61.741 Application to corporation authorized to transact business in this state on December 31, 1959. Foreign corporations which are duly authorized to transact business in this state on December 31, 1959, for a purpose or purposes for which a corporation might secure such authority under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, shall, subject to the limitations set forth in their respective certificates of authority, be entitled to all the rights and privileges applicable to foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, and from December 31, 1959, such corporations shall be subject to all the limitations, restrictions, liabilities and duties prescribed herein for foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1959 c.580 §80]

61.745 Transacting business without certificate of authority. (1) No foreign corporation transacting business in this state without a certificate of authority shall be permitted to maintain any action, suit or proceeding in any court of this state, until such corporation shall have obtained a certificate of authority. No action, suit or proceeding shall be maintained in any court of this state by any successor or assignee of such corporation on any right, claim or demand arising out of the transaction of business by such corporation in this state, until a certificate of authority shall have been obtained by such corporation or by a corporation which has acquired all or substantially all its assets.

(2) The failure of a foreign corporation to obtain a certificate of authority to transact business in this state shall not impair the validity of any contract or act of such corporation, and shall not prevent such corporation from defending any action, suit or proceeding in any court of this state. [1959 c.580 §81]

CEMETERIES AND CREMATORIES

61.755 Lands of cemetery or crematory corporation; exemption from execution, taxation and condemnation. A nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains, may purchase or take, by gift or devise, and own and hold lands for the sole purpose of either a cemetery or a crematory and burial place for incinerate remains. Such lands shall be exempt from execution and taxation, and from any appropriation for public purposes, and lots or portions of such land and space in any buildings thereon may be sold, if intended to be used exclusively for burial purposes, and in no wise with a view to the profit of the members of such corporation. The land so held for cemetery purposes shall not exceed 600 acres, but if the land already held for such purpose by the corporation is all practically used, the amount thereof may be increased by adding thereto not more than 20 acres at any one time. The land so held for the purposes of a crematory and the burial of incinerate remains shall not exceed 30 acres, but if the land already held for such purposes by the corporation is all practically used, the amount thereof may be increased by adding thereto not more than 10 acres at any one time. [1959 c.580 §95]

61.760 Revenues; restrictions on uses thereof. (1) A nonprofit corporation organized or existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains may, by its bylaws, provide that a stated percentage of the money received from the sale of lots and burial space, cremation of bodies, donations, gifts or other sources of revenue shall constitute an irreducible fund. Any bylaw enacted for the creation of the irreducible fund cannot be amended to reduce the fund.

(2) The board of directors may direct the investment of the money in the irreducible fund, but all investments of money deposited in the fund on or after January 1, 1972, shall be in securities in classes and amounts approved by the State Treasurer and published in a list pursuant to ORS 97.820. If a bank or trust company qualified to engage in the trust business is directed by the board of directors to invest the money in the irreducible fund,

HEALTH AND SAFETY CODE

DIVISION 7. DEAD BODIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. DEFINITIONS

7000. The definitions in this chapter apply to this division and to visions 8 and 9 of this code.

7001. "Human remains" or "remains" means the body of a deceased rson, and includes the body in any stage of decomposition and cremated mains.

7002. "Cremated remains" means human remains after incineration d necessary processing under Section 7054.1 in a crematory.

7003. "Cemetery" means any one, or a combination of more than one, the following, in a place used, or intended to be used, and dedicated, r cemetery purposes:

(a) A burial park, for earth interments.

(b) A mausoleum, for crypt or vault interments.

(c) A crematory, or a crematory and columbarium, for cinerary terments.

7004. "Burial park" means a tract of land for the burial of human mains in the ground, used or intended to be used, and dedicated, for metery purposes.

7005. Except in Part 5 of Division 8 of this code, "mausoleum" means tructure or building for the entombment of human remains in crypts vaults in a place used, or intended to be used, and dedicated, for metery purposes.

7006. "Crematory" means a building or structure containing one or ore furnaces for the reduction of bodies of deceased persons to cremated mains.

7007. Except in Part 5 of Division 8 of this code, "columbarium" means tructure, room, or other space in a building or structure containing hes for inurnment of cremated human remains in a place used, or ended to be used, and dedicated, for cemetery purposes.

7008. "Crematory and columbarium" means a building or structure ntaining both a crematory and columbarium.

7009. "Interment" means the disposition of human remains by rnment, entombment, or burial in a cemetery or, in the case of mated remains, by inurnment, entombment, burial, or burial at sea as ovided in Section 7117.

7010. "Cremation" means the reduction of the body of a deceased rson to cremated remains in a crematory and the placement of the mated remains in a grave, vault or niche or burial at sea as provided Section 7117 of this code.

7011. "Inurnment" means placing cremated remains in an urn and acing it in a niche.

7012. "Entombment" means the placement of human remains in a ypt or vault.

7013. "Burial" means the placement of human remains in a grave.

7014. "Grave" means a space of ground in a burial park, used, or tended to be used, for burial.

7015. "Crypt" or "vault" means a space in a mausoleum of sufficient e, used or intended to be used, to entomb uncremated human remains.

7016. "Niche" means a space in a columbarium used, or intended to be used, for inurnment of cremated human remains.

7017. "Temporary receiving vault" means a vault used or intended to be used for the temporary placement of human remains.

7018. "Cemetery authority" includes cemetery association, corporation sole, or other person owning or controlling cemetery lands or property.

7019. "Cemetery corporation," "cemetery association," or "cemetery corporation or association" mean any corporation now or hereafter organized which is or may be authorized by its articles to conduct any one or more or all of the businesses of a cemetery, but do not mean or include a corporation sole.

7020. "Cemetery business," "cemetery businesses," and "cemetery purposes" are used interchangeably and mean any and all business and purposes requisite to, necessary for, or incident to, establishing, maintaining, operating, improving, or conducting a cemetery, interring human remains, and the care, preservation, and embellishment of cemetery property, including, but not limited to, any activity or business designed for the benefit, service, convenience, education, or spiritual uplift of property owners or persons visiting the cemetery.

7021. "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

7022. "Lot," "plot," or "interment plot" means space in a cemetery, used or intended to be used for the interment of human remains. Such terms include and apply to one or more than one adjoining graves, one or more than one adjoining crypts or vaults, or one or more than one adjoining niches.

7023. "Plot owner," "owner," or "lot proprietor" means any person in whose name an interment plot stands of record as owner, in the office of a cemetery authority.

7024. "Permit for Disposition of Human Remains" includes "burial permit" and is a permit, issued pursuant to law, for the interment, disinterment, removal, reinterment or transportation of human remains.

DIVISION 8. CEMETERIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. CEMETERY DEFINED

8100. Six or more human bodies being buried at one place constitute the place a cemetery.

CHAPTER 2. VANDALISM

8101. (a) Every person is guilty of a misdemeanor and punishable by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not exceeding one year, or by both, who maliciously does any of the following:

(1) Destroys, cuts, mutilates, effaces, or otherwise injures, tears down, or removes any tomb, monument, memorial, or marker in a cemetery, or any gate, door, fence, wall, post or railing, or any inclosure for the protection of a cemetery or any property in a cemetery.

(2) Obliterates any grave, vault, niche, or crypt.

(3) Destroys, cuts, breaks or injures any building, statuary, ornamentation, tree, shrub, or plant within the limits of a cemetery.

Bankrupt Palmer cemetery's fate still in limbo

Cemetery bankruptcy affects more than 1,000 consumers.

by Rebecca Goodman

Sighs of relief swept across a federal courtroom in Anchorage as nearly 100 older consumers heard Judge Douglas Williams' decision to delay for three months abandonment of the bankrupt Valley Memory Gardens Cemetery in Palmer.

But consumers' relief may be premature and, for some, may never come.

There are still no buyers ready to take over the cemetery property.

Even worse, consumers who purchased pre-need funeral services will probably never recover their money for those items.

The 90-day delay granted by Williams allows the state Consumer Protection Office time to locate a buyer for the nine-acre cemetery.

Included in the bankruptcy case—the biggest in Alaska's history in terms of numbers of creditors involved—are over 1,000 consumers who purchased plots and pre-need funeral services from the cemetery between 1966 and 1982. Many of those consumers, frustrated and angry about their financial losses, sat through long hours of court hearings last month trying to figure out what happened to their money.

Court testimony painted a confusing picture of cemetery mismanagement and complicated land deals. It was testified that:

- Arthur Richmond, as president and major shareholder of Valley Memory Gardens, Inc., neglected to put consumers' money for pre-need services into individual trust accounts as required by state law.
- The cemetery firm used the proceeds from consumers' pre-need sales to buy more than 40 acres of residential lots in the Matanuska Valley with the intention of subdividing for profit.
- Consumers' deeds of trusts to their cemetery plots were not, according to Richmond, legal deeds of trust transferring ownership rights. The cemetery intended for those deeds to be considered "certificates of pre-arrangement" only.
- The cemetery was a major portion of collateral in a loan deal involving the cemetery firm, Arthur Richmond, and another businessman, Wayne Lofgren. They borrowed $500,000 from the Matanuska Valley Valley Federal Credit Union to finance a new business venture, then defaulted on the loan.

As the major creditor in the case, the Matanuska Valley Federal Credit Union could become the new owner of the cemetery in mid-February. However, the court is accommodating consumers by allowing the Consumer Protection Office and assistant attorney general Connie Sipe a chance to locate a buyer for the cemetery by February 17, 1983.

If the credit union becomes owner, it is uncertain what would happen to the cemetery

Bankruptcy frustrates cemetery consumers

by Rebecca Goodman

The gray-haired woman jostled through the packed courtroom clearing a path for the disabled man behind her. He moved haltingly on his one leg with crutches, searching each row for vacant seats.

The pair had already spent an hour winding up and down corridors and stairs as court officials herded consumers through two courtrooms too small to hold everyone.

It was standing room only in this big courtroom too. The man and women had to settle for vacant wall-space to lean against.

During the next two hours they listened along with more than 100 other consumers to questions and testimony in the bankruptcy proceedings of the Valley Memory Gardens cemetery.

The man grew impatient and more agitated with every question. He muttered aloud: "They act as though there's nobody even buried out there... What's going to happen to my kids' graves?"

The audience exploded when one attorney explained that consumers probably would lose not only their money, but also their cemetery plot.

Several consumers shouted. "We should've been warned if they weren't placing our money into trust accounts... Why aren't they filing criminal charges?"

Finally the man gathered his nerve and raised his hand to speak.

"I have some questions that I think every single person in this courtroom wants answered," he began.

"I bought land and headstones and vaults at Valley Memory and I have two people buried there. I scraped together money and paid for

OPINION PAGES

'Cemetery laws in this state are lousy'

"I didn't know that my cemetery plot came with a 'consumer beware' tag attached to the deed," said one disgruntled older consumer involved in the Valley Memory Gardens cemetery bankruptcy.

"Boy! The cemetery laws in this state are lousy," he fumed.

As is reported elsewhere in this issue, more than 1,000 Alaskan consumers are caught up in the Palmer cemetery's bankruptcy and stand to lose all or nearly all of the money they have paid for cemetery lots and funeral services. Probably all of them would agree with that assessment of Alaska's laws on cemetery operation.

The most startling single thing to come out of the Valley Memory case–aside from the losses suffered by individuals and families–is this:

As it stands right now, Alaska just doesn't even have basic laws regulating cemeteries.

It would certainly seem appropriate that the new state administration and the new legislature address this lack of consumer protection laws as a top priority.

This present lack of laws with teeth in them hit consumers three different ways in the Valley Memory case:

1. There are no regulatory boards overseeing cemetery sales practices.

2. There are no dedication procedures for cemeteries. (Procedures that would recognize cemeteries as special purpose property and set aside that property forever.)

3. There are no requirements that each deed in a burial plot must be recorded as property.

The main problem–lack of regulatory boards to oversee cemetery practices–means that there is no clout behind the few cemetery laws that are on the books.

For example, a 1977 law requires that individual trust accounts be established by cemetery firms to handle every pre-need sale of funeral services.

In the Valley Memory Gardens case, court testimony revealed that consumers' money for pre-need sales was held for a short while in a single collective trust prior to 1979. Then, as a financial squeeze hit the firm, the trust moneys, according to court testimony, were removed from the trust account and distributed to general fund accounts. Consumers' money vanished.

Currently, Alaska has no statutes to provide for regular checks on established trust accounts of consumers' sales funds. It is left to the cemetery firm to establish and maintain these trust accounts. As evidenced in the Valley Memory Gardens bankruptcy, the requirement to establish trust accounts is a weak law.

A second problem that hurt Valley Memory Gardens consumers was the lack of dedication procedures for cemeteries. Dedication means that designated property is recognized as a cemetery forever and cannot be abandoned. If something happens to the property to threaten its cemetery status, dedication would provide for "rescue" and maintenance by the state.

In the Valley Memory Gardens case, the cemetery was viewed as commercial property: 5,500 unsold, unoccupied cemetery plots. In a loan arrangement in 1980 with the Matanuska Valley Federal Credit Union, owners of the cemetery, used this commercial value to obtain a $500,000 loan. The cemetery with its 500 occupied gravesites became the major portion of collateral for the $500,000 loan.

When the loan was defaulted upon, consumers who had purchased plots or had relatives buried in Valley Memory Gardens were astonished to discover that mortgages could be made on cemeteries.

According to Connie Sipe, assistant attorney general for Alaska: "No one should ever be allowed to make mortgages on cemeteries; that's why dedication procedures are important. We need to restructure the laws."

The third problem area needs attention too: there are no requirements that each deed to a burial plot must be recorded as property.

In the Valley Memory Gardens case, consumers' plots do not show up in the district recorder's title records. The nine-acre cemetery property is recorded, but not each individual gravesite.

There is now some question whether consumers' deeds of trust to their cemetery plots are actually legal deeds. In court testimony, Arthur Richmond, president of the cemetery firm, stated that those deeds were for "right to future interment" only. No ownership rights were transferred according to Richmond's testimony.

Since there were no plots recorded as property in the district recorder's office and no laws requiring such a record, consumers may be the ultimate losers in this controversy over deeds.

In commenting on the case, Sipe, who is head of the state's consumer protection agency, said:

"In most states there is more protection for consumers.

"Maybe we can prevent this from happening again if the statutes are changed to protect future consumers of cemetery services. Some good may still come out of this case."

But that will only happen if the state administration and the legislature take it upon themselves to make sure that a Valley Memory Gardens case doesn't happen again.

Need information? Try OPAG's directory

Recently we attended a large meeting of senior citizens where participants were urged to voice their most pressing problems.

"There's no place we can go to get all the information we need," said one woman to a round of applause.

In a way, she is right. lady seemed to want, it does contain a wealth of information of help to the senior citizen.

Two years ago the state Division of Adult and Aging Services gave OPAG a pilot project grant to publish the first directory, a 68-page compilation of agencies, programs, organizations and business zations directly affecting seniors. These listings cover 89 different communities across the state.

Information for the directory was gathered from a variety of sources, including local senior citizen programs, local organizations and state aging officials.

Seniors have told us they like "(This is) one of the best pieces here because it is just right," he said of the booklet. "Shape and contents and handling all fit together ideally; heads (headlines) visible at a glance, clear and incisive."

A grant from the Municipality of Anchorage to OPAG included

Valley Memory Gardens:

Cemetery 20-year history reveals land deals

A legal tangle of questions remains to be answered about events leading up to the Valley Memory Gardens Cemetery bankruptcy.

To put recent events into perspective, it's helpful to look at the history of the cemetery, from 1962 to present:

1962 – Arthur Richmond purchased property for Valley Memory Gardens Cemetery on Old Palmer Highway. Richmond sold lots, vaults and funeral services. He testified during recent court hearings that no pre-need services were sold between 1962 and 1966.

1966 – Valley Memory Gardens is incorporated. Assets conveyed into the limited corporation include 20 acres with shop buildings, house, equipment and cemetery. Richmond's shareholder interest in the corporation is, by his own estimate, 85 percent. There are 10 to 12 other shareholders, all with small interests in the corporation.

In 1966 Richmond began selling a pre-need package plan that included a plot, vault and services. The average cost of these pre-need plans was $4,000. According to Richmond, land was purchased by the corporation during this period and by 1980 over 40 acres of land had been acquired with the purpose of subdividing and selling as residential lots.

Richmond testified recently that all proceeds from sales were plowed back into the cemetery corporation. Valley Memory Gardens, Inc. sold the contracts for both residential lots and cemetery plots and services to three finance corporations in exchange for cash advances. These cash advances ranged between 50 and 90 percent of the face value of the contracts. Although no total dollar figure was disclosed in recent testimony, Richmond testified that the cash advances for these contracts accounted for a significant portion of Valley Memory Gardens' operating income.

1977 – The State of Alaska amended the Alaska Consumer Protection Act to require that all funerals and other services sold to families on a pre-need basis be fully funded in individual trust accounts for the benefits of persons purchasing those services.

1978 – According to recent court testimony by Dean Erich, Valley Memory Gardens' secretary-treasurer, the corporation had a single collective trust endowment account in National Bank of Alaska that totaled approximately $200,000 to $300,000 during 1977-1978. Erich further stated that when he became a corporate officer in 1979, records indicated that these trust funds had been transferred to a general account.

1979 – Consumer Protection Office filed suit against Valley Memory Gardens, Inc. charging the cemetery with six counts of fraud in the sale of pre-need funeral services. The suit charged that Valley Memory Gardens was in violation of the 1977 law requiring trust accounts for pre-need contracts.

August 22, 1979 – Consumer Protection Office received sworn deposition from Arthur Richmond claiming that a trust account was established for pre-need services. No sum was disclosed in that deposition.

1980 – During recent court hearings, Richmond testified that he was approached by a loan broker, William Lang and an investor, Wayne Lofgren, in 1980 to arrange a $500,000 loan for needed operating funds from the 11,000-member Matanuska Valley Federal Credit Union. Richmond claims that the credit union gave the cemetery corporation $25,000, promised it another $25,000 to be [illegible] planned to use the loan money for the plant.

The collateral used for that credit union loan included the cemetery, approximately 22 acres of adjacent property and contracts from cemetery sales. Richmond claims that no attorney was present during loan transactions. Richmond also testified that Lofgren put up no collateral of his own, yet received approximately $450,000 of the $500,000 loan.

According to credit union attorney, Jan Ostrovsky, Lofgren has paid back some portion of that $500,000 loan. According to Richmond, Lofgren has paid back a $28,000 Small Business Administration loan included in the $500,000 loan package.

January 1981 – Dean Erich, secretary-treasurer of VMG, Inc., testified recently that the cemetery corporation had a single trust account during this time that totaled approximately $6,000 to $7,000.

April 1981 – Two years after it initiated the suit, the Consumer Protection Office received a consent judgement in the 1979 suit against Valley Memory Gardens. The cemetery refused to acknowledge any wrongdoing. It later appealed the order to retroactively place all money it had received since January 1, 1977 for pre-need services into separate trust accounts. The cemetery corporation claimed it was sufficient that all money was in one collective trust.

September 1981 – Valley Memory Gardens, Inc. files for bankruptcy under Chapter 11 of the U.S. bankruptcy code to allow for reorganization of the corporation.

January 1982 – The 1981 appeal by Valley Memory Gardens regarding the legality of establishing a single collective trust fund fails. The Alaska Supreme Coun upholds the earlier order that pre-need payments must be placed into individual trust accounts.

June 1982 – Bennie Leonard of Anchorage, a real estate sales representative, is appointed trustee by the bankruptcy court to take possession of all cemetery assets during bankruptcy proceedings. Services by the cemetery were officially halted June 16, 1982. No further payments were accepted by the corporation after this date.

July 1982 – Valley Memory Gardens, Inc. files for bankruptcy under Chapter 7, which mandates the complete liquidation of company assets and payment distribution to the creditors.

September 1982 – Federal bankruptcy court approves the motion to move Valley Memory Gardens into Chapter 7 bankruptcy. All consumers who have purchased services from the cemetery and received no "performance" on those purchases become creditors according to bankruptcy law.

November 16, 1982 – During abandonment hearings, a federal judge gives a 90-day continuance to allow consumer creditors time to locate a buyer for the cemetery. This move delays abandonment of the cemetery to the major creditor with a secured (mortgaged) claim, the Matanuska Valley Federal Credit Union. Connie Sipe, assistant attorney general, was given until February 17, 1983 to locate a buyer for the Valley Memory Gardens cemetery. Sipe continued to explore options and benefits of starting a non-profit cemetery association or expanding an existing one. Sipe planned to poll creditors about their opinions on the non-profit association idea in late November.

November 18, 1982 – Arthur Richmond appeared in court during continuation of the first creditors' meeting. Three hours of questioning shed little light on what happened to consumers' money. Richmond refused to answer or failed to recall numerous details about the events that led to the bankruptcy.

Alert issued to locate all creditors

The State Consumer Protection Office is seeking all consumers involved in the Valley Memory Gardens Cemetery bankruptcy case.

So far the list has grown to over 1,200 persons and is expected to reach 1,500. The state office is particularly concerned about consumers who purchased services or lots from the cemetery then moved outside of Alaska.

If you know someone who bought cemetery services and may be unaware of the current bankruptcy proceedings, contact Connie Sipe at the Consumer Protection Office, (907) 279-0428.

...during this period...over 40 acres was acquired with the purpose of subdividing and selling residential lots

Valley Memory Gardens:

Bankrupt Palmer cemetery's fate still in limbo

Continued from page 1

property. One option open to the credit union includes sale of the cemetery lands and consolidation of existing plots into a smaller parcel of land.

"We're hoping it won't come to that," Sipe explained. "The State's No. 1 priority in this case is to preserve the cemetery and the right to peaceful burial."

Consumers must now decide what options to pursue to save the cemetery and existing plots.

Since it is unlikely that a for-profit cemetery firm would move in and take over the financial woes of the Valley Memory Gardens cemetery, the current focus is on non-profit cemetery associations.

The Consumer Protection Office is exploring alternatives for non-profit associations and is about to poll consumers on those alternatives.

One alternative would expand an existing non-profit cemetery association. The other would form an entirely new non-profit association.

"From the poll, we'll decide whether consumers feel this is worth pursuing and how much they'd be willing to spend on membership fees," Sipe said.

As far as court proceedings are concerned, many questions remain unanswered.

Richmond's questioning during a recent creditors' meeting shed little light on what happened to consumers' money. He refused to answer many questions and often could not recall answers to other questions.

Attorneys for the creditors tried to determine whether any trust funds were established by the cemetery for consumers' pre-need accounts.

Under a 1977 amendment to the Consumer Protection Act, funeral directors are required to place into individual trust accounts all funds for funerals and other services sold on a pre-need basis.

Court testimony from Richmond revealed that one collective trust may have been established sometime prior to 1979 and may have contained a total of $100,000.

Secretary-treasurer of Valley Memory Gardens, Inc., Dean Erich, testified that those trust funds were transferred into general accounts sometime after 1979.

The cemetery firm operated for years as a land development company, according to attorney for the trustee, Cabot Christianson.

"The cemetery was really only a small part of the lands owned out there," Christianson said. "There's a 38-acre subdivision, and property all over in the valley being foreclosed upon.

"It appears that the corporation took consumers' money and put it into undeveloped lands with the hopes of big money from sales of residential lots," he added.

One of consumers' biggest concerns is whether their deeds of trust to cemetery plots are actually legal deeds with ownership rights.

Across the top of most deeds issued after 1966 are the words "deed for right to be interred."

There are no seals or stamps on most deeds, and Richmond claims that the cemetery considered the papers "certificates of pre-arrangement" only, without rights of ownership.

The cemetery lots do not show up in the property records by the district recorder, and it would appear that the deeds are not considered acceptable property deeds.

In a similar case in Washington courts, certificates of pre-arrangement were not considered by the courts as real deeds of trust.

Some future ruling on the legality of these papers may be necessary if abandonment proceedings are continued in mid-February.

The court-appointed trustee for the case, Bennie Leonard, an Anchorage real estate representative, is currently reviewing all claims against the cemetery.

The biggest single claim is held by the Matenuska Valley Federal Credit Union for its $500,000 loan to Richmond, the cemetery and Lofgren.

Under bankruptcy laws, the credit union's claims take priority over all consumers' claims.

Leonard and attorneys in the case are attempting to piece together what happened in 1980 when the loan deal was arranged, then defaulted upon.

Richmond said that Lofgren intended to invest the loan money in a new fish processing plant in Palmer. Richmond said he received $25,000 of the loan and a "promise" of another $25,000 to be handed over in six months.

According to Richmond's testimony, Lofgren paid off a $28,000 Small Business Administration loan, but ended up with the remaining $400,000.

Credit union officials report that some portion of the loan was paid back by Lofgren. No other details were revealed.

Attorneys continue to explore the loan arrangement, and the questions surrounding the signing of papers. Richmond said that no attorney was present during the signing procedures and has mentioned a number of "promises" that were never placed in writing.

No criminal charges have been filed in this case, but the district attorney is following the proceedings.

According to Sipe, the case may not be resolved for another six to 12 months.

In the meantime, consumers are being informed of proceedings and requested to return their opinion polls on the matter of forming a non-profit association.

"This case points out the need for more protection for consumers," Sipe said. "Some think that we over-regulate, but it should be known that Alaska lacks some basic laws for consumer protection in this area. We need to completely re-structure cemetery laws in this state."

Cemetery president Richmond

President of Valley Memory Gardens cemetery, Arthur Richmond, has been an elusive figure throughout bankruptcy proceedings. Richmond tried - unsuccessfully - to dodge a Senior Voice photographer prior to his appearance at a recent creditors' meeting in the Federal Building in Anchorage.

Questions about deeds, trusts, money and laws surround case

Editor's note: Throughout bankruptcy hearings for the Valley Memory Gardens cemetery, consumers have struggled to understand what happened. They want to know where their money went, whether their contracts will be honored, whether criminal charges will be filed and what the state cemetery laws cover. Senior Voice tackled answers to those questions and more...

Q: What happened to consumers' money? What did Valley Memory Gardens do with pre-need funeral service payments?

A: Arthur Richmond, president of Valley Memory Gardens, Inc., has refused to answer those questions. From court testimony of other witnesses, however, it appears that the cemetery took consumers' money and, rather than placing it into trust through and invested moneys were lost.

Q: Do we have legal deeds of trust with ownership rights to our cemetery plots?

A: According to Connie Sipe, assistant attorney general, the deeds held by consumers may not actually be deeds. Most of the deeds are titled "deed for interment rights." Richmond said in court that those deeds were pre-arrangement rights, not ownership rights. It remains for the courts to figure out what consumers actually have in those "deeds."

Q: Why aren't the cemetery lots recorded as deeds of trust?

A: Apparently state law does not require deeds to burial plots to be recorded as property. Property record of cemetery lots does not show up in the official title records. Burial plots are not accepted by the district recorder.

Q: What [illegible]

vidual trust deposits for every consumer purchasing pre-need funeral services. The 1977 laws do not cover cemetery spaces, just pre-paid plans.

Q: Will criminal charges be filed against Richmond or others?

A: To bring criminal charges against Richmond would require the involvement of the district attorney. Currently the district attorney is reviewing the matter. It would have to be shown that Richmond took cor-

Valley Memory Gardens:

Few alternatives left for cemetery creditors

It's a hard lump to swallow.

No one likes being "ripped off." And no one likes the idea of plunking down more money just to hang onto what he or she already owns.

But that's the problem facing over 1,000 Anchorage area consumers, mostly older persons, as a result of the Valley Memory Gardens bankruptcy case.

The cemetery's bankruptcy is shaping up to be what the Internal Revenue Service calls a "totally worthless bad debt." Creditors who paid as much as thousands of dollars for lots and services may end up with little or nothing.

So where does that leave the persons who paid for cemetery services or lots? What alternatives are there for recouping losses or planning new funeral arrangements?

For those consumers who paid only for funeral services, but not for lots, there is little hope of recovering any money owed them by the cemetery. About the only alternative these consumers have is a possible tax write-off for bad debts.

Any consumer involved in the bankruptcy case who wants to know what their tax write-off options are should call the Internal Revenue Service for publication 548, "Deductions for Bad Debts." Call 276-1040 or write the I.R.S., P.O. Box 1500, Anchorage 99510.

According to tax specialist Marie Luzzano, "Consumers will have to prove that their contract with the cemetery is worthless and a mere bankruptcy doesn't prove that it's worthless."

In other words, to file capital loss deductions, consumers will have to wait until final distribution of assets has been made at the end of the bankruptcy hearings six to 12 months from now.

For consumers who purchased cemetery lots, the alternatives look more positive.

More than 100 consumers owed money by the bankrupt Valley Memory Gardens Cemetery line up outside federal courtrooms in Anchorage during a recent abandonment hearing. The crowds were so large that court officials had to move hearings to a larger courtroom. Involved in the case are some 1,000 consumers who purchased plots and pre-need funeral services.

If the State of Alaska Consumer Protection Office manages to locate a buyer for the cemetery before February 17, 1983, the federal bankruptcy court will not abandon the cemetery lot to the major creditor, the Matanuska Valley Federal Credit Union.

But finding a buyer won't be easy. It is unlikely that a for-profit cemetery would agree to take over Valley Memory Gaidens. The legal and financial complications alone would probably prevent such a business from being a profitable enterprise.

For that reason, the Consumer Protection Office is exploring two alternatives involving non-profit cemetery associations.

The two alternatives include expanding an ongoing non-profit cemetery association such as Angelus Memorial Park in Anchorage, or forming an entirely new non-profit association.

Either way, all consumer creditors would be asked to join the association for a membership fee that would cover equipment and caretaking costs for the cemetery. Membership would not be limited to those who purchased lots at Valley Memory Gardens; anyone could join.

A new non-profit cemetery association would require only five members to form and would be permitted to operate cemetery land so that people who have paid for plots could still be buried there in the places they have already paid for.

Cynthia Sipe, assistant attorney general with the Consumer Protection Office, is currently polling all consumers involved in the case to determine their interest level in forming a non-profit association. Sipe also wants to find out how much consumers would be willing to pay for association membership fees.

"It's up to the consumers to let me know whether they think this idea is worth pursuing," Sipe said. "A non-profit cemetery association is really the best deal we can work out."

For consumers who want to begin again to plan funeral arrangements, one local consumer-run, non-profit society assists consumers in funeral pre-arrangement details.

Whether you're interested in cremations, simple ceremonies or elaborate services, the Cook Inlet Memorial Society offers, for a $10 one-time membership fee, the opportunity to compare cost levels of various funeral services and arrange through the society's contractual agreement with a local funeral director some of the lowest-cost services available in the Anchorage area.

As a new member, you are asked to fill out a simple form giving instructions to your family and/or funeral director spelling out exactly what you want. A copy of your form is kept on file with the society and with the funeral director.

For more information about Cook Inlet Memorial Society, contact Fred Gazaway, president, at 277-2073 or write CIMS, P.O. Box 2414, Anchorage, AK 99510.

Glossary spells out explanations of bankruptcy legal terminology

Chapter 11 bankruptcy – Bankruptcy laws are federal laws that pre-empt all state laws. Chapter 11 is corporate reorganization and allows a corporation to evaluate their situation and recover, if possible.

Chapter 7 bankruptcy – Chapter 7 bankruptcy is complete liquidation of assets with no hope of reorganization. All assets are taken and divided up according to federal bankruptcy law. Valley federal court judge in a bankruptcy case to stop all actions by the corporation. It is the trustee's responsibility to figure out how to pay the biggest creditors and legally proceed to pay off debts.

Creditors – There are two sorts of creditors, those with secured claims and those with unsecured claims. The credit union is the major creditor in this case because it has a secured (mortgaged) claim on the cemetery for its the cemetery and are now owed money because the cemetery either lost their money or failed to perform on consumers' contracts.

Creditors' Committee – Group of five consumers nominated by the consumers themselves to supervise the trustee. The creditors' committee may call creditors meetings for the purpose of gathering information. Creditors' meetings are not attended by federal court judges.

Valley Memory Gardens:

Bankruptcy frustrates consumers

Continued from page 1

everything—$12,000 for all of it. My question is, do I still have it?

"And if my kids have to be moved, who's going to pay for it and who in the court will order it? And why isn't the judge here to hear this?"

The attorneys glanced at each other, not knowing where to begin to tackle the man's barrage of questions.

Breaking the uncomfortable silence, Candy Powers, clerk of court, answered his last question first.

"During the first meeting of creditors, the bankruptcy court operates without the bankruptcy judge. Please understand that this is only the beginning and it doesn't happen very fast," Powers said.

The man on crutches never did get any real answers to his questions until the proceedings ended.

That's when Connie Sipe, assistant attorney general, took over the task of fielding questions from frustrated, confused consumers.

"This is going to get more legally complicated, but I will keep you informed of everything that happens," Sipe promised.

"To answer your questions," Sipe nodded to the man on crutches, "the deeds held by consumers may not actually be deeds; it isn't a black-and-white issue.

"We're trying to figure out whether those papers are promises for interment rights or real deeds of ownership. We figure 90 percent of the consumers don't have any real deeds; they have pre-arrangement certificates."

Consumers who had begun to leave the courtroom at the end of proceedings drew closer to hear Sipe's remarks.

"And as to the removal of bodies," Sipe continued, "the state is in opposition to removal of anyone from that cemetery. We can prevent the abandonment of the cemetery if we start a non-profit cemetery association run by consumers. You must all show up at the next abandonment hearing to let the judge know how you feel. The state agrees with consumers; the cemetery should not be abandoned."

To help consumers understand the proceedings of the bankruptcy hearings, Sipe has issued summaries of events to over 1,000 consumers owed money by the cemetery firm.

During the creditors' meeting, Sipe patiently answered several dozen questions by consumers.

One older woman asked: "What happens if I die tomorrow?"

Sipe replied: "No one can be buried in that cemetery right now, everything's in limbo. About all I can say is 'try not to die for awhile.'"

Another woman asked: "When we heard it was no longer a sound business we stopped our payments into the pre-need account. Valley Memory went to a collections agency and they tried to ruin our credit rating. All we wanted was to be sure that it was a sound business. Who wants to pay for something they won't ever get to use?"

Sipe explained how Valley Memory took its consumer contracts to finance corporations in exchange for cash advances for about 60 percent of the face value of the contracts.

"Even if a business sells a payment to a third party, you still don't have to pay that third party if the original contract was broken," Sipe added. "You can see how complicated each individual case can become."

Others complained about not being notified of the bankruptcy.

"I wasn't even aware of the problem," said one man. "My wife died last spring and I ordered a headstone in July. My check was cashed by the cemetery, but no headstone ever showed up. I got nothing."

Another consumer remarked, "Richmond gave me information saying that Valley Memory Gardens belonged to a national cemetery organization and if we purchased services with him, those would be transferable to other cemeteries. Is that so?"

Sipe promised to ask Richmond this question and did so during a second creditors' meeting. Court testimony revealed that despite the $50 annual dues required for membership in the national cemetery organization, about the only guarantees provided were for yearly certificates to post on the cemetery's office wall.

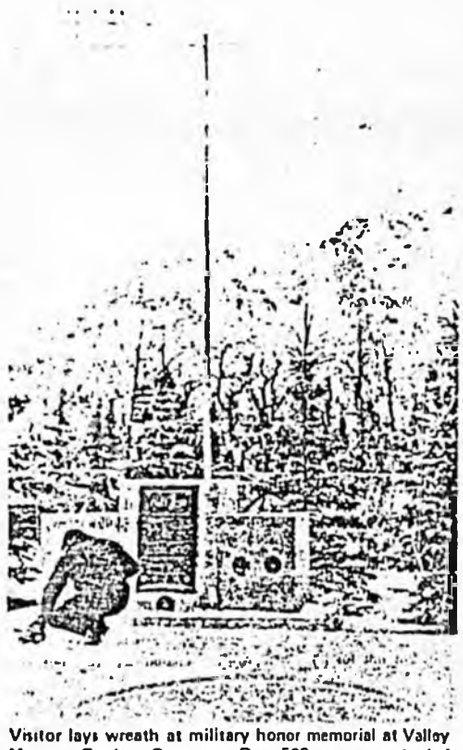
One man listened a long while to the questions and answers, then held up his deed and said, "I'll sell this to anyone who wants it—real cheap."

There was little laughter.

Sipe summed up the feelings of consumers by saying:

"We need big improvements in the cemetery laws. Too many consumers have spent considerable sums of money and have no hope of ever recovering it.

This is the hardest and saddest case I've ever dealt with."



Visitor lays wreath at military honor memorial at Valley Memory Gardens Cemetery. Over 500 persons are buried in the nine-acre Palmer cemetery.

Questions surround use of money, deeds, trust

Continued from page 7

porate funds and used them for personal uses for any criminal charges to be filed. Richmond invested funds for corporate uses in the documents reviewed by the court.

Q: Who are the major creditors with outstanding claims against the cemetery property?

A: Those with secured or mortgaged claims include the Matanuska Valley Federal Credit Union, $500,000 loan; Alaska Pacific Bank, $15,000 loan; National Bank of Alaska, $10,000 priority under bankruptcy law.

Q: What will happen if the cemetery is abandoned to the Matanuska Valley Federal Credit Union, the largest creditor?

A: The credit union is under obligation to its shareholders to get the most money possible from property and investments. That obligation may also apply to the commercial value of the cemetery property. In three similar cemetery abandonments in the State of Washington, the cemeteries were consolidated, bodies exhumed

MEMORANDUM

February 13, 1984

SUBJECT: Sectional analysis of HB 569

TO: Representative Randy Phillips

FROM: Edward H. Hein EHH
Legislative Counsel

Section 1 allows a nonprofit cemetery to incorporate under AS 10.20 as an alternative to forming as a cemetery association.

Section 2 adds clean-up provisions necessitated by section 1.

Section 3 expands to which a cemetery's endowment fund may be put to include improvement of the grounds, buildings, and lots, and the repayment of debts.

Section 4 adds clean-up provisions necessitated by section 1.

Section 5 expands a nonprofit cemetery's authority borrow money to construct and repair buildings and mausoleums, to purchase or lease equipment, and other purposes. Such debts may be secured by mortgages on the cemetery's land, except those burial lots in which association members or corporate officers, trustees, or employees have more than a one-half interest.

Sections 6 - 11 add clean-up language necessitated by section 1.

Section 12 adds a definition for the term "cemetery lot".

CEMETERY
AND
OFFICE
ON KLATT ROAD

Representative Joe Hayes
Alaska State Legislature
Juneau, Alaska

Atten: Mr. Jeff Day:

The Board of Trustees of Angelus Memorial Park Association approved a motion to present to the Legislature, amendments to the Alaska Cemetery Statutes, pertaining to non-profit cemetery associations. A committee was appointed consisting of Mr. Alvah C. Buswell, Jr. and Mr. Robert F. Shary, who are board members and Mr. Sidney Abbott, park manager, to work on the proposed amendments of the present statutes.

The present Alaska non-profit cemetery statutes were patterned after the Oregon Statutes many years ago before Statehood and are badly out dated. The State of Oregon has since amended their Statutes, twice, and now Alaska needs to do the same, so that a non-profit cemetery can better serve the community. To our knowledge Angelus is the only non-profit cemetery in the state.

Enclosed are copies of Oregon Statutes that have been amended and a copy of our proposed revisions to the Alaska State Cemetery Statutes.

The association realy needs these changes in order to grow, as it is now, we can not serve the community as a modern cemetery, because of the way the laws are written. The public wants all the services a cemetery is suppose to supply, such as, a columbarium for inurnment of cremated remains, mausoleum, niches and storage vault. Also we can not even build a much needed administration building. We now have to rent a very inadequate building for an office. The association has never had a maintenance building. The present laws prevent our growth.

The reason we included association and or corporation in our amendments is that Angelus intends to incorporate in order to help lessen the personal individual liability of the board members. Angelus board members are non-paid.

Sincerely,
Mr. Douglas W. Brown
President of Board of Trustees

ANGELUS MEMORIAL PARK ASSOCIATION

the bank or trust company shall be governed by the provisions of ORS 128.057 and shall not be required to invest the money according to the list approved by the State Treasurer. An officer of the corporation shall file with the Secretary of State on or before April 15 of each year a verified statement in duplicate containing the same information pertaining to the irreducible fund as provided in ORS 97.810 (2) regarding endowment care funds. The Secretary of State may require the corporation to file, as often as he considers it to be necessary, a detailed report of the conditions and assets of the irreducible fund.

(3) The interest or income arising from the irreducible fund provided for in this section or by any bylaws, or so much thereof as is necessary, shall be devoted exclusively to the preservation and embellishment of the grounds, buildings and property of the corporation and the lots and space in buildings or grounds sold to the members of the corporation, or to the payment of the interest or principal of the debts authorized by subsection (5) of this section for the purchase of land, erecting buildings, and improvements. Any surplus thereof not needed or used for such purposes shall be invested as provided in this section and shall become part of the irreducible fund.

(4) After paying for the land and the erection of the original buildings and improvements thereon, all the future receipts and income of the corporation subject to the provisions in this section relating to the creation of an irreducible fund, whether from the sale of lots and burial space, cremation of bodies, donations, gifts and other sources, shall be applied exclusively to laying out, preserving, protecting, embellishing and beautifying the cemetery or the crematory and grounds thereof, and the avenues leading thereto, and to the erection of such buildings and improvements as may be necessary or convenient for cemetery or crematory purposes, and to pay the necessary expenses of the corporation.

