget about it. They don't observe any of the formalities of corporate existence. They don't keep separate books and records. They don't segregate their assets from the assets of their corporation. And they don't file reports. Now they would be in trouble under existing Alaska law, sir. They will be in trouble under this bill. In the sense that when the State of Alaska confers a corporate charter on someone, whether or not they have sent $49.95 off to somebody who advertises in every airline magazine, that you don't need a lawyer and you, too, can be a corporation and somehow you will pay no income tax and like me you will turn out being rich. The only person that's probably ever done that is the individual who wrote that book, because he is getting rich by all of the people who write in and send their $50. I think this is the problem you'll want to keep in mind. What I am saying to all of you is that this bill is designed in such a manner that, although it is a complicated subject and I wouldn't suggest anyone could write a corporation code that could be so obvious that an individual could make casual reference to it and never need an attorney so they could guide themselves through the world of maintaining a corporation, this bill does organize the law. It does restate the law. It does have comments which are designed to assist people in understanding the law. Not one of those features can be said about current Alaska law. So there will be a problem of people who incorporate and thereafter regard it as a

little flag of convenience which they'll fly so long as it's useful and which, on the day that it isn't, they'll just forget about it. That will continue to be a problem not only in Alaska, but in Califo .. It's true in Nevada. It's true in Wyoming where I was reared. It's a major social problem we have. People who incorporate with no idea that there are responsibilities as well as privileges for taking on that status. Now, fortunately, the federal tax law which in years gone by caused people to believe that they could pay less income tax by somehow becoming a corporation, have because of movements undertaken first by the administration of President Carter and now of greater emphasis during the administration of President Reagan. As you know, the marginal income tax on individual income has now been reduced from a maximum of 70% now to where it is very close to the top corporate, there is only a two percent spread. But I still find that many people believe that they are going to get some tremendous tax benefit by becoming a corporation. What they do, of course, is eventually wind up in a hellacious tax audit. They find and the individual who wrote the $49 book and gave you the form never accompanies you to that audit because he is living in Bimini.

RODEY: Representative Koponen.

KOPONEN: I was interested in Section 488 which does create a liability for the officers of the corporation, and I'm not up on contract law and one of your notes, in terms of any written contract to modify or eliminate the liability created by this section, what happens to that liability, is it transferred or . . .

FESSLER: Let me explain to all of the members. Section 488, gentlemen, appears at page 67 of the draft in front of you. Section 488 relates also to Rep. Pestinger's question. One of the reasons that people incorporate is to achieve from the State of Alaska a presumption of limited liability. Now this presumption of limited liability means that to all individuals who do business with the entity which is incorporated, they are to look only to the assets which the individuals who incorporated have left with the corporation to satisfy their claim. This is true whether those individuals have made contractual relationships with the corporation or whether they have entered into an accidental injury situation, a tort. Section 488 is called secondary liability of directors and officers. It was reflected after lengthy discussions among members of the commission, a feeling that for small creditors of corporations, employees, tradesmen, materialmen, suppliers, individuals who generally have a credit relationship to a corporation which is not reduced to writing, that these individuals are the year in and year out, these are the individuals who pay the price for corporate existence. When corporations are run so long as it is

convenient to the individuals who find they are the owners and then when they are not, they are simply abandoned. Large institutional lenders, bankers, insurance companies, large contracting creditors, will get a lawyer and go out and they will quote, attempt to pierce the corporate veil. Alaska's common law on the circumstances in which it will disregard limited liability is found in only three cases since statehood. Those cases do not hold out great hope that in the absence of fraud in a transaction that the court would do. But if you have a claim for $1,000 in wages owed to you, there is no lawyer who is going to be able to successfully launch that lawsuit. If you are an individual who sold fish to a restaurant which has now gone out of business, and the owner has marched off leaving you unpaid and it's a $43,000 account receivable, you cannot get any modern recourse at all. Section 488 for the first time to a very limited extent shifts that presumption. It says that the officers and directors of a corporation to the extent that its assets prove insufficient to cover its liabilities, have a liability to a class of individuals who are defined as employees of the corporation as materialmen, tradesmen, etc., people who have extended credit on open account for up to $25,000. Now this liability, sir, is not inevitable. The statute clearly says that if I have a corporation and you have a fishing fleet, and you are supplying my incorporated restaurant with fresh salmon, that you can be approached by me saying I would like you to agree in writing that in the event that this business folds, my restaurant, you won't look to me for the liability which exists under the law. It would be a liability of up to $25,000. That's all you could ever recover under this. So for the first time there would be an incentive in dealing with the smallest people in the marketplace who are the recurrent little mules on which this business of limited liability is ridden out, year in and year out, that these people would have some relief and that there would be an incentive to talk about this question of limited liability. And then if I can convince you that you should give me a relaxation, a waiver of that, that's fine. But in the absence of a contractual modification, I would have the right to this.

KOPONEN: The contract then is between the creditor and the corporation, not between the corporation and its directors.

FESSLER: That's absolutely right. It's between the corporate debtor and its employees, between the corporate debtor and its materialmen or suppliers.

KOPONEN: It's a very useful section. I know there is a major business problem in the Fairbanks area, these collapsible corporations.

FESSLER: Mr. Chairman.

COWDERY: Would the effect of this, would it discourage say qualified managers from getting into taking over a trouble corporation that was having some problems, maybe through a lack of expertise in the past, would this discourage someone from coming in . . .

FESSLER: Well, it would certainly give me pause. Now there are two things relevant, sir, in the bill. First, if the corporation is in a process of dissolution, one of the ways to avoid dissolution under the provisions of this bill is for a court to appoint interim directors in order to resolve deadlocks. Those directors are not subjected to this type of liability. So the director who is brought on board to try and straighten things out by court order is the director who is exempted by the reference in the bill to other than the directors who are appointed pursuant to. Now that is one protection. Another factor, of course, would be that if a corporation is in trouble, and I am going to step in and attempt to save it, one of the things I'd want to do is be aware of Section 488 and go to the creditors and say, I am willing to come into this picture only if you are willing to contract to exempt me from any personal liability that I would incur. Yes, sir, it would be something that in the hypothetical you advance an individual would want to take into consideration.

RODEY: If I might interject, that would apply to directors but not to employees of the corporation?

FESSLER: It has no application to employees at all. In fact, I should tell you that this appears to be very novel, and I want you to understand that it has a great quality of being novel. But New York has never given total limited liability to anyone. And if anybody tries to come to you and say, my God, if we adopt this the wheels of commerce will grind to a halt. Since 1843 when New York adopted the first general incorporation statute, the ten largest shareholders in a New York corporation are subjected to liability in the event the corporate assets prove insufficient to the claims of all employees. New York has never stricken that from the books, and it has not prevented the development of the State of New York as a center of commerce. What we did here, was to say that in many Alaskan corporations we didn't want to have the liability on the ten largest shareholders because that might include many very passive people who really have nothing to do with the way in which the business was run. So put the liability on the people who are being paid, the officers, the president, and the secretary and the treasurer. They are the defined officers and the directors. They are not passive, or they oughtn't to be. So that is how we would differ from New York law. And we have broadened the exposure, because in New York the exposure is limited to claims of employees, and we broadened it to include the claims of materialmen and

suppliers.

COWDERY: In the past we have had some of the Native corporations who have had financial troubles and hired two people to direct them and turn it around. And this is an area I was wondering about, if that would be . . .

FESSLER: I appreciate the question. It is an important matter. The AFN subcommittee has looked into this question. I think that at that level, or at the level of any large corporation that is involved in an attempted turn around, that there would be awareness of the provisions of Section 488 and that there would be appropriate advice from counsel to deal with the subject. That would be my hope.

BROWN: Mr. Chairman, may I suggest . . .

RODEY: Mr. Brown.

BROWN: I am Fred Brown. It's nice to know that Labor and Commerce [garbled] . . . The one example you might think of is what would really happen . . . the example might be one of the most prosperous, currently most prosperous Alaska corporation is Alaska International Air. Originally, that was Interior Airways based out of Fairbanks. They expanded too fast for the building of the pipeline, which didn't get built fast enough as many Alaskans remember. What happened then was, and this sort of thing is really what happens when a corporation gets into trouble in most cases, and that's why I'm raising this as an example. What happened then was they went into reorganization and the creditors and shareholders hired Mr. Duncan McClaren, a legend in the Canadian air industry, a great manager and a legendary worker [TAPE CHANGE] . . . Section 488 to take care of that problem.

RODEY: Thank you, Mr. Brown. This is a problem currently in Alaska. It is possible for individuals who incorporate to run up all sorts of bills, not pay its creditors, and then just move away from that corporation, will eventually be resolved by the state, set up another corporation and then bilk a lot of small tradesmen who work for the corporation, creditors, what have you, move on. You can do it in serial fashion. It is currently being abused presently in the state. Mr. Abbott has kept an eye on this, has had a practice in that area of the law for 15 years. But it is currently a problem. There are a lot of honest Alaskans who lose money because of this problem.

FESSLER: And I think the problem is also that it has a broader ramification. To the extent that citizens get the impression that there are tricks out there for people who are in with lawyers, if you will. It demeans my profession of which I am very proud. We were never the source of this value judgment,

that people could pull this type of thing. But to the extent that people believe that if you quote, know the law, you can do bad things and get away with it. You can do hurtful things and have no accountability. It creates an impression of the law which none of us have an interest in seeing furthered in the minds of citizens. Because the minute one law becomes suspect like this, the cloud falls over all law. And so this is probably the most important value judgment about corporations. They have done great things for us. But the idea of a one-person corporation, and the only person that probably has pulled off that role real well in history, was Louis the Fourteenth and a tremendous price was paid for that notion.

UEHLING: If we can kind of go back to the section regarding the foreign corporations, maybe you could explain what the Alaska Code Revision Commission took as far as an approach as a comparison of what occurred in California regarding the foreign corporation situation there.

FESSLER: Because California has this basic social problem that in order to evade the restrictions on long-term director terms or in order to have a board classify itself, most important California business, most corporate business at the moment in my state, is foreign incorporated. Runs to a different jurisdiction and comes back home and says we've been gone 20 minutes, and we are now a foreign corporation, we're a Delaware corporation. The basic social problem we had in California when we approached the revision of the legislation was to say, well, will we give up these value judgments which we've had for many years. And the bar association, frankly, and the banking industry thought that's what was going to happen. That we were going to get a corporation law that looked more like that of other states. What the legislature did, interestingly enough, and I think it remains to be seen because it's costing us a lot of money in litigation in front of the federal supreme court, was to say, no, if a corporation has a certain percentage of its employees in California, does a certain volume of business in California, has a certain amount of its ownership owned by shareholders in California, then even though it purports to be an Alaska corporation or a Delaware corporation, we're going to say that it's merely a pseudo foreign corporation, and we're going to apply California's laws to it. Now the Arden-Mayfair litigation is pending in the California Supreme Court where it has been on hold for nearly three years. Delaware's courts have already litigated the Arden-Mayfair case and come to the conclusion that California was attempting to deny full faith and credit to the public acts of a sister state. Ultimately, the federal supreme court will have to decide whether California's notion of pseudo foreign corporations is an idea whose time has come. The judgment of the commission was that there are no pseudo foreign corporation concepts in this bill. Instead, we increased the

reporting obligations on foreign corporations to keep us informed of the nature of their activities. We greatly increased the circumstances under which it's clear that they must seek a certificate to do business in the State of Alaska. But we have not attempted to interfere with their internal control and management such as California has done, because we haven't done it to our own people. We haven't said you have to have a board with one-year terms, that you can't classify the board, that you have to have cumulative voting. Our default mode if you don't say is, you do have one-year terms, if you do have cumulative voting and you don't have b[illegible]ssification. But we didn't feel that it was necessary to [illegible]olved in that position. But later on in what may be five [illegible]ears as you see the outcome of the Arden-Mayfair matter, [illegible]a if you decide you want to adopt certain similar rules, t[illegible]ld be an appropriate time to do that. But there is nothing n[illegible] now that contains that.

BROWN: At least some of the members of the commission think the Delaware view is going to prevail in the state supreme court, and that's one of the reasons why the provision is written that way.

RODEY: Thank you, Mr. Brown.

UEHLING: This is a follow up question. And in just sort of reading through this I got the feeling what would be the situation like if you took a state like Delaware where we had a situation where companies are going to incorporate ther because it's a very pro-management kind of situation, where in California it's very pro-shareholder, the shareholder is a completely different situation, how does Alaska rate on that spectrum? Would they be considered a very pro-management situation?

FESSLER: No. The default provisions, ever since I learned to use the personal computer, I've picked up the jargon, excuse me. The provisions that are in place if you don't say otherwise of the Alaska statute today, because it's a version of the early '50's model act would today be called a pro-shareholder jurisdiction. And the provisions which would lock into place in the absence of agreement that they be otherwise under this bill are also pro-shareholder provisions. But so that Alaska would in the default mode line up looking very much more like California than Delaware. But it would be possible for people to make an intelligent and informed decision to form a very, very management oriented, reduced role for shareholder corporation, not going as far as Delaware has gone. For instance, a good example in Delaware, it is possible that the board of directors would have the exclusive power to amend the articles and bylaws, and the shareholders could be ousted from any role at all. That would not be possible in Alaska. It isn't possible under current law with regard to the articles. It would not be possible with

regard to the bylaws should the legislature enact this bill. So it continues to leave Alaska law with most other western jurisdictions as having a pro-shareholder bias, but not going nearly as far as California.

RODEY: Are there other questions from members of the committee? If there are . . .

FESSLER: I'll remain in the room, Mr. Chairman, in case anyone does have any questions for me, but there are other witnesses desiring to appear.

RODEY: The next witness is Willis Kirkpatrick, the director of the division of banking and securities.

KIRKPATRICK: Mr. Chairman and committee members. My name is Willis Kirkpatrick. I am director of banking and securities for the State of Alaska. I'd first like to say that we have appreciated the opportunity to join with the commission as a participant in discussion in their work. I believe that any of the concerns the state has had as far as the administration of this new code, the commission has known up front as to what the problems we've had. One of the things I'd like to point out is that what I am excited about in their work is that in a present situation where we have an old Oregon law, in a situation where we have very little, if any, state common law court cases the administration of the provisions of the Alaska Business Corporations Code as it stands today is somewhat suspect in some of its legislative intent. And to determine legislative intent, we go back to Oregon law, we go back to Oregon cases, we go back to the sparse official comments under the model code. With the passage of this bill, I think that our work as far as working with the corporations in maintaining their files is going to be a whole lot easier because of the official comments alone. Everything has been addressed. I would suggest that in considering the passage of this bill, that they make part of the record the official comments as to the new law. There is only one particular area that I have a problem with, and that is in Section 733 on page 127, in the filing of foreign corporations to do business in the State of Alaska. On line 7, beginning on line 7, it requires that together with a certified copy of its articles of incorporation all amendments to the articles . . . In other words, what they are saying here is that one of the provisions for a foreign corporation to qualify to do business in the State of Alaska, is that it would have to file its articles with the state and any amendments to those articles. In a hearing last session, we brought this up and I believe, you'd have to check with the code revision commission on this, but I believe it was agreed upon that they would reconsider that requirement to file articles. At the present time articles of foreign corporations are not filed with the state. We find that

some of our sister states, those that do have this provision, are looking at dropping them, I think the last one we've heard from is Texas. Now I don't believe that it is going to create any hardship to anybody in the State of Alaska that wishes to find out the substance of the articles of a foreign corporation. First of all, if they are looking for the officers and directors of the foreign corporation, we can look at the application they file with us giving us that particular information. If they do want a copy of the articles of incorporation or the amendments to the articles of incorporation of a foreign corporation, the place that would have the most current filing would be the state of domicile so that they are available. We would be more than happy to assist anybody that wanted that to find out the proper procedures to obtain those records. With my understanding that this provision, that the code revision commission had no particular problem with that being dropped, the fiscal note that I prepared was zeroed out. If this provision stays in, I am going to ask for a revision of the fiscal note because one of the problems we have now is just file maintenance. The biggest problem in file maintenance is amendments to articles. We receive a great number of amendments to articles every day, and one of the things we have to do is that we just don't file the amendments. A lot of times we have to look back through the files to see what the prior articles contain to see amendments are consistent. If nothing more than article order. That is the only comment that I have as far as any changes are concerned, and I am sorry I don't have an amendment prepared, but I would be most happy to. I would replace that word with a certificate of compliance executed by the officer of domicile, or the official of domicile. I am open to any questions.

RODEY: If I might ask either Chairman Abbott or Professor Fessler to respond.

ABBOTT: Yes, Mr. Chairman. We had previously agreed with Mr. Kirkpatrick that we would make that change. Unfortunately, consideration of this matter came up after the bill was printed. So it is the position of the commission that this requirement should be deleted when it was brought to our attention that it would serve no useful purpose and would impose an additional fiscal burden on the commissioner of commerce. We are in complete agreement that the provision should be deleted, and there should be no requirement to file foreign articles or amendments.

RODEY: Thank you, Chairman Abbott. Mr. Brown.

BROWN: On behalf of the commission, I am sure they would agree, it would be very nice if Professor Fessler were involved in structuring the amendment that the committee might be interested . . .

RODEY: That's a very good suggestion, Mr. Brown. Professor, would it be possible for you to prepare that amendment?

FESSLER: Certainly.

RODEY: Mr. Kirkpatrick, continue.

KIRKPATRICK: One other item that my notes show. On page 138 and 139, on line 28 of page 138 it refers to the misdemeanor, and my staff says that it should be either a rated misdemeanor A or B to be consistent with Title 9. And the same with line 9 on page 139. That also relates to a misdemeanor.

RODEY: If I might address Chairman Abbott or Professor Fessler, are we in that case talking about a Class A misdemeanor?

ABBOTT: That's our understanding, Mr. Chairman. Yes.

RODEY: If again I could request you, Professor Fessler, to prepare the appropriate amendment based on current Alaska criminal law.

FESSLER: The question has been asked, has been prepared, is one of the amendments that Chairman Abbott was referring to is being transmitted . . .

RODEY: Thanks, Professor. Obviously we can't take any official action here. If there are any questions, we'll have this prepared and delivered to committees on both sides for their consideration and Senator Hulcahy and myself will explain it on our side and . . .

COWDERY: Could I, I was wondering what financial burden would this, if we adopt this to the existing corporation for the state, would it be to conform, is there any grandfathering situations . . .

KIRKPATRICK: If I understand your question, Mr. Chairman, as to what this is going to do to existing corporations. I think the last two sections of the bill pretty well cover a timely transfer of the act, and I think we are gong to have some problems just as far as educating the corporations in switching them over. I don't see that a lasting problem. I don't see it as much more of a problem than we have now with the new corporation that is coming on board. I don't think there will be an financial, I think the problem is going to be basically on the state's side as far as getting the information out and getting the transition going. I don't envision any

economic problem on the corporation. I am wondering about correspondence fees, but . . . I don't see it as a major problem.

RODEY: I just might add that the proposed draft was written to reduce legal fees by putting a great element of certainty in there so that a layman would have a much greater understanding of the law just by reading the law without having to consult a lawyer. So I think there will be actually a reduction of attorney's fees. Are there any other questions for Mr. Kirkpatrick? If none, thank you very much Mr. Kirkpatrick. We do have floor session now at 10:00 a.m. We don't go in until 11:00 o'clock on Mondays, as a convenience to the Anchorage legislators. Would you like me to stay?

ABBOTT: Mr. Chairman, if I might, there are only two other people that intend to offer brief testimony. That's Liz Johnston and Irv Bertram.

RODEY: In consultation with House chairman, I will stay here if Senator Mulcahy is agreeable and listen to the comments of Elizabeth Johnston and Irv Bertram and then report to you, sir. Thank you, gentlemen. Next, I'd like to call Elizabeth Johnston. It's always disconcerting to be testifying and have everybody leaving. But, Senator Mulcahy and I will make up for any absence of numbers. You have the floor, madam.

JOHNSTON: Gentlemen. My name is Elizabeth Johnston. I'm general counsel to Bristol Bay Native Corporation. Today I am here speaking on behalf of the Alaska Federation of Natives concerning the bill on the revision of the corporate statutes, the profit corporate statutes. You will be delighted to know my comments will be brief. This is because we have had extensive opportunity to present our concerns before the code revision commission. By way of background, I can tell you that in the summer of 1982, the Alaska Federation of Natives created a subcommittee. And the member of the subcommittee had both regional and village corporation backgrounds, and the committee was created to review and testify on the proposed revision. We met with the code revision commission on three separate occasions and made extensive comments. Based on the receptivity of the commission to our comments, and the way they were able to meet our concerns, in April of 1983 Janie Leask, who is the president of the federation, wrote in support of the proposed revision. And she commented specifically on the quality of the new legislative scheme, on the technical commentary which has already been brought up by some of the other people. But the fact there there is technical commentary to back up the new code which should help all of us in the absence of court cases to understand the legislative history. The fact there there is this kind of backup, we feel will mean it will reduce the legal expenses for

the Native corporations. We also articulated, commented on the finance section, that it was an important reform. Unlike Professor Fessler I can read numbers, and I still feel that it is a significant accomplishment. I was forced to. So finally the only final comment is that this is a bill which does strengthen the rights of shareholders and does strengthen the requirements of periodic reporting by corporations to their shareholders. It is a pro-shareholder document, and the federation supports the revision.

RODEY: Senator Mulcahy, do you have any questions for Miss Johnston? Thank you, appreciate your coming. Next I'd like to call Irv Bertram.

BERTRAM: I'm Irv Bertram, and I am assistant counsel to Alaska Airlines. We have looked at the bill and discussed it with the commission to raise some of the concerns we have. Our bylaws and articles go back to 1938, at least the articles do. The bylaws have been changed on numerous occasions. And we did have some concerns, but we found that the commission has made some changes that will assist us in going forward. We think that the bill is very well drafted and very good and will be of benefit to the state as well as being helpful to us. In my current position as house counsel, I have an opportunity to advise management or answer questions about Alaska law. I have practiced in Alaska for a number of years before joining the airlines, and you don't feel so foolish when you have something layed out in front of you in the law. You can look at it and say, well, this is how it's done. Currently Alaska law on corporations has a number of areas where simply there is no law. And so you really have to say, gee, I don't know, maybe we can do it and maybe we can't. It's . . . you're not sure how to do something. But I think the bill answers that. It does provide a very well layed out road map, so to speak, which I think will be very helpful not only to large corporations such as ourselves, but I also believe this will be helpful to the small mom and pop operations. There is that old trite saying that ignorance of the law is no excuse. However, when the law is a body of common law with very few statutory references, it makes it fairly difficult to know what's going on. On the other hand, once things have been layed out in a fairly succinct form that can be followed, it's true a lawyer may still be required and should be used. But I think most people will have a better understanding of what corporate governess should be once they have this body of law in front of them. So we think it would be good for the state. Alaska Airlines will have to make one change in its bylaws as a result of this. It doesn't address everything we wanted. But on the other hand, we think on the whole it is very good and we do support it and would recommend it. Thank you.

RODEY: Thank you very much, Mr. Bertram. Senator

Mulcahy, do you have any questions? I am aware of the . . . if there are no other comments, Mr. Brown.

BROWN: One comment, Mr. Chairman. There have been much comment about the comments, and the people who are supporting the bill who are now part of the commission, are finding that the comments are very important. I would hope an admission to the members of the Senate and the House in the event this bill is considered, that an action be taken similar to what was taken when the criminal code revision was passed. And that is there be specifically an affirmative vote on the floor of each house approving the comments or the comments as you may have amended in concert with the commission to make a clear and unambiguous legislative history. To really make sure those are available and that they are important legislative history, since they will be relied on by people in the private sector as well as scholars.

RODEY: Thank you, Mr. Brown. That's a very good suggestion. Obviously it's wise. It's an area of law we don't know much about in terms of importance, and whether a separate vote on that really means much or not.

BROWN: Take it from Alaska's only published legal historian.

RODEY: And a distinguished member of the Fairbanks bar. I think it is a wise suggestion to incorporate in the journal and to vote separately and affirmatively on the commentary. I think it is a good and desirable method of annotating Alaska laws. It is certainly preferable to allowing Michie Company to do it back east. If there are no other comments, the committee meeting is adjourned.

ALASKA CODE REVISION COMMISSION

ALASKA STATE LEGISLATURE
POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
(907) 465-4878

MEMORANDUM

TO: Representative John Cowdery, Chairman
House Labor and Commerce Committee

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

DATE: February 3, 1984

RE: Amendments to HB 343/SB 246 on for profit corporations

The subcommittee appointed by the Alaska Federation of Natives to work on the corporations bill has proposed these changes in the proposed amendments I transmitted to you on January 31, 1984: Those members of the code revision commission that could be polled by telephone have agreed that the changes are acceptable.

(1) CHANGE:

Page 12, line 27-29: In the previously proposed amendment change "January 1, 1983" to "March 24, 1982".

EXPLANATION: A relatively recent date is needed, but the specific date chosen is not of importance. The date of first introduction of the Alaska Corporations Code as a bill in the legislature is a date used elsewhere in the bill. Using it here is simply to avoid using many different dates in the bill.

(2) CHANGE:

Page 56, following line 28: In the previously proposed amendment, change "January 1, 1971" to "March 24, 1982".

EXPLANATION: The bill provides that staggered terms of directors must be provided for in the articles of incorporation. The effect of the change is that a provision in a corporation's bylaws providing for staggered terms of its directors would be valid if the provision was in the bylaws before a recent date--the date of first introduction of the Alaska Corporations Code bill in the legislature, March 24, 1982.

In other words, the amendment would make this provision of the bill prospective, keeping in effect valid bylaws on staggered terms; however, no corporation would be able to hurriedly enact bylaws now, simply in anticipation of passage of this bill.

(3) CHANGE:

Page 149, line 12, following the period: In the previously proposed amendment, following "section" insert "prior to December 19, 1991,".

EXPLANATION: The amendment as previously proposed was overbroad. Its only purpose was to conform to a requirement of Section 30 of the Alaska Native Claims Settlement Act, a copy of which is attached. The reason for the change will be clear by reference to the attached Section 30 of ANCSA.

Retyped with these three changes, the proposed amendments are attached.

- -

An identical text to the foregoing with the same attachments was sent to Senator Eliason, chairman of the Senate Labor and Commerce Committee. A hearing was held by Senate Labor and Commerce on the bill February 2, 1984, and the revised amendments were adopted in the form attached to the memorandum.

The committee voted the bill out as a committee substitute and adopted a statement of intent containing the two small changes in the commentary on the bill, as previously provided you. The statement of intent is also attached as it was adopted in the Senate committee.

Please note that the attached amendments are a retyping of the amendments previously provided you, with the changes explained in this February 3 memorandum.

SAVING CLAUSE

SEC. 26. To the extent that there is a conflict between any provision of this Act and any other Federal laws applicable to Alaska, the provisions of this Act shall govern.

SEPARABILITY

SEC. 27. If any provision of this Act or the applicability thereof is held invalid the remainder of this Act shall not be affected thereby.

TEMPORARY EXEMPTION FROM CERTAIN SECURITIES LAWS

SEC. 28. Any corporation organized pursuant to this Act shall be exempt from the provisions of the Investment Company Act of 1940 (54 Stat. 789), the Securities Act of 1933 (48 Stat. 74), and the Securities Exchange Act of 1934 (48 Stat. 881), as amended, through December 31, 1991. Nothing in this section, however, shall be construed to mean that any such corporation shall or shall not, after such date, be subject to the provisions of such Acts. Any such corporation which, but for this section, would be subject to the provisions of the Securities Exchange Act of 1934 shall transmit to its stockholders each year a report containing substantially all the information required to be included in an annual report to stockholders by a corporation which is subject to the provisions of such Act. (Added January 2 1976, P.L. 94-204 §§ 3, 18, 89 Stat. 1147, 1156)

RELATION TO OTHER PROGRAMS

SEC. 29. (a) The payments and grants authorized under this Act constitute compensation for the extinguishment of claims to land, and shall not be deemed to substitute for any governmental programs otherwise available to the Native people of Alaska as citizens of the United States and the State of Alaska.

(b) Notwithstanding section 5(a) and any other provision of the Food Stamp Act of 1964 (78 Stat. 703), as amended, in determining the eligibility of any household to participate in the food stamp program, any compensation, remuneration, revenue, or other benefit received by any member of such household under the Settlement Act shall be disregarded. (Added January 2 1976, P.L. 94-204 § 4, 89 Stat. 1147)

MERGER OF NATIVE CORPORATIONS

SEC. 30. (a) Notwithstanding any provision of this Act, any corporation created pursuant to section 7(d), 8(a), 14(h)(2), or 14(h)(3) within any of the twelve regions of Alaska, as established by section 7(a), may, at any time, merge or consolidate, pursuant to the applicable provi-

sions of the laws of the State of Alaska, with any other of such corporation or corporations created within or for the same region. Any corporations resulting from mergers or consolidations further may merge or consolidate with other such merged or consolidated corporations within the same region or with other of the corporations created in said region pursuant to section 7(d), 8(a), 14(h)(2), or 14(h)(3).

(b) Such mergers or consolidations shall be on such terms and conditions as are approved by vote of the shareholders of the corporations participating therein, including, where appropriate, terms providing for the issuance of additional shares of Regional Corporation stock to persons already owning such stock, and may take place pursuant to votes of shareholders held either before or after the enactment of this section: *Provided,* That the rights accorded under Alaska law to dissenting shareholders in a merger or consolidation may not be exercised in any merger or consolidation pursuant to this Act effected prior to December 19, 1991. Upon the effectiveness of any such mergers or consolidations the corporations resulting therefrom and the shareholders thereof shall succeed and be entitled to all the rights, privileges, and benefits of this Act, including but not limited to the receipt of lands and moneys and exemptions from various forms of Federal, State, and local taxation, and shall be subject to all the restrictions and obligations of this Act as are applicable to the corporations and shareholders which and who participated in said mergers or consolidations or as would have been applicable if the mergers or consolidations and transfers of rights and titles thereto had not taken place: *Provided,* That, where a Village Corporation organized pursuant to section 19(b) of this Act merges or consolidates with the Regional Corporation of the region in which such village is located or with another Village Corporation of that region, no provision of such merger or consolidation shall be construed as increasing or otherwise changing regional enrollments for purposes of distribution of the Alaska Native Fund; land selection eligibility; or revenue sharing pursuant to sections 6(c), 7(m), 12(b), 14(h)(8), and 7(i) of this Act.

(c) Notwithstanding the provisions of section 7 (j) or (m), in any merger or consolidation in which the class of stockholders of a Regional Corporation who are not residents of any of the villages in the region are entitled under Alaska law to vote as a class, the terms of the merger or consolidation may provide for the alteration or elimination of the right of said class to receive dividends pursuant to said section 7 (j) or (m). In the event that such dividend right is not expressly altered or eliminated by the terms of the merger or consolidation, such class of stockholders shall continue to receive such dividends pursuant to section 7 (j) or (m) as would have been applicable if the merger or consolidation had not taken place and all Village Corporations within the affected region continued to exist separately.

(d) Notwithstanding any other provision of this section or of any other law, no corporation referred to in this section may merge or consolidate with any other such corporations unless that corporation's shareholders have approved such merger or consolidation.

(e) The plan of merger or consolidation shall provide that the right of any affected Village Corporation pursuant to section 14(f) to withhold consent to mineral exploration, development, or removal within the boundaries of the Native village shall be conveyed, as part of the merger or consolidation, to a separate entity composed of the Native residents of such Native village. (Added January 2 1976, P.L. 94-204 § 6, 89 Stat. 1148)

ASSIGNMENTS OF RIGHTS BY REGIONAL CORPORATIONS

SEC. 31. (a) Notwithstanding the provisions of section 3477 of the Revised Statutes, as amended (31 U.S.C. 203), the Secretary is authorized to recognize validly executed assignments made by Regional Corporations of their rights to receive payments from the Alaska Native Fund. Such assignments shall only be recognized to the extent that the Regional Corporation involved is not required to distribute funds pursuant to subsection (j) or (m) of section 7 of this Act.

(b) The Secretary shall not recognize any assignment under this section which does not provide that the United States reserves the right to assert against the assignee and successors of the assignee, any setoff or counterclaim which the United States has against the assignor Corporation.

(c) No stockholder of any Regional or Village Corporation shall have any claim against the Secretary or the United States as the result of any assignment duly recognized by the Secretary pursuant to this section. (Added November 15 1977, P.L. 95-178 § 4, 91 Stat. 1370)

ALASKA STATE LEGISLATURE - SENATE

COMMITTEE ON LABOR AND COMMERCE

SENATOR RICHARD I. ELIASON
CHAIRMAN

POUCH V • JUNEAU, ALASKA 99811
(907) 465-3844

OFFICIAL BUSINESS

LETTER OF INTENT

It is the intent of the Senate Labor and Commerce Committee that the detailed commentary accompanying S.B. 246, House and Senate Joint Journal Supplement No. 11, be considered a comprehensive guide to the proposed new Alaska Corporation Code and as such should be amended and revised accordingly if any changes are made to S.B. 246.

The following narrative changes reflect the amendments adopted in CSSB 246 (L&C).

(At page 89 of the House and Senate Joint Journal Supplemental for April 8, 1983, the Official Comment to Section 388 should be amended to read):

Official Comment to ACC Section 10.06.388. ACQUISITION OF CORPORATION'S OWN SHARES; REISSUANCE OR RETIREMENT.

SCOPE: ACC sec. 388 specifies the treatment to be given redeemed or repurchased shares. They revert to the status of authorized but unissued shares unless the articles of incorporation prohibit reissuance. If reissuance is prohibited, the article stating the number of authorized shares must be amended to reflect the lowered number. Such an amendment of the articles must be filed with the commissioner. Shareholder approval of the required amendment is not necessary.

While sec. 388 abolished the antiquated accounting concept of "treasury shares", nothing in this section is intended to prejudice the present or contingent contract rights which pre-ACC corporations may have created in reacquired shares described as "treasury shares."

CHANGE IN FORMER ALASKA LAW: ACC sec. 388 is taken from GCL Section 510. It continues prior Alaska law (former AS 10.05.312-345) in requiring a filing with the commissioner of an amendment to the articles. It departs from and simplifies prior law by the elimination of the concept of "treasury shares."

(At page 123 of the House and Senate Joint Journal Supplement for April 8, 1983, the Official Comment to Section 455 should be amended to read):

Official Comment to ACC Section 10.06.455. CLASSIFICATION OF DIRECTORS.

SCOPE: Sec. 455 provides for optional classification of a board consisting of a minimum membership while taking steps to preclude the adoption of such a scheme for a corporation which has not eliminated cumulative voting from adopting such a classification scheme by amendment if shares sufficient to elect one director under cumulative voting oppose such amendment. Sec. 455 replaces former AS 10.05.186.

CHANGE IN FORMER ALASKA LAW: Sec. 455(a) is an enactment of Model Act Section 37 and works an important change from former AS 10.05.186 respecting the election to classify the board. Under prior Alaska law this decision could be taken by a bylaw adopted by the board without shareholder participation. The danger to minority share representation in such circumstances led to subsection (a)'s requirement that the election be taken in the articles, which insures shareholder participation.

Subsection (b) is new. Continuing the concern for minority share representation on the board of a corporation which has not eliminated cumulative voting, sec. 455(b) precludes amendment of the articles to classify the board if the number of shares voting "no" on the amendment or refusing to consent in writing would be sufficient to elect one director if voted cumulatively at an election of the entire board.

Subsection (c) is new. It permits board classification pursuant to the terms of a provision on the bylaws rather than the articles of incorporation. In order to classify a board under sec. 455(c) it is necessary that the bylaw have been adopted prior to March 24, 1982 with or without shareholder participation, and that it contains nothing which, were it a provision in the articles of incorporation, would offend sec. 455(a). Thus, all of the restrictions on the minimum size of the board, the minimum number of classes, and the terms of the director office set forth in sec. 455(a) limit the terms of any bylaw which would be effective under sec. 455(c).

Dear Representative Furnace:

You had asked Arthur Snowden to provide comments about the anticipated impact on the courts of HB 343, revising the Alaska Corporations Code.

Carole Baekey, Judicial Education Coordinator for the court system, has extensive background in corporate litigation. Ms. Baekey reviewed the proposed bill in detail; her comments are attached. Based upon her comments, the court system concludes that the superior court will not be substantially burdened by passage of this bill.

Thank you for the opportunity to submit comments. If you have any questions or concerns, please let me know.

Sincerely,

Karla L. Forsythe

TO: Karla Forsythe
General Counsel

DATE : February 1, 1984

FROM: Carole A. Baekey
Judicial Education Coordinator

SUBJECT: House Bill No. 343, Revisions of the Alaska Corporation Code

You requested that I review House Bill No. 343 and its commentary, with a view to any increased burden on the court system.

Generally, House Bill No. 343 strives for greater clarity and flexibility with respect to corporate organization and operation. The bill contains several new legal concepts which could give rise to interpretation in superior court. Historically, when a statute containing new standards or legal concepts is developed, cases are brought to interpret the statute. I have briefly outlined the provisions of the proposed Alaska Corporation Code which could conceivably alter the court's burden. Only issues which might affect court caseloads have been addressed. From this overview, it does not appear that the superior court would be substantially burdened by enactment of the proposed Alaska Corporation Code.

The proposed provisions which have the potential to affect causes of action filed in superior court are highlighted below:

1. Proposed A.S. 10.06.358-365, inclusive:

These proposed sections address a corporation's distribution of corporate assets, usually in the form of dividends, and imposition of restrictions to prevent the dissipation of corporate assets by an insolvent corporation. The specific problem addressed is the distribution of dividends by a corporation to shareholders, after which the corporation is unable to meet its obligations to creditors or to meet its contractual preferences to holders of senior share of stock.

Existing A.S. 10.05.201 imposes an "equitable insolvency test" upon distribution of dividends. This test is the "inability of the corporation to pay its debts as they become due in the regular course of business." This test is also imposed upon existing A.S. 10.05.309 setting forth the restrictions on the redemption or purchase of redeemable shares. (It should be noted that page 76 of the March, 1983 commentary of the Alaska Code Review Commission refers to this

restriction in A.S. 10.05.012, which section does not exist in the present corporation code. Perhaps this is a typographical transposition referring to either existing A.S. 10.05.201 or A.S. 10.05.210.)

Existing A.S. 10.05.369 imposes a second accounting method, "use of capital surplus to reduce losses," upon distribution of dividends. As the commentary notes, existing A.S. 10.05.369 permits the board of directors to eliminate an operating deficit by simply writing down or reducing capital surplus. Any subsequent net profits could then be charged against stated capital or capital surplus and distributed as earned surplus notwithstanding the former deficit. The danger here is that dividends to common or junior shareholders might be distributed by a corporation so as to prejudice the ability of the corporation to meet its debts or dividend obligations to senior shareholders in subsequent accounting periods.

Each of the equitable insolvency tests and the use of capital surplus to reduce losses is reflected in existing A.S. 10.05.204 - payment of dividends, A.S. 10.05.207 - distribution in partial liquidation and A.S. 10.05.210 - payment of accumulated dividends out of capital surplus.

The commentary covers these issues in depth and this brief sketch is to frame the major change in accounting methods in the proposed law. Assuming a corporation is equitably solvent as defined in proposed A.S. 10.06.360, proposed A.S. 10.06.358 permits licit distribution of dividends if: (i) the distribution is made to the extent of retained earnings, or (ii) the distribution is in satisfaction of (a) the "ratio/assets surplus test" which requires that the assets of the corporation are equal to one and one-fourth of its current liabilities and (b) current liquidity requirements are met. Unlike the existing law, there are no exceptions to the stated requirements.

Proposed A.S. 10.06.360 would give limited protection to preferences of senior shares by forbidding any corporate distribution which would raid corporate assets. Proposed A.S. 10.06.365 restricts the board's authority under proposed A.S. 10.06.358 to make a distribution on junior shares unless certain requirements are met; the goal is to impose restrictions designed to protect shares with a dividend preference.

In short, proposed A.S. 10.06.358-365, inclusive, is a change in accounting procedures to clarify and strengthen standards for distribution of assets, namely dividends. If the proposed legislation becomes law, undoubtedly cases will be brought to test the law. That is the function of the court. However, it should be noted that proposed A.S. 10.06.358-365, inclusive, is an attempt to protect shareholders by simplifying accounting procedures and getting rid of numerous exceptions enabling corporations to dissipate assets. This simplification could conceivably reduce complex corporate litigation.

The only apparent lack of clarity I perceive is in proposed A.S. 10.06.363 which does not protect liquidation preferences when a distribution is made to either shares of the same class or series or to a class with superior preferences upon liqudation. Inequities could easily be remedied by proper corporate planning done by counsel. In any event, this provision is not likely to result in a flood of litigation.

2. Proposed A.S. 10.06.378.

This proposed section addresses shareholders who receive any distribution of corporate assets with knowledge of facts indicating the impropriety of the distribution. The commentary notes a shareholder would be liable "if a reasonable person in like circumstances exhibiting reasonable effort would have recognized an indication of impropriety in the distribution." Any suit would be brought in the name of the corporation and a shareholder's liability under this section would be brought for the amount received by the shareholder with interest at the legal rate on judgments until paid.

This proposed section, new to Alaska law and a new cause of action, is an extension of liability in existing A.S. 10.06.225(a). Present law provides that a director against whom a claim is asserted for the payment of distribution of assets is entitled to contribution from shareholders who knowing a payment to be illicit took it. Existing A.S. 10.05.225(a) is in the proposed code as A.S. 10.06.480(b).

3. Proposed A.S. 10.06.405.

This proposed section would require that shareholders of a corporation meet annually. If management defaults in the calling of an annual meeting, under proposed A.S. 10.06.405(b), on the application of a shareholder, the superior court may order a meeting held.

This is a new remedy for an aggrieved shareholder, giving rise to a new statutory cause of action in superior court.

4. Proposed A.S. 10.06.425.

This proposed section which would explicitly permit the formation of voting trusts and agreements among shareholders has its genesis in existing A.S. 10.05.171. As the commentary notes, A.S. 10.06.425(b), by not being more specific, leaves to common law development the development of limitations upon agreements between or among shareholders which fall short of a voting trust.

Clearly, under this proposed section courts could be called upon to determine what, short of a voting trust, constitutes a valid agreement of shareholders. Irrespective of the proposed changes, this issue historically has been and would remain a proper cause for determination in superior court. Therefore, no measurable change would seem to be wrought.

5. Proposed A.S. 10.06.430.

This proposed section has its origins in existing A.S. 10.05.237-249, inclusive, addressing inspection of books and records. Proposed A.S. 10.06.430 strengthens the penalties for restricting and refusing inspection, but creates no new cause of action.

Irrespective of the increased penalties for restricting or refusing inspection of books and records, this issue is presently within the domain of the superior court. Therefore, no measurable change would be wrought by the increased penalties.

6. Proposed A.S. 10.06.433.

This proposed section would establish a corporation's obligation to prepare and send an annual report to shareholders. No similar requirement exists in the present law Therefore, this proposed section would create a new obligation of domestic and foreign corporations to shareholders. This obligation would be enforceable by superior courts.

While this section gives rise to a new corporate obligation and thus a new cause of action, it is inconceivable that this would create a flood of litigation.

7. Proposed A.S. 10.06.435.

This proposed section would be Alaska's first statutory attempt to regulate shareholders' derivative actions. Presently, shareholders' derivative actions are regulated by the Supreme Court's adoption of Rule 23.1 of the Federal Rules of Civil Procedure.

Since this cause of action already exists in fact, the proposed statute should create no major changes.

8. Proposed A.S. 10.06.460.

This proposed section would permit the removal, by shareholders of a corporation, of a director without cause. This would be a new provision since existing A.S. 10.05.177-192, inclusive, provides only for removal of directors at the time of the annual meeting. The proposed section gives shareholders of a corporation more latitude in choosing and terminating directors and sets out restrictions on this right of shareholders.

This proposed section would seem to create no new causes of action, save the validity of an election, which, if challenged, would come under the court's scrutiny. A deluge of cases is unlikely.

9. Proposed A.S. 10.06.463.

If there would be insufficient votes to remove a director under proposed A.S. 10.06.460, proposed A.S. 10.06.463 provides for judicial removal of a director for specific types of acts. The corporation could be made a party to the action.

This section creates a new cause of action. Generally, corporations should be able to handle these matters internally with recourse to the court only in extreme cases. A deluge of such cases is unlikely.

10. Proposed A.S. 10.06.488.

This proposed section would provide for secondary liability of directors and officers personally, the cost of doing business, if the assets of the corporation should provide insufficient. This is an attempt to get at thinly capitalized or mismanaged corporations. The total secondary liability of an officer or director could not exceed $25,000 and contribution is authorized. A written contract could be competent to modify or eliminate liabilty.

This section is without precedent in Alaska and is an attempt to pierce the corporate veil and address ultra vires acts of directors and officers. Settling disputed claims is an obligation of the court and this proposed section falls within that obligation. This specific cause of action could give creditors additional parties to pursue in satisfaction of claims. Whether this would increase cases is not clear since, conceivably, directors and officers could be impleaded or otherwise joined as defendants.

11. Dissolution of Corporation.

Proposed A.S. 10.05.465-10.05.594, inclusive, addresses the dissolution and winding up of affairs of a corporation. Dissolution is noted herein because it is a major area of court intervention. Since this is usually a contentious area among corporate management, shareholders and creditors, courts have a long history of intervening in the affairs of a dissolving corporation. Proposed A.S. 10.06.605-675, inclusive, appears to create no substantial new duties for the court.

12. Proposed A.S. 10.06.818.

This proposed section has its origins in existing A.S. 10.05.777 which permits interrogatories by the commissioner if interrogatories are necessary to ascertain whether a corporation has complied with the state's corporation code.

Proposed A.S. 10.06.818(d), unlike existing law, provides that a petition from the corporation to extend the date for answer, to modify or set aside the interrogatories may be filed by the corporation with the commissioner.

Proposed A.S. 10.06.818(d) gives a corporation an unprecedented recourse to superior court. The use of this tool in superior court would largely depend on the extent to which the commissioner propounded unwelcome interrogatories to corporations. Lacking an abuse of discretion in the commissioner, it is unlikely this tool would create a deluge of superior court cases.

Please see me if you have any questions.

TESTIMONY OF ARCO ALASKA, INC.
JOINT HEARING OF HOUSE LABOR
AND COMMERCE COMMITTEE AND
HOUSE JUDICIARY COMMITTEE
PROPOSED HB 343
"AN ACT REVISING THE CORPORATION CODE"

Good morning. My name is Bruce Frenzel. I am an attorney with ARCO Alaska, Inc. here in Anchorage. I am also a member of the Corporation Code Revision Task Force of the Business Law Committee of the Alaska Bar Association. I am speaking today on behalf of ARCO Alaska, Inc., a wholly owned subsidiary of Atlantic Richfield Company.

Proposed House Bill 343 envisions a completely new Corporate Code. As noted in the House and Senate Joint Journal Supplement, No. 11, dated April 8, 1983, major portions of this bill "are without precedent in Alaska law." Any such major changes deserve adequate time for persons affected by the bill to review and comment. We recognize that the bill was introduced last April, but has laid dormant until now.

We especially appreciate the hard work by the Alaska Code Revision Committee which has gone into the preparation of this bill, but we are strongly opposed to certain portions of it, and are uncomfortable with others.

ARCO respectfully requests that consideration of this bill be deferred for 30 days so that specific, constructive comments on the precedent-setting portions of this bill can be made. With constructive changes to the bill, ARCO may be able to support it.

As currently drafted, one specific objectionable provision allows individual liability for corporate officers, which destroys a basic purpose of incorporation, which is to limit liability

for corporate officers and shareholders. For a large corporation such as ours, the proposed provision combined with the large number of creditors would amount to completely unlimited liability for a few of our highest-level employees. Such a provision is also likely to be even more onerous for small or closely-held corporations.

We will commit ourselves to recommend specific language changes to make the bill acceptable. Unless consideration is deferred, however, we must oppose this bill as currently drafted.

ALASKA CODE REVISION COMMISSION

ALASKA STATE LEGISLATURE
POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811

MEMORANDUM

TO: Representative John Cowdery, Chairman
House Labor and Commerce Committee

FROM: Dick Regan, Research Director
Alaska Code Revision Commission

Dick Regan

DATE: February 8, 1984

RE: Amendments to HB 343/SB 246 on
for profit corporations

At the joint hearing of the Labor and Commerce Committees January 23, 1984, reference was made to certain proposed amendments that would be forthcoming.

It was agreed that the amendments would be prepared by Professor Dan Fessler and would be provided to the committees after a final review of the form by the parties who had initiated them--the Division of Banking, Securities and Corporations, the spokesperson for the Alaska Federation of Natives subcommittee appointed to work on the bill, and counsel for Alaska Airlines.

Those steps were followed.

The amendments were provided to committee staff of the House and Senate Labor and Commerce Committees, both before and after the final review.

On February 1st, Senate Labor and Commerce approved the amendments as submitted, together with a Letter of Intent that two changes in the commentary on the bill be approved as submitted. The committee voted the bill out as CSSB 246(L&C), incorporating the agreed amendments.

Except for one date, the substance, and in some instances the form of the amendments had been agreed upon by the code revision commission many months ago, with the understanding that they would be offered to the legislative committees at the appropriate time.

The proposed amendments and proposed form of the Letter of Intent are attached, as previously provided on February 3.

Also attached are a few words of explanation keyed to the page and line of each proposed amendment.

DR:chw

EXPLANATION OF PROPOSED AMENDMENTS TO HB 343

Page 12, lines 27-29:

Section 5(b) at page 160 of the bill requires existing coorporations to restate their articles of incorporation within five years after the effective date of the new code. It was pointed out that in some instances a corporation cannot provide the name and address of its initial registered agent because the information has been lost. This amendment would take care of the problem.

A relatively recent date in the section is needed, but the specific date chosen is not of importance. The date of first introduction of the Alaska Corporations Code as a bill in the legislature is a date used elsewhere in the bill. Using it here is simply to avoid using many different dates in the bill.

Page 12, line 29:

The amendment is subsumed in the above amendment.

Page 16, line 5:

This corrects an erroneous cross reference. There is no section 10.06.873 in the bill.

Page 56, following line 28:

The bill provides that staggered terms of directors are invalid unless provided for in the articles of incorporation. The effect of the change is that a provision in a corporation's bylaws providing for certain staggered terms of its directors would be valid if the provision was in the bylaws before a recent date--the date of first introduction of the Alaska Corporations Code bill in the legislature, March 24, 1982.

In other words, the amendment would make this provision of the bill prospective, keeping in effect valid bylaws on staggered terms; however, no corporation would be able to hurriedly enact bylaws now, simply in anticipation of passage of this bill.

Page 127, lines 7-9:

The commission agreed with Director Kirkpatrick that requiring a corporation from another state to file its articles and all amendments to its articles in Alaska would be costly to administer and that the ready availability of those articles and amendments from the parent state of the corporation adequately serves the needs of Alaskans. The change was agreed upon in the committee hearing May 17, 1983, and again in the hearing January 23, 1984.

Page 138, line 28; Page 139, line 9:

These are only changes to preferred drafting style. A misdemeanor is a "Class A" misdemeanor if no class is designated in the statute. (Reference existing AS 11.81.250(c)).

Page 147, lines 28-29

This is a deletion of unnecessary and possibly confusing verbiage.

Page 148, line 8:

The deleted phrase is obsolete. Originally the articles of incorporation of an ANCSA corporation had to be approved by the Secretary of the Interior (ANCSA, Section 7(d)). However, after five years the articles could be freely amended. Because many such amendments have been made, articles that are "approved by the Secretary of the Interior" are a thing oof the past in some of the ANCSA corporations.

Page 149, line 18:

The change is to conform to a decision made by the legislature in existing law, AS 10.05.005(a)(2)(B)(ii), that ANCSA Section 7(i) money is not included in "capital". Section 7(i) income is from the poolled 70% of revenue from the subsurface estate and timber.

Page 148, lines 25-26:

This is a change in form only, to conform to language elsewhere in the Act.

Page 149, line 12, following the period:

The section of the bill amended here deals only with ANCSA corporations. The only purpose of the amendment is to conform to Section 30 of the Alaska Native Claims Settlement Act.

Page 149, line 15:

Surplus and confusing language is deleted.

Page 161, line 13:

An update of the effective date clause.

ALASKA STATE LEGISLATURE - SENATE

COMMITTEE ON LABOR AND COMMERCE

SENATOR RICHARD I. ELIASON
CHAIRMAN

POUCH V • JUNEAU, ALASKA 99811
(907) 465-3844

OFFICIAL BUSINESS

LETTER OF INTENT

It is the intent of the Senate Labor and Commerce Committee that the detailed commentary accompanying S.B. 246, House and Senate Joint Journal Supplement No. 11, be considered a comprehensive guide to the proposed new Alaska Corporation Code and as such should be amended and revised accordingly if any changes are made to S.B. 246.

The following narrative changes reflect the amendments adopted in CSSB 246 (L&C).

(At page 89 of the House and Senate Joint Journal Supplemental for April 8, 1983, the Official Comment to Section 388 should be amended to read):

Official Comment to ACC Section 10.06.388. ACQUISITION OF CORPORATION'S OWN SHARES; REISSUANCE OR RETIREMENT.

SCOPE: ACC sec. 388 specifies the treatment to be given redeemed or repurchased shares. They revert to the status of authorized but unissued shares unless the articles of incorporation prohibit reissuance. If reissuance is prohibited, the article stating the number of authorized shares must be amended to reflect the lowered number. Such an amendment of the articles must be filed with the commissioner. Shareholder approval of the required amendment is not necessary.

While sec. 388 abolished the antiquated accounting concept of "treasury shares", nothing in this section is intended to prejudice the present or contingent contract rights which pre-ACC corporations may have created in reacquired shares described as "treasury shares."

CHANGE IN FORMER ALASKA LAW: ACC sec. 388 is taken from GCL Section 510. It continues prior Alaska law (former AS 10.05.312-345) in requiring a filing with the commissioner of an amendment to the articles. It departs from and simplifies prior law by the elimination of the concept of "treasury shares."

(At page 123 of the House and Senate Joint Journal Supplement for April 8, 1983, the Official Comment to Section 455 should be amended to read):

Official Comment to ACC Section 10.06.455. CLASSIFICATION OF DIRECTORS.

SCOPE: Sec. 455 provides for optional classification of a board consisting of a minimum membership while taking steps to preclude the adoption of such a scheme for a corporation which has not eliminated cumulative voting from adopting such a classification scheme by amendment if shares sufficient to elect one director under cumulative voting oppose such amendment. Sec. 455 replaces former AS 10.05.186.

CHANGE IN FORMER ALASKA LAW: Sec. 455(a) is an enactment of Model Act Section 37 and works an important change from former AS 10.05.186 respecting the election to classify the board. Under prior Alaska law this decision could be taken by a bylaw adopted by the board without shareholder participation. The danger to minority share representation in such circumstances led to subsection (a)'s requirement that the election be taken in the articles, which insures shareholder participation.

Subsection (b) is new. Continuing the concern for minority share representation on the board of a corporation which has not eliminated cumulative voting, sec. 455(b) precludes amendment of the articles to classify the board if the number of shares voting "no" on the amendment or refusing to consent in writing would be sufficient to elect one director if voted cumulatively at an election of the entire board.

Subsection (c) is new. It permits board classification pursuant to the terms of a provision on the bylaws rather than the articles of incorporation. In order to classify a board under sec. 455(c) it is necessary that the bylaw have been adopted prior to March 24, 1982 with or without shareholder participation, and that it contains nothing which, were it a provision in the articles of incorporation, would offend sec. 455(a). Thus, all of the restrictions on the minimum size of the board, the minimum number of classes, and the terms of the director office set forth in sec. 455(a) limit the terms of any bylaw which would be effective under sec. 455(c).

Alaska Code Revision Commission

DATE: February 1, 1984

RE: Transcript of joint hearing on
HB 343/SB 246 on profit corporations

Enclosed is a transcript made from the House Labor and Commerce Committee's tape of the joint hearing on HB 343/SB 246 held Monday, January 23, 1984. Catherine Walsh of this office typed it at the request of the code revision commission.

Any members of the House or Senate Labor and Commerce Committees who were absent from the January 23rd meeting may be especially interested in the transcript.

Since the House members had to leave for a floor session before the meeting was concluded, they may be interested in the testimony at the last of the transcript--testimony of Elizabeth Johnston of the Alaska Federation of Natives subcommittee on the bill and Irv Bertram, legal counsel for Alaska Airlines.

Enclosure

JOINT HOUSE /SENATE LABOR AND COMMERCE COMMITTEE
HEARING ON HB 343/SB 246--FOR PROFIT CORPORATIONS
JANUARY 23, 1984
8:30 a.m.

COWDERY: I'd like to call the Labor and Commerce meeting to order. It's January 23, 1984, at 9:50 a.m. (sic) 8:50 a.m. I'd like to note those present: Rep. Ueling, Rep. Pestinger, Rep. Koponen and James Cowdery. And I'd also like to note present Senator Mulcahy. The purpose of this morning's meeting is to have testimony on an act revising the corporate code. At this time I think that we would like to call on John Abbott and anyone that would like to testify sign in. The first one to testify that I believe I'd like to have is John Abbott. State your name and affiliation.

ABBOTT: Thank you, Rep. Cowdery. My name is John Abbott and I am the chairman of the Alaska Code Revision Commission. The code revision commission, for those of you who are unaware of this, was a Title 24 commission created by the legislature in 1976. It is comprised of individuals representing the Alaska Court System, the Attorney General's office representing the Governor, the Alaska Bar Association representative, representatives from both the House and the Senate, at this time, Rep. Charlie Bussell and Senator Patrick Rodey. Myself as an appointment of the Governor, as a layperson and Fred Brown as a representative of Governor Sheffield. We have one vacancy on the commission at the present time. Generally, the purpose of the commission is to entertain requests by the legislature, by any branch of government for that matter, to look into areas of statutory law of a technical nature that are in need of revision for any number of reasons including the fact that they no longer comport with the Alaska life, because we are a more sophisticated state, because they haven't provided for a number of years, that they are out of sync with the present needs of the law. The commission also entertains its own projects and has at any given point in time two major projects at least, plus a number of minor projects for consideration by the legislature. We have at the present time five major bills, some of which will be considered by the legislature this session, others will die and not get consideration. The bill in front of you today has been introduced by the Rules Committee in both the House and the Senate as HB 343 and SB 246. The two bills are identical in what they do and were introduced simultaneously for the purpose of consideration by both the House and Senate without the necessity of going through one and then going through the other. This is the practice the code revision commission has used for the past several years to expedite consideration of the bill. Myself, as chairman, and Jerry Kurtz who represents the Alaska Bar Association have been present on the commission during the entire

period of time the corporations bill has been considered and worked on, and we along with with other members of our staff and other commissioners are most anxious to meet with you or your staff to further explain the bill itself. It's a very large bill; it's complicated; it is a sophisticated bill. It determines all of the areas of responsibility which are taken on when a company seeks a corporate charter and seeks a privilege conferred by the State of Alaska. We have with us today Professor Daniel Fessler. He is a professor of law at the University of Davis, California, who has been the consultant on this bill since its inception and is one of the recognized authorities on corporate law in the United States. He will give you a thumbnail sketch of this bill and attempt to answer any questions that you may have concerning the specific technical aspects of the bill. The bill was the result of concern on the part of members of the code commission, both in private practice and in the other areas represented by the code commission, that some work needed to be done because the basic bill had been, as it were, an off-the-rack bill adopted from Oregon statutes at the time of statehood. Whether or not it was appropriate to Alaska even at the time it was adopted leaves some question. Certainly the existing law does not in any respect really meet the needs of Alaskans for incorporation. The new bill attempts to set out and define all the relationships between the various principals or players in the corporate status. So that one need only look at this bill to determine how you become a corporation; how you act as a corporation; how you terminate as a corporation. The bill that's presently before this committee was introduced, I believe, on April 9, 1983. Since that time, some changes have been made as a result of public hearings held by the code revision commission and input from various different organizations concerning some of the specific features of the bill. And as a result, the code commission will be making some recommendations for changes to the committees considering this bill. The work on sections, written comments to the bill and requests that certain changes be made. These changes address concerns raised by Alaska Airlines, one of probably the state's largest corporations, a special subcommittee of the Alaska Federation of Natives that has worked for quite some time with the code commission, has graciously, generously provided its own time and expertise and its legal staff in various of the corporations and has provided us with some good and needed amendments to the bill. Those, too, will be entertained. We also have worked very closely with Mr. Willis Kirkpatrick, deputy director of corporations in the Commissioner of Commerce office. And he, too, has recommended some changes that if made will reduce any financial impact on his office. So that it was the intent of the commission to draft a bill that would have no financial impact on the Commissioner of Commerce office or the director of corporations. So you will be getting some recommendations for amendments pursuant to our discussions and the exchange of ideas of Alaska Airlines, the Commissioner of

Commerce and the Alaska Federation of Native's subcommittee. I think without further ado I'll ask Professor Daniel Fessler to come up and give you a brief summary, an overview of what the bill does. If there are any questions, we also have signed up as witnesses, Commissioner Jerry Kurtz, Fred Brown to provide additional testimony or comments or, in the event you have some questions, we'll do our best to answer them for you. Thank you.

COWDERY: Thank you. I'd like to note that Senator is present. And at this time, I'd like to have John Abbott . . . then the next one up is . . .

RODEY: Rather than invite any comments, I think that Professor Fessler can do a better job of explaining the material than anybody else I know. Mr. Chairman, I'm the Senate member of the code revision commission, and the code has labored long and hard, particularly Professor Fessler and Chairman Abbott on this particular legislation. And I think it is worthy of the committee's very serious consideration. It is in final form, but it is very near passage.

FESSLER: Gentlemen, I am a school teacher at the University of California at Davis. And the subjects that I teach are contracts and corporations. Four years ago I was approached by the commission and asked if I would be interested in serving as a consultant to first survey the content of existing Alaska statutory law in the business field, and then work with the commission should it determine that there was need for revision. The survey of existing Alaska law was undertaken, and the conclusion was arrived at that the existing Alaska law was not the law that the state would most like to have its citizens functioning under. The law that we currently have in Alaska was adopted by the legislature, the first legislature after statehood, by adopting the then Alaska, excuse me, the then content of the Oregon corporation law. The Oregon corporations law in turn was taken from something called the Model Business Corporation Act, which act was put out by the Business Law Section of the American Bar Assocation in the early 1950's. By the time Alaska adopted the Oregon law, the Oregon legislature was on the verge of changing it. And, subsequently, the Oregon legislature has changed much of the content of the law. So, and this is because the model act, which was the basis of the Oregon law and then became the basis of our sort of stepchild has been in the process of evolution. The commission also noted that in the intervening near quarter of a century, that there have been significant changes in corporate law in three of the most critical jurisdictions to which other states generally look for guidance. And that is that New York had rewritten its corporations laws in the late 1960's; California undertook a similar project in which I was involved on the working committee with the legislature in the mid-1970's. And finally the model

act itself has been recalled and is in the process of a three-year study in which a couple of years from now will result in further recommendations. So there have been changes with regard to the theoretical basis of the law. Further, there are changes in Alaska in a quarter of a century. Changes which suggested that it might be time for the State of Alaska to have a corporation law that is a product of its own deliberate creation, rather than something borrowed from elsewhere. The result of this four-year effort is the bill which you have in front of you. And with the exception of some minor amendments which resulted in final meetings with representatives of the Alaska Federation of Natives subcommittee and various other private parties who have testified before the commission that the bill which the commission is seeking your legislative approval and enactment is now in final form. In addition to the bill, the commission has prepared very lengthy commentaries. These commentaries, hopefully, are designed to explain to members of both the House and Senate the origin of each and every provision of the act, to share the value judgments which caused the members of the code revision commission to recommend that particular content, to disclose to you to the extent that the statute is borrowed or modified from statutory law in other jurisdictions the specific genesis of the law, and then to state what change would be made in existing Alaska law were the legislature to adopt this bill. In addition, your staffs will be furnished, and the members will be invited, to work with another document. I apologize for the prodigious size of these documents, but this document is useful in that if an individual is familiar with the provision of existing Alaska law, this works backwards from existing Alaska law, section by section, and shows how that provision would fare should this particular bill be adopted. So those study aids hopefully will be useful to staffs and will be useful to the various committees of the legislature. What I had hoped to do this morning was to share with you some of the value judgments which the commission has made and which are embodied in the multiple provisions of this act. One of the major disadvantages of existing Alaska law is that if an individual were to pick it up seeking to know the content of the law the individual might follow, existing Alaska corporate law is totally disorganized. Provisions which may relate or surround the problem are scattered throughout the bill. One of the initial impressions that you will gain from looking at this bill is that it is very tightly organized. it is organized by major topical sections with the hope that if an individual has a problem with the formation of a corporation, all provisions of the act that deal with corporate formation will be found in Article 3. If the issue relates to corporate finance, Article 4 contains all the relevant law. So that, in essence, the commission directed me to draft the value judgments which it had made very much in the form of a cookbook, but hopefully getting the ingredients in the right order so that it should be something which an individual, whether

a layperson or a practitioner desirous of knowing the content of the law, will be able to find it. And once in the right area, will find all of the related provisions of the statute rather than have them lying around in land mines some 25 to 30 credit pages later, which is the rather dubious distinction of the current provisions of chapter 5, Title 10. Now the areas wherein significant value judgments are found would be Article 3 which deals with the formation of a corporation. Some states like California have attempted to say that if you are going to form a corporation in California, certain major value judgments have been made by the legislature. And the price for forming a corporation in California is that you comply with the value judgments. They would include such things as the requirement that there be cumulative voting for shareholders; that the board cannot be classified; that the directors can only serve one-year terms. California is a statute which is very pregnant with value judgments that sort of tell citizens this is the only way we are going to permit it to be done. Now the reason that this statute does not do that is first there was a fundamental philosophical disagreement that the State of Alaska should be in the business of making value judgments about how people who enter in the corporate form ought to behave. The value judgment which took precedence over that was that people should be informed by reading the statute what the possibilities are. And that they should be allowed, knowing what the possibilities are, to make their own decisions as to whether there will be cumulative voting; how large a board they will have; whether they will classify the board; whether the board will have terms that exceed one year. But that those value judgments should be layed out, and they are layed out in Article 3 in a manner which an individual determining to form a corporation can quickly see that these are the basic things with which the individuals desirous of entering this association should come to some agreement. Further, there is the advantage that we say that if you are going to make these fundamental decisions, you must put them in the articles of incorporation. So that if a person who is a potential investor desiring to know what the lay of the land is for XYZ corporation need only obtain a copy of the articles of XYZ corporation, and that individual will have a definitive statement of the basic value judgments which citizens forming that corporation have made. And there is a further problem, while California has attempted to make value judgments and impose them on citizens, the scandal is that people then simply leave the state and foreign incorporate. They come back as Oregon corporations. They come back across the state line as Nevada corporations. And so it was deemed that this was probably not the best thing to attempt, and that the attempt in the state that's pursuing it isn't working. So in that respect, although you'll see the California corporation code has had a significant impact on many of the provisions of this recommended legislation, the basic thing that the California corporation code is known for

is not carried forward here. It is possible to form a corporation in Alaska which is every bit as straightlaced as a corporation mandated under California law. That is a value judgment that citizens can make. It is not a value judgment that the legislature would be making for you. Now with regard to Article 4 on corporate finance. Here Alaska law was deemed to be flawed in a manner that is true of virtually every state. Lawyers, at least in my experience of being one and teaching others for a longer period of time than I like to recollect, generally make a career decision to go into law sometime after they learn that they have no aptitude whatsoever for arithmetic, let alone mathematics. The consequence is that most lawyers cannot, including myself, balance a checkbook. And lawyers are horrified by concepts of accounting. Therefore, over the years we have sort of developed our own accounting techniques. Because over the years we have had perhaps a bigger voice than we should have whispering in the ears of elected representatives and people, our versions of the myths of accounting rather than the accounting profession have begun to creep into the law. Alaska's current corporation law suffers from perhaps a terminal case of lawyer-accounting terms. One of the major things which corporations must worry about if they are to behave in a socially responsible manner, since they are given the presumption of limited liability. If I form a corporation, my creditors and even victims of calamaties such as torts must look only to the assets of the corporation, not to my own personal assets. Circumstances are important to the state, all people who come into contact with corporations. Well, then what assets must I leave with the corporate entity? What accounting principles must I observe in keeping the books of the corporation? The law has always been interested in this question. But the problem is that we allowed a gulf to grow between what the law seemed to be suggesting and what accountants were telling people are the intelligent way to parse through matters and to resolve them on the books and records of a corporate entity. California broke new ground in 1977 when it said that it would abolish all concepts of legal accounting. It would substitute some straight, common sense ideas as to when a corporation could pay a dividend. A corporation could pay a dividend within the discretion of the board of directors at any time so long as the assets of the corporation equal the liabilities of the corporation with the protective ratio of $5.00 in assets to every $4.00 in liabilities. A very simple concept to understand. There are no longer reduction surplus, earned surplus, all of the notions which lawyers have invented over the years. It's a very simple idea. If we are going to make a distribution, whether we make it in money, whether we make it in corporate property to shareholders, we have what is called the ratio of assets to liabilities which must be maintained. This bill adopts what is turning out to be one of the most successful decomplications of corporate life which was done in California. It also follows both

California and now New York in saying that in complying with the law, that so long as a corporation keeps its books and records in a manner which reflects generally accepted accounting principles, he has complied with the law. So we leave to the accounting profession and not to my brothers and sisters-in-law the determination as to what is the best way for that craft and science to proceed to advise. So accounting is left to accountants, but we make a simple value judgment to protect people. It's this ratio of liabilities to assets. Five dollars in assets to four dollars. You can make any distribution you want so long as you do not go below that floor. That, I think, will make it much easier for people determined to comply with the law to do so and make the detection of those few people who are determined to evade the law much easier. Now with regard to Article 5, a major question has been in existence for many years. What are the proper prerogatives of shareholders as opposed to the directors and officers of the corporations? Is it to be an Athenian democracy, or is the better model that you elect the directors and you vest control and management of the corporate entity during the period of tenure of their terms in the individuals? Article 5 has a default provision that the powers of control and management of the corporation are vested in the board. However, a corporation may by the terms of its articles modify this presumption and confer greater prerogatives upon shareholders. If it is going to do that, however, it must do it by an affirmative provision in the articles of incorporation. The thrust of Article 5 is to ensure that shareholders have acess to reliable and up-to-date information as to the condition and record of accomplishment or failure of the people they have elected to be the directors of the corporation. You will notice that for the first time we would standardize notice requirements. Under current law, one of the defects is that we have no standardization of notice requirements. For certain matters, 30 days' notice is sufficient. For others, 40 days is required. Under this bill, notice requirements are standardized, and it should make people who are determined to evade it much easier to ferret out. So again the act reflects the commission's value judgment that the basic policy or power between shareholders on the one hand and directors on the other that the act should specify what should be that ratio or relationship if the parties don't wish to change it. But if they do wish to make a different arrangement, if they put it in the articles they are free to do so. Article 6 deals with the prerogatives and responsibilities of officers and directors. Here I think you'll be very pleased to see that for the very first time we have a statutory definition of the duties of care and duties of loyalty which directors and officers are expected to obey. At the present time in Alaska, it would be a matter of conjecture what the Alaska Supreme Court would eventually say with the content of those important duties. This makes it difficult for an individual who is embarking upon the career of

being a corporate director, perhaps out of accommodation to friends, and many small corporations know exactly what it is I am expected to do, a peril of later on being held accountable for not having done it. Another important feature of this bill which has received wide support by those people who have read it, is Section 435. Section 435 for the first time in Alaska subjects shareholder derivative causes of action to statutory regulation. Alaska presently has the dubious distinction of being one of two American jurisdictions which has no statutory regulation of the derivative suit. This is a suit in which a shareholder comes forward and brings a cause of action that alleges that not I, the shareholder, have been injured but that the corporation has been injured. And I as a shareholder appoint myself to litigate this matter on behalf of the corporation. The tension between the prerogatives of the incumbent directors of the corporation to make that decision and to control that litigation and the rights of a shareholder to say that I am going to elbow my way into the pilot's seat in this plane for the next several years, is a very important one because it may be that there is corruption at the board level. Maybe there is not. I urge your very careful attention to Section 435 to point out that I believe you would find that you would go from having no statutory regulation on this important subject to having one of the most balanced, comprehensive regulations of the subject in this country. Section 435, therefore, is an important innovation. Article 7 is rather technical in nature. It deals with the question of how we go about making amendments and changes to the articles of incorporation. Again, it standardizes procedures and forces the attention of those who wish to change the basic format of a corporation into doing it by way of amending the articles so that there is regularity. And again so that potential investors interested in the corporate entity can look at the articles of incorporation and have not only an historical impression of what the corporation was like in yesteryear, but an accurate, modern impression of where the power within this corporation is currently being distributed. Article 8 is going to be a matter of great interest to your constituents. It deals with what are called organic changes. In essence, mergers; consolidations; share exchanges; sale of all the corporate assets other than in the usual course of business. As each of us is aware, the United States right now is going through what is called a merger craze. Corporations are appearing to be attractive takeover candidates by individuals who may or may not have legitimate desires or desires which would advance the interest of shareholders should they be in a position to seize control of the board of directors. At the present time, Alaska law is very unclear as to the respective roles of incumbent boards as opposed to shareholders. And, therefore, Alaska corporations look vulnerable to individuals who are determined to launch a takeover bid. Article 8 clearly defines the prerogatives of existing management and the shareholders of a corporation with respect to

framing the content of one of these organic changes and taking it through the shareholder approval level. Essentially, what Article 8 does is vest with the existing board the power to frame the terms of a merger, a consolidation, a share exchange, or sale of assets in an extraordinary transaction. And then require two-thirds approval by the shareholders of the corporation in order to approve. This should bring Alaska corporations into line with California and New York and other major states which have moved to protect the integrity of their corporations from being the victims of an easy takeover in which the will of the shareholders and existing management would simply be subverted and brushed aside. Reform needs to be taken in Alaska in this area. I would hope that you would be satisfied with the commission's recommendations which are embodied in Article 8. Article 9, dealing with dissolution, is very important because of the changes that have been made in the federal bankruptcy law. It coordinates with modern federal bankruptcy law and creates for the Alaska judiciary a far more sensible approach to protecting the rights of creditors as well as the rights of senior shareholders in the event that a corporation goes to either voluntary or involuntary dissolution. It also contains some very innovative, and I think, useful provisions that deal with giving shareholders who are being oppressed or frozen out of the role of management or income where other shareholders are being afforded such prerogativees a right in the final analysis to petition for involuntary dissolution in order that the grievance which would have to rise to the level of a very serious grievance to get the attention of Alaska courts. Again, these are not new ideas. They might be the final decision of the Alaska Supreme Court if someone were to spend $100,000 litigating that. But if you enact this bill, all Alaskans with only the expense of supporting their government will have presumptive answers to these important questions. Those are the basic provisions and value judgments which underlie this bill. Both myself and the law students who have assisted me in working with the technicians in this area will be available to any member of either body and staff members. I am prepared now to answer any questions which any members of the committee may have.

RODEY: Mr. Pestinger.

PESTINGER: Thank you, Senator Rodey. Professor Fessler, to me this is a really excellent articulation of the rights and duties and obligations so that it gives our larger corporate participants a clearer understanding of where they stand, which is so essential to doing business. But what I am wondering about, though, is what burden this approach may place upon the smaller mom and pop family corporation. To me, if I had such a business I could not engage in corporate law comfortably without the assistance of counsel. Do you think that this packet necessitates the assistance of counsel as almost a mandate now

for anyone that does business in the corporate form? In other words, I am wondering, I see the need for this in California and New york, and I see the need for this in Alaska with that level of corporations that we deal with. But how about that other level that are just kind of, they get their articles punched out and they ask their lawyer to help them with the minutes, and they look at the Supreme Court that says that the only way you pierce the corporate veil is with an indicia of fraud. So they are using a whole different standard of operation. I mean this is really substantial. Do you think it might have a negative effect on that small family business?

FESSLER: In terms of cost of doing business in the corporate form, I think it will have the opposite effect. Right now, many small businesses probably are coming into corporate existence without the assistance of counsel at all. People are going out and buying little kits for $49.95 that contain forms that they fill in and send to the state. They are oblivious to the legislature's requirement that they file biannual reports to the legislature. They are not doing so. They are in danger of having their articles and their corporate status dissolved by the commission because the legislature has prescribed that as the penalty for not filing reports. And one of the basic difficulties with this situation will always be people who, to use your example, a two-person corporation, decides for one reason or another that they should do business in the corporate form, and then having done that they forget about it. They don't observe any of the formalities of corporate existence. They don't keep separate books and records. They don't segregate their assets from the assets of their corporation. And they don't file reports. Now they would be in trouble under existing Alaska law, sir. They will be in trouble under this bill. In the sense that when the State of Alaska confers a corporate charter on someone, whether or not they have sent $49.95 off to somebody who advertises in every airline magazine, that you don't need a lawyer and you, too, can be a corporation and somehow you will pay no income tax and like me you will turn out being rich. The only person that's probably ever done that is the individual who wrote that book, because he is getting rich by all of the people who write in and send their $50. I think this is the problem you'll want to keep in mind. What I am saying to all of you is that this bill is designed in such a manner that, although it is a complicated subject and I wouldn't suggest anyone could write a corporation code that could be so obvious that an individual could make casual reference to it and never need an attorney so they could guide themselves through the world of maintaining a corporation, this bill does organize the law. It does restate the law. It does have comments which are designed to assist people in understanding the law. Not one of those features can be said about current Alaska law. So there will be a problem of people who incorporate and thereafter regard it as a

little flag of convenience which they'll fly so long as it's useful and which, on the day that it isn't, they'll just forget about it. That will continue to be a problem not only in Alaska, but in California. It's true in Nevada. It's true in Wyoming where I was reared. It's a major social problem we have. People who incorporate with no idea that there are responsibilities as well as privileges for taking on that status. Now, fortunately, the federal tax law which in years gone by caused people to believe that they could pay less income tax by somehow becoming a corporation, have because of movements undertaken first by the administration of President Carter and now of greater emphasis during the administration of President Reagan. As you know, the marginal income tax on individual income has now been reduced from a maximum of 70% now to where it is very close to the top corporate, there is only a two percent spread. But I still find that many people believe that they are going to get some tremendous tax benefit by becoming a corporation. What they do, of course, is eventually wind up in a hellacious tax audit. They find and the individual who wrote the $49 book and gave you the form never accompanies you to that audit because he is living in Bimini.

RODEY: Representative Koponen.

KOPONEN: I was interested in Section 488 which does create a liability for the officers of the corporation, and I'm not up on contract law and one of your notes, in terms of any written contract to modify or eliminate the liability created by this section, what happens to that liability, is it transferred or . . .

FESSLER: Let me explain to all of the members. Section 488, gentlemen, appears at page 67 of the draft in front of you. Section 488 relates also to Rep. Pestinger's question. One of the reasons that people incorporate is to achieve from the State of Alaska a presumption of limited liability. Now this presumption of limited liability means that to all individuals who do business with the entity which is incorporated, they are to look only to the assets which the individuals who incorporated have left with the corporation to satisfy their claim. This is true whether those individuals have made contractual relationships with the corporation or whether they have entered into an accidental injury situation, a tort. Section 488 is called secondary liability of directors and officers. It was reflected after lengthy discussions among members of the commission, a feeling that for small creditors of corporations, employees, tradesman, materialmen, suppliers, individuals who generally have a credit relationship to a corporation which is not reduced to writing, that these individuals are the year in and year out, these are the individuals who pay the price for corporate existence. When corporations are run so long as it is

convenient to the individuals who find they are the owners and then when they are not, they are simply abandoned. Large institutional lenders, bankers, insurance companies, large contracting creditors, will get a lawyer and go out and they will quote, attempt to pierce the corporate veil. Alaska's common law on the circumstances in which it will disregard limited liability is found in only three cases since statehood. Those cases do not hold out great hope that in the absence of fraud in a transaction that the court would do. But if you have a claim for $1,000 in wages owed to you, there is no lawyer who is going to be able to successfully launch that lawsuit. If you are an individual who sold fish to a restaurant which has now gone out of business, and the owner has marched off leaving you unpaid and it's a $43,000 account receivable, you cannot get any modern recourse at all. Section 488 for the first time to a very limited extent shifts that presumption. It says that the officers and directors of a corporation to the extent that its assets prove insufficient to cover its liabilities, have a liability to a class of individuals who are defined as employees of the corporation as materialmen, tradesmen, etc., people who have extended credit on open account for up to $25,000. Now this liability, sir, is not inevitable. The statute clearly says that if I have a corporation and you have a fishing fleet, and you are supplying my incorporated restaurant with fresh salmon, that you can be approached by me saying I would like you to agree in writing that in the event that this business folds, my restaurant, you won't look to me for the liability which exists under the law. It would be a liability of up to $25,000. That's all you could ever recover under this. So for the first time there would be an incentive in dealing with the smallest people in the marketplace who are the recurrent little mules on which this business of limited liability is ridden out, year in and year out, that these people would have some relief and that there would be an incentive to talk about this question of limited liability. And then if I can convince you that you should give me a relaxation, a waiver of that, that's fine. But in the absence of a contractual modification, I would have the right to this.

KOPONEN: The contract then is between the creditor and the corporation, not between the corporation and its directors.

FESSLER: That's absolutely right. It's between the corporate debtor and its employees, between the corporate debtor and its materialmen or suppliers.

KOPONEN: It's a very useful section. I know there is a major business problem in the Fairbanks area, these collapsible corporations.

FESSLER: Mr. Chairman.

COWDERY: Would the effect of this, would it discourage say qualified managers from getting into taking over a trouble corporation that was having some problems, maybe through a lack of expertise in the past, would this discourage someone from coming in . . .

FESSLER: Well, it would certainly give me pause. Now there are two things relevant, sir, in the bill. First, if the corporation is in a process of dissolution, one of the ways to avoid dissolution under the provisions of this bill is for a court to appoint interim directors in order to resolve deadlocks. Those directors are not subjected to this type of liability. So the director who is brought on board to try and straighten things out by court order is the director who is exempted by the reference in the bill to other than the directors who are appointed pursuant to. Now that is one protection. Another factor, of course, would be that if a corporation is in trouble, and I am going to step in and attempt to save it, one of the things I'd want to do is be aware of Section 488 and go to the creditors and say, I am willing to come into this picture only if you are willing to contract to exempt me from any personal liability that I would incur. Yes, sir, it would be something that in the hypothetical you advance an individual would want to take into consideration.

RODEY: If I might interject, that would apply to directors but not to employees of the corporation?

FESSLER: It has no application to employees at all. In fact, I should tell you that this appears to be very novel, and I want you to understand that it has a great quality of being novel. But New York has never given total limited liability to anyone. And if anybody tries to come to you and say, my God, if we adopt this the wheels of commerce will grind to a halt. Since 1843 when New York adopted the first general incorporation statute, the ten largest shareholders in a New York corporation are subjected to liability in the event the corporate assets prove insufficient to the claims of all employees. New York has never stricken that from the books, and it has not prevented the development of the State of New York as a center of commerce. What we did here, was to say that in many Alaskan corporations we didn't want to have the liability on the ten largest shareholders because that might include many very passive people who really have nothing to do with the way in which the business was run. So put the liability on the people who are being paid, the officers, the president, and the secretary and the treasurer. They are the defined officers and the directors. They are not passive, or they oughtn't to be. So that is how we would differ from New York law. And we have broadened the exposure, because in New York the exposure is limited to claims of employees, and we broadened it to include the claims of materialmen and

suppliers.

COWDERY: In the past we have had some of the Native corporations who have had financial troubles and hired two people to direct them and turn it around. And this is an area I was wondering about, if that would be . . .

FESSLER: I appreciate the question. It is an important matter. The AFN subcommittee has looked into this question. I think that at that level, or at the level of any large corporation that is involved in an attempted turn around, that there would be awareness of the provisions of Section 488 and that there would be appropriate advice from counsel to deal with the subject. That would be my hope.

BROWN: Mr. Chairman, may I suggest . . .

RODEY: Mr. Brown.

BROWN: I am Fred Brown. It's nice to know that Labor and Commerce [garbled] . . . The one example you might think of is what would really happen . . . the example might be one of the most prosperous, currently most prosperous Alaska corporation is Alaska International Air. Originally, that was Interior Airways based out of Fairbanks. They expanded too fast for the building of the pipeline, which didn't get built fast enough as many Alaskans remember. What happened then was, and this sort of thing is really what happens when a corporation gets into trouble in most cases, and that's why I'm raising this as an example. What happened then was they went into reorganization and the creditors and shareholders hired Mr. Duncan McClaren, a legend in the Canadian air industry, a great manager and a legendary worker [TAPE CHANGE] . . . Section 488 to take care of that problem.

RODEY: Thank you, Mr. Brown. This is a problem currently in Alaska. It is possible for individuals who incorporate to run up all sorts of bills, not pay its creditors, and then just move away from that corporation, will eventually be resolved by the state, set up another corporation and then bilk a lot of small tradesmen who work for the corporation, creditors, what have you, move on. You can do it in serial fashion. It is currently being abused presently in the state. Mr. Abbott has kept an eye on this, has had a practice in that area of the law for 15 years. But it is currently a problem. There are a lot of honest Alaskans who lose money because of this problem.

FESSLER: And I think the problem is also that it has a broader ramification. To the extent that citizens get the impression that there are tricks out there for people who are in with lawyers, if you will. It demeans my profession of which I am very proud. We were never the source of this value judgment,

that people could pull this type of thing. But to the extent that people believe that if you quote, know the law, you can do bad things and get away with it. You can do hurtful things and have no accountability. It creates an impression of the law which none of us have an interest in seeing furthered in the minds of citizens. Because the minute one law becomes suspect like this, the cloud falls over all law. And so this is probably the most important value judgment about corporations. They have done great things for us. But the idea of a one-person corporation, and the only person that probably has pulled off that role real well in history, was Louis the Fourteenth and a tremendous price was paid for that notion.

UEHLING: If we can kind of go back to the section regarding the foreign corporations, maybe you could explain what the Alaska Code Revision Commission took as far as an approach as a comparison of what occurred in California regarding the foreign corporation situation there.

FESSLER: Because California has this basic social problem that in order to evade the restrictions on long-term director terms or in order to have a board classify itself, most important California business, most corporate business at the moment in my state, is foreign incorporated. Runs to a different jurisdiction and comes back home and says we've been gone 20 minutes, and we are now a foreign corporation, we're a Delaware corporation. The basic social problem we had in California when we approached the revision of the legislation was to say, well, will we give up these value judgments which we've had for many years. And the bar association, frankly, and the banking industry thought that's what was going to happen. That we were going to get a corporation law that looked more like that of other states. What the legislature did, interestingly enough, and I think it remains to be seen because it's costing us a lot of money in litigation in front of the federal supreme court, was to say, no, if a corporation has a certain percentage of its employees in California, does a certain volume of business in California, has a certain amount of its ownership owned by shareholders in California, then even though it purports to be an Alaska corporation or a Delaware corporation, we're going to say that it's merely a pseudo foreign corporation, and we're going to apply California's laws to it. Now the Arden-Mayfair litigation is pending in the California Supreme Court where it has been on hold for nearly three years. Delaware's courts have already litigated the Arden-Mayfair case and come to the conclusion that California was attempting to deny full faith and credit to the public acts of a sister state. Ultimately, the federal supreme court will have to decide whether California's notion of pseudo foreign corporations is an idea whose time has come. The judgment of the commission was that there are no pseudo foreign corporation concepts in this bill. Instead, we increased the

reporting obligations on foreign corporations to keep us informed of the nature of their activities. We greatly increased the circumstances under which it's clear that they must seek a certificate to do business in the State of Alaska. But we have not attempted to interfere with their internal control and management such as California has done, because we haven't done it to our own people. We haven't said you have to have a board with one-year terms, that you can't classify the board, that you have to have cumulative voting. Our default mode if you don't say is, you do have one-year terms, if you do have cumulative voting and you don't have board classification. But we didn't feel that it was necessary to get involved in that position. But later on in what may be five or six years as you see the outcome of the Arden-Mayfair matter, and then if you decide you want to adopt certain similar rules, that would be an appropriate time to do that. But there is nothing here now that contains that.

BROWN: At least some of the members of the commission think the Delaware view is going to prevail in the state supreme court, and that's one of the reasons why the provision is written that way.

RODEY: Thank you, Mr. Brown.

UEHLING: This is a follow up question. And in just sort of reading through this I got the feeling what would be the situation like if you took a state like Delaware where we had a situation where companies are going to incorporate ther because it's a very pro-management kind of situation, where in California it's very pro-shareholder, the shareholder is a completely different situation, how does Alaska rate on that spectrum? Would they be considered a very pro-management situation?

FESSLER: No. The default provisions, ever since I learned to use the personal computer, I've picked up the jargon, excuse me. The provisions that are in place if you don't say otherwise of the Alaska statute today, because it's a version of the early '50's model act would today be called a pro-shareholder jurisdiction. And the provisions which would lock into place in the absence of agreement that they be otherwise under this bill are also pro-shareholder provisions. But so that Alaska would in the default mode line up looking very much more like California than Delaware. But it would be possible for people to make an intelligent and informed decision to form a very, very management oriented, reduced role fc shareholder corporation, not going as far as Delaware has gone. For instance, a good example in Delaware, it is possible that the board of directors would have the exclusive power to amend the articles and bylaws, and the shareholders could be ousted from any role at all. That would not be possible in Alaska. It isn't possible under current law with regard to the articles. It would not be possible with

regard to the bylaws should the legislature enact this bill. So it continues to leave Alaska law with most other western jurisdictions as having a pro-shareholder bias, but not going nearly as far as California.

RODEY: Are there other questions from members of the committee? If there are . . .

FESSLER: I'll remain in the room, Mr. Chairman, in case anyone does have any questions for me, but there are other witnesses desiring to appear.

RODEY: The next witness is Willis Kirkpatrick, the director of the division of banking and securities.

KIRKPATRICK: Mr. Chairman and committee members. My name is Willis Kirkpatrick. I am director of banking and securities for the State of Alaska. I'd first like to say that we have appreciated the opportunity to join with the commission as a participant in discussion in their work. I believe that any of the concerns the state has had as far as the administratio of this new code, the commission has known up front as to what the problems we've had. One of the things I'd like to point out is that what I am excited about in their work is that in a present situation where we have an old Oregon law, in a situation where we have very little, if any, state common law court cases the administration of the provisions of the Alaska Business Corporations Code as it stands today is somewhat suspect in some of its legislative intent. And to determine legislative intent, we go back to Oregon law, we go back to Oregon cases, we go back to the sparse official comments under the model code. With the passage of this bill, I think that our work as far as working with the corporations in maintaining their files is going to be a whole lot easier because of the official comments alone. Everything has been addressed. I would suggest that in considering the passage of this bill, that they make part of the record the official comments as to the new law. There is only one particular area that I have a problem with, and that is in Section 733 on page 127, in the filing of foreign corporations to do business in the State of Alaska. On line 7, beginning on line 7, it requires that together with a certified copy of its articles of incorporation all amendments to the articles . . . In other words, what they are saying here is that one of the provisions for a foreign corporation to qualify to do business in the State of Alaska, is that it would have to file its articles with the state and any amendments to those articles. In a hearing last session, we brought this up and I believe, you'd have to check with the code revision commission on this, but I believe it was agreed upon that they would reconsider that requirement to file articles. At the present time articles of foreign corporations are not filed with the state. We find that

some of our sister states, those that do have this provision, are looking at dropping them. I think the last one we've heard from is Texas. Now I don't believe that it is going to create any hardship to anybody in the State of Alaska that wishes to find out the substance of the articles of a foreign corporation. First of all, if they are looking for the officers and directors of the foreign corporation, we can look at the application they file with us giving us that particular information. If they do want a copy of the articles of incorporation or the amendments to the articles of incorporation of a foreign corporation, the place that would have the most current filing would be the state of domicile so that they are available. We would be more than happy to assist anybody that wanted that to find out the proper procedures to obtain those records. With my understanding that this provision, that the code revision commission had no particular problem with that being dropped, the fiscal note that I prepared was zeroed out. If this provision stays in, I am going to ask for a revision of the fiscal note because one of the problems we have now is just file maintenance. The biggest problem in file maintenance is amendments to articles. We receive a great number of amendments to articles every day, and one of the things we have to do is that we just don't file the amendments. A lot of times we have to look back through the files to see what the prior articles contain to see amendments are consistent. If nothing more than article order. That is the only comment that I have as far as any changes are concerned, and I am sorry I don't have an amendment prepared, but I would be most happy to. I would replace that word with a certificate of compliance executed by the officer of domicile, or the official of domicile. I am open to any questions.

RODEY: If I might ask either Chairman Abbott or Professor Fessler to respond.

ABBOTT: Yes, Mr. Chairman. We had previously agreed with Mr. Kirkpatrick that we would make that change. Unfortunately, consideration of this matter came up after the bill was printed. So it is the position of the commission that this requirement should be deleted when it was brought to our attention that it would serve no useful purpose and would impose an additional fiscal burden on the commissioner of commerce. We are in complete agreement that the provision should be deleted, and there should be no requirement to file foreign articles or amendments.

RODEY: Thank you, Chairman Abbott. Mr. Brown.

BROWN: On behalf of the commission, I am sure they would agree, it would be very nice if Professor Fessler were involved in structuring the amendment that the committee might be interested . . .

RODEY: That's a very good suggestion, Mr. Brown. Professor, would it be possible for you to prepare that amendment?

FESSLER: Certainly.

RODEY: Mr. Kirkpatrick, continue.

KIRKPATRICK: One other item that my notes show. On page 138 and 139, on line 28 of page 138 it refers to the misdemeanor, and my staff says that it should be either a rated misdemeanor A or B to be consistent with Title 9. And the same with line 9 on page 139. That also relates to a misdemeanor.

RODEY: If I might address Chairman Abbott or Professor Fessler, are we in that case talking about a Class A misdemeanor?

ABBOTT: That's our understanding, Mr. Chairman. Yes.

RODEY: If again I could request you, Professor Fessler, to prepare the appropriate amendment based on current Alaska criminal law.

FESSLER: The question has been asked, has been prepared, is one of the amendments that Chairman Abbott was referring to is being transmitted . . .

RODEY: Thanks, Professor. Obviously we can't take any official action here. If there are any questions, we'll have this prepared and delivered to committees on both sides for their consideration and Senator Hulcahy and myself will explain it on our side and . . .

COWDERY: Could I, I was wondering what financial burden would this, if we adopt this to the existing corporation for the state, would it be to conform, is there any grandfathering situations . . .

KIRKPATRICK: If I understand your question, Mr. Chairman, as to what this is going to do to existing corporations. I think the last two sections of the bill pretty well cover a timely transfer of the act, and I think we are gong to have some problems just as far as educating the corporations in switching them over. I don't see that a lasting problem. I don't see it as much more of a problem than we have now with the new corporation that is coming on board. I don't think there will be an financial, I think the problem is going to be basically on the state's side as far as getting the information out and getting the transition going. I don't envision any

economic problem on the corporation. I am wondering about correspondence fees, but . . . I don't see it as a major problem.

RODEY: I just might add that the proposed draft was written to reduce legal fees by putting a great element of certainty in there so that a layman would have a much greater understanding of the law just by reading the law without having to consult a lawyer. So I think there will be actually a reduction of attorney's fees. Are there any other questions for Mr. Kirkpatrick? If none, thank you very much Mr. Kirkpatrick. We do have floor session now at 10:00 a.m. We don't go in until 11:00 o'clock on Mondays, as a convenience to the Anchorage legislators. Would you like me to stay?

ABBOTT: Mr. Chairman, if I might, there are only two other people that intend to offer brief testimony. That's Liz Johnston and Irv Bertram.

RODEY: In consultation with House chairman, I will stay here if Senator Mulcahy is agreeable and listen to the comments of Elizabeth Johnston and Irv Bertram and then report to you, sir. Thank you, gentlemen. Next, I'd like to call Elizabeth Johnston. It's always disconcerting to be testifying and have everybody leaving. But, Senator Mulcahy and I will make up for any absence of numbers. You have the floor, madam.

JOHNSTON: Gentlemen. My name is Elizabeth Johnston. I'm general counsel to Bristol Bay Native Corporation. Today I am here speaking on behalf of the Alaska Federation of Natives concerning the bill on the revision of the corporate statutes, the profit corporate statutes. You will be delighted to know my comments will be brief. This is because we have had extensive opportunity to present our concerns before the code revision commission. By way of background, I can tell you that in the summer of 1982, the Alaska Federation of Natives created a subcommittee. And the member of the subcommittee had both regional and village corporation backgrounds, and the committee was created to review and testify on the proposed revision. We met with the code revision commission on three separate occasions and made extensive comments. Based on the receptivity of the commission to our comments, and the way they were able to meet our concerns, in April of 1983 Janie Leask, who is the president of the federation, wrote in support of the proposed revision. And she commented specifically on the quality of the new legislative scheme, on the technical commentary which has already been brought up by some of the other people. But the fact there there is technical commentary to back up the new code which should help all of us in the absence of court cases to understand the legislative history. The fact there there is this kind of backup, we feel will mean it will reduce the legal expenses for

the Native corporations. We also articulated, commented on the finance section, that it was an important reform. Unlike Professor Fessler I can read numbers, and I still feel that it is a significant accomplishment. I was forced to. So finally the only final comment is that this is a bill which does strengthen the rights of shareholders and does strengthen the requirements of periodic reporting by corporations to their shareholders. It is a pro-shareholder document, and the federation supports the revision.

RODEY: Senator Mulcahy, do you have any questions for Miss Johnston? Thank you, appreciate your coming. Next I'd like to call Irv Bertram.

BERTRAM: I'm Irv Bertram, and I am assistant counsel to Alaska Airlines. We have looked at the bill and discussed it with the commission to raise some of the concerns we have. Our bylaws and articles go back to 1938, at least the articles do. The bylaws have been changed on numerous occasions. And we did have some concerns, but we found that the commission has made some changes that will assist us in going forward. We think that the bill is very well drafted and very good and will be of benefit to the state as well as being helpful to us. In my current position as house counsel, I have an opportunity to advise management or answer questions about Alaska law. I have practiced in Alaska for a number of years before joining the airlines, and you don't feel so foolish when you have something layed out in front of you in the law. You can look at it and say, well, this is how it's done. Currently Alaska law on corporations has a number of areas where simply there is no law. And so you really have to say, gee, I don't know, maybe we can do it and maybe we can't. It's . . . you're not sure how to do something. But I think the bill answers that. It does provide a very well layed out road map, so to speak, which I think will be very helpful not only to large corporations such as ourselves, but I also believe this will be helpful to the small mom and pop operations. There is that old trite saying that ignorance of the law is no excuse. However, when the law is a body of common law with very few statutory references, it makes it fairly difficult to know what's going on. On the other hand, once things have been layed out in a fairly succinct form that can be followed, it's true a lawyer may still be required and should be used. But I think most people will have a better understanding of what corporate governess should be once they have this body of law in front of them. So we think it would be good for the state. Alaska Airlines will have to make one change in its bylaws as a result of this. It doesn't address everything we wanted. But on the other hand, we think on the whole it is very good and we do support it and would recommend it. Thank you.

RODEY: Thank you very much, Mr. Bertram. Senator

Mulcahy, do you have any questions? I am aware of the . . . if there are no other comments, Mr. Brown.

BROWN: One comment, Mr. Chairman. There have been much comment about the comments, and the people who are supporting the bill who are now part of the commission, are finding that the comments are very important. I would hope an admission to the members of the Senate and the House in the event this bill is considered, that an action be taken similar to what was taken when the criminal code revision was passed. And that is there be specifically an affirmative vote on the floor of each house approving the comments or the comments as you may have amended in concert with the commission to make a clear and unambiguous legislative history. To really make sure those are available and that they are important legislative history, since they will be relied on by people in the private sector as well as scholars.

RODEY: Thank you, Mr. Brown. That's a very good suggestion. Obviously it's wise. It's an area of law we don't know much about in terms of importance, and whether a separate vote on that really means much or not.

BROWN: Take it from Alaska's only published legal historian.

RODEY: And a distinguished member of the Fairbanks bar. I think it is a wise suggestion to incorporate in the journal and to vote separately and affirmatively on the commentary. I think it is a good and desirable method of annotating Alaska laws. It is certainly preferable to allowing Michie Company to do it back east. If there are no other comments, the committee meeting is adjourned.

PRESENTATION TO THE JOINT SENATE AND HOUSE
LABOR AND COMMERCE COMMITTEE HEARING ON
SENATE BILL NO. 246 AND HOUSE BILL NO. 343
January 23, 1984

Mr. Chairman:

My name is Elizabeth B. Johnston. I am Secretary and General Counsel of Bristol Bay Native Corporation. Today I am speaking on behalf of the Alaska Federation of Natives concerning Senate Bill No. 246 and House Bill No. 343.

My comments will be brief. This is because the Federation has already been given the opportunity to present its concerns to the Code Revision Commission.

In the summer of 1982, the Alaska Federation of Natives created a subcommittee, with both regional and village corporation experience represented, to review and testify on the proposed revision to the profit corporation code. The Code Revision Commission received testimony from the Federation subcommittee on three separate occasions and satisfied its major concerns.

In April, 1983, Janie Leask, President of the Federation, wrote in support of the proposed revision. Her letter is attached, but I would like to quote from the last paragraph. "The proposed corporations code is a comprehensive and generally careful legislative scheme of good quality. Further, it is accompanied by a technical commentary which can serve to reduce Native corporations' extensive litigation costs. The finance section is an important reform, making possible some distributions from capital, but not jeopardizing creditor's security."

I would like to add that the proposed code strengthens the rights of shareholders and the requirements of periodic reporting. In other words, the proposed bill is a pro-shareholder document.

The Federation supports this revision.

April 8, 1983

Mr. John W. Abbott, Chairman
Alaska Code Revision Commission
Pouch Y
State Capitol
Juneau, Alaska 99811

Dear Mr. Abbott:

I would like to take this opportunity to thank the Commission for fully providing the AFN with the opportunity to review and comment on the proposed Alaska Corporations Code. The AFN now supports the passage of Senate Bill No. 246 and House Bill No. 343.

The proposed Corporations Code is a comprehensive and generally careful legislative scheme of good quality. Further, it is accompanied by a technical commentary which can serve to reduce Native corporations' extensive litigation costs. The finance section is an important reform, making possible some distributions from capital, but not jeopardizing creditors' security. If you need us to testify on behalf of the Bill, we will do so.

Sincerely,

Janie Leask

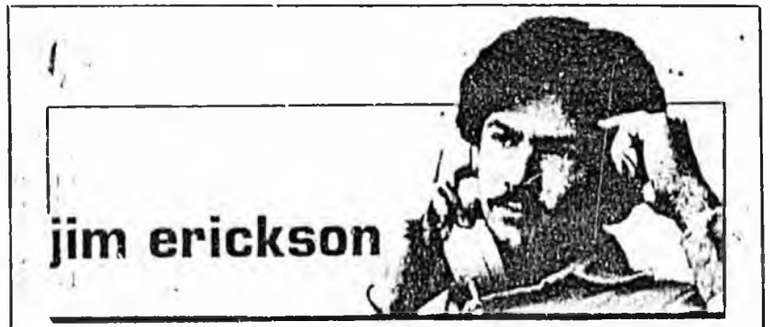
Dealing with 'lemons'

Public voices should ring clearly today at a teleconference hearing before the House Labor and Commerce Committee on a proposed state "lemon law" governing new automobile warranties. The hearing begins at 2 p.m. and deserves healthy public participation.

The law essentially would shift part of the burden of proof in dealing with defective automobiles from the consumer to the dealer and manufacturer. It provides that a consumer is entitled to either a new vehicle or a full refund if a manufacturer's defect renders it undriveable for 30 days or more during the first year of ownership.

The major effect would be to encourage dealers to stand up and pay heed to the products and warranties they offer. For the dealer who already performs warranty service promptly and efficiently, the impact of the law would be negligible, and in fact good for credibility. For the dealer who ducks or delays the demands of a good-faith warranty there would be new incentive to meet the obligations of doing business.

And for the consumer who has a right to expect automobiles under warranty to run properly, there would be an improved chance of gaining full value for a very expensive investment. That seems like a good deal for all concerned.



TROUBLESHOOTER

CONSUMER ADVISORY-ALASKA LEMON LAW: A statewide teleconference has been set for Wednesday on a proposed Alaska "lemon law," legislation that would give consumers substantially more leverage when wrangling with automobile dealers and manufacturers over warranty obligations.

Under the provisions of House Bill 344, automakers would be forced to replace or refund the purchase price of new cars that, due to manufacturing defects covered by the new-car warranty, cannot be satisfactorily repaired.

If the defect causes the car to be undriveable for 30 days or more during the first year of ownership, the car buyer would be entitled to either an identical new vehicle or a refund, including repair costs. Auto dealers would be given four chances to repair the defect.

Fred Marino, part-owner and general manager of Eero Volkswagen in Anchorage, said Monday that he felt the bill was unnecessary in light of the track record of Alaska dealers.

"If the customer has a legitimate complaint, most (dealers) really seemed to bend over backward" to help iron out difficulties, he said. "If there is a problem, none of us to our knowledge haven't got it fixed within a reasonable length of time."

Marino, who called the bill "heavy and cumbersome," added that the legislation would increase taxpayers' expense, despite legislative estimates to the contrary. "Just enacting it would cost a great deal," Marino said.

In written testimony submitted to the House Labor and Commerce Committee May 9, Assistant Attorney General Connie Sipe noted the bill gives vehicle owners the benefit of "a legal presumption that after a reasonable number of attempts to correct a deformity, that the vehicle is in fact defective or a lemon."

Sipe, head of the Consumer Protection Section of the Attorney General's Office, said under current common law warranty rights, it is up to the vehicle owner to prove a car is a lemon before the courts can compel automakers to replace a vehicle.

If HB 344 is passed, she said, that burden of proof would be shifted. If the manufacturer cannot prove a defect does not cause substantial impairment to the operation or value of the vehicle or prove the owner caused the failure by abuse or modification of the car, the car would be presumed to be a lemon and the buyer would be entitled to reimbursement.

"It is my opinion, after working in this area for seven years, that very few Alaskans, especially those who live outside the three major cities, receive full value of the warranty on their vehicles," Sipe said. "Since Alaskans pay not only the top manufacturers' suggested retail price, but usually amounts in addition to the suggested retail price, we can see that Alaskans do not get any break or allowance for their difficulty in obtaining warranty work."

Consumer Protection auto investigator Scotty Dawkins said before the House Labor and Commerce Committee May 9 that automakers routinely deliver vehicles to buyers with built-in problems.

"Often the manufacturer is aware of these defects but seldom is any voluntary action taken to correct the problems in cars that are already built," Dawkins said.

"Instead, the manufacturer relies on the predelivery inspection performed by the dealer to detect and correct these problems. What actually happens is that the buyer finds the problems after delivery and faces the hassle of attempting to have repairs completed by the dealer."

Dawkins added that new car warranties require the buyer to return to the dealer for warranty work, but "In Alaska, the fact that your new-car dealer may be hundreds of miles away somewhat complicates this requirement."

The Attorney General's Office is calling for an amendment to the bill that would require manufacturers to establish factory-authorized repair centers in towns where there are no dealers.

The public is invited to testify at Wednesday's public hearing before the House Labor and Commerce Committee. The hearing will be held via the Legislative Teleconference Network at 2 p.m. ADT. Anchorage residents who would like to participate can contact the Legislative Information Office, 1024 W. 6th Ave (278-9624).

Alaska's auto dealers protest 'lemon law' proposal

Dealers: Law unneeded Consumer rep: Yes it is

By DEBBIE REINWAND ROSE
Empire Staff Reporter

Alaska car dealers converged on teleconference sites throughout the state this morning to protest a bill its sponsors say will protect consumers who purchase autos.

Labeled the "lemon law," the legislation sponsored by local Reps. Jim Duncan and Mike Miller and Sen. Bill Ray would force car dealers to adhere strictly to the advertised warranty on a new car.

If a customer complained of a "substantial" problem not caused by owner abuse, the manufacturer or distributor would be given four chances to fix the vehicle. Failing that, the customer could receive a refund or a new car to replace the defective model.

Testimony at today's teleconference, organized at the request of car dealers in the state, ran heavily against the bill. Input came primarily from auto distributors.

Fairbanks car dealer James Masters said the consumer already has plenty of protection from defective autos.

"In case of a difference between the consumer and the dealership, they can go directly to the dealer, or the manufacturer," he said. "If that doesn't work, the (state) Consumer Protection Division is very good at following through on these complaints."

Consumer Protection officials, however, favored the legislation as offering the car buyer "some recourse" when dealing with faulty vehicles, according to Scotty Dawkins in the Anchorage Consumer Protection office.

"In Alaska, it often takes two weeks or more just to get the cars into the service department. Not one manufacturer has a service representative in the state, so the consumer has to wait six to eight weeks for that rep to come up here," he said. When dealing with many warranty problems, the defect often must be checked by the service representative.

Alaska has a booming automobile sales business, Dawkins said, and dealers should be responsive to the public's needs. Last year, 27,705 cars were sold in the state for an average of 1,148 sales per distributorship. In the rest of the nation, the average is 205 cars per year for each dealership, he added.

As an example of problems faced by Alaska car owners, Dawkins cited several complaints received over defective cars:

- One district court judge had his car worked on 10 times for, among other things, a defective horn. After all attempts to repair the car had failed, he was offered half the $9,000 sticker price on a trade-in, said Dawkins.
- An Alaska State Trooper had his station wagon worked on eight times, and ended up having the engine replaced after the protection agency intervened in the matter.
- After purchasing a car in Anchorage, complete with a $700 service contract, a Valdez resident had to pay towing fees between Anchorage and Valdez when the engine quit running. He had been assured by the dealership in Anchorage that his service contract would be honored in Valdez, Dawkins said.

Continued on Page 2

'Lemon'...

Continued from Page 1

Bill sponsor Miller said the crux of the testimony revolved around "people giving excuses for not conforming to the warranty."

"We are not trying to place the burden on the dealer. ... They are missing the point of the bill. If there is a major problem with a car, then it should be corrected. The manufacturer issues the warranty, and they are ultimately responsible for living up to that warranty," he said.

Extensive testimony from disgruntled car dealers continued until adjournment of the meeting. House Labor and Commerce Chairman Walt Furnace, R-Anchorage, has scheduled a statewide teleconference on the bill for May 18, from 4 to 6 p.m. in the Labor and Commerce room in the Behrends Building.

Lemon law would force

dealers to replace cars

By JIM ERICKSON
Daily News reporter

Alaska auto dealers would be forced to buy back or replace automotive "lemons," defective new cars that defy all attempts at repair, if legislation introduced recently in the state Senate and House becomes law.

House Bill 344 calls for replacement of a new car or a refund of the purchase price when manufacturing defects make the car undriveable for 30 days or more during the first year of ownership.

The so-called "lemon law" is scheduled for a House Labor and Commerce Committee hearing Monday.

An identical bill introduced in the Senate by Sen. Bill Ray, D-Juneau, has not been scheduled for a hearing.

The House measure was introduced last month by Rep. Mike Miller, D-Juneau. Miller said Saturday the legislation would compel dealers and manufacturers to honor new-car warranties promptly.

"The legislation doesn't spell out the warranty," he cautioned. "That's up to the manufacturer. What it does do is put full force of the state law behind customer satisfaction of that warranty."

If the defect poses a safety hazard, the car must be repaired within 14 days, the measure states.

In all cases, dealers would be allowed four chances to fix the car, before the buyer could demand a refund or a replacement. The measure applies only to failures covered by new-car warranties, and only during the first year of ownership.

"What we are talking about is correcting major problems of the vehicle," Miller said. "This is not in regard to trivial repairs or problems that result due to owner abuse."

Similar legislation has been adopted in California, Connecticut, Montana and Wyoming, said legislative aide Denise Zachary. Ten other states are considering lemon laws, she said.

Monday's hearing will be linked to Anchorage, Fairbanks and Ketchikan via the state teleconference network.

Zachary said the public can comment on the bill by attending the teleconference, to be held in Anchorage at the Anchorage Legislative Information Office, 1024 W. 6th Ave.

The teleconference will begin at 7 a.m.

3/8/83 Daily News

s a phrase for every misdeed

(Not to mention the ultimate disaster: "If you eat that now, you won't be hungry for dinner!")

And then there is the chapter on Questions Without Answers. These generally come along during the teen-age years.

Questions like, "You're not going out dressed like that, are you?"

Or, "You know this goes against everything we've ever taught you, don't you?"

Not to mention the all-time winner, which spans most of the formative years: "Just what do you think you're doing?"

Experienced mothers know they can mix and match these phrases for special effect, as in: "Just where do you think you're going dressed like that?"

"When you're grown and have children of your own, that's when."

This last, especially, falls under the definition of all-purpose Motherese, touching as it does on the perpetually ripe arena of life after one has children of one's own.

Of course, it's not all conflict and threats in Motherese. There's the Broken Heart chapter, things mothers say to make you feel better. Things like, "Ten years from now this will all seem funny" and "Just think of it as good experience" — not to mention the all-time classic, "Well, just consider yourself lucky, a man will never marry a girl like that!"

I suppose with changing mores they'll be wanting to update the Mother's Phrase Book before long, make it a little more hip, but I

'Lemon law' deserves support

Sometimes it seems that all cars should be painted yellow just to warn buyers what they are getting themselves into. All too often nowadays, expensive cars transform themselves into "lemons" before their owners' very eyes.

Before a sale is made, salesmen point out all of the wonderful aspects of a new car. It's pretty, the doors slam with a solid "thunk" and it sounds good idling there in front of the dealer.

But a select few cars turn into "lemons," some the minute they are driven off the lot. Some don't start right; some don't stop right; some don't do anything right.

Any dealer is more than happy to provide buyers with a copy of the warranty manufacturers give for their cars. Some last for a year; some last for five years. But unless the dealer and manufacturer back up the claims of those warranties, they aren't worth the paper they are printed on.

Introduced in the Alaska Legislature last week was a bill aimed at taking the "lemon" out of the lives of Alaska car buyers. The bill, whose prime sponsors are Juneau Sen. Bill Ray in the Senate and Reps. Jim Duncan and Mike Miller in the House, does nothing more than make manufacturers and dealers live up the promises made in warranties.

For most people, buying an automobile is the second-largest purchase they will make in their lives. The largest purchase, of course, is a home, but it should be remembered that the price of some 1983 cars would buy a nice house 20 years ago.

Because of the tremendous expense of cars, no one should be stuck with a "lemon" — a car that doesn't work properly. Yet we all know people with horror stories about how their expensive new cars went to pot on them and they were unable to get satisfaction from the dealer.

It is for those people that the "lemon law" before the Legislature is meant. A warranty is not written on paper that self-destructs once the sales agreement is signed. It is a document in which the manufacturer, through the dealer, promises to make a car run properly, no ifs, ands or buts.

Dealers should welcome the advent of a "lemon law" in Alaska. It means dealers that have been standing behind their products won't be affected in the slightest. Other dealers, who are unwilling to stand behind their products and the warranties that go with them, will — and should — find themselves having to shape up.

The "lemon law" bill deserves your support.

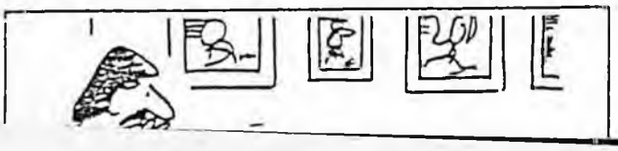
Berry's World



We went up some stairs to a glass-enclosed booth.

When Widget shut the door he said, "I want you to meet my Master Robot, Turnbill. He is programmed to program the robots on the floor."

Turnbill gave me a steely look and reluctantly put out his arm which I shook.

"How many sneakers did we make today, Turnbill?" Widget asked.

Turnbill's lights blinked, and a deep voice said, 12,890."

Widget rubbed his hands. "I used to make that many in a week.

Eyeing the ne

WASHINGTON (NEA) — "I can make a million through the union," Jackie Presser boasted several years ago to a magazine in his hometown of Cleveland. Indeed, the union has made him rich — and now it's about to make him famous as well.

The union is the International Brotherhood of Teamsters, Chauffeurs, Warehousemen & Helpers of America, arguably the country's most corrupt labor organization.

When the Teamsters' executive board met recently to select a new president for the union, it could have chosen a leader whose reputation had not been blackened by compelling evidence of regular affiliation with organized crime figures.

M.E. (Andy) Anderson, area director of the union's Western Conference, is hardly a candidate for sainthood but he surely would have been more suitable as president than Presser if the Teamsters were serious about restoring at last a semblance of integrity to their organization.

The same is true, although perhaps to a lesser extent, of the other two "dark horse" contenders for the presidency — Joseph W. Morgan, area director of the union's Southern Conference and Donald Peters, a Chicago Teamster leader.

But, in an election preordained as far back as the union's 1981 convention, all three of those men were summarily rejected in favor of Presser, a glib, portly 56-year-old veteran of more than three decades as a Teamster organizer.

A detailed affidavit filed by the FBI in connection with a criminal case in U.S. District Court in Los Angeles quoted FBI informants as stating that Presser was "controlled" by members of the Mafia.

In testimony before the New Jersey Commission of Investigation, a state police sergeant identified Presser as an intermediary for syndicate members seeking loans from the Teamsters' pension and welfare funds.

Some of the most disturbing allegations about Presser come from Aladena "Jimmy the Weasel" Fratianno, believed to be the first Mafia member to testify against another Mafioso in court. His testimony has aided federal prosecutors to convict approximately two dozen organized crime figures.

According to Fratianno, Presser's union activities generally have been conducted under the direction and control of James T. "Blackie" Licavoli, the reputed head of the Cleveland "family" of the nationwide crime syndicate. "Jackie Presser, he told me himself that 'I don't do nothing unless Blackie tells me,'" Fratianno said in sworn court testimony.

How does Presser respond to those allegations? He blithely denies any knowledge of La Cosa Nostra: "There's no organized crime that I know of as a person."

Presser offers a similar see-no-evil response to the documented examples of massive abuse of the union's Central States, Southeast and Southwest Areas Pension Fund: "Despite the many claims and accusations of various governmental agencies, the Central States (Fund) is a sound, well managed plan."

In 1976, Presser's father, William, was forced to resign as a trustee of the fund after he invoked his Fifth Amendment right against self-incrimination while being interrogated about trust fund abuses by federal investigators.

William Presser's position as a fund trustee was inherited by his son, Jackie, but he too was forced to resign only one year later and is one of numerous Teamster leaders being sued by the Justice Department for approving more than

'Lemon' bill would put the squeeze

By DEBBIE REINWAND ROSE
Empire Staff Reporter

Hearings begin this week on a bill that should warm the hearts of everyone who has ever bought a "lemon" — a car that for some reason doesn't work right.

Commonly known as the "lemon law," this legislation, introduced by the Juneau delegation, would bind car dealers under state law to adhere strictly to the warranty they advertised when selling a car.

Under it, if a customer complains of a "substantial" malfunction during the warranty term, the dealer or manufacturer would have to repair it. The dealer would be given four chances to bring the car up to par, and failing that, would then have to refund the customer's money or provide a new car.

"It's not an overly restrictive law; if anything it's conservative and could be tighter," said Rep. Mike Miller, D-Juneau. "What we're talking about correcting are major problems with the vehicle. This is not in regard to trivial repairs or problems that result because of owner abuse."

Currently, 12 states have similar legislation on the books. Montana and Wyoming just passed lemon laws.

While the bill is aimed at protecting the consumer, it should not unnecessarily alarm car manufacturers.

"One feature is that the legislation doesn't spell out what the warranty is — that's up to the manufacturer. What it does is put the full force of state law behind customer satisfaction of that warranty," said Miller.

"The idea is if the distributor or parent company issues a warranty as a selling point for their vehicles, they should live up to it; no sloughing off," said Sen. Bill Ray, D-Juneau.

And Ray should know. Like a number of people who have contacted him about the bill, the senator once owned a "lemon."

"A lot of the time, the car wouldn't start. The dealer kept saying we didn't know how to operate it. ... The car ended up being recalled because of a problem with the starter," he said.

During that experience, Ray ran into delays getting the car fixed. He advocated the clause in the bill putting a limit on how long the car can be out of commission. That provision would allow the customer a refund or new car if the "lemon" has been out of service for 30 days during the warranty period or one year, or if repair services are not available to the owner for reasons beyond the owner's control.

Rep. Jim Duncan, D-Juneau, has also had a "couple of lemons," and backs the bill because it would benefit Alaskans.

Continued from page 1

"You run into this every once in awhile and it should be cleared up so the consumer is adequately protected," he said.

The measure has been introduced in both houses, and while House passage is unclear, the co-sponsorship of several majority coalition members may help the bill.

The first hearing on the lemon law will be Thursday at 8:45 a.m. in the Labor and Commerce Committee, room 210 in the Behrends Building.

Buyer gets $85,000 for lemon

MEMPHIS, Tenn. (AP) — A man who complained about the treatment he got from an auto dealer after his new car burned too much oil has been awarded $85,000 by a Circuit Court jury.

Charles Pardue was awarded $10,000 for actual loss and $75,000 in punitive damages in the judgment reached Tuesday.

"As far as the repair of his car was concerned, it was poorly handled," said jury foreman James Reid Jr.

Reid said jurors discussed awards ranging from $20,000 to $500,000 but settled on the final figure as a "fair compromise."

Randall Noel, the lawyer for Lewis Ford Inc., where Pardue bought his 1976 Ford Grenada, said his client is considering an appeal.

Pardue, a resident of Oakland, Tenn., bought the car in 1977 for $5,178, but said it soon began using too much oil.

He said it took two years to get the car fixed and he was charged $1,600 for a new engine he never ordered.

Mr. Walt Furnace, Chairman
House Labor and Commerce Committee
Alaska State Capitol
Juneau, Alaska 99801

Dear Mr. Furnace:

We have been informed that the House Labor and Commerce Committee is considering H-344 which would, in simplest terms, require a motor vehicle manufacturer or importer to replace or repurchase a vehicle if it suffered the "same nonconformity" four times or if the vehicle is out of service for warranty repairs thirty calendar days during the vehicle's first year.

Automobile Importers of America, Inc. (AIA) and its sixteen Members strongly oppose this "replace or repurchase" bill as counterproductive for consumers, car dealers, and car warrantors (i.e., manufacturers or importers). This bill is apparently based on two faulty premises. First, that a consumer is without an effective remedy if a vehicle repeatedly breaks down other than for the vehicle to be "fixed as best it can be". This is incorrect. The Uniform Commercial Code provides for revocation of acceptance of a product where the product has a defect or nonconformity which substantially impairs the product's value to the purchaser. Such revocation can result in a rescission of the purchase contract (i.e., purchaser gets his money back and returns the product) if the defect or nonconformity cannot be cured in a reasonable time and manner. There have been several cases - in both courts and private informal dispute resolution processes - where rescission has occurred in new motor vehicle cases.

The other faulty premise upon which the bill is based is that it is possible to set arbitrary figures for the motor vehicle industry representing "reasonable" number of attempts to cure the "same nonconformity". There are so many different models of motor vehicles with varying levels of mechanical sophistication, varying levels of product and parts distribution sophistication, and varying levels of reasonable consumer expectations, that it should be self evident that no one set of numbers could be reasonable for all vehicles. Moreover, even for a single, relatively simple vehicle model, favored with a comprehensive, sophisticated product service and replacement parts network, and with reasonably modest consumer expectations because of its low price, that vehicle will have some 17,000 parts and many different components and systems. No one number can possibly be used as a "reasonable" standard for repair attempts for all possible mechanical problems with that vehicle. Some defects are so obvious that two repair attempts are too many; some so subtle that five repair attempts are not unreasonable.

It is the great advantage of the existing UCC system that each case is decided on its own merits without the intervention of arbitrary standards.

In addition to unnecessarily complicating existing reasonable remedies, the bill would be counter-productive in several respects. Among them are:

(1) Unrealistic increased consumer expectations. As simple but little known as the UCC remedy - and its availability through the courts and informal dispute resolution process - is to consumers, this complex bill is sure to be misunderstood by them to guarantee them greater rights than it does. The inevitable result will be consumer disappointment with the motor vehicle industry and the law, including the way it is written, implemented and interpreted. Consumers will become ever more cynical about all of us, industry and government.

(2) Increased litigation. Experience teaches us that any "consumer" legislation leads to more litigation. Because of the increased consumer expectations discussed above, there will be more disputes than usual over vehicle service and warranties leading to more litigation.

(3) Reduced "goodwill" warranty work. Every manufacturer approves some "goodwill" warranty work, that is, payment for service not covered by the warranty but done in an effort to

maintain the consumer's goodwill. Typical are examinations and adjustments in response to consumer complaints that the fuel economy of the vehicle is not as great as expected. However, under this bill, such goodwill service might count as one of four repair attempts. Therefore, the warrantor will be less likely to go beyond the precise language of the warranty strictly as a matter of defense against possible future claims.

(4) Increased dealer disputes. Just as the bill will surely increase consumer disputes, so also will it cause more dealer disputes. Fewer "goodwill" warranty approvals will mean the dealer will have to charge the consumer - a sure source of conflict. On the other side of the dealer's business, consumer claims against the manufacturer are sure to bring the dealer into many of the disputes on a "claim over" basis (e.g., were the repeated repair attempts the result of inadequate dealer repairs?

(5) Increase costs - for everyone. The bill would necessitate the creation and maintenance of records not now kept, e.g., number of repair attempts, more detailed explanation of the nonconformity involved, numbers of days the vehicle is out of service for repair. This information is difficult to assemble from one dealer, but where multiple dealers are involved, as where the consumer goes to a second dealer when dissatisfied with the results from the first, the difficulties go up geometrically. Dealer and manufacturer litigation costs will also go up. All these costs eventually find their way into the price of the product to be borne by the consumer.

Finally, we submit that the bill, even if it were appropriate in basis and concept, is inartfully drafted creating ambiguous, unfair, and unintended results. For example, the provision on informal dispute resolution processes would seriously damage the utility of the dealer established AUTOCAP programs utilized by all sixteen AIA Members and American Motor Corporation to resolve consumer warranty disputes. The bill would apparently cull out AUTOCAPs from the "accepted" informal dispute resolution processes despite their proven worth and status as the most widely used such process in the motor vehicle industry. This is but one example of several such anomolies.

AIA stands ready to discuss with you or any member of your staff the specific problems posed by H-344. Please contact me or Diane DePould, Esq., AIA's General Counsel at your convenience.

Respectfully submitted,

AUTOMOBILE IMPORTERS OF AMERICA, INC.

Re: House Bill 344

Dear Jeff:

As a result of our conversation on Tuesday, April 26, I am sending you this letter outlining our concerns with HB 344, the lemon car bill, as it is presently drafted. As I indicated, one of the things we like to do if at all possible is to keep uniformity and consistency from one state to the other, if in fact the respective state legislature is desirous of passing such a bill.

On page 1, line 12 in Section 45.45.300, we would like to see the words "in writing" between "nonconformity" and "to the." In addition, on line 13 following the word "manufacturer" remove the language through line 14. The reason is that if the manufacturer has the responsibility of buying the vehicle back or refunding the consumer his money, it is important that we be aware of the fact there is a nonconformity of the vehicle. The only way we can achieve this is by having the consumer provide us in writing the fact that he is willing to pursue the third party settlement procedure as outlined in (h), page 3. If the consumer notifies the distributor, agent or dealer, the likelihood of the manufacturer receiving such communication is remote, plus the fact there could be a significant time lapse.

As far as including the terms "distributor, agent or dealer" in the rest of the language throughout the bill, that does not create a problem.

On page 1, line 26, we would like to see the word "comparable" inserted between "new" and "motor vehicle." This would allow for us to try to work out with the consumer a replacement vehicle as close as possible but perhaps not exactly like the one he previously had due to its unavailability. A problem in this area could occur particularly if the consumer buys the vehicle late in the model year.

On page 1, line 27, we would like to see the words "excluding interest" inserted after "collateral charges." We have no problem refunding the full purchase price plus any taxes or license or other fees, but we don't like to include interest, as that is the individual's choice as to how he purchases the vehicle and as to what interest rate he pays.

On page 2, line 15, include the word "business" between the words "more" and "days." The rationale behind this is that 30 or more business days in fact gives the dealer or manufacturer about one-third more time to find and correct the difficulty. Generally there are about 22 working days in a month and with "business" days it does allow us some additional time for a serious problem.

Sections (e) and (f) on page 2 are new sections which I have not seen in any other state's repair/replace bill. Section (e), relating to the unsafe defect, seems overly restrictive in reducing the repair/replace time to 14 days. Section i (3) talks about "substantially impairs use and value," which could in fact relate to the safety of the vehicle, but in addition to that, who would make the determination of whether or not it is unsafe? Regarding section (f), the remedy is already provided in section (b) of the bill which would require the manufacturer to comply with the decision of the third party mechanism, therefore making section (f) unnecessary. Also, there has been a general practice throughout the industry wherein the third party settlement procedure is binding on the manufacturer and he must comply with the decision, or the consumer can pursue his case in court.

On page 3, line 3, (h), we would like to have the word "substantially" inserted between "that" and "complies." The rationale is that the Federal Trade Commission regulations under Part 703 are voluminous and in fact the settlement procedure is not binding on either party, but in practice we consider it to be binding on us. Additionally, there are many paperwork procedures in those federal regulations which don't really add to the benefit of the consumer, but are "make work" for the informal dispute settlement procedure mechanism. Therefore, including the word "substantially" before "complies" means that the program must basically meet all the provisions but not to the letter.

The intent of this legislation in the other states is to try to prevent the problem from ending up in court where the consumer has to spend time and money in order to have his problem resolved. The industry in fact has voluntarily embarked on this type of program some four years ago and it appears to be working out pretty well on a voluntary basis. Again, this is designed to resolve the consumer's problem in a quick and expeditious way but still does not preclude them from going to court if in fact they are not satisfied with the third party dispute procedure's decision.

I will give you a call after you have had a chance to look this over and we can discuss it further at that time.

Thank you very much for your consideration.

Sincerely,

James W. Austin
Public Affairs Manager

Assembly Bill No. 1787

CHAPTER 388

An act to amend Section 1793.2 of the Civil Code, relating to warranties.

[Approved by Governor July 7, 1982. Filed with Secretary of State July 7, 1982.]

LEGISLATIVE COUNSEL'S DIGEST

AB 1787, Tanner. Warranties.

Under existing law, a manufacturer who is unable to service or repair goods to conform to applicable express warranties after a reasonable number of attempts must either replace the goods or reimburse the buyer, as specified.

This bill would provide that it shall be presumed that a reasonable number of attempts have been undertaken to conform a new motor vehicle, as defined, excluding motorcycles, motorhomes, and off-road vehicles, to the applicable express warranties if within one year or 12,000 miles (1) the same nonconformity, as defined, has been subject to repair 4 or more times by the manufacturer or its agents and the buyer has directly notified the manufacturer of the need for repair, as specified; or (2) the vehicle is out of service by reason of repair for a cumulative total of more than 30 calendar days since the delivery of the vehicle to the buyer. The bill would provide that the presumption may not be asserted by the buyer until after the buyer has resorted to an existing qualified third party dispute resolution process, as defined. The bill would also provide that a manufacturer shall be bound by a decision of the third party process if the buyer elects to accept it, and that if the buyer is dissatisfied with the third party decision the buyer may assert the presumption in an action to enforce the buyer's rights, as specified.

The people of the State of California do enact as follows:

SECTION 1. Section 1793.2 of the Civil Code is amended to read:

1793.2. (a) Every manufacturer of consumer goods sold in this state and for which the manufacturer has made an express warranty shall:

(1) Maintain in this state sufficient service and repair facilities reasonably close to all areas where its consumer goods are sold to carry out the terms of such warranties or designate and authorize in this state as service and repair facilities independent repair or service facilities reasonably close to all areas where its consumer goods are sold to carry out the terms of such warranties.

As a means of complying with paragraph (1) of this subdivision, a manufacturer shall be permitted to enter into warranty service

contracts with independent service and repair facilities. The warranty service contracts may provide for a fixed schedule of rates to be charged for warranty service or warranty repair work, however, the rates fixed by such contracts shall be in conformity with the requirements of subdivision (c) of Section 1793.3. The rates established pursuant to subdivision (c) of Section 1793.3, between the manufacturer and the independent service and repair facility, shall not preclude a good-faith discount which is reasonably related to reduced credit and general overhead cost factors arising from the manufacturer's payment of warranty charges direct to the independent service and repair facility. The warranty service contracts authorized by this paragraph shall not be executed to cover a period of time in excess of one year.

(2) In the event of a failure to comply with paragraph (1) of this subdivision, be subject to the provisions of Section 1793.5.

(b) Where such service and repair facilities are maintained in this state and service or repair of the goods is necessary because they do not conform with the applicable express warranties, service and repair shall be commenced within a reasonable time by the manufacturer or its representative in this state. Unless the buyer agrees in writing to the contrary, the goods must be serviced or repaired so as to conform to the applicable warranties within 30 days. Delay caused by conditions beyond the control of the manufacturer or his representatives shall serve to extend this 30-day requirement. Where such delay arises, conforming goods shall be tendered as soon as possible following termination of the condition giving rise to the delay.

(c) It shall be the duty of the buyer to deliver nonconforming goods to the manufacturer's service and repair facility within this state, unless, due to reasons of size and weight, or method of attachment, or method of installation, or nature of the nonconformity, such delivery cannot reasonably be accomplished. Should the buyer be unable to effect return of nonconforming goods for any of the above reasons, he shall notify the manufacturer or its nearest service and repair facility within the state. Written notice of nonconformity to the manufacturer or its service and repair facility shall constitute return of the goods for purposes of this section. Upon receipt of such notice of nonconformity the manufacturer shall, at its option, service or repair the goods at the buyer's residence, or pick up the goods for service and repair, or arrange for transporting the goods to its service and repair facility. All reasonable costs of transporting the goods when, pursuant to the above, a buyer is unable to effect return shall be at the manufacturer's expense. The reasonable costs of transporting nonconforming goods after delivery to the service and repair facility until return of the goods to the buyer shall be at the manufacturer's expense.

(d) Should the manufacturer or its representative in this state be unable to service or repair the goods to conform to the applicable

express warranties after a reasonable number of attempts, the manufacturer shall either replace the goods or reimburse the buyer in an amount equal to the purchase price paid by the buyer, less that amount directly attributable to use by the buyer prior to the discovery of the nonconformity.

(e) (1) It shall be presumed that a reasonable number of attempts have been made to conform a new motor vehicle to the applicable express warranties if, within one year from delivery to the buyer or 12,000 miles, whichever occurs first, either (A) the same nonconformity has been subject to repair four or more times by the manufacturer or its agents and the buyer has at least once directly notified the manufacturer of the need for the repair of the nonconformity, or (B) the vehicle is out of service by reason of repair of nonconformities by the manufacturer or its agents for a cumulative total of more than 30 calendar days since delivery of the vehicle to the buyer. The 30-day limit shall be extended only if repairs cannot be performed due to conditions beyond the control of the manufacturer or its agents. The buyer shall be required to directly notify the manufacturer pursuant to subparagraph (A) only if the manufacturer has clearly and conspicuously disclosed to the buyer, with the warranty or the owner's manual, the provisions of this subdivision and that of subdivision (d), including the requirement that the buyer must notify the manufacturer directly pursuant to subparagraph (A). This presumption shall be a rebuttable presumption affecting the burden of proof in any action to enforce the buyer's rights under subdivision (d) and shall not be construed to limit those rights.

(2) If a qualified third party dispute resolution process exists, and the buyer receives timely notification in writing of the availability of a third party process with a description of its operation and effect, the presumption in paragraph (1) may not be asserted by the buyer until after the buyer has initially resorted to the third party process as required in paragraph (3). Notification of the availability of the third party process is not timely if the buyer suffers any prejudice resulting from any delay in giving the notification. If a qualified third party dispute resolution process does not exist, or if the buyer is dissatisfied with the third party decision, or if the manufacturer or its agent neglects to promptly fulfill the terms of such third party decision, the buyer may assert the presumption provided in paragraph (1) in an action to enforce the buyer's rights under subdivision (d). The findings and decision of the third party shall be admissible in evidence in the action without further foundation. Any period of limitation of actions under any federal or California laws with respect to any person shall be extended for a period equal to the number of days between the date a complaint is filed with a third party dispute resolution process and the date of its decision or the date before which the manufacturer or its agent is required by the decision to fulfill its terms, whichever occurs later.

(3) A qualified third party dispute resolution process shall be one that complies with the Federal Trade Commission's minimum requirements for informal dispute settlement procedures as set forth in the Commission's regulations at 16 Code of Federal Regulations Part 703; that renders decisions which are binding on the manufacturer if the buyer elects to accept the decision; that prescribes a reasonable time not to exceed 30 days, within which the manufacturer or its agents must fulfill the terms of those decisions; and that each year provides to the Department of Motor Vehicles a report of its annual audit required by the Commission's regulations on informal dispute resolution procedures.

(4) For the purposes of this subdivision the following terms have the following meanings:

(A) "Nonconformity" means a nonconformity which substantially impairs the use, value, or safety of the new motor vehicle.

(B) "New motor vehicle" means a new motor vehicle which is used or bought for use primarily for personal, family, or household purposes, but does not include motorcycles, motorhomes, or off-road vehicles.

May 1983

DEPARTMENT OF LAW -- CONSUMER PROTECTION SECTION

AUTOMOTIVE WARRANTY COMPLAINTS

A Note on Complaint Statistics: A total of 133 auto warranty complaints were formally filed with Consumer Protection from January 1981 to April 1983. This figure, although significant, does not necessarily reflect the total number of warranty problems in Alaska.

A study by T.A.R.P. Inc., a Washington D.C. based research firm, revealed that 96 percent (96%) of consumers with a complaint never even tell the business of the problem, much less complain to a government agency. The Consumer Protection Section's experience over a ten year period is that for each consumer who complains, there are probably five or more additional consumers in a similar situation. Many Alaskans do not file a complaint with Consumer Protection because: they don't know we exist, they are distant from our offices, or our limited ability to negotiate voluntary settlements may not satisfy their needs. National automobile industry complaint statistics show that three percent (3%) of all new car buyers feel they were sold a defective vehicle and are frustrated in their attempts to have the defects corrected. If this three percent number holds true in Alaska (and indeed it might be higher) last year alone 846 Alaskans purchased defective vehicles that may meet the criteria established in HB 344.

AN ANALYSIS OF AUTO WARRANTY COMPLAINTS

January 1981 - April 1983

TOTAL NUMBER WARRANTY COMPLAINTS 133

REGIONAL BREAKDOWN:	Number	Percentage
South Central/Anchorage	101	76%
Interior/Fairbanks	14	10%
Southeast/Juneau	18	14%

COMPLAINTS BY PRIMARY ALLEGATIONS:

Multiple Repairs to Same Defect	28	22%
Unreasonable Delay in Repairs	17	14%
Multiple Defects	27	20%
Safety Related Defect	13	10%
Complaint Involves Defect Under Federal Investigation (FTC, NHTSA, EPA, ect.)	12	9%
Paint, Water Leak	7	6%
Miscellaneous	10	8%

Total Complaints 133

DISPOSITION OF WARRANTY COMPLAINTS:	Number	Percentage
Mediated to Consumer's Satisfaction ....TOTAL:	73	55%

	(48)	(36%)
WARRANTY COMPLAINTS NOW PENDING: .....TOTAL:	12	9%
Anchorage	8	6%
Fairbanks	2	2%
Juneau	2	2%

ECONOMIC IMPACT ON CONSUMERS

The owner of a defective vehicle suffers real economic harm, measured in: (1) hours/days of lost work, (2) cost of substitute transportation, and (3) after the warranty expires, cost of numerous repairs due to aftereffects of the defect.

Also, the economic life and value of a defective vehicle is seriously lessened, and this economic truth is recognized by the automobile industry itself. The following example is taken from the June 1983 "Blue Book," a widely used guide to used car values. Calculation of the Blue Book resale price of a 1982 Cadillac includes a deduction of $1,335. because the vehicle is equipped with a diesel engine which has become nationally recognized as seriously defective. This sharp decrease in value, in comparison to a non-diesel version of the same Cadillac, is made despite the fact that this particular diesel engine had cost the owner $925. extra at the time of purchase. Thus, the owner of the defective diesel vehicle can be said to have suffered an economic loss of $2,460. in the value of his/her defective vehicle in comparison to the owner of a similar Cadillac without the defect.

SUBJECT: HB 344
Motor Vehicle
Warranties

The weekly newspaper "Automotive News" reported that the average 1982 automobile sold for $9910.00. In Alaska I'm sure this figure is considerably higher, however, even at this price vehicles routinely are delivered to buyers with built-in problems. General Motors recently said "When a product is mass-produced, it is possible that from time to time a particular item may be completed and yet contain a defect in material or workmanship". GM was speaking to the problems with the Oldsmobile diesel engine, the Chevette transmission they installed in their full size cars and the thousands of camshafts that failed in the 305/350 Chevrolet V8 since 1974. GM was making the understatement of the year, when they made this admission.

Consumer Reports often finds over twelve built-in defects in the new cars they test. Often the manufacturer is aware of these defects but seldom is any voluntary action taken to correct the problems in cars that are already built. Instead the

manufacturer relies on the predelivery inspection preformed by the dealer to detect and correct these problems. What actually happens is that the buyer finds the problems after delivery and faces the hassle of attempting to have repairs completed by the dealer.

Most, if not all new car warranties require that you take your car back to the dealer for these warranty repairs. In Alaska the fact that your new car dealer may be hundreds of miles away somewhat complicates this requirement.

Even if you live in the Anchorage area warranty service can be a problem. Consumers often report to me that it takes two weeks or more just to get their car into the dealer's repair shop. It is clear many Alaskan automobile dealer's lack adequate service departments for the number of vehicles they sell. Indeed, I was recently told by a major manufacturer's representative that their largest Alaskan dealer had half the number of mechanics they should have, by national standards. Indeed, it is not unusual to find an Alaskan dealership that has more sales personnel than it has mechanics.

Last year the 25 Alaskan new car dealers sold 27,705 new vehicles, which works out to be 1,148 new vehicles per dealership. Automotive News of May 1983, reports the sales per dealer of the average GM single line dealer is 265 vehicles. The

average Alaskan automobile dealership is big business with the average gross sales in excess of $10,480,000. Indeed Alaska is host to two of the most profitable dealerships in the country and the only full line GM dealer this side of Kuwait.

Despite the healthy condition of the auto dealers in Alaska, Alaskan buyers of new cars have problems when it comes to obtaining service on the defective products they were sold. What recourse do these buyers have? In Alaska very little. While all vehicle manufacturers have a service support system spread across the country, a system that includes thousands of employees and dozens of offices, not one manufacturer has a office or an employee in this state that is responsible for any of the aspects of customer service. An Alaskan with vehicle problems has to rely on an Oregon or Washington service representative that visits once every 6 to 8, weeks or long distance telephone calls to Seattle, California or Detroit. In other states most of the manufacturers have set up third-party arbitration systems to help deal with these problems. In Alaska nobody has as of this date. Instead you may be referred to a Seattle based arbitration programs. A consumer may seek redress through litigation. However, the Small Claims limit of $2000.00 precludes most of these cases. Alaskan attorneys normally are reluctant to handle these cases due to the lack of statutory definitions and minimal case law, besides the time and expense involved.

I don't wish to waste the committee's time with any unnecessary rhetoric but let me outline five separate complaints that I have recently been involved with. The first complaint came from a District Court Judge who for 18 mont had been trying to have his 1980 vehicle's thirst for engine oil and an inoperative horn repaired. The dealer who had worked on this problem 10 times told the judge that the warranty had now expired, and since the dealer didn't build the car just sold it, he was not responsible. Instead the dealer offered half of the $9000 selling price in trade for a new car. The judge then contacted the manufacturer only to be rebuffed. They would not even return his calls. It is well known that this brand of vehicle had an oil-burning defect but the Alaskan industry refused to acknowledge it.

The second complaint came from a Valdez resident who purchased a car from an Anchorage dealer. The salesman assured the buyer that warranty work could be handled in Valdez. The buyer also bought an additional service contract to expand his warranty to 5 years or 50,000 miles. Seven months later the vehicle's engine failed. Contact was made with the dealer who informed the consumer that repairs would only be made at the dealership and whatever expenses were accrued in towing the now disabled vehicle from Valdez to Anchorage would be out of the owners pocket. I tried but was unsuccessful in resolving this dilemma. The consumer ended up paying several hundred dollars to have his disabled truck shipped to Anchorage, and probabley hundreds more to ship it home after the repairs.

The third complaint was by an Alaska State Trooper. His station wagon had been in the dealers shop 8 times in a futile battle to effect repairs to a defective engine. Our intervention finally convinced the manufacturer to replace the engine. However, the problems did not end. The replacement engine also failed. It was again repaired but to this day still uses an excessive amount of oil.

The fourth complaint came from a Ketchikan resident. The vehicle in question had been purchased in Washington. Again assurance was made by the selling dealer that warranty repairs could be done in Ketchikan. The vehicle, a small four wheel drive unit, developed a severe vibration. The consumer soon found out how reliable the warranty representations were. After having a number of local garages work on the problem, the consumer paid to have the vehicle shipped back to the Washington dealer. The dealer made a number of modifications to the vehicle then shipped the vehicle back to Ketchikan, at the consumer's expense. The problem persisted, however, and finally progressed to the point that the State Troopers ordered the car off the road. Our office was called and finally after technical information was received from Detroit a local garage was able to correct the defect. The car however, is in a deteriorated condition caused by the vibrations of the defect.

Alaska dealers and their employees have on numerour occasions stated they wish they could do more to correct these problems. On occasion I have been told by dealership personnel that a particular automobile was a lemon and should be brought back; however, there hands were tied and they could only follow manufacturers procedures or that the manufacturer would not authorize what needed to be done.

I could go on with many more "horror" stories but I think I've made my point. Alaskans have severe problems in obtaining service on their new cars, and House Bill 344 goes a long way to correct these woes.

Lemon law would force dealers to replace cars

By JIM ERICKSON
Daily News reporter

Alaska auto dealers would be forced to buy back or replace automotive "lemons," defective new cars that defy all attempts at repair, if legislation introduced recently in the state Senate and House becomes law.

House Bill 344 calls for replacement of a new car or a refund of the purchase price when manufacturing defects make the car undriveable for 30 days or more during the first year of ownership.

The so-called "lemon law" is scheduled for a House Labor and Commerce Committee hearing Monday.

An identical bill introduced in the Senate by Sen. Bill Ray, D-Juneau, has not been scheduled for a hearing.

The House measure was introduced last month by Rep. Mike Miller, D-Juneau. Miller said Saturday the legislation would compel dealers and manufacturers to honor new-car warranties promptly.

"The legislation doesn't spell out the warranty," he cautioned. "That's up to the manufacturer. What it does do is put full force of the state law behind customer satisfaction of that warranty."

If the defect poses a safety hazard, the car must be repaired within 14 days, the measure states.

In all cases, dealers would be allowed four chances to fix the car, before the buyer could demand a refund or a replacement. The measure applies only to failures covered by new-car warranties, and only during the first year of ownership.

"What we are talking about is correcting major problems of the vehicle," Miller said. "This is not in regard to trivial repairs or problems that result due to owner abuse."

Similar legislation has been adopted in California, Connecticut, Montana and Wyoming, said legislative aide Denise Zachary. Ten other states are considering lemon laws, she said.

Monday's hearing will be linked to Anchorage, Fairbanks and Ketchikan via the state teleconference network.

Zachary said the public can comment on the bill by attending the teleconference, to be held in Anchorage at the Anchorage Legislative Information Office, 1024 W. 6th Ave.

The teleconference will begin at 7 a.m.

3/8/83 Daily News

s a phrase for every misdeed

(Not to mention the ultimate disaster: "If you eat that now, you won't be hungry for dinner!")

And then there is the chapter on Questions Without Answers. These generally come along during the teen-age years.

Questions like, "You're not going out dressed like that, are you?"

Or, "You know this goes against everything we've ever taught you, don't you?"

Not to mention the all-time winner, which spans most of the formative years: "Just what do you think you're doing?"

Experienced mothers know they can mix and match these phrases for special effect, as in: "Just where do you think you're going dressed like that?"

"When you're grown and have children of your own, that's when."

This last, especially, falls under the definition of all-purpose Motherese, touching as it does on the perpetually ripe arena of life after one has children of one's own.

Of course, it's not all conflict and threats in Motherese. There's the Broken Heart chapter, things mothers say to make you feel better. Things like, "Ten years from now this will all seem funny" and "Just think of it as good experience" — not to mention the alltime classic, "Well, just consider yourself lucky, a man will never marry a girl like that!"

I suppose with changing mores they'll be wanting to update the Mother's Phrase Book before long, make it a little more hip, but I

IN THE HOUSE

HOUSE BILL NO. 344

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to motor vehicle warranties."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.45 is amended by adding a new section to read:

ARTICLE 6. MOTOR VEHICLE WARRANTIES.

Sec. 45.45.300. MOTOR VEHICLE WARRANTIES. (a) If a new motor vehicle does not conform to an express warranty that is applicable to it and the owner of the vehicle reports the nonconformity to the manufacturer or distributor of the vehicle, the agent of the manufacturer or distributor, or the manufacturer's or distributor's dealer during the term of the warranty or within one year after the date of delivery of the motor vehicle to the owner, whichever date is earlier, the manufacturer, distributor, agent, or dealer shall make the necessary repairs to conform the vehicle under the express warranty.

(b) If a manufacturer, distributor, agent, or dealer is unable to conform the motor vehicle under an applicable express warranty under (a) of this section after a reasonable number of attempts and the nonconformity is a defect or condition that substantially impairs the use and value of the motor vehicle to the owner, the manufacturer or distributor shall accept the return of the defective motor vehicle and shall, at the option of the owner, replace the motor vehicle with a new motor vehicle, or refund the purchase price to the owner, including all collateral charges. A refund under this subsection shall be made to the owner and to a lienholder as their respective interests appear.

(c) It is an affirmative defense to a claim made under (b) of this section for a new motor vehicle or a refund that the nonconformity complained of

(1) does not substantially impair the use and value of the motor vehicle; or

(2) is the result of abuse, neglect, or unauthorized modification or alteration of the motor vehicle by the owner.

(d) A presumption that a reasonable number of attempts have been undertaken to conform a motor vehicle under an applicable express warranty is established if (1) the same nonconformity has been subject to repair four or more times by the manufacturer or distributor, its agent, or its dealer during the term of the warranty or the one-year period after delivery of the motor vehicle to the owner, whichever period terminates first, but the nonconformity continues to exist; or (2) the vehicle is out of service for repair for a total of 30 or more days during the warranty term or the one-year period referred to in (1) of this subsection, whichever period terminates first. A period of time under this subsection is extended by any period during which repair services are not available to the owner for reasons that are not the responsibility of the owner.

(e) If the nonconformity is a defect in the motor vehicle that makes it unsafe for the owner to operate it and the defect is reported under (a) of this section, the time period for repair, refund, or replacement under (b) of this section is reduced to 14 days.

(f) A failure to replace or refund the purchase price of a motor vehicle when there is a requirement to do so under this section is an unfair trade practice under AS 45.50.471.

(g) The provisions of this section do not limit other rights and remedies that may be available to the owner of a motor vehicle under

other provisions of law.

(h) If a manufacturer or distributor has established an informal dispute settlement procedure that complies with the provisions of 16 C.F.R. Part 703, as that Part may be amended, the provisions of (b) of this section concerning refund or replacement do not apply to an owner who has not first resorted to the informal dispute settlement procedure.

(i) In this section

(1) "motor vehicle" or "vehicle" means a motor vehicle as defined in AS 28.35.360 that is required to be registered under AS 28.10 or with a governmental agency of another jurisdiction performing a similar function;

(2) "owner" means a purchaser, other than for resale, of a new motor vehicle, a person to whom the motor vehicle is transferred during the term of an express warranty applicable to the vehicle, or any other person entitled to enforce an express warranty on the vehicle under the terms of the warranty;

(3) "substantially impairs use and value" refers to a defect or condition in a vehicle that

(A) prevents it from being operated;

(B) makes it unsafe to operate; or

(C) decreases the economic life of the vehicle.

The act also reduces the amount of interest that is forfeited by a tenant for late payment of a month's rent from the interest earned during the entire year to the interest earned during the month that the rent payment was late.

AN ACT CONCERNING AUTOMOBILE WARRANTIES

SUMMARY: This act requires a manufacturer of a new passenger car, van or truck or the manufacturer's agent or authorized dealer to repair all defects covered by a written warranty if reported by the purchaser during the warranty period or within one year of the vehicle's delivery date, whichever is earlier. If these vendors are unable to repair a defect which substantially impairs the vehicle's use and value after a reasonable number of attempts, the act requires the manufacturer to either replace the vehicle or refund the full purchase price and collateral charges, less an allowance for the consumer's use. A refund is made to the consumer and to anyone holding a lien on the vehicle. If a manufacturer has established an informal dispute settlement mechanism that complies in all respects with relevant Federal Trade Commission regulations, the act requires a consumer to attempt to settle the dispute through this mechanism before the act's refund or replacement provisions apply. The act specifies that the manufacturer has the following affirmative defenses in any suit to have a vehicle replaced or to recover the cost of a vehicle:

1) The defect does not substantially impair the vehicle's use and value; and
2) The defect was caused by the consumer's abuse, neglect or unauthorized modification of the vehicle.

The act specifies that a "reasonable number of attempts" have been undertaken when:

1) the same problem has been subject to repair four or more times during the warranty period or within one year of the vehicle's delivery date, whichever is earlier; or
2) the vehicle has been out of service for repair for a cumulative total of 30 calendar days during the same period.

In addition, the act extends the term of a written warranty, the one-year period following the vehicle's delivery and the 30-day period for repair for the period of time during which repair services are unavailable due to war, invasion, strike, fire, flood or other natural disasters.

Finally, the act does not limit other rights or remedies available to a consumer under any other law.
EFFECTIVE DATE: October 1, 1982

COMMENT

Informal Dispute Settlement Mechanisms

Federal Trade Commission regulations providing a means to mediate disputes between consumers and warrantors were issued under the authority of the "Magnuson-Moss Warranty Act." They must be complied with only if the manufacturer refers to such a mechanism in the warranty. The regulations:

1) establish requirements for consumer notification;
2) require the mechanism to be insulated from the manufacturer's influence and that the decision-makers not be associated in any way with a party to a dispute;
3) require that the mechanism be free to the consumer; and
4) generally require that a dispute be settled within 40 days.

AN ACT ESTABLISHING A CATERER'S PERMIT

SUMMARY: This act establishes a restaurant liquor permit for catering establishments. The permit allows the sale of liquor to persons invited to and attending a catered event. The act also:

1) limits the hours and days such an establishment may sell liquor to the same as those previously established by law for restaurants, hotels, cafes, and several other types of on-premises permits;
2) specifies that the permittee is not required to be open except during the hours events are scheduled; and
3) specifies that the permittee is required to comply with local health regulations.

The permit fee is $1,200.
EFFECTIVE DATE: July 1, 1982

FURTHER EXPLANATION

Permit Eligibility

A person or business organization is eligible for the permit if he or it:

1) regularly furnishes rooms for hire for particular events or regularly furnishes provisions or services for these events;

Substitute House Bill No. 5729

PUBLIC ACT NO. 82-287

AN ACT CONCERNING AUTOMOBILE WARRANTIES.

Be it enacted by the Senate and House of Representatives in General Assembly convened:

(NEW) (a) As used in this act: (1) "Consumer" means the purchaser, other than for purposes of resale, of a motor vehicle, any person to whom such motor vehicle is transferred during the duration of an express warranty applicable to such motor vehicle, and any other person entitled by the terms of such warranty to enforce the obligations of the warranty; and (2) "motor vehicle" means a passenger motor vehicle or a passenger and commercial motor vehicle, as defined in subdivisions (35) and (36) of section 14-1 of the general statutes, as amended, which is sold in this state.

(b) If a new motor vehicle does not conform to all applicable express warranties, and the consumer reports the nonconformity to the manufacturer, its agent or its authorized dealer during the term of such express warranties or during the period of one year following the date of original delivery of the motor vehicle to a consumer, whichever is the earlier date, the manufacturer, its agent or its authorized dealer shall make such repairs as are necessary to conform the vehicle to such express warranties, notwithstanding the fact that such repairs are made after the expiration of such term or such one-year period.

(c) If the manufacturer, or its agents or authorized dealers are unable to conform the motor vehicle to any applicable express warranty by repairing or correcting any defect or condition which substantially impairs the use and value of the motor vehicle to the consumer after a reasonable number of attempts, the manufacturer shall replace the motor vehicle with a new motor vehicle or accept return of the vehicle from the consumer and refund to the consumer the full purchase price including all collateral charges, less a reasonable allowance for the consumer's use of the vehicle. Refunds shall be made to the consumer, and lienholder if any, as their interests may appear. A reasonable allowance for use shall be that amount directly attributable to use by the consumer prior to his first report of the nonconformity to the manufacturer, agent or dealer and during any subsequent period when the

Lemon Law
Motor Vehicles
Consumer Protect
Warranties

vehicle is not out of service by reason of repair. It shall be an affirmative defense to any claim under this act (1) that an alleged nonconformity does not substantially impair such use and value or (2) that a nonconformity is the result of abuse, neglect or unauthorized modifications or alterations of a motor vehicle by a consumer.

(d) It shall be presumed that a reasonable number of attempts have been undertaken to conform a motor vehicle to the applicable express warranties, if (1) the same nonconformity has been subject to repair four or more times by the manufacturer or its agents or authorized dealers within the express warranty term or during the period of one year following the date of original delivery of the motor vehicle to a consumer, whichever is the earlier date, but such nonconformity continues to exist or (2) the vehicle is out of service by reason of repair for a cumulative total of thirty or more calendar days during such term or during such period, whichever is the earlier date. The term of an express warranty, such one-year period and such thirty-day period shall be extended by any period of time during which repair services are not available to the consumer because of a war, invasion, strike or fire, flood or other natural disaster.

(e) Nothing in this act shall in any way limit the rights or remedies which are otherwise available to a consumer under any other law.

(f) If a manufacturer has established an informal dispute settlement procedure which complies in all respects with the provisions of title 16 Code of Federal Regulations Part 703, as from time to time amended, the provisions of

subsection (c) of this section concerning refunds or replacement shall not apply to any consumer who has not first resorted to such proced re.

> cle in 1970 . . . for all *checks* and *adjustments*. Actual *defects* we bill the factory for on a regular warranty claim. . . . We spend an average of three hours on each car in preparation. . . .
>
> We are reimbursed nothing for predelivery service by the factory. We charge it off as a "cost of sale" per factory accounting manual—same as salesman's commission. . . .
>
> There is no fee as such collected for predelivery service from the customer. We absorb the cost in its entirety.
>
> Other dealers are less responsible. A Ford dealer in southern California puts his better mechanics on make-ready, but pays them only a flat $5 per car, giving them no incentive to do a good job.

Of course, when the manufacturers deem predelivery inspection to be important, they know how to improve the usual make-ready procedure. For instance, dealers who process police cars are paid by Ford for 5.4 hours of labor per car to insure a thorough check. In New Jersey this amounts to $59.40 per car.

Ford and Chrysler are both experimenting with regional predelivery inspection operations, financed, in part, by fees charged to participating dealers. However, there are only a few of these facilities. Most new cars are either poorly inspected or not inspected at all by the dealers. Informants estimate that less than 25% of the required checks are generally performed.

To complicate matters considerably, cars frequently arrive from the assembly plant with defects which the dealer cannot remedy —because parts are unavailable, because the dealer is not equipped to diagnose the defect, or because the defects are too numerous. One dealer has reported that the new 1970 cars are "being received in the poorest condition ever. They are poorly assembled and finished." A car which starts out as a lemon at the factory is thus unlikely to undergo any significant alteration before reaching the buyer.

Even more distressing, some new cars are received from the assembly plant in damaged condition. A. East Douglas, Massachusetts, resident wrote that he saw a new Maverick in a body repair shop having a badly smashed fender repaired, only to discover later that it was the very Maverick he had ordered. The dealer's response: "It is a common practice to pass on to customers patch jobs like this, for that matter much worse." [16] According to one dealer, the manufacturer's policy is that if front fenders have to be replaced (because of damage in transit) or if the K frame has to be replaced, this is done and the car is sold by the dealer as new. But if the roof or quarter panel is seriously damaged and needs replacement, the car is sold as used. The reason for the distinction is simple: in the first instance, if the repair is done properly, it cannot be detected; in the second it can.

IN THE HOUSE

HOUSE BILL NO. 344

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to motor vehicle warranties."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.45 is amended by adding a new section to read:

ARTICLE 6. MOTOR VEHICLE WARRANTIES.

Sec. 45.45.300. MOTOR VEHICLE WARRANTIES. (a) If a new motor vehicle does not conform to an express warranty that is applicable to it and the owner of the vehicle reports the nonconformity to the manufacturer or distributor of the vehicle, the agent of the manufacturer or distributor, or the manufacturer's or distributor's dealer during the term of the warranty or within one year after the date of delivery of the motor vehicle to the owner, whichever date is earlier, the manufacturer, distributor, agent, or dealer shall make the necessary repairs to conform the vehicle under the express warranty.

(b) If a manufacturer, distributor, agent, or dealer is unable to conform the motor vehicle under an applicable express warranty under (a) of this section after a reasonable number of attempts and the nonconformity is a defect or condition that substantially impairs the use and value of the motor vehicle to the owner, the manufacturer or distributor shall accept the return of the defective motor vehicle and shall, at the option of the owner, replace the motor vehicle with a new motor vehicle, or refund the purchase price to the owner, including all collateral charges. A refund under this subsection shall be made to the owner and to a lienholder as their respective interests appear.

(c) It is an affirmative defense to a claim made under (b) of this section for a new motor vehicle or a refund that the nonconformity complained of

(1) does not substantially impair the use and value of the motor vehicle; or

(2) is the result of ~~abuse~~ UNREASONABLE abuse, neglect, or unauthorized modification or alteration of the motor vehicle by the owner.

(d) A presumption that a reasonable number of attempts have been undertaken to conform a motor vehicle under an applicable express warranty is established if (1) the same nonconformity has been subject to repair four or more times by the manufacturer or distributor, its agent, or its dealer during the term of the warranty or the one-year period after delivery of the motor vehicle to the owner, whichever period terminates first, but the nonconformity continues to exist; or (2) the vehicle is out of service for repair for a total of 30 or more days during the warranty term or the one-year period referred to in (1) of this subsection, whichever period terminates first. A period of time under this subsection is extended by any period during which repair services are not available to the owner for reasons that are not the responsibility of the owner.

(e) If the nonconformity is a defect in the motor vehicle that makes it unsafe for the owner to operate it and the defect is reported under (a) of this section, the time period for repair, refund, or replacement under (b) of this section is reduced to 14 days.

(f) A failure to replace or refund the purchase price of a motor vehicle when there is a requirement to do so under this section is an unfair trade practice under AS 45.50.471.

(g) The provisions of this section do not limit other rights and remedies that may be available to the owner of a motor vehicle under

BINDING ON MANUFACTURER
MANUFACTURER
BILL DEFINITIONS

other provisions of law.

(h) If a manufacturer or distributor has established an informal dispute settlement procedure that complies with the provisions of 16 C.F.R. Part 703, as that Part may be amended, the provisions of (b) of this section concerning refund or replacement do not apply to an owner who has not first resorted to the informal dispute settlement procedure. FEDERAL REGULATION (PROGRAM INFORMAL BASIS)

(i) In this section

(1) "motor vehicle" or "vehicle" means a motor vehicle as defined in AS 28.35.360 that is required to be registered under AS 28.10 or with a governmental agency of another jurisdiction performing a similar function;

(2) "owner" means a purchaser, other than for resale, of a new motor vehicle, a person to whom the motor vehicle is transferred during the term of an express warranty applicable to the vehicle, or any other person entitled to enforce an express warranty on the vehicle under the terms of the warranty;

(3) "substantially impairs use and value" refers to a defect or condition in a vehicle that

(A) prevents it from being operated;

(B) makes it unsafe to operate; or

(C) decreases the economic life of the vehicle.

STATE
of ALASKA

MEMORANDUM

TO: Rep. Walt Furnace, Chairman
House Labor & Commerce Committee
House of Representatives

DATE: May 4, 1983

FILE NO:

TELEPHONE NO: 279-0428

SUBJECT: House Bill 344
(Motor Vehicle Warranties)

FROM: Norman C. Gorsuch
Attorney General
By: C. J. Sipe
Connie J. Sipe
Assistant Attorney General
Chief, Consumer Protection Section
AGO/Anchorage

The Office of the Attorney General is in favor of House Bill 344, although we do suggest some possible amendments to the bill which would enhance its benefit to Alaskan citizens. Before I analyze the bill section by section, I would like the committee to note that state legislation which dictates a certain degree of performance of warranties on consumer goods is not unusual, and in many states, it has been a frequent subject of legislative action. The Alaska legislature passed a bill in 1978 setting minimal warranty standards for mobile homes and providing for performance bonds by manufacturers of mobile homes sold in the state. (AS 45.30.011--100.) The Uniform Commercial Code for the State of Alaska also addresses warranties in a more general manner.

It is our information that as of this date the states of Connecticut, California, and Wyoming have passed a bill similar to House Bill 344, and that the State of Wisconsin is likely to pass a bill this section. Several other states are considering these bills.

Analysis of HB 344

Section 1. Section 1 of the bill states that when the express warranty given by a manufacturer against defects of design, manufacturing or assembly is not being carried out, because the vehicle is displaying a defect, then the owner may report the nonconformity to either the manufacturer, or in the case of a foreign manufacturer the U.S. "distributor" of the vehicle, or their agent. Subsection (a) limits the application of the bill to the term of the warranty, or one year, whichever comes first. Many manufacturers are now offering three to five years warranties with extended mileage periods, but HB 344 would only apply to the first year of ownership of the vehicle if a year is shorter than the manufacturer's express warranty.

Subsection 1(a) also requires the manufacturer or its dealer to make the necessary repairs to bring the vehicle to conformity under the express warranty. Testimony which will be submitted by our auto investigator will show that Alaskans have great difficulty in getting such repairs performed in a timely fashion.

Section 1(b), at line 19, sets out the burden of proof which a consumer would have to meet if the consumer sued the manufacturer of a vehicle. (Under case law interpreting the Uniform Commercial Code and other common law warranty rights, the consumer's burden of proof can be more difficult.) By the operation of (b), the vehicle owner would enjoy a legal presumption that after a reasonable number of attempts to correct a deformity, that the vehicle is in fact defective or a "lemon." HB 344 also provides a remedy: namely, that the owner has the option of returning the defective vehicle for a refund of the purchase price (including all collateral charges) or having the new motor vehicle replaced with an identical motor vehicle. (The bill does provide for a refund to a lien holder if one exists.)

Subsection (c) (page 2, line 1) gives the manufacturer two affirmative defenses to the owner's claim for a refund. The manufacturer may not be liable if the defect complained of does not actually cause substantial impairment to the owner's ability to use the vehicle or to the value of the vehicle, or if the defect is not in fact a manufacturer defect but resulted from the abuse or modification of the vehicle by the owner. I would urge the addition of the word "unreasonable" just before "neglect." Otherwise, an express warranty may set up such an unreasonably strict maintenance schedule for the consumer to follow that the manufacturer would always be able to claim that any defect was caused by consumer "neglect." I think that a modification to "unreasonable neglect" would be a good balance.

Subsection (d) creates the presumption (or in other words a legal definition) of when a car is "defective" by defining as defective a vehicle which has been worked on four or more times for the same nonconformity, or which is out of service for more than 30 days, during the warranty term or the first year (whichever comes earlier). Such a car is legally presumed to be a "lemon."

Please note that an amendment needs to be made in subsection (d), at page 2, lines 17-20. This last section of the sentence should read:

... The warranty term or the one year period referred to in (1) of this section shall be extended by any period during which repair services are not available to the owner for reasons that are not the responsibility of the owner.

As the section reads now, the presumption of what is a lemon (4 repairs or 30 days out of use) would be taken away from the consumer by being "extended" (?) when the manufacturer fails to provide repairs.

Subsection (e). Frankly, I do not understand what the legislative drafter meant by subsection (e). The clear intent of the passage seems to be that if the nonconformity which is a defect in the motor vehicle is one that makes the vehicle unsafe for owner operation, that a repair must be effected within 14 days. However, the 14 days language references back to subsection (b) which does not contain any time period. Perhaps the drafter meant to refer back to subsection (d) saying that if the vehicle is unsafe to operate, then only 14 instead of 30 days would be required to create a presumption of a "lemon." However, as you will hear from testimony of the auto investigator, 14 days is the norm in Alaska even for safety defects. I think the 14 days would probably be too strict a time period in terms of a standard for creating the presumption that the vehicle is a lemon. I think that 30 days out of service during the warranty period, or the first year, is a reasonable time period for creating a presumption that the owner owns a defective car.

Subsection (f) makes the manufacturer's failure to honor the owner's request for replacement of, or refund of the purchase price of a defective motor vehicle an unfair trade practice under the Alaska Unfair Trade Practices and Consumer Protection Act. This is an efficient way of providing an enforcement mechanism for the statute, since it gives the Attorney General public enforcement powers against a manufacturer or dealer who is engaging in a pattern of refusal to honor its warranty obligations, but it also gives private individuals a private cause of action, with up to triple damages, costs and attorneys fees, under AS 45.50.531. Since the Alaska Unfair Trade Practices Act already discusses warranty work at AS 45.50.471(b)(17), and since the warranty becomes "false" if it is not honored by the manufacturer, it is appropriate to put the enforcement section in this

statute. It also dovetails well with the Motor Vehicle Repair statute which is already incorporated into the Unfair Trade Practices Act, at AS 45.50.471(b)(23).

Subsection (g) insures that the provisions of this act do not limit any other rights or remedies that the motor vehicle owner might have under common law regarding express or implied warranties. This is a good provision, since the courts might develop a higher standard for manufacturers, and some courts might rule in the owner's favor on a defect which shows up after the one year period.

Subsection (h) refers to the federal Magnuson-Moss Warranty Act act, and the regulations promulgated pursuant to that act. Under that act a manufacturer of vehicles may set up an informal dispute settlement procedure, outside the court, (usually an arbitration panel) to which consumers must take their defect or warranty claim before filing suit against the manufacturer for a defective vehicle. However, the informal dispute settlement procedure must follow carefully the standards in the federal regulations, including a provision that the award of the arbitration panel is binding on the manufacturer but is not necessarily binding on the consumer owner of the vehicle unless the owner accepts the award. If the owner does not agree with the award the owner may then proceed to court. Subsection (h) insures that under the Alaska motor vehicle warranty act we would also allow the national manufacturers to exercise this same option.

[The committee should know that historically, it was the hope of Congress to encourage all the manufacturers to create such informal dispute resolution programs, but that to date none of the manufacturers have set up a national program that complies with the Magnuson-Moss Act. In the last year, General Motors has contracted with the Better Business Bureau in some states (not Alaska) to do arbitrations with discontented vehicle owners, but the arbitrations do not meet the federal requirements because they are binding on both parties and the consumer does not have the option of refusing the arbitration award. Because of this requirement, consumers are <u>not</u> <u>required</u> to use the GMC/BBB program before going to court on what the consumer believes to be a defective GMC car.]

Subsection (i) of the bill includes pertinent definitions. The definition of "owner" includes not only the original purchaser of the vehicle but anyone to who the vehicle is transferred during the term of the express warranty, which is appropriate, since the warranties on new vehicles are transferrable by their own terms. Also, this subsection includes examples of what are "substantial impairments" of the use and value of a vehicle. These definitions seem to cover most instances that a court would want to consider and I think they are adequate.

OVERALL COMMENTS ON HB 344

HB 344 is very well drafted in respect that it avoids some problems found in its counterpart in Connecticut statutes. Specifically, in the Connecticut statute, the consumer owner who asks for a refund of the purchase price of the vehicle will have deducted from it a "reasonable allowance for use of the vehicle." This is a serious problem, and one which it is anticipated that dealers or the manufacturers may suggest as an amendment to HB 344. HB 344 should not include this kind of set off provision, because, under court case law developed pursuant to under the U.C.C. on warranties, when a consumer revokes acceptance of a defective vehicle the consumer is usually entitled to the full refund of the purchase price, and may sometimes recover from the manufacturer "cover" costs for buying a more expensive replacement vehicle. Also, under the U.C.C., the consumer may recover incidental and consequential damages from the dealer, not just the purchase price. Under the U.C.C., a consumer could claim consequential damages caused by the vehicle's failure, such as: loss of work due to a car that broke down, long distance telephone calls, towing charges. HB 344 is a better statute than the Connecticut lemon law because it does not allow the manufacturer to ask for the set off for use of the defective vehicle. This is appropriate in light of the case law.

Overall, HB 344 if passed would greatly help the work of the Consumer Protection Section of the Office of the Attorney General in mediating and investigating warranty complaints by consumers. As our auto investigator will report, a great number of our auto repair problems are alleged warranty violations or defects in vehicles.

It is my opinion, after working in this area for seven years, that very few Alaskans, especially those who live outside the three major cities, receive full value of the warranty on their vehicles. We know that warranties, and the service guaranteed under warranties, is a substantial selling tool of the manufacturers. We also know that the warranty has a definite, although unstated, economic value as part of the purchase price of a motor vehicle. Since Alaskans pay not only the top manufacturers' suggested retail price but usually amounts in addition to the suggested retail price we can see that Alaskans do not get any break or allowance for their difficulty in obtaining warranty work. (As far as I know this is the only marketplace in the entire United States where consumers pay manufacturer's suggested price or above.)

Suggested Amendments

I would suggest the addition of language like the following, although this has not yet been refined to legislative standards. The suggested language, which is attached, would require manufacturers of motor vehicles to either maintain sufficient repair facilities reasonably close to all areas where its vehicles are sold or to designate independent shops in various towns as authorized warranty repair facilities.

Most manufacturers and their corporate organization provide for such independent repair facilities, but in fact, we do not know of any non-dealer, factory authorized repair centers in the State of Alaska. We have tried to negotiate directly with a couple of manufacturers to get them to authorize repairs in population centers like Ketchikan, but we have failed in our efforts.

Also as you will note in the suggested amendments, it is important that the manufacturer be required to fairly compensate either the dealer or the non-dealer authorized repair facility for the warranty work done. As the auto repair investigator can testify, the flat rate paid to dealers for warranty work often reflects the economic and political power differential between the manufacturer and the dealer more than it does the actual time and effort necessary to cure a warranty defect. Also, the warranty service manual's suggested times for repair are geared to large dealer service centers with computer diagnostic equipment and factory-trained technicians. Since an independent repair facility in Bethel would be unlikely to have the same sophistication of equipment or personnel training, the manufacturer should pay the actual time necessary to repair the warranty defect, not just the suggested flat rate time in a warranty repair manual.

Availability of parts. Another problem in Alaska is the availability of repair parts for warranty work. The manufacturer should fairly reimburse the repair facility for shipping cost on warranty covered repairs. Also, the manufacturer should timely reimburse repair facilities for warranty expenses. Consumers should not be required to pay for parts shipments on warranty repairs.

Substitute Transportation. Another suggested addition to the bill is a requirement that if a vehicle is not timely fixed, within two weeks of notice of defect, that the manufacturer should be obligated to provide substitute transportation or rental car cost, from the two week date until the car is repaired. (At the present time only one national manufacturer promises a loaner car in its express warranty. In Alaska, most dealers do not offer loaner cars as a courtesy, although that courtesy is a common practice in the lower 48.)

The manufacturers should be encouraged to beef up their repair facilities and their inventory of repair parts within the state or face the obligation to provide alternative transportation, at least after the first two-week period that a vehicle has been unuseable.

Vehicle Transport Costs. It is important that Alaska take action to clarify what is the duty of the customer to re-deliver a vehicle to the manufacturer's nearest dealership for warranty repairs. This is requirement in most express warranties, but it creates great difficulties, especially when there are no roads back from the consumer's location, (such as Bethel) to the nearest dealership (say in Anchorage). Perhaps manufacturers should not be required to bear all the high cost of transportation of vehicles within the state, but the manufacturer could choose an alternative if these amendments were put into law. The manufacturer should either authorize independent repair facilities in the communities to repair vehicles, or pay for at least one way of the transportation of the vehicle, namely from the dealership back to the customer after repair.

Sec. 45.45.305. WARRANTY REPAIR FACILITIES AND OBLIGATIONS. (a) Every manufacturer or distributor of motor vehicles sold in this state for which the manufacturer or distributor has made an express warranty shall maintain in this state sufficient repair facilities, reasonably close to all population centers where its vehicles are used, to carry out the terms of such warranties.

(b) As a means of complying with section (a), a manufacturer or distributor shall be permitted to enter into warranty service contracts with independent repair facilities. The warranty service contracts may provide for a flat rate schedule of repair times to be used in calculating charges for warranty service or repair work, provided that the contract hourly rates must reimburse the repair facility at normal retail rates, for the community where the facility is located, for any service and parts reasonably required to carry out warranty repairs. The manufacturer or distributor shall also fairly reimburse a dealer or authorized contract repair facility for expenses incurred in ordering and shipping parts needed to effect warranty covered repairs. Any request by a contract repair facility for reimbursement of warranty covered repairs must be paid by the manufacturer or distributor within 30 days.

(c) In the event that repairs of any warranty covered malfunction or defect are not completed within two weeks of (1) the customer's delivery of the vehicle to the manufacturer's or distributor's designated repair facility or dealer; or, (2) the customer's notification to the manufacturer, distributor, or its dealer of a warranty malfunction which renders the vehicle inoperable; then reasonable charges for the owner's rental of substitute transportation shall be paid by the manufacturer or distributor, or the manufacturer or distributor shall provide

a substitute vehicle, from the date two weeks after delivery of the vehicle or notification of a malfunction rendering a vehicle inoperable, until repairs are complete.

[NOTE: Subsection d, below, is very rough, even in concept!]

(d) If the express warranty requires the owner to deliver the vehicle to the nearest manufacturer's dealer for warranty repair, that duty shall not be binding on the owner, nor a waiver of the owner's warranty rights when, (1) due to the malfunction or defect the vehicle cannot safely be operated, or (2) the delivery of the vehicle cannot be made by road or by shipment by boat or ferry of less than one day's shipping or travel time. Should the customer be unable to effect return of the vehicle for any of the above reasons, the customer shall notify the manufacturer, distributor or its nearest dealer or authorized repair facility within the state. Written notice of the malfunction or defect to the manufacturer, distributor, dealer or repair facility shall constitute "return" of the vehicle for purposes of this section. Upon receipt of such notice of malfunction or defect the manufacturer or distributor shall, at its option, repair the vehicle at the customer's residence or town of residence, or arrange for transporting the vehicle to a dealer or repair facility. All reasonable costs of transporting the vehicle when, pursuant to (1) above, the owner is unable to effect delivery, shall be at the manufacturer's expense. When the owner cannot deliver the vehicle under the time limits of (2) above, if the manufacturer does not choose to repair the vehicle at the owner's residence or town of residence, the reasonable cost of transporting the vehicle to the dealer or designated repair facility shall be paid one-half by the owner and one-half by the manufacturer.

WARRANTIES - MOTOR VEHICLES - REPAIRS

COMMENTARY: Under existing case law, a manufacturer who is sued because of failure to service or repair goods to conform to applicable express warranties after a reasonable number of attempts may be required by a court to either replace the goods or reimburse the customer. However, the costs of determining in the court what is a "reasonable" number of repair attempts and by what method a customer should be reimbursed makes such suits very difficult and costly.

This bill would provide that it shall be presumed that a reasonable number of attempts have been undertaken to conform a new motor vehicle to the applicable exprss warranties, if, during the first year or 12,000 miles of the applicable express warranty (note that some warranties are now "5-year"): (1) the same malfunction or defect has been subject to repair four or more times by the manufacturer or its agent or authorized dealers or (2) the vehicle is out of service by reason of repair (or repair delays) of a warranty covered malfunction or defect for a cumulative total of more than 30 business days during the first year of the warranty.

The bill would provide that the presumption may not be asserted by the customer until after the customer has resorted to an in-state qualified third party dispute resolution process, if one is available in state. The bill would also provide that a manufacturer shall be bound by a decision of the third party process if the customer elects to accept it, and that if the customer is dissatisfied with the third party decision the customer may assert the presumption in an action to enforce the buyer's rights as specified. (This tracks the federal Magnuson-Moss Warranty Act.) The bill also would require manufacturers to pay for the shipping of parts.

SECTION 1. (a) If a new motor vehicle does not conform to all applicable express warranties, and the customer reports the nonconformity to the manufacturer, its agent or its authorized dealer during the term of such express warranties, or during the period of one year following the date of original delivery of the vehicle to the customer, whichever is the later date, the manufacturer, its agent or its authorized dealer shall make such repairs as are necessary to conform the vehicle to such express warranties, notwithstanding the fact that such repairs are made after the expiration of the warranty term or the one-year period;

(b) Every manufacturer of motor vehicles sold in this state for which the manufacturer has made an express warranty shall maintain in this state sufficient service and repair facilities, reasonably close to all areas where its vehicles are sold, to carry out the terms of such warranties; and designate and authorize in this state as service and repair facilities independent repair or service facilities, reasonably close to all population centers where its motor vehicles are used, to carry out the terms of such warranties.

As a means of complying with this section, a manufacturer shall be permitted to enter into warranty service contracts with independent repair facilities. The warranty service contracts may provide for a flat rate schedule of repair times to be used in calculating charges for warranty service or repair work, provided that the contract hourly rates must reimburse the repair facility at normal retail rates, for the community where the facility is located, for any service and parts reasonably required to carry out warranty repairs. The manufacturer shall also fairly reimburse the repair facility for expenses incurred in ordering and shipping parts needed to effect warranty covered repairs. Any request by a contract repair facility for reimbursement of warranty covered repairs must be paid by the manufacturer within 30 days.

(c) In the event that repairs of any warranty covered malfunction or defect are not completed within two weeks of: (1) the customer's delivery of the vehicle to the manufacturer's designated repair facility; or, (2) the customer's notification to the manufacturer of a warranty malfunction which renders the vehicle inoperable; reasonable charges for the rental of substitute transportation shall be paid by the manufacturer, or the manufacturer shall provide a substitute vehicle, from the date two weeks after delivery or notification of the vehicle until repairs are complete.

(d) It shall be the duty of the customer to deliver the vehicle to the nearest authorized dealership or manufacturer authorized service and repair facility within this state unless: due to the malfunction or defect the vehicle cannot safely be operated, or the delivery of the vehicle cannot be made by road, or by shipment by boat or ferry, of less than one day's shipping or travel time. Should the customer be unable to effect return of the vehicle for any of the above reasons, the customer shall notify the manufacturer or its nearest service and repair facility within the state. Written notice of the malfunction or defect to the manufacturer or its service and repair facility shall constitute return of the vehicles for purposes of this section. Upon receipt of such notice of malfunction or defect the manufacturer shall, at its option, repair the vehicle at the customer's residence, or arrange for transporting the vehicle to its repair facility. All reasonable costs of transporting the vehicle when, pursuant to the above, a customer is unable to effect return, shall be at the manufacturer's expense. The reasonable costs of return transport of a non-conforming vehicle to the customer after the vehicle's delivery to the repair facility shall be at the manufacturer's expense.

SECTION 2. (a) Should the manufacturer or its representative in this state be unable to service or repair the vehicle to conform to the applicable express warranties after a reasonable number of attempts, the manufacturer shall either replace the vehicle or reimburse the customer in an amount equal to the purchase price paid by the customer, less a reasonable amount for use by the customer prior to the discovery of the non-conforming malfunction or defect.

(b) It shall be presumed that a reasonable number of attempts have been made to conform a new motor vehicle to the applicable express warranties if, within one year from delivery to the customer or 12,000 miles, whichever occurs first, either (1) the same vehicle system or assembly has been subject to repair for non-conforming warranty problems four or more times by the manufacturer or its agent, or (2) the vehicle is out of service by reason of repairs (or repair delays) by the manufacturer or its agents of the malfunctions or defects, for a cumulative total of more than 30 business days since delivery of the vehicle to the customer.

(c) If a qualified third party dispute resolution process exists in Alaska and the customer receives timely notification in writing of the availability of a third party process with a description of its operation and effect, the presumption in paragraph (b) may not be asserted by the customer until after the

customer has initially resorted to the third party process as described in paragraph (d). Notification of the availability of the third party process is not timely if the customer suffers any prejudice resulting from any delay in giving notification. If a qualified third party dispute resolution process does not exist in Alaska, or if the customer is dissatisfied with the third party decision, or if the manufacturer or its agent neglects to promptly fulfill the terms of such third party decision, the customer may assert the presumption provided in paragraph (b) in an action to enforce the customer's rights under (a). The findings and decision of the third party shall be admissible in evidence in the action without further foundation. Any period of limitation of actions under any federal or Alaska law with respect to any person shall be extended for a period equal to the number of days between the date a complaint is filed with a third party dispute resolution process and the date of its decision or the date before which the manufacturer or its agent is required by the decision to fulfill its terms, whichever occurs later.

(d) A qualified third party dispute resolution process shall be one that complies with the Federal Trade Commission's minimum requirements for informal dispute settlement procedures as set forth in the Commission's regulations at 16 Code of Federal Regulations Part 703; that renders decisions which are binding on the manufacturer if the customer elects to accept the decision; that prescribes a reasonable time not to exceed 30 days, within which the manufacturer or its agents must fulfill the terms of those decisions.

(e) It shall be an affirmative defense to any claim under this act: (1) that a nonconforming malfunction or defect does not substantially impair the uses, values or safety of the vehicle; or (2) that a nonconformity is the result of abuse, unreasonable neglect, or unauthorized modifications or alterations of the vehicle by the customer.

SECTION 3. For the purposes of this chapter the following terms have the following meanings:

(1) "Malfunction or defect" means a nonconformity with an express warranty which substantially impairs the use, value, or safety of the new motor vehicle.

(2) "Customer" means the purchaser, ~~other~~ than for the purposes of resale, of a motor vehicle, any person to whom such motor vehicle is transferred during the duration of an express warranty applicable to such motor vehicle, and any other person applicable to such motor vehicle, and any other person entitled

by the terms of such warranty to enforce the obligations of such warranty.

(3) "Vehicle" means a "new" motor vehicle which is the subject of a manufacturer's express new car warranty and specifically includes motorcycles and motorhomes.

(4) "Population center" means a community of over 1,000 persons (or ____ miles of publicly funded roads).

(5) "Vehicle system or assembly" means . . .

STATE
of ALASKA

MEMORANDUM

TO: Mike Ford, Legislative Aid to Representative Mike Miller

DATE: March 18, 1983

FILE NO.:

TELEPHONE NO.: 279-0428

SUBJECT: Lemon Law

FROM: Connie J. Sipe
Assistant Attorney General
Chief, Consumer Protection Section
AGO/Anchorage

Enclosed please find a copy of the California Lemon Law, and a copy of the Connecticut Lemon Law. The statute which you had referred to as possibly being a Pennsylvania law is in fact the Connecticut law, which is noted in their most recent supplement as "P.A.," which merely stands for "public act." To our knowledge, no states except Connecticut and California have passed lemon statutes.

Also enclosed you will find not a draft but a "sketch" of a lemon law for Alaska, with a prefatory page of commentary. Please note that this sketch of a bill does not in any way conform to Alaska drafting standards on legislation, but our office has been so busy that it was all that I and our auto investigator could do on short notice to throw together a "cut and paste" which combined parts of the Connecticut with parts of the California statute, and inserted some other modifications that would be needed to address the specific warranty problems in the Alaskan market.

As some background information on warranties, you should realize that many of the American manufacturers are now offering 5-year warranties rather than the former 1-year or 12,000 mile warranties. Both the California and Connecticut lemon laws seemed to be based on the assumption that the 1-year warranty would continue to be the industry standard. On the other hand, in terms of the leverage provided by the lemon law, perhaps it is appropriate that only the very "worst" lemons, those cars with massive defects showing up within 1-year or 12,000 miles should be covered by a state lemon law.

The way we set up the draft that we sent down to you separates out the manufacturer's responsibilities in two areas: First, the ~~simple duty to follow through on their vehicle warranties, and to maintain a sufficient number of authorized repair shops in the state to make the warranty effective.~~ Section One does not have any time deadline other than the terms of the express warranty given by the manufacturer or 1-year, if 1-year would be the longer of the two dates. Our auto investigator, Scotty Dawkins, and I feel that Section 1 is very important in Alaska, because one of the main warranty problems we see is the fact that for most of the state, a warranty received with a new car is

virtually useless. Alaskan consumers outside of the major metropolitan areas receive virtually no value for their warranty, but we do know that a warranty is a significant part of the purchase price of a new vehicle. (Scotty would be willing to meet with you and talk with you about this, because he has had extensive experience inside the industry in Michigan, working with warranty problems both there and here.)

It would be important also that any bill which is meant to encourage the manufacturers to appoint or contract with independent repair shops in the smaller Alaska communities, provide a standard of payment that would be high enough to encourage those independent repair shops to enter into such agreements. A very real problem in the area of manufacturer's warranties is that the manufacturers compensate their dealerships for warranty work based on a flat rate manual which has very little relationship to the actual time needed to complete a warranty repair. Also, the times suggested for repair in the manufacturer's manual assume that the person doing the work will have all the specialized tools and diagnostic equipment of a full dealership, as well as factory trained technicians who know about the latest problems or technology. An independent repair shop in a rural area attempting to correct a defect of any complexity soon discovers that it takes them many more hours to cure the problem than it would a factory trained technician back in the dealership's more fully equipped shop.

Another problem apparently unique to Alaska is the incredible delay in getting warranty repair work done. Although only one manufacturer offers in its express warranty to provide substitute transportation during w[illegible] repairs, most dealerships in the lower 48 do offer compl[illegible]y loaner vehicles to almost all warranty repair customers [illegible]epairs are delayed beyond a few days. Also, in the lower [illegible]ost dealerships would be chagrined if they could not get the car into the shop on a warranty repair within two to three days. In Alaska, one of our largest dealerships "prides" itself on being able to get a non-functioning vehicle, under warranty, into the shop to be "looked at" in 10 business days.

The problem in Alaska is further aggravated by the fact that many of the dealerships do not stock a significant inventory of parts, but order parts specially as the warranty calls for. (In fact, if a vehicle under warranty needs a part not available at the Alaska dealership, the customer is usually required to pay the air freight to get the part shipped promptly, or else wait for the surface shipment of the required parts.) To address these problems, we inserted a Section 1(c), which gives the manufacturer two weeks leeway, then imposes a duty to provide substitute transportation.

We also tried to put in some reasonably balanced criteria about what constitutes a customer's inability to deliver a vehicle to a dealership or authorized agent because of distance. You will find this in Section 2(d). The way we set up this statute, Section (2) really contains the heart of the "lemon" law provisions, namely the presumption of when a manufacturer has had a reasonable chance to attempt repair, and the manufacturer's duty to make reimbursement to a customer who has purchased a lemon. (Section 2's more powerful provisions are for the first year or 12,000 miles.)

We wrote some definitions, but we would still need to figure out definitions for "population center," and also for what a "vehicle system or assembly" is.

You will note that the other states focus in on whether a manufacturer has attempted to repair the "same non-conformity." What Scotty Dawkins tells me is that that language could provide an incredibly large loophole for the manufacturer. For instance, if a customer has a portion of the transmission "system or assembly" worked on four times, it is possible that the first two times the manufacturer will attempt to repair the least expensive portion of the system, hoping that that will be sufficient. Often in warranty repairs Scotty sees that the necessary work is done in a progressive manner; namely the least expensive and least complex repairs are attempted first, but when this doesn't work, only then does the manufacturer reluctantly dig into the larger system or into some more complex component of the system, which in fact may be the underlying problem. So, you see that Scotty wanted to make sure that the same nonconformity was broad enough to cover the same malfunction within a system. For example, your engine develops a severe oil leak, and it is repaired by repacking a seal. The engine then develops a knock, and the dealer attempts to correct it by first installing a new oil pump, then a crankshaft, and finally corrects the knock by rebuilding the engine. A few weeks later while operating the vehicle on the highway several hundred miles from home the engine seizes. That is the malfunction or the defect of the system that should trigger the statutory remedies.

We also did not write in any law enforcement mechanism into the statute, since I assumed you're thinking of it being a private action lemon law as in other states. You might want to note all the background warranty statutes that do exist in the State of California, and that provide for treble damages and affirmative defenses and other things. I am including those in this packet, for your use. You may also want to look at whether you want to make any or all of this act a violation of the Unfair Trade Practices Act if not followed. (You might get very different political reactions to those two proposals.)

I need to disclose to you a possible conflict of interest on this request. I am currently president of a nonprofit corporation known as the Conflict Resolution Center (CRC), which is a "third party dispute resolution mechanism," offering mediation and arbitration in the Anchorage municipality. In fact, the Conflict Resolution Center has made approaches to representatives of several automobile manufacturers about whether or not they would wish to use the services of CRC as a third party dispute mechanism under the federal Magnuson-Moss Warranty Act. At this time, there is no such specific relationship contemplated between CRC and any manufacturer. However, that is a possibiliity, so I thought I should mention my relationship to CRC.

Scotty Dawkins will be in Juneau on March 28 and, despite the official holiday, is very eager to discuss the lemon law concept with you.

HB 344
Fiscal Note
Analysis

HB 344 clarifies and defines the legal warranty rights and responsibilities between owners of new motor vehicles and the vehicle manufacturer, when a new vehicle is seriously defective. Section 1(f) of the bill makes the manufacturer's refusal or failure to fulfill its warranty duties an unfair trade practice under AS 45.50.471. AS 45.50.471, which is enforced by the Consumer Protection Section of the Department of Law, already covers warranties and repairs in a more general manner. The specific legal standards of HB 344 should not cause additional fiscal impact on Consumer Protection because HB 344 merely gives a better definition and therefore a better enforcement tool in the auto warranty area.

AS 45.50.471 also provides for the vehicle owner's private enforcement lawsuit, so some of HB 344's impact will be in the private legal sector.

IV. Analysis

The fiscal note takes into consideration the retroactive provisions of the bill (1-1-83). Corporations make estimated payments in advance of their filing of a tax return and the fiscal note assumes that the first quarterly payments for 1983 taxes (paid on or before March 15, 1983) would not be refunded until after July 1, 1983. Therefore, the fiscal note for FY84 is greater than subsequent fiscal notes because of that refund carryover.

The fiscal note is based on data extracted from returns as filed for tax year 1981 and adjusted for anticipated increases in tax liabilities.

FROM: Jay Livey
Legislative Analyst

RE: Regulation of Naturopaths in Other States
Research Request 84-055

Steve Levi of your staff asked that we compare the regulation and licensure of naturopaths in other states with the approach proposed by CSHB 374. There are currently six states, Washington, Arizona, Oregon, Hawaii, Nevada, and Connecticut, that license naturopaths. We were able to contact or obtain licensing laws for all of these states. The comparisons of the laws includes the following information:

- the entity responsible for the regulation;
- requirements for licensure as a naturopath;
- scope of naturopathic practice; and
- reciprocity arrangements with other states.

Responsibility for Naturopathic Regulation

CSHB 347 puts the responsibility for the regulation of naturopaths in Alaska within the authority of the Department of Commerce and Economic Development. The department would have the authority to evaluate the qualifications of applicants, prepare and administer examinations to applicants and revoke and suspend licenses for cause. The State of Washington uses a similar structure, giving these powers to the Department of Licensing.

In four states, Hawaii, Oregon, Nevada and Arizona, the authority to administer the licensure law is given to a Board of Naturopathic Examiners. These boards may discipline licensed naturopaths through revocation or suspension of licenses, establish and administer licensure examinations, evaluate the qualifications of applicants and generally administer the licensure law. Three of these states, Hawaii, Arizona

and Oregon, have a three-member board composed of licensed naturopaths. Nevada has a five-member Board of Examiners of which three members are required to be naturopaths; one member is required to be a physician and one member must be a layperson.

Connecticut has a structure that divides the licensing authority between a Board of Examiners and the Department of Health Services. The board, composed of 2 licensed naturopaths and one layperson, has the authority to discipline licensed naturopaths according to procedures established by the law and administrative code. The board is also responsible for developing the licensure examination. The Department of Health Services administers the licensure statute, and has final responsibility for licensing naturopaths under the statute.

Requirements for Licensure

In summary, to be licensed as a naturopathic physician in any of these states, the applicant must be a high school graduate, have graduated from an approved school of Naturopathy and pass an examination administered by either a state department or state board of examiners. As proposed in the Alaska law, Hawaii, Oregon and Connecticut require that applicants complete additional college work at an approved school. We also found the the standards used by the states to define approved schools of naturopathy were fairly similar to those proposed in the Alaska law. All states require a mix of classroom and clinical study, a course of study that occurs over four years and a minimum number of hours required for graduation. Each state's requirements are summarized below.

Alaska. To be eligible for a license as a naturopath in Alaska, CSHB 347 would require the applicant to be a high school graduate or equivalent, and to have completed two years of postsecondary education at an accredited college of liberal arts and sciences, have successfully completed an examination given by the Department of Commerce and Economic Development and not to have been licensed to practice naturopathic medicine in another state if the license has been revoked or suspended for disciplinary reasons. In addition, the applicant must have graduated from a legally chartered school of naturopathic medicine or a school of naturopathic medicine that meets specific curriculum requirements including a course of study of at least 4,000 hours of which 1,500 must be clinical.

Hawaii. In Hawaii, to be licensed as a naturopathic physician, an applicant must reside in the state for one year prior to application, be a high school graduate, have had two years liberal arts education at an accedited college and be a graduate of a legally chartered school of naturopathic medicine that meets specific curriculum requirements found in the law. In addition, the applicant must pass an examination prepared and administered by the Board of Naturopathic Examiners.

Arizona. Arizona law requires an applicant for a naturopathic license to be a high school graduate or the equivalent and to have graduated from a school of drugless therapeutics, approved by the Board of Naturopathic Examiners. The school must meet specific curriculum requirements specified in the law and provide a total of at least 4,500 hours of instruction. The applicant must also pass an examination prepared by the Board of Examiners.

Connecticut. Connecticut law requires an applicant for a naturpathic license to be a high school graduate, to have completed 64 weeks of study at a college or scientific school approved by the Board of Naturopathic Examiners and to have graduated from a legally chartered, reputable school or college of naturopathy approved by the board. To be approved, the school of naturopathy, must require a course of resident instruction of at least four years, with each year consisting of thirty-six weeks of actual attendance. The applicant must also successfully pass an examination given by the Department of Health Services.

Oregon. Minimum requirements to be eligible for a license of naturopathy in Oregon include a high school diploma, two years satisfactory study in an accredited college of liberal arts and sciences and graduation from a college of naturopathy approved by the Board of Naturopathic Examiners. To be accredited, the college of Naturopathy must provide at least 4,000 lecture or recitation hours. Applicants are also required to pass an examination administered by the board.

Washington. Washington requires applicants for a naturopathic license to be graduates of a school of naturopathic medicine approved by the Director of Licensing and to pass an examination prepared amd administered by the Director of Licensing. To be approved, the school must require a high school diploma as a condition of admission.

Nevada. To be licensed as a naturopath in Nevada, the applicant must be 21 years of age or older, a citizen of the United States or be legally entitled to work and live here, a graduate of a school of naturopathic medicine that is approved by the Board of Naturopathic Examiners and must have successfully completed an examination administered by the board.

Scope of Practice

The scope of naturopathic practice allowed by the proposed Alaska law is similar to the scope of practice allowed in Oregon, Arizona, and Connecticut. These states all allow naturopaths to perform childbirth, draw blood for diagnosis purposes, sign birth and death certificates and perform minor surgeries.

However, the states of Washington and Nevada restrict the scope of naturopathic practice more than the proposed Alaska law. These states do not allow naturopaths to perform surgeries of any kind or perform natural childbirth (except in Washington if a licensed midwife is present). Naturopaths in Nevada must work under the supervision of a physician; however, they are allowed to draw blood for diagnosis.

Alaska. The proposed Alaska law would allow naturopaths to perform physical exams, write prescriptions for noncontrolled substances, sign birth and death certificates, diagnose disease according to training, treat patients by stimulating normal functions of tissues and organs sensitized by disease, draw blood for laboratory purposes, use electrical or other methods for repair and care of superficial lacerations and abrasions, and practice natural childbirth in obsetrics. According to the proposed law, a naturopath may not perform surgery except as related to childbirth, use controlled substances, use radiation therapy or use drugs except antiseptics, local anesthetics, minerals and extracts, compounds or concentrates obtained from plants or animals.

Hawaii. Hawaii's naturopathic licensing law does not specify a scope of allowable practice. However, it does state that "naturopathic physicians licensed under this chapter shall observe and be subject to all state regulations relative to reporting births and deaths and all matters pertaining to the public health with equal rights and obligations as physicians, surgeons, and practitioners of other schools of medicine." Because we were unable to contact representatives of the Hawaii Board of Naturopathic Examiners, we were unable to make specific comparisons to the proposed Alaska law.

Arizona. The Arizona law does not specifically include the scope of services naturopaths can offer. According to Dr. Milburn Shelton, President of the State Naturopathic Licensing Board, the scope of services is determined by the definitions found in the statute.[1] For example, naturopathy means "a system for treating the abnormalities of the human mind and body by the use of drugless and nonsurgical methods including the use of physical, electrical, hygenic, and sanitary measures and all form of physiotherapy."

Nonsurgical is defined to be "a system of treating the abnormalities of the human mind and body without surgical invasion of the human body, but does not preclude the use of acupuncture, electrical or other methods for the repair and care of incident and superficial lacerations and abrasions, benign superficial lesions and the removal of foreign bodies

---

[1]Dr. Milburne Shelton, President of the Arizona Board of Naturopathic Examiners, (602) 937-9125.

located in superficial structures, and the use of standard clincal procedures in connection therewith." This definition allows procedures that are similar to ones allowed in the proposed Alaska law.

Dr. Shelton stated that naturopaths in Arizona could also perform physical examinations, prescribe substances authorized in the statutes, sign both birth and death certificates, treat patients with acupuncture, draw blood for laboratory purposes and practice natural childbirth. He also noted that naturopaths in Arizona are prohibited from performing the activities also prohibited in CSHB 347.

Connecticut. As with Arizona, the Connecticut law is not very specific concerning the scope of practice naturopaths are allowed to perform. However, according to Dr. Charles Soderstrom, President of the Board of Naturopathic Examiners, the scope of practice is very similar to the proposed Alaska law.[2] He noted that Connecticut naturopaths can perform minor surgery, practice natural childbirth, sign both birth and death certificates, draw blood for laboratory tests, and perform diagnosis. However, as in the proposed Alaska law, naturopaths may not perform major surgery, use controlled substances, or use radiation therapy.

Oregon. The Oregon statutes allow naturopaths to "treat the human body by use of drugless methods, which has for its object the maintaining of the body in, or of restoring it to, a state of normal health." Although the full scope of allowed services is not detailed in the statute, it does specifically mention that antiseptics and anesthetics can be administered, birth and death certificates can be signed and minor surgery (as defined in the statute) can be performed.[3] Specific prohibitions mentioned in the law include the practice of optometry, performing chiropractic adjustments and prescribing drugs.

Washington. The Washington licensing law does not specifically detail the scope of naturopathic practice. According to Yvonne Braeme, Executive Secretary to the Drugless Examining Committee, the existing law in Washington, which was adopted in 1919, is outdated.[4] However, she did note that naturopathic practice in Washington may be more restricted than that proposed by the Alaska law. In Washington, naturopaths are

---

[2]Dr. Charles Soderstrom, President, Connecticut Board of Naturopathic Examiners, (203) 633-5330.

[3]Minor surgery as defined in the Oregon law is very similar to the scope of services detailed in the proposed Alaska statute.

[4]Ms. Yvonne Braeme, Executive Secretary, Washington State Board of Drugless Medicine, (206) 753-3576.

not allowed to sign birth and death certificates, draw blood for laboratory uses, perform natural childbirth without the presence of a licensed midwife, do surgeries of any kind or prescribe medicine.

Nevada. Of all the states that we contacted, Nevada had the most restrictive law concerning naturopaths. In Nevada, naturopaths are required to work under the supervision of a licensed physician and are not authorized to "perform those functions and duties specifically delegated by law to physicians, dentists, nurses, osteopaths, chiropractors, practitioners of traditional oriental medicine, podiatrists, optometrists, hearing aid specialists or physical therapists."

Specifically, naturopaths may not use x-ray or radium treatments, perform major or minor surgery, perform obstetrics, prescribe drugs or draw blood for any reason other than diagnosis. Naturopaths may sign birth and death certificates if they are co-signed by the supervising physician.

Reciprocity in Licensing

Reciprocity refers to the granting of a license by one state based on the fact that a license has been granted to the applicant by another state that has similar licensing requirements. The proposed Alaska law gives this power to the Department of Commerce and Economic Development assuming that the law in the state in which the applicant currently has a license is equivalent to the requirements of Alaska law.

Currently, the states of Arizona and Oregon have the power in their statutes to grant naturopathic licenses based on reciprocity agreements. The states of Nevada, Washington, Connecticut and Hawaii do not allow reciprocity.

I hope that this informatiom is helpful to you. If you would like copies of the naturopathic regulations from other states or require additional research, please let me know.

From: Labor and Commerce Committee Staff

RE: CSHB 347 "Relating to Licensing of Naturopathic Practitioners

Following yesterdays public hearing on HB 347, a committee substitute for the bill was ordered by the Chairman of the Committee. The changes from the original committee are substitute are listed below.

1. The Board of Naturopathic examiners would consist of three naturopaths, one licensed doctor, and one public member. The original CS called for two naturopaths, one doctor, one nurse and a public member.

2. The Applicability section was deleted.

3. Page 2, Line 5, the words "equivalent to or higher than requirements in other states that license naturopaths" were added.

4. Page 3, Line 3, after the word held the words "at least twice a year" were added.

5. Page 6, Line 21 was changed so to read "through the prevention and treatment of illness."

IN THE HOUSE BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 347 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) regulation of naturopathy or naturopathic medicine under AS 08.45.

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS.

ARTICLE 1. REGULATION OF NATUROPATHY.

Sec. 08.45.010. DUTIES AND POWERS. The department shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter;

(3) license naturopaths and renew licenses in accordance with AS 08.45.100 - 08.45.170; and

(4) provide for temporary permits to engage in the practice of naturopathic medicine for persons who are apparently qualified that are valid until certification of the results of the next examination given under AS 08.45.120.

ARTICLE 2. LICENSING OF NATUROPATHS.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage in the practice of naturopathy or naturopathic medicine unless that

person has a valid license or temporary permit under this chapter.

Sec. 08.45.110. LICENSURE AS A NATUROPATH. To be eligible for a license as a naturopath, an applicant shall

(1) hold a high school diploma or the equivalent;

(2) have completed two years of postsecondary education at an accredited college of liberal arts or sciences;

(3) have graduated from a legally chartered school or college of naturopathic medicine that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of instruction totaling 4,000 hours or more of which at least 1,500 hours is clinical experience; the course of instruction shall include:

(A) anatomy, physiology, histology, and embryology;

(B) microbiology;

(C) pathology;

(D) immunology;

(E) public health;

(F) physical, clinical, and x-ray diagnosis;

(G) first aid and emergency medicine;

(H) obstetrics and gynecology;

(I) orthopedics;

(J) minor surgery and proctology;

(K) otolaryngology;

(L) physiotherapy and manipulative techniques;

(M) dietetics and clinical nutrition;

(N) botanical medicine;

(O) naturopathic theory, therapeutics and clinical practice;

(P) jurisprudence;

(4) successfully complete an examination given by the department;

(5) not have a license to practice naturopathic medicine in another state, province, or territory, that is suspended or revoked for disciplinary reasons;

(6) be a United States citizen or lawfully admitted to permanent residence in this country; and

(7) be of good moral character.

Sec. 08.45.120. EXAMINATION. (a) An examination for licensing as a naturopath shall be held at a time and place and shall be conducted as determined by the department. The examination shall be limited to the subjects listed in AS 08.45.110(3), each of which shall constitute a separate examination section. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the department may require.

(b) To pass the examination an applicant shall receive an overall average of 75 percent and may not receive less than 70 percent in more than two sections.

Sec. 08.45.130. ENDORSEMENT. The department may license a person as a naturopath if the person is currently licensed as a naturopath in another state or in a province of Canada and

(1) that state or province maintains professional licensing standards equivalent or higher than those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license in this state; and

(3) the person demonstrates to the satisfaction of the department qualifications at least equal to those required of persons

licensed under this chapter.

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The department may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) habitually overuses alcoholic beverages;

(4) unlawfully uses a controlled substance as defined in AS 11.81.900(b)(6);

(5) impersonates another physician;

(6) practices under an assumed name; or

(7) is convicted of a crime involving moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

Sec. 08.45.150. FEES. The following fees are imposed under this chapter:

(1) application for examination	$ 50
(2) application for reexamination	10
(3) license issuance or biennial renewal	200
(4) issuance of temporary permit	50

Sec. 08.45.160. SCOPE OF NATUROPATHIC PRACTICE. (a) A naturopath in the course of the practice of naturopathic medicine may

(1) perform physical examinations, write prescriptions for substances authorized in this chapter, and sign birth and death certificates;

(2) use systems of diagnosis for which the naturopathic physician has been trained under AS 08.45.110(3);

(3) treat patients by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies, including acupuncture, that are effective in stimulating normal function of tissues and organs sensitized by disease;

(4) draw blood for laboratory purposes, and use electrical or other methods for the repair and care of superficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in superficial structures; and

(5) practice natural childbirth in obstetrics, including related minor surgical procedures.

(b) A naturopath may not

(1) perform surgery except as provided under (a)(5) of this section;

(2) use controlled substances as defined in AS 11.81.-900(b)(6);

(3) use radiation therapy; or

(4) use drugs except (antiseptics, local anesthetics, minerals and extracts, compounds or concentrates obtained from plants or animals.)

Sec. 08.45.170. CONTINUING EDUCATION. (a) The department may prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the department evidence of completion of continuing education requirements.

(c) The department may exempt a licensee from the continuing education requirement under (b) of this section upon an application of the licensee setting out extenuating circumstances. A licensee may

not receive more than one exemption under this subsection in a five-year period.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND ABBREVIATIONS. (a) A person licensed under this chapter may use the following titles: "Naturopath", "Doctor of Naturopathy" or its abbreviation, "N.D.". A person licensed under this chapter may not use a title in a manner that suggests that the person practices a form of medicine or a healing art other than naturopathy.

(b) A person may not use a title or abbreviation listed in (a) of this section unless the person is licensed under this chapter.

Sec. 08.45.205. VIOLATIONS. (a) A person is guilty of a class B misdemeanor if the person

(1) fraudulently obtains or furnishes a temporary permit, license, renewal, or record required by this chapter;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter.

(b) A person who practices naturopathy or naturopathic medicine without a valid temporary permit or license issued under this chapter is guilty of a class A misdemeanor.

Sec. 08.45.220. DEFINITIONS. In this chapter

(1) "department" means the Department of Commerce and Economic Development;

(2) "naturopathy" and "naturopathic medicine" means a system of healing the human body that includes diagnosis and treatment through the use of natural agencies, forces, processes, and products with emphasis on the response of the individual to the disease rather than its treatment in isolation.

* Sec. 3. LICENSING OF PRACTITIONERS OF NATUROPATHY OR NATUROPATHIC

MEDICINE WITHOUT EXAMINATION. The commissioner of commerce and economic development shall license all persons who, on the effective date of this Act, meet the qualifications of AS 08.45.110(1) - (3) and (5) - (7) and who apply for licensure under AS 08.45 not later than June 30, 1985.

* Sec. 4. This Act takes effect July 1, 1984.

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 347 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of naturopaths; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) regulation of naturopaths under AS 08.45.

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS.

ARTICLE 1. BOARD OF NATUROPATHIC EXAMINERS.

Sec. 08.45.010. CREATION AND MEMBERSHIP OF THE BOARD. There is established the Board of Naturopathic Examiners consisting of

(1) two naturopaths licensed under this chapter;

(2) one doctor licensed under AS 08.64;

(3) one registered nurse licensed under AS 08.68; and

(4) one public member.

Sec. 08.45.030. TERM OF OFFICE. Members of the board serve staggered terms of three years. A member may be appointed to serve no more than two consecutive full terms.

〈Sec. 08.45.040. APPLICABILITY. AS 08.45.010 - 08.45.040 apply one year after the first eight licenses are issued under this chapter. After AS 08.45.010 - 08.45.040 becomes applicable, the board shall exercise the powers and duties of the department under this chapter.〉

ARTICLE 2. REGULATION OF NATUROPATHY.

Sec. 08.45.090. DUTIES AND POWERS. (a) The department shall

(1) evaluate the qualifications of applicants for licenses

under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter; and

(3) license naturopaths and renew licenses in accordance with AS 08.45.100 - 08.45.170.

(b) The department may establish by regulation educational requirements for licensure under this chapter in addition to requirements under AS 08.45.110(2), and identify schools that provide courses of study that satisfy the requirements.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage in the practice of naturopathy unless that person has a valid license or temporary permit issued under this chapter.

Sec. 08.45.110. LICENSURE AS A NATUROPATH. To be eligible for a license as a naturopath, an applicant shall

(1) hold a bachelor's degree from an accredited college of liberal arts or sciences;

(2) have graduated from a school of naturopathy approved by the department that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of study totaling at least 4,000 hours of instruction of which at least 1,500 hours is clinical experience;

(3) successfully complete an examination given by the department;

(4) not have a license to practice naturopathy in another state, province, or territory, that is suspended or revoked for disciplinary reasons;

(5) be a United States citizen or lawfully admitted to permanent residence in this country; and

(6) after graduating from a school of naturopathy, complete a one-year internship supervised by a naturopath licensed in this or another state.

Sec. 08.45.120. EXAMINATION. (a) An examination for licensing as a naturopath shall be held at a time and place and shall be conducted as determined by the department. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the department may require.

(b) To pass the examination an applicant shall receive an overall average of 75 percent and may not receive less than 70 percent in more than two sections. If an applicant fails the examination, the applicant may apply to be re-examined.

Sec. 08.45.130. TEMPORARY PERMIT. (a) The department may issue a temporary permit to practice naturopathy to a person if the person

(1) is currently licensed as a naturopath in another state or territory or in a province of Canada; and

(A) that state, territory, or province maintains professional licensing standards equivalent or higher than those in this chapter;

(B) that state, territory, or province extends the same licensing privilege to those holding a license in this state; and

(C) the person demonstrates to the satisfaction of the department qualifications at least equal to those required of persons licensed under this chapter; or

(2) qualifies for a license under AS 08.45.110(1) - (5) and is working as an intern supervised by a naturopath with a license or temporary permit issued under this chapter.

(b) A temporary permit issued under (a)(1) of this section is valid until the date on which the next examination is offered under AS 08.45.120. A temporary permit issued under (a)(2) of this section is valid for one year.

Sec. 08.45.140. LICENSE RENEWAL. A license issued under this chapter expires unless it is renewed every four years.

Sec. 08.45.150. FEES. The following fees are imposed under this chapter:

(1) application for examination	$ 50
(2) application for re-examination	10
(3) license issuance or renewal	200
(4) temporary permit issuance	50

Sec. 08.45.160. SCOPE OF NATUROPATHIC PRACTICE. (a) A naturopath in the course of the practice of naturopathy may

(1) use systems of diagnosis for which the naturopath has been trained;

(2) treat patients by physiological, nutritional, mechanical, manual, hydrotherapeutic and phytotherapeutic means, with accupressure, ~~and~~ and with minerals, and ~~with~~ extracts, compounds and concentrates obtained from plants or animals.

(b) A naturopath may not

(1) perform surgery;

(2) use or prescribe controlled substances as defined in AS 11.81.900(b)(6); or

(3) use x-ray equipment, radium, or irradiation for diagnosis or therapy.

Sec. 08.45.170. CONTINUING EDUCATION. (a) The department shall prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the department evidence of completion of continuing education requirements.

(c) The department may exempt a licensee from the continuing education requirement upon an application of the licensee setting out extenuating circumstances. A licensee may not receive more than one exemption under this subsection in a five-year period.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND ABBREVIATIONS. (a) A person with a license or permit under this chapter may use the following titles: "Naturopath", "Doctor of Naturopathy" or its abbreviation, "N.D.". A person with a license or permit under this chapter may not use a title in a manner that suggests that the person practices a form of medicine or a healing art other than naturopathy.

(b) A person may not use a title or abbreviation listed in (a) of this section unless the person is licensed under this chapter.

Sec. 08.45.210. IMPOSITION OF DISCIPLINARY SANCTIONS. After a hearing, the department may limit, deny, suspend, or revoke a license or temporary permit, or censure a licensee or permittee if the person

(1) secured a license or permit under this chapter through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime that affects the person's ability to continue to practice competently and safely;

(5) fails to comply with this chapter or a regulation adopted under this chapter;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) addiction or severe dependency on alcohol or other drugs that impairs the person's ability to practice safely;

(C) physical or mental disability;

(7) engaged in lewd or immoral conduct in connection with the delivery of professional service to a patient.

Sec. 08.45.220. VIOLATIONS. (a) Except as provided in (b) of this section, a person is guilty of a class B misdemeanor if the person intentionally violates a provision of this chapter or a regulation adopted under this chapter.

(b) A person who practices naturopathy without a valid temporary permit or license issued under this chapter is guilty of a class A misdemeanor.

Sec. 08.45.900. DEFINITIONS. In this chapter

(1) "department" means the Department of Commerce and Economic Development;

(2) "naturopathy" and "naturopathic" means a system of human health care that promotes good health through the prevention of illness and treatment by the use of educational, physical, nutritional, botanical, hygienic and other methods, and without the use of prescription drugs, surgery, x-ray equipment or radium therapy.

* Sec. 3. TEMPORARY PERMITS FOR PRACTITIONERS OF NATUROPATHY. (a) The Department of Commerce and Economic Development shall issue a temporary permit to practice naturopathy to a person who, on the effective date of this Act,

(1) is practicing naturopathy in the state;

(2) meets all the qualifications of AS 08.45.110 or 08.45.130-(a)(2), except for AS 08.45.110(3); and

(3) applies for the permit.

(b) A temporary permit issued under this section is valid until the date on which the first examination is offered under AS 08.45.120, as enacted in sec. 2 of this Act.

* Sec. 4. Notwithstanding AS 08.45.010 as enacted in sec. 2 of this Act, the first members of the Board of Naturopathic Examiners shall be appointed for the following terms; one member shall serve a one-year term, two members shall serve two-year terms, and two members shall serve three-year terms.

* Sec. 5. This Act takes effect January 1, 1985.

introduced by Rep. Furnace

MARCH 27, 1984

TO: HOUSE LABOR AND COMMERCE COMMITTEE MEMBERS
RE: PROPOSED AMENDMENTS TO HB 347

THE FOLLOWING AMENDMENTS TO CSCSHB 347 WERE PROPOSED BY MEMBERS OF THE NATUROPATHIC PROFESSION.

1. ADD A THIRD NATUROPATH TO THE BOARD. THE TOTAL NUMBER OF BOARD MEMBERS WOULD THEN BE SIX.

2. PAGE 2, LINE 7 AFTER THE WORD CHAPTER ADD, CONSISTENT WITH OTHER STATES THAT LICENSE NATUROPATHS.

3. PAGE 3, LINE 5 AFTER THE WORD HELD ADD, AT LEAST TWICE PER YEAR.

4. PAGE 5, LINE 11 AFTER THE WORD NATUROPATHY ADD, NATUROPATHIC PHYSICIAN.

5. PAGE 6, LINE 21 BEGINNING WITH THE WORD PREVENTION, CHANGE TO READ, PREVENTION AND TREATMENT OF ILLNESS.

6. PAGE 6, LINE 24 CHANGE THE TERMS PRESRCIPTION DRUGS TO READ, CONTROLLED SUBSTANCES AS DEFINED UNDER AS 11.71.140-11.71.190

7. INCLUDE A SECTION AT THE END OF THE BILL ALLOWING THOSE NATUROPATHS WHO:

1. MEET THE REQUIREMENTS FOR LICENSURE
2. ARE LICENSED IN ANOTHER STATE
3. HAVE PRACTICED IN ALASKA FOR ONE YEAR OR MORE

TO BE EXCLUDED FROM TAKING THE NATUROPATHIC LICENSING EXAMINATION.

MARCH 7, 1984

TO: JOHN

FROM: KEN

RE: 347

THE PURPOSE OF HB 347 IS TO PROVIDE, IN STATUTES, LANGUAGE ON THE LICENSING OF PRACTITIONERS OF NATUROPATHIC MEDICINE, AND TO CLEARLY SPELL OUT THE SCOPE OF NATUROPATHIC PRACTICE. THIS LEGISLATION HAS BEEN SCRUTINIZED BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE AND PASSED ON TO THIS COMMITTEE FOR FURTHER WORK.

TO DEFINE THE INTENT OF THE BILL MORE CLEARLY, HB 347 WOULD SET UP A MEANS FOR REGULATING NATUROPATHY. IT ALSO WOULD ESTABLISH LICENSING, EDUCATION, AND EXAMINATION REQUIREMENTS, SET FEES, AND LAY OUT WHAT A NATUROPATH CAN OR CAN NOT PRACTICE.

THE HESS COMMITTEE PASSED OUT ONE VERSION OF THE BILL. REP. MILO FRITZ HAS ALSO OFFERED ANOTHER. BOTH VERSIONS OF THE BILL ARE BEFORE YOU KNOW FOR COMPARISON AND CONSIDERATION.

QUESTIONS:

1. SHOULD THE DEPARTMENT OF HEALTH EDUCATION AND SOCIAL SERVICES HAVE RESPONSIBILITY FOR REGULATING THIS FIELD, OR SHOULD A BOARD OF NATUROPATHY BE ESTABLISHED ?

2. WHY SHOULD OR SHOULDN'T A NATUROPATH BE ALLOWED TO DRAW BLOOD FOR TESTING ?

3. HOW MANY NATUROPATHS ARE THERE PRACTICING IN ALASKA AT THE PRESENT TIME ?

4. IN THE TWO BILLS THE EDUCATION REQUIREMENTS VARY. HOW MUCH EDUCATION SHOULD A NATUROPATH BE REQUIRED TO HAVE? AND, IN WHAT SPECIFIC AREAS SHOULD STUDY BE CONCENTRATED?

5. IN SECTION 3 OF THE HESS COMMITTEE VERSION, THOSE CURRENTLY PRACTICING NATUROPATHY IN ALASKA WOULD NOT HAVE TO MEET REQUIREMENTS ESTABLISHED FOR FUTURE PRACTITIONERS. WHY ?

IN THE HOUSE BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 347 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) regulation of naturopathy or naturopathic medicine under AS 08.45.

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS.

ARTICLE 1. REGULATION OF NATUROPATHY.

Sec. 08.45.010. DUTIES AND POWERS. The department shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter;

(3) license naturopaths and renew licenses in accordance with AS 08.45.100 - 08.45.170; and

(4) provide for temporary permits to engage in the practice of naturopathic medicine for persons who are apparently qualified that are valid until certification of the results of the next examination given under AS 08.45.120.

ARTICLE 2. LICENSING OF NATUROPATHS.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage in the practice of naturopathy or naturopathic medicine unless that

person has a valid license or temporary permit under this chapter.

Sec. 08.45.110. LICENSURE AS A NATUROPATH. To be eligible for a license as a naturopath, an applicant shall

(1) hold a high school diploma or the equivalent;

(2) have completed two years of postsecondary education at an accredited college of liberal arts or sciences;

(3) have graduated from a legally chartered school or college of naturopathic medicine that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of instruction totaling 4,000 hours or more of which at least 1,500 hours is clinical experience; the course of instruction shall include:

(A) anatomy, physiology, histology, and embryology;

(B) microbiology;

Dee - not enough — (C) pathology; (alteration of tissue - by disease)

(D) immunology;

(E) public health;

(F) physical, clinical, and x-ray diagnosis;

(G) first aid and emergency medicine;

(H) obstetrics and gynecology;

(I) orthopedics;

(J) minor surgery and proctology;

(K) otolaryngology;

(L) physiotherapy and manipulative techniques;

(M) dietetics and clinical nutrition;

(N) botanical medicine;

should be left in — (O) naturopathic theory, therapeutics and clinical practice;

7 yrs

(P) jurisprudence;

(4) successfully complete an examination given by the department;

(5) not have a license to practice naturopathic medicine in another state, province, or territory, that is suspended or revoked for disciplinary reasons;

(6) be a United States citizen or lawfully admitted to permanent residence in this country; and

(7) be of good moral character.

Sec. 08.45.120. EXAMINATION. (a) An examination for licensing as a naturopath shall be held at a time and place and shall be conducted as determined by the department. The examination shall be limited to the subjects listed in AS 08.45.110(3), each of which shall constitute a separate examination section. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the department may require.

(b) To pass the examination an applicant shall receive an overall average of 75 percent and may not receive less than 70 percent in more than two sections.

Sec. 08.45.130. ENDORSEMENT. The department may license a person as a naturopath if the person is currently licensed as a naturopath in another state or in a province of Canada and

(1) that state or province maintains professional licensing standards equivalent or higher than those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license in this state; and

(3) the person demonstrates to the satisfaction of the department qualifications at least equal to those required of persons

licensed under this chapter.

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The department may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) habitually overuses alcoholic beverages;

(4) unlawfully uses a controlled substance as defined in AS 11.81.900(b)(6);

(5) impersonates another physician;

(6) practices under an assumed name; or

(7) is convicted of a crime involving moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

Sec. 08.45.150. FEES. The following fees are imposed under this chapter:

(1) application for examination	$ 50
(2) application for reexamination	10
(3) license issuance or biennial renewal	200
(4) issuance of temporary permit	50

Sec. 08.45.160. SCOPE OF NATUROPATHIC PRACTICE. (a) A naturopath in the course of the practice of naturopathic medicine may

(1) perform physical examinations, write prescriptions for substances authorized in this chapter, and sign birth and death certificates;

(2) use systems of diagnosis for which the naturopathic physician has been trained under AS 08.45.110(3);

(3) treat patients by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies, including acupuncture, that are effective in stimulating normal function of tissues and organs sensitized by disease;

(4) draw blood for laboratory purposes, and use electrical or other methods for the repair and care of superficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in superficial structures; and

(5) practice natural childbirth in obstetrics, including related minor surgical procedures. all Major - no minor

(b) A naturopath may not

(1) perform surgery except as provided under (a)(5) of this section;

(2) use controlled substances as defined in AS 11.81.-900(b)(6); should not need to use Drugs.

(3) use radiation therapy; or very dangerous

(4) use drugs except antiseptics, local anesthetics, minerals and extracts, compounds or concentrates obtained from plants or animals.

Sec. 08.45.170. CONTINUING EDUCATION. (a) The department may prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the department evidence of completion of continuing education requirements.

(c) The department may exempt a licensee from the continuing education requirement under (b) of this section upon an application of the licensee setting out extenuating circumstances. A licensee may

not receive more than one exemption under this subsection in a five-year period.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND /BBREVIATIONS. (a) A person licensed under this chapter may use the following titles: "Naturopath", "Doctor of Naturopathy" or its abbreviation, "N.D.". A person licensed under this chapter may not use a title in a manner that suggests that tne person practices a form of medicine or a healing art other than naturopathy.

(b) A person may not use a title or abbreviation listed in (a) of this section unless the person is licensed under this chapter.

Sec. 08.45.205. VIOLATIONS. (a) A person is guilty of a class B misdemeanor if the person

(1) fraudulently obtains or furnishes a temporary permit, license, renewal, or record required by this chapter;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter.

(b) A person who practices naturopathy or naturopathic medicine without a valid temporary permit or license issued under this chapter is guilty of a class A misdemeanor.

Sec. 08.45.220. DEFINITIONS. In this chapter

(1) "department" means the Department of Commerce and Economic Development;

(2) "naturopathy" and "naturopathic medicine" means a system of healing the human body that includes diagnosis and treatment through the use of natural agencies, forces, processes, and products with emphasis on the response of the individual to the disease rather than its treatment in isolation.

* Sec. 3. LICENSING OF PRACTITIONERS OF NATUROPATHY OR NATUROPATHIC

MEDICINE WITHOUT EXAMINATION. The commissioner of commerce and economic development shall license all persons who, on the effective date of this Act, meet the qualifications of AS 08.45.110(1) - (3) and (5) - (7) and who apply for licensure under AS 08.45 not later than June 30, 1985.

* Sec. 4. This Act takes effect July 1, 1984.

850-10-220

SCOPE AND PURPOSE

(1) ORS 685.060 requires that one of the minimum educational requirements for licensure to practice naturopathic medicine in Oregon is graduation from a naturopathic school or college approved by the State Board of Naturopathic Examiners which teaches adequate courses in all subjects necessary to the practice of naturopathic medicine. The statute also specifies required subjects and subjects which the Board may not require, and permits the Board to require other subjects at its discretion.

(2) The purpose of these rules is to provide a set of standards and procedure by which schools of naturopathic medicine may obtain approval by the Board of Naturopathic Examiners in order that graduates of those schools may be permitted to take examinations for license.

850-10-221

EXERCISE OF BOARD AUTHORITY

(1) The Board may grant provisional approval to a naturopathic college which has been in continuous operation for at least one year. Provisional approval may be for a period not to exceed two and one half years and may not be renewed or extended. Provisional approval shall not imply nor assure eventual approval under ORS 685.060.

(a) In order to obtain provisional approval, a naturopathic college must demonstrate compliance with, or adequate planning and resources to achieve compliance with, the standards of Rule 850-10-224, 1 through 17.

(b) The procedures for application, examination, review, and revocation of provisional approval shall be the same as those specified for approval in Rules 850-10-224, 850-10-225 and 850-10-226.

STANDARDS

The following standards shall be used by the Board in considering a naturopathic college's application for approval:

(1) Objectives. The objectives of the institution shall be clearly stated and address the preparation for the naturopathic physician to provide patient care. The implementation for the objectives should be apparent in the administration of the institution, individual course objectives, and in the total program leading to the N.D. degree.

(2) Organization. The institution shall be incorporated under the laws of the state of its residence as an education corporation. Control shall be vested in a board of directors composed of naturopathic physicians and others. Under no circumstances shall more than one-third of the directors have administrative or instructional positions in the college. The directors must demonstrate collective responsibility in their: Knowledge of, and policy decisions consistent with, the Articles of Incorporation or Charter, By-laws, and objectives of the college; support of college programs and active participation in college governance; selection and oversight of the chief Administrative Officer.

(3) Administration. The education and experience of directors, administrators, supervisors, and instructors should be sufficient to insure that the student will receive educational services concistent with institutional objects. The administration of the institution shall be such that the lines of authority are clearly drawn. The institution shall present with its application a catalog and a brief, narrative explanation of how the administration of the institution is, or is to be, organized and how the administrative responsibility for each of the following is or is to be managed:

(a) Faculty and staff recruitment

(b) Personnel records management

the student have been paid. Each course entry shall include a title, the number of credits awarded, and a grade. The transcript shall separately identify all credits awarded by transfer, or examination.

(c) Upon request, all student records and transcripts shall be made available to the Naturopathic Board of Examiners.

(7) Catalog. The institution shall publish a current catalog at least every two years containing the following information:

(a) Name and address of the school

(b) Date of publication

(c) Admission requirements and procedures

(d) A statement of tuition and other fees or charges for which a student is responsible and a statement on refund policies

(e) A school calendar designating the beginning and ending dates of each term, vacation periods, holidays, and other dates of significance to students

(f) Objectives of the institution

(g) A list of trustees (directors), administrative officers and faculty members including titles and academic qualifications

(h) A statement of policy about standards of progress required of students, including the grading system, minimum satisfactory grades, conditions for interruption for unsatisfactory progress, probation, and re-entry, if any

(i) A description of each course indicating the number of hours and course content, and its place in the total program

(j) A description of facilities and major equipment, including library laboratory and clinical training facilities

(k) Statements on the nature and availability of student financial assistance, counseling, housing, and placement services if any.

(9) Attendance. The college shall have a stated policy relative to attendance. Students shall be required to spend the last year of the course in residence in the college which confers the degree.

(10) Curriculum. The curriculum of the college shall be designed and presented to meet or exceed the statutory requirements of length and content. The following standards are intended not as an exact description of a college's curriculum, but rather as guidelines for the typical acceptable program. It is expected that the actual program taught by each college will be prepared by the academic departments of the institution to meet the needs of their students and will exceed the outline present here. This policy has been adopted to preserve the autonomy and uniqueness of each naturopathic institution, and to encourage innovative and experimental programs enhancing the quality of naturopathic education.

(a) Basic Science

Anatomy (Includes Histology and Embryology - 350 hours
Physiology .....250 hours
Pathology.....125 hours
Biochemistry.....125 hours
Public Health (Includes Public Health, genetics, microbiology, immunology.....175 hours
Naturopathic Philosophy.....100 hours
Pharmacology .....100 hours

(b) Clinical Sciences

I. Diagnostic Courses

Physical diagnosis..... 75 hours
Clinical diagnosis.....100 hours
Laboratory diagnosis..... 50 hours
Radiological diagnosis..... 50 hours

II. Therapeutic Courses

Materia Medica (Botanical medicine).....150 hours
Homeotherapeutics, Emergency Drugs)
Nutrition.....125 hours
Physical Medicine.....150 hours
Psychological Medicine..... 75 hours

(d) Name and course number of each course taught

(e) Other non-instructional responsibilities, if any, and the proportion of the faculty member's time devoted to them.

(f) The length of time associated with the college.

(13) Library. The library shall be staffed, equipped and organized to adequately support the instruction, and research of students and faculty. The college shall submit information about the library to include:

(a) Financial support

(b) Circulation

(c) Number of volumes exclusive of documents

(d) List of periodicals

(e) List of reference books

(f) List of other instructional media

(g) List of special collections

(h) Staff and operating hours

(i) Arrangements for student and faculty access to library facilities at other institutions.