(5) No debts shall be contracted by such corporation in anticipation of any future receipts, except for originally purchasing the lands authorized to be purchased by it, laying out and embellishing the grounds and avenues, erecting buildings and vaults on such land, and improving them for the purposes of the corporation. The corporation may issue bonds or notes for debts so contracted and may secure them by way of mortgage upon any of its lands, buildings, property and improvements excepting lots or space conveyed to the members. [1969 c.580 §96; 1971 c.225 §1]

61.765 Selling land unsuited for burials. If in the board of directors' opinion, any portion of the lands of a nonprofit corporation organized and existing solely for the purposes of either owning or operating a cemetery or the cremation of dead bodies and the burial and care of incinerate remains is unsuitable for burial purposes or other purposes of the corporation, the board of directors may sell such portion and apply the proceeds to the general purposes of such corporation in the same proportion and manner as provided by ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1969 c.580 §97]

61.770 Burial lots or space; use, exemption from taxation, execution and liens; lien for purchase price of gravestone. Burial lots or space for burial of incinerate remains in buildings or grounds sold by a nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall be for the sole purpose of interment or deposit and safekeeping of incinerate remains. Such lots or space shall be exempt from taxation, execution, attachment or other lien or process, if used as intended by the purchaser thereof from such corporation, or his assigns or representatives, exclusively for burial purposes, and in no wise with a view to profit. The vendor of any gravestone, however, shall not be prevented from having and enforcing a lien thereon for all or part of its purchase price. If a suit is brought to enforce such a lien, the decree therein is enforceable thereafter; and, for the purpose of enabling the lien to be had and enforced, the gravestone shall be deemed personal property and may be severed and removed, under execution and order of sale, from the lot where it is situated and may be sold in the same manner as any other personal property. [1969 c.580 §98]

61.775 Recording plan; power to improve and regulate grounds. A nonprofit corporation organized and existing solely for the purposes of owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall cause a plan of its land and grounds and of the lots laid out by it and of the niches or burial space in the buildings erected thereon to be made and recorded in the county in which such grounds and land are located, such lots or

SPECIAL PROVISIONS RELATING TO ORS 97.010 TO 97.040, 97.110 TO 97.450, 97.510 TO 97.730, 97.810 TO 97.920 and 97.990

97.010 Definitions for ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990. As used in ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990:

(1) "Human remains" or "remains" means the body of a deceased person in any stage of decomposition or after cremation.

(2) "Cemetery" means any place dedicated to and used, or intended to be used, for the permanent interment of human remains.

(3) "Burial park" means a tract of land for the burial of human remains in the ground used, or intended to be used, and dedicated for cemetery purposes.

(4) "Mausoleum" means a structure for the entombment of human remains in crypts or vaults in a place used, or intended to be used, and dedicated for cemetery purposes.

(5) "Crematory" means a structure containing a retort for the reduction of bodies of deceased persons to cremated remains.

(6) "Columbarium" means a structure or room containing niches for permanent inurnment of cremated remains in a place used, or intended to be used, and dedicated for cemetery purposes.

(7) "Interment" means the disposition of human remains by cremation, inurnment, entombment or burial.

(8) "Cremation" means the reduction of a body of a deceased person to cremated remains in a crematory.

(9) "Inurnment" means placing cremated remains in an urn and depositing it in a niche.

(10) "Entombment" means the placement of human remains in a crypt or vault.

(11) "Burial" means the placement of human remains in a grave.

(12) "Grave" means a space of ground in a burial park used, or intended to be used, for burial of the remains of one person.

(13) "Crypt" or "vault" means a space in a mausoleum of sufficient size used, or intended to be used, to entombment cremated human remains.

(14) "Niche" is a recess in a columbarium used, or intended to be used, for the interment of the cremated remains of one or more persons.

(15) "Cemetery authority" includes cemetery corporation, association, corporation sole or other person or persons owning or controlling cemetery lands or property.

(16) "Cemetery association" means any corporation or association authorized by its articles to conduct any or all the businesses of a cemetery, but does not include a corporation sole or a charitable, eleemosynary association or corporation.

(17) "Cemetery business," "cemetery businesses" and "cemetery purposes" are used interchangeably and mean any business and purpose requisite or incident to, or necessary for establishing, maintaining, operating, improving or conducting a cemetery, interring human remains, and the care, preservation and embellishment of cemetery property.

(18) "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

(19) "Lot," "plot" or "burial space" means space in a cemetery owned by one or more individuals, an association or fraternal or other organization and used, or intended to be used, for the permanent interment therein of the remains of one or more deceased persons. Such terms include and apply with like effect to one, or more than one, adjoining grave, crypt, vault or niche.

(20) The term "plot owner" or "owner" means any person in whose name a burial plot stands as owner of the right of sepulture therein in the office of the cemetery authority, or who holds from such cemetery authority a conveyance of the right of sepulture or a certificate of ownership of the right of sepulture in a particular lot, plot or space.

(21) "Endowment care" means the general care and maintenance of developed portions of a cemetery and memorials erected thereon financed from the income of a trust fund established and maintained pursuant to the provisions of ORS 97.810 to 97.860. Endowment care cemeteries owned by a city or a county may supplement their general care and maintenance trust funds from general revenues.

(22) "Special care" is any care in excess of endowed care in accordance with the specific directions of any donor of funds for such purposes. [Amended by 1955 c.545 §1; 1965 c.396 §11]

61.736 Procedure for revoking certificate of authority. ORS 57.735, relating to revocation of certificate of authority, is applicable to nonprofit corporations. [1963 c.492 §36 (enacted in lieu of 61.735)]

61.740 [Renumbered 61.984]

61.741 Application to corporation authorized to transact business in this state on December 31, 1959. Foreign corporations which are duly authorized to transact business in this state on December 31, 1959, for a purpose or purposes for which a corporation might secure such authority under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, shall, subject to the limitations set forth in their respective certificates of authority, be entitled to all the rights and privileges applicable to foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, and from December 31, 1959, such corporations shall be subject to all the limitations, restrictions, liabilities and duties prescribed herein for foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1959 c.580 §80]

61.745 Transacting business without certificate of authority. (1) No foreign corporation transacting business in this state without a certificate of authority shall be permitted to maintain any action, suit or proceeding in any court of this state, until such corporation shall have obtained a certificate of authority. No action, suit or proceeding shall be maintained in any court of this state by any successor or assignee of such corporation on any right, claim or demand arising out of the transaction of business by such corporation in this state, until a certificate of authority shall have been obtained by such corporation or by a corporation which has acquired all or substantially all its assets.

(2) The failure of a foreign corporation to obtain a certificate of authority to transact business in this state shall not impair the validity of any contract or act of such corporation, and shall not prevent such corporation from defending any action, suit or proceeding in any court of this state. [1959 c.580 §81]

CEMETERIES AND CREMATORIES

61.755 Lands of cemetery or crematory corporation; exemption from execution, taxation and condemnation. A nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains, may purchase or take, by gift or devise, and own and hold lands for the sole purpose of either a cemetery or a crematory and burial place for incinerate remains. Such lands shall be exempt from execution and taxation, and from any appropriation for public purposes, and lots or portions of such land and space in any buildings thereon may be sold, if intended to be used exclusively for burial purposes, and in no wise with a view to the profit of the members of such corporation. The land so held for cemetery purposes shall not exceed 600 acres, but if the land already held for such purpose by the corporation is all practically used, the amount thereof may be increased by adding thereto not more than 20 acres at any one time. The land so held for the purposes of a crematory and the burial of incinerate remains shall not exceed 30 acres, but if the land already held for such purpose by the corporation is all practically used the amount thereof may be increased by adding thereto not more than 10 acres at any one time. [1959 c.580 §85]

61.760 Revenues; restrictions on uses thereof. (1) A nonprofit corporation organized or existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains may, by its bylaws, provide that a stated percentage of the money received from the sale of lots and burial space, cremation of bodies, donations, gifts or other sources of revenue shall constitute an irreducible fund. Any bylaw enacted for the creation of the irreducible fund cannot be amended to reduce the fund.

(2) The board of directors may direct the investment of the money in the irreducible fund, but all investments of money deposited in the fund on or after January 1, 1972, shall be in securities in classes and amounts approved by the State Treasurer and published in a list pursuant to ORS 97.820. If a bank or trust company qualified to engage in the trust business is directed by the board of directors to invest the money in the irreducible fund,

HEALTH AND SAFETY CODE

DIVISION 7. DEAD BODIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. DEFINITIONS

7000. The definitions in this chapter apply to this division and to visions 8 and 9 of this code.

7001. "Human remains" or "remains" means the body of a deceased rson, and includes the body in any stage of decomposition and cremated mains.

7002. "Cremated remains" means human remains after incineration d necessary processing under Section 7054.1 in a crematory.

7003. "Cemetery" means any one, or a combination of more than one, the following, in a place used, or intended to be used, and dedicated, cemetery purposes:

(a) A burial park, for earth interments.

(b) A mausoleum, for crypt or vault interments.

(c) A crematory, or a crematory and columbarium, for cinerary erments.

7004. "Burial park" means a tract of land for the burial of human mains in the ground, used or intended to be used, and dedicated, for metery purposes.

7005. Except in Part 5 of Division 8 of this code, "mausoleum" means tructure or building for the entombment of human remains in crypts vaults in a place used, or intended to be used, and dedicated, for metery purposes.

7006. "Crematory" means a building or structure containing one or ore furnaces for the reduction of bodies of deceased persons to cremated mains.

7007. Except in Part 5 of Division 8 of this code, "columbarium" means tructure, room, or other space in a building or structure containing ches for inurnment of cremated human remains in a place used, or ended to be used, and dedicated, for cemetery purposes.

7008. "Crematory and columbarium" means a building or structure ntaining both a crematory and columbarium.

7009. "Interment" means the disposition of human remains by rnment, entombment, or burial in a cemetery or, in the case of mated remains, by inurnment, entombment, burial, or burial at sea as ovided in Section 7117.

7010. "Cremation" means the reduction of the body of a deceased rson to cremated remains in a crematory and the placement of the mated remains in a grave, vault or niche or burial at sea as provided Section 7117 of this code.

7011. "Inurnment" means placing cremated remains in an urn and acing it in a niche.

7012. "Entombment" means the placement of human remains in a ypt or vault.

7013. "Burial" means the placement of human remains in a grave.

7014. "Grave" means a space of ground in a burial park, used, or tended to be used, for burial.

7015. "Crypt" or "vault" means a space in a mausoleum of sufficient e, used or intended to be used, to entomb uncremated human remains.

7016. "Niche" means a space in a columbarium used, or intended to be used, for inurnment of cremated human remains.

7017. "Temporary receiving vault" means a vault used or intended to be used for the temporary placement of human remains.

7018. "Cemetery authority" includes cemetery association, corporation sole, or other person owning or controlling cemetery lands or property.

7019. "Cemetery corporation," "cemetery association," or "cemetery corporation or association" mean any corporation now or hereafter organized which is or may be authorized by its articles to conduct any one or more or all of the businesses of a cemetery, but do not mean or include a corporation sole.

7020. "Cemetery business," "cemetery businesses," and "cemetery purposes" are used interchangeably and mean any and all business and purposes requisite to, necessary for, or incident to, establishing, maintaining, operating, improving, or conducting a cemetery, interring human remains, and the care, preservation, and embellishment of cemetery property, including, but not limited to, any activity or business designed for the benefit, service, convenience, education, or spiritual uplift of property owners or persons visiting the cemetery.

7021. "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

7022. "Lot," "plot," or "interment plot" means space in a cemetery, used or intended to be used for the interment of human remains. Such terms include and apply to one or more than one adjoining graves, one or more than one adjoining crypts or vaults, or one or more than one adjoining niches.

7023. "Plot owner," "owner," or "lot proprietor" means any person in whose name an interment plot stands of record as owner, in the office of a cemetery authority.

7024. "Permit for Disposition of Human Remains" includes "burial permit" and is a permit, issued pursuant to law, for the interment, disinterment, removal, reinterment or transportation of human remains.

DIVISION 8. CEMETERIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. CEMETERY DEFINED

8100. Six or more human bodies being buried at one place constitute the place a cemetery.

CHAPTER 2. VANDALISM

8101. (a) Every person is guilty of a misdemeanor and punishable by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not exceeding one year, or by both, who maliciously does any of the following:

(1) Destroys, cuts, mutilates, effaces, or otherwise injures, tears down, or removes any tomb, monument, memorial, or marker in a cemetery, or any gate, door, fence, wall, post or railing, or any inclosure for the protection of a cemetery or any property in a cemetery.

(2) Obliterates any grave, vault, niche, or crypt.

(3) Destroys, cuts, breaks or injures any building, statuary, ornamentation, tree, shrub, or plant within the limits of a cemetery.

HOUSE LABOR AND COMMERCE COMMITTEE AMENDMENT KEEPS SUSITNA EQUITY CLAUSE INTACT

JUNEAU - The House Labor and Commerce Committee on Friday approved House Bill 589, but added an amendment to the legislation which would ensure funding and construction of the Watana Dam phase of the Susitna Hydroelectric Project.

HB 589, authored by the Sheffield administration, proposed to repeal the so-called "susitna equity clause" as part of an attempt to finance four ailing hydroelectric projects under the direction of the Alaska Power Authority.

Rep. John Cowdery, R-Anchorage, chairman of the committee, said the amendment would delay repeal of the equity clause until construction of the Watana Dam is ensured with the establishment of a proposed major projects fund. "This is a message to the administration that Susitna supporters will not stand by idlely while attempts are made to salvage the four dam pool" said Cowdery. The representative from south Anchorage noted "this is only the first step in the process of developing a comprehensive state-wide energy program. There is obviously a lot of negotiating to be done before the problems with hydropower in Alaska are resolved".

The Labor and Commerce Committee also approved a measure appropriating 35 million dollars to help stabilize power rates for the four dam pool. Both pieces of legislation now go to the Resources Committee where further work will be done on the states energy program and the proposed major projects fund.

RE: HB 589

POINTS OF DEBATE FAVORING AMENDMENT TO HB 589

THE KEY WORD IN WENDTE'S OPPOSITION DEBATE WILL BE "IF". THERE ARE TOO MANY "IF'S" OR VARIABLES STILL TO BE RESOLVED BEFORE SUSITNA SUPPORTERS WILL ALLOW THE EQUITY CLAUSE TO BE REPEALED.

1. IF POWER SALES AGREEMENTS ARE SIGNED.

2. IF PETERSBURG DOES NOT SIGN THE AGREEMENT SOON, ALTERNATIVE POWER SALES CONTRACTS WILL HAVE TO BE DRAWN UP AND THERE IS NO ASSURANCE THE FOUR OTHER COMMUNITIES INVOLVED IN THE NEGOTIATIONS WILL AGREE TO THE NEW TERMS BECAUSE:

A. THE ENTRY RATE INTO THE INITIAL PROJECT FOR THE FOUR COMMUNITIES WILL BE HIGHER.

B. THE WHOLESALE POWER RATE MIGHT ALSO BE HIGHER BECAUSE OF LESS UTILIZATION AT LAKE TYEE.

3. IF THE LEGISLATURE APPROVES A MAJOR PROJECTS FUND WHICH PRIORITIZES WATANA CONSTRUCTION, IF THE LEGISLATURE APPROVES THE COMMITTEE SUBSTITUTE FOR HB 589, IF THE LEGISLATURE PASSES HB 684 APPROPRIATING FUNDS FOR RATE STABILIZATION, IF ALL THESE PIECES OF LEGISLATION ARE PACKAGED AND APPROVED IT WILL SOLIDIFY ALASKA'S COMMITMENT TO A COMPREHENSIVE STATEWIDE ENERGY PROGRAM.

4. IF THESE STEPS ARE TAKEN I WOULD PROJECT THE "BONDING APPEAL" FOR ALASKA'S HYDROELECTRIC PROJECTS WILL ESCALATE AND THERE WILL BE NO DEFAULT ON ANY OF THE SHORT DEBTS NOW FACING THE STATE.

AS CHAIRMAN, IT IS MY INTENTION TO PASS FROM THE LABOR AND COMMERCE COMMITTEE TO THE NEXT COMMITTEE OF REFERRAL, THE COMMITTEE SUBSTITUTE FOR HB 589 ALONG WITH HB 684 APPROVING A 35 MILLION DOLLAR APPROPRIATION FOR RATE STABILIZATION.

HOUSE LABOR AND COMMERCE COMMITTEE AMENDMENT KEEPS SUSITNA EQUITY CLAUSE INTACT

JUNEAU - The House Labor and Commerce Committee on Friday approved House Bill 589, but added an amendment to the legislation which would ensure funding and construction of the Watana Dam phase of the Susitna Hydroelectric Project.

HB 589, authored by the Sheffield administration, proposed to repeal the so-called "susitna equity clause" as part of an attempt to finance four ailing hydroelectric projects under the direction of the Alaska Power Authority.

Rep. John Cowdery, R-Anchorage, chairman of the committee, said the amendment would delay repeal of the equity clause until construction of the Watana Dam is ensured with the establishment of a proposed major projects fund. "This is a message to the administration that Susitna supporters will not stand by idlely while attempts are made to salvage the four dam pool" said Cowdery. The representative from south Anchorage noted "this is only the first step in the process of developing a comprehensive state-wide energy program. There is obviously a lot of negotiating to be done before the problems with hydropower in Alaska are resolved".

The Labor and Commerce Committee also approved a measure appropriating 35 million dollars to help stabilize power rates for the four dam pool. Both pieces of legislation now go to the Resources Committee where further work will be done on the states energy program and the proposed major projects fund.

Department of Commerce & Economic Development / POSITION PAPER

HB 589: "An act relating to the Alaska Power Authority; and providing for an effective date."

My name is George Matz. I am Special Assistant to Commissioner Richard A. Lyon for the Department of Commerce and Economic Development. I am representing Commissioner Lyon who regrets that he is not able to attend this hearing because of previous commitments in Washington, D.C.

There are four points that I want to make in my testimony:

- First, HB 589 is essential to the power sales agreements and the long-term financing of the "Four Dam Pool."
- Second, the long-term financing of the "Four Dam Pool" is essential to the Energy Program for Alaska.
- Third, the power sales agreements now being negotiated by the Alaska Power Authority (APA) should be financable.
- Fourth, the Department of Commerce and Economic Development supports the terms and conditions of the power sales agreements being negotiated by the APA.

To elaborate on these points, the Energy Program for Alaska was conceived by the Legislature in 1981 when it enacted Chapter 118, SLA 1981 (SB 25). After nearly three years of gestation, we are about to witness its birth as an operating power supply system. However, nearly $200 million of interim financing must first be converted to long-term financing. How the financing occurs will determine the long-term health of the Energy Program for Alaska.

If revenue bonds are used for long-term financing, the Energy Program for Alaska will have overcome some prenatal illness and can look forward to a healthy life with ever more attractive power rates. Also, these initial projects can expect to be the parents of a family of power projects that serve the electrical needs of Alaska. Hopefully, with our improved diagnostic skills, we will prevent a recurrence of the problems previously experienced.

If long-term financing is based on additional State appropriations, the Energy Program for Alaska will draw nourishment from other State needs. Also, the program will not have demonstrated the ability to exist without 100% financial support from the State. This is not a good precedent for propagating additional power projects.

If the Energy Program for Alaska has neither revenue bond financing nor State appropriation, it will be stillborn. In financial terms that means the State would default on repayments of the interim financing.

As we approach the term of this gestation, we know that some assistance is needed to assure completion of long-term financing. Our bond counsel and underwriters warned us of some statutory problems that could impede the sale of revenue bonds. Also, the respective communities and utilities have stated that their participation is contingent on certain statutory changes.

As a result of this advice, the Governor has introduced HB 589 which includes the statutory changes required to meet the demands of both the bond buyer and the wholesale power buyer. The Administration considers each section of this bill to be essential.

The highlights of HB 589 are as follows:

1. Section 1 repeals the existing statutory requirement that industrial retail power rates can be no less than retail power rates to residential customers. This allows utilities to offer, if they wish, lower rates to large volume customers.

2. Section 1 and 2 allows the four projects that are part of the "Four Dam Pool" (Solomon Gulch, Swan Lake, Lake Tyee and Terror Lake) to be considered as one project. The significance of this is that the debt service portion of the wholesale power rate for each project will be unified rather than project-specific as currently required by the statutes. Project-specific allocation of debt service results in higher wholesale power rates for projects which are more costly and/or have unused capacity relative to other projects in the pool. However, new projects added to the Energy Program for Alaska will have project-specific rates.

3. Section 2 deletes the "Susitna clause" which otherwise would trigger substantial wholesale power rate increases for projects included in the Energy Program for Alaska. The possibility of this rate increase and the reduction that could occur in demand and revenues will have a decidedly negative effect on the ratings and interest rates of revenue bonds used for long-term financing of the "Four Dam Pool."

4. Section 2 includes a technical amendments which deletes "at the bus-bar" in order to remove ambiguity.

5. Section 3 protects the "Four Dam Pool" from the addition of new projects to the Energy Program for Alaska which could substantially increase their wholesale power rate.

6. Section 4 removes reference to the "Susitna clause" from definitions that apply to the Energy Program for Alaska.

7. Section 5, similiar to Section 1, allows utilities to establish retail industrial rates that are less than residential rates.

8. Section 6 provides an immediate effective date.

HB 589 represents a tremendous amount of analysis and negotiating. All communities or utilities that are part of the "Four Dam Pool" have had extensive opportunity to partake in drafting the concept and the language of this bill. The Administration firmly believes that HB 589 represents the best resolution to a difficult problem and the best approach for leveraging futher development of power projects in Alaska.

FEBRUARY 29, 1984

TO: JOHN
FROM: KEN
RE: HB 589

HB 589 WOULD AMEND STATE STATUTES GOVERNING THE ALASKA POWER AUTHORITY. IT WOULD COMBINE FOUR HYDROELECTRIC PROJECTS, LAKE TYEE, SWAN LAKE, SOLOMON GULCH, AND TERROR LAKE, INTO ONE POWER PROJECT WHICH WOULD BE REFERED TO AS THE INITIAL PROJECT. THE LEGISLATION WOULD ALSO REPEAL THE HIGHLY CONTROVERSIAL "SUSITNA CLAUSE", A STATUTE APPROVED BY THE LEGISLATURE TO ASSURE THE CONSTRUCTION OF THE SUSITNA HYDROELECTRIC PROJECT.

WHILE I BELIEVE THIS BILL HAS CONSIDERABLE MERIT, I AM OPPOSED TO THE REPEAL OF THE SUSITNA CLAUSE WITHOUT SOME SUBSTITUTE ASSURANCE THAT THE WATANA PHASE OF SUSITNA WILL BE CONSTRUCTED. IT MY INTENTION, AS CHAIRMAN, TO TAKE TESTIMONY TODAY ON HB 589, AND, I WOULD ASK THE MEMBERS OF THIS COMMITTEE TO CONSIDER THAT TESTIMONY AND PERHAPS A COMMITTEE SUBSTITUTE.

LEGISLATIVE BRIEFING
LABOR AND COMMERCE COMMITTEES
ENERGY PROGRAM FOR ALASKA

The Energy Program for Alaska, adopted by the Legislature in 1981, provides for State construction, ownership, and operation of power generating projects throughout the State. Program objectives are achieved by providing financing through the Power Authority for the development of new power projects and the acquisition of existing projects. The Energy Program includes a check and balance system for project development and approval, through which a project's feasibility must be approved by the Legislature before expenditures for design and construction can begin. Following legislative approval and funding, the Power Authority designs and constructs the project, which is then owned by the State.

Under the Energy Program for Alaska, the Power Authority acquired the Solomon Gulch project, then being constructed by Copper Valley Electric Association. This project serves Valdez and Glennallen. The Swan Lake project, then being developed by Ketchikan Public Utilities, was also acquired under this program. In addition, the Power Authority assumed responsibility for developing and constructing the Tyee Lake project for Wrangell and Petersburg, and the Terror Lake project near Kodiak.

These hydroelectric projects are known as the Four Project Pool, which has become the cornerstone of the Energy Program for Alaska. The Solomon Gulch project is in commercial operation; the Tyee project will soon be providing test power to Wrangell and Petersburg; Swan Lake is providing test power to Ketchikan; and the Terror Lake project is about 95 percent complete with power projected to be on-line in September 1984. With the completion of these projects, the role of the Power Authority in power generation, transmission, and the wholesale marketing of electrical energy is significantly expanding.

When the Legislature began appropriating funds in 1979 for the construction of hydroelectric projects, it was intended that these projects were to be fully financed by the State. However, declining State revenues resulting from a drop in international oil prices has forced the abandonment, at least for the foreseeable future, of full State funding of these projects. Lower oil prices have also made the short term cost of hydropower from new projects less advantageous, when compared to the cost of diesel generated electricity, than it once was expected to be. Power Authority economic and financial analyses have necessarily assumed conservative long term oil price increases although experts consider the possibility of world oil supply interruptions could dramatically revise current Power Authority projections.

In the face of the financial reality of declining State revenue, the Legislature amended the Energy Program for Alaska with House Bill 9 (HB 9) in 1982. The original legislation had established a single wholesale power rate for all Power Authority projects in the State. HB 9 changed this by establishing a new rate setting mechanism based on pooling the debt service of the projects and providing that each project carry its own operation and maintenance costs.

To meet the requirements of HB 9 and the needs of consumers in the communities served by the Four Project Pool as equitably as possible, the Power Authority has

proposed new power sales agreements with those communities served by the Four Project Pool. These agreements are the result of several months of negotiation and extensive coordination between the Power Authority, the utilities to be served by the projects, financial institutions, the Governor's Office, and the legislative leadership. Under the agreements, initial consumer rates for the four hydroelectric projects are designed so as not to exceed the cost of diesel-generated power, and in the long-run, provide more favorable rates. They should provide significant benefits to the communities served by the projects as well as communities to be served by future projects that will be included in the program.

In order to implement the proposed power sales agreements, new legislation is necessary. These legislative changes are:

- Elimination of the energy fund requirement (commonly referred to as the Susitna Clause) to reduce the potential future risk to the Four Project Pool communities
- A limitation on the impact of new projects coming into the system on the debt requirement of the first four projects
- Authorization of the sale of power to industrial users at a separate rate
- Classification of the first four projects as one project in order to issue revenue bonds as a single system
- Approval and financing of a Rate Stabilization Fund (with a total State appropriation of approximately $35 million) to off-set the difference between the costs of hydropower and diesel generated electricity during the early years of the projects.

Negotiations are still in progress with the Five communities involved in the Four Project Pool. The Power Authority plans to present its final offer to the Board of Directors for action on March 9, 1984. The communities have indicated that it will take thirty to forty-five days longer for them to ratify any agreement due to local ordinance requirements. Petersburg has indicated that they will conduct a local election on the matter on April 17, 1984.

MEMORANDUM

TO: Representative Jack McBride

FROM: Jack Kreinheder
Research Staff

RE: History of Hydro Projects in Election District 1
Research Request 83-54

You requested that we summarize the development of hydro projects in Election District 1, focusing on the Swan Lake, Lake Grace and Tyee Lake sites. As you know, the Swan Lake and Tyee Lake projects are under construction by the Alaska Power Authority, while Lake Grace was considered as an alternative to the Swan Lake site.

Existing Hydro Projects in Ketchikan and Petersburg

The City of Ketchikan's electric utility generates about 45 percent of its annual power production from three existing hydro facilities at Ketchikan, Beaver Falls, and Lake Silvis. The generation capacity of these hydro units is 4,200, 5,000, and 2,100 kilowatts, respectively. The first generating unit at the Ketchikan site was installed in 1938, with another unit added in 1957. The first Beaver Falls unit was installed in 1946, with two more generators added in 1954. The Lake Silvis plant was installed in 1968.

Ketchikan's remaining power demand is met by diesel generators with a total capacity of about 18,300 kilowatts. These diesel units will be retired except for standby generation purposes when the Swan Lake project is completed.

Petersburg generates about 50 percent of its current power requirements from the Crystal Lake hydro project. This project was originally developed in 1929, with a major expansion in 1955. The current generation capacity of the Crystal Lake plant is about 2,000 kilowatts.

The City of Wrangell presently generates all of its electricity from diesel plants.

Lake Grace

Lake Grace is located about 15 miles east of Swan Lake on the west side of Behm Canal. The proposed hydro plant at Lake Grace would have been substantially larger than Swan Lake in terms of power output and cost. The Lake Grace project would provide 25,000 kilowatts (KW) of capacity and 102 million kilowatt hours (KWH) of average annual energy, in comparison to 18,000 KW of capacity and 85.4 million KWH of energy for the Swan Lake project.

You expressed an interest in how the decision was made by Ketchikan to proceed with development of the Swan Lake hydro site, rather than the Lake Grace site. The principal basis for this decision was an appraisal report prepared by R.W. Beck and Associates in June 1977 for Ketchikan Public Utilities. This report evaluated the technical and economic feasibility and compared the cost of power for hydro developments at Swan Lake, Lake Grace, and Mahoney Lake, which is a smaller site.

The R.W. Beck report found that although hydro development was feasible at each of the three sites, Swan Lake was the most economic hydro alternative which would eliminate Ketchikan's reliance on diesel fuel. The average 10-year cost of power for the Swan Lake project was estimated at 6.7 cents per KWH, compared to 7.8 cents per KWH for the Lake Grace alternative. The Mahoney Lake alternative was competitive with Swan Lake with a power cost of 6.7 cents per KWH, but the Mahoney Lake site would not generate enough power to replace all of Ketchikan's diesel generation. A summary comparison of the three projects is included in Appendix A, taken from the R.W. Beck report.

You also indicated an interest in whether the U.S. Borax mineral development at Quartz Hill was considered in the evaluation of alternative hydro projects for Ketchikan. It appears that the power requirements of the Borax development were not given significant consideration, for at least two reasons. When the Borax molybdenum discovery was first announced in 1977, Borax planned to meet its power needs by constructing its own hydro project at Wilson Lake (this plan was later dropped because of strong local opposition, due in large part to the high sport fishing value of Wilson Lake). In addition, the City of Ketchikan was primarily concerned with meeting the power needs of its residents, not of mining or other industries outside of the city.

R.W. Beck recommended that Lake Grace and Mahoney Lake be reevaluated as additional hydroelectric developments when the power output from Swan Lake nears full utilization. Lake Grace is now within the Misty Fjords National Monument, which may make future development of this site more difficult. The Lake Grace area was withdrawn under federal land classification at one time as a power project site, but is unclear whether this withdrawal was superceded by the National Monument designation.

Swan Lake

The Alaska Power Authority prepared the following brief history of the Swan Lake project, which is expected to begin producing power by January or February of 1984.

> The City of Ketchikan, having made the decision to discontinue its reliance on the use of diesel electric generation to meet rising energy demands, authorized the engineering firm of R.W. Beck in September of 1977 to investigate the feasibility of developing, as a major hydroelectric generating resource, the Swan Lake Project which is located approximately 22 miles northeast of Ketchikan near the northern end of Carroll Inlet in the central portion of Revillagigedo Island.
>
> In June of 1978, R.W. Beck issued a feasibility report indicating that a hydroelectric project which would demonstrate a benefit/cost ratio of 1.25 could be constructed at Swan Lake at a total investment cost of $80,924,000. Subsequently, the City of Ketchikan, Ketchikan Public Utilities (KPU) authorized R.W. Beck to proceed with preparation of final design of the project.
>
> The 1980 Legislature through joint resolution authorized the Alaska Power Authority to issue bonds up to the maximum amount of $120,000,000 for financing the construction of the Swan Lake Project.
>
> Construction was initiated by KPU in November of 1980. Funding for project design and initial construction was secured primarily through the proceeds or loans from the Power Authority's Power Project Revolving Loan Fund.
>
> On May 28, 1981, the Power Authority loaned KPU $35,000,000 for construction from funds which had been raised through the sale of General Obligation Bonds.
>
> On May 21, 1982, the Power Authority and KPU executed an acquisition agreement under which, in return for providing funds to complete project construction, the Power Authority will receive title to the project and as operation of the project [begins] will provide sufficient power for the City of Ketchikan's needs via a Power Sales Agreement.

The total construction cost for the Swan Lake project is now estimated at $93.5 million in nominal dollars. The target completion date is April 1984; however, the construction work is ahead of

schedule and the project may be completed as early as January 1984. Swan Lake will have an installed generation capacity of 22.5 megawatts and an annual firm energy production of about 70 million KWH. The project is expected to have about 50 percent utilization in its first years of operation; that is, about 35 million KWH of the 70 million KWH available will be used by Ketchikan Public Utilities. The year in which the full capacity of Swan Lake will be consumed depends largely on the rate of increase in future power demand, which is uncertain. However, current Power Authority projections show the project being fully utilized in about 2002.

Lake Tyee

I believe that you have seen a copy of my memo on the Tyee project to Representative Clocksin, dated February 11. Attached to that memo was a Tyee chronology prepared by the Power Authority which focused mainly on cost estimates. This chronology is also attached here as Appendix 2.

The Tyee project was originally proposed by the Thomas Bay Power Authority, a local Petersburg and Wrangell group. This group was first interested in the development of the Thomas Bay hydro site, but a reconnaissance study by the Corps of Engineers indicated that the smaller Tyee project was more feasible and cost-effective. Based on the Corps study, the Thomas Bay Power Authority dropped the Thomas Bay site in favor of the Tyee project. When the Alaska Power Authority became operational in 1978, an agreement was reached for the Authority to take over the development of the project and proceed with design and licensing work.

The Alaska Power Authority prepared the following brief history of the Tyee project.

> On December 19, 1979, the Alaska Power Authority submitted an application to the Federal Energy Regulatory Commission (FERC) for the construction of the Tyee Hydroelectric Project in the vicinity of Wrangell and Petersburg, Alaska. Our engineers, R.W. Retherford Associates/International Engineering Company (IECO), estimated the cost of the project at that time at $53,333,000, including an allowance for inflation at the rate of seven percent per year during the construction period. Procurement of long-lead-time turbines began in July 1981, in anticipation of a FERC license. FERC issued a license August 5, 1981, and the award of several additional procurement and one construction contract followed almost immediately thereafter.

The power-on-line date is scheduled for January 1984. The current estimate of the total project cost is $124 million. Available funds include $82 million in State grants and $50 million in interim financing.

The powerhouse is located in the Tongass National Forest, approximately 40 miles east-southeast of Wrangell, Alaska. The project is designed to develop the energy potential of Tyee Lake--a natural lake at Elevation 1396--convert it to electricity, and transmit the energy to the communities of Wrangell and Petersburg for distribution.

Tyee will have an initial generating capacity of 20 megawatts, expandable to 30 megawatts with the addition of a third generating unit. The project will be able to produce about 110 million KWH per year, of which about 34 million KW (31 percent) is expected by the Power Authority to be sold to Petersburg and Wrangell in the first year of operation. Based on the Power Authority's estimate of 2.5 percent annual increase in power demand, the power output from the Tyee project will not be fully utilized until the year 2033.

I have also attached as Appendix C a memorandum by George Matz of the Office of Management and Budget which outlines the history of the Tyee project from the perspective of studies and approvals.

If you have any questions or would like more specific information on any of these hydroelectric projects, please do not hesitate to contact me. Also, I plan to complete a response to your research request on Swan Lake power rates (#83-89) by March 25. This analysis will compare projected power rates for the Swan Lake project with current power generation costs in Ketchikan and discuss alternatives for reducing Swan Lake rates, if necessary.

Subject: Tyee Hydroelectric Project-Summary of Estimated Total Costs

Dear Jack:

As per your request, following is a brief summary on the sequence of events on the Tyee hydropower project primarily relating to cost. The summary of Board actions was extracted from our corporate minutes. Most of the actions taken by the Board were based on advice from myself and my staff.

On December 19, 1979, the Alaska Power Authority submitted a revised application to the Federal Energy Regulatory Commission (FERC) for the construction of the Tyee Hydroelectric Project in the vicinity of Wrangell and Petersburg, Alaska. Our engineers, R.W. Retherford Associates/International Engineering Company (IECO) estimated the total cost of the project at that time at $39,590,000 (1980$'s). With an allowance for inflation and interest during construction the estimated total capital investment at that time came to $53,333,000.

In September 1980, IECO submitted a revised cost estimate of $50,976,000 (August 1980$'s).

Early in 1981, the Power Authority retained EBASCO Services, Inc., to prepare an independent cost estimate. EBASCO subsequently estimated the total project cost at $96,693,000 (May 1981$'s). Escalated to the midpoint of construction, this would represent a completed cost of approximately $110 million. After reviewing the EBASCO estimate, IECO conceded that its previous estimates were low and IECO raised its estimate to $81,069,000 (June 1981$'s). EBASCO refuted this revised estimate.

Procurement of long-lead-time turbines began in July 1981 in anticipation of a FERC license. The Board of Directors was realigned by Statute in the latter part of July 1981. The FERC issued a license on August 5, 1981 and the award of several additional procurement and one construction contract followed almost immediately thereafter.

IECO continued to make monthly reports on the status of the project, including estimated total project costs. It is important to note that by the end of March 1982, IECO had increased its project estimate to $97,072,000,

including engineering costs prior to construction. In the March report the overhead transmission line was estimated to cost $12,840,000 plus a $6,000,000 contingency. Less than two months later, during the bid opening for that contract, IECO provided an engineer's estimate of $23,280,887.00--an estimate that is 24 percent above any previous estimate, including contingency funds. The actual low bid was even higher at $24,901,466.

Starting with the IECO estimate from the March 1982, report, adjusting for the actual low bid on the transmission line, and adding the estimated cost for a proposed separate substation construction contract, the estimated total project cost was increased by IECO to $110,133,000 (May 1982). This did not include approximately $5 million for owner provided insurance. During the months that followed, the total project cost has decreased and increased, slightly, as adjustments have been made for actual bids on relatively small procurement contracts..

In December 1982, and again in January 1983, senior staff of IECO and IECO's parent company, Morrison Knudson (M-K), met with representatives of the Power Authority to discuss construction management of the project, including total project costs. The latest information from IECO is that the total project cost will not exceed $124,886,100. The Power Authority has asked the parent company, M-K, to completely review this estimate. A report from the M-K staff is anticipated the second week of March 1983.

A summary of Board actions, as extracted from our corporate minutes, is as follows:

October 4, 1978 Board receives report on Tyee Project indicating that, according to the reconnaissance study by Robert W. Retherford Associates, (RWR) the Project looks favorable and that Thomas Bay Power Commission (TBPC) will soon enter into contract with RWR for Federal Energy Regulatory Commission (FERC) work and that TBPC may request the Alaska Power Authority to take over the project.

November 18, 1978 APA Board voted to make $120,000 loan to TBPC for Tyee FERC work and this would supplement the $300,000 available from the Water Resources Revolving Loan Fund (WRRLF) in order to cover the $475,000 contract with RWR.

June 21, 1979 Board makes a loan to TBPC of $60,000 for Tyee Project. TBPC and Representative E.J. Haugen request the APA take over Tyee. The Board directed staff to bring information back at next Board meeting for Project take-over.

September 27, 1979 Tyee Letter of Understanding with TBPC adopted by Board.

November 2, 1979 Board authorized Executive Director to submit FERC license application. Also passed "stop-the-clock" resolution needed for bonding.

February 7, 1980 Board agreed to extend contract for advanced Engineering

and Design to IECO for Tyee but it was later decided with legal council to seek competitive proposals.

April 18, 1980 Board selects IECO for the Engineering and Design from among three proposals.

October 23, 1980 Board informed that costs have increased from $39,000,000 to $51,000,000 and has IECO explain to Board.

April 20, 1981 Board selects consultant panel as required by FERC.

May 14, 1981 Board awards Bids for Turbines.

July 6, 1981 Board considered awarding contract for Steel Towers and Conductors but defers "notice to proceed" until after opening of major Civil Contract so that the Board could get a better fix on the true cost of the Project.

August 18, 1981 FERC license has been received. Bids for Civil construction were reviewed as were the economics of the Project based on new cost estimates. Notice-to-proceed was given on Towers and Conductors. The Board was informed that existing funds were insufficient and that interim financing would be necessary. Board deferred action until the next meeting.

September 10, 1981 Board awards Civil Works contract to Southeast Harrison Western (SEHW) after lengthy debate.

October 2, 1981 Board informed on legal actions against Tyee construction contracts. Need for interim financing was discussed and indicated a proposal would be presented to the Board in December, 1981. Risk Management's desire to use "Wrap-up Insurance" on Tyee Project was discussed and actions that would be taken to effectuate such a program.

December 15, 1981 A Finance Plan was presented to the Board. It was recommended that the Board appoint a subcommittee to review the feasibility of the Tyee Project based on present knowledge of the costs. Commissioners Ward and Mueller and Dr. Weeden were appointed to the subcommittee. The Board moved that final financing documents for financing be prepared. The economics of the Project was reviewed.

January 22, 1982 Senator Dankworth and Representative Haugen addressed the Board and recommended proceeding with interim financing. Board authorized securing of $50,000,000 in interim financing. Board awarded a contract for Underwater Cables.

May 25, 1982 The Board awarded the Overhead Transmission Line contingent upon the Legislature not passing a piece of legislation that was being considered but that subsequently was not passed. Thus on June 3, 1982 the Executive Director informed the Board of his intent to issue the award for Transmission Tower construction.

October 22, 1982 The Board awarded contract for Transformers.

I trust this information is of assistance to you. If there is any further information you need, please call on me.

Sincerely,

Eric P. Yould

MEMORANDUM State of Alaska

TO Gordon Harrison
Associate Director
Office of Management and Budget
Division of Strategic Planning

DATE February 23, 1983

FILE NO

TELEPHONE NO 465-3573

FROM George Matz GM
Division of Strategic Planning
Office of Management and Budget

SUBJECT Tyee Lake Project

There has been controversy recently regarding the Tyee Lake Project. The City of Petersburg has stated that the cost of power from the project is too expensive and they may not want to sign a power sales contract under the terms initially proposed by the Alaska Power Authority (APA). This situation has lead to an examination of other questions including the projects economic feasibility and the process by which this is determined. The purpose of this memo is to provide an historical perspective on the question of economic feasibility. The information in this memo should supplement rather than duplicate information in a February 9, 1983 memo from Eric Yould to Jack Kreinheder and a February 11, 1983 memo from Jack Kreinheder to Representative Don Hocksin.

The feasibility study for the Tyee Lake Project was completed for the APA in December of 1979. The statute at this time (AS 44.56.180) required the Office of the Governor to evaluate APA feasibility studies. Since the APA was in its infancy and the Tyee Lake Project was its first project to have completed a feasibility study, no formal review was undertaken.

In 1980, the Legislature passed an omnibus energy bill (Ch 83, SLA 1980) which amended requirements for APA reconnaissance and feasibility studies. This bill also requires the Division of Budget and Management (now Office of Management and Budget) to review these studies for statutory compliance and provide a recommendation to the Governor and the Legislature for feasibility studies. However, certain projects, including the Tyee Lake Project, had been previously approved by the Legislature and were exempted from review by the Division of Budget and Management. House Joint Resolution No. 62, which had been approved by the Legislature earlier in the 1980 session, stated that the general design of the Tyee Lake Project was approved and that the APA could incur $70,000,000 in revenue bond indebtedness to finance the project.