(14) Clinical Training. The clinical facilities shall be adequate in size, number and resources to provide all aspects of naturopathic diagnosis and treatment. There shall be properly equipped rooms for consultation, physical examination, and therapy, and a pharmacy, laboratory, and radiological equipment. A licensed and adequately experienced naturopathic physician must be present in the clinic at all times which the clinic is open and in direct supervision of diagnosis and treatment of patients by students. The ratio of adequately prepared studented to clinical staff shall be such that patient care and student experience are optimized while the competence of the student is evaluated.

accrediation by the Council on Naturopathic Medical Education, Inc., or other accrediting agency acceptable to the Board.

(3) Final action for approval by the Board will be held open to the public and the applicant college shall be invited to attend.

850-10-226

Revocation of Approval

Approval obtained under ORS 685.060 may be revoked for proper cause by the Board at its discretion, after a hearing. Such hearing shall be held in accordance to Model Rules of Procedure applicable to contested cases.

NATUROPATHY--THE MEDICINE OF THE FUTURE

Naturopathic Medicine comprises a holistic system of healing based upon its own unique concepts of health and disease. Naturopathy may be defined as a philosophy, science, and art that follows specific physical, chemical, biological, mental, and spiritual laws in the restoration and maintenance of health and the correction of physical disorders, without the use of synthetic drugs or major surgery. For both short-term relief and long-range cure, it utilizes Nature's most beneficial agents, based on the premises that the natural condition of the human body in normal circumstances is one of health and and viability, and that the body is able to heal itself. Disease implies a block in this self-healing ability.

While naturopathic physicians are concerned with the immediate precursors of an illness, equal consideration is given to underlying causal factors and circumstances that are frequently associated with many disorders. Particular emphasis is placed on the maintenance of health and the prevention of disease through health education in nutrition, physical fitness, mental hygiene, and other aspects of bodily care.

The naturopathic physician first familiarizes himself with what constitutes natural living; then he learns to detect by diagnostic signs how, when, and where departure from the normal or natural has taken place, and applies his knowledge and skill, aided by naturopathic therapies, to help bring about a return to the normal and natural condition that is called health. Nature heals and cures; the naturopathic physician interprets Nature's laws for and lends intelligent assistance to the patient. A major emphasis in naturopathic treatment is the equal responsibility of the patient for his own health. Patients who come to a naturopathic physician must want to be well.

Naturopathic physicians treat conditions that fall within the scope of general medical practice; cardiovascular, respiratory, gastrointestinal, gynecological and obstetrical, genitourinary, geriatric, pediatric, neurological, psychiatric, musculoskeletal, and other orthopedic disease are treated by the naturopathic practitioner. In addition, many naturopathic physicians specialize in one or more therapeutic modality or organic system. Where indicated in the diagnosis and treatment of a patient, naturopathic physicians coooperate freely with licensed physicians in the other healing professions.

Naturopathy as Philosophy, Science, and Art

The philosophy of naturopathic medicine is based upon the premise that man is part of his environment and is always influenced by it to some extent. Therefore, the health of a person's body and mind is governed by the same natural laws that apply to all living organisms. For example, physiological science has demonstrated that the natural laws by which man must abide include nutrition, oxygenation, elimination, circulation, and excretion. Disease may be viewed as altered physiology or pathology and results when man does not follow or actually violates natural or biological laws. In treating disease, naturopathic physicians utilize "therapeutic" modalities that are compatible with these laws and thereby restore health. The two principal philosophical axioms of naturopathic medicine, therefore, are "Vis Medicatrix Naturae" ("the healing power of nature") and "Do No Harm."

The science of naturopathic medicine entails a thorough and rigorous study of all the basic medical sciences, including anatomy, physiology, histology, biochemistry, and microbiology. After mastery of the basic medical sciences, the subjects of diagnosis (physical, clinical, symptomatological, radiological, and laboratory) are of the

The History and Scope of Naturopathic Medicine

While the name "naturopathy" is of comparatively recent origin, its philosophy and practices can be traced to antiquity. Naturopathy does not discard a method because it is old; neither does it embrace a technic simply because it is new. Its methods and techniques have tested upon the anvil of time and experience and have been proven to be effective.

Many of the methods of treatment which the naturopathic physician employs have been in use since the prehistoric period. Sunshine, fresh air, heat, exercise, water, clay and mud baths, and the like served as agents for cure long before man knew how to heal by non-natural means. We see a similar situation among animals, which have always known "instinctively" how to treat themselves.

In early historical times, massage, manipulation of a crude type, more explicit rules of diet and hygiene inculcated by religious doctrines were added to the therapeutic regimen. The Greeks contributed athletics and physical culture, while the Romans made extensive use of therapeutic baths of all kinds.

During medieval times the Church fostered the various healing arts, among which the methods of natural healing were outstanding. After the Renaissance, the Nature Cure movement continued to develop in Central Europe, where it received considerable attention.

The latter part of the nineteenth century marked the beginning of the development of naturopathy as we know it today. Such men as Priesnitz, Rickli, Kuhne, Bilz, Schuessler, Father Kneipp, Just, Lahmann, Ehret, and others made important contributions to the natural healing arts. They did much to popularize the work which was now called naturopathy by incorporating natural healing methods into the already-existing practices of homeopathy in Central Europe by Lust, Lindlahr, Carey, and others. Additions to the methods of the natural healing arts were now being made very rapidly. Naturopathy was formally introduced in this country approximately 75 years ago.

Naturopathic medicine is practiced throughout the world. Naturopathic medicine is currently recognized in the states of Arizona, Connecticut, Florida, Hawaii, Oregon, Utah, and Washington as well as the Canadian provinces of Alberta, British Columbia, Manitoba, Ontario, and Saskatchewan. Preliminary steps for licensing have been started in several states. In England and other countries of the Commonwealth, professional associations of naturopathic physicians have been in existence for many years. Many European countries grant recognition to naturopathic physicians equal to that of all major healing professions. Germany has some 4,000 naturopathic practitioners. This is truly the medicine of the future.

How to Become a Naturopathic Physician

The first step in becoming a naturopathic physician is admission to an established college of naturopathic medicine. The National College of Naturopathic Medicine is a four-year, N.D. degree-granting institution located at 11231 S.E. Market St., Portland, OR 97216. The Student Recruiting Office will be able to provide you with more information about NCNM's curriculum and admissions procedures.

The four years at The National College of Naturopathic Medicine are spent in a thorough study of the basic medical sciences followed by two years of work in the clinical sciences, in which students see patients in the Outpatient Clinic and develop more specialized expertise in therapeutic modalities, diagnostic procedures, and medical specialties such as obstetrics and gynecology, endocrinology, and the like. The clinical science years are an important transitional period in the

January 27, 1984

Dear Committee Members:

I know that you are concerned with whom in the department of commerce would be qualified to test and properly examine naturopathic applicants for licensure if no Naturopathic Board of Examiners is established at this time. I recommend that the department request form other states that license naturopaths, and from the approved naturopathic schools who teach the subjects being tested, questions and examinations with appropriate answers for use as a resource in Alaska's examinations. Other Naturopathic Licensing Boards and approved naturopathic schools could be consulted for guidelines when the department lacks knowledge reguarding naturopathy. When a pre-established number of naturopaths are licensed in Alaska, a Board of Naturopathic Examiners could then be established which would then consist of licensed naturopaths and public members.

Sincerely,

Patton Pettijohn N.D.

TEMPORARY CEASE AND DESIST ORDER
(AS 08.01.087(b)(1))

TO: Patton D. Pettijohn, M.D.
515 West Northern Lights Boulevard
Anchorage, Alaska 99503

1. As a result of an investigation conducted by the Division of Occupational Licensing, it has been determined that you are engaged in the following activity:

> On and after July 26, 1983, you diagnosed a medical problem of Cheryl Jones, Anchorage. Your examination and diagnosis process included your personally taking a blood sample from Ms. Jones by needle and syringe, and by conducting what Ms. Jones described as a urinalysis. You are alleged to have processed the blood and urinalysis tests at "a lab", and thereafter analyzed and interpreted these tests personally. You advised Ms. Jones that you had diagnosed her problem as vaginitis. You prescribed and sold various vitamins to Ms. Jones and provided her with a diet analysis and diet instructions which Ms. Jones believed to pertain to her general health. For her "vaginitis" you gave her only an excerpt from an unnamed magazine which explained treatment for vaginitis by a natural method. You did not refer her for treatment to any other health care professional.
>
> It has also been determined that during January 1983 you diagnosed a medical problem for one Drew Holt, a north slope employee. Your examination concluded that Mr. Holt had bursitis. You treated him with diathermy and ultrasound, and, on January 19, 1983, you advised his employer that he was again fit to return to work with regular duties.

2. This constitues the practice of medicine as defined under Alaska Statute 08.64.380(2), which states that the practice of medicine means (A) for a fee, donation or other consideration, to diagnose, treat, operate on, prescribe for, or administer to, any human ailment, blemish, deformity, disease, disfigurement, disorder, injury, or other mental or physical condition; or to attempt to perform or represent that a person is authorized to perform any of the acts set out in this subparagraph.

3. Investigation reveals that you are practicing without a license issued under AS 08.64. This is in violation of AS 08.64.170.

EXHIBIT A

4. Notification has been made to the members of the State Medical Board of the proposed issuance of this Temporary Cease and Desist Order and a majority of the members do not object to its issuance.

IT IS THEREFORE ORDERED pursuant to AS 08.01.087(b) (1) that you immediately CEASE AND DESIST from the further practice of medicine in the State of Alaska until you are properly licensed by the State Medical Board under AS 08.64.

Upon your written request within 15 days of receipt of this order a hearing will be set and thereafter a further order will be entered; if no such request is received, this order shall stand as entered.

This order is effective upon receipt by you.

DATED this 12 day of December 1983, at Juneau, Alaska.

BY ORDER OF

COMMISSIONER

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 16, 1984

SUBJECT: Regulation of Naturopaths
(CSHB 347 (HESS))

TO: Representative Niilo Koponen

FROM: Tamara Brandt Cook
Deputy Director
Division of Legal Services

TBC

Here is a draft of CSHB 347 (HESS) incorporating the changes that you requested, with one exception. Under Section 08.45.160(b)(2) you asked me to add "drugs" to the prohibition against the use of controlled substances and this I was not able to do in a way that would lead to a sensible or desirable result.

Under this draft that paragraph prohibits a naturopath from prescribing or using ". . .controlled substances as defined in AS 11.81.900(b)(6). . . ." The referenced section in turn refers to another section, AS 11.71.900(4) that includes drugs within the definition of controlled substances:

> "controlled substance" means a drug, substance, or immediate precursor included in the schedules set out in AS 11.71.140 - 11.71.190;" (Emphasis added)

By using the term "controlled substance" in this draft, drugs of a type that are regulated under state law have been included, from those deemed most dangerous (schedule IA drugs) to those deemed least dangerous (schedule VIA drugs). In view of the very comprehensive definition of controlled substance, I fear that adding the word "drugs" to the prohibition would have the result of precluding the use by a naturopath of many items available to every other person without a prescription, like aspirin or common over-the-counter cold remedies.

For you information I am including a copy of all of the types of drugs that are controlled substances and, consequently, already covered by this draft. If I can be of further assistance, please let me know.

NATUROPATHIC MEDICINE

Naturopathic Medicine is a distinct system of healing, a philosophy, science, art and practice which seeks to promote health through education and the rational use of natural agents and processes. As a separate profession, naturopathic medicine in North America traces its origins to Dr. Benedict Lust. Late in the nineteenth century, Lust came to the United States from Germany to practice and teach Hydrotherapy and "Nature-Cure" techniques popularized by Preissnitz, Kneipp and others in Europe. A committee of these practicioners met in 1900 and determined that the practice incorporate all natural methods of healing, including such elements as botanical medicines, homeopathy, nutritional therapy, medical electricity, psychology, and the emerging manipulative therapies. They called their profession "Naturopathy", a term first used by Dr. John H. Scheel, a German Homeopath. The American School of Naturopathy in New York City, founded by Dr. Benedict Lust, graduated its first class in 1902.

Although the name "naturopathic" is of relatively recent origin, the philosophical basis and many of the methods of naturopathic medicine are ancient. The modern naturopathic physician is a true heir to the Hippocratic tradition in Medicine.

PHILOSOPHY

The human body possesses enormous power to heal itself through mechanisms of homeostasis - restoring balance in structure and function and adapting to environmental changes. This vital force, the "vis medicatrix naturae", is the foundation of naturopathic philosophy and practice. The naturopathic physician uses those therapeutic substances and techniques which act in harmony with the body's self-healing processes and avoids treatments which are designed to counteract or supervene them. Ideally, naturopathic methods are applied as a means of assisting and augmenting this "healing power of nature". A cornerstone of natural therapy is cleansing, detoxification and regeneration.

Naturopathic medicine is a wholistic approach to health. By taking into consideration heredity, biochemical, emotional, environmental and psychological factors, disease manifestations are thus acknowledged from a polycausal perspective. Disease as a process rather than disease as an entity is empahsized and an understanding of the individual as an expression of the dynamic process of life is developed.

SCIENCE

The science of naturopathic medicine is a comprehensive body of knowledge derived from traditional and contemporary sources. It is a record of observation and research in diverse cultures and throughout history. Included in this science are the disciplines common to all healing arts; a thorough study of the human organism, how it iss influenced by all aspects of its environment, and techniques of discovering the nature of the disease process. Naturopathic physicians apply the latest research in all branches of medical science and technology to their field, from discoveries of new facts about human physiology, biochemistry and nutrition to the most modern diagnostic tools and techniques.

Beyond these conventional studies, naturopathic medical science also embraces other diagnostic and proven therapeutic techniques which reflect its philosophical principles.

ART

The art of naturopathic medicine is essentially the application of philosophy and science to the individual. The naturopathic physician develops an ability to gain insight into the causes and effects of personal health problems and to use his or her own knowledge and skill to assist patients in finding solutions. Only in the role of teacher - the literal meaning of "doctor" - can a physician practice truly preventative medicine. In helping people to understand how the choices they make about their lives have an effect on their health, naturopathic physicians provide health education. The ultimate role of the physician is to provide each patient with the tools to achieve the highest possible level of health and the encouragement to use these tools.

PRACTICE

The naturopathic physician is trained as a general practitioner, able to provide a wide range of individual, family and community health services to persons of all ages.

Naturopathic treatment of illnesses, injuries, and reversible pathologies embraces the psychological and emotional, nutritional, biochemical, neurological, and physical therapeutic modes. These methods are administered in combination to produce a maximal desired response or therapeutic effect.

The therapies employed by the naturopathic physician include, but are not limited to the following:

1. CHINESE MEDICINE AND ACUPUNCTURE are concerned with the basic concepts of balance in and correct mobilization of the body's internal energy flow.

2. HOMEOPATHY utilizes the natural law of similars (like cures like) in treating highly personalized "symptom pictures" displayed by patients, a health profile that is derived from extensive life histories and life style analysis.

3. PHYSICAL MEDICINE explores the physiological effects and therapeutic use of heat, light, water, electricity, and sound.

4. NUTRITION focuses on diet and the uses of food stuffs, including vitamins, to correct nutritional deficiencies or imbalancees as well as dietary therapies for specific metabolic conditions.

5. BOTANICAL MEDICINE involves a detailed survey of plants and plant knowledge, integrating traditional herbal knowledge with modern pharmacological research.

In all cases, the naturopathic physician emphasizes the patient's responsibility towards his/her own health and well-being.

BECOMING A NATUROPATHIC PHYSICIAN

The first step in becoming a naturopathic physician is application to an established college of naturopathic medicine. The National College of Naturopathic Medicine is a four-year, N.D. degree-granting institution located in Portland, Oregon. The Admissions Office will be able to provide you with more information about NCNM's curriculum and specific admissions procedures.

The four years at The National College of Naturopathic Medicine are spent in a thorough study of the basic medical sciences, followed by two years of work in the clinical sciences. During the latter, students see patients in the Outpatient Clinic, and develop more specialized expertise in therapeutic modalities. The clinical science years are an important transitional period in the development of the student to a practicing naturopathic physician. In addition, NCNM's new curriculum allows a student to concentrate in certain areas of interest including those listed above. Because of extensive contact with patients under the supervision of a licensed naturopathic physician, and the flexibility that permits students to develop specialized skills and knowledge, the clinical years are generally viewed as the most rewarding and exciting--when being a naturopathic physician becomes a reality.

Upon graduation, most naturopathic physicians set up a private, general practice, though some physicians, by choice, limit their practice to certain classes of problems or therapeutic modalities. Since naturopathic medicine is a

re-emerging profession, most physicians need to be "trail blazers" to some degree by establishing themselves independently in a community which may have little understanding of what a naturopathic physician is and what he does. This provides both a personal and a professional challenge, a challenge that is consistently met with enthusiasm.

Opportunities for post-graduate study or specialty training are presently limited. Only a few clinical residencies are available to graduates of NCNM. In the future, when the profession of naturopathic medicine grows and prospers as is inevitable, inpatient hospitals and other long-term care facilities will allow for even greater exposure to a variety of patients and ailments as well as greater opportunity for specialization at a post-graduate level.

In the words of John B. Bastyr, N.D., President Emeritus of NCNM, "It takes a special kind of person to meet the challenges of naturopathic education and practice--one who is dedicated to the service of others through healing and health education, remembering always that he or she is merely a channel for the healing power of nature." If you are such an individual, we would encourage you to pursue a career in naturopathic medicine at NCNM, and again to quote Dr. Bastyr, "brightly light the path to tomorrow's health care."

Further inquiries about naturopathic medicine and the National College of Naturopathic Medicine may be directed to:

J3/103 Enclosure

Sec. 11.71.140.

Schedule IA.

(a) A substance shall be placed in schedule IA if it is found under AS 11.71.120(c) to have the highest degree of danger or probable danger to a person or the public.

(b) Schedule IA includes, unless specifically excepted or listed in another schedule, any of the following substances whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(1) opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

(A) raw opium;

(B) opium extracts;

(C) opium fluid extracts;

(D) powdered opium;

(E) granulated opium;

(F) tincture of opium;

(G) codeine;

(H) ethylmorphine;

(I) etorphine hydrochloride;

(J) hydrocodone;

(K) hydromorphone;

(L) metopon;

(M) morphine;

(N) oxycodone;

(O) oxymorphine;

(P) thebaine;

(2) any salt, compound, derivative, or preparation of a substance included in (b)(1) of this section which is chemically equivalent or identical to any of the substances referred to in (b)(1) of this section; however, these substances do not include the isoquinoline alkaloids of opium;

(3) opium poppy and poppy straw;

(4) concentrate of poppy straw which is the crude extract of poppy straw in either liquid solid, or powder form which contains the phennanthrine alkaloids of the opium poppy.

(c) Schedule IA includes, unless specifically excepted or unless listed in another schedule, any of the following opiates,

including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers, whenever the existence of these isomers, esters, ethers, and salts is possible within the specific chemical designation, dextrorphan excepted:

(1) acetylmethadol;

(2) allylprodine;

(3) alphacetylmethadol;

(4) alphameprodine;

(5) alphamethadol;

(6) alphaprodine;

(7) anileridine;

(8) benzethidine;

(9) betacetylmethadol;

(10) betameprodine;

(11) betamethadol;

(12) betaprodine;

(13) bezitramide;

(14) clonitazene;

(15) dextromoramide;

(16) diampromide;

(17) diethylthiambutene;

(18) difenoxin;

(19) dihydrocodeine;

(20) dimenoxadol;

(21) dimepheptanol;

(22) dimethylthiambutene;

(23) dioxaphetyl butyrate;

(24) diphenoxylate;

(25) dipipanone;

(26) ethylmethythiamutene;

(27) etonitazene;

(28) etoxeridine;

(29) fentanyl;

(30) furethidine;

(31) hydroxpethidine;

(32) isomethadone;

(33) ketobemidone;

(34) levomethorphan;

(35) levomoramide;

(36) levorphanol;

(37) levophenacylmorphan;

(38) meperidine, also known as pethidine;

(39) metazocine;

(40) methadone;

(41) methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane;

(42) moramide-intermediate, 2-methyl-3-morpholino-1, 1-diphenyl-propane-carboxylic acid;

(43) morpheridine;

(44) noracymethadol;

(45) norlevorphanol;

(46) normethadone;

(47) norpipanone;

(48) pethidine, also known as merperidine;

(49) pethidine-intermediate-A, 4-cyano-1-methyl-4-phenyl piperidine;

(50) pethidine-intermediate-B, ethyl-4-phenylpiperidine-4-carbox-ylate;

(51) pethidine-intermediate-C, 1-methyl-4-phenylpiperidine- 4-carboxylic acid;

(52) phenadoxone;

(53) phenampromide;

(54) phenazocine;

(55) phenomorphan;

(56) phenoperidine;

(57) piminodine;

(58) piritramide;

(59) propheptazine;

(60) properidine;

(61) propiram;

(62) racemethorphan;

(63) racemoramide;

(64) racemorphan;

(65) trimeperidine.

(d) Schedule IA includes, unless specifically excepted or unless listed in another schedule, any of the following opium derivatives, their salts, isomers, and salts of isomers whenever

the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) acetorphine;

(2) acetyldihydrocodeine;

(3) benzylmorphine;

(4) codeine methylbromide;

(5) codeine-n-oxide;

(6) cyprenorphine;

(7) desomorphine;

(8) dihydromorphine;

(9) drotebanol;

(10) etorphine, except hydrochloride salt;

(11) heroin;

(12) hydromorphinol;

(13) methyldesorphine;

(14) methyldihydromorphine;

(15) morphine methylbromide;

(16) morphine methylsulfonate;

(17) morphine-n-oxide;

(18) myrophine;

(19) nicocodeine;

(20) nicomorphine;

(21) normorphine;

(22) pholcodine;

(23) thebacon.

Sec. 11.71.150. SCHEDULE IIA.

(a) A substance shall be placed in schedule IIA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public which is less than substances listed in schedule IA, but higher than substances listed in schedule IIIA.

(b) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following hallucinogenic substances, or which contains any of its salts, isomers, whether optical, position, or geometric, or salts of isomers whenever the existence of these salts, isomers, or salts of isomers is possible within the specific chemical designation:

(1) 4-bromo-2, 5-dimethoxy-amphetamine, also known as 4-bromo-2, 5-dimethoxy-a-methylphenethylamine and 4-bromo-2, DMA;

(2) 2,5-dimethoxyamphetamine, also known as 2,5-dimethoxy-a-methylphenethylamine and 2,5-DMA;

(3) 4-methoxyamphetamine, also known as 4-methoxy-a-methylphenethylamine and paramethoxyamphetamine, PMA;

(4) 5-methoxy-3,4-methylenedioxy-amphetamine;

(5) 4-met[illegible]-dimethoxy-amphetamine, also known as 4-methyl-2,5-dimethoxy-[illegible]ethylphenethylamine;

(6) 3,4-methylenedioxy amphetamine;

(7) 3,4,5-trimethoxy amphetamine;

(8) bufotenine, also known as 3-(B-dimethylaminoethyl)-5-hydroxyindole, 3-(2-dimethylaminoethyl)-5-indolol, N, N-dimethylserotonin; 5-hydroxy-N, N-dimethyltryptamine, and mappine;

(9) diethyltryptamine, also known as N, N-diethyltryptamine and DET;

(10) dimethyltryptamine, also known as DMT;

(11) ibogaine, also known as 7-ethyl-6, 6B, 7, 8, 9, 10, 12, 13-octahydro-2-methoxy-6, 9-methano-5H-pyrido ~~[illegible]~~ (16,26:1,2) azepino ~~[illegible]~~ (5,4-b) indole and tabernanthe iboga;

(12) lysergic acid diethylamide, also known as LSD;

(13) mescaline;

(14) n-ethyl-3-piperidyl benzilate;

(15) n-methyl-3-piperidyl benzilate;

(16) peyote;

(17) analogs of phencyclidine (PCP), including:

(A) ethylamine analog, also known by some trade or other names as follows: N-ethyl-1-phenylcyclohexylamine (1-phenylcyclohexyl)ethylamine, N-(1-phenylcyclohexyl)ethylamine, cyclohexamine, PCE;

(B) pyrrolidine analog, also known by some trade or other names as follows: 1-(1-phenylcyclohexyl)-pyrrolidine, PCPY, PHP;

(C) thiophene analog, also known as 1-[1-(2-thienyl) cyclohexyl] piperidine and 2-thienylanalog of phencyclidine, TPCP, and TCP;

(18) psilocybine;

(19) psilocyn.

(c) Schedule IIA includes cocaine or coca leaves, and any salt, compound, derivative, mixture, isomer, ester, ether, or preparation of cocaine or coca leaves produced directly or indirectly by extraction from coca leaves, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, including the isomers, salts, and salts of isomers of cocaine and other derivatives of coca leaves whenever the existence of these esters, ethers, isomers or salts is possible, but does not include decocainized coca leaves or extractions of coca leaves which do not contain cocaine or ecgonine.

(d) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system, including their salts, isomers, and salts of isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) amobarbital;

(2) mandrix or mandrax;

(3) mecloqualone;

(4) methaqualone;

(5) pentobarbital;

(6) phencyclidine, also known as PCP;

(7) secobarbital.

(e) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the nervous system:

(1) amphetamine, its salts, optical isomers, and salts of its optical isomers;

(2) methamphetamine, its salts, isomers, and salts of its isomers;

(3) methylphenidate;

(4) phenmetrazine and its salts.

(f) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, mixture, or preparation which contains any quantity of the following substances:

(1) immediate precursor to amphetamine and methamphetamine: phenylacetone also known as phenyl-2-propanone; P2P; benzyl methyl ketone; methyl benzyl ketone;

(2) immediate precursors to phencyclidine, also known as PCP:

(A) 1-phencylclohexylamine;

(B) 1-piperidinocyclohexanecarbonitrile, also known as PCC.

Sec. 11.71.160. SCHEDULE IIIA.

(a) A substance shall be placed in schedule IIIA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public less than the substances listed in schedule IIA but higher than substances listed in schedule IVA.

(b) Schedule IIIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including their salts, isomers whether optical,

position, or geometric, and salts of these isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) benzphetamine;

(2) chlorphentermine;

(3) clortermine;

(4) mazindol;

(5) phendimetrazine;

(6) any compound, mixture, or preparation in dosage unit form containing any stimulant substance listed in schedule IIA, which compound, mixture, or preparation was listed on August 25, 1971, as an excepted compound under 21 C.F.R. sec. 1308.32, and any other drug of the quantitive composition shown in that list for those substances, or which is the same except that it contains a lesser quantity of any controlled substance.

(c) Schedule IIIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system:

(1) amobarbital, secobarbital, or pentobarbital or any salt of these substances, combined with one or more other active medicinal ingredients which are not listed in any other schedule;

(2) amobarbital, secobarbital, or pentobarbital or any salt of these substances, approved by the federal Food and Drug Administration for marketing only as a suppository;

(3) any substance which contains any quantity of a derivative of barbituric acid or any salt of barbituric acid;

(4) chlorhexadol;

(5) glutethimide;

(6) lysergic acid;

(7) lysergic acid amide;

(8) methyprylon;

(9) sulfondiethylmethane;

(10) sulfonethylmethane;

(11) sulfonmethane.

(d) Schedule IIIA includes nalorphine.

(e) Schedule IIIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing any of the following narcotic drugs or their salts calculated as the free anhydrous base or alkaloid, in the following quantities:

(1) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium;

(2) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(3) not more than 100 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium;

(4) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(5) not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(6) not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(7) not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(8) not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(f) Schedule IIIA includes

(1) hashish;

(2) hash oil or hashish oil; and

(3) tetrahydrocannabinols.

Sec. 11.71.170. SCHEDULE IVA.

(a) A substance shall be placed in schedule IVA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public which is less than the substances listed in schedule IIIA, but higher than the substances listed in schedule VA.

(b) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances, including their salts, isomers and salts of isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) barbital;

(2) chloral betaine;

(3) chloral hydrate;

(4) chlordiazepoxide;

(5) clonazepam;

(6) clorazepate;

(7) diazepam;

(8) ethclorvynol;

(9) ethinamate;

(10) flurazepam;

(11) lorazepan;

(12) mebutamate;

(13) meprobamate;

(14) methohexital;

(15) methylphenobarbital, also known as mephobarbital;

(16) oxazepam;

(17) paraldehyde;

(18) petrichloral;

(19) phenobarbital;

(20) prazepam.

(c) Schedule IVA includes any material, compound, mixture or preparation which contains any quantity of the following

substance, including its salts, isomers whether optical, position, or geometric, and salts of these isomers, whenever the existence of these salts, isomers, and salts of isomers is possible: fenfluramine.

(d) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including their salts, isomers whether optical, position, or geometric, and salts of these isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) diethylpropion;

(2) phentermine;

(3) pemoline, including organometallic complexes and chelates of this substance.

(e) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing not more than 1 milligram of difenoxin and not less than 25 micrograms of atropine sulfate per dosage unit, or their salts calculated as the free anhydrous base or alkaloid.

(f) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound,

mixture or preparation which contains any quantity of the following substances, including their salts:

(1) dextropropoxyphene (alpha-(+)-4-dimethylamino-1,2-dephenyl3-methyl-2-propionoxybutane);

(2) pentazocine;

(3) propoxphene.

Sec. 11.71.180. SCHEDULE VA.

(a) A substance shall be placed in schedule VA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public which is less than substances listed in schedule IVA, but higher than substances listed in schedule VIA.

(b) Schedule VA includes any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs or their salts, calculated as the free anhydrous base or alkaloid, in limited quantities as specified in (1) - (6) of this subsection, which includes one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by schedule IA substances alone:

(1) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;

(2) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;

(3) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;

(4) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;

(5) not more than 100 milligrams of opium per 100 milliliters or per 100 grams;

(6) not more than 0.5 milligrams of difenoxin and not less than 25 micrograms of atropine sulfate per dosage unit.

(c) Schedule VA includes loperamide.

Sec. 11.71.190. SCHEDULE VIA.

(a) A substance shall be placed in schedule VIA if it is found under AS 11.71.120(c) to have the lowest degree of danger or probable danger to a person or the public.

(b) Marijuana is a schedule VIA controlled substance.

OREGON LAW
Relating to Naturopathic Medicine

The practice of naturopathic medicine was first recognized in Oregon law in 1927 and by the United States Congress in 1931.

Oregon Revised Statutes, Chapter 685 (revised 1977), 685.101—685.990, provides the licensing authority for Naturopathic Physicians in the state of Oregon:

Chapter 685

Naturopaths

Note: Section 41, chapter 842, Oregon Laws 1977, is operative July 1, 1986, and provides:

Sec. 41. ORS 685.010, 685.020, 685.030, 685.040, 685.050, 685.060, 685.070, 685.080, 685.085, 685.090, 685.100, 685.102, 685.104, 685.106, 685.110, 685.125, 685.160, 685.170, 685.190, 685.201, 685.210 and 685.990 relating to naturopaths are repealed.

GENERAL PROVISIONS

685.010 Definitions. As used in this chapter.

(1) "Board" means the Naturopathic Board of Examiners.

(2) "Drugs" means all medicines and preparations and all substances, except non-poisonous plant substances, food and water, used or intended to be used for the diagnosis, cure, treatment, mitigation or prevention of diseases or abnormalities of man, which are recognized in the latest editions of the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia, official National Formulary, or any supplement to any of them, or otherwise established as drugs.

(3) "Minor surgery" means the use of electrical or other methods for the surgical repair and care incident thereto of supperficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in the superficial structures; and the use of antiseptics and local anesthetics in connection therewith.

(4) "Naturopathy," which includes physiotherapy and minor surgery, is defined as a system of treating the human body by use of drugless methods, which has for its object the maintaining of the body in, or of restoring it to, a state of normal health.

[Amended by 1953 c.557 §4]

685.020 License required to practice naturopathy; title and abbreviations usable by licentiates. (1) No person shall practice, attempt to practice, or claim to practice naturopathy in this state without first complying with the provisions of this chapter.

(2) Licentiates under this chapter may use any or all of the following terms: "Doctor of Naturopathy" or its abbreviation, "N.D.," "Naturopath" or "Naturopathic Physician." However, none of these terms, or any combination of them, shall be so used as to convey the idea that the physician who uses them practices anything other than drugless therapy.

685.030 Application of chapter. Nothing in this chapter shall be construed to:

(1) Apply to any physician and surgeon, osteopath or chiropractor, or to any Christian Scientist or other person who by religious or

spiritual means endeavors to prevent or cure disease or suffering in accord with the tenets of any church.

(2) Authorize licentiates to practice optometry or administer chiropractic adjustments, or any system or method of treatment not authorized in this chapter, or to administer or write prescriptions for or dispense drugs, or do major surgery.

(3) Prevent one licensed under this chapter from the administration of the anesthetics or antiseptics authorized in subsection (3) of ORS 685.010 or the use of radiopaque substances administered by mouth or rectum necessary for Roentgen diagnostic purposes.

(4) Authorize the administration of any substance by the penetration of the skin or mucous membrane of the human body for a therapeutic purpose.

[Amended by 1953 c.557 §4]

685.040 Application of health laws. Licentiates under this chapter shall observe and are subject to all state, county and municipal laws and regulations relating to public health.

685.050 Execution of birth and death certificates. Licentiates under this chapter are authorized to sign birth and death certificates. Such certificates so signed shall be accepted as fulfilling all the requirements of the laws dealing with such certificates.

LICENSING

685.060 Minimum educational requirements for license. (1) The minimum educational requirements for license under the provisions of this chapter shall be:

(a) A high school education, as shown by diploma or certificate of graduation from a standard high school, or the equivalent of such an education, which shall be certified by a Superintendent of Public Instruction; and

(b) At least two years' satisfactory liberal arts and science study, or either, in a college or university accredited by either the Northwest Association of Secondary and Higher Schools or a like regional association or in a college or university in Oregon approved for granting degrees by the Oregon State Board of Education as evidenced by certificate or transcript of credits from the college or university; and

(c) Graduation from a naturopathic school or college approved by the State Board of Naturopathic Examiners and which requires for graduation a period of actual attendance of four years of at least nine months each, and teaching adequate courses in all subjects necessary to the practice of naturopathy.

(2) The studies required of the applicant for a license to practice naturopathy in this state shall include anatomy, histology, embryology, physiology, chemistry, pathology, bacteriology, public health and hygiene, toxicology, obstetrics and gynecology, diagnosis, theory, practice and philosophy of naturopathy, electrotherapy, hydrotherapy, physiotherapy, clinics, eye-ear-nose-throat, minor surgery, first aid, herbology, proctology, dietetics, jurisprudence, and such other naturopathic subjects as the board may require, except materia medica, pharmacology and major surgery, with a total of not less than 4,000 lecture or recitation hours.

[Amended by 1953 c.557 §4, 1969 c.381 §5]

685.070 Application for examination; license fee. Any person who wishes to practice naturopathy in this state shall make application to the board for an examination for a license to practice naturopathy. The application shall be filed with the board not less than 10 days before the date of the examination upon blanks provided by the board. All persons licensed under this chapter shall pay to the board a license fee of $25, $10 of which must accompany the application for examination. The balance shall be paid when the applicant has been granted a license. Under no condition will the application fee of $10 be returned to the applicant. Affidavits of two reputable citizens of the state attesting the good moral character of the applicant shall be filed with the application for examination.

685.080 Examination of applicants; issuing license. (1) For the purpose of determining the qualifications of applicants for license under this

chapter, the board shall hold meetings and conduct examinations of applicants for licenses at such time and places and under such rules and regulations as a majority of the board may determine. The time and place of holding such an examination shall be published at least 30 days prior to the date of the examination.

(2) At the time and place the board has previously designated, the applicant shall appear before the board to be examined as to his fitness to practice naturopathy. The examination shall be in writing and embrace and be restricted to the subjects listed in ORS 685.060.

(3) If the applicant answers correctly 75 percent of the questions asked on each of the subjects of the examination, the board shall issue to such applicant a license to practice naturopathy. If however, an applicant fails to pass an examination, the applicant shall, without losing credits for subjects passed and without paying another fee, be permitted, within one year from date of failure to pass, to take another examination at the convenience of the board, but the applicant shall, not less than 10 days before the date of the examination, notify the board of his intention to take the examination.

685.085 Reciprocal license. A person licensed to practice naturopathy under the laws of another state who demonstrates to the satisfaction of the board that he possesses qualifications at least equal to those required of persons eligible for licensing under this chapter, may be issued a license to practice in this state without written examination upon payment of the license fee required under ORS 685.100.
[1973 c.469 §2]

685.090 Recording license with county clerk. Before engaging in practice in any part of the state, the holder of a license under this chapter shall present such a license, or a certified copy, for record to the county clerk of the county in which the holder of the license resides. A county clerk is entitled to collect a fee of $1 for recording the license or for making a certified copy of it. Annually, on January 1, county clerks shall, when requested by the board, furnish the board with a list of such licenses on record in their respective counties.

685.100 Annual renewal of license. (1) On or before January 1 of each year, every person holding a license under this chapter shall apply to the board for a certificate of annual registration and at the time of applying shall pay to the board an annual registration fee not to exceed $75, as determined by the board and approved by the Executive Department. A person holding a license under this chapter who is at least 70 years of age and retired from the practice of naturopathy shall apply to the board for a certificate of annual registration and at the time of applying shall pay to the board an annual registration fee not to exceed $30, as determined by the board and approved by the Executive Department. The application shall be made upon a blank form furnished by the board, and shall contain such information as may be necessary to enable the board to identify the applicant for registration and the licensee to be what he claims to be in the application.

(2) Upon receipt of an application for annual registration, accompanied by the annual registration fee, the board shall issue to the applicant a certificate of annual registration. The certificate shall, at all times, be displayed in the office of the person to whom it was issued unless the person is retired from the practice of naturopathy and does not maintain an office.

(3) The failure, neglect or refusal of any person holding a license under this chapter, to pay the annual registration fee as required by subsection (1) of this section shall, after 30 days from January 1 of each year, automatically revoke his license. A revoked license shall not be restored except upon written application therefor and the payment of a restoration fee of $25 for each year the license remains revoked, which is in addition to the annual registration fee for each year the registration fee remains unpaid. An applicant for the restoration of a license so revoked shall not be required to submit to any examination as to his qualification to practice under this chapter. However, the board may deny the restoration of any license for which the required registration fees have not been paid during the years for which they are due if it finds that grounds for refusal to grant or for revocation of the license exist under ORS 685.110.

(4) On or before December 1 of each year the secretary of the board shall notify each person holding a license under this chapter that the annual registration application and fee are due on or before January 1 following.

[Amended by 1967 c.44 §2, 1969 c.26 §2, 1969 c.381 §6; 1973 c.182 §5]

685.102 Continuing education course required; exemptions. (1) Except as provided in subsection (2) of this section, each person holding a license under this chapter shall submit at the time he submits the annual registration fee, evidence satisfactory to the board of his successful completion of an approved program of continuing education in naturopathy, completed in the calendar year preceding the date on which the evidence is submitted.

(2) The board may exempt any person holding a license under this chapter from the requirements of subsection (1) of this section upon an application by him showing evidence satisfactory to the board that he is unable to comply with the requirements because of physical or mental condition or because of other unusual or extenuating circumstances. However, no person shall be exempted from the requirements of subsection (1) of this section more than once in any five-year period.

(3) Notwithstanding subsection (2) of this section, a person holding a license under this chapter may be exempted from the requirements of subsection (1) of this section upon an application by him showing evidence satisfactory to the board that he is or will be in the next calendar year at least 70 years of age and is retired or will retire in the next calendar year from the practice of naturopathy.

(4) A person who is exempted from the requirements of subsection (1) of this section shall not practice naturopathy. A violation of this subsection is grounds for suspension or revocation of the license of the person granted the exemption by the board.

[1969 c.381 §2, 1973 c.829 §67]

685.104 Effect of failure to comply with ORS 685.102; reissuance of registration. (1) The board shall refuse to issue the certificate of annual registration to any person holding a license under this chapter who fails to submit with his annual registration fee proof required under ORS 685.102, unless it has exempted the person from the requirements of subsection (1) of ORS 685.102. The board shall return the annual registration fee to the person.

(2) After January 1 of any year, the board may issue a certificate of annual registration to any holder of a license under this chapter who had been refused such certificate under subsection (1) of this section upon submission of the evidence required under subsection fees for each year the registration fee remains unpaid and a restoration fee of $25 for each year the license remains revoked.

(3) If the person completes an approved program after January 1 to meet the requirementof ORS 685.102 for the year beginning January 1, such completion does not meet the requirements of ORS 685.102 for the subsequent year.

[1969 c.381 §3, 1973 c.182 §6]

685.106 Approval of continuing education programs. (1) The board may offer a program of continuing education in naturopathy to meet the requirements of ORS 685.102. The board may also approve a program to be presented by persons reasonably qualified to do so.

(2) Any person seeking approval of a program of continuing education in naturopathy, to be offered to assist persons holding licenses under this chapter to comply with the requirements of subsection (1) of ORS 685.102, shall submit to the board, at such time as the board may require, copies of courses of study to be offered and proof of such other qualifications as the board may require. Approval granted to any program of continuing education shall be reviewed periodically and approval may be withdrawn from any program that fails to meet the requirements of the board.

(3) Any program of continuing education in naturopathy offered or approved under this section shall consist of at least 20 hours of study covering new, review, experimental, research and specialty subjects in the field of naturopathy.

[1969 c.381 §4]

685.110 Denial or revocation of license by board. The board may refuse to grant or may suspend or revoke a license to practice naturopathy in this state for any of the following reasons:

(1) The use of fraud or deception in securing a license.

(2) The impersonation of another physician.

(3) Practicing naturopathy under an assumed name.

(4) The procuring, aiding or abetting in procuring an abortion, provided, that for the purpose of this subsection an abortion means the removal from the womb of a woman the product of conception at any time prior to delivery of the child; provided further, that nothing in this chapter shall be construed to authorize any licentiate under this chapter to perform an abortion.

(5) The conviction of a crime involving moral turpitude.

(6) Any other reason that renders the applicant or licentiate unfit to perform the duties of a naturopathic physician.

[Amended by 1953 c 555 §2, 1971 c 734 §132]

685.120 [Repealed by 1971 c 734 §21]

685.125 License denial or revocation procedure; promulgation and review of rules and orders. (1) Where the board proposes to refuse to issue or renew a license, or proposes to revoke or suspend a license, opportunity for hearing shall be accorded as provided in ORS 183.310 to 183.500.

(2) Promulgation of rules, conduct of hearings, issuance of orders and judicial review of rules and orders shall be as provided in ORS 183.310 to 183.500.

[1971 c 734 §134]

STATE BOARD

685.160 Naturopathic Board of Examiners; appointment; confirmation. (1) There hereby is created the Naturopathic Board of Examiners in the Health Division. The board shall consist of three members appointed by the Governor for terms of three years commencing July 1, and until their successors are appointed and qualified. A majority of the members of the board constitutes a quorum. The Governor shall fill all vacancies in the membership of the board. All appointments of members of the board by the Governor are subject to confirmation by the Senate in the manner provided in ORS 171.560 and 171.570. No person shall be appointed to membership on the board, who is not a citizen of the State of Oregon, or who has not been in continuous practice of naturopathy in this state for five years immediately prior to the date of appointment, or who is interested financially in any medical or drugless school or college, or who is connected, directly or indirectly, with the dispensing, prescribing or sale of pharmaceutic drugs.

(2) The board shall carry into effect the provisions of this chapter and is authorized to issue licenses to practice naturopathy in this state. The possession of a common seal by the board hereby is authorized.

[Amended by 1971 c 650 §34, 1973 c 792 §40]

685.170 Officers of board. Annually the board shall elect one of its members president and one of its members secretary, who severally shall have power during their terms of office to summon witnesses, administer oaths and to take testimony and affidavits, certifying thereto, under their hand and the seal of the board. The secretary of the board shall keep a record of all actions of the board, including a detailed register of applicants for license. The board in lieu of electing one of its members as secretary, may employ or appoint a person to act as secretary to the board who shall perform such duties and functions as may be prescribed by the board.

[Amended by 1973 c 829 §68]

685.180 [Repealed by 1973 c 829 §71]

685.190 Compensation and expenses of board members; compensation of secretary. (1) A member is entitled to compensation and expenses as provided in ORS 292.495.

(2) The board may fix the compensation of the secretary subject to ORS 240.245. Such compensation shall not prohibit the secretary from receiving reimbursement for actual and necessary travel and other expenses incurred in the performance of his official duties.

[Amended by 1967 c 44 §3, 1969 c 314 §86]

685.200 [Amended by 1967 c 617 §12, repealed by 1973 c 427 §28 (685.201 enacted in lieu of 685.200)]

685.201 Disposition of receipts. All moneys received by the Health Division under this chapter shall be paid into the General Fund in the State Treasury and placed to the credit of the Health Division Account and such moneys hereby are appropriated continuously and shall be used only for the administration and enforcement of this chapter.

[1973 c 427 §29, (enacted in lieu of 685.200)]

ENFORCEMENT

685.210 Enforcement; employing attorney; jurisdiction. (1) The district attorneys of the state shall prosecute all persons charged with violation of any of the provisions of this chapter. However, the board shall have power to retain its own attorney to prosecute or assist in prosecuting any person so charged and to pay such attorney such sums as may be just for such services from the Naturopathic Fund.

(2) Justice courts, municipal courts and circuit courts have concurrent jurisdiction for the prosecution of offenses under this chapter.

PENALTIES

685.990 Penalties. Violation of any provision of this chapter is punishable, upon conviction, by a fine of not less than $50 nor more than $500.

DIVISION 10

GENERAL

Definitions

850-10-005 As used in rules 850-10-010 to 850-10-200, unless otherwise required by context:

(1) "Board" means Oregon State Board of Naturopathic Examiners.

(2) "Naturopathy" is defined as a system of diagnosing and treating the human body and maintaining or restoring it to a state of normal health, as defined in ORS Chapter 685, and in such other sections thereof as may apply.

(3) "Diagnosis" is a determination of the nature of a disease by the use of all recognized and accepted physical and laboratory examinations, which includes the drawing of blood and taking specimens of body fluids and tissues for microscopic and chemical analysis.

(4) "Prescriptions": Naturopathic physicians shall be allowed to prescribe and dispense nature's agents, forces, processes, and products.

(5) "Non-poisonous plant substance" is any plant substance, taken in relatively small amounts, which would not, by its action on organs or tissue, seriously impair function or destroy life.

(6) "Plant substance" is any medical material taken or removed from a plant.

(7) "Food" is any organic substance taken into the body which helps maintain life, builds or repairs tissue, and sustains growth. This includes the use of ensymes, minerals, vitamins (either in trace amounts or megadoses) and any food products or extracts either processed, refined, or concentrated.

Requirements for Application

850-10-010 (1) Any applicant for examination shall be a high school graduate or equivalent and a graduate of a naturopathic college that offers a resident four-year course of at least 4,000 hours.

(2) Each applicant shall possess a basic science certificate, obtained from the State Board of Higher Education either by reciprocity or by examination.

(3) Each applicant shall submit satisfactory evidence of his having had, prior to his matriculation into a naturopathic college, at least two years Liberal Arts or Science study in a college or university accredited by either the North-West Association of Secondary and Higher Schools or a like regional association or in a college or university in Oregon approved for granting degrees by the Oregon State Board of Education.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Basic Science Examination or Reciprocity

850-10-020 (1) Any applicant desiring the dates of or application blanks for the basic science examination or for reciprocity shall address all inquiries to the Secretary, State Board of Higher Education, P.O. Box 3175, Eugene, Oregon.

(2) The Oregon Basic Science Examinating Committee reciprocates with a like board from each of the following states: Arizona, Arkansas, Colorado, Iowa, Michigan, Minnesota, Nebraska, Nevada, New Mexico, Oklahoma, South Dakota, Tennesee, Texas, Washington, and Wisconsin.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Application for Examination; Filing; Additional Papers

850-10-030 (1) Any applicant for licensure by the Board shall fill out, without alterations, an application furnished by the Board.

(2) The application shall be filed with the Board at least 10 days prior to the date of the examination.

(3) A photostatic copy of the applicant's Oregon basic science certificate and of his naturopathic diploma shall be attached to his application.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Examination Dates

850-10-040 Examinations shall be held by the Board in March and in September of each year or at such other times as may be feasible.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Re-Examination

850-10-050 Any applicant for examination who has failed in one or more subjects shall be permitted, within one year, to submit himself for re-examination in those subjects, without paying an additional fee if he notifies the Board of his intention at least 10 days prior to the examinations.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Temporary Permits

850-10-060 Temporary permits for the practice of naturopathy shall not be issued by the Board.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Reciprocity

850-10-070 Reciprocity in naturopathy with another state cannot be considered by the Board.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Recordation and Display of License

850-10-080 (1) An Oregon licentiate for the practice of naturopathy shall record his license in the office of the county clerk in the county in which he resides.

(2) Each licentiate of the Board shall display in his office, in a conspicuous place, his license and yearly renewal card.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Expiration and Renewal of Licenses

850-10-090 (1) Unless renewed by proper application to the Secretary of the Board on a form provided by the Board, all licenses to practice naturopathy in Oregon automatically expire on January first of each year.

(2) The renewal application shall be accompanied by a specified yearly fee of $75, the practioner's address, and his original license number.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59; NE 2-1980, f. & ef. 9-11-80

Mode of Remittance

850-10-100 (1) The remittance of any application fee, license fee, or yearly renewal fee shall be made by postal money order, postal certificates, express money order, bank draft, or certified check.

(2) The Secretary shall be under no obligation to accept personal checks; however, he may accept them subject to collection only.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Use of Unauthorized Material and Misrepresentations in Obtaining License

850-10-110 (1) Any applicant for a license detected in the act of offering or accepting unauthorized assistance or using unauthorized material while the examinations are in progress shall be excluded from further examination and his or her papers rejected in total.

(2) The Board may refuse to grant a license to any applicant indulging in misrepresentation, fraud, or deception, or to revoke the license granted as a result of these.

(3) The Board shall carefully and rigidly investigate applicants who attempt to obtain naturopathic license by false statements or representations in their applications or otherwise violate these rules.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Illegal Practice

850-10-120 (1) Any applicant for examination shall be prohibited from and prosecuted for any practice of naturopathy while awaiting examination.

(2) Any person convicted of practicing illegally in Oregon or any person who, without a license, makes a diagnosis shall not be admitted to examination by the Board at any time.

(3) It shall be the duty of all licentiates of the Board, in the interests of both the public and the profession, to inform the Board, in writing, fully signed, of anyone practicing naturopathy in Oregon without a license or otherwise in violations of the law.

(4) For the purpose of this rule, naturopathic treatment shall be considered as practicing naturopathy within the meaning of ORS 685.010(4) even though practicing in the office of a licentiate of the Board.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Change of Address

850-10-130 It shall be the duty of any licentiate of the Board to keep the Secretary of the Board informed of any change of address.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Advertising

850-10-140 While constructive educational publicity shall be encouraged, licentiates of the Board shall refrain from using or causing to be used advertising matter which contains misstatements, falsehoods, misrepresentations, distorted, or fabulous statements as to cures.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Public Health Laws

850-10-150 Naturopathic physicians shall be subject to all state, county, and municipal laws and rules relating to public health concerning the diagnosis and reporting of contagious and infectious diseases, as may be required, to the proper health authorities in the respective counties.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

State Industrial Accident Cases

850-10-160 Naturopathic physicians may accept injured workers who are employed under the provisions of the State Industrial Accident Commission, in conformance with the Workers' Compensation Law and the rules of committee.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

State Welfare Cases

850-10-170 Naturopathic physicians may accept welfare cases under the medical plan adopted by the Welfare Commission, April 26, 1946.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Standards

850-10-180 It shall be the object of the Board to foster higher professional standards as rapidly as is consistent with the best intrests of the profession, and in this, it shall not be swayed or influenced by any school or other interests whatsoever.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Denial or Revocation of License

850-10-190 The Board may refuse to grant or may revoke a license to practice naturopathy in the State of Oregon for any of the following reasons:

(1) Commitment to a mental institution. A copy of the record of commitment, certified to by the clerk of the court entering the commitment, is conclusive evidence of the commitment.

(2) Habitual intemperance in the use of ardent spirits, narcotics, or stimulants to such an extent as to incapacitate him from the performance of his professional duties.

(3) Unprofessional or dishonorable conduct.

(4) Representing to a patient that manifestly incurable condition of sickness, disease, or injury can be permanently cured.

(5) The obtaining of any fee through fraud or misrepresentation.

(6) The willful betrayal of a professional secret.

(7) The use of any advertising in which untruthful, improper, misleading, or deceptive statements are made.

(8) The advertising of techniques or modalities to infer or imply superiority of treatment or diagnosis by the use thereof.

(9) Knowingly permitting or allowing any person to use his certificate in the practice of any system or mode of treating the sick or afflicted.

(10) Advertising either in his own name or under the name of another person or clinic or concern, actual or pretended, in any newspaper, pamphlet, circular, or other written or printed paper or document, professing superiority to or a greater skill than that possessed by fellow naturopathic physicians.

(11) Aiding or abetting the practice of any of the healing arts by an unlicensed person.

(12) The use of his name under the designation, "Doctor", "Dr.", "Naturopathy", "Naturopathic Physician", or any similar designation with preference to the commercial exploitation of any goods, wares, or merchandise.

(13) The advertising or holding oneself out to treat diseases or other abnormal conditions of the human body by any secret formula method, treatment, or procedure.

(14) The guaranteeing of a cure or "results" from any treatment.

Stat. Auth.: ORS Ch. 685
Hist: NE 1, f. 11-12-57; NE 3-1980, f. & ef. 9-11-80

Rules of Administrative Procedure in Contested Cases

850-10-205 [Renumbered to 850-01-005]

Programs of Continuing Education

850-10-210 (1) The following programs of continuing education in naturopathy are approved by the Naturopathic Board of Examiners as meeting the requirements of ORS 685.102, 685.104, and 685.106:

(a) Programs offered by the Oregon Association of Naturopathic Physicians.

(b) Programs offered by the Northwest Naturopathic Physician's convention.

(c) Programs offered by all colleges of Naturopathic Medicine which are recognized by this Board.

(2) A person who desires to offer a program of continuing education in naturopathy other than the programs set forth in section (1) of this rule shall first comply with the provisions of ORS 685.106 (2) and (3) and receive approval of the program from the Board of Naturopathic Examiners.

(3) Any programs of continuing education in naturopathy not authorized or approved by the Board prior to their being offered to naturopathic physicians will not be considered as meeting the requirements of ORS 685.102, 685.104, and 685.106.

Stat. Auth.: ORS Ch. 685

Representative Mae Tischer, Chairperson
House Health, Education and Social Service
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Tischer:

Last Saturday I participated in the teleconference with your committee regarding House Bill 347 relative to the licensing of naturopathic physicians in Alaska. I am not usually an activist; in fact, this is the first time I have even written to a legislator on any subject. This is an issue about which I feel so strongly that I simply must make my opinions known and I'm grateful to have had the opportunity, through the vehicle of the teleconference, to speak out publicly in support of this bill.

One of the major concerns of your committee seems to be the question of how to set up the regulatory body which would license naturopathic physicians and oversee their activities. Why not set up a board consisting of one naturopathic physician from Alaska, one licensed ND from another state, and one layperson. The member from the "outside" state would be a valuable resource from which to draw guidance. In addition, this person would need to travel to Alaska only in unusual circumstances (as in an investigative action, for example) which, I suspect, would occur very infrequently.

During the teleconference the question arose of how to write the licensing exam. Why not simply look to other states for guidance and input. Along a similar line, I see no point in requiring naturopaths already licensed in other states to take Alaska's licensing exam. I believe they should be "grandfathered" in the same manner in which MD and RN boards grant reciprocity to those already licensed elsewhere. often they don't.

I happen to be a registered nurse as well as a very pleased and satisfied consumer of naturopathic treatment. I wish I could speak for all nurses when I urge the legislature to pass HB 347 as soon as possible, but of course I cannot. Judging from the nursing journals, from conversations I have had with other nurses, and from other sources the majority of

my profession know nothing about naturopaths or the alternatives available to the kind of health care normally dispensed by the practitioners of today's "modern medicine."

Finally, I believe there is room in Alaska for both breeds of physician. As was stated by numerous participants in the teleconference, naturopaths often refer their patients to MDs. Moreover, it is well documented that many enlightened MDs are beginning to recognize the merits of alternative approaches to healing and are incorporating more and more of them into their own practices. The passage of HB 347 would stimulate a general interest in naturopathy which can only serve to strengthen both professions. Dialog and exchange of information are sure to grow out of this healthy curiosity as MDs and the public become informed as to what naturopathy is all about. This would naturally result in individuals being able to make intelligent, educated choices about the type of health care they want for themselves and for their families.

I would appreciate it very much if your staff would periodically keep me up to date on HB 347 and its progress.

Thanks again for your attention during the teleconference and for providing the public with the opportunity for speaking out on this most important legislation.

Sincerely,

Kathleen F. Gerstenberger

Representative Mae Tischer
Pouch V
Juneau, AK 99811

Dear Representative Tischer,

I support legislation that will license Naturopathic Doctors to practice medicine in Alaska and urge you to do the same.

Thank you,

Pamela Fuller

Pamela A. Fuller
P.O. Box 1174
Juneau, AK 99802

As co-sponsor of HB 347, you can be assured of my support. Thank you for your comment.

M.T.

In praise of naturopathic medicine

Within a span of six months, my then-two-year-old son Nicholas was hospitalized three times for severe asthma attacks. My wife and I were informed by our pediatric physician (M.D.) that our son would have to be kept on three very strong drugs and a series of allergy shots for perhaps several years. This therapy was designed to keep the bouts with asthma in check, not to address the cause. Our only hope was that someday Nick would outgrow this serious medical problem.

We noticed our son's behavior, growth and general development were being adversly affected by the drugs. I thought our only alternative, without the drugs, was a recurrence of the attacks. I was resigned to the fact; this was the way it was going to be.

I had assumed the care Nick was receiving was the best money could buy in Anchorage. The expense of this care was indeed considerable especially the hospital stays. Fortunately my Teamsters insurance covered virtually all the costs involved.

My wife, however, was not satisfied this therapy was our only alternative. Diane took it upon herself to do a great deal of reading and pertinent question-asking before suggesting we consult a naturopathic physician. I admit at first I was reluctant, but she had done her homework and her arguments had merit.

Nine months have passed since we first went to Dr. Cary Jasper, N.D. My son has not had a single asthma attack and has been completely off drugs for more than six months. His behavior, attentiveness and growth have improved dramatically. Nick is a happy, growing boy again.

Dr. Jasper made some common sense suggestions concerning Nick's diet, gave us some homeopathic preparations (herbal medicines) and offered my wife instruction on how she could "doctor" Nick on her own. The doctor also helped me successfully treat my ulcer in six weeks; it had remained resistant to more "conventional" treatments for more than 1½ years. Our experience with naturopathic medicine helped us to be a much healthier family in all respects.

The purpose of this testimonial is threefold. First, I want to thank my wife Diane for being so persistent and diligent in seeking out a better way. Second, I hope many of the more conscientious M.D.s in town, who might read this, may embark on some diligent research of their own in the area of naturopathic medicine. Third, I would like to suggest to health insurance companies, they might save a great deal of money paid out in claims for the "after the fact symptom-relief" medicine offered by the pharmacologically dominated American Medical Association, by also covering the relatively minor expenses incurred with the "preventative-curative" alternative of naturopathic medicine.

— Steve M. McDermott

COMMITTEE ON TOURISM, PROFESSIONS AND OCCUPATIONS
HOUSE OF REPRESENTATIVES AMENDMENTS TO H.B. 2202
(Reference to printed bill)

(a Compiled Model Bill Prepared by Legislative Council in Arizona)

Strike everything after the enacting clause and insert:

"Section 1. Legislative intent

Since naturopathy is a health care system of diagnosing, treating and preventing disease, illness or injury of the human mind and body, it has a direct relationship with the public health. It is essential that the legislature regulate the practice of the profession of naturopathy to safeguard the public health, safety and welfare. It is also a matter of public interest and concern that the practice of the profession of naturopathy merit and receive the confidence of the public and that only qualified persons be permitted to engage in the practice of the profession of naturopathy.

Sec. 2. Repeal

Title 32, chapter 14, Arizona Revised Statutes, is repealed.

Sec. 3. Title 32, Arizona Revised Statutes, is amended by adding a new chapter 14, to read:

CHAPTER 14

NATUROPATHIC PHYSICIANS

ARTICLE 1. NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS

32-1501. Definitions

IN THIS CHAPTER, UNLESS THE CONTEXT OTHERWISE REQUIRES:

1. "BOARD" MEANS THE STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS.

2. "COMPLETED APPLICATION" MEANS AN APPLICATION FOR A REGULAR OR TEMPORARY LICENSE TO PRACTICE NATUROPATHY OR A NATUROPATHIC SPECIALTY WHICH, IN THE OPINION OF THE BOARD, APPEARS ON ITS FACE TO SHOW THAT THE APPLICANT POSSESSES ALL OF THE REQUIREMENTS FOR THE CATEGORY OF LICENSE

APPLIED FOR EXCEPT FOR THE PHYSICAL EXAMINATION OR MENTAL EVALUATION WHICH MAY BE REQUIRED BY THE BOARD AND THE EXAMINATION APPLICABLE TO THE CATEGORY OF APPLICATION CONCERNED.

3. "DIAGNOSING" INCLUDES PHYSICAL, CLINICAL, X-RAY AND LABORATORY EXAMINATIONS, AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD, TO DETERMINE THE NATURE OF A PERSON'S CONDITION.

4. "DOCTOR OF NATUROPATHIC MEDICINE" MEANS A NATURAL PERSON LICENSED UNDER THIS CHAPTER.

5. "DRUGS" MEANS PREPARATIONS AND SUBSTANCES, OTHER THAN FOOD AND WATER:

(a) RECOGNIZED, OR FOR WHICH STANDARDS OR SPECIFICATIONS ARE PRESCRIBED, IN THE LATEST REVISION OF THE PHARMACOPOEIA OF THE UNITED STATES, THE LATEST REVISION OF THE NATIONAL FORMULARY OR ANY CURRENT SUPPLEMENT TO EITHER OF THEM.

(b) USED OR INTENDED TO BE USED FOR THE DIAGNOSIS, CURE, TREATMENT, MITIGATION OR PREVENTION OF DISEASES OR ABNORMALITIES OF MAN.

DRUGS DO NOT INCLUDE BARIUM SULFATE USED FOR DIAGNOSTIC PURPOSES, ANTISEPTICS, LOCAL ANESTHETICS OR NONPOISONOUS PLANT SUBSTANCES OR OTHER EXTRACTED, COMPOUNDED OR CONCENTRATED SUBSTANCES OBTAINED FROM AN ANIMAL, A PLANT OR A MINERAL ORIGIN USED OR INTENDED TO BE USED IN THE TREATMENT OR PREVENTION OF DISEASES OR ABNORMALITIES OF MAN BY A NATUROPATHIC PHYSICIAN FOR WHICH STANDARDS OR SPECIFICATIONS ARE PROVIDED BY FEDERAL OR STATE LAWS.

6. "LOCAL ANESTHETIC" MEANS AN AGENT USED TO ABOLISH THE SENSATION OF PAIN WHOSE ACTION IS LIMITED TO AN AREA OF THE BODY AROUND THE SITE OF ITS APPLICATION.

7. "MINOR SURGERY" MEANS MINOR SURGERY AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD, INCLUDING:

(a) THE USE OF ELECTRICAL OR OTHER METHODS FOR SURGICAL REPAIR AND CARE INCIDENT TO SURGICAL REPAIR OF MINOR PROCEDURES, SUPERFICIAL LACERATIONS, LESIONS AND ABRASIONS.

(b) THE CLAMPING AND SEVERING OF UMBILICAL CORDS.

(c) THE REMOVAL OF FOREIGN BODIES LOCATED IN SUPERFICIAL STRUCTURES.

(d) THE USE OF ANTISEPTICS, SANITARY MEASURES AND LOCAL ANESTHETICS IN CONNECTION WITH PROCEDURES SET FORTH IN THIS PARAGRAPH.

MINOR SURGERY DOES NOT INCLUDE ABORTIONS BY NATUROPATHIC PHYSICIANS.

8. "NATURAL THERAPEUTIC METHODS" MEANS PROCEDURES, DEVICES AND METHODS FOR TREATING THE HUMAN MIND AND BODY WITHOUT DRUGS AS DEFINED IN PARAGRAPH 5.

9. "NATUROPATHIC SPECIALTY" MEANS ANY FIELD OF NATUROPATHIC PRACTICE WHICH, IN THE JUDGMENT OF THE BOARD, REQUIRES EDUCATIONAL BACKGROUND AND DEMONSTRATED PROFICIENCY IN ADDITION TO THE GENERAL QUALIFICATIONS REQUIRED FOR LICENSING AS A NATUROPATHIC PHYSICIAN.

10. "NATUROPATHY" MEANS A HEALTH CARE SYSTEM OF DIAGNOSING, TREATING AND PREVENTING DISEASE, ILLNESS OR INJURY OF THE HUMAN MIND AND BODY BY THE USE OF NATURAL THERAPEUTIC METHODS, PHYSIOTHERAPY AND MINOR SURGERY AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD.

11. "PHYSIOTHERAPY" INCLUDES ALL FORMS OF PHYSIOLOGICAL THERAPEUTICS AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD.

12. "UNPROFESSIONAL CONDUCT" INCLUDES THE FOLLOWING ACTS:

(a) INTENTIONAL BETRAYAL OF A PROFESSIONAL SECRET OR INTENTIONAL VIOLATION OF A PRIVILEGED COMMUNICATION EXCEPT AS EITHER OF THESE MAY OTHERWISE BE REQUIRED BY LAW. THIS SUBDIVISION DOES NOT PREVENT MEMBERS OF THE BOARD FROM THE FULL AND FREE EXCHANGE OF INFORMATION WITH THE LICENSING AND DISCIPLINARY BOARDS OF OTHER STATES OR COUNTRIES OR WITH THE ARIZONA NATUROPATHIC MEDICAL ASSOCIATION, INC., OR ANY OF ITS COMPONENT SOCIETIES OR WITH THE NATUROPATHIC MEDICAL SOCIETIES OF OTHER STATES, COUNTIES OR COUNTRIES.

(b) ANY DISHONORABLE CONDUCT REFLECTING UNFAVORABLY ON THE PROFESSION.

(c) COMMISSION OF A FELONY, WHETHER OR NOT INVOLVING MORAL TURPITUDE, OR A MISDEMEANOR INVOLVING MORAL TURPITUDE. IN EITHER CASE CONVICTION BY ANY COURT OF COMPETENT JURISDICTION IS CONCLUSIVE EVIDENCE THEREOF.

(d) HABITUAL INTEMPERANCE IN THE USE OF ALCOHOL.

(e) HABITUAL USE OF NARCOTIC OR HYPNOTIC DRUGS, OR BOTH.

(f) GROSS MALPRACTICE, REPEATED MALPRACTICE OR ANY MALPRACTICE RESULTING IN THE DEATH OF A PATIENT.

(g) IMPERSONATION OF ANOTHER DOCTOR OF NATUROPATHIC MEDICINE OR ANY OTHER PRACTITIONER OF THE HEALING ARTS.

(h) ACTING OR ASSUMING TO ACT AS A MEMBER OF THE BOARD IF SUCH IS NOT THE FACT.

(i) PROCURING OR ATTEMPTING TO PROCURE A LICENSE TO PRACTICE NATUROPATHY BY FRAUD, MISREPRESENTATION OR KNOWINGLY TAKING ADVANTAGE OF THE MISTAKE OF ANOTHER.

(j) HAVING PROFESSIONAL CONNECTION WITH OR LENDING ONE'S NAME TO AN ILLEGAL PRACTITIONER OF NATUROPATHY OR ANY OF THE OTHER HEALING ARTS.

(k) REPRESENTING THAT A MANIFESTLY INCURABLE DISEASE, INJURY, AILMENT OR INFIRMITY CAN BE PERMANENTLY CURED, OR THAT A CURABLE DISEASE, INJURY, AILMENT OR INFIRMITY CAN BE CURED WITHIN A STATED TIME, IF SUCH IS NOT THE FACT.

(l) OFFERING, UNDERTAKING OR AGREEING TO CURE OR TREAT A DISEASE, INJURY, AILMENT OR INFIRMITY BY A SECRET MEANS, METHOD, DEVICE OR INSTRUMENTALITY.

(m) REFUSING TO DIVULGE TO THE BOARD UPON DEMAND THE MEANS, METHOD, DEVICE OR INSTRUMENTALITY USED IN THE TREATMENT OF A DISEASE, INJURY, AILMENT OR INFIRMITY.

(n) GIVING OR RECEIVING, OR AIDING OR ABETTING THE GIVING OR RECEIVING OF, REBATES, EITHER DIRECTLY OR INDIRECTLY.

(o) KNOWINGLY MAKING ANY FALSE OR FRAUDULENT STATEMENT, WRITTEN OR ORAL, IN CONNECTION WITH THE PRACTICE OF NATUROPATHY EXCEPT AS NECESSARY FOR ACCEPTED THERAPEUTIC PURPOSES.

(p) IMMORALITY OR MISCONDUCT THAT TENDS TO DISCREDIT THE NATUROPATHIC PROFESSION.

(q) REFUSAL, REVOCATION OR SUSPENSION OF LICENSE BY ANY OTHER STATE OR COUNTRY, UNLESS IT CAN BE SHOWN THAT SUCH WAS NOT OCCASIONED BY REASONS WHICH RELATE TO THE ABILITY TO SAFELY AND SKILLFULLY PRACTICE NATUROPATHY OR TO ANY ACT OF UNPROFESSIONAL CONDUCT IN THIS PARAGRAPH.

(r) ANY CONDUCT OR PRACTICE CONTRARY TO RECOGNIZED STANDARDS OF ETHICS OF THE NATUROPATHIC PROFESSION OR ANY CONDUCT OR PRACTICE WHICH DOES

OR MIGHT CONSTITUTE A DANGER TO THE HEALTH, WELFARE OR SAFETY OF THE PATIENT OR THE PUBLIC, OR ANY CONDUCT, PRACTICE OR CONDITION WHICH DOES OR MIGHT IMPAIR THE ABILITY TO SAFELY AND SKILLFULLY PRACTICE NATUROPATHY.

(s) FAILURE TO OBSERVE ANY STATE, COUNTY OR MUNICIPAL LAW RELATING TO PUBLIC HEALTH AS A PHYSICIAN IN THIS STATE.

(t) VIOLATING OR ATTEMPTING TO VIOLATE, DIRECTLY OR INDIRECTLY, OR ASSISTING IN OR ABETTING THE VIOLATION OF, OR CONSPIRING TO VIOLATE ANY OF THE PROVISIONS OF THIS CHAPTER.

32-1502. Naturopathic physicians board of examiners; appointment; qualifications; term of office; immunity

A. THERE IS ESTABLISHED A STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS CONSISTING OF THE FOLLOWING EIGHT MEMBERS:

1. FOUR NATUROPATHIC PHYSICIAN MEMBERS APPOINTED BY THE GOVERNOR. EACH NATUROPATHIC PHYSICIAN MEMBER SHALL BE:

(a) A RESIDENT OF THIS STATE FOR FIVE YEARS IMMEDIATELY PRECEDING HIS APPOINTMENT.

(b) A DOCTOR OF NATUROPATHIC MEDICINE WITH A DEGREE FROM A NATUROPATHIC SCHOOL OR COLLEGE APPROVED BY THE BOARD WHO HAS ENGAGED IN THE FULL-TIME PRACTICE OF NATUROPATHY FOR FIVE YEARS IMMEDIATELY PRECEDING HIS APPOINTMENT.

2. TWO PUBLIC MEMBERS APPOINTED BY THE GOVERNOR. EACH PUBLIC MEMBER SHALL:

(a) BE A RESIDENT OF THIS STATE FOR FIVE YEARS IMMEDIATELY PRECEDING HIS APPOINTMENT.

(b) NOT BE CONNECTED, IN ANY MANNER, WITH OR HAVE ANY INTEREST IN A SCHOOL OF MEDICINE, HEALTH CARE INSTITUTION OR ANY PERSON PRACTICING ANY FORM OF HEALING OR TREATMENT OF BODILY OR MENTAL AILMENTS.

(c) DEMONSTRATE AN INTEREST IN THE HEALTH PROBLEMS IN THIS STATE.

3. THE CHAIRMAN OF THE STATE BOARD OF MEDICAL EXAMINERS WHO SHALL SERVE AS AN EX OFFICIO MEMBER OR ANOTHER PROFESSIONAL MEMBER OF THE STATE BOARD OF MEDICAL EXAMINERS DESIGNATED BY THE CHAIRMAN TO SERVE ON THE STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS IN HIS PLACE.

4. THE PRESIDENT OF THE STATE BOARD OF NURSING WHO SHALL SERVE AS AN EX OFFICIO MEMBER OR ANOTHER PROFESSIONAL MEMBER OF THE STATE BOARD OF NURSING DESIGNATED BY THE PRESIDENT TO SERVE ON THE STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS IN HIS PLACE.

B. THE TERM OF OFFICE OF THE NATUROPATHIC PHYSICIAN MEMBERS AND THE PUBLIC MEMBERS IS FIVE YEARS TO BEGIN AND END ON JUNE 30. EACH NATUROPATHIC PHYSICIAN MEMBER AND EACH PUBLIC MEMBER CONTINUE TO HOLD OFFICE UNTIL THE APPOINTMENT AND QUALIFICATION OF THEIR SUCCESSORS, SUBJECT TO THE FOLLOWING EXCEPTIONS:

1. A MEMBER OF THE BOARD, AFTER NOTICE AND A HEARING BEFORE THE GOVERNOR, MAY BE REMOVED FROM OFFICE AND HIS TERM ENDS IF THE GOVERNOR FINDS THE MEMBER NEGLECTED ANY DUTY IMPOSED BY LAW OR WAS GUILTY OF MALFEASANCE, MISFEASANCE OR DISHONORABLE CONDUCT.

2. THE TERM OF ANY MEMBER AUTOMATICALLY ENDS ON HIS DEATH, RESIGNATION OR PERMANENT REMOVAL FROM THIS STATE OR REMOVAL FROM THIS STATE FOR A PERIOD OF MORE THAN SIX MONTHS.

C. MEMBERS OF THE BOARD ARE IMMUNE FROM PERSONAL LIABILITY WITH RESPECT TO ACTS DONE AND ACTIONS TAKEN IN GOOD FAITH WITHIN THE SCOPE OF THEIR AUTHORITY.

32-1503. Organization; meetings; compensation

A. THE BOARD SHALL ANNUALLY ELECT, FROM AMONG ITS MEMBERSHIP, A CHAIRMAN, A VICE-CHAIRMAN AND A SECRETARY-TREASURER, WHO SHALL HOLD THEIR RESPECTIVE OFFICES AT THE PLEASURE OF THE BOARD.

B. THE BOARD SHALL HOLD A REGULAR MEETING AT LEAST SEMIANNUALLY ON A DATE AND AT A TIME AND PLACE IT DESIGNATES. IN ADDITION, THE BOARD MAY HOLD SPECIAL MEETINGS IT DEEMS NECESSARY.

C. A MAJORITY OF THE MEMBERS OF THE BOARD CONSTITUTES A QUORUM AND A MAJORITY VOTE OF A QUORUM PRESENT AT ANY MEETING GOVERNS ALL ACTIONS TAKEN BY THE BOARD, EXCEPT THAT LICENSES SHALL BE ISSUED UNDER THIS CHAPTER ONLY ON THE VOTE OF THE MAJORITY OF THE FULL BOARD.

D. MEMBERS OF THE BOARD ARE ELIGIBLE TO RECEIVE COMPENSATION AS DETERMINED UNDER SECTION 38-611 FOR EACH DAY OF ACTUAL SERVICE IN THE BUSINESS OF THE BOARD. THE BOARD MAY PAY COMPENSATION IN AN AMOUNT AS DETERMINED UNDER SECTION 38-611 TO THE SECRETARY-TREASURER IF HE SERVES AS

THE ADMINISTRATIVE HEAD OF THE BOARD ASSUMING THE DUTIES OF AN EXECUTIVE SECRETARY.

32-1504. Powers and duties

A. THE BOARD SHALL:

1. ADMINISTER AND ENFORCE ALL PROVISIONS OF THIS CHAPTER AND ALL RULES AND REGULATIONS ADOPTED BY THE BOARD UNDER THE AUTHORITY GRANTED BY THIS CHAPTER.

2. COLLECT ALL FEES PROVIDED FOR BY THIS CHAPTER AND MAKE DISPOSITIONS OF THEM AS PROVIDED FOR IN SECTION 32-1505.

3. MAINTAIN AN ACCURATE ACCOUNT OF ALL RECEIPTS, EXPENDITURES AND REFUNDS GRANTED UNDER THIS CHAPTER.

4. MAINTAIN A RECORD OF ITS ACTS AND PROCEEDINGS, INCLUDING THE ISSUANCE, REFUSAL, RENEWAL, SUSPENSION OR REVOCATION OF LICENSES.

5. MAINTAIN A ROSTER OF ALL DOCTORS OF NATUROPATHIC MEDICINE LICENSED UNDER THIS CHAPTER WHICH INDICATES:

(a) THE NAME OF THE LICENSEE.

(b) HIS CURRENT PROFESSIONAL OFFICE ADDRESS.

(c) THE DATE OF ISSUANCE AND THE NUMBER OF HIS LICENSE.

(d) WHETHER THE LICENSE IS IN GOOD STANDING.

6. KEEP ALL APPLICATIONS FOR LICENSURE AS A PERMANENT RECORD.

7. MAINTAIN A PERMANENT RECORD OF THE RESULTS OF ALL EXAMINATIONS IT GIVES.

8. KEEP ALL EXAMINATION RECORDS INCLUDING WRITTEN EXAMINATION RECORDS AND TAPE RECORDINGS OF THE QUESTIONS AND ANSWERS IN ORAL EXAMINATIONS FOR ONE YEAR.

9. KEEP THE RECORDS OF THE BOARD OPEN TO PUBLIC INSPECTION AT ALL REASONABLE TIMES.

10. ADOPT AND USE A SEAL, THE IMPRINT OF WHICH, TOGETHER WITH THE SIGNATURES OF THE CHAIRMAN OR VICE-CHAIRMAN AND THE SECRETARY-TREASURER OF THE BOARD, SHALL EVIDENCE ITS OFFICIAL ACTS.

11. COMPENSATE ITS EXECUTIVE SECRETARY, OTHER PERMANENT AND TEMPORARY PERSONNEL AND COMMISSIONERS ON EXAMINATIONS AS DETERMINED UNDER SECTION 38-611.

B. THE BOARD MAY:

1. MAKE AND ADOPT RULES AND REGULATIONS WHICH ARE NECESSARY OR PROPER FOR THE ADMINISTRATION OF THIS CHAPTER.

2. MAKE AND ADOPT RULES AND REGULATIONS PRESCRIBING CONTINUING EDUCATION REQUIREMENTS FOR THE RENEWAL OF LICENSES ISSUED UNDER THIS CHAPTER.

3. EMPLOY AN EXECUTIVE SECRETARY AND OTHER PERMANENT OR TEMPORARY PERSONNEL IT DEEMS NECESSARY TO CARRY OUT THE PURPOSES OF THIS CHAPTER AND DESIGNATE THEIR DUTIES.

4. APPOINT DOCTORS OF NATUROPATHIC MEDICINE AS COMMISSIONERS ON EXAMINATIONS TO GIVE ANY PART OR ALL OF ANY EXAMINATION PROVIDED FOR UNDER THIS CHAPTER.

5. REQUIRE A BOND, IN AN AMOUNT IT DETERMINES AS APPROPRIATE, FOR THE FAITHFUL DISCHARGE OF THE DUTIES OF ITS EMPLOYEES.

32-1505. Naturopathic physicians board fund

A. ALL MONIES FROM WHATEVER SOURCE WHICH COME INTO THE POSSESSION OF THE BOARD SHALL BE PAID TO THE SECRETARY-TREASURER WHO SHALL, BEFORE THE END OF EACH CALENDAR MONTH, DEPOSIT THEM WITH THE STATE TREASURER WHO SHALL DEPOSIT TEN PER CENT OF SUCH MONIES IN THE STATE GENERAL FUND AND TRANSFER THE REMAINING NINETY PER CENT TO THE NATUROPATHIC PHYSICIANS BOARD FUND.

B. MONIES DEPOSITED IN THE NATUROPATHIC PHYSICIANS BOARD FUND ARE SUBJECT TO SECTION 35-143.01.

ARTICLE 2. LICENSING

32-1521. Persons and acts not affected by this chapter

THIS CHAPTER DOES NOT APPLY TO:

1. THE PRACTICE OF ANY OTHER METHOD, SYSTEM OR SCIENCE OF HEALING BY A PERSON LICENSED UNDER THE LAWS OF THIS STATE.

2. ANY STUDENT OF NATUROPATHY IN THE COURSE OF TAKING AN APPROVED INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM IF THE STUDENT COMPLIES WITH THE APPLICABLE REGISTRATION PROVISIONS OF THIS CHAPTER AND PAYS THE REQUIRED FEES.

3. ANY PERSON ACTING AT THE DIRECTION OR UNDER THE SUPERVISION OF A DOCTOR OF NATUROPATHIC MEDICINE SO LONG AS HE IS ACTING IN A CUSTOMARY CAPACITY, NOT IN VIOLATION OF ANY STATUTE AND DOES NOT HOLD HIMSELF OUT TO THE PUBLIC GENERALLY AS BEING AUTHORIZED TO PRACTICE NATUROPATHY.

4. ANY OUT-OF-STATE NATUROPATHIC PHYSICIAN LICENSED BY ANOTHER STATE OR COUNTRY, IF IN CONSULTATION REQUESTED BY A DOCTOR OF NATUROPATHIC MEDICINE.

32-1522. Qualifications for license

A. TO BE ELIGIBLE FOR A LICENSE TO PRACTICE NATUROPATHY OR A NATUROPATHIC SPECIALTY, THE APPLICANT SHALL:

1. HAVE A HIGH SCHOOL DIPLOMA OR THE EQUIVALENT OF A HIGH SCHOOL DIPLOMA.

2. HAVE AT LEAST SIXTY SEMESTER UNITS OF CREDIT IN LIBERAL ARTS AND SCIENCES FROM AN ACCREDITED COLLEGE OR UNIVERSITY.

3. BE A GRADUATE OF A SCHOOL OF NATUROPATHIC MEDICINE APPROVED BY THE BOARD.

4. HAVE SATISFACTORILY COMPLETED AN INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM IN NATUROPATHIC MEDICINE APPROVED BY THE BOARD.

5. POSSESS A GOOD MORAL AND PROFESSIONAL REPUTATION.

6. BE PHYSICALLY AND MENTALLY ABLE TO SAFELY ENGAGE IN THE PRACTICE OF NATUROPATHY AND SUBMIT TO A PHYSICAL EXAMINATION, MENTAL EVALUATION OR INTERVIEW, OR ANY COMBINATION THEREOF, DEEMED PROPER BY THE BOARD.

7. NOT BE GUILTY OF ANY ACT OF UNPROFESSIONAL CONDUCT OR ANY OTHER CONDUCT WHICH WOULD BE GROUNDS FOR REFUSAL, SUSPENSION OR REVOCATION OF A LICENSE UNDER THIS CHAPTER.

8. NOT HAVE HAD A LICENSE TO PRACTICE NATUROPATHY REFUSED, REVOKED OR SUSPENDED BY ANY OTHER STATE OR COUNTRY FOR REASONS WHICH RELATE TO HIS ABILITY TO SKILLFULLY AND SAFELY PRACTICE NATUROPATHY.

9. FILE THE APPLICATION, PAY THE FEES PROVIDED FOR IN SECTION 32-1529 AND PASS THE EXAMINATION PROVIDED FOR IN SECTION 32-1526.

B. THE BOARD MAY:

1. REQUIRE AN APPLICANT TO SUBMIT CREDENTIALS OR OTHER WRITTEN OR ORAL PROOF.

2. MAKE INVESTIGATIONS IT DEEMS PROPER TO ADEQUATELY ADVISE ITSELF WITH RESPECT TO THE QUALIFICATIONS OF AN APPLICANT.

32-1523. Qualifications for license by reciprocity

TO BE ELIGIBLE FOR A LICENSE TO PRACTICE NATUROPATHY BY RECIPROCITY, THE APPLICANT SHALL:

1. QUALIFY UNDER SECTION 32-1522 EXCEPT FOR PASSING THE WRITTEN EXAMINATION PROVIDED FOR IN SECTION 32-1526.

2. BE LICENSED TO PRACTICE NATUROPATHY BY ANOTHER STATE AFTER PASSING A WRITTEN EXAMINATION, IF THAT STATE ACCORDS LIKE PRIVILEGES TO HOLDERS OF LICENSES ISSUED BY THIS STATE.

3. BE ACTIVELY ENGAGED, FOR THREE YEARS IMMEDIATELY PRECEDING HIS APPLICATION, IN ONE OR MORE OF THE FOLLOWING:

(a) THE ACTIVE PRACTICE OF NATUROPATHY.

(b) AN INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM APPROVED BY THE BOARD.

(c) POSTGRADUATE TRAINING DEEMED BY THE BOARD TO BE EQUIVALENT TO AN APPROVED CLINICAL TRAINING PROGRAM.

(d) THE STUDY OF NATUROPATHY AT A SCHOOL OF NATUROPATHIC MEDICINE APPROVED BY THE BOARD.

4. PASS AN ORAL EXAMINATION PROVIDED FOR IN SECTION 32-1526.

32-1524. Temporary licenses

A. TO BE ELIGIBLE FOR A TEMPORARY LICENSE TO PRACTICE NATUROPATHY, AN APPLICANT SHALL QUALIFY UNDER SECTION 32-1522 EXCEPT FOR PASSING THE WRITTEN EXAMINATION PROVIDED FOR IN SECTION 32-1526.

B. TEMPORARY LICENSES SHALL BE ISSUED FOR A TERM OF SIX MONTHS AND MAY BE RENEWED ONLY ONCE.

C. A TEMPORARY LICENSE EXPIRES ON THE OCCURRENCE OF ONE OF THE FOLLOWING EVENTS:

1. THE EXPIRATION OF THE TERM FOR WHICH THE TEMPORARY LICENSE OR RENEWAL WAS ISSUED.

2. ISSUANCE OF A REGULAR LICENSE TO PRACTICE NATUROPATHY.

3. SUSPENSION OR REVOCATION OF THE TEMPORARY LICENSE.

D. THE HOLDER OF A TEMPORARY LICENSE SHALL PRACTICE WITH A NATUROPATHIC PHYSICIAN LICENSED UNDER THIS CHAPTER AND SHALL NOT OPEN AN OFFICE OR PRACTICE WITHOUT THE SUPERVISION AND DIRECTION OF A NATUROPATHIC PHYSICIAN LICENSED UNDER THIS CHAPTER.

32-1525. Application; hearing on deficiencies in application; interview; withdrawal

A. EACH APPLICANT SHALL FILE A VERIFIED COMPLETED APPLICATION IN THE FORM AND STYLE REQUIRED AND SUPPLIED BY THE BOARD ACCOMPANIED BY THE APPROPRIATE APPLICATION FEE PRESCRIBED IN SECTION 32-1529.

B. THE APPLICATION SHALL BE DESIGNED TO REQUIRE THE SUBMISSION OF EVIDENCE, CREDENTIALS AND OTHER PROOF NECESSARY TO SATISFY THE BOARD THAT IT MEETS THE REQUIREMENTS OF A COMPLETED APPLICATION.

C. THE APPLICATION SHALL CONTAIN THE OATH OF THE APPLICANT THAT:

1. ALL INFORMATION CONTAINED IN THE APPLICATION AND EVIDENCE SUBMITTED WITH IT ARE TRUE AND CORRECT.

2. THE CREDENTIALS SUBMITTED WERE NOT PROCURED BY FRAUD OR MISREPRESENTATION OR ANY MISTAKE OF WHICH THE APPLICANT IS AWARE.

3. THE APPLICANT IS THE LAWFUL HOLDER OF THE CREDENTIALS.

D. ALL APPLICATIONS SUBMITTED TO THE BOARD AND ANY ATTENDANT EVIDENCE, CREDENTIALS OR OTHER PROOF SUBMITTED WITH AN APPLICATION ARE THE PROPERTY OF THE BOARD AND PART OF THE PERMANENT RECORD OF THE BOARD AND SHALL NOT BE RETURNED TO A WITHDRAWING APPLICANT.

E. THE BOARD SHALL PROMPTLY INFORM AN APPLICANT, IN WRITING, OF THE DEFICIENCIES, IF ANY, IN HIS APPLICATION WHICH PREVENT IT FROM BEING A COMPLETED APPLICATION.

F. ANY APPLICANT WHO DISAGREES WITH THE STATEMENT OF DEFICIENCIES AND WHO BELIEVES HE HAS FILED A COMPLETED APPLICATION MAY REQUEST AND ON REQUEST SHALL BE GRANTED A HEARING. THE HEARING SHALL NOT BE HELD LESS THAN THIRTY DAYS AFTER THE RECEIPT OF THE REQUEST BUT SHALL BE HELD AT THE FIRST MEETING OF THE BOARD THEREAFTER. AT THE HEARING THE BURDEN OF PROOF IS ON THE APPLICANT TO SHOW THAT HE HAS FILED A COMPLETED APPLICATION.

G. THE BOARD MAY INTERVIEW THE APPLICANT TO DETERMINE WHETHER THE APPLICATION IS SUFFICIENT OR WHETHER THE APPLICANT OTHERWISE QUALIFIES FOR LICENSURE.

H. APPLICATIONS ARE CONSIDERED WITHDRAWN ON ANY OF THE FOLLOWING CONDITIONS:

1. REQUEST OF THE APPLICANT.

2. FAILURE OF THE APPLICANT TO APPEAR FOR AN INTERVIEW WITH THE BOARD EXCEPT FOR GOOD CAUSE BEING SHOWN.

3. FAILURE TO SUBMIT A COMPLETED APPLICATION WITHIN ONE YEAR FROM THE DATE OF THE MAILING BY THE BOARD OF A STATEMENT TO HIM OF THE DEFICIENCIES IN HIS APPLICATION UNDER SUBSECTION E OF THIS SECTION.

4. FAILURE TO SHOW, AT THE HEARING PROVIDED FOR IN SUBSECTION F OF THIS SECTION, THAT DEFICIENCIES DO NOT EXIST.

5. FAILURE TO SHOW, WITHIN ONE YEAR FROM THE INTERVIEW PROVIDED FOR IN SUBSECTION G OF THIS SECTION, THAT HIS COMPLETED APPLICATION IS TRUE AND CORRECT.

32-1526. Examinations

A. EXAMINATIONS REQUIRED UNDER SECTIONS 32-1522 AND 32-1523 SHALL BE CONDUCTED AT A TIME AND PLACE DESIGNATED BY THE BOARD BUT NO LESS FREQUENTLY THAN SEMIANNUALLY. THE APPLICANTS TO BE EXAMINED SHALL HAVE FIRST FILED A COMPLETED APPLICATION FOUND TO BE TRUE AND CORRECT AND SHALL BE GIVEN AT LEAST THIRTY DAYS' WRITTEN NOTICE OF THE TIME AND PLACE AT WHICH THE EXAMINATION SHALL BE GIVEN.

B. THE EXAMINATION REQUIRED UNDER SECTION 32-1522 SHALL BE WRITTEN BUT MAY ALSO INCLUDE ORAL, CLINICAL OR LABORATORY SECTIONS, OR ANY COMBINATION OF ORAL, CLINICAL OR LABORATORY SECTIONS.

C. THE EXAMINATION REQUIRED UNDER SECTION 32-1523 SHALL BE ORAL AND MAY INCLUDE CLINICAL OR LABORATORY SECTIONS, OR BOTH.

D. EXAMINATIONS FOR LICENSURE UNDER THIS CHAPTER SHALL:

1. BE IN ENGLISH.

2. BE PRACTICAL IN CHARACTER.

3. BE DESIGNED TO ASCERTAIN THE APPLICANT'S KNOWLEDGE OF NATUROPATHY AND HIS FITNESS TO PRACTICE NATUROPATHY.

4. INCLUDE ALL SUBJECTS WHICH ARE GENERALLY ACCEPTED AS NECESSARY TO A THOROUGH KNOWLEDGE OF THE PRACTICE OF NATUROPATHY.

E. THE BOARD SHALL PRESCRIBE RULES AND REGULATIONS FOR CONDUCTING EXAMINATIONS AND SET PASSING GRADES.

F. THE BOARD SHALL REVIEW THE EXAMINATION OF ANY APPLICANT ON THE APPLICANT'S REQUEST. A GRADE ON AN EXAMINATION REVIEWED BY THE BOARD MAY BE CHANGED ONLY BY THE MAJORITY VOTE OF THE MEMBERS OF THE BOARD. AN APPLICANT FAILING TO PASS AN EXAMINATION MAY BE REEXAMINED WITHIN ONE YEAR WITHOUT PAYMENT OF ADDITIONAL FEES.

G. IN A WRITTEN EXAMINATION, APPLICANTS SHALL BE DESIGNATED BY NUMBERS ONLY, AND THE CORRESPONDING NAMES SHALL BE KEPT SECRET UNTIL AFTER THE GRADING OF THE EXAMINATIONS.

H. IN ANY ORAL EXAMINATION OR IN THE ORAL SECTION OF ANY EXAMINATION, A TAPE RECORDING SHALL BE MADE OF ALL QUESTIONS AND ANSWERS.

32-1527. License; issuance; registration; reregistration; cancellation; waiver of fees; registration of exempt persons

A. THE BOARD SHALL ISSUE LICENSES TO APPLICANTS WHO ARE QUALIFIED UNDER THIS CHAPTER.

B. EACH PERSON LICENSED UNDER THIS CHAPTER SHALL REGISTER HIS LICENSE AND PAY THE REGISTRATION FEE PRESCRIBED IN SECTION 32-1529.

C. EACH PERSON HOLDING A REGULAR LICENSE TO PRACTICE NATUROPATHY IN THIS STATE SHALL ANNUALLY REGISTER HIS LICENSE ON OR BEFORE JANUARY 1 OF EACH YEAR BY SUPPLYING THE BOARD WITH INFORMATION IT DEEMS NECESSARY AND PAYING THE ANNUAL REGISTRATION FEE PRESCRIBED IN SECTION 32-1529. IF A LICENSEE FAILS TO REGISTER HIS LICENSE ON OR BEFORE FEBRUARY 1 OF EACH YEAR, HE SHALL PAY THE PENALTY FEE FOR LATE REGISTRATION PRESCRIBED IN SECTION 32-1529. FAILURE TO REGISTER A LICENSE ON OR BEFORE MARCH 1 OF EACH YEAR, WITHOUT ADEQUATE CAUSE SHOWN, IS GROUNDS FOR PROBATION, SUSPENSION OR REVOCATION OF A LICENSE UNDER SECTION 32-1551.

D. A LICENSEE IN GOOD STANDING AND WHOSE LICENSE IS CURRENT MAY, AT ANY TIME, REQUEST AND SHALL BE GRANTED CANCELLATION OF HIS LICENSE.

E. THE BOARD MAY WAIVE THE ANNUAL REGISTRATION FEE IF A LICENSEE PRESENTS EVIDENCE SATISFACTORY TO THE BOARD THAT HE HAS PERMANENTLY RETIRED FROM THE PRACTICE OF NATUROPATHY AND HAS PAID ALL FEES REQUIRED UNDER THIS CHAPTER PRIOR TO WAIVER.

F. IF A RETIRED LICENSEE WHO HAS HAD HIS ANNUAL REGISTRATION FEE WAIVED BY THE BOARD ENGAGES IN THE PRACTICE OF NATUROPATHY HE IS SUBJECT TO THE SAME PENALTIES AS ARE IMPOSED UNDER THIS CHAPTER ON A PERSON WHO PRACTICES NATUROPATHY WITHOUT A LICENSE AND WITHOUT BEING EXEMPT FROM LICENSURE.

G. THE BOARD MAY REINSTATE A RETIRED LICENSEE TO ACTIVE PRACTICE ON PAYMENT OF THE ANNUAL REGISTRATION FEE AND PRESENTATION OF EVIDENCE SATISFACTORY TO THE BOARD THAT HE IS PHYSICALLY AND MENTALLY ABLE TO SAFELY ENGAGE IN THE PRACTICE OF NATUROPATHY AND STILL POSSESSES THE PROFESSIONAL KNOWLEDGE REQUIRED TO ENGAGE IN THE PRACTICE OF NATUROPATHY. THE BOARD MAY

REQUIRE A PHYSICAL EXAMINATION OR A MENTAL EVALUATION AND AN EXAMINATION OF NATUROPATHIC KNOWLEDGE AS IT DEEMS NECESSARY TO DETERMINE THESE QUALIFICATIONS.

H. TO QUALIFY FOR THE EXEMPTION IN SECTION 32-1521, PARAGRAPH 2, NATUROPATHIC STUDENTS SHALL:

1. REGISTER WITH THE BOARD FOR EACH YEAR OF THEIR INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM.

2. SUPPLY THE BOARD WITH WRITTEN PROOF THE BOARD DEEMS NECESSARY TO SATISFY ITSELF THAT THE REQUIREMENTS FOR THE EXEMPTION ARE MET.

3. PAY THE REGISTRATION FEE PRESCRIBED IN SECTION 32-1529.

32-1528. Directory; change of address

A. THE BOARD SHALL ANNUALLY COMPILE AND PUBLISH A DIRECTORY WHICH CONTAINS:

1. THE NAMES, ADDRESSES AND FIELDS OF PRACTICE OF ALL PERSONS HOLDING REGULAR LICENSES ISSUED UNDER THIS CHAPTER.

2. THE NAMES AND ADDRESSES OF THE OFFICERS AND MEMBERS OF THE BOARD.

3. THE RULES OF THE BOARD.

4. A COPY OF THIS CHAPTER.

5. SUPPLEMENTARY INFORMATION THE BOARD DEEMS OF INTEREST AND IMPORTANCE TO DOCTORS OF NATUROPATHIC MEDICINE.

B. EACH PERSON LICENSED UNDER THIS CHAPTER SHALL PROMPTLY AND IN WRITING INFORM THE BOARD OF HIS RESIDENCE AND OFFICE ADDRESSES AND EACH CHANGE OF HIS RESIDENCE AND OFFICE ADDRESSES.

C. A COPY OF THE DIRECTORY SHALL BE GIVEN FREE OF CHARGE TO EACH PERSON LICENSED UNDER THIS CHAPTER AT THE TIME OF INITIAL LICENSURE AND AT THE TIME OF EACH ANNUAL REGISTRATION OF LICENSE. ADDITIONAL COPIES SHALL BE AVAILABLE FOR PURCHASE AT A COST PRESCRIBED IN SECTION 32-1529.

32-1529. Fees

THE BOARD SHALL CHARGE THE FOLLOWING FEES:

1. FOR APPLICATION FOR A LICENSE TO PRACTICE NATUROPATHY OR A NATUROPATHIC SPECIALTY UNDER SECTION 32-1522, A FEE NOT TO EXCEED FOUR HUNDRED DOLLARS.

2. FOR APPLICATION FOR A LICENSE TO PRACTICE NATUROPATHY BY RECIPROCITY UNDER SECTION 32-1523, A FEE NOT TO EXCEED FOUR HUNDRED DOLLARS.

3. FOR APPLICATION FOR A TEMPORARY LICENSE TO PRACTICE NATUROPATHY UNDER SECTION 32-1524, TWO HUNDRED DOLLARS FOR THE INITIAL TERM AND ONE HUNDRED DOLLARS FOR THE RENEWAL TERM.

4. FOR ISSUANCE OF A DUPLICATE LICENSE, ONE HUNDRED DOLLARS.

5. FOR ENDORSEMENT OF AN ARIZONA LICENSE FOR THE PURPOSE OF APPLYING FOR A LICENSE IN ANOTHER STATE, FIFTY DOLLARS.

6. FOR INITIAL REGISTRATION OF LICENSE, FIFTY DOLLARS.

7. FOR ANNUAL REGISTRATION, A UNIFORM FEE OF ONE HUNDRED DOLLARS OR MORE BUT NOT TO EXCEED FOUR HUNDRED DOLLARS TO BE ANNUALLY DETERMINED BY THE BOARD AS NECESSARY TO PROVIDE FUNDS TO CONDUCT ITS BUSINESS.

8. FOR LATE REGISTRATION, A PENALTY OF TWO HUNDRED DOLLARS.

9. FOR ANNUAL REGISTRATION FOR INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING, ONE HUNDRED DOLLARS.

10. FOR THE SALE OF COPIES OF THE ANNUAL NATUROPATHIC DIRECTORY WHICH ARE NOT DISTRIBUTED FREE OF CHARGE UNDER SECTION 32-1528, A FEE NOT TO EXCEED TWENTY-FIVE DOLLARS.

11. FOR SERVICES NOT REQUIRED TO BE PROVIDED BY THIS CHAPTER BUT WHICH THE BOARD DEEMS APPROPRIATE TO CARRY OUT THE INTENT AND PURPOSE OF THIS CHAPTER, A FEE NOT TO EXCEED THE COSTS OF RENDERING THE SERVICES.

ARTICLE 3. REGULATION

32-1551. Grounds for probation, suspension, revocation or refusal to issue license; notice; hearing; appeal

A. THE BOARD ON ITS OWN MOTION MAY INVESTIGATE ANY INFORMATION WHICH APPEARS TO SHOW GROUNDS FOR PROBATION, SUSPENSION, REVOCATION OR REFUSAL TO ISSUE A LICENSE FOR UNPROFESSIONAL CONDUCT. ANY NATUROPATHIC PHYSICIAN OR HEALTH CARE INSTITUTION AS DEFINED IN SECTION 36-401 SHALL, AND ANY OTHER PERSON MAY, REPORT TO THE BOARD ANY INFORMATION THE PERSON MAY HAVE WHICH APPEARS TO SHOW GROUNDS FOR PROBATION, SUSPENSION, REVOCATION OR REFUSAL TO ISSUE A LICENSE. ANY PERSON WHO REPORTS OR PROVIDES INFORMATION TO THE BOARD IN GOOD FAITH IS NOT SUBJECT TO AN ACTION

FOR CIVIL DAMAGES AS A RESULT, AND THE PERSON'S NAME SHALL NOT BE DISCLOSED UNLESS THE PERSON'S TESTIMONY IS ESSENTIAL TO THE DISCIPLINARY PROCEEDINGS CONDUCTED UNDER THIS SECTION. ANY HEALTH CARE INSTITUTION WHICH FAILS TO REPORT AS REQUIRED BY THIS SECTION SHALL BE REPORTED BY THE BOARD TO THE INSTITUTION'S LICENSING AGENCY.

B. IF, IN THE OPINION OF THE BOARD, IT APPEARS THE CHARGE IS OF SUCH MAGNITUDE AS TO WARRANT SUSPENSION OR REVOCATION OF A NATUROPATHIC PHYSICIAN'S LICENSE THE BOARD SHALL SERVE ON THE PHYSICIAN A SUMMONS AND A COMPLAINT FULLY SETTING FORTH THE CONDUCT OR INABILITY CONCERNED AND SETTING THE TIME AND PLACE FOR A HEARING TO BE HELD BEFORE THE BOARD. THE HEARING SHALL NOT BE HELD LESS THAN THIRTY DAYS FROM SERVICE OF THE SUMMONS AND COMPLAINT.

C. IF THE PHYSICIAN WISHES TO BE PRESENT AT THE HEARING IN PERSON OR BY REPRESENTATION, OR BOTH, HE SHALL FILE WITH THE BOARD HIS ANSWER TO THE CHARGES IN THE COMPLAINT. THE ANSWER SHALL BE IN WRITING, VERIFIED UNDER OATH AND FILED WITHIN TWENTY DAYS AFTER SERVICE OF THE SUMMONS AND COMPLAINT.

D. IF THE PHYSICIAN COMPLIES WITH SUBSECTION C, HE MAY BE PRESENT AT THE HEARING WITH COUNSEL AND WITNESSES.

E. THE BOARD SHALL ISSUE SUBPOENAS FOR WITNESSES IT DEEMS NECESSARY AND FOR WITNESSES THE PHYSICIAN REQUESTS. ANY PERSON REFUSING TO OBEY A SUBPOENA SHALL BE CERTIFIED BY THE BOARD TO THE SUPERIOR COURT IN THE COUNTY IN WHICH SERVICE WAS MADE, AND PROCEEDINGS SHALL BE HAD AS FOR CONTEMPT.

F. SERVICE OF THE SUMMONS AND COMPLAINT SHALL BE AS PROVIDED FOR SERVICE OF THE SUMMONS AND COMPLAINT IN CIVIL CASES.

G. SERVICE OF SUBPOENAS FOR WITNESSES SHALL BE AS PROVIDED BY LAW FOR THE SERVICE OF SUBPOENAS GENERALLY.

H. THE BOARD MAY ADMINISTER THE OATH TO ALL WITNESSES AND SHALL KEEP A WRITTEN TRANSCRIPT OF ALL ORAL TESTIMONY SUBMITTED AT THE HEARING AND THE ORIGINAL OR A COPY OF ALL OTHER EVIDENCE SUBMITTED. THE BOARD MAY WAIVE THE TECHNICAL RULES OF EVIDENCE AT ANY HEARING CONDUCTED UNDER THIS SECTION.

I. IF THE BOARD FINDS, AFTER A HEARING CONDUCTED UNDER THIS SECTION, THAT SUFFICIENT GROUNDS EXIST TO MERIT PROBATION, SUSPENSION, REVOCATION OR DENIAL OF A LICENSE, THE BOARD SHALL TAKE THE APPROPRIATE ACTION.

J. COPIES OF THE WRITTEN TRANSCRIPT AND ALL OTHER EVIDENCE SUBMITTED SHALL BE AVAILABLE AT THE PHYSICIAN'S EXPENSE TO ANY PHYSICIAN APPEALING A DECISION OF THE BOARD AND WITHOUT CHARGE TO THE COURT IN WHICH AN APPEAL IS TAKEN.

K. AN APPEAL TO THE SUPERIOR COURT OF MARICOPA COUNTY MAY BE TAKEN FROM DECISIONS OF THE BOARD PURSUANT TO TITLE 12, CHAPTER 7, ARTICLE 6.

32-1552. Reinstatement of a suspended license; reissuance of a revoked license

A. A PHYSICIAN WHOSE LICENSE TO PRACTICE NATUROPATHY HAS BEEN SUSPENDED FOR AN INDEFINITE PERIOD OF TIME, OR REVOKED, MAY APPLY TO THE BOARD FOR THE TERMINATION OF THE SUSPENSION OR REISSUANCE OF THE REVOKED LICENSE UNDER THE FOLLOWING TERMS AND CONDITIONS:

1. THE APPLICATION SHALL BE SUBMITTED IN WRITING, VERIFIED UNDER OATH AND SHALL CONTAIN OR HAVE ATTACHED TO IT SUBSTANTIAL EVIDENCE SHOWING THAT THE BASIS FOR SUSPENSION OR REVOCATION HAS BEEN REMOVED AND THAT THE TERMINATION OF SUSPENSION OR REISSUANCE OF THE REVOKED LICENSE WILL NOT CONSTITUTE A THREAT TO THE PUBLIC HEALTH OR SAFETY.

2. IF IT IS AN APPLICATION FOR THE TERMINATION OF A SUSPENSION FOR AN INDEFINITE PERIOD, THE APPLICANT HAS NOT APPLIED FOR TERMINATION MORE FREQUENTLY THAN ONCE IN ANY SIX MONTH PERIOD.

3. IF IT IS AN APPLICATION FOR THE REISSUANCE OF A REVOKED LICENSE, THE APPLICANT HAS NOT APPLIED FOR REISSUANCE MORE FREQUENTLY THAN ONCE IN ANY TWENTY-FOUR MONTH PERIOD.

B. THE BOARD MAY INTERVIEW AN APPLICANT UNDER SUBSECTION A.

C. THE BOARD SHALL MAKE ITS DETERMINATION ON EACH APPLICATION AS IT DEEMS CONSISTENT WITH THE PUBLIC HEALTH AND SAFETY AND JUST IN THE CIRCUMSTANCES.

32-1553. Insurers to report malpractice claims and actions

A. ANY INSURER PROVIDING PROFESSIONAL LIABILITY INSURANCE TO A NATUROPATHIC PHYSICIAN LICENSED BY THE BOARD SHALL REPORT TO THE BOARD,

WITHIN THIRTY DAYS OF ITS RECEIPT, ANY WRITTEN OR ORAL CLAIM OR ACTION FOR DAMAGES FOR PERSONAL INJURIES CLAIMED TO HAVE BEEN CAUSED BY AN ERROR, OMISSION OR NEGLIGENCE IN THE PERFORMANCE OF THE INSURED'S PROFESSIONAL SERVICES, OR BASED ON A CLAIMED PERFORMANCE OF PROFESSIONAL SERVICES WITHOUT CONSENT OR BASED UPON BREACH OF CONTRACT FOR PROFESSIONAL SERVICES BY A NATUROPATHIC PHYSICIAN.

B. REPORTS REQUIRED BY SUBSECTION A SHALL CONTAIN:

1. THE NAME AND ADDRESS OF THE INSURED.

2. THE INSURED'S POLICY NUMBER.

3. THE DATE OF THE OCCURRENCE WHICH CREATED THE CLAIM.

4. THE DATE OF CLAIM IF SUIT IS NOT SIMULTANEOUSLY FILED.

5. THE DATE SUIT IS FILED.

6. A SUMMARY OF THE OCCURRENCE WHICH CREATED THE CLAIM AS STATED BY THE CLAIMANT.

7. SUCH OTHER REASONABLE INFORMATION RELATED TO THE CLAIM AS THE BOARD MAY REQUIRE.

C. EVERY INSURER REQUIRED TO REPORT TO THE BOARD UNDER THIS SECTION SHALL ALSO BE REQUIRED TO ADVISE THE BOARD OF ANY SETTLEMENTS OR JUDGMENTS AGAINST A NATUROPATHIC PHYSICIAN WITHIN THIRTY DAYS AFTER THE SETTLEMENT OR JUDGMENT OF ANY TRIAL COURT.

D. THE BOARD SHALL MAINTAIN THE REPORTS FILED IN ACCORDANCE WITH THIS SECTION AS CONFIDENTIAL RECORDS. STATISTICAL DATA DERIVED FROM THESE REPORTS SHALL BE RELEASED ONLY FOR BONA FIDE RESEARCH OR EDUCATIONAL PURPOSES.

E. THE BOARD SHALL INSTITUTE PROCEDURES FOR AN ANNUAL REVIEW OF ALL RECORDS KEPT IN ACCORDANCE WITH THIS CHAPTER IN ORDER TO DETERMINE WHETHER IT IS NECESSARY FOR THE BOARD TO TAKE REHABILITATIVE OR DISCIPLINARY MEASURES PRIOR TO THE RENEWAL OF A NATUROPATHIC PHYSICIAN'S LICENSE TO PRACTICE.

F. THE BOARD SHALL ANNUALLY REPORT TO THE DIRECTOR OF INSURANCE THE FOLLOWING STATISTICAL INFORMATION REPORTED BY INSURERS:

1. THE NUMBER OF CLAIMS.

2. THE DATES OF THE ACTS OR OMISSIONS WHICH FORM THE BASIS OF CLAIMS.

3. THE FINAL DISPOSITION OF CLAIMS.

G. THERE IS NO LIABILITY ON THE PART OF AND NO CAUSE OF ACTION ARISES AGAINST ANY INSURER REPORTING OR ITS AGENTS OR EMPLOYEES, OR THE BOARD OR ITS REPRESENTATIVES, FOR ANY ACTION TAKEN BY THEM IN GOOD FAITH UNDER THIS SECTION.

32-1554. Observance of public health laws and regulations

NATUROPATHIC PHYSICIANS LICENSED UNDER THIS CHAPTER SHALL OBSERVE AND ARE SUBJECT TO ALL STATE, COUNTY AND MUNICIPAL LAWS AND REGULATIONS RELATING TO PHYSICIANS AND TO PUBLIC HEALTH AS REQUIRED FOR PHYSICIANS OF OTHER SCHOOLS OF HEALING.

32-1555. Unlawful acts

IT IS UNLAWFUL FOR ANY PERSON:

1. TO PRACTICE, ATTEMPT TO PRACTICE OR CLAIM TO PRACTICE NATUROPATHY OR ANY BRANCH OF NATUROPATHY WITHOUT COMPLYING WITH THIS CHAPTER.

2. NOT LICENSED UNDER THIS CHAPTER TO USE THE DESIGNATION "DOCTOR OF NATUROPATHIC MEDICINE", "DOCTOR OF NATUROPATHY", "NATUROPATH", "NATUROPATHIC PHYSICIAN" OR THE USE OF ANY OTHER WORDS, INITIALS, SYMBOLS OR COMBINATION THEREOF WHICH WOULD LEAD THE PUBLIC TO BELIEVE SUCH PERSON WAS LICENSED TO PRACTICE AS A NATUROPATHIC PHYSICIAN.

3. TO SELL OR FRAUDULENTLY OBTAIN OR FURNISH ANY NATUROPATHIC DEGREE OR DIPLOMA.

4. TO OPERATE A SCHOOL, COLLEGE OR EDUCATIONAL INSTITUTION GRANTING A DEGREE, DIPLOMA OR CERTIFICATE IN NATUROPATHY UNLESS IT HAS BEEN APPROVED BY THE BOARD.

5. TO REPRESENT THAT A SCHOOL, COLLEGE OR EDUCATIONAL INSTITUTION GRANTING A DEGREE, DIPLOMA OR CERTIFICATE IN NATUROPATHY IS APPROVED BY THE BOARD IF THE SCHOOL, COLLEGE OR EDUCATIONAL INSTITUTION HAS NOT BEEN APPROVED BY THE BOARD.

6. TO SECURE OR ATTEMPT TO SECURE A LICENSE TO PRACTICE NATUROPATHY UNDER THIS CHAPTER BY FRAUD OR DECEIT.

32-1556. Prosecution for violations

THE COUNTY ATTORNEY OF EACH COUNTY OR THE ATTORNEY GENERAL SHALL PROSECUTE ALL PERSONS CHARGED WITH VIOLATING THIS CHAPTER, BUT THE BOARD

MAY RETAIN ITS OWN ATTORNEY OR INVESTIGATORS TO AID IN PROSECUTING A VIOLATOR. IF THE BOARD OBTAINS INVESTIGATORS OR LEGAL ASSISTANCE TO PROSECUTE OR AID IN THE PROSECUTION FOR A VIOLATION OF THIS CHAPTER, PAYMENT FOR THESE SERVICES SHALL BE MADE FROM THE NATUROPATHIC PHYSICIANS BOARD FUND.

32-1557. Violation; classification

A PERSON WHO VIOLATES ANY PROVISION OF THIS CHAPTER IS GUILTY OF A CLASS 5 FELONY.

32-1558. Injunction

A. AN INJUNCTION MAY BE ISSUED TO ENJOIN THE PRACTICE OF NATUROPATHY BY EITHER OF THE FOLLOWING CLASSES OF PERSONS:

1. ONE NOT LICENSED TO PRACTICE NATUROPATHY NOR EXEMPT FROM THE LICENSING REQUIREMENT UNDER THIS CHAPTER.

2. A NATUROPATH WHOSE CONTINUED PRACTICE WILL OR MAY CAUSE IRREPARABLE DAMAGE TO THE PUBLIC HEALTH AND SAFETY.

B. IN A PETITION FOR INJUNCTION UNDER SUBSECTION A, PARAGRAPH 1 IT IS SUFFICIENT TO CHARGE THAT THE RESPONDENT ON A DAY CERTAIN IN A NAMED COUNTY ENGAGED IN THE PRACTICE OF NATUROPATHY WITHOUT A LICENSE AND WITHOUT BEING EXEMPT FROM THE LICENSING REQUIREMENT UNDER THIS CHAPTER. FOR THE PURPOSE OF THIS SUBSECTION DAMAGE OR INJURY AS A RESULT OF SUCH PRACTICE IS PRESUMED.

C. A PETITION FOR INJUNCTION SHALL BE FILED IN THE NAME OF THIS STATE BY THE BOARD OR AT THE REQUEST OF THE ATTORNEY GENERAL IN THE COUNTY WHERE THE RESPONDENT RESIDES OR MAY BE FOUND.

D. ISSUANCE OF AN INJUNCTION DOES NOT RELIEVE THE RESPONDENT FROM BEING SUBJECT TO ANY OTHER PROCEEDINGS UNDER LAW PROVIDED FOR IN THIS CHAPTER OR OTHERWISE. VIOLATION OF AN INJUNCTION SHALL BE PUNISHED AS FOR CONTEMPT OF COURT.

E. IN ALL OTHER RESPECTS INJUNCTION PROCEEDINGS UNDER THIS SECTION SHALL BE CONDUCTED IN THE SAME MANNER AS OTHER INJUNCTIONS.

Sec. 4. Section 41-2362, Arizona Revised Statutes, is amended to read:

41-2362. Schedule for termination July 1, 1982

The following agencies shall terminate on July 1, 1982:

WE PETITION YOU

AS OUR LEGISLATOR TO RECOGNIZE BY LAW, THE NATUROPATHIC PROFESSION. WE FEEL IT IS OUR CONSTITUTIONAL RIGHT TO BE ABLE TO MAKE OUR OWN CHOICE IN SELECTING THE TYPE OF DOCTOR AND THE TYPE OF TREATMENT FOR US OR OUR FAMILY. WE WOULD PREFER TO BE ABLE TO CHOOSE BECAUSE OF AVAILABILITY, FROM ALL OF THE DIFFERENT TYPES OF TREATMENT AND ESPECIALLY AT TIMES, THE NATURAL METHOD OR NATUROPATHIC SYSTEM. WE THE UNDERSIGNED HAVE USED OR WOULD LIKE TO USE NATUROPATHIC SERVICES. WOULD YOU ACT IN OUR BEHALF TO ASSURE US OF OUR CONTINUED FREEDOM OF CHOICE?

WE PETITION YOU

AS OUR LEGISLATOR TO RECOGNIZE BY LAW, THE NATUROPATHIC PROFESSION. WE FEEL IT IS OUR CONSTITUTIONAL RIGHT TO BE ABLE TO MAKE OUR OWN CHOICE IN SELECTING THE TYPE OF DOCTOR AND THE TYPE OF TREATMENT FOR US OR OUR FAMILY. WE WOULD PREFER TO BE ABLE TO CHOOSE BECAUSE OF AVAILABILITY, FROM ALL OF THE DIFFERENT TYPES OF TREATMENT AND ESPECIALLY AT TIMES, THE NATURAL METHOD OR NATUROPATHIC SYSTEM. WE THE UNDERSIGNED HAVE USED OR WOULD LIKE TO USE NATUROPATHIC SERVICES. WOULD YOU ACT IN OUR BEHALF TO ASSURE US OF OUR CONTINUED FREEDOM OF CHOICE?

WE PETITION YOU

AS OUR LEGISLATOR TO RECOGNIZE BY LAW, THE NATUROPATHIC PROFESSION. WE FEEL IT IS OUR CONSTITUTIONAL RIGHT TO BE ABLE TO MAKE OUR OWN CHOICE IN SELECTING THE TYPE OF DOCTOR AND THE TYPE OF TREATMENT FOR US OR OUR FAMILY. WE WOULD PREFER TO BE ABLE TO CHOOSE BECAUSE OF AVAILABILITY, FROM ALL OF THE DIFFERENT TYPES OF TREATMENT AND ESPECIALLY AT TIMES, THE NATURAL METHOD OR NATUROPATHIC SYSTEM. WE THE UNDERSIGNED HAVE USED OR WOULD LIKE TO USE NATUROPATHIC SERVICES. WOULD YOU ACT IN OUR BEHALF TO ASSURE US OF OUR CONTINUED FREEDOM OF CHOICE?

: in penalties under the AECA would
oactive and to allow adequate time to
ient the change in pricing for train-
; other sections would be effective on
r 1, 1983.

S. 638

enacted by the Senate and House of
ntatives of the United States of
: in Congress assembled, That this
y be cited as the "Special Security
ition Act of 1983".

TARY SALES AND RELATED PROGRAMS

)1. (a) In addition to amounts other-
de available for the fiscal year 1983
guaranties under section 24(a) of
s Export Control Act, $425,000,000
principal are authorized to be so
ed during such fiscal year.
addition to amounts otherwise
ailable for the fiscal year 1983 to
t the provisions of section 503 of
ign Assistance Act of 1961, there is
ed to be appropriated $142,000,000
out such provisions for such fiscal

ECONOMIC SUPPORT FUND

2. In addition to amounts otherwise
d to be appropriated for the fiscal
3 to carry out the provisions of
of part II of the Foreign Assist-
of 1961, there is authorized to be
ted $82,000,000 to carry out such
s for such fiscal year.

TIONAL ORGANIZATIONS AND PROGRAMS

3. In addition to amounts otherwise
ilable for the fiscal year 1983 to
the provisions of chapter 3 of part
Foreign Assistance Act of 1961,
uthorized to be appropriated for
year 1983 $4,500,000 to carry out
sions, for payment to the Interna-
mic Energy Agency.

Section Analysis of the Proposed Special Security Cooperation Act

I. INTRODUCTION

posed Special Security Coopera-
1983 contains freestanding provi-
der to authorize supplemental in-
l security assistance to meet
us for fiscal year 1983.

II. PROVISIONS OF THE BILL

101. Military sales and related programs

tion authorizes an increase of
) in the limit established in P.L.
the total principal amount of
which guaranties may be issued
al year 1983 under section 24(a)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. This Act may be cited as the "Lebanon Emergency Assistance Act of 1983".

ECONOMIC SUPPORT FUND

SEC. 2. (a) It is hereby determined that the national interests of the United States would be served by the authorization and appropriation of additional funds for economic assistance for Lebanon in order to promote the economic and political stability of that country and to support the international effort to strengthen a sovereign and independent Lebanon.

(b) Accordingly, in addition to amounts otherwise authorized to be appropriated for fiscal year 1983 to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961, there is authorized to be appropriated $150,000,000 to carry out such provisions.

(c) The amounts appropriated pursuant to this section are authorized to remain available until expended.

MILITARY SALES AND RELATED PROGRAMS

SEC. 3. (a) In order to support the rebuilding of the armed forces of Lebanon, the Congress finds that the national security interests of the United States would be served by the authorization and appropriation of additional funds to provide training for the Lebanese armed forces and to finance procurements by Lebanon of defense articles and defense services for its security requirements.

(b) In addition to amounts otherwise made available for the fiscal year 1983 to carry out the provisions of chapter 5 of part II of the Foreign Assistance Act of 1961, there are authorized to be appropriated for the fiscal year 1983 $1,000,000 to carry out such provisons.

(c) In addition to amounts otherwise made available for the fiscal year 1983 for loan guarantees under section 24(a) of the Arms Export Control Act, $100,000,000 of loan principal are authorized to be so guaranteed during such fiscal year.

Section-by-Section Analysis of the Proposed Lebanon Emergency Assistance Act of 1983

I. INTRODUCTION

The proposed Lebanon Emergency Assistance Act of 1983 ("the Bill") contains freestanding provisions in order to authorize supplemental international security assistance for the fiscal year 1983 for Lebanon. The amounts which would be authorized in the Bill represent the total amounts which are proposed to be allocated to Lebanon in fiscal year 1983 from amounts made available pursuant to this Bill and Public Law 97-377 for the Economic Support Fund, the International Military Education and Training program, and the Foreign Military Sales Credit program.

II. PROVISIONS OF THE BILL

Section 1. Short title

This section provides that the Bill may be cited as the "Lebanon Emergency Assistance Act of 1983".

Section 2. Economic support fund

This section consists of three subsections, as follows:

(a) This subsection states the determination of Congress that the national interests of the United States would be served by the authorization and appropriation of additional funds for economic assistance to promote the economic and political stability of Lebanon and to support the international effort to strengthen its sovereignty and independence.

(b) This subsection authorizes the appropriation of $150,000,000 for economic support pursuant to chapter 4 of Part II of the Foreign Assistance Act, in addition to amounts otherwise authorized for that chapter by Public Law 97-133.

(c) This subsection provides that the amounts appropriated pursuant to this section are authorized to remain available until expended.

Section 3. Military sales and related programs

This section consists of three subsections as follows:

(a) This subsection is a finding by the United States Congress, in support of the rebuilding of the armed forces of Lebanon, that the authorization and appropriation of supplemental funds for military sales and related programs would serve the national security interests of the United States. These additional funds would be used to provide training for the Lebanese armed forces and to finance procurements by Lebanon of defense articles and defense services for its security requirements.

(b) This subsection authorizes the appropriation of an additional $1,000,000 for the fiscal year 1983 for the International Military Education and Training (IMET) program. This authorization is in addition to the amounts made available for the IMET program by Public Law 97-377

(c) This subsection authorizes an increase of $100,000,000 is the limit established in Public Law 97-377 on the total principal amount of loans for which guaranties may be issued during fiscal year 1983 under section 24(a) of the Arms Export Control Act.●

By Mr. DOLE (by request):

S. 640. A bill to amend the Internal Revenue Code of 1954 to provide for the inclusion of certain employer contributions to health plans in an employee's gross income; to the Committee on Finance.

S. 641. A bill to provide for voluntary private alternative coverage for medicare beneficiaries, and for other purposes; to the Committee on Finance.

S. 642. A bill to restructure the medicare hospital insurance program; to the Committee on Finance.

S. 643. A bill to make improvements in the medicare and medicaid programs, and for other purposes; to the Committee on Finance.

HEALTH INCENTIVES REFORM LEGISLATION

● Mr. DOLE. Mr. President, I am introducing today, at the request of the administration, the major components of the health incentives reform program. There are five components of the package, one of which—the pro-

change in penalties under the AECA would be retroactive and to allow adequate time to implement the change in pricing for training. All other sections would be effective on October 1, 1983.

S. 638

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Special Security Cooperation Act of 1983".

MILITARY SALES AND RELATED PROGRAMS

SEC. 101. (a) In addition to amounts otherwise made available for the fiscal year 1983 for loan guaranties under section 24(a) of the Arms Export Control Act, $425,000,000 of loan principal are authorized to be so guaranteed during such fiscal year.

(b) In addition to amounts otherwise made available for the fiscal year 1983 to carry out the provisions of section 503 of the Foreign Assistance Act of 1961, there is authorized to be appropriated $142,000,000 to carry out such provisions for such fiscal year.

ECONOMIC SUPPORT FUND

SEC. 102. In addition to amounts otherwise authorized to be appropriated for the fiscal year 1983 to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961, there is authorized to be appropriated $82,000,000 to carry out such provisions for such fiscal year.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 103. In addition to amounts otherwise made available for the fiscal year 1983 to carry out the provisions of chapter 3 of part I of the Foreign Assistance Act of 1961, there is authorized to be appropriated for the fiscal year 1983 $4,500,000 to carry out such provisions, for payment to the International Atomic Energy Agency.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED SPECIAL SECURITY COOPERATION ACT OF 1983

I. INTRODUCTION

The proposed Special Security Cooperation Act of 1983 contains freestanding provisions in order to authorize supplemental international security assistance to meet urgent needs for fiscal year 1983.

II. PROVISIONS OF THE BILL

Section 101. Military sales and related programs

This section authorizes an increase of $425,000,000 in the limit established in P.L. 97-377 on the total principal amount of loans for which guaranties may be issued during fiscal year 1983 under section 24(a) of the AECA.

In addition, this section authorizes an increase in appropriations of $142,000,000 above the amount made available in P.L. 97-377 for fiscal year 1983 to carry out the military assistance program. Although the President's budget for fiscal year 1984 requested a supplemental appropriation of $167,000,000 to carry out the military assistance program for fiscal year 1983, section 506(c) already provides authorization to appropriate that part of the budget request ($25,000,000) which is proposed to be used for reimbursement to the Department of Defense for defense articles, defense services and military education and training previously drawn down pursuant to section 506(a).

Section 102. Economic support fund

The President's budget for fiscal year 1984 requested a supplemental appropriation of $144,500,000 for the Economic Support Fund for fiscal year 1983. This section increases by $82,000,000 the authorization of appropriations for fiscal year 1983 for this Fund, made by P.L. 97-113. The amounts appropriated in P.L. 97-377 for this Fund for fiscal year 1983 were $62,500,000 less than the amount authorized by P.L. 97-113.

Section 103. International organizations and programs

This section authorizes an increase in appropriations of $4,500,000 above the amount made available in P.L. 97-377 for fiscal year 1983 to carry out Chapter 3 of part I of the Foreign Assistance Act of 1961, as amended. These funds will be used for payments to the International Atomic Energy Agency.

S. 639

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. This Act may be cited as the "Lebanon Emergency Assistance Act of 1983".

ECONOMIC SUPPORT FUND

SEC. 2. (a) It is hereby determined that the national interests of the United States would be served by the authorization and appropriation of additional funds for economic assistance for Lebanon in order to promote the economic and political stability of that country and to support the international effort to strengthen a sovereign and independent Lebanon.

(b) Accordingly, in addition to amounts otherwise authorized to be appropriated for fiscal year 1983 to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961, there is authorized to be appropriated $150,000,000 to carry out such provisions.

(c) The amounts appropriated pursuant to this section are authorized to remain available until expended.

MILITARY SALES AND RELATED PROGRAMS

SEC. 3. (a) In order to support the rebuilding of the armed forces of Lebanon, the Congress finds that the national security interests of the United States would be served by the authorization and appropriation of additional funds to provide training for the Lebanese armed forces and to finance procurements by Lebanon of defense articles and defense services for its security requirements.

(b) In addition to amounts otherwise made available for the fiscal year 1983 to carry out the provisions of chapter 5 of part II of the Foreign Assistance Act of 1961, there are authorized to be appropriated for the fiscal year 1983 $1,000,000 to carry out such provisons.

(c) In addition to amounts otherwise made available for the fiscal year 1983 for loan guarantees under section 24(a) of the Arms Export Control Act, $100,000,000 of loan principal are authorized to be so guaranteed during such fiscal year.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED LEBANON EMERGENCY ASSISTANCE ACT OF 1983

I. INTRODUCTION

The proposed Lebanon Emergency Assistance Act of 1983 ("the Bill") contains freestanding provisions in order to authorize supplemental international security assistance for the fiscal year 1983 for Lebanon. The amounts which would be authorized in the Bill represent the total amounts which are proposed to be appropriated to Lebanon in fiscal year 1983 from amounts made available pursuant to this Bill and Public Law 97-377 for the Economic Support Fund, the International Military Education and Training program, and the Foreign Military Sales Credit program.

II. PROVISIONS OF THE BILL

Section 1. Short title

This section provides that the Bill may be cited as the "Lebanon Emergency Assistance Act of 1983".

Section 2. Economic support fund

This section consists of three subsections, as follows:

(a) This subsection states the determination of Congress that the national interests of the United States would be served by the authorization and appropriation of additional funds for economic assistance to promote the economic and political stability of Lebanon and to support the international effort to strengthen its sovereignty and independence.

(b) This subsection authorizes the appropriation of $150,000,000 for economic support pursuant to chapter 4 of Part II of the Foreign Assistance Act, in addition to amounts otherwise authorized for that chapter by Public Law 97-133.

(c) This subsection provides that the amounts appropriated pursuant to this section are authorized to remain available until expended.

Section 3. Military sales and related programs

This section consists of three subsections as follows:

(a) This subsection is a finding by the United States Congress, in support of the rebuilding of the armed forces of Lebanon, that the authorization and appropriation of supplemental funds for military sales and related programs would serve the national security interests of the United States. These additional funds would be used to provide training for the Lebanese armed forces and to finance procurements by Lebanon of defense articles and defense services for its security requirements.

(b) This subsection authorizes the appropriation of an additional $1,000,000 for the fiscal year 1983 for the International Military Education and Training (IMET) program. This authorization is in addition to the amounts made available for the IMET program by Public Law 97-377.

(c) This subsection authorizes an increase of $100,000,000 is the limit established in Public Law 97-377 on the total principal amount of loans for which guaranties may be issued during fiscal year 1983 under section 24(a) of the Arms Export Control Act.●

By Mr. DOLE (by request):

S. 640. A bill to amend the Internal Revenue Code of 1954 to provide for the inclusion of certain employer contributions to health plans in an employee's gross income; to the Committee on Finance.

S. 641. A bill to provide for voluntary private alternative coverage for medicare beneficiaries, and for other purposes; to the Committee on Finance.

S. 642. A bill to restructure the medicare hospital insurance program; to the Committee on Finance.

S. 643. A bill to make improvements in the medicare and medicaid programs, and for other purposes; to the Committee on Finance.

HEALTH INCENTIVES REFORM LEGISLATION

● Mr. DOLE. Mr. President, I am introducing today, at the request of the administration, the major components of the health incentives reform program. There are five components of the package, one of which—the pro-

posed Medicare Prospective Payment Rates Act—was introduced on February 23, 1983.

The following four bills are those that are being introduced today: First, limitation on exclusion for employer health plan payments; second, the Medicare Voucher Act of 1983; third, the Medicare Catastrophic Hospital Cost Protection Act; and, fourth, the Health Care Financing Amendments of 1983.

NEED FOR ACTION

As many of my colleagues are aware, health care costs continue to escalate at an alarming rate, far exceeding the increase in prices overall.

This year the Federal Government will spend approximately $57 billion on the medicare program. At the same time, we expect to spend $19 billion on services for the poor under the medicaid program.

Rising health care costs are a problem that affects all of us. As the President pointed out in the letter of transmittal accompanying the health incentives reform program, increasing costs affect the elderly who are covered by medicare, and face the threat of increasing out of pocket costs. The poor continue to see medicaid coverage reduced as States and the Federal Government are forced by rising costs to make cutbacks. Workers with employment-based health insurance have received lower cash wages because of the unchecked cost increases for health benefits.

The President's package of health care program reform measures is designed to address each of these areas. The Senator from Kansas is particularly pleased to note the inclusion of the provision limiting the exclusion for employer health plan payments.

Under the proposal contained in the administration's fiscal year 1984 budget, employer contributions to accident or health plans for an employee would be included in the employee's income to the extent they exceed, first, $175 per month—$2,100 per year—if the plan covers the employee and his family, or second, $70 per month—$840 per year—if the plan covers only the employee. The provision would apply for taxable years beginning after December 31, 1983. The $175 and $70 amounts would be indexed to adjust for inflation.

Amounts included in the employee's income under the proposals would also be subject to social security taxes.

There would be a transition rule to exempt premiums paid under collective-bargaining agreements signed before January 31, 1983.

The total exclusion from employees' income for employer paid medical coverage is the second largest, statutory fringe benefit in the Tax Code. The largest is the exclusion from income of pension contributions and earnings.

The revenue loss estimate for this total exclusion from income is estimated to be $18.6 billion in fiscal year 1983 and $21.3 billion in fiscal year 1984.

The administration's proposal would reduce this revenue loss by $2.3 billion in fiscal year 1984 and $4.4 billion in fiscal year 1985. Therefore, even after a cap on the exclusion, the tax benefit for receiving part of your compensation in the form of health care would be very substantial.

Many experts believe that our present tax treatment of employer provided health benefits has been a contributing factor in the trend toward excessive coverage and escalating medical cost

We will h[ave] to decide whether a dollar cap o[n] on from an employee's inc[ome] hange consumer behavi[or] le way. For example, wi[ll] age copayments and m[ore] health care, or will some [such] as low-income individual[s] ve insufficient coverage?

Even if we decide to limit employer paid tax free medical insurance, there are still a number of questions to be resolved with respect to a so-called tax cap. These include the level at which the cap is set. For instance, should there be a national cap or one which varies in different areas of the country, thereby recognizing differing costs of care; how often should the limit be updated; and how do we prevent adverse selection—the case where all the healthy choose low option insurance and the sick, high option. Another obvious question is how to deal with self-insured plans which are increasing in number.

It is not likely that we on the Federal level would attempt to establish a minimum benefits package in conjunction with a tax cap. That is clearly the jurisdiction of the State insurance commissioners and in the lands of labor and business.

CONCLUSION

Medicare is a program which has grown at an alarming rate since its creation 17 years ago. The trust fund is rapidly approaching a period of time in which it will no longer have sufficient funds to finance program expenditures. Something must be done to prevent this potential insolvency. The President's proposals are an attempt to address this problem and others. The Senator from Kansas urges his colleagues to give these bills their serious consideration.

Mr. President, I request that a summary of each bill be included in the record following my comments.

There being no objection, the summaries were ordered to be printed in the RECORD, as follows:

S. 640—LIMITATION ON EXCLUSION FOR EMPLOYER HEALTH PLAN PAYMENTS

GENERAL EXPLANATION

Current law

All employer contributions to health insurance plans for employees are excluded from the employees income and wages for purposes of income and employment taxes. This tax treatment generally applies to all insurance coverage, regardless of cost, and to all medical benefits, no matter how extensive. The same rule generally applies to amounts paid by an employer to or on behalf of an employee under a self-insured medical plan.

Reasons for change

Excluding employer contributions to health plans from gross income creates an inequity between individuals covered by employer health plans and those who are not so covered. The latter group must pay for their health care with after tax dollars, while the health care of the former group is provided with before tax dollars. For example, an employee with $23,000 of total compensation consisting of $20,000 of cash wages and $3,000 of health insurance coverage will pay $804 less in Federal income and Social Security taxes than one with $23,000 of cash wages.

The preferential treatment of employer paid health benefits encourages employees to receive large amounts of their compensation in that form. This has led to a significant decline in the amount of compensation subject to tax and indirectly has led to higher tax rates on cash wages.

From a health policy viewpoint, many employees have such generous insurance plans that they bear very little, if any, of the cost of doctors' visits or hospital services. They therefore tend to overuse doctor and hospital services and medical tests. The very rapid increase in health care costs in recent years can be attributed at least in part to this tax-induced incentive to demand additional health care with little or no regard to its actual costs.

Proposal

Employer contributions to a health plan would be includible in gross income to the extent that they exceed $70 per month ($840 per year) for an individual employee, or $175 per month ($2,100 per year) for family coverage.

The proposal will generally be effective January 1, 1984. However, in order to allow renegotiation of existing contracts, the proposal will not be effective with respect to employer contributions to employer health plans, the amounts of which are fixed by a legally binding contract entered into on or before January 31, 1983, until the earlier of January 31, 1986, or the first date after January 31, 1983 on which such amounts cease to be fixed by the contract.

Effects of proposal

The amount of employer contributions is determined, in the case of an insured plan, on the basis of the premiums charged for such insurance. The insurance premiums paid by the employer on behalf of employees will be divided by the number of covered employees. If the employer maintains different plans covering different groups of employees, each plan will be treated separately in determining employer costs per employee.

In the case of noninsured plans, the amount of the employer contributions will be based on the costs of providing coverage under the plan. Costs of providing coverage may be determined based on reasonable estimates of such costs.

To the extent that employer contributions exceed the $70 individual/$175 family monthly ceilings, the excess would be includible in the income of the covered employee. Even if employer health plan payments exceed the $70 individual/$175 family monthly amounts, only the excess will be included in the employee's gross income. For example, if the employer paid $185 per month for family health coverage for an

employee, $10 per month would be included in the employee's gross income. Thus, $10 would be subject to income tax and FICA and FUTA taxes (if applicable). Most current employees will pay no additional tax because those employees have insurance coverage costing less than the applicable ceiling amount.

Revenue estimate

Fiscal years:	Billions
1984	$2.1
1985	4.2
1986	6.0
1987	8.0
1988	10.7

LIMITATION ON EXCLUSION FOR EMPLOYER HEALTH PLAN PAYMENTS

TECHNICAL EXPLANATION

Summary of the proposal

Employer contributions to a health plan would be includible in gross income to the extent that they exceed $70 per month ($840 per year) for an individual employee, or $175 per month ($2100 per year) for family coverage.

Detailed description

Under the proposal, the amount of any excess employer contributions to a health plan with respect to coverage of an employee during the payroll period will be included in the employee's gross income. Employer contributions for a payroll period are excess employer contributions to the extent they exceed the monthly dollar limit for such employee, prorated to reflect the length of the payroll period. For 1984, the monthly dollar limit is $70 for an employee with individual coverage under the plan and $175 for an employee with family coverage under the plan. For years after 1984, the monthly dollar limit will be adjusted to reflect changes in the Consumer Price Index. An employee will be treated as having individual coverage unless the employee has a spouse or a dependent who is covered under the plan.

The employer contribution to a health plan with respect to an employee will be the cost of coverage of the employee under the plan reduced by the amount of the employee's contributions for such coverage. The annual cost of coverage with respect to an employee will be the aggregate annual cost of providing coverage for all employees with the same type of coverage (individual or family) under the plan as that of the employee, divided by the number of such employees. The cost of coverage with respect to an employee for a payroll period will be the annual cost of coverage prorated to reflect the length of the payroll period. Any cost of providing coverage under a plan which is allocable to workmen's compensation or to a purpose other than providing medical care is not taken into account in determining the cost of coverage under the plan.

The annual cost of providing coverage under an insured plan (or any insured part of a plan) will be determined based on the net premium charged by the insurer for such coverage. The annual cost of providing coverage under a noninsured plan (or any noninsured part of a plan) will be based on the costs incurred with respect to the plan, including administrative costs. In lieu of using actual administrative costs, an employer may treat 7 percent of the plan's incurred liability for benefit payments as the administrative costs with respect to the plan. A plan will be a noninsured plan to the extent the risk under the plan is not shifted from the employer to an unrelated third party.

The cost of coverage under the plan must be determined in advance of the payroll period and must be redetermined not less often than once every 12 months. The cost of coverage must be redetermined whenever there are significant changes in the coverage provided under the plan or in the composition of the group of covered employees. The cost of coverage is determined separately for each separate plan of the employer. Coverage of a group of employees is a separate plan if such coverage differs from the coverage of another group of employees. Where the actual cost of coverage cannot be determined in advance, reasonable estimates of the expected cost of coverage are to be used. Where the cost of coverage fluctuates each year depending on the experience of the employer under the plan, an average annual cost of coverage will be used.

If an estimate is determined not to be a reasonable estimate, the employer will be liable for the income taxes (at the maximum rate applicable to individuals) and the employment taxes (both the employer's and the employee's share) that would have been imposed on the additional amount that would have been included in the income of employees as excess employer contributions if the actual cost of coverage had been used to determine the amount of excess employer contributions.

In the case of multiemployer plans to which an employer makes contributions, the multiemployer plan is to be treated as the employer for purposes of determining the cost of coverage and the liability for errors in estimates of the cost of coverage. Each employee's excess employer contributions will be determined based on this cost of coverage. However, for purposes of the employer's obligations to withhold from wages and to pay employment taxes, the amount of excess employer contributions will be considered to be a portion of each contribution made by the employer to the plan. The portion of each contribution to be treated as an excess employer contribution will be based on the ratio of the plan's excess employer contributions per employee per month to the total monthly employer contribution per employee.

Effective date

In general, the proposal would apply to employer contributions made with respect to payroll periods beginning after December 31, 1983. However, the proposal will not apply to employer contributions to employer health plans, the amounts of which are fixed by a legally binding contract entered into on or before January 31, 1983, until the earlier of January 31, 1986, or the first date after January 31, 1983 on which such amounts cease to be fixed by the contract.

S. 641—SUMMARY OF PROPOSED MEDICARE VOUCHER ACT OF 1983

Section 1 would assign the draft bill the short title "Medicare Voucher Act of 1983".

Section 2 would permit the Secretary to contract with health benefits organizations (HBOs) (a broad range of health insurers and health services providers, including health maintenance organizations (HMOs) and competitive medical plans (CMPs)) to provide private alternative coverage for Medicare beneficiaries (other than individuals suffering from end-stage renal disease, or who are working and are 65 years of age or older but under 70) who chose to participate in such a private plan. Section 2 would also enact additional amendments to current provisions of law concerned with Medicare contracts with such organizations to—

Establish a single, coordinated open enrollment period during August and September of each year (but only for that number of new enrollees, in order of applications filed, previously specified by an HBO); and to enable the Secretary, to the extent feasible, to provide for individuals who move from the area served by one HBO to an area served by another (similar to the system used by the health benefits program for Federal employees);

Preclude new enrollments for individuals receiving only Supplementary Medical Insurance (SMI) benefits;

Preclude new cost-based contracts;

Permit HBOs to offer separate benefit packages for employer-based groups;

Permit HBOs to offer one or more benefit packages as long as each package covered at least those services for which Medicare pays and covered inpatient hospital services for every day of hospitalization, which benefit levels, coinsurance, and deductibles to be set by the HBO;

Eliminate current requirements as to premium levels and benefits, and require only that the average cost-sharing for the portion of benefits for which Medicare pays not exceed the average cost-sharing (including amounts above the Medicare reasonable charge) under Medicare;

Permit HBOs to provide annual rebates of up to $500 (instead of charging premiums), not consider those rebates as income for purposes of Medicaid, Aid to Families with Dependent Children, Supplemental Security Income, Food Stamps, Low-Income Home Energy Assistance, or low-income housing programs, and treat those rebates as Social Security benefits for purposes of the Federal income tax laws; and

Preempt provisions of State or local law requiring benefits more extensive that those under section 2.

Section 3 would enact conforming amendments that would—

Repeal the requirement for the Secretary to conduct a study of additional benefits that are required under existing law (but not under the provisions of section 2); and

Require payments to HBOs under section 2 to take into account services furnished by physician assistants or nurse practitioners if Medicare would pay for those services when furnished by a physicians.

Section 4 would make the provisions of section 2 applicable to services furnished after 1984. Section 4 would also—

Retain the transitional provisions enacted in 1982 when Congress amended the provisions of law providing for payments to HMOs;

Permit any enrollee of an HMO or CMP at the end of 1984 not already covered by those earlier transition provisions to continue his enrollment under the provisions of law then current if either the HMO or CMP had a cost-based contract with the Secretary or if the enrollee was enrolled for Medicare SMI (but not Hospital Insurance (HI) benefits), unless the Secretary found that the new provisions should apply to all members of an HMO or CMP because of administrative costs or other administrative burdens; and

Apply the provisions of section 2 to enrollees who also receive benefits under Medicaid only after the Secretary finds that it is administratively feasible.

S. 642—SUMMARY OF PROPOSED MEDICARE CATASTROPHIC HOSPITAL COST PROTECTION ACT

Section 1 would assign the draft bill the short title "Medicare Catastrophic Hospital Cost Protection Act".

Section 2 would restructure benefits under the Medicare Hospital Insurance program. Under current law, Medicare covers only the first 90 days of a hospitalization during any spell of illness, plus a lifetime reserve of 60 additional days. An inpatient hospital de-

Oregon Board of Naturopathic Examiners

Procedures for Colleges Applying for Approval under ORS 685.060

Naturopathic colleges seeking approval by the Board of Naturopathic Examiners in order that graduates may be eligible to take the licensing examinations should submit the following information to document compliance with the standards of OAR . Four(4) copies of all materials are required.

1) Current institutional catalog, brochures, and other information provided to students and the public.

2) Institutional self-evaluation for accreditation, if any.

3) Statements or documents described below, corresponding to sections of rule , Standards. Reference may be made to the appropriate sections of 1) and 2) above.

   1) Objectives. List the objectives of the college.

   2) Organization. Submit copies of Articles of Incorporation, By-laws, and the names of all Directors or Trustees.

   3) Administration. Submit resumes of all administrators, organization chart and position descriptions.

   4) Financial Condition. Submit current audited financial statement, current budget and projected budget for t he next fiscal period.

   5) Records and Educational Credentials. Describe record-keeping policies and procedures, submit sample degree and transcript.

   6) Catalog. Indicate the location of each required item in the catalog.

   7) Admissions. Describe the admissions policies, requirements and procedures. List the names of the Admissions Committee members. Submit a copy of the application form(s) used.

   8) Attendance. Describe the college's attendance policy.

   9) Curriculum. Submit a synopsis of the curriculum showing the number of clock hours for each course. Submit a course outline for each course.

   10) Academic Standards. Describe how students are evaluated and the standards by which they are evaluated. Provide representative tests.

over

11) Faculty. Submit resume for each member of the faculty as described. Provide a narrative description on faculty participation in other areas specified. Submit copies of policies on hiring, compensation, etc. as listed.

12) Library. Submit all information as listed in Standards.

13) Clinical Training. Provide a narrative description of clinic facilities, major equipment, details of clinic procedures, rules of conduct, resumes of clinic staff, and any other pertinent data on the student's clinical experience.

14) Physical Plant. Describe in detail the college's physical plant and equipment.

15) Cancellation and Refund Policy. Submit a copy of the college's policy on refund of tuition and fees.

The following information should be made available to the Board's inspection committee during its visit.

a) Minutes of all board of control meetings
b) Administrative reports to the board of control
c) Minutes of faculty meetings
d) Student personnel records and financial accounts

DIVISION 10

GENERAL

Definitions

850-10-005 As used in rules 850-10-010 to 850-10-200, unless otherwise required by context:

(1) "Board" means Oregon State Board of Naturopathic Examiners.

(2) "Naturopathy" is defined as a system of diagnosing and treating the human body and maintaining or restoring it to a state of normal health, as defined in ORS Chapter 685, and in such other sections thereof as may apply.

(3) "Diagnosis" is a determination of the nature of a disease by the use of all recognized and accepted physical and laboratory examinations, which includes the drawing of blood and taking specimens of body fluids and tissues for microscopic and chemical analysis.

(4) "Prescriptions": Naturopathic physicians shall be allowed to prescribe and dispense nature's agents, forces, processes, and products.

(5) "Non-poisonous plant substance" is any plant substance, taken in relatively small amounts, which would not, by its action on organs or tissue, seriously impair function or destroy life.

(6) "Plant substance" is any medical material taken or removed from a plant.

(7) "Food" is any organic substance taken into the body which helps maintain life, builds or repairs tissue, and sustains growth. This includes the use of ensymes, minerals, vitamins (either in trace amounts or megodoses) and any food products or extracts either processed, refined, or concentrated.

Hist: NE 3, f. 8-26-66; NE 4, f. 10-9-67; NE 1-1980, f. & ef. 9-11-80

Requirements for Application

850-10-010 (1) Any applicant for examination shall be a high school graduate or equivalent and a graduate of a naturopathic college that offers a resident four-year course of at least 4,000 hours.

(2) Each applicant shall possess a basic science certificate, obtained from the State Board of Higher Education either by reciprocity or by examination.

(3) Each applicant shall submit satisfactory evidence of his having had, prior to his matriculation into a naturopathic college, at least two years Liberal Arts or Science study in a college or university accredited by either the North-West Association of Secondary and Higher Schools or a like regional association or in a college or university in Oregon approved for granting degrees by the Oregon State Board of Education.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Basic Science Examination or Reciprocity

850-10-020 (1) Any applicant desiring the dates of or application blanks for the basic science examination or for reciprocity shall address all inquiries to the Secretary, State Board of Higher Education, P.O. Box 3175, Eugene, Oregon.

(2) The Oregon Basic Science Examinating Committee reciprocates with a like board from each of the following states: Arizona, Arkansas, Colorado, Iowa, Michigan, Minnesota, Nebraska, Nevada, New Mexico, Oklahoma, South Dakota, Tennesee, Texas, Washington, and Wisconsin.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Application for Examination; Filing; Additional Papers

850-10-030 (1) Any applicant for licensure by the Board shall fill out, without alterations, an application furnished by the Board.

(2) The application shall be filed with the Board at least 10 days prior to the date of the examination.

(3) A photostatic copy of the applicant's Oregon basic science certificate and of his naturopathic diploma shall be attached to his application.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Examination Dates

850-10-040 Examinations shall be held by the Board in March and in September of each year or at such other times as may be feasible.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Re-Examination

850-10-050 Any applicant for examination who has failed in one or more subjects shall be permitted, within one year, to submit himself for re-examination in those subjects, without paying an additional fee if he notifies the Board of his intention at least 10 days prior to the examinations.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Temporary Permits

850-10-060 Temporary permits for the practice of naturopathy shall not be issued by the Board.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Reciprocity

850-10-070 Reciprocity in naturopathy with another state cannot be considered by the Board.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Recordation and Display of License

850-10-080 (1) An Oregon licentiate for the practice of naturopathy shall record his license in the office of the county clerk in the county in which he resides.

(2) Each licentiate of the Board shall display in his office, in a conspicuous place, his license and yearly renewal card.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Expiration and Renewal of Licenses

850-10-090 (1) Unless renewed by proper application to the Secretary of the Board on a form provided by the Board, all licenses to practice naturopathy in Oregon automatically expire on January first of each year.

(2) The renewal application shall be accompanied by a specified yearly fee of $75, the practioner's address, and his original license number.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59; NE 2-1980, f. & ef. 9-11-80

Mode of Remittance

850-10-100 (1) The remittance of any application fee, license fee, or yearly renewal fee shall be made by postal money order, postal certificates, express money order, bank draft, or certified check.

(2) The Secretary shall be under no obligation to accept personal checks; however, he may accept them subject to collection only.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Use of Unauthorized Material and Misrepresentations in Obtaining License

850-10-110 (1) Any applicant for a license detected in the act of offering or accepting unauthorized assistance or using unauthorized material while the examinations are in progress shall be excluded from further examination and his or her papers rejected in total.

(2) The Board may refuse to grant a license to any applicant indulging in misrepresentation, fraud, or deception, or to revoke the license granted as a result of these.

(3) The Board shall carefully and rigidly investigate applicants who attempt to obtain naturopathic license by false statements or representations in their applications or otherwise violate these rules.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Illegal Practice

850-10-120 (1) Any applicant for examination shall be prohibited from and prosecuted for any practice of naturopathy while awaiting examination.

(2) Any person convicted of practicing illegally in Oregon or any person who, without a license, makes a diagnosis shall not be admitted to examination by the Board at any time.

(3) It shall be the duty of all licentiates of the Board, in the interests of both the public and the profession, to inform the Board, in writing, fully signed, of anyone practicing naturopathy in Oregon without a license or otherwise in violations of the law.

(4) For the purpose of this rule, naturopathic treatment shall be considered as practicing naturopathy within the meaning of ORS 685.010(4) even though practicing in the office of a licentiate of the Board.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Change of Address

850-10-130 It shall be the duty of any licentiate of the Board to keep the Secretary of the Board informed of any change of address.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Advertising

850-10-140 While constructive educational publicity shall be encouraged, licentiates of the Board shall refrain from using or causing to be used advertising matter which contains misstatements, falsehoods, misrepresentations, distorted, or fabulous statements as to cures.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Public Health Laws

850-10-150 Naturopathic physicians shall be subject to all state, county, and municipal laws and rules relating to public health concerning the diagnosis and reporting of contagious and infectious diseases, as may be required, to the proper health authorities in the respective counties.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

State Industrial Accident Cases

850-10-160 Naturopathic physicians may accept injured workers who are employed under the provisions of the State Industrial Accident Commission, in conformance with the Workers' Compensation Law and the rules of committee.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

State Welfare Cases

850-10-170 Naturopathic physicians may accept welfare cases under the medical plan adopted by the Welfare Commission, April 26, 1946.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Standards

850-10-180 It shall be the object of the Board to foster higher professional standards as rapidly as is consistent with the best intrests of the profession, and in this, it shall not be swayed or influenced by any school or other interests whatsoever.

Stat. Auth.: ORS Ch. 685
Hist: NE 2, f. 6-7-59

Denial or Revocation of License

850-10-190 The Board may refuse to grant or may revoke a license to practice naturopathy in the State of Oregon for any of the following reasons:

(1) Commitment to a mental institution. A copy of the record of commitment, certified to by the clerk of the court entering the commitment, is conclusive evidence of the commitment.

(2) Habitual intemperance in the use of ardent spirits, narcotics, or stimulants to such an extent as to incapacitate him from the performance of his professional duties.

(3) Unprofessional or dishonorable conduct.

(4) Representing to a patient that manifestly incurable condition of sickness, disease, or injury can be permanently cured.

(5) The obtaining of any fee through fraud or misrepresentation.

(6) The willful betrayal of a professional secret.

(7) The use of any advertising in which untruthful, improper, misleading, or deceptive statements are made.

(8) The advertising of techniques or modalities to infer or imply superiority of treatment or diagnosis by the use thereof.

(9) Knowingly permitting or allowing any person to use his certificate in the practice of any system or mode of treating the sick or afflicted.

(10) Advertising either in his own name or under the name of another person or clinic or concern, actual or pretended, in any newspaper, pamphlet, circular, or other written or printed paper or document, professing superiority to or a greater skill than that possessed by fellow naturopathic physicians.

(11) Aiding or abetting the practice of any of the healing arts by an unlicensed person.

(12) The use of his name under the designation, "Doctor", "Dr.", "Naturopathy", "Naturopathic Physician", or any similar designation with preference to the commercial exploitation of any goods, wares, or merchandise.

(13) The advertising or holding oneself out to treat diseases or other abnormal conditions of the human body by any secret formula method, treatment, or procedure.

(14) The guaranteeing of a cure or "results" from any treatment.

Programs of Continuing Education

850-10-210 (1) The following programs of continuing education in naturopathy are approved by the Naturopathic Board of Examiners as meeting the requirements of ORS 685.102, 685.104, and 685.106:

(a) Programs offered by the Oregon Association of Naturopathic Physicians.

(b) Programs offered by the Northwest Naturopathic Physician's convention.

(c) Programs offered by all colleges of Naturopathic Medicine which are recognized by this Board.

(2) A person who desires to offer a program of continuing education in naturopathy other than the programs set forth in section (1) of this rule shall first comply with the provisions of ORS 685.106 (2) and (3) and receive approval of the program from the Board of Naturopathic Examiners.

(3) Any programs of continuing education in naturopathy not authorized or approved by the Board prior to their being offered to naturopathic physicians will not be considered as meeting the requirements of ORS 685.102, 685.104, and 685.106.

OREGON EDUCATIONAL COORDINATING COMMISSION
PROPOSED AMENDMENTS TO OREGON ADMINISTRATIVE RULES
CHAPTER 583, DIVISION 30

NOTE: Matter underlined is new; matter [*italic and bracketed*] is existing language to be omitted.

STANDARDS AND PROCEDURES FOR APPROVAL OF DEGREE REQUIREMENTS IN CERTAIN OREGON PRIVATE AND ALL OUT-OF-STATE INSTITUTIONS

Scope and Purpose

583-30-005 (1) ORS 348.83[illegible] provides that certain Oregon private and all out-of-state institutions of learning shall not confer or offer to confer any degree in recognition of the attainment or proficiency of a person without first having submitted the requirements for the degree to the Oregon Educational Coordinating Commission and having obtained the Commission's approval. This applies to each degree program at each location proposed by an institution.

(2) The purpose of this rule is to provide standards and procedures for submission of requirements and for Commission review and approval of the same, and to assure that institutions covered by this rule meet minimum standards of quality in their operation and conferral of degrees. It is also the purpose of these rules to help prevent deception of the public resulting from the conferring and use of fraudulent or substandard degrees. Regulation of degree requirements as evidence of academic achievement is in the public interest.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Exemptions

583-30-010 This rule shall not apply to:

(1) Any school or institution of learing which has been established and conducted within Oregon, and has conferred degrees for a period of 15 years prior to March 4, 1935;

(2) Any school conducted under the public educational system of the State of Oregon;

(3) Any Oregon school which is a member in good standing of the Northwest Association of Schools and Colleges;

[*(4) Any school which confers degrees only for proficiency in any system or method of healing;*]

[*(5) Any school now conferring the degree of doctor of optometry;*]

(4)[*(6)*] Schools of theology operating on a post-baccalaureate degree level.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Definitions as Used in OAR 583-30-005 to 583-30-045

583-30-015 (1) "Institution of Learning" or "Institution" means post-secondary educational institution subject to this rule.

(2) "Degree" means any academic or honorary title of designation mark, appelation, series of letters or words, such as, but not limited to, associate, bacheior, master, doctor, or fellow which signifies, purports, or is generally taken to signify satisfactory completion of the requirements of an academic program of study beyond the secondary school level or a recognized title conferred for meritorious recognition which may be used for any purpose whatsoever. "Degree" does not include certificate, diploma, license, report, document, or title which signifies satisfactory completion of requirements of a non-degree program.

(3) "Confer" includes awarding, granting, bestowing, or giving of a degree.

(4) "Good Standing" means full accreditation with the Northwest Association of Schools and Colleges.

(5) "Commission" means the Oregon Educational Coordinating Commission.

(6) "Out-of-State" or "Foreign" educational institution means either a public or private institution which is not an Oregon school.

(7) "Attainment" or "Proficiency" means the completion and mastery of a program or field of study or competence in the skills generally required in the profession or field of study.

(8) "Advertising" means any form of public notice used in school recruiting and promotional activities, however disseminated including, but not limited to, catalogues and other school publications, signs, mailing pieces, radio or television advertisement, and audiovisual material.

(9) "Oregon School" means any school or institution of learning which initially establishes operations solely in oregon and Continuously maintains its main headquarters in Oregon.

(10) "Part-time faculty" means teaching staff employed by an institution less than full-time throughout the academic year.

(11) "Credit for prior learning" means credit which is awarde[illegible]or learning which is not sponsored by an institution and occ[illegible] prior to matriculation.

Stat. [illegible]h.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Exercise of Commission Authority

583-30-020 (1) After initial approval by the Commission for an institution to grant a certain degree (or degrees), periodic reports may be required. Failure to conform to the established standards may result in loss of Commission approval. No institution shall receive approval for a period longer than five years. Prior to the expiration of the five-year period, or any lesser period designated by the Commission at the time of approval, the institution must initiate the reevaluation process by making application to the Commission for renewal of its authority. The Commission upon review and evaluation of the application shall make a final decision of approval or disapproval in not less than two nor more than 11 months.

(2) If any institution of learning fails to maintain the required standards or fails to report significant institutional changes within 90 days of the change including the offering of approved degree programs at new locations either within Oregon or elsewhere, the Commission may revoke its approval subject to rule 583-30-045 of these rules. The Commission may make periodic contact and/or send a representative or qualified examining or evaluation committee to an institution to gather information as authorized under rule 583-30-040. All costs of an evaluation shall be borne by the institution requesting approval.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Eligibility to Apply

583-30-025 In order to make application for the review of its degree-granting authority, an institution subject to this rule must have a representative in Oregon residence and a headquarters with a physical location and address in Oregon and identify its agent for the transaction of business with the Commission; or, if a foreign or out-of-state institution, it must designate a responsible agent within the State of Oregon and provide his/her name, address, and telephone number.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Application Procedure

583-30-030 Institutions making application shall do so on a form provided by the Commission, which shall be designed to meet the standards in rule 583-30-035.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75

Standards

583-30-035 The following standards shall be used by the Commission in determining the completeness of an application and in its review of the degree-granting authority of an institution:

(1) Objectives. The objectives of the institution shall be clearly stated; they should make evident the ends which the institution hopes to achieve; and their implementation should be obvious in the administration of the institution, individual course objectives, and the total program which has been planned for students.

(2) Curriculum and Academic Standards. The institution shall make known the standards of excellence, mastery, and competence for its programs and courses of study and shall validate the effectiveness of its instruction by evaluating the proficiency of its students in their particular field of study before the granting of degrees. Special training for a given profession or vocation shall be sufficient in extent and quality to insure that recipients of the degree can perform acceptably the duties of the particular profession or vocation involved.

(3) Administration. The education and experience of directors, administrators, supervisors, and instructors should be sufficient to insure that the student will receive educational services consistent with institutional objectives. The administration of the institution shall be such that the lines of authority are clearly drawn. The institution shall present with its application a catalog and a brief, narrative explanation of how the administration of the institution is or is to be organized and how the administrative responsibility for each of the following is or is to be managed:

(a) Faculty and staff recruitment;

(b) Personnel records management;

(c) Faculty pay scale and policies;

(d) Standards and practices relating to evaluation, improvement of instruction, promotion, retention, and tenure;

(e) Admissions policies including procedures used to solicit students;

(f) Development and administration of policies governing rejection and retention of students, job placement, and student counseling and advising services;

(g) Curriculum requirements;

(h) Tuition and fee policies; and

(i) Financial management policies.

(4) Faculty. Faculty members of any institution conferring degrees shall be qualified by training and experience to give effective instruction in the particular fields involved. There shall be submitted to the Commission a resume for each faculty member participating in a program in Oregon, including the following information:

(a) Academic rank or title;

(b) Degree or degrees held, the institution(s) that conferred the degree(s), the dates(s) thereof, and whether earned or honorary;

(c) The faculty members' assignments by course number and title and the number of students involved in each course;

(d) Where faculty members have responsibilities for other than teaching, the nature of these responsibilities and the proportion of the faculty member's time required for them;

(e) Full-time equivalency; and

(f) The length of time each faculty member has been with the institution. Institutions which primarily employ part-time faculty must show how the following are provided:

(a) Faculty participation in the development of curriculum to afford continuity and stability in the educational program.

(b) Opportunity, for counseling and informal association between students and faculty.

(5) Student Recruitment, Selection, and Retention. Recruitment and selection policies and practices shall be such as to assure that the personal goals and abilities of prospective students are compatible with the institution's purpose and academic standards and that student retention practices are consistent with the institution's objectives. The data submitted to the Commission shall include the following:

(a) A statement of the institution's recruitment, selection, and retention policies;

(b) The number of applicants for admission, number admitted, and the number enrolled during the past year, the attrition rate compared to the total school enrollment, and the reasons for students' leaving if known; and

(c) The distribution of students in each of the various years in school and in each degree program.

(6) Financial Condition:

(a) The institution shall demonstrate to the satisfaction of the Commission its financial solvency and stability by submitting certified audit reports, the posting of an adequate bond, or other appropriate evidence.

(b) The potential of a proposed program for retaining students over time will be a factor in assessing projected financial stability.

(7) Physical Plant, Materials, and Equipment. Instructional space, equipment, laboratories, recreational facilities, gymnasiums, health centers, and instructional materials shall be adequate to achieve all institutional and program objectives. Institutions without the educational resources of a traditional campus and out-of-state domiciled institutions shall furnish evidence that provisions are made for faculty and student access to all necessary teaching and learning resources.

(8) Library Resources:

(a) The library resources shall be adequate to support the instruction, research, and services pertinent to the institution's goals and courses of study. Evidence for evaluation shall include:

(A) Financial support;

(B) Circulation;

(C) Number of volumes exclusive of documents;

(D) list of periodicals;

(E) List of reference books;

(F) List of instructional media available; and

(G) List of special collections.

(b) Institutions that do not maintain an on-site library shall furnish evidence that provisions have been made for faculty and student access to adequate library services.

(9) Entrance Requirements. Entrance requirements for post-secondary degree studies shall include graduation from a secondary school or its equivalent or such other requirements as are generally employed by institutions offering similar degrees.

(10) Educational Credentials:

(a) Upon satisfactory completion of educational or training and the payment of all tuition and fees owed by the student to the institution, the student shall be given appropriate educational credentials by the institution indicating that the course or courses of instruction or study have been satisfactorily completed by the student.

(b) In addition, for each student who graduates or withdraws, the institution shall prepare, permanently file, and make available a transcript that specifies all courses completed, provided that all tuition and fees owed by the student to the institution have been paid. Each course entry shall include a title, the number of credits awarded, and a grade. The transcript shall separately identify all credits awarded by transfer and for prior learning experience, correspondence courses, and credit by examination.

(11) Records:

(a) In addition to the transcript requirement provided for under section (10), the institution shall maintain adequate records to document the performance and progress of each student. The records and accounts pertaining to each period of

enrollment of each student shall be kept intact and in good condition by the educational institution for a period of at least three years following the termination of such enrollment period.

(b) The records to be retained shall include, but not necessarily be limited to, any of the following information that does not appear on permanently filed transcripts:

(A) Records and accounts which are evidence of tuition and fees charged to and received from or on behalf of all students.

(B) Records of previous education or training of students at the time of admission and records of credit, if any, granted by the institution at the time of admission.

(C) Records of the student's grades and progress.

(D) Individual instructor's class records.

(E) Records of interruption for unsatisfactory progress or conduct.

(F) Records of refunds of tuition, fees, and other charges made to the student.

(c) Institutions shall maintain and have available for inspection for a period of three years following their use complete records and copies of all advertising, sales, and enrollment materials used by or on behalf of the institution.

(d) If any educational institution proposes to discontinue its operation, the chief administrative officer of the institution shall file with the Oregon Educational Coordinating Commission the original or legible true copy of all such information as is customarily required by colleges when considering students for transfer or advanced study, including but not necessarily limited to, all records required in section (10) and subsection (a) of this section. In the event it appears to the Commission that any such records of an educational institution discontinuing its operations are in danger of being destroyed, secreted, mislaid, or otherwise made unavailable to the Commission, the Commission may seek a court order to protect and, if necessary, take possession of the records. The Commission shall select at appropriate permanent location for such records.

(12) Advertising:

(a) The institution and its agents shall not utilize advertising of any type which is false or misleading, either by actual statement, omission, or insinuation.

(b) References to accreditation will be limited to accreditation currently held by the school through nationally recognized accrediting agencies as listed by the United States Department of Education.

(c) When an institution advertises that it is accredited it must identify the accrediting agency.

(d) An institution shall have records available to document any statements made through its advertising including salary and placement claims.

(e) An institution shall not advertise that it is in any way licensed, endorsed, recommended, approved, or accredited by the Oregon Educational Coordinating Commission.

(f) The insitution shall provide students and other interested parties with a brochure or catalog. The brochure or catalog must be revised and published at least every two years.

The following may be included in the brochure or catalog: "This institution has met the requirements of the Oregon Educational Coordinating Commission to grant degrees."

If any of the following items of information are not included in the catalog or brochure, it shall refer to other specific documents containing the omitted information:

(A) Name and address of the school;

(B) Date of publication;

(C) Admission requirements and procedures;

(D) A statement of tuition and other student charges related to enrollment such as deposits, fees, books and supplies, tools and equipment, and other charges for which a student may be responsible. This information may be presented as an addendum or insert to the main publication;

(E) A description of the extent and nature of part-time or full-time job placement assistance, if any, available to students or graduates;

(F) Specifics describing the availability of student housing, counseling and other student services, if any;

(G) A school calendar including beginning and ending dates of classes and programs, holidays, and other dates of importance;

(H) A statement of the objectives of the institution;

(I) A list of all institutional administrators and faculty members, including their titles and academic qualifications;

(J) A statement of institutional policy relative to standards of progress required of the student. This policy shall describe the grading system of the school, the minimum grades considered satisfactory, conditions for interruption for unsatisfactory grades or progress, a description of the probationary period, if any, and conditions for re-entrance for those students dismissed for unsatisfactory progress. A statement shall be made regarding progress records kept by the institution and furnished to the student;

(K) A statement of institutional cancellation and refund policy;

(L) A description of the available space, facilities and equipment;

(M) A description of the objectives, requirements, and length of each program offered.

(N) For each program or field of study that prepares students for a licensed or certified occupation, a statement that indicates whether or not the appropriate agency or association recognizes the program for purposes of licensing or certification in that occupation. For all such programs, this information must be provided at the beginning of each program description in the catalog, brochure, and supplementary publications.

(O) Policy and procedures relative to the granting of credit for prior learning if offered.

(P) A statement explaining the arrangements, or lack thereof, for transfer of the institution's credits to other institutions.

(Q) A description of the types of financial assistance available to students enrolled in the institution.

(R) Any other material facts concerning the school and the instruction which are reasonably likely to affect the decision of the potential student;

(13) Credit for Prior Learning:

(a) Institutions awarding credit for prior learning shall have clearly state policies relating to administrative responsibility, student eligibility, means of assessment, recording of results and transcripts, storage of documentation, student fees and maximum number of credits allowable.

(b) Credit for prior learning normally should be awarded in subject matter fields in which the institution offers comparable courses or curriculum and has available faculty expertise or where nationally validated examinations or other procedures for establishing credit equivalency can be relied upon. However, credit may be accepted when appropriately evaluated through contractual or other means.

(c) Systematic and rigorous procedures for assessing prior learning shall be used. They shall insure that learning is carefully articulated, documented, and measured in the context of the role of the institution and the educational objective of the student. Requirements must be specific that each student must demonstrate the learning achieved before credit is awarded.

(14) Requirements for all Associate, Baccalaureate and graduate degrees shall provide for an appropriate balance of credits between those earned in the major discipline and in general education. These requirements shall be in keeping with those generally employed by institutions offering similar degrees.

(15) Cancellation and Refund Policy. The institution shall maintain a fair and equitable policy in reference to refund of the unused portion of tuition fees and other charges in the event the student fails to enter the course, or withdraws at any time prior to completion of the course. Such a policy shall be in keeping with generally accepted practices of institutions of higher education.

(16) Other Information. The applicant shall provide any other information about the institution and its programs required by the Commission.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Review Procedures

583-30-040 (1) The Commission may send a representative or an examining or evaluation committee to inspect any institution of learning subject to ORS 348.835. The examining committee shall be comprised minimally of a Commission staff reviewer, or a designee; an institutional representative of a college accredited by the Northwest Association of Schools and Colleges; and a third party drawn from the general professional field of the institution undergoing review. In those instances in which a representative of the Commission or an examining committee has been assigned to inspect an institution, the representative's or committee's report shall be submitted as part of the documentation necessary for Commission action.

(2) In lieu of a review in accordance with part of the standards used by the Commission as listed in OAR 583-30-035, the Commission may acknowledge the adequacy of accreditation by an association recognized by the United States Department of Education.

(3) Final action for approval by the Commission will be held open to the public and the applicant institution shall be invited to attend.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 26, f. & ef. 6-8-77; ECC 2-1980, f. & ef. 4-14-80

Revocation of Approval

583-30-045 Approval obtained under ORS 348.835 may be revoked for proper cause by the Commission at its discretion, after a hearing. Such hearing shall be held only after the institution of learning involved has been given 20 days' notice in writing of the time and place of such hearing.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75

AMENDED

IN THE HOUSE BY FURNACE

HOUSE BILL NO. 389

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the regulation of real estate brokers and salesmen."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.88.071(a)(3) is amended to read:

(3) after hearing, have the authority to reprimand a licensee or suspend or revoke the license of a licensee who

(A) with respect to a real estate transaction

(i) made a substantial misrepresentation;

(ii) made a false promise likely to influence, persuade, or induce;

(iii) in the case of a real estate broker, pursued a flagrant course of misrepresentation or made a false promise through an agent, associate real estate broker, or real estate salesman;

(iv) has engaged in conduct that is fraudulent or dishonest;

(v) violates AS 08.88.391;

(B) procures a license by deceiving the commission, or aids another to do so;

(C) has engaged in conduct in which the commission had no knowledge at the time the licensee was licensed demonstrating the licensee's unfitness to engage in the business for which the licensee is licensed;

(D) knowingly authorizes, directs, connives at or aids

in publishing, distributing, or circulating a material false statement or misrepresentation concerning the licensee's business or concerning real estate for sale in the licensee's business in this or any other state;

(E) if a real estate broker, wilfully violates AS 08.-88.171(d) or 08.88.291;

(F) if an associate real estate broker, claims to be a real estate broker, or, if a real estate salesman, claims to be a real estate broker or associate real estate broker;

(G) if a real estate broker, employs an unlicensed associate real estate broker or real estate salesman;

(H) if an associate real estate broker or real estate salesman, fails immediately to turn money collected in a real estate transaction over to the employing real estate broker;

* Sec. 2. AS 08.88.071(a)(3) is amended by adding a new subparagraph to read:

(I) violates a provision of this chapter;

* Sec. 3. AS 08.88.091 is amended by adding a new subsection to read:

(b) The commission may charge a fee for informational material published under this section to a person or organization that obtains more than five copies of the publication. The charge may not exceed the cost of publishing the copies and no charge may be required for the first five copies obtained.

* Sec. 4. AS 08.88.161 is amended by adding a new paragraph to read:

(9) for compensation, manage commercial or residential ~~real estate~~ homeowners association, condominium association, or similar organization.

* Sec. 5. AS 08.88.251(a) is amended to read:

(a) A licensee with active status [PERSON LICENSED BY THE COMMISSION] may obtain [BECOME] inactive status by completing [RETURNING

TO THE COMMISSION THE PERSON'S LICENSE CERTIFICATE AND] a form provided by the commission and submitting the form with the required fee to the commission. In the form, the licensee [PERSON] shall state the date on which the licensee [PERSON] intends to become inactive. The licensee's [PERSON'S] inactive status begins on the date stated. [THE COMMISSION SHALL ISSUE THE PERSON AN INACTIVE LICENSE CERTIFICATE.]

* Sec. 6. AS 08.88.251(c) is amended to read:

(c) A licensee with [PERSON WHO IS] inactive status may obtain [BECOME] active status by applying for [AN] active status with the commission [LICENSE] and paying the required fees. In the application form the licensee [PERSON] shall state the date on which the licensee [PERSON] intends to become active. The licensee's [PERSON'S] active status begins on the date stated. [THE COMMISSION SHALL SEND THE PERSON A LICENSE CERTIFICATE.] A licensee [PERSON] is entitled to change from an inactive to an active status without examination if the licensee [PERSON] has not been inactive more than three years. If the licensee [PERSON] has been inactive more than three years, the licensee [PERSON] is required to take an examination.

* Sec. 7. AS 08.88.291 is amended to read:

Sec. 08.88.291. LOCATION. A licensed real estate broker shall register with [INFORM] the commission [OF] the broker's principal office and [OF] any branch offices the broker maintains by completing and submitting a form provided by the commission [HAS]. The broker and each person with a license issued under this chapter who [THE ASSOCIATE REAL ESTATE BROKERS AND REAL ESTATE SALESMEN] the broker employs may do business only from [IN OR OUT OF] the broker's principal or branch [OFFICE AND THE BROKER'S BRANCH] offices. Failure of a real estate broker to maintain a place of business or inform the commission of its location and the names and addresses of all li-

censees employed by [UNDER] the broker [BROKER'S JURISDICTION] at the location are grounds for the suspension or revocation of the broker's license.

* Sec. 8. AS 08.88.331 is amended to read:

Sec. 08.88.331. MAKING OF TRANSACTIONS. A real estate salesman or associate real estate broker may make a real estate transaction only through the real estate broker who employs the real estate salesman or associate real estate broker. All money collected on behalf of the broker shall immediately be turned over to the broker or the broker's agent. All transactions in real estate by a real estate salesman or associate real estate broker shall be processed through the real estate salesman's or the associate real estate broker's employing real estate broker's office and shall be supervised by the real estate broker, whether the transactions are for the real estate salesman's or associate real estate broker's own use or the use of a client.

* Sec. 9. AS 08.88.351 is amended by adding a new subsection to read:

(b) The records required under this section of transactions that are for the broker or an employee of the broker shall be similar to and as complete as records of transactions for clients.

* Sec. 10. AS 08.88.421 is amended by adding new paragraphs to read:

(11) the developer of commercial or residential ~~real estate~~ condominium when acting as manager of the ~~real estate~~ A condominium ASSOCIATION;

(12) a member of the board of directors of a homeowner's association, condominium association, or similar organization when managing the real estate in the course of performing duties as a member of the board of directors.

* Sec. 11. AS 08.88.455(a) is amended to read:

(a) A licensed real estate broker, [OR] associate broker, or

$125.00

salesman when obtaining or renewing a real estate license, in lieu of obtaining a corporate surety bond, shall pay to the commission in addition to the license fee, a bond fee not to exceed $125 [, AND A LICENSED SALESMAN, WHEN OBTAINING OR RENEWING A LICENSE, IN LIEU OF OBTAINING A CORPORATE SURETY BOND, SHALL PAY TO THE COMMISSION IN ADDITION TO THE LICENSE FEE, A BOND FEE NOT TO EXCEED $40]. After the fund reaches $250,000 the commission shall by regulation adjust the bond fees so that, taking into account anticipated expenditures for claims against the fund and real estate educational purposes, the fund is maintained at a level not less than $250,000.

* Sec. 12. AS 08.88.460 is amended by adding a new subsection to read:

(c) A claimant under this section shall pay a filing fee of $100 to the commission at the time the claim is filed. The filing fee shall be refunded if the commission makes an award to claimant from the real estate surety fund.

* Sec. 13. AS 08.88.261 is repealed.

C.J.S., Brokers, §§ 6-24.

Sec. 08.88.161. License required. Unless licensed as a real estate broker, associate real estate broker, or real estate salesman, a natural person, foreign or domestic corporation, or partnership, or limited partnership, or other entity may not

(1) sell, exchange, rent, lease, auction, or purchase real estate;

(2) list real estate for sale, exchange, rent, lease, auction, or purchase;

(3) collect rent for the use of real estate;

(4) as a business, buy, sell, or deal in

(A) options in real estate; or

(B) options in improvements to real estate;

(5) assist in or direct the procuring of prospective buyers or the negotiation of a transaction which results or is calculated to result in the sale, exchange, rent, lease, auction, or purchase of real estate;

(6) hold out to the public as being engaged in the business of doing any of the things listed in this section;

(7) attempt or offer to do any of the things listed in this section.

(8) Repealed by § 4, ch. 28, SLA 1982. (§ 1 ch 95 SLA 1964; am § 321 ch 108 SLA 1970; am § 324 ch 28 SLA 1974)

Cross references. — As to activities in aid of housing for minority groups, see AS 18.80.215.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.88.171. Entitlement to license. (a) A person is entitled to a real estate broker license if the person is a resident of the state, if the person passes the real estate brokers examination, if the person applies for a license within six months after the person has taken the real estate brokers examination, if the person has had at least 24 months of active and continuous experience as a licensed real estate salesman, if the person is not under indictment for, or seven years have elapsed since the person has completed a sentence imposed upon conviction of, forgery, theft, extortion, conspiracy to defraud creditors, or any other felony involving moral turpitude, and if the person is an owner of a real estate business or employed as a real estate broker by a corporation or a partnership, and if that corporation or partnership does not have an existing licensed broker. Unless the broker fails to pay the biennial renewal fee or unless the broker's license is suspended or revoked under AS 08.88.071(a)(3), the real estate broker's license continues in

Sec. 08.88.431. Definitions. In AS 08.88.011 — 08.88.500

(1) "real estate" means an interest or estate in land, corporeal or incorporeal;

(2) "commission" means the Real Estate Commission;

(3) Repealed by § 42 ch 167 SLA 1980.

(4) "lease" includes a lease that is a part of another transaction.

(5) "resident manager" means a person who resides on real property and manages it for the benefit of another person. (§ 1 ch 95 SLA 1964; am § 58 ch 218 SLA 1976; am §§ 32, 2 ch 167 SLA 1980)

Effect of amendments. — The 1980 amendment repealed paragraph (3), and added paragraph (5).

Article 4. General Provisions.

Section
421. Exceptions
431. Definitions

Sec. 08.88.421. Exceptions. AS 08.88.011 — 08.88.500 do not apply to

(1) a person who is not licensed under AS 08.88.011 — 08.88.500 who makes a real estate transaction with respect to real estate he owns or on his own behalf, unless the transaction involves land defined in AS 34.55.044(6) which is not in Alaska;

(2) an attorney in fact under a power of attorney authorizing the consummation of a specific real estate transaction; an attorney in fact may not act as such for more than two transactions in a calendar year;

(3) a lawyer performing his duties as a lawyer;

(4) a public official in the conduct of his official duties;

(5) a person acting as receiver, trustee, administrator, executor, or guardian;

(6) a person acting under court order;

(7) a person acting under the authority of a will or trust instrument;

(8) a person dealing in mineral rights transactions;

(9) each of the following:

(A) a domestic or foreign corporation, or a general or limited partnership; or

(B) a partner or regular employee of a domestic or foreign corporation or a general or limited partnership, when performing an act described in AS 08.88.161 in the regular course, or as an incident to, the management, sale or other disposition of real estate owned by the corporation or partnership; the exemption provided in this subparagraph does not apply to a person who performs an act described in AS 08.88.161 either as a vocation or for compensation if the amount of the compensation is dependent upon or directly related to the value of the real estate with respect to which the act is performed.

(10) a resident manager of rented real estate if his duties are limited to the negotiation of leases and rental agreements and the collection of rent for the use of the real estate and if he is

(A) employed by the owner of the real estate; or

(B) employed by, or engaged under contract with, a licensed real estate broker. (§ 1 ch 95 SLA 1964; am § 1 ch 38 SLA 1969; am § 19 ch 28 SLA 1974; am §§ 29—31 ch 167 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "who is not licensed under AS 08.88.011 — 08.88.500 who makes" for "making" near the beginning of paragraph (1), added "which is not in Alaska" at the end of paragraph (1); in paragraph (9), restructured the paragraph into present subparagraphs (A) and (B), added the introductory phrase, "each of the following", inserted "or a" preceding "general" in subparagraph (A), substituted a semicolon for a comma following "limited partnership" at the end of subparagraph (A), substituted "a domestic or foreign corporation or a general or limited partnership" for "one of these," and "an act" for "acts", deleted "however" following "the corporation or partnership", inserted "exemption provided in this subparagraph does not apply to a", and substituted "who performs an act described in AS 08.88.161 either" for "may not perform these acts", all near the middle of subparagraph (B), and substituted "act is" for "acts are" at the end of subparagraph (B); and added paragraph (10).

FISCAL NOTE ANALYSIS OF HB 389

The surety fund is a self-sustaining fund not supported by general revenues. Fees are set by regulation, up to a maximum statutory limit, to cover expenditures and appropriations from the fund. The fund is currently showing a slight negative balance between revenue and expenditures.

Licenses issued and renewed remains the same as currently is the case.

This bill raises the maximum surety payment by salesmen to $125.00 which is what brokers currently pay.

These fees are for surety fund and educational programs only. The actual fees will be set by regulation to cover the expenditures of the fund. It is estimated that the actual fee will be $100.00 The estimated increase in revenue is $123,250 per year. In the event that heavy losses due to claims should deplete the fund, the fees could be adjusted to bring in (at current licensee numbers) 337,500 per year - an increase of 191,250 over current revenues.

CALCULATIONS OF REVENUES

Based on 2500 salesmen and 700 broker renewals plus 2000 new salesman licenses and 200 new broker licenses per biennium.

Current Revenues ($40 per salesman, $125 per broker)

Salesman Renewals	$100,000
Broker Renewals	87,500
New Salesmen	80,000
New Brokers	25,000
	$292,500/biennium
	$146,250/annualized

Projected Revenues @$100 uniform fee
- $540,000/biennium
- $270,000 annualized
- $123,750 annualized increase

Projected Revenues @$125 (the maximum) uniform fee
- $675,000/biennium
- $337,500 annualized
- $191,250 annualized increase

MEMORANDUM State of Alaska

TO: Kenneth C. Moore
Director, Division of Insurance

DATE: May 26, 1983

FILE NO:

TELEPHONE NO:

FROM: Jim Jordan
Insurance Market Analyst

SUBJECT: HB 426 - comments

In the most part, the bill as introduced is substantially the same as my original draft. Some re-ordering was done but does not change the substance. However, I would recommend that four changes be made. Two of the changes, if not made, would make no difference in the meaning but are suggested to add more clarity. However, the other two suggested changes need to be made.

Suggested Amendments

1. p. 1., line 10; immediately following the word "A" add the word "group". (Not critical but would add more clarity.)

2. p. 1., line 14; following the word "unions" add the following words ", or by one or more employers and labor unions".

   (This is a necessary change to recognize the combination of employers and labor unions which represent the employees of that employer(s).)

3. p. 1., line 18; between the words "insurability" and "imposed" insert the words "as may be".

   (This is not critical but it adds more clarity. Without the amendment, it might appear that an insurer must apply evidence of insurability standards. Many group life contracts are issued without any requirements that evidence of insurability or good health be provided for each group member. It is a basic tenet of group insurance that with a large enough group of insureds a sufficient spread of risk is realized, thus obviating the necessity of individually, medically underwriting each person. I don't believe we want to impose this on the public or insurers when it is an actuarially sound principal.)

4. p. 1., line 28; change the cite "AS 21.48.070" to the correct cite "AS 21.48.170".

   (This is a necessary change. The citation in HB 426 is incorrect.)

HB 426 leaves in the specific criteria for debtor groups (AS 21.48.060) and for credit union groups (AS 21.48.070). The original draft did the same thing. This was done because of the unique nature of these types of groups and their specific relationship to AS 21.57. This is particularly the case for debtor groups.

I am attaching a marked up copy of HB 426, which includes the suggested amendments, as well as copies of my memoranda of November 26, 1982 to you and of May 18, 1983 to Jeff Day, and of my original draft.

Introduced: 5/25/83
Referred: Labor & Commerce

IN THE HOUSE BY HAYES

HOUSE BILL NO. 426

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to group life insurance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.48.010(a) is amended to read:

(a) A group [NO] life insurance policy may not be delivered in this state insuring the lives of more than one individual unless

(1) the policyholder was formed for purposes other than obtaining insurance, or is a trust established by one or more employers or labor unions; or by one or more employers and labor unions

(2) the policy covers at least two individuals at the date of issue;

(3) an individual eligible for coverage is subject to uniformly applied standards of insurability imposed by the insurer; as may be

(4) amounts of group life insurance are determined based on some plan that will preclude individual selection; and

(5) the group life insurance contract is in compliance with the other applicable provisions of this chapter [DELIVERED TO ONE OF THE GROUPS AS PROVIDED FOR IN SECS. 20 - 60 OF THIS CHAPTER, AND UNLESS IN COMPLIANCE WITH THE OTHER APPLICABLE PROVISIONS OF THIS CHAPTER].

* Sec. 2. AS 21.48.010 is amended by adding new subsections to read:

(c) Insurance under a group life insurance policy may be extended to insure dependents. Notwithstanding AS 21.48.070, 170 only one certificate need be issued for delivery to an insured person if a

statement concerning a dependent's coverage is included in the certificate.

(d) In this section, "dependents" means the spouse and dependent children of an employee or member of the group.

* Sec. 3. AS 21.48.020 - 21.48.050 and AS 21.48.090 are repealed.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

MEMORANDUM State of Alaska

TO: Kenneth C. Moore, Director

DATE: November 26, 1982

FILE NO:

TELEPHONE NO:

FROM: Jim Jordan

SUBJECT: Group Life Insurance
Proposed Legislated Changes

Attached, please find the draft of the Act which amends AS 21.48, Group Life Insurance.

The proposed amendments to AS 21.48 accomplish the following:

1) The definition regarding who constitutes a duly formed group for the purposes of group life insurance is liberalized;
2) The ceiling on amounts of group life insurance for dependents is removed;
3) The group definitions applicable to group disability insurance contracts are indirectly liberalized pursuant to AS 21.54.060(4);
4) The provisions requiring some premium contribution by an employer/policyholder are eliminated; and
5) AS 21.48.060, debtor groups, and AS 21.48.070, credit union groups, remain intact and unchanged due to their unique character and relationship to credit life and credit disability (AS 21.57).

Of course, the underlying intent of the proposal is to provide for expanded availability of group life insurance. Conceiveably, a broader based portion of our population will have expanded means of acquiring life insurance coverage on an economical basis.

In my opinion, this proposal will not require increased appropriations for administration. In fact it may result in increased premium tax revenue. Master group contracts heretofore delivered in other states, covering Alaskan residents, in order to circumvent unfavorable provisions in our law, may, in the future, be issued in this state. By so doing, taxable, Alaska premiums could increase.

It should be noted that some unfavorable federal income tax implications could arise in the area of dependent group life. For amounts of dependent group life insurance provided by an employer in excess of $2,000, the premiums paid by the employer for such coverage would be taxed as income to the employee.

Opposition, if any, to this proposal would most likely come from the life insurance agent specializing in the sale of individual life insurance products. This opposition would be primarily "protectionist" in nature and easily countered.

Let me know if you would like to discuss this proposal in greater detail.

MEMORANDUM State of Alaska

TO	Mr. Jeff Day Assistant to the Speaker	DATE:	May 18, 1983
THRU:	Kenneth C. Moore Director of Insurance	FILE NO:	
THRU:	Richard Lyon Commissioner of Commerce & Economic Development	TELEPHONE NO:	
FROM:	Jim Jordan Insurance Market Analyst III	SUBJECT:	Proposed Group Life Insurance Legislation

Per our telephone conversation of May 10, 1983, the following will serve to explain certain defects in the current law which the proposed legislation is intended to rectify.

AS 21.48.010-230 set forth the various criteria regarding group life insurance. Similarly, AS 21.54.010-070 sets forth the criteria which apply to group disability insurance. Each of these chapters respectively establishes what types of entities or collections of persons constitutes a duly formed group. It is only these defined entities that may have a group master contract issued to it within the state. Most frequently, group life insurance and group accident and health insurance is marketed and issued as a "package".

AS 21.48 is constructed to define those eligible groups of persons within very narrow parameters. Conversely AS 21.54 is constructed so that a broader range of entities form duly constituted groups. In other words, it is possible for some types of groups to be proper groups for the purposes of group accident and health but not be eligible for group life insurance. An example of this situation is an "association" group for which group accident and health coverage may be legally written (AS 21.54.060(2)) but may not be eligible for group life insurance (AS 21.48.040).

This holds true for associations that are comprised of members who may not be necessarily employers. Examples of such associations could be bar associations, medical associations, pilots associations, or commercial fishermans associations. When interested in obtaining group insurance coverages, these types of associations are able to obtain coverage. This is accomplished by joining other associations outside of Alaska that have such coverages provided via group master contracts delivered in other jurisdictions. Alaska's insurance laws do not extend extra-territorially, so residents covered under these arrangements lose, to a certain degree, the local regulatory protection. (However, they may go to the insurance department in the state in which the master contract is delivered for consumer assistance.) Additionally, such arrangements may also result in less premium taxes being collected in Alaska.

AS 21.48.090 imposes maximum amounts of group life insurance which may be extended to the dependents of covered employees or members of a group. The amount is scheduled and increases by the age of the family member from $100 at under the age of 6 months to a maximum of $2,000 at

ages 5 years and older. These amounts were established by law in 1966 and certainly inflationary pressures alone would dictate the maximum amounts of coverage be increased. The proposed language would remove all maximums. Group insurance is primarily an employee benefit and may be subject to collective bargaining. It was felt that the insurance laws should not impose any artificial barriers in the negotiation or determination of employee benefits. Again, an employer may provide amounts of dependents group life insurance greater than that allowed by Alaska law by joining a multiple employer trust located in state allowing higher amounts. (We know this has been done.) Many states exist which have no such maximum for dependents group life insurance. One of the reasons for limiting the amount of dependent group life to $2,000 is due to federal income tax implications. In the situation where an employer pays the entire premium for dependents group life insurance, the IRS has ruled that so long as the coverage amount is incidental, no additional taxable income is incurred by the employee. The amount determined by the IRS as being incidental is up to a maximum of $2,000. (The same holds true for the amounts of group life insurance provided to employees except that no federal income tax liability accrues until the amounts of coverage exceeds $50,000.)

In general, AS 21.48 requires that the premium can not be entirely paid by employee contributions. The proposed language removes this requirement. This change was included for several reasons. First, an employer can in effect make this meaningless by contributing only 1¢ toward the premium cost for each employee. Second, some employee benefit programs contain a basic amount of group life insurance paid for entirely by the employer and an optional amount paid for entirely the employee. Current construction of AS 21.48 forces such coverages to be underwritten by one insurer in one master group contract. This may impede competition to a certain degree, particularly for larger employers. An example of this could be the State of Alaska plan for its employees where the various segments of the benefit package go out to competitive bid. One insurer may submit the lowest bid for the optional group life but may not be the lowest bidder on the basic group life. Therefore, the state could not award the contract for the optional group life to that insurer who is the lowest bidder and award a separate contract to another insurer who was the lowest bidder on the basic group life. Third, again,, an employer may circumvent this situation by joining an association or multiple employer trust sitused in another state. Last, AS 21.54 imposes no such requirement for group accident and health coverages.

It is felt that the proposed changes would help facilitate the extension of life insurance protection to a broader section of our population with no material loss in regulatory protection. Typically, group insurance is less costly than individual insurance contracts due to the administrative economies realized. Therefore, this proposal should help to provide a broader base of coverage at a cost more beneficial to the Alaskan resident.

Also, for your information, the proposed language is patterned after Colorado's group life law.

Please let me know if I may be of any further assistance.

Sincerely,

James J. Jordan
Insurance Market Analyst

MAY 4, 1984

TO: JOHN

FROM: KEN

RE: HB 457 " MAKING AN APPROPRIATION TO THE IDITAROD TRAIL COMMITTEE.

HB 457 WAS FIRST INTRODUCED AS AN APPROPRIATION TO THE IDITAROD TRAIL COMMITTEE AS A GRANT FOR THE 1984 RACE. BY REQUEST OF THE SPONSORS, THE AMOUNT OF THE GRANT HAS BEEN INCREASED FROM 65 THOUSAND TO 72 THOUSAND AND THE DIRECTED TOWARD NEXT YEARS IDITAROD. THE TRAIL COMMITTEE HAS SUPPLIED A BRIEFING PAPER EXPLAINING HOW THE MONEY WOULD BE USED.

IDITAROD TRAIL COMMITTEE, INC

May 1, 1984

Mr. Ken Johnson
Administrative Assistant, Rep. John Cowdery
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Johnson,

Enclosed is a complete breakdown of our request for funding for the 1985 Iditarod Trail Sled Dog Race, classified under HB 457.

We appreciate the State's assistance in the past, as without it I don't believe Iditarod could have grown to be the international spectacle it has become.

A fact that should interest you is that data was gathered during this year's Race for a professional research firm which has volunteered its services to prepare an economic impact study for us. Rough estimates indicate that we generate around $3,000,000 in additional revenue for the State, alot of that benefitting the communities we pass through. A final accurate report should be completed by early next year.

Your assistance in the passage of HB 457 is greatly appreciated.

Sincerely yours,

Greg Bill

Greg Bill
Executive Director

GB/jp
Enclosure

Pouch X, Wasilla, Alaska 99687 — (907) 376-6166

1985 Iditarod Sled Dog Race Request

1. Trail

Each year ITC breaks and marks the Iditarod Trail from Settler's Bay to Shageluk or Ruby. We must find volunteers to complete, at cost, this project. Many different groups use the trail when it is opened. We need monies for machine rentals, expenses, gas, food, labor, and markings.

$14,000

2. Dog Care and Treatment

Last year over one thousand (1000) dogs left Fourth Avenue in Anchorage. About 700 arrived in Nome. All up the trail we have Veterinarians stationed to care for the dogs. Each Veterinarian has medication and equipment to treat emergencies and to preform autopsies if necessary. They also help the mushers keep their teams in top health. Veterinarians also check for illegal drugs, sending the samples to Cornell University for analysis. For Veterinarian expenses (food, lodging, transportation), medical supplies, autopsies, and sample analysis.

$13,000

3. Iditarod Air Force

Each year Aviation Insurance cost raises. The Iditarod Trail Committee must be protected, so we take out this Insurance for a month and a half. We purchase gas and oil for our planes on the trail. This does put money in the local economy. We request funding for pilot expenses (food, lodging) gas, oil, and Aviation Insurance.

$20,000

4. Liability Insurance

We must have protection for spectators, municipalities, Bureau of Land Management, our volunteers, and Iditarod Trail Committee. Our dog truck is also insured.

$ 8,000

5. Brochures and Press Packets

Because of increasing race exposure, we are getting more requests, year round, for information on Iditarod. We would like to put together an "Amateur's Guide to Iditarod". This would include the whys, whens, and how comes of the Iditarod Sled Dog Race. For the press packets we try to provide them with interesting information and facts about the race. We also inform the uninformed the trials and tribulations of traveling up the trail.

$ 5,000

6. Race Personnel Identification

With all the spectators and press following the race, it is hard to identify our race personnel. Not only is it confusing for mushers, but many times we end up with unauthorized charges on our accounts.

$ 2,000

7. Office Equipment and Expenses

The cost of operating our office year round is expensive. We would like to include general office supplies in this request.

Also included is one (1) word processor and one (1) electric typewriter.

$10,000

TOTAL REQUEST $72,000

CURRENT LINE

Vol. 4, No. 5 Palmer, Alaska

MATANUSKA ELECTRIC ASSOCIATION, INC.

January 20, 1983

FROM THE BOARD ROOM

In its regular meeting of January 11, 1983 the Board of Directors took the following action:

*approved a contract with D. A. Vaughn Company, Real Estate Investors of Eagle River to market the unused Eagle River building and land.

*approved the Association's new Equity Management Plan which will see capital credits retirement checks mailed this year for the first time in MEA history.

*agreed to meet January 25 in a special meeting to consider the rate design and Annual meeting items. The APUC has given the Association a February 15 deadline for action on rate design.

*appointed the 1983 nominating committee. Committee members are: Don Savage, 376-4719; Linda Olson, 745-3355; Dorothy Jones, 733-2395, E. L. "Turk" Mayfield, 495-6413; Dale Briggs, 694-2311; Lorry Pollock, 745-4036; and Mac Stevens, 733-2281.

*approved the write-offs of uncollectable accounts for December making the total for 1982 $68,448.79.

*declined to approve the removal of Director Sandvik from the Board of Directors as requested by Director Staudenmaier.

*set the next regular meeting of the Board as Tuesday, February 22, 1983 at 7:00 p.m.

PERSONNEL POINTERS

"Your Indirect Paycheck" for 1983

This information is intended to give you an idea of what MEA pays its nonunion personnel in addition to your salary. This "indirect paycheck" very often goes unnoticed and as a result, unused. They represent a real part of your total compensation which you should be aware of.

For purposes of conceptualizing these programs, an exempt employee was imagined who has worked four years at MEA, and makes $30,000 per year. All variations were excluded, such as overtime, salary increases, program changes, price increases or decreases, etc. Exact percentages and figures will vary. If you would like to know what your figures would be, Personnel would be happy to compute them for you.

PROGRAM	RATES ON $30,000 SALARY	ANNUAL $ AMOUNT IN ADDITION TO AN EMPLOYEE'S BASE SALARY OF $30,000
1. NRECA Retirement Pays 2% X salary X # of years worked	16.8%	$ 5,040
2. Required Employer Costs		
A. FICA: Social Security costs 6.7% of wages up to $35,700	6.7%	$ 2,010
B. FUTA: Federal Unemployment insurance costs .7% of wages up to $6,000 =$42.00 ÷ $30,000 =	.14%	$ 42
C. Alaska Unemployment Insurance costs 1.66% on wages up to $20,000 = 335 ÷ $30,000 =	1.12%	$ 335
D. Workmen's Comp Insurance for exempt employees costs .69% of 1st $400 of weekly wages: $400 X 52 X .0069 = 144 ÷ $30,000 =	.48%	$ 144

ERS (continued from page 2)

3.	Alaska Public Utility Insurance Trust Group health plans includes health, vision, dental & dependents life insurance	7.32%	$ 2,197
4.	NRECA Long Term Disability Pays 50% of your salary while disabled	1.31%	$ 393
5.	NRECA Savings Plan MEA required payments	1.00%	$ 300
6.	NRECA Life and AD&D Pays 2X salary	.82%	$ 246
7.	MEA Self-Insured Short-Term Disability Pays $75 per week for 13 weeks. Present cost unknown but would have averaged in the past about .14% for this employee.	.14%	$ 42
8.	Miscellaneous Benefits Employee training, physical exams, jury duty, etc. are estimated to be at least 1%	1.00%	$ 300
	TOTALS	36.83%	$11,049

$11,049 ÷ $30,000 = 36.83% means MEA pays 36% in additon to this employee's wage.

Annual Leave While payments for time away from work won't increase the amount paid to this employee, such payments significantly increase overall costs. If this employee was a temporary employee, not eligible for leave, this benefit could be valued as follows:

MEA 4 year leave accrual rate = 24 days X 8 hours = 192 hours per year. $30,00 ÷ 2080 = 14.42 hours X 192 = $2,769.21 ÷ $30,000 = 9.23%

PERSONNEL POINTERS (continued from page 3)

This means annual leave could be valued by this employee at $2,769 per year and constitutes approximately 9.23% of his/her compensation.

Similarly, Holiday Pay could be viewed as follows:

MEA holidays = 11 days per year X 8 = 88 hours per year X $14.42 hourly rate = $1,269 per year ÷ $30,000 = 4.22%. Holiday pay could be considered to constitute 4% of this employee's pay and be worth $1,269 annually.

If you add these percentages to the above figures, (36.83% + 9.33% + 4.22% = 50.38), an employee could consider receiving the equivalent to one-half of his or her salary in the form of employee benefits. The costs for this example would be approximately $15,087.

For a $20,000 per year employee MEA pays an additional $9,042 per year, or 41.3%. When leave is considered the amount is $11,734 or 54.76%.

For a $40,000 per year employee MEA pays an additional $13,537 or 33.85%. With leave considered, the additional amount is $18,921 or 47.31%.

For a $50,000 per year employee MEA would pay $15,645 or 31.27%. When leave is added the amount would be $22,375 or 44.73%.

These figures, when averaged, equal 35.81% or $12,318, without leave or holidays. With leave and holidays added the averages are 49.29% or $17,029.

The buying power of these group benefits significantly increases their value as well. We attempted to price a comparative private group health plan and were given such widely varying rates, (from $400 up per month) that comparisons were impossible. There appears to be no private dental plans available anywhere. Most of these figures are not subject to taxes, thus increasing the value of them substantially.

MEA is pleased to be able to contribute these benefits in appreciation for the skilled and dedicated service received from our all employees. If you have any questions on what these figures mean or how you can obtain the maximum benefit from the varied coverage provided for you, please contact the Personnel Office.

COMMENDATIONS

Please join us in applauding these employees for doing an outstanding job. Their efforts have earned glowing words of praise from our members. We need to give as much attention to compliments as we do to complaints.

Employee	Member Compliments
Bill West, Eng. Tech II	"An A+ in public relations and professional expertise"
Ernie Jameson, General Foreman	"Mr. Jameson was very courteous and helpful"
Larry McDuffey, Foreman Larry Corcoran, Lineman Dennis Illies, Apprentice	"...could not believe how nice everyone had been to him..."
Terry Smith, ROW Agent II	"...thoroughly impressed with the professionalism Terry used in solving the problem.

New employees

Please join us in welcoming these new employees:

John Parker, Manager of Administration will start February 9, 1983.

Joan Bennett and Donna Mathena, Work Experience trainees, who started first week of January.

Adam Heller, Brian Shandler and Sherry Thom, high school trainees in Operations, who started January 17, 1983.

Also new in Operations: three temporary journeymen linemen; Bill J. Parker, Tony Tessaro, and John Donovan. Our new apprentice lineman Mike Hodsdon took Mike Thrasher's spot; he's now a journeyman. New apprentice Lee Stevens fill Larry Schnell's spot. Larry is now attending apprenticeship school.

Retirement Planning Seminar I'm sorry to report that the seminar we had planned for Saturday, January 22nd had to be cancelled. We could not recruit enough participation to cover the fixed expenses. We do hope to reschedule this seminar and we are considering inviting employees from a couple of other organizations so that participation will be higher. Thank you for your interest. Personnel will contact employees again when we have a new date.

To ALL HEA Personnel

A thank you is not enough but ---- thanks to everyone for all your help and support. You're a great bunch of people!!!

Bill

FIRST AID TO BURN VICTIMS

The care of a burn victim depends on the percentage of burned body surface involved. In no instance should grease (butter, lard, vaseline, mineral oil, or other ointments) be applied to a burn. For first and second degree burns:

1. Immerse the burned part in cold water for two to five minutes.
2. Cover the burn with a sterile dressing or clean sheet.
3. Use cool, wet applications for relief of pain.
4. Transport the patient to a hospital.

If the victim has third degree burns, cover the burned area with a sterile dressing or a clean sheet. Use cool wet applications for relief of pain and be prepared to treat the victim for shock. Cover the victim with a blanket and elevate his feet. Get the victim to a hospital as soon as possible.

Joanie's Feline Orphanage Going Out of Business!

Due to overcrowded conditions at home I MUST sever my affectionate association with four of my cattiest friends: FREE TO GOOD HOMES Momma cat, now neutered; Punkin, intact female 8 month old kitten. She's grey and gold like a crazy quilt, but great personality. Also intact female, very pretty Siamese looking, about 6 months old, affectionate and gentle Crystal. Photos are available in the hall outside Personnel. I dread the worst fate for them so if you would ask around, I'd appreciate it. Or better yet, take one yourself, they make wonderful pets.

"...and right now I'm 'specially thankful we've got an automatic 10-cycle all-electric dish-washer."

INTRO TO ELECTRIC UTILITY CIRCUITS

Jim Hall is presently teaching a class on Intro to Electric Utility Circuits each Wednesday from 4-6 p.m. until mid-March. Anyone wishing to attend this class should contact Jim at X66.

NANCY DOLLARD'S CHEESE FILLED COFFEE CAKE

1 pkg. dry yeast
1/4 cup lukewarm water
1 teaspoon honey
1 egg lightly beaten
3/4 cup margarine
2 cups flour
1/4 teaspoon salt

Filling

2 pkgs. (8 ounces each) cream cheese
1/2 cup honey
1/2 teaspoon vanilla
1 teaspoon fresh lemon juice

Mix yeast, water and honey. Let stand for 10 minutes. Add egg. Cut margarine into flour and salt and mix well. Add yeast mixture and blend completely. Divide into 2 balls and roll each into 8 x 10 inch rectangles.

Filling

Combine cream cheese, honey, vanilla and lemon juice. Spread half of filling on each rectangle and fold by taking each long side toward the middle, making sure the sides overlap a little. Fold the ends up about 1 1/2". Bake immediately at 375° for 25 minutes. Serve warm. Makes 10 - 15 servings.

(Nancy was a temporary employee in Consumer Accounts and mailed us this recipe.)

CAR OPERATING COST

Americans spent an average $2,790 last year to operate a car, equal to 34.5 cents a mile for an estimated 8,081 miles traveled, a Hertz Corp. study shows.

- - - - -

December 7, 1982

To: Robert L. Husted, President
Matanuska Electric Association, Inc.

From: Elden Sandvik, Chairman
Board Compensation Committee

Subject: Committee Recommendations

The following are our recommendations regarding MEA's compensation programs and practices.

1) Discontinue the practice of offering exempt employees paid time off in return for overtime hours worked (comp time). We recommend that compensatory time for exempt employees be eliminated and that the General Manager establish appropriate means of alternate compensation for unique circumstances.

2) In order to protect the tax exempt status of the Deferred Compensation program, it needs to be limited to department managers and the General Manager. This change should be made effective on January 1, 1983. Those employees who are in the program as of that date will have "grandfather rights" in the plan. Also effective January 1, 1983, MEA should not prepay an employee's yearly deferred compensation contribution. It should now be paid on a quarterly basis. MEA should continue to pass on its reduced benefit costs to deferred compensation participants using NRECA formulas.

3) The present savings program is structured such that all employees are enrolled in it. We recommend the installation of a participation requirement of a minimum of one (1) percent for the savings plan. This change permits MEA to switch from paying the entire cost at the start of the year to paying throughout the year and should result in a cost savings of approximately $11,550 (per TB&A report). This $11,550 should be applied to offset benefit cost increases resulting from our following recommendations.

4) MEA presently has duplicate employee coverage in life insurance and accidental death and dismemberment programs. Employees presently have two times annual salary in life and accidental death program from NRECA. They also have $2,000 in life insurance and $4,000 in accidental death from Alaska Public Utilities Insurance Trust (APUIT). The APUIT programs are comparatively expensive when compared to their small benefit. APUIT also offers an accident and sickness program which pays $75.00 per week for thirteen weeks in the event of a non-work related injury or sickness. The monthly cost per employee is $5.30 for the above benefits.

It is our recommendation to drop the above APUIT programs and apply the funds to improvements in APUIT's dental coverages as follows:

A)	Increase the annual maximum dental benefit from $1,500 to $2,000; cost $1.07/employee/month.	$1.07
B)	Increase dental coverage from 80% to 90%; cost $4.54/employee/month.	4.54
		$5.61

This represents an increase of $.31 per month per employee ($5.61 - 5.30 = $.31).

It should be noted that the Board of Trustees of APUIT recently increased the vision benefit schedule by ten percent at a cost of $.50 per month per employee.

It is our recommendation that we self-insure the accident and sickness program until an alternate program can be developed. MEA's leave policy presently provides coverage for a portion of this area and NRECA's long-term disability program provides coverage after thirteen weeks. It is our recommendation that we self-insure to the $75.00 level that APUIT provided and utilize the same requirements. It is anticipated that a program can be developed which provides coverages for emergency leave situations for a reasonable cost.

5) MEA incurs an extensive financial unfunded liability when an employee does not utilize their vacation accruals. It is our recommendation we require employees to take at least ten working days off per year and provide a maximum accrual of 60 days.

6) We recommend improving the NRECA Retirement Program in order to increase the rewards for long service to the Association. The improvements are:

   1) Add a cost-of-living allowance which maintains an employee's retirement income at a uniform level regardless of inflation.
   2) Add a thirty year and out or retirement at 62 feature. This means someone starting to work at MEA at age 20 could retire at age 50 or anyone can retire at age 62.

      This program can be made effective on January 1, 1984, and increase costs by about $10,000 or about .5% of payroll. This increase can be offset by the next recommendation.

7) In an effort to save money, the presently distressed Social Security System is now using a strict definition of total disability. A person now has to be unable to do any type of work to be totally disabled. In the past they have used a more liberal definition. MEA's present NRECA Long-Term Disability program pays 50% of an employee's salary. Social Security payments, if any, are added to that 50%. It appears that many of our employees would now be unable to rely on any income from Social Security if they were totally disabled for more than thirteen weeks.

It is our recommendation that MEA select NRECA's LTD program which increases the percentage paid to employees from 50% to 66 2/3%. Social Security payments, if any, would be subtracted from NRECA payments. The most an employee could make while disabled would be 66 2/3% of prior salary to a maximum of $4,500 per month. By selecting the increased rate, many future employees should receive a greater benefit than is now provided.

In those cases when an employee receives money from Social Security, NRECA saves that amount. That potential savings is passed on to MEA in a reduction in LTD rates of about 1.36%. That savings can be applied to the improvements in the retirement plan and other cost increases resulting from our recommendations. Therefore, it can be noted that the overall savings between items six and seven is .86% (.5% - 1.36% = .86%). We recommend this change be made as soon as NRECA programs permit.

8) We recommend MEA adopt the attached October-November 1982 salary survey and the resultant 1983 salary plan. We recommended that the overall organizational comp-ratio for MEA not exceed an average of .98. This does not mean employees will be restricted to this level, but that the General Manager is responsible for assuring that the average comp-ratio for the overall organization does not exceed .98. Fiscal considerations and member realities require MEA to take a conservative approach to its compensation programs. The .98 comp-ratio will also help establish a level of competance required in the activities of the Association employees. This area can be monitored by the Board, as a monthly report will be provided to the Board of Directors.

9) We recommend continuing to use the performance guide presently in use, copy attached for your information. This guide sets possible percentages given to employees who achieve various levels of performance. Increases in these figures cannot be supported by the CPI. Decreases at this time would cause MEA wages to fall behind the prevailing market.

10) We recommend discontinuing immediately lump sum payments for COLA, performance increases, and salary increases. We further recommend no change in policy regarding leave cash-in and commendation awards providing such commendation awards are only considered for extremely unique situations.

11) We also recommend that staff be directed to prepare the necessary policy revisions to implement the above changes as may be approved by the Board of Directors.

cc: Committee Members - Harvey Bowers
Tamie Miller

1982 Salary Survey

October/November 1982

Completed by

MEA Personnel Office

1. Position descriptions were summarized and approved by employees and supervisors.

2. Thirteen comparable firms were contacted to gain assistance and position questionaires mailed out.

3. Follow-up included individual meetings and phone calls.

4. Position matches were mutually determined with the comparable firms. Actual salaries were then obtained and averaged to establish the new mid-point for each grade level.

Organizations Surveyed

1. Copper Valley Electric
2. Golden Valley Electric
3. Kodiak Electric
4. Homer Electric
5. Matanuska Telehone
6. Chugach Electric
   (no data returned)
7. Municipality of Anchorage
   (ML&P)
8. Municipality of Fairbanks
   (ML&P)
9. Mat-Su Borough
10. Mat-Su School District
11. State of Alaska
12. Alascom
13. Retherford & Associates
    (now International
    Engineering)

In the following report each organization is referred to by an alphabetical letter to protect the salary confidentiality of the survey participants.

1982 Salary Survey

Establishing Grade I

Benchmark Positions	Actual Salaries Reported Matching Our Position	
General Accounting Clerk	$20,700	Employer A
	22,464	Employer C
	23,192	Employer I
General Office Clerk II	$25,750	Employer D
	22,464	Employer I
	18,832	Employer L

Average of above $22,233

Present mid-point $22,300

Recommend increasing Grade I as follows:

1. $22,300 new mid-point
   22,300 old mid-point

   $ 000 grade increase

2. Plus 4% of the 1982 rates to allow for 1983 wage increases.

1983 Recommended Grade I:

Minimum: $19,700 Mid-point: $23,100 Maximum: $26,700

1982 Salary Survey

Establishing Grade II

Benchmark Positions	Actual Salaries Reported Matching Our Position	
Billing Clerk	$28,059	Employer D
Cashier	$20,700	Employer A
	28,059	Employer D
Engineering Clerk	$24,900	Employer A

To: James F. Palin
General Manager

From: D. C. Schneider
Personnel Officer

Subject: Monthly Report - Personnel Office

November's activity centered around our annual salary survey and trying to encourage targeted survey participants to promptly furnish requested data. For a wide spectrum of excuses about half of the participants have not promptly furnished requested material. The survey will be finalized at the end of November.

Other activities in November included:

1. An NRECA employee benefit workshop, which covered recent changes and practices in NRECA programs;

2. Planning activities for the holiday season, such as the Christmas party and a community service activity;

3. Preliminary preparation of a training program for the contract dispatchers.

In addition, work was done on benefit programs, policies and job descriptions.

Total Employees as of October 31:		Total Employees anticipated on November 30:

February 15, 1984

TO: ALL MEMBER-CONSUMERS

FROM: MEMBER AND PUBLIC RELATIONS OFFICE

SUBJECT: APUC APPROVED RATES

SINGLE-PHASE SERVICE

Facilities Charge[(1)]: $15.00 per month

Energy Charge: First 1300 kWh at 7.505¢* per kWh
Over 1300 kWh at 5.804¢* per kWh

THREE-PHASE SERVICE

Facilities Charge $40.00 per month

Demand Charge: $3.61 per kW

Energy Charge: All kWh at 4.483¢* per kWh

SEASONAL SINGLE-PHASE SERVICE

Annual Facilities Charge: $180.00
Energy Charge: As outlined under single-phase service

*Add to the stated rate a wholesale power cost rate adjustment of 0.917¢ (9.17 mills) per kWh approved by the Alaska Public Utilities Commission.

(1) FACILITIES CHARGE: The facilities charge is made by the Association to help cover costs to the Association which are not directly related to energy sales. These fixed costs include interest on debt, depreciation and cost of building equity. In 1980, the test year on which the facilities charge is based, these costs amounted to approximately $5.4 million annually for single-phase service. When these costs are equally allocated to each single-phase account, they amount to approximately $38 per month per account. The facilities charge recovers part of that $38.

Subject: Tom Staudenmaier's Request for Rate Information

The following is a recap of single-phase rates in effect during 1983 and a brief description of why they changed.

1. Rates effective 1/1/83:

Facilities charge	$20.00
1st 1300 kWh	5.325¢/kWh
over 1300 kWh	3.834¢/kWh
WPCRA	1.390¢/kWh

These rates reflect the interim increase received in U-82-60, MEA's rate case filed in September 1982.

2. No change in regular rates. WPCRA increased to 1.43¢/kWh. This change was effective March 11. The rate changed because of the reconciliation of wholesale power for the fourth quarter of 1982.

3. No change in regular rates. WPCRA changed to .033¢/kWh. This reflects the first quarter 1983 reconciled rate of 3.084¢/kWh for wholesale power and a change in the base rate from 1.6202¢/kWh to 3.051¢/kWh.

4. Single-phase rates effective June 24, 1983:

Facilities Charge	$15.00
1st 1300 kWh	7.393¢/kWh
over 1300 kWh	5.723¢/kWh
WPCRA	0.033¢/kWh (no change)

This change in the permanent rates reflects the increase allowed in Bench Order, U-82-60. This increase was granted subject to reconsideration of one or two items in the rate case.

Dear Mr. Staudenmaier:

Subject: Recall Petition

In reference to the recall petition which you submitted to MEA on February 14, 1984, on behalf of the Staudenmaier Electric Merger Committee, please be advised that the Board has reviewed Attorney Roger Kemppel's legal opinion dated March 1, 1984. A copy was provided to you with my letter of March 5. In addition, at its regular monthly meeting on March 13, 1984, the Board accepted Mr. Kemppel's ruling that the recall petition does not contain valid charges, and rejected the petition for this reason, as well as for other reasons mentioned in the attorney's letter.

Should you desire to pursue or contest this decision, I suggest that you have your attorney contact Mr. Kemppel so that the petitioners and the Association can seek judicial resolution of any disputes.

Sincerely,

Elden Sandvik
Secretary-Treasurer

Mr. Thomas G. Staudenmaier
P. O. Box 408
Eagle River, Alaska 99577

Dear Mr. Staudenmaier:

In reference to the recall petition which you submitted to MEA on February 14, 1984, on behalf of the Staudenmaier Electric Merger Committee, please be advised of the following:

1. We have verified that the petition contains an adequate number of member signatures, in accordance with MEA's Bylaws; and

2. At a special meeting of the Board of Directors of Matanuska Electric Association, Inc., held on February 23, 1984, the Board advised management to provide you a copy of MEA General Counsel Roger Kemppel's legal opinion as soon as it was available and, further, that the Board would officially accept Mr. Kemppel's legal opinion at the March 13, 1984 Board meeting.

3. A copy of Mr. Kemppel's opinion letter dated March 1, 1984 is enclosed. On page 11, Mr. Kemppel advised the Board that the recall petition does not contain valid charges and that the Board may consider rejecting this recall petition for this reason, as well as for other reasons mentioned in the letter. Based on Mr. Kemppel's letter, I believe that the Board will reject the recall petition.

You will note in the opinion letter that Mr. Kemppel suggests that you have your attorney contact him should you decide to contest the Board's action, so that the petitioners and the Association can seek judicial resolution of any disputes.

Please feel free to contact Mr. Kemppel or me if you have any questions.

Sincerely,

James F. Palin
General Manager

Re: Recall Petition

Dear Board Member:

The Association received a recall petition from the Staudenmaier Electric Merger Committee on February 14, 1984, calling for the removal of the entire Board of Matanuska Electric Association, Inc. This petition purports to bring the following charges against the present Board of Directors of the Association:

"Charge 1: With failing to conduct the business of Matanuska Electric Cooperative, Inc. in a manner as to prevent an unreasonable increase in the electric bills and charges of the members and that you have entered into a course of action as to be unfamiliar with any alternative to the unreasonable burden placed upon the members, in particular senior citizens and parties of low fixed incomes.

"Charge 2: You have allowed the management of the corporation (MEA) to communicate incorrect and misleading information with the intent to subvert the election process (1983 Ballot for Directors). Marion Bowen Pippel officially withdrew in writing from running as a candidate for the Board of Directors of said Cooperative (MEA). Marion Bowen Pippel's name was deliberately placed on the 1983 MEA Ballot by management for the purpose of splitting the vote. Marion Bowen Pippel received 249 votes.

"Charge 3: You have allowed said Cooperative (MEA) General Manager James F. Palin a salary increase from $73,800.00 to $78,000.00 per year--a $4,200.00 per year increase, at the April 12th, 1983 Board Meeting.

"Charge 4: You have lost the trust and confidence of Matanuska Electric Association Co-op owners."

Reid 3-5-84

action of the director to constitute "cause," that action must be wrongful or malfeasance in office. In a similar electric cooperative case, the Ohio court ruled that the above language in effect required that there be cause, and went on to define what actions on the part of a cooperative board of directors amounted to cause. In Neal Taylor, et al., Plaintiffs, vs. Buckeye Rural Electric Cooperative, et al., Defendants, 79-CL108 (Ohio 1979), the court found:

> An examination of the instant charges, however, indicates a failure to direct any specific charge of malfeasance, misfeasance, or nonfeasance against any board member. All charges read the same against every board member, and, in effect, constitute disagreement with the policies of the trustees in operation of the business. But such disagreement with policy is the basic reason for the election of the trustees at regular annual meetings. The section entitled 'Removal' indicates a more radical and emergency type of procedure and not a method by 135 members to completely replace all of the trustees and officers of a multi-million dollar business. The resulting chaos can well be imagined.... Defendants claim all trustees, otherwise lawfully in office, can be replaced at a special meeting without any cause being stated. This section interpretation would make an annual meeting and election of trustees meaningless. Any faction constituting 10% of the company membership could, at any special meeting, replace the whole board of trustees of the company and therefore, the whole company management. This could go on indefinitely. The words 'removal' and 'charges' and 'present evidence' indicate that no such intention

> But unless the officer has been guilty of some acts of misfeasance or nonfeasance he is not subject to removal, nor is a director subject to removal by reason of acts committed in another office.... Of course a director cannot be removed on the ground of incompetency where the facts show the contrary. 2 W. Fletcher, Cyclopaedia of the Law of Private Corporations, §356 (1982).

As the Buckeye case, supra, indicated, there is no power to remove a director if the basis of the charge is that the person bringing the charge disagrees with the policies of the director. Such disagreement does not rise to the level of cause. If shareholders were to attempt to remove a director merely because they disagree with policies which that director supports, then the special relationship that a director has with the corporation would cease to exist. That relationship has been described by courts as that of a trustee or fiduciary:

> While the ordinary rules of law relating to an agent are applicable in considering the acts of a board of directors in behalf of a corporation when dealing with third persons, the individual directors making up the board are not mere employees but a part of an elected body of officers constituting the executive agents of the corporation. They hold such office charged with the duty to act for the corporation according to their best judgment, and in so doing they cannot be controlled in the reasonable exercise and performance of such duty. As a general rule, the stockholders cannot act in relation to the ordinary business of the corporation, nor can they control the directors in the exercise of the judgment

As long as the members of the board of directors use their best business judgment to make a decision for the benefit of a corporation as a whole, that action is not a breach of their fiduciary or trust responsibility to the membership, even though a significant number of members may have voted differently on a particular issue. Proper charges, as required by Article IV, Section 5, of the Association's Bylaws, require more than mere disagreement. As the court stated in the case of Fox v. Codey, 252 N.Y. Supp. 395:

> Removal may not be based upon whim or caprice. Mistake or misunderstanding probably will not suffice. Substantial grounds showing breach of trust must be shown.

Clearly the law does not permit the stockholders to create a sterilized board of directors. Manson v. Curtis, 119 N.E. 559 (N.Y. 1918); Fells v. Katz, 175 N.E. 516, 517 (N.Y. 1931). Accordingly, a director cannot be removed merely because the majority of the association members who attend the meeting happen to disagree with a particular policy.

Turning to the charges presented by the above petition, it should be noted at the outset that identical charges are being brought against each and every member of the Board of Directors. This of itself is not dispositive (since it is at least possible that each member of the Board may have committed identical acts of malfeasance in office), but it does at least lead to the suggestion that these charges are more in the nature of a purge or takeover rather than bona fide charges of individual misconduct as required by law.

The first charge contained in the attached petition alleges that the directors failed to prevent an unreasonable increase in electric bills and charges. This charge does not allege any specific examples of mismanagement or other misconduct. The case law makes it clear that when the shareholders attempt to remove a director for cause, there must be service of

> SECTION 8. Manager. The Board may appoint a manager who may be, but who shall not be required to be, a member of the Association. The manager shall perform such duties and shall exercise such authority as the Board may from time to time vest in him.

The setting of salaries is a policy decision which is reserved by statute and the Bylaws of the Association to the Board of Directors. Article VI, Section 10(a), of the Association's Bylaws provides:

> SECTION 10. Compensation. (a) The powers, duties and compensation of officers, agents and employees shall be fixed by the Board subject to the provisions of these Bylaws with respect to compensation for a board member. [Emphasis added]

As noted earlier, only the Board of Directors has the power and the right to manage the business and affairs of the Association. The power to set and establish salaries is an essential part of this right to manage the business and affairs of the Association. Unless it is alleged that the setting of salaries is done fraudulently, the members of the Association may not review this type of decision by recall petition. Again, this charge merely represents a disagreement with the Board of Directors as to the proper level of the general manager's salary. Such a disagreement clearly does not constitute legal cause for removal of a Board member.

The fourth charge states that the Board has "lost the trust and confidence of Matanuska Electric Association Co-op owners." Once again, this charge is vague and so broad as to effectively deny the Directors charged the opportunity of meeting the accusation. Auer v. Dressel, supra; Campbell v. Loew's, Inc., supra. This charge in effect alleges a widespread "disagreement" with the presently-seated Board. Again, mere disagreement with the policies of the Board does not constitute

Should the Board resolve to reject the above petition as insufficient at law, I would suggest that you immediately arrange to provide Staudenmaier's petition committee with a copy of this opinion and request that that committee have its attorney contact me as soon as possible if it decides to contest the Board's action. It is important that the Staudenmaier Electric Merger Committee and the Association seek judicial resolution of any outstanding disagreement at the earliest possible time in order not to delay the Association's annual membership meeting scheduled to be held April 27, 1984, and in order to ensure the widest possible notice and membership participation at that meeting.

Sincerely,

KEMPPEL, HUFFMAN & GINDER

P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-2322

PETITION FOR REMOVAL—Seven (7) Members of Matanuska Electric Association Board of Directors

Authority Cited — MEA bylaws. ARTICLE IV Board Members. ***Section 5. removal of board member by members.*** (Alaska Statutes) ***Title 10*** Chapter 25 Electric and Telephone Co-operative Act. ***Article 1. Sec. 10.25.140*** (Board of Directors).

We, the undersigned members of Matanuska Electric Association, Inc. do hereby bring the following charges against the hereinafter listed Directors of Matanuska Electric Co-operative, Inc. (sometimes referred to as Officers or Trustees) and request the removal of such Directors by reason thereof. We hereby direct you, **Elden Sandvik,** Secretary-Treasurer to inform said Director, **Robert L. Husted,** President (MEA), **Barbara T. Miller, Phil O'Neill, Harvey Bowers, Joy Foster** and **Robert C. Johnson** in writing, of the charges hereinafter set out so that the President of MEA, Robert L. Husted shall call a special meeting of the members pursuant to **Article III Section 2 Special Meetings** of the By-Laws of Matanuska Electric Co-operative, Inc. affording said Directors an opportunity at the meeting to be heard in person or by counsel and to present evidence in respect to the charges, granting us the undersigned the same opportunity.

After said meeting and pursuant to Section 2 of Article III of the By-Laws of said Co-operative, we, the undersigned members of said Co-operative (MEA) petition **Robert L. Husted, President** of said Corporation, to call a special meeting of the members and cause notice of such meeting to be given as provided in said By-Laws for the purpose of voting on the question of removal of said Directors pursuant to Section 3 of Article III aforesaid.

That the following Directors are charged by the undersigned members. . .

CHARGE 1: With failing to conduct the business of Matanuska Electric Co-operative, Inc. in a manner as to prevent an unreasonable increase in the electric bills and charges of the members and that you have entered into a course of action as to be unfamiliar with any alternative to the unreasonable burden placed upon the members, in particular, senior citizens and parties of low fixed incomes.

CHARGE 2: You have allowed the management of the corporation (MEA) to **communicate incorrect** and **misleading information** with the intent to **subvert** the **election process** (1983 Ballot for Directors.) Marion Bowen Pippel officially withdrew in writing from running as a candidate for the Board of Directors of said Co-operative (MEA) Marion Bowen Pippel's name was deliberately placed on the 1983 MEA Ballot by management for the purpose of **splitting the vote.** Marion Bowen Pippel received **249** votes.

CHARGE 3: You have allowed said Co-operative (MEA) GENERAL MANAGER **James F. Palin a salary increase from $73,800.00 to $78,000.00 per year —a $4,200.00 per year increase,** at the April 12th, 1983 Board Meeting.

CHARGE 4: You have lost the trust and confidence of Matanuska Electric Association Co-op owners.

That these charges are brought against the following Directors and the removal of all of the following named Directors, the same being all of the Directors, (sometimes referred to by the Company as Trustees or Officers) are hereby requested and petitioned to be removed to wit:

Robert L. Husted, P.O. Box 132, Talkeetna, Alaska 99676. **Barbara T. Miller,** P.O. Box 151, Wasilla, Alaska 99687. **Phil O.O'Neill,** P.O. Box 2229, Palmer, Alaska 99645. **Harvey Bowers,** P.O. Box 1960, Wasilla, Alaska 99687. **Joy Foster,** P.O. Box 274, Wasilla, Alaska 99687. **Robert C. Johnson.** P.O. Box 456, Eagle River, Alaska 99577. **Elden Sandvik,** P.O. Box 512, Palmer, Alaska 99645.

ORGANIZATIONAL CHART

Chugach ELECTRIC ASSOCIATION, INC

* Position to be filled

OFFICERS

1. Report below the name, title, office address, and salary for the year of each general officer of the respondent. Report the information also for each other employee whose annual salary is $25,000* or more. The information required by this schedule may be omitted for assistant general officers whose duties do not embrace important executive or policy functions, and whose salaries are less than $25,000* per year. (*$35,000, if respondent's annual operating revenues are $50,000,000 or more.)

2. If any officer or other employee reported in this schedule received remuneration from respondent, directly or indirectly, other than the salary reported in column (d), such as commissions, bonuses, shares in profits, moneys paid, set aside or accrued pursuant to any pension, retirement, savings or similar plan *(exclusive of plans qualified under Section 401 of the Internal Revenue Code of 1954)* including premiums paid for retirement annuities, or life insurance where the respondent is not the beneficiary, or any other advantageous arrangement which constitutes a form of compensation, give the essentials of the plans not previously reported, the basis of determining the ultimate benefits receivable, and the payments or provisions made during the year with respect to each person reported herein. If the word 'none' correctly states the facts with respect to the matters referred to in this instruction, so state ..... N/A per. #7 .....

3. State the annual benefits estimated to be payable to each of the three highest paid officers named herein in the event of retirement at normal retirement date pursuant to any pension or retirement plan.
..... N/A per #7 .....
.....
.....