In 1981, the Legislature once again made significant amendments to the APA statutes (Ch 118, SLA 1981). One of the more significant amendments established a Power Development Fund to be used primarily for financing construction of State owned power projects. Restrictions were placed on the use of this fund. One of these restrictions (AS 44.83.394) states that "the authority may not use money in the fund for a power project except in compliance with AS 44.83.177-44.83.187 and unless the authority determines that the project is economically feasible."

Ch 90, SLA 1981 (which was the appropriation bill which accompanied Ch 118, SLA 1981) made appropriations to begin construction on three power projects. These projects, and the amount of their respective appropriations are Tyee Lake Project - $48,000,000, Swan Lake Project - $53,000,000, and the Terror Lake Project $81,500,000. Additional appropriations in the form of a loan, had previously been made to each of these projects. These loans were converted to grants by another bill Ch 91, SLA 1981.

Although each of these projects had completed feasibility studies and received legislative approval, AS 44.83.394 required a final review of the economic feasibilty of each project before the APA could make expenditures from the Power Development Fund. The statutes are not specific as to how the economic feasibility should be determined. The APA assumed that the feasibility assessment should be treated as an updated supplement to previous feasibility studies rather than repeat the entire process.

Apparently, the APA's first attempt at complying with AS 44.83.394 was an August 13, 1981 memo from Robert Mohn, Director of Engineering to the Record (see Attachment A). The information in this memo was presented to the August 18, 1981 meeting of the APA Board of Directors to demonstrate that even with more recent and higher construction cost estimates, the Tyee Lake Project was economically feasible at the "most likely" load growth rates. Following this presentation, the Board was asked to approve the award of construction contracts which would obligate funds in the Power Development Fund. It should be noted that this was the first meeting of a newly appointed Board of Directors and not all of the Board members were familiar with statutory requirements for power projects.

Ron Lehr, a Board member and Director of Budget and Management at that time, questioned some of the points used in the presentation and requested backup information. This information was sent to Budget and Mangement where staff found the information inadequate to make a determination regarding the economic feasibility of the Tyee Lake Project. APA staff was informed of this and responded in a September 10, 1981 letter with copies of the calculations used for the August 13, 1981 memo.

Budget and Management staff reviewed these calculations, found some technical errors, and requested that corrections be made in the analysis. Apparently, the request led to a decision by the APA to provide a more complete and adequate explanation of the economic feasibility of the project. The product of this effort was a "Findings and Recommendations" report that was completed on December 2, 1981 and distributed to the Board at its December meeting. This report fully explained the assumptions that were being used and provided enough details to review the economic feasibility of the project.

Although a review by Budget and Management of the "Findings and Recommendations" report was not required by statute, a review was undertaken for the benefit of Ron Lehr who's interest was both as a Board member and State Budget Director. Ron Lehr distributed this review to the Board at its January, 1982 meeting.

The Budget and Management review (Attachment B) questioned several assumptions and calculations used in the "Findings and Recommendations" report. The conclusion of the review is that the Tyee Lake Project may not be economically feasible based on the "most likely" load forecast but should be economically feasible if the actual load should exceed the "most likely" load forecast. Some of the more significant points brought out in the review are given below.

1) If and When - The economic feasibility analysis of a power project, particularly projects having a long life such as hydro power, should not only determine "if" the project is feasible but "when" is the most economic time to begin construction. A timing exercise of this nature was not done for the Tyee Lake Project even though such an exercise is most applicable to projects which have initial overcapacity, such as the Tyee Lake Project.

2) Reserve Capacity - Neither this economic analysis or cost of power calculation considered the cost of reserve capacity.

3) Load Forecast - The base year for the load forecast was higher than actual data. Also, the load forecast assumed an increase in electric space heating even though fuel oil appears to be a less expensive alternative.

4) Alternative - A number of smaller and less remote hydroelectric alternatives were not given detailed consideration. U.S. Army Corps of Engineers data indicates that some of these projects could have lower power costs than the Tyee Lake Project. Also, since all of the projects were smaller, overcapacity would not be a significant problem.

The load forecast in the most significant and perhaps the most uncertain parameter which applies to the economic feasibility of the Tyee Lake Project. Since the load forecasts were made a few years ago, we now have the benefit of hindsight to assess the accuracy of the first few years of the forecast. This information is presented below based on the "most likely" forecast for the "Findings and Recommendations" report and the "expected" forecast for the Feasibility Study. The Feasibility Study used 1978 as the last year of actual data. Neither of these forecasts, as presented, subtract out approximately 11,700 MWh of annual generation from an existing hydroelectric facility near Petersburg.

Energy Sales (MWh) for Wrangell and Petersburg

Year	Actual	Findings and Recommendations Report	Feasibility Study
1978	29,981	---	29,981
1979	29,087	---	31,445
1980	29,788	30,535	32,990
1981	29,222	31,726	35,275
1982	30,989	32,963	37,710

In summary, commitments to the Tyee Lake Project have been slightly ahead of establishing a more rigorous process for assessing the economic feasibility of proposed APA projects. Specifically:

1) the feasibility study for the project was completed before an independent review process was firmly established by the Legislature;

2) the Legislature approved the project without benefit of an independent cost analysis as now required by statute; and

3) construction contracts had been awarded before the "Findings and Recommendations" report had been completed and before the provisions of AS 44.83.394 has been met.

HB584

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 8 1984

The Honorable Jalmar Kerttula
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Kerttula:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the sale of power by the Alaska Power Authority. The bill amends portions of AS 44.83.398, which governs sale of power from projects in the energy program for Alaska. The amendments are necessary before power sales agreements can be signed and long-term financing can be put in place for the Lake Tyee, Swan Lake, Solomon Gulch, and Terror Lake hydroelectric projects -- the "four dam pool."

A section-by-section analysis follows.

Sections 1 (by amending AS 44.83.398(a)) and 5 (by repealing AS 44.83.398(d)) of the bill eliminate restrictions on industrial power rates that may be charged by utilities purchasing power from projects in the energy program for Alaska. The statute currently prohibits utilities from charging a retail power rate to industrial consumers that is less than the rate charged to residential consumers. The change allows utilities to offer a lower rate to large-volume consumers, or consumers who currently use their own generation sources, which should reduce the overall rate to all consumers. The authority has discussed with the utilities the use of fixed-term supply contracts with industrial users with the length of the contract limited so that, when usage of power from the hydroelectric facilities approaches capacity, more power will be available to residential consumers and they will not end up subsidizing industrial power rates.

Section 1 also provides for the combination of the Lake Tyee, Swan Lake, Solomon Gulch, and Terror Lake hydroelectric projects into one power project for the purposes of the wholesale power rate calculation in AS 44.83.398-(b)(1). This power project is referred to as the "initial project."

Section 2 deletes the "Susitna clause" in AS 44.83.398-(b)(2). Repeal of this provision is desired by both the authority and the purchasing utilities because of the potential effect on rates. It is also viewed as crucial to the long-term financing of the initial project and future projects in the energy program for Alaska. The rating services are reluctant to give a favorable rating to revenue bonds issued with this provision in place because of the possibility that ratepayers' rates could increase substantially in 1991. The rates could be high enough to reduce demand and revenues, thus jeopardizing the ability of the utilities to meet their payment obligations under the power sales contracts.

Section 2 also describes the method for determining the amounts to be allocated to each hydroelectric facility in the initial project. Under this combined system the facilities share the debt service for the entire project and there is a single cents-per-kilowatt-hour rate for debt service applicable to all four hydroelectric facilities in the initial project. The rate for costs of operations, maintenance, equipment replacement, safety inspections, and investigations is determined separately for each facility. The result is a different wholesale rate for each facility in the initial project, but a sharing of debt service which substantially reduces the wholesale rate for projects such as Lake Tyee.

Section 3 adds a sentence to AS 44.83.398(e) to allow the power authority to contractually limit the amount of debt service payable by power purchasers as a consequence of the later addition of new projects to the energy program for Alaska.

Section 4 removes the reference to the "Susitna clause" from AS 44.83.398(g).

Section 6 provides for an immediate effective date.

Sincerely,

Bill Sheffield
Governor

Alaska Power Authority
Commissioner: D Lyon
Executive Director: Lary Crawford

Board meeting, 22 February 1984

Power Sales agreements;

1. Copper Valley: close to an agreement. Jim Billingame, manager of utilitiesstates that he shows some concern of confronting his public with a cost not seen before. Presently Glennallen diesel generation is .06 PKH and proposed APA power will be .07 PKW. This constitutes a 40% increase to some. Valdez is an emphatic NO! Average monthly consumption in Glennallen is 340 KWH and translates to $90 per month, while Valdez is running an average monthly bill of 550 KWH or $151. per month. A 40% increase can be devastating.

2. Wrangell: Matt Cole (position unknown) will be taking power sales agreement to city council Thursday night (Feb 23rd) for consideration. He says discussion (informal) with council members appears good and contract may be forthcoming.

3. Kodiak: David Neese, Mgr of Muni-power. Municipality has agreed to purchase power from APA. Two suggestions: possible loans to consumers and the establishment of an advisory board.

4. Ketchikan: Rick -?--. mgr of utilities says it looks very good, contract in the making with questions as to wording of legal documents.

5. Petersburg: NO!

Management study (status report) presented by Roger McMannus of Mead consultants for FY 84, FY 85, FY 86.

RE: HB 610

HB 610 WAS WRITTEN IN LATE NOVEMBER AFTER A NUMBER OF HEARINGS CONDUCTED BY REP. FURNACE ON PROBLEMS RELATING TO SMALL CONTRACTORS IN ALASKA. THE PURPOSE OF THIS LEGISLATION IS TO REDUCE THE NUMBER OF CONTRACTORS WHO OPERATE IN ALASKA WITHOUT HOLDING A STATE CONTRACTORS LICENSE. DURING THE HEAVY CONSTRUCTION SEASON A LARGE NUMBER OF CONTRACTORS FROM OUT OF STATE COME TO ALASKA AND BECAUSE MANY ARE NOT LICENSED OR BONDED AND DON'T HAVE EXPENSES SUCH AS WORKMANS COMPENSATION, THEY CAN EASILY UNDER BID THOSE CONTRACTORS WHO COMPLY WITH LICENSE REQUIREMENTS. THIS BILL WOULD MAKE CHANGES IN STATUTES DESIGNED TO HELP THOSE CONTRACTORS WHO HAVE COMPLIED WITH THE LAWS OF THIS STATE.

QUESTIONS:

1. WHAT IS THE ADVANTAGE TO SMALL CONTRACTORS OF HAVING A BOARD OF BUILDERS ?

2. WHAT IS THE NEED TO INCREASE A GENERAL AND SPECIALTY CONTRACTORS BOND ?

3. HOW CAN LANGUAGE BE ADDED OR CHANGED IN THIS BILL THAT WOULD GO EVEN FURTHER IN HELPING THE SPECIALTY CONTRACTORS ?

4. WHEN HEARINGS WERE BEING HELD IN ANCHORAGE ON THIS ISSUE, A SUGGESTION WAS MADE TO REQUIRE A CONTRACTOR INCLUDE HIS LICENSE NUMBER IN ALL ADVERTISEMENTS. WAS THAT SUGGESTION ADOPTED INTO THIS BILL ?

5. HOW MANY NONE LICENSED CONTRACTORS DUE YOU ESTIMATE ARE OPERATING IN ALASKA ?

6. HOW MANY OF THOSE ARE STATE RESIDENTS THAT ARE SIMPLY NOT LICENSED ?

MARCH 23, 1984

TO: JOHN

FROM: KEN

RE: WORK SESSION ON HB 610 "RELATING TO CONSTRUCTION CONTRACTORS AND ESTABLISHING A BOARD OF BUILDERS"

THE HOUSE LABOR AND COMMERCE COMMITTEE HAS SPENT MANY HOURS WORKING TO RESOLVE THE PROBLEMS WHICH PLAGUE THE CONSTRUCTION INDUSTRY. DURING THE INTERIM, SEVERAL HEARINGS WERE HELD WITH MEMBERS OF THE INDUSTRY IN AN EFFORT TO HAMMER OUT A LEGISLATIVE SOLUTION. THE RESULT WAS HOUSE BILL 610, WHICH WE NOW HAVE BEFORE US. DURING RECENT PUBLIC HEARINGS HELD HERE IN JUNEAU AND IN ANCHORAGE, THE COMMITTEE RECOGNIZED THAT HB 610 DID NOT SOLVE ALL THE PROBLEMS WE HAD SOUGHT TO SOLVE. IN THIS WORK SESSION TODAY, I WOULD ASK THE COMMITTEE TO CONSIDER THE CONCERNS BROUGHT OUT IN PUBLIC TESTIMONY, AS WE WORK TO CONSTRUCT A BILL WHICH IS ADVANTAGEOUS TO GENERAL CONTRACTORS, SPECIALTY CONTRACTORS, AND TO THE CONSUMER AS WELL.

LICENSED AND BONDED CONTRACTORS MEETING
NOVEMBER 29, 1983
2:00 PM

The meeting was called to order my Rep. Furnace. Persons present at the meeting were:

Rep. Furnace
Rep. Cowdery
Rep. Uehling
Allairy
Ken Johnson
Steve Levi
Dianna Smith
Earl Carlyle
Ray D. Agen
James N. Malapanes
Clay Porter

Earl Carlyle passed out a paper with 15 suggestions to support specialty contractors and these suggestions were discussed in detail and the following recommendations were made:

1. Come up with a modified definition of a "Contractor". Make it mandatory for all licensed contractors to include their license number in all advertisements; including business cards, signs, newspaper ads, television ads, radio ads, and yellow pages for easier identification by the license enforcement investigator.

2. Put in the statutes that the contractors license number or administrators license number should appear on all vehicles used in the conduct of business.

3. Bonds should be increased to $5,000 and $10,000 on the initial draft.

4. Concern was expressed over the lack of enforcement offered by the Dept. of Labor and the suggestion was made to transfer the enforcement function to Dept. of Commerce and Economic Development, Division of Occupational Licensing which is a more reasonable, supervisory governmental unit. It was noted that we should give the inspectors more ability of checking for violations. Concern was also expressed with the regard to the ability of the enforcing agency to issue citations with "teeth". For further information, staff was advised to contact, Ron Wates with the Municipality at 786-8307.

5. Establishment of a statewide Board of Builders which shall meet on a monthly basis and shall include a membership of the following:
    1) Speciality Contractor
    2) Remodeling Specialist
    3) Private Sector Representative
    4) Local Government Representative
    5) Two General Contractors
    6) One Heavy Highway Contractor

6. This statement is already covered in number one.

7. It was recommended that House Counsel examine the constitutionality of legislation to terminate phone service for those companies who are inviolation of the licensing and bonding provisions of the statutes and regulations. House Counsel was contacted and staff has been informed that there is probably no constitutional question involved in the discontinuance of telephone service for those businesses which advertise falsly or falsly portray themselves as bonafied businesses. The only difficulty that could arise would be the instance in which a business phone and a personal phone are used for the same purpose and for some reason the individual could not disassociate the two entities.

8. It was noted that the laws for violators are there and the problem we are having is with enforcement. It was recommended that a monetary fine of not more than $250 a day for contractors in violation of the law (see page 15 of the Oregon law).

9. This statement is covered in suggestion number one, but it was recommended to maybe include a monetary fine of $250 a day.

10. It was noted that since there is some support for this issue, we would propose this to the drafters and let them work with some language as to how we can best do this. The general contractor is already covered, we want to reach the subcontractor.

11. It was noted that a list can be obtained, but that it takes a long time to get. A person requesting a list of contractors you should be able to get one within a certain period of time that is fairly predictable. It was recommended that we should advise that a list is available upon request for a nominal fee, if any, and that the list can be expected to be received within a two week or 30 day time frame. It was suggested that we may want to contact, Dick Lyon with the Dept. of Commerce and Economic Development to further discuss the possibilities of this of instigating this.

12. It was noted that this statement should have been on a separate sheet of paper and is not to be included under this heading because it pertains to the motor vehicle laws.

13. It was recommended that we restate this in whatever new section we develop on general contractors and specialty contractors.

14. It was recommended that a owner/builder can only build one home or one structure per year to take advantage of the owner-builder option to remain unlicensed.

MEMORANDUM

TO: Representative Jack McBride

FROM: Nancy Pease
Legislative Analyst

RE: Licensing and Bonding of Contractors in Other States
Research Request 83-251

Rena Bukovich of your staff requested information on the licensing and bonding of contractors in other states. Specifically, she asked how certain contractors--plumbers, electricians, builders and specialty contractors--are licensed and regulated in the following states: California, Colorado, Idaho, Michigan, Montana, Ohio, Oregon, and Washington.

Regulation of Contractors in the Eight States

Licensing. Altogether, 28 states license contractors. The licensing and bonding requirements for contractors in the eight states about which you inquired are summarized in the attached chart (see Attachment A). Of these states, Ohio is the only state which does not license contractors in any of the trades you specified (electrical work, plumbing, or general or specialty contracting). Colorado does not license general or specialty construction contractors, and Idaho and Montana require licenses of construction contractors only if they wish to bid on public works. With these exceptions, the states generally require contractors to be licensed.

Bonding. California, like Alaska, requires that all contractors post bonds with the state as a prerequisite for license approval. Washington and Michigan require bonding for electricians; the other states do not require electricians or plumbers to post bonds in order to obtain a license. Four of the eight states--California, Michigan, Oregon, and Washington--require general or specialty construction contractors to post bonds with the state. The largest bonds are required by Michigan, where a residential building contractor must post a bond of $10,000 to obtain a license.

Regulations. As requested, we are providing copies of the other states' statutes for the trades of electrical work, plumbing, and general and specialty contracting.

In some instances, we have included license applications and printed regulations supplied by the states' trade boards. Please let us know if you require further analysis of the statutes and regulations; we will be happy to summarize and compare them if needed.

Requirements for a Contractor's License

Licensing requirements for contractors vary from trade to trade and from state to state. The procedure for obtaining a license may require the applicant to complete some of the following steps:

- pass a written or oral examination;
- submit a financial statement;
- submit references from material suppliers and/or bank;
- attest to ownership of equipment and/or experience related to the given field;
- report an in-state business address;
- report personal or corporate bankruptcies;
- obtain bonding; or
- obtain insurance covering public liability, property damage, and workers' compensation.

Exemptions. Some states exempt from licensing those contractors whose contracts do not exceed a specified dollar amount. Other states waive the license requirement if a person intends to work only on his personal property. For example, Alaska does not require a person to license himself to repair his own property, while Arizona requires that work on personal property be performed by a licensed and bonded contractor if the building is to be rented or sold within one year of completion of the work. Two states, Kansas and Nebraska, license only nonresident contractors, and Delaware licenses contractors for revenue purposes only.

Limited and reciprocal licenses. In skilled trades such as plumbing and electrical work, states frequently issue licenses that limit the licensee to working at a particular skill level for which he has demonstrated competency or proven his experience. For example, Colorado licenses electrical workers at four skill levels: trainee, residential wireman, journeyman electrician, and master electrician.

In granting a license to a contractor, some licensing boards also: (1) determine the construction classification at which the contractor may work (i.e. industrial, commercial, residential, public works); and (2) set a contract bid limit based on the contractor's working capital, i.e., he may not bid over $200,000 on a single contract or over $500,000 on separate, concurrent bids.

A few states have agreed to reciprocally recognize other states contractors' licenses; for example, Michigan and Indiana permit plumbers licensed in either state to do contract work in both states.

Licensing Boards

In states which thoroughly review the qualifications of contractor applicants, the licensing procedure is usually handled by a licensing board. Typically, this board is composed of licensed, experienced contractors who are appointed by the governor or the state legislature and who convene intermittently throughout the year. Recently, many states have included members of the general public on regulatory boards so that the boards are not composed exclusively of representatives of the regulated industry or profession.[1]

Bonding Requirments

Of the 28 states that license contractors, eleven states require the contractor to be bonded as a condition of license approval.[2]

As you may know, Alaska requires a surety bond of $5,000 for a general contractor and $2,000 for a specialty contractor, or an equivalent cash deposit.[3] The surety bond, also termed a "license bond", is intended to assure payment of (1) taxes, (2) employees and suppliers, and (3) any judgments against the contractor for negligent or improper work, breach of contract, or damage to public facilities.

The bonds that some states require before they will license contractors are independent from the bonds that construction clients may require before they will accept a contractor's bid. Construction clients may

[2]Ibid

[3]AS 08.18.071.

require (1) performance bonds to guarantee that the work will be completed on time and according to specifications; (2) payment bonds to guarantee that suppliers and employees will be paid; and (3) bid bonds to guarantee the sincerity of the bid.

Penalties and Enforcement

Penalties. AS 08.18.141 states that "a person acting in the capacity of a contractor in violation of this chapter is guilty of a misdemeanor." The contractor is usually given a hearing before the trade or licensing board, and if found guilty, he may be fined in addition to having his license revoked. This same penalty appears to be common among states that require contractors to be licensed.

The method of recovering damages from bonded contractors in Alaska also appears to be normal procedure in other states. The surety bond issuer is not liable for claims in excess of the amount of the bond, and claims for breach of contract are assigned a lower priority than claims for labor costs and taxes which may be owed to government units.

Enforcement. Most states share with local governments the responsibility for monitoring contractors. For example, Colorado plumbing laws prescribe that cities with populations of over 70,000 must appoint inspectors of plumbing to their local boards of health to help report violations of plumbing laws to the State Examining Board of Plumbers. In addition, Colorado's State Examining Board of Plumbers is authorized to hire its own plumbing inspectors.

In states which have a single board of licensing for contractors in all trades, enforcement duties may be divided among state agencies as well as between state and local agencies. For example, in Tennessee, the Board for Licensing Contractors only investigates complaints about licensing, while violations of the technical rules of a particular trade are dealt with by the appropriate trade board or by state health and safety agencies.

Footnotes: See Next Page

FOOTNOTES TO TABLE 1

1 AS 8.18.171 defines "general contractor" as a contractor whose business operations require the use of more than two distinct trades whose work the general contractor superintends; the terms "general contractor" and "builder" are synonymous; a "specialty contractor is a contractor whose operations do not fall within the definition of "general contractor". Contractors are persons who undertake or bid for projects to construct, alter, repair, move or demolish a building, highway, road, railroad, or a type of fixed structure, including excavation, site development and erection of scaffolds.

2 A bond of three to ten times this amount is required for the licensing of applicants who have been a party to business infractions resulting in the revocation of their own or other contractors' licenses (CRS 7071.8). Swimming pool contractors must post a bond of $10,000.

3 The co-owner of a licensed firm, or the subsidiary or joint venture partner of a licensed firm, may in some circumstances be required to post an additional bond of $2,500. CRS.7068 and CRS.7071.9.

4 The bond takes the form of a deposit to the Homeowners Construction Lien Recovery Fund. The required amount of the bond varies. MCL 338.883.

5 Contractors in the fields of residential building, maintenance, or alteration must post bonds of $2,000 for each trade for which they are licensed, not to exceed a total of $10,000. MCL.338.1504.

6 ORC 3781.102 delegates the licensing of contractors in Ohio to local governments. However, legislation is now pending before the Ohio General Assembly to establish requirements for state licensing of electrical contractors.

MEMORANDUM

TO: Representative Walt Furnace

FROM: David Teal
Legislative Analyst

RE: Licensed/Bonded Contractors
Research Request 83-213

Steve Levi, of your staff, asked whether or not Alaska had the least restrictive standards for licensed and bonded contractors. We contacted the Council of State Governments, the National Conference of State Legislatures and the Associated General Contractors of America to determine Alaska's standing in this regard. We discovered that training/experience requirements in Alaska are minimal relative to other states which require licensing and bonding of contractors, but that nearly half of all states do not require contractors to be licensed. Further, fewer than half of the 50 states require contractors to be bonded.

This memorandum discusses standards for contractors from three perspectives: when a licence is required; requirements for obtaining a license; and the consequences of failure to meet legal standards. Each of these topics is discussed below.

Who must obtain a contractors' license?

The attached table shows that 28 states require contractors to be licensed and that only 11 of those states require licensed contractors to be bonded.[1] From the perspective of whether or not a license is required to operate as a contractor, Alaska's standards are clearly more restrictive than those imposed by some states. However, relative to other states that require contractors to be licensed and bonded, Alaska is more liberal than some states. For example, no license is required for an Alaskan to repair his own property, while Arizona requires that work on personal property be performed by a licensed and bonded contractor if the building is rented or sold within one year of completion of the work.

---

[1]The table is from a 1978 document prepared by the State of Tennessee. Much of the information appears to be outdated. More reliable information will be forwarded to you when it is received.

What is required to obtain a contractor's license?

Among those states that require contractors to be licensed, Alaska's standards are relatively nonrestrictive. Alaska does not require demonstration of knowledge or experience in order to obtain a license to contract for general building construction or repairs. Alaska requires only that an applicant complete an application, pay the registration fees, obtain a $5,000 surety bond ($2,000 for specialty contractors) or file an equivalent cash deposit, obtain a business license and provide evidence of insurance covering public liability, property damage and workers' compensation. Several states require that an applicant pass an examination and provide evidence of four or more years of experience in the construction field. Some states have more stringent requirements related to an applicant's financial situation, character, integrity, qualifications and age.

What are the consequences of failure to comply with the law?

AS 08.18.141 states that "a person acting in the capacity of a contractor in violation of this chapter is guilty of a misdemeanor." This penalty appears to be common among states that require contractors to be licensed. The method of recovering damages from bonded contractors in Alaska also appears to be normal procedure in other states. The surety bond issuer is not liable for claims in excess of the amount of the bond, and claims for breach of contract are assigned a lower priority than claims for labor costs and taxes which may be owed to government units.

* * *

The Associated General Contractors of America has written a letter on this subject to each state. When results from that survey are available, they will be forwarded to your office. Previous work by the House Research Agency on the subject of contract bonding is attached to this memorandum. I hope you find the information useful.

Exhibit I, State of Tennessee Program Evaluation

U.S. SMALL BUSINESS ADMINISTRATION
WASHINGTON, D.C. 20416

OFFICE OF THE ADMINISTRATOR

JULY 2, 1974

Mr. Victor L. Lowe
Director
United States General Accounting Office
Washington, D.C. 20548

Dear Mr. Lowe:

This is in response to your request for comments on the draft report entitled "Surety Bonds in Federal Construction: A Study of Their Application and Effectiveness."

[See GAO note 1, p. 40.]

Operation of the Program

Before we get into the specific areas listed, we must bear in mind that the report itself is 14 months old, and we should like to provide an update on the statistical data listed in the report as of March 31, 1973, and bring that up to May 20, 1974. The Surety Bond Guarantee Program is the fastest growing program of the SBA. Following is a table indicating levels of activity:

Fiscal Year	No. Guarantees Approved	No. Contracts Awarded	Value of Contracts
1971 (Pilot)	21	7	$ 312,252
1972	2,316	1,339	$ 94,434,157
1973	8,657	5,597	$ 351,169,011
1974 (Thru 5/20/74)	11,856	8,150	$ 571,426,269
TOTAL	22,850	15,093	$1,017,361,689

The total number of contractors that have received this assistance since the inception of the program had been 8,342. There are 99 sureties that are currently participating in the program. Approximately 35 percent of our total guarantees are for minority contractors.

Next, we should like to outline the procedures through which an applicant goes in obtaining a surety bond guarantee: (1) The contractor obtains a copy of our application form from one of our district offices or, in most cases, through a broker or agent. (2) The original application goes directly to our surety bond personnel in the regional office, a copy to the surety, and an information copy to our local district office.

If an agent or contractor is unable to locate a surety willing to participate in our program in his area or feels that the sureties are unreasonable in their underwriting standards, our offices are prepared to give him a list of the sureties which have demonstrated a responsiveness to our program. Agreement with the surety industry provides that, if a surety decides that it cannot issue a bond even with an SBA guarantee, SBA will be supplied with the reasons for decline. Three major reasons for declination are:

1. The financial package is inadequately prepared,

2. The surety feels that the contractor does not have sufficient working capital to handle the contract under consideration, or

3. There is a lack of sufficient technical and/or managerial skills to perform the contract or to handle the extra managerial and financial load of one more contract in addition to his work in progress.

SBA can and does assist the contractor to eliminate deficiencies by the following means:

1. Refers the contractor to funded organizations which specialize in assisting the contractor in putting his financial package together properly.

2. Refers the contractor to SBA loan specialists for consideration of either a working capital loan or the revocable, revolving line of credit, which was designed specifically for construction contractors.

3. Refers contractor to our management assistance personnel.

If the surety decides that a bond can be issued with our guarantee, they will forward to our office a copy of the contractor's financial statement, together with a copy of our Surety Bond Guarantee Underwriting Review, SBA Form 994-B. The SBA Form 994-B is primarily a checklist of virtually all of the normal underwriting requirements that a surety would check out prior to issuing a bond, be it with SBA or on their own. Upon receipt of the Underwriting Review, the financial statement, and the surety's recommendation, the SBA makes its own underwriting review, and, if favorable, completes the guarantee agreement and returns it to the surety.

The following is an update on our claims and defaults. We compute our loss ratios on a quarterly basis, the last of which was as of April 20, 1974. At that time we had 548 default notifications, with 393 of these that have established incurred loss of $9,260,21[illegible] Th. incurred loss figure included paid losses plus reserves. In computing our loss ratios, we use our average sized contract of $68,000 and prorate the contract over a 10 month period. In other words, our $68,000 contract is 50 percent completed in 5 months and 100 percent complete in 10 months. Our loss ratio, based on completed commitments, is 1.24 percent.

SBA loss RATIO

The sureties compute their loss ratios on an earned premium basis rather than commitments. An average contract of $68,000 would carry a 1 percent premium. Therefore, the industry loss ratio, based on earned premiums, would be 124 percent versus 1.24 percent on commitments.

We break down our loss ratio by region as well as by surety. At any given time we can determine the loss ratio of a specific surety company, either nationwide or in any region.

All claims are handled out of our Central Office. Our field office sends us a copy of the complete underwriting file. A desk audit is made on each claim submitted. In addition to normal verification and audit of claims data, we also assure that the surety made no misrepresentations, etc., as well as attempting to establish reasons for default. We have found that the reasons our contractors go into default are basically the same as those that the sureties sustain under normal programs - insufficient capitalization to carry them over when they run into trouble, and going beyond their capacity. Only about 3 percent of our contracts go into default. Therefore, we have a success rate of 97 percent.

As a matter of information, we also have broken down some other statistical data with regard to our loss ratios. A study made by us in February shows the surcharge rate companies had a 1.56 percent loss ratio versus a 1.34 percent for the standard rate companies. This includes only those companies that have one or more losses. The commitments of the other companies are not included.

Minority contractors have established a 1.8 percent loss ratio versus non-minority at a 1.1 percent loss ratio. Our four largest producers in this program have the following loss ratios: 1.58 percent, 2.3 percent, 1.67 percent, 2.58 percent. These are all smaller companies that specialize in smaller contracts. One of the major companies, which is one of the largest surety bond writers in the country, has established a loss ratio of 1.60 percent in our program. A copy of the loss ratios is enclosed with this report and, as you will note, one company has a 7.5 percent loss ratio. However, there were only two claims that were quite substantial and would be considered as shock losses in determining loss ratio. We will debar any surety that has a consistent and inordinately high unexplained loss ratio.

We have taken the position, unless Congress feels to the contrary, that a 2 percent loss ratio on commitments should be the maximum allowable in the program. This, we feel, is a reasonable loss expectation for the marginal contractor. As a comparison in loss ratios, GAO reports show that sureties have a 51 percent loss ratio on government work, based on their premiums. Converting this to our method of computation would show a .51 percent loss ratio on the "blue chip" contractors. Comparing this contractor to the marginal contractors that we are dealing with, our loss ratio of 1.24 percent would fall in line with the intent of the program.

.51% vs. 1.24% SBA

Need for Increased Participation by SBA in Program Operations

Our position is that any contractor who meets our size standards is eligible to apply for surety bond guarantee assistance. The initial evaluation of the contractor is up to the surety. The premiums charged by sureties include efforts expended in the prequalification of contractors. This is a function that we feel should be performed by the surety itself. Our function is only reviewing what the surety has submitted to us and to see whether it falls in line with our legislative and regulatory requirements. The industry itself does not have any iron-clad formal underwriting criteria. Each case must stand on its own merits. We feel this same procedure should be followed within our own program. However, we do have our underwriting review, which is an official checklist for the industry of the information we expect them to develop in order to make an underwriting determination. As we have mentioned earlier, should a surety decide that a contractor does not qualify for a bond, even with an SBA agreement, and, if we feel that the contractor can perform, we will refer him to a more responsive surety.

One factor which makes it difficult to establish formal underwriting guidelines for the sureties is that these guidelines can be used to turn down applicants, as well as to make them eligible. As a rule of thumb, for construction contractors, many sureties require a ratio of 1 to 10 of the contractor's net quick assets to his total work in progress. There are cases where the surety may want a 1 to 5 ratio. There are other cases where another surety may go 1 to 20 on a specific contractor. Availability of additional credit, size of the job, and the amount to be subcontracted are all elements that enter into a decision on net quick asset requirements. If we were to establish a standard of, say 1 to 15, a ratio of less would automatically trigger a decline by the surety industry. It would become too complex to establish these types of standards. The industry itself has general guidelines in their normal underwriting; we expect them to use their guidelines, consider that these are marginal contractors, and that the SBA will accept risks that the industry would normally decline. All we ask them to do is to give us the normal underwriting data with all of the facts and their opinion as to whether the contractor can perform the specific contract. Based on that analysis, SBA will further analyze the facts presented and make a subjective judgment.

We have even had cases where we have extended our guarantee where the contractor had a deficit net worth and where he performed successfully. However, we could not write a guideline that would permit the issuance of a guarantee to a contractor with a deficit net worth. Such a determination would depend upon the individual contractor and circumstances of the specific case.

A contractor has every right to appeal to SBA for assistance should he be turned down by a surety, and, as a matter of fact, frequently does. We have met with several minority contractor associations throughout the country. There is a favorable consensus among these groups.

The question of "graduation" is a difficult one. The sureties do not notify us when they take a contractor out of our program and put him into their own. The only assumption we can make is that, if there is no activity in a particular file for 6 months to a year, we can assume that the contractor, if he has not gone into claim, has gone into the surety's normal business. We do, however, have certain guidelines for our surety bond personnel in the field. As an example, a valid reason for keeping a contractor in our program after he completes several jobs could be that his financial statements show insufficient earnings to justify bonding him without SBA support. Another reason is that the contractor is increasing the size of job or total work program beyond what the surety would accept in its standard business. Again, this is a form of graduating from small contracts to larger contracts.

There is considerable room for upward mobility within the program. The average job is now $68,000. Our limit is $500,000. We also find that the marketplace itself assists in this area. We have noted that even in the cases of some surcharge rate companies, which may not write standard rate bond business, a contractor who can qualify for standard business will go with one of the major companies. The reason for this is twofold:

(1) The contractor will not pay the higher premium if he can avoid it, and

(2) There is a certain pride among contractors when they can get bonding on their own with one of the major sureties.

We must remember that the contractors in our program are considered marginal and no contractor wants to be tagged with that label for any longer than absolutely necessary. In checking with one of the large producers in the surcharge rate area, we find that they average 1-1/2 contracts before they lose a client to one of the other surety companies. Our national average is less than two contracts per contractor since the inception of the program.

When we originally discussed the prospects of this program with the industry, one of the objections of the industry in handling our type of business - the marginal contractor - was the fact that the administrative expense alone, aside from the losses, would be far greater than the normal business. Our experience so far has proven this to be the case.

In February we had a meeting with 19 surety companies, each of which write 1 percent or more of our total volume. Combined, they represented 89 percent of the total volume in our program. Also attending were representatives of the American Insurance Association, the Surety Association of America, and the Agents' Associations. The purpose of the meeting was to discuss premium sharing, percentage of guarantee, and contractors' fees.

The major companies expressed a willingness to increase the SBA share of the premium and to consider a reduced guarantee percentage. They also stated that they were losing money on the program. Our analysis of their activity would bear this out.

The smaller companies took a very strong position on maintaining the present fee and guarantee structure. They stated that they were making money on the program, that increased fees and decreased guarantees would eliminate profit, and that without profit they would not remain in the program.

There are many factors to consider. Why are the major companies willing to participate in the program at loss? Is it because their big business clients are applying subtle pressure to eliminate competition? Is it because they know that the smaller sureties cannot remain in the program at a loss?

To remain in the program with higher fees or a lesser guarantee, the smaller sureties would have to tighten up on their underwriting. What would the effect be on the minority contractor? The loss rate on his business is 1.8 percent versus 1.1 percent for nonminority. With a tightening of underwriting standards, the benefits of the program would be denied to those who need it most.

We are not prepared to adjust either the fees or percentages of guarantee at this time. We will, however, make adjustments at such a time as our continuing analyses might justify.

We are enclosing a list of all the sureties participating in our program as of May 20, 1974 (from the inception of the program). This list includes the number of contracts and the dollar values by region and total. As you will note, there are many sureties listed that are national companies but have written very few bonds through our program in the almost 3 year period since its inception.

The report also states that the maximum allowable premium rate that SBA permits was $20.00 a thousand and a change to $15.00 a thousand under contemplation. Our maximum allowable rate as of March 1973 is $15.00 per thousand for the first $50,000 and $10.00 per thousand on amounts in excess of $50,000. Therefore, we only allow the additional 1/2 percent on the first $50,000. Any surety that is using the standard 1 percent in their normal business, because of filing with the various state insurance departments, must use the same rate for the business with the SBA program. Therefore, there are very few companies charging the 1-1/2 percent rate, though it is true that a substantial amount of our volume comes from sureties which charge the higher rate. We have no quarrel with those sureties which are in the program for profit. Profit, if kept within reasonable bounds, is a perfectly legal and proper incentive.

Lack of Incentives

Our experience in the program alone seems to dispute this point.

1. For the surcharge rate companies, their records show that a contractor, on the average, has 1-1/2 contracts prior to leaving them.

2. The total number of contracts in the program versus the number of contracts guaranteed is still less than two contracts per contractor.

It is true that the surcharge rate companies would prefer to keep the contractor with them for a longer period of time, but, because of market conditions and the lower rates with the standard surety companies, the contractor automatically will go where the price is right. It must also be noted that publicly the Surety Association and American Insurance Association have indicated to us that they feel the program is getting too large. Therefore, they are encouraging their members to graduate contractors out of our program and write them in as their standard business. This philosophy of the industry is understandable. They are afraid of any government interference in the surety bond field. Total underwritings through the SBA are probably between 1 to 2 percent of the total value of construction bonds written throughout the country, and it is evident that they do not want government participation to become a much bigger factor than it now is.

We have found no instance where the surety found that it was advantageous, economically or administratively, to allow the contractor to default rather than provide financial and technical assistance. On the contrary, the sureties check with us on all claims and we work together in attempting to handle claims in the best way possible. There are many cases where the sureties have financed the contractor. When the surety finances the contractor, we do not provide any funds to the surety while they have the funds in a controlled account. However, once the funds are expended from the account, then the sureties receive their 90 percent reimbursement. This is much the same way that claims are handled between the sureties and their reinsurers. So again, we have found no cases where the surety has defaulted a contractor rather than go through additional administrative expense in trying to have the contractor himself complete the job. It is an unfortunate fact that, once a marginal contractor defaults, the chances of his survival are minimal. In a few cases, however, through the mutual efforts of SBA and the surety, we have been able to help a contractor so that he corrected his default and was able to continue in business.

Conclusions

Based on the information given herein, we feel that we have covered the three points in your recommendations:

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES
RESEARCH AGENCY

Pouch Y, State Capitol
Juneau, Alaska 99811
(907) 465-3991

MEMORANDUM July 1, 1980

TO: Representative Patrick O'Connell

FROM: Anne DeVries, Issues Analyst AD

RE: Availability of Contract Bonding
Research Request No. 147

This memorandum is in response to your request for research on the availability of contract bonding for small contractors. I understand you are interested in possible legislative action to relieve the problems some contractors face in obtaining contract bonds in amounts over $500,000.

Summary of Findings

Briefly, there are three major findings from this research:

- Overall, contractors are able to get bonding in the amounts for which they are qualified. It is not evident that sureties are denying bonds to contractors on the basis of criteria which are irrelevant to their ability to complete a contract.

- A State reinsurance program is the major way in which bonding could be made more available. The primary problem of such a program is that it would expose the State to financial losses on defaulted contracts.

- The availability of bonding is important to contractors because bonds are required for most public works contracts. An alternative to making bonds more available is to modify access to public contracts. The State has two main alternatives: to raise the amount of the contract below which no bonding is required, or eliminate bonding altogether. There are two problems with these alternatives: they expose the state to financial losses from defaulted contracts and they shift the responsibility of determining contractor qualifications from a non-political body, the surety, to the State. These are the same problems that the surety system was designed to eliminate.

Introduction to the Question of Bond Availability

Contract bonding is the way in which a corporate surety, usually a large insurance company, extends its financial backing to qualified construction contractors. It is a means of assuring the construction client that he will not have to suffer a financial loss because the contractor fails to complete a contract. The demand for bonds arises primarily from the public sector as bonds are a means of protecting the taxpayer from contract losses.

In return for a service fee, a surety company will bond any contractor it deems qualified to do the work for which a bond is required. If the contractor defaults on the job, the surety is obligated to assure that the contract is satisfied with no financial loss to the client. If the surety incurs a loss in meeting its obligation to the client, it will take action against the contractor to recover its losses. Under established surety underwriting practices, the risk of financial loss from default remains with the contractor. As a consequence, the surety will bond only those contractors in situations where it anticipates that no default will occur, and where the contractor is financially able to cover any losses that may occur (if, for instance, where one of the principals dies and the firm cannot complete the contract). The availability of bonding, therefore, is determined by the criteria surety underwriters use to define a "qualified" contractor.

Interest Groups

The question you have raised concerning the availability of contract bonding directly affects the economic interests of four groups, often in conflicting ways. The interests of these groups - the contractors, the sureties, the construction clients and the State - are described in this section.