4. Describe all transactions since the beginning of the year in which any person who was an officer of the respondent at any time during the year received remuneration, directly or indirectly, from the respondent in the form of securities, options, warrants, rights or other property, or through the exercise or disposition thereof. As to options, warrants or rights granted or extended, give the information under this caption on page 106. If the response "none" correctly states the facts with respect to the matters referred to in this instruction, so state. N/A per. #7

5. State briefly any arrangement under which any officer is insured or indemnified against liability which he may incur in his capacity as an officer. If there are no such arrangements, so state ..... N/A per. #7 .....

6. If a change was made during the year in the incumbent of any position, show name and address and total remuneration of the previous incumbent and date change in incumbency was made.

7. Utilities which are not required to file copies of this report with the Securities and Exchange Commission may omit the data called for by instructions 2, 3, 4, and 5. Omission of responses to such instructions for this reason should be stated.

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. _____

TOM STAHR

From: Mayor

Meeting Date:

Subject: Cost of Living Adjustment for Executive Pay Plan

AO 81-28, as further amended by AO 82-53, provides for annual adjustment to the pay plan for Executive Employees as defined under AMC 3.30.171B based on the U.S. Department of Labor's Anchorage Consumer Price Index for All Urban Consumers for the prior year. For the prior year that index increased 5.3%.

Applying the Cost of Living adjustment formula outlined in AO 82-53, the Municipal Pay Ranges for Executive Employees for 1984 are as follows:

E-I	$32,000 - $55,000
E-II	$42,000 - $67,000
E-III	$52,000 - $78,000

Tom Stahr

The future

ow long will electricity remain a 'bargain'?

Electricity from gas-fired generators cheap

Continued from Page A-1

But in parts of Alaska where electricity from gas or hydropower is not available, the cost of keeping the lights on was considerably higher,in many cases. In Fairbanks 1000 kwh cost $121; in Kodiak, $160; and in Port Lions, a small fishing community near Kodiak, $612.63. Port Lions has the distinction of having the most expensive juice in the state.

Chugach Electric Association is the largest utility in the state. It distributes electricity to 50,000 users in the Anchorage bowl and sells [illegible] to utilities serving an addi[illegible]. It could go higher, however, if the [illegible]

Gas burned at Bernice Lake, International and Knik Arm power stations is not the bargain Beluga River methane is. It is purchased from Enstar and it costs $1.12 per thousand cubic feet.

According to an initial draft study of available Cook Inlet gas reserves done for the state by Battelle Pacific Northwest Laboratories, the weighted average price of all the gas used by Chugach is 42 cents per thousand cubic feet. Over the next 13 years, the study predicts, that average cost will increase to $1.32.

Utilities argue fault

JAN. 11, 1984

By JIM ERICKSON
Daily News reporter

A Chugach Electric Association spokesman Monday denied reports that a massive weekend power failure could have been avoided if the utility had not cut loose from Municipal Light and Power electrical supplies shortly after the Chugach system began to falter. [illegible]

pokesman disputes claim power outage could have been avoided

[illegible] this problem," he said about Monday's outage. "It's not something that won't happen again."

In contrast, Kolasinski said the fuel-delivery gremlin that caused complete shutdown of the Chugach main power plant at Beluga was "a one-time affair."

"We suspect that the main gas regulator station had wa[illegible] main gas regulator said.

Power restored, but blackout still makes its mark

By LARRY CAMPBELL
Daily News reporter

The vast power outage that struck Southcentral Alaska on Sunday continued to raise havoc on Monday, only after power had been restored.

Hindered by another outage Monday, though of much less duration and area, some shivering residents were thwarted in attempts to get heat into their homes through frozen water pipes. Others fought water back as pipes burst from freezing water inside, spewing a soppy, icy mess.

Police and fire officials reported numerous incidents related to the outage and resulting vulnerability to the cold. Anchorage police responded to about 30 minor auto accidents Monday while firefighters answered over 35 weather related calls, including burst water pipes and minor fires.

A house fire at 1021 Boston St. about midnight Sunday began when a candle fell on a bed. Damage in that fire was estimated at $3,000. Another fire at the Northern Lights Inn, caused by a heating duct, resulted in only $100 damage.

Diners at Nikko Gardens in the Denali Tower rushed from the restaurant just after noon Monday when a fire sprinkler line burst and showered water through the ceiling tile and down the walls.

"We heard this pop, then the water started coming through the tile and down onto the aisle," said Stephan

See Back Page, BLACKOUT

Chugach sues over

By DON HUNTER
Daily News reporter

Chugach Electric Association chose Pearl Harbor Day to launch a new legal offensive in its decade-old territorial war with Municipal Light and Power and the Alaska Public Utilities Commission.

At the crux of the suit filed Tuesday in Superior Court is the commission's interpretation of a 1979 Alaska Supreme Court ruling and a subsequent order from a Superior Court judge.

Both the earlier case and the current suit focus on a 1973 APUC order that established boundaries for Chugach and city-owned ML&P. Both utilities provide electrical service to Anchorage residents, and in the 1973 order the APUC defined which parts of town each utility would serve.

Since the utilities had, in some cases, built distribution lines and transmission facilities in the same areas, the territorial exchange required the exchange of some customers and equipment.

The order first was challenged by Chugach in 1974. The Supreme Court's 1979 opinion directed a Superior Court judge to remand the issue to the APUC for further consideration of "the retirement and transfer of Chugach's facilities to ML&P."

Chugach officials contend the Supreme Court opinion also allows the APUC to consider changing the boundary lines that were drawn in 1973, but, because of the association's lawsuit, never enforced.

When the APUC held public hearings this fall on the "retirement and transfer" issue, Chugach attempted to introduce testimony and evidence in support of its contention that the 1973 boundaries are unfair. But APUC Chairwoman Carolyn Guess denied the request, saying the Supreme Court's opinion restricts the commission from changing the boundaries.

The commission is expected to take rebuttal testimony from its staff next month. Attorney William Moran, representing Chugach, has requested expedited handling of the lawsuit.

"As far as Chugach is concerned, the purpose (of the suit) is to facilitate" the commission's handling of the territorial case, "not to delay it," Moran said.

Chugach contends enactment of the 1973 boundaries would require it to give up about 10,000 customers, while ML&P would lose only about 1,000. Chugach general manager Walter Truitt has said such a transfer deficit would cause an unwarranted financial drain on the association, which already is reeling from mounting debts incurred to pay for new generation equipment.

TOM STAUDENMAIER
DIRECTOR OF THE BOARD
MATANUSKA ELECTRIC ASSOCIATION
P. O. Box 1603
EAGLE RIVER, AK 99577

Dear Mr. Staudenmaier:

Thank you for your correspondence of September 10, 1982. Needless to say, your letter contains a number of provocative and compelling proposals that deserve complete examination.

You raise a number of points which deserve active consideration and research. They include:

a) a commitment to a plan to reduce the cost of electric power throughout South Central Alaska;

b) administrative and clerical overhead costs at managerial levels are rising "explosively";

c) after the November election, the next governor will undoubtedly face a declining commitment at the Federal level from the Rural Electrification Administration. The State of Alaska will inevitably reassess its financial relationship with the REA and devise alternative schemes of financing utility expansion and improvement;

d) retiring the indebtedness with the REA is certainly one viable alternative that warrants active consideration; and

continued on page two --

e) finally, I wholeheartedly agree that electric bills are atrociously high throughout this State, and any plans to reduce monthly electric bills will be more than welcome, both by my campaign and by my administration.

Tom, I think you would be the first to agree with me that any plan that could potentially involve a State commitment of a billion dollars requires serious consideration, active deliberation, a full study of opportunity costs, a reassessment of our revenue projections, a full-scale legislative commitment, and an articulated, comprehensive statement of policy. These will be my duties as Governor, and I will never take them lightly. I will support any plan that can survive this tough screening process.

Thanks again for providing me with the input. I anxiously await the day when Alaska can witness a reduction in power rates instead of the chain of increases that we have had for so many years.

Best regards.

Yours very truly,

Bill Sheffield

Mr. Tom Staudenmaier
Director of the Board
Matanuska Electric Association
P. O. Box 1603
Eagle River, Alaska 99577

Dear Tom:

Thank you for the material on your proposal to merge the four Southcentral Alaska Electric Power Distributors. The concept is certainly an interesting one, and the potential benefits as you've outlined them exciting. It most definitely merits investigation.

My immediate reaction to the fiscal implications include the very substantial commitment of state funds, and the various uncertainties which attend that concern. Quite obviously, state revenue projections come in for serious examination. They are uncertain at best, and many experts see them declining below present levels. At the same time, there seems little likelihood of a decline in the demands being made upon them; quite in fact we must anticipate continuing increases in demand.

Two principal and major probabilities of such commitment are the Susitna and other hydroelectric projects and the potential capital move. Major activity in either of those spheres could derail a plan to retire the utilities' REA debts by quite some time; in fact, assistance even to maintenance of those debts could be difficult.

On the other hand, should the capital move fail, another scenario would come into view. Given the likelihood of declining REA assistance to Alaskan hydro projects, that would leave those as a very major demand on available revenues.

All these things are speculative, quite obviously. I think none of them should discourage efforts to develop your plan. At the same time, I feel you should pursue aggressively the development of as firm as possible figures concerning savings through the merger alone, even without the debt retirement. With that as a first step, the debt retirement might become a much more publicly attractive idea. I can

fully appreciate the virtue of using the debt retirement scheme as a way to share a major portion of the state's oil wealth with a high percentage of the population, and to establish some equity with the subsidy the state is presently providing for electric power in remote communities.

You most assuredly may count on my active support after the merger with respect to investigating the viability and financibility of the plan. If the public can be persuaded to accept it in exchange for some of its other wants and needs, or if our revenue picture brightens dramatically in the future, I certainly would support the plan itself.

I appreciate you sharing your idea with me and hope you will keep me apprised in timely fashion of developments respecting the merger and of figures you develop in both areas.

Very truly yours,

Joe Hayes

Tom Staudenmaier
Electric Merger Committee
P.O. Box 1603
Eagle River, AK 99577

Dear Tom,

Your idea to merge the electric utilities of South Central Alaska appears to be a good one. I would certainly support paying off the outstanding loans from the Rural Electric Association if I am convinced that the utilities will be run properly and efficiently and further debt would not be incurred.

Thank-you for the information and I wish you success in the "merger."

Sincerely,

Jan Faiks

ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

September 13, 1982

Dear Mr. Martin:

I speak for a group of Matanuska Electric Association, Chugach Electric Association, and Homer Electric Association members seeking your commitment to a plan to reduce the cost of electric power throughout South Central Alaska. Our plan is highly advantageous to us economically. We believe it politically advantageous to you.

I was elected to the Board of Directors of the Matanuska Electric Association this past April on a write in vote. The reason, to cut the cost of high electric bills. The next step in our strategy is to promote a merger vote on behalf of Matanuska Electric Association (MEA), Homer Electric Association (HEA), Chugach Electric Association (CEA), and Municipal Light and Power (MLP). The new name of the four merged organizations will be Alaska South Central Electric Co-op. The new Board of Directors could be apportioned using the State of Alaska 1982 Reapportionment and Redistributing Plan. Upon voter approval the Board could be make up of 11 members using the senate plan or 22 members using the house plan.

The proposed merger would reduce our administrative and clerical overhead costs, which are now rising explosively. Incidentally, we were driven to action not by union costs of power production and distribution but by exorbitant increases in management costs, high salaries, mismanagement and duplicity in their work. We have no quarrel with Labor.

When you are in the Legislature after the November election, and the merger vote is successful, will you assist us in legislation to payoff with a State Grant all outstanding loans from the Rural Electric Association throughout the State. What better way could we use some of the excess oil revenue. We ask your active support after the merger. Now we want your commitment to the idea.

We believe this plan will pull the vote of every homeowner and businessmen from Talkeetna to Homer. The production and distribution of electric power at reasonable rates is an Alaska necessity. Ours is a plan that should please everyone.

The end result of this merger plan would be a streamline debt free utility in South Central Alaska, thereby reducing the average electric bill between 50-85% per month.

Can we count on your active support after the merger? (YES) NO

Sincerely,

Tom Staudenmaier
Director of the Board
Matanuska Electric Association

Very interesting concept. Needs to be pursued to get maximum benefits to the consumer.

Dear Tom:

Reference: Your telephone question to staff concerning the retirement of REA loans.

Please understand that each year the Association makes the required payments on all outstanding loans. In that effort, principal and interest payments are made on each loan; none have priority or must be paid ahead of any other, except as provided by due dates during the calendar year.

When making extra principal payments, however, the earlier loans must receive those payments or be paid off first, unless a special waiver was approved by REA. In other words, extra principal payments sent to REA would be applied to earlier, lower interest loans until they were eliminated. If loans were to be paid off, a 1950 loan would be paid off before a 1960 loan.

We hope this answers your question.

Sincerely,

James F. Palin
General Manager

Utility officials lash out at joint electric board

by Cary Virtue
Times Writer

A group that would coordinate electric power planning in South-central would be a "monster" that would haunt the utility world, critics said Thursday.

In short, neither city officials nor representatives from the Matanuska and Homer electric associations support creating such a board, which was proposed by the Chugach Electric Association early this fall.

Specific makeup and duties of the joint planning board have not been determined, but Chugach officials hope the board has some muscle to enforce its decisions on members. But uncertainty over the board's role has created fears that Chugach may try to dominate the board, a charge Chugach officials deny.

"The organization they (Chugach) have proposed is neither necessary nor desirable," Tom Stahr, Municipal Light and Power general manager, told about 100 people attending a breakfast meeting of the Resource Development Council. "It could well become a monster that would destroy rational power planning."

Stahr, who said he was expressing personal opinions, said there already are several organizations involved in power planning, and another one is not needed. Such a board could have too much power, and it could become expensive for consumers to support, he said.

But Joyce Murphy, president of the Chugach board of directors, said Chugach proposed the concept for a joint panel to promote communication between the different electrical utilities. For too long, she said, the utilities have argued, bickered and battled over turf.

"We need joint planning," she said. "We want to cooperate with our sister co-ops."

At stake is the future role of Chugach, the largest cooperative in the state with 58,000 retail customers. It also sells power to both Matanuska and Homer electric associations.

City utility officials are urging Chugach to merge with ML&P, though financial implications of such a merger have not been discussed. A joined utility would not include Homer and Matanuska electric associations.

Meanhwile, both Matanuska and Homer electric associations are urging Chugach not to merge.

Jim Parm, MEA general manager, reiterated Thursday that Chugach should transfer ownership and control of its five power plants to a new authority that would be responsible for producing power for the three cooperatives. This proposal — known as the generation and transmission proposal — would not include the city's electric utility.

The G&T proposal, however, would give Homer and Matanuska co-ops more say in decisions on how much power to produce and what rates to charge. They also say it would help Chugach save money by reducing interest payments it would have to make to pay off a $292 million deficit.

So far, the Chugach board of directors has said it does not want to merge with the city or form a separate G&T authority. However, Murphy said that if the joint planning board agreed to one of those options Chugach would be willing to consider it.

NEWS FOR IMMEDIATE RELEASE

FOR FURTHER INFORMATION CONTACT:

Budd Goodyear
Manager, Member and Public Relations

The Matanuska Electric Association, Inc. (MEA) has received approval from the Alaska Public Utilities Commission (APUC) to increase the wholesale power cost component of consumers' bills by .713¢ per kilowatt hour to 1.39¢ per kilowatt hour on bills rendered after November 9, 1982.

This adjustment is necessary because of the third quarter 1982 reconciliation of generation and transmission costs to Chugach Electric Association, Inc., (CEA) MEA's energy supplier, and because of MEA's share of interest and depreciation expense of CEA's Beluga 8 generating unit which was brought on line September 30. The wholesale power cost rate adjustment (WPCRA) is added to the existing interim rate approved by the APUC on October 10 when computing energy bills.

The new WPCRA (flow-through) will affect sample bills as noted below.

February 16, 1984

Mr. Thomas G. Staudenmaier
Box 1603
Eagle River, Alaska 99577

Dear Mr. Staudenmaier:

As you requested, the following information as to the Anchorage School District's budgeted electricity costs for 1983-84 has been summarized for your use. If you need any additional information please contact me or Melvin J. Greaves Jr., Budget Director at 269-2351.

Budgeted Electricity Costs
1983-84

Administrative and Support Units	$ 175,450
Elementary Schools	1,119,300
Special Education/Special Services Units	37,800
Secondary Schools	1,594,000
Reserve for Rate Increases	95,000
	$ 3,021,550

The following summarizes the budgeted electricity by source.

Chugach Electric	$ 980,900
Municipal Light and Power	1,458,750
Matanuska Electric	394,400
U.S. Government (On-Base Schools)	92,500
	2,926,550
Reserve for Rate Increases	95,000
	$ 3,021,550

Sincerely,

E. E. (Gene) Davis

SUPERINTENDENT OF SCHOOLS

December 17, 1982

Thomas G. Staudenmaier
Box 1603
Eagle River, Alaska 99577

Dear Mr. Staudenmaier,

This is to advise you, as per your request, that the Matanuska-Susitna Borough School District has budgeted $489,643.00 for electricity for the fiscal year July 1, 1982 to June 30, 1983. This figure includes budgeted amounts for all schools and buildings under the School District's operation, excluding Skwentna, which is powered by a generator.

Thank you for your interest.

Sincerely,

Gary E. Epperson
Business Manager

Mr. Tom Staudenmaier
Director
Board of the Matanuska Electric Association
P.O. Box 1603
Eagle River, Alaska 99577

Dear Mr. Staudenmaier:

Thank you for your letter requesting Senator Murkowski's intervention in securing a General Accounting Office (GAO) audit into the activities of Chugach Electric Association.

Senator Murkowski is presently in Alaska, and I will bring your letter to his attention as soon as possible. In the meantime, I will continue to discuss this issue with you, and will attempt to have a complete response at the earliest possible date.

I appreciate your taking the time to contact Senator Murkowski about this issue.

Sincerely,

David Garman
Legislative Assistant
Senator Murkowski

MEMORANDUM

MATANUSKA ELECTRIC ASSOCIATION, INC.
P.O. BOX 1148
PALMER, ALASKA 99645

PHONE (907) 745-3231

TO: Joyce

DATE: April 23, 1982

FROM: Deannine
Deannine

SUBJECT: NRECA Director coverage and ID cards

At the May 4 meeting the new Director's need only pencil in the information underlined in red. The date of hire should be the date they are sworn in. A sample of beneficiary wording is attached to each form to assist them in their choice. I will type the official form and have it ready for signature at their regular 5/11/82 meeting. Each Director is covered by $25,000 24 hours accident coverage and $100,000 Business Travel insurance. Our Manager's, Officer's & Director's Liability Insurance (MODL) coverage is $10,000,000. Fiduciary Liability Insurance coverage is $1,000,000. After enrollment I will be sending each Director (new) a participation card from NRECA indicating their 24 hour and Business Travel coverage.

Please return the completed ID card information to me with an indication of where I may reach each new Director to make arrangements for the issuance of the ID card.

Please provide me with a formal copy of the proposition that expanded our Board to 7 members. I will need to send this to NRECA with enrollments so they can expand our MODL insurance coverage.

Tom, for your information/jg

Title 10 AK.

Chapter 25. Electric and Telephone Cooperative Act.

Article 1. Substantive Provisions.

Sec. 10.25.010. Powers of electric or telephone cooperative. An electric or telephone cooperative may

(1) sue and be sued in its corporate name;

(2) have perpetual existence;

(3) adopt a corporate seal and alter it;

(4) construct, buy, lease, or otherwise acquire, and equip, maintain, and operate and sell, assign, convey, lease, mortgage, pledge, or otherwise dispose of or encumber lands, buildings, structures, electric or telephone lines or stations, dams, plants and equipment, and any other real or personal property, tangible or intangible, which is necessary, convenient or appropriate to accomplish the purpose for which the cooperative is organized;

(5) buy, lease, or otherwise acquire, and use, and exercise and sell, assign, convey, mortgage, pledge or otherwise dispose of or encumber franchises, rights, privileges, licenses and easements;

(6) borrow money and otherwise contract indebtedness, and issue evidences of indebtedness, and secure the payment of the indebtedness by mortgage, pledge, or deed of trust of or any other encumbrances upon its real or personal property, assets, franchises, or revenues;

(7) construct, maintain, and operate electric transmission and distribution lines, or telephone lines along, upon, under and across publicly owned lands and public thoroughfares, including, without limitation, all roads, highways, streets, alleys, bridges and causeways;

(8) exercise the power of eminent domain;

(9) become a member of other cooperatives or corporations or own stock in them;

(10) conduct its business and exercise its powers inside or outside the state;

(11) adopt, amend and repeal bylaws;

(12) make all contracts necessary, convenient or appropriate for the full exercise of its powers;

(13) do and perform any other act and thing, and have and exercise any other power which may be necessary, convenient or appropriate to accomplish the purpose for which the cooperative is organized. (§ 4(1) ch 93 SLA 1959)

Sec. 10.25.020. Powers of electric cooperative. An electric cooperative may

(1) generate, manufacture, purchase, acquire, accumulate and transmit electric energy, and distribute, sell, supply and dispose of electric energy to its members, to governmental agencies and political subdivisions, and to other persons not exceeding 10 per cent of the number of its members; however, a cooperative which acquires existing electric facilities may continue service to persons, not in excess of 40 per cent of the number of its members, who are already receiving service from these facilities without requiring them to become members, and these persons may become members upon the terms as may be prescribed in the bylaws;

(2) assist persons to whom electric energy is or will be supplied by the cooperative in wiring their premises and in acquiring and installing electrical and plumbing appliances, equipment, fixtures and apparatus by financing them, and in connection with these services wire or have wired the premises, and buy, acquire, lease, sell, distribute, install and repair electric and plumbing appliances, equipment, fixtures and apparatus;

(3) assist persons to whom electric energy is or will be supplied by the cooperative in constructing, equipping, maintaining and operating electric cold storage or processing plants by financing them or otherwise. (§ 4(2) ch 93 SLA 1959)

Sec. 10.25.030. Powers of telephone cooperative. A telephone cooperative may

(1) furnish, improve and expand telephone service to its members, and to other users not in excess of 10 per cent of the number of its members; however, telephone service may be made available by a cooperative through interconnection of facilities to any number of subscribers of other telephone systems, and through pay stations to any number of users, and a cooperative which acquires existing telephone facilities may continue service to persons, not exceeding 40 per cent of the number of its members, who are already receiving service from the facilities without requiring

them to become members, and these persons may become members upon terms as may be prescribed in the bylaws;

(2) connect and interconnect its telephone lines, facilities or systems with other telephone lines, facilities or systems;

(3) make its facilities available to persons furnishing telephone service inside or outside the state. (§ 4(3) ch 93 SLA 1959)

Sec. 10.25.040. Name. The name of a cooperative shall include the words "electric" or "telephone," as appropriate to its purpose, and "cooperative," and the abbreviation "inc." The name of a cooperative shall be distinct from the name of other cooperatives or corporations organized under the laws of or authorized to do business in this state. This section does not apply to a corporation which becomes subject to this chapter by compliance with §§ 290 and 300 or 600 of this chapter and which elects to retain a corporate name which does not comply with this section. (§ 5 ch 93 SLA 1959)

Sec. 10.25.050. Incorporators. Five or more persons, including cooperatives, may organize a cooperative. (§ 6 ch 93 SLA 1959)

Sec. 10.25.060. Articles of incorporation. (a) The articles of incorporation of a cooperative shall recite that they are executed under this chapter and shall state

(1) the name of the cooperative;

(2) the address of its principal office;

(3) the names and the addresses of the incorporators;

(4) the names and addresses of its directors.

(b) The articles may contain any provisions not inconsistent with this chapter which are considered necessary or advisable for the conduct of its business. The articles shall be signed by each incorporator and acknowledged by at least two of the incorporators, or on their behalf, if they are cooperatives. It is not necessary to recite in the articles the purpose for which the cooperative is organized or any of its corporate powers. (§ 7 ch 93 SLA 1959)

Sec. 10.25.070. Bylaws. The board of directors shall adopt the first bylaws of a cooperative to be adopted following an incorporation, conversion, merger or consolidation. Thereafter the members shall adopt, amend or repeal the bylaws by the affirmative vote of a majority of those members voting on the adoption, amendment or repeal at a meeting of the members. The bylaws shall set forth the rights and duties of members and directors and may contain other provisions for the regulation and management of the affairs of the cooperative not inconsistent with this chapter or with its articles of incorporation. (§ 8 ch 93 SLA 1959)

Sec. 10.25.080. Members. Each incorporator of a cooperative shall be a member of the cooperative. No other person may become

a member unless he agrees to use electric energy, or telephone service, or other services furnished by the cooperative when they are made available through its facilities. Membership in a cooperative is not transferable, except as provided in the bylaws. The bylaws may prescribe additional qualifications and limitations on membership. (§ 9 ch 93 SLA 1959)

Sec. 10.25.090. Meetings of members. (a) An annual meeting of the members of a cooperative shall be held at the time and place provided in the bylaws.

(b) Special meetings of the members may be called by a majority of the board of directors or by not less than 10 per cent of all members. (§ 10(1) (2) ch 93 SLA 1959)

Sec. 10.25.100. Notice of meetings. Except as otherwise provided in this chapter, written notice stating the time and place of each meeting of the members and, in the case of a special meeting, the purpose or purposes for which the meeting is called, shall be given to each member, either personally or by mail, not less than 20 days nor more than 40 days before the date of the meeting. If mailed, notice is considered given when it is deposited in the United States mail with postage prepaid addressed to the member at his address as it appears on the records of the cooperative. (§ 10(3) ch 93 SLA 1959)

Sec. 10.25.110. Quorum requirements. Unless the bylaws prescribe the presence of a greater percentage or number of the members for a quorum, a quorum for the transaction of business at all meetings of the members of a cooperative having not more than 1,000 members is 5 per cent of all members, present in person, and a quorum for the transaction of business of the members of a cooperative having more than 1,000 members is 50 members, present in person. If less than a quorum is present at a meeting, a majority of those present in person may adjourn the meeting from time to time without further notice. (§ 10(4) ch 93 SLA 1959)

Sec. 10.25.120. Voting. Each member is entitled to one vote on each matter submitted to a vote at a meeting of the members. Voting shall be in person, but, if the bylaws so provide, may also be by mail. (§ 10(5) ch 93 SLA 1959)

Sec. 10.25.130. Waiver of notice. A person entitled to notice of a meeting may waive notice in writing either before or after the meeting. Attendance at a meeting is a waiver of notice of the meeting, unless the person attends solely to object to the transaction of business because the meeting has not been legally called or convened. (§ 11 ch 93 SLA 1959)

Sec. 10.25.140. Board of directors. The business of a cooperative shall be managed by a board of not less than five directors, each of whom shall be a member of the cooperative or of another cooperative which is a member of it. The bylaws shall prescribe the number of directors, their qualifications other than those prescribed in this chapter, and the manner of holding meetings of the board of directors and of electing successors to directors who resign, die, or are otherwise incapable of acting. The bylaws may provide for the removal of directors from office and for the election of their successors. Directors shall not receive salaries for the services as directors and, except in emergencies, shall not receive salaries for their services in any other capacity without the approval of the members. The bylaws may, however, prescribe a fixed fee for attendance at each meeting of the board of directors and may provide for reimbursement of actual expenses of attendance. (§ 12(1) ch 93 SLA 1959)

Sec. 10.25.150. Term of office of directors. The directors of a cooperative named in articles of incorporation, consolidation, merger or conversion hold office until the next annual meeting of the members and until their successors are elected and qualify. At each annual meeting, or in case of failure to hold the annual meeting as specified in the bylaws, at a special meeting called for that purpose, the members shall elect directors to hold office until the next annual meeting of the members, except as otherwise provided in this chapter. Each director holds office for the term for which he is elected and until his successor is elected and qualifies. (§ 12(2) ch 93 SLA 1959)

Sec. 10.25.160. Staggered terms of office for directors. Instead of electing all directors annually, the bylaws may provide that directors shall be elected for terms not to exceed three years, or until their successors are elected and qualify, and that the terms of directors shall be staggered so that one-third of the directors, or a number as close to one-third as possible, shall be elected at each annual meeting. (§ 12(3) ch 93 SLA 1959)

Sec. 10.25.170. Quorum of board. A majority of the board of directors constitutes a quorum. (§ 12(4) ch 93 SLA 1959)

Sec. 10.25.180. General powers of board. The board of directors may exercise all of the powers of a cooperative not conferred upon the members by this chapter, its articles of incorporation or its bylaws. (§ 12(5) ch 93 SLA 1959)

Sec. 10.25.190. Districts. The bylaws may provide for the division of the territory served or to be served by a cooperative into two or more districts for any purpose, including, without limitation, the nomination and election of directors and the election and

functioning of district delegates. These delegates, who shall be members, may nominate and elect directors. The bylaws shall prescribe the boundaries of the districts, or the manner of establishing the boundaries, and the manner of changing the boundaries, and the manner in which the districts function. No member at any district meeting and no district delegate at any meeting may vote by proxy or by mail. (§ 13 ch 93 SLA 1959)

Sec. 10.25.200. Officers. The officers of a cooperative are a president, a vice president, a secretary and a treasurer. The officers shall be elected annually by the board of directors from among its members. When a person holding an office ceases to be a director, he ceases to hold office. The offices of secretary and of treasurer may be held by the same person. The board of directors may elect or appoint such other officers, agents, or employees as it considers necessary or advisable and shall prescribe their powers and duties. An officer may be removed from office and his successor elected in the manner prescribed in the bylaws. (§ 14 ch 93 SLA 1959)

Sec. 10.25.210. Amendment of articles of incorporation. A cooperative may amend its articles of incorporation as follows, except that it may change the location of its principal office in the manner set forth in § 230 of this chapter.

(1) The proposed amendment shall be presented to a meeting of the members, and the notice of the meeting shall set forth or have attached to it the proposed amendment.

(2) If the proposed amendment, with any changes, is approved by the affirmative vote of not less than two-thirds of those members voting on it, the president or vice president shall execute and acknowledge articles of amendment on behalf of the cooperative and the secretary shall affix and attest to the seal of the cooperative. (§ 15 ch 93 SLA 1959)

Sec. 10.25.220. Contents of articles of amendment. (a) The articles of amendment shall recite that they are executed under this chapter and shall state

(1) the name of the cooperative;

(2) the address of its principal office;

(3) the amendment to its articles of incorporation.

(b) The president or vice president executing the articles of amendment shall make and annex to them an affidavit stating that the provisions of this section regarding the amendment were complied with. (§ 15 ch 93 SLA 1959)

Sec. 10.25.230. Change of location of principal office. A cooperative may, upon authorization of its board of directors or its members, change the location of its principal office by filing a certificate reciting the change of principal office, executed and ac-

knowledged by its president or vice president under its seal, attested by its secretary, in the office of the commissioner. (§ 16 ch 93 SLA 1959)

Article 2. Merger and Consolidation.

Sec. 10.25.240. Merger. One or more cooperatives, each hereinafter designated "merging cooperative," may merge into another cooperative, hereinafter designated "surviving cooperative," by complying with the following requirements.

(1) The proposition for the merger of the merging cooperatives into the surviving cooperative and proposed articles of merger shall be submitted to a meeting of the members of each merging cooperative and of the surviving cooperative. The notice of the meeting shall have attached to it a copy of the proposed articles of merger.

(2) If the proposed merger and the proposed articles of merger, with any amendments, are approved by the affirmative vote of not less than two-thirds of those members of each cooperative voting on them at the meeting, articles of merger in the form approved shall be executed and acknowledged on behalf of each cooperative by its president or vice president and its seal shall be affixed by its secretary. (§ 18(1) (2) ch 93 SLA 1959)

Sec. 10.25.250. Contents of articles of merger. (a) The articles of merger shall recite that they are executed under this chapter and shall state

(1) the name of each merging cooperative and the address of its principal office;

(2) the name of the surviving cooperative and the address of its principal office;

(3) a statement that each merging cooperative and the surviving cooperative agree to the merger;

(4) the names and addresses of the directors of the surviving cooperative;

(5) the terms and conditions of the merger and the manner of carrying it into effect, including the manner in which members of the merging cooperatives may or shall become members of the surviving cooperative.

(b) The articles of merger may contain provisions not inconsistent with this chapter which are considered necessary or advisable for the conduct of the business of the surviving cooperative.

(c) The president or vice president of each cooperative shall make and annex to the articles an affidavit stating that the provisions of this section regarding the articles were complied with by the cooperative. (§ 18(2) ch 93 SLA 1959)

Sec. 10.25.260. Consolidation. Two or more cooperatives, hereinafter designated "consolidating cooperative" may consolidate into a new cooperative, hereinafter designated the "new cooperative," by complying with the following requirements.

(1) The proposition for the consolidation into the new cooperative and proposed articles of consolidation shall be submitted to a meeting of the members of each consolidating cooperative. The notice of the meeting shall have attached to it a copy of the proposed articles of consolidation.

(2) If the proposed consolidation and the proposed articles of consolidation, with any amendments, are approved by the affirmative vote of not less than two-thirds of those members of each consolidating cooperative voting on them, articles of consolidation in the form approved shall be executed and acknowledged on behalf of each consolidating cooperative by its president or vice president and its seal shall be affixed and attested by its secretary. (§ 17(1) (2) ch 93 SLA 1959)

Sec. 10.25.270. Contents of articles of consolidation. (a) The articles of consolidation shall recite that they are executed pursuant to this chapter and shall state

(1) the name of each consolidating cooperative and the address of its principal office;

(2) the name of the new cooperative and the address of its principal office;

(3) a statement that each consolidating cooperative agrees to the consolidation;

(4) the names and addresses of the directors of the new cooperative;

(5) the terms and conditions of the consolidation and the manner of carrying it into effect, including the manner in which members of the consolidating cooperatives may or shall become members of the new cooperative.

(b) The articles of consolidation may contain provisions not inconsistent with this chapter which are considered necessary or advisable for the conduct of the business of the new cooperative.

(c) The president or vice president of each consolidating cooperative executing the articles of consolidation shall make and annex to the articles an affidavit stating that the provisions of this section regarding the articles were complied with by the cooperative. (§ 17(2) ch 93 SLA 1959)

Sec. 10.25.280. Effect of consolidation or merger. (a) In the case of a consolidation the existence of the consolidating cooperatives ceases and the articles of consolidation are the articles of incorporation of the new cooperative. In the case of a merger the separate existence of the merging cooperatives ceases and the articles of incorporation of the surviving cooperative are amended to the extent that changes are provided for in the articles of merger.

(b) The rights, privileges, immunities and franchises, and all real and personal property including, without limitation, applications for membership, all debts due on whatever account and all other choses in action, of the consolidating or merging cooperatives are transferred to and vested in the new consolidated or surviving cooperative without further act or deed.

(c) The new consolidated or surviving cooperative is responsible and liable for the liabilities and obligations of each of the consolidating or merging cooperatives and a claim existing or action or proceeding pending by or against the consolidating or merging cooperatives may be prosecuted as if the consolidation or merger had not taken place, but the new consolidated or surviving cooperative may be substituted in its place.

(d) Neither the rights of creditors nor liens upon the property of the cooperatives is impaired by the consolidation or merger. (§ 19 ch 93 SLA 1959)

Sec. 10.25.290. Conversion of existing corporation. A corporation organized under the laws of the state and supplying or having the corporate power to supply electric energy, or to furnish telephone service, may be converted into a cooperative by complying with the following requirements and thereupon becomes subject to this chapter as if originally organized under this chapter.

(1) The proposition for the conversion of the corporation into a cooperative and proposed articles of conversion shall be submitted to a meeting of the members or stockholders of the corporation, or in case of a corporation having no members or stockholders, to a meeting of the incorporators of the corporation. The notice of the meeting shall have attached to it a copy of the proposed articles of conversion.

(2) If the proposition for the conversion of the corporation into a cooperative and the proposed articles of conversion, with any amendments, are approved by the affirmative vote of not less than two-thirds of those members of the corporation voting on them or, if the corporation is a stock corporation, by the affirmative vote of the holders of not less than two-thirds of those shares of the capital stock of the corporation represented at the meeting and voting on them, or, in the case of a corporation having no

members and no shares of its capital stock outstanding, by the affirmative vote of not less than two-thirds of its incorporators, articles of conversion in the form approved shall be executed and acknowledged on behalf of the corporation by its president or vice president and its seal shall be affixed and attested by its secretary. (§ 20(1) (2) ch 93 SLA 1959)

Sec. 10.25.300. Contents of articles of conversion. (a) The articles of conversion shall recite that they are executed under this chapter and shall state

(1) the name of the corporation and the address of its principal office prior to its conversion into a cooperative;

(2) the statute or statutes under which it was organized;

(3) a statement that the corporation elects to become a cooperative, nonprofit, membership corporation subject to this chapter;

(4) its name as a cooperative;

(5) the address of the principal office of the cooperative;

(6) the names and addresses of the directors of the cooperative;

(7) the manner in which members, stockholders or incorporators of the corporation are to become members of the cooperative.

(b) The articles of conversion may contain provisions not inconsistent with this chapter considered necessary or advisable for the conduct of the business of the cooperative.

(c) The president or vice president executing the articles of conversion shall make and annex to it an affidavit stating that the provisions of this section were complied with regarding the articles. The articles of conversion are the articles of incorporation of the cooperative. (§ 20(2) ch 93 SLA 1959)

Article 3. Dissolution.

Sec. 10.25.310. Dissolution of cooperative which has not commenced business. A cooperative which has not commenced business may be dissolved by delivering articles of dissolution to the commissioner. A majority of the incorporaters shall execute and acknowledge articles of dissolution on behalf of the cooperative. The articles shall state

(1) the name of the cooperative;

(2) the address of its principal office;

(3) that the cooperative has not commenced business;

its debts, obligations and liabilities, other than those to patrons arising by reason of their patronage, the directors shall distribute remaining sums, first, to patrons for the pro rata return of all amounts standing to their credit by reason of their patronage, and second, to members for the pro rata repayment of membership fees. Sums then remaining shall be distributed among its members and former members in proportion to their patronage, except to the extent participation in the distribution has been legally waived. The board of directors sh thereupon authorize the execution of articles of dissolution. The president or vice president shall execute and acknowledge articles of dissolution on behalf of the cooperative and the secretary shall affix and attest to the seal. (§ 21(2) ch 93 SLA 1959)

Sec. 10.25.360. Contents of articles of dissolution. (a) The articles of dissolution shall recite that they are executed under this chapter and shall state

(1) the name of the cooperative;

(2) the address of its principal office;

(3) the date on which the certificate of election to dissolve was filed by the commissioner;

(4) that there are no actions or suits against the cooperative;

(5) that all debts, obligations and liabilities of the cooperative have been paid and discharged or that adequate provisions has been made for them;

(6) that the provisions of §§ 320—360 of this chapter have been complied with.

(b) The president or vice president executing the articles of dissolution shall make and annex to the articles an affidavit stating that the statements contained in the articles are true. (§ 21(2) ch 93 SLA 1959)

Article 4. Miscellaneous Provisions.

Sec. 10.25.370. Filing of articles. Articles of incorporation, amendment, consolidation, merger, conversion, or dissolution, when executed and acknowledged and accompanied by the affidavits required by this chapter, shall be presented to the commissioner for filing. If the commissioner finds that the articles presented conform to the requirements of this chapter, he shall, upon the payment of the fees provided in this chapter, file the articles in the records of his office. Upon filing, the incorporation, amendment, consolidation, merger, conversion, or dissolution provided for is in effect. This section also applies to certificates of election to dissolve and affidavits executed under §§ 320—360 of this chapter. (§ 22 ch 93 SLA 1959)

Sec. 10.25.380. Nonprofit operation. A cooperative shall be operated on a nonprofit basis for the mutual benefit of its members and patrons. The bylaws of a cooperative or its contracts with members and patrons shall contain such provisions relating to the disposition of revenues and receipts as may be necessary and appropriate to establish and maintain its nonprofit and cooperative character. (§ 23 ch 93 SLA 1959)

Sec. 10.25.390. Disposition of property to secure indebtedness. The board of directors of a cooperative may, without authorization by the members of the cooperative, authorize the execution and delivery of mortgages or deeds of trust of, or the pledging or encumbering of, the property, assets, rights, privileges, licenses, franchises and permits of the cooperative, whether acquired or to be acquired, and wherever situated, as well as the revenues therefrom, upon the terms and conditions the board of directors determines, to secure an indebtedness of the cooperative to the United States of America or an agency or instrumentality of it. (§ 24(1) ch 93 SLA 1959)

Sec. 10.25.400. Limitations on disposition of all the property. A cooperative may not otherwise sell, mortgage, lease or dispose of or encumber all or a substantial portion of its property unless the transaction is authorized by the affirmative vote of not less than a majority of all the members of the cooperative. However, notwithstanding a provision of this chapter or any other provision of law, the board of directors may, upon the authorization of a majority of those members of the cooperative present at a meeting of the members, sell, lease or otherwise dispose of all or a substantial portion of its property to another cooperative or to the holder

of an evidence of indebtedness issued to the United States of America or an agency or instrumentality of it. (§ 24(2) ch 93 SLA 1959)

Sec. 10.25.410. Nonliability of members for debts of cooperative. No member is liable or responsible for any debts of the cooperative and the property of the members is not subject to execution therefor. (§ 25 ch 93 SLA 1959)

Sec. 10.25.420. Effect of recordation of mortgages. A mortgage, deed of trust, or other instrument executed by a cooperative, which affects real and personal property and which is recorded in the real property records in the city, borough or other recording districts in which the property is located or is to be located has the same effect as if recorded, filed or indexed as provided by law in the proper office in the city, borough or other recording district as a mortgage of personal property. All after-acquired property of the cooperative described or referred to as being mortgaged or pledged in a mortgage, deed of trust or other instrument is subject to the lien thereof immediately upon the acquisition of such property by the cooperative, whether or not the property was in existence at the time of the execution of the mortgage, deed of trust or other instrument. Recordation of such mortgage, deed of trust or other instrument constitutes notice and has the same effect with respect to after-acquired property as it has under the laws relating to recordation of property owned by the cooperative at the time of the execution of the mortgage, deed of trust or other instrument and described in it or referred to as being mortgaged or pledged thereby. The lien of such mortgage, deed of trust or other instrument upon personal property after its recordation continues for the period of time specified in the instrument without refiling or the filing of a renewal certificate, affidavit or other supplemental information required by the laws relating to the renewal, maintenance or extension of liens upon personal property. (§ 26 ch 93 SLA 1959)

Sec. 10.25.430. Validity of mortgage under Rural Electrification Act of 1936. A mortgage made by a cooperative organized under this chapter to the United States of America, or an agency or instrumentality of it, to secure indebtedness incurred under the Rural Electrification Act of 1936, as amended, is not void as against creditors of the mortgagor and subsequent purchasers and encumbrancers of the property in good faith for value because the mortgage is not accompanied by an affidavit of the parties to it, or an affidavit of the agent or attorney in fact of a party to it, that the mortgage is made in good faith to secure the amount named, and without a design to hinder, delay or defraud creditors. A mortgage made by a cooperative organized under this chapter to the

United States of America, or an agency or instrumentality of it to secure indebtedness incurred under the Rural Electrification Act of 1936, as amended, need not set forth the date upon which the indebtedness secured by it becomes due. (§ 26 ch 93 SLA 1959)

Sec. 10.25.440. Construction standards. Construction of electric lines and facilities, or telephone lines and facilities, by a cooperative shall, as a minimum requirement, comply with the standards of the National Electrical Safety Code in effect at the time of construction. (§ 27 ch 93 SLA 1959)

Sec. 10.25.450. Directors, officers or members as notaries. No person authorized to take acknowledgments under the laws of this state is disqualified from taking acknowledgments of instruments to which a cooperative is a party because he is an officer, director or member of the cooperative. (§ 28 ch 93 SLA 1959)

Sec. 10.25.460. Registered office and registered agent. Each cooperative shall have and continuously maintain in the state

(1) a registered office which may be, but need not be, the same as the location of the principal office;

(2) a registered agent who is an individual resident in the state and whose business office is identical with the registered office. (§ 29 ch 93 SLA 1959)

Sec. 10.25.470. Change of registered office or registered agent. A cooperative may change its registered office or change its registered agent, or both, upon filing in the office of the commissioner a statement setting forth

(1) the name of the cooperative;

(2) the address of its registered office;

(3) if the address of its registered office is changed, the address of the new registered office;

(4) the name of the registered agent;

(5) if its registered agent is changed, the name of its new registered agent;

(6) that the address of its registered office and the address of the business office and its registered agent, as changed, will be identical;

(7) that such change was authorized by resolution adopted by its board of directors. (§ 30 ch 93 SLA 1959)

Sec. 10.25.480. Execution and filing of statement. The statement of change of office or agent shall be executed by the cooperative by its president or vice president, verified by him, and directed to the commissioner. If the commissioner finds that the statement conforms to this chapter, he shall file it in his office. Upon the filing, the change of address of the registered office and the appoint-

ment of the registered agent, or both, as the case may be, is effective. (§ 30 ch 93 SLA 1959)

Sec. 10.25.490. Resignation of registered agent. A registered agent of a cooperative may resign by filing a written notice of resignation, executed in duplicate, with the commissioner. The commissioner shall immediately mail a copy of it to the cooperative at its registered office. The appointment of the agent terminates 30 days after receipt of the notice by the commissioner. (§ 30 ch 93 SLA 1959)

Sec. 10.25.500. Service of process on cooperative. (a) The registered agent of a cooperative is an agent of the cooperative upon whom process, notice or demand required or permitted by law to be served upon the cooperative may be served.

(b) When a cooperative fails to appoint or maintain a registered agent in the state, or when its registered agent cannot with reasonable diligence be found at the registered office, then the commissioner is an agent of the cooperative upon whom process, notice or demand may be served. (§ 31 ch 93 SLA 1959)

Sec. 10.25.510. Manner of service on commissioner. (a) Service on the commissioner is made by delivering to and leaving with him, or with a clerk having charge of the corporation department of his office, duplicate copies of the process, notice or demand. The commissioner shall immediately have one copy forwarded by registered mail, addressed to the cooperative at its registered office. Service on the commissioner is returnable in not less than 30 days.

(b) The commissioner shall keep a record of each process, notice and demand served upon him under this section, and shall record the time of service and his action with reference to it. (§ 31 ch 93 SLA 1959)

Sec. 10.25.520. Other means of service not affected. Nothing in §§ 500 and 510 of this chapter limits or affects the right to serve process, notice or demand required or permitted by law to be served on a cooperative in any other manner permitted by law. (§ 31 ch 93 SLA 1959)

Sec. 10.25.530. Fees. The commissioner shall charge and collect for

(1) filing articles of incorporation, $10;
(2) filing articles of amendment, $5;
(3) filing articles of consolidation or merger, $5;
(4) filing articles of conversion, $10;
(5) filing certificate of election to dissolve, $1;
(6) filing articles of dissolution, $5;
(7) filing certificate of change of principal office and designa-

tion or change of registered office and registered agent, $1. (§ 32 ch 93 SLA 1959)

Sec. 10.25.540. Taxation of cooperatives. Cooperatives under this chapter shall apply for a business license and pay the initial license fee as provided by the Alaska Business License Act (AS 43.70), as amended. Before March 1, 1961, and before March 1 of each year thereafter, each cooperative shall pay to the state, instead of state and local ad valorem, income and excise taxes which may be assessed or levied on or after January 1, 1960, a percentage of its gross revenue earned during the preceding calendar year. (§ 33 ch 93 SLA 1959; am § 1 ch 66 SLA 1960)

Sec. 10.25.550. Amount of gross revenue tax. The gross revenue tax shall be computed as follows:

(1) one per cent of gross revenue for cooperatives which have furnished electric energy and power, or telephone service, to consumers for less than five years as of December 31 of the preceding calendar year;

(2) two per cent of gross revenue for cooperatives which have furnished electric energy and power, or telephone service, to consumers for five years or longer as of December 31 of the preceding calendar year. (§ 33 ch 93 SLA 1959; am § 1 ch 66 SLA 1960)

Sec. 10.25.560. Manner of computing gross revenue. For the purpose of computing gross revenue, an electric cooperative shall include only that revenue which has been derived from electric energy which it distributes to its consumers. It shall not include revenue derived from the sale or transmission of electric energy and power to, or on behalf of, another distributor. Gross revenue of a telephone cooperative includes all revenues earned from local and toll services. (§ 33 ch 93 SLA 1959)

Sec. 10.25.570. Refund of gross revenue tax to local taxing authorities. The proceeds of the gross revenue tax, less the amount expended by the state in its collection, shall be refunded to the local taxing authorities by action of the legislature, in the proportion that the revenue was earned within the geographical areas of the taxing authorities. However, taxes collected on gross revenue earned outside a local taxing authority shall be retained by the state and deposited into its general fund. (§ 33 ch 93 SLA 1959)

Sec. 10.25.580. Inventory and fixtures subject to taxation. The inventory and fixtures of a business operated by a cooperative incidental to the furnishing of central station electric service, including, without limitation, appliance stores or departments, is not exempt from ad valorem taxes. The inventory and accounts of these businesses shall be separately maintained and taxes shall be paid upon them as provided by law. (§ 33 ch 93 SLA 1959)

Sec. 10.25.590. Connection and interconnection of facilities. A telephone cooperative organized or doing business under this chapter, hereafter designated as applicant, may require a person furnishing telephone service to the public in the state, hereafter designated as company, to interconnect its lines, facilities or systems with, or otherwise make available the lines, facilities or systems to, the applicant's telephone lines, facilities or systems, in order to provide a continuous line of communication for the applicant's subscribers. If the company and the applicant are unable to agree upon the terms and conditions of interconnection, including compensation, the superior court shall, upon petition of the parties, or either of them, establish the terms and conditions. The terms and conditions shall be reasonable and nondiscriminatory. (§ 34 ch 93 SLA 1959)

Sec. 10.25.690. Correction of defectively organized cooperatives. If a cooperative has filed defective articles of incorporation, or has failed to do all things necessary to perfect its corporate organization, it may file corrected articles of incorporation, or amend the original articles, and do and perform all acts and things necessary for the correction of the defects. The action so taken is valid and binding upon all persons concerned. The capacity of the cooperative to file corrected articles of incorporation or amendments to the original articles, or to do and perform all acts and things necessary, may not be questioned. (§ 37 ch 93 SLA 1959)

Article 5. General Provisions.

Sec. 10.25.610. Purpose. Cooperative, nonprofit, membership corporations may be organized under this chapter for the purpose of supplying electric energy or telephone service and promoting and extending the use of these services. (§ 2 ch 93 SLA 1959)

Sec. 10.25.620. Chapter extended to existing cooperatives. This chapter applies to all nonprofit cooperatives organized under any other law of the state for the purpose of supplying electric energy and power, or telephone service, to its members, or for the purpose of promoting and extending the use of electric energy and power, or telephone service. These cooperatives are subject to this chapter as if originally organized under it. (§ 36 ch 93 SLA 1959)

Sec. 10.25.630. Construction of chapter. This chapter is complete in itself and is controlling. The provisions of any other law of the state relating to the organization of a corporation, except as pro-

vided in this chapter, do not apply to a cooperative organized under this chapter. The enumeration of an object, purpose, power, manner, method or thing does not exclude like or similar objects, purposes, powers, manners, methods or things. (§ 35 ch 93 SLA 1959)

Sec. 10.25.640. Definitions. As used in this chapter

(1) "commissioner" means the commissioner of commerce;

(2) "cooperative" means a corporation organized under this chapter or which becomes subject to this chapter in the manner provided in this chapter;

(3) "person" means a natural person, firm, association, corporation, business trust, partnership, federal agency, state or political subdivision, or an agency of the state or political subdivision, or a body politic;

(4) "telephone service" means communication service where voice communication through the use of electricity is the primary intended use, and includes all telephone lines, facilities or systems used in the rendition of this service. (§ 3 ch 93 SLA 1959; am § 10 ch 64 SLA 1959; am § 2 ch 1 SLA 1961)

Sec. 10.25.650. Short title. This chapter may be cited as the Electric and Telephone Cooperative Act. (§ 1 ch 93 SLA 1959)

Chapter 30. Cemetery Associations.

Sec. 10.30.010. Formation of cemetery association. Five or more persons who are residents of the same recording district may form themselves into a cemetery association, and elect at least three of their members to serve as trustees, and one member as clerk. The trustees and the clerk hold office at the pleasure of the association. (§ 36-5-1 ACLA 1949)

Am. Jur. and C.J.S. references.—
10 Am. Jur., Cemeteries, §§ 5, 10, 19.
14 C.J.S. Cemeteries §§ 5 to 14.

Sec. 10.30.020. Records. The clerk shall keep a record of the proceedings of the meetings of the association, certify to and file one copy of the record together with the name of the association

IMMEDIATE NEWS RELEASE

November 18, 1982

The Honorable Senator William Proxmire
United States Senate
Washington, D. C. 20510

Dear Senator Proxmire:

I speak for a group of Matanuska Electric Association, Chugach Electric Association and Homer Electric Association members, requesting your immediate assistance in plugging a rat hole, at least temporarily, which tens of millions of Federal dollars have already slid down.

The Chugach Electric Association, a Rural Electric Association electric utility located in Anchorage, Alaska requested, as of November 12, 1982 yet another Federal loan for $37.7 million dollars to cover massive cost overruns. One year ago, Chugach Electric received $41 million dollars from the Rural Electric Association. That loan too was for the purpose of paying for cost overruns on the same project that was started in 1976 and was to be completed in 1979. Chugach Electric Association, Matanuska Electric Association and Homer Electric Association are in deep financial trouble. The reason is the high salaries, mismanagement and duplicity in their work. The former General Manager of Chugach Electric, Bud Schultz, was paid $145,000 (plus a retirement fee of $400,000 in cash) for wages, plus 32% fringe benefits which totals $191,400 per year. The Manager of Matanuska Electric Association, Jim Palin, draws $73,000 plus 40% fringe benefits, which totals $102,000 per year. Homer Electric Association is just as bad. Chugach Electric for the most part generates the bulk of the electric power in southcentral Alaska. Matanuska Electric Association buys 90% of its power needs from Chugach Electric. Ten percent is bought from the Eklutna Power Authority. Homer Electric Co-op buys 100% of their power needs from Chugach Electric Association.

There are less than 100,000 monthly billing members buying electric power from Chugach Electric, Matanuska Electric, Homer Electric and the Municipal Light & Power Co. Between the four utilities in southcentral Alaska, there are approximately 525 bureaucrats, plus four complete management organizations where one could do the job.

Chugach Electric Association has been involved in a major management scandal, touching on salaries, benefits and contracts written under questionable authority. Chugach reports a 100% cost overrun on a power development project at the Beluga Field near Anchorage. As customers we are forced to pay these outrageous costs.

Senator Proxmire, I'm asking for your help in the following areas:

1. Stop the REA from any further action on Chugach Electric Associations $37.7 million dollar loan for cost overruns until there is a complete audit.

2. Request a complete audit of REA by the GAO, to determine the following:

a. Propriety of the entire Beluga Project including salaries, contracts let on competitive bid, cable laying operations and vessels hired to do the work.

b. Was the 1977 Foreign Corrupt Business Practices Act violated in the purchase of generators and the cable laying operations from a foreign country?

c. Were contracts let under Federal guide lines for competitive bid? Were contractors who were involved in the construction projects for Chugach Electric owned by any Chugach employees?

d. What justifies the 100% cost overruns?

e. What savings would there be if three REA Co-ops, along with the Municipal Light and Power were merged into one management organization with three divisions.

a) division of generation, b) division of transmission and distribution, and, c) division of administration.

f. How many times have major line items been shifted in Chugach Electric, Homer Electric and Matanuska Electric? And, do these shifts indicate budget fraud? Example: Matanuska Electric Association. I, as an elected Board Member refused to sign a waiver for borrowing $1,646,000 this past August 1982. James F. Palin, Manager of Matanuska Electric Association stated at the time this money was being borrowed for a new headquarters building in Palmer, Alaska. The Board now has the intention of using this money for other projects besides building this unnecessary building. Is this obtaining Federal money under false pretenses?

g. Attorney Roger Kemppel represents the three above mentioned utilities at the same time. Is this a conflict of interest?

My concern is to stop the flow of millions of dollars of Federal funds which flows through the Chugach Electric Association, which we the customer members must eventually pay. There are many people who would be more than happy to talk to GAO investigators in Alaska in order to get to the bottom of this case.

In closing I would like to say that if there are any violations of Federal laws then that information should be turned over to the Federal Grand Jury for prosecution of the individuals who are involved in this scandal.

An early reply would be deeply appreciated.

Sincerely,

Tom Staudenmaier, Director
of the Board, Matanuska
Electric Association

December 13, 1982

The Honorable Senator Ted Stevens
United States Senate
Washington, D. C. 20510

Dear Senator Stevens:

I speak for a group of Matanuska Electric Association, Chugach Electric Association and Homer Electric Association members, requesting your immediate assistance in plugging a rat hole, at least temporarily, which tens of millions of Federal dollars have already slid down.

The Chugach Electric Association, a Rural Electric Association electric utility located in Anchorage, Alaska requested, as of November 12, 1982 yet another Federal loan for $37.7 million dollars to cover massive cost overruns. One year ago, Chugach Electric received $41 million dollars from the Rural Electric Association. That loan too was for the purpose of paying for cost overruns on the same project that was started in 1976 and was to be completed in 1979. Chugach Electric Association, Matanuska Electric Association and Homer Electric Association are in deep financial trouble. The reason is the high salaries, mismanagement and duplicity in their work. The former General Manager of Chugach Electric, Bud Schultz, was paid $145,000 (plus a retirement fee of $400,000 in cash) for wages, plus 32% fringe benefits which totals $191,400 per year. The Manager of Matanuska Electric Association, Jim Palin, draws $73,000 plus 40% fringe benefits, which totals $102,000 per year. Homer Electric Association is just as bad. Chugach Electric for the most part generates the bulk of the electric power in southcentral Alaska. Matanuska Electric Association buys 90% of its power needs from Chugach Electric. Ten percent is bought from the Eklutna Power Authority. Homer Electric Co-op buys 100% of their power needs from Chugach Electric Association.

There are less than 100,000 monthly billing members buying electric power from Chugach Electric, Matanuska Electric, Homer Electric and the Municipal Light & Power Co. Between the four utilities in southcentral Alaska there are approximately 525 bureaucrats, plus four complete management organizations where one could do the job.

Chugach Electric Association has been involved in a major management scandal, touching on salaries, benefits and contracts written under questionable authority. Chugach reports a 100% cost overrun on a power development project at the Beluga Field near Anchorage. As customers we are forced to pay these outrageous costs.

Senator Stevens, I'm asking for your help in the following areas:

1. Stop the REA from any further action on Chugach Electric Associations $37.7 million dollar loan for cost overruns until there is a complete audit.

2. Request a complete audit of REA by the GAO, to determine the following:

a. Propriety of the entire Beluga Project including salaries, contracts let on competitive bid, cable laying operations and vessels hired to do the work.

b. Was the 1977 Foreign Corrupt Business Practices Act violated in the purchase of generators and the cable laying operations from a foreign country?

c. Were contracts let under Federal guide lines for competitive bid? Were contractors who were involved in the construction projects for Chugach Electric owned by any Chugach employees?

Seven to ten million dollars in contracts were given out without competitive bid by the manager of Chugach Electric, Bud Schultz.

d. What justifies the 100% cost overruns?

e. What savings would there be if three REA Co-ops, along with the Municipal Light & Power were merged into one management organization with three divisions.

a) division of generation, b) division of transmission and distribution, and, c) division of administration.

f. How many times have major line items been shifted in Chugach Electric, Homer Electric and Matanuska Electric? And, do these shifts indicate budget fraud? Example: Matanuska Electric Association. COMMITTEE ON APPROPRIATIONS
WASHINGTON, D.C. 20510

January 17, 1983

Mr. Tom Staudenmaier
Director of the Board
Matanuska Electric Association
P.O. Box 1603
Eagle River, Alaska 99577

Dear Mr. Staudenmaier:

This is in further reference to our conversation with Senator Stevens' Administrative Assistant, Dennis Fradley, about your visit to Washington and your interest in discussing with a member of the staff your concerns about the use of Federal funds by the Chugach Electric Association, the Homer Electric Association and the Matanuska Electric Association. This is also to acknowledge receipt of your letter about this situation.

As Dennis advised you, Senator Stevens has been out of town during the Congressional recess, so I was requested by Dennis to meet with you when you came to Washington. I understand from Rick Agnew of Congressman Young's office that you did discuss with him your belief in the need for a GAO investigation of the financial practices of these electric associations. I was prepared to meet with you last Monday, January 10th, and I do regret that we did not get together. However, I will make sure that your letter about this matter is brought to Senator Stevens' attention when he returns to Washington.

Sincerely,

Susan L. Arnold

WASHINGTON, D.C. 20510

February 2, 1983

Mr. Tom Staudenmaier
Post Office Box 1603
Eagle River, Alaska 99577

Dear Mr. Staudenmaier:

This is to follow up on the brief conversation you had with Joseph Darnell on my Washington, D.C. staff about a possible GAO study.

A GAO study of Chugach and the Rural Electrification Administration does not appear to be appropriate. It is my understanding that Chugach Electric Association has recently undergone two separate audits, one by REA and another for the Alaska Public Utilities Commission. If you have concerns about Chugach's management, then they should be directed to the organizations charged with overseeing Chugach.

With best wishes,

Cordially,

TED STEVENS

Dear Mr. Staudenmaier:

Thank you for contacting my office requesting that I initiate a General Accounting Office (GAO) investigation into the activities of Chugach Electric.

In light of the fact that the REA has recently completed a complete audit of Chugach, along with the fact that a private management audit completed at the request of the Alaska Public Utilities Commission has also recently been completed, I do not believe the disruption and expense associated with a GAO investigation is warranted at this time.

I appreciate your contacting my office about this matter.

Dear Mr. Staudenmaier:

I appreciated being informed of your efforts regarding the proposed merger of Alaskan electrical co-ops and the suggested audits of R.E.A. and Chugach Electric Association.

After reviewing the materials you sent and the investigative work prepared by staff, I have concluded that there is not a justifiable basis at this time to request an audit of R.E.A. by the General Accounting Office. Many of the questions you have raised regarding management practices have been answered by internal audits and audits conducted by R.E.A. and the Alaska Public Utilities Commission. In the case of Chugach Electric Association, changes were recommended and adopted by the Association. Allegations of serious wrong-doing were not substantiated.

I hope that this information is useful to you. Again, I appreciated hearing from you regarding these matters and will keep your concerns in mind. In the meantime, if you have any further comments or questions regarding this matter, please contact me.

Sincerely,

DON YOUNG
Congressman for All Alaska

March 30, 1983

Charles A. Bowsher
Comptroller General
U. S. General Accounting Office
Washington, D. C. 20510

Dear Mr. Bowsher:

I speak for a group of Matanuska Electric Association, Chugach Electric Association and Homer Electric Association members, requesting your immediate assistance in plugging a rat hole, at least temporarily, which tens of millions of Federal dollars have already slid down.

The Chugach Electric Association, a Rural Electric Association electric utility located in Anchorage, Alaska requested, as of November 12, 1982 yet another Federal loan for $37.7 million dollars to cover massive cost overruns. One year ago, Chugach Electric received $41 million dollars from the Rural Electric Association. That loan too was for the purpose of paying for cost overruns on the same project that was started in 1976 and was to be completed in 1979. Chugach Electric Association, Matanuska Electric Association and Homer Electric Association are in deep financial trouble. The reason is the high salaries, mismanagement and duplicity in their work. The former General Manager of Chugach Electric, Bud Schultz, was paid $145,000 (plus a retirement fee of $400,000 in cash) for wages, plus 32% fringe benefits which totals $191,400 per year. The Manager of Matanuska Electric Association, Jim Palin, draws $73,000 plus 40% fringe benefits, which totals $102,000 per year. Homer Electric Association is just as bad. Chugach Electric for the most part generates the bulk of the electric power in southcentral Alaska. Matanuska Electric Association buys 90% of its power needs from Chugach Electric. Ten percent is bought from the Eklutna Power Authority. Homer Electric Co-op buys 100% of their power needs from Chugach Electric Association.

There are less than 100,000 monthly billing members buying electric power from Chugach Electric, Matanuska Electric, Homer Electric and the Municipal Light & Power Co. Between the four utilities in southcentral Alaska, there are approximately 525 bureaucrats, plus four complete management organizations where one could do the job.

Chugach Electric Association has been involved in a major management scandal, touching on salaries, benefits and contracts written under questionable authority. Chugach reports a 100% cost overrun on a power development project at the Beluga Field near Anchorage. As customers we are forced to pay these outrageous costs.

Mr. Bowsher, I'm asking for your help in the following areas:

1. Stop the REA from any further action on Chugach Electric Associations $37.7 million dollar loan for cost overruns until there is a complete audit.

2. Request a complete audit of REA by the GAO, to determine the following:

a. Propriety of the entire Beluga Project including salaries, contracts let on competitive bid, cable laying operations and vessels hired to do the work.

b. Was the 1977 Foreign Corrupt Business Practices Act violated in the purchase of generators and the cable laying operations from a foreign country?

c. Were contracts let under Federal guide lines for competitive bid? Were contractors who were involved in the construction projects for Chugach Electric owned by any Chugach employees?

Seven to ten million dollars in contracts were given out without competitive bid by the manager of Chugach Electric, Bud Schultz.

d. What justifies the 100% cost overruns?

e. What savings would there be if three REA Co-ops, along with the Municipal Light and Power were merged into one management organization with three divisions.

a) division of generation, b) division of transmission and distribution, and, c) division of administration.

f. How many times have major line items been shifted in Chugach Electric, Homer Electric and Matanuska Electric? And, do these shifts indicate budget fraud? Example: Matanuska Electric Association. I, as an elected Board Member refused to sign a waiver for borrowing $1,646,000 this past August 1982. James F. Palin, Manager of Matanuska Electric Association stated at the time this money

was being borrowed for a new headquarters building in Palmer, Alaska. The Board now has the intention of using this money for other projects besides building this unnecessary building. Is this obtaining Federal money under false pretenses?

g. Attorney Roger Kemppel represents the three above mentioned utilities at the same time. Is this a conflict of interest?

My concern is to stop the flow of millions of dollars of Federal funds which flows through the Chugach Electric Association, which we the customer members must eventually pay. There are many people who would be more than happy to talk to GAO investigators in Alaska in order to get to the bottom of this case.

In closing I would like to say that if there are any violations of Federal laws then that information should be turned over to the Federal Grand Jury for prosecution of the individuals who are involved in this scandal.

I originally contacted Sen. William Proxmire regarding a full GAO audit outside the REA. He in turn referred me to our State Delegates - Stevens, Murkowski & Young.

I sent a request to our Delegates and met with them or their Staff personally concerning this in January 1983 in Washington, D. C. and their response was that they were not going to initiate a GAO investigation. It appears that they are proud of the way Chugach handles their business affairs and approve of the past practices of massive cost overruns. Some of their close friends are the recipients of the $9 million dollar contracts that went out without competitive bid.

In light of the poor performance of our Alaska Congressional Delegation, Sen. Proxmire referred me directly to the Anchorage GAO office, Ronald D. Kelso, Site Coordinator.

An early reply would be deeply appreciated.

Sincerely,

Tom Staudenmaier

Mr. Tom Staudenmaier
Director of the Board
Matanuska Electric Association
P.O. Box 1603
Eagle River, AK 99577

Dear Mr. Staudenmaier:

Your letter of March 30, 1983, which was referred to our Division on April 22, 1983, requested a complete audit of the Rural Electrification Administration (REA) activities relative to the Matanuska, Chugach, and Homer Electric Associations.

The General Accounting Office is an agency in the legislative branch of the Government whose principal purposes are to assure compliance by agencies of the executive branch with Federal statutes governing the expenditure of public monies appropriated by the Congress and to assist in improving the effectiveness and efficiency with which Government programs are administered. However, in the execution of these functions, our reporting responsibility runs to the Congress as a whole, to chairmen of committees and subcommittees, and to individual Members of Congress who request that we undertake work.

The Department of Agriculture has primary responsibility for assuring that REA activities are effectively administered. One way the Department accomplishes this is through periodic audits of REA by the Office of Inspector General. Accordingly, we have referred your request for an audit to the Department's Office of Inspector General for its consideration.

Sincerely yours,

Robert E. Allen, Jr.

Mr. Tom Staudenmaier
Executive Director
Staudenmaier Electric Merger Committee
P.O. Box 1603
Eagle River, Alaska 99577

Dear Mr. taudenmaier:

Your November 17 telegram to Secretary Block was referred to this office for reply.

Our investigation of your complaint concerning Chugach Electric Association, Homer Electric Association, and Matanuska Electric Association is complete and a report (Hq-999-3) was issued on November 10, 1983.

The investigative report is currently being reviewed by officials of the Department to determine whether enforcement action may be appropriate. Since release of the report at this time would interfere with enforcement proceedings, it is exempt from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552(b)(7)(A). Therefore, your request for the report is denied.

You may appeal this decision to the Inspector General, U.S. Department of Agriculture, Washington, D.C. 20250.

Sincerely,

L. L. FREE
Assistant Inspector General
Administration

STAUFFENBERG'S

November 22, 1983

The Honorable John R. Block
Secretary of Agriculture
14th St. & Independence Ave., S. W.
Washington, D. C. 20250

Dear Mr. Block:

On November 18, 1982, I made a request to Senator Proxmire for a complete in-depth, Federal, criminal audit of Chugach Electric Assoc., Homer Electric Assoc., and Matanuska Electric Assoc., concerning massive cost overruns on the Beluga project and what major line items had been shifted.

Senator Proxmire replied that since Dept. of Defense funds were not directly involved, this request should be directed to our Alaska Delegates, Stevens, Young & Murkowski.

I sent a written request to our Delegates December 13th, 1982, and met with them or their Staff personally in Washington, D. C. in January 1983, and their response was to go to hell.

Letters were sent to Senator Proxmire by the management of MEA, HEA and the Rural Electrification Administration in an effort to kill this investigation. In light of the poor performance of our Alaska Congressional Delegation, Senator Proxmire referred me directly to the Comptroller General, Charles A. Bousher, United States General Accounting Office in Washington, D. C.

On April 25, 1983 Control No. 29514 was assigned to this case.

June 6th, 1983 special agents for the Office of Inspector General, Security and Special Operations, U. S. Dept. of Agriculture arrived in Anchorage from Washington, D. C. and from Kansas City, Missouri.

I was informed that on November 10th, 1983 the criminal investigation was completed by special agent Joe Rotunno.

I hereby request an immediate response to the disposition of this investigation concerning this scandal involving REA funds.

Will there be criminal prosecution of the individuals involved? If not, why not?

Will there be civil prosecution? If not, why not?

If the Department of Agriculture does not seek criminal or civil prosecution, then I hereby request a copy of the findings of that investigation.

Sincerely,

Tom Staudenmaier
Executive Director

President Ronald Reagan
The White House
Washington, D. C. 20250

Dear President Reagan:

On November 18, 1982, I made a request to Senator Proxmire for a complete in-depth, Federal, criminal audit of Chugach Electric Assoc., Homer Electric Assoc., and Matanuska Electric Assoc., concerning massive cost overruns on the Beluga project and what major line items had been shifted.

Senator Proxmire replied that since Dept. of Defense funds were not directly involved, this request should be directed to our Alaska Delegates, Stevens, Young & Murkowski.

I sent a written request to our Delegats December 13th, 1982, and met with them or their Staff personally in Washington, D. C. in January 1983, and their response was to go to hell.

Letters were sent to Senator Proxmire by the management of MEA, HEA and the Rural Electrification Administration in an effort to kill this investigation. In light of the poor performance of our Alaska Congressional Delegation, Senator Proxmire referred me directly to the Comptroller General. Charles A. Bousher, United States General Accounting Office in Washington,D.C

On April 25, 1983 Control No. 29514 was assigned to this case.

June 6th, 1983 special agents for the Office of Inspector General, Security and Special Operations, U. S. Dept. of Agriculture arrived in Anchorage from Washington, D. C. and from Kansas City, Missouri.

I was informed that on November 10th, 1983, the criminal investigation was completed by special agent Joe Rotunno.

A reply was received on November 23rd, 1983 from the Department of Agriculture indicating that report #Hq. 999-3 was issued on November 10th, 1983. This criminal investigative report is currently being reviewed by officials of the Department to determine whether enforcement action may be appropriate.

STAUDENMAIER'S
ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

Mr. President, through hours of research, we have uncovered the fact that Stevens, Young & Murkowski have received substantial financial contributions from the Action Committee for Rural Electrification, 1800 Massachusetts Ave. N. W., Washington, D. C. 20036.

According to the Federal Election Commission Reports, one of the congressional delegates from Alaska received a substantial contribution from Wayne H. Henson, 1701 E. 1st Avenue, Anchorage, Ak. 99501. His employer is York Steel, who is one of the prime suspects in this $100 million dollar cost overrun.

We have followed your presidency the last three years in the areas of your efforts in uncovering waste, mismanagement and corruption in the Federal system. In light of Stevens, Young & Murkowski's refusal to help clean up their own backyard, they may try to quash and cover up this investigation to protect some of their friends who are involved.

Mr. President, I ask you to look into the matter of this incident.

Will there be criminal prosecution of the individuals involved?

Will there be civil prosecution? If not, why not?

If the Department of Agriculture does not seek criminal or civil prosecution, then I hereby request a copy of the findings of that investigation.

We hereby request an immediate response to the disposition of this investigation concerning this scandal involving REA funds. It affects hundreds of thousands of Alaskans.

Respectfully yours,

Tom Staudenmaier
Executive Director

THE WHITE HOUSE

WASHINGTON

February 22, 1984

Dear Mr. Staudenmaier:

This is in response to your recent letter to the President, which was forwarded to my office for reply.

Please be advised that we have forwarded your correspondence to the General Counsels at the Department of Agriculture and the Federal Elections Commission so that it may receive appropriate consideration by those Government officials responsible for review of such matters. It is established White House policy not to become involved in particular investigatory matters pending before a Federal department such as the Department of Agriculture, or which come under the jurisdiction of an independent agency such as the Federal Elections Commission.

I am confident you will understand the need for this policy as a means for maintaining public confidence in the effective and impartial administration of our laws.

With best regards,

Sincerely,

Fred F. Fielding
Counsel to the President

Re: Telephone Conversation
of November 15th, 1983

Dear Sirs:

Please find enclosed the newspaper clippings that you asked for. A copy of a letter to U. S. Senator Proxmire, the Government Accounting Office, and all other pertinent data.

On November 10th, 1983 a criminal audit was completed by Federal agents from the Office of Security and Special Operations, U. S. Dept. of Agriculture.

There is concern on our part that an effort is underway to cover up these findings.

I would encourage you to contact Secretary of Agriculture, John R. Block.

Sincerely yours,

Tom Staudenmaier
Executive Director

March 31, 1983

Tom Staudenmaier
Staudenmaier's Electric Merger Committee
Post Office Box 8-890
Anchorage, Alaska 99508

Dear Tom:

You have asked me to confirm that the Electric Merger Committee, funded separately and independently of the Alaska Conservative Political Action Committee, is not subject to the reporting requirements of Alaska's Campaign Disclosure Law, AS 15.13, with regard to elections held by private entities such as the Matanuska Electric Association and the Chugach Electric Association. The reason for this is that the disclosure requirements of AS 15.13 apply only to state and municipal elections. Hence, efforts to influence the outcome of the election held by a private entity are not reportable; advertising related to such a private election is not within the APOC's jurisdiction and is not required to carry the identification specified by AS 15.13.090.

In the event that the subject of a merger appears on the ballot at a Municipality of Anchorage election, however, efforts to influence the outcome of that municipal election would be reportable under AS 15.13 and required to be identified.

Sincerely,

ALASKA PUBLIC OFFICES COMMISSION

Dear Mr. Staudenmaier:

In reference to your letter of December 7, to MEA President Robert Husted, in which you basically requested a $25,000 contribution from MEA to the Staudenmaier Electric Merger Committee, please be advised that the MEA Board of Directors voted against making a contribution to your Committee. Since you were present at that meeting, I feel confident that you understand the reasons for the Boards' decision. In addition, and as you will no doubt recall, on November 9, 1982, the Board included the following comment in Resolution No. 1018, "WHEREAS, the Board of Directors of Matanuska Electric Association, Inc. because it has not yet been furnished with sufficient information and verified facts in support of the merger plan, has taken no position on this plan." To the best of my knowledge, the Board's position has not changed.

Should you have need for additional information, please send us a letter detailing the request, and MEA will certainly consider an appropriate response.

Happy Holidays to you and yours.

Sincerely,

James F. Palin

ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

NEWS RELEASE Nov. 17, 1983

PROPOSED NEW BI-LAWS OF THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP, TO BE VOTED ON BY THE MEMBERS OF CHUGACH ELECTRIC ASSOC., MATANUSKA ELECTRIC ASSOC. AND HOMER ELECTRIC ASSOC., UNDER TITLE 10, STATUATORY LAW, CHAPTER 25, ELECTRICAL AND TELEPHONE CO-OPERATIVE ACT, ARTICLE II, MERGER AND CONSOLIDATION, SECTION 10.25.240.

1. THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP'S BOARD OF DIRECTORS SHALL CONSIST OF 11 MEMBERS. THE CO-OP'S HEADQUARTERS SHALL BE IN ANCHORAGE, ALASKA.

RATIONALE: EVERY AREA IN SOUTHCENTRAL ALASKA IS EQUALLY REPRESENTED BY POPULATION USING THE SAME REAPPORTIONMENT METHOD AS THE ALASKA STATE SENATE.

2. THE BOARD OF DIRECTORS SHALL NOT SERVE MORE THAN ONE CONSECUTIVE FOUR YEAR TERM.

RATIONALE: NEW PEOPLE WILL BRING NEW IDEAS TO THE BOARD OF DIRECTORS, WITHOUT LETTING ANY CERTAIN GROUP DEVELOP A POWER STRUCTURE.

3. MONTHLY BOARD MEETINGS SHALL BE CONVENED ON THE SECOND SATURDAY OF EACH MONTH, CONVENING AT 10:00 AM. THE MEETINGS SHALL BE HELD ON A ROTATING BASIS STARTING IN ANCHORAGE. THE NEXT MONTHLY MEETING SHALL BE IN THE MAT/SU VALLEY. FOLLOWED BY THE KENAI PENINSULA. EACH OF THESE AREAS SHALL HAVE FOUR MEETINGS PER YEAR, FOLLOWING THE ABOVE ROTATION SCHEDULE. THIS ROTATION SHALL NOT BE CHANGED UNLESS VOTED ON BY THE MEMBERSHIP AT LARGE.

RATIONALE: THIS WILL GIVE THE CONSUMER/OWNERS OF THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP MAXIMUM EXPOSURE TO THE BOARD OF DIRECTORS FOR THEIR MAXIMUM PARTICIPATION.

STAUDENMAIER'S
ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

4. ALL OFFICIAL MEETINGS, INCLUDING WORK SESSIONS, SHALL BE TAPED, TRANSCRIBED AND THE ORIGINAL COPY HELD AT THE CO-OPS HEADQUARTERS FOR SEVEN YEARS. THE TAPING SYSTEM SHALL BE OF THE SAME QUALITY AS THAT OF THE ANCHORAGE MUNICIPAL ASSEMBLY. ALL ISSUES SHALL BE RECORDED BY ROLL CALL VOTE.

RATIONALE: TO MAINTAIN A COMPLETE RECORD OF THE BUSINESS THAT TRANSPIRES WITHIN THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP.

5. A COMPLETE, CERTIFIED COPY OF THESE TRANSCRIPTS SHALL BE POSTED AT EACH LOCATION OF THE AK. SOUTHCENTRAL ELECTRIC CO-OP'S PLACE OF OFFICIAL BUSINESS, AND MADE AVAILABLE TO THE MEMBERSHIP WITHIN 48 HOURS OF A BOARD MEETING. THESE ARE TO BE UPDATED ON A MONTHLY BASIS.

RATIONALE: TO GIVE THE CONSUMER/OWNER IMMEDIATE ACCESS TO TRANSACTIONS THAT OCCURED AT THE BOARD MEETINGS OR WORK SESSIONS.

6. THE GENERAL MANAGER SHALL SERVE FOR A ONE 5 YEAR TERM. THE BOARD OF DIRECTORS CAN REPLACE HIM OR HER AT THEIR DISCRESSION AT ANY TIME DURING HIS/HER TERM IF HIS/HER SERVICES ARE BELOW EXPECTATIONS.

RATIONALE: "NEW LEADERSHIP BRINGS NEW AND FRESH IDEAS".

7. ALL SALARIES AND BENEFITS OF THE EMPLOYEES OF THE AK. SOUTHCENTRAL ELECTRIC CO-OP SHALL BE MADE PUBLIC TO THE MEMBERSHIP, WITH AN UPDATE EVERY SIX MONTHS. BENEFITS SHALL NOT EXCEED 20% OF THE BASE SALARY. THE SALARIES, BENEFITS AND JOB TITLES SHALL BE POSTED IN ALL OF THE OFFICIAL OFFICES OF THE CO-OP FOR MEMBERSHIP REVIEW.

RATIONALE: THE MEMBERSHIP OWNS THE CO-OP. THE MEMBERS ARE THE EMPLOYER AND THEREFORE SHOULD BE AWARE OF THE SALARIES AND BENEFITS THAT THEIR EMPLOYEES ARE BEING PAID.

STAUDENMAIER'S
ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

8. THE SALARY OF THE GENERAL MANAGER SHALL NOT EXCEED THE BASE SALARY OF THE GOVERNOR OF THE STATE OF ALASKA.

RATIONALE: THERE ARE THOUSANDS OF AMERICAN MEN AND WOMEN WHO ARE QUALIFIED, WHO ARE LOOKING FOR JOBS.

9. IT SHALL TAKE A 2/3 VOTE BY THE BOARD OF DIRECTORS TO IMPLEMENT A PAY RAISE FOR THE EMPLOYEES.

RATIONALE: TO CONTROL OVERHEAD EXPENSES AND HELP KEEP THE COST OF THE ELECTRIC UTILITIES REASONABLE.

10. THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP SHALL BE A NON-PROFIT ORGANIZATION AND THEREFORE SHALL NOT ENGAGE IN ANY NEW CONSTRUCTION. NEW CONSTRUCTION IS DEFINED AS: ANY ITEMS THAT ARE NOT ALREADY PHYSICALLY IN PLACE, INCLUDING TEMPORARY POWER. THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP SHALL BE DESIGNATED AND SHALL FUNCTION AS A SERVICE AND MAINTENANCE ORGANIZATION. NEW CONSTRUCTION SHALL BE PUT OUT TO COMPETITIVE BID TO PRIVATE ENTERPRISE.

RATIONALE: THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP IS A NON-PROFIT ORGANIZATION AND SHALL NOT COMPETE WITH A PROFIT MAKING ORGANIZATION. LABOR PRODUCTIVITY IS MUCH GREATER IN PRIVATE INDUSTRY.

11. MAINTENANCE AND SERVICE PERSONNEL UNDER A COLLECTIVE BARGAINING AGREEMENT WITH THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP SHALL RECEIVE 85% OF CONSTRUCTION SCALE, PLUS BENEFITS.

RATIONALE: THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP IS ESTABLISHED AS A MAINTENANCE AND SERVICE ORGANIZATION, NOT AS A CONSTRUCTION COMPANY. THEREFORE THE MEN AND WOMEN WHO WORK SERVICE AND MAINTENANCE ARE NOT ENTITLED TO

STAUDENMAIER'S
ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

FULL CONSTRUCTION SCALE. THOSE WHO WANT TO RECEIVE FULL CONSTRUCTION SCALE SHOULD TAKE THEIR TALENTS AND WORK IN THE CONSTRUCTION INDUSTRY. THIS IS A FAIR AND EQUITABLE WAGE AND THE SAME TYPE OF WAGE PLAN USED BY ALYESKA PIPELINE SERVICE CO.

12. THE BELUGA POWER STATION SHALL BE DESIGNATED AS LOCAL HIRE AND SERVICE AND MAINTENANCE SHALL BE RUN ON THREE 8 HOUR SHIFTS, TWENTY-FOUR HOURS PER DAY, SEVEN DAYS A WEEK.

RATIONALE: CUT DOWN COST OF OVERHEAD TO MAINTAIN THE MEN AND WOMEN WHO WORK AT BELUGA. CREATE MORE JOBS BY CUTTING OVERTIME.

13. BID PROCEDURES SHALL FOLLOW THE BID PROCEDURES OF THE STATE OF ALASKA ON ALL NEW CONSTRUCTION PROJECTS. ANY VIOLATIONS OF BID PROCEDURES SHOULD BE CLASSIFIED AS A FELONY COUNT UNDER STATUATORY LAW.

RATIONALE: EVERY BUSINESS ESTABLISHMENT THAT WANTS TO PARTICIPATE IN THE BIDDING PROCESS SHALL HAVE AN EQUAL OPPORTUNITY TO PARTAKE OF THE AMERICAN FREE ENTERPRISE SYSTEM.

14. LINE EXTENSION POLICIES: THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP'S LINE EXTENSION POLICIES SHALL BE: 1. ALL NEW SUBDIVISIONS MUST SECURE THEIR OWN FINANCING FOR THEIR ELECTRIC POWER INSTALLATION AND SHALL BUILD THEIR SYSTEM TO THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP'S SPECIFICATIONS, SO IT IS COMPATIBLE WITH THE MAIN POWER GRID SYSTEM. 2 EACH SUBDIVISION SHALL CHOOSE HIS OWN METHOD OF INSTALLATION PROVIDED IT MEETS THE SPECIFICATIONS OF THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP. 3. WHEN THESE SPECIFICATIONS ARE MET, THEN THE AK. SOUTHCENTRAL ELECTRIC CO-OP SHALL ENERGIZE THE SYSTEM.

STAUDENMAIER'S
ELECTRIC MERGER COMMITTEE
P.O. BOX 1603 • EAGLE RIVER, AK 99577 • 694-4982, 694-2322

15. THE TRANSITION TEAM OF THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP.

1. THE TRANSITION TEAM SHALL BE MADE UP OF THREE MEMBERS FROM MEA, HEA & CEA, EACH SELECTED BY THEIR OWN BOARD OF DIRECTORS.

2. THE TRANSITION TEAM POWERS SHALL BE:

A. TO OVERSEE THE OFFICIAL ELECTION OF THE PERMANENT ELEVEN MEMBER BOARD WITHIN 60 DAYS OF THE MERGER VOTE.

B. TO EXECUTE CONTRACTS FOR THE LENGTH OF 60 DAYS ONLY, ON BEHALF OF THE ELECTION PROCESS.

16. THE PRESENT THREE UTILITIES, MEA, HEA & CEA SHALL FUNCTION IN THEIR INDIVIDUAL CAPACITY UNTIL THE NEW ELEVEN MEMBER BOARD IS SELECTED. THE NEW BOARD OF DIRECTORS SHALL HAVE NINETY DAYS TO COMPLETE THE MERGER.

17. ALL JOBS SHALL BE FILLED THRU APPLICATIONS RECEIVED AT THE PERSONNEL DEPT. OF THE ALASKA SOUTHCENTRAL ELECTRIC CO-OP. NO PRESENT EMPLOYE IS GUARANTEED THEIR POSITION IN THE NEW ORGANIZATION.

RATIONALE: ALL QUALIFIED ALASKANS SHALL HAVE THE SAME OPPORTUNITY TO APPLY AND COMPETE FOR THE JOBS THAT ARE AVAILABLE IN THIS NEW CO-OP.

SUBJECT: CFC - Study of the Formation of An Alaskan G & T

Comments:

1. Study Variance - Natural Gas Contracts

   Quote: "We are of the opinion that the figures provided which justify a formation of the G & T far outweigh any perceived loss of benefits from an assignment of the gas contracts to the new G & T."

   Answer: CFC states a savings of $271.9 million over a period of 18 years and $639.0 million over the entire period. Apparently CFC didn't do their homework because if the present CEA Beluga gas contracts were abragated and the G & T would have to pay the market price $2.32 MCF vs 20¢ MCF for the gas that is in inventory the net cost would be more than $700 million during the next 15 years.

Nowhere in the study does the report address the cost to Chugach (Distribution Coop.) for the additional 20% supplemental loan requirements from CFC if a G & T were formed; i.e., CEA would have a plant revenue ratio of approximately 9.0. (Total utility plant ÷ operating revenue - less cost of power.)

The study characterizes higher margins as a cost to members.

Chugach believes there are several benefits from using a 1.5 TIER:

1. A Equity Management Program can flow monies back to the members.

2. Chugach can invest in facilities instead of borrowing money.

Dr. Joyce Murphy
Chairwoman, Board of Directors
Chugach Electric Association, Inc.
P.O. Box 3518
Anchorage, Alaska 99501

Dear Doctor Murphy:

You have requested our opinion as to whether certain natural gas supply contracts ("gas contracts") under which natural gas is sold to Chugach Electric Association, Inc. ("Chugach") may be assigned by Chugach to a proposed generation and transmission cooperative ("G&T") without the consent of the producer/sellers under such contracts.

Summary of opinion

Our opinion is that such an attempt to assign the gas contracts without the consent of the producer/sellers may violate the terms of the contracts. Although a sound legal argument can be made that these contract terms are inapplicable or unenforceable, an assignment without the consent of the producer/sellers presents an unacceptable risk to Chugach of the loss of the economic benefit of the gas contracts.

Background

Chugach has considered the possibility of establishing a G&T to which Chugach's generation and transmission facilities would be transferred and to which its long-term natural gas supply contracts would be assigned. Under these contracts, Chugach purchases natural gas for fuel for its generating facilities from ARCO, Shell and Chevron ("producer/sellers") at a price of approximately 26 cents per MCF.

Article XVII of the gas contracts (which is identical in all of the contracts) provides as follows:

> All provisions, covenants and obligations contained herein by which either of the parties hereto is bound, shall in like manner be binding upon the successors and assigns of the parties so bound and those which are for the benefit of either of the parties shall in like manner inure to the benefit of the successors and assigns of the parties so benefited; provided, however, that neither party hereto shall assign this Agreement in whole or in part (except to a subsidiary or successor to their respective businesses) without first obtaining the consent in writing of the other party except that the Buyer may assign this Agreement to the United States Government or any Agency thereof to secure any indebtedness thereto without Seller's consent.

Analysis

The assignment clauses of the gas contracts by their terms prohibit either party from assigning the contract in whole or in part without obtaining the prior written consent of the other party, except where the assignment is to a "subsidiary or successor" of the assignor's "business," or to a Federal agency as security for indebtedness. Thus, assignment to the G&T would be a breach of the contract unless --

(i) the G&T is a "subsidiary or successor" of Chugach's "business";
(ii) the assignment clause is inapplicable or unenforceable; o
(iii) consent is obtained.

a. "Subsidiary or successor"

Under Article XVII, consent is not required for assignment to a "subsidiary" or "successor" to Chugach's business. Both terms are undefined. However, it is unlikely that the G&T would be regarded as a subsidiary unless it was owned or controlled by Chugach. Whether the G&T is a successor is a closer question. While it would not be a successor to Chugach as a corporate entity (as a G&T which resulted from a merger or reorganization would be), the G&T could be regarded as a successor to Chugach's generation and transmission business. By specifying the "business" of the parties instead of referring to the parties, the assignment clause of the contract is concerned with the economic activity of the assignee, not its corporate form.

The producers, on the other hand, could argue that the reference to "business" was intended to refer to Chugach's business as a whole (including the distribution functions), and that a G&T not owned or controlled by Chugach is not a subsidiary or successor of Chugach's generation, transmission and distribution business.

b. Scope of prohibition on assignment.

Contract clauses prohibiting assignment are specifically addressed in the Uniform Commercial Code ("UCC"). Section 2.210(c) of the UCC (AS 45.02.210(c)) applies to sales of natural gas (see, AS 45.02.107) and provides:

> Unless the circumstances indicate the contrary, a prohibition of assignment of "the contract" is to be construed as barring only the delegation to the assignee of the assignor's performance.

Thus, if the contract language prohibited assignment, Chugach could assign its right to gas delivery, but not its duty to pay, unless the circumstances indicated the contrary. The gas contracts do not completely prohibit assignment; they only prohibit it unless consent is obtained or the assignee is a successor, subsidiary, or Federal agency. In our opinion, this UCC provision applies even if the prohibition on assignment is not unqualified. However, the UCC provision is only a rule of construction ("is to be construed") which applies unless "the circumstances indicate the contrary".

Examination of the assignment clause in the gas contracts indicates that they are not simple prohibitions on assignment, but rather are carefully drafted provisions which prescribe the rights and duties of successors and assigns, and limit the conditions under which assignment is permissible. Under the assignment clause, contract obligations are binding on successors and assigns; contract rights inure to the benefit of successors and assigns; but consent to an assignment is required unless the assignment is to a subsidiary, successor, or Federal agency.

If the draftsman had intended the construction provided by UCC § 2.210(c), (consent is required only in order to delegate performance), then it is unlikely that the assignment clause would have specifically provided that contract benefits inure to the benefit of an assignee where consent has been given, since under § 2.210(c) the assignee could receive these benefits even if consent were not given.

c. Good faith

If Chugach were to request consent to its assignment of the contracts to the proposed G&T, and the consent were refused, Chugach could argue that the refusal was not in good faith. The parties to a contract have a duty of good faith and fair dealing. AS 45.01.203; Mitford v. De Lasala, 660 P.2d 1000 (Alaska 1983). A contractual right, however unconditional it might appear to be, must be exercised in good faith. See, Alyeska Pipeline Service Company v. Aurora Air Service, Inc., 604 P.2d 1090 (Alaska 1979) (unilateral right to terminate contract required to be exercised in good faith). The producers are obligated to act in good faith in deciding whether to consent to an assignment. If performance by the G&T would not impose any greater burden or risk on the producers than performance by Chugach, it would be difficult for the producers to argue that they have acted in good faith in withholding consent to the assignment. However, if the producers could find a basis for arguing that performance by the G&T instead of Chugach would disadvantage them, then they presumably would have a good faith basis for refusing consent.

Conclusion

If Chugach wished to assign the gas contracts to the proposed G&T without the producers' consent, there are a number of legal theories on which Chugach could rely were the producers to claim that such an assignment was a breach of contract. However, there is a plausible reply that the producers could make to each of these theories. If Chugach argues that consent is not required because the G&T is a "successor" to Chugach's business, the producers can respond that the G&T must be a successor to the entire business, not just the generation and transmission business. If Chugach argues that the UCC makes consent unnecessary because Chugach is assigning a benefit rather than delegating performance, the producer can respond that the "circumstances indicate the contrary" -- the parties intended a different result. If Chugach argues that withholding of consent would be in violation of the producers' duty of good faith, the producers may be able to devise a good faith objection to selling gas to the G&T (or take the position that defense of their economic interest in raising the price of the gas is not bad faith).

It is our opinion that, although sound legal arguments can be made that consent to an assignment of the gas contracts to the G&T is unnecessary or cannot be withheld, there is a substantial possibility that such an assignment would be held to be a breach of the contract, and the basis for the producers' terminating delivery of the gas. Because of the extraordinary value of these contracts to Chugach and its

customers, we believe that an assignment without consent of the producers would present an unacceptable business risk to Chugach, unless prior to the assignment Chugach obtained a declaratory judgment or a decision under the arbitration provisions of the contract that such assignment was permissible.

We hope that this opinion has responded to your question.

Sincerely,

Van Ness, Feldman, Sutcliffe,
Curtis & Levenberg, P.C.

Railbelt Energy Needs May Double by 2001

Alaska's Rapid Population Growth Increases Electric Power Demands

By DEB DAVID

Although per capita energy consumption by Alaskans has not increased dramatically in this decade, the demand for electricity has risen due to unprecedented population growth. The precise demand for electricity in the long-term future continues to evade planners, but they are certain that Railbelt electrical requirements will continue to grow at a healthy rate.

A 20-year energy and peak load forecast summary compiled by the Alaska Systems Coordinating Council (ASCC) for the Railbelt (see Table 1) estimates peak energy usage will jump from 627.8 MW in 1983 to 1,474 MW in 2001. Considerable disagreement surrounds the peak load forecasts, which are invaluable in planning electrical generation needs.

One argument is the peak load forecasts indicate that the proposed $5.5-billion (estimated 1983 dollars), 1,600-MW Susitna hydroelectric project is too large. Another camp argues the power projections are unrealistically low.

In either case, at least some growth in demand is certain, and utilities will continue to be active users of construction services through the next decade.

Anchorage Area

Southcentral Alaska, particularly the Anchorage area, has exhibited phenomenal population growth in the first three years of the 1980s. The growth has spurred revised peak load forecasts and provided the impetus for large electrical construction projects.

According to the ASCC forecast, Anchorage Municipal Light and Power (ML&P) generated 663 gigawatts (1 GW = 1,000 MW) in 1982. Energy consumption by the publicly owned utility is expected to reach 717 GW this year and 786 GW in 1984. Table 1 shows similar energy usage increases through the year 2001.

Peak loads this winter at ML&P are expected to reach between 130 MW and 140 MW, compared to the peak last winter of 126 MW. (Peak loads are very weather-sensitive, surging during periods of extremely cold temperatures.) By the year 1991, peak loads will nearly equal the utility's current total generating capacity of 253 MW, which includes 16 MW of power purchased from the Alaska Power Authority's Eklutna hydro facility.

ML&P currently has more than 100-MW reserve capacity, a hefty 80-percent reserve capacity. From a national perspective, the reserve is extremely high, but in Anchorage, where the largest unit produces 100 MW, the reserve is not excessive. The loss or failure of ML&P's largest unit at peaking periods would annihilate its reserve generating capacity.

> 'ML&P's 80-percent reserve capacity is not excessive for Anchorage.'

A $122.5-million, 170-mile electrical intertie between Anchorage and Fairbanks utilities will help to preserve Anchorage's generating reserve during peaking, while enabling Fairbanks area utilities to draw from Anchorage's cheaper gas-fueled power. The project, sponsored by the Alaska Power Authority, is under construction and scheduled for completion in December 1984. (See November 1983 issue of AC&O for a complete report on the Anchorage-Fairbanks intertie project.)

The municipality currently operates seven main generating units — four simple-cycle combustion turbines, two of which are diesel-fired, and two combined cycle units which work in concert with one steam turbine running off of waste heat. ML&P is considering the installation of an additional 80-MW plant next spring at a nominal cost of $16 million, if a contract for sale of excess power can be arranged with Chugach Electric Cooperative Inc.

Chugach, which serves nearly 50,000 Anchorage area customers compared to ML&P's 19,000 center city customers, has a greater immediate need for energy. Under the arrangement being negotiated, Chugach would buy excess production from the new ML&P plant until the latter utility required the generation to meet its customers' needs. While Chugach and ML&P could mutually benefit from such an arrangement — Chugach would have additional power without up-front capital costs, while the municipality could reduce its capital costs by selling power — both utilities are prepared to proceed alone if an agreement is not reached.

ML&P would install the plant in 1985 instead of 1984 without a purchase agreement from Chugach. And the cooperative is pursuing plans to purchase ML&P new generation and to build its own new unit on a parallel track. Chugach, which pegs the total project cost at $26 million, would probably install a new unit at its Beluga station, near its cheapest source of gas from the Beluga field.

Chugach Electric also is planning to increase its generation by another 40 MW with a new unit at Bernice Lake. The $17-million project would include a new gas-driven turbine and 21 miles of 115-kV transmission line from the Nikiski plant to a Soldotna substation. The transmission line portion of the contract is estimated to cost between $7 million and $8 million. The Bernice Lake unit is scheduled for installation in 1984.

In 1986-87, Chugach is planning to boost its generation further by adding

two more units — an 80-MW unit at its Beluga station and a 40-MW unit at Bernice Lake. Specifications and site plans for the projects are being developed.

The increased generating capacity will help Chugach meet ASCC's forecasted energy demand of 2,304 GW in 1987. Table 1 indicates the cooperative's energy generation climbing from 1,765 GW in 1982, to 1,854 GW in 1983, to 1,966 GW in 1984, to 2,079 GW in 1985, and to 2,192 GW in 1986.

The two Anchorage-based utilities also are undertaking major transmission line upgrades this year. All Chugach-ML&P 35-kV transmission lines will be boosted to 115 kV by the end of 1983. The improvements also entail modifying the lines into a loop system to give all substations two-way feed. The utilities have been interconnected in the past, but the recent transmission upgrades will build extra reliability into both systems.

ML&P will spend about $14 million in capital improvements this year, and has budgeted $36 million, including $16 million for the proposed new electrical generating unit at its main plant, for 1984. According to Tom Stahr, general manager of ML&P, the utility also has a four-million-gallon fuel-oil storage facility on the drawing board for possible construction in the next few years.

Additional Chugach improvements include a complete upgrade of its Beluga station transmission lines to 230 kV over the next three or four years. The project, which will boost the current 115-kV line from Anchorage to the Kenai Peninsula, likely will involve a submarine cable crossing of Turnagain Arm.

In addition, the cooperative is planning two new bulk power substations in Anchorage — one in the western end of the city near Anchorage International Airport and one in east Anchorage at University Substation. Within the next five years, Chugach is planning an upgrade of its radial transmission lines to 138 kV in South Anchorage's Huffman Road residential area.

For the immediate future, the two utilities are confident they will keep pace with Southcentral Alaska's mounting energy needs. But with the proposed Susitna hydroelectric project still hanging and the inability to precisely predict long-term energy demands, the distant future is more uncertain.

Several proposals aimed at improving future capacity have been aired, including the merger of Chugach and ML&P. Stahr believes the proposal merits further study. A merger could result in up to $60 million in savings to consumers by avoiding duplications and improving planning capabilities, he said. Chugach's board of directors has chosen to accentuate cooperative, joint planning among the two utilities, avoiding any reorganization until such a move is deemed economically sound for Chugach customers, said Larry Markley, director of government and environmental affairs for Chugach.

Southcentral

The City of Seward, which purchases the bulk of its power from Chugach Electric, is planning an estimated $10-million transmission line upgrade

which will boost its power lines from 24 kV to 115 kV. In the design phase, the project is scheduled to begin in spring 1984, hinging on an appropriation from the Alaska Legislature.

Existing single-pole transmission lines are undersized for current loads, resulting in excess voltage loss, and hence, in energy loss. The current transmission system also leaves little room for any industrial load expansion at a time when Seward foresees increased electrical demands from industry.

A coal port to handle Usibelli coal being shipped to Korea's coal-fired electrical plants is scheduled to be built next fall in Seward. A ship lift currently is under construction and should be in use by the summer of 1984. The city also is expecting ancillary industries to spin off of these larger developments and an accompanying increase in residential energy demand.

Seward's current peak loading is estimated at 5 MW, a figure which is predicted to increase to 20 MW over the next 30 years. Ebasco Services Inc. currently is conducting a 30-year economic and load forecast to be used in designing the line and preparing construction contract drawings and documents.

To meet short-term energy needs, the city will have to rely on two of its three stand-by diesel generators to supplement the power it purchases from Chugach. The only power currently generated by the city utility consists of about 100 kW from a small hydro plant for use by the local hospital.

In the Glenallen-Valdez area, Cooper Valley Electric Association (CVEA) has no plans for immediate capital improvements. The system is powered by two diesel units — one producing 10 MW in Valdez and one producing 7 MW in Glenallen — in the winter months and the 12-MW Solomon Gulch hydro plant in the summer. Glenallen currently is not tied into the hydro facility and operates its diesel units year-round.

Dan Tegeler, CVEA office manager, hopes to see a transmission line built to tie Glenallen into the hydro system. But no immediate plans or funding exists.

Also in the future is the possibility of installing a pressure-reducing turbine which would tap the kinetic energy from the trans-Alaska pipeline, terminating in Valdez, and convert it to electricity. Such a system would replace Valdez's aging and expensive-to-operate diesel turbines.

The kinetic conversion talks have been held up by a lawsuit brought by the City of Valdez in an effort to take over CVEA. Tegeler said the case soon will be dismissed, opening the door for continuation of negotiations with the Alyeska Pipeline Service Co. over using the pipeline as a kinetic energy source.

Also in limbo is an Alaska Power Authority preliminary feasibility study to determine the lowest long-range cost of power for the area. The study, conducted by Stone-Webster, tentatively recommended a Silver Lake hydro plant transmitting electricity to Cordova and Valdez as the best of several options. The Power Authority is requesting funding in 1984 to complete the feasibility study.

Unlike most areas of the state, Cordova's peak electrical loads occur during the summer fishing season. The summer peak for 1983 reached 4.5 MW and is expected to climb to 5 MW in 1984.

About 1,200 Cordova area customers are served by the Cordova Electrical Cooperative Inc. A demand growth rate of between seven and eight percent a year has necessitated construction of a new power plant, which was about one-third complete in late October. The facility will increase CEC's current 7.5-MW generating capacity to 10 MW in time for next summer's fish processing surge.

The $3-million project, funded with money borrowed from the Rural Electric Association and the National Rural Utilities Cooperative Finance Corp., entails installing a new 2.5-MW diesel unit and relocating an existing 2.5-MW unit to the new power plant. The contract is being performed by Hales Construction & Associates of Seattle.

Two units — 1.9-MW and 2.6-MW Enterprise generators — will continue to operate at the existing Eyak Lake plant, but plans are to eventually phase out these older units and replace them with new unattended-operation models. CEC Manager Doug Bechtel said the move would reduce staffing levels and lower electricity rates.

Fairbanks Area

Fairbanks area utilities also will benefit from the Anchorage-Fairbanks intertie project currently under way. While demand is growing — new connects by Golden Valley Electric Association increased from 1,075 in 1981, to 1,319 in 1982 and an estimated 2,000 in

1983 — utilities generally feel their generating capacities are adequate to cover power needs into the early 1990s.

GVEA currently has a generating capacity of 203 MW and expects peak loading this year to reach 72.7 MW, compared to a peak load of 67.9 MW in 1982. Peak load estimates for 1984 are 77 MW.

Power for the cooperative's 20,000 customers is generated with GVEA's main base plant at Healy, which produces 25 MW from coal-fired turbines. In addition, two diesel-driven generators each produce 65 MW at the North Pole peaking plant and several 7.5-MW generators operate at the Fairbanks Vhender complex.

While GVEA has no plans for large capital improvements in the short-term, the rising number of new connects will require continual power line expansions.

At Fairbanks Municipal Utility System (MUS), which is interconnected with GVEA and Fort Wainwright, the maximum generating capacity is 63 MW achieved with four coal-fired, steam turbines and two diesel turbines for back-up and for peaking. The system usually operates in the 30-MW to 50-MW range, and peaked at 28.2 MW in the winter of 1982-83. The utility expects a peak load this winter of 30 MW.

System growth due to new housing construction and commercial construction will require MUS to purchase an additional 25-MW coal-diesel unit, which will replace three 30-year-old steam turbines with a combined capacity of 17.5 MW. While the change will not greatly enhance generation ability, it will build more reliability into the system.

Southeastern

The Juneau area has experienced a significant increase in peak demand and energy consumption since 1980. In the spring of 1983 local utilities were required to furnish more than five million kwh of diesel-generated electricity to supplement power available from hydroelectric plants. According to the Alaska Power Administration, a division of the U.S. Department of Energy, the need for this diesel generation is expected to increase each spring as area reservoirs are drawn down until additional hydro power is available from Crater Lake.

An Alaska Power Administration study, "Juneau Area Power Market Analysis, Update of Load Forecasts," concludes that the Crater Lake addition to the Snettisham hydroelectric facility is needed, since from 40 to 70 percent of the project's output could be used the first year on-line in 1987. Firm energy from Crater Lake would be used by 1990 under a high-growth case, and by 1993 under a lower-growth scenario.

Construction of the Crater Lake project, estimated to cost $70 million, is expected to be contracted by the Army Corps of Engineers in the spring of 1984, with site construction beginning in early July. Under this construction schedule, the project would be on-line in February 1987.

Expected generating capacity from the addition is 27 MW, which represents a 60-percent increase in present generating capabilities in the Juneau area.

Crater Lake generating units will be housed in the Snettisham power plant, from which Juneau utilities draw the bulk of their power. Snettisham's current generating capacity is about 46 MW. In addition, Alaska Electric Light & Power (AEL&P) owns small hydro sites supplying about 6 MW. The privately owned utility added one diesel unit this year to give it nine stand-by diesel generators with a capacity of 17 MW.

Plans are to add two to three additional diesel generators a year to satisfy the hydroelectric deficit which currently exists. AEL&P also has requested a 17.5-MW oil-fired gas turbine which it would use strictly for stand-by in the event of a loss of load at Snettisham.

Potential hydroelectric sites beyond Crater Lake would include Long Lake Dam, Lake Dorothy, Sweetheart Creek and Speel River, according to the Alaska Power Administration. AEL&P has proposed a cooperative study to look into future development of generation facilities to ensure the best use of the area's hydro resources.

Table 2 shows the Juneau area net generation and peak demand and the trend toward increased demand and declining MW generation capacity.

In other Southeastern communities, the State of Alaska has invested millions of dollars in hydroelectric projects at Swan Lake, Tyee Lake and Terror Lake in an attempt to meet electrical demands in the long-term. (See articles on Southeastern hydro projects in this issue of AC&O.)

Electric power retains a commanding role in the development of Alaska, and will continue to spark construction activity for the foreseeable future. □

Bill proposes merger of Railbelt utilities

11 JAN 84

By DON HUNTER
Daily News reporter

An Anchorage legislator has sponsored a bill that would appropriate up to $800 million to pay off the combined debts of electric utilities from Fairbanks to Seward, if the utilities agreed to merge into one giant power cooperative.

Rep. Terry Martin, a Republican, says his proposal would eliminate duplication and waste by forging several administration-heavy utilities into one. Paying off the debt would cause electric bills to plummet, perhaps by as much as 50 percent, he said.

The heads of two of the utilities involved disagree, however.

Martin concedes the odds are slim lawmakers would agree to an $800 million grant to benefit only Railbelt electric utilities and ratepayers, especially in an era of declining oil revenues and increasing competition from other spending proposals.

But he says House Bill 475, introduced on Monday, may be a useful bargaining chip when budget time rolls around.

Martin said the legislature has routed millions of dollars into energy projects in rural Alaska and to hydroelectric projects in Southeast. He said the Sheffield administration will ask for an additional appropriation and legislative action necessary to issue revenue bonds for the Alaska Power Authority's so-called four-dam pool.

"I think it's just a real opportune time to make the statewide legislators and public aware that we in Southcentral have just as many problems as they do elsewhere," he said.

Martin also said his funding proposal — using $800 million in state money to pay off the accumulated debts of electric cooperatives and city utilities in Fairbanks, Anchorage, the Matanuska Valley and the Kenai Peninsula — is open to compromise.

"This isn't the gospel line, it's just a concept very general in its statements," he said.

The grant, as proposed in Martin's bill, would be awarded on the date the utilities merged into an "Alaska south-central electric cooperative." Martin said the new utility would merge Chugach Electric Association, Anchorage's Municipal Light and Power, Homer Electric Association, Matanuska Electric Association, Seward and Fairbanks city utilities and the Golden Valley Electric Association in Fairbanks.

The merger is essentially the same proposal advocated for more than a year by utilities critic Tom Staudenmaier. It would require affirmative votes of the members of the cooperatives and probably voters in Fairbanks, Anchorage and Seward.

Executives of two of the utilities, however, said there are serious drawbacks to the plan.

ML&P General Manager Tom Stahr said it is a mistake to believe that merging smaller companies into one larger company will reduce administrative overhead. Even though one company only has one manager, larger companies require more levels of administrative oversight, he said.

"You only have to look at larger government or larger private business operations to see that is so," Stahr said. "One man can run a small business, but for a big organization you have to have layer upon layer of administration. It's just wrong to say (merger) will reduce adminstrative costs."

Matanuska Electric General Manager Jim Palin said a low-interest state loan program for construction of new generators would be more valuable than the retroactive elimination of existing debt.

MANAGEMENT QUARTERLY is published in March, June, September and December by the Management Services Department of the National Rural Electric Cooperative Association, 1800 Massachusetts Avenue, N.W., Washington, D.C. 20036. Editorial and business correspondence should be sent to this address.

Subscriptions are $95 per year for 14 copies, or $42 for 5 copies, additional copies $6, mailed to individual employees and board members of a system. Individual subscriptions are available to firms that are not members of a cooperative at a rate of $20 per year. Rates for libraries and other institutions are $10 per year for domestic subscribers and $40 per year for foreign subscribers. Second class postage paid at Washington, D.C., and at additional mailing offices. Association does not stand for views expressed by the authors in articles issued in its publication, nor do the views expressed in MANAGEMENT QUARTERLY feature articles and reprints necessarily reflect those of the systems that subscribe to it.

MANAGEMENT QUARTERLY ADVISORY COMMITTEE

The Management Quarterly Advisory Committee was selected from a wide cross section of cooperative board members, managers, and key employees from across the country. The Committee's purpose is to provide a link with our readers which enables us to know your thoughts, concerns and suggestions for MQ. Readers who have ideas to share are invited to contact the Advisory Committee member nearest them.

From the Editor

As MQ goes to press for this issue, the economy and the spring flowers in Washington seem to match—a bit bedraggled as yet but looking better than what we had a couple of months ago. Several of the indicators the experts use to gauge the general health of the economy indicate that our nation's financial malaise is improving a bit. So.....we hope you can breathe a tentative sigh of relief, put your feet up on your desk and take some time to enjoy an issue of MQ of which I am inordinately proud! Every writer has done a praiseworthy job and each article has immediately usable, readily acceptable ideas.

To switch gears a bit, those members of the Management Services staff who are in the field a lot have been comparing notes of late and several of us have become aware of a tendency (hopefully one that is not contagious) which might best be described as "the-doom-and-gloom-theory-of-management". To determine whether you or others around you may have adopted this world view, ask yourself these questions: Have I (or a member of the staff or of the board of directors) made the following—or a similar statement—recently?" "There's no point in trying to communicate with the members because they don't care about the cooperative and will just complain no matter what." "There's no point in trying to motivate employees because all they want is their paychecks and the union has our hands tied anyway." "There's no point in trying to give new ideas to the board because they never listen and they're all living in the past."

While any of these statements may be true in isolated instances, it is certain that they are not as universally applicable as the doom and gloom adherents would have us believe.

I've always found it fascinating that children can so easily build happy worlds for themselves--castles and spaceships and far-off places can be conjured in the twinkling of an eye.

Although one of the tasks of becoming an adult is to learn to live in the real world, the process seems to have left many of us with the ability to fantasize only harmful outcomes and to act as if they had already happened. ("Vague premonitions of disaster" is the name stress management experts give to this tendency.) Perhaps it's time that we took a cue from the little people around us (and from some very credible health practitioners as well) and began creating good mental scenarios for ourselves and the world around us. Whether we choose to call this exercise positive thinking, good mental health habits, meditation or some other form of "mental centering", people who use an upbeat, accepting way of processing reality seem to be highly successful at creating the reality they wish to participate in. It would be shortsighted at this point in our history to assume that wishing will make our problems disappear, but it surely will not help to abdicate our rights and responsibilities by creating a world for ourselves in which we are totally powerless to affect the outcomes.

June Bostic Lane

The Board Room

Is Bigger Better?

The economic realities of the 1980's mandate that we take a fresh look at the major objective of our rural electric systems and determine whether there are some other ways of meeting it. This article is a very important one. It is the result of some lengthy analytical efforts by CFC which clearly show the economic advantages of merging some of our smaller systems. Would a merger benefit your system? Only the thoughtful consideration of those most closely involved can determine the answer and it may well be time to examine the option.

By George King, Jr.

For many years there has been a great deal of discussion among rural electric program leaders regarding the advantages of merger or consolidation of the smaller REA-financed electric distribution systems, or at least a consolidation of certain functions into organizations of sufficient size to take advantage of the economies of scale inherent with higher volume. I do not know of a single merger study which has not shown cost savings to the ultimate consumer if two or more relatively small systems were consolidated. Such consolidations can eliminate duplication in staffing, equipment, headquarters facilities, top management and consulting services. Frequently, it can also result in long-term savings in distribution plant, all of which can reduce costs to the ultimate consumers. Yet, relatively few mergers or consolidations have taken place.

In this article we will explore some of the pros and cons regarding the merger of rural electric distribution systems in the 1980's, as compared to prior decades.

Obviously, the leaders in the rural electric program have long recognized the economies possible from working together to accomplish, as a group, what would have been impossible or impractical to accomplish as individuals. In the 1930's, when few farms and rural homes had electric service, those people without electricity generally recognized that it was not practical for each farm or home to buy, operate, and maintain its own small generating plant. The costs associated with the purchase and installation of a plant, with capacity adequate for more than intermittent service for a few lights and a radio, were too expensive. After taking into consideration the additional expenses for fuel, oil, maintenance, depreciation and replacement, very few decided it was economically feasible to install these "light plants".

Yet, by working together, rural residents organized REA-financed distribution systems, which are today providing electric service to 10 million persons. The key to the feasibility of these distribution systems was then and is today the spreading of certain fixed expenses over a wide base of consumers and KWh sales. Certainly, REA's low cost loans were important, as were non-profit operation, standardization of line materials and design and REA technical assistance. However, the keystone in the feasibility was the ability to take advantage of economies of scale made possible by consumers joining together to spread costs over a wider base.

The initial emphasis in the 30's and on into the 40's was not so much in creating systems of an "*optimum*" size, as it was on creating systems with *adequate* size to make the costs of service "feasible" or "affordable" at that time, and into the immediate future.

Local control was considered to be a special advantage. In the creation of almost every rural electric system, many local people spent countless hours without pay, calling on their neighbors to "sell" the concept of creating an electric cooperative, to "sign up" each farmer as an "applicant", to collect a $5.00 membership fee, and to obtain an easement to cross the farmer's land with poles and wires. Neighbors were more trustful of their friends, neighbors and acquaintances, and this created a tendency for smaller systems to be developed.

In the 1930's the creation of more jobs was also a major federal objective. The goal of the REA program was not only to help provide electric service in previously unserved areas, but also to provide jobs in manufacturing the transformers, wire and meters, and the myriad of other items necessary to build a system. At the local level, jobs were created in building the lines and wiring the farmsteads and in managing and operating the local distribution system. All of these developments were important in improving the nation's economic outlook in the years following the "great depression". Again, optimum size of the new systems was not a consideration. The objective was to get the job done, not to determine the "right" size.

REA did recognize the need for more than 300 or 3000 or even 30,000 consumers to spread the costs associated with owning and operating generating plants and transmission grids. Very few loans were granted for distribution systems to construct their own generating plants. In order to spread the costs across a wider base, generation and transmission cooperatives were organized by groups of distribution systems to build and operate these facilities.

Rural leaders across the nation also recognized the need for spreading the costs of such programs as job and safety training and other educational and legislative efforts over a wider base. As a result, statewide organizations were established. The National Rural Electric Cooperative Association (NRECA) and the National Rural Utilities Cooperative Finance Corporation (CFC), along with many regional supply organizations and data processing centers were created, each to fulfill a specific need, and each based upon the concept of spreading of the costs over a wide base in order to realize economies of scale.

For forty years or more following the creation of the rural electric program and most of the rural electric distribution systems, the individual systems continued to grow in number of consumers served, miles of line, and KWh sold. The efficiency of their operations improved with this growth. Although inflation has been a factor for most of the REA program's

George King is Director of Planning and Staff Services at the National Rural Utilities Cooperative Finance Corporation.

history, the economies of scale achieved by virtue of growth approximately offset the effect of inflation, at least through 1973, and the systems were able to provide service with little change in their electric rates. However, when the rate of inflation reached the double-digit levels of the early 1970's, costs began to increase much faster than any normal economies of scale could offset.

Exhibits I and II show the Trends in Total Operating Expenses for the composite of all REA-financed distribution systems from 1962 thru 1981. **Exhibit I** excludes the cost of wholesale power and thus shows the increases in efficiency for the distribution systems alone. **Exhibit II** includes wholesale power costs and is thus more representative of the consumer's view of his cost of electric service.

Under the declining cost conditions which prevailed until about 1970 to 1973, the consumers of most systems were content with the operation of their distribution systems, and there was little incentive for the consideration of mergers. There was very little dissatisfaction with the quality of the electric service and the rates charged. The systems' staffs enjoyed steadily increasing wage levels resulting from the systems' increased ability to pay, inflation and increased responsibilities. Under these conditions, most managers and directors had little incentive to consider changing long-standing organizational patterns. Everyone was happy: Why take any chances on the uncertainties which could be coincident with a merger?

However, later in the 1970's and continuing into the 80's, and as far into the future as we can now see, the fulfillment of management within electric systems has been eroded by inflation at rates greater than could be offset by increases in the systems' efficiency or economies of scale resulting from normal rates of growth. First, there was the substantial inflation in the interest rates on the loans to finance distribution plant extensions and replacements. The increase in the interest rates for new generating plants has been even more severe.

The cost of fuel for the generating plants has also been increasing, and the rate of increase went out the ceiling following the OPEC oil embargo and the deregulation of natural gas prices in the United States.

The cost of constructing new generating plants has also been increasing steadily due to ordinary inflation in the cost of labor and materials used, but especially due to the new federal and state requirements to reduce the pollution of the air and water, not simply to a reasonable level, but to the maximum degree afforded by the "state of the art", with no consideration for the effect these measures will have on the ultimate cost to the consumers.

Management of electric systems has been made more difficult by the need for repeated retail electric rate increases necessary to pay higher costs for trucks, gasoline, labor, materials and especially for wholesale power. The consumer's reaction to these "excessive" rate increases was to conserve in their use of electricity which, in turn, requires additional rate increases in order to realize sufficient revenues to cover the fixed costs of owning the required facilities, while selling a lower volume of KWh's.

It would be foolhardy to suggest that the merger or consolidation of systems into larger units would offset all these increased costs. However, at a time when member dissatisfaction with rapidly increasing rates is rampant, it would seem appropriate to explore all possible ways

EXHIBIT I

TRENDS IN TOTAL OPERATING EXPENSES

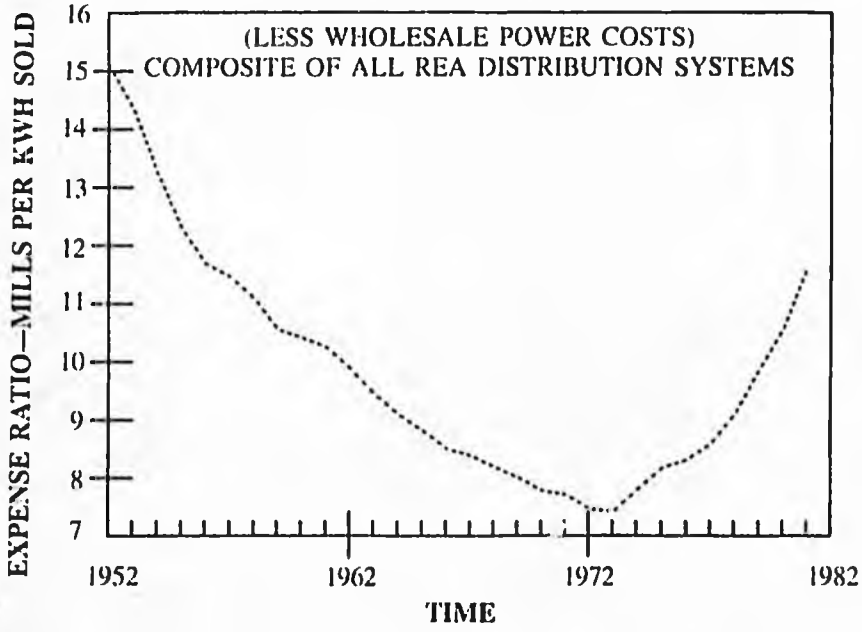

EXHIBIT II

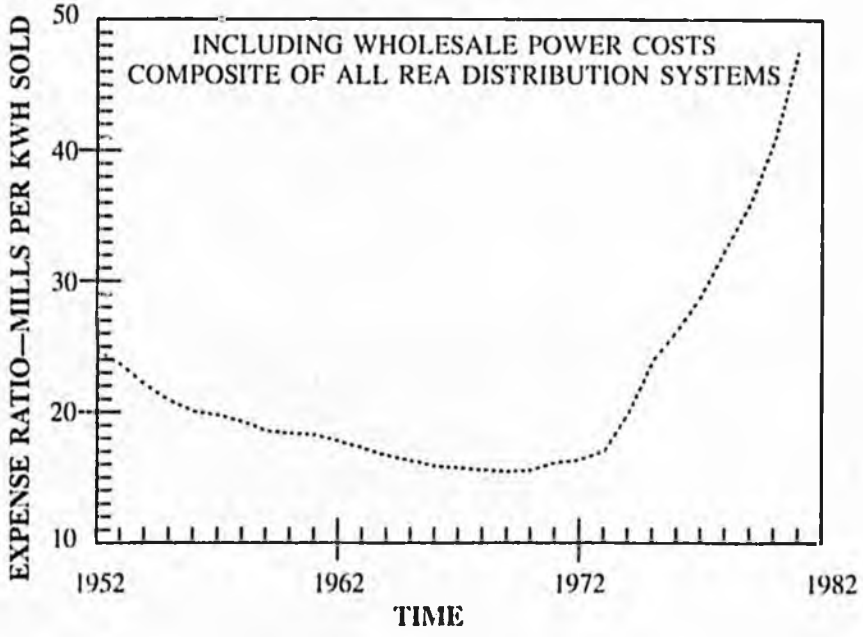
TRENDS IN TOTAL OPERATING EXPENSES



to limit the need for rate increases as much as possible and thus minimize consumer dissatisfaction and conservation, which only serves to compound the problem, from the point of view of the distribution system.

Merger Statistics

For a decade or more I have explored various approaches to quantify the potential savings possible from the merger of two or more electric distribution systems. A wealth of actual cost *data* is available in the REA Annual Statistical Reports and this data has served as the base for my studies. The problem is in converting the *data* to useful *information*.

Each year since 1974 I have run the CFC Key Ratio Trend Analysis to extract, among other things, the trends of various expense ratios as posted by the more than 900 REA-financed electric distribution systems. For the purposes of the merger studies I have concentrated on the following two ratios of the 39 included in the KRTA:

1. Administrative And General Expenses (Expressed as a percent of Total Utility Plant)
2. Total Operating Expenses Less Power Costs (Expressed in Mills per KWH sold)

The logic is that most savings which can be realized in the short-term (one to three years) would tend to be charged to Administrative and General Expenses. Over the long-term, (five to ten years) savings should be realized in many additional areas, so we look to Total Operating Expenses.

Wholesale power costs are normally subtracted out of Total Operating Expenses, since it is unlikely that the cost of wholesale power could be reduced appreciably as the result of a merger.

In one facet of the KRTA, all distribution systems were divided into one of 11 groups, depending upon the number of consumers they served, and the expense ratios of the systems in each group were then sorted into descending order to determine the median ratio value for each size group, which was taken as representative of the costs for systems in that size group.

The actual median values for each size group were then smoothed by substituting values as computed from a formula derived by least squares techniques from the actual values. **Table 1** shows the median data-points for Administrative and General Expenses for each of the years from 1975 thru 1981, together with "adjusted" values as computed from the formula derived as the best "fit" of the actual values. **Table 2** shows the same data for Total Operating Expenses Less Wholesale Power Costs.

The data shown on Table 1 can be better visualized by reference to **Graph I**, in which one can see how sharply the median expense values for 1981 fall from 4.62% (of Total Utility Plant) for systems in the 0 to 1,000 consumer size group to 2.88% for systems in the 9,000 to 12,000 size group, and then decline more slowly to 2.42% for systems in the 30,000 and over consumer-size group.

Graph II shows the same data for 1981, but points and the best-fit curve have been added to show data for the year 1975. **Graph III** shows the 1975 and 1981 actual data points and the best-fit curves for Total Operating Expenses, less wholesale power costs.

If you examine Graphs II and III carefully, you will note a considerably greater increase from 1975 to 1981 in the adjusted expense ratios for the smallest size-group as compared to the largest. For example, on Graph 3 the Total Operating Expenses for the smallest size-group went from 14.08 mills per KWh in 1975 to 29.42 mills in 1981, while the comparable value for the largest size-group increased from 8.26 mills to 10.87 mills over the same time span.

In order to show this more clearly, we rearranged the adjusted values from Tables 1 and 2 into time series for each

NOTE: The formula was found for the curve (with the form of $Y = A\ X^B$) which best fit the actual data points for each year's data. The adjusted values were computed from the derived formula. The r^2 (coefficient of determination) indicates the quality of the fit, with $r^2 = 1.00$ indicating a perfect fit.

to limit the need for rate increases as much as possible and thus minimize consumer dissatisfaction and conservation, which only serves to compound the problem, from the point of view of the distribution system.

Merger Statistics

For a decade or more I have explored various approaches to quantify the potential savings possible from the merger of two or more electric distribution systems. A wealth of actual cost *data* is available in the REA Annual Statistical Reports and this data has served as the base for my studies. The problem is in converting the *data* to useful *information*.

Each year since 1974 I have run the CFC Key Ratio Trend Analysis to extract, among other things, the trends of various expense ratios as posted by the more than 900 REA-financed electric distribution systems. For the purposes of the merger studies I have concentrated on the following two ratios of the 39 included in the KRTA:

1. Administrative And General Expenses (Expressed as a percent of Total Utility Plant)
2. Total Operating Expenses Less Power Costs (Expressed in Mills per KWH sold)

The logic is that most savings which can be realized in the short-term (one to three years) would tend to be charged to Administrative and General Expenses. Over the long-term, (five to ten years) savings should be realized in many additional areas, so we look to Total Operating Expenses.

Wholesale power costs are normally subtracted out of Total Operating Expenses, since it is unlikely that the cost of wholesale power could be reduced appreciably as the result of a merger.

In one facet of the KRTA, all distribution systems were divided into one of 11 groups, depending upon the number of consumers they served, and the expense ratios of the systems in each group were then sorted into descending order to determine the median ratio value for each size group, which was taken as representative of the costs for systems in that size group.

The actual median values for each size group were then smoothed by substituting values as computed from a formula derived by least squares techniques from the actual values. **Table 1** shows the median data-points for Administrative and General Expenses for each of the years from 1975 thru 1981, together with "adjusted" values as computed from the formula derived as the best "fit" of the actual values. **Table 2** shows the same data for Total Operating Expenses Less Wholesale Power Costs.

The data shown on Table 1 can be better visualized by reference to **Graph I**, in which one can see how sharply the median expense values for 1981 fall from 4.62% (of Total Utility Plant) for systems in the 0 to 1,000 consumer size group to 2.88% for systems in the 9,000 to 12,000 size group, and then decline more slowly to 2.42% for systems in the 30,000 and over consumer-size group.

Graph II shows the same data for 1981, but points and the best-fit curve have been added to show data for the year 1975. **Graph III** shows the 1975 and 1981 actual data points and the best-fit curves for Total Operating Expenses, less wholesale power costs.

If you examine Graphs II and III carefully, you will note a considerably greater increase from 1975 to 1981 in the adjusted expense ratios for the smallest size-group as compared to the largest. For example, on Graph 3 the Total Operating Expenses for the smallest size-group went from 14.08 mills per KWh in 1975 to 29.42 mills in 1981, while the comparable value for the largest size-group increased from 8.26 mills to 10.87 mills over the same time span.

In order to show this more clearly, we rearranged the adjusted values from Tables 1 and 2 into time series for each

consumer size-group. These values, adjusted by the formula for the best curve-fit, are plotted on **Graph IV** and **Graph V**.

Conclusions

On **Graphs IV and V** we can clearly see that not only are the unit costs of operating a small system higher than for larger systems, but the rate of increase with time is considerably greater for small systems.

Administrative and General Expenses for the smallest size-group were 65.6% greater than for the largest size-group in 1975 and 86.7% higher in 1981. If they continue to increase at the same rates, the smallest group's costs will be 116% greater than the largest systems costs by 1991.

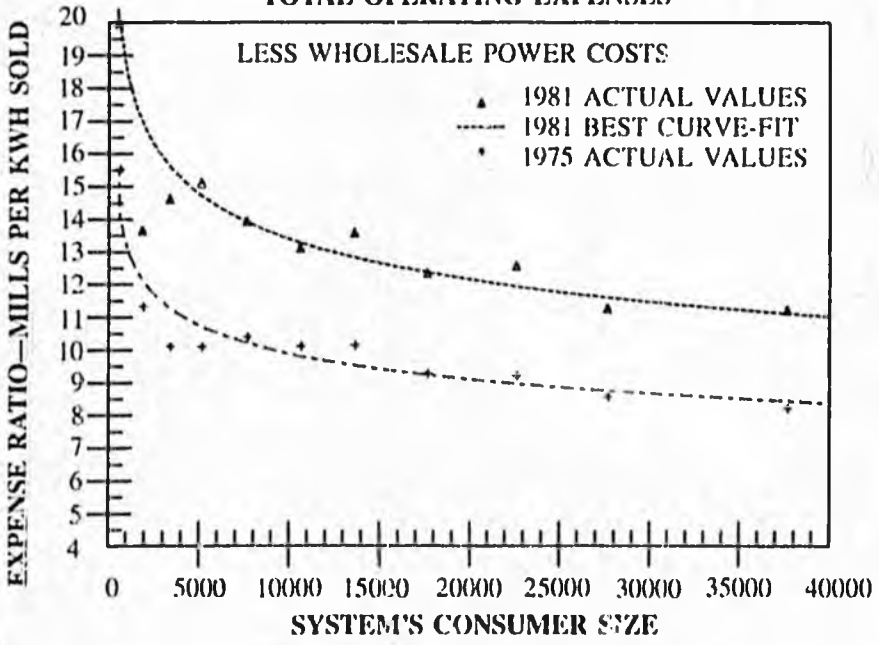
Total Operating Expenses (less power costs) for the smallest size-group were 60.1% higher than similar unit costs for the largest size-group in 1975, 84.2% higher in 1981 and projected to be 106% higher by 1991.

At best, the cost of electric service is skyrocketing, due to many causes. The consumers react in many ways, including conservation in their use of electricity and a retreat to alternative sources of energy such as wood-burning stoves and solar water heaters. This reduces the volume of KWh sales over which the system spreads the fixed costs on the facilities built to make electric service available. This reduced volume only creates the need for additional rate increases.

Potential short-run savings computed to result from the merger or consolidation of one or more "typical" systems in the 100 to 2500 consumer size-group to create a system in the 30,000 or larger size-group could statistically be $44.00 per consumer per year from Administrative and General Expenses alone.

GRAPH III

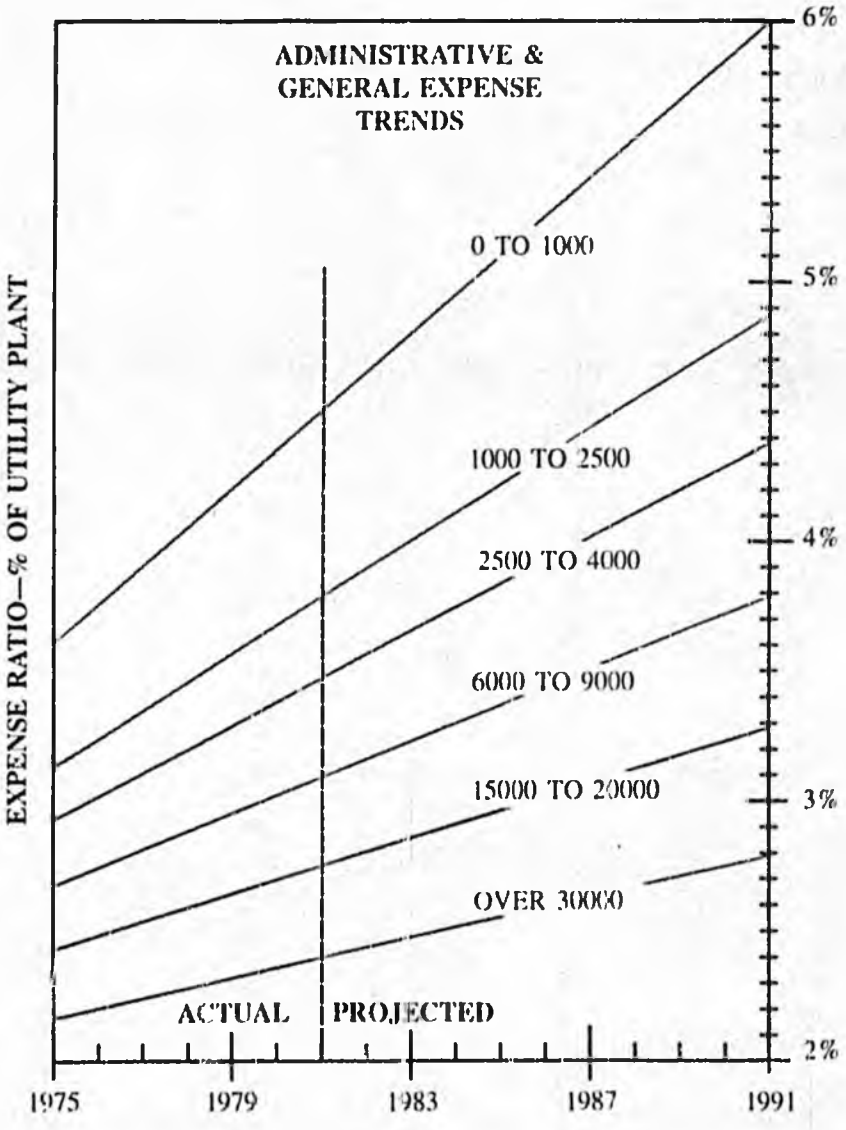
TOTAL OPERATING EXPENSES



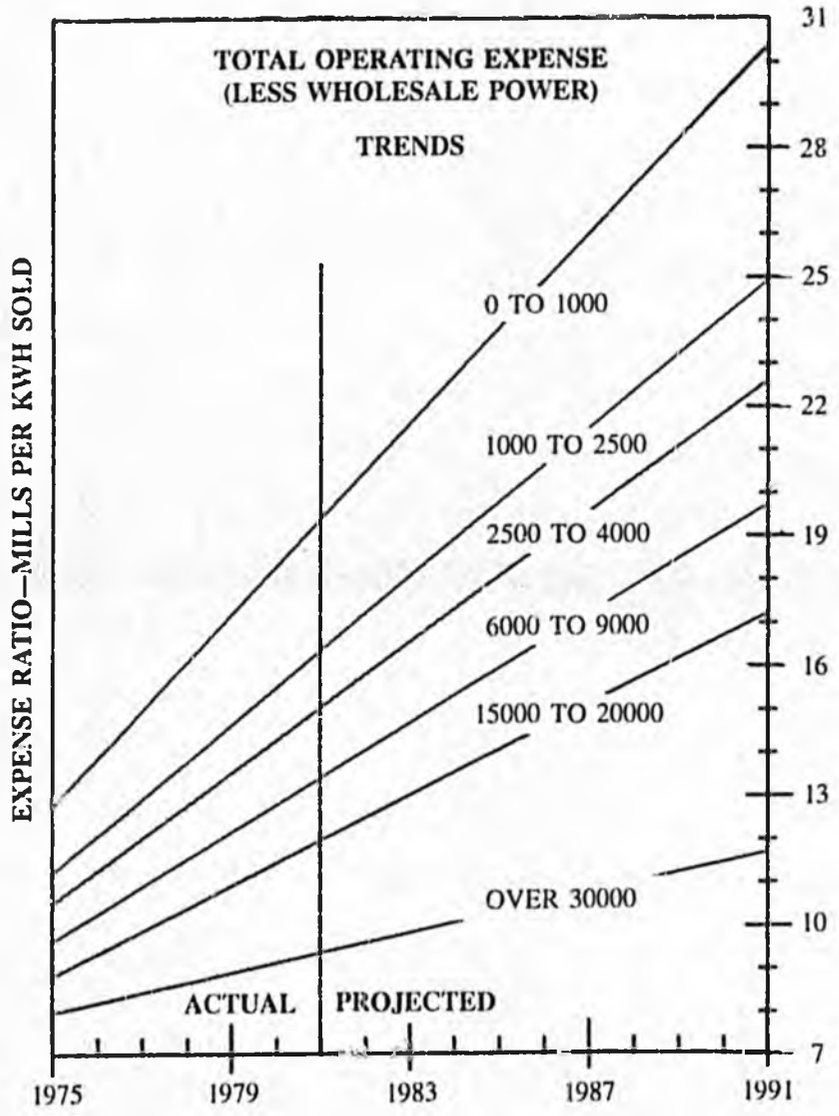
Potential savings in Total Operating Expenses are computed at $93.31 per consumer per year in the short-run and per $201.77 consumer per year by 1991. These calculations assume 5% per year growth in KWh sold and 2.75% per year growth in the number of consumers served.

From the "average consumer's" viewpoint (from a purely financial stance), it would be difficult to defend a board's reluctance to consider merger, considering the potential savings from merger and the growing concern over continuing increases in the cost of electric service.

GRAPH IV



GRAPH V



If no other values were to be considered, the financial health and viability of the RE program would likely be better if we entered the 1990's with a smaller but more efficient group of larger distribution systems serving the area and consumers now served by over 900 systems. Distasteful as this might be to managers, members of the boards, auditors, attorneys and key members of the staff who might face considerable uncertainties during the merger and readjustment period, a merger should be preferred to an attempted sellout.

THE OTHER SIDE of the proposition has many good points for consideration! First, there has always been considerable "labor of love" among the directors, managers, board members and key staff of the smaller electric systems. There seems to be a greater sense of pride in being an integral part of a small organization which is vital to the "home town". As the organization grows and the individuals become a smaller part of the whole, the sense of importance and pride diminishes somewhat and individuals tend to demand other forms of compensation to replace the values lost.

Rural people were not generally pleased with the forced consolidation of the rural schools into county school systems. The economies which were promised either did not come about, or were lost in the increases in costs caused by inflation and additional layers of bureaucracy.

Many small rural communitities are already suffering from being by-passed by the interstate highway system and the migration of jobs and people and services to metropolitan areas. A reduction in payroll resulting from a reduction in or a relocation of, the local RE system's operation would have an important effect on a small community which may now consider the RE system one of its largest payrolls.

The economies of scale obvious from the study of existing systems in different size groups cannot be achieved immediately following a merger. In all probability, costs would even be higher in the first year as a result of the costs of accomplishing the merger, and a degree of confusion would exist as all the people involved become accustomed to different roles and different procedures.

Individuals would undoubtedly be apprehensive for their future, and may resent their new title, assignments, and supervisors. If this doubt and uncertainty and apprehension is allowed to build within the staff, they can either consciously or subconsciously sabotage efforts to effect economies and truly "merge" the organizations into one.

Although much of the savings from merger must result from the elimination of duplication in jobs, it is essential that the people involved have assurance that their careers will not suddenly end and that the vested interest of loyal, capable, dedicated employees will not be ignored simply in order to pursue economies of scale. To a large degree, elimination of duplication must result from attrition. In other words, it must be a process of evolution, not revolution.

In addition to all its other problems, it appears that the management of many RE systems must look forward to solving the dilemma of "to merge or not to merge" or "how to successfully merge" in the 1980's.

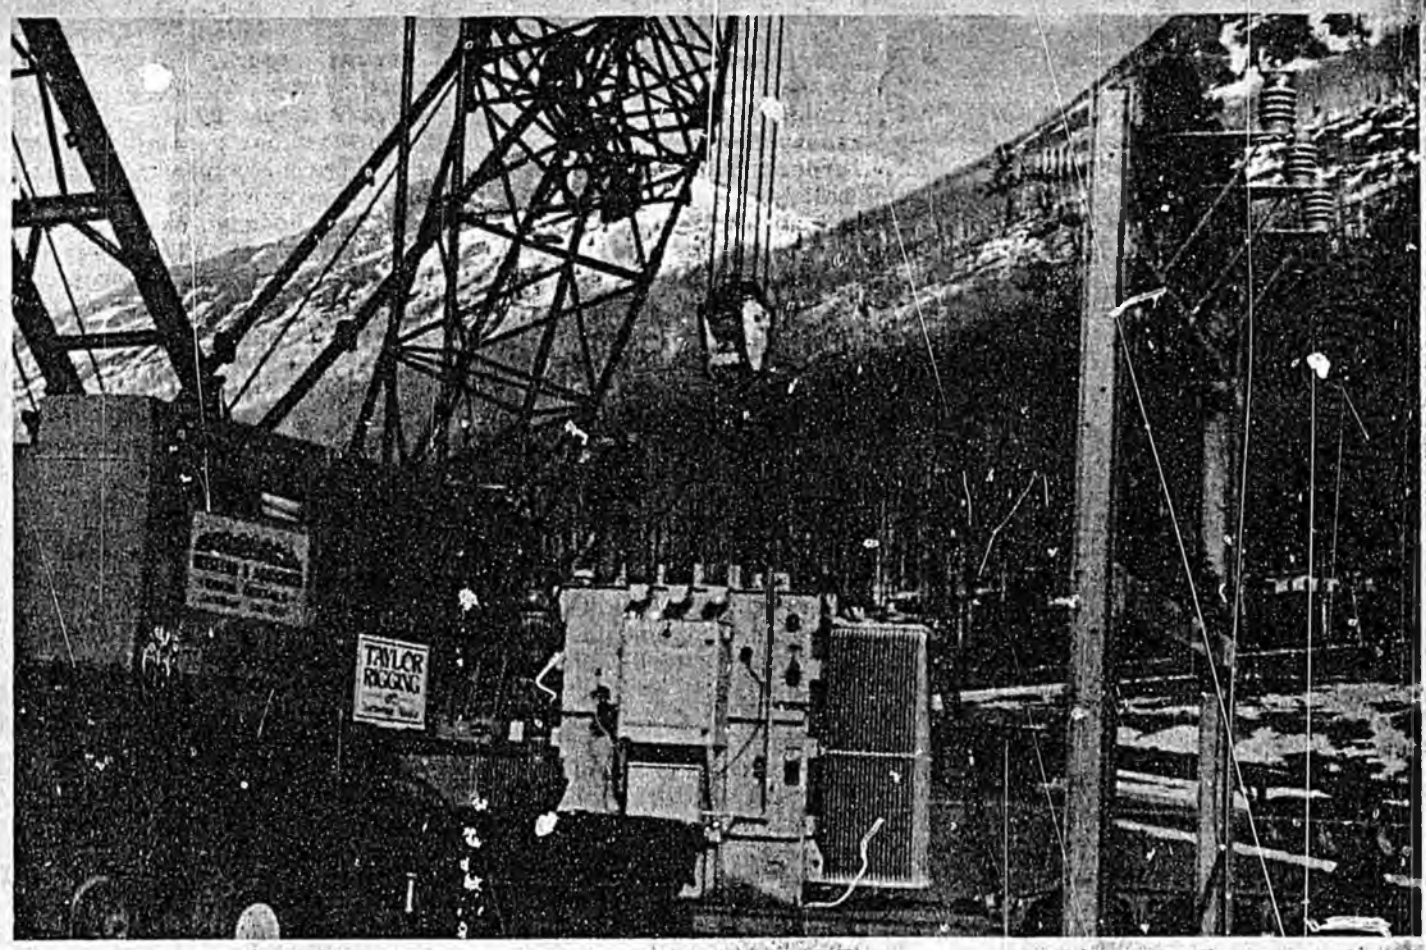
G&T: Keeping rates down

Page 16
see also pages 8-9, 24-25



G&T: To keep rate increases reasonable and give a voice to MEA members

What is a "G&T"? What does it mean to me, the average consumer? Where is MEA going to get electricity for our members? What say does MEA have over our power supply? What will it cost—or will it lower my electric bill?

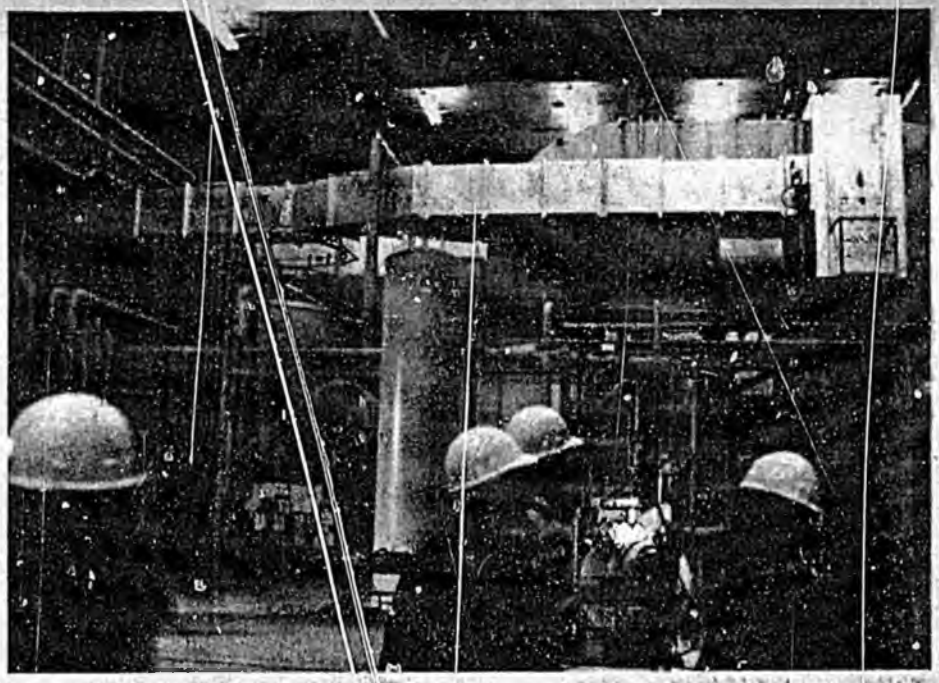
These questions need to be asked by all the consumers in south central Alaska—and the factual answers to these questions need to be given to the public by the management and boards of directors of all the utilities in the region.

Matanuska Electric Association—and its Board of Directors, its Member Advisory Committee and its management staff—the whole organziation has very carefully examined this *major* issue from every angle. We have some answers, and we want our members to know what they are.

A "G&T" is a Generation and Transmission Cooperative. It is a special kind of utility organization, which has as its only purpose to provide power generation and the high voltage transmission of that power into each local utility's power lines—into each utility's electrical distribution system.

The "G" in "G&T" is for Generation and the "T" is for Transmission. This special kind of utility organization is also called a Cooperative, because its members are each local utilities *cooperating* together, planning together, deciding together, building together and maintaining together the power generating plants and the high power transmission lines coming from those plants into each local utility system, which are necessary to meet the electricity needs of consumers.

Why shouldn't each individual utility "do its own thing," build its own power plants and transmission lines? Utility rates could skyrocket! Decades ago in this country, both lending institutions and government agencies came to the solid conclusion that electric consumers would not be able to pay the price of duplicated and unnecessary electrical plants being built side by side by competing private electric utilities. A new 60-megawatt gas turbine generating set costs about $20,000,000 today. Today, it is still true



ight, the Beluga generating tation.

pposite: A new transformer is stalled at a substation.

hat it is cheaper for our consumers, for all consumers, if utilities jointly purchase just the amount of power generating supply that is needed to meet consumers' needs, with an appropriate reserve supply, rather than each utility building its own power plants. Years ago in south central Alaska, the federal government, through the Rural Electrification Administration (REA) decided only Chugach Electric Association would be given loan funds to build G&T plant, and that they would sell power wholesale to MEA and Homer Electric Association (HEA) down on the Kenai Peninsula, as well as providing power to their own consumers. That arrangement stands today.

Unfortunately, that "arrangement" leaves MEA and HEA OUT of the big decisions about new generation and transmission facilities. Those BIG decisions can cost our consumers more on their monthly electric bill, or less, depending on whether or not the gas turbine generating unit purchased is a reliable unit. We want to be at the decision-making table, on behalf of our consumers' best interests, when those decisions are made. A Generation and Transmission Cooperative would have a Board of Directors making those millions-of-dollars-worth of decisions, which would include representatives from each local participating utility. Now we pay and have no say at the table where those decisions are made . . . by Chugach Electric Association.

In total fairness, Chugach has made some good decisions for us. We have enjoyed the benefit of some very inexpensive gas which runs Chugach turbines across Knik Arm, because Chugach negotiated those cheap gas contracts in past years. Our wholesale power rate has been less because of that decision. On the other hand, other decisions were made on the last couple of generating and transmission projects which we believe may have made our wholesale power rate a little higher than it need have been. MEA had no say in either set of those decisions on behalf of our members. A G&T, with Chugach, Matanuska and Homer Electric Associations as members, would put all the cooperatives in that decision-making process.

The three REA cooperatives all believe that some sort of regional generating and transmission orgnization should be formed. MEA and our sister co-op, HEA, believe it should be a G&T. REA, itself, believes that a G&T should be formed, as they have been formed and functioning for years, among and between REA distribution cooperative utilities in the South 48. And REA believes that an Alaskan G&T should include Chugach, as well as the generation and transmission plant they have built to meet the needs of Chugach, MEA and HEA, with loans from REA and which we have all helped pay for.

The *bottom line*, in dollars and cents to the average residential consumer based on Chugach's most recent rate increase filing, would be an immediate average annual savings on their electric bills of approximately $55 for the Chugach member, $60 for the HEA member and $75 for the MEA member. These average annual savings are based upon the fact that a potential reduction in revenue requirements from electric rates of $7,600,000 could be saved, if Chugach put its generating and transmission facilities into a G&T. These savings are based on lower interest coverage required for a G&T than for a Distribution Cooperative, as which Chugach is classified now by REA. The interest coverage level required to be collected from consumers has always historically been significantly lower for a Generation and Transmission Cooperative, than for a Distribution Cooperative. While some observers expect both those interest coverage levels to be increased by the federal government, nearly everyone acknowledges that there will likely be savings for consumers if a G&T is formed, especially in the immediate future.

"This may be the most important decision MEA has faced in the last ten years," announced MEA's Manager of Administration, John Parker, at the January meeting of our Member Advisory Committee. We agree. In our next issue of *Ruralite* we will have more about the G&T Cooperative issue.

RE: HB 475 APPROPRIATING 800 MILLION DOLLARS TO THE THE ALASKA SOUTHCENTRAL ELECTRIC COOPERATIVE.

HOUSE BILL 475 MAKES AN APPROPRIATION TO THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT FOR PAYMENT AS A GRANT TO THE ALASKA SOUTHCENTRAL ELECTRIC COOPERATIVE. THE MONEY WOULD BE USED BY THE COOPERATIVE TO DISCHARGE ALL THE DEBTS OF THE COMPANIES, ASSOCIATIONS AND COOPERATIVES THAT MERGED TO FORM ONE UTILITY.

QUESTIONS:

1. HOW WAS THE FIGURE 800 MILLION DOLLARS ARRIVED AT ?

2. WHAT ARE THE ADVANTAGES TO MERGING ALL UTILITIES IN THE RAILBELT AREA ?

3. WHAT TYPE OF STUDIES DO YOU HAVE TO SUPPORT THESE ADVANTAGES ?

4. HAVE YOU HAD A MANAGEMENT PLAN LAYED OUT THAT WOULD SHOW EFFICIENCY YET SAVE THE CONSUMER MONEY ?

5. WHY WOULD THIS MERGER PROPOSAL BE BETTER FOR CONSUMERS THAN ANY OF THE OTHERS PROPOSED FOR UTILITIES IN THE RAILBELT AREA ?

6. WITH 800 MILLION DOLLARS THE STATE COULD ENSURE THE CONSTRUCTION OF THE WATANA PHASE OF THE SUSITNA PROJECT. DO YOU FEEL THE MERGER IS MORE IMPORTANT THAN SUSITNA ?

7. IN THE PAST, THE MERGING OF SMALL UTILITIES HAS RESULTED IN SAVINGS FOR THE CONSUMER. BUT IN THE MERGER OF LARGE UTILITIES THIS IS NOT ALWAYS THE CASE. WHY DO YOU THINK SUCH A LARGE MERGER WOULD WORK IN THE RAILBELT AREA ?

Railbelt Energy Needs May Double by 2001

Anchorage, AK 9911

Alaska's Rapid Population Growth Increases Electric Power Demands

By DEB DAVID

Although per capita energy consumption by Alaskans has not increased dramatically in this decade, the demand for electricity has risen due to unprecedented population growth. The precise demand for electricity in the long-term future continues to evade planners, but they are certain that Railbelt electrical requirements will continue to grow at a healthy rate.

A 20-year energy and peak load forecast summary compiled by the Alaska Systems Coordinating Council (ASCC) for the Railbelt (see Table 1) estimates peak energy usage will jump from 627.8 MW in 1983 to 1,474 MW in 2001. Considerable disagreement surrounds the peak load forecasts, which are invaluable in planning electrical generation needs.

One argument is the peak load forecasts indicate that the proposed $5.5-billion (estimated 1983 dollars), 1,600-MW Susitna hydroelectric project is too large. Another camp argues the power projections are unrealistically low.

In either case, at least some growth in demand is certain, and utilities will continue to be active users of construction services through the next decade.

Anchorage Area

Southcentral Alaska, particularly the Anchorage area, has exhibited phenomenal population growth in the first three years of the 1980s. The growth has spurred revised peak load forecasts and provided the impetus for large electrical construction projects.

According to the ASCC forecast, Anchorage Municipal Light and Power (ML&P) generated 663 gigawatts (1 GW = 1,000 MW) in 1982. Energy consumption by the publicly owned utility is expected to reach 717 GW this year and 786 GW in 1984. Table 1 shows similar energy usage increases through the year 2001.

Peak loads this winter at ML&P are expected to reach between 130 MW and 140 MW, compared to the peak last winter of 126 MW. (Peak loads are very weather-sensitive, surging during periods of extremely cold temperatures.) By the year 1991, peak loads will nearly equal the utility's current total generating capacity of 253 MW, which includes 16 MW of power purchased from the Alaska Power Authority's Eklutna hydro facility.

ML&P currently has more than 100-MW reserve capacity, a hefty 80-percent reserve capacity. From a national perspective, the reserve is extremely high, but in Anchorage, where the largest unit produces 100 MW, the reserve is not excessive. The loss or failure of ML&P's largest unit at peaking periods would annihilate its reserve generating capacity.

> 'ML&P's 80-percent reserve capacity is not excessive for Anchorage.'

A $122.5-million, 170-mile electrical intertie between Anchorage and Fairbanks utilities will help to preserve Anchorage's generating reserve during peaking, while enabling Fairbanks area utilities to draw from Anchorage's cheaper gas-fueled power. The project, sponsored by the Alaska Power Authority, is under construction and scheduled for completion in December 1984. (See November 1983 issue of AC&O for a complete report on the Anchorage-Fairbanks intertie project.)

The municipality currently operates seven main generating units — four simple-cycle combustion turbines, two of which are diesel-fired, and two combined cycle units which work in concert with one steam turbine running off of waste heat. ML&P is considering the installation of an additional 80-MW plant next spring at a nominal cost of $16 million, if a contract for sale of excess power can be arranged with Chugach Electric Cooperative Inc.

Chugach, which serves nearly 50,000 Anchorage area customers compared to ML&P's 19,000 center city customers, has a greater immediate need for energy. Under the arrangement being negotiated, Chugach would buy excess production from the new ML&P plant until the latter utility required the generation to meet its customers' needs. While Chugach and ML&P could mutually benefit from such an arrangement — Chugach would have additional power without up-front capital costs, while the municipality could reduce its capital costs by selling power — both utilities are prepared to proceed alone if an agreement is not reached.

ML&P would install the plant in 1985 instead of 1984 without a purchase agreement from Chugach. And the cooperative is pursuing plans to purchase ML&P new generation and to build its own new unit on a parallel track. Chugach, which pegs the total project cost at $26 million, would probably install a new unit at its Beluga station, near its cheapest source of gas from the Beluga field.

Chugach Electric also is planning to increase its generation by another 40 MW with a new unit at Bernice Lake. The $17-million project would include a new gas-driven turbine and 21 miles of 115-kV transmission line from the Nikiski plant to a Soldotna substation. The transmission line portion of the contract is estimated to cost between $7 million and $8 million. The Bernice Lake unit is scheduled for installation in 1984.

In 1986-87, Chugach is planning to boost its generation further by adding

two more units — an 80-MW unit at its Beluga station and a 40-MW unit at Bernice Lake. Specifications and site plans for the projects are being developed.

The increased generating capacity will help Chugach meet ASCC's forecasted energy demand of 2,304 GW in 1987. Table 1 indicates the cooperative's energy generation climbing from 1,765 GW in 1982, to 1,854 GW in 1983, to 1,966 GW in 1984, to 2,079 GW in 1985, and to 2,192 GW in 1986.

The two Anchorage-based utilities also are undertaking major transmission line upgrades this year. All Chugach-ML&P 35-kV transmission lines will be boosted to 115 kV by the end of 1983. The improvements also entail modifying the lines into a loop system to give all substations two-way feed. The utilities have been interconnected in the past, but the recent transmission upgrades will build extra reliability into both systems.

ML&P will spend about $14 million in capital improvements this year, and has budgeted $36 million, including $16 million for the proposed new electrical generating unit at its main plant, for 1984. According to Tom Stahr, general manager of ML&P, the utility also has a four-million-gallon fuel-oil storage facility on the drawing board for possible construction in the next few years.

Additional Chugach improvements include a complete upgrade of its Beluga station transmission lines to 230 kV over the next three or four years. The project, which will boost the current 115-kV line from Anchorage to the Kenai Peninsula, likely will involve a submarine cable crossing of Turnagain Arm.

In addition, the cooperative is planning two new bulk power substations in Anchorage — one in the western end of the city near Anchorage International Airport and one in east Anchorage at University Substation. Within the next five years, Chugach is planning an upgrade of its radial transmission lines to 138 kV in South Anchorage's Huffman Road residential area.

For the immediate future, the two utilities are confident they will keep pace with Southcentral Alaska's mounting energy needs. But with the proposed Susitna hydroelectric project still hanging and the inability to precisely predict long-term energy demands, the distant future is more uncertain.

Several proposals aimed at improving future capacity have been aired, including the merger of Chugach and ML&P. Stahr believes the proposal merits further study. A merger could result in up to $60 million in savings to consumers by avoiding duplications and improving planning capabilities, he said. Chugach's board of directors has chosen to accentuate cooperative joint planning among the two utilities, avoiding any reorganization until such a move is deemed economically sound for Chugach customers, said Larry Markley, director of government and environmental affairs for Chugach.

Southcentral

The City of Seward, which purchases the bulk of its power from Chugach Electric, is planning an estimated $10-million transmission line upgrade

which will boost its power lines from 24 kV to 115 kV. In the design phase, the project is scheduled to begin in spring 1984, hinging on an appropriation from the Alaska Legislature.

Existing single-pole transmission lines are undersized for current loads, resulting in excess voltage loss, and hence, in energy loss. The current transmission system also leaves little room for any industrial load expansion at a time when Seward foresees increased electrical demands from industry.

A coal port to handle Usibelli coal being shipped to Korea's coal-fired electrical plants is scheduled to be built next fall in Seward. A ship lift currently is under construction and should be in use by the summer of 1984. The city also is expecting ancillary industries to spin off of these larger developments and an accompanying increase in residential energy demand.

Seward's current peak loading is estimated at 5 MW, a figure which is predicted to increase to 20 MW over the next 30 years. Ebasco Services Inc. currently is conducting a 30-year economic and load forecast to be used in designing the line and preparing construction contract drawings and documents.

To meet short-term energy needs, the city will have to rely on two of its three stand-by diesel generators to supplement the power it purchases from Chugach. The only power currently generated by the city utility consists of about 100 kW from a small hydro plant for use by the local hospital.

In the Glenallen-Valdez area, Cooper Valley Electric Association (CVEA) has no plans for immediate capital improvements. The system is powered by two diesel units — one producing 10 MW in Valdez and one producing 7 MW in Glenallen — in the winter months and the 12-MW Solomon Gulch hydro plant in the summer. Glenallen currently is not tied into the hydro facility and operates its diesel units year-round.

Dan Tegeler, CVEA office manager, hopes to see a transmission line built to tie Glenallen into the hydro system. But no immediate plans or funding exists.

Also in the future is the possibility of installing a pressure-reducing turbine which would tap the kinetic energy from the trans-Alaska pipeline, terminating in Valdez, and convert it to electricity. Such a system would replace Valdez's aging and expensive-to-operate diesel turbines.

The kinetic conversion talks have been held up by a lawsuit brought by the City of Valdez in an effort to take over CVEA. Tegeler said the case soon will be dismissed, opening the door for continuation of negotiations with the Alyeska Pipeline Service Co. over using the pipeline as a kinetic energy source.

Also in limbo is an Alaska Power Authority preliminary feasibility study to determine the lowest long-range cost of power for the area. The study, conducted by Stone-Webster, tentatively recommended a Silver Lake hydro plant transmitting electricity to Cordova and Valdez as the best of several options. The Power Authority is requesting funding in 1984 to complete the feasibility study.

Unlike most areas of the state, Cordova's peak electrical loads occur during the summer fishing season. The summer peak for 1983 reached 4.5 MW and is expected to climb to 5 MW in 1984.

About 1,200 Cordova area customers are served by the Cordova Electrical Cooperative Inc. A demand growth rate of between seven and eight percent a year has necessitated construction of a new power plant, which was about one-third complete in late October. The facility will increase CEC's current 7.5-MW generating capacity to 10 MW in time for next summer's fish processing surge.

The $3-million project, funded with money borrowed from the Rural Electric Association and the National Rural Utilities Cooperative Finance Corp., entails installing a new 2.5-MW diesel unit and relocating an existing 2.5-MW unit to the new power plant. The contract is being performed by Hales Construction & Associates of Seattle.

Two units — 1.9-MW and 2.6-MW Enterprise generators — will continue to operate at the existing Eyak Lake plant, but plans are to eventually phase out these older units and replace them with new unattended-operation models. CEC Manager Doug Bechtel said the move would reduce staffing levels and lower electricity rates.

Fairbanks Area

Fairbanks area utilities also will benefit from the Anchorage-Fairbanks intertie project currently under way. While demand is growing — new connects by Golden Valley Electric Association increased from 1,075 in 1981, to 1,319 in 1982 and an estimated 2,000 in

Juneau, AK 99811

1983 — utilities generally feel their generating capacities are adequate to cover power needs into the early 1990s.

GVEA currently has a generating capacity of 203 MW and expects peak loading this year to reach 72.7 MW, compared to a peak load of 67.9 MW in 1982. Peak load estimates for 1984 are 77 MW.

Power for the cooperative's 20,000 customers is generated with GVEA's main base plant at Healy, which produces 25 MW from coal-fired turbines. In addition, two diesel-driven generators each produce 65 MW at the North Pole peaking plant and several 7.5-MW generators operate at the Fairbanks Vhender complex.

While GVEA has no plans for large capital improvements in the short-term, the rising number of new connects will require continual power line expansions.

At Fairbanks Municipal Utility System (MUS), which is interconnected with GVEA and Fort Wainwright, the maximum generating capacity is 63 MW achieved with four coal-fired, steam turbines and two diesel turbines for back-up and for peaking. The system usually operates in the 30-MW to 50-MW range, and peaked at 28.2 MW in the winter of 1982-83. The utility expects a peak load this winter of 30 MW.

System growth due to new housing construction and commercial construction will require MUS to purchase an additional 25-MW coal-diesel unit, which will replace three 30-year-old steam turbines with a combined capacity of 17.5 MW. While the change will not greatly enhance generation ability, it will build more reliability into the system.

Southeastern

The Juneau area has experienced a significant increase in peak demand and energy consumption since 1980. In the spring of 1983 local utilities were required to furnish more than five million kwh of diesel-generated electricity to supplement power available from hydroelectric plants. According to the Alaska Power Administration, a division of the U.S. Department of Energy, the need for this diesel generation is expected to increase each spring as area reservoirs are drawn down until additional hydro power is available from Crater Lake.

An Alaska Power Administration study, "Juneau Area Power Market Analysis, Update of Load Forecasts," concludes that the Crater Lake addition to the Snettisham hydroelectric facility is needed, since from 40 to 70 percent of the project's output could be used the first year on-line in 1987. Firm energy from Crater Lake would be used by 1990 under a high-growth case, and by 1993 under a lower-growth scenario.

Construction of the Crater Lake project, estimated to cost $70 million, is expected to be contracted by the Army Corps of Engineers in the spring of 1984, with site construction beginning in early July. Under this construction schedule, the project would be on-line in February 1987.

Expected generating capacity from the addition is 27 MW, which represents a 60-percent increase in present generating capabilities in the Juneau area.

Crater Lake generating units will be housed in the Snettisham power plant, from which Juneau utilities draw the bulk of their power. Snettisham's current generating capacity is about 46 MW. In addition, Alaska Electric Light & Power (AEL&P) owns small hydro sites supplying about 6 MW. The privately owned utility added one diesel unit this year to give it nine stand-by diesel generators with a capacity of 17 MW.

Plans are to add two to three additional diesel generators a year to satisfy the hydroelectric deficit which currently exists. AEL&P also has requested a 17.5-MW oil-fired gas turbine which it would use strictly for stand-by in the event of a loss of load at Snettisham.

Potential hydroelectric sites beyond Crater Lake would include Long Lake Dam, Lake Dorothy, Sweetheart Creek and Speel River, according to the Alaska Power Administration. AEL&P has proposed a cooperative study to look into future development of generation facilities to ensure the best use of the area's hydro resources.

Table 2 shows the Juneau area net generation and peak demand and the trend toward increased demand and declining MW generation capacity.

In other Southeastern communities, the State of Alaska has invested millions of dollars in hydroelectric projects at Swan Lake, Tyee Lake and Terror Lake in an attempt to meet electrical demands in the long-term. (See articles on Southeastern hydro projects in this issue of AC&O.)

Electric power retains a commanding role in the development of Alaska, and will continue to spark construction activity for the foreseeable future. □

HB

497

Alaska State Legislature

House of Representatives

Pouch V
State Capitol
Juneau, Alaska 99811

Official Business

MEMORANDUM

January 19, 1984

TO: Representative Cowdery, Chairman
House Labor & Commerce Committee

FROM: Representative Joe Flood

SUBJECT: HB 497 - Overcrowding in Schools

On Tuesday, January 26th, the Committee on Labor & Commerce will be hearing HB 497, which is a bill that I sponsored. I feel this is important legislation and therefore appreciate your committee's willingness to give this legislation a fair and complete hearing.

The bill is important because it deals with the quality of education here in Alaska. A quality that is eroding away. In fact, as you may already be aware, our students graduation rates and test scores are falling. I find this to be unacceptable. I think we can do better.

That is why I introduced HB 497. This bill will provide the opportunity for school board members and teachers to meet together so they can negotiate on class size. This is important because if we can reduce class size we can increase student achievements and, once again bring our education standards up to the quality we all expect and need.

The issue of class size is not new. It was brought to the attention of the state Supreme Court several years ago. At that time the Court suggested, "It would be helpful if the legislature, through future enactments provided specific guidance on a number of items which unions seek to negotiate.". Thus, the Supreme Court is inviting a bill such as HB 497.

In that same opinion, the Court also asserted that under the Alaska Constitution, Article VII, Section 1, the legislature has exclusive domain over education in the state. I believe that we members must respond to this obligation and pass legislation that can, in a cost effective manner deal with some of our schools problems.

I believe this bill will do just that. It will provide the opportunity to reduce class size and therefore increase student achievement. I hope you will support this legislation with me and believe, as I do, that something must be done and done now. Students are flocking into the Anchorage, Matsu and Kenai districts. Class size is putting a terrible burden on our teachers abilities to provide an effective and efficient learning environment. This bill will at least provide the opportunity to deal with class size and do so at the local level so we can maintain the local control over schools that we all want.

You will note that I have also enclosed some additional backup information for your review. If you have additional questions to be answered before the hearing on Thursday, please call.

Thank you for your time and consideration in regards to this matter.

Scores low despite pay in schools

From staff and wire reports

In the past decade, Alaska has retained the distinction of having the best-paid teachers in the country and has reduced the student-teacher ratio in the classroom, but the dropout rate has been increasing and test scores have been falling.

The numbers are not so discouraging in Anchorage as in other parts of the state, says Anchorage School District Superintendent Gene Davis.

The statewide composite is drawn from figures released Thursday by the U.S. Department of Education. Secretary T.H. Bell said the statistics show that the school systems that spend the most money don't necessarily get the best results.

The data compares figures in 1982 to 1972 and puts them into national perspective.

Alaska teachers' salaries in 1982 averaged $29,000. The District of Columbia is second at $22,883. The national average is $17,360.

In 1972, Alaska led the way at $14,124, followed by New York at $11,400. The national average was $9,615.

During that 10-year period, the number of students per class in Alaska schools declined from 21 to 16, moving Alaska from 18th in the country to a tie for eighth. The national average declined from 22.3 to 18.9.

But Alaska's graduation rate declined from 79.3 percent to 71 percent, dropping it from 25th to 38th in the country. The national rate went from 77.2 percent to 72.8 percent.

Alaskans' scores on the American College Test (ACT) fell from 19.6 to 18.7 (on a scale of 1 to 36). Nationally, the ACT scores went from 15.5 to 13.5 so Alaska's standing actually improved from a tie for 15th to a tie for 13th.

The dropout rate in Anchorage appears to be declining, Davis said. As for test scores, he acknowledged a decline last year in Anchorage, but said average test scores here are nevertheless higher than the state or national average.

The biggest problem in Anchorage is the high turnover rate of students each year, Davis said. Family mobility resulted in a 35 percent turnover rate last year, he said.

The Class Size/Achievement Issue:
New Evidence and a Research Plan

by Leonard S. Cahen and Nikola N. Filby

Using "meta-analysis," Gene Glass and Mary Lee Smith have discovered important student achievement gains when class size is reduced to 15 or below. Cahen and Filby are now involved in intensive field study of the whys and hows of these gains.

On the average, student achievement increases as class size is reduced, and the advantage rises sharply for a class of 15 and below. Reductions in size of from, say, 28 to 25, are projected to make only a small difference in average achievement.

These are perhaps the most significant conclusions reached in a new "meta-analysis" of half a century of research, performed as part of a project in class size and instruction being conducted by the Far West Laboratory for Educational Research and Development with National Institute of Education funds.

Gene Glass and Mary Lee Smith of the University of Colorado were responsible for the meta-analysis. At the same time, a complementary and converging approach to the question of class size/achievement relationships was undertaken and is continuing. A small number of field studies were designed in which class size is experimentally controlled and intensive observation of classroom procedures is being conducted. A chief object is to find out what aspects of instruction in smaller classes account for the achievement advantages.

The remainder of this article will detail the procedures, findings, conclusions, and policy implications of the Far West project.

For the research synthesis, we felt that the new approach called meta-analysis would prove to be a powerful way of resolving some of the inconclusive findings reported in the literature. Glass, a primary developer of meta-analysis methodology, reported that the class size/student achievement literature might lend itself to the technique.[1]

Meta-analysis provides a method for the statistical integration of data across many studies.[2] Studies of psychotherapy and tutoring, among other fields, have already been integrated via meta-analysis. Meta-analysis proceeds by calculating the size of one or more measures of effect in each study, then pools these measures as data points for further analysis. In the case of class size studies, each data point is a measure of the difference in achievement between two classes of different size.

Glass and Smith first obtained and read some 300 reports, publications, theses, etc., that reported findings on class size and achievement. The search was made through ERIC, dissertation abstracts, research reports and reviews,[3] and from nominations and suggestions from other researchers. Glass and Smith found current reviews by Doris Ryan and T. Barr Greenfield[4] and C. D. Latleur, R. J. Sumner, and E. Witton[5] very helpful. Only 77 of the 300 documents could be used. They yielded 725 comparisons of achievement in different class sizes. Many studies yielded multiple sets of data. For example, one might report achievement data for reading, mathematics, and science for three grade levels, thus yielding nine comparisons. The studies provided a data set based on nearly 900,000 pupils and spanned over half a century. Sixty-five percent of the comparisons were obtained from journals, approximately 16% from books, and 11% from unpublished sources. Approximately 8% came from theses, a source not generally tapped in prior examinations of the literature. Approximately 56% of the comparisons were obtained on children whose ages ranged from 5 to approximately 11½ years.

As expected, most of the studies compared class size in the range of 20 or larger. Comparisons of classes of about 26 pupils with classes of more than 30 were common, 10 with 20 far less so. For many years researchers expected to see dramatic differences between class sizes of 25 and 28.

Glass and Smith define class size as the pupil-to-instructor ratio (P/I). One teacher with 30 pupils gives a P/I of 30, two with 30 a P/I of 15. One teacher doing supplementary math instruction with four pupils gives a P/I of four. The search for an appropriate descriptive ratio has a long history in the research on class size.[6] Any ratio is, at best, a crude indicator of how much teacher attention any pupil receives. One hopes that as the total number of pupils in a class decreases, the teacher will be able to provide more appropriate, personal instruction for every pupil. How to help teachers take advantage of reduction in total class size becomes a crucial issue, to be discussed later.

Glass and Smith define "delta" as a key concept. A statistical index of the achievement advantage of one size class over another size class, delta is defined as the mean achievement score for the smaller class in a study minus the mean of the larger class in the study, the difference then being divided by the within-group

LEONARD S. CAHEN is director and NIKOLA N. FILBY associate director of the Class Size and Instruction Project, Far West Regional Laboratory, San Francisco. *The study reported here was produced under NIE grant No. OB-NIE-G-78-0103.*

Cahen and Filby wish to acknowledge the help and support of Joseph Caverly and Virginia Koehler of the National Institute of Education. Some support for the project came from the Carnegie Scholars Program, Center for the Study of Evaluation, UCLA, NIE grant No. OB-NIE-G-78-0213.

standard deviation. To illustrate, Class A has 10 pupils. Class B in the same study has 20. The students in each class are given an achievement test of 50 items. The mean for Class A is 35. The mean for Class B is 30. The within-group standard deviation is 10. The delta for this hypothetical case would be .5, i.e., (35-30) – 10. Delta is a standard score. Its value can be positive, negative, or zero. Assuming a normal distribution, a delta of plus one is one standard deviation above the mean and has a percentile rank of 84. A delta of plus .5 represents the 69th percentile.

The calculation of delta is straightforward when means and standard deviations are given and when the standard deviations are equal, but these conditions are not always met. Glass worked out formulas for estimating delta from other common statistics, such as a correlation coefficient. Problems can arise in defining the within-group standard deviation when the groups differ widely in variability. In this case the estimate of delta may be biased. Continued work on the methodology of meta-analysis, as developed by Glass, will need to study the effects of heterogeneous variability on the magnitude of deltas and the relationship of the deltas to other variables in the studies being examined.

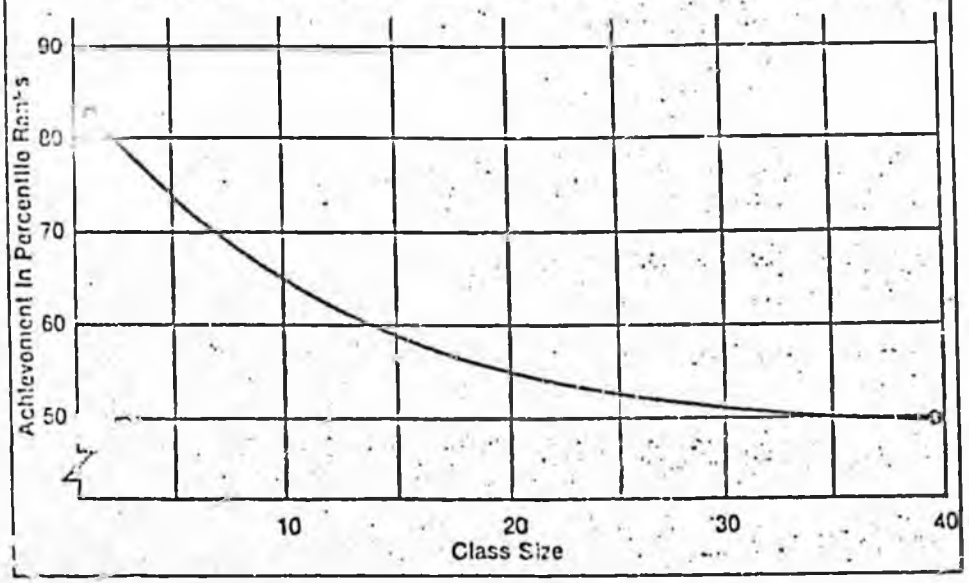
Of the 725 deltas calculated, 60% were positive, indicating that achievement was higher in the smaller class. The average delta was .09. Further analysis revealed two important interactions: The size of the difference depended on the sizes of the classes being compared; it also depended on the quality of the research design. Effects were stronger in studies having good design characteristics — e.g., where pupils were randomly assigned to classes or were "matched," or where the same teachers or pupils participated in both the smaller and the larger class. The average delta in well-designed studies was .40.

To take into account the influence of different class sizes, a regression model was developed to predict delta. After preliminary models were tried, the final system predicted delta (advantage of smaller over larger) from three variables: 1) number of students in the smaller class; 2) square of the number of students in the smaller class; 3) difference between the number of students in the smaller class and the number of students in the larger class. The regression model was used to generate a graph of predicted achievement. Predicted achievement scores were transformed to a percentile rank on a hypothetical nationally normed standard achievement test. The Glass-Smith curve for well-designed studies is shown in Figure 1.

In this figure the curve starts to rise most dramatically when class size is reduced below 15 pupils. The average pupil in class sizes of 40, 20, 15, 10, and five would be expected to score at the 50th, 55th, 58th, 65th, and 75th percentiles respectively. The predicted outcome difference can be described in grade-equivalent units over one school year: 1.00 years of growth for class size 40, 1.15 years for size 20, 1.24 years for size 15, 1.45 years for size 10, and 1.72 for size five. These data show an impressively large advantage for smaller classes.

Figure 1. The Glass-Smith Curve of Achievement and Class Size

(Data integrated across approximately 100 comparisons from studies exercising good experimental control)



The overall difference in results between the well-controlled and poorly controlled studies was dramatic. The curve for the poorly designed studies was almost flat, indicating, at best, a very small advantage to smaller classes. Almost half of the deltas came from the poorly designed studies. Little wonder class size research has been so inconclusive.

Glass and Smith analyzed data separately for elementary and secondary pupils. Small-class advantages were slightly stronger at the secondary level. It is our opinion that the advantages are too small to lead to a conclusion that elementary pupils would profit less than secondary pupils if class size were reduced. There also appeared to be no difference in results for different subject matters, such as reading or mathematics.

The meta-analysis reports that there is no correlation between class size and achievement advantage in the studies performed before 1940. Over half the 725 deltas were from pre-1940 studies. It is not surprising that surveys of the literature prior to World War II typically concluded that reducing class size had no effect on achievement.

Over the next few months we plan to fit the Glass-Smith equation to data not analyzed when the model was developed. This will allow us to estimate the error in the model for different class size comparisons. We anticipate that new studies will be identified, but these, like those available to Glass and Smith, will contain few data for class size smaller than 20, the range we believe to be crucial.

How does one judge the importance of the differences shown in Figure 1? Is the percentile advantage in achievement between class sizes of 15 and 30 big enough to make it worthwhile to reduce size by this much? Policy makers will have to decide. As researchers, we encourage the concept of utility. We regard the delta difference between class size 30 and 25 as relatively trivial. But the difference between class size 30 and 15 has utility. Enough pupils should profit to warrant pursuing ways of creating the smaller class. We acknowledge the economic difficulty of putting this judgment into practice. But we encourage investigations of reduced instructional group size for parts of the school day. More on this later.

A cautionary comment about the small changes in achievement above a class size of 20: Achievement tests measure only one aspect of instruction. They do not capture the quality or humanness of the classroom environment. Certainly larger classes permit less relaxed interaction with individual pupils. Teachers often feel overwhelmed and frustrated.

It is also important to point out that the Glass-Smith meta-analysis shows the relationship of class size and achievement without any attempt to see how this relationship is conditioned by a set of variables we shall call quality of instruction. It would be useful to find out whether, and how, good and poor teaching or environmental conditions alter the curve.

The Field Studies

The Glass-Smith meta-analysis indicates that, on the average, achievement

The field studies may show how to achieve even greater gains in small classes.

increases as class size decreases. If this is true, it must be because of some change in classroom instruction. With fewer pupils to attend to, a teacher should be able to improve the quantity and/or quality of instruction.

P. J. Porwoll and others have concluded that many qualities of classroom instruction, such as increased individualization, are improved when class size is reduced.[5] Glass and Smith are now doing a meta-analysis of studies relating class size to classroom processes, student attitude, and teacher satisfaction. Teacher satisfaction is an important outcome to consider in its own right.[6] It appears from the literature search that relatively few studies have systematically examined the question of *how* class size influences student achievement. The field studies undertaken by the Class Size and Instruction Project address this question.

The basic plan of the current field studies is to reduce class size experimentally and see what changes take place in the classroom. In each of two schools, we work with two second-grade classes, each taught by a single teacher. Midway through the year a third teacher is hired and some students from each class are moved to the new third class. Many methodologies are used to learn about the nature of schooling in the larger class situation (before the split), and this can be compared with what we learn when the classes are made smaller after the split.

An important aspect of the field studies is the role of the classroom teachers. We hope to make them collaborators in the investigation of an important educational question. As a research team, we shall form hypotheses about what might be different in a smaller class, and we shall collect evidence about what actually changes. The teachers are encouraged to "tinker," i.e., try new techniques. This means that the field studies are not a "clean" experimental test of class size but are instead a combination of class size experiment and in-service training for teachers. It is exactly this combination that we consider it important to study. Many people have suggested that reducing class size will have no effect if teachers do exactly the same thing in a small class as in a large one and that it is important to help teachers take advantage of the opportunity of a small class."

[illegible] we [illegible] the increases in achievement should be even greater than those shown in the Glass-Smith curve.

A major source of our perspective in describing classroom instruction is our previous work on the Beginning Teacher Evaluation Study (BTES).[10] In our current work we hope to elaborate and extend the BTES model of instruction, thus building a cumulative research program.[11] BTES researchers, working with second- and fifth-grade classes, looked at a series of questions about pupil learning in mathematics and reading and how this learning was related to teaching behaviors and characteristics of classroom learning environments. The BTES study convinced us that the teacher controls learning conditions that are positively associated with pupil learning. For example, larger pupil achievement gains were associated with teacher monitoring of pupil behavior, the teacher's ability to diagnose pupil status and prescribe appropriate educational tasks (quantity and quality), and teacher feedback. Classes with larger gains were typically associated with teachers who held academic goals for their pupils and provided relatively large amounts of direct instruction. It was also observed that the teaching/learning environments in these classes were supportive. Teachers did not have to be punitive in order to have children learn. As we began to design our plan for the Class Size and Instruction Project, we wondered how the learning environments in classes could be changed if we reduced the number of pupils for whom the teacher had responsibility. If class size could be reduced by one-third or one-fourth, would the teacher be able to provide a more individualized form of instruction? Would the teacher be able to diagnose pupil needs better, assign more appropriate work, and monitor the work more frequently? Would pupils' "wait time" (waiting for teacher direction or help) be reduced? Would pupil/pupil and pupil/teacher interaction change?

How would teachers feel about teaching and their pupils when class size was reduced? Would there be more time for informal discussions with pupils? Would there be changes in the curriculum or learning activities such as more and different types of art or science lessons? Would pupils now be allowed to talk to each other as they worked?

The following categories of questions provide a framework for our investigations: [illegible] environment, rule setting, interruptions and disruptions, diagnosis, assessment and pupil evaluation, teacher feedback, reward systems, teacher expectations prior to splitting, and teacher evaluation of conditions before and after splitting.[12]

Two schools are participating in the study. One is a rural school near Charlottesville, Virginia, directed by Gail McCutcheon of the University of Virginia. Pupils are primarily low socioeconomic level blacks (60%). Before they were split in January, 1979, each class had about 19 pupils. Splitting reduced the classes to approximately 13 students each. Parent volunteers assist teachers.

The second school is located in Oakland, California. Both second-grade classes prior to splitting were composed of 34 students, so size dropped to approximately 23 students per class after splitting in February, 1979. Classroom aides are used. There is a staggered reading schedule, meaning that half the students in a class come for an hour in the morning and the other half remain at the end of the day for their smaller group instruction in reading. Nikola Filby, one of the authors, teaches the class created by the split.

Methods of Data Collection

The central activity in the field study will be to document and describe differences in instruction before and after splitting. Research on teaching today is multidisciplinary and uses many approaches to knowing. Some researchers advocate the experimental method as the most powerful way of detecting teaching/learning relationships. Others feel that understanding can best be attained by spending many hours in classrooms watching the process, talking to teachers, etc. Many researchers like ourselves think it is wise to combine many methods: We observe and record what we see, we measure some dimensions, we ask our teachers to help us understand what we see. Our methodology includes both qualitative and quantitative approaches. The Oakland and Virginia researchers have developed descriptions of different approaches to inquiry being used in the study under the following headings: 1) "case study" observation, 2) interviews with teachers, 3) systematic, quantitative observation, 4) teacher journals, 5) achievement testing, 6) samples of student work, 7) photographs, and 8) later follow-up.[13]

Reporting the Findings

The detailed case studies of each class will be a major form for reporting our study findings. The case studies will document any changes between instruction in the large-class phase and the small-class phase. We hope to discover whether changes in instruction are a function of reduced class size. The case studies will also address more general questions about important characteristics of classroom in-

struction that should be understood regardless of class size.

It is our goal to blend the information obtained from the case studies, teacher logs, and interviews with the information obtained through quantitative records. The "numbers" gathered by systematic observation may help tell us *if* changes took place after splitting. The other sources of information can then, we hope, tell us *how* the changes took place.

Issues and Policies

To date, major reviews of the literature on class size have reported conflicting findings in the research.[14] Some studies supported smaller class sizes; others did not. Reviewers generally found the literature complex and inconclusive. Some reviewers became pessimistic about the value of smaller classes.[15] The Glass-Smith meta-analysis is unique because it presents a statistical synthesis that reveals general trends. Previous reviews and the conclusions drawn from them were primarily reached from an "armchair" synthesis of the literature. Studies were classified as supportive of smaller class size, larger class size, or inconclusive. The classifications were guided by the statistical significance reported. No evaluation was given in the counting or classification procedure to studies nearing conventional levels of significance. For example, studies showing probability levels greater than .05 would typically be classified as nonsignificant and thus be placed in the inconclusive category. In contrast, Glass and Smith used all the available data to develop a continuous distribution of effects and therefore move their analysis beyond the nominal classification of supportive (favoring smaller classes), nonsupportive (favoring larger classes), and inconclusive (failure to reject the null hypothesis). We feel that the new findings by Glass and Smith present a convincing case that average achievement increases as class size decreases, especially when class size is below 20 pupils per class. Earlier arguments that smaller classes cannot be justified on the basis of test scores must be reexamined in light of the Glass-Smith findings.

We must point out, however, that there are many exceptions to the general trend. Smaller is not always better. Previous reviews of the literature have done a commendable job of describing the limitations of past studies of class size and explaining how research in the area must accept the problem as interactive — a

No surplus, only underutilized teachers.

Glass-Smith analyses did not find any general interactions in the data; that is, class size effects were *not* noticeably different for children of different ages or abilities or studying different subjects. But there were many instances in the data where small classes did not produce superior achievement. Two possible explanations are the nature of the teaching that takes place and imprecision in the construct "class size."

As discussed earlier, a number of people have pointed out that the effect of class size depends on the intervening classroom instruction. Poor teaching will not be effective, even in a small class. Teachers may need help in learning to use the potential available in the small-class situation. We are exploring this issue in the field studies. Certainly anyone who plans to reduce class size should plan also to support and educate personnel to realize the potential.

From discussions of class size in the literature, it is clear that better designs are needed if we are to understand the complexities of instruction and how the complexities are influenced by the sometimes poorly defined global term "class size." Donald Pidgeon has described other characteristics of students and classrooms that influence the size of the job facing a teacher.[17] He mentions homogeneity of pupils, classroom space available, and ancillary assistance available in the classroom. The concept of teacher load is discussed in the literature. While the term is usually used to describe the teaching responsibilities of secondary teachers, it applies to the elementary school as well. A teacher who has responsibility for grading essays probably has a different out-of-school workload than a shop teacher. The teacher who has many students learning English as their second language has additional teaching burdens. The problems created by disruptive students must be reckoned with in assessing teaching load responsibilities. The Class Size Committee of the Los (California) Education Association has attempted to weight factors in the classroom (i.e., number of slow learners, hyperactive pupils, bilingual pupils, etc.) in adjusting class size so that it better reflects the range of teaching responsibilities.[18] All of these issues create complications in simplified [illegible] class size.

[illegible] have [illegible] and political climate [illegible] 9.

in collaboration with Gene Glass and Mary Lee Smith, we shall commission reaction papers to the meta-analysis on class size and achievement and the second meta-analysis dealing with the relationship of class size and classroom processes, teacher satisfaction, and pupil affect. Within our funding restriction we shall seek reaction papers from teachers, administrators, economists, and researchers. These papers will serve to clarify and highlight the different viewpoints on class size and the trade-offs that must be made. In the end, individual states, communities, or parents must make their own value judgments.

We would hope that in discussions of class size many different alternatives will be considered. The data suggest that there is relatively little pay-off for small overall reductions (e.g., 28 to 25). Attention should be given to ways to make larger reductions in more limited situations. Flexible arrangements within a school might allow the creation of smaller instructional groups for part of the school day or for those students most in need of closer supervision or individual attention. Some school districts use a staggered schedule so that students spend part of the day in a smaller class. Paraprofessionals can help. The use of nonprofessional instructional staff (aides, parent volunteers, and pupil tutors) deserves careful attention. R. G. Stennett, A. L. Hyer and Robert M. McClure, and Beatrice A. Ward and William J. Tikunoff have discussed issues relating to the use of noncertificated personnel in classroom instruction.[19] We would also hope that schools examine ways to rehire some of the many talented teachers who have lost their positions or cannot find teaching positions. We share the positions of John Corbally[20] and Herbert Walberg and Sue Pinzur Rasher[21] that the large number of unemployed teachers should be viewed as an underutilization of talent, not as a surplus. It is interesting to ponder what instruction in schools could be with two professionals teaching 30 pupils, at least for reading and mathematics in the primary grades.

We are concerned that the Smith-Glass curve may be interpreted by "budget at any cost" school administrators and citizens to mean that class size can be increased beyond 30 pupils without achievement deficit or other consequences.

[illegible] that the present [illegible] only student achievement [illegible]. Glass and Smith are presently completing a second meta-analysis for our project. This analysis will

(Continued on page 538)

Class Size/Achievement
(Continued from page 495)

examine the relationship of class size, instructional processes, teacher morale, and pupil affect. The studies will include pieces of research that previously have not been integrated into most of the literature reviews. Their report is scheduled for publication later this spring. We can anticipate that this further analysis and the field studies will give a richer picture of the benefits of smaller classes. Certainly many teachers are convinced of the need for smaller classes. NEA President John Ryor has said that wages and class size were primary strike issues in 1978-79.[22] In November, 1978, half of the Fresno, California, public school teachers struck in a dispute over class size. The school board had rejected the Fresno Teachers Association proposal to add an aide in elementary school classes with more than 33 students.

We need to consider a broad range of outcomes — the relationship between class size and the quality and humanness of the nation's schools. These concerns may make even small changes in class size worthwhile and may increase the impetus to find ways to create some small classes. We encourage educators and the public to think seriously about what we want our schools to be and how smaller classes might help make that image a reality.

HB

505

MARCH 28, 1984

TO: JOHN

FROM: KEN

RE: HB 505 "RELATING TO INSURANCE"

THE PURPOSE OF HB 505 IS TO UPDATE THE PENALTY PROVISIONS IN THE INSURANCE CODE IN TITLE 21 OF THE ALASKA STATUTES. UNDER CURRENT LAW, MANY OF THE VIOLATIONS OF THE INSURANCE CODE HAVE CRIMINAL PENALTIES, SUBJECT TO PROSECUTION AS A MISDEMEANOR. THIS LEGISLATION WOULD CREATE CIVIL PENALTIES FOR CERTAIN VIOLATIONS OF THE INSURANCE CODE. ACCORDING TO THE DIVISION OF INSURANCE THIS WOULD PREVENT MANY OF THE ADMINISTRATION VIOLATIONS OF THE INSURANCE CODE WHICH MANY INSURANCE COMPANIES NOW TAKE LIGHTLY.

QUESTIONS:

1. HOW MANY VIOLATIONS DO YOU ESTIMATE OCCUR EACH YEAR THAT ARE NEVER PROSECUTED ?

2. COULD YOU ESTIMATE THE ADDED EXPENSE TO THE DIVISION BECAUSE OF THESE VIOLATIONS ?

3. WHY IS THERE SUCH A STRONG EFFORT NOW TO CURB THESE VIOLATIONS OF THE CODE ?

4. ON PAGE 2, LINE 11, HOW WAS THE FIGURE 2,500 DECIDED ?

5. ON PAGE 2, LINE 25, 25 THOUSAND DOLLARS IS A CONSIDERABLE AMOUNT OF MONEY TO BE FINED BY THE DIRECTOR OF THE DIVISION OF INSURANCE FOR A CIVIL PENALTY. SHOULDN'T CRIMES SUCH AS EMBEZZLEMENT BE PUNISHED UNDER THE CRIMINAL STATUTES ?

SECTION BY SECTION ANALYSIS OF CSHB 505 (L&C) 3/26/84

This proposal, while lengthy, is a relatively straightforward cleanup and update of the penalty provisions in the insurance code. The first function of this bill is to consolidate the criminal penalties of the insurance code in a single section, Sec.21.36.360. There are no NEW criminal penalties created, but there are some upgrades. Currently, any violation of Title 21 (the insurance code), is a misdemeanor unless otherwise specifically labeled.

The second function of this bill is to establish an administrative penalty for any violation of the insurance code. In many cases there is no administrative or civil penalty for a violation of the code. This means that the violator gets away with the act, since a district attorney is going to be less than enamored with prosecuting as a misdemeanor some of the technical violations we see in the administration of the code. This bill sets up a dual course, where an administrative remedy and a criminal remedy will be available for any violation of the code. This is accomplished by changing all the present criminal language to civil penalty language. In doing this, the penalty levels, which have not been changed since 1966, have been reviewed and upgraded.

The third element of this bill deals with a growing concern amongst insurance regulators concerning information sought during investigations of criminal activities. In recent months a number of fraud investigations have commenced in the west, some in which our division is participating. The challenge we currently face is that there is no immunity available for persons sharing or providing information. This fact has impeded a number of investigations across the country. In some cases other insurance regulators are willing to act as our agent in securing information but have no protection if they do so. Presently two states have adopted legislation that deals with this issue. We have used a model that tracks a National Association of Insurance Commissioners model.

Section 1. Page 1, lines 9-16.
This is a new civil penalty section that fines an insurer who fails to submit its annual financial statement when due. It also gives the director the authority to suspend the activities of an insurer who fails to submit the statement when due. The concern here is that the statement is the director's principal tool in determining the financial health of an insurer and its absence leaves that health in question.

Section 2. Page 1, lines 17-25.
This section establishes a new civil penalty. The section deals with violations of AS 21.09.220-250, which is the section on the countersignature law which is in the process of repeal, and with writing through unlicensed agents. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(i)].

Section 3. Page 1, lines 26-29 & page 2, lines 1-7.
This section establishes a new civil penalty. AS 21.22 is the insurance

holding company act which is concerned with the acquisition of, control of, or, merger with a domestic insurance company. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(h)].

Section 4. Page 2, lines 8-12.
This section establishes a new civil penalty. AS 21.27 is the insurance agents, brokers, solicitors, and adjusters licensing act. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(j)].

Section 5. Page 2, lines 13-19.
This section establishes a new civil penalty. It deals with reporting of premiums to an insurer by a licensee. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(n)].

Section 6. Page 2, lines 20-27.
This section establishes a new civil penalty. is concerned with the monies a licensee receives as premium from an insured or as return premium from an insurer. These are trust funds and their misuse or misappropriation is a matter of particular concern to the division. The current criminal provision is transferred to Section 10 [see Sec. 21.36.360(b)(5)].

Section 7. Page 2, lines 28-29 & page 3, lines 1-11.
This section deals with the penalties for violation of the licensing law. The principal change here is an upgrading of the amount of penalty.

Section 8. Page 3, lines 12-21.
This section upgrades the fine applied in lieu of suspension, revocation, of refusal to renew a license from $500 to $2500.

Section 9. Page 3, lines 22-29 & page 4, lines 1-2.
This section establishes a new civil penalty. It deals with persons refusing examination by the director of their activities in the surplus lines market. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(l)].

Section 10. Page 4, lines 3-29, all of pages 5-9 & page 10, lines 1-14.
This section centralizes the criminal provisions of the insurance code. The chapter into which this has been inserted is the trade practices and frauds chapter, a logical place to look for these provisions. The new section also deals with investigation information confidentiality and immunity.

Sec 21.36.360(a). Page 4, lines 3-9.
This subsection prohibits fraudulent and criminal acts and provides that the criminal penalties are in addition to civil penalties. We have made a distinction beteween fraudulent and criminal because of the connotation

associated with the term "fraudulent". The word as used in this section generally means to intentionally injure, defraud, or deceive.

Sec 21.36.360(b)(1). Page 4, lines 10-15.
This section is drawn from the current AS 21.36.180(a), which is repealed in Section 22. No substantive change.

Sec 21.36.360(b)(2)-(3). Page 4, lines 16-24.
These sections are drawn from the current AS 21.36.200, which is repealed in Section 22. No substantive charge.

Sec 21.36.360(b)(4). Page 4, lines 25-29 & page 5, lines 1-2.
This section is drawn from the current AS 21.36.180(b), which is repealed in Section 22. No substantive change.

Sec 21.36.360(b)(5). Page 5, lines 3-5.
This section is drawn from the current AS 21.27.360(c) which is amended in Section 6. No substantive change.

Sec 21.36.360(b)(6). Page 5, lines 6-7.
This section effectively upgrades the criminal offense of failing to pay a tax liability under this title, depending on the amount the person has failed to pay. It is currently a misdemeanor under the general penalty section of the insurance code, AS 21.90.020.

Sec 21.36.360(c). Page 5, lines 8-16.
This section is drawn from the current AS 21.69.060 which is amended in Section 14. It deals with solicitation to form an insurer without a solicitation permit. No substantive change.

Sec 21.36.360(d)-(e). Page 5, lines 17-27.
These sections are drawn from the current AS 21.06.170(e) which is repealed in Section 22, and deals with perjury in an examination, investigation or hearing of the division. No substantive change.

Sec 21.36.360(f). Page 5, lines 28-29 & page 6, lines 1-3
This section is drawn from the current AS 21.69.210 and deals with false accounts, documents, or advertisements in forming an insurer. See Section 15. No substantive change.

Sec 21.36.360(g). Page 6, lines 4-7.
This section is drawn from the current AS 21.69.390 and deals with the removal or concealment of records of a domestic insurer. See Section 16. No substantive change.

Sec 21.36.360(h). Page 6, lines 8-9.
This section is drawn from the current AS 21.22.170 and deals with insurance holding companies. See Section 3. No substantive change.

Sec 21.36.360(i). Page 6, lines 10-21.
This section is drawn from the current AS 21.09.250-260 and deals with the writing of business by insurance companies through persons not licensed by this state. See Section 2. No substantive change.

Sec 21.36.360(j). Page 6, lines 22-29 & page 7, lines 1-5.
This section is drawn from the current AS 21.27.010(d), AS 21.66.160, and AS 21.84.420(a) and deals with agents, brokers, solicitors, and adjusters licensing. See Sections 4, 12, and 18. No substantive change.

Sec 21.36.360(k). Page 7, lines 6-14.
This section is drawn from the current AS 21.27.370 in the licensing chapter which requires all parties to the insurance transaction have the appropriate license. The penalty is drawn from the general penalty section, AS 21.90.020. No substantive change.

Sec 21.36.360(l). Page 7, lines 15-19.
This section is drawn from the current AS 21.33.320 dealing with examination of surplus lines transactions. See Section 9. No substantive change.

Sec 21.36.360(m). Page 7, lines 20-23.
This section is drawn from the current AS 21.69.510(a) dealing with unauthorized dividends of a domestic insurer. See Section 17. No substantive change.

Sec 21.36.360(n). Page 7, lines 24-28.
This section is drawn from the current AS 21.27.360 dealing with agents and brokers trust accounts. See Section 5. No substantive change.

Sec 21.36.360(o). Page 7, line 29 & page 8, lines 1-3.
This section is drawn from the current AS 21.36.200 which is repealed in Section 21. It deals with false applications for insurance. No substantive change.

Sec 21.36.360(p). Page 8, lines 4-5.
This section is drawn from the current AS 21.90.020, the general penalty section of the insurance code. See Section 20. No substantive change.

Sec 21.36.360(q). Page 8, lines 6-20.
This subsection establishes the level of criminal violation in each of

the activities described in the section. i.e., whether it is a class B felony, class C felony, class A misdemeanor, or a class B misdemeanor.

Sec 21.36.370. Page 8, lines 21-29 & page 9, line 1.
This section is drawn from the current AS 21.36.180(b) which is repealed in Section 22. No substantive change.

Sec 21.36.380. Page 9, lines 2-8.
This is a new provision which requires that claims forms contain a warning that falsification is a felony.

Sec 21.36.390. Page 9, lines 9-19.
This is a new requirement requiring insurers to advise the director when they have knowledge of a fraudulent claim. It also provides immunity from civil liability for persons providing such information without malice.

Sec 21.36.400. Page 9, lines 20-29 & page 10, lines 1-5.
This is a new section. It provides confidentiality for data received under Sec.21.36.390. Presently investigations are considered examination of the insurer and are confidential while necessary, but this is not true when an insurer is not involved thus impeding investigation.

Sec 21.36.410. Page 10, lines 6-13.
This is an important new provision that enables the director to effectively share investigative functions with other states. It allows the director to designate another state to act on his behalf and vice-versa. The information would be in the participating state as well as the principle state. This would be a valuable tool in investigating violations of the insurance code by non residents. Further, the sharing of the data will better enable us to head off problems before they are sufficiently entrenched and cause loss to the insureds in this state and the insurer.

Section 11. Page 10, lines 14-25.
This section upgrades the rate law penalty provisions to make them more meaningful. Presently the gain from a violation of that law may well exceed the loss from a penalty application. With this new provision, that would no longer be the case.

Section 12. Page 10, lines 26-29 & page 11, lines 1-7.
This section establishes a new civil penalty. It deals with doing a title insurance business without an effective certificate of authority. The current criminal provision is transferred to Section 10 [see Sec. 21.36.360(j)].

Section 13. Page 11, lines 8-21.
This section substantially upgrades the title insurance rate law

penalties. The gain from writing a title insurance policy at an inappropriate rate is far more profound than in a property/casualty situation. It is also more likely to occur.

Section 14. Page 11, lines 22-26.
This section establishes a new civil penalty. AS 21.69 deals with the organization and corporate procedures of domestic insurers. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(c)].

Section 15. Page 11, lines 27-29 & page 12, lines 1-6.
This section establishes a new civil penalty. This section deals with deliberate falsification of company records. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(f)].

Section 16. Page 12, lines 7-17.
This section establishes a new civil penalty. This section deals with the removal or concealment of the records of a domestic insurer. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(g)].

Section 17. Page 12, lines 18-26.
This section establishes a new civil penalty. It deals with the unauthorized payment of dividends. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(m)].

Section 18. Page 12, lines 27-29 & page 13 lines 1-5.
This section establishes a new civil penalty. It deals with the unlicensed agent of a fraternal benefit society. The current criminal penalty is transferred to Section 10 [see Sec. 21.36.360(j)].

Section 19. Page 13, lines 6-18.
This section establishes a new civil penalty. It deals with misrepresentations under the fraternal benefit society chapter. The current criminal penalty is transferred to Section 10[see Sec. 21.36.360(p)].

Section 20. Page 13, lines 19-29 & page 14, lines 1-7.
This section is needed in view of the transfer of the criminal penalty in Section 19. AS 21.84 is an exclusive chapter that incorporates the other provisions of AS 21 only by specific reference within that chapter. No substantive change.

Section 21. Page 14, lines 8-17.
This section establishes a new general civil penalty for violations of the insurance code not specifically carrying a stated civil penalty. The current criminal general penalty is transferred to Section 10 [see Sec. 21.36.360(p)]. The effect of this change is to have a civil penalty and a criminal penalty for any violation of the insurance code. This fact will

division of insurance newsletter

VOL. 15, NO. 2 FALL/WINTER 1983

LET THE SURPLUS LINES BROKER BEWARE

"A surplus lines broker shall ascertain the financial condition of an insurer before placing insurance with him. A violation of this section is punishable by a fine of not less than $50 or more than $250 for each offense. The department shall also revoke his license and may not license him as a surplus lines broker for a period of two years thereafter."

Surplus lines brokers who fail to ascertain the financial condition of insurers as required by AS 21.33-.180, run the risk of losing their license, as well as being liable for losses if an insurer proves to be insolvent. During the past year, we have followed up on numerous consumer complaints where policy security runs from poor to insolvent. Some of these policies fail to name the actual insurers as required by law. Instead, we see coverage backed by "Lloyds and foreign companies." The foreign companies are domiciled in Bermuda, Cayman Islands, Africa and Hong Kong. In many cases, it is more correct to say they were domiciled in these countries but have since gone broke, leaving policyholders little option but to recover from the surplus line broker. The Division of Insurance urges every licensee to know his/her markets. Agents and brokers must ascertain the quality of markets utilized by a surplus lines broker when they farm out coverage to a surplus lines wholesaler.

The responsibility to determine the financial condition of an insurer cannot be delegated. The surplus lines broker carries a heavy responsibility when dealing with the unauthorized market and will be held responsible for his conduct.

RURAL HEALTH CARE

Bethel Family Health Services, Inc. (BFHS), a rural, private health care provider, recently entered into an agreement with the Indian Health Service (IHS). This agreement is unique and the first of its kind in the entire United States.

This agreement makes available acute in-patient care, emergency room services, laboratory services, and radiology services to the population of the Bethel area, who are not IHS beneficiaries. Bethel is a rural village not connected by any road or rail system to a major population center. In fact, Bethel is approximately 475 air-miles from Anchorage, the nearest population center.

In effect, BFHS can be viewed as a "retailer" of health care services that purchases some services from the "wholesaler," IHS - a "hospital within a hospital."

Any licensed physician or mid-level practitioner employed by BFHS that meets the credential requirements of IHS may be granted hospital privileges. In fact, this is what is anticipated in the agreement. BFHS medical staff will be treating their own patients but in the IHS facility.

IHS has established a fee schedule for those services contracted by BFHS. IHS intends to modify this fee schedule annually each October 1 to reflect changes in the actual costs incurred based upon the Medicare methodology. BFHS is financially responsible for all charges incurred on behalf of its own patients. BFHS will be billed directly by IHS and, in turn, will bill their patients. However, BFHS must pay IHS directly and must collect from their patients.

1983 INSURANCE COMPANY ANNUAL STATEMENTS AND PREMIUM TAX

The Alaska premium tax statements were mailed to all insurance companies doing business in Alaska during the week of November 14. The annual reports are due in Juneau on or before March 2, 1984. Premium tax payments must be received in the Division of Insurance before April 1. A postage mailing date stamp will not be accepted in lieu of actual receipt.

The 1983 INSURANCE REPORT is now available from the Division of Insurance for $10.00 per copy. Please send checks in advance with order. Make them payable to the Director of Insurance and/ or the Division of Insurance.

SHOW CAUSE ORDERS

83-10: World Underwriters/Richard Buestad

The division negotiated with Corroon Black/Dawson (50% owner of World Underwriters Northwest) a stipulated agreement signed by Richard Buestad (50% owner of World Underwriters Northwest) whereby World Underwriters Northwest agreed to pay a $50,000 fine, $25,000 suspended, and $2,500 to help defray investigative costs. In addition, World Underwriters Northwest agreed to withdraw their request for renewal of their nonresident surplus line broker license and not reapply for any license for two years. The basis for the penalties was the allegation that World Underwriters Northwest transacted business with admitted companies while not properly licensed, altered policies, issued fraudulent endorsements, charged premiums in excess of those reported to the companies and failed to maintain a proper trust account.

83-11: Corroon and Black/Dawson and Company, Inc., Withdrawn without prejudice.

83-12: Rollins Burdick Hunter of Washington entered into a stipulated agreement with the division whereby they agreed to several points, including that they would pay $2,500 to help defray investigative costs and forfeit to the division $7,500, a sum equivalent to the commissions received by Rollins Burdick Hunter of Washington on premium charges based on rates not filed with the division. The agreement was based on the division's contention that Rollins Burdick Hunter knew or should have known that certain policy dailies and endorsements received from an intermediary and given to the insured were not identical with those authorized by the company.

83-13: Alexander and Alexander. Hearing postponed indefinitely.

83-14: Baccala and Shoop entered into a stipulated agreement whereby they agreed to pay a $50,000 fine with $25,000 suspended, provided no violations occur between November 1, 1983 and December 31, 1984. All of Baccala and Shoop's licenses were suspended until December 31, 1984. Such suspension is stayed provided no violations occur between November 1, 1983 and December 31, 1984. The basis for the penalties was the allegation that Baccala and Shoop had acted as a general agent in Alaska without a license, transacted admitted business with improperly or unlicensed individuals and allowed an intermediary to alter policies and to charge premiums in excess of the premium reported to the company.

83-16: Alaska National Insurance Company. Fine levied for dealing with improperly licensed persons.

83-17. John Anderson. Hearing pending.

83-18: Rosemurgy and Company fined $5,000 for an unlicensed trainee adjuster adjusting claims. They are further prohibited from using trainee adjusters for a period of five years.

83-19: F. B. Beattie and Company, Inc. has entered into a stipulated agreement and agreed to pay a $4,000 penalty to the division for acting as a broker without a proper license and provide a list of all business conducted with admitted companies in the past two years. The division has agreed to issue F. B. Beattie and Company, Inc., a broker's license.

83-20: Frontier Underwriters, Inc., has entered into a stipulated agreement and agreed to pay a $4,500 penalty to the division for acting as a broker without a proper license. The division has agreed to issue Frontier Underwriters a broker's license.

CEASE AND DESIST ORDERS

83-12: Automobile Warranty Corporation was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-13: Everett Sports Cars was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-14: Gold Rush Auto Sales was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-15: Universal Dealer Services, Inc., was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-16: Stephen J. May International was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-17: Frontier Underwriters, Inc., was ordered to cease and desist from dealing with admitted insurance companies in the State of Alaska.

83-18: Swett and Crawford (Seattle) was ordered to cease and desist from dealing with admitted insurance companies in the State of Alaska.

83-19: F. B. Beattie and Company, Inc. was ordered to cease and desist from dealing with admitted insurance companies in the State of Alaska.

83-20: Don Sherwood was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-21: Loveless and Company, Inc., was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-22: Seligman and Seligman was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-23: Corroon and Black/Carter and Higgins was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-24: Cordell Excess and Surplus Lines was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-25: Professional Reinsurance Office, Inc., was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-26: Swett and Crawford (Dallas) was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-27: Stewart Smith Mid-America, Inc., was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-28: PENCO was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-29: The Nelson Company was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-30: GBS Insurance Agency was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-31: Alaska Commercial and Marine Insurance Brokerage, Inc./Martin Horn was ordered to cease and desist from acting as surplus lines brokers without a license. Martin Horn was ordered to cease and desist from acting as a broker on Alaska commercial license until qualifies to do so.

83-32: Miro and Associates was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-33: Bruce C. Davis was ordered to cease and desist from acting as a broker and dealing with admitted companies in the State of Alaska.

83-34: International Rental Insurance Services, Inc., was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

VOL. 15, NO. 1 SPRING/SUMMER 1983

DIRECTOR'S COMMENTS

by Kenneth C. Moore

"Change" is a word you hear with increasing frequency. With each change new problems arise. As a regulator of the business of insurance my major concern is Solvency of Insurance Companies.

Insolvencies are occurring with increasing frequency. These events are happening to both life and property and casualty companies. The citizens of Alaska deserve nothing less than the very best. As a producer agent-broker you owe this high degree of responsibility to each member of the buying public. If you have any questions there are some simple steps that can be taken. A few of them are:

1. Check the "Best's" rating. If you do not have a current guide, call the division's office in Anchorage or Juneau.

2. Twice a year we publish a "White List" of companies which meet our unofficial guide for surplus lines companies. Please understand that our publishing of the list is no guarantee of solvency. It simply means that we have made some checks as to capital and surplus. We also follow various guides as to policy service, promptness of payments and a host of other informative information, including trust deposits. We do not deny that there is some subjectivity in the formation of this list. Without the freedom of that choice I would immediately eliminate its publication.

3. Sharing information between us is important. Many of you rub shoulders on the same street with persons who have information. Likewise, I will share with you if you will only ask.

Let's keep our market clean.

PROTECT OUR FISHING FLEET

by John George

Fishing is a major component of the economy of Alaska. Likewise, fishermen are extremely reliant upon insurance for protection of their property and defense of potential liability. Recent events have caused the fishing industry to have some misgivings concerning the integrity of the insurance industry.

The Division of Insurance has revoked licenses of those who may have been a part of this confusion. We found instances of subscription policies which failed to name the security. The division also found policies listing a company actually being written in a different company.

Investigation revealed at hearings that companies were being used whose financial background was suspect. Consequently, we have vessel owners who have hull losses, P and I claims and return premiums unpaid.

It is the duty of the broker and surplus lines broker to determine the substance of the security. No licensee is privileged to pass the blame on to some other wholesale source.

Due to situations described above, many lenders have adopted the director's "White List" as the standard for acceptance of surplus lines companies on mortgaged vessels. Cut rate prices set by the use of unreliable security have become the standard by which all legitimate quotes are compared. Unpaid claims reflect on all insurance companies.

Fishermen contacted by the division have indicated that they do not understand marine insurance and are very dissatisfied with the handling of all marine claims. In order to gain the confidence of fishermen the insurance industry will need to fully explain the options, differences between admitted and surplus companies and the procedures for collecting a loss from insurers.

NONADMITTED CARRIERS
by Dorothy Devinney

A broker selling insurance coverage in nonadmitted carriers should be aware of the consequences to his client and himself should the company not pay a claim due to poor claims practices or insolvency.

Every nonadmitted policy in Alaska is required to have the following wording on it:

> "This contract is registered as a surplus line coverage under the insurance law of Alaska."

In addition to the wording required under AS 21.33-.120, Bulletin 81-4 (Amendment) requires the following wording affixed to the face of the policy:

> "THIS POLICY OF INSURANCE IS NOT COVERED BY THE ALASKA INSURANCE GUARANTY ASSOCIATION ACT."

This lettering must be in red and at least 3/16" high.

The meaning of the above wording should be explained to every insured.

Explanations

It means that the benefits of the State insolvency law do not apply. It means that the insurance director does not have a control over the company, nor can be of any service in claims or have any control over the company's assets.

It also could mean that the broker providing the policy could be held liable for an insolvency, even if the risk is reinsured in a solvent admitted or nonadmitted company.

The benefits of the reinsurance do not flow to the insured, but rather to the receiver of the insolvent ceding company for the benefit of "all" insureds, unless there is a cut-through endorsement.

Every broker should take extra precautions when dealing with a nonadmitted insurer and when covering property outside the State or in dealing with a foreign insurer.

MARKET SURVEILLANCE
by Norm Cheney

Recently, the division has become aware of many illegal activities taking place in the marketplace. These activities range from companies paying commission to unlicensed brokers all the way up to fraud. Many of the activities appear to be the result of intense competition for business in the commercial arena. While the division welcomes and encourages healthy competition in all areas of the insurance market, we would urge all members of the industry to confine their competitive efforts within the legal and moral framework upon which an industry based on trust must rely.

All admitted companies are urged to review their procedures to verify that all agents, brokers and general agents they do business with are properly licensed and that the rates being charged are filed with and approved by this division. Those utilizing schedule rating plans should review Bulletin 82-9 to make sure they are in compliance. When conducting field audits have the auditor look beyond the numbers; quite often irregularities can be picked up through the correspondence in the file. This tactic was instrumental recently in aiding the division in the identification of apparently illegal overcharges totalling almost $78,000.

While the vast majority of agents and brokers licensed in Alaska conduct their business in an ethical manner, there are few that do not choose to follow the rules. These are not the type of representatives the insurance industry needs in Alaska. The division encourages your cooperating in helping to ferret out those undesirable elements for the betterment of the industry as a whole.

Thirteen Alaskan insureds have received refunds and credits totalling $77,995 as a result of an investigation conducted by the Division of Insurance. The cash refunds were $61,443 plus $3,210 interest, in addition one insured received a $13,342 credit on an existing policy. The refunds ranged from a low of $103 to a high of $22,953. The division's three-

month investigation uncovered evidence that the 13 insureds had been overcharged for insurance through the use of allegedly altered policy dailies and forged endorsements. In most cases, it appeared that the producing brokers were unaware of any illegal premium manipulation. The insurance companies whose policies were altered are Twin City Fire, American [illegible]tennial and Old Republic. They, while innocent of any direct involvement in the scheme, agreed to pay to the insureds through their general agent Baccala and Shoop Insurance Services the overcharges plus interest from the date of the overcharge and will be reimbursing the division for investigative expenses. Their cooperation in this matter has been appreciated.

The investigation is continuing and the division expects to issue at least four show cause orders on this matter in July.

BULLETIN 83-5

TO: ALL AGENCIES AND COMPANIES

RE: QUALIFYING TESTS AND EXAMINATION PROCEDURES FOR PRODUCERS

Due to previous problems encountered in the past, new guidelines have been established to permit more efficient and equitable testing procedures, ultimately benefiting all applicants for licensure. These procedures are primarily applicable to the Anchorage and Fairbanks testing facilities.

1. All test fees are payable in advance and must be received in the Juneau office by the Thursday prior to the test.

   A. Test dates in Anchorage are the first and third Thursdays of each month at 7:00 p.m.

   B. There is only one test date per month in Fairbanks, that is the first Thursday of the month at 1:00 p.m.

In Anchorage, all fees are collectible in advance (AS 21.06.250(a)). NO checks will be accepted in the Anchorage office.

2. All applicants are requested to be at the test site no later than 6:45 p.m. to facilitate processing of the admittance cards so the examination may promptly begin at 7:00 p.m. (The test time is 7:00 p.m. to 10:00 p.m.)

3. If your admittance card is lost, not received by the day prior to the test date, or if there are errors on your admittance card, notify Juneau no later than noon, Juneau time, of the test day (10:00 a.m. Anchorage time). Juneau can authorize a new admittance card to be issued by the Anchorage office. You will be required to turn in the old admittance card when you pick up the corrected one. No corrected admittance cards will be accepted at the test site. Identification will be required, along with your admittance card before any applicant will be allowed to sit for an examination.

If an applicant cannot appear on the scheduled test date, they must notify the Juneau office (465-2578) 72 hours prior to the test date for rescheduling. For nonappearance without notification, the fee will be forfeited and another fee will need to be submitted before another examination date is scheduled.

4. When an applicant fails to pass an examination, there must be at least a 20-day study period before retesting. After the third time the applicant has failed to pass the examination, the applicant must wait at least 90 days from the date of the most recent failure before being eligible to retake that examination.

SHOW CAUSE ORDERS

82-8: All insurance licenses of Fred [illegible] Tucker and Fred A. Tucker and Company [illegible] evoked for numerous violations of the Insur[illegible]de pertaining to surplus lines placements o[illegible]ng and vessel insurance.

83-1: Any and all licenses held by John C. Karnos were permanently revoked and fines totalling $35,000 were levied for misappropriating funds for his personal use.

83-2: John C. Murphy entered into a consent agreement in lieu of SC 83-2 for misappropriating funds for his personal use and for acting as an agent without a license. A fine of $1,000 was levied and his adjuster's license was permanently revoked.

83-3: Integrity Insurance Company entered into a stipulated agreement with the director and reimbursed $1,000 in investigation expenses for paying commissions to an unlicensed person or firm.

83-4: Forrest Gene Short's agent's license was voluntarily surrendered until July 1, 1983 for irregularities pertaining to insurance applications.

83-5: Mead Reinsurance Corporation entered into a stipulated agreement with the director and reimbursed $1,000 in investigation expenses for paying commissions to an unlicensed person or firm.

83-6: Planet Insurance Company entered into a stipulated agreement with the director and reimbursed $1,000 in investigation expenses for paying commissions to an unlicensed person or firm.

83-7: Marsh and McLennon (Seattle) was fined $2,000 with $1,432 suspended for failing to file Surplus Line Affidavits from September 1982 - January 1983.

83-8: LaBow Haynes Company, Inc., entered into a stipulated agreement and paid fines of $9,425 for writing insurance without a proper license and dealing with matters outside the scope of their license.

83-9: Fred S. James' hearing for charging a fee in excess of filed insurance rates was postponed until August.

CEASE AND DESIST ORDERS

82-5: Leroy E. Kuehne was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-1: S. J. Petrakis Insurance Services, Inc., was ordered to cease and desist from transacting insurance in the State without a license and paid a $2,000 penalty pursuant to a stipulated agreement.

83-2: Alexander Howden Insurance Services, Inc., of Atlanta, was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-3: Baccala and Shoop Insurance Services of San Francisco, Los Angeles and Seattle were ordered to cease and desist from transacting insurance in the State of Alaska without a license. A fine of $2,000 was levied by stipulated agreement.

83-4: Patricia Fleischman, Inc., was fined $2,000 for dealing with an unlicensed producer in Alaska by the terms of a stipulated agreement.

83-5: Independent Contractors-Operators Association was ordered to cease and desist from conducting the business of insurance in Alaska without a license.

83-6: Patrick Hines was issued a Cease and Desist Order to stop the practice of insurance in Alaska with out a license. Mr. Hines was subsequently issued an agent's license.

83-7: Aviation Insurance Unlimited Agency, Inc., was ordered to cease and desist from conducting the business of insurance in Alaska without a license.

83-8: John Robbins and Lightwing Insurance Agency was ordered to cease and desist from conducting the business of insu ance in Alaska without a license.

83-9: Samuel W Hartman was ordered to cease and desist from conducting the business of insurance in the State of Alaska without a license.

83-10: Not issued.

83-11: World Underwriters Northwest, Inc., was ordered to cease and desist from acting as a broker as they are only licensed as a nonresident surplus line broker.

BULLETINS

82-9: Schedule or Individual Risk Modification Plans. This bulletin eliminates aggregate limitations on schedule or individual risk modification plans for property and casualty. Rate modifications are limited, however, to the extent that they must be justified and shall not be discriminatory.

83-1: Notifies all resident and nonresident surplus line brokers that International Indemnity Company of Texas has not been approved for our "White List."

VOL. 14, NO. 1 FALL/WINTER 1982

DIRECTOR'S COMMENTS
by Kenneth C. Moore

TIME FOR REVIEW

In March 1979, I listed my specific philosophies and goals for the Division of Insurance.

My Philosophy remains the same.

Here are the goals restated. True evaluation must come from you, to see how we have measured up to the goals. I would appreciate your comments on how I view the results:

1. To bring the personnel of the Division of Insurance into closer contact with the public.

   Result - Through public hearings, seminars, and literature, we have exposed ourselves. Inquiries are increasing, which would indicate some success.

2. To personally visit as many cities and villages as the travel budget will permit.

   Result - We have tried. Alaska is a huge area. We will continue in this effort.

3. To publish an educational handbook on automobile insurance covering rate making factors and tips on securing automobile insurance.

   Result - This book as well as one on homeowners has been published, the demand has been heavy.

4. To hold hearings in as close proximity as possible to the principals of such hearings.

   Result - Completely accomplished for Alaskan residents.

5. To utilize the Division of Insurance financial and market surveillance personnel on any questions of solvency or market conduct where such action is justified and do so without delay.

   Result - In the admitted market our efforts need improvement. In the Surplus Lines Market our actions have brought better results.

6. To personally make contacts in the insurance world that hopefully result in the insurance companies competing for business.

   Result - There is now intense competition. The marketplace in many instances has corrected itself. Our sales effort in Workmen's Compensation and Nonstandard Automobile Insurance has been a notable success.

7. To encourage the insurance companies writing business in Alaska to invest portions of their assets in Alaska enterprises.

   Result - Success here has been beyond our fondest expectations. Investments have expanded at the rate of approximately one hundred million dollars per year. In this we had the wholehearted assistance of our staff and from our agents and brokers.

2. Employees of admitted insurers need not be licensed to solicit, bind or otherwise carry on the business of insurance for their employer.

Licensees must also limit their insurance dealings to those types of insurance for which they are licensed. The most frequently noted violations are agents acting as brokers and agents or brokers acting as surplus line brokers.

TO COMPANIES APPOINTING AGENTS:

Agent appointment Forms 08-230 not submitted in four copies, typewritten, and signed by an authorized person will no longer be accepted by the division. Deviation from this in the past has caused delays in issuing appointments and overall confusion. We will be better able to serve you under the new procedure.

ATTENTION RESIDENT BROKERS:

Broker licenses will be up for renewal December 31, 1982. The division will attempt to send a renewal Form 08-266 sometime before the first of December. If the form has not been received before the time indicated, notify our office in Juneau or Anchorage so a form can be sent or picked up. Submit forms and fees on time or a late filing may result in a penalty.

SHOW CAUSE ORDERS

81-14: Barry Callahan's agent license was revoked and fines totalling $850.00 were levied for submitting false applications for insurance.

81-11: Lawrence M. English's life agents license was revoked and fines totalling $4,000.00 were levied for soliciting surplus lines insurance without an appropriate license.

81-16: Neil Padgett, Harold Wurster, and John Kelczewski all had their life agents licenses permanently revoked and fines totalling $1,650.00 were levied for trade practice violations committed as agents of Combined Insurance Company of America. Combined entered into an agreement limiting the scope of their future operations in this State and agreed to reimburse the State for up to $20,000.00 in past and future investigation costs related to their agents.

82-2: Greg Parks entered into a settlement agreement for operating without a valid license for a period in excess of one year. A penalty of $2,000.00 was levied.

82-3: Bayly Martin and Fay, Clyde Clary, Lois Clary, Jack Katzenmeyer, and Mary Shields have each entered into an agreement in settlement of Show Cause 82-3.

BMF as owners agreed to closely monitor their Aiaska operations in the future and pay a $75,000.00 fine. BMF was dismissed from further actions without prejudice.

Clyde Clary's licenses were revoked and a fine of $75,000.00 was levied with $70,000.00 suspended provided that he commit no further violations of AS 21.

Lois Clary's surplus lines brokers license was revoked and fines of $50,000.00 were levied with $45,000.00 suspended provided that she commit no further violations of AS 21 during the next five years. She is also prohibited from dealing with premium finance matters for five years.

Jack Katzenmeyer agreed not to violate any part of AS 21.

Mary Shields was fined $10,000.00 with $9,000.00 suspended provided that she not violate AS 21 during the next five years. She is prohibited from exercising any signatory powers on behalf of any insurance agency in this State.

82-5: Lambert "Pete" Peterson hearing was continued pending the outcome of criminal proceedings against him. NOTE: Peterson was convicted on seven criminal counts. Sentencing has been set for January 14, 1983. Peterson has announced his intent to appeal.

82-7: Gail Brewer's insurance licenses were revoked for unfair trade practices relating to his failure to place coverage despite his assurances to the client that coverage was in effect at all times.

CEASE AND DESIST ORDERS

81-15 & 81-16: Robert and John Deck were ordered to cease and desist from soliciting insurance without a license.

82-2: Cease and Desist Order issued to Alaska Shield for acting as an insurer without a Certificate of Authority. On appeal a hearing has been set for March 1983 with the concurrence of all parties.

82-3: Property Management Service, Inc. was ordered to cease and desist from solicitation of insurance without a license.

82-4: Midwest Mutual Insurance Company was ordered to cease and desist solicitation of insurance in the State of Alaska without a Certificate of Authority.

BULLETINS

82-1: Notifies all resident and nonresident surplus lines brokers that surplus line affidavits must be filed within 30 days of the end of the month for which the report is made.

82-2: On February 2, 1982, the director issued an updated list of eligible unauthorized insurers who have met Alaska's minimum trust or capital and surplus requirements.

82-3: The director continued permission to place aircraft workers compensation in the surplus lines market. This bulletin also sets out certain conditions on the placement of this coverage.

82-4: Rescinded

82-5: Advised all insurers of possible delays caused by renovation of the Juneau office. Renovation was completed October 14.

82-6: On August 10, 1982, the director issued an updated list of eligible unauthorized insurers who have met Alaska's minimum trust of capital and surplus requirements.

82-7: Removed Oceanus Mutual Underwriting Association from the "White list" of approved unauthorized insurers on October 7, 1982.

82-8: Notified all surplus lines brokers to cease using Amherst Insurance Company. The company is in receivership.

REGULATORY ORDERS

81-6: Adopted medicare supplement regulations.

81-7: Authorizes political subdivisions as a qualifying group for life and disability coverages.

81-8: Requires insurers to adopt supplement payment coverage pertaining to attorney fees.

81-9: Pertains to filings by title insurers.

81-10: Adopted regulations pertaining to variable life insurance.

81-11: Approved merger of INA Corporation and Connecticut General Corporation.

81-12: Approved the application of Alaska National Insurance Company to invest in a wholly owned subsidiary in order to acquire ownership in their home office building.

82-1: Repeals regulations pertaining to deposits required by insurers holding a Certificate of Insurance.

In this newsletter we have omitted the changes in company names and companies newly admitted to conduct business in the State. Copies of these lists are available upon request. Please enclose a stamped self-addressed envelope with your request.

United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada

Composed of journeymen and apprentices who have jurisdiction over every branch of the plumbing and pipe fitting industry

LOCAL NO. 262

STREET ADDRESS 245 Marine Way #7

CITY, STATE, ZIP Juneau, Alaska 99801

SUBJECT MATTER

DATE

January 31, 1984

Mr. Chairman, Committee Members,

My name is Dwight Perkins and I am the Business Manager for the United Association of Plumbers & Pipefitters Local Union 262 in Juneau, Alaska. I am also speaking on behalf of the Alaska state Pipe Trades Council of the United Association with a membership of two thousand state wide.

I've come to speak in oppostition of House Bill 508, an act realating to the Plumbing code. I would like to give you some background of the code and address some concerns that we have.