The Contractors: As a group, contractors share two interests:

- They desire ready access to work, and to the extent that the lack of bonding denies access, they want ready access to bonding as well.

- They would like to limit competition to qualified contractors. An unqualified contractor may be the low bidder because he lacks full knowledge of costs and potential problems in a job. He may get a contract and then fail to perform. This creates "unfair" competition to qualified contractors.

Obviously, those contractors who have no trouble obtaining bonds do not necessarily see their interests enhanced by measures making it easier for other contractors to secure the same means of access to work.

The Sureties: As a group, sureties share an interest in making money. However, there are two types of surety companies with distinctly different ways of making money:

- Standard sureties make money by writing all the bonds they can. However, as they are not compensated for risk, they adhere to underwriting criteria that are established based on the presumption of "no losses".

- Specialty sureties make money by exploiting the government subsidy inherent in the Small Business Administration's re-insurance program. This is discussed in greater detail later in the memorandum.

The Construction Clients: Demand for bonding originates primarily from the public sector, all discussion in this memorandum will focus on the interests of municipal, state and federal construction clients. As a group, these entities share two interests:

- They want to protect the taxpayers' interests by obtaining the best quality construction work at the lowest price.

- In order to insure the lowest feasible costs, state and federal governments want to insure adequate competition among qualified contractors by removing any artificial impediments to competition, such as minority discrimination.

- They want to protect themselves from the claims of suppliers or laborers who were not compensated by a contractor on a public works job. Bonds are necessary as public works are not subject to liens designed to protect suppliers and laborers on private jobs.

The State: The State, as a protector of its citizens, wants to:

- Insure that citizens are not prevented from enjoying their livelihoods by the arbitrary acts of others, such as a private company discriminating against minorities.

- Insure that citizens have "fair" access to all work that the state provides.

Of these four parties, the State faces the strongest conflicting interests. It may want to make access to bonding easier in order to insure some of its citizens better access to their livelihoods, while at the same time it is the largest single beneficiary of the contract bonding system. This conflict will be the focus of this memorandum.

What is Contract Bonding?

Construction is an inherently risky business. A contractor can fail to perform on a job for any number of reasons:

- Key personnel die or become disabled, either physically or emotionally - a divorce or death in the family, a drinking problem, etc.
- He is overextended; either he has committed his firm to too much work or to a job which may have unexpected problems beyond his capability to solve.
- He has inadequate supervision.
- He has an inefficient operation.
- He lacks the appropriate job cost accounting records and procedures.
- He has uninsured losses.
- He is the victim of employee dishonesty.
- He has submitted an improper bid: it may contain mistakes, it may not allow for unforeseen contingencies and/or price increases, or it may not have adequately provided for overhead.
- He has failed to arrange proper financing.
- He has made a poor selection of venture partners.
- He is adversely affected by weather conditions.

Awarding a contract to the "lowest qualified bidder" increases the risks of a project, for the contractor who wins the job has given himself the smallest possible financial cushion with which to absorb the cost of any problems.

The construction client recognizes that these problems can occur and he has two alternative ways to protect his interests:

- If a contractor fails to perform, the client can arrange to complete the job himself and take legal action against the contractor.

- He can require that the contractor secure the backing of another party who will assure the client that he will suffer no financial loss from a contractor failure. This third party may be an individual or a corporate surety.

Under either alternative, the client pays for the cost of this protection. In the former instance, he incurs the costs directly; in the latter, the cost of the surety's bond is included in the bid price.

Types of Bond Required: Three types of contract bonds are generally required:

Performance bonds guarantee that the work will be completed in accordance with the plans and specifications and at the contract price.

Payment Bonds guarantee that the suppliers and employees of the contractor will be paid. Payment bonds are required on all public works projects because that property cannot be made subject to a Mechanics and Materialmen's Lien which protects these interests on private projects. A payment bond also makes it easier for suppliers to get credit, as they are assured of being paid.

Bid Bonds guarantee the sincerity of the bid. A bid bond in the amount of 10% to 25% of the bid is usually required. If a contract is awarded to a bidder who is then unable to secure the other required bonding or for some reason cannot enter into a contract, the bid bond is forfeited. A surety will usually issue a bid bond only when it is prepared to issue payment and performance bonds, as required.

Both payment and performance bonds are required because it is possible for a contractor to finish a job and then "leave town" before his suppliers and employees are paid, or he might meet his obligations to his suppliers and employees without satisfactorily completing the job.

Underwriting Requirements: The surety decides whether or not to provide bonding to a contractor through a careful analysis of his job history and financial capacity. This process is termed underwriting. It is underwriting which determines the availability of contract bonding.

There are two major factors considered in underwriting:

- The total amount of work the contractor will have if he is awarded the contract for which a bond is required.

- A combination of his performance record, his experience with the type of work required by the contract, the suitability of his equipment and the skill of his employees for the type of construction, the soundness of his bid and his financial capability.

The contractor will usually be asked to supply his bond agent or broker with the following:

- Financial statements for the last three years. Depending on the size of the job and the surety, these statements may have to be prepared by a certified public accountant and may have to be auditied.

- Completion of a contractor questionnaire which requires resumes of experience — job size, client, etc.

- A letter from his banker stating his credit experience with the contractor - what credit has been extended, how it has been handled, what credit is available for the upcoming contract, etc.

- Two or three letters of recommendation from former clients.

- One to two letters of recommendation from major suppliers.

An underwriter evaluates two aspects of the contractor's financial status: the amount of working capital he has in relation to the dollar volume of his projected workload and his net worth. Sufficient working capital is necessary to cover cash outlays for which the contractor will be reimbursed later. Contractors are usually paid on work as it is completed, therefore they must finance each portion of the work themselves. In addition, clients retain a portion of the payment, usually 10%, until the project is completed in order to guarantee performance. The contractor has to finance that 10% for the duration of the project. Without adequate working capital, a contractor may have to stop work on the project and be in default on the contract. A contractor's net worth, total assets less total liabilities, is the second component of his financial status that is important to a surety. The surety relies on a contractor's net worth as the primary loss paying fund, should the contractor default on the contract and the surety incurs losses in completing the contract.

Cost of Bonding: Contractors are charged a premium for the bonds they are issued. The premium is determined by the amount of the bond, the duration of the bond obligation and the type of contract being bonded: as the amount of the bond increases, the cost per thousand dollars of bonding declines; as the duration of the bond obligation lengthens beyond a specified period, the cost of the bond increases; and as the complexity of the construction task increases, the cost of the bond increases. The Surety Association of America has established rates which are used by most standard sureties; in its rate setting manual, it divides construction contracts into three major groups:

Class B	These are the most difficult types of construction involving architectural building construction, most engineering construction, concrete and excavation work performed underground or in or under water, etc.
Class A	These are general contracts and subcontracts of generally less difficult nature than those included within Class B such as most earthmoving work of a non-excavation nature, etc.
Class A-1	Contracts of this description include those generally less difficult than "B" or "A" of the construction classification and contracts for furnishing and installing, or installing only, or providing various services and equipment, such as a data processing contract.

As an example of the rate structure, the premium established for a Class B contract is 1.2% of the contract amount under $500,000, .725% of the next $2,000,000; .575% of the next $2,500,000; .525% of the next $2,500,000; and .48% for any additional amounts. This covers a bond obligation of 24 months.

The premium charged by a surety is distinctly different from that charged by an insurance company. The surety premium is not meant to create a loss-paying fund as an insurance premium does. In insurance, risk is transferred to the insurer, whereas in bonding that risk remains with the contractor. The function of a premium is clearly stated in the following excerpt from a Surety Association of America publication:

> Suretyship transaction does not intend a transfer of risk from the contractor to the surety. .... The surety's obligation is collateral or secondary to the contract obligation assumed by the contractor.. The surety's fee is essentially a flat rate charge for the services performed by the surety and as such it is more related to averting or controlling loss than to funding ultimate loss."
>
> The Unseen Services of a Surety, Surety Association of America

Reinsurance and Cosuretyship: A surety has two options for limiting his exposure on a contract bond: reinsurance and cosuretyship. Reinsurance is a means of sharing the premium and risk with another company; and it is a standard practice in the industry. The most commonly used mechanism is for the reinsurer to take a percentage of the premium (net of commission) and to assume the same percentage of any loss. The SBA program is a form of reinsurance; however, the government assumes a disproportionately large share of the risk for the premium it receives.

Cosuretyship is the means by which two or more sureties jointly issue a bond. Each surety has a limit on the amount of single bond it can write, depending on its financial position; this limit is established by the U.S. Treasury. By jointly issuing a bond with another surety, a surety can bond a contractor for an amount greater than the Treasury limit of either surety. Most cosuretyship arrangements limit the liability of each surety to a specified amount.

Regulations Pertaining to the Contracting Industry

The following sections outline the State's requirements for entry into the contracting business and its requirements for bonding on public works contracts.

There are about 3,000 contractors licensed by the State to operate in Alaska. About half of these are general contractors, the remainder are specialty contractors.*

According to AS 8.16, in order for a construction contractor to operate in the state, he must be issued a certificate of registration by the Department of Commerce and Economic Development. The following are required before a certificate is issued:

- a completed application
- a registration fee of $100 for a general contractor and $50 for a specialty contractor
- a surety bond of $5,000 for a general contractor and $2,000 for a specialty contractor or an equivalent cash deposit
- public liability and property damage insurance no less than $20,000 for property damage, $50,000 for injury or death to one person and $100,000 for injury or death to more than one person.

The surety bond, also termed a "license bond", is intended to assure payment of:

- all taxes and contributions due the state and political subdivisions
- payments to all persons furnishing labor or material or renting or supplying equipment
- payments for all amounts that may be adjudged against the contractor by reason of negligent or improper work, breach of contract or damage to public facilities occurring in the course of a construction project.

---

* AS 8.18 defines a contractor as "a person who, in the pursuit of an independent business, undertakes or offers to perform, or claims to have the capacity to perform, or submits a bid for a project to construct, alter, repair, move or demolish a building, highway, road, railroad, or any type of fixed structure, including excavation and site development and erection of scaffolding; a "general contractor" is a contractor whose business operations require the use of more than two distinct trades whose work the general contractor superintends." A specialty contractor is one involved in only one or two distinct trades.

In addition to this bond, the State requires payment and performance bonds on construction work exceeding $50,000 in value. AS 36.25 establishes the minimum bond coverage; the contracting officer is empowered to increase these amounts as he sees fit. The bond requirement can be satisfied by either a corporate surety, a large insurance company, or by two individual sureties who "shall each justify in a sum equal to the amount of the bond". The relevant portions of the statute are quoted below:

> . . . before a contract exceeding $50,000 for the construction alteration, or repair of a public building or a public work of the state or a political subdivision of the state is awarded to a general or specialty contractor, the contractor shall furnish to the state or political subdivision of the state the following bonds, which become binding upon the award of the contract to that contractor.
>
> (1) a performance bond . . . .; the amount of the performance bond shall be equivalent to the amount of the payment bond.
>
> (2) a payment bond . . . for the protection of all persons who supply labor and material in the prosecution of the work provided for in the contract; when the total amount payable by the terms of the contract is not more than $1,000,000, the payment bond shall be in a sum of one-half (50%) the total amount payable by the terms of the contract; when the total amount . . . is more than $1,000,000 and not more than $5,000,000, the payment bond shall be in a sum of 40% of the total amount . . .; when the total amount . . . is more than $5,000,000 the payment bond shall be in the sum of $2,500,000.

The statute also provides for a municipal exemption which allows municipalities to exempt contractors from these bonding requirements on contracts not exceeding $400,000 if the following conditions are met:

- The contractor has been licensed in the state for a period of two years and his principal office is in the state.
- The contractor has certified that he has not defaulted on a contract awarded to him during the previous three years.
- The contractor submits a financial statement, prepared within a period of 9 months preceding the submission of a bid, . . .

certified by a public accountant . . . demonstrating that the contractor has a net worth of not less than 20% of the amount of the contract for which the bid is submitted.

The total amount of all contracts which the contractor anticipates performing during the term of performance of the contract for which a bid is submitted does not exceed the reported net worth by more than seven times.

The Federal statutes, the Miller Act, served almost verbatim as a model for the State statute. There are only two differences: the Federal government requires bonds for all contracts in excess of $2,000 and it leaves the amount of the performance bond to the discretion of the contracting officer.

While the State statute requires a combination of payment and performance bonds amounting to 100% of the contract amount on jobs under $1,000,000, 80% on jobs between $1,000,000 and $5,000,000, and a flat bond of $5,000,000 on jobs over $5,000,000, in practice 100% bonding is required on all projects over $50,000. On projects which involve federal money, a 100% performance bond and a 100% payment bond is usually required. Municipal practices differ with the municipality and the source of funds it is spending; however, they are usually at least as strict as the state practices.

The Alaska Bond Market: Contracts bonds are supplied by 71 companies licensed to do business in Alaska. All are regulated by the Division of Insurance of the Department of Commerce and Economic Development, to which they must submit their premium rates for approval.

There are three types of firms: the standard companies, the specialty companies which are involved in the SBA reinsurance program, and sub-standard companies. This last group is able to supply bonds for the most marginal contractors by charging higher rates. It is not a significant part of the market.

The standard companies dominate the bonding market. The four largest companies, Travellers, Firemen's Fund, Fidelity and Deposit of Maryland, and Safeco, control over 50% of the Alaska market. Forty-nine companies, each writing less than $50,000 in premium annually, account for only 5% of the market.

In 1978, the last year for which data is available, $5.6 million of

direct premiums were written for surety bonds on Alaskan construction. Premiums average about 1% of the bond amount, so approximately $562.6 million of construction jobs were bonded. Direct losses to surety companies, net of recoveries, were $0.2 million, or 4% of the premiums written or .04% of the construction activity. The table below summarizes bonding activity since 1974.

TABLE 1

Surety Bonding Activity in Alaska, 1975 - 1978

	1975	1976	1977	1978
Number of Companies	93	70	68	71
Direct Premiums (000)	$3950.5	$4178.0	$4442.0	$5626.0
Direct Losses (000)	$1838.7	$ 964.0	$2863.0	$ 209.0
Losses/Premiums	47%	23%	64%	4%

Source: Insurance Reports for 1977-1979, issued by the Department of Commerce and Economic Development, Division of Insurance.

As you are aware, some small contractors have noted a tightening in the availability of bonds. They are unable to get the same levels of bonding that they have gotten in the past or they are unable to find sureties willing to write larger bonds for them. Apparently, they are experiencing the impact of tighter underwriting standards which have been made necessary by the large losses the sureties suffered in the mid-1970's, as indicated on Table 1; normal surety losses average between 5% to 10% of premiums while losses in Alaska got as high as 64% in 1977. One surety termed Alaska the "cemetery" of surety companies.

According to members of the industry who have followed the developments in the Alaska market, underwriting standards by most sureties were relaxed in the early 1970's in response to competitive pressures. Sureties are in the business of writing bonds and the primary limitation on the amount of bonds they write is their underwriting criteria. In

the late 1960's, a company entered the Alaska market agressively seeking business by writing bonds more readily than the existing companies. It offered larger bonds and larger bonding capacities to firms in order to take business away from competitors. The other companies were forced to match its tactics in order to retain customers. By the mid-1970's, this company, which had followed the same strategy across the country, was incurring large losses and decided to leave the surety business.

The problem of losses due to loosened underwriting standards was exacerbated by the recession in the mid-1970's. High interest rates affected a contractor's ability to get financing and inflation adversely affected his ability to project costs for materials and labor; both could lead to default on a contract.

As a response to these problems, some sureties chose to leave the Alaska market, while the remaining ones revised their underwriting criteria. One broker characterized this as a return to normal underwriting practice after a period of too-loose underwriting. He noted that the market in Alaska is "coming back". The current market has been characterized as the best one in Alaska for years; the comment that "any qualified contractor can get bonding" was made repeatedly by the surety representatives interviewed.

Means of Increasing Bond Availability

It is the question of what constitutes a "qualified contractor" which is central to the issue of availability. For the client, bonding serves a twofold purpose: it protects him from financial loss and it is a means of pre-qualifying contractors who want to bid on work. The client is protected by the surety's financial stake in only bonding qualified contractors. Because contract bonding is both a form of credit and a pre-qualification process, there are always some contractors who are unable to secure bonding for jobs which, in the opinion of the surety, exceed their financial or technical capability. Consequently, it is impossible to judge whether the contractors who have been experiencing problems in bonding are being subjected to unfair discrimination or are simply not sufficiently qualified to warrant the surety's financial commitment. If, through additional extensive research, it is found that there is some significant pattern of discrimination against a particular type or class of contractor, the State has two types of approaches to relieve their dilemma:

- It can permit sureties to lower their underwriting standards by assuming a large share of the risk of contractor defaults.

- It can remove the bonding requirement, on all jobs or on jobs over a certain amount, and assume the surety's dual functions. The State would be responsible for recovering its own losses on contractor defaults and it would have to devise a means of pre-qualifying contractors. These qualifications could reflect preferences to particular types of contractors if it could be shown they had been excluded unjustly from work because of surety discrimination.

There are variations on these approaches; however, these are the two major ones which have been considered by the Federal government in its frequent reviews of the surety bonding process.

Again, I have been unable to conclude that any group of contractors has been denied bonding for reasons unrelated to their ability to perform. As a third-party, often the State of Alaska, relies on bonding to protect the taxpayers and simplify its contracting process, it would seem that such a pattern of discrimination would have to exist before the State encourages the lowering of underwriting standards or becomes its own surety. That reservation aside, the following section describes how the Small Business Administration's reinsurance program works. This is the type of program which the State could implement if it choose the first of the two alternatives listed above.

The SBA Program

The Small Business Administration manages a program of reinsurance for contractors with annual gross sales of less than $3.5 million who are unable to get bonding with a standard surety company. The SBA program will issue a bond up to $1 million. The average SBA bond in the Pacific Northwest Region is about $70,000. This program was originally intended to help minority contractors secure bonding. It has since been expanded to include all small contractors as a way to insure their access to the bond market, and hence to public construction jobs.

The standard market takes the theoretical approach to surety bonding - it bonds contractors assuming there will be no losses and charges a premium, not based on risk, but to cover the costs of offering the service. On the other hand, the sureties which specialize in SBA bonds - the specialty

market - are more liberal in their underwriting criteria because the federal government is subsidizing the defaults of less "qualified" contractors who are bonded through the program.

The contractor pays a higher price for SBA bonding than he would if he qualified for bonding in the standard market. Table 2 presents a comparison of the premiums charged for bonds of different amounts under the standard surety rates and the SBA rates. The standard surety charges 1.2% of the contract amount for the first $500,000 and .0725% for up to the next $2,000,000 of bonding. In return for this premium, the surety is obligated to the full extent of the contract amount. These are the maximum rates charged for the most risky class of contract according to the Surety Association of America rate filing.

For the specialty surety, the maximum premium is 1.5% on amounts less than $250,000 and 1.0% on the balance of the bond. In addition, the SBA charges .2% of the contract amount as a service fee. Therefore, on a $250,000 bond issued by the SBA, the contractor pays 1.7% of the contract amount, compared to 1.2% for similar standard bond. The surety retains 80% of the premium and the remainder goes to the SBA. For its 80% premium, the surety takes 20% of the risk of default (10% if the bond is less than $250,000). The SBA assumes 80% of the risk of default (90% if the bond is less than $250,000) and receives 20% of the premium and the .2% service charge.

The SBA makes it attractive for sureties to bond contractors through its program by taking a disproportionately large share of the risk for the premium it receives. Table 3 illustrates the cost of this reinsurance program to the SBA. Table 3 assumes a 1.25% loss rate on each bond; this is the loss experience for the Pacific Northwest over the life of the SBA program. This loss is divided between the surety and the SBA and then compared to the premium income each received. For instance, on a $500,000 bond the loss is assumed to be $6250 or 1.25% of the bond. The SBA would cover 80% of that, or $5000. In issuing this bond the SBA received $1250 in premium and $1000 in service fees, a total of $2250. The SBA incurs a loss/premium ratio of 225% by assuming the larger share of the risk while the specialty surety has a more moderate 25% loss ratio. Overall, the loss ratio is 86.2%. This compares unfavorably with the national average of 5% to 10% and the most recent Alaskan performance of 4%. Table 3 also illustrates why some contractors have trouble getting SBA bonding over $250,000. The loss ratio doubles on these larger bonds because the government is assuming less of the risk; therefore, the specialty sureties have lost some of their incentive to take chances on weaker contractors.

Standard sureties, the ones writing the majority of the business in Alaska, generally do not participate in the SBA program. They have a number of objections to it:

- The paperwork demands are great. A contractor has to be underwritten each time he wants a bond. This requires the compilation of financial statements, letters of recommendations, etc. for each bond application. A standard surety avoids this problem by establishing a bond capacity, good for up to a year, on which the contractor can draw.

- Paperwork requirements create time delays. For instance, bonds over $500,000 must be approved by the SBA's Washington D. C. office.

- The SBA duplicates the underwriting work of the sureties to some extent.

- However, the overriding objection to the program is that "unqualified" contractors are placed in competition with "qualified" contractors, those who got bonding in the standard markets. Standard sureties see themselves as applying one standard to a contractor - whether or not he can complete the job - if the contractor can not mmet this standard, then he should not be given bonding.

It is likely that a State program similar to the SBA's would face simila: problems: . duplication of work done in the private sector, creation of a bureaucracy, the resistance of standard sureties, etc. However, the two most important problems it would face are:

- the cost of defaulted contracts, and

- the difficulty of defining limits to the program

These are clearly related. The SBA program began to help minorities, the victims of racial discrimination. It was expanded to help all "small businesses" and is under pressure to increase its limits to raise the definition of "small". A state program would be faced with a similar dilemma of pressures for an ever expanding scope. And clearly, financial losses from defaulted contracts would be a function of how broadly the State defined the group of contractors worthy of subsidy and the extent of the subsidy it offered.

It has not been possible to provide an extensive analysis of the SBA program within the time frame of this research. The detailed questions which would require answers before any State program is considered, are:

- Why are contractors in the SBA program unable to get bonding elsewhere? (Minorities excluded)
- Why is the loss ratio so high? How does this relate to the composition of contractors in the SBA program?
- How many contractors are able to grow out of the SBA program into the standard surety market?
- What are the administrative costs of the program?
- Based on a range of assumptions about the scope of the program, the amount of the risk assumed by the State and loss experience, what are the potential costs to the State?

Modifications of Bonding Requirements

The State has another alternative way of addressing the problems some contractors face in obtaining bonds, and hence access to public work: it could eliminate all bonding on State jobs or it could increase the contract amount below which no bonding is required. There are two problems with this approach. First, the State would have to duplicate the capabilities of existing sureties. It would require personnel to arrange for the satisfactory completion of contracts in default and to bring legal action against defaulting contractors for any losses it incurred. In addition, it would require the development of criteria to determine which contractors were qualified to bid on State contracts. One of the reasons for the creation of the surety system was to remove the "qualifying" process from the potential distortions of the political process. If the State became its own surety, on some or all contracts, its loss experience would primarily be determined by the appropriateness of its qualifying criteria in relation to contract requirements.

As this memorandum has shown, underwriting is a subjective process. It has been impossible to determine, within the time frame of this work, whether any conditions exist which limit bonding available in a way that warrants action by the State to increase availability of bonding. The standards that sureties established are intended to protect the client,

notably the State of Alaska, and any actions to change underwriting standards to increase availability may create serious problems for the State. I will send shortly selected portions of a report to Congress on the surety industry and its effect in preventing contract losses to the federal government. This may be of interest to you. If you have any additional questions, please let me know.

MEMORANDUM July 16, 1980

TO: Representative Patrick O'Connell

FROM: Anne DeVries
Issues Analyst

RE: Contract Bonding
Research Request No. 147 (Additional Material)

I have enclosed three excerpts from a report on the use of surety bonds in federal construction prepared by the General Accounting Office and submitted to the U.S. Congress. This report concluded that the government should not eliminate bonding and become its own self insurer. In addition, the report found problems in the ability of the SBA program to meet its objective of providing a transitional program for a marginal contractor.

One problem facing the SBA which I did not address was the involvement of organized crime in the specialty surety business. Recently, NBC Nightly News examined abuse of the SBA program in Chicago, where it is believed that fraudulent claims are being submitted by sureties fronting for organized crime. I do not know much about this beyond the NBC news story. However, if the State does consider a SBA-like program, this potential type of abuse may need to be examined more closely.

REPORT TO THE CONGRESS

Use Of Surety Bonds In Federal Construction Should Be Improved

Multiagency

BY THE COMPTROLLER GENERAL OF THE UNITED STATES

LCD-74-319

JAN. 17, 1975

ELIMINATING CURRENT BONDING SYSTEM DOES NOT APPEAR WARRANTED

We evaluated (1) the effectiveness of the current bonding system and (2) the economic and administrative feasibility of eliminating bonds and having the Government become a self-insurer.

In general, surety bonds and the surety companies provide

1. Financial protection to Government agencies against losses resulting from defaults.

2. Financial recourse for subcontractors, suppliers, and laborers.

3. Financial and technical aid for contractors.

The lack of cost data and the lack of Federal experience, particularly with respect to the latter two functions, prevented us from reducing the issue of self-insurance to a strictly quantitative determination. The monetary value of the individual services provided by sureties could not be isolated. Because the Federal agencies have had no experience in providing these services, they could not state what the cost would be if the Government assumed such services.

In the absence of comparable quantitative data, we could not develop measurable evidence supporting either elimination or retention of the current bonding system. The major participants in the system--Federal construction agencies, contractors, subcontractors, suppliers, etc.--generally voiced opinions that surety bonds were needed and that the current system was effective and should be continued.

As discussed below, Federal construction agencies do not, at this time, have the ability to duplicate some of the services provided by sureties. Particular factors arguing against the Government's becoming a self-insurer are the lack of legal means, administrative machinery, and in-house expertise for handling claims of subcontractors, suppliers,

could develop the necessary capabilities, it would probably prove costly to the Government.

Although we do not recommend eliminating the current bonding system, we feel that the Government is not benefiting as much as it could from surety bonds. Chapter 5 discusses those areas where the Federal construction agencies can improve their participation in the system.

CLAIMS OF SUBCONTRACTORS, SUPPLIERS, AND LABORERS

The basic purpose of the Miller Act is to provide a means of recourse for subcontractors, suppliers, and laborers on Federal construction projects. Payment bonds provide the means by which subcontractors, suppliers, and laborers can submit claims against contractors, even in the absence of defaults.

We examined selected project files at 9 Federal construction agencies, including files relating to 75 defaulted contracts. For 17 of the defaults, we examined the project files at both the Federal agency and the cognizant surety company. In many instances, subcontractors, suppliers, or laborers submitted claims or voiced complaints directly to the Federal agencies. Because these projects were bonded, the Federal agencies simply referred the complaints to the appropriate surety company. The fact that sureties handled the claims removed potentially major legal and administrative problems from the Federal construction agencies.

The surety industry has said that it does not keep overall statistics on the amount of claims submitted and paid on Federal construction projects. To ascertain the prevalence of claims, we reviewed selected surety companies. Presented below are examples of the situations we found.

Example 1

On a $36,000 Navy contract, a subcontractor submitted a claim for $29,000 to the surety company, citing nonpayment by the contractor. The surety maintains that,

$10,130. The surety also noted that its attempts to recover its loss from the contractor had so far proved unsuccessful.

Example 2

The contractor got into difficulty simultaneously on three multimillion dollar Federal projects. The surety allowed the contractor to complete all three projects and funded settlements with subcontractors and material suppliers. The surety cited payments on such claims of over $540,000, plus incurred expenses of over $20,000 and said that, so far, it had recovered only about $85,000 from the contractor.

However, in other instances the sureties contested subcontractors' and suppliers' claims. It is apparent that the sureties do not automatically pay all claims submitted under payment bonds. Rather, the sureties make certain determinations regarding the validity of the claims and the effect that payment or nonpayment will have on the sureties' financial exposure and on contract completion.

If bonds were eliminated, some other system for protecting subcontractors, suppliers, and laborers would have to be devised. Most Federal construction agencies believe that a workable system cannot be developed. The agencies feel that, even if a system could be developed, the administrative cost to the Government to operate the system likely would be high.

FINANCIAL AID TO CONTRACTORS

The surety keeps a bonded contractor's work program under surveillance to guard against the contractor overextending its total resources and thus subjecting the surety to potential financial losses. Should the contractor get into difficulty, the surety may be able to arrange for the loan of supervisory personnel, skilled technicians, or special equipment from other contractor clients of the surety. In addition, a surety sometimes provides or arranges for financial assistance to a contractor in trouble.

provide in-house technical assistance to a contractor. However, the agencies currently have no legal means, administrative machinery, or resources to provide financial aid to contractors in trouble.

As shown in the following examples, the surety companies can and do provide financial assistance to contractors.

Example 1

A contractor involved in a Federal dam project for the Corps of Engineers, Department of the Army, experienced a serious cash shortage that threatened its ability to continue operations. The surety elected to support the contractor and secured a $1 million line of credit for the contractor at a commercial bank. The surety guaranteed advances under the line of credit. As a result of the surety's aid, the contractor avoided default and completed the project.

Example 2

The contractor exhausted its capital at the time it was involved with nine bonded projects, including eight Federal jobs. The surety provided the contractor with enough capital to pay construction costs and to satisfy outstanding bonded job obligations. Surety payments on the Federal jobs totaled $138,500, plus legal and other expenses of over $5,000. The surety eventually was reimbursed.

It was evident from our study that the decision to provide financial aid to contractors was generally based strictly on sureties' concern for minimizing potential losses. If the surety determined that immediate financial aid would be less costly than the loss from default, the aid was provided. However, if the surety felt that it would be potentially less costly to take over the contract, the contractor was allowed to default.

DEFAULTS ON FEDERAL CONSTRUCTION

From the nine Federal agencies reviewed, we tried to obtain detailed data on the default history for a 10-year

period and the relationship of defaults to total construction activities. Only one of the nine agencies was able to provide complete information.

An analysis of the limited information available indicates that (1) most agencies experienced very few defaults and (2) the value of the defaulted contracts represented a very small portion of the total value of all construction contracts. For example, for the period 1963-72, AEC, NASA, and HEW were able to identify only five, two, and six defaults, respectively.

The Corps of Engineers was the only agency able to provide complete data comparing defaults to total construction activities. For the 10-year period, the Corps had 73 defaulted contracts having a total contract award value of about $30 million. During the period, the Corps awarded about 20,000 contracts valued at about $11.7 billion. The number of defaulted contracts represented less than one-half of 1 percent of total contract awards. On the basis of the total value of all contract awards, the value of the defaulted contracts was also less than one-half of 1 percent.

Generally, the cost of performance and payment bonds represents about one-half of 1 percent to three-quarters of 1 percent of the total contract price. Accordingly, it appears that sureties' losses on the Corps' defaulted contracts were considerably less than the bond premiums earned from such contracts. Surety figures show that, for all Federal contracts, the direct losses incurred averaged 51 percent for the period 1959-70--total premiums of about $241 million versus direct losses of about $123 million.

In comparing these figures to the total premiums paid on direct Federal construction (about $24 million annually), it appears that the Government could self-insure against losses from defaults if Federal construction agencies could keep losses from defaults, including the administrative cost of handling defaults, below $24 million annually. The agencies could not determine what their administrative costs would be if they had to assume the responsibility for handling defaults.

The above approach does not consider:

1. The costs related to the other services provided by sureties, particularly paying claims and providing financial aid to contractors.

2. What the default ratio would be if surety bonds were eliminated.

If bonds were eliminated, these two issues would become particularly important. Unless some substitute method was devised to handle claims and provide contractors with financial aid, defaults would increase.

Other factors affect the ratio of losses to premiums earned. When a default occurs, sureties try to minimize their losses through various legal sanctions against the defaulting contractor, such as attachment and subsequent liquidation of the contractor's equipment and personal assets. If the Government became a self-insurer, it would have to take similar actions or face the prospect of higher loss ratios.

Most agencies expressed satisfaction with sureties' efforts on defaulted contracts. Our review of defaulted contracts at both the Federal agencies and the surety companies generally supported the agencies' observations. Sureties were usually prompt in attempting to reach agreements with the agencies regarding arrangements for completing the projects. Generally the sureties (1) cooperated with the agencies in completing the projects and (2) honored the agencies' claims for reimbursement of additional contract costs incurred in completing the projects. As discussed in chapter 5, we believe the agencies, besides being reimbursed for increased contract costs, should also be reimbursed for the administrative costs incurred in handling defaults.

CONCLUSIONS

Because of the unavailability of cost data and the Government's inexperience in providing certain surety-type services, we could not quantitatively determine:

1. The value of the services provided by sureties particularly the value of handling claims of su contractors, suppliers, and laborers and providing financial aid to contractors in trouble.

2. Whether it would be economically feasible for Federal construction agencies to assume these services and have the Government become a self-insurer.

Therefore we do not recommend eliminating the curren bonding system. Factors arguing against the Government's becoming a self-insurer are its lack of legal means, admi: istrative machinery, and in-house expertise for handling claims and providing financial aid to contractors.

AGENCY COMMENTS AND OUR EVALUATION

The Federal construction agencies supported our conclusion that there was no basis for recommending elimination of the curr nt bonding system. For example, the Department of Defense (DOD) stated that it strongly supporte our "conclusion that the present basic system of performan and payment bonds in construction should be retained."

The Office of Management and Budget expressed the opinion that we might review the issues in greater detail. On the basis of factors cited in this chapter, however, we do not believe that additional review effort would produce enough meaningful data to make a definitive decision on the Government's becoming a self-insurer.

CHAPTER 6

SBA BOND GUARANTEE PROGRAM

As part of our study, we examined SBA's bond guarantee program. The program's basic objectives are to (1) provide bonds for small and minority contractors who cannot obtain bonds in the open market and (2) increase the viability of these contractors so they can make the transition ("graduate") to the regular bonding system. We believe that the program would be more effective if SBA developed formal criteria for graduating participating contractors and established a monitoring system to insure that sureties are complying with such criteria.

PROGRAM OPERATION

The bond guarantee program, established pursuant to Public Law 91-609 (15 U.S.C. 694a-b), allows SBA to guarantee, for a fee, any surety company against up to 90 percent of its losses resulting from a small contractor's breach of the terms of a bid, performance, or payment bond. To qualify, a contractor must be a small business with annual sales under $750,000 and be able to show that a surety bond is required and could not be obtained on reasonable terms and conditions without an SBA guarantee. The guarantee is limited to surety bonds on contracts up to $500,000.

SBA stated that, as of May 20, 1974, it had guaranteed bonds on 15,093 contracts having a total value of about $1 billion. As of that date, 99 sureties were participating in the program.

To obtain a bond, a contractor applies to a bond broker of its choice. The contractor furnished the broker with the necessary financial data, work history, and other information. If the broker decides that the contractor may be bondable, he refers the application to surety companies he represents until he finds a surety willing to bond the contractor.

A surety company which is interested in the contractor's application decides whether to (1) bond the contractor without an SBA guarantee, (2) bond with an SBA guarantee, or (3) not bond under any circumstances. If the surety determines an SBA guarantee is necessary, it sends a letter with supporting data to the appropriate SBA regional office

[illegible] SBA makes its own underwriting review and, if it is favorable, completes the guarantee agreement and returns it to the surety company.

When the bond is issued, the contractor pays SBA two-tenths of 1 percent ($2 per $1,000) of the contract's face value. In the case of partial bonds (less than 100-percent bonds), the contractor pays SBA either two-tenths of 1 percent of the contract's face value or 20 percent of the total premium charged by the surety, whichever is less. The contractor must also pay the surety the total bond premium, 10 percent of which the surety pays to SBA as its fee for the guarantee.

Claims and defaults

SBA officials stated that losses resulting from defaulted contracts were 1.24 percent of total completed contracts backed by guarantees.

Initially, reserves to cover potential claims resulting from payment defaults were about $400,000, or 1 percent of the $40 million in bonds outstanding. SBA subsequently raised reserves to about 2 percent because of an increase in the number of claims.

Defaults and claims against SBA bond-guaranteed contractors are handled by the sureties. SBA gives each surety written authorization to deal with such problems in a manner which is routine for the company and conducive to mitigating losses and insuring satisfactory completion of the contract.

Sharing ratios and premiums

The SBA program is often referred to as the "90-10 program" because of the method used to distribute risk exposure to premiums earned. SBA guarantees 90 percent of the risk

sureties participating in the program incur only a 10-percent risk for 90 percent of the bond premiums collected.

The authorizing legislation stated that SBA could guarantee up to 90 percent of the penal amount of the bond in return for a reasonable portion of the premiums collected from the contractors. The disparity in the relationship of risk to premiums resulted from the uncompromising position taken by the surety industry during negotiations. According to SBA officials, the surety industry dictated the terms under which it would participate in the program. One condition the industry insisted on was that SBA had to agree to accept 90 percent of any loss for no more than 10 percent of the premiums collected. SBA agreed, and the industry indicated a willingness to reassess the adequacy of SBA's 10-percent share after 2 years of experience.

In February 1974, SBA met with surety representatives to reassess the "90-10" ratio. No change resulted from the meeting.

SBA's apparent lack of forcefulness in dealing with the industry was explained as being the result of the industry's take it or leave it proposition for SBA. SBA officials made the following observations.

---If SBA had not been willing to accept 90 percent of the risk, the industry would not have been willing to participate in the program.

--The surety's premium on the average guaranteed bond is not large and has to be shared with SBA and the broker.

--The 10-percent risk the surety faces makes it more responsible than it would be if it bore no risk whatsoever.

Sureties are allowed to charge higher premium rates for guaranteed bonds. Normally, bonds cost contractors $10 per $1,000 for contracts up to $100,000. However, for bonds issued under the SBA program, sureties were allowed to charge a rate up to $20 per $1,000. In March 1973, the rate

was changed to $15 per $1,000 for the first $5,000 and $10 per $1,000 thereafter.

NEED FOR INCREASED SBA PARTICIPATION IN PROGRAM OPERATIONS

The need for increased SBA guidance and program management is apparent. Specifically, SBA should provide formal guidelines and improved procedures for graduating guaranteed contractors.

According to SBA, the program is too new to have an adequate basis for graduation procedures, and the program operates under the assumption that a "surety will make every effort to graduate a contractor."

Because SBA does not have formal graduation procedures or a monitoring system, it does not know (1) the number of graduated contractors or (2) the number of contractors still in the program that should have been graduated. Therefore, SBA has not been able to determine the extent to which the program was accomplishing its objective.

CONCLUSIONS

It is apparent to us that, unless SBA develops adequate procedures for graduating contractors, its ability to insure that the program is accomplishing its objectives will be impaired. Accordingly, we believe SBA should develop formal criteria for graduating participating contractors into the regular bonding system and establish a monitoring system to insure that sureties are complying with such criteria.

RECOMMENDATION

We recommend that the Administrator of SBA direct that formal criteria be developed for graduating participating contractors into the regular bonding system and a monitoring system be established to insure that sureties are complying with such criteria.

AGENCY COMMENTS AND OUR EVALUATION

The Administrator, SBA, disagreed with our findings, conclusions, and recommendation regarding the bond guarantee program. With respect to our recommendation, he stated that SBA has established criteria by which its field offices will question the sureties on why a particular contractor is remaining in the program and not being graduated. SBA thinks, however, that the forces at work in the marketplace will

vised.

After receiving its comments, we asked SBA to provide us with a copy of the established criteria. SBA officials stated that there was no written criteria, just an understanding among SBA's field offices to review a contractor's file when a surety applies for a guarantee.

The officials acknowledged that SBA has no systematic method for determining whether a contractor has, in fact, graduated. It should be recognized that "marketplace conditions" could produce results other than graduation, such as a contractor no longer being in business or maybe being involved in projects that do not require bonds.

We still believe the program would be more effective if our recommendation were implemented. Following are comments from those Federal construction agencies--GSA, Transportation (DOT), and NASA--that discussed the SBA section of the report.

GSA--"Since the recommendations directed primarily toward SBA would generate certain benefits for the procuring agencies participating in the small business programs, we also support those recommendations."

DOT--"We do not object to the recommendations concerning the Small Business Administration's involvement in the Surety Bond Guarantee Program."

NASA--"We believe the GAO findings to be accurate and their recommendations sound."

Our report was also reviewed by representatives from the Surety Association of Amer[illegible] the American Insurance Association, the Reinsurance Association of America, the National Association of Surety Bond Producers, and several surety companies. All the representatives stated that the SBA section of the report was an accurate description of the SBA program and how it is currently operating.

After carefully considering SBA's informative response, we still believe our report accurately reflects the current state of the bond guarantee program, a view supported by the Federal construction agencies and the surety industry. We believe that implementation of our recommendations will make the program more effective and its goals more readily attainable.

HOUSE LABOR AND COMMERCE COMMITTEE

To: House Labor and Commerce Committee

From: Walt Furnace, Chairman

Date: September 26, 1983

This interim the House Labor and Commerce Committee is specifically looking into the question of licensed and bonded contractors.

At the present time there are a multitude of contractors who are leading the public to believe that they are both licensed and bonded though neither is the case. Should these contractors produce inferior work, the consumer is often left with no recourse other than to repair the damage out of his own pocket.

Further, sometimes a licensed and bonded contractor will produce inferior work and the cost of his damage exceeds the bond posted. Again, this means that consumer often has no recourse but to pay for repairs out of his own pocket.

The intent of the hearings in Fairbanks, Ketchikan and Anchorage is to seek an answer to the following three questions:

1) Are there enough serious abuses of the law to suggest that the Legislature should demand stricter enforcement of the licensing and bonding sector?

2) Are there enough serious abuses to the consumer by licensed and bonded contractors to warrant the establishment of some testing and credentialling of those businesses who represent themselves to the public as licensed contractors?

3) Is the amount of bonding sufficient and, if not, is there another reasonable manner in which the consumer can be protected financially from inferior work by licensed contractors?

MEMORANDUM State of Alaska

TO: Connie Sipe
Chief, Consumer Protection
Department of Law-Anchorage

DATE: March 23, 1982

FILE NO:

TELEPHONE NO:

FROM: Deborah Feldman
Investigator
Consumer Protection-Anchorage

SUBJECT: Contractors

I examined approximately 97 consumer complaint files filed in the Anchorage Consumer Protection Office between January 1979 and February 1982 -- a little over 3 years worth of complaints. These contractor complaints do not involve any consumer complaints against plumbers, furnace repair people, or electricians. Also, complaints against developers, architects, designers, and real estate agents are not included, although in a number of cases consumers had home improvement or home construction related complaints against these kinds of professionals. A breakdown on the categories of complaints is as follows:

General Contractor/Home Builder	41
Landscape/Excavating	18
Home Improvement Installations (glass, fireplace, tile, flooring)	9
Insulation/Roofing	7
Drywall/Painting	6
Masons/Asphalting	4
Fencing Installation	4
Drilling	4
Carpenter	2
Other	1
Total	97

Below is a breakdown of contractor complaints by years:

1979	27
1980	32
1981	29
1982 (Jan/Feb)	8
Total	97

The figures available for 1982 reflect that 8 complaints have already been filed with the Consumer Protection Section. Projected over the course of the year the 1982 total could be 48 complaints, a 33% increase over the next highest year, 1980. This would seem to be a conservative projection, as there will be approximately 4,500 housing starts in Anchorage alone this year. With this increased building activity it is likely that there will be a substantial increase over the year.

A breakdown by area is as follows:

Anchorage	76
Outlying areas (Willow, Wasilla, Palmer)	8
Kenai area	8
Bush	4
Fairbanks	1
Total	97

The following is a list of dwelling unit starts in Anchorage for 1980 and 1981. Also listed is the projected number of starts for 1982.

Dwelling Unit Starts

1980	1,071
1981	2,601
1982 (projected)	4,000-4,500

The figures almost speak for themselves. The projected growth in dwelling unit starts for the Anchorage ara will be between 35% and 43%.

The impact of this increased activity upon the consumer is obvious. More contractors will be competing for this new business and our experience with the oil pipeline boom indicates that many of these new contractors will be "take the money and run" types.

Comments Regarding These Complaints:

Although it was difficult to do so, I attempted to evaluate the legitamacy of the consumer's complaint by reading through the entire file, including the business's response to the complaint. In approximately three cases out of the 97, consumers appeared to have perhaps been unreasonable in their complaints (e.g., demanding repairs past the warranty time, demanding changes in the contract after work had commenced). In one additional case, the business claimed that it sold the house as a private party and that our office had no jurisdiction over the repair complaint.

In approximately 90% of the remaining cases, the business either (a) did not respond to the consumer complaint; (b) had disappeared or absconded with money; (c) gave a partial correction or adjustment to the consumer; or (d) disputed the consumer's version of the facts. In these latter cases, our office usually ended up referring the consumer to a private attorney or small claims court because our office does not have the resources to assess in any depth evidence presented in an individual complaint. For example, businesses often disputed that there existed any corrective work for them to do or that the corrective work was so small in nature that it did not fall under any warranty or guaranty. Another problem is that verbal agreements were often made between the contractor and the consumer, eventually leading to many contract disputes over the terms of the agreement which could not be readily evaluated.

Because of the above-mentioned factors present in these disputes between consumers and contractors, our resolution rate on these disputes is very low -- approximately 10% consumers achieved a satisfactory settlement through our office. This is a much lower rate than our normal rate (40%) of resolution of consumer complaints through mediated settlement.

In addition to written complaints, our office receives a number of phone-in complaints against contractors. Our information officer takes these phone-in complaints but also generally refers consumers with contracting complaints to Ocupational Licensing and the Department of Labor. In many cases, the consumer calls us in the hopes that the Consumer

Protection Office can intervene legally on the consumer's behalf. Often when the consumer finds out this is not the case, he/she may file directly in court or go to Occupational Licensing or the Department of Labor without filing a written complaint with Consumer Protection. In fact, the more serious or legally urgent the contractor complaint, the more strongly we urge seeing a private attorney and then we often do not get a written consumer complint on those cases.

In reviewing our phone logs, our information officer estimates that at least 55-60 additional contractor complaints were received by the Consumer Protection Office in 1981. These complaints are not reflected in the previously discussed charts because written complaints were not formally processed in these phone-in cases. Total estimated contractor complaints (not including plumbers, electricians, etc.) for 1981 alone could be 87-92.

There is a high percentage of contracting businesses which shut down, enter bankruptcy, or simply disappear after a consumer complaint is filed, making any kind of resolution of a complaint pretty impossible.

Complaints About Quality of Contractor's Work
(1979-1982 sample from 97 total number of written complaints)

Major delays	12
*Deviation from Original Plan	6
*Extra Charge/Cost Overruns	5
*Defective Work/Major/ Structural	35
*Defective Work/Finish/ Cosmetic	22
*Defective Work/Code Violation	6
*Defective Work/Operational	11
*Incomplete Work/Major	9
*Incomplete Work/Finish/ Cosmetic	26
*Incomplete Work/Operational	4
*Clean-Up	4
Total	140

Note: Categories which reflect complaints of a more major or serious nature have an (*) asterisk. Total number of serious complaints from these categories is 82 or 59% of all 140 allegations. (The figure is conservative since the other categories also contain complaints which are more serious in nature but are not counted in the 59% figure as time has not permitted more detailed analysis to be made of these complaint categories.) Also, below are listed some other serious problems consumers encounted with contractors as far as method of doing business which are not accounted for in the 59% figure.

Misrepresentations Connected with Contractor Complaints
(1979-1982 from 97 total written complaints)

Misleading or False Advertising	20	(approximately)
Misrepresentation Qualifications, Licensing, etc.	9	
Promised Corrective Work Not Done	20	
Misrepresented Terms of Agreement	13	
Misrepresented Money Would Be Refunded	3	
Not properly licensed.	?	
Total	65	

Other Related Problems
(1979-1982 from 97 total written complaints)

Lien Threatened	2
Lien Filed (separate from above)	2
Verbal Abuse or Physical Threat by contractor	6
*Contractor Disappeared/ Went Out of Business	8
Damages Incurred by Faulty Work	5
*Contractor Absconded with funds	17
Warranty/Guaranty Not Honored	20
Total	58

* Figures available for 1981 only - 9 contractors unlicensed, 4 unknown, 16 licensed.

Note: In 25 of 97 complaints the contractor either absconded with money, disappeared, could not be contacted, went out of business or went bankrupt.

Comments

1. These charts represent an extremely conservative estimate of the kinds of complaints consumers have against contractors. In a number of cases I suspect that many additional misrepresentations were made to the consumer, but the consumer did not report these misrepresentations, (e.g. concerning warranty that repairs would be done, that the contractor was licensed and bonded.) Similarly, in many of the other categories such as "warranty," "clean-up," "damages," the consumer may not have reported these problems if he/she had a more pressing concern such as a major building defect.

2. In almost every instance, people who filed written complaints against contractors were not "nit-picking" about one or two minor items to be corrected under warranty, for example. The greatest number of complaints against contractors fell under the category of major defective and/or incomplete work. In addition, those consumers who had more minor, cosmetic or finish work to be done presented lists of four or more items for which they had been waiting a long time for correction by the contractor.

3. Definitions -- "Major" or "structural" defects are those defects which are substantial and may prevent normal use of the home.

"Cosmetic" or "finish" work defects include defects which are less substantial and which may not keep the homeowner from enjoying the normal use of the home. Items in this category include bubbling or warping of counters, defective painting or staining, cracked plaster, chipped walls, loose nails, and warped or damaged flooring.

"Operational" defects include defects in mechanical, electrical, or plumbing items. Most common examples in this category are defective or incomplete plumbing fixtures which cannot be used, defective fireplaces which cannot be used, and defective heating and/or cooling systems which cannot be used.

"Warranty" category is counted only when the consumer alleges a warranty obligation exists that is not met or where it is otherwise obvious from the nature of the complaint that a warranty obligation has not been met.

"Deviation from plans" primarily refers to instances where a general contractor alters construction from what was originally agreed to or from what was on the blueprint.

"Clean-Up" refers to cases where contractors have left a major mess for the consumer to pick up after.

General Patterns

1. The overwhelming majority of complaints are by condominium or homeowners against the general contractor/builder. Most complaints are from the Anchorage area (including Eagle River).

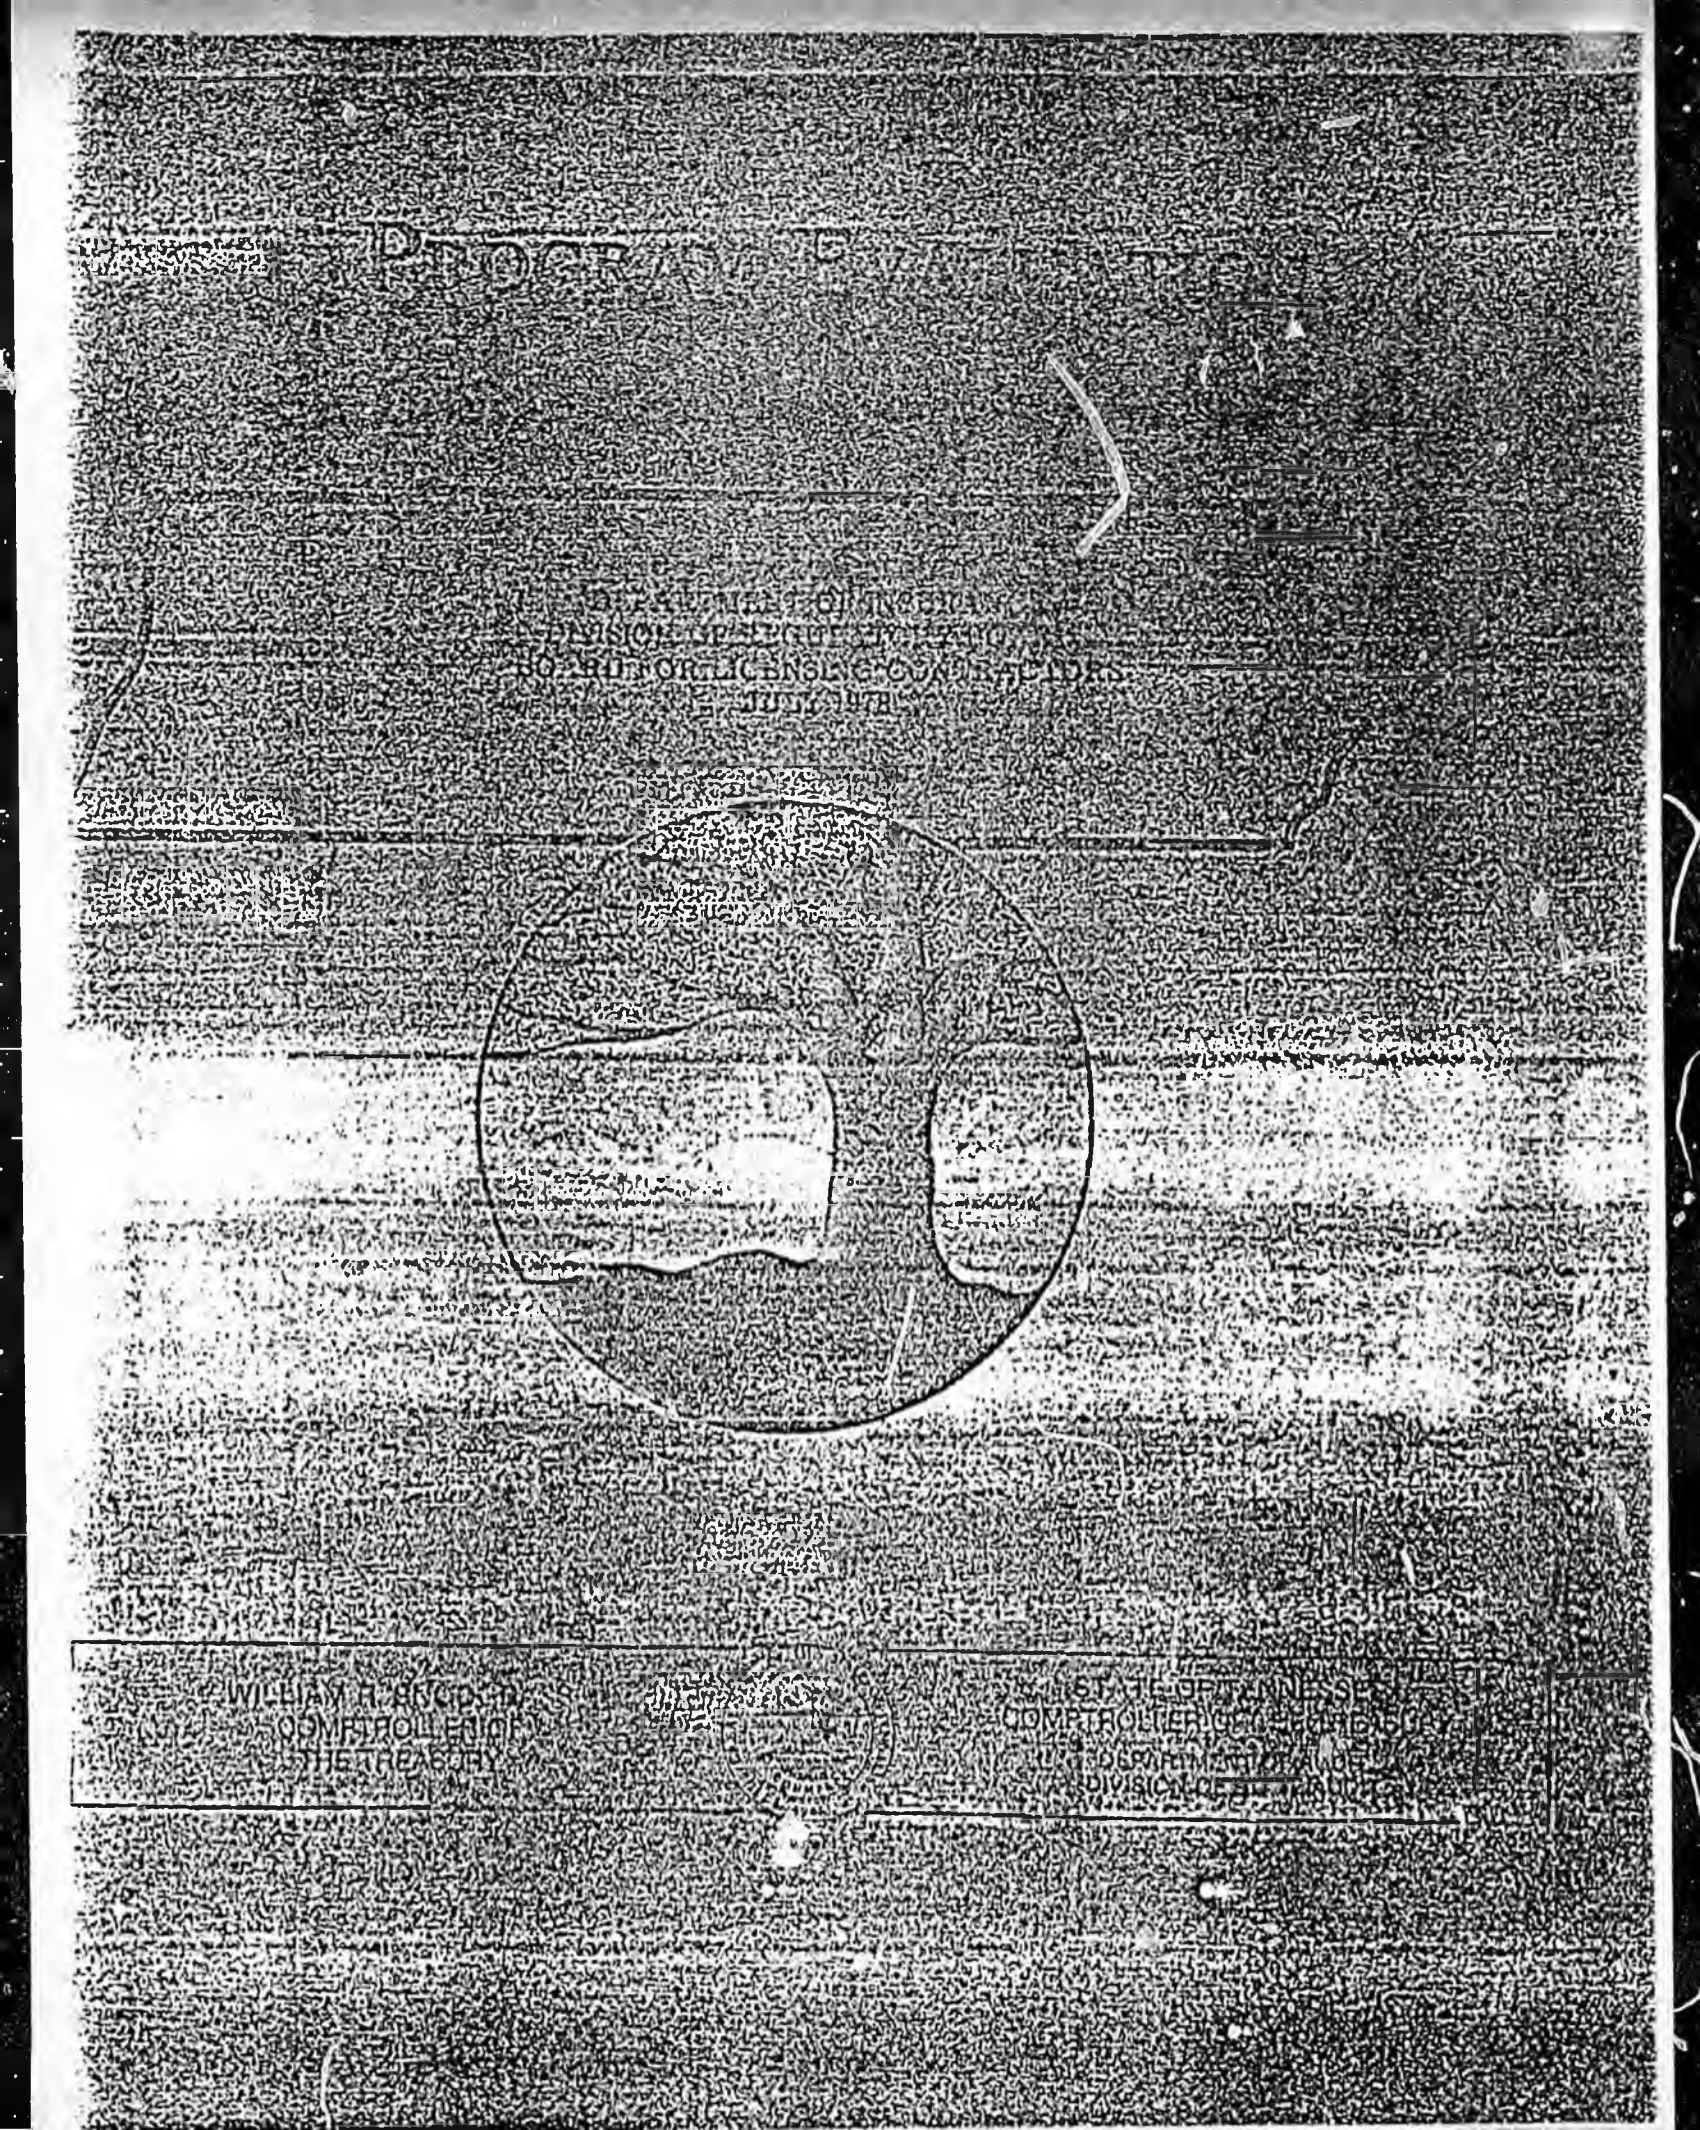
2. The greatest number of complaints involve allegations of major structural problems or defects such as structurally defective foundations, leaky roofs, improper roof or deck construction, missing structural support and improper grading or drainage leading to flooding.

3. The second greatest area of complaint involved incomplete work such as missing trim, unpainted surfaces, incomplete plumbing fixtures, missing windows, doors, screens, decorations, missing carpet and tiling. Our office also received a number of complaints concerning major unfinished work by contractors such as missing fixtures, unfinished lot grading, unfinished carpentry work.

4. Next category involved more minor, cosmetic, or visual defects such as blistered paint, cracked plaster, warped counters and floors, improper carpet installation, pitted or unlevel asphalt.

5. In every case involving general contractors, consumers attempted to have the contractor correct the problems complained about, but were unsuccessful in these efforrs. In

most cases, the consumer tried to work with the contractor for several months after "closing" a deal before filing a complaint with the Consumer Protection Office.



LIMITED PROGRAM EVALUATION
BOARD FOR LICENSING CONTRACTORS
JULY 1978

INTRODUCTION

PURPOSE AND AUTHORITY FOR THE EVALUATION

This limited program evaluation of the Board for Licensing Contractors was conducted in accordance with the Tennessee Governmental Entity Review Law, Tennessee Code Annotated, Title 4, Section 29. The evaluation is intended to aid the legislative evaluation committee in determining whether the Board for Licensing Contractors should be abolished, continued, or restructured.

OBJECTIVES OF THE EVALUATION

The primary objective of the limited program evaluation was to address the criteria for review outlined in TCA 4-2911 and 4-2912. The secondary objective was to determine the issues involved in licensing contractors. An attempt was made to gather all pertinent information relating to these issues, and any other information which would aid the legislative evaluation committee.

SCOPE AND METHODOLOGY

The scope of the evaluation was the activities of the Board for Licensing Contractors for the last three years—1975, 1976, and 1977. This report is based on the following:

- Examination of minutes, correspondence, and other records of the board;
- Questionnaires completed by the board and its executive director;
- Intereviews with board members, staff, and other state and local officials;
- Interviews with licensing and consumer officials of the southeastern states;
- Correspondence with other states and national organizations;

- Examination of resource materials and publications concerning contract construction; and

- Observation of board meetings.

HISTORY AND BACKGROUND

The first legislation regulating the construction industry in Tennessee was passed in 1931. Under the first law only general contractors were licensed. The original law defined a general contractor as any person who completed or improved a structure where the cost exceeded $10,000.

The original law was repealed in 1945. The 1945 law included provisions for the licensure of subcontractors who contracted work in excess of $10,000. In addition this statute fixed standards of qualification and eligibility, provided for revocation of licenses for cause, and provided penalties for other violations.

In 1965 an amendment was passed that exempted residential contractors in counties with populations less than 60,000. According to the 1970 census only ten counties in Tennessee have populations over 60,000. As a result of this amendment, 46 percent of the population in Tennessee is not affected by the residential licensing requirement. If there is a public purpose involved in licensing homebuilders in urban areas, there should also be a public purpose in licensing rural homebuilders. The feeling of the current board is that the law should apply equally to both rural and urban homebuilders.

In 1972 the contractors act was amended again. The major alteration was to clarify that only subcontractors engaged in performing plumbing, electrical, heating, ventilating, or air conditioning work were required to be licensed. The 1972 amendments also raised the minimum contract amount which necessitated the licensing of contractors and subcontractors from $10,000 to $20,000.

In 1976 a new contractors licensing act was passed. The act included the update and revision of obsolete and ambiguous sections of the previous law. It also provided for certain exemptions and bidding provisions (see Summary of the Current Law, page 8). In 1977 the minimum contract amount requiring a contractor and subcontractor license was increased from $20,000 to $50,000.

SUMMARY OF THE CURRENT LAW

1. The Tennessee Board for Licensing Contractors is created by TCA 62-604, and is charged with the administration of that act.

2. This act applies to: any person, firm, or corporation engaged in contracting in this state where the cost of the completed structure or improvement, or of different structures and improvements under the same contract, exceeds $50,000. The act applies to subcontractors who engage in electrical, plumbing, heating or ventilating and air conditioning classifications or contracting where the amount of the subcontract is equal to or greater than $50,000.

3. This act does not apply to: any person, firm, or corporation in a county with under 60,000 population according to the 1970 census, who engages in his county of residence in the construction of residential buildings; any person, firm, or church that owns property and constructs thereon single residences, farm buildings or other buildings for individual use, not for resale, lease, rent or similar purpose.

4. An applicant for a first-time license is charged a fee of $75, and a renewal fee of $35 is charged each year after that.

5. Each approved applicant is issued a license to construct in certain classifications, i.e., industrial, commercial, residential, and a single contract limit above which he may not bid, e.g., $100,000, $1,000,000, $2,000,000.

6. Every contract awarded for more than $50,000 requires that each bidder represent his license number, classification, and expiration date on the outside of his bid. Penalties are provided for violation of this provision.

The board is authorized to:

1. Administer the contractors licensing act, rules and regulations;

2. Make bylaws, rules, and regulations;

3. Determine the qualifications of candidates (experience, education, finances, and equipment);

4. Conduct written or oral examinations;

5. Determine classifications and bid levels;

6. Revoke or suspend (after a hearing) any license or renewal granted;

7. Initiate inquiries and investigations;

8. Prosecute violators subject to the approval of the Commissioner of Insurance.

STATE COMPARISONS

As shown in Exhibit 1 on page 10, there are 28 states that in some manner license or register contractors or subcontractors. Twenty of these states license contractors in a manner similar to Tennessee. Four states license only some specialty contractors—for example, electrical contractors—two states license only nonresident contractors, and Delaware licenses contractors for revenue purposes only. Of the eight states bordering Tennessee, all license contractors except Kentucky and Georgia.

Eleven states which license contractors in some manner require surety or performance bonds from non-resident, general, or public works contractors. Different bond payments are required in order to assure that nonresident contractors pay taxes, and that general or public works contractors complete their awarded projects. The Tennessee contractors act does not require any surety or performance bonds.

There is great variability in the state laws regulating contractors. Before issuing a license most states require the assessment of an applicant's financial statement, bank and material supplier references, construction experience and equipment. Several states require contractors to report any personal or corporate bankruptcies to the board; however, the Tennessee law does not include such a provision.

ORGANIZATION AND STAFFING

The Board for Licensing Contractors consists of seven licensed contractors appointed by the governor for seven-year terms. The board is composed of one subcontractor, one homebuilder, and five other licensed contractors who have had at least ten years of construction experience.

The administrative staff to the board consists of one executive director, one executive aide, three clerk II's, one typist, and one investigator (see Exhibit 2, page 11 for organization chart). The major functions of the administrative staff pertain

EXHIBIT 1

States Licensing General Contractors

States	License Contractors	License Subcontractor	Dollar Limit	Bond Requirements
1. Alabama	Yes	No	$20,000	No

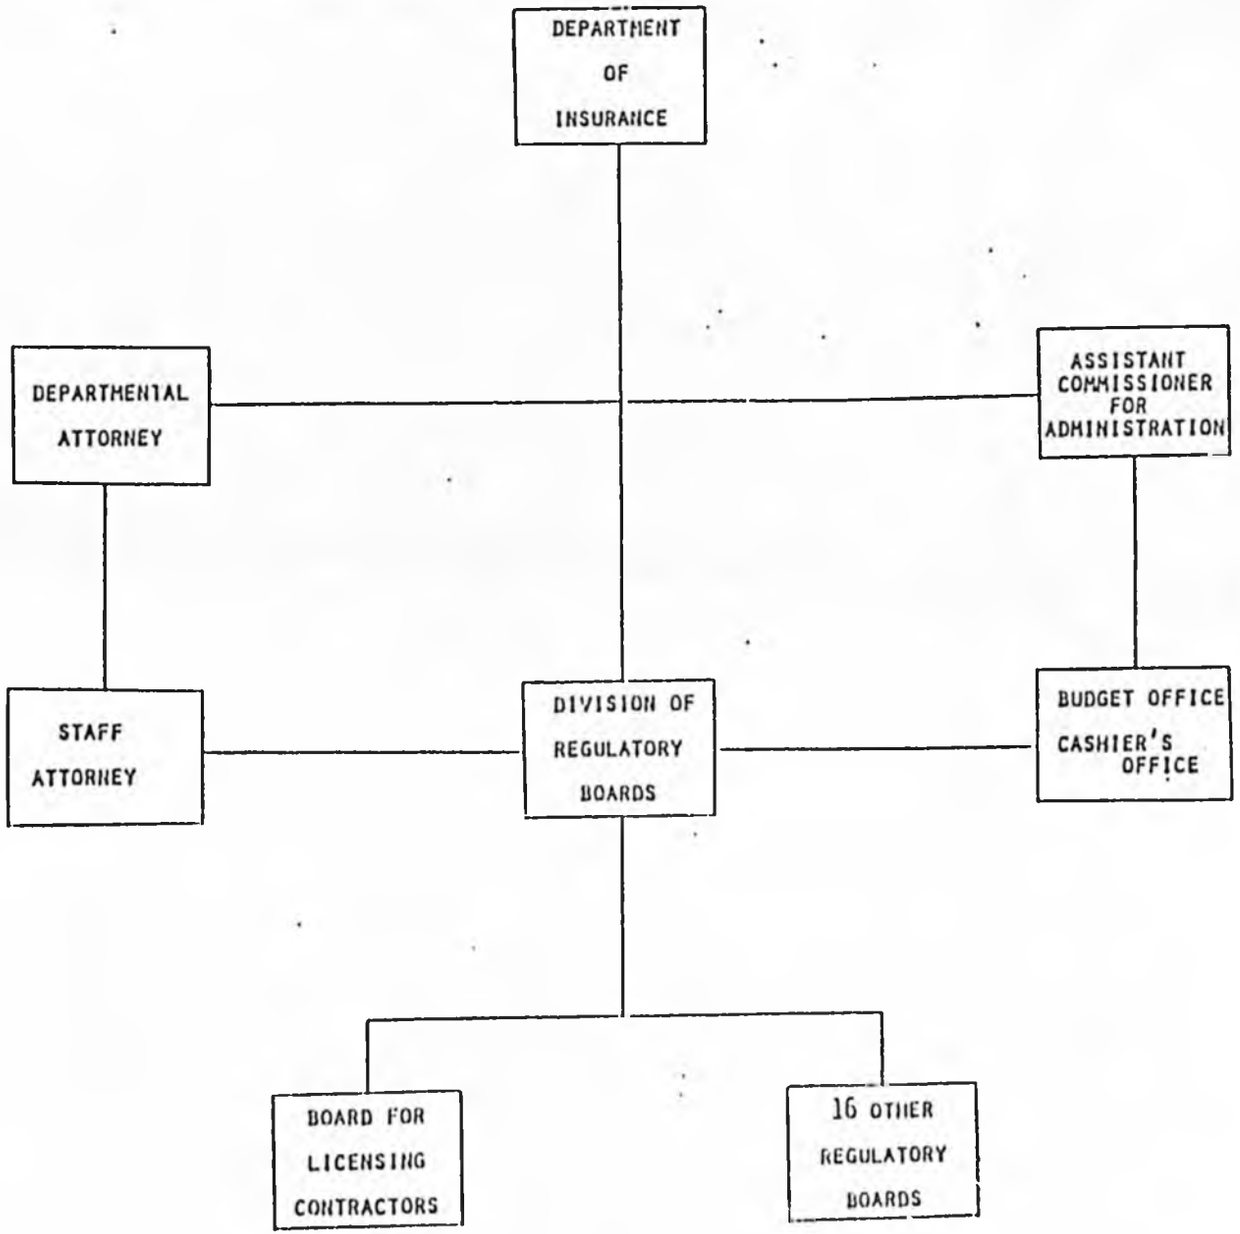
28. Nebraska	Nonresident Contractors	$1,000 bond requirem

(1) Surety Bonds required for taxes on nonresident contractors.
(2) License only subcontractors who perform heating and ventilating, air conditioning, electrical, and plumbing work where the contract cost exceeds $50,000.
(3) 50 percent performance bond for public works contract.

amount NA-dollar amount not available.

EXHIBIT 2. ORGANIZATION CHART: BOARD FOR LICENSING CONTRACTORS



to licensing and renewal activities. The staff is responsible for compiling the roster, renewing licenses, issuing original licenses, preparing for board meetings, and all related notification and clerical work.

The board has proposed in its fiscal year 1978-79 budget to computerize the licensing process at a cost of $2,894. The computer could send out renewal notices and type renewal licenses, post renewal payments, notify delinquent contractors, keep track of expired licenses, type the annual roster, type and address all mailing labels and keep a record of all licensing information such as bid limits and classifications. These are essentially the same functions a Clerk II now performs. Generally, a computerized system requires careful planning for successful implementation. A computerized system is usually added when it results in savings in time and personnel costs.

Recently many states have included public members on regulatory boards. This trend has resulted from criticism that licensing boards are composed exclusively of representatives of the regulated industry or profession. The Tennessee Board for Licensing Contractors does not have a public member.

The board is required by law to meet six times per year (in January, March, May, July, September, and November) for interviewing applicants and evaluating applications and extensions of bid limits. Each session lasts two to three days and board members are compensated for travel and boarding expenses but receive no per diem. Members of all other regulatory boards in the Department of Insurance receive compensation (salary or per diem) and travel and boarding expense. In all other southeastern states that license contractors, board members receive per diem payments.

LICENSING ACTIVITIES

1. Licensing Procedures

According to the contractors' rules and regulations 0680-1-.01, an applicant desiring to be licensed must have reference inquiries from: (1) an architect or engineer; (2) a bank; (3) a material or supplies dealer; and, (4) another contractor. The candidate must also complete a personal questionnaire covering his business finances, equipment and experience. For bid limits under $500,000 the financial statement in the questionnaire may be prepared by the applicant and notarized; if not prepared by the applicant it must be signed by a certified public accountant (CPA), a public accountant (PA), or a bank officer. For bid limits over $500,000 the financial statement must be prepared by a CPA, PA, or bank officer. The financial statement required of the applicant is a balance sheet, which is not required to be audited, and which may or may not reflect an accurate picture of his financial situation. The board has the authority to require an audited financial statement before a license is issued; however, they have not utilized this authority.

After all reference and questionnaire forms have been properly completed the applicant is scheduled for a hearing with the board. During the hearing, or interview, the board divides into groups to question the applicant in order to insure that he has proper experience, finances, and equipment. If the applicant's finances are on the "light side" as determined by the board, the board will require the applicant and/or partners to indemnify the company. Indemnification is a procedure which requires that applicants send in current personal financial statements and agree to stand personally liable for their company's actions. Subsequent to the interview the board determines the classification and bid limit that is warranted by the applicant's finances,

experience, and equipment. For example, an applicant might be granted a license to engage in the classifications of residential and commercial building with a per contract bid limit of $200,000. This does not restrict the licensee from taking on any number of jobs at this bid limit. For example, a contractor with a $100,000 bid limit could have ten or fifty jobs for $100,000 each underway at any one time. Therefore, the bid limit in itself is not an effective method of insuring financial responsibility.

In the first year of the board's operations, 177 general contractors were licensed. As of 1977 over 6,511 contractors and subcontractors were licensed by the board. According to the board, from 1974 to June 1977, 33 applicants, or 1.45 percent of those who applied, were denied licenses.

Reasons for Application Denials

A.	Insufficient Working Capital	21
B.	Lack of Experience	3
C.	Bad Recommendations	5
D.	Lack of Required Information Submitted	3
E.	Information Submitted Falsified	1

2. Classification

There are approximately 200 different classifications of construction work in Tennessee. There is no easy way to get an accurate total number of classifications, due to the lack of a standardized or uniform classification system. The effect of this is that it is not clear what types of construction activities the board is authorizing when it issues a license. This is especially true in specialized fields of contracting such as utility construction. The board has realized these difficulties and has been working on a new classification system which should be adopted sometime in the spring of 1978.

The idea behind classifying contractors is to make sure that contractors engage in only the categories of work for which they are qualified by experience and expertise. Although currently no guidelines exist for determining whether or not a contractor is qualified in a certain classification and there are difficulties in the standardization of categories, classifying contractors is still one of the most effective means available to the board to assure quality construction. It is especially important in the more technical areas of construction which demand more expertise—for example, high rise buildings or sewage treatment plants.

3. Criteria for Licensing

As previously mentioned, the factors the board considers when issuing a license are the applicant's experience, equipment, references, and financial situation. The principal determinant appears to be the applicant's financial situation and the second most important is evidently experience. The applicant's references are not verified, and it appears to be sufficient to have access to the right type of equipment to be licensed.

Neither the contractors law nor the rules and regulations states any criteria to guide the board in its decisions. The rules and regulations 0680-0-.01 state "Sufficient finances, equipment, and experience must be shown to enable the contractor to do the work applied for, in the discretion of the Board" (emphasis added). How the board arrives at the classifications and bid limits that are granted is unclear. For example, there are no established criteria regarding the experience requirements or the examination.

Five of the eight southeastern states that license contractors require applicants to pass written examinations before licensure. The written examinations cover the applicant's general knowledge in the classification of work

applied for, general knowledge of construction methods, safety, health and lien laws of each states. The southeastern states that require examinations are shown below:

Southeastern States		Examinations
1.	Virginia	written*
2.	Florida	written
3.	Louisiana	written
4.	North Carolina	written
5.	South Carolina	written
6.	Tennessee	oral or written
7.	Alabama	oral or written
8.	Mississippi	oral or written

*written exam required for plumbers and electricians

Currently, the Tennessee Board for Licensing Contractors gives an interview or oral exam. The board prefers an interview over a written test for the following reasons:

1. Knowledge of the contractor concerning experience, equipment, and specialties is examined through the interview.

2. Some contractors cannot pass a written exam but can perform quality construction work.

3. Compiling a fair test on methods, specialties, etc., would be difficult.

4. An exam on safety and lien laws would be unfair because they are constantly changing.

5. Some construction companies or corporations are highly specialized and rely on several partners' expertise to run their companies. Therefore, it would be difficult to test only one partner, and unfair to test all.

The arguments for a supplemental written exam are:

1. More objectivity is instilled in the board's decision-making.

2. Greater uniformity in the granting of licenses is assured.

3. Increased assurance is obtained that contractors are familiar with state health, safety, and lien laws.

Tennessee does not have any stated criteria for determining bid levels. The board has followed an unofficial policy of issuing a bid limit of 10 times the candidate's quick assets.[1] However, the board frequently deviates from this policy. In a random sample of 110 renewal financial statements, original licenses, and extensions, 31.8 percent of the bid levels were over 10 times the applicant's quick assets, and 17.2 percent had negative net working capital.

Other states have established minimum criteria that candidates must meet to be licensed at a certain bid level. For example, in North Carolina:

> Total current assets of at least $7,500 in excess of total current liabilities are required for a Limited License. Total current assets of at least $35,000 in excess of current liabilities are required for an Intermediate License. Total current assets of at least $65,000 in excess of total current liabilities are required for an Unlimited License.[2]

Written minimum criteria give notice to the applicant of what is required for a bid limit, allow for greater uniformity between bid levels, and help to assure continuity of action when the composition of the board changes. For example, a minimum standard for a bid limit of $50,000 might be one year of experience in the type of construction classification sought, and a net working capital of $5,000.

Several members of the board expressed the view that applicants' experience and expertise are adequately checked through the interview. However, observation of the interviews revealed them to be quite brief—five to ten minutes long—and emphasizing the financial status of the applicant.

---

[1] Quick assets, or net quick, is (current assets-inventory) - current liabilities.

[2] Correspondence with C. S. Scatton, Assistant to Secretary-Treasurer, North Carolina Licensing Board for Contractors, January 11, 1978.

Renewals

Licensed contractors are required by law to renew their licenses annually and pay a renewal fee of $35. Before 1972, contractors were required to submit renewal forms prior to December 31 of each year. Contractors licensed after 1972 are required to send in renewals during the month of original licensure. Although renewals were staggered by this change, approximately 30 percent (or 2,000) of the renewals still come in during November and December. As a result of this peak workload, the activity of the administrative staff increases for two months, and decreases in other months. A possible solution is to stagger renewal dates so the workload will be equalized throughout the year.

Beginning in November 1976, contractors were required to send in current financial statements in order to renew their licenses. The rationale for this requirement is that the financial status of a contractor can change drastically from one year to the next. The board is currently in favor of lowering the bid limits of contractors with financial problems, although they have not lowered bid limits in the past. They have not set up any criteria to aid in making decisions on lowering bid limits, and they emphasize that limits should be lowered only when there is a clear need, not just because a contractor has a bad year.

Although the procedure requiring financial statements is commendable, the board does not require the financial statements to be audited. Assets could easily be overstated, liabilities understated, or the statements otherwise prepared in a misleading manner. Requiring that all financial statements be audited every year would probably impose an unjustifiable burden on contractors. However, unless the statements are audited, the board has no assurance of their reliability except for the contractor's integrity. Many

contractors already submit audited statements. The board could obtain assurance of the validity of financial statements and otherwise ease the burden on contractors by periodically requiring that statements be audited.

The Board for Licensing Contractors has not reviewed any of the renewal financial statements submitted since they were first required in 1976. The board has an informal agreement with the Comptroller of the Treasury, Division of State Audit to review the financial statements of contractors. The state auditors calculate net worth and net working capital for each contractor, review the financial statements, and "red flag" those with problems for the board's attention. During calendar year 1977 over $20,000 was charged for these services; however, the results of the work have not been utilized. According to the executive director of the board, the renewal financial statements have not been utilized because of a shortage of personnel in the office of the board and a failure of State Audit to return the financial statements in a timely manner. The statements were not returned in a timely manner because of the lack of emphasis put on them by the board. The result has been that the statements have been filed away without the board's consideration, in effect wasting the $20,000 paid to the Division of State Audit to review them. Another result has been the approval of renewals without reviewing the financial statements, thereby granting license renewals to contractors whose financial positions may have changed. In these cases, if the financial statements had been examined, the board might have required further evidence of financial stability or lowered the license limits of some contractors.

A further difficulty with the current renewal procedure is that financial statements have been taken from the office of the board for review by State Audit, sometimes for extended periods of time. According to the executive

director of the board, it is often necessary to refer to those files which are removed from the office. The board has requested an Auditor III position for the review of financial statements in their office. This position was approved in the fiscal year 1978-79 budget. The auditor should save both money and time in reviewing the financial statements. However, to perform his or her job adequately the workload would have to be rearranged so that a manageable number of renewals were due each month.

ENFORCEMENT

The Board for Licensing Contractors only investigates complaints about unlicensed contractors, licensed contractors bidding on contracts over their bid limit, or contractors bidding in areas of construction for which they are not licensed. Most of these investigations stem from written complaints, telephone complaints, and Dodge Reports. Dodge Reports is a periodical which publishes construction projects up for bid, the contractors who bid on the projects, the bid prices, and the contractors who are awarded the projects. The board's investigator examines these reports to assure that contractors are properly licensed, classified, and within their proper bid levels. The emphasis of the investigative work is not on the quality of contractors' work.