In October 1981 at it's 52nd. Annual Conference, the International Association of Plumbing and Mechanical Officials adopted the Uniform Plumbing Code, 1982 edition. Up until 1982 all such codes had limited the use of polybutylene, Polethylene, Polyvinal Chloride and Asbestos Cement Pipe for water distribution systems outside of a building, under section 1004 materials.

In addition section 401-materials limited the use of ABS and PVC Piping installation for drainage and venting systems to residential construction, not more than two stories in height.

The 1982 addition of the Uniform Plumbing code has lifted restrictions regarding the use of PB water pipe under section 1004 so that now it may be used for hot and cold water distribution systems within a building.

In Section 401, ABS and PVC Piping installations can be used where all combustible construction is allowed.

Because of the less stringent attitudes the International Association of Plumbing and Mechanical Officials has adopted raises several issues of concern not only here in Alaska but nationwide.

The issues I would like to address regarding the use of plastic pipe, whether PB., PVC, asbestos cement pressure piping or ABS presents the following problems:

1. Durability

2. Thaw ability in Arctic regions as well as other parts of the state.

3. Fire Hazards (both combustibility and gases released upon combustion)

4. Use of water system as the electricial "ground"

5. Permeability and related public health issues

6. Worker safety

1. Durability In discussing the issue of Durability the most obvious difference between plastic and metal pipe is durability. Some of Alaska is earthquake prone and hence durability can be quite important. In construction of large residential buildings and commercial buildings, the increased usage makes durability important. This issue has the advantage of being self evident. Cast iron, mallable iron or copper piping and its qualities are apparent to all and a comparision with the qualities of plastic, particularly in temperature extremes such as those in the interior, needs no further amplificiation.

2. Thaw Ability The issue of thaw ability in arctic regions as well as other parts of the state is cause for concern in that sometimes pipes freeze. The common methods of thawing pipes are (a) the use of propane torches, (b) the use of steam, and (c) the use of clamp on electricial generators. Noe of these can be used on plastic pipe. In any installation where the freezing of a pipe represents a danger to either a considerable investment or a large number of people, the ability to thaw is

important.

3. Fire Hazards The 1979 edition of the Uniform Plumbing code states that ABS or PVC installation be limited to residential construction, not more than two stories in height. The 1982 UPC states that ABS and PVC piping iinstallation shall be limited to the structures where combustable construction is allowed. It also states that PB pipe may be used for hot and cold water distribution system within a building. The problems in this area are twofold. First, plastic pipe will burn. In burning, the plastice makes itself useless as a pipe and hense terminates the water which is often necessary to fight a fire. Additionally the burning of the pipe generates gases.

4. Grounding Most modern construction involves electricity. Electricity presents the problem of short circuits. Almost all communications that use electricity require additional grounding. Traditionally, this grounding is done through the water system in a building. In a plastic pipes water system, there is no readily available ground. If the water has sufficient mineral content and if the grounds are inserted through the pipe, adequate grounding may occur. Otherwise the defense against electricial accidents and fires is worthless in plastic piped building.

5. Permeability Recent tests in California have duplicated field and laboratory experiences of water utility

districts and enviromental health experts concur that ploy vinyl chloride (PVC), Polyethylene (PE) and Polybutylene (PB) water service lines can be and are permeated by gasoline, petroleum distillates and industrial solvents. The Public Health impact can be serious enough to require the removal of an entire underground network of plastic water service lines and may cause serious health consequences for its consumers. Since plastic pipe was found to have a potentially adverse effect on the environment and because of its threat to water quality, worker safety, and fire safety, state agencies in California will not allow its expended use until all scientific and public health questions have been answered.

Because the International Association of Plumbing and Mechanical Officials proceeded with the expanded use of plastic pipe in its 1982 Uniform Plumbing Code, a colition of state public and private consumer groups, environmental and labor organizations sued I.A.M.P.O. and forced a notice of disclaimer at each location in the code where plastic pipe is mentioned.

6. Worker Safety Assemblage in small construction quantities such as residential housing, do not normally bring workers beyond the dangerously toxic levels of exposure to the Benzene, Chloroform and kindred glue. On larger projects, the time spent on their assemblage puts workers beyond the safe limits of such exposure and in effect forces him to sniff glue. Because the damage from these chemicals is permanent and irreversible, the united association and its members strenously object to the

current state of the art process for assembling plastice pipe.

In closing, I would ask that you consider holding House Bill 508 in Committee and review the amdenments the muncipality of anchorage has adopted regarding the 1982 edition of Uniform Plumbing Code.

LEGISLATIVE PROPOSAL ANALYSIS

Subject of Proposed Bill:

"Adoption of 1982 Uniform Plumbing Code"

Background Information:

Every third year, the International Association of Plumbing and Mechanical Officials adopts a revised plumbing code incorporating advances and improvements in technology. During the Twelfth Legislature, the department did not propose legislation to adopt the 1982 version of the Uniform Plumbing Code because there were conflicts between the Uniform Plumbing Code and the Uniform Building Code. The Department of Public Safety (Fire Marshall's Office) will propose legislation to adopt the most recent edition of the Uniform Building Code which is consistent with the 1982 Uniform Plumbing Code.

Summary:

The most noticeable changes in the plumbing code are as follows:

Section 108 allows for a larger grease interception to serve one or more fixtures. Section 203(d) states that copper tubing used for water service shall have a weight of not less than Type L.

Table 4-3, footnote #4. Evidence indicates that a three-inch horizontal waste will effectively handle discharge from three water closets; thus the code change, so that only four water closets or six unit traps are allowed on any vertical stack, and not to exceed three water closets or six unit traps on any horizontal branch or drain.

Section 601 changes will not allow cold storage rooms, refrigerators, cooling counters, etc. designed to hold food or drink, or sinks for washing or preparation of food, to be directly connected to a waste or vent pipe. All drains shall discharge through an air gap into a open drain or approved receptor.

Section 1004 is one of the major changes, and allows Poly Butylene (PB) water pipes to be used for hot and cold water distribution tubing systems, using inserts for connectors. It also inserts language to assure that when metal pipe is used as a building ground, it will be replaced by metal pipe when repairs are made to these pipes.

Also adopted were insulation standards for cold water service and yard piping. These standards were for Poly Vinyl Chloride (PVC), asbestos cement pressure piping and Poly Butylene (PB).

Those groups most affected by this change will be plumbers, contractors, local governments and state agencies issuing building permits.

Estimated Fiscal Impact: (FY '83 - FY '87)

To the state: -0-

To others: -0-

V CEQA SUMMARY

This chapter covers various information not presented earlier but required by the California Environmental Quality Act (CEQA) for Environmental Impact Reports. As this document is a preliminary environmental review, this section has not been fully developed. When the draft and final versions of the EIR are proposed, it is likely to expand and some of the findings will undoubtedly change or at least be stated more confidently.

A. Significant Unavoidable Environmental Impacts

For this preliminary environmental review of a very subtle and complex proposal, SRI chose to describe our current overall conclusions about the proposed plumbing code changes and our reasons for them, without making definitive findings of significance except where they were clearcut.

First, we discovered nothing to suggest that the issues discussed earlier as the prime ones are insignificant or that other issues are dominant. The only new issue of potential significance that surfaced was the permeation of buried plastic pipe by contaminants in soil and the resulting possible public health impacts. Although the possibility that such effects could occur from permeation of water supply lines from the meter to the house is plausible, any potential problem would also occur--probably in much greater proportion--from the public water distribution system. This problem should be re-examined when better understood and if found significant should influence state policies with respect to plastic use in both public and residential systems. With

adequate education of building inspectors on the permeation issue, improper installation of plastic water service in contaminated soils should be rare.

As to public health impacts from chemicals leaching from water pipe into potable water, we find that significant impacts are possible but unproven, both for plastic pipes--especially the chlorinated varieties--and for metal ones, specifically copper systems. If the upper ranges of possible concentrations of leachates are regularly reached, the cumulative risks to public health may be high enough to be of concern by typical standards of acceptable risk, for example, a lifetime cancer risk of one in a million. The chemicals of concern are lead from the solder in copper pipes, possibly leading to neurologic disorders, and carbon tetrachloride, perchloroethylene, and trichloroethylene from plastic (especially PVC and CPVC) pipes, possibly resulting in cancer.

Two major considerations limit the significance of the findings. First, the status of information about long-term levels of leachates is exceedingly flimsy. Reasonable further testing could resolve at least part of the uncertainty (see Section VI). Second, the risk assessment procedure is moderately conservative. If risks still appear to be of concern after concentrations are better known, more attention would need to be devoted to assuring that the assessment procedure took into account detailed properties of the chemical. Finally, thorough initial flushing would effectively mitigate the effects of the rapidly leaching materials, especially the solvents used with plastic pipe. Overall, current information does not establish an environmental preference between copper and plastic pipe, with neither clearly likely to cause a great number of deaths or serious illnesses.

For worker safety and health, a similar situation exists. Both lead from solder fumes in installing copper pipe and solvents from installing ABS, PVC, and CPVC pipe could be hazardous if plumbers have high exposures by inhalation; dermal absorption could also be significant in the case of solvents. The diseases of concern for solder fumes are related to the lead exposure and are neurologic. The solvents may also cause nerve damage, and

they may be involved in liver damage or reproductive problems as well. However, they are not implicated in cancer unless benzene is more common than thought. Unless the NIOSH report about to be released resolves the range of exposures satisfactorily, further testing would be useful before completing the EIR. Safety issues generally favor plastic over metal, which appears to lead to more burns (hot solder and especially flux) and strains and contusions (from heavier metal pipes). PB (like PE, although its uses are not proposed for change) poses little if any worker safety and health concern. Use of gloves, other protective equipment, ventilation, and simple care will significantly reduce any potential hazards from either plastic or metal pipe, but these practices have not achieved widespread acceptance among plumbers.

Fire safety is a very real concern with plastic DWV pipe; ABS is combustible, and PVC and CPVC will at least soften and slump in lines. If these plastics are installed as direct substitutes for metal, as they already are in non-fire-rated residences, they will degrade the fire resistance of structures. The gaskets in no-hub cast iron will also fail in fires and cause the pipe to fall, leaving fire passages. But the proposed code changes apply to fire-rated, fire-resistive construction that could retain its fire rating if appropriate installation procedures are developed and enforced. In such conditions, no degradation of fire resistance would occur. This issue thus turns on enforcement, not science. The potable water pipes, kept cooler by the water inside and of much lower mass, are not a significant fire safety issue.

As with fire safety, smoke toxicity is an issue in which plastic can only be less environmentally acceptable than metal. However, whether the difference is significant is less certain. Both ABS, which seems likely to contribute the majority of pipe mass in California, and the polyolefins PB and PE produce combustion products that are not highly toxic; few if any additional fatalities or serious injuries would be likely from their combustion. PVC and CPVC both produce significant quantities of hydrogen chloride vapor in fire environments, and this corrosive material could, under certain circumstances, make a difference in the probability of human

survival in lines. The frequency of such occurrences is clouded by lack of a generally accepted test for smoke toxicity. This problem is currently being addressed both by the State of California Department of Industrial Relations and by the State of New York. We believe OHCD should pay close attention to results from those studies, but does not need to delay a decision solely on those grounds.

No other significant adverse impacts are likely to result from the expanded use of plastic plumbing pipe if relatively simple mitigation measures are taken. Plastic drain pipes may be slightly noisier than cast iron pipe. See the following section (V-B) for further elaboration.

Overall, the SRI study team sees little evidence that expanded use of plastic plumbing pipe would cause significantly greater environmental problems than the materials it would replace. Unfortunately, lack of evidence is not the same as lack of hazard. We believe it is especially important to gather more information on leaching of chemicals from both plastic and metal pipe systems into potable water and on the exposures of plumbers to material from plastic (ABS, PVC, CPVC) and metal (copper) plumbing systems.

Table V-1 summarizes our present assessment of our relative environmental concern about pipe systems. There we show our relative degrees of concern for different materials for each of the major areas of impacts. A high rating does not necessarily mean an impact that is significant in the sense of CEQA, but does mean that the material rated seems to us more likely to be environmentally harmful than other materials on that dimension. For example, the chlorinated plastics clearly are of highest concern for smoke toxicity, but may not pose any significantly higher impacts in the proposed new DWV uses (fire-resistive construction).

Table V-1

RELATIVE DEGREE OF CONCERN REGARDING
POTENTIAL ENVIRONMENTAL IMPACTS*

Impact Area	Potable Water				Drain, Waste, and Vent			
	Plastic		Metal		Plastic		Metal	
	PB/PE	PVC/CPVC	Copper	Galv. Steel	ABS	PVC/CPVC	Copper/ Gal. Steel	Ca Ir
Public Health	3	4	3	3	0	0	0	
Worker Safety	1	2	4	2	2	2	3+	
Worker Health	0	3	4	2	4	4	3+	
Fire Safety	3	2	0	0	5	4	0	
Smoke Toxicity	1	3	0	0	3	5	0	
Other Impacts	0	0	0	0	1	1	0	

*Key: 0 - No concern
1 - Considerably less concern than average
2 - Less concern than average
3 - About average concern
4 - More concern than average
5 - Considerably more concern than average

Note: High relative concern does not necessarily imply high absolute concern; significance of ratings depends on mitigation measures taken.

+More for copper, less for galvanized.

B. Insignificant Effects

The following environmental effects of expanded uses for plastic plumbing pipe may occur but are probably insignificant by any reasonable interpretation of CEQA:

- Plastic pipe systems may fail slightly more frequently than metal systems until a body of experience with installation errors has accumulated.
- Plastic pipe will consume slightly more petroleum than metal pipe, but slightly less energy overall.
- Plastic pipe will contribute a slightly different load of pollutants to public waste water treatment systems, but the direction of impact, let alone its magnitude, is uncertain.
- Plastic DWV pipe will be slightly noisier than metal systems if installed so as to contact wall surfaces; this may be more significant than otherwise in the multifamily, fire-rated construction that is affected in the DWV code changes.
- Plastic DWV pipe could be damaged by pipe cleaning equipment, but because of its resistance to corrosion, the frequency of such cleaning should be low.
- Plastic pipe will slightly decrease the life-cycle cost of plumbing and therefore of housing, but not enough to change demand patterns or growth.
- Small shifts in employment from metal pipe manufacturing to plastic pipe manufacturing will occur.
- A small reduction in the work of plumbers will occur, mostly as a result of repair and renovation work by do-it-yourselfers.

C. Effects of Alternative Actions

In addition to the proposed project, e.g., the proposed change to the 1982 Uniform Plumbing Code (UPC) allowing certain new uses of plastic plumbing pipe as described in the Project Description, this environmental review has examined the potential effects of alternatives to the proposed project on the quality of the natural and human environment. The eventual EIR will consider alternatives as well as the project itself to provide a

baseline for evaluating the significance of the impacts and to provide possible alternative courses of action should the proposed project create significant adverse impacts that cannot be successfully mitigated. With this goal in mind, the alternatives we have selected for analysis are no changes to the state code, partial approval of plastic pipe use, and complete rejection of all plastic pipe (that is, reversal of earlier provisions allowing certain uses of plastic pipe).

Under the no-action alternative, there would be no changes in the state code regarding the use of plastic plumbing pipe. All currently approved uses for plastic pipe would continue to be permitted and no new uses of plastic pipe would be allowed. None of the impacts attributable to the use of plastic pipe in expanded applications would be observed; any public health and worker safety and health effects of currently allowed plastic and metal piping systems would persist.

The partial approval alternative would amend the state code to permit certain new uses of plastic pipe, but not all of the new uses proposed under the project. Counting cold and hot water supply in a given application as one new use, the proposed project would change the code to permit 11 new uses of plastic pipe (i.e., 1 new use for ABS pipe, 3 for PB pipe, 1 for PVC pipe, and 6 for CPVC pipe). Considering all the possible combinations of these uses, over 2,000 partial approval alternatives are possible.

Our analyses of the environmental consequences of the proposed project have guided our selection of the subset of the partial approval alternatives to be considered in the EIR. That is, we define the partial approval alternative(s) to permit those new uses of plastic plumbing pipe that are least likely to have significant adverse effects on the quality of the natural and human environment. At present, the only partial alternative that seems reasonably certain to meet this requirement is to allow PB for hot and cold water supply both outside buildings and inside buildings that are not fire-rated or within the fire-resistive construction of fire-rated buildings. No other new uses of plastic pipe would be allowed. Parenthetically, there seems little reason to prohibit PB in exposed

locations of fire-rated buildings as long as the penetrations of fire-resistant construction are designed to maintain the rating of that construction. The state of information on the impacts of this alternative is generally the same as on those of the metal water pipe currently allowed for these two uses. Although PB will certainly burn and metal will not, the additional risk of fire spread appears minimal, as does that of smoke toxicity. Leachates from PB have not been shown to be risk-free, but neither have those from copper or galvanized steel. Of the two plastic alternatives, PB is somewhat less likely to be a public health hazard than CPVC, although the relative ratings of PB, CPVC, copper, and galvanized steel will not be clear without further testing (see Section VI). PB is clearly a preferred material, from the worker safety and health viewpoint, compared both with metal systems and with plastics that require cementing.

Under the option of disallowing currently allowed uses of plastic pipe, any impacts of these materials would disappear and those of metal systems reappear. The possibility of permeation of water supply piping by organic contaminants would decrease to the extent that PVC and PE supply lines would be replaced by metal with impermeable joints (but even metal pipe joints can be permeable). Leachates from PVC and PB would be replaced by those from copper, with no clear impact, positive or negative, on public health. The metal pipes would be somewhat more likely to corrode in soil than plastic (galvanized steel is not recommended for buried supply lines). Only small changes in worker safety and health would result from the changes in water supply piping.

Any major impacts of disallowing current uses of plastic pipe would be associated with the widespread use of ABS (and less widespread use of PVC) in DWV applications. Fire load and fire spread would be reduced in nonfire-rated construction. It is probable that few fatalities or little property damage would be avoided by this action, but both are possible benefits. Smoke toxins would also decrease somewhat, especially if PVC were replaced. The decrease in plumbers' exposures to solvent cements would be offset by increased work-related injuries from working with cast iron and, to some extent, with soldered joints in copper DWV. Whether the net effect

on worker safety and health would be positive or negative is difficult to predict, given the current lack of information on plumbers' exposures.

Finally, the alternative that would disallow current uses of plastic would transfer some profits and jobs from the plastics to the metal pipe industries. Since large quantities of DWV are involved, these impacts would probably be greater than those for the prime project alternative of allowing expanded uses of plastic pipe. Houses could become more expensive, depending on the prices of cast iron and copper, but probably not enough to significantly affect the demand for housing.

In summary, the alternative of approving only the expanded uses of PB appears to pose fewer environmental risks than does the full proposed project given the state of current information. Because metal systems also pose some unique risks and may be comparable to plastic systems in other risk areas, we are not prepared to say that the no-project alternative or the alternative that would disallow current uses of plastic are environmentally preferable to the partial approval alternative, or even to the full proposed project.

D. Cumulative and Long-Term Implications

Increased use of plastic plumbing pipe can contribute to cumulative environmental impacts in two ways.

First, the sum of the environmental impacts of plastic pipe could be significant even when no one individual impact is deemed significant. In the case of plastic pipe, the most plausible example is for the various leachates that could each contribute to public health impacts. For example, no one leachate might reach the level of 10^{-6} lifetime risk for cancer, but the cumulative risk of all leachates acting together might exceed that level. Given the current uncertainties about the public health impacts, especially those concerning the long-term levels of leachates in drinking water, we are unable to determine whether the cumulative impact is

significant. A similar situation is found with worker health impacts, where the risk of one solvent might be insignificant, but that of two or more could be significant. For fire safety, the cumulative impact of all the proposed new uses for plastic pipe are likely to be dominated by the new DWV uses; the contribution of PW pipe is likely to be negligible. The same is true of smoke toxicity, except that the combined affect of HCl, CO, and other toxicants could be significant even when the effects of any one alone were not.

A second issue of cumulative impact is the question of whether the expanded use of plastic water pipe would add to the impacts of other similar actions and in total create a significant effect even though the use of plastic water pipe is not itself significant. We can consider two levels of cumulative impacts:

- Cumulative impact of expanded and existing use of plastic plumbing pipe.
- Contribution of plastic plumbing pipe to total use of plastic products.

As has been made clear earlier, the expanded uses of plastic pipe are in many ways rather small in comparison to existing approved use of plastic pipe. Most new California houses are already being plumbed with ABS DWV if they are not fire-rated; the addition of 10% (by weight) more plastic pipe as PB or (less likely) CPVC water pipe will be of little consequence for fire safety, especially as water piping is less sensitive. The increase for plastic pipe in fire-rated construction, of course, is total since no plastic is being used now; however, if ways of maintaining the rating are developed as required by code, little fire safety impact would be expected. Similarly, the cementing of plastic potable water pipe is probably much less of a problem for workers than the cementing of already approved ABS DWV. Thus, the greatest issue of cumulative impact involves public health impacts, in which plastic in residences can add to plastic in public utility distribution systems. We have no way of estimating the relative contribution of each to the total hazard, as the source of contaminants

found in the water supply (control) during leaching tests is not known. We doubt that the combined effects of distribution and residential piping would be significant if neither one alone were, but we cannot rule out that possibility. Similarly, permeation of plastic distribution pipes by toxic substances is more likely than it is for residential piping systems, but the significance of either, in terms of an overall risk assessment, will not be clear for a long time.

With regard to plastics in total, the expanded uses of plastic pipe will be a relatively small contribution in most respects. Plastics are by now endemic in our society. Most of the contaminants of PVC and CPVC that could be public health hazards will be ingested in much greater quantities from other PVC products such as food containers or, in the case of some of the chlorinated methanes, simply from waste products reaching the raw water supply. Those from PB and PE are similar to those from PE food contact materials. If plasticizers do contaminate plastic pipe, they will still do so at much lower levels than they do in any number of plasticized products to which people are regularly exposed, such as flexible vinyl upholstery (where they would yield inhalation rather than ingestion exposures). But equally clearly, plastic pipe does contribute to the total load of plastic-related hazards in California--for example, to the total of all combustible plastics in residences. The hazards from the total use of plastics are undoubtedly appreciable, even though nearly impossible to estimate. Whether or not they are greater or less than the hazards of the materials they replace is perhaps even more difficult to state. About all that can be said is that plastic pipe is not an unusually prominent or special case among plastics in general.

CEQA also requires an assessment of whether long-term environmental costs will be incurred as a result of short-term economic or other benefits. Certainly, any public health impacts of plastic pipe that do occur will probably be delayed for decades, as will some of the worker health or smoke toxicity impacts. However, for the purpose of determining the environmental consequences of the expanded uses of plastic pipe, those

should be counted as current impacts, and not discounted in comparison with current benefits. We believe that, when it is viewed from this perspective, this CEQA issue is irrelevant to the decision at hand.

E. Significant Irreversible Changes

CEQA also requires an assessment of environmental changes or consumption of resources that would be permanent and irreversible. For example, the mining of a mountain is an essentially irreversible impact, whereas most air pollutants and their impacts would disappear once the source of pollution is removed.

In the case of the expanded use of plastic plumbing pipe, there would be a small permanent commitment of petroleum resources (but not other energy sources) to the manufacture of the pipe constituents. Total energy resources would be conserved to a slight degree. If any deaths occurred as a result of diseases caused by leachates or occupational exposures, or from fire or smoke toxicity, they would also be irreversible. If plastic pipe were later disapproved, the occurrence of new fatalities would gradually disappear. Some of the leachates from plastic pipe are mutagens and some mutations can be heritable. Thus, it is possible that a heritable--and more likely than not adverse--mutation could persist in the population as a result of drinking from plastic water pipes. Neither the specifics of the leachates in water from plastic pipe nor the overall state of the art of genetic risk assessment allows an evaluation of this possibility at present. If the impacts of plastic pipe eventually were judged unacceptable, it is possible that the metal pipe industry would have declined by that time to the point at which it would prove difficult to revive, but that possibility is also extremely speculative. Overall, we believe that the reversibility of the impacts is not as important an issue to resolve as the magnitude and significance of current impacts.

F. Growth-Inducing Impacts

California's population is projected to increase from the 1980 total of 23.8 million people to 25.9 million by 1985 and to 27.9 million by 1990 (California Department of Finance, 1981). The proposed code change is not likely to significantly affect this forecast population growth for the following reasons. First, the reduction in the cost of housing construction that would result from use of the newly permitted plastics in place of currently approved plumbing materials is so small that it would have virtually no effect on the sales price or rent of dwelling units in the state. Therefore, there will be no change in the demand for housing and consequently no additional in-migration of residents who would be attracted by a drop in the price of housing. Second, the plumbing material substitutions that are likely to result from the proposed code change would not significantly affect employment opportunities in the state and so would not affect the in-migration and out-migration forecasts. Nor would either housing prices or employment opportunities significantly affect shifts in population from one part of California to another.

Bill No. House Bill 508

Date January 26, 1984

Title "An Act relating to the Plumbing Code."

Contact: Eileen Plate
465-2700
Bob Bacolas
465-4870

Every three years, the International Association of Plumbing and Mechanical Officials revises its minimum standards for the installation of plumbing to incorporate technological advances. The 1982 code described in this bill is the most recent effort in this regard. The 1979 code presently in effect for the State of Alaska is therefore outdated and will not be reprinted by the International Association of Plumbing and Mechanical Officials.

Adoption of the 1982 Uniform Plumbing Code would bring Alaska's minimum standards into conformity with those commonly accepted and used by industry across the nation. The latest edition of the Uniform Plumbing Code is also commonly adopted by political subdivisions in the state as the minimum standards enforced under their building inspection programs.

Since the time the 1982 code was adopted by the International Association of Plumbing and Mechanical Officials, a number of water quality, worker safety and fire safety questions have been posed nationally concerning 1982 code provisions which permit the use of plastic pipe (section 401 of chapter 4 dealing with drainage systems and section 1004 of chapter 10 dealing with water distribution). This concern also exists in Alaska, and no doubt will be brought out in the hearings on House Bill No. 508. Although the Department supports adoption of the 1982 code at this time, should it be determined in the course of the hearings that there are compelling reasons to prohibit the use of plastic pipe, we would not have any strong objection to the specific questioned sections being excluded from the State's minimum plumbing standards.

House Bill No. 508 would not have any fiscal impact on the Department of Labor.

United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada

Consisting of journeymen and apprentices who have jurisdiction over every branch of the plumbing and pipe fitting industry

LOCAL NO. 375 STREET ADDRESS 3568 Geraghty Street

CITY, STATE, ZIP Fairbanks, Alaska 99701

SUBJECT MATTER Proposed Substitute for HB 508 DATE January 26, 1984

The Honorable Niilo Koponen
House of Representatives
State Capitol
Pouch V
Juneau, Alaska 99811 (Mail Stop 3100)

Dwight Perkins
245 Marine Way #7
Juneau, Alaska 99801

Dear Niilo and Dwight:

I am enclosing the proposed substitute for HB 508 which has been drafted in legislative form by Art Robson, our house counsel. I am sending a copy of this letter to our legislative friends so that they will know what is occurring.

After Senator Vic Fischer advised us of the pendency of this bill, Art got together with Dwight Perkins to see what had been done elsewhere. They extracted the modifications which were made by the Municipality of Anchorage and those are the modifications made in the proposed substitute bill. This may not be exactly the way we would have done it, but with Anchorage already having thoroughly debated the matter and adopted the new Uniform Plumbing Code in this form, we feel the interests of uniformity require that we all go together so that the State adopts it in the same form. Adoption in this form will take care of all our concerns and fears.

I understand there is a possibility that Rick Eliason will introduce this form in the senate so that it can proceed in both houses simultaneously.

We back this substitute one hundred percent and we hope that our legislative friends will do likewise. I hope to be in Juneau personally later on in the session to get together with everyone on

this, the natural gas pipeline proposals, and other matters that effect the work life of our members.

My thanks for all your help.

Sincerely yours,

J. L. ARSENAULT, Business Manager
Financial Secretary - Treasurer

HOUSE BILL NO. 508

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the plumbing code."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60.705 is amended to read:

Sec 18.60.705. PLUMBING CODE. The Department of Labor shall adopt, as the official minimum plumbing code for the state, the Uniform Plumbing Code, 1982 [1979] edition, adopted at the 52nd [49TH] Annual Conference, October 1981 [SEPTEMBER, 1978], International Association of Plumbing and Mechanical Officials, chs. 1 - 13 and appendices, useful tables, and installation standards, but excluding Part I, Administration, pages 1a - 6a, all of Subsection (e) and its exception, as well as the second and third sentences of Part (a) of Section 1004, Chapter 10, Page 75, and subject to AS 18.60.710 - 18.60.740. The following amendments to said code shall be adopted:

- In Chapter 4, Page 37, Section 401(a) and (b), shall be amended by deletion of the words "extra strength vitrified clay pipe" and "vitrified clay".

- In Chapter 4, Page 37, Section 401(a), subparagraphs number (1),(2) and (3), shall be deleted and will be replaced by the following words:

"1. No galvanized wrought iron or galvanized steel pipe or ABS or PBC shall be used under ground, but all such pipe shall be kept at least six inches above ground.

2. ABS or PBC installations shall be limited to residential construction not over 25 feet in stack height. ABS and PBC shall be no less than Schedule 40 iron pipe size standard steel pipe thickness. ABS or PBC shall not penetrate any one hour wall unless it is sleeved with a minimum of 20 gauge metal for a distance of six inches beyond the wall or changed to Schedule 40 galvanized DWV copper or cast iron pipe to a metal trap connection."

- In Chapter 5, Page 45, Section 503(a), subsection number (2), shall be deleted and replaced with the following words:

"2. ABS or PBC installations shall be limited to residential construction not over 25 feet in stack height. ABS and PBC shall be no less than Schedule 40 iron pipe size standard steel pipe thickness. ABS or PBC shall not penetrate and one hour wall unless it is sleeved with a minimum of 20 gauge metal for a distance of six inches

beyond the wall or changed to Schedule 40 galvanized DWV copper or cast iron pipe to a metal trap connection."

* Sec. 2. AS 18.60.740(1) is amended to read:

(1) "code" means the Uniform Plumbing Code, 1982 [1979] edition, adopted at the 52nd [49TH] Annual Conference, October 1981 [SEPTEMBER 1978], International Association of Plumbing and Mechanical Officials as modified by AS 18.60.705;

RE: HB 508, PLUMBING CODE

WHAT THE BILL DOES

HOUSE BILL 508 WOULD REPLACE THE STATES CURRENT UNIFORM PLUMBING CODE, the 1979 EDITION, WITH THE NEWER 1982 EDITION.

COMMENTS

AS YOU KNOW, THIS BILL IS QUITE CONTROVERSIAL WITHIN THE INDUSTRY. THE PLUMBERS UNIONS OPPOSE ITS IMPLEMENTATION WHILE NUMEROUS OTHER GROUPS INVOLVED WITH PLUMBING FAVOR THE NEW CODE. YOU CAN EXPECT SOME PRETTY HEATED DEBATE OVER THE HEALTH AND SAFETY ISSUES IN VOLVED WITH THE NEW CODE.

IN THE 1979 EDITION, PLASTIC PIPE WAS VERY RESTRICTED AS TO HOW IT COULD BE USED. IN THE 1982 CODE THE USE OF PLASTIC PIPE HAS BEEN EXPANDED TO INCLUDE VENTILATION SYSTEMS, HOT AND COLD WATER DISTRIBUTION, AND IN DRAINAGE.

I HAVE ATTACHED AN ADDITIONAL PAGE WITH QUESTIONS FOR SEVERAL DIFFERENT WITNESSES.

QUESTIONS ON 508

FOR PLUMBERS UNION.

1. IS IT TRUE PLASTIC PIPE SUCH AS POLYBUTALYENE IS MORE LABOR EFFICIENT AND ACTUALLY TAKES LESS TIME TO INSTALL ?
2. ISN'T TRUE THERE ARE CONSIDERABLE HAZARDS FROM TECHNICS USED TO INSTALL PIPES OTHER THAN THOSE MADE FROM PLASTIC ?

FOR SHELL OIL CO.

1. WHAT KIND OF TESTS HAVE YOU CONDUCTED THAT PROVE TO YOU PLASTIC PIPE IS SAFE TO USE AS PRESCRIBED BY THE 1982 UNIFORM PLUMBING CODE ?
2. DO HAVE ANY RESERVATIONS ABOUT THESE SHELL PRODUCTS ? ARE THEY AS SAFE, IN YOUR PROFESSIONAL OPINION, AS PIPE MADE FROM OTHER MATERIAL SUCH AS COPPER OR CAST IRON ?

FOR TOM HIGHAM

1. WHY DID THE INTERNATIONAL ASSOCIATION OF PLUMBERS AND MECHANICAL OFFICIALS DECIDE TO INCLUDE THE USE OF PLASTIC PIPE IN THE 1982 UNIFORM PLUMBERS CODE ?
2. IS THERE CONSIDERABLE DIFFERENCE IN SAFETY IN USING PLASTIC PIPE AND THE MORE CONVENTIONAL PIPES, IN YOUR OPINION ?
3. MR HIGHAM, IN YOUR OPINION, IS THIS AS MUCH A POLITICAL ISSUE AS IT IS WORKERS SAFETY ISSUE ? WHY IS THAT ?

COUNTY CLERK

SUPERIOR COURT OF THE STATE OF CALIFORNIA

FOR THE COUNTY OF LOS ANGELES

MARIE SHIBUYA-SNELL, DIRECTOR OF THE CALIFORNIA DEPARTMENT OF CONSUMER AFFAIRS, FRIENDS OF THE EARTH, CONSUMER FEDERATION OF CALIFORNIA, STATE BUILDING AND CONSTRUCTION TRADES COUNCIL OF CALIFORNIA, AND AILEEN ADAMS, Plaintiffs, vs. INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIALS, a California corporation, and DOES I through XX, Defendants.	CASE NO. C 395 294 JUDGMENT EXTENDING AND MODIFYING INJUNCTION

The above-captioned matter was duly and regularly called for trial on December 12, 1983, in Department 32 of the Superior Court, the Honorable Jack A. Crickard, Judge Presiding. Roger Dickinson, Esq., appeared on behalf of plaintiff Marie Shibuya-Snell, Director of the California Department of Consumer Affairs ("Director"); Michael H. Remy, Esq., and Tina A. Thomas, Esq., appeared on behalf of plaintiff California State Building and Construction Trades Council, AFL-CIO ("Union Council"); and Geoffrey Cowan, Esq.,

entered an appearance on December 12, 1983, behalf of plaintiffs Consumer Federation of California, Friends of the Earth and Aileen Adams.

John F. McKenna, Jr., Esq , appeared on behalf of defendant International Association of Plumbing and Mechanical Officials ("IAPMO").

The matter was heard on December 12, 13, 14, 15, 16, 20 and 21, 1983. Evidence, both oral and written, was submitted by all parties, and the matter was duly submitted.

IT IS NOW ORDERED, ADJUDGED AND DECREED:

1. Upon the authority of Code of Civil Procedure Section 526 Subdivision (1), the existing preliminary injunction, granted upon the application of plaintiff Director's predecessor in office, is partially modified and continued in force as the permanent order of this Court.

2. Pursuant thereto, Defendant IAPMO, its agents, officers, employees, and representatives, and all persons acting in concert or participating with IAPMO are hereby permanently enjoined from disseminating, directly or indirectly, to any individual or organization in California, the 1982 Edition of the Uniform Plumbing Code ("UPC") or the IAPMO Directory of Plumbing Research Recommendations ("Research Directory"), without including a warning notice. The warning notice required to be included shall appear in no less than 10-point bold type and shall state as follows:

> NOTICE: An Environmental Impact Report is now being prepared in California to determine whether the use of CPVC, PVC, or PB plastic pipe for transing potable water poses a danger to public health or the environment. At the time of this printing of the 1982 Edition of the Uniform Plumbing Code,

and this update of IAPMO's Directory of Plumbing Research Recommendations, the State of California does not permit any expansion of the use of such pipe, in applications permitted by the Uniform Plumbing Code, beyond those applications permitted in the 1979 Edition of the Uniform Plumbing Code.

For information on California restrictions, contact the State Housing Law Section of the California Housing and Community Development Department.

Immediately below the notice, in the same size or smaller type, the following statement may appear, at the option of IAPMO:

(This notice is inserted herein pursuant to a court Order in the case of CALIFORNIA DEPARTMENT OF CONSUMER AFFAIRS v. INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIALS, Los Angeles Superior Court No. C-395294.)

The notice shall not contain, include, or be accompanied by any other information or materials.

3. The notice shall be affixed

(a) To the inside cover of each copy of the UPC affected by this Order, and

(b) Upon the reverse side of the division page entitled "Water Systems and Related Items" (No. 5) of each copy the Research Directory,

(c) By suitable adhesive material along the notice's top and bottom borders, in a manner calculated to ensure that the accidental removal of the notice does not occur.

4. The foregoing orders shall take effect 30 days after entry of this Judgment, and the foregoing orders shall automatically terminate, both as to the UPC and the Research Directory, upon the date the 1982 Edition of the UPC is superceded by the publication of the 1985 Edition of the UPC.

5. All relief sought by plaintiffs, other than the relief granted to plaintiff Director by the foregoing orders, is denied.

6. Each party shall bear their own court costs.

DATED: JAN 24 1984.

February 2, 1984

The Honorable John Cowdery
House of Representatives
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Representative Cowdery:

I'd like to thank you for your prompt and efficient handling of HB 508. I also extend my appreciation to the entire committee for the courtesies extended during my appearance before the House Committee on Labor and Industries.

There is one matter that I believe deserves further comment. On February 1, 1984, during Committee discussion on the bill, Representative Koponen commented on two different occasions that "representative from Shell supports the amendments submitted by the United Association (Union)." Please be advised that Shell did not nor does not support these amendments.

First of all, I speak on behalf of polybutylene. The U.A. amendments delete all reference to polybutylene in the Code. Given the substantial performance and economic benefits of polybutylene, this amendment is clearly not in the best interest of the people of Alaska. When you combine the performance benefits -

Corrosion resistance
Resistance to scale
Freeze resistance

with the savings realized in the installation of polybutylene, you can understand why polybutylene has been widely accepted by the Code approval agencies and the contractor and developers across the United States.

The remainder of the U.A. amendements are also not supported by Shell. Simply stated these amendments would be a step back in time. The deletion of materials already approved by the U.P.C. or the restriction of their use would inflict an economic penalty on the builder and consumer. This penalty would be inflicted with no basis in fact.

Please feel free to contact me if I can clearify any of the above.

Very truly yours,

M. J. O'Brien
Regional Sales Manager
Polybutylene Department

LEGISLATIVE PROPOSAL ANALYSIS

Subject of Proposed Bill:

"Adoption of 1982 Uniform Plumbing Code"

Background Information:

Every third year, the International Association of Plumbing and Mechanical Officials adopts a revised plumbing code incorporating advances and improvements in technology. During the Twelfth Legislature, the department did not propose legislation to adopt the 1982 version of the Uniform Plumbing Code because there were conflicts between the Uniform Plumbing Code and the Uniform Building Code. The Department of Public Safety (Fire Marshall's Office) will propose legislation to adopt the most recent edition of the Uniform Building Code which is consistent with the 1982 Uniform Plumbing Code.

Summary:

The most noticeable changes in the plumbing code are as follows:

Section 108 allows for a larger grease interception to serve one or more fixtures. Section 203(d) states that copper tubing used for water service shall have a weight of not less than Type L.

Table 4-3, footnote #4. Evidence indicates that a three-inch horizontal waste will effectively handle discharge from three water closets; thus the code change, so that only four water closets or six unit traps are allowed on any vertical stack, and not to exceed three water closets or six unit traps on any horizontal branch or drain.

Section 601 changes will not allow cold storage rooms, refrigerators, cooling counters, etc. designed to hold food or drink, or sinks for washing or preparation of food, to be directly connected to a waste or vent pipe. All drains shall discharge through an air gap into a open drain or approved receptor.

Section 1004 is one of the major changes, and allows Poly Butylene (PB) water pipes to be used for hot and cold water distribution tubing systems, using inserts for connectors. It also inserts language to assure that when metal pipe is used as a building ground, it will be replaced by metal pipe when repairs are made to these pipes.

Also adopted were insulation standards for cold water service and yard piping. These standards were for Poly Vinyl Chloride (PVC), asbestos cement pressure piping and Poly Butylene (PB).

Those groups most affected by this change will be plumbers, contractors, local governments and state agencies issuing building permits.

Estimated Fiscal Impact: (FY '83 - FY '87)

To the state: -0-

V CEQA SUMMARY

This chapter covers various information not presented earlier but required by the California Environmental Quality Act (CEQA) for Environmental Impact Reports. As this document is a preliminary environmental review, this section has not been fully developed. When the draft and final versions of the EIR are proposed, it is likely to expand and some of the findings will undoubtedly change or at least be stated more confidently.

A. Significant Unavoidable Environmental Impacts

For this preliminary environmental review of a very subtle and complex proposal, SRI chose to describe our current overall conclusions about the proposed plumbing code changes and our reasons for them, without making definitive findings of significance except where they were clearcut.

First, we discovered nothing to suggest that the issues discussed earlier as the prime ones are insignificant or that other issues are dominant. The only new issue of potential significance that surfaced was the permeation of buried plastic pipe by contaminants in soil and the resulting possible public health impacts. Although the possibility that such effects could occur from permeation of water supply lines from the meter to the house is plausible, any potential problem would also occur--probably in much greater proportion--from the public water distribution system. This problem should be re-examined when better understood and if found significant should influence state policies with respect to plastic use in both public and residential systems. With

adequate education of building inspectors on the permeation issue, improper installation of plastic water service in contaminated soils should be rare.

As to public health impacts from chemicals leaching from water pipe into potable water, we find that significant impacts are possible but unproven, both for plastic pipes--especially the chlorinated varieties--and for metal ones, specifically copper systems. If the upper ranges of possible concentrations of leachates are regularly reached, the cumulative risks to public health may be high enough to be of concern by typical standards of acceptable risk, for example, a lifetime cancer risk of one in a million. The chemicals of concern are lead from the solder in copper pipes, possibly leading to neurologic disorders, and carbon tetrachloride, perchloroethylene, and trichloroethylene from plastic (especially PVC and CPVC) pipes, possibly resulting in cancer.

Two major considerations limit the significance of the findings. First, the status of information about long-term levels of leachates is exceedingly flimsy. Reasonable further testing could resolve at least part of the uncertainty (see Section VI). Second, the risk assessment procedure is moderately conservative. If risks still appear to be of concern after concentrations are better known, more attention would need to be devoted to assuring that the assessment procedure took into account detailed properties of the chemical. Finally, thorough initial flushing would effectively mitigate the effects of the rapidly leaching materials, especially the solvents used with plastic pipe. Overall, current information does not establish an environmental preference between copper and plastic pipe, with neither clearly likely to cause a great number of deaths or serious illnesses.

For worker safety and health, a similar situation exists. Both lead from solder fumes in installing copper pipe and solvents from installing ABS, PVC, and CPVC pipe could be hazardous if plumbers have high exposures by inhalation; dermal absorption could also be significant in the case of solvents. The diseases of concern for solder fumes are related to the lead exposure and are neurologic. The solvents may also cause nerve damage, and

they may be involved in liver damage or reproductive problems as well. However, they are not implicated in cancer unless benzene is more common than thought. Unless the NIOSH report about to be released resolves the range of exposures satisfactorily, further testing would be useful before completing the EIR. Safety issues generally favor plastic over metal, which appears to lead to more burns (hot solder and especially flux) and strains and contusions (from heavier metal pipes). PB (like PE, although its uses are not proposed for change) poses little if any worker safety and health concern. Use of gloves, other protective equipment, ventilation, and simple care will significantly reduce any potential hazards from either plastic or metal pipe, but these practices have not achieved widespread acceptance among plumbers.

Fire safety is a very real concern with plastic DWV pipe; ABS is combustible, and PVC and CPVC will at least soften and slump in lines. If these plastics are installed as direct substitutes for metal, as they already are in non-fire-rated residences, they will degrade the fire resistance of structures. The gaskets in no-hub cast iron will also fail in fires and cause the pipe to fall, leaving fire passages. But the proposed code changes apply to fire-rated, fire-resistive construction that could retain its fire rating if appropriate installation procedures are developed and enforced. In such conditions, no degradation of fire resistance would occur. This issue thus turns on enforcement, not science. The potable water pipes, kept cooler by the water inside and of much lower mass, are not a significant fire safety issue.

As with fire safety, smoke toxicity is an issue in which plastic can only be less environmentally acceptable than metal. However, whether the difference is significant is less certain. Both ABS, which seems likely to contribute the majority of pipe mass in California, and the polyolefins PB and PE produce combustion products that are not highly toxic; few if any additional fatalities or serious injuries would be likely from their combustion. PVC and CPVC both produce significant quantities of hydrogen chloride vapor in fire environments, and this corrosive material could, under certain circumstances, make a difference in the probability of human

survival in lines. The frequency of such occurrences is clouded by lack of a generally accepted test for smoke toxicity. This problem is currently being addressed both by the State of California Department of Industrial Relations and by the State of New York. We believe DHCD should pay close attention to results from those studies, but does not need to delay a decision solely on those grounds.

No other significant adverse impacts are likely to result from the expanded use of plastic plumbing pipe if relatively simple mitigation measures are taken. Plastic drain pipes may be slightly noisier than cast iron pipe. See the following section (V-B) for further elaboration.

Overall, the SRI study team sees little evidence that expanded use of plastic plumbing pipe would cause significantly greater environmental problems than the materials it would replace. Unfortunately, lack of evidence is not the same as lack of hazard. We believe it is especially important to gather more information on leaching of chemicals from both plastic and metal pipe systems into potable water and on the exposures of plumbers to material from plastic (ABS, PVC, CPVC) and metal (copper) plumbing systems.

Table V-1 summarizes our present assessment of our relative environmental concern about pipe systems. There we show our relative degrees of concern for different materials for each of the major areas of impacts. A high rating does not necessarily mean an impact that is significant in the sense of CEQA, but does mean that the material rated seems to us more likely to be environmentally harmful than other materials on that dimension. For example, the chlorinated plastics clearly are of highest concern for smoke toxicity, but may not pose any significantly higher impacts in the proposed new DWV uses (fire-resistive construction).

Table V-1

RELATIVE DEGREE OF CONCERN REGARDING
POTENTIAL ENVIRONMENTAL IMPACTS*

Impact Area	Potable Water				Drain, Waste, and Vent			
	Plastic		Metal		Plastic		Metal	
	PB/PE	PVC/CPVC	Copper	Galv. Steel	ABS	PVC/CPVC	Copper/ Gal. Steel	Ca Ir
Public Health	3	4	3	3	0	0	0	
Worker Safety	1	2	4	2	2	2	3+	
Worker Health	0	3	4	2	4	4	3+	
Fire Safety	3	2	0	0	5	4	0	
Smoke Toxicity	1	3	0	0	3	5	0	
Other Impacts	0	0	0	0	1	1	0	

*Key: 0 - No concern
1 - Considerably less concern than average
2 - Less concern than average
3 - About average concern
4 - More concern than average
5 - Considerably more concern than average

Note: High relative concern does not necessarily imply high absolute concern; significance of ratings depends on mitigation measures taken.

+More for copper, less for galvanized.

B. Insignificant Effects

The following environmental effects of expanded uses for plastic plumbing pipe may occur but are probably insignificant by any reasonable interpretation of CEQA:

- Plastic pipe systems may fail slightly more frequently than metal systems until a body of experience with installation errors has accumulated.
- Plastic pipe will consume slightly more petroleum than metal pipe, but slightly less energy overall.
- Plastic pipe will contribute a slightly different load of pollutants to public waste water treatment systems, but the direction of impact, let alone its magnitude, is uncertain.
- Plastic DWV pipe will be slightly noisier than metal systems if installed so as to contact wall surfaces; this may be more significant than otherwise in the multifamily, fire-rated construction that is affected in the DWV code changes.
- Plastic DWV pipe could be damaged by pipe cleaning equipment, but because of its resistance to corrosion, the frequency of such cleaning should be low.
- Plastic pipe will slightly decrease the life-cycle cost of plumbing and therefore of housing, but not enough to change demand patterns or growth.
- Small shifts in employment from metal pipe manufacturing to plastic pipe manufacturing will occur.
- A small reduction in the work of plumbers will occur, mostly as a result of repair and renovation work by do-it-yourselfers.

C. Effects of Alternative Actions

In addition to the proposed project, e.g., the proposed change to the 1982 Uniform Plumbing Code (UPC) allowing certain new uses of plastic plumbing pipe as described in the Project Description, this environmental review has examined the potential effects of alternatives to the proposed project on the quality of the natural and human environment. The eventual EIR will consider alternatives as well as the project itself to provide a

baseline for evaluating the significance of the impacts and to provide possible alternative courses of action should the proposed project create significant adverse impacts that cannot be successfully mitigated. With this goal in mind, the alternatives we have selected for analysis are no changes to the state code, partial approval of plastic pipe use, and complete rejection of all plastic pipe (that is, reversal of earlier provisions allowing certain uses of plastic pipe).

Under the no-action alternative, there would be no changes in the state code regarding the use of plastic plumbing pipe. All currently approved uses for plastic pipe would continue to be permitted and no new uses of plastic pipe would be allowed. None of the impacts attributable to the use of plastic pipe in expanded applications would be observed; any public health and worker safety and health effects of currently allowed plastic and metal piping systems would persist.

The partial approval alternative would amend the state code to permit certain new uses of plastic pipe, but not all of the new uses proposed under the project. Counting cold and hot water supply in a given application as one new use, the proposed project would change the code to permit 11 new uses of plastic pipe (i.e., 1 new use for ABS pipe, 3 for PB pipe, 1 for PVC pipe, and 6 for CPVC pipe). Considering all the possible combinations of these uses, over 2,000 partial approval alternatives are possible.

Our analyses of the environmental consequences of the proposed project have guided our selection of the subset of the partial approval alternatives to be considered in the EIR. That is, we define the partial approval alternative(s) to permit those new uses of plastic plumbing pipe that are least likely to have significant adverse effects on the quality of the natural and human environment. At present, the only partial alternative that seems reasonably certain to meet this requirement is to allow PB for hot and cold water supply both outside buildings and inside buildings that are not fire-rated or within the fire-resistive construction of fire-rated buildings. No other new uses of plastic pipe would be allowed. Parenthetically, there seems little reason to prohibit PB in exposed

locations of fire-rated buildings as long as the penetrations of fire-resistant construction are designed to maintain the rating of that construction. The state of information on the impacts of this alternative is generally the same as on those of the metal water pipe currently allowed for these two uses. Although PB will certainly burn and metal will not, the additional risk of fire spread appears minimal, as does that of smoke toxicity. Leachates from PB have not been shown to be risk-free, but neither have those from copper or galvanized steel. Of the two plastic alternatives, PB is somewhat less likely to be a public health hazard than CPVC, although the relative ratings of PB, CPVC, copper, and galvanized steel will not be clear without further testing (see Section VI). PB is clearly a preferred material, from the worker safety and health viewpoint, compared both with metal systems and with plastics that require cementing.

Under the option of disallowing currently allowed uses of plastic pipe, any impacts of these materials would disappear and those of metal systems reappear. The possibility of permeation of water supply piping by organic contaminants would decrease to the extent that PVC and PE supply lines would be replaced by metal with impermeable joints (but even metal pipe joints can be permeable). Leachates from PVC and PB would be replaced by those from copper, with no clear impact, positive or negative, on public health. The metal pipes would be somewhat more likely to corrode in soil than plastic (galvanized steel is not recommended for buried supply lines). Only small changes in worker safety and health would result from the changes in water supply piping.

Any major impacts of disallowing current uses of plastic pipe would be associated with the widespread use of ABS (and less widespread use of PVC) in DWV applications. Fire load and fire spread would be reduced in nonfire-rated construction. It is probable that few fatalities or little property damage would be avoided by this action, but both are possible benefits. Smoke toxins would also decrease somewhat, especially if PVC were replaced. The decrease in plumbers' exposures to solvent cements would be offset by increased work-related injuries from working with cast iron and, to some extent, with soldered joints in copper DWV. Whether the net effect

on worker safety and health would be positive or negative is difficult to predict, given the current lack of information on plumbers' exposures.

Finally, the alternative that would disallow current uses of plastic would transfer some profits and jobs from the plastics to the metal pipe industries. Since large quantities of DWV are involved, these impacts would probably be greater than those for the prime project alternative of allowing expanded uses of plastic pipe. Houses could become more expensive, depending on the prices of cast iron and copper, but probably not enough to significantly affect the demand for housing.

In summary, the alternative of approving only the expanded uses of PB appears to pose fewer environmental risks than does the full proposed project given the state of current information. Because metal systems also pose some unique risks and may be comparable to plastic systems in other risk areas, we are not prepared to say that the no-project alternative or the alternative that would disallow current uses of plastic are environmentally preferable to the partial approval alternative, or even to the full proposed project.

D. Cumulative and Long-Term Implications

Increased use of plastic plumbing pipe can contribute to cumulative environmental impacts in two ways.

First, the sum of the environmental impacts of plastic pipe could be significant even when no one individual impact is deemed significant. In the case of plastic pipe, the most plausible example is for the various leachates that could each contribute to public health impacts. For example, no one leachate might reach the level of 10^{-6} lifetime risk for cancer, but the cumulative risk of all leachates acting together might exceed that level. Given the current uncertainties about the public health impacts, especially those concerning the long-term levels of leachates in drinking water, we are unable to determine whether the cumulative impact is

significant. A similar situation is found with worker health impacts, where the risk of one solvent might be insignificant, but that of two or more could be significant. For fire safety, the cumulative impact of all the proposed new uses for plastic pipe are likely to be dominated by the new DWV uses; the contribution of PW pipe is likely to be negligible. The same is true of smoke toxicity, except that the combined affect of HCl, CO, and other toxicants could be significant even when the effects of any one alone were not.

A second issue of cumulative impact is the question of whether the expanded use of plastic water pipe would add to the impacts of other similar actions and in total create a significant effect even though the use of plastic water pipe is not itself significant. We can consider two levels of cumulative impacts:

- Cumulative impact of expanded and existing use of plastic plumbing pipe.
- Contribution of plastic plumbing pipe to total use of plastic products.

As has been made clear earlier, the expanded uses of plastic pipe are in many ways rather small in comparison to existing approved use of plastic pipe. Most new California houses are already being plumbed with ABS DWV if they are not fire-rated; the addition of 10% (by weight) more plastic pipe as PB or (less likely) CPVC water pipe will be of little consequence for fire safety, especially as water piping is less sensitive. The increase for plastic pipe in fire-rated construction, of course, is total since no plastic is being used now; however, if ways of maintaining the rating are developed as required by code, little fire safety impact would be expected. Similarly, the cementing of plastic potable water pipe is probably much less of a problem for workers than the cementing of already approved ABS DWV. Thus, the greatest issue of cumulative impact involves public health impacts, in which plastic in residences can add to plastic in public utility distribution systems. We have no way of estimating the relative contribution of each to the total hazard, as the source of contaminants

found in the water supply (controls during leaching tests is not known. We doubt that the combined effects of distribution and residential piping would be significant if neither one alone were, but we cannot rule out that possibility. Similarly, permeation of plastic distribution pipes by toxic substances is more likely than it is for residential piping systems, but the significance of either, in terms of an overall risk assessment, will not be clear for a long time.

With regard to plastics in total, the expanded uses of plastic pipe will be a relatively small contribution in most respects. Plastics are by now endemic in our society. Most of the contaminants of PVC and CPVC that could be public health hazards will be ingested in much greater quantities from other PVC products such as food containers or, in the case of some of the chlorinated methanes, simply from waste products reaching the raw water supply. Those from PB and PE are similar to those from PE food contact materials. If plasticizers do contaminate plastic pipe, they will still do so at much lower levels than they do in any number of plasticized products to which people are regularly exposed, such as flexible vinyl upholstery (where they would yield inhalation rather than ingestion exposures). But equally clearly, plastic pipe does contribute to the total load of plastic-related hazards in California--for example, to the total of all combustible plastics in residences. The hazards from the total use of plastics are undoubtedly appreciable, even though nearly impossible to estimate. Whether or not they are greater or less than the hazards of the materials they replace is perhaps even more difficult to state. About all that can be said is that plastic pipe is not an unusually prominent or special case among plastics in general.

CEQA also requires an assessment of whether long-term environmental costs will be incurred as a result of short-term economic or other benefits. Certainly, any public health impacts of plastic pipe that do occur will probably be delayed for decades, as will some of the worker health or smoke toxicity impacts. However, for the purpose of determining the environmental consequences of the expanded uses of plastic pipe, those

should be counted as current impacts, and not discounted in comparison with current benefits. We believe that, when it is viewed from this perspective, this CEQA issue is irrelevant to the decision at hand.

E. Significant Irreversible Changes

CEQA also requires an assessment of environmental changes or consumption of resources that would be permanent and irreversible. For example, the mining of a mountain is an essentially irreversible impact, whereas most air pollutants and their impacts would disappear once the source of pollution is removed.

In the case of the expanded use of plastic plumbing pipe, there would be a small permanent commitment of petroleum resources (but not other energy sources) to the manufacture of the pipe constituents. Total energy resources would be conserved to a slight degree. If any deaths occurred as a result of diseases caused by leachates or occupational exposures, or from fire or smoke toxicity, they would also be irreversible. If plastic pipe were later disapproved, the occurrence of new fatalities would gradually disappear. Some of the leachates from plastic pipe are mutagens and some mutations can be heritable. Thus, it is possible that a heritable--and more likely than not adverse--mutation could persist in the population as a result of drinking from plastic water pipes. Neither the specifics of the leachates in water from plastic pipe nor the overall state of the art of genetic risk assessment allows an evaluation of this possibility at present. If the impacts of plastic pipe eventually were judged unacceptable, it is possible that the metal pipe industry would have declined by that time to the point at which it would prove difficult to revive, but that possibility is also extremely speculative. Overall, we believe that the reversibility of the impacts is not as important an issue to resolve as the magnitude and significance of current impacts.

F. Growth-Inducing Impacts

California's population is projected to increase from the 1980 total of 23.8 million people to 25.9 million by 1985 and to 27.9 million by 1990 (California Department of Finance, 1981). The proposed code change is not likely to significantly affect this forecast population growth for the following reasons. First, the reduction in the cost of housing construction that would result from use of the newly permitted plastics in place of currently approved plumbing materials is so small that it would have virtually no effect on the sales price or rent of dwelling units in the state. Therefore, there will be no change in the demand for housing and consequently no additional in-migration of residents who would be attracted by a drop in the price of housing. Second, the plumbing material substitutions that are likely to result from the proposed code change would not significantly affect employment opportunities in the state and so would not affect the in-migration and out-migration forecasts. Nor would either housing prices or employment opportunities significantly affect shifts in population from one part of California to another.

Bill No. House Bill 508

Date January 26, 1984

Title "An Act relating to the Plumbing Code."

Contact: Eileen Plate
465-2700
Bob Bacolas
465-4870

Every three years, the International Association of Plumbing and Mechanical Officials revises its minimum standards for the installation of plumbing to incorporate technological advances. The 1982 code described in this bill is the most recent effort in this regard. The 1979 code presently in effect for the State of Alaska is therefore outdated and will not be reprinted by the International Association of Plumbing and Mechanical Officials.

Adoption of the 1982 Uniform Plumbing Code would bring Alaska's minimum standards into conformity with those commonly accepted and used by industry across the nation. The latest edition of the Uniform Plumbing Code is also commonly adopted by political subdivisions in the state as the minimum standards enforced under their building inspection programs.

Since the time the 1982 code was adopted by the International Association of Plumbing and Mechanical Officials, a number of water quality, worker safety and fire safety questions have been posed nationally concerning 1982 code provisions which permit the use of plastic pipe (section 401 of chapter 4 dealing with drainage systems and section 1004 of chapter 10 dealing with water distribution). This concern also exists in Alaska, and no doubt will be brought out in the hearings on House Bill No. 508. Although the Department supports adoption of the 1982 code at this time, should it be determined in the course of the hearings that there are compelling reasons to prohibit the use of plastic pipe, we would not have any strong objection to the specific questioned sections being excluded from the State's minimum plumbing standards.

House Bill No. 508 would not have any fiscal impact on the Department of Labor.

APPROVED:

Jan Robinson

POSITION PAPER/Department of Labor

United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada

Organized of journeymen and apprentices who have jurisdiction over every branch of the plumbing and pipe fitting industry

LOCAL NO. 375 STREET ADDRESS 3568 Geraghty Street

CITY, STATE, ZIP Fairbanks, Alaska 99701

SUBJECT MATTER Proposed Substitute for HB 508 DATE January 26, 1984

The Honorable Niilo Koponen
House of Representatives
State Capitol
Pouch V
Juneau, Alaska 99811 (Mail Stop 3100)

Dwight Perkins
245 Marine Way #7
Juneau, Alaska 99801

Dear Niilo and Dwight:

I am enclosing the proposed substitute for HB 508 which has been drafted in legislative form by Art Robson, our house counsel. I am sending a copy of this letter to our legislative friends so that they will know what is occurring.

After Senator Vic Fischer advised us of the pendency of this bill, Art got together with Dwight Perkins to see what had been done elsewhere. They extracted the modifications which were made by the municipality of Anchorage and those are the modifications made in the proposed substitute bill. This may not be exactly the way we would have done it, but with Anchorage already having thoroughly debated the matter and adopted the new Uniform Plumbing Code in this form, we feel the interests of uniformity require that we all go together so that the State adopts it in the same form. Adoption in this form will take care of all our concerns and fears.

I understand there is a possibility that Rick Eliason will introduce this form in the senate so that it can proceed in both houses simultaneously.

We back this substitute one hundred percent and we hope that our legislative friends will do likewise. I hope to be in Juneau personally later on in the session to get together with everyone on

this, the natural gas pipeline proposals, and other matters that effect the work life of our members.

My thanks for all your help.

Sincerely yours,

J. L. ARSENAULT, Business Manager
Financial Secretary - Treasurer
U.A. Local 375

WHAT THIS BRIEF IS

This brief is an exploration of the issues which underly the use of plastic pipe in construction, as well as the reasoning behind the State code which limits its use to certain type building projects.

ISSUES ADDRESSED

The use of plastic pipe, whether "P.B.", "P.V.C.", or asbestos cement pressure piping, presents the following problems:

1. Durability;
2. Thaw ability in Arctic regions;
3. Fire hazards (both combustibility and gases released upon combustion);
4. Use of the water system as the electrical "ground";
5. Permeability; and
6. Worker safety.

BACKGROUND

The International Association of Plumbing and Mechanical Officials is an organization composed of representatives of building inspection departments for governmental bodies. It meets in the United States in annual convention and on every third year, it adopts a "Uniform Plumbing Code". Up until 1982, all such codes had expressly forbidden the use of asbestos cement pressure piping and limited the use of P.B. and P.V.C. piping to residential construction not in excess of two stories.

In 1982, the International Association of Plumbing and Mechanical Officials adopted a plumbing code which permitted the use of P.B. pipe in hot water supply, of P.B. and P.V.C. pipe in cold water supply, and of P.B., P.V.C., and asbestos cement pressure piping in venting and drainage. A brief synopsis of the adoption and lobbying efforts will be found in the California Legislature's summary of a case by the California Department of Consumer Affairs and others against the International Association.

This is marked Exhibit "A" and attached hereto. Forthwith upon procuring this adoption, there was introduced in Alaska and the other 49 of the United States, legislation to change the State adopted building codes to the newly adopted 1982 "Uniform Plumbing Code". In Alaska, this was Senate Bill 214, which did not pass and which was supported by Shell Oil to the tune of $75,000 during the last session in Juneau. It would have amended AS 18.60.705 and AS 18.60.740(1) to adopt the 1982 "Uniform Plumbing Code".

The salient portion of this background history is that the State Legislature has considered and not adopted the plastic pipe standards. The proponents (manufacturers of plastic pipe) have consistently made the point that plastic pipe costs less than metal pipe to purchase and is cheaper to install than metal pipe. These points have made the contractors eager to bid and construct jobs using plastic pipe, thereby being able to underbid those contractors who stick with the State building codes.

A DISCUSSION OF THE ISSUES

I.

DURABILITY

The most obvious difference between plastic and metal pipe is durability. Some of Alaska is earthquake prone and hence durability can be quite important. In construction of large residential buildings and commercial buildings, the increased usage makes durability important. This issue has the advantage of being self evident. Cast iron, malleable iron, or copper piping and its qualities are apparent to all, and a comparison with the qualities of plastic, particularly in temperature extremes such as experienced in Fairbanks, needs no further amplification.

II.

THAW ABILITY IN ARCTIC REGIONS

This issue is also one which needs little amplification. Fairbanks is exposed to cold temperatures. Cold temperatures

sometimes cause pipes to freeze. The common methods of thawing pipes are (a) the use of propane torches, (b) the use of steam, and (c) the use of clamp on electrical generators. None of these can be used on plastic pipe. In any installation where the freezing of a pipe represents a danger to either a considerable investment or a large number of people, the ability to thaw is important.

III.

THE EFFECTS OF FIRE

The "Uniform Building Code" from 1979 and all prior codes permitted plastic pipe only where "combustible construction is allowed". The 1982 code makes no such restriction. The problems in this area are twofold. First, plastic pipe will burn. In burning, the plastic pipes makes itself useless as a pipe and hence terminates the water supply which is often necessary to fight a fire. Additionally, the burning of the pipe generates gases. These are further discussed under the issue of permeability and worker safety. They range from carcinogens to known toxic substances and each such gas requires a material safety data sheet. These sheets reveal the individual problems with each such gas.

IV.

"GROUNDING"

Most modern construction involves electricity. Electricity presents the problem of short circuits. Almost all communications that use electricity require additional grounding. Traditionally, this grounding is done through the water system in a building. In a plastic pipes water system, there is no readily available ground. If the water has sufficient mineral content and if the grounds are inserted through the pipe, adequate grounding may occur. Otherwise, the defense against electrical accidents and fires is worthless in a plastic piped building.

V.

PERMEABILITY

The issue of permeability involves petroleum products, pesticides, and kitchen, bath and workshop chemicals. This is explored at great length in the summary of the California Department of Consumer Affairs lawsuit attached as Exhibit "A" and the documents for Subcommittee #1 on Health and Welfare Oversight Hearing on Plastic Pipe of the California Legislature; these being attached hereto and marked Exhibit "B". Suffice it to say, the chemical dangers here involve 1, 2 Dichloropropane; 1, 1, 1 Trichloroethane; Trichloroethylene; 1, 1 Dichloroethane; 1, 1 Dichloroethylene; Ethyloxirane; Benzene; Methylpyrole; Butane; Toluene; Xylenes; Trimethylbenzenes; Tetramethylbenzenes; Ethylbenzene; Chloroform; and Lindane. The safety and health issue here is self evident.

VI.

WORKER SAFETY

The reason for the interest of the amicus curiae in this action flows from the exposure of members of the union to the hazardous materials involved in assembling the plastic pipe.

Assemblage in small construction quantities such as residential housing, etc., do not normally bring an experienced installer beyond the dangerously toxic levels of exposure to the Benzene, Chloroform and kindred "glue". On larger projects, the time spent on this assemblage puts workers beyond the safe limit of such exposure and in effect forces him to "sniff glue". Because the damage from these chemicals is permanent and irreversible, the United Association and its members strenuously object to the current state of the art process for assembling plastic pipe.

January 27, 1984

MEMORANDUM

TO: Representative John Cowdery, Chairman
House Labor and Commerce Committee

FROM: Susan Brody, Director SEB

RE: Adoption of Uniform Plumbing Code, 1982 Version
Research Request 84-18

Ken Johnson of your staff requested information about adoption of the 1982 version of the Uniform Plumbing Code. Specifically, he asked us to survey selected municipalities in the state to find out if they had adopted the 1982 version of the code, with or without amendments. He was particularly interested in sections 4,5 and 10 of the code. Ken also asked us to find out which other western states have adopted the 1982 version of the code.

Adoption of the Code in Alaska

Within the time available to complete this request, we were able to survey the following seven municipalities: Anchorage, Bethel, Fairbanks, Juneau, Kenai, Ketchikan and Sitka. Our findings are summarized below.

Anchorage has adopted the 1982 version of the Uniform Plumbing Code. However, a number of amendments were made when it was adopted, including changes to the following sections: 401(a), 503(a), 506(b), 506(f), 1003(k), 1004(a), 1004(e), and 1007(e). In addition, two new sections were added--1010 and 1011. Some of the sections noted above deal specifically with the use of ABS, PVC and PB pipe.

Bethel has not adopted the Uniform Plumbing Code. According to planning director Tony Stigall, the city has a study underway currently to consider the possible adoption of a number of codes, including the plumbing code.

Fairbanks is currently in the process of adopting the 1982 version of the code; a hearing is scheduled before the city council in February. Amendments are being considered to sections 1002(d), 1004(a), 1007(e) and 1008(e).

Juneau has adopted the 1982 version of the Uniform Plumbing Code with amendments to the following provisions in sections 4,5 and 10: 401(a), 506(a), 506(c), 506(f), 1004(a), and 1007(e). See Attachment A for a copy of Juneau's amendments.

Kenai adopted the 1982 version of the Uniform Plumbing Code in March of 1983; apparently no changes were made to sections 4,5 and 10.

Ketchikan has not yet adopted the 1982 version of the code. According to Steve Elenberger, the building inspector, the city is waiting for the State to adopt the 1982 version before they proceed with adoption.

Sitka has adopted the 1982 version of the code. The code was adopted in its entirety with no amendments.

Adoption of the Code in Other Western States

I was not able to obtain a comprehensive listing of all other states which have adopted the 1982 version of the Uniform Plumbing Code. I called a number of sources which only had incomplete or out-of-date information. However, Tom Higham with the International Association of Plumbing and Mechanical Officials, informed me that, to the best of his knowledge, the following western states have adopted the 1982 version: California, Colorado, Hawaii, Idaho, Montana, New Mexico and Utah. He also mentioned that Oregon is currently in the process of adopting the code.

Mr. Higham pointed out that not all states choose to adopt the Uniform Plumbing Code at the state level. Instead, they leave adoption to local county and city governments. For example, Arizona and Wyoming are two western states which take this approach.

* * * * *

I am sorry I was unable to provide more complete information. I hope this information is useful to the committee.

Attachment A
City of Juneau, Uniform Plumbing Code Amendments.

this section, subject only to the following enumerated additions, deletions and changes:

(1) Delete Section 103.

(2) Delete Chapters 2, 5 and 6.

(3) Delete Section 910.

19.11.010 PLUMBING CODE ADOPTED AMENDMENTS AND DELETIONS.

For the purpose of regulating the erection, construction, reconstruction, addition, enlargement, conversion, equipment, use and maintenance of all plumbing within and without all buildings and structures or portions thereof within the city and borough, there is adopted by reference as the Plumbing Code of the city and borough, that certain compilation of rules and regulations prepared and published by the International Association of Plumbing and Mechanical Officials, a nationally recognized technical trade organization, which compilation is entitled "Uniform Plumbing Code, 1982 Edition," and five copies each of which have been filed in the office of the clerk of the city and borough or at such places as designated by the clerk, for public use, inspection and examination and which compilation is made a part of this chapter as if fully set forth in this section, subject only to the following enumerated additions, deletions and changes:

(1) Delete Sections 10.1 through 10.4; 10.5(b); 20.1 through 20.3; 20.4(b) and (c); 20.6 through 20.14; and 1303.

(2) In Section 310, add a new subsection (h) reading as follows:

"(h) Galvanized or black steel pipe shall not be used for soil pipe."

(3) In Section 401(a), add new exceptions 3 and 4 reading as follows:

"3. ABS and PVC shall not be used underground where it passes underneath within one (1) foot of building walls or footings unless adequately sleeved with cast iron or ductile iron to a point two (2) feet on each side of the wall or footing.

4. ABS and PVC shall not be used underground where it passes through building walls or footings unles it passes through an opening with a minimum of a two-inch annular space around the pipe which space shall be filled with a waterproof material which will permit the pipe to move within the space without damage."

(4) In Section 506(a) change the phrase "six (6) inches (152.4 mm)" to read "one (1) foot (.3 m)".

(5) In Section 506(c) change the phrase "six (6) inches (152.4 mm)" to read "one (1) foot (.3 m)".

(6) In Section 506, delete the existing subsection (f) and substitute a new subsection (f) reading as follows:

"(f) Vents through the roof shall be a minimum of two (2) inches diameter. The increase in vent size shall be at least six (6) inches below the roofline."

(7) In Section 1004(a), in the second sentence, delete the letters "PB" and delete the entire third sentence reading "PB waterpipe and tubing may be used for hot and cold water distribution systems within a building."

(8) In Section 1007, delete subparagraph (e) and substitute the following:

"(e) Relief valves shall be located inside a building and shall be provided with full sized drain of galvanized steel or harddrawn copper piping and fittings and shall extend from the valve to a point not less than 6 inches or more than 12 inches above the floor. No part of such drain pipe shall be trapped and the terminal end of the pipe shall not be threaded."

(9) In Section 1307(c)(3), delete the first sentence and substitute therefore the following:

"(3) Combustion air requirements for gas and oil burning water heaters shall consist of two openings as described below, with each opening containing not less than one square inch of free area per 5,000 Btu per hour input."

(10) In Section 1307, delete subsection (e), including Table 13-1 and the footnotes thereto, and substitute the following:

"(e) Alternate Methods of Supplying Combustion Air. In lieu of the requirements of Section 1307(c)(3), combustion air supply may be designed in accordance with recognized engineering principals when first approved by the Administrative Authority."

(11) Add a new Section 1326 reading as follows:

"1326 Check Valves. Check valves shall not be installed on any domestic water heater installation unless approved by the Administrative Authority."

(12) Appendices A, B, C, E, G, and H are adopted.

(13) Appendix D is adopted with the following additions: Under Part B add a new section D2.2 reading:

"D2.2 Cleanouts: Cleanouts the same size as the piping shall be installed at the base of all roof leaders."

In Part C, delete the last sentence of Section D3.1 and substitute the following:

"D3.1 Roof drainage rate shall be based on a rainfall of one (1) inch per hour."

19.16.010 ELECTRICAL CODE ADOPTED AMENDMENTS AND DELETIONS.

For the purpose of regulating the construction, reconstruction, addition, enlargement, conversion, equipment, use and maintenance of all electrical wiring and devices within and without all buildings and structures within the city and borough, there is adopted, as the Electrical Code of the city and borough, that certain compilation of rules and regulations prepared and published by the National Fire Protection Association, a nationally recognized technical trade association, which compilation is entitled "National Electrical Code, 1981 Edition," and five copies each of which have been filed in the office of the clerk of the city and borough or in such places as designated by the clerk, for public use, inspection and examination and which compilation is made a part of this chapter as if fully set forth in this section, subject only to the following enumerated additions, changes and deletions:

(1) Add a new Section 90-9 reading as follows:

"PLANS AND SPECIFICATIONS. A set of electrical plans and specifications or a wiring schedule, giving the following information, shall be filed before the issuance of a permit for the installation of electrical wiring intended to supply an anticipated or future load in excess of 200 amperes, single phase, or 150 amperes, three phase. Every plan shall be drawn to scale upon substantial paper and shall be of sufficient clarity to indicate the location, nature and extent of the work proposed and showing in detail that it will conform to the provisions of the Electrical Code and all other relevant laws, ordinances, rules and regulations. Specifications for such plans may be either shown thereon or provided separately. The building official may require plans, computations and specifications to be prepared and designed by an engineer licensed by the state to practice as such. The wiring plan or schedule required shall contain the following information:

(a) The type, rating and location of any new service equipment.

SUMMARY

CALIFORNIA DEPARTMENT OF CONSUMER AFFAIRS, FRIENDS OF THE EARTH, CONSUMER FEDERATION OF CALIFORNIA, STATE BUILDING AND CONSTRUCTION TRADES COUNCIL OF CALIFORNIA, AFL-CIO, and AILEEN ADAMS, (PLAINTIFFS)

vs.

INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIALS (IAPMO). (DEFENDANTS)

Exhibit "A"

I. BACKGROUND ON THE PROBLEM OF PLASTIC PIPES

Recent tests in California have duplicated field and laboratory experiences of water utility districts and environmental health experts that polyvinylchloride (PVC), polyethylene (PE), and polybutylene (PB) water service lines can be and are permeated (infiltrated) by gasoline, petroleum distillates and industrial solvents.

The public health impact can be serious enough to require the removal of an entire underground network of plastic water service lines and may cause serious health consequences for its consumers. Because of the pervasive occurence of toxic chemical spills and soil contamination with residues of pesticides and herbicides, California will need to embark on a comprehensive analysis of the problem. The problem is amplified by the specter of frequently used garden and household products that may permeate these plastic pipe.

Permeation of plastic pipe by toxic chemicals is all the more serious because of the existing threat to water quality by the pipes themselves and the quality of our current water supply. The California Department of Health found that the pipes themselves leach large amounts of chloroform, carbon tetrachloride, DEHP and a host of solvents used to degrease and glue the pipes. If these toxic chemicals are added to the already high level of contamination of many water supplies, then a truly dangerous prospect

for the quality of our potable water systems emerges.

Since 1977, the State of California has reviewed industry requests for unlimited usage of plastic pipe for water distribution. Industry assertions of economic feasibility and product safety were thoroughly and comprehensively reviewed by California Departments of Health, Consumer Affairs, Housing and Community Development, Cal/OSHA, and the State Fire Marshal. The Department of Housing and Community Development(HCD) concluded, after extensive hearings and in consultation with these other state agencies, that there was substantial evidence that unlimited use of plastic pipe may have a significant effect on the environment.

These conclusions were reached because of the threat to workers who breathe the fumes of the glues, and the presence of toxic chemicals (dimethylformamide, tetrahydrofuran, DEHP, carbon tetrachloride, chloroform and many others) in drinking water passed through the pipe, and an equally dramatic conclusion of the State Fire Marshal that plastic pipe is high rise construction may pose an unreasonable fire risk.

Since plastic pipe was found to have a potentially adverse effect on the environment because of its threat to water quality, worker safety, and fire safety, state agencies in California will not allow its expanded use until all scientific and public health questions have been answered. The State Architect has also warned all the design professions and school districts throughout California

of the potential hazards of plastic pipe.

Because the International Association of Plumbing and Mechanical Officials (IAPMO) proceeded with the expanded use of plastic pipe in its 1982 Uniform Plumbing Code, a coalition of state public and private consumer groups, environmental and labor organizations sued IAPMO and forced a notice disclaimer at each location in the Code where plastic pipe is mentioned. The lawsuit is still in progress over complaints that IAPMO misrepresents its product evaluation to the general public.

Outlined below are some of the key issues being pursued in that lawsuit.

II. ISSUES IN LAWSUIT AGAINST IAPMO

Under current law, IAPMO has the authority to prepare a model code know as the Uniform Plumbing Code (UPC). The code is prepared every three years and is forwarded to Housing and Community Development (HCD) for action. HCD may make minor modifications. In the event HCD takes no action, the Model Code lapses into law in one year. The Code is then forwarded to the Building Standards Commission for final approval and publication.

IAPMO's voting membership consists of governmental jurisdictions and building officials of member jurisdictions. The UPC is approved at the IAPMO annual convention after recommendations from IAPMO's code change committee are presented to the members who come to the convention.

IAPMO's other major function is preparation of a Research Directory which lists products by the manufacturer's name. (Such "listings" are used by jurisdictions for substitutions of plumbing materials.) In order for a product to be approved, the manufacturer must submit a sizeable application fee, along with durability and strength tests and show compliance with certain standards, depending on the product.

In the case of plastic pipe products and solvents, the appropriate standard is the National Sanitation Foundation (NSF) Standard 14. One of the main problems with the standard is that it does not test for the leaching of organic chemicals (dimethyl-formamide, tetrahydrofuran, DEHP, carbon tetrachloride, chloro-form, and more) from the plastic pipe products, nor does it test the permeability of the pipe. NSF 14 also does not test for fire safety performance with respect to either the increased fire-spread risks or the toxicity of the smoke.

Finally, NSF 14 is inadequate because plastic pipe does not have a 100% content requirement standard. Thus, each manufacturer varies the formula; only generic varieties of pipe (i.e. CPVC, PVC, ABS) are tested under Standard 14.

After one review of the manufacturer's application by the IAPMO Research Committee, the plastic pipe product is given the IAPMO seal or logo which declares that the product has been tested and meets minimum health and safety requirements.

The product is then listed in the Research Directory. Both the Research Directory and the UPC are heavily relied upon by contractors, builders, inspectors and others in the building and construction trades.

In 1981, IAPMO voted for nearly unlimited use of plastic pipe products for transportation of hot and cold potable water for its 1982 Code. By this time, HCD required, in accordance with the California Environmental Quality Act (CEQA), preparation of an EIR for such expanded use of plastic pipe.

Nevertheless, IAPMO proceeded to distribute its 1982 UPC with apparent approval of plastic piping products for transportation of potable water.

The Department of Consumer Affairs and a host of environmental and consumer groups filed a complaint alleging unfair business practices and negligent misrepresentation (Business and Professional Code sections 17200 and 17500).

The theory of the case is that IAPMO's representations in both the UPC and Research Directory that plastic pipe products are safe are, in fact, gross misrepresentations. IAPMO has no testing facilities or qualified chemists, toxicologists, or epidemiologists on staff. Voting on product approval for the Research Directory and the UPC is limited to voting member of IAPMO. Furthermore, IAPMO has totally ignored the substantial evidence amassed by HCD that substantial adverse impacts are a possibility

and that an EIR would be required before use of such plastic pipe can receive HCD approval.

The Department of Consumer Affairs immediately requested an injuction from the Los Angeles Superior Court to prohibit IAPMO from distributing the 1982 UPC without a warning of potential hazards. The Superior Court denied the motion, as did the Appellate Court. However, the Supreme Court granted an alternative writ forcing IAPMO to affix a warning to the UPC. That warning reads:

> NOTICE: An Environmental Impact Report is now being prepared in California to determine whether the use of CPVC, PVC, or PB plastic pipe for transporting potable water poses a danger to public health or the environment. At the time of this printing of the 1982 Edition of the Uniform Plumbing Code, the State of California does not permit any expansion in the use of such pipe beyond those applications permitted in the 1979 Edition of the Uniform Plumbing Code.
>
> For information on California restrictions, contact the State Housing Law Section of the California Housing and Community Development Department.

The trial on the underlying merits is now set for December 12, 1983 in Los Angeles Superior Court before the Honorable Judge Jack Crickard. The objectives of the plaintiffs are

best understood in light of the relief requested. Plaintiffs seek to require either IAPMO, or the product manufacturer through a contract with an independent laboratory approved or designated by IAPMO, to test each individual product for health and safety effects. Such health and safety effects should include:

1. toxicological testing of chemicals found in products or to have leached from products;

2. water chemistry testing of appropriate uses of such products;

3. permeation of organic and inorganic substances into potable water from either airborne or groundladen substances;

4. fire safety testing;

5. worker/installer safety assessment;

6. determination of durability to assure adequate service life.

Moreover, all Research Committee meetings should be opened to the public at large. Decisions by the Research Committee should be based on substantial evidence in the record. Findings should be prepared by IAPMO which show that the Research Committee has determined that the product does not create negative health and safety effects. Members of the Research Committee must not be limited to IAPMO members only, but rather must include public members, including but not limited to, those representing environmental and consumer interests. These public members shall

have voting privileges on the Research Committee.

IAPMO plays a critical legislative role and enjoys the economic and legal benefits of such a role. The time has come for them to assume the related burden of public responsibility.

PLASTIC PIPE: A BACKGROUND REPORT

Since the early 1950's plastic pipe has steadily replaced metal piping for plumbing applications. These include: drainage-waste-vent (DWV) piping for interior drain systems; potable water piping from the street main into the building (water service); and interior hot and cold water piping to fixtures (water distribution).

Plastic pipe was introduced in the United States and Europe over 30 years ago. It is widely used in England, Canada, Australia, Japan and Germany. It now distributes potable water into 35 percent of the nation's households and businesses. Plastic pipe is used in 55 percent of the nation's drain, waste and vent (DWV) systems and a full 95 percent of the irrigation systems.

A number of U.S. cities have installed plastic instead of metal pipe for their water service systems. Most federal housing program projects use plastic pipe. Most hospitals and laboratories must use plastic pipe to deliver high purity water.

There are many reasons for preferring plastic over traditional metal piping for these plumbing applications:

1. <u>It is more cost effective</u>. Both the short-term installation costs of plastic pipe and its longer term costs associated with its longevity are lower than metal pipe in most circumstances.

Losses to the water works industry in the United States due to underground corrosion of metal pipes are in excess of $150 million annually.

In Los Angeles County, homes built between July 1973 and April 1976 began to experience leaks in the galvanized steel plumbing systems shortly after the pipe had been installed. In Santa Clara County, newly-installed copper plumbing systems began to fail immediately upon installation.

Plastic pipe does not corrode under normal use situations.

The staff of the California Department of Housing and Community Development did its own economic analysis of the costs of plastic versus metal piping installations in typical California homes and found substantial savings using plastic piping.

In 1984, if metal pipe was used exclusively, the cost of installing plumbing for all new homes in California would be $118 million higher than for plastic pipe. The figure, estimated by the Plastic Pipe and Fittings Association on housing projections from the UCLA Economic Forecast Group, jumps to between $127 and $136 million in 1985.

2. Plastic pipe is energy efficient. It is lighter than metal. In 1977, the two billion pounds of plastic pipe used in construction that year compared with 17.5 billion pounds of the equivalent amount of metal pipe which was manufactured. The energy required for plastic pipe was 84 trillion BTUs, versus 408 trillion to produce the equivalent amount of metal pipe. The savings equated to 56 million barrels of crude oil. In 1978, the savings doubled.

3. Plastic pipe protects water users from known hazards associated with the use of metal pipe. Plastic pipes made from a variety of plastics are relatively impervious to various corrosive materials including water and chemicals dissolved in it. Potential health hazards associated with heavy metals which may be leached from metal piping or their joining systems are well-known and documented.

The Federal Safe Drinking Act provided for the U.S. Environmental Protection Agency to establish standards for toxic substances in drinking water. All states must meet these minimum requirements in enforcing their own safe drinking water regulations.

The plastic pipe industry is the only piping industry which submits its products to independent third party certification processes based exactly on the Federal drinking water regulations.

FOR IMMEDIATE RELEASE

PIPE GASKETS POSE HEALTH THREAT, STUDY SAYS

SACRAMENTO, California, October 19, 1983 -- Pipe gaskets, not pipe materials, are the primary points through which contaminants leach into drinking water, according to test results presented today to the California Assembly by plastics industry representative Alan J. Olson. Moreover, he warned, attempts to restrict the use of certain pipe materials in the hope of solving this problem mask the real issue - the threat to public health caused by transporting drinking water through contaminated soil.

Members of the California Pipe Trades Union recently have claimed that plastic pipe poses a potential threat to public health because it allows ground contaminates to leach through it to drinking water. Olson, a scientist for B.F. Goodrich Chemical Group, appeared before the Ways and Means subcommittee on health and welfare to present the results of an industry-sponsored study which refutes those claims.

-more-

The study, conducted by the Battelle Memorial Institute, one of the world's largest private research organizations, reveals that the gaskets used to join sections of underground water distribution systems can fail when exposed to gasoline spills or to chemicals such as those found in landfills or dump sites. A threat to public health exists, Olson explained, when water distribution systems are routed through such areas.

The Battelle tests involved constructing gasketed piping systems out of three commonly used materials -- ductile iron, asbestos cement and plastic -- and exposing them to solvent-saturated soil conditions for six weeks. Pipes of the same materials, but without joints, were exposed to identical conditions. After six weeks exposure, solvents had permeated the gasketed pipes in all but one test situation while ungasketed pipe showed slower permeation or no permeation.

"While these results clearly exonerate the integrity of the piping materials involved in this study, they underscore the urgency of addressing an issue of great potential concern," Olson said. "The effect of soil contamination on drinking water is something which the State of California now must examine from a fresh perspective. As these results indicate, merely replacing one piping material with another is not the solution. Under the worst conditions, all types

of pipe systems can be contaminated through gasketed joints.

The Battelle study was commissioned by The Vinyl Institute, a trade organization of material suppliers to the pipe industry.

EXPERT SEMINAR

ON HAZARDOUS WASTE 'PROBLEM' SITES

Case of Lekkerkerk

(Contribution by Mr. Strybis)

The attached paper is submitted for consideration at the expert seminar on hazardous waste "problem" sites, OECD, Paris, November 3-7, 1980.

It has been specially prepared by Mr. Stybis, Netherlands.

Lekkerkerk

One of the most serious cases of soil pollution in the Netherlands is the case of Lekkerkerk.

Lekkerkerk is a village north east of Rotterdam on the river Lek in a reclaimed coastal swamp area. Around 1970 for the expansion of this village the ditches in the expansion area west of the village were not filled up with crushed peat, straw and saw dust, as usually is done for building purp in marshy polders, but for financial reasons with the building and demolition wastes. Among these, chemical wastes and waste oil were dumped illegally, partly in drums (of which more than a thousand have been found until now) and probably partly unpacked. Soon after the houses on this "ground" were built and inhabited complaints arose about bad smells in the houses, while at a number of places gas and water tubes in the ground were so badly affected by polluted grondwater that they broke.

After the fainting of two workmen in a pit dug for inspection of gas pipes an investigation was started in 1978. From this resulted that soil and grou water in this new part of the village were badly polluted by aromatic hydrocarbons, mainly xylene, toluene and ethylbenzene (solvents widely usec in the paintindustry) that, as later appeared, floated as a film on a layer of oily waste material on the groundwater.

Because of the low permeability of the peat soil and because of the fact that Lekkerkerk lies in an area behind the dike of the river Lek where the groundwater wells up, the pollution had not spread laterally nor vertically to the subsoil. But when in april 1980 further investigations showed that not only the atmosphere inside the houses contained rele- tively high concentrations of aromatic hydrocarbons by evaporation from the soil, but that these polluting compounds also penetrated through the network of PVC and PCE tubes in the ground for the distribution of drinkir water as a result of which the quality of this water could not be guarante any longer, in the interest of public health it was decided that at the shortest possible notice all pollutions should be removed. This cleaning operation is now in progress and reached the world press for because of th some 800 inhabitants had to be evacuated from their 270 homes for abou six to nine months.

The operation is complicated by the fact that for social and financial reasons the aim is to save the 270 houses that are built on piles, some of concrete, others of wood.

The following works have been carried out or are still to be carried out.

1. All pavements, trees and other vegetation, street lights, garages, tubes and cables in the ground have been removed and if polluted have been destroyed. Only the houses were left standing.

2. The canal around the concerning part of the village was dammed off from the surrounding surface waters to prevent possible spreading of pollutions during the operation. By steel barrages the subsoil of the quarter was divided into five compartments to reduce spreading of pollutions from uncleaned territory into cleaned territory and to reduce the quantities of groundwater that have to be pumped away during the operation.

3. The groundwater level in the compartments was lowered by pumping for the time of the operation to a level just under the pollutions so that work can be done under dry conditions, which makes grading and concentrating easier. Well from the river Lek is ooposed by a number of deep well pumping stations.

4. All polluted materials deposited on the original surface and in the ditches are removed and transported to a combustion installation for domestic and chemical wastes at Rotterdam to be burned. All polluted water thas is pumped out of the compartments is led to a temporary purification installation on the spot, where it is purified and finally led through active carbon filters before it is drained into the river Lek. Saturated active carbon sludges and chemicals separated from the water are burnt at the combustion installation in Rotterdam.

5. Underneath the houses the removal of soil and polluting substances is done by special drilling and dragging machines that can work horizontally. To prevent leaning to one side of the houses work is done two opposite sides at the same time. Houses on wooden piles are kept up straight by temporary steel constructions for additional support while work underneath them is going on.

6. After removal of all wastes and polluted soil (estimated on 75.000 tons of which 2.000 drums) the depressions are filled with clean sand, for which was chosen "flugsand" to prevent differential setting of the ground afterwards. Flugsand is a light vulcanic sand from the Eifel are.

in Germany, which has about the same volumeweight under water saturated conditions as peat. Next clean topsoil is brought up. After that the infrastructure of the quarter can be reestablished and the groundwater is raised to its original level again.

It is expected that the inhabitants can return to their homes on a new clean subsoil between november 1980 and february 1981. The costs of the whole operation are estimated to be more than 140 million guilders.

PERMEATION OF ORGANIC COMPOUNDS IN PLASTIC PIPE

Anlab
ANALYTICAL LABORATORY
A DIVISION OF DEWANTE & STOWELL

1914 S STREET, SACRAMENTO, CALIFORNIA 95814 • 916 447-2946

September 15, 1983

Mr. Ray Leonardini
555 Capitol Mall, Suite 435
Sacramento, CA 95814

The results of the pipe study are in the report enclosed.

The findings indicate that certain organic chemicals can permeate through plastic pipe under the conditions of the study.

Sincerely,

Tom Ikesaki

TI:et
Encls.

ABSTRACT

Four potable water service pipes were tested for permeability to specific organic compounds. These organic compounds were used in concentrated form in these tests and may not be representative of normal applications. Three series of test designs were used. Successive tests were designed to reduce the possible effect of pipe joints to the inward migration of chemicals through the pipe material.

Three groups of chemicals were tested; chlorinated solvents, pesticides and gasoline in Polybutylene (PB), Polyethylene (PE), Polyvinylchloride (PVC) and Copper (CU) pipes.

Permeation by small molecular weight chlorinated solvents was pronounced for polyolefin pipes (PB & PE), less for PVC. Trace contamination of joined pipe systems (PVC and Copper) was also found. Controls with no joints in pipes showed that PVC but not Copper was permeable to specific molecular weight chemicals.

For systems showing permeation, the rank order of chemicals was related to molecular weight and polarity, with constituents of chlorinated solvents, gasoline (benzene and substituted benzenes) showing the greatest permeation effect in polyolefin and chlorinated pipes, respectively. The rank of pipes according to decreasing permeability is: Polyethylene, Polybutylene, Polyvinylchloride and Copper.

Results indicate the presence of organic chemicals from other sources such as pipe joining and sealing compounds, and a group of chemicals that appear to have been extracted as specific plastic pipes were permeated.

SOME FREQUENTLY ASKED QUESTIONS CONCERNING PIPE PERMEATION

ANSWERS PREPARED BY THE CALIFORNIA PIPE TRADES COUNCIL

Q. WHAT IS PIPE PERMEATION?

A. Pipe permeation is the phenomena whereby toxic substances seep through pipe material causing the contamination of the drinking water which is carried by those pipes. This occurs most commonly with pipe which is buried in soil.

Q. WHEN WAS PIPE PERMEATION FIRST DISCOVERED?

A. That is hard to answer. Pipe permeation was not widely reported until the Department of Consumer Affairs released test results in December, 1982, which showed that plastic pipe can be permeated by a number of carcinogens. The test was sponsored by the California Pipe Trades Council and was conducted by Anlab, an independent testing laboratory in Sacramento. The investigation leading to that test, however, revealed that the East Bay Municipal Utility District had recognized permeation as early as 1978 and had reported its findings to the Department of Health Services. Further, the president of the Society of the Plastics Industry (a major trade association of plastic resin and plastic product producers) stated, in response to DCA's permeation announcement, that the findings "are not new, since they have been identified long ago . . ."

Q. IS ONLY PLASTIC PIPE PERMEABLE?

A. As far as we know, the only testing for permeation has been conducted with plastic pipe and the only reported instances of pipe permeation have involved plastic pipe (although metal pipes have been used as test control, but were not permeated). We believe, however, that all pipe materials should be tested to make absolutely certain that public health is protected. The Budget Bill item (#4260-001-014) which would have appropriated funds for a permeation study called for the testing of all pipe materials. It was vetoed by the Governor.

Q. WHICH CHEMICALS CAN PERMEATE PLASTIC PIPE?

A. No one knows for sure how many different chemicals can permeate plastic pipe, nor under which conditions the permeation is most likely to occur. Among the toxics discovered to permeate, however, are some known carcinogens and some which are known to cause liver and kidney damage, mobility impairment, birth defects, lung congestion, nausea, and anemia. Until a comprehensive test is conducted, we simply won't know which chemicals permeate at hazardous levels. The Anlab test found the following will

permeate:

1, 2 dichloropropane
1, 1, 1 trichloroethane
trichloroethylene
1, 1 dichloroethane
1, 1 dichloroethylene
Ethyloxirane
Benzene
Methylpyrole
Butane
Toluene
Xylenes
Trimethylbenzenes
Tetramethylbenzenes
Ethylbenzene
Chloroform
Lindane

(An attachment to this series of questions & answers, excerpted from "The Merck Index" shows some of the common uses of these toxic chemicals.)

Q. WHY DID THE GOVERNOR VETO THE PIPE PERMEATION STUDY?

A. In his veto message, the Governor stated, "I am eliminating the $200,000 legislative augmentation for the study of the permeation and infiltration of toxic chemicals into pipe and pipe water mains. I believe it is more appropriate for this study to be funded by the pipe industry."

Q. WHY SHOULDN'T THE INDUSTRY BE REQUIRED TO FUND THE STUDY?

A. We're talking about a potentially serious health hazard which could affect millions of Californians. It requires a thorough and objective examination. Just as statistics can be manipulated, so can test protocols and results. Although the plastics industry acknowledges that they have known of the permeation phenomena for some time, the industry has not been at the forefront of any effort to restrict the use of plastic pipe to safe applications. Further, the president of the Society of the Plastics Industry, while referring to the permeation tests financed by the California Pipe Trades Council, stated, "There should be serious questions about the validity of a report funded by a source opposed to the product it is testing." We concur that privately funded tests may have a credibility problem and we also assert the same logic used by the S.P.I. president should discourage reliance on tests funded by advocates of products. The potential health hazard related to permeation is simply too serious to have its examination and evaluation financed, designed, or conducted by any organization other than one that is thoroughly and unquestionably objective.

Q. WAS THE TEST FUNDED BY THE PLUMBERS UNIONS (CALIFORNIA PIPE TRADES COUNCIL) A RELIABLE TEST?

A. The objective of the test was to determine whether or not certain chemicals could permeate plastic pipe. The test did not replicate "real-life" circumstances. It used highly saturated sandy soil in a controlled environment in order to accelerate the results. The test did prove that, under those conditions, plastic pipe is permeable. We know that a much more expensive and sophisticated test, such as the one which the Governor vetoed, is necessary to accurately determine which chemicals will permeate and under which soil conditions the permeation will occur. The plumbers' test was not designed to be the "last word"; its purpose was to provide sufficient evidence of the problem in order to prompt responsible parties (such as the State) to conduct a comprehensive and objective test.

Q. WHO BESIDES THE PLUMBERS UNIONS HAVE HAD EXPERIENCE WITH PERMEATION TESTING?

A. Apparently the East Bay Municipal Utility District conducted some limited testing after their initial discovery of permeation. We have recently learned, also, that testing has been conducted by the American Water Works Service Co. in New Jersey and that the company's results have shown findings similar to our own. None of this testing, however, has been nearly as comprehensive as the one which would have been conducted pursuant to the Budget Bill provisions. Strangely, although the Department of Health Services has jurisdiction over the regulation of public drinking water distribution systems and although the department has been aware of the permeation phenomena at least since 1978, DHS has never shown any interest in permeation testing until now.

Q. HASN'T A PERMEATION TEST BEEN CONDUCTED BY THE CITIZENS FOR SAFE DRINKING WATER?

A. No. The Citizens for Safe Drinking Water did widely report its discovery of lead leaching in copper pipe. The test was conducted at a few locations in Sacramento. The City of Sacramento subsequently tested the same water taps and found no evidence of leaching. The only known member of the Citizens for Safe Drinking Water, by the way, is a public relations representative for the Plastic Pipe & Fitting Association, a trade association which has worked closely with the Society of the Plastics Industry. This front organization has never announced the conduct or the results of any permeation studies.

Q. ASIDE FROM LABORATORY TESTING, WHERE HAS PERMEATION OCCURRED?

A. It may have occurred at the Coyote Hills tract near the McColl hazardous waste site in Fullerton. Further testing needs to be

conducted there to know for certain. The most dramatic permeation episode occurred at Lekkerkerk, a town in the Netherlands. There, 800 inhabitants were evacuated when 270 homes were contaminated by toxics in the soil which permeated plastic pipes and conduit. All other known instances have been in the U.S. The East Bay Municipal Utility District has reported 12 episodes of gasoline permeating PB pipe, two episodes of gasoline permeation of PB pipe have been reported by the Marin Municipal Water District in Corte Madera, one identical episode has been reported by the North Marin County Water District in Novato, Tetrachloroethylene (PCE) has permeated PE pipe in Delaware, gasoline distillates permeated PE pipe in Columbus, Ohio, and gasoline permeated plastic water service lines in Chattanooga. Undoubtedly, there have been a number of other permeation episodes that have gone unrecognized or unreported.

Q. AREN'T THE PLUMBERS SIMPLY OPPOSING PLASTIC PIPE BECAUSE THE INSTALLATION OF PLASTIC PIPE REDUCES LABOR COSTS?

A. The advocates of plastic pipe want you to think that is the reason. Actually, there are minimal economic considerations related to the plastic pipe issue. As you know, SRI International (formerly Stanford Research Institute) is currently producing an environmental impact report (E.I.R.) for the Department of Housing & Community Development which relates to the expanded uses of plastic plumbing pipe. The initial review draft produced by SRI (the final report will not be completed until next year) reports on page IV.F-1 that the proposed expanded use of plastics in home construction would amount to a labor savings of only about $50 per single family residence. The E.I.R. does not include a review of the permeation phenomena, so no accurate costs are available on the labor cost differential between the installation of underground plastic pipe and the installation of alternative materials. However, since plumbing the interior of a house is much more complicated than simply laying pipe in a trench, we can assume that the impact on labor costs -- if subsurface plastic water lines were to be restricted -- would be negligible.

Q. WHY THEN, ARE THE PLUMBERS SO CONCERNED ABOUT PERMEATION?

A. Members of the plumbing trades drink water too. Historically, our membership has been very active in the promotion of technologies to deliver pure water and to provide adequate sanitation. Our initial examination into the plastic pipe issue had been prompted by a fear that the health of plumbers had been severely endangered by the use of adhesives required for the bonding of plastic pipe, just as, 30 years ago, our fear that working with asbestos was causing cancer amongst our membership led to our investigation into the dangers of that material. Our continuing examination of plastic has uncovered the other dangers of the material, i.e., permeation, leaching, and fire toxicity.

Q. HOW COME THE E.I.R. DOES NOT INCLUDE AN EXAMINATION OF THE PERMEATION ISSUE?

A. We think it should. Unfortunately the proponents of the E.I.R. were unaware of the permeation issue when the scope of the study was being determined by the E.I.R. Task Force membership (although at least two of the participants, the Department of Health Services representative and the Society of the Plastics Industry spokesperson, were apparently well aware of the issue but chose not to reveal it) and it was therefore never included in the E.I.R.'s original work plan. When permeation eventually became a public issue, various environmental and labor organizations, some legislators, and even the Department of Health Services requested that an evaluation of pipe permeation be included in the E.I.R. Despite the strong evidence that this problem needs a careful analysis, the Department of Housing & Community Development acceded to the demands of the plastic industry and refused to permit the inclusion of a permeation study.

Q. WHAT REASONS DID THE DEPARTMENT OF HOUSING & COMMUNITY DEVELOPMENT GIVE FOR REFUSING TO INCLUDE PERMEATION TESTING AS AN ELEMENT OF THE E.I.R?

A. The department contended that underground pipes are outside of their jurisdiction. That contention is not true. While water mains are the responsibility of the Department of Health Services, the subsurface pipes which carry water from the meter (usually at the property line) to the structure are within the jurisdiction of DHCD. Clearly, if a plastic water main can be permeated, so can a plastic service line carrying water under a residential yard. DHCD has frequently sided with the plastic industry representatives during E.I.R. Task Force disputes, so the department's refusal was not surprising.

Q. WHAT IS THE MAGNITUDE OF THE PROBLEM?

A. No one can know for sure, but we believe it can be a problem with enormous consequences. Until a comprehensive test is completed, we can not know with absolute certainty which chemicals will permeate plastic pipe, which soil conditions contribute to it, nor how long it takes for permeation to reach truly hazardous levels. The vetoed study could have given us those answers. Its possible, however, to speculate with some assurance about the magnitude of the problem:

The E.I.R. draft prepared by SRI estimates that over 25% of all Californians will live in homes plumbed by plastic pipe within the next 25 years if the proposed new uses of plastic are approved. It is safe to estimate that at least that many, and probably many more, will also be served by underground pipe systems which include at least some plastic. (The manager of the San Juan Suburban Water District in Sacramento County has estimated that 98% of the new homes in his district have plastic water lines from the house to the main.) Consider also that

there are thousands of recorded toxic spills each year in California (every one of them could eventually trigger some permeation activity), that there are now tens of thousands of California homes near hazardous waste sites (such as the Coyote Hills tract near McColl), and that many new communities are projected for development on land which had formerly been contaminated by pesticides. The potential for extreme danger is high; its time for clear answers.

Q. IS ANYONE BESIDES THE CALIFORNIA PIPE TRADES COUNCIL ACTIVELY SUPPORTING PERMEATION TESTING?

A. There is, of course, considerable support within the Legislature. Additionally, the California Pipe Trades Council is part of a coalition of organizations which have been actively pushing for permeation testing. Other members of the coalition include the Citizens for a Better Environment, the Consumer Federation of California, the Friends of the Earth, and the Natural Resources Defense Council. Additionally, the Sierra Club has taken strong supportive positions.

(1)

A STATEMENT OF CONCERN FOR A NEW PUBLIC HEALTH RISK POSED BY TOXIC SUBSTANCES THAT PENETRATE PLASTIC DRINKING WATER PIPES

Presented to

The Assembly Ways and Means Subcommittee Number 1
Art Agnos, Chairperson

by

The Consumer Federation of California, Friends of the Earth, Citizens for a Better Environment, The Natural Resources Defense Council, and the California Pipe Trades Council

October 19, 1983

We wish to alert the Committee to a new and previously underestimated source of environmental contamination. We are gravely concerned that California consumers may be unknowingly exposed to hazardous chemicals which may enter drinking water supplies from contaminated soils by migrating through the walls of permeable plastic water pipes.

The degree of our concern is heightened by two facts:

1) the increasing occurrences of soil contamination following accidental spills, leaks from underground storage tanks and, chemical migration from landfills [from the records of the Environmental Protection Agency we know of 58 episodes of major spills of gasoline or diesel oil in one month in California alone (January, 1983)]; and,

2) the increasing reliance of many municipalities on plastic pipes as the conduits for potable water.

In the past, such episodes of soil contamination had been thought to be rare and small in magnitude. From the EPA records we know that spills in the million-gallon range may occur monthly. In early May, 1983, the Regional Water Quality Control Board in Santa Clara reported a total of 57 major underground leaks from storage tanks containing industrial solvents and stripping solutions.

Municipalities either have been unaware of these problems or have underestimated its seriousness. San Francisco uses plastic piping in over 50 percent of its water service connections. The East Bay Municipal Utility District (EBMUD), in spite of having uncovered over a dozen such episodes since 1978, relies almost exclusively on polybutylene plastic pipe for its mains and recommends such use for service laterals.

Research done at the Anlab Laboratory in Sacramento under the supervision of Prof. Marc Lappe' of the UC Berkeley School of Public Health has shown that several major groups of hazardous chemicals can permeate different types of plastic pipe. Some of these pipes, such as polybutylene and polyethylene, are strikingly permeable to chlorinated solvents including some which are carcinogenic in animals.

At the Fairchild plant in San Jose, for instance, soils have been contaminated with chlorinated solvents like 1,1,1 trichloroethane and 1,1 dichloroethylene. Homes in the immediate

vicinity of the plume of contamination are plumbed with subsoil polyethylene (PE) and polyvinychloride pipe (PVC). PE has proven to be extremely permeable to these solvents, PVC less so.

Homes sold throughout California are commonly sprayed with lindane, a carcinogenic and teratogenic pest control agent which the EPA has just recertified for use as a structural pest control agent. The labels on several such formulations carry the instruction to spray directly on exposed pipes. Anlab studies show that prolonged contact (1-7 weeks) between PVC pipe and a concentrated lindane solution results in substantial contamination of water inside the intact pipe with this highly persistant pesticide.

Although it contains less toxic ingredients than lindane, the chemical of greatest concern remains gasoline because of its ubiquitous presence in the environment. In spite of studies done in 1978-79 by EBMUD which showed that gasoline will readily penetrate PE and PB (polybutylene) pipe, the level of concern of health officials for this now commonly recognized permeation event remains inexplicably low. A survey of water utility districts in California performed in the summer of 1983 by the Sanitary Engineering Branch of the State Department of Health Services showed that 62 percent of the representatives of districts which regularly recommend the use of plastic pipe for water lines knew nothing about State regulations which proscribed their use in the presence of petroleum distillates.

In spite of their familiarity with permeation problems with plastic pipe, the Department of Health Services failed to specify permeability when asked to indicate what public health concerns were properly within the scope of an Environmental Impact Report on expanded use of plastic pipe being conducted by the Department of Housing and Community Development. This omission is all the more questionable in the face of the fact that Robert Stephens, then the Department's head of hazardous substances, had just returned from an oversight mission in Holland where he had observed the most serious environmental episode involving plastic pipe permeation then known (Lekkerkerk).

Perhaps of greater concern, is the fact that the attorney for the Society for Plastics, Inc., failed to divulge any data about plastic pipe permeation when asked to do so by the Department of Health Services in March of 1981 following the first public reports of the Lekkerkerk event. It is clear from material submitted for the public record that such industry data were available.

Part of the lack of the Department's concern may have stemmed from the mistaken belief that problems of the magnitude of the Lekkerkerk episode (often called Europe's Love Canal) could not happen in the United States. But we know now of several episodes reported to American water districts and the EPA which have involved potential human exposure to extremely hazardous substances such as benzene as the result of permeation of plastic pipe.

Another explanation for Department passivity is the belief that the taste or odor of the water will alert consumers to the existence of a problem. Published data on odor thresholds for the chemicals of concern for permeation establish that consumers cannot be expected to detect them before they are already above the level of health concern.

A case in point is benzene, a human leukemia-causing agent. Data from the Anlab studies showed that this constituent of gasoline will readily go through PB and PE pipe walls and reach extremely high concentrations (100 ppm) after just one week of exposure. This observation could have predicted a permeation contamination episode in Columbus, Ohio, where seven people were exposed to levels of benzene well above those considered the threshold for regulatory action. For benzene in particular, the odor detection threshold is known to be substantially above this threshold, set by the EPA at 0.66 parts per billion (ppb). At 100 parts per million, the levels found by the Anlab work--albeit with pure gasoline--are over 100,000 times the action level.

The lack of response on the part of the plastics industry to the Department's request for data on permeation (March, 1981) is even less understandable, since several industry studies on the resistance of various plastics to attack by chemicals, show that they have known about the vulnerability of various plastics since the early 1960's. That they permitted water pipes to be constructed of these same materials without public disclosure of this vulnerability to appropriate public agencies is cause for concern.

Because of the gravity of the potential health hazards posed by these and other carcinogenic chemicals, and the uncertainties surrounding where and when health-threatening episodes may occur throughout the state, we believe that the following moratoria requirements and authorizations should be adopted immediately:

1) A specific moratorium on use of underground plastic

pipes for carrying potable water in and around high-risk sites in the state. These sites, to be specified by the Department of Health Services, Department of Food and Agriculture, and CalTrans, would include, but not be limited to, areas of proximity to present and abandoned hazardous waste disposal sites; land in proximity to underground chemical storage tanks; agricultural land where residual contamination with pesticides or soil sterilants may occur; and, rights-of-way at high risk for accidents or spills that contaminate soils with potentially permeating chemicals.

2) A requirement that soils at all major construction sites and rights-of-way in which contractors intend to use plastic pipe be monitored prior to use to determine the presence of significant levels of permeating chemicals.

3) A directive to the Department of Health Services to rigorously enforce relevant statutes and regulations dealing with the siting of water mains and service laterals.

4) A notification requirement that householders whose service lines have been plumbed with plastic be warned of the health risks associated with permeation of toxic chemicals from contaminated soil.

5) A requirement that CalTrans and other emergency agencies notify local water utilities known to use plastic pipe of any spill or leakage of hazardous chemicals which can permeate plastic piping (A model notification request for PCB permeation of PB pipe was recently developed by the North Marin County Water District).

6) A requirement that the Department of Food and Agriculture monitor agricultural soils for residual contaminants which can permeate underground plastic irrigation pipes and thereby recontaminate crops or workers (examples include DBCP and dichloropropanes). And

7) An authorization for the Department of Health Services to modify its existing regulations proscribing the use of plastic pipe where petroleum distillates are present to encompass all classes of chemicals known

to permeate plastic pipe.

We believe that the health and welfare of California citizens will be substantially served by taking the steps outlined above to offset the real and potentially damaging health threat posed by the permeation of plastic water pipes by toxic organic chemicals.

INCIDENTS OF PERMEATION OF PLASTIC WATER SUPPLY LINES

SITE	NUMBER OF EPISODES
East Bay Municipal Utility Districts, Oakland, California: Reports of at least twelve specific incidents of potable water being contaminated by gasoline distillates via permeation of plastic pipe. Specific types of plastic pipes permeated are unknown at this time.	12
Marin Municipal Water District, Corte Madera, California: Episodes of gasoline permeation of PB pipe at two residences.	2
North Marin County Water District, Novato, California: Permeation of PB pipe by gasoline (accident near meter) at a residence.	1
State of Delaware: Department of Health and Social Services Division of Public Health reported an episode of permeation at a shopping center of PE pipe by Tetrachloroethylene (PCE).	1
Columbus, Ohio: Shopping center, 2492 Morse Road, Columbus, reports of permeation of PE by gasoline distillates. Adverse health effects reported.	2

FOR IMMEDIATE RELEASE
October 19, 1983

3

A new danger associated with the use of plastic pipe was revealed today in Sacramento at an Assembly committee hearing. Laboratory tests have shown that lindane, a carcinogenic chemical commonly sprayed on or near pipes for the control of termites and other structural pests, will penetrate the walls of some plastic pipe and contaminate drinking water according to Dr. Marc Lappe of the U.C. Berkely School of Public Health.

Testifying before an Assembly Ways & Means Subcommittee chaired by Assemblyman Art Agnos (D-San Francisco), Lappe urged the state to adopt an emergency regulation to prevent the application of lindane on or near plastic pipe.

Under California law, all structures must be treated for termites before sale or resale. The average home in California is resold every four years, according to Lappe, and lindane is the second most common chemical used for the required treatment. Lappe speculated that, by the year 1990, most Californians will have drunk water from lindane contaminated pipes.

Lappe warned the committee that "the state departments which are responsible for health and environmental protection need to conduct comprehensive examinations of plastic pipe permeation and do a better job of coordinating information amongst themselves." The testing for lindane permeation was recently completed under Lappe's supervision by an independent laboratory in Sacramento. Previous research had indicated that gasoline and other toxic chemicals commonly spilled, dumped, or sprayed in or on soil will permeate plastic pipe.

"Despite the reports of gasoline permeation episodes by three different California utility districts and independent confirmation of my findings by the American Water Works Service Co. in New Jersey, the state has attempted to ignore this serious health hazard," Lappe charged.

Agnos had called the hearing in response to an unreleased report by the Department of Consumer Affairs that the Department of Health Services and other agencies had failed to properly protect drinking water quality in a housing tract developed near the McColl hazardous waste site in Fullerton. The hearing also questioned the Governor's veto of a Budget Bill appropriation which would have commissioned a study of pipe permeation.

#####

LINDANE

Common Name: Lindane

Synonyms: Hexachlorocyclohexane; gamma benzene hexachloride; BHC

Uses: Fumigant in homes and gardens* (See attachments); control of body lice

*Approximately 29,000 pounds of Lindane were used for structural pest control in California in 1981. Pesticide Use Report, Dept of Food and Agriculture, State of California, 1981.

Type of Chemical: Organochlorine (chlorinated hydrocarbon)

Chemical and Physical Properties: Colorless; persists in environmeant for approximately 10 years**

** An Assessment of the Health Risks of Seven Pesticides Used for Termite Control. Committee on Toxicology, Board on Toxicology and Environmental Health Hazards, Commission on Life Sciences. National Academy Press, Washington, D.C. August, 1982.p.3.

LD_{50}: Acute oral: 88 mg/kg. in male rats*

*Thomson, W.T. Agricultural Chemicals, Thomson Publications, California. 1977.

Antidote: No antidote available

Acute Health Effects: As an organochlorine, lindane may disrupt the function of the nervous system, principally that of the brain. Acute symptoms may include headache, disorientation, apprehension, weakness, muscle twitching and convulsions. Chlorinated hydrocarbons are fat soluble and may be stored in human body fat.

Morgan, D.P., 1977. Recog. & Mgmt. of Pesticide Poisonings, U.S. EPA, Washington, D.C.

A 2-year-old boy developed aplastic anemia after playing with a dog treated with lindane solution for mange.

Vodopick, H. "Cherchez la Chienne: Erythropoietic Hypoplasia After Exposure to -Benzene Hexachloride." JAMA, 234(8), 850-851, 1975.