In addition to investigating licensing violations, the investigator has attempted to inform municipal building and housing inspectors as to which contractors are required to be licensed by the state. According to the investigator, many licensing violations could be resolved by local building inspectors. TCA 62-621 states in part: "No official of the State, or any political subdivision thereof, shall issue a permit or contract work order to any applicant therefor, to do contract work, unless such applicant at the time holds a license as a contractor under the provisions of this chapter..." According to the board, cooperation by the building inspectors has been weak in the areas of issuing building permits to contractors who are not properly

licensed, and in the referral to the board of complaints about the quality of contractors' work. Improved cooperation and coordination of efforts between the board and the building inspectors could expedite the enforcement of the law.

TCA 62-617 stipulates that it is the duty of the board before granting a renewal to gather or receive satisfactory evidence that a contractor has paid all state, municipal and county taxes. The board presently requires a notarized statement from the contractor stating that all taxes have been paid; however, not all contractors have submitted these statements. The board has not verified the statements that were submitted or followed up on those that were not.

RATIONALE FOR LICENSURE

The construction industry's main characteristics are its low profit margin, competitive bidding, and its reaction to the trends in the national economy. All of these characteristics promote a high failure rate. It is theorized that the licensing of contractors protects the public welfare by qualifying applicants so they can better react to the economy and thus maintain financial responsibility. It is also postulated that the qualification of contractors promotes better quality work, and that the Board for Licensing Contractors serves as a forum for public complaints. Theoretically, the classification of contractors protects the public by assuring that the contractor possesses the minimum level of financial means, experience, and expertise to engage in the specific area of construction for which a license is sought.

How do these theories hold up in practice? First, the Board for Licensing Contractors does not effectively assure financial responsibility. The bid limits established by the board are for per contract bids, and do not prevent a contractor from having ten or a hundred projects of that size in progress at one time. Also the procedure for arriving at those bid limits is questionable; it is not based upon any stated criteria and can be circumvented in several ways. Renewal financial statements have not been utilized by the board; consequently, contractors who might once have had sound financial positions could now have limits greater than their resources justify.

Second, the Board for Licensing Contractors presently does not assure the competence of contractors. The references contractors submit are not verified, the interviews are quite brief, and there are no minimum criteria established for either experience or financial responsibility. Further, although the board inspector is vigorous in seeking out contractors who are not licensed, in the past the board has not actively reviewed complaints regarding the quality of contractors' work.

Although the Board for Licensing Contractors is a group of dedicated individuals who have tried to protect the public as well as possible within the framework of the current law, the net effect of the operations of the board has not been the protection of the public. On the other hand, the public has not been adversely affected by the licensing of contractors. In essence the gains to the public from licensing have not been commensurate with the burden on contractors of complying with another set of government regulations. It is not clear what the effects of terminating the board would be; however, 22 states in no way license contractors.

ALASKA JOURNAL OF COMMERCE & PACIFIC RIM REPORTER

Crackdown sought on no-license contractors

By PAUL LAIRD
AJC Editor

Earl Carlyle is a painting contractor who's mad as hell and isn't going to take any more.

A licensed painting contractor who's mad as hell nd isn't going to take any more.

The owner of Earl's Custom Home Painting in Anchorage, this uncaped crusader is conducting a one-man campaign to mobilize licensed specialty contractors throughout Alaska and force the state to crack down on unlicensed contractors in all trades.

"I don't know about doing research," he said. "I do know about raising a lot of hell. I'm tired of living in a trailer and not being able to prosper even after seven years in business."

What he lacks in research expertise he compensates for in ability to match names in a state directory of licensed contractors against names of contractors listed in the Yellow Pages of the Greater Anchorage telephone directory.

State law prohibits unlicensed contractors from advertising. Nonetheless, Carlyle says he's found nearly 500 contractors without licenses advertised in the phone book.

State Rep. Walt Furnace, R-Anchorage and chairman of the House Labor & Commerce Committee, said many contractors don't bother to secure state licenses because the process is time-consuming.

"The process isn't cumbersome, but it is time-consuming," he said. "We all have a thing about filling out forms."

While requirements for contractors' licenses aren't that stringent, they do require somewhat of a commitment from the applicants. To secure licenses, contractors must have bonding, insurance and workers' compensation programs.

Carlyle said that by avoiding those requirements, unlicensed contractors are able to underprice those with licenses, and they also sidestep accountability for their work.

He said his investigation of the problem through classified advertising in daily newspapers and bidding forms published by general contractors for their projects leads him to believe the 500 unlicensed contractors in the Yellow Pages are only the tip of the iceberg.

During the suimmer, there would be as many as 2,000 unlicensed contractors operating in the Municipality of Anchorage, he said.

Furnace said most unlicensed contractors in the Anchorage area seem to be subcontractors, It's licensed companies operating in a subcontractor capacity that seem to be injured most.

Carlyle said some licensed contractors in Alaska have been forced out of business by price undercutting from unlicensed competition, both from within Alaska and Outside. Others have been forced to live indefinitely from one job to the next.

"Fly by nighters" who "guarantee their work right up to the time when the plane leaves" cost his business about $500,000 in jobs during his first five years of painting contracting, he said. Now he's beginning to live off referrals.

"These fly by nighters bring their out-of-state prices with them, and a licensed contractor can't compete," he said. "They don't keep books, they don't pay taxes and they don't incur the expenses of doing business here during the winter.

"They just come in the spring and split in the fall when it gets cold. They don't have to eat their mistakes; the consumer does."

Earlier this year he engineered a write-in campaign of more than 1,000 of the state's specialty contractors to the governor, key legislators and other state officials. Goal of the campaign was to build awareness of the problem and to prompt stricter enforcement of state law barring unlicensed contractors from working in Alaska.

One legislator reported receiving more than 1,000 letters from specialty contractors throughout Alaska.

"That must mean there are 1,000 specialty contractors who are as mad as I am," Carlyle said. "I think we're starting to get some attention now."

Although the Anchorage painting contractor said he's contemplating another mailing blitz, the first one apparently found its mark.

Furnace said his committee is studying the problems of local hire and unlicensed contractors before the next legislative session begins in January, and public hearings will be scheduled for Anchorage, Fairbanks, Ketchikan or Juneau and possibly Bethel or Kotzebue sometime this month.

"At this point we don't know what the overall effect of unlicensed contractors operating in the state is, and we don't know how severe the income loss is to licensed contractors," Furnace said. "That's what we hope to determine from testimony at these hearings."

Carlyle blames the unlicensed contractor problem on spotty enforcement by the state, and Furnace agrees. The Anchorage legislator said the Department of Commerce & Economic Development division responsible for enforcement—the Division of Occupational Licensing—has been stymied by manpower shortages.

There are too few people responsible for keeping track of too many things in the division," Furnace said. He added he believes the problem is not a lack of money in the department's budget, but rather questionable priorities of how the money is spent.

"There's never been a shortage of money (in the department)," he said. "The shortages in enforcement manpower have been the result of the way the money is allocated."

A number of approaches to the problem are being considered, and notification of this month's hearings will be mailed to nearly 2,000 specialty contractors statewide to generate responses to existing proposals and other ideas.

The Anchorage painting contractor said he expects widespread support for the move to push for stricter enforcement, but he also anticipates resistance from some general contractors who capitalize on the availability of cheaper unlicensed subcontractors.

He said he's encountered a handful of subcontractors afraid to become active in the involvement for fear general contractors will refuse them work.

Established contractors' organizations won't resist the move, he said, but some individual general contractors who use unlicensed subcontractors will lobby against it.

"We're going to need strong organization before the legislative session starts if we want to accomplish anything," he said.

Though shoddy workmanship and lack of accountability are major problems with unlicensed contractors, Carlyle said the state should not instate written examinations to assure competency.

"Some real artists and craftsmen couldn't pass a written test, but they could certainly pass a test on the job," he said.

Carlyle received an assurance from a special assistant to Gov. Bill Sheffield late in the spring that the Division of Occupational Licensing has been working with the Department of Law to develop a citation program to enforce regulations restricting unlicensed contractors.

The special assistant wrote Carlyle that some names he supplied to the division indeed are practicing without licenses, and those violators were sent warning letters.

"The list of names will be monitored for compliance and are potentially the first to be cited when the program begins if they are not licensed," the special assistant wrote.

Furnace said he believes many of the violators simply don't know they're not complying with state regulations, and he hopes to avoid an enforcement approach that will be punitive.

"Some contractors think all they need is a business license," he said. "It's one of the problems of the easy entrance and easy exit in business in Alaska."

He added he hopes the problem can be addressed at least partially without adding to state statutes.

"The main thing is that we have to prevent unlicensed people from posing as experts by advertising," he said.

A possible solution, the Anchorage legislator said, is soliciting voluntary cooperation from newspapers of general circulation and from the people who compile the Yellow Pages.

By screening unlicensed contractors from advertising, those sources could prevent unlicensed contractors from posing as experts, Furnace said. One Anchorage daily already operates under that policy, he added, but the other doesn't

"We'd like not to have to put that kind of thing into statute form, but we do need the help of the private sector in attacking the problem," Furnace said.

He added he doesn't believe the licensing process on the books now is in need of revamping.

An aide to Furnace said the following list of solutions is being studied, but some are believed unworkable. The legislator's office is soliciting reactions to and suggestions about these proposals:

- Require all contractors to include contracting license numbers in all advertising.
- Require contractors to place signs on both sides of their vehicles stating company names and contracting license numbers.
- Increase bonds for specialty contractors to $5,000 and for general contractors to $15,000.
- Give enforcement inspectors authority to check identification and issue citations.
- Establish a state division for policing contracting laws.
- Mandate that enforcement officers to police newspapers, Yellow Pages, television and radio for violators.
- Adopt legislation requiring telephone utilities to disconnect service for unlicensed contractors.
- Impose stiffer penalties for violators.
- Prohibit state agencies from contracting with unlicensed contractors and licensed contractors who subcontract to unlicensed subcontractors. Prohibit projects using unlicensed contractors or subcontractors from taking advantage of state financing or refinancing for one year.
- Have a computerized list of contractors available on demand that would include the kind of contractor, license number, company name and address.

Proposals for ensuring compliance with local hire laws include requiring the submission and monitoring of a statement of the percent of work force to be hired locally when state funds are involved, requiring quarterly filings of compliance statements and the use of spot audits and penalties.

TRLabor

HB 610

Amendments Proposed:

1. Delete all reference to a board.
2. The below amendments if the bill is passed.

Page 1 - Delete reference to a Board of Builders.

Line 11 - Delete
Lines 18 to 20 - Delete.

Page 3, line 13, section 8 - Delete.

Insert between lines 18 and 19, page 3:

*Section AS 08.18.011 is amended to read:

Sec. 08.18.011. REGISTRATION REQUIRED. (a) It is unlawful for a person to submit a bid or work as a contractor until that person has been issued a certificate of registration by the Department of Commerce and Economic Development. A bid submitted for work as a contractor by a person or firm not registered under this chapter prior to the bid is invalid and shall be rejected.

(b) A bid submitted for contracts involving electrical work by a registered contractor who is not a licensed electrical administrator, or does not have in his employ, an electrical administrator qualified under AS 08.40.090 is invalid and shall be rejected. A registered electrical contractor who has been retained must qualify under AS 08.40.090.

(c) A general or specialty contractor registered under this chapter, prior to bidding on a contract involving electrical work, must

(1) be an owner licensed as an electrical administrator and licensed to perform electrical work in the category to be performed under the contract on which the contractor is bidding, or;

(2) have in his employ, prior to bidding, a person licensed as an electrical administrator in the category of the work to be performed under the contract on which the contractor is bidding.

Line 23 - Delete "By the Board".

*Sec. 2. AS 08.18.026 is amended to read:

Sec. 08.18.026. ELECTRICAL CONTRACTORS. (a) The department may not issue a certificate of registration as an electrical contractor to an applicant unless the applicant is, or employs, a person currently licensed as an electrical administrator under AS 08.40.

(b) Each applicant for an electrical contractor's certificate of registration may employ more than one electrical administrator.

(c) If the relationship of the [ONLY] electrical administrator with a registered electrical contractor is terminated, the contractor must notify the department within seven days following the termination. Registration is void 30 days after termination [THE NEXT REGULARLY SCHEDULED EXAMINATION] unless the electrical contractor has hired a licensed electrical administrator in the interim.

Insert after line 20, page 4:

*Sec. 3. AS 08.18.121 is amended to read:

Sec. 08.18.121. SUSPENSION AND REVOCATION OF REGISTRATION. (a) If the insurance required in AS 08.18.101 ceases to be in effect, the registration of the contractor shall be suspended until the insurance has been reinstated.

(b) If a final judgment impairs the liability of the surety upon the bond or depletes the cash deposit so that there is not in effect a bond undertaking or cash deposit in the full amount prescribed in AS 08.18.071, the registration of the contractor involved shall be suspended until the bond liability in the required amount, unimpaired by unsatisfied judgment claims, has been furnished.

(c) If a bonding company cancels its bond of a contractor the contractor's registration shall be revoked. The contractor may again obtain registration by complying with the requirements of this chapter.

(d) If a licensed contractor fails to fulfill the contractor's obligations as set out in AS 08.18.071 the contractor's license shall be suspended for a period of time the commissioner determines is appropriate. After three suspensions the contractor's license may be permanently revoked.

(e) Proceedings to suspend or revoke a license issued under this chapter are governed by the Administrative Procedure Act (AS 44.62).

(f) If the commissioner of commerce and economic development or the commissioner of labor determines that a person is acting as a contractor in violation of this chapter, the commissioner of commerce and economic development or the commissioner of labor shall give written notice prohibiting further action by the person as a contractor. The prohibition continues until the person has submitted evidence acceptable to the commissioner [OF LABOR] showing that the violation has been corrected.

(g) A person affected by an order issued under this chapter may seek equitable relief preventing the commissioner of commerce and economic development or the commissioner of labor from enforcing the order.

(h) The departments of commerce and economic development and labor may investigate alleged or apparent violations of this chapter. Upon demand, a contractor or his representative must produce evidence of current registration. Refusal or failure to provide proof of current registration constitutes violation of this chapter.

(i) Registered contractors utilizing subcontractors shall ensure that these contractors meet the registration requirements of this chapter.

Page 4, lines 21 to 29, section 13 - Delete question - Why a highway specialist?

Page 5, lines 1 to 23 - Delete.

Line 24, Section 15 - As read, this section would take the jurisdiction away from the Department of Labor, Mechanical Inspectors and Department of Commerce and Economic Development Investigators.

We would prefer to see the authority for issuance of misdemeanor citations with mandatory court appearance. This would demand the "fly-by-night operators" to become licensed or leave the industry. The citation program should extend to legitimate contractors using unlicensed subcontractors.

*Sec. 4. AS 08.18.131 is amended to read:

Sec. 08.18.131. INJUNCTION. In an action instituted in the superior court by the commissioner of commerce and economic development or the commissioner of labor or a [THE] commissioners' [COMMISSIONER'S] representative, a person acting in the capacity of a contractor in violation of this chapter may be enjoined from doing so.

*Sec. 5. AS 08.18.141 is amended to read:

Sec. 08.18.141. MISDEMEANOR. A person acting in the capacity of a contractor in violation of this chapter is guilty of a misdemeanor. An authorized representative of the commissioner of commerce and economic development or the commissioner of labor may issue a misdemeanor citation to a person, firm, partnership, corporation, or any other entity that is doing contracting work if the person, firm, partnership, corporation, or other entity does not have a valid certificate of registration under AS 08.18.011 or AS 08.18.026.

Section 17, lines 7 to 14 - Delete.

If not, then line 9 - Change to quarterly if necessary. This should be by regulation, not statute.

Line 12 - Delete telephone numbers.

Section 18, line 22 - Delete.

HDT/wfs22884b

TESTIMONY OF

BILL REEVES

ALASKA CHAPTER

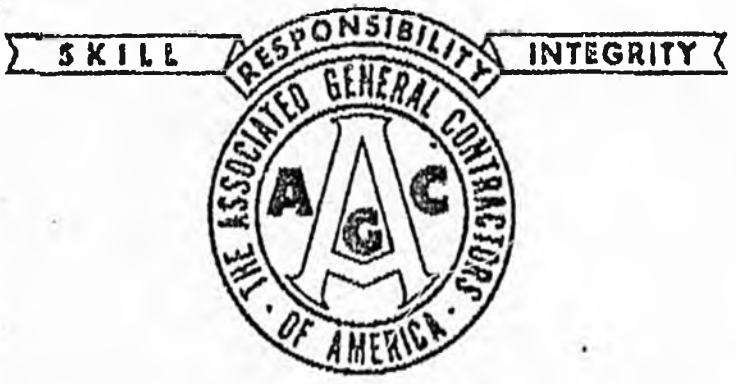
THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA

TO THE

HOUSE LABOR AND COMMERCE COMMITTEE

ON

LEGISLATION ESTABLISHING A BOARD OF BUILDERS (HB 610)



The Alaska Chapter, Associated General Contractors of America, (A.G.C.) represents more than 800 companies, including most of the general contracting companies engaged in commercial construction. We appreciate the opportunity to present A.G.C.'s views on HB 610.

The A.G.C. opposes HB 610. In its present configuration, HB 610 includes commerical contractors within a statutory framework aimed at residential home contractors. A.G.C. urges this committee to scrutinize any legislation creating any new "Board" as the State is presently inundated with Boards and Commissions. Finally, A.G.C. opposes the broad powers vested in the proposed Building Board by this legislation. There are no standards of conduct established or criteria other than basic licensing requirements. In short, a "board" is not necessary to enforce what is already the law.

Specifically, A.G.C. objects to the creation and all references to a "Board of Builders". The inappropriateness of the formation of this board is nowhere more apparent than in Section 13 of proposed House Bill 610. Section 13 attempts to create and defines the membership of the Board of Builders. Three general contractors are provided for in this section, one of which must be a "remodeling specialist" (a term which seemingly contradicts the term "general contractor") and one of whom is a Highway specialist. The one remaining "general contractor" Board member would be picked from general contractors with such varied expertise as a residential contractor building five houses a year, a residential housing contractor building 200 multi-family units per year, a commercial building contractor constructing small shopping centers, a commercial building contractor constructing large public and private buildings such as the Convention Center, ARCO or SOHIO buildings, a heavy and industrial general contractor constructing such items as major hydroelectric projects and refining plants, and any one of more than hundreds of different contractors with different areas of focus. All of these contractors will have

different perspectives; therefore, it seems inappropriate to elevate to a special status a remodeling specialist and a highway specialist.

With respect to including the registration number on stationery and on vehicles as required by Section 11; the A.G.C. recommends modification if this provision is felt to be necessary. We recommend that Page 4, Lines 7-9 be changed to read:

c) A motor vehicle displaying the name of a contractor shall also display the registration number of the contractor.

We further recommend an effective date of January 1986 to allow for utilization of supplies which do not contain the registration number.

The Alaska Chapter, A.G.C. does not oppose increasing the bond limits as provided in Section 12. In fact, A.G.C. does not oppose raising the bond limits even further.

In summary, the Alaska Chapter, A.G.C. opposes all of the provisions of HB 610 with the exception of raising the bonding limits for contractors.

The labor and commerce committee appears to be responding to a statewide need on two separate and unrelated issues. First, is the claim by many licensed residential contractors that they are competing with unlicensed contractors -- in particular the small specialty subcontractor. Second, many home purchasers complain of construction quality and the inadequate legal remedy that presently exists - especially if the contractor is no longer in the state.

HB 610 as proposed will not solve either problem. Unlicensed contractors are illegal under present law - creating a "board" will not solve the problem. Shoddy construction and an inadequate remedy for home purchasers will continue as long as home purchasers do not check into the reputation of the contractor. Raising the bonding limits to $10,000 still will not provide an adequate safeguard.

The Alaska Chapter A.G.C. submits that the present system can work if everyone knows the laws that presently exist, and if the bonding limits are increased to an effective level. Present laws prohibit an unlicensed contractor from suing for compensation or a breach of contract. A public awareness campaign of this fact may stimulate many individuals to obtain licenses.

FISCAL ANALYSIS
HB 610

Assumptions:

This bill creates a new seven member board to govern an established licensing function within the Department of Commerce and Economic Development, Division of Occupational Licensing, Construction Contractors.

There are currently approximately 7,000 licensed contractors and an estimated 2,500 to 3,000 contractors that have not renewed their registration and are considered inactive.

This bill is silent on the number of meetings that the board shall hold each year. In the absence of specific statutes, AS 08.01.070(2) shall prevail. This states that each board shall hold a minimum of one meeting each year. With the number of licensed contractors, it is anticipated that it would be necessary for the board to hold at least quarterly meetings and in geographic locations of the State to cover Southeastern, Interior and Southcentral, with at least two of the meetings to be held in Anchorage, with each meeting, including travel time, being three days duration, in order to competently address the business of the board.

Travel and Per Diem costs would be incurred for board members and division administrative support staff to attend the board meetings.

This bill does not address the registration or renewal fee structure, as specified in AS 08.18.041, therefore no fiscal impact would be incurred on revenue.

The bill does provide for civil penalties for violations, however it would be extremely difficult to project any revenue from civil penalties imposed on licensed contractors by the board.

The bill does not address the issue of geographic areas of the State that board members shall reside in as a criteria for appointment to the board to ensure equal representation for contractors throughout the State. It is anticipated that three of the board members would be from the Interior area, three for Southcentral and the remaining one would be from the Southeastern area. Travel cost projected is based on this assumption.

This bill transfers the enforcement responsibility for construction contractor statutes and regulations from the Department of Labor to the Department of Commerce and Economic Development, Board of Builders. Additional Investigative personnel would be required for this activity and travel and per diem costs would be incurred for investigations.

HOUSE BILL NO. 610

100 PERSONAL SERVICES - (FY '84 Salary Schedule with a 5% inflation factor projected for succeeding Fiscal Years)

2 Investigators, Range 18A, General Goverment, Seasonal - 6 months each (March through September) 1 located in Anchorage and 1 located in Juneau	$ 46,299.48
1 Investigator, Range 18E, General Goverment, Seasonal - 6 months (March through September) to be located in Fairbanks	26,301.85
Total:	$ 72,601.33

200 TRAVEL (Estimated)

2 Staff travel from juneau to attend board meetings:

Anchorage: 2 meetings Transportation: $400.00 each x 2 staff x 2 meetings =	$ 1,600.00
Per Diem: 2 staff - 2 meetings 3 days each @ $80.00 per day =	960.00
Fairbanks: 1 meeting Transportation: 2 staff x $475.00 each =	950.00
Per Diem: 2 staff 3 days each @ $90.00 per day =	540.00

Board Travel:

Transportation: Juneau meeting 3 members from Anchorage @ $400.00 each =	1,200.00
3 members from Fairbanks @ $475.00 each =	1,425.00
Per Diem: 7 members - 3 days each @ $80.00 per day =	1,680.00
Transportation: Anchorage meeting 1 board member from Juneau @ $400.00 each x 2 meetings =	800.00
3 board members from Fairbanks @ $250.00 each x 2 meetings =	1,500.00
Per Diem: 7 board members 3 days each x 2 meetings @ $80.00 per day =	3,360.00

Transportation: Fairbanks meeting	
1 board member from Juneau @ $475.00 =	475.00
3 board members from Anchorage @ $250.00 each =	750.00
Per Diem: 7 board members @ $90.00 per day x 3 days each =	1,890.00
Investigator Travel:	
Fairbanks: 1 Investigator - 1 airline trip per month @ $300.00 x 6 months =	1,800.00
Per Diem: 8 days per month @ $90.00 per day x 6 months =	4,320.00
Juneau/Anchorage: 2 Investigators 1.5 airline trips per month each @ $300.00 x 6 months =	5,400.00
Per Diem: 8 days per month per Investigator @ $80.00 per day x 6 months =	7,680.00
TOTAL TRAVEL:	$36,330.00

300 CONTRACTUAL (Estimated costs)

Postage, telephone and operating costs, 3 Investigators @ $250.00 per month each x 6 months =	$ 4,500.00
Investigator Leased Vehicles, dry,W/Maintenance:	
Juneau: 1 vehicle @ $425.00 per month x 6 months =	2,550.00
Anchorage: 1 vehicle @ $410.00 per month x 6 months =	2,460.00
Fairbanks: 1 vehicle @ $540.00 per month x 6 months =	3,240.00
Fuel: 3 leased vehicles @ estimated $175.00 per month each x 6 months =	3,150.00
Disciplinary Hearings:	
Estimated 36 hearings under the Administrative Procedure Act for disciplinary sanctions with an estimated cost per hearing @ $2,000.00 =	72,000.00
TOTAL CONTRACTUAL:	$87,900.00

400 COMMODITIES (Estimated costs)

Stationery, Typewriter ribbons, pens, pencils, tablets, and other miscellaneous desk top supplies: 3 Investigators @ $100.00 per month each x 6 months =	1,800.00

500 EQUIPMENT (One time cost - FY '85 only- based on estimated Juneau costs for FY '85)

3 Investigators- Juneau, Anchorage and Fairbanks:

3 Desks, double pedestal, 60" x 30" @ $568.22 each =	$ 1,704.66
3 Chairs, Executive Swivel, with arms @ $313.30 each =	939.90
3 Typewriters, IBM Correcting Selectric with dual pitch, 15.5 inch paper capacity @ $1,369.36 each =	4,108.08
3 Typewriter Tables @ $135.65 each =	406.95
3 Calculators, Desk, printing and display, 12 digit, @ $364.66 each =	1,093.98
3 Chairs,Side without arms, contour style @ $114.60 each =	343.80
3 Recording Machines, Lanier, portable @ $775.87 each =	2,327.61
3 Book Cases, with adjustable shelves (3) @ $164.69 each =	494.07
3 File Cabinets, 5 drawer, legal with lock @ $406.91 each =	1,220.73
TOTAL EQUIPMENT COSTS:	$12,639.78

600 LAND & STRUCTURES (Estimated costs)

Office space for 3 Investigators:

Juneau: 150 square feet @ $2.25 per foot per month x 6 months =	$2,025.00
Anchorage: 150 square feet @ $2.00 per foot per month x 6 months =	1,800.00
Fairbanks: 150 square feet @ $2.50 per foot per month x 6 months =	2,250.00
TOTAL LAND & STRUCTURES COST:	$6,075.00

JUSTIFICATION

This position would be necessary to implement the provisions of HB 610, which creates the Board of Builders and transfers investigations and enforcement of Construction Contractor statute, AS 08.18, and regulations adopted to implement the statute, from the Department of Labor to the Department of Commerce and Economic Development. This would be a seasonal position of 6 months duration to conduct investigations into alleged violations of AS 08.18, and of alleged violations of the regulations and orders of the Board of Builders during the peak months of the construction season.

Assoc. General Contractors Amendment.

HB 610 (L&C)

Section 5, Page 2, Line 13:

Adds a new section authorizing the Department of Commerce and Economic Development enforcement and citation powers.

Section 6, Page 3, Line 15 and Section 7, Line 25 and 26:

This subsection addresses the authority of the commissioner of labor but, adds "or the commissioner of commerce and economic development".

RECOMMENDATION:

Either the Department of Labor or the Department of Commerce and Economic Development have enforcement and citation authority but, not both. This would help avoid the potential for conflicting regulations and actions.

Section 3, Page 1, Line 29:

Adds that all advertising and contracts are to include the registration number.

RECOMMENDATION:

Most telephone yellow page advertisements are prepared long in advance. The effective date of this bill is July 1, 1984 therefore any advertising appearing in a telephone book after that date would be in violation. An effective date of January 1, 1986 for Section 3 would avoid this problem.

Section 1, Page 1, Line 12 and 13:

The word "person" is used. It is unclear if "person" means an individual person hired to do some work or a firm that is a specialty contractor.

RECOMMENDATION:

The language be clarified to indicate that this section is addressing the hiring of a specialty contractor firm and not and an individual person.

FISCAL ANALYSIS

CS HB 610

Assumptions:

This bill does not address the registration or renewal fee structure, as specified in AS 08.18.041, therefore no fiscal impact would be incurred on revenue generated by licensing.

This bill does provide for civil penalties for violations, however it would be extremely difficult to project any revenue generated from civil penalties imposed under the provisions of this bill. A fiscal impact would be incurred on revenue generated from civil penalties.

The provisions of this bill transfers the enforcement responsibility for the construction contractor statute and regulations from the Department of Labor to the Department of Commerce and Economic Development. This will require additional investigative personnel for this activity and travel and per diem costs would be incurred for investigations as well as personal services.

CS HOUSE BILL NO. 610

100 PERSONAL SERVICES: (FY '84 salary schedule with a 5% inflation factor projected)

2 Investigators, Range 18A, General Goverment, Seasonal - 6 months each (April through September) located in Anchorage	$46,299.48

M E M O R A N D U M March 27, 1984

SUBJECT: Construction contractors
(CSHB 610(L&C))

TO: Representative John Cowdery
Chairman, House Labor and Commerce Committee

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

Here is the section by section analysis that you requested of the draft CSHB 610(L&C).

Section 1 makes it unlawful for a general contractor to authorize a person to begin work as a specialty contractor unless the person is registered.

Section 2 prohibits the commissioner of commerce and economic development from issuing a registration or renewing a registration of an applicant whose registration has been revoked or suspended or against whom a fine has been imposed until the period of revocation or suspension has expired and the fine has been paid.

Section 3 requires that advertising and contracts include the contractor's registration number.

Section 4 raises the amount of bonds to $10,000 for a general contractor and $5,000 for a specialty contractor.

Section 5 requires the department of commerce and economic development to provide investigative services to enforce AS 08.18. A peace officer or employee designated to conduct investigations may issue a citation for a violation of AS 08.18. Each day a violation continues is a separate violation. The Supreme Court is required to establish a schedule of bail amounts for violations. A person cited may deliver to the clerk of the court in which the citation is filed the amount of bail and a copy of the citation

indicating that the right to an appearance is waived, a plea of no contest entered, and bail is forfeited. Forfeiture of bail is a complete satisfaction for the violation. If the person cited fails to pay the bail amount or to appear in court, the citation is considered a summons for a misdemeanor.

Section 6 allows the commissioner of commerce and economic development as well as the commissioner of labor to prohibit a person from engaging in action as a contractor in certain situations.

Section 7 allows a person affected by an order issued by the commissionor of commerce and economic development, as well as those affected by an order from the commissioner of labor, to seek equitable relief.

Section 8 allows the commissioner of commerce and economic development as well as the commissioner of labor to seek an injunction against a person acting in the capacity of a contractor in violation of AS 08.18. A civil penalty not to exceed $250 may be imposed for each violation and each day that an unlawful act continues is a separate violation.

Section 9 provides that a person acting in the capacity of a contractor in violation of AS 08.18 is guilty of a class A misdemeanor. A class A misdemeanor is punishable by a term of imprisonment of not more than one year and by a fine of not more than a $5,000.

Section 10 prohibits a state agency, corporation or authority from lending money for construction of a project that is constructed in violation of AS 08.18.011 and requires the lending institution to make reasonable efforts to determine whether construction is proceeding in accordance with that section before releasing money under a construction loan.

Section 11 adds a definition of department for purposes of the chapter.

Section 12 ties the effective date to the beginning of the new fiscal year.

611

M E M O R A N D U M

DATE: 29 March 1984

TO: Representative Rick Uehling

FROM: John Geary

RE: Dental Hygienists, CSHB 611

You have requested that I review CSHB 611 an act relating to dentists and dental hygienists. This act, introduced by Representative Walt Furnace, consists of 41 sections which divide into three major topics.

1. Sections 1-15 regulate the practice of dental hygienists.

2. Sections 16-21 regulate the board of dental examiners who oversee both dentists and dental hygienists.

3. Sections 22-41 amends the current regulations of dentists.

For such an overall lengthy bill it reads coherently and is popular with the dentists themselves

MARCH 29, 1984

TO: JOHN

FROM: KEN

RE: HB 611 "RELATING TO DENTISTS AND DENTAL HYGENTISTS"

HB 611 WOULD UPDATE THE CURRENT STATUTES WHICH GOVERN THE LICENSING, EXAMINATIONS, AND PRACTICES TO WHICH DENTISTS AND DENTAL HYGENTIST MUST COMPLY. THIS BILL IS INTENDED TO GIVE MORE CLARITY TO THOSE STATUTES WHICH COVER: LICENSES AND REGISTRATION, TESTING OF APPLICANTS, DISCIPLINARY SANCTIONS, AND THE OPERATION OF THE BOARD OF DENTAL EXAMINERS. TO DATE THE COMMITTEE HAS HELD ONE PUBLIC HEARING ON HB 611, AND SINCE THAT TIME REPRESENTATIVES OF THE DIVISION OF LICENSING, THE BOARD OF DENATL EXAMINERS, THE ALASKA DENTAL SOCIETY, AND THE DENTAL HYGENTISTS SOCIETY, HAVE MET. IT IS MY UNDERSTANDING THAT THE BASIC PROBLEMS HAVE BEEN WORKED OUT. DURING TO TODAYS SESSION I HOPE ANY OTHER NECESSARY CHANGES CAN BE MADE TO THE LEGISLATION.

Delete all references to certificate or registration. Retain the word license.

Page 1

Line 12 add current after "without a."

Line 12/13 delete all after [and a current certificate of registration].

Line 15 delete [and registration].

Line 16 delete [and registration].

Page 2

Line 5 delete [a professional dental or dental hygiene association]. Insert [Another Dental Licensing jurisprudence].

Line 9 delete [and registration].

Page 3

Begin on Line 1. Oppose as unnecessary. The language can be restrictive to the board. The size of the board and number of applicants could be burdensome to meet this statutory requirement.

Line 18 add this new sentence [If the board has reason to believe the applicant cannot practice safely on a clinical patient].

Line 20 delete [REGISTRATION AND].

Line 21 delete [If the applicant passes the examination].

Line 21 change "t" to "T".

Line 28 and 29 delete. Retain only the term of license or licensure.

Page 4

Line 6, 7 and 8 delete words "registration or registration certificate".

Line 29 change to (5) license renewal fee.

Page 5

Section 10

Line 19, 20 and 21 request the direct and indirect term be clarified.

Line 21 add (b) eliminate intra oral (Lois Reeder).

Section 11

Recommend the wording be changed to: (Begin on line 24) "The board may revoke or suspend the license of a dental hygienist, after a hearing, or may reprimand, censure, or discipline a licensee, if the board finds that the licensee...." This change would give the board the authority to act timely for minor infractions without threating the loss of a license.

Line 28

(1) delete or change the word knowingly.

This causes an extra burden of proof on the disciplinary body. It offers an affirmative defense or raises an issue that could cloud the main concern. It is fair to assume a licensee of this intelligence level would not participate in securing a license except by the same method the licensee applied.

Page 6

Line 1 add "or registration."

Line 5 and 6 delete (3) as unnecessary. Item (2) of the same section would cover the false or misleading advertising.

Line 6 delete [in violation of regulations adopted by the board].

Line 15 delete as over stating. "Severe" need not be stated if one is dependent on a substance such as alcohol or drugs so their reliability to protect the public is a question.

Section 12

Delete Section 12 beginning on line 25 continuing on to page 7, line 9. (Per Lois Reeder, and agreed by DOL).

Line 28 delete the word "Board." The board sits as the final judge they should not be the "investigators."

Page 7

Line 2 - Oppose. Prejudgment could be dangerous to fairness. The panel could recommend for reprimand or censure, not for hearing.

Page 9

Begins addressing AS 08.36 Dentist

Line 5 and 6 change after the word "state" who teaches or demonstrates clinical techniques at a seminar or limited course of instruction.

Line 9 to 11. Delete (4) instructors should be the first to be licensed.

Line 26 and 27 delete [FOR CAUSE] . Board members should be appointed and removed by the Governor.

Page 10

Section 18

Line 1 change [is] to "may be"

Line 5 - change "once" to read four.

This would allow proper budgeting. If once or one the agency would be able to budget for one meeting.

Line 12 to 14 - Delete as unnecessary beginning with "The department shall reimburse a member, etc...."

Page 11

Line 21 - This is fine, however, should it be required in statute?

Line 27 - Item (11). OK. However, the Association of Dental Hygienist wanted to respond.

Line 28 add the word "specific" after for.

Line 29 change special to "specific" and after training add "as determined by."

Page 12

Section 21

Oppose to and request deletion of lines 13 to 17. This not only circumvents state hiring procedures but dictates the service which the investigator will serve under ("exempt").

The current system provides for investigation when funded. Contractual monies are available for hiring expert help in the professional evaluations when needed. At present, there is insufficient cases to have one investigator serve just the dental board.

Line 26 and 27

The Dental Board requests change of the word "is a" to "has" on line 26 and line 27 after graduate add or will graduate.

Page 13

Section 24

Line 8 change [30] to 45.

Line 21 change [shall] to may. The board will have the latitude to follow the national acceptable standard; however, if the national standard falls below the State level, the board is not statutorily required to follow it.

Line 27 add "if the board has reason to believe the applicant cannot practice safely on a clinical patient."

Page 14

Line 5 add "regulation of."

Page 15

Section 27

Line 1 delete "professional association peer review procedure."

Line 2 change "professional dental association" to ANOTHER DENTAL LICENSING JURISDICTION.

Section 29 (continues on to page 16)

(b) delete as unenforceable. Licensing should be as stated in the above AS 08.36.246(a)(1), (2) and (3) as all that is necessary.

Page 16

Section 30

Line 9 to 11 delete.

Opposed as increasing the number of board members.

Page 17

Section 33

Line 17 to 22 (see prior recommendation Section 11)

Line 23 - Delete "knowingly."

Page 18

Line 16 delete the word severe.

Line 24 add "in violation of."

Line 26 add after "board" - through the Division of Occupational Licensing

Reason - Board members are not always available.

Delete all of Section 34 beginning on page 18 and continuing to line 12 of Page 19.

Page 21

Line 11 add after "who" teaching or

Line 12 add after "a seminar or limited course of instructions." Delete the word "meeting."

Line 15-17 - delete. The Dental Hygienist School requires a current licensed dentist (see AS 08.32.095(1)).

Page 22

Section 40

Delete. The purpose of this new section is unclear. It enables one to violate this chapter under research.

HDT/kkkB41
32884b

Sec. 08.36.140. Out-of-state examination. If an applicant requests the board to hold an examination outside the state, the board may require the applicant to pay the transportation costs to the members of the committee conducting the examination. (Sec 3 art III ch 186 SLA 1955)

Sec. 08.36.150. Examination in out-of-state dental schools. The examination committee, with the approval of the board, may conduct an examination in the clinic of an approved dental school within the continental limits of the United States and admit to the examination a dental student in his last year of school who would otherwise be eligible for admission to examination and licensing in the state upon completion of his education. (Sec 3 art III ch 186 SLA 1955)

Sec. 08.36.170. Partial examination. A student at least 19 years of age who has satisfactorily completed regular courses of instruction in dentistry in at least two different school years at an approved dental school, and who is certified by the dean of the college as having satisfactorily completed the subjects included in Section I of the examination may take Section I of the examination. If the student passes Section I and subsequently takes the full examination, the requirements of Section I are waived. (Sec 5 art III ch 186 SLA 1955)

Sec. 08.36.200. Waiver of written examination. The board may waive the requirement for written examination for an applicant who holds a certificate from the National Board of Dental Examiners that he has passed the theoretical or written examination given by the national board. (Sec 8(a) art III ch 186 SLA 1955)

Sec. 08.36.280. Temporary permit. (a) The board may issue a one year temporary permit without examination to an applicant to practice dentistry in a locality requested by the applicant if the locality is of the type specified in (2) of this subsection and the applicant

(1) meets the requirements of Sec 110 of this chapter;

(2) desires to practice dentistry in a city or rural village which does not have a resident licensed dentist in active general practice;

(3) has a license in good standing to practice dentistry in a state, territory, district or possession of the United States;

(4) tenders and pays the fee prescribed in AS 08.36.290(9).

(b) The board may authorize a temporary permittee to practice dentistry in more than one city or rural village of the type specified in (a)(2) of this section.

(c) The board may annually renew a temporary permit upon written appliction of an applicant and upon payment of the prescribed fee if the applicant has not committed an act which is a ground for revocation in Sec. 310 of this chapter, but in any case, within two years from issuance of his first temporary permit, the applicant must pass a board exam.

(d) A temporary permit may be revoked, suspended or annulled, or the permittee may be reprimanded, censured or disciplined by the board in the same manner and for the same cause as a licensed dentist under Sec. 310 of this chapter.

(e) The board shall grant or deny an application for a temporary permit within 60 days after it is received. (Sec 15 art III ch 186 SLA 1955; am Sec 4 ch 26 SLA 1965; am Secs 8, 9 ch 121 SLA 1972; am ch 59 SLA 1982)

RE: HB 611 "RELATING TO DENTISTS AND DENTAL HYGENTISTS"

HB 611 WOULD UPDATE THE CURRENT STATUTES WHICH GOVERN THE LICENSING, EXAMINATIONS, AND PRACTICES TO WHICH DENTISITS AND DENTAL HYGENTIST MUST COMPLY. THIS BILL IS INTENDED TO GIVE MORE CLARITY TO THOSE STATUTES WHICH COVER: LICENSES AND REGISTRATION, TESTING OF APPLICANTS, DISCIPLINARY SANCTIONS, AND THE OPERATION OF THE BOARD OF DENTAL EXAMINERS.

QUESTIONS:

1. THIS BILL HAS A STRONG EMPHASIS ON DISCIPLINARY ACTIONS. IS THERE SERIOUS PROBLEMS IN THE INDUSTRY TODAY THAT WARRANTS THIS IN THE BILL ?

2. WHAT ARE THE FEELINGS ON THIS BILL OF THE DENTAL ASSOCIATIONS AND DENTAL SOCIETIES AROUND THE STATE ?

3. PARAGRAPH D OF SECTION SEC. 11, PAGE 6 LINE 19 SUGGESTS A CONTINUING EDUCATION PROGRAM SHOULD BE IN PLACE. AT

THE PRESENT IS THERE A REQUIREMENT FOR CONTINUING EDUCATION AND IF SO HOW IS IT MEASURED ?

HOUSE BILL NO. 611

FISCAL ANALYSIS:

Assumptions: If adopted in its present form, this bill would require regulations be adopted to implement the provisions of Sec. 17, paragraphs (10), (12) and (13), and Sec. 27. This would be a one time cost for FY '85 only for travel and contractual costs.

Sec. 17, paragraph (11), would require a continuing contractual cost for advertising of a summary of disciplinary actions by the board.

200 TRAVEL

1 staff travel to Fairbanks and Anchorage to conduct public hearings on proposed regulations.

Fairbanks:	Transportation - 1 trip	$ 450.00
	Per Diem: 2 days @ $90.00	180.00
Anchorage:	Transportation - 1 trip	375.00
	Per Diem: 2 days @ $80.00	160.00
	Total	$1,165.00

300 CONTRACTUAL

Advertising costs for public notices of proposed regulations and public hearings; 3 major newspapers, one time only X $100.00 each. (one time cost - FY '85 only)	$ 300.00
Advertising cost for quarterly publication of the summary of disciplinary actions; 3 major newspapers, one time only X $100.00 each = $300.00 X 4 quarters=	1,200.00
(7% inflation factor projected for succeeding fiscal years) Total	$1,500.00

SUBJECT: Sectional analysis of HCS CSHB 611 (Dentists and Dental Hygienists)

TO: Representative John Cowdery
Chairman, Labor Commerce

FROM: Teresa B. Cramer Teresa B. Cramer
Legislative Counsel

You have asked for a sectional analysis of CSHB 611 (L&C). The bill can be considered in three parts. Sections 1-15 amend AS 08.32, regulating the practice of dental hygienists. Many of the amendments transfer regulations applying to hygienists but codified in AS 08.36, regulating dentists, into AS 08.32.

The second set of amendments, found in sections 16-21, relate to the Board of Dental Examiners which regulates both dental hygienists and dentists.

The third part of the bill amends the regulation of dentists and is contained in sections 22 through 41.

Sections Relating to Dental Hygienists

Sections 1 and 2 Clarify the requirement that hygienists be registered as well as licensed.

Section 3 Permits dental hygienists licensed in another state to apply for a temporary license pending receipt of their Alaska licensing examination results.

Section 5 Clarifies the composition and content of the licensing examination.

Sections 6 and 7 Clarify the requirement that registrations be renewed every four years. Section 7 is modeled on AS 08.36.250 which currently applies to hygienists as well as to dentists.

Section 8 The penalty for late renewal under AS 08.01.100(b) is $10.

Section 9 Gives the board the power to set licensing fees by regulation. AS 08.36.190 currently sets fees for dental hygienists and dentists by statute.

Section 10 Adds reference in AS 08.32.110 to requirement that hygienists who administer local anesthetics be certified.

Section 11 Paragraph (2) adds fraudulent billing for services as a basis for imposing discipline. Paragraph (3) limits discipline for false or misleading advertising to instances in which the advertising violates regulations adopted by the board. Paragraph (6)(D) adds unfitness because of failure to keep informed of current professional theories and practices as grounds for imposing discipline.

Section 12 Adds a new section to provide that a panel of the board will screen consumer complaints before the complaint reaches an adjudicatory hearing under the Administrative Procedure Act.

Section 13 Transfers provisions in AS 08.36.320 to AS 08.32 and adds language in subsection (c) to permit the board to suspend the license of a dental hygienist who refuses to submit to a physical or mental examination.

Section 14 Makes failure to comply with a regulation of the board a violation and changes the penalty for a violation to a Class B misdemeanor (punishable by a fine of no more than $1000 (AS 12.55.035) and by imprisonment for no longer than 90 days (AS 12.55.135).

Section 15 Adds new provisions modeled on AS 08.36.350 to permit the hygienists listed to practice without a state license. Subsection (b) holds those dental hygienists to the same standard of care as licensed hygienists.

Sections relating to the Board of Dental Examiners

Section 16 Adds a requirement that the dental hygienist on the Board of Dental Examiners have practiced in Alaska for five years.

Section 17 Adds language to suspend a dentist or dental hygienist from the board if an accusation alleging unprofessional conduct has been filed under the Administrative Procedure Act. The suspension lasts until the decision of the board is final under AS 44.62.520.

Section 18 Permits a majority of the board to call a meeting in the absence of a call of the president.

Section 19 Adds specific authorization for the department to reimburse board members for expenses.

Section 20 Paragraph (a)(3) expands the required content of the board's annual report. Paragraph (a)(10) requires that the board publish information about its disciplinary decisions annually. Paragraph (a)(11) permits the board to provide for education and training requirements for special procedures and to issue permits or certificates to those who meet those requirements. Paragraph (a)(12) clarifies existing powers of the board. Paragraph (b)(2) permits the board to authorize the inspection of records of dentists to monitor compliance with AS 08.32 and 08.36.

Section 21 Authorizes the board to hire an investigator. The board currently has no staff.

Sections relating to dentists.

Section 22 Deletes reference to permits. The bill repeals AS 08.36.280 which provides for temporary permits. Dentists practicing in isolated areas under AS 08.36.271 are exempt from the chapter under AS 08.36.350.

Sections 23 and 27 Require that all applicants for licensing pass the national board examination before taking the state exam.

Section 25 Clarifies the composition and structure of the licensing examination.

Section 26 The penalty under AS 08.01.100(b) for late renewal is $10.

Section 28 Deletes the requirement that dentists register with the clerk of the superior court.

Sections 29 and 30 Require that applicants for specialist licenses be eligible for diplomate status with a specialty board and that a licensed specialist take part in the licensing procedures.

Section 31 Adds subsection (b) requiring that dentists who are renewing their registrations report to the board any suits filed against them based on the quality of their professional services.

Section 32 Rewrites the fee statue to allow the board to set fees by regulation rather than providing for specific amounts by statute.

Section 33 Paragraph (2) adds fraudulent billing for services as a basis for imposing discipline. Paragraph (3) limits discipline for false or misleading advertising to instances in violation of regulations adopted by the board. Paragraph (10) makes a dentist who fails to report a death occurring in the dentist's office liable to discipline.

Section 34 Adds a new section to provide that a panel of the board will review complaints about professional services before an accusation is filed under the Administrative Procedure Act adjudicatory hearing procedures. (See also Section 12)

Section 35 Deletes reference to dental hygienists

Section 36 Adds language to permit the board to suspend the license of a dentist who refuses to submit to a mental or physical examination.

Section 37 Makes dentists who violate regulations of the board subject to sentencing. A Class B misdemeanor carries a maximum fine of $1000 (AS 12.55.035) and imprisonment for no more than 90 days (AS 12.55.135).

Section 38 Paragraph (a)(5) clarifies exemptions for licensed clinicians. Paragraph (a)(6) exempts from licensing instructors in an accredited dental educational institution. Paragraph (a)(7) exempts dentists providing emergency care. Subsection (b) holds dentists exempt from licensing to the same standard of care as licensed dentists

Section 39 Paragraph (7) defines the practice of dentistry to exclude owners and managers of dental facilities.

Section 40 Adds a new section to provide rights to dentists. Paragraphs (3) and (4) permit dentists supervising research in a research institution chartered by the state or in a school accredited by the American Dental Association to perform procedures that would otherwise violate this chapter. Paragraph (4) requires that the dentist notify the board of any procedures to be performed on patients. The board may disapprove the procedures.

Section 41 Repeals five sections of the law.

AS 08.36.140 permits the board to hold a licensing exam outside the state.

AS 08.36.150 permits students in their last year of dental school to take the licensing examination and permits the board to give the exam in an out-of-state dental school.

AS 08.36.170 permits students to take sections of the state licensing examination at different times.

AS 08.36.200 permits the board to waive the state written exam for applicants who have passed the national board examination.

AS 08.36.280 provides for temporary permits to dentists practicing in a city or rural village which does not have a resident licensed dentist in active general practice.

RE: OPENING COMMITTEE COMMENTS ON HB 633

HOUSE BILL 633, SPONSORED BY OUR COLLEAGUE REP. FURNACE, WOULD AMEND TITLE 21 OF THE ALASKA STATUTES. UNDER PRESENT LAW THE FEES REQUIRED FROM THOSE WORKING IN THE INSURANCE INDUSTRY, ARE ESTABLISHED BY THE LEGISLATURE. IF THIS BILL IS ADOPTED, THE LEGISLATURE WOULD NO LONGER BE RESPONSIBLE SETTING THESE FEES. INSTEAD, THIS BILL WOULD GRANT AUTHORITY, UNDER STATE REGULATIONS, TO THE DIRECTOR OF THE DIVISION OF INSURANCE TO ESTABLISH FEES FOR THE INDUSTRY .

QUESTIONS:

1. WHY CAN'T THE DIVISION OF INSURANCE SUBMIT CHANGES IN THE FEE STRUCTURE TO THE LEGISLATURE FOR APPROVAL RATHER THAN CHANGING THE STATUTE ?

2. HAS THE DIVISION OF INSURANCE EXPERIENCED PROBLEMS IN THE PAST WITH A LEGISLATURE WHICH REFUSED TO COOPERATE WITH THE DIVISIONS REQUESTS ?

3. What was [illegible] Behind The Present [illegible].

4 - Needed [illegible] Amendment.

5 - Report - Fo[illegible]

HOUSE BILL 633

D R A F T

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill amending the current structure for fees collected by the division of insurance, Department of Commerce and Economic Development under AS 21.

Insurance license and other related fees are currently set by statute and may be adjusted only through legislation. This bill proposes to remove these fee structures from the statutes and provide that they may be set instead by regulation. This will mean that the fees may be adjusted to more nearly reflect actual costs to the state for the services rendered, without the need to repeatedly request statutory changes. The director of the division of insurance, Department of Commerce and Economic Development, will have the responsibility for adopting the fee-setting regulations.

The statutes currently setting fees for the division of insurance do not provide adequate revenue to the state to cover the division's present budget. Most of the fees were set by statute in 1966 and have not been increased since. In order to permit adjustment of insurance fees to more closely approximate the actual cost of services, I urge your prompt action on this measure.

Sincerely,

Bill Sheffield
Governor

1984 LEGISLATIVE PROPOSAL REQUEST FORM

AGENCY: Commerce and Economic Development

SUBJECT OF PROPOSED BILL: Repeal of insurance fees as set by statute in order that they can be set by regulation.

BRIEF SUMMARY: Insurance fees are currently set by statute. They can be adjusted only by means of the legislative process. The current fees, most of which were established as long ago as 1966, (see attached)
(Attach a more detailed explanation if you can.)

ESTIMATED FISCAL IMPACT:

OTHER STATE AGENCIES CONSULTED/AFFECTED: none

CONSTITUENT GROUPS:
Those opposed:

Those in favor:

Those yet to be contacted:

Has this or a substantially similar bill been introduced (and not passed) in the legislature in a previous session? Yes ____ No ____

If so, please state: Bill number _____
Dept. of Law log no: J-77-___-___
(if it was a Governor's bill)

PREFERRED HOUSE OF INTRODUCTION:

RATE THE BILL'S IMPORTANCE TO DEPARTMENT BY PRIORITY #:

DRAFT ATTACHED: Yes xx No ____ Not finalized ____

COMMISSIONER'S SIGNATURE: Richard A. Lyon

DATE:

are inadequate to reflect the costs of the services provided. It is proposed that fees would be more appropriately placed in regulation where they can be adjusted upwards or downwards to reflect true costs and eliminate the need to repeatedly ask for statutory change.

In FY 83, income from the various fee charges was $801,034. The budget for the Division was $939,823. The proposed fees would more closely approximate the actual cost to provide services to the user and balance the Division's budget.

Perhaps only sections 1, 11, 14 and 29 need be included in the bill and the revisor of statutes could pick up the remaining conflicting statutes. This would avoid a lengthy bill which appears more complicated than it is.

Further Reflections on the Alaska Relationship with East Asia

Over the past two decades, a new international order has emerged in East Asia. Composed of twelve nations with market economies, fringed by four nations with socialist, or command economies, and one nation, China, moving from a command to a market economy, the order has at its center Japan and the United States.

The basis of the international order is mutual economic benefit. Each member nation hopes to stimulate its growth through economic cooperation. At present, trade is the most developed tie. Each East Asian nation trades more with the other East Asian nations than it does with nations outside of East Asia. Led by Japan and the United States, investment between the nation-states is also starting. Japan seems most interested in the developing nations; the United States seems most interested in the newly industrialized states.

The growth rates of developing and newly industrialized states is high, with some East Asian nations having growth rates in the double digits. Clearly, East Asia will be at the forefront of the world's economic activity in the years ahead.

Alaska, by both geographic and economic logic, belongs to this new international order. Yet, at the present time,

none of the other nations in the international order recognize the relationship. Alaska is seen as part of the United States, its fate immutably hooked to that of the United States, the articulation of its interests emanating from Washington.

Alaska's greatest task, then, is to demonstrate that it is part of this new international order. While part of the United States, its interests are not necessarily identical to the interests of the lower forty-eight states. It does not rely on Washington for the articulation of its interests. It can speak for itself. Alaska has much to contribute to the development of the other East Asian and Southeast Asian states. Alaska has much to gain from this contribution.

If the international order is cooperative, it is also competitive. Alaska belongs to the resource rich nations. Indonesia, Malaysia, Australia, and Thailand are other examples. It must compete with them. And, in many respects, Alaska is behind the power curve.

Political philosophy is a case in point. Alaska has derived its rules of governance from early American and European experience. It believes that the state should participate in business only to the extent of regulating it. The East Asian states, on the other hand, derive their rules of governance from the Japanese experience, the last of the big powers to modernize. They believe, and the Japanese believe, that the state has the responsibility of fostering development. Government should be a partner of business.

The developmental state is not a socialist state. In a socialist state, the authorities control all the factors of production, are relatively indifferent to price and to competition. In the developmental state, the authorities are most selective about where they intervene. They protect if not strengthen the terms of competition. They accept the discipline imposed by cutthroat pricing.

The East Asian nations have development strategies. These strategies are delineated in plans. These plans are important for two reasons. First, their preparation requires both government officials and businessmen to come together to establish goals and set priorities. Dreams are made real and practical. Second, the plans serve as advertisements. They inform other nations what will be happening. The other nations can shape their plans to make best use of their advantages. The other nations can learn whether or not they wish to invest in the plan-writing nation. There have been many instances where the plans have served as the basis for international cooperation.

The East Asian nations push their interests overseas. They do this three ways: through international organizations--ASEAN is a case in point; through the rigorous training of its officials in diplomacy and developmental economics; and through the establishment of large embassies.

Each East Asian nation has representation in the capital of every other Asian nation as well as in the capitals of each industrialized state. These embassies report on the developments, show the flag, develop friendships, and encourage trade and investment. They are worth every penny invested in them.

What should Alaska be doing?

First of all, Alaska should look to its governing mechanisms. Should the Alaskan government reflect America at the time of the Civil War, should it remain in its philosophy a regulatory state? Or should the Alaskan government look overseas to late nineteenth century German, to postwar Japan, and now to South Korea, Singapore, and Taiwan to become a developmental state?

Second, Alaska should figure out where it is going. There are lots of tested but different developmental strategies to review. And there is plenty of room to argue over how detailed and who should actually undertake and participate in these reviews. But there is little question that some sort of a strategy set down is some sort of a plan is needed.

Finally, Alaska needs a foreign service. Currently, Alaska has a small office in Tokyo. Its personnel are of high quality. Its manager is politically savvy. They represent Alaska well. But the office is miniscule compared to the embassies of the other Asian states, many of whom have staffs that number in the hundreds, all aggressively pushing their nation's interests.

So much for broad statements. Now let me offer some detailed comments.

In terms of product, Alaskans are probably correct in first concentrating on the sale of energy--oil, gas, and coal.

Alaska has comparative advantage over the other energy states in two respects: It has short lines of supply not easily subject to interdiction unless the interdicting state wishes to mess with the U.S. Navy. And political conditions in Alaska are such that politics will not disrupt production.

But Alaskans should aggressively start to push their other resources--fish, lumber, minerals, and hydro-electric power. Japanese and Korean companies are beginning to peddle Alaskan resources in the other countries of East Asia and in the United States. They should not be discouraged. But the Alaskans should do more themselves.

Finally, Alaska should try to take advantage of conditions in the other Asian nations. Two examples immediately come to mind. Because of high power costs, the Japanese aluminum industry is no longer internationally competitive. It is declining and the Japanese government is prepared to look to foreign sources for its aluminum ingots. Why shouldn't this industry move to Alaska, where power is cheap?

A second example is cement. During the trip, we heard the officials of the DAE LIM Company boast that they had built and were running the world's largest cement plant. That plant with its other plants may supply the domestic needs of Korea as well as the needs of the Korean construction firms overseas. But certainly, DAE LIM wishes to further profit by exporting its cement technology, too. Should it not be invited to look at conditions in Alaska to determine if there is room for a cement industry?

Finally, during the trip we heard frequently businessmen, politicians, and officials say that they often transited Alaska. I have come to conclude that most of the world's leaders have at one time or another stood around in the international lounge in th Fairbank or Anchorage airport for an hour or so, waiting for their plane to be fueled for an ongoing flight. Shouldn't these airports have small theaters where the Alaskan government could show films, with sound tracks in several languages, extolling what Alaska has and what Alaska can do?

In terms of target nations, Alaska should concentrate on Japan. It is the world's second largest economy. Its appetite for natural resources is voracious. It has a substantial and growing imbalance of trade with the United States and it has an impatient and complaining American government leaning on it to correct this imbalance. These factors suggest that Japan should be willing to buy Alaskan products.

But not all factors favor Alaska. For over a century, the Japanese have said that they have the responsibility for leading Asia, for developing conditions of peace and prosperity in the other Asian nations. That means that the Japanese look more favorably south than they do north. Secondly, Japan has spent much time and treasure developing resources in Southeast Asia and Australia. It will not put aside this investment readily. Thirdly, Asians have the ties to and know how to sell to the Japanese, something that the Alaskans cannot do, yet.

Finally, the Japanese have become accustomed to and know how to deflect Washington complaints. They are aware that both Japan and the United States have again entered an upward phase of the business cycle and during these upward thrusts, Washington officials do not push their economic interests vigorously.

These negative factors lead me to conclude that Alaska will first be able to succeed in its overseas efforts in Korea. It has a booming economy. It has government officials in other states and these officials are favorably disposed towards the United States. It has an unfavorable balance of trade with the United States and both its businessmen and officials want to correct that. Korea does not have any political goals in Southeast Asia, though it is dallying with the idea of helping the Chinese develop Manchuria and the Russians to develop Siberia with the aim of outflanking the North Koreans. Finally, Korea has a healthy appetite for raw materials, particularly energy.

Alaska should not overlook Taiwan. It, too, is short of energy and raw materials and favorably disposed, for political reasons, to purchases from the United States. The Philippines are presently in political turmoil. But that will pass. Although rich in some resources, it is short of energy. It is another potential market for Alaska. Finally, Alaska should be extending feelers to Hong Kong and Singapore. They, too, have high growth rates, resource shortages, and want to establish closer ties with the United States.

February 8, 1984

The Honorable John Cowdery
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Cowdery:

Jim Clark has urged me to propose that you consider my continued association with the State to assist in making Alaska the focal point of a resource relationship with the Pacific Rim countries. As you know, these countries have historically looked to Southeast Asia and the South Pacific for their resources. The notion of looking north is something that they have really only recently considered.

The exchange of legislative missions has created awareness among some Japanese political leaders of Alaska's potential, not only for supplying resources, but also for enhancing Japan's security relationship with the U.S. The same can be said for Korean political leaders. Efforts such as the legislative mission need to be continued and accelerated within these political establishments to broaden support for the concept.

This is a matter about which I feel very strongly. I share Ambassador Mike Mansfield's view that the United States' bilateral relationship with Japan is the most important in the world and I would like to do everything I can to enhance it. Korea is also important. Enhancing and protecting these relationships by the sale of Alaska's resources to the Pacific Rim and by Japanese and Korean investment in Alaska are obvious things we can do.

I am going to be in Japan for a good deal of this year working on a book. I believe that I would be in a good position to attempt to explain Alaska's potential within Japanese political circles, at the highest levels. Moreover, since it would be appropriate to include Bill Overstreet in these efforts, I believe we could create a mechanism to cause Alaska's viewpoint to be made known with these people on a continuing basis.

If you feel this warrants further discussion, please let me know.

Very truly yours,

Nathaniel B. Thayer

Finally, Alaska should be extending feelers to Hong Kong and Singapore. They, too, have high growth rates, resource shortages, and want to establish closer ties with the United States.

FEASABILITY STUDY:
ESTABLISHING A SEPARATE
ALASKAN TRADE OFFICE IN KOREA

Submitted To: The Honorable Joe Hayes,
Speaker of the House of Representatives
of the State of Alaska

Submitted By: Michael M. Gay
6917 Old Seward Highway
Anchorage, Alaska 99502
(907) 276-2733

TABLE OF CONTENTS

I - PURPOSE AND METHODOLOGY

A. Purpose and Scope.

The primary purpose of this report is to provide the Alaska House of Representatives with a feasibility study for the establishment of an Alaska trade office in Korea, as well as a set of guidelines and recommendations, including proposed goals and objectives, for the establishment, staffing and operation of such an office.

The scope of this feasibility study is limited to the following specifically requested topics and areas:

1. Outlining the current structure of the Alaska State Asian Office (ASAO) in Tokyo, including staffing and costs of operation;
2. Analyzing the operation and functions of the ASAO; evaluating its effectivness and examining the option of extending its operation to include the rapidly increasing trade relations and activities in Korea;
3. Reviewing the activities of other states that have established trade offices in Korea;
4. Providing a history of Alaska-Korean trade efforts and activities;
5. Outlining the strongest areas of Korean interest in Alaska and examining the potential economic benefits to the state from increased trade with Korea and from increased Korean investment in Alaska;
6. Synthesizing the materials and information gathered from Korean business people and governmental officals, especially information regarding Korean government and business practices and protocol; and
7. Setting forth and discussing the main reasons for the desirability and feasibility of establishing a seperate Alaska trade office in Korea and outlining a plan for the setting up, staffing and operation of such an office.

B. PROCEDURES FOLLOWED

This study was accomplished in three phases. The first was aimed at obtaining ideas and information from various Alaskan business people and public officials regarding the establishment, functions, goals and policies of an Alaskan trade office in Korea. The organizations contacted in this regard included the Alaska-Korea Business Council (AKBC), and the Anchorage offices of the U.S. Department of Commerce, the International Trade Administration, and the Resource Development Council for Alaska, Inc. Numerous Alaskans presently involved or contemplating being involved in trade with Korea were also interviewed.

The second phase was conducted in Seoul, Korea. Interviews were held with Korean government and business leaders to obtain their ideas and information regarding the establishment of an Alaskan trade office in their country. Among the government agencies, trade associations and business groups contacted were the following:

Korean Foreign Ministry;
Korean Ministry of Commerce and Industry;
Economic Planning Board;
National Tax Administration;
Korea-U.S. Economic Council;
Korea Trade Association (KOTRA);
Samsung Company, Ltd.;
Hyundai Company, Ltd.;
Kukge-ICC Corporation;
Daewoo Corportion;
Kolon Corporation;
Namju Development Corporation;
Various middle-sized and smaller Korean business enities;
Seoul office of the U.S. Embassy, Commercial Section;
Seoul office of the U.S. Chamber of Commerce.

The third and final phase of this study involved the synthesizing of all the data collected in the first two phases, focusing on the areas specifically requested by the Alaska State House of Representatives and as set forth in the preceding subsection.

C. General Results.

The contacts that were made and the interviews that were conducted in both Alaska and Korea revealed a remarkable degree of interest from all sources. The amount of candid and positive input from Alaskan and Korean business people and government officials was very encouraging, but somewhat unexpected in light of what appears to have been a very limited amount of communication and sharing of detailed business and trade information between Alaska and Korea in the past.

II - HISTORY OF ALASKA-KOREAN TRADE

A. Limitations.

There is very little documentation available that specifically deals with past and current trade activities between Korea and Alaska. Most of the information obtained for this study was the product of interviews with individuals familiar with , or was derived from publications that addressed only small portions of the overall picture or included information on Korea that was only incidental to other topics. As a result, it is impossible to present an accurate, comprehensive and up to date summary of Alaska-Korea trade activities. Thus, what follows is only a general overview with a capsule history and figures on the recent level of trade, as to which some examples and statistics were available.

B. Capsule History.

Until very recently direct trade between Alaska and Korea has been relatively sparse compared to trade activities between Alaska and Japan, for example.

Alaska-Korean trade activities have generally involved exporting Alaskan natural resouce products, particuarly fish, timber and coal, to Korea. In addition, some Korean firms have supplied industrial materials for Alaskan capital projects, and in a few cases Korean firms have been awarded contracts to construct all or substantial portions of such projects. In more recent years, Korean firms have participated and shown a strong interest in continuing to

participate in joint ventures with Alaskan businesses, especially those involved in natural resource extraction and development.

C. Level of Trade.

As to the specific level of Alaska-Korean trade activities, according to a table in the 1980 Alaska Statistical Review listing the value of Alaskan imports and exports by nation for selected years between 1970 and 1979, in 1970 Korea ranked 4th as a recipient of Alaskan exports, behind Japan, India and Canada. In 1979, Korea again ranked 4th, this time behind Japan, India, and the People's Republic of China. Japan was clearly the dominant export market for Alaska, receiving over 80% of all Alaskan exports, while Korea does not appear to have been a significant market during the 1970's.

According to statistics from the Alaska Department of Commerce and Economic Development on, Alaskan exports to East Asian markets for the years 1978 through 1982, Korea was consistantly ranked behind Japan and the People's Republic of China until 1982, when it surpassed the latter. However, it should be noted that in 1982 the sale of 2 reconditioned jet aircraft to Korea accounted for over half the total yearly figure.

It should further be noted that the statistics mentioned above reflect only exports that were shipped directly to Korea from Alaska. Many Alaskan products have been and are being exported to Japan, whose trading companies then sell

them to Korea. Furthermore, some Alaskan products have been and are being transported to the contiguous United States before being shipped to Korea, and no statistics are available for all these types of transactions.

III - OTHER STATES' TRADE OFFICES[1]

According to a 1980 survey, 33 states were represented in that year by trade offices in 66 foreign countries. This had increased from 20 states in 1977.[2] While some states may have added or closed foreign trade offices in the last three years, international trade staff for such national organizations as the National Association of State Development Agencies (NASDA), the National Conference of State Legislators (NCSL), and the Council of State Governments (CSG) indicated that the level of activity is about the same currently. NASDA is in the process of compiling an updated list of state foreign trade offices, which should be available later this year.

In almost all cases, the foreign trade offices are associated with their state's economic development agency. In a few cases, the office represents the state's agriculture agency, and in some states different agencies share an office. In some cases, rather than representing a state, an office will represent a port authority or some other regional entity. For the purposes of our discussion, we have not included any state offices which are limited to promoting tourism, although some state trade offices do serve this function in addition to other duties.

---

[1]This section of the study was provided by Jonathan Sherwood of the House Research Agency.

[2]National Governors' Association, Export Development and Foreign Investment; The Role of States and its Linkage to Federal Action, 1981, p. 22.

Foreign trade offices are most frequently staffed by personnel employed directly by state government, as is the case with Alaska. In many cases, these are regular employees of the parent agency, who are routinely rotated to their home state. However, some states contract with one or more foreign consultants to represent their state. In addition, several western states operate the Old West Commission, which has had joint trade offices in both Europe and Asia.

Foreign trade--and consequently the activities of state foreign offices--is often classified into two broad categories: (1) investment; and (2) trade. Investment, also called reverse investment or foreign investment, refers to business transactions in which foreign companies invest capital in the state, frequently by opening a manufacturing plant.

Trade, the second kind of activity, involves the exporting of goods to foreign markets. According to Marsha Clarke, with NASDA, state foreign trade office activity is fairly evenly divided between the promotion of these two functions, at least on the global scale. State offices in developed countries like Japan may place a higher priority on encouraging investment; in developing nations, state offices may place a greater priority on expanding markets, as these countries are less likely to have firms interested in developing operations in the U.S.

The trade offices of other states also collect trade intelligence for their state. However, according to Ms. Clarke, it is difficult to identify how much time is devoted to this activity, as it tends to be performed in conjunction with the office's promotional activities.

According to a 1983 study prepared for the Alaska Legislature by Dupere and Associates, once a state foreign office has made contact with a foreign firm interested in doing business with the U.S., the state's home office provides the U.S. business contact.

The Dupure report and other articles on foreign trade offices emphasize the importance of strong direction and support for state foreign offices from their parent agency. The home office must be able to identify the appropriate business contacts for foreign business interests who contact the state's foreign office, and to identify which in-state businesses expressing interest in exporting their products are serious candidates for foreign trade.

Ms. Clarke stated that the typical cost for a foreign trade office would be between $100,000 and $300,000. She noted that the upper limit generally provides for a large operation, but also cautioned that Tokyo was substantially more expensive than other locations. A 1982 survey indicated that the number of employees per office varied from 1 to 8, with 2 or 3 employees being the most common

staffing pattern. The largest number of employees in the Japanese offices surveyed was six.

Asian Offices.

According to Marsha Clarke, her most recent information shows that 19 states now have foreign trade offices in Japan.[3] In addition, California, which does not have a state office there, has several port authorities, including Long Beach and Oakland, which operate offices in Japan. Most of these offices are regional in scope; however, some of the offices are intended to deal strictly with Japan. States which currently have offices in Japan are listed below:

Alabama	Indiana	Michigan	Pennsylvania
Alaska	Kentucky	Missouri	South Carolina
Florida	Louisiana	New York	Virginia
Georgia	Maryland	North Carolina	Washington
Illinois	Massachussettes	Ohio	

In addition, Illinois has an office in Hong Kong and Missori has an agriculture representative in Singapore. None of the individuals we contactaed was aware of any state with an office in Korea.[4]

According to Ms. Clarke, state foreign offices in Japan usually place much more emphasis on encouraging foreign investment and little emphasis on increasing exports. Ms. Clarke explained that this is a result of Japan's long-

---

[3]This compares with 14 states in 1980.

[4]We received an excerpt of a recently published book on foreign trade office activity which refers to a possible office in Korea. The excerpt does not provide detail on the status of the office; it is not clear whether an office has been opened or was merely planned.

standing trade restrictions on the importation of manufactured goods and agricultural products. Traditionally, these have made it very difficult for the U.S. businesses to export goods to Japan. While some of these restrictions have been lifted in recent years, Ms. Clarke stated that the direction of states' trade office activities in Japan have not changed significantly. The Dupere study also found that most state offices in Japan devote more time to promoting Japanese investment in the U.S. than to promote trade.

IV - KOREAN GOVERNMENT, BUSINESS AND CULTURAL PRACTICES AND PROTOCOL

A. Interrelationship.

There is a very close interrelationship between Korean governmental, business and cultural practices and protocol, the degree and extent of which is completely foreign to most Americans. This chiefly stems from the fact that modern Korean industrial society is founded on close cooperation between government and private sectors. Government agencies are responsible for establishing and implementing short and long term goals that set the tone for the private sector[1], and government agencies then openly and freely provide broad, efficent assistance to private enterprises willing and able to help pursue and fullfil the chosen goals.

The closely knit ties between government and private sectors regarding economic and industrial matters is interwoven, overlapped and, in essence, held together by unique cultural practices and rules of protocol and etiquette.

B. Basic Principles.

Like all other countries, and even specific regions within a country, in Korea there are many peculiarities and practices that have come to be recognized as proper and correct etiquette in the business community, as well as in governmental and social cicles. And although they may differ in form and vary with specific circumstances, Korean

---

[1]The economic Planning Board (EPB), an agency within the Ministry of Commerce and Industry, sets and implements the economic and commercial plans, goals and policies for the entire country.

governmental, business and cultural practices and protocol are essentially based on certain fundamental principles which, to most effectively, efficiently and profitably conduct business in Korea, must be acknowledged, learned and adhered to.

The strongest and most basic principles of proper Korean etiquette and protocol are respect, courtesy and seniority. These are universal norms, but nowhere are they more strongly ingrained and adhered to than in Korea.

Furthermore, the concept of seniority does not merely refer to age, although that certainly is a valid consideration, but also applies to rank, status and relative position, with which Koreans are intensely concerned. Thus, it is equally improper to be overly courteous to someone of lesser social status, job position and age as it is to be curt and inattentive to someone of greater seniority.

For obvious reasons, this study cannot deal with all, or even most, of the specfic practices and rules that apply to even the most basic of situations. The examples that follow, however, can serve as a general introduction and guide in this area.

C. Specific Customs.

Korean business people and government officials are very modern and westernized in their attire. They tend to dress formally and conservatively, wearing suits that are of traditional colors and muted patterns, with white shirts and subdued ties. The wearing of loud colored, leisure type

clothing and accessories is generally considered in poor taste when attending to business and governmental affairs, even if after normal business hours.

Koreans have an extremely strong work ethic that they are very proud and concious of. It is bad form, even in jest, to condone the wasting of working time and resouces. Long lunches or work breaks are frowned upon unless warranted by a special occassion or at the insistance of a higher ranking host, and it is equally frowned upon to show up too early for a business appointment, as it is considered rude and insulting to be more than a few minutes late.[2]

Normal handshakes are the accepted form of greeting. Bowing is usually reserved for greetings between Koreans themselves and westerners are not required or expected to engage in that particular custom.

The traditional Korean way of writing names is to place the family (or last) name first, followed by the first and then the middle name. This tradition is slowly changing, however, and many Koreans now use the western method of first, middle and then last name. It is proper etiquette to refer to an individual by his or her family (last) name preceded by Mr. or Mrs. It is not appropriate to use first names unless specifically requested by the individual involved.

---

[2]Actually, if one has a choice in the matter, it is better to be a few minutes late than early because this is apt to waste less of your Korean host's time.

At the first meeting with a Korean business person or government official, it is appropriate and expected to let the host intiate and lead the conversation and the meeting. First meetings are usually short and the Korean host will most often focus on non-essential matters. In-depth discussions about vital topics are normally reserved for later meetings, but even then it is not at all unusual for a Korean host to somewhat abruptly change the subject. This normally indicates that the former topic of discussion is closed for that meeting, and it is best not to insist on discussing that particular matter further.

As a general rule, Korean business people and government officials will not complete a transaction of any significance at the first meeting. The main reason for this is that they put a great deal more emphasis than Americans on establishing a personal rapport with the other party before entering into serious or final discussions and negotiations.

D. Culture and Arts.

A recent (December, 1982) publication of the Korean Ministry of Culture and Information titled Looking Ahead contains (at pages 56 and 57) the following colorful description of Korean culture and arts:

> Korean culture has a special flavor all its own, a unique blending of change with traditions stretching back some 5000 years into the mists of mystery and myth, of animistic, Buddhist, and Confucian beliefs. Korea is a kaleidoscope of sights and its unique taste can be found in the resplendent rainbows of "tanchong" that color the palaces

and temples throughout the country; the lively motions of an ageless farmers dance; the richly vibrant sounds of exotic musical instruments; the slow, subtle movements of the shoulders, hands, and neck of the court dancers; and the soft, curving roof lines floating ever so gently heavenward.

Each dynasty produced its own unique artistic forms, not to mention the world's first moveable metal printing types some 220 years before the Guttenberg invention, and the Hangul alphabet, perhaps the most scientific system of writing in general use in any langauge.

Korea's arts are colored with symbolism reflecting a people who wanted to be happy, have progeny, live long, and enjoy good luck. Even today, furniture, linens, clothes, all accessories including hairpins, outside walls, gates, chimneys, etc., are adorned with the five elements, ten symbols of longevity, four directional animals, twelve animals of the oriental zodiac and propitious adeographs; a spicy mixing of shamanistic, Taoist, and Buddhist beliefs.

Much pottery and many paintings, especially folk paintings, are rather whimsical, reflecting the artist's own sense of humor and playfulness. While academic painters tended towards almost monochromatic landscapes conveying an impression of serenity and oneness with nature, the charmingly naive and unpretentious folk paintings reflect the actual life of the people.

Ceramics, especially the blue-green Koryo celadons produced more than a thousand years ago, are by far the most famous class of the nation's art objects. The Yi Dynasty forsook the delicate and intricate to produce simple, robust forms of an unpretentious and spontaneous style. No matter which of nature's shapes are suggested. Korean potters created some of the most beautiful elongated curves ceramic history has known, curvaceous lines soaring with energy, lines that were perfected and made more approachable and warm.

So too is Korean dance warm, earthy and alive with a character all its own. Unlike other Asian dances, the dance in and of itself never tells a story but strives only to communicate a mood. Stepped by silk-clad court ladies the ancient court dances are characterized by dignity and grace. Not so the folk dances farmers improvised

during planting and harvest times, a slithering of airborne paper streamers from the crown of gyrating headdress, while acrobatics mounting in a crescendo of frenzy, a fleeting flash of straw sandals, shuffling in the dust, competing with complex cross rythms of drum, gong and bugle.

Music, especially court music, is both nasal and shrill; slow long-held notes dissolving into lacy arabesques punctuated by the single thump of a drum, one pungent stroke of gong, chime or cymbal. Outlining vast arching melodies, the tones sound strangely piquant.

Musical events, especially folk ones, are often punctuated by boisterous cries of delight and encouragement from the audience as traditionally, the enjoyment of these art forms is in the participation and not merely the watching.

E. Sense of National Identity.

Modern Koreans are extremely conscious of and concerned with projecting, maintaining, enhancing and getting outsiders to acknowledge and accept their unique national identity. To say that Koreans are not pleased or even that they are insulted when associated or sterotyped or analogized with other oriental cultures, especially the Japanese, is to vastly understate the matter. At the very least, such behavior is considered a serious breach of etiquette and to most Koreans signifies a disrespectful and insulting ignorance of oriental cultures and history.

This is a very important point for any American who desires to have smooth, successful and profitable dealings with Korea to constantly keep in mind. Its significance cannot be overly emphasized.

For example, in the course of conducting this study in Korea, it was extremely difficult to even raise, much less

seriously discuss, the option of extending the operation of the ASAO office in Tokyo as a viable alternative to establishing a seperate trade office in Korea. That particular notion of having to deal with outsiders through the Japanese carries a strong and extremely negative stigma among Korean business people and government officials who unanimously share in the goal of reversing the virtually complete economic control and exploitation that Japanese trading companies exerted for so many years over the Koreans.[3]

---

[3]This strong sense of national identity and feverish need to disassociate themselves from Japanese dominance underlies the Koreans' notorious aggressiveness and competitiveness in the area of international trade, which in turn provides the basis for their dramatic successes in that area.

V - KOREAN INTERESTS IN ALASKA

A. Korean Interests Generally.

Because of Korea's lack of natural resouces, it must secure stable and longterm supply sources elsewhere. Thus, Alaska's natural resources are considered a prime source of acquisition by the Koreans, who are also interested in marketing their goods and services in Alaska. This study will highlight the most serious areas of interest the Koreans have in Alaska, which are as follows:

1. Potential Acquisitions in Alaska:
   a. Coal and hardrock minerals;
   b. Oil and petroleum products;
   c. Liquified natural gas (LNG);
   d. Fisheries;
   e. Timber resources;
   f. Agriculture.

2. Potential goods and services to be provided to Alaska:

   a. Heavy industrial machinery, equipment, tools and materials;
   b. Construction and infrastructure development projects;
   c. Joint ventures in various areas, ecspecially those involving natural resource development;
   d. Airline passenger and cargo services.

B. Governmental Policy.

The Korean Ministry of Energy and Resources strongly encourages private businesses to get involved in the development and purchase of natural resources from foreign countries with which, as a part of the general plan, trade and commerce can also be implemented or increased. To the Koreans, the key to resource development abroad lies in securing a stable supply of energy sources on a long term

basis. Since this requires a great deal of capital, it is the recommendation of the Korean Ministry of Energy and Resources that energy exploring and consuming firms engage in natural resource development in foreign countries by way of consortiums and joint ventures.

C. Coal and Strategic Minerals.

Because of the oil shocks of 1972 and 1979, Korea has undertaken an aggresive program of increasing the uses of coal and nuclear power to supply its energy needs. Furthermore, the most recent trend has been to rely more heavily on coal than nuclear power, which has fallen into disfavor due to the escalating costs of nuclear power plant construction and the increased safety regulations and standards that must be established and implemented.[1]

In 1980, a Korean corporation, the Sun Eel Shipping Company, Ltd., signed a long term (10 years) contract to purchase 7 million metric tons of coal from the Usibelli Coal Mine near Healy. In 1983, Sun Eel and another Korean company, the Korean Electric Power Coporation, further agreed to export 800,000 metric tons of coal annually from the Usibelli Coal Mine through the coal loading facilities that are presently being constructed in Seward.

---

[1]This information was obtained primarily from interviews and discussions with various Korean Government officials, including: the director of the American Division of the Foreign Ministry, J.J. Ryung, and his subdorinate in charge of the North American sector, S.H. Kim; and the director of the American Trade Division of the Ministry of Commerce and Industry, S.H. Chang.

The Koreans are also involved in another coal development project through a joint venture between a consortium of Korean coporations called the Korea Alaska Development Coporation (KADCO) and Chugach Natives Corporation, Inc., who are the owners of the coal field being developed near Cordova. This Alaskan-Korean joint venture is named the Bering River Development Corporation and it has very promising prospects because the coal to be extracted is of higher quality, and value, than that from the Usibelli Coal Mine. However, the joint venture faces and has been dealing with a major problem in that the coal fields are located approximately 30 miles from the ocean and transportation and loading facilities need to be constructed.

D. Oil and Petroleum Products.

Even though, as previously mentioned, Korea is gearing up to decrease her oil dependancy, it will be some time before her oil imports are substantially reduced. Korea currently purchases a little over $6 billion worth of oil annually from the Middle East, which is a highly unstable and distant market. Thus, in terms of stability and logistics, it is very clear that Alaska would be a much better source of crude oil for the Koreans, who have consistently expressed an interest in purchasing, and becoming involved in the development of, Alaskan crude, and who are also very interested in being allowed to explore that possibility if and when the federal export restrictions are removed.