Lindane can be absorbed through the skin.

Chronic Health Effects: Lindane has been shown to cause cancer in rats and mice.

Reuber, M.D., 1979. "Carcinogenicity of Lindane." Environ. Res. 19(2): 460-481.
Reuber, M.D., 1979. "Carcinomas and Other Lesions of the Liver in Mice Ingesting Organochlorine Pesticides." Toxicol. Annu. 3:231-256.

Lindane has been found to be mutagenic in human cell cultures and plant root tips.

Vachkova-Petrova, R.(Inst. Hyg. & Occup. Dis., Med. Acad., Sofia, Bulgaria), 1978. Mutagenna aktivnost na pestitsidite. (Mutagenic activity of pesticides). Khig. Zdraveopaz. 21(5):496-605. (Bulgarian).
Kolmark, F.C. "The Induction of Cytogenetic Changes and Atypical Growth by Hexachlorocyclohexane." Science, 109, 467-468.

Long-term administration of lindane to rats resulted in decreased fertility and produced teratogenic, carcinogenic and central nervous system effect.

Petescu, S., V. Dobre, M. Leibovici, Z. Petroscu, S.A. Ghelberg, 1974. "The Effects of Long-Term Administration of Organochlorine Pesticides (Lindane, DDT) on the White Rat." Rev. Med. Chir. 78(4):831-842.

CAUTION

May be fatal if swallowed. Harmful if inhaled or absorbed through the skin or eyes. Do not swallow or inhale vapor or spray mist or allow contact with skin, eyes or clothing.

Avoid contact with food or feeds.

If swallowed, induce vomiting by giving the victim 1 Tablespoon of table salt in a glass of water. If on skin, remove contaminated clothing and wash with soap and water; if in eyes, flush with running water. Call a physician in all cases of suspected poisoning. Do not use in dairy barns or milkhouses.

Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.

Apply this product only as specified on this label.

NOTICE — Recommendations for the use of this product are based upon information believed to be reliable to the time of printing. The storage and use of this product being beyond the control of Los Angeles Chemical Company, no guarantees expressed or implied are made as to the effects of such, or the results to be obtained. If not used in strict accordance with the recommendations and established safe and sound practice. The Buyer assumes all responsibility including any injuries and/or damages resulting from its misuse as such, or in combination with other products. No recommendations are made under abnormal storage or use conditions, or under conditions not reasonably foreseeable to the seller.

MANUFACTURED BY

LOS ANGELES CHEMICAL COMPANY

DIRECTIONS

LACCO HI-LIN is prepared for use against certain household and structural pests as listed below. Dosages are given in terms of fluid quarts of this product.

HOUSEHOLD: 1 quart in 25 gallons as a coarse, wet spray or with a paint brush as directed for the control of the following pests. Repeat as needed to maintain effective control. May cause staining in some cases.

ANTS: Apply to ant trails, door sills, window frames, openings around water pipes, heat ducts, electrical outlets, baseboards and other areas where ants may enter rooms.

ROACHES, WATERBUGS: Apply to infested cracks, hiding places and adjacent exposed surfaces where pests may crawl when not in hiding.

MOSQUITOES: Apply to doors, door sills, screens, window frames, and other areas where the pests frequently alight.

SILVERFISH: Apply to baseboards and areas behind shelving, bookcases and storage spaces.

FLEAS: Apply to infested areas around baseboards, windows and door frames, wall cracks, sleeping quarters of household pets and localized areas of floors and floor coverings; place fresh bedding in animal quarters after treatment and do not apply directly to pets.

DIRECTIONS (Continued)

FLIES: 1 quart in 8 gallons of water. Apply to doors, door sills, screens, window frames, and other areas where pests frequently alight.

STRUCTURAL: 1 quart in 25 gallons of water, pre-construction. Apply as a coarse, wet spray, or with a paint brush. Inspect treated areas annually for signs of infestation.

SUBTERRANEAN TERMITES: Slab construction, use a solution of 1 quart to 3½ gallons of water. For treatment before gravel or cinder fill has been added, apply 1 gallon of solution per 10 square feet of soil surface. Where fill has already been added, apply 1½ gallons per 10 square feet. Conventional construction, use a solution of 1 quart to 3¼ gallons of water. Apply to trench 6 inches wide and up to 30 inches deep for buildings with deep foundations along both sides of exterior and interior foundations, around piers and under utility entrances; placing about 1/3 of the solution in the bottom of the trench with the remaining 2/3 mixed into the soil as the trench is backfilled. Use 2 gallons of solution per 5 linear feet for trenches not over 15 inches deep and 4 gallons per 5 linear feet for trenches exceeding 15 to 18 inches in depth. On voids or unit masonry walls, apply to 125 linear feet, from the surface of the soil to the footing.

CAUTION

Avoid use in dairy barns or milk houses.
Keep container closed.
May be absorbed through skin.
Avoid inhalation and skin contact.
In case of contact, wash immediately with soap and water.
Avoid contamination of feed and foodstuffs.
Do not use on household pets or humans.
Harmful if swallowed.

DO NOT LEAVE IN SUNSHINE. DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

DESTROY OR RETURN THIS CONTAINER WHEN EMPTY.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

DIRECTIONS

LACCO LIN-O-FLY is prepared for use against certain household pests, listed below. Use as a spot treatment inside dwellings. Do not use as a general space spray or broadcast vapor. Use a coarse type spray.

ANTS: Spray around doorways, windows and cracks or openings of any kind in floor, walls or ceiling where ants might enter the room. Pay particular attention to space behind baseboards, under sinks, in cupboards and behind built-in drawers. Repeat as needed for complete control.

FLIES, MOSQUITOES: Spray to heavy dampness on and around doors, around windows, on screens and any surface on which flies or other insects congregate. Repeat often as necessary to maintain maximum killing value.

SPIDERS, CENTIPEDES: Spray infested baseboards, corners, behind pipes, storage or dark areas. Pay particular attention to basements or areas under houses, garages and storage sheds. Repeat often as needed to maintain killing efficiency of treatment.

DIRECTIONS (Con'L)

CRICKETS: Spray baseboards, floors of closets and storage places. Spray thoroughly around doorways and openings of any kind through which crickets might enter. Repeat each 2 to 4 weeks during heavy cricket infestations.

ROACHES, WATERBUGS: Spray around doors, windows, and into any cracks or spaces (such as around drain pipes) through which insects might enter. Pay particular attention to areas behind built-in drawers and cupboards. Repeat as needed to maintain control.

CARPET BEETLES: Spray infested areas of carpets and surrounding floor. Spray dark corners and into cracks where insects might hide. Repeat as needed.

CLOTHES MOTHS: Clothing, blankets and other woolens to be protected should be cleaned and thoroughly sprayed so as to dampen all surfaces. Pay particular attention to seams, cuffs and pockets. Dry thoroughly and place in good tight storage. Treated items should be dry cleaned before being used as clothing or bedding.

FLEAS: Spray infested areas carefully. Direct spray into cracks, crevices and other hiding places in out-houses, yards and kennels, so that all infested areas are dampened. Repeat at monthly intervals. Do not use in human habitations. Do not spray animals. Dry treated areas carefully before allowing pets to re-enter.

SILVERFISH: Spray baseboards, behind drawers or shelving, book cases and storage areas. Repeat as needed to maintain efficient control—usually about each 2 to 3 months.

NOTICE: Recommendations for the use of this product are based upon information believed to be reliable at time of printing. The use of this product being beyond the control of LOS ANGELES CHEMICAL COMPANY, no guarantee, expressed or implied is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe and sound practice. The BUYER must assume all responsibility including injury and/or damage resulting from its misuse as such or in combination with other products.

AGENDA

SUBCOMMITTEE #1 on HEALTH and WELFARE
OVERSIGHT HEARING on PLASTIC PIPE
WEDNESDAY OCTOBER 19, 1983
1:00 - 3:00 P.M.

Background

In July the Governor blue pencilled $200,000 for a study to assess the public impact of the permeation and infiltration of plastic pipe and pipe water mains by toxic chemicals. The study called for a comprehensive and independent literature search on permeation; the development of new test protocols to assess permeation; and risk assessment based on the likelihood and dose of human exposure to chemicals which could enter drinking water supplies.

The study designed by the Assembly was to be carried out by an independent contractor under the supervision of the Assembly Office of Research. It was to be completed by March 1, 1984, and it was funded entirely by the Hazardous Waste Control Account.

The Governor's veto message stated that the item was vetoed because it was more appropriate for the study to be funded by the pipe industry.

Major Issues

This hearing will address five critical issues relating to the plastic pipe issue.

1. How much do we know about the phenomena of permeation? Do existing studies and available information suggest that this is a serious health issue?

2. What type of studies are currently being done by industry? Are they comparable to the study proposed by the Legislature?

3. Is it prudent public policy to rely on the industries which manufacture plastic pipe and have direct financial interest in its use, to perform an important public health study?

4. Is there a legitimate need for an independent study of plastic pipe permeability? How should such a study be funded?

5. Are existing regulations being adequately enforced? Are there immediate steps that should be taken to limit or restrict the use of plastic pipe?

PLASTIC PIPE AND PERMEATION; DOHS OVERSIGHT HEARING
OCTOBER 19, 1983

BACKGROUND PAPER FOR
ASSEMBLY WAYS AND MEANS SUBCOMMITTEE NO. 1
ON HEALTH AND WELFARE

Summary

This briefing document provides background information on the phenomena of plastic pipe permeation and discusses what the state has done to restrict the use of plastic pipe. The document is organized as follows:

I. Overview of the Issue

Permeation refers to the phenomenon by which chemical substances travel through the walls of plastic pipe from surrounding soils and contaminate fluids transported within the pipe. Permeation is of concern whenever drinking water is transported by plastic pipe through soils that are contaminated with hazardous substances. The evidence demonstrates that permeation does occur, although the data necessary to determine the extent and severity of the problem is not conclusive. Uncertainty rests both with the potential frequency of the problem and with the often unknown health effects resulting from chronic (long-term) exposure to low levels of toxic substances.

A. Types of Pipe:

There are three major types of plastic pipe commonly in use for water service. The types of pipe are refered to by their prime constituents: polybutylene (PB), polyethylene (PE) and polyvinylchloride (PVC). Pipe used for water mains is generally from two to twelve inches in diameter. Pipe used to service individual customers is two inches or less in diameter. Evidence indicates that the higher the density of the molecules of the plastics used in the pipe, the lower the permeability of the walls and the lower the rate of permeation.

B. Reports of Permeation:

Permeation has been reported in California and in the Netherlands and EPA data indicates that other states have also experienced permeation problems. Alleged incidents of permeation have been connected to contaminated soils in the vacinity of both the McColl and Stringfellow dumpsites. Permeation could also be a problem if plastic pipe is installed to carry drinking water near any of the hundreds of other identified California sites with known soil contamination.

The experience of one major California water utility demonstrates that the installation of plastic pipe in localized areas subject to soil contamination from the spillage of gasoline can lead to permeation. Other situations of concern include: a) cases in which pipe is installed in new housing developments located on old

agricultural lands that have [illegible]
persistant pesticides; and b) application of common pesticides in a residential setting. In summary, the preconditions for permeation may be a common feature of residential and urban settings.

C. Related Public Health Issues:

Permeation is only one of several public health issues related to the use of plastic pipe. One major concern is the contamination of tap water from the leaching of plasticizing agents which are used in the manufacture of plastic pipe, and of solvents and glues used in connecting pieces of pipe. There are also concerns about toxic fumes that are generated during structural fires. Leaching and plastic fumes are major issues in an EIR being developed by SRI International for the State Department of Housing and Community Development (HCD). By contrast there is no scientific study of permeation being carried out in California.

D. Jurisdictional Issues:

Jurisdiction over the use of plastic pipe in California involves a split at the property line of the individual homeowner. The laying of water mains and the delivery of water up to, and away from the property line is regulated by the Sanitary Engineering Branch of the Department of Health Services (DOHS). The use of plastic pipe inside of the property line and within buildings is regulated by HCD. The failure to properly evaluate the threat of permeation in the five years that DOHS has known of the concern, and the failure to take appropriate preventive action, is partially due to this split in jurisdiction. In larger part, DOHS's failure on permeation is a function of:

- o very poor follow through once regulations are developed;
- o a tendency to downplay the potential severity of public health threats and;
- o understaffing.

E. Economic Interests:

The debate on permeation is often clouded by the large economic interests involved in the issue. Plumbers unions have generally been opposed to the use of plastic pipe on several grounds including:

- occupational health issues involved in using glues that contain synthetic organic compounds to join pieces of pipe and;

- public health issues of fire safety, leaching and permeation.

In addition, plastic pipe is generally less expensive than metal pipe and is more easily installed, particularly by homeowners and other nonprofessional plumbers that can use glue and avoid the soldering necessary with metal pipe. Plumbers have not been vocal in raising potential health concerns with nonplastic pipe. Yet there are also occupational and public health issues related to the use of asbestos in pipe, and the lead and cadmium used to solder metal pipe.

II. What is Known About Permeation?

The following is a summary of incidences of contamination and studies related to permeation. Events are presented chronologically where possible.

A. East Bay MUD:

In the late 1970's the East Bay Municipal Utility District (EBMUD) began to receive complaints about drinking water tasting and smelling of petroleum. After investigating several complaints EBMUD concluded that gasoline and other petroleum distillates must have been present in soils into which plastic water mains and service pipes were installed, and that these chemicals permeated through the walls of the pipe and into the tap water.

EBMUD conducted laboratory studies demonstrating that permeation occurs when PE and PB plastic pipe is allowed to soak in a solution of gasoline diluted with water. Results of an identical test of permeation through PVC pipe were negative. Several of the first incidents of petroleum distillate permeation were linked to: (1) the uncontrolled drainage of materials used to clean motorcycles and the corrosion of asphalt, and (2) the contamination of soil caused by the spillage of gasoline from the tanks of automobiles parked on a steep hill.

A third reported incident of permeation in the EBMUD service area involved the presence of butyl mercaptan in tap water. Mercaptans are added to natural gas to produce an odor for safety reasons. The mercaptans apparantly permeated from a natural gas service pipe made of PE and through a PB water pipe with which the gas pipe was in direct contact. EBMUD conducted a simple laboratory test of permeation using butyl mercaptan and PE pipe. Strong mercaptan odors were detected in several of the samples.

Several aspects of the EBMUD experience deserve note:

- Although one of the reported cases of permeation occurred on the premises of an operating chemical manufacturing plant, EBMUD did no test for substances other than gasoline and butyl mercaptan.

- The EBMUD lab tests demonstrate that permeation occurs. There was no attempt, however, to quantitatively correlate concentrations of specific substances with the rate of permeation for each type of pipe.

- EBMUD conclusions that permeation is not a common phenomenon because of the relatively low number of reported cases may be erroneous. As the utility notes, permeation will not likely be reported unless the taste or odor of the tap water is adversely affected. Thus there may be unreported incidents of permeation that involve substances at concentrations too low to be detected by end users.

- A number of the EBMUD incidents involved contaminated soils on the property of the building involved. There is serious concern that the application of pesticides near a residence, particularly fumigation with lindane and chlordane for termite or ant control, may increase the likelihood of the permeation of service pipe running through soils within the property line. One consultant notes that it is common practice when fumigating for termites to deliberately spray both the soil and any pipes entering the house.

- The EBMUD permeation experiences resulted in the 1979 promulgation of PG&E regulations prohibiting the use of plastic pipe in soils contaminated with petroleum distillates.

B. Lekkerkerk:

Lekkerkerk is a town in the Netherlands that experienced what appears to be the most serious reported incident of permeation. PE pipe was installed in Lekkerkerk in soils that were heavily contaminated with a variety of substances including known carcinogens. Many of the buildings were located on top of an old chemical waste dump. Trichloroethylene (TCE), for instance, was found in concentrations of from 140 to 160 parts per million (ppm). In 1980, 800 inhabitants were evacuated from 270 houses which were then put up on piles while the contaminated soil, totalling 150,000 tons, could be removed.

Dutch scientists subsequently did several studies of

permeation. One was a 1981 study of the permeation of gaseous methyl bromide through PE, PB and PVC pipe. An incident of suspected permeation involved this soil disinfectant which is commonly used in both the Netherlands and the U.S. PVC pipe was found to be the most resistant and of the three was the only one that did not permeate. These results are of concern in California because of the chemical similarity of methyl bromide to ethylene dibromide (EDB). Although EDB is now being banned for use by the EPA, the substance is very persistant and has been used for many years on California soils.

C. Housing and Community Development EIR:

The Department of Housing and Community Development is currently preparing an EIR on the impacts of expanding the legal uses for plastic pipe in residential buildings. Legal use is currently restricted to effluent and prohibits the use of plastic pipe to deliver potable water. Development of the EIR began in 1978 with the formation of a task force chaired by HCD and including representatives of DOHS, Consumer Affairs, Cal-OSHA, the Fire Marshall, the Pipe Trades Council (plumbers), the California Building Trades Council, a plumbers union and several manufacturers of plastic pipe. The study is being conducted by SRI International and funded by the Society of the Plastic Industry.

Although SRI identified permeation as an important public health concern, HCD does not want to include the issue in the EIR because:

- o the concern was brought up too late in the process;
- o too much basic scientific research is required before permeation can validly be evaluated in an EIR and;
- o the issue is outside of HCD's jurisdiction. Despite ongoing efforts of the Pipe Trades Council and a coalition of environmental and consumer organizations, it is not clear that the EIR is the proper forum for a study of permeation. The EIR focusses on the use of pipe in buildings and permeation occurs outside of residences.

D. McColl Dumpsite/Coyote Hills:

In 1981 residents of the Coyote Hills housing development near the McColl dumpsite began to complain of petroleum odors and tastes in their drinking water. Little was done at either the local or the state level to respond to these concerns. Two years later, during the summer of 1983, DOHS finally conducted water sampling and laboratory analyses of Coyote Hills tap water. Although DOHS concluded that permeation probably is not a problem in this Fullerton community, the report has been criticized by local residents and the Pipe Trades Council. Specific objections to the study include:

- o Water was only allowed to accumulate in the plastic service lines for two hours. Such a short period may not adequately reflect actual residential use, tending to understate any permeation.

- o No soil testing was done in the vacinity of the plastic pipe from which water entered the houses.

- o Instead of testing a random number of houses, essential for statistical validity, DOHS allegedly tested the first twelve houses they came across.

- o The Department never took the measurements of water flowrate necessary to assure that the sampled water came from the service pipe, where it was supposed to be static for two hours.

The Department found extremely low levels of one or more of three toxic organic compounds (toluene, styrene and tetrahydrofuran) in the water of three houses. The Department concluded that although the source of the substances is unknown, none of the substances is related to the oilfield wastes that contaminate the soils of the area, and that permeation is not demonstrated to be occuring. McColl residents will vociferously dispute the results of the DOHS study. The Department intends to do further water sampling at the Coyote Hills subdivision. The nature of this testing has not been announced.

E. Stringfellow Dumpsite:

Permeation has also become a concern at the Stringfellow dumpsite. In 1978 the regional water board released part of the liquid contents of one of the Stringfellow ponds during a heavy rainstorm in order to avoid a breaching of the pond walls. The effluent ran down the canyon and across a portion of the playground at the Glen Avon school. Synthetic organic compounds have recently been found in water from the school drinking fountains. It is possible that some of the Stringfellow wastes may have percolated into the school's soils and permeated plastic water service pipe.

F. Department of Consumer Affairs:

The Department of Consumer Affairs has been involved in the issue of permeation in several different contexts:

- In mid-1982 Dr. Marc Lappe, a consultant for Consumer Affairs during the Brown Administration, learned of the Lekkerkerk incident and obtained a copy of the EBMUD studies that had been part of the hearing record for the DOHS regulations. Lappe designed a protocol, working with Consumer Affairs and funding from the state Building Trades Council, to duplicate the EBMUD tests on petroleum distillates and to test a broader range of organic compounds including solvents and pesticides. As with the EBMUD studies, the aim was to qualitatively rather than quantitatively, demonstrate the threat of permeation. The work was conducted by AnLab, a independent laboratory in Sacramento, and the results were relesed by Consumer Affairs in December 1982.

The results included:

- o In testing permeation of pipe with soil saturated by gasoline, AnLab found that benzene (a potent carcinogen) accumulated in pipe at levels of up to 100 ppm in one week. The federal regulatory action level for benzene in drinking water is approximately ten thousand times lower.

- o In testing a range of pesticides, AnLab obtained negative results for chlordane, but positive results for lindane. This result raises serious questions regarding common methods of ant and

termite control that include spraying pesticides on water pipes.

- In the spring of 1983, Gus Koehler, then a research analyst with Consumer Affairs, learned of the experiences of McColl area residents. Koehler researched and wrote a paper entitled, "Plastic Water Pipe in Coyote Hills: A Case Study of Regulatory Failure", that became available in draft form in August 1983. The Koehler study is as an indictment of a state regulatory structure that is intended to protect the public health. The report demonstrates the ineffectiveness of the existing DOHS permeation regulations, due largely to lack of enforcement, and the finger pointing concerning the lack of soil testing prior to the installation of plastic pipe between the developer, the water agency and county health officials. Koehler has since been removed from his post at Consumer Affairs and shuffled to a desk with no phone in a different department.

G. Shell Study:

In July 1983 the Governor vetoed budget item 4260-001-014 which would have allocated $200,000 from DOHS' Hazardous Waste Control Account for an independent study of permeation. Department representatives testified in budget hearings that such a study would be useful.

DOHS is now working with Shell scientific staff at the firm's corporate headquaters in Houston to develop a protocol for a study to be both funded and conducted by Shell. Department spokepersons have indicated that Shell and DOHS are a long way from agreement about the initial protocol submitted by Shell. For example, Shell does not want to test soils contaminated above 1 part per million. In practice, soil is often contaminated at levels far in excess of this.

A number of questions are unanswered:

- o What was the impetus for the veto of the budgeted study and the Shell study? Did Shell offer to do the study or was the firm approached by the Administration?

- o How will the Shell study address the fundemental issue of permeation if it involves only one type of pipe, PB, of which Shell is the major manufacturer? Does the Department have any plans for more exhaustive study of permeation?

- To what degree will DOHS be able to exercise control over a study that is funded by Shell and is conducted in Texas? Will this study just be another example of suspect results from private testing by an affected industry?

The Shell study is already controversial. The Department contends that no actual work has been done by Shell and that only the protocol is now under discussion. The Pipe Trades Council asserts, however, that Shell has already conducted testing and is unhappy with the results. This controversy highlights the dangers of relying on a study such as Shell's as the basis for major public health decisions.

B. New Studies:

The results of several new studies are now becoming available including:

- Recent laboratory studies by a New Jersey utility, the American Water Works Company, strengthens the case on permeation. American Water Works conducted tests using substances present in low concentrations in the gaseous phase, rather than soil saturated with liquids. One major result is that PE, PB and PVC all were permeated by a gaseous solvent in periods ranging from one day to one week.

- AnLab, with funding from the Pipe Trades Council, has replicated its 1982 experiments using tighter controls to avoid any possible entry of substances through the joints between the pieces of pipe, rather than through the walls. The results, to be released at the hearing, include:

  - The degree and rate of permeation appears to be a function of identifiable chemical characteristics of a permeant. Constituents of gasoline, such as benzene, and chlorinated solvents permeate readily while pesticides permeate more slowly.

  - In order of the threat of permeation, PE pipe poses the greatest danger, PB pipe is of intermediate danger, and PVC appears to pose the least threat.

- o California Analytical Labs, also under contract to the Pipe Trades Council, is conducting tests on a carbon water filter from one of the McColl area houses sampled by DOHS. The results, also to be released at the hearing, indicate the presence of over thirty organic chemicals, including a number of benzene-related molecules. Some of the chemicals are known or suspected carcinogens. A number of the chemicals are related to crude petroleum and could probably be linked to the McColl wastes.

I. Miscellaneous Notes:

Ray Leonardini's group, the Pipe Trades Council and a coalition of organizations including Friends of the Earth, Citizens for a Better Environment and the Consumer Federation of California, is suing the International Association of Plumbing and Mechanical Officials (IAPMO). IAPMO is developing rules governing the installation and use of plastic pipe. Although the rules do not have the weight of law, it is common for IAPMO rules to be incorporated into state building codes. The suit is now in the discovery phase and is expected to go to trial in Los Angeles in December.

IAPMO contends that sufficient data exists to certify plastic pipes as safe. The plaintiffs assert that there is insufficient data and that the development of the rules is premature.

III. Does California Need an Independent Study of Permeation? What are the Issues?

There are significant drawbacks to relying on an industry organization to both fund and conduct a study of permeation. The Shell study will examine only PB pipe, of which the company is the major manufacturer. In addition, representatives of DOHS indicate that Shell and the Department are far from agreement on the protocol initially submitted by the firm. The State has little if any leverage over research funded and conducted by a private firm. Is the public good served by a prolonged study that addresses only part of the issue? The results of the Shell study will be inconclusive for all parties except Shell.

IV. Are Existing Regulations Being Adequately Enforced? Are there Immediate Steps that Should be Taken to Restrict the Use of Plastic Pipe?

A. Existing Regulations:

In 1979 the Sanitary Engineering Branch promulgated two new regulations relating to the permeation of plastic pipe. These regulations were the direct result of studies by East Bay MUD, and were added to Title 22, Article 5, Water Mains and Appurtances.

- Section 64624 (f) states that:

  "Plastic pipe shall not be used in areas subject to contamination by petroleum distillates."

- Section 64630 (g) states that:

  "Installation of water mains near the following sources of potential contamination shall be subject to written approval by the Department on a case-by-case basis:

  (1) Storage ponds or land disposal sites for waste water or industrial process water containing toxic materials or pathogenic organisms.

  (2) Solid waste disposal sites.

  (3) Facilities such as storage tanks and pipelines where malfunction of the facility would subject the water in the main to toxic or pathogenic contamination."

B. The Need for Emergency Regulations:

The scope of existing regulations appears to be inadequate to protect public health from toxic contaminants. Existing regulations apply only to petroleum distillates and exclude many solvents, pesticides and other toxic substances that can permeate plastic pipe.

Section 64624 should be expanded beyond petroleum

distillates to include all hazardous substances, including wastes. In addition the regulations could require:

- o certification that soil has been tested prior to installation of plastic pipe
- o that end users of water receive notice from the entity installing the pipe that plastic pipe has been used and that in the event of contamination of adjacent soils delivered water could become contaminated through permeation.

C. The Need for an Information Program:

The Department has no procedures to inform affected parties of the permeation regulations. A Department survey of water utilities found very poor knowledge of the regulations. It is unlikely that housing developers have any knowledge of the regulations. In the case of the alleged permeation in the vacinity of McColl, there were three forms of regulatory failure.

- o The contractor was unaware of Section 64624 which prohibits the use of plastic pipe in areas subject to soil contamination.
- o The water purveyor relied on the contactor to inform him of any soil contamination.
- o Despite the proximity of the McColl dumpsite the water purveyor did not request the Department's permission to install plastic pipe, in violation of Section 64630.

DOHS should develop procedures to:

- o Inform water utilities and contractors of their responsibilities under the permeation regulations.
- o Utilize data from a variety of sources within the Department, and from the regional water boards and the State Waste Management Board, to aid local governments in locating sites of known or potential contamination. This data base should include information on abandoned sites, underground storage facilities, solid and industrial waste disposal facilities and liquid waste surface impoundments.

Fiscal Note
Analysis
HB 509

March 28, 1984

This bill amends Alaska's Code of Civil Procedure by exempting aviation fuel refiners from liability in a civil action for injuries resulting from the use of contaminated or impure fuel unless the fuel refiner intentionally, recklessly, or through gross negligence, causes or contributes to an injury. This exemption from liability would also not apply when an aviation fuel refiner transfers aviation fuel directly into the fuel tanks of an aircraft. This bill also amends Title 45, Trade and Commerce, to provide that an aviation fuel refiner may not refuse to sell aviation fuel solely because the purchaser provides drums of 50 gallons or more into which the aviation fuel is to be delivered.

Enactment of this bill will probably not have any direct fiscal impact on the Department of Law because it deals with private sector liability matters rather than the legal operations of state government. State funds could be significantly impacted, however, in a more indirect manner.

If, for instance, a major aircraft disaster occurred at a state operated airport, the state could be one of several parties with potential liability. When another party is shielded from liability, as is provided for in this bill, that portion of the liability that is shielded is not extinguished but, rather, it is transferred to the remaining liable parties. In this event, the total potential liability would be shouldered by the remaining parties, including the state, but excluding the aviation fuel refiner, even though contaminated or impure fuel might be a contributing cause. Because there are so many uncertainties involved in assessing potential liability, the cost of such an eventuality cannot be estimated. Consequently, no fiscal impact has been shown in this analysis.

RE: Product Liability Laws for Aviation Gasoline
Research Request 83-249

Merrill Sikorski of your office requested information regarding product liability for aviation gasoline in other states. He expressed a special interest in legislation that would limit the liability of suppliers and distributers of aviation gasoline.

I contacted Chevron USA, the Office of Air Worthiness Standards of the Federal Aviation Administration (FAA), the Aircraft Owners and Pilots Lobbying Association, and the aeronautics and consumer protection agencies in Alaska and five other states. It appears that no states have laws which limit product liability for aviation gasoline. However, several of the agencies I contacted mentioned other issues regarding the quality control of aviation fuel which may be of interest to you.

According to Thomas Horess, manager of the Propulsion Branch of the FAA's Office of Air Worthiness Standards, the FAA has seen no need to federally regulate aviation gasoline in the past. However, since August of 1982, the FAA has authorized the use of high octane automobile fuel in 12 or more models of general aviation engines and airplanes. As a result, concern has increased in several states over liability for auto fuel used in aviation. Automobile fuel normally is not subject to the strict quality controls that assure the purity of aviation gasoline. The FAA stipulates that automobile gas used in aircraft be handled according to the American Society of Testing and Materials (ASTM) standards for aviation gasoline. However, Mr. Horess said that the gasoline industry has difficulty controlling product quality at the gas station distribution level, a problem that has raised concern about product liability for the fuel suppliers.

Pat Chapman, a researcher for the Aircraft Owners and Pilots Lobbying Association, also mentioned the issue of product liability for automobile fuel used in aviation. Mr. Chapman noted that the fuel manufacturers are increasingly concerned over major settlements and awards in product liability lawsuits, but he could find no legislation addressing the issue in other states.

Jim Day of Chevron's public affairs office in Anchorage reported that he was not aware of any efforts to legislate limits to liability for aviation fuel. However, Mr. Day mentioned that Chevron had refused to supply some remote fueling sites in Alaska in instances where facilities were inadequate to assure against fuel contamination. According to Mr. Day, general aviation in Alaska involves unique fuel liability situations which are not likely to have arisen in other states.

Mr. Sikorski indicated that he thought Ohio might have a law limiting the product liability of aviation fuel, but I could find no such law in the Ohio Revised Code or through talking with numerous Ohio state agencies. I contacted aeronautics and consumer protection agencies in four other states with similar negative results.

While no states have limited the liability for fuel products, approximately 15 states have adopted ASTM quality standards for the production and handling of petroleum products, and a few states have developed fuel inspection programs.[1] Otherwise, states have little involvement in regulating fuel quality.

I am still trying to contact the Product Liability Defense Bar, an association of attorneys based in Washington D.C. If they can provide any further information on this issue, I will certainly pass it on to you. However, it appears that no states have passed legislation to limit product liability for aviation gasoline.

If we can assist you further on this or other issues, please feel free to contact us.

NP

MEMORANDUM

RE: HB 509 - Aviation Fuel Liability

The importance of aviation, both commercial and general, to Alaskan communication and commerce cannot be overstated. It is common knowledge that more air miles per resident are flown in Alaska than in any other state; indeed, aviation is the only mechanism by which modern commerce and communication can be undertaken to the vast majority of Alaskan locations.

1. Marketing Aviation Fuels in Alaska.

In order to fuel the ever growing aviation traffic in Alaska, it has become necessary to develop an enormous marketing system to distribute the relatively few gallons of aviation fuel to many geographically diverse locations across the state. However, because of the increasing exposure to liability from the sale of aviation products, many companies have removed themselves from the Alaskan market. Due to the relatively low volume, and geographically diverse, aviation fuel market in Alaska, the increased exposure to liability has resulted in a declining incentive to market aviation fuel in the state.

This is particularly true with aviation gasolines, as opposed to jet fuels. For the most part, jet fuels are used in commercial aviation where the volume sales are high, and the geographical distribution is not as great. Aviation gasoline constitutes a relatively minor portion of the total market for aviation fuels. On the other hand, because of its low volume, the relative multitude of individual sales, and the geographical diversity of the ultimate customers, aviation gasolines account for the greatest exposure to liability in the aviation fuel market.

For example, in 1981, Chevron U.S.A. Inc., the largest marketer of aviation fuels in the state of Alaska, sold a total of 375 million gallons of aviation fuel in the state. Of that total, jet fuel sales accounted for 360 million gallons. Only 15 million gallons of aviation gasoline were sold. As stated before, although aviation gasolines account for only 4% of Chevron's annual aviation fuel sales, these sales provide by far the greatest exposure to liability.

2. Aviation Fuel Refiners - Unprecedented Exposure to Liability.

Aviation fuel refiners are at an unfair disadvantage with respect to the sale of their products as opposed to the sale of other products by other companies. The exposure to liability is much greater than with almost any other product because of the serious consequences of any aviation accident.

The court's development of the strict liability theory for defective products has created a legal situation wherein the refiner is virtually guilty until he proves himself innocent.

Because most refiners are large companies, the Deep Pocket Theory invites plaintiffs' attorneys to join them in actions even were liability is unlikely. Refiners may at times find it more economical to settle a case than spend thousands in defense, even when they believe there is no liability.

Even where the refiner is successful in defending such cases, the court's award of costs and attorneys' fees rarely represents even one-half of the actual expenditures. This, of course, does not even consider the in-house costs of the refiner in investigative and administrative endeavors related to the litigation. In addition, where the court makes a cost award for attorneys' fees and costs incurred in defending such an action, collection of the award is never guaranteed and often is not possible.

Examples of the effect of this increased exposure to liability are not difficult to find in Alaska. In 1980, Texaco quietly withdrew from the aviation fuel market because of the potential liability it faced. This removal prompted a letter from Governor Hammond to Chevron U.S.A. Inc., asking that Chevron do everything possible to remain in the aviation fuel market, and inquiring as to whether there might be any assistance the State of Alaska could render in that regard.

Union Oil Company withdrew from the aviation fuel market in Southeast Alaska sometime ago for the same reason. Others may do the same thing in Southcentral Alaska as a result of the Spernak Airways incident.

In that case, a plane carrying four people crashed on take-off at Merrill Field in Anchorage. It was determined that the cause of the crash was water in the gas lines of the airplane. According to the investigator for the National Transportation Safety Board (NTSB), the source of the water which contaminated the plane's fuel lines was the storage tanks kept by Spernak Airways at Merrill Field. Spernak Airways maintained a $500,000 general liability policy, and has settled the case for the policy limits. However, in spite of the NTSB's findings that the source of the water was the Spernak storage tanks, Union Oil was sued for damages in the amount of $5,000.000.

3. The Use of Barrels in the Distribution of Aviation Fuels.

In an attempt to reduce its exposure to liability, Chevron has declined to place aviation fuel in used barrels for distribution to the popular aviation market. Chevron continues to market aviation fuels in new barrels only in Alaska, and only as an accommodation to the unique reliance this state has on general aviation in remote areas where the most practical means of supply is by barrel. In all other states, Chevron will not sell aviation fuel in a barrel.

In this regard, it should be noted that there is no such thing as a "sealed barrel." All barrels, whether new or used, are susceptible to moisture contamination particularly when they are stored outside in the widely fluctuating temperatures encountered in Alaska. During such fluctuations, when moisture is present on top of the barrel near the bung hole, moisture can be pulled right through the threads on the bung with the expansion and contraction of the barrel. There in thus no guarantee that uncontaminated, clean, dry fuel purchased in a new barrel will remain so when it is stored improperly.

Typical supply routes of aviation fuel in rural Alaska include the following:

A) Direct purchase by the consumer from a Chevron-owned bulk plant - such as the bulk plants located at Kotzebue, Nome and Bethel.

B) Purchase by a Chevron aviation fuel dealer from a Chevron-owned bulk plant and sale by the Chevron aviation fuel dealer to the consumer.

C) Purchase by anyone acting as a "middleman" from a Chevron-owned bulk plant or a Chevron aviation fuel dealer and sale by the middleman to the consumer or to another middleman - such an ultimate sale by the middleman would be of unbranded product.

Chevron has learned that some of its dealers and some "middlemen" who buy aviation fuel from Chevron have (while not be under any obligation to do so) adopted Chevron's policy of declining to deliver aviation fuel in used drums supplied by the customer.

A recent example may help to illustrate the complex supply routes and the impact on rural residents.

Representative Hurlbert lives in Sleetmute which is about 200 miles up the Kuskokwim River from Bethel. The source of petroleum products including aviation gasoline, for this river system is Chevron's bulk plant in Bethel. Avgas can be purchased from Chevron FOB Bethel in new drums or 5 gallon pails or in bulk quantities delivered to a customer's barge or tank truck. There are two barge companies currently serving the river communities.

Sometime last fall Representative Hurlbert apparently had hauled a number of used drums down the river expecting to have the barge operator fill them directly from storage tanks or the barge. The barge operator was not a Chevron aviation fuel dealer but had purchased aviation gas in bulk from Chevron at Bethel. The barge operator, as an independent businessman, apparently adopted Chevron's policy regarding used drums and refused to fill them. Representative Hurlbert had to wait until bulk product was pumped ashore into another customers' tank then move his barrels to that location for filling.

4. Alternate Marketing Options

It should also be noted that Chevron has implemented a new program in the lower 48 states concerning the sale and distribution of aviation fuels. This program could prove deleterious to the flow of Alaska commerce if implemented in this state.

In the lower 48 states, Chevron will deliver aviation fuel only in 10,000-gallon deliveries and only to its own airport dealers that meet its quality specifications. All other wholesale purchasers must take delivery of such fuels in minimum 10,000-gallon allotments at a Chevron bulk plant when Chevron has certified that the carrying vehicle is appropriate for the transport of aviation fuels.

5. House Bill No. 509

House Bill 509 as originally introduced protects only aviation fuel refiners from unreasonable assertions of liability. As indicated above, numerous and probably the majority of sales of aviation fuel in Alaska are made by independent businesses that are not owned or controlled by Chevron. Perhaps consideration should be given to:

a) expending the protection of the bill to include within its protection all sellers of aviation fuel to the ultimate consumers, and

b) restricting the bill's applicability to sales of less than a given amount, such as 10,000 gallons.

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 9, 1981

Mr. James Howard
Chevron International
P.O. Box 1580
Anchorage, AK 99510

Dear Mr. Howard:

As you know, due to a revised product procurement policy and its attendant transportation changes, one supplier of aviation gasoline has significantly cut back its sales of this product in Alaska. I have been made aware that this action has caused problems for some aircraft operators in various parts of the state. As you also know, avgas plays a large, more vital role in the life and commerce of Alaska than in any of the smaller states, or perhaps the world. Therefore, supply disruption here has an impact on more people than just the directly concerned parties.

I am aware that you have already provided assistance to some aircraft operators experiencing supply problems. Your efforts to date are appreciated. I can only ask that you continue to do whatever else you can to assist those other operators who are still without an avgas supplier.

Please contact the Division of Energy and Power Development if you have questions or if the State of Alaska can assist you in this matter.

Sincerely,

Jay S. Hammond
Governor

ater and rust con- he fuel system of at Merrill Field has ie fiery crash that in October 1979. ort on the accident, ansportation Safety contaminated fuel underground fuel It also said the air- was contaminated

ernak Airways and gers were killed in Cessna 207 which angar shortly after ed a blaze which [illegible]

[illegible] the [illegible] jon [illegible] ed that [illegible] fuel system [illegible] er [illegible] underground fu [illegible] fuel tank [illegible] fuel system [illegible]

he crash said the o the north, then turn and lost alti- smashed into the of a hangar near ie, exploded and to he hangar. sh were pilot Wil- nchorage and pas- Standifer Sr.; his ou, and her daugh- f Tyonek.

[illegible] Spernak [illegible] of [illegible]

pending, but ttorney for Stan- [illegible] settlement [illegible] has Spernak. He de- clined to specify the terms.

Bud's Aircraft is no longer a part of the suit, and Cessna Aircraft has been added as a defendant. Came[illegible]pt said the partial settlement with Spernak "doesn't mean we've waived any rights with Cessna or Union [illegible]."

The suit alleges that an employee of Union Oil failed to [illegible] a chemic[al] necessary to detect the presence of water in [illegible] tank at Spernak Airways pr[illegible] the tank on Oct. 6, 1979.

Cessna Aircraft, the suit says, was "grossly negligent," and showed "wanton disregard for proper design, manufacture, warning and instruction for use" of the fuel system on the model 207 aircraft.

The suit also says the plane crashed as "a direct and proximate result" of Cessna's "defective design, manufacture, warning and instructions for use" of the craft's fuel and related systems.

Damages [illegible] bil- lion" are being sought, according to the suit.

Geor[ge] [S]pernak, owner of Spernak Air[way]s, said he hadn't seen the transportation board's report and declined comment on it. When a portion of report was read to him Monday, Spernak said, "We've been here since 1955 and we haven't heard those reports."

Spernak Airways has two underground fuel tanks which are supplied by Union Oil, Spernak said, adding "they are checked for water by Union Oil each time and we watch their procedures."

Spernak said the same fuel tanks

(See FUEL, page A-3)

Fuel . . .

(Continued from page A-1)

are being used now that were used at the time of the crash.

Each air taxi operator is responsible for maintaining its storage tanks. No local, state or federal regulations currently are in effect to govern fuel storage or tank maintenance.

Merrill Field Manager Joe Fouts said the municipality, which operates the field, leases land to the various air taxi services for their operations. He said about 20 leaseholders have their own underground fuel tanks.

Joe Swanson, head of the state's division of weights and measures, said a bill had been pending in the Legislature to give his agency jurisdiction over fuel tank maintenance.

"But the bill didn't go anywhere," Swanson said.

The federal board said it recognized the pilot is responsible for making sure that an airplane has uncontaminated fuel.

Pilots normally check for water or particles during preflight inspection, the report said, and contamination can be detected because water or particles settle to the bottom of the tank.

"However, when fuel contaminated by water is added to an uncontam[in]ated tank, considerable time is needed for the water to completely settle to the bottom of the tank," the report said. "This creates the opportunity for contaminated fuel to go undetected."

The report goes on to list several other instances which may prevent immediate detection of contaminated fuel and concludes, th[at] while the pilot, "although respons[i]ble, is presented with situations [in] which water detection is difficult."

The board recommended that th[e] Federal Aviation Administratio[n] adopt three specific regulatio[ns] which would:

[illegible] specifica- tions [illegible] design requirements fo[r] the installation, maintenance and in- spection of aviation fuel storage an[d] dispensing systems [illegible] cer- tificated under FAA regulations.

[illegible] minimum specifica- tions and design requirements fo[r] aviation fuel storage and dispensin[g] systems at public use airports and ce[rtificated under] FAA regulations.

[illegible] pro- cedures [illegible] compliance.

running out of gas

by Patti Epler
Times Writer

Two Merrill Field businessmen say they will either have to close their doors or raise their prices because Texaco Inc. as decided to cut back its sale of aviation gas in Alaska.

Gene Bender of Piper Sales Alaska and Ken Triplett of Alyeska Air Service say they have nowhere to turn for wholesale gas. The men said neither of the two other suppliers of aviation gas in Alaska, Chevron USA Inc. and Union Oil Co. of California, are accepting new customers.

The other companies are not taking new customers until they see what happens to two bills before the state Legislature that would limit the liability of oil companies in the sale of gas.

Bender and Triplett are the only two cut off by Texaco in Anchorage. The third and largest Texaco retailer, Air Associates at Anchorage International Airport, will still have fuel, a Texaco spokesman said.

The spokesman said Texaco has not done much business in Alaska in the past and has decided to cut back on the aviation gas business here because it's just not worth their trouble.

Piper Sales, Alyeska Air Service and Air Associates are the only Texaco retailers in Anchorage.

In three weeks, said Bender, "I'll have to close my doors. It's either that or get some awful powerful rubber bands and some big apes to wind them up."

Bender said his business consists of aircraft sales and service, rental of planes and student instruction.

Additionally, he said, more than

(See AIRCRAFT, page A-3)

(Continued from page A-1)

600 pilots per month gas at his pumps.

Now, he says, he's not selling any fuel to anybody. What he has left in his storage tanks he must keep for his own aircraft.

Triplett, who runs a charter business, said he also has cut off his 15 regular customers in order to protect his own supply.

He will be forced to buy gas from competitors at the going, public rate. That, he said, will force him to raise his charter prices between $5 and $10 per hour, a factor he believes will unfairly price him out of the market.

"It's an unfair advantage," he said. "I've got too much invested here to go out of business. I'll just have to make ends meet."

Triplett said Chevron and Union are not taking new customers because they don't want to add to their liabilities. He is hoping the two bills limiting oil companies' liability will pass this year.

The problem now, he said, is that state law makes the oil companies responsible for their fuel even after they have sold it to someone else.

The bills would stop the liability of the oil companies once they have sold their gas to a retailer and the retailer puts it in his own tanks, Triplett said.

"But," he said, "even if those are passed, there's no guarantee they'll take Alyeska Air Service as a customer."

NATIONAL TRANSPORTATION SAFETY BOARD
WASHINGTON, D.C.

ISSUED: February 6, 1981

Forwarded to:

Mr. Charles E. Weitboner
Acting Administrator
Federal Aviation Administration
Washington, D.C. 20591

SAFETY RECOMMENDATION(S)

A-81-9 through -11

On October 8, 1979, a Cessna 207A, N6424H, crashed into a hangar at Merrill Field, Anchorage, Alaska, moments after lift-off from runway 33. All four occupants were killed, and the postcrash fire destroyed the hangar.

Investigation of the accident revealed that: the fuel system showed evidence of extensive water and rust contamination; the underground fuel tank at Merrill Field where the aircraft was last fueled contained a large quantity of water and rust; the underground fuel tank's filtration system was heavily contaminated; and an incorrect fuel system dispensing filter, intended for use with diesel fuel, had been installed.

In 1978, the National Transportation Safety Board investigated 17 general aviation accidents involving fuel contamination "exclusive" of water as a cause or factor, and 66 general aviation accidents involving water "in" the fuel as a cause or factor. In March 1980, the Safety Board's Anchorage field office mailed a questionnaire to all known commercial/air taxi operators in the State of Alaska. Of the operators who replied, 4 percent did not know what type of filtration assemblies and filters they used, 4 percent performed no inspections to determine when the dispensing filters should be changed, 30 percent inspected the dispensing filter daily, and 20 percent inspected the dispensing filter "at least yearly." The remaining operators inspected at intervals ranging from "once every 3 days" to "once every 3 years."

The Safety Board recognizes that the pilot is responsible for assuring that a general aviation aircraft has uncontaminated fuel. Pilots of general aviation aircraft procedurally drain a small amount of fuel from the tanks and the fuel strainer and check for the presence of water and particulate matter. If a partially filled tank cools, condensation results and settles to the bottom of the tank. This is detectable using normal preflight procedures.

However, when fuel contaminated by water is added to an uncontaminated tank, considerable time is needed for the water to completely settle to the bottom of the tank. This creates the opportunity for contaminated fuel to go undetected. Also, the uncontaminated fuel in the lines and fittings must first be drained to detect the water-contaminated fuel. On some aircraft, more than a quart of fuel must be drained before any water appears. Most tiedown areas where preflights checks are performed belong to flight schools or fixed-base operators, most of whom do not encourage pilots to drain a quart of fuel on the asphalt because aircraft fuel tends to dissolve this particular surface. The pilot then, although responsible, is presented with situations in which water detection is difficult.

While the Board believes that pilots must conduct an adequate preflight check, we are concerned that this is not a total solution to the problem of fuel contamination. In addition to the current pilot responsibility, the Board believes that other measures should be taken to insure against contamination. For example, fuel dispensing systems could be required to be equipped with filter/separator units which respond to the presence of free water by shutting down.

The Board is aware that 14 CFR 139 prescribes rules governing the certification of land airports serving air carriers that hold certificates of public convenience and necessity issued by the Civil Aeronautics Board. Part 139.51 states that ". . . the applicant for an airport certificate must show that it (or its tenant), as the fueling agent, has a sufficient number of trained personnel and procedures for safely storing, dispensing, and otherwise handling fuel, lubricants, and oxygen on the airport (other than articles and materials that are, or are intended to be, aircraft cargo). . . ." This is the only rule that addresses the subject of storing and dispensing aviation fuel, and in addition, applies solely to air carrier airports. In the Board's opinion, 14 CFR 139 is inadequate even for those airports it covers because it does not address fuel contamination. Our accident statistics do not indicate that fuel contamination has been a problem to air carrier aircraft. However, informal communication with the FAA indicates that control of contamination is considered during airport certification via a rather broad interpretation of 14 CFR 139.51. The Board believes that the problem of fuel contamination should be specifically addressed for both air carrier and general aviation airports. In our judgment, fuel contamination should be specifically addressed for all segments of aviation rather than only that segment in which there is an apparent current problem. It has been generally accepted that standards for air carrier operations must be as stringent as they are for general aviation. We believe that the regulations should reflect this consistency.

Therefore, the National Transportation Safety Board recommends that the Federal Aviation Administration:

> Expand 14 CFR 139 to include minimum specifications and design criteria for the installation, maintenance, and inspection of aviation fuel storage and dispensing systems at airports certificated under 14 CFR 139. (Class II, Priority Action) (A-81-9)
>
> Take necessary action to establish minimum specifications and design criteria for aviation fuel storage and dispensing systems at public-use airports not certified under 14 CFR 139. In addition to the equipment itself, such criteria should address their installation, operation, maintenance, and inspection. (Class II, Priority Action) (A-81-10)

When specifications and criteria are established for aviation fuel storage and dispensing systems at public-use airports are not certified under 14 CFR 139, establish and implement procedures to verify compliance. (Class II, Priority Action) (A-81-11)

KING, Chairman, DRIVER, Vice Chairman, McADAMS, GOLDMAN and BURSLEY, Members, concurred in these recommendations.

By: James B. King
Chairman

TESTIMONY OF GEORGE DAY
OF CHEVRON U.S.A. INC. BEFORE
THE OUSE LABOR AND COMMERCE COMMITTEE
CONCERNING HOUSE BILL 509
FEBRUARY 2, 1984

Good Morning. My name is George Day, I am the Public Affairs Manager for Chevron U.S.A. Inc. in Anchorage. Chevron markets a complete line of petroleum products throughout Alaska and is the largest marketer of aviation fuels in the state. In 1983, Chevron sold a total of 160 million gallons of aviation fuel in Alaska. Jet fuel sales accounted for 147 million gallons, and only 13 million gallons of aviation gas were sold. For this reason, Chevron is vitally interested in the passage of HB 509.

Chevron has developed an extensive distribution system for supplying aviation fuels throughout the State of Alaska. Chevron recognizes that its primary responsibility is to deliver uncontaminated fuel to the next person in the distribution chain. Quality control is an ongoing process that requires constant supervision and the expenditure of much time and money. Nevertheless, inspection of the fuels for contaminants and for water is relatively easy. In order to demonstrate this, we have brought samples of jet fuel, Avgas 80, and Avgas 100.

[Demonstrate inspection process]

A description of our distribution process to the urban areas and to the bush areas of Alaska should help the committee members of understanding the liability problems faced by an aviation fuel refiner.

[Describe Anchorage process]

[Describe Bethel process]

The development of the theory of strict liability in products liability cases has greatly expanded the liability exposure of an aviation fuel refiner to fuel liability. As you may know, the plaintiff in a strict liability lawsuit need only demonstrate that he was sold a "defective product" by the defendant which caused damage to the plaintiff. The plaintiff is not required to demonstrate that the defendant's conduct in manufacturing or maintaining the product was negligent.

The essential distinction between aviation fuel and other products for which strict liability is imposed is that most other products such as automobiles or furniture or even airplanes are static in their quality once they have been manufactured. Generally speaking, barring unforeseen events, other products remain in the same form as they were immediately after their manufacture. However, the quality of aviation fuel is always subject to incremental change depending on the quality of the handling thereof.

At each stage of the distribution process, contamination is a distinct possibility that must carefully be guarded against. Fuel that is clean and dry going into a storage tank can come out wet, dirty, and/or contaminated depending on the quality of the storage and the method of handling. Once a

refiner has placed aviation fuel in the storage tanks of another person not under the refiner's control, we believe that it is unfair to hold the refiner liable for the continued quality and integrity of that fuel.

Nevertheless, because most refiners are large companies, plaintiffs' attorneys tend to join them in actions even where liability may be unlikely. Refiners may at times find it more economical to settle the case than spend thousands in defense, even when they believe there is no liability. In response to this increased exposure to liability, companies have quietly withdrawn from the aviation fuel market in Alaska. Texaco did so in 1980, and Union Oil Company has pulled out of the aviation fuel market in Southeast Alaska.

Barrels pose a particular dilemma for the refiner. Chevron continues to market aviation fuels in new barrels only in Alaska, and only as an accommodation to the unique reliance the state has on general aviation in remote areas where the most practical means of supply is by barrel. In all other states, Chevron does not sell aviation fuel in a barrel.

It is important to realize that there is no such thing as a "sealed barrel." All barrels, whether new or used, are susceptible to moisture contamination particularly when they are stored outside in the widely fluctuating temperatures encountered in Alaska. During such fluctuations, when moisture is present on

the top of the barrel near the bunghole, moisture can be pulled right through the threads on the bung with the expansion and contraction of the barrel. There is thus no guarantee that uncontaminated, clean, dry fuel purchased in a new barrel will remain so when it is stored improperly.

Obviously, used barrels pose additional problems beyond subsequent contamination. No dealer has the facilities to complete an accurate inspection of barrels prior to refilling them. For these reasons, Chevron declines to refill used barrels with aviation fuel.

These problems combine to create strong incentive to discontinue the present marketing system in the state. For example, in the lower 48 states, Chevron will deliver aviation fuel only in 10,000-gallon deliveries and only to its own airport dealers who meet its quality specifications. All other wholesale purchasers must take delivery of such fuels in minimum 10,000-gallon allotments at a Chevron bulk plant after Chevron has certified that the carrying vehicles are appropriate for the transport of aviation fuels.

It is imperative that the State of Alaska take immediate steps to provide a fair economic climate that would allow the continued distribution of aviation fuels to all areas of the state.

The sole purpose of HB 509 is to create a fair and reasonable business climate for aviation fuel refiners by removing unreasonable exposure to liability. This will go a long way toward assuring adequate supplies to remote geographical locations and to individual customers.

The means selected to achieve this objective are carefully tailored to meet the needs that have been stated. Under HB 509, refiners are still subject to liability when they place fuel directly into aircraft. This is as it should be, since the refiners have total control of the quality of the product up to final delivery.

Except for gross negligence, recklessness or intentional conduct, the refiner is not liable where the fuel is delivered other than directly into an aircraft. The important point to note here is that once title and possession have passed from a refiner, the refiner no longer has control over the integrity of the fuel and should not be held liable therefor.

Aviation fuel refiners will not dismantle quality control programs merely because of the passage of this legislation. It should be again emphasized that refiners are still fully exposed to liability where they fuel airplanes directly. Thus, the dismantling of the quality control program which results in the delivery of contaminated fuel into an aircraft by a refiner would still fully expose the refiner to liability.

Furthermore, even where the deliveries are not made directly into an aircraft, quality control programs will remain. The dismantling of a quality control program, and the use thereafter of little or no care in the manufacture of aviation fuel, may be held to be "gross negligence" under the bill. Thus, the refiners' liability would be maintained in such situations.

HB 509 re-establishes the balance that has often been lost in the development of products liability law. Each entity in the distribution chain must take responsibility for its actions in handling aviation fuel, and must be held responsible for failure to do so properly. Aviation fuel refiners must continue to ensure quality control during the manufacture and distribution of the product. Wholesalers and retailers must also take adequate steps to ensure the continued integrity of the product during their part of the distribution chain. Finally, airlines and private pilots must continue to handle fuel in a safe manner and test for quality before and after each transfer. Only by following such procedures for each fuel transfer can the integrity of the aviation fuel be assured. It is for precisely these reasons that Chevron urges the adoption of HB 509.

HB

535

BACKGROUND

HB 535

House Bill 535 is a single purpose piece of legislation designed to allowed retired state employees to continue their group life insurance after age 65. They would be required to pay the premiums on this coverage.

HB 535 arose from complaints from a constituent in House District 17 who is a retired state employee. At the time of her retirement, the group life insurance policy with the state was her only life coverage. By the time she was informed that she was no longer covered, her age made it impossible to purchase life insurance on the open market at a reasonable rate.

Cost of funerals in small, interior communities is very high. This is primarily due to the fact that graves cannot be dug in the winter, and bodies must therefore either be cremated or held in cold storage until after break-up.

MEMORANDUM January 30, 1984

SUBJECT: Sectional analysis of HB 535

TO: Representative John Cowdery
Chairman, House Labor and Commerce Committee

FROM: Edward H. Hein EHH
Legislative Counsel

Under AS 39.30.090 state employees and others who participate in state-provided group life insurance are entitled to continue the insurance after terminating employment if they pay the cost of the insurance themselves. Only the coverage the person had at the time of leaving employment may be purchased. The conversion privilege is limited to persons under 65 years of age. HB 535 deletes the age requirement at page 2, line 23. All other changes reflected in the bill are technical.

MEMORANDUM

TO: Representative John Cowdery, Chairman
House Labor and Commerce Committee

FROM: Cherie Shelley
Executive Director

SUBJECT: HB 535

DATE: February 7, 1984

The Alaska Public Employees Association fully supports the provisions of HB 535 allowing all former public employees to continue to purchase group life insurance regardless of age.

This legislation will remove discriminatory language from state statute and make insurance coverage available at a time when people need it the most.

Cost to the state will be minimal since the premium will be paid by the former employees.

House Bill 535
Fiscal Note Analysis
Prepared by the Division of Retirement & Benefits
Department of Administration

February 3, 1984

IV Analysis: This bill would allow retirees age 65 and older to continue to purchase optional group life insurance. Currently, retirees are ineligible to purchase this insurance after age 65.

There is no cost to the State. Premiums for this insurance would be paid by the retiree.

Position Paper

HB 535

The Department of Administration supports this bill. It offers retirees the choice of continuing to purchase optional group life insurance coverage beyond the current limit of age 65. This flexibility can be achieved with no cost to the state. Favorable premium rates would benefit the retiree.

Bill No. House Bill No. 540

Date February 13,1984

Title "An Act relating to claims against a contractor's payment bond"

Contact: Eileen Plate, 465-2700
Bob Bacolas, 465-4870

The bonding requirements of AS 36.25 are designed to provide persons performing labor or furnishing material on a public construction project with remedies comparable to those that are available to persons performing work or furnishing material on a private sector construction project. With respect to private construction, the following points are relevant:

1. A person who performs work or supplies materials on a private project may lien the property for recovery of monies owed for wages or materials;

2. A lien on the property may be filed for up to 90 days after the last date on which the person performed labor or furnished materials; and

3. The property is lienable by workers and suppliers of the general contractor or any subcontractor.

Public property, on the other hand, cannot be liened, and the bonding requirements of AS 36.25 evolved as an equitable alternative, with the only difference being the vehicle used for recovery -- on public construction, the contractor's bond; on private construction, lienable real property.

The amendments to AS 36.25.020(b), as set out in House Bill No. 540, propose to disrupt the equity presently provided by discriminating against the person who performs labor or furnishes material to a subcontractor on a public construction project. In fact, the proposed provision that these workers or suppliers must initiate their claims against the contractor's bond within ten days from the first date labor was performed or materials were furnished effectively denies them use of the system specifically designed to assist them. Few workers or suppliers would fear that money owed them was in jeopardy after only ten days. Further, the requirements of AS 36.25.010(a)(2) clearly contemplate that the general contractor is responsible for the protection of all persons who supply labor and material in connection with the construction contract. Therefore, the proposal to treat a subcontractor's workers and suppliers differently than those of a general contractor is not only without justification, but is also contrary to the spirit of the bonding law itself.

House Bill 540 is not in the best interest of Alaska's workers, and the department opposes its passage.

POSITION PAPER/Department of Labor

Revised Draft

TESTIMONY OF

ALASKA CHAPTER

THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA

TO THE

HOUSE LABOR AND COMMERCE COMMITTEE

ON

VARYING THE NOTICE PROVISIONS TO PRIME CONTRACTORS

BY

SUBCONTRACTOR SUPPLIERS (HB 540)

SKILL RESPONSIBILITY INTEGRITY

THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA

1984

Draft

The change proposed in HB540 would not preclude claims of a subcontractor's supplier against a general contractor's payment bond. However, timely notice to the general contractor of the supplier's status and existence will become a prerequisite to filing a claim. This notice requirement will allow a general contractor to ensure that a subcontractor has paid all suppliers.

Under proposed HB540, a general contractor will know which persons may possibly have claims against his payment bond prior to a claim being made. Under existing law, a general contractor cannot determine, in advance of a claim being filed, which persons may be eligible to file a claim.

HB540 proposes a system somewhat analagous to the Alaska lien law (AS 34.35). In 1978 the lien laws for the State of Alaska were substantially revised. The revisions still provide protection to the subcontractor and material supplier but now subcontractor and suppliers have to take the initiative in assuring that the owner and lender are aware of their existence and ability to lien the project.

In summary, the A.G.C. believes HB540 will continue to provide protection to subcontractor suppliers but in a more enlightened and commercially reasonable manner. The A.G.C. urges this committee to consider all of the offered testimony and pass HB540 on to the next committee of referral.

Draft

The Alaska Chapter Associated General Contractors of America represents more than 800 companies including most of general contracting companies engaged in commercial construction. We appreciate the opportunity to present A.G.C.'s views on HB540.

The A.G.C. supports HB540 and offers the following brief explanation of the effect of the proposed change as we understand its intent.

Under existing law, a person with no direct contractural relationship with a general contractor, but who supplies labor or material to a subcontractor, may make a claim against the payment bond by giving the general contractor written notice within 90 days from the last date on which the person performed labor or furnished material. A general contractor has no way of knowing who may have supplied labor or materials to a subcontractor. Accordingly, a general contractor has no easy way to assure that a subcontractor has paid all his suppliers. Certification by a subcontractor that all labor and materialmen have been paid is no assurance if the certifying subcontractor is or becomes insolvent. The only "iron clad" safeguard for a general contractor is to delay payment to all subcontractors until 90 days after they have supplied labor or materials. This solution would do little to harmonize relations and increase cooperation between general contractors and subcontractors.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811

MEMORANDUM January 27, 1984

SUBJECT: Sectional analysis of HB 540

TO: Representative John Cowdery
Chairman, House Labor and
Commerce Committee

FROM: Edward H. Hein
Legislative Counsel

Under AS 36.25.010(a)(2), a general or specialty contractor, as a condition of being awarded a contract for a public building or public works project exceeding $100,000, must post a payment bond for the protection of all persons who supply labor and materials provided for in the contract.

Under AS 36.25.020(b), a supplier of labor or materials under a contract with a subcontractor, who has no contractual relationship with the prime contractor, has a right of action against the payment bond if the supplier notifies the prime contractor within 90 days after completing the work or the delivery of all materials.

The bill amends this section to provide that the supplier would have to give notice within 10 days after beginning performance. The goal is to give prime contractors earlier notice of claims that might be made against the payment bond so that the contractors can withhold adequate amounts from the subcontractors to assure that the suppliers will be paid.

Because the bill would require that notice be given in most cases before work is completed, it will often be impossible for the supplier to "state with substantial accuracy the amount claimed", as is now required in AS 36.25.020(b). Thus, that language is deleted at lines 16 - 17 of the bill. The new language inserted at lines 18 - 23 require that the notice also identify the project, describe the work or material furnished, and state the date on which performance began.

March 8, 1984

The Honorable John J. Cowdery
Pouch V
Juneau, Alaska 99811

Dear Representative Cowdery:

I, in my capacity as Secretary/Treasurer and Controller for UNITED LUMBER COMPANY, INC., have recently had the opportunity to review HB 540 which amends AS 36.25.020 (called the Little Miller Act). The proposed amendment adds subsection (d) which imposes certain notice requirements on suppliers of materials, equipment to be given to general contractors in order to preserve a right of action under the Act.

I have discussed the ramifications of HB 540 with some of my colleagues in the retail/wholesale lumber industry, including representatives of Spenard Builders Supply and Superior Millwork, Inc. We are unanimous in our view that the proposed amendment (copy attached) would increase the cost of our business by placing additional account functions on suppliers. Therefore, we would urge you to vote against the passage of HB 540.

By way of background, in recent years the burden of preserving Mechanic's Lien rights for material suppliers and subcontractors has, in our view been unfairly shifted from those in the most logical and least burdened position to protect everyone's lien rights to the subcontractors and material suppliers.

For example, the Mechanics Lien Law was amended in 1979 and 1980 which resulted in changing priority between a Mechanic's Lien and a Deed of Trust securing the interim construction loan. The amendments further created the burden upon subcontractors and material suppliers to obtain an "acknowledgement of right to lien" from the owner if we were not selling directly to the owner. It has generally been the view in the retail/wholesale lumber industry that the interim financing institutions could easily monitor construction draws to insure proper disbursement to subcontractors and material suppliers, yet this burden of notice was shifted to us.

We view HB 540 as another example of such unfair and unnecessary shifting of such burdens. Certainly the general contractor on a State funded project is in the best position to determine with whom his subcontractors are dealing with in the purchase of materials. Such could be a condition of draws by the subcontractors, and checks can be made payable jointly.

UNITED
Lumber Co., Inc.

Speaking from personal experience, the staff in our Credit Department doubled in order to keep up with the new notice requirements of the amended Mechanics Lien Law. Now we are faced with additional notice requirements under AS 36.25.020 if HB 540 is passed in order to protect our rights under the Little Miller Act. Additionally, the proposed amendment under HB 540 requires that we give notice to the general contractor by registered mail, a costly and time-consuming method.

We would urge consideration by you as to the effect of this unnecessary and costly amendment. We would welcome the opportunity to meet with you personally if you are in Anchorage during this current session. In the alternative, please don't hesitate to call me collect if you have any questions or if I can further elaborate upon the position of the retail/wholesale lumber suppliers.

Sincerely Yours,

ROBERT H. "BOB" BETTISWORTH

211 CUSHMAN STREET
FAIRBANKS, ALASKA 99701

Memorandum:

From: Rep. Bob Bettisworth RHB

To: John Cowdery, Chairman House Labor and Commerce Committee

Re: Bill Analysis: HB 540 "An act relating to claims against a contractor's payment bond"

The purpose of the bill is to change the timing required for notice of a claim to a contractor by a third party having a contractual relationship with a subcontractor but no contractual relationship with the contractor.

At present a person furnishing labor or materials has 90 days after the last date the person provided labor or materials to make notice of a claim. In this situation the contractor often faces claims, against its payment bond from persons or businesses, which were filed long after the contractor has paid the subcontractor. The proposed bill will require notice by the person providing labor or materials within 10 days of the date they first provide labor or materials. This will not prevent claims against the payment bond. However, it will give the contractor notice of those people or businesses which may have claims so that the contractors will be able to take measures to insure that persons furnishing labor or materials are paid when the subcontractors are paid.

The bill also eliminates the requirement to state the amount claimed. In its place is a requirement to provide the nature of the materials or work provided and the date work or materials were first provided. This is necessary because the exact amount of the claim would not be known in all cases.

The proposed bill will require notice by the person providing labor or materials within 10 days of the date they first provide labor or materials. This will not prevent claims against the payment bond. However, it will give the contractor notice of those people or businesses which may have claims so that the contractors will be able to take measures to insure that persons furnishing labor or materials are paid when the subcontractors are paid.

The bill also eliminates the requirement to state the amount claimed. In its place is a requirement to provide the nature of the materials or work provided and the date work or materials were first provided. This is necessary because the exact amount of the claim would not be known in all cases.

HB

545

SUMMARY: Intent of HB 545.

It has come to my attention that there are no current laws requiring employers of food service workers to provide a half-hour break for their employees during each shift.

There is also no federal or state law requiring an employer to provide employees with rest or meal periods during a work shift. However private employment agreements and collective bargaining contracts frequently require rest and meal periods and the Alaska Dept. of Labor will enforce those private agreements. Food service workers who do not have an employment agreements or collective bargaining contracts could then be required to work through a shift without having any break time.

The intent of this legislation is to implement by statute a break time requirement.

MEMORANDUM January 11, 1984

SUBJECT: Requiring Rest or Meal Periods for Food Service Workers (Work Order No. 13-1626)

TO: Representative Barbara Lacher

FROM: Teresa B. Cramer Teresa B Cramer 2450
Legislative Counsel

You have requested information about any current laws requiring employers of food service workers to provide a half-hour break for their employees during each shift. You have also asked for recommendations about how to require those employers to provide a break-time for their employees.

There is no federal or state law requiring an employer to provide employees with rest or meal periods during a work shift. However, private employment agreements and collective bargaining contracts frequently require rest and meal periods and the Alaska Department of Labor will enforce those private agreements. Federal regulations under the Fair Labor Standards Act (29 U.S.C. 201 - 219) recognize that employment contracts may require employers to provide rest or meal periods and address how to consider those periods when computing overtime compensation. (A copy of 29 C.F.R. 785.18 and 785.19 is attached for your information.)

The state cannot adopt laws in a field which federal statutes have pre-empted. The Fair Labor Standards Act does not address rest or meal periods. It sets a floor below which states may not go in regulating minimum wages and overtime compensation. It permits states to provide greater protections for employees than those of the federal law provided that those protections do not conflict with or frustrate the purpose of the federal law. The act does not prohibit Alaska from adopting requirements about break times.

A break-time requirement should be implemented by statute rather than by regulation. Neither AS 23.10 (the Alaska

Wage and Hour Act) nor AS 18.60.010 - 18.60.105 (prevention of accident and health hazards) speaks directly to this proposed requirement. The Wage and Hour Act establishes minimum wage and overtime compensation standards. AS 18.60.010 - 18.60.105 addresses the prevention of work-related accidents and health hazards. Since regulations providing for rest or meal periods would not directly flow from existing statutory language, the safer course to follow would be to establish the requirement by statute in general terms and permit regulations to be adopted to implement it.

§ 785.15 On duty.

A stenographer who reads a book while waiting for dictation, a messenger who works a crossword puzzle while awaiting assignments, fireman who plays checkers while waiting for alarms and a factory worker who talks to his fellow employees while waiting for machinery to be repaired are all working during their periods of inactivity. The rule also applies to employees who work away from the plant. For example, a repair man is working while he waits for his employer's customer to get the premises in readiness. The time is worktime even though the employee is allowed to leave the premises or the job site during such periods of inactivity. The periods during which these occur are unpredictable. They are usually of short duration. In either event the employee is unable to use the time effectively for his own purposes. It belongs to and is controlled by the employer. In all of these cases waiting is an integral part of the job. The employee is engaged to wait. See: Skidmore v. Swift, 323 U.S. 134, 137 (1944); Wright v. Carrigg, 275 F. 2d 148, 14 W.H. Cases (C.A. 4, 1960); Mitchell v. Wigger, 39 Labor Cases, para. 66,278, 14 W.H. Cases 534 D.N.M. 1960); Mitchell v. Nicholson, 79 F. Supp. 292,14 W.H. Cases 487 W.D.N.C. 1959))

785.16 Off duty.

(a) *General.* Periods during which an employee is completely relieved from duty and which are long enough to enable him to use the time effectively for his own purposes are not hours worked. He is not completely relieved from duty and cannot use the time effectively for his own purposes unless he is definitely told in advance that he may leave the job and that he will not have to commence work until a definitely specified hour has arrived. Whether the time is long enough to enable him to use the time effectively for his own purposes depends upon all of the facts and circumstances of the case.

(b) *Truck drivers; specific examples.* A truck driver who has to wait at or near the job site for goods to be loaded is working during the loading period. If the driver reaches his destination and while awaiting the return trip is required to take care of his employer's property, he is also working while waiting. In both cases the employee is engaged to wait. Waiting is an integral part of the job. On the other hand, for example, if the truck driver is sent from Washington, D.C. to New York City, leaving at 6 a.m. and arriving at 12 noon, and is completely and specifically relieved from all duty until 6 p.m. when he again goes on duty for the return trip the idle time is not working time. He is waiting to be engaged. (Skidmore v. Swift, 323 U.S. 134, 137 (1944); Walling v. Dunbar Transfer & Storage, 3 W.H. Cases 284; 7 Labor Cases para. 61,565 (W.D. Tenn. 1943); Gifford v. Chapman, 6 W.H. Cases 806; 12 Labor Cases para. 63,661 (W.D. Okla., 1947); Thompson v. Daugherty, 40 Supp. 279 (D. Md. 1941))

§ 785.17 On-call time.

An employee who is required to remain on call on the employer's premises or so close thereto that he cannot use the time effectively for his own purposes is working while "on call". An employee who is not required to remain on the employer's premises but is merely required to leave word at his home or with company officials where he may be reached is not working while on call. (Armour & Co. v. Wantock, 323 U.S. 126 (1944); Handler v. Thrasher, 191 F. 2d 120 (C.A. 10, 1951); Walling v. Bank of Waynesboro, Georgia, 61 F. Supp. 384 (S.D. Ga. 1945))

Rest and Meal Periods

§ 785.18 Rest.

Rest periods of short duration, running from 5 minutes to about 20 minutes, are common in industry. They promote the efficiency of the employee and are customarily paid for as working time. They must be counted as hours worked. Compensable time of rest periods may not be offset against other working time such as compensable waiting time or on-call time. (Mitchell v. Greinetz, 235 F. 2d 621, 13 W.H. Cases 3 (C.A. 10, 1956); Ballard v. Consolidated Steel Corp., Ltd., 61 F. Supp. 996 (S.D. Cal. 1945)),

§ 785.19 Meal.

(a) *Bona fide meal periods.* Bona fide meal periods are not worktime. Bona fide meal periods do not include coffee breaks or time for snacks. These are rest periods. The employee must be completely relieved from duty for the purposes of eating regular meals. Ordinarily 30 minutes or more is long enough for a bona fide meal period. A shorter period may be long enough under special conditions. The employee is not relieved if he is required to perform any duties, whether active or inactive, while eating. For example, an office employee who is required to eat at his desk or a factory worker who is required to be at his machine is working while eating. (Culkin v. Glenn L. Martin, Nebraska Co., 97 F. Supp. 661 (D. Neb. 1951), aff'd 197 F. 2d 981 (C.A. 8, 1952), cert. denied 344 U.S. 888 (1952); Thompson v. Stock & Sons, Inc., 93 F. Supp. 213 (E.D. Mich 1950), aff'd 194 F. 2d 493 (C.A. 6, 1952); Biggs v. Joshua Hendy Corp., 183 F. 2d 515 (C. A. 9, 1950), 187 F. 2d 447 (C.A. 9, 1951); Walling v. Dunbar Transfer & Storage Co., 3 W.H. Cases 284; 7 Labor Cases para. 61.565 (W.D. Tenn. 1943); Lofton v. Seneca Coal and Coke Co., 2 W.H. Cases 669; 6 Labor Cases para. 61,271 (N.D. Okla. 1942); aff'd 136 F. 2d 359 (C.A. 10, 1943); cert. denied 320 U.S. 772 (1943); Mitchell v. Tampa Cigar Co., 36 Labor Cases para. 65, 198, 14 W.H. Cases 38 (S.D. Fla. 1959); Douglass v. Hurwitz Co., 145 F. Supp. 29, 13 W.H. Cases (E.D. Pa. 1956))

(b) *Where no permission to leave premises.* It is not necessary that an employee be permitted to leave the premises if he is otherwise completely freed from duties during the meal period.

Sleeping Time and Certain Other Activities

§ 785.20 General.

Under certain conditions an employee is considered to be working even though some of his time is spent in sleeping or in certain other activities.

§ 785.21 Less than 24-hour duty.

An employee who is required to be on duty for less than 24 hours is working even though he is permitted to sleep or engage in other personal activities when not busy. A telephone operator, for example, who is required to be on duty for specified hours is working even though she is permitted to sleep when not busy answering calls. It makes no difference that she is furnished facilities for sleeping. Her time is given to her employer. She is required to be on duty and the time is worktime. (Central Mo. Telephone Co. v. Conwell, 170 F. 2d 641 (C.A. 8, 1948); Strand v. Garden Valley Telephone Co., 51 F. Supp. 898 (D. Minn. 1943); Whitsitt v. Enid Ice & Fuel Co., 2 W. H. Cases 584; 6 Labor Cases para. 61,226 (W.D. Okla. 1942).)

§ 785.22 Duty of 24 hours or more.

(a) *General.* Where an employee is required to be on duty for 24 hours or more, the employer and the employee may agree to exclude bona fide meal periods and a bona fide regularly scheduled sleeping period of not more than 8 hours from hours worked, provided adequate sleeping facilities are furnished by the employer and the employee can usually enjoy an uninterrupted night's sleep. If sleeping period is of more than 8 hours, only 8 hours will be credited. Where no expressed or implied agreement to the contrary is present, the 8 hours of sleeping time and lunch periods constitute hours worked. (Armour v. Wantock, 323 U.S. 126 (1944); Skidmore v. Swift, 323 U.S. 134 (1944); General Electric Co. v. Porter, 208 F. 2d 805 (C.A. 9, 1953), cert. denied, 347 U.S. 951, 975 (1954); Bowers v. Remington Rand, 64 F. Supp. 620 (S.D. Ill, 1946), aff'd 159 F. 2d 114 (C.A. 7, 1946) cert. denied 330 U.S. 843 (1947); Bell v. Porter, 159 F. 2d 117 (C.A. 7, 1946) cert. denied 330 U.S. 813 (1947); Bridgeman v. Ford, Bacon & Davis, 161 F. 2d 362 (C.A. 8, 1947); Rokey v. Day & Zimmerman, 157 F. 2d 736 (C.A. 8, 1946); McLaughlin v. Todd & Brown, Inc., 7 W.H. Cases 1014; 15 Labor Cases para. 64,606 (N.D. Ind. 1948); Campbell v. Jones & Laughlin, 70 F. Supp. 996 (W.D. Pa. 1947).)

(b) *Interruptions of sleep.* If the sleeping period is interrupted by a call to duty, the interruption must be

The Department of Labor is, from a safety and health standpoint, an advocate of the philosophy that workers need time away from their duties during the work shift, as provided for in House Bill 545. While there are presently no provisions in either state or federal law that require rest or meal periods for any class of worker, the absence of such provisions is premised upon the ability and good faith of employers and employees to negotiate suitable arrangements in this regard. This has been very workable and, generally, employers and employees do come to mutually acceptable terms on meal and rest periods. However, it appears that the food service industry has failed to satisfactorily police itself in this regard, and that workers in the industry are being denied the opportunity to negotiate for meal or rest periods which is commonly extended to workers in other industries.

Traditionally, a role of government has been to provide remedies to inequities when the more desirable self-regulating approach has failed. With this being the situation in the food service industry, it is, therefore, appropriate for government to assume the stronger role as provided for in House Bill 545.

The Department of Labor, therefore, supports passage of House Bill 545. It will not have a fiscal impact on the Department.

Dear Representative Koponen,

Local 879 is pleased to see the introduction of H.B. 545, and would like to be kept informed of its progress in the Labor and Commerce Committee. As this bill is presently written, is it intended to provide workers with either a meal or a 30 minute break, but not necessarily both? It would seem to be a curious result if employers provided a meal but required the employee to eat it while on shift.

Thank you for introducing this bill, and for sending us your comments or further information on it.

Sincerely,

Beth E. Behner

RE: Meal Period for Food Service Workers
Research Request 84-057

You asked about state and federal laws and regulations pertaining to rest or meal periods for food service workers on an 8-hour shift. Alaska, like most states, defers to federal standards in lieu of state wage and hour regulation. Federal requirements for work breaks (except for minors) were abolished in the 1960s when equal pay and equal opportunity laws were adopted.[1]

I spoke with Don Wilson and James Sanwick, both of the Alaska Department of Labor, about states that have adopted laws and regulations governing meal periods. Washington, Oregon, California and Hawaii are some of the states that have state wage and hour requirements in addition to federal requirements.

Hawaii requires employers to provide breaks to employees who are minors, but does not require breaks for adult workers. California requires employers to provide a meal period to workers in some fields, but food service workers are not on the list of occupations covered by the regulations. A copy of California's regulations governing meal periods is attached to this memorandum.

Employers that are covered by state regulation in Oregon must provide a 10-minute break (15 minutes for minors) twice a day and must provide a meal break within 5 hours of the beginning of a shift. Oregon's

---

[1]Until the federal equal pay requirements were adopted, employers were required to provide breaks to women and children employees. Federal regulations no longer require employers to give adult employees rest or meal breaks, but they do require that employees be compensated for breaks of less than 20 minutes and meal periods of less than one-half hour.

wage and hour regulations apply only to those businesses that have gross sales of less than $362,000 per year and do not participate in interstate commerce. Over 90 percent of the employers in Oregon are covered by federal regulations.

Washington's administrative code requires employers to allow employees to take a meal break of at least 30 minutes no less than two hours and no more than five hours from the beginning of a shift. In addition, employees must receive a paid 10-minute break for each four hours of work. The provisions apply to all employers in the state.

Several people I spoke with stated that most food service workers are allowed to eat before, after or during their shifts, often for free. Several contacts mentioned that a requirement for a meal break might cause "during shift" meals to change from the traditional no cost and no lost hourly compensation situation. If food service workers in Alaska are given meal breaks, they may no longer be paid for the meal period and could be required to pay for any of the employers' food which is consumed.

If you wish us to perform a more extensive survey of states, please contact the agency.

RE: HB 545

THE LANGUAGE IN HB 545 IS VERY SIMPLE, BUT IT PROPOSES ACTION WHICH IS UNPRECEDENTED IN ALASKA STATUTE. THIS LEGISLATION WOULD MANDATE THAT WORKERS IN THE FOOD SERVICE INDUSTRY BE GIVEN A 30 MINUTE REST OR MEAL PERIOD DURING WORK SHIFTS THAT LAST EIGHT HOURS OR MORE.

QUESTIONS:

1. WHY HAVE FOOD SERVICE WORKERS BEEN SINGLED OUT IN THIS BILL ?

2. HAS THIS TYPE OF LEGISLATION BEEN PASSED IN OTHER STATES ?

3. IS THERE ANY LAW ON THE FEDERAL LEVEL THAT MIGHT SUPPORT SUCH LEGISLATION ?

4. IF THIS LEGISLATION IS PASSED, DO YOU EXPECT A LARGE NUMBER OF WORKERS WILL WANT THE SAME PRIVILEGE ?.

RE: HB 569/ cemetery associations

Representative Phillips has introduced HB 569 relating to cemetery associations and I have referred it to the Labor and Commerce Committee.

I had intended to introduce similar legislation, and I am supportive of this bill. I would appreciate it if you would schedule HB 569 for a committee hearing as soon as convenient so that we might be able to bring it to the floor for a vote in the near future.

Thanks.

HB 538, (cont'd)

lating to agriculture, industry, horticulture, native plants or livestock, 3) indicating past, present, or future potential of a renewable resource that is related to the community, region or state, 4) showing household arts, and 5) including general interest subjects such as hobbies, arts, crafts, photography and school education.

Rewrites definition of "agricultural and industrial fair" to mean: ". . .a community, regional or state fair that includes in its activities exhibits of agriculture, industry, horticulture, native plants, livestock, and related domestic arts produced in the community, region, or state;" (currently an "agricultural and industrial fair" means a fair, the major focus of which is displays, exhibitions, demonstrations, contests or promotions of agricultural or industrial concern to the region in which the fair is located, or any fair which, before July 1, 1980, has received a grant under this chapter;"). Identical to SB 378, page 119.

Does not provide for an effective date (becomes law 90 days after Governor signs bill).

Introduced January 24 and referred to Resources, Finance.

Motorcycle Helmets (mandatory)

HOUSE BILL NO. 539, by Reps. Cato and M. M. Miller. Would require a person driving, operating, or riding as a passenger on a motorcycle, motor-driven cycle, or snowmobile to wear an approved motorcycle helmet. Does not provide for an effective date (becomes law 90 days after Governor signs bill).

Introduced January 25 and referred to State Affairs.

Contractor's Payment Bond (claims against)

HOUSE BILL NO. 540, by Rep. Bettisworth. Relates to the rights of persons who furnish labor or materials. Under this bill a person having direct contractual relationships with a subcontractor but no contractual relationship express or implied with the contractor furnishing the payment bond has a right of action on the payment bond upon giving written notice to the contractor within 10 days from the first date on which the person performed labor or furnished material for which the claim is made (under current law the person has a right to action within 90 days from the last date on which the person performed labor or furnished material). Requires the notice to state the name of the person to whom the material was furnished or for whom the labor was performed, ". . . identify the public building project or public work project for which the material was furnished or for which the labor was performed, describe the material furnished and to be furnished or the work performed and to be performed, and state the date on which the material was first furnished or the work was first performed. . . ." (currently the notice must state "with substantial accuracy the amount claimed and the name of the person to whom the material was furnished or for whom the labor was performed--underlined language added to current law by this bill). Does not provide for an effective date (becomes law 90 days following Governor's signature).

Re: Cemetery Associations

Ken Johnson of your office recently asked for background information regarding the captioned bill, which is set for hearing next Tuesday, February 14, 1984.

I am attaching a copy of a letter I received from the Chairman of the Special Committee of Angelus Memorial Park Association in Anchorage. As you can see from his letter, the Association wishes to build a building to house much-needed administration and service-related activities. Under present law, the Association could only accomplish the building of such a structure by selling off a portion of the land it owns; in other words, present statutes prohibit the Association from financing such structures. Additionally, under present statutes, a cemetery association cannot incorporate as a non-profit association. House Bill 569 would permit this.

I have asked Legal Services to prepare a sectional analysis of the bill and I hope to have it to your office before the hearing; however, I have been advised that due to the personal bill deadline, such sectional analysis may have to wait. I have notified Mr. Buswell of the meeting and he has indicated that the Association will either send someone to Juneau to testify or will submit written testimony.

If you have any questions, please contact me.

Mr. Randy Phillips
State Legislator
Juneau, Alaska

Dear Mr. Phillips:

The Board of Trustees of Angelus Memorial Park Association approved a motion to present to the Legislature, amendments to the Alaska Cemetery Statutes, pertaining to non-profit cemetery associations. A committee was appointed consisting of Mr. Alvah C. Buswell, Jr. and Mr. Robert F. Shary, who are board members and Mr. Sidney Abbott, park manager, were to work on the proposed amendments of the present statutes.

The present Alaska non-profit cemetery statutes were patterned after the Oregon Statutes many years ago before Statehood and are badly out dated. The State of Oregon has since amended their Statutes, twice, and now Alaska needs to do the same, so that a non-profit cemetery can better serve the community. To our knowledge Angelus is the only non-profit cemetery in the state.

Enclosed are copies of Oregon Statutes that have been amended and a copy of our proposed revisions to the Alaska State Cemetery Statutes.

The association realy needs these changes in order to grow, as it is now, we can not serve the community as a modern cemetery, because of the way the laws are written. The public wants all the services a cemetery is suppose to supply, such as, a columbarium for inurnment of cremated remains, mausoleum, niche and storage vault. Also we can not even build a much needed administartion building. We now have to rent a very inadequate building for an office. The association has never had a maintenance building. The present laws prevent our growth.

The reason we included association and or corporation is that Angelus intends to incorporate in order to help lessen the personal individual liability of the board members. Angelus board members are non paid.

Sincerely,
Special Committee
Mr. Alvah C. Buswell, Jr.
Chairman

ANGELUS MEMORIAL PARK ASSOCIATION

ALASKA STATUTES

CHAPTER 30. Cemetery Associations

Sec. 10.30.070. Creation of irreducible fund. The association may by its bylaws provide that a stated percentage of the money realized from the sale of lots and donations (AND OTHER SOURCES OF REVENUE) constitutes an irreducible fund, which may be invested in the manner or loaned upon the securities the association or the trustees consider proper. The interest or income from the irreducible fund provided for in any bylaw or as much as may be necessary shall be devoted exclusively to the preservation and embellishment of the (CEMETERY) grounds, buildings and property of the association and or corporation and the lots and space in buildings or grounds sold to the members of the association and or corporation, or to the payment of the interest or principal of the debts authorized by the association for the purchase of land, equipment, erecting buildings and improvements. Where a bylaw has been enacted for the creation of an irreducible fund, (IT) the set amount or percentage stated in the bylaw, may not be amended except for the purpose of increasing the fund. (36-5-5 ACLA 1949)

I was told to use caps & put in brackets those words to be deleted and to underline all new wording.

ALASKA STATUTES

CHAPTER 30. Cemetery Associations

Sec. 10.30.090. Debts of association and or corporation. A cemetery association and or corporation may (NOT) contract debts in anticipation of future receipts, (EXCEPT) for the (ORIGINAL) purchase of cemetery land and or for other cemetery purposes, the laying out and embellishment of the grounds and avenues of the cemetery, repairing their buildings, erection of new buildings, mausoleums, columbariums, and purchasing necessary equipment, for which debts the association may issue bonds or notes. The association may secure these debts by mortgage upon its lands, except lots which have been conveyed to the members of the Association, or by security interest in no more than 50% of the irreducib fund. (36-5-5 ACLA 1949).

ALASKA STATUTES

CHAPTER 30. Cemetery Associations.

Sec. 10.30.125 Definition of "Cemetery Lot", one or more than one adjoining, lot, plot, space, grave, nich, mausoleum crypt, vault, and columbarium, for the interment of human remains.

the bank or trust company shall be governed by the provisions of ORS 128.057 and shall not be required to invest the money according to the list approved by the State Treasurer. An officer of the corporation shall file with the Secretary of State on or before April 15 of each year a verified statement in duplicate containing the same information pertaining to the irreducible fund as provided in ORS 97.810 (2) regarding endowment care funds. The Secretary of State may require the corporation to file, as often as he considers it to be necessary, a detailed report of the conditions and assets of the irreducible fund.

(3) The interest or income arising from the irreducible fund provided for in this section or by any bylaws, or so much thereof as is necessary, shall be devoted exclusively to the preservation and embellishment of the grounds, buildings and property of the corporation and the lots and space in buildings or grounds sold to the members of the corporation, or to the payment of the interest or principal of the debts authorized by subsection (5) of this section for the purchase of land, erecting buildings, and improvements. Any surplus thereof not needed or used for such purposes shall be invested as provided in this section and shall become part of the irreducible fund.

(4) After paying for the land and the erection of the original buildings and improvements thereon, all the future receipts and income of the corporation subject to the provisions in this section relating to the creation of an irreducible fund, whether from the sale of lots and burial space, cremation of bodies, donations, gifts and other sources, shall be applied exclusively to laying out, preserving, protecting, embellishing and beautifying the cemetery or the crematory and grounds thereof, and the avenues leading thereto, and to the erection of such buildings and improvements as may be necessary or convenient for cemetery or crematory purposes, and to pay the necessary expenses of the corporation.

(5) No debts shall be contracted by such corporation in anticipation of any future receipts, except for originally purchasing the lands authorized to be purchased by it, laying out and embellishing the grounds and avenues, erecting buildings and vaults on such land, and improving them for the purposes of the corporation. The corporation may issue bonds or notes for debts so contracted and may secure them by way of mortgage upon any of its lands, buildings, property and improvements excepting lots or space conveyed to the members. [1969 c.580 §96; 1971 c.225 §1]

61.765 Selling land unsuited for burials. If in the board of directors' opinion, any portion of the lands of a nonprofit corporation organized and existing solely for the purposes of either owning or operating a cemetery or the cremation of dead bodies and the burial and care of incinerate remains is unsuitable for burial purposes or other purposes of the corporation, the board of directors may sell such portion and apply the proceeds to the general purposes of such corporation in the same proportion and manner as provided by ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1969 c.580 §97]

61.770 Burial lots or space; use, exemption from taxation, execution and liens; lien for purchase price of gravestone. Burial lots or space for burial of incinerate remains in buildings or grounds sold by a nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall be for the sole purpose of interment or deposit and safekeeping of incinerate remains. Such lots or space shall be exempt from taxation, execution, attachment or other lien or process, if used as intended by the purchaser thereof from such corporation, or his assigns or representatives, exclusively for burial purposes, and in no wise with a view to profit. The vendor of any gravestone, however, shall not be prevented from having and enforcing a lien thereon for all or part of its purchase price. If a suit is brought to enforce such a lien, the decree therein is enforceable thereafter; and, for the purpose of enabling the lien to be had and enforced, the gravestone shall be deemed personal property and may be severed and removed, under execution and order of sale, from the lot where it is situated and may be sold in the same manner as any other personal property. [1969 c.580 §98]

61.775 Recording plan; power to improve and regulate grounds. A nonprofit corporation organized and existing solely for the purpoees of owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall cause a plan of its land and grounds and of the lots laid out by it and of the niches or burial space in the buildings erected thereon to be made and recorded in the county in which such grounds and land are located, such lots or

SPECIAL PROVISIONS RELATING TO ORS 97.010 TO 97.040, 97.110 TO 97.450, 97.510 TO 97.730, 97.810 TO 97.920 and 97.990

97.010 Definitions for ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990. As used in ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990:

(1) "Human remains" or "remains" means the body of a deceased person in any stage of decomposition or after cremation.

(2) "Cemetery" means any place dedicated to and used, or intended to be used, for the permanent interment of human remains.

(3) "Burial park" means a tract of land for the burial of human remains in the ground used, or intended to be used, and dedicated for cemetery purposes.

(4) "Mausoleum" means a structure for the entombment of human remains in crypts or vaults in a place used, or intended to be used, and dedicated for cemetery purposes.

(5) "Crematory" means a structure containing a retort for the reduction of bodies of deceased persons to cremated remains.

(6) "Columbarium" means a structure or room containing niches for permanent inurnment of cremated remains in a place used, or intended to be used, and dedicated for cemetery purposes.

(7) "Interment" means the disposition of human remains by cremation, inurnment, entombment or burial.

(8) "Cremation" means the reduction of a body of a deceased person to cremated remains in a crematory.

(9) "Inurnment" means placing cremated remains in an urn and depositing it in a niche.

(10) "Entombment" means the placement of human remains in a crypt or vault.

(11) "Burial" means the placement of human remains in a grave.

(12) "Grave" means a space of ground in a burial park used, or intended to be used, for burial of the remains of one person.

(13) "Crypt" or "vault" means a space in a mausoleum of sufficient size used, or intended to be used, to entomb uncremated human remains.

(14) "Niche" is a recess in a columbarium used, or intended to be used, for the interment of the cremated remains of one or more persons.

(15) "Cemetery authority" includes cemetery corporation, association, corporation sole or other person or persons owning or controlling cemetery lands or property.

(16) "Cemetery association" means any corporation or association authorized by its articles to conduct any or all the businesses of a cemetery, but does not include a corporation sole or a charitable, eleemosynary association or corporation.

(17) "Cemetery business," "cemetery businesses" and "cemetery purposes" are used interchangeably and mean any business and purpose requisite or incident to, or necessary for establishing, maintaining, operating, improving or conducting a cemetery, interring human remains, and the care, preservation and embellishment of cemetery property.

(18) "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

(19) "Lot," "plot" or "burial space" means space in a cemetery owned by one or more individuals, an association or fraternal or other organization and used, or intended to be used, for the permanent interment therein of the remains of one or more deceased persons. Such terms include and apply with like effect to one, or more than one, adjoining grave, crypt, vault or niche.

(20) The term "plot owner" or "owner" means any person in whose name a burial plot stands as owner of the right of sepulture therein in the office of the cemetery authority, or who holds from such cemetery authority a conveyance of the right of sepulture or a certificate of ownership of the right of sepulture in a particular lot, plot or space.

(21) "Endowment care" means the general care and maintenance of developed portions of a cemetery and memorials erected thereon financed from the income of a trust fund established and maintained pursuant to the provisions of ORS 97.810 to 97.860. Endowment care cemeteries owned by a city or a county may supplement their general care and maintenance trust funds from general revenues.

(22) "Special care" is any care in excess of endowed care in accordance with the specific directions of any donor of funds for such purposes. [Amended by 1955 c.545 §1; 1965 c.396 §1]

61.736 Procedure for revoking certificate of authority. ORS 57.735, relating to revocation of certificate of authority, is applicable to nonprofit corporations. [1963 c.492 §36 (enacted in lieu of 61.735)]

61.740 [Renumbered 61.984]

61.741 Application to corporation authorized to transact business in this state on December 31, 1959. Foreign corporations which are duly authorized to transact business in this state on December 31, 1959, for a purpose or purposes for which a corporation might secure such authority under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, shall, subject to the limitations set forth in their respective certificates of authority, be entitled to all the rights and privileges applicable to foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, and from December 31, 1959, such corporations shall be subject to all the limitations, restrictions, liabilities and duties prescribed herein for foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1959 c.580 §80]

61.745 Transacting business without certificate of authority. (1) No foreign corporation transacting business in this state without a certificate of authority shall be permitted to maintain any action, suit or proceeding in any court of this state, until such corporation shall have obtained a certificate of authority. No action, suit or proceeding shall be maintained in any court of this state by any successor or assignee of such corporation on any right, claim or demand arising out of the transaction of business by such corporation in this state, until a certificate of authority shall have been obtained by such corporation or by a corporation which has acquired all or substantially all its assets.

(2) The failure of a foreign corporation to obtain a certificate of authority to transact business in this state shall not impair the validity of any contract or act of such corporation, and shall not prevent such corporation from defending any action, suit or proceeding in any court of this state. [1959 c.580 §81]

CEMETERIES AND CREMATORIES

61.755 Lands of cemetery or crematory corporation; exemption from execution, taxation and condemnation. A nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains, may purchase or take, by gift or devise, and own and hold lands for the sole purpose of either a cemetery or a crematory and burial place for incinerate remains. Such lands shall be exempt from execution and taxation, and from any appropriation for public purposes, and lots or portions of such land and space in any buildings thereon may be sold, if intended to be used exclusively for burial purposes, and in no wise with a view to the profit of the members of such corporation. The land so held for cemetery purposes shall not exceed 600 acres, but if the land already held for such purpose by the corporation is all practically used, the amount thereof may be increased by adding thereto not more than 20 acres at any one time. The land so held for the purposes of a crematory and the burial of incinerate remains shall not exceed 30 acres, but if the land already held for such purpose by the corporation is all practically used the amount thereof may be increased by adding thereto not more than 10 acres at any one time. [1959 c.580 §95]

61.760 Revenues; restrictions on uses thereof. (1) A nonprofit corporation organized or existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains may, by its bylaws provide that a stated percentage of the moneys received from the sale of lots and burial spaces, cremation of bodies, donations, gifts or other sources of revenue shall constitute an irreducible fund. Any bylaw enacted for the creation of the irreducible fund cannot be amended to reduce the fund.

(2) The board of directors may direct the investment of the money in the irreducible fund, but all investments of money deposited in the fund on or after January 1, 1972, shall be in securities in classes and amounts approved by the State Treasurer and published in a list pursuant to ORS 97.820. If a bank or trust company qualified to engage in the trust business is directed by the board of directors to invest the money in the irreducible fund,

Calif laws

HEALTH AND SAFETY CODE

DIVISION 7. DEAD BODIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. DEFINITIONS

7000. The definitions in this chapter apply to this division and to Divisions 8 and 9 of this code.

7001. "Human remains" or "remains" means the body of a deceased person, and includes the body in any stage of decomposition and cremated remains.

7002. "Cremated remains" means human remains after incineration and necessary processing under Section 7054.1 in a crematory.

7003. "Cemetery" means any one, or a combination of more than one, of the following, in a place used, or intended to be used, and dedicated, for cemetery purposes:

(a) A burial park, for earth interments.

(b) A mausoleum, for crypt or vault interments.

(c) A crematory, or a crematory and columbarium, for cinerary interments.

7004. "Burial park" means a tract of land for the burial of human remains in the ground, used or intended to be used, and dedicated, for cemetery purposes.

7005. Except in Part 5 of Division 8 of this code, "mausoleum" means a structure or building for the entombment of human remains in crypts or vaults in a place used, or intended to be used, and dedicated, for cemetery purposes.

7006. "Crematory" means a building or structure containing one or more furnaces for the reduction of bodies of deceased persons to cremated remains.

7007. Except in Part 5 of Division 8 of this code, "columbarium" means a structure, room, or other space in a building or structure containing niches for inurnment of cremated human remains in a place used, or intended to be used, and dedicated, for cemetery purposes.

7008. "Crematory and columbarium" means a building or structure containing both a crematory and columbarium.

7009. "Interment" means the disposition of human remains by inurnment, entombment, or burial in a cemetery or, in the case of cremated remains, by inurnment, entombment, burial, or burial at sea as provided in Section 7117.

7010. "Cremation" means the reduction of the body of a deceased person to cremated remains in a crematory and the placement of the cremated remains in a grave, vault or niche or burial at sea as provided in Section 7117 of this code.

7011. "Inurnment" means placing cremated remains in an urn and placing it in a niche.

7012. "Entombment" means the placement of human remains in a crypt or vault.

7013. "Burial" means the placement of human remains in a grave.

7014. "Grave" means a space of ground in a burial park, used, or intended to be used, for burial.

7015. "Crypt" or "vault" means a space in a mausoleum of sufficient size, used or intended to be used, to entomb uncremated human remains.

7016. "Niche" means a space in a columbarium used, or intended to be used, for inurnment of cremated human remains.

7017. "Temporary receiving vault" means a vault used or intended to be used for the temporary placement of human remains.

7018. "Cemetery authority" includes cemetery association, corporation sole, or other person owning or controlling cemetery lands or property.

7019. "Cemetery corporation," "cemetery association," or "cemetery corporation or association" mean any corporation now or hereafter organized which is or may be authorized by its articles to conduct any one or more or all of the businesses of a cemetery, but do not mean or include a corporation sole.

7020. "Cemetery business," "cemetery businesses," and "cemetery purposes" are used interchangeably and mean any and all business and purposes requisite to, necessary for, or incident to, establishing, maintaining, operating, improving, or conducting a cemetery, interring human remains, and the care, preservation, and embellishment of cemetery property, including, but not limited to, any activity or business designed for the benefit, service, convenience, education, or spiritual uplift of property owners or persons visiting the cemetery.

7021. "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

7022. "Lot," "plot," or "interment plot" means space in a cemetery, used or intended to be used for the interment of human remains. Such terms include and apply to one or more than one adjoining graves, one or more than one adjoining crypts or vaults, or one or more than one adjoining niches.

7023. "Plot owner," "owner," or "lot proprietor" means any person in whose name an interment plot stands of record as owner, in the office of a cemetery authority.

7024. "Permit for Disposition of Human Remains" includes "burial permit" and is a permit, issued pursuant to law, for the interment, disinterment, removal, reinterment or transportation of human remains.

DIVISION 8. CEMETERIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. CEMETERY DEFINED

8100. Six or more human bodies being buried at one place constitute the place a cemetery.

CHAPTER 2. VANDALISM

8101. (a) Every person is guilty of a misdemeanor and punishable by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not exceeding one year, or by both, who maliciously does any of the following:

(1) Destroys, cuts, mutilates, effaces, or otherwise injures, tears down, or removes any tomb, monument, memorial, or marker in a cemetery, or any gate, door, fence, wall, post or railing, or any inclosure for the protection of a cemetery or any property in a cemetery.

(2) Obliterates any grave, vault, niche, or crypt.

(3) Destroys, cuts, breaks or injures any building, statuary, ornamentation, tree, shrub, or plant within the limits of a cemetery.

The Honorable Joe Hayes
Speaker of the House
Alaska State House of
Representatives
Pouch V
Juneau, AK 99811

Re: House Bill S69
relating to nonprofit
cemetery corporations

Dear Representative Hayes:

You have asked the Consumer Protection section of the Attorney General's office to review House Bill _____ regarding nonprofit cemeteries, and to inform you whether the Department of Law has any difficulties with the overall concept behind the bill, specifically whether it would pose a threat of injury to the consuming public dealing with nonprofit cemeteries in the state.

My understanding of the intent behind the bill is to modernize and clarify the 1949 Nonprofit Cemetery Association statute presently in effect. The bill would allow nonprofit cemetery associations to be incorporated as nonprofit corporations under AS 10.20 and would generally give the nonprofit cemetery association or corporation more flexibility in how it invests the monies in its irreducible fund, how it spends its other revenues and how and for what purposes it may contract debts. The crucial part of this updating was to add a definition of "cemetery lot" to include not only grave spaces but also mausoleum crypts, or crematory niches, since those items are often the preferred choice of modern consumers.

The Consumer Protection section in the Attorney General's office is not opposed to this bill and does not think that it will cause any harm to the public. If anything, the bill will allow those nonprofit cemetery associations operating in the state to better serve their own membership. Since these associations are like cooperatives, owned and controlled by the members, there is little danger of overreaching or abuse of the corporation's cemetery assets. The changes in this statute will only further the worthy purposes of the cemetery associations as

03-C5LH

they will be able to respond to the needs of their own association for the erection of new buildings, acquisition of new lands or equipment or development of new cemetery services such as mausoleums.

The last section of the bill also adds a broader definition of "cemetery lot" to the Alaska Unfair Trade Practices and Consumer Protection Act. This definition refers to AS 45.50.471(b)(24), which regulates the sales of funeral or burial goods or services before "need" (i.e. before death). Under 471(b)(24) as it presently exists, a corporation or association making advance sales of funeral goods or services is required to deposit the consumers' monies in a trust fund pending actual use by the consumer. There is presently an exemption from trust deposit for the amount paid for the actual cemetery lot and grave marker. By expanding the definition of cemetery lot, an advance purchase of a mausoleum crypt, or a crematorium deposit space of some sort, would also be exempt from this trust deposit requirement.

The Department of Law does not oppose this change, since it seems reasonable that this broader definition of cemetery lot be adopted to meet with modern day marketing of burial goods such as crematory crypts. The Consumer Protection section does not believe that broadening this definition will lead to any abuse of the advance-need funeral statute, despite what members of the public or Legislature might fear because of the recent debacle with the Valley Memorial Garden Cemetery near Palmer. (Unfortunately, most of the advance-need burial sales made by that cemetery were made before the effective date of AS 45.471(b)(24), and it was the lack of any trust requirement for any portion of the advance-need sales price which allowed the abusive dissipation of those funds by the for-profit cemetery corporation known as Valley Memorial Gardens, Inc.)

If legislators have a concern that the purchase monies from consumers who purchase cemetery lots or crematory crypts in advance need further protection, a further sentence could be added to 471(b)(24) to the effect that cemetery lots (as more broadly defined by this bill) are exempt if they are in fact, upon payment of the purchase price, "transferred" from the seller to the consumer. Although transfer is not usually made in the sense of legal property "title" transfer, designation of the space as a consumer's by the placement of a grave stone marker already marked with the consumer's name and designation of the plot or crypt as the consumer's on the official map of the cemetery should be sufficient protection.

Overall, the Attorney General's office does not see significant problems with the enactment of House Bill _____.

Sincerely,

NORMAN C. GORSUCH

Re: HB 569/ cemetery associations

The following information is provided as background for this legislation.

During the past year, the Angelus Memorial Park Association in Anchorage acquired the Valley Memorial Garden cemetery in Palmer. Valley Memorial was in bankruptcy proceedings and many community residents feared that this cemetery would be lost as would many relatives buried in the cemetery.

After Angelus had come to the rescue, so to speak, of Valley Memorial Garden, it was discovered that the cemetery had never been properly surveyed, burials had been improperly made and the entire 7½ acre facility was in need of substantial capital improvement. However, state law relating to cemeteries is extremely outdated and is very restrictive as to what money and assets possessed by a cemetery association may be used for such improvements or as collateral.

The legislation is intended to remedy that situation and allow non-profit cemetery associations as Angelus more flexibility in using their funds to serve the public. This bill will allow the cemetery association to better serve its clients. As the letter from the Attorney General's office provided as backup indicates, these associations act like cooperatives and there would be little danger of abusing the corporation's assets.

In general, will allow cemetery associations to provide for the desires of today's community in the area of cemetery services.

We suggest an amendment which has been recommended by the Attorney General's office.

* Add a section 13 to read

AS 45.50.561 is amended by adding a new paragraph to read:

(9) "cemetery lot" means a lot, plot, space, grave, niche, mausoleum, crypt, vault or columbarium, used or intended to be used for the interment of human remains.

This is an amendment to the unfair trade practices statutes referred to in the second page of the letter provided as further backup.

For further background, I would suggest the committee request testimony from Connie Sipe in the Consumer Protection section of the Attorney General's office. She has been instrumental in the drafting if this legislation.

Representative Joe Hayes
Alaska State Legislature
Juneau, Alaska

Atten: Mr. Jeff Day:

The Board of Trustees of Angelus Memorial Park Association approved a motion to present to the Legislature, amendments to the Alaska Cemetery Statutes, pertaining to non-profit cemetery associations. A committee was appointed consisting of Mr. Alvah C. Buswell, Jr. and Mr. Robert F. Shary, who are board members and Mr. Sidney Abbott, park manager, to work on the proposed amendments of the present statutes.

The present Alaska non-profit cemetery statutes were patterned after the Oregon Statutes many years ago before Statehood and are badly out dated. The State of Oregon has since amended their Statutes, twice, and now Alaska needs to do the same, so that a non-profit cemetery can better serve the community. To our knowledge Angelus is the only non-profit cemetery in the state.

Enclosed are copies of Oregon Statutes that have been amended and a copy of our proposed revisions to the Alaska State Cemetery Statutes.

The association realy needs these changes in order to grow, as it is now, we can not serve the community as a modern cemetery, because of the way the laws are written. The public wants all the services a cemetery is suppose to supply, such as, a columbarium for inurnment of cremated remains, mausoleum, niches and storage vault. Also we can not even build a much needed administration building. We now have to rent a very inadequate building for an office. The association has never had a maintenance building. The present laws prevent our growth.

The reason we included association and or corporation in our amendments is that Angelus intends to incorporate in order to help lessen the personal individual liability of the board members. Angelus board members are non-paid.

Sincerely,
Mr. Douglas W. Brown
President of Board of Trustees

ANGELUS MEMORIAL PARK ASSOCIATION

the bank or trust company shall be governed by the provisions of ORS 128.057 and shall not be required to invest the money according to the list approved by the State Treasurer. An officer of the corporation shall file with the Secretary of State on or before April 15 of each year a verified statement in duplicate containing the same information pertaining to the irreducible fund as provided in ORS 97.810 (2) regarding endowment care funds. The Secretary of State may require the corporation to file, as often as he considers it to be necessary, a detailed report of the conditions and assets of the irreducible fund.

(3) The interest or income arising from the irreducible fund provided for in this section or by any bylaws, or so much thereof as is necessary, shall be devoted exclusively to the preservation and embellishment of the grounds, buildings and property of the corporation and the lots and space in buildings or grounds sold to the members of the corporation, or to the payment of the interest or principal of the debts authorized by subsection (5) of this section for the purchase of land, erecting buildings, and improvements. Any surplus thereof not needed or used for such purposes shall be invested as provided in this section and shall become part of the irreducible fund.

(4) After paying for the land and the erection of the original buildings and improvements thereon, all the future receipts and income of the corporation subject to the provisions in this section relating to the creation of an irreducible fund, whether from the sale of lots and burial space, cremation of bodies, donations, gifts and other sources, shall be applied exclusively to laying out, preserving, protecting, embellishing and beautifying the cemetery or the crematory and grounds thereof, and the avenues leading thereto, and to the erection of such buildings and improvements as may be necessary or convenient for cemetery or crematory purposes, and to pay the necessary expenses of the corporation.

(5) No debts shall be contracted by such corporation in anticipation of any future receipts, except for originally purchasing the lands authorized to be purchased by it, laying out and embellishing the grounds and avenues, erecting buildings and vaults on such land, and improving them for the purposes of the corporation. The corporation may issue bonds or notes for debts so contracted and may secure them by way of mortgage upon any of its lands, buildings, property and improvements excepting lots or space conveyed to the members. [1969 c.580 §96; 1971 c.228 §1]

61.765 Selling land unsuited for burials. If in the board of directors' opinion, any portion of the lands of a nonprofit corporation organized and existing solely for the purposes of either owning or operating a cemetery or the cremation of dead bodies and the burial and care of incinerate remains is unsuitable for burial purposes or other purposes of the corporation, the board of directors may sell such portion and apply the proceeds to the general purposes of such corporation in the same proportion and manner as provided by ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1969 c.580 §97]

61.770 Burial lots or space; use, exemption from taxation, execution and liens; lien for purchase price of gravestone. Burial lots or space for burial of incinerate remains in buildings or grounds sold by a nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall be for the sole purpose of interment or deposit and safekeeping of incinerate remains. Such lots or space shall be exempt from taxation, execution, attachment or other lien or process, if used as intended by the purchaser thereof from such corporation, or his assigns or representatives, exclusively for burial purposes, and in no wise with a view to profit. The vendor of any gravestone, however, shall not be prevented from having and enforcing a lien thereon for all or part of its purchase price. If a suit is brought to enforce such a lien, the decree therein is enforceable thereafter; and, for the purpose of enabling the lien to be had and enforced, the gravestone shall be deemed personal property and may be severed and removed, under execution and order of sale, from the lot where it is situated and may be sold in the same manner as any other personal property. [1969 c.580 §98]

61.775 Recording plan; power to improve and regulate grounds. A nonprofit corporation organized and existing solely for the purposes of owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall cause a plan of its land and grounds and of the lots laid out by it and of the niches or burial space in the buildings erected thereon to be made and recorded in the county in which such grounds and land are located, such lots or

SPECIAL PROVISIONS RELATING TO ORS 97.010 TO 97.040, 97.110 TO 97.450, 97.510 TO 97.730, 97.810 TO 97.920 and 97.990

97.010 Definitions for ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990. As used in ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990:

(1) "Human remains" or "remains" means the body of a deceased person in any stage of decomposition or after cremation.

(2) "Cemetery" means any place dedicated to and used, or intended to be used, for the permanent interment of human remains.

(3) "Burial park" means a tract of land for the burial of human remains in the ground used, or intended to be used, and dedicated for cemetery purposes.

(4) "Mausoleum" means a structure for the entombment of human remains in crypts or vaults in a place used, or intended to be used, and dedicated for cemetery purposes.

(5) "Crematory" means a structure containing a retort for the reduction of bodies of deceased persons to cremated remains.

(6) "Columbarium" means a structure or room containing niches for permanent inurnment of cremated remains in a place used, or intended to be used, and dedicated for cemetery purposes.

(7) "Interment" means the disposition of human remains by cremation, inurnment, entombment or burial.

(8) "Cremation" means the reduction of a body of a deceased person to cremated remains in a crematory.

(9) "Inurnment" means placing cremated remains in an urn and depositing it in a niche.

(10) "Entombment" means the placement of human remains in a crypt or vault.

(11) "Burial" means the placement of human remains in a grave.

(12) "Grave" means a space of ground in a burial park used, or intended to be used, for burial of the remains of one person.

(13) "Crypt" or "vault" means a space in a mausoleum of sufficient size used, or intended to be used, to entomb uncremated human remains.

(14) "Niche" is a recess in a columbarium used, or intended to be used, for the interment of the cremated remains of one or more persons.

(15) "Cemetery authority" includes cemetery corporation, association, corporation sole or other person or persons owning or controlling cemetery lands or property.

(16) "Cemetery association" means any corporation or association authorized by its articles to conduct any or all the businesses of a cemetery, but does not include a corporation sole or a charitable, eleemosynary association or corporation.

(17) "Cemetery business," "cemetery businesses" and "cemetery purposes" are used interchangeably and mean any business and purpose requisite or incident to, or necessary for establishing, maintaining, operating, improving or conducting a cemetery, interring human remains, and the care, preservation and embellishment of cemetery property.

(18) "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

(19) "Lot," "plot" or "burial space" means space in a cemetery owned by one or more individuals, an association or fraternal or other organization and used, or intended to be used, for the permanent interment therein of the remains of one or more deceased persons. Such terms include and apply with like effect to one, or more than one, adjoining grave, crypt, vault or niche.

(20) The term "plot owner" or "owner" means any person in whose name a burial plot stands as owner of the right of sepulture therein in the office of the cemetery authority, or who holds from such cemetery authority a conveyance of the right of sepulture or a certificate of ownership of the right of sepulture in a particular lot, plot or space.

(21) "Endowment care" means the general care and maintenance of developed portions of a cemetery and memorials erected thereon financed from the income of a trust fund established and maintained pursuant to the provisions of ORS 97.810 to 97.860. Endowment care cemeteries owned by a city or a county may supplement their general care and maintenance trust funds from general revenues.

(22) "Special care" is any care in excess of endowed care in accordance with the specific directions of any donor of funds for such purposes. [Amended by 1955 c.545 §1; 1965 c.396 §1]

61.736 Procedure for revoking certificate of authority. ORS 57.735, relating to revocation of certificate of authority, is applicable to nonprofit corporations. [1963 c.492 §36 (enacted in lieu of 61.735)]

61.740 [Renumbered 61.984]