If a gas line is constructed, and if exsisting federal restrictions are removed, Korea would also be an ideal potential consumer of Alaskan LNG. Of course, the level of LNG, as well as crude oil, imports by Korea depends on a host of other factors, especially price. But the interest is certainly there,[2] and the Koreans' entry as a competitor among potential buyers and investors would be of obvious benefit to Alaska.

As to other petroleum products, several Korean coporations are presently considering importing various items such as unleaded gasoline, reformate and residual fuel oil.[3]

In conclusion, although Alaska-Korean trade in oil and petroleum products has not yet gotten off the ground, it clearly appears that Korea is a potentially good customer who is willing and able to participate in the infrastructure development that is necessary to market those resources.

E. Fisheries.

---

[2]Although there appears to be some question about Korea's potential as an Alaskan crude oil and LNG purchaser due to its long term commitments to obtain those resources from other countries, virtually all of the coporate and government officials contacted in Korea expressed a keen interest in these areas. In this regard, see the notes of interviews conducted in Korea Attachment D hereto; and also see the January 10, 1984 letter from Samsung President J.H. Kyong, in Attachment C hereto, which states: "we have expressed our keen interests in the Alaskan LNG and petrochemical project when Mr. Hickel visited seoul (sic.) last December. To facilitate our efforts, Samsung is opening an Anchorage offices (sic.), beginning this January."

[3]This information was obtained from two officials of the Alaska-Korea Business Council (AKBC), Loren Lounsbury and Robert Breeze.

The export of Alaskan seafood products to Korea has been one of the largest items of trade in the past several years.

As far as fisheries and fish processing activities are concerned, until very recently foreign entities, including Korea, conducted entirely self-sufficent operations. The more recent trend, however, has been the formation of joint ventures between American trawlers and foreign processers. Korea has been very active in this trend and there is every indication that it will continue to do so and that the number of Korean-Alaskan joint ventures will rapidly increase.[4]

F. Agriculture.

Although in the past there has not been much agricultural trade between Alaska and Korea, there is an existing beef exporting operation near Homer and two large Korean firms have initiated a project in the Kenai area that entails the leasing of University of Alaska land for the raising and slaughter of cattle to be shipped to Korea.[5]

Some work is presently being done in the area of growing and exporting grain products from the Mat-Su Valley to Korea and other Pacific Rim countries. It appears that the success of this project largely depends on experimental research being

---

[4]Thus, according to a memorandum dated January 17, 1984, from House Research agency analyst Jonathan Sherwood to Speaker Hayes' office, 8 of the 17 joint ventures approved by the North Pacific Fisheries Management Council in December, 1983, involved Korean firms.

[5]This information was also obtained from AKBC members Lounsbury and Breeze.

done at and in conjunction with the University of Alaska on the development of new types of grains capable of being produced in large quantities here in Alaska. Due to its high demand and needs, Korea is an ideal potential market for the export of these grain products, and if successful the venture promises to be very benficial, in terms of jobs and revenue, to Alaska.[6]

G. Korean Investments in and Goods/Services Provided to Alaska.

As previously discussed, Korean investment in Alaska presently consists of joint ventures in coal, timber, fisheries and the raising of reindeer.[7] The current level of this investment is significant, rapidly increasing and, as further discussed below, there is very strong Korean interest in its continued expansion.[8]

Korean firms have provided and are providing a large and increasing amount of heavy industrial products, materials and services to Alaska. Although there are no available

---

[6] This information was obtained from interviews with Hyoung "Henry" Kim, the president of Topex Industries, Inc., an Alaskan coporation with offices in Anchorage that is involved in the project discussed.

[7] The Nana Regional Native Corporation in Kotzebue is engaged in a Korean joint venture that involves raising and maintaining a herd of 6,000 reindeers, with the horns of slaughtered animals being exported to Korea and the meat being consumed by local Eskimos.

[8] In addition to the other specific joint ventures and projects mentioned in this report, AKBC member Robert Breeze recently indicated that a large Korean company, the Korea Ship Building and Engineering Coporation, has made serious and detailed proposals to build a modern ship repair and building facility at Seward.

figures as to the dollar level of these transactions, they include the following:

1. An $118.4 million saltwater treatment plant that the Korean firm, Daewoo, constructed and delivered to ARCO on the North Slope in 1983;
2. The Hyundai Corporation, the largest in Korea, provided the structural steel for the new Sohio Building in Anchorage; and
3. Hyundai is also erecting the transmission towers for a section of the Anchorage-Fairbanks power intertie.

The Koreans are especially interested in expanding the goods and services that have been and are being provided to Alaska. In terms of their potential to do so, it should be noted that in the last decade Korea has made a dramatic emergence in the world community as a heavily industrialized nation that does not need to take a back seat to anyone, with specific areas of expertise in the manufacturing of steel products; pipe; plant construction; heavy equipment; petrochemical industries; ship building and repairing; and general construction services.[9]

Because the Koreans are highly modernized and technologically sophisticated, and because they have a highly skilled and low priced labor force, they are very competetive in all the above areas, which has been and will be of substantial benefit to Alaska as Korean involvement in

---

[9]This information was obtained from interviews with officials of the largest Korean Corporations, or conglomerates, whose annual sales figures and diversity of interest, expertise and projects are extremely impressive, as indicated in the brochures found in Attachment "C" hereto.

construction and infrastructure development projects continues and expands.

H. Potential for Future Trad .

Most Alaskans who are involved or contemplating being involved in trade with Korea unanimously agree that there is vast potential for increased trade, with the export of Alaskan natural resources as the most promising area. Of course, the major drawbacks of inadequete infrastructure and governmental regulations are usually also focused on by both Alaskans and Koreans interested in seeing trade in this area expand.

In general, Koreans view Alaska as an ideal trading partner because of its wealth of natural resources; its proximity to Korea; and its political stability compared to other sources of vital natural resources.

All of the major Korean corporations and government agencies contacted as part of this study expressed a keen interest in intiatiting or expanding their trade with Alaska.

For example, Director K.S. Choo, speaking for himself and on behalf of president M.J. Chung of Hyundai Heavy Industry, the largest private business entity in Korea, stated that his group of companies is interested in the following areas of trade with Alaska: steel; pipe; coal; timber; heavy industrical products; construction machinery and materials; and red meat.[10]

---

[10]See notes on 1/11/84 interview with Mr. Choo in Attachment B hereto.

Mr. S.N. Sonh, the manager of natural resources of the Daewood Corporation, Korea's second largest private business enity, stated that his companies are interested in pre-cast cement; rolling stocks; LNG; coal; oil; ship building and repair; and textiles.[11]

Mr. J.H. Kyong, the president of Samsung Corporation, the third largest private business enity in Korea with annual gross revenues of approximately $2.5 billion, stated that his group of companies are interested in coal; timber; LNG; steel; heavy industrial products; oil and petroleum products; steel structures; pipe; heavy construction machinery, vehicles and tools; and joint ventures with Alaskan native corporations and other Alaskan entities, especially those involved in natural resource development.[12]

Mr. J.J. Kim, the executive vice-president of Kukje-ICC Corporation, the fourth largest private business entity in Korea with annual gross revenues of approximately $2.2 billion, stated that his group of companies are interested in LNG; coal; timber; oil and petroleum products; heavy component parts; heavy equipment; and joint ventures with Alaskan native coporations and other Alaskan entities, especially those involved in natural resource development.[13]

---

[11] See notes on 1/13/84 interview with Mr. Sonh in Attachment B hereto.

[12] See notes on 1/9/84 interview with Mr. Kyong in Attachment B hereto.

[13] See notes on 1/9/84 interview with Mr. Kim in AttachmentB hereto.

The contacts undertaken for this study in Alaska and Korea leave little doubt that the potential for future trade is extremely promising. Indeed, given the strong interest and enthusiasm, and considering the mutually compatable needs and desires, on both sides, it appears to be inevitable that Alaska-Korean trade will continue and will expand. And it seems quite possible that this expansion will take place at an unprecedented rate, with obvious and potentially substantial benefits to both trading partners. Furthermore, it is also obvious that the Alaska state government can be of great assistance in fostering and enhancing this fruitful climate. Thus, the establishment and maintenance of an Alaskan trade office in Korea which can provide, as part of its functions, information about business and investment opportunities to both groups, and can serve as a contact point for Alaskan and Korean businesses, seems to be a logical and appropriate step in the right direction at this time.[14]

---

[14]The major drawbacks to the rapid expansion of Alaska-Korea trade, as expressed by business and government leaders on both sides, are Alaska's lack of adequate infrastructure for resouce development; the lack of sophistication and expertise in international trade among Alaskan businesses; the lack of consistant and positive governmental policies regarding resource development; and state and federal governmental restrictions and requirements. Of course, the Alaska state government can also be of major assistance in mitigating or removing some of these obstacles.

VI. - POTENTIAL ECONOMIC BENEFITS TO ALASKA

A. Generally.

As a general proposition, it is obvious that Alaska will reap economic benefits from increased trade with Korea, and from increased Korean investments in the state.

B. Level and Frequency.

As to the level and frequency of those benefits, there is inadequate, up to date information available on which to base any detailed estimates, other than to say that, as reflected in other sections of this report, there are various factors indicating that they are apt to be substantial, frequent and capable of rapidly increasing. Those factors include but are not limited to the following:

1. The vast natural resources that Alaska possesses;
2. The great and increasing needs that Korea has for those resources;
3. Alaska's acute need to develop infrastructure to successfully and profitably market its resources;
4. Korea's willingness and ability to invest and participate in the development of Alaskan infrastructure;
5. Korea's rapidly growing capability and expertise in providing high quality goods and services at highly competitive prices; and
6. Korea's commercial and industrial aggressiveness and the healthy competitive affect this will have among potential providers of goods and services to Alaska, and among potential purchasers of Alaska's exports.

C. Nature and Extent.

As to the nature and extent of the benefits, the immediate benefit will be a broadening of Alaska's economic base stemming from the steady, thoughtful development of its

natural resources.[1] This should result in more jobs for Alaskans and a broader tax base as the infracture needed to market the resources is expanded and refined.

Just as success breeds success, a strong economy will breed a stronger economic base to sustain and benefit future generations of Alaskans. The long-term view shows that the potential for development of Alaska's resources, and the infrastructure necessary to market them, has barely begun, and that the process now under way can be controlled and guided in the proper direction, so as to make the Alaskan economy steadier and safer in the coming years.

For example, the imminent purchase of the Alaska Railroad will need to be coupled with private investments in further infrastructure development before the state can reap the maximum benefits. And the continuing expansion of the petroleum industry also needs to be tied to further infrastructure development so as to assure that the diversification necessary to stabilize and thoughtfully expand the Alaskan economy will occur.

The Korean business and government officials interviewed for this study understand and are more then willing to participate in fulfilling these Alaskan goals. And they openly acknowledge that it is in their best, long range interest to do so, as part of the price they are willing and

---

[1] Of course, it is the Alaska legislature's function to make sure that the development of the state's natural resources takes place in a steady and thoughtful manner.

able to pay to obtain the vital natural resources so desperately needed by their country.

VII. - FUNCTIONS, OBJECTIVES AND EFFECTIVENESS OF ASAO

A. ASAO's Primary Area of Service.

The Alaskan State Asian Office (ASAO) located in Tokyo, Japan, has an interesting and intriguing history dating back to its founding in 1965 that was detailed in a recent study[1] and clearly indicates that despite its recently changed name, the ASAO has been and is primarily, if not solely, involved in providing contacts and services with and regarding Japan, rather than any other Asian country. This conclusion is further supported by an examination of pertinent documents and an interview conducted for this study by House Research Agency analyst Jonathan Sherwood with Vince O'Reilly, Deputy Commissioner of Commerce and Economic Development,[2] which indicates that the ASAO has devoted very little, if any, time or resources to Korea or the two other countries--Taiwan and China--that it is supposed to service.[3]

---

[1] Alaskan State Asian Office Study, January, 1982, submitted by Agritrade International, Inc. to the Department of Commerce and Economic Development, at pages 10-14.

[2] See January 17, 1984, memorandum from Mr. Sherwood to House Speaker Hayes' office, at pages 2-3.

[3] For examples, Mr. O'Reilly stated that the contacts and activities of the ASAO with Asian countries other than Japan is so negligible that virtually no records thereof are kept and no estimates can be made; and the 2 ASAO monthly reports detailing activities in September and October of 1983, which are in Attachment "D" hereto, show that the only contact with Korea during the 2 month period involved was a trip on October 12, 1983, to attend a funeral of the Korean government officials killed in the Rangoon bombing.

B. FUNCTIONS AND OBJECTIVES.

As mandated in the appropriate executive budget documents, the primary purposes and functions of the ASAO are to:

1. Provide the Alaska business community with pertient intelligence on market prices and conditions, product utilization, etc.;
2. Locate and establish business contacts which are interested in Alaskan products and investments;
3. Act as a catalyst to assist Alaska and foreign business persons to meet and conduct business;
4. Establish foreign government contacts which are important to Alaska, and introduce them to the state's economic trade and development policies; and
5. Establish a favorable image of Alaska in foreign countries.[4]

As previously mentioned, it is quite clear that the ASAO is only exercising the functions and fulfilling the objectives listed above in regard to Japan. For example, as to the first function and objective, it is obvious that the ASAO cannot provide "pertinent intelligence on market prices and conditions" in Korea if its only contacts with that country in a 2 month period is a single trip there to attend a funeral.[5]

C. Effectiveness.

It is difficult, if not impossible, to evaluate the effectiveness of the ASAO without some measurable and meaningfull criteria. However, during its years of operation Alaskan exports to Japan have risen dramatically and it is predicted that they will reach the $1 billion mark

---

4See footnote 2, above, and accompanying text.
5See footnote 3, above, and accompanying text.

in the next year or two'[6] and this is in itself an indication of the ASAO's strong effectiveness.

However, once again it must be pointed out that the ASAO's effectiveness is only in relation to Alaskan trade with Japan. Certainly, based on the previously mentioned information, it would be unwarranted to attribute the dramatic recent rise in Alaskan exports to Korea[7] to the ASAO.

6A U.S. Department of Commerce, Division of International Trade, study listing the level of Alaska exports to Asian countries through November, 1982, indicated that in 1981 the total exports to Japan were approximately $934 million. This decreased in 1982 to approximately $888 million, but the director of the U.S. Department of Commerce's Anchorage office, Richard Lenahan, concurs with the $1 billion in the next year or two prediction.

[4]The same study mentioned in footnote 6, above, shows that exports to Korea rose from approximately $20 million in 1981 to around $95 million through November of 1982.

VIII. - EXPANDING THE ASAO TO SERVICE KOREA

A. Only Protocol Functions and Objectives Being Provided Re Korea.

As pointed out in the preivous section of this report, the ASAO is not, in any meaningful sense, providing any services in regard to Korea.

The ASAO is not, in any meaningful sense, providing the Alaska business community with pertinent intelligence on market prices and conditions, product utilization, etc., in regard to Korea. It is not and it cannot perform this function because to do so would require a presence or representation in Korea, and that has not occured and is not occuring.

The ASAO is not and cannot locate and establish business contacts in Korea which are interested in Alaska products and investments because to do so would require a presence or representation in that country, and that has not occured and is not occuring.

The ASAO is not and cannot act as a catalyst to assist Alaska and Korea business persons to meet and conduct business because to do so would require a presence or representation in Korea, and that has not occured and is not occuring.

However, the ASAO is apparently making some effort, and planning to increase those efforts,[1] to establish government

---

[1]This information was obtained by House Research Agency anaylist Jonathan Sherwood through interviews with Alaska state officials and review of applicable documents for this study.

contacts which are important to Alaska, and introduce them to the state's economic trade and developmental policies, and to establish a favorable image of Alaska in Korea.

It should be noted that the latter activities being performed and contemplated by the ASAO in regard to Korea are in the nature of a liason or protocol function and objective.

B. Feasability.

The question of whether it is feasible for the ASAO to expand its present or contemplated functions and objectives so as to perform and fulfill them in regard to Korea, has already been answered in the negative, for obvious reasons. The gathering of pertinent, or useable, intelligence on market prices, conditions, product utilization, etc., in Korea is a function that cannot conceivably be performed without being present or represented in that country. And the same is true for locating and establishing business contacts and acting as a catalyst for business transactions. These are activities that require virtually day to day attention and cannot be performed in any meaningful sense from another country.

C. Other Considerations.

Thus, the only way to expand the ASAO to service Korea is to limit its activities in that country to those it is already performing or contemplating, which is mainly a laison or protocol function. Increasing the contacts the ASAO has with Korea will not substantially alter the nature of that

function unless those contacts are increased to the point where it becomes pratical and necessary to have a representative permanately stationed in Korea, and to establish a permanant ASAO branch office there.

However, there are reasons that such an alternative to establishing a seperate Alaskan trade office in Korea is ill-advised and should be rejected.

As previously mentioned and discussed in this report Koreans have a strong sense of national identity and they are very sensitive about being rated second to Japan.[2] Indeed, all the Korean business and government officials interviewed for this study pointed this out, and some of them expressly stated that they would consider the expansion of the ASAO in Tokyo to service Korea as relegating Korea to the postion of being a second class citizen.[3]

Other Koreans interviewed for this study had more practical objections. Thus, Mr. Rhim, the executive director of the Korea-U.S. Economic Council (KUSEC) pointed out that to be effective, an Alaskan representative in Korea must be knowledgeable of Korean business protocol and must have an understanding of Korean business practices and their ramnifications.[4] Mr. Kyong, the president of Samsung Corporation, stated that a Tokyo laison office would not be efficent because of the amount of time lost due to travel,

---

[2]See section IV, subsection E, above.

[3]See notes on 1/11/84 interview with Mr. Choo, the director of the Hyndai Corportion, in Attachment B hereto.

[4]See notes of 1/31/84 interview with Mr. Rhim in Attachment B hereto.

reporting and follow up. He also pointed out that his company had experienced these very difficulties with their own corporate branch office structure in other parts of the world.[5]

---

[5]See notes on 1/9/84 interview with Mr. Kyong in Attachment B hereto.

IX - PROS AND CONS OF ESTABLISHING A SEPERATE ALASKA TRADE OFFICE IN KOREA

A. The Pros Among Koreans.

Virtually all of the Korean business people and government officials interviewed as part of this study agreed that the establishment of a seperate Alaska trade office in Korea would not only be of great potential benefit to both Koreans and Alaskans, but would also constitute a positive and much needed step in the direction of fostering better trade relations that might have immediate, practical results.

The Koreans were sophisticated and realistic enough to understand that although Alaska is a wealthy state in many respects, like most other governmental bodies throughout the world, it also has limitations on the amount of public funds it can devote to business promotional activities such as the establishment, staffing and operation of a foreign trade office. Nevertheless, virtually all of them seemed to have a very difficult time understanding why the Alaska state government doesn't already recognize that the tremendous potential economic benefits to be derived from fostering trade relations with Korea at this time far outweigh the

costs of establishing, staffing and operating a modest trade office in their country.[1]

Koreans are very aware and proud of the fact that their country is presently the United States' 12th largest trading partner; that Korea is one of the largest importers of U.S. grain products and livestock; and that Korea has incurred and continues to incur a substantial trade deficit in its dealings with the United States.

Koreans are also very keenly aware of the rapid, unprecedented increase in trade with Alaska during the past few years, and they generally view the opening of an Alaskan trade office in Korea as an ideal way to encourage Korean businesses, who can usually obtain extensive cooperation and assistance from the Korean government, to actively get involved in trade activities with Alaska.

As indicated in the notes of the interviews conducted in Korea contained in Attachment D hereto, virtually all the Korean business and government leaders contacted felt that an Alaskan trade office in their country could fulfill the vital and necessary functions of providing detailed information about Alaska and being a point of contact for Korean and Alaskan business entities. Furthermore, there

---

[1] Attachment "C" hereto contains letters from three of the major Korean corporations contacted whose expression of support for the proposed trade office are representative of all the other business and government leaders interviewed. Furthermore, one of those letters, from Jung Ju Kim, Executive Vice President of the Kukje - ICC Corporation, expresses the widespread desire and need for detailed information about Alaska, which is a perceived function of an Alaskan trade office in Korea.

was widespread interest in being provided access to information about government regulations affecting trade, and other technical matters necessary to engage in or expand business activities in and with Alaska.

B. The Pros Among Alaskans.

The view among Alaskan business persons and officials interviewed was equally one-sided in favor of establishing a seperate trade office in Korea, and virtually all the Alaskans who are presently involved or contemplate being involved in trade with Korea emphasize the strong need for such a source of detailed information about Korean groups, opportunities, procedures and other factors vital to efficient and profitable trade with that country.

C. The Cons.

From the Korean side there were not any objections to the proposed Alaskan trade office, and from the Alaskan side the only negative point to the establishment, staffing and operation of a seperate trade office in Korea was its cost. In this regard, although it can be said that setting up an office the size of the ASAO in Tokyo is prohibitive and perhaps unjustifiable at this time, virtually everyone will agree that a smaller office in Korea, with a small staff, does not seem excessive in light of the substantial potential benefits to be derived by fostering trade with Korea at the present time.

X - CONCLUSIONS AND RECOMMENDATIONS

A. Conclusions.

Based on the information obtained in this study, the conclusion that is not only feasible but appropriate and even necessary to establish a seperate Alaskan trade office in Korea is inescapable.

In just the past few years, the level of Alaskan exports to Korea has dramatically increased[1] and there has been an increase in Korean investment in Alaska, with every indication that these trends will continue and rapidly expand in the future, thus providing substantial potential economic benefits to Alaska.[2]

All these things, and more, indicate that the state should endeavor to realize these potential economic benefits, and that the establishment of a seperate trade office in Korea that can fully perform and fulfill all the functions and objectives of the ASAO in Tokyo will be a significant, positive step in that direction. In this regard, the option of expanding the ASAO to adequately service Korea is unfeasible and, insofar as the Koreans themselves are concerned, unthinkable, demeaning and thus inherently contradictory to the basic objective of improving Alaska's image in that country.

---

[1] See section V, subsection F, and section VII, subsection C, footnote 7, above. The latter refers to a study showing that the level of Alaskan exports to Korea rose from $20 million in 1981 to $95 million in 1982..

[2] See section VI, subsection B, above, for a list of factors responsible for this trend.

B. Recommendations.

In addition to recommending that a seperate trade office in Korea be established as soon as possible, the following recommendations are also offered:

1. Location: as suggested and explained by the executive director of KUSEC[3] and the vice-president of the US Chamber of Commerce in Korea,[4] the Alaskan trade office should be located in the central business district of Seoul, close to the United Government Building and the U.S. Embassy, not only because of easier access to government and business headquarters, but also because such a location is perceived by Koreans as a status symbol of which they are extremelly conscious.[5]

2. Staffing: the Alaskan trade office should have, as a minimum staff, an executive director, a deputy director and a secretary. It is important to have a deputy director because there should always be someone in the office of sufficient rank to host important visitors while the executive director is attending important functions.

3. Qualifications: either the executive or deputy director must be fluent in Korean and be able to read and write the language. In general, these individuals should be business oriented professionals, preferably with experience in Korean-Alaskan trade, rather than dignitary types. This is in keeping with the tenor of the office, which should be oriented more toward the business functions than

---

3See notes on 1/10/84 interview with Mr. Rhim in Attachment D hereto.
4See notes on 1/10/84 interview with Brigadier General (retired) Frederick C. Krause in Attachment D hereto.
5See section IV, subsection B, above, where the basic principles of seniority, courtesy and respect and discussed, pursuant to which, having an office in an inferior location would be a breach of Korean business etiquette.

the laison or protocol functions.[6]

4. Duties and Goals: The Alaskan trade office should have the same basic functions and objectives that are presently mandated for the ASAO in Tokyo, which are to:

   a. Provide the Alaska business community with pertinent intelligence on Korean market prices, conditions, product utilization and related matters;

   b. Locate and establish Korean business contacts which are interested in Alaska products and investments;

   c. Act as a catalyst to assist Alaskan and Korean business persons to meet and conduct business;

   d. Establish Korean government contacts which are important to Alaska, and introduce them to the State's economic trade and development policies; and

   e. Establish a favorable image of Alaska in Korea.

5. Proposed Annual Budget.[7]

Executive Director	$ 60,000.
Deputy Director	40,000.
Secretary	10,000.
Office Rent	24,000.
Office Equipment	10,000.
Office Expenses	12,000.
Office Supplies	1,200.
Printing	1,200.
Entertainment	12,000.
Misc. Costs (licenses, etc.)	10,000.
Total	$180,400.

---

[6] As previously discussed in section VI, subsection B, above, this is in recognition of and in compliance with the strong Korean work ethic, pursuant to which the appointment of dignitary-type individuals with no prior experience in or detailed knowledge of Korean-Alaskan trade would be viewed as inefficent and unwise. This is not to say, however, that the protocol or laison function and objective should be ignored.

[7] Detailed estimated costs of office space, housing, transportation, schooling and other expenses were provided by the vice president of the U.S. Chamber of Commerce in Korea. See notes on 1/10/84 interview with Brigadier General (retired) Frederick C. Krause in Attachment B hereto.

6. Placement.[8]
The Alaskan trade office in Korea should be placed under the jurisdiction of the Department of Commerce and Economic Development, where the ASAO in Tokyo is presently placed. This is consistant with the practice followed by virtually all states that have foreign trade offices.[9]

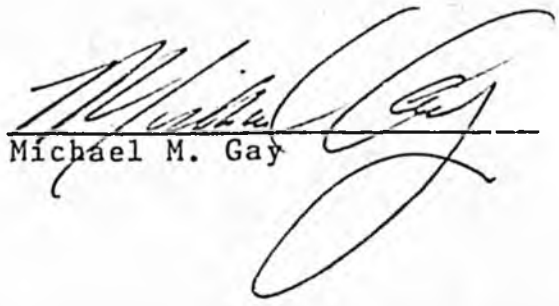
---

[8] Detailed estimated cost of office space, housing, transportation, schooling and other expenses were provided by the vice president of the U.S. Chamber of Commerce in Korea. See notes no 1/10/84 interview with Brigadier General (retired) Fredrick C. Krause in Attachment B hereto.

[9] See section III, above, containing the following statement: "In almost all cases, the foreign trade offices are associated with their state's economic development agency."

SUBMITTAL

This report is being respectfully submitted on the 14th day of February, 1984, to Alaska House of Representatives Speaker Joe Hayes by



Michael M. Gay

Mr. Joe L. Hayes
Speaker of the House of Representatives.
Alaska State Legislature

Dear Sir,

It is an honor for us to express our sincere gratitude to you for Alaska State's intention to open a trade office in Seoul. We firmly believe this planned office will do much to increase trade and business relations between Alaska and Korea.

We, Kolon International Corp., very much welcome your proposal, and as an importer-exporter and investor, will be foremost to use this plannned-office in the future. And we sincerely hope that we may be able to offer you any assistance in the establishment and functioning of this office.

We hope that sometime in the near future your plan will include a trip to Korea and at that time you will offer us the opportunity of receiving you at our main offices.

We send you our best regards and intentions both to you and entire state of Alaska.

Sincerely Yours,

KOLON INTERNATIONAL CORP.

Mr. Joe L. Hayes
Speaker of The House
Pouch V
State Capital
Juneau, Alaska 99811

Dear Mr. Hayes :

It is my great pleasure to take this opportunity to give our whole-hearted welcome and support to your initiating a feasibility study of opening a trade office in Seoul.

Samsung Co., Ltd. is already participating in the Bering coal field development project through our KADCO consortium since 1981 and now we are also studying timber development project with Seulaska corp.

Moreover, we have expressed our keen interests in the Alaskan LNG and petrochemical project when Mr. Hickel visited seoul last December. To facilitate our efforts, Samsung is opening an Anchorage offices, beginning this January.

If your trade office would be established in seoul, reciprocating our Korean efforts as soon as possible, we are sure a bilateral trade between Alaska and Korea can be tangibly activated. Economic cooperation, especially in the fields of natural resources, agriculture, construction and plants for Alaska based industry etc., would be something to watch with great expectations.

We hope your wise vision would bring success and good results.

Sincerely,

Joo Hyon Kyong
President
Samsung Co., Ltd.

His Excellency
Mr. Joe L. Hayes
Speaker of the House
Alaska ~~State Legislature~~

Your Excellency :

Few days ago, I had an opportunity of meeting Mr. Michael M. Gay who was introduced to me by Mr. Pio Y. Park. At this meeting we discussed many interesting topics regarding the Korea-Alaska business potentials and possibility of establishing a Alaskan office here in Korea.

As I am in the position of developing oversea businesses within our corporation, I am keenly aware of the fact that overall informations about the state of Alaska or lack of them may influence significant future business decisions. Most of the Korean business men, including myself, have very romatic notions about the Alaska but see few business potentialities. To be more specific, we do not know the details of the natives and Alaskan State, the commercial laws, the labor relationships and other federal laws that may govern the Korean side involvements.

By establishing the Alaskan office in Korea will solve and clear all of these questions. What is more important in my opinion is that it will create both Alaska and Korean exposures that are both benefitial to each other.

In our judgement, the timing is right and hope that you will set up such an office in Korea.

Very truly yours,

Jung Ju Kim
Executive Vice President
Kukje-ICC Corporation

State Foreign Trade Offices

WESTERN CONFERENCE
THE COUNCIL OF STATE GOVERNMENTS

720 SACRAMENTO STREET, 3rd FLOOR SAN FRANCISCO, CALIFORNIA 94108 (415) 986-3760

December 19, 1983

John Sherwood
Alaska House Research Agency
Pouch Y
Juneau, AK 99811

Dear John:

Enclosed are the materials I found on states' foreign trade promotion offices.

Enclosure 1 is from a publication that the Council of State Governments (CSG) did earlier this year, Economic Development: A Survey of State Activities. The information from the study was gathered in a survey sent in September of 1982. Bob Reinshuttle, the contact person at CSG that I gave you, produced the finished report.

Enclosure 2 is from a report produced by the National Governors' Association in 1981. The report, Export Development and Foreign Investment: The Role of States and its Linkage to Federal Action, was developed using information NGA gathered through a survey of state officials.

Enclosure 3 is excerpted from a book written by John Kline, State Government Influence in U.S. International Economic Policy (Lexington Books, 1983). The chapter I have sent you provides more detailed background on state export promotional activities, including foreign trade offices. I recommend the entire book if you are looking for information on other aspects of state foreign-trade activities.

The National Association for State development Agencies (NASDA) did its own survey on states' export promotion activities (I gave you Marsha Clarke as a contact there). The NASDA survey is probably the most recent work in that area.

I hope all of this is helpful to you. Call me if you have any questions or if our office can provide you with further assistance.

Sincerely,

Mark Klender
Policy Analyst

MKsk/WC10a-01

CHAPTER 5

INDUSTRIAL DEVELOPMENT: ADVERTISING, MEDIA PROMOTION AND PUBLICATIONS

Comparison between state expenditures for non-tourist advertising and promotion in fiscal 1982 shows a striking contrast. Six states spent nothing, while 11 spent over $500,000. The largest expenditures for advertising and promotion were by New York ($6.95 million), Maryland ($1.2 million), and Kentucky ($1 million). Other significant expenditures were by Florida, Louisiana, Massachusetts and Pennsylvania.

In fiscal 1983 budgets, the recession was reflected in nearly every state, and there was much debate in the legislatures and executive offices as to whether promotional budgets should be increased to attract more business and industry to the state, or reduced as part of an overall budget reduction plan. Eight states chose the latter by reducing expenditures (Arizona, Florida, Georgia, Hawaii, Kentucky, Mississippi, Montana, and Wisconsin). Most states, however, decided that a greater commitment should be made to promote their state as a good place to do business. As a result, five states will spend above a million dollars on that activity: New York ($9.38 million requested), Michigan ($1.5 million), Maryland ($1.3 million), Massachusetts ($1.05 million), and New Mexico ($1.033 million).

Of the states whose budgets have received final approval, the largest percentage increases will take place in Illinois, Michigan, Oregon, Tennessee, Utah, Vermont, Washington and West Virginia. It is interesting to note that many of these states have suffered the most severe budgetary and economic difficulties during the past few years.

Caution should be used in making direct comparisons between state budgetary figures. States which spend very different dollar amounts for advertising and promotion may nevertheless be spending comparable percentages of their total budgets for that purpose, and in a few cases a special promotional effort may have swelled the promotion budget out of proportion to past expenditures.

Of the 45 states responding to this question, 24 indicated that the amount allocated for promotion and advertising is determined exclusively by the legislature, while 19 said expenditures are determined by administrative decision. In Nevada and Virginia, the decision is made by both legislative and administrative action. (See Table 13.)

Advertising Media

Forty-four states indicated that they advertise through one or more of the following media: newspapers, magazines, radio, television, billboards and direct periodicals. California, Minnesota and New Hampshire do not advertise but produce their own publication. Colorado does not budget for advertising and promotion. (See Table 14.)

Field Representatives

Field representatives cover two basic areas: in-state, to provide services to local industry, communities and development groups; and out-of-state, to make contact with industrial prospects, provide them with information on locations in the state, and render location assistance to prospects once they move into the state. Overall, field representatives provide information, technical and coordinating services.

Twenty-four states employ in-state field representatives. Kansas has such a proposal under consideration, and Alabama uses regular line staff to meet these responsibilities. Eight states use field representatives for work outside the state, and 19 use field representatives outside the United States.

Seven states reported having information centers located outside their own jurisdiction. The two most popular locations are New York City and Washington, D.C. Centers there primarily provide industrial development and trade facility information to interested persons.

Foreign Offices to Promote Industrial Development and Trade

Twenty-three states reported having at least one foreign office engaged in promoting state products, providing information, and assisting foreign corporations who may be interested in locating a plant within their state. Most states have their offices in Japan, Belgium and West Germany; however, other locations include England, China, Canada, Mexico, Brazil, Switzerland, France and The Netherlands. Most foreign offices focus on a region rather than merely concentrating their efforts on the country in which they are located. The exceptions are Michigan, whose office in Tokyo works only with Japanese repre-

Canada. Virginia employs the largest staff in its foreign offices (six in Japan and eight in Belgium). The average number of staff per foreign office is three; however, larger staffs are commonly placed in European offices.

Within the past five years, 10 states have expanded their foreign operations (Alabama, Florida, Georgia, Illinois, Maryland, Missouri, Nebraska, New York, North Carolina, Pennsylvania and Virginia), while two states have reduced their visibility in other parts of the world (Louisiana and Washington). Ohio recently shifted its West Germany office to Belgium. Three states (Maryland, Missouri and Ohio) plan to expand their foreign operations in 1983, and Illinois opened an office in Japan in January. (See Tables 15 and 16.)

Foreign Offices

An important part of trade organization for many states is the overseas offices. Although there has been some debate in the past over their utility and cost effectiveness, the continuing increase in the number of overseas offices indicate their importance to states' commercial interests overseas. Data compiled in 1976 show nineteen states with overseas offices. This survey, conducted in October 1980, indicates that thirty-three states are represented overseas and that there are sixty-six offices. Some of these offices (those organized by regional commissions) are shared by several states, while several states have more than one office to represent them around the world.

States have this kind of continuous representation in all parts of the world. Europe was the first target when states began to set up these offices more than a decade ago. Japan then became a focus of activity. Now seventeen different countries host state representatives. Most of these offices have regional responsibiliites, making it clear that state economic activities reach into most parts ofthe world.

Our survey data showed that overseas offices could be categorized by the type of authority administering them. First, there are offices maintained by the state unit charged with primary responsibility for increasing international commerce (the economic development office or similar department) or by closely allied offices (such as those in charge of tourism). Secondly there are offices maintained by quasi-public, semi-autonomous state organs, such as port authorities. Finally, there are offices operated by regional organizations such as non-state port authorities or planning commissions. Some states, particularly in the West, work through this kind of office rather than

maintaining their own facilities abroad.[10] Appendix III lists state overseas offices of all types.

Staffing arrangements for overseas offices also varied. In some cases the staffs were employed by the state and solely represented the state. In other cases, the state retained only a consultant or business contact, either on its own or through a regional planning commission.

Different state departments, such as economic development offices and port authorities (or even the same) sometimes maintained separate offices in different foreign country. In other cases, different departments from the same state shared offices or consultants in the same foreign country. For a list of overseas representation by state and country, see Table II.4.

Policy Implications and Recommendations

This chapter outlines the continuing increase in foreign trade activities by states. Figures on overseas trade missions, the hosting of foreign delegations (whether or not visits are directly tied to commercial exchanges), and the proliferation of state offices overseas suggest the scope of the states' activity. Organizational developments also give expression to expanding overseas interests. Traditional bureaucratic organs have been given new responsibilities and in some cases specialized agencies have been created. The emergence of a substantial number of trade-related interests within states has required special mechanisms to foster cooperative relations between state governments and their trade communities. Advisory councils in which the entire trade community is represented have been organized by some governors to deal with this situation. In other states the proliferation of trade activities and interests remain to be

area within the state. New Hampshire, which targeted both rural and economically depressed areas, noted that a labor market sufficient to meet an industry's needs was one of its basic criteria used in assisting firms wishing to relocate there. Table III.8 provides a summary of internal targeting by the states.

Foreign Area Targeting

A look at where states choose to market state products or to seek overseas investors is instructive in several ways. It suggests the extensiveness of state-based commercial networks around the world. Foreign areas where state effort is most concentrated are identified, as is the presence of state activity in those international markets with the greatest potential.

Taken collectively, state overseas interests reach into most areas of the world. The major regions identified for market development are Europe, Asia and Latin America. It does not appear from the survey that states have given much attention to the trade opportunities available in Eastern Europe, Africa, or West Asia.

That states' export promotion efforts do give greater focus to well-established markets is apparent if we note those cases where specific countries are mentioned. In questionnaire responses, states tended to identify regions or continents rather than individual countries. The list of countries which were also specified includes only modern or rapidly modernizing countries. For the most part, specific countries within Third World markets were not identified.

The survey provides no surprises in the area of targeting investment. For most states the major sources of foreign investment are the developed countries. Western Europe, Canada, and Japan focus most state effort. A few states do look to the rapidly modernizing economies of Taiwan, Mexico, and South Korea.

A detailed breakdown of where states concentrate their overseas activities is provided in Table III.9. It illustrates the considerable diversity of states in their targeting of international business. Of the forty-four states from which data was collected regarding foreign targeting and export promotion,[4] thirty-one concentrated on particular geographical areas. Vermont, while not engaging in targeting per se, has participated in trade shows and missions held in West Europe and Latin America. Wyoming had no targeting policy; it confined its international business activities to participation in the Old West Regional Commission, leaving to that organization such policy decisions. The eleven states did not specify any specific region or country for export promotion include: Arizona, Colorado, Delaware, Georgia, Iowa, Nebraska, Nevada, North Carolina, Pennsylvania, South Dakota, and Utah.

Among the thirty-two states targeting foreign areas for export promotion, regions or continents were specified sixty-two times, particular countries twenty-four times. Preferences for European and Asian regions were equal (twenty each), followed closely by Latin America (eighteen). Two states identified the Pacific Rim countries. The particular countries mentioned as targets for export promotion were: Canada (by 5 states); Mexico (by 4 states); Japan (by 3 states); Germany (by 2 states); and Taiwan (by 2 states). Argentina, Australia, Brazil, China, Denmark, New Zealand, South Korea, and Venezuela were each mentioned by one state.

Of the forty-six states for which data was collected regarding foreign targeting and reverse investment, thirty-five concentrated on particular areas overseas. As in the case of export promotion, Wyoming leaves such targeting up to its regional commission. The twelve states that do not target specific foreign areas for attracting investment

Six states targeted specific foreign areas for export promotion, but not for reverse investment. These states include: Idaho, Illinois, Minnesota, Montana, New Mexico, and Texas. In terms of general policy, all of these states strongly encourage export promotion and strongly discourage, mildly discourage, or at least are neutral toward, reverse

foreign investment. Six states also targeted specific foreign areas for reverse investment, but not for export promotion. These states include: Arizona, Georgia, Iowa, North Carolina, Pennsylvania, and Vermont.

Policy Implications and Recommendations

To speak of state trade policy is really only to refer to the collective activities that states perform in promoting international business. No state appears to have anything approximating an articulated policy relating to trade. A few states are so minimally involved in international trade it would be difficult to accurately identify a trade posture, much less a policy. Yet the idea of trade policy, and its development in the states, gives an instructive focus to the findings of this chapter.

From the collective activities of the typical state it is possible to derive the elements of a policy framework. Foreign investment and export promotion are both strongly encouraged. The longstanding interest of states in inv[illegible] continues, although there is increasing interest in export pro[illegible]ion. The higher priority given exports is evident. Larger allocations of the state's international budget go for trade expansion. States offer a full range of export services in response to a whole range of needs within an expanding state trade network. It seems that states have generally rejected a strategy of making state exports more profitable. That approach would only serve one category of business within the state -- the experienced exporter. In providing a number of programs, the state reaches firms with no experience, those who might export but don't know how, those who want to but need assistance, and those who do export and want greater market opportunities. By sponsoring a variety of promotion programs, states assure that there is an appropriate program for most businesses in the expanding trade environment. This strategy is compatible with the finding that state programs are generally geared to small manufacturing firms with fewer than five years of experience in

see pg. 59 for foreign affairs activities

5 State Trade-and-Investment Promotion

The most obvious manifestation of state-government involvement in international economic matters is the growth of state trade-and-investment promotion activities. These efforts have developed a structural dimension that demonstrates some of the organizational changes states experience in responding to international economic forces. While the national government encouraged initial state involvement in international promotional activities, this intergovernmental relationship has recently exhibited some competitive as well as cooperative aspects in both programmatic and policy terms.

State-government promotional efforts affect U.S. policy outcomes primarily through indirect means at the program-implementation level. Trade activities generally support the achievement of national export-expansion goals while state investment promotion can conflict with national policy regarding the use of public incentives. The growth of state promotional programs thus offers evidence of the overlapping government interests created by international-interdependence trends and resultant state influence on U.S. policy outcomes.

The State Economic Interest

The growth of state promotional activities, including their interface with national programs, can be understood only within the context of their importance to state economic interests. Chapter 3 detailed some of the broad impact of interdependence at the state level, but a clearer picture emerges when one considers the role international-market factors can play in a state's economic-development strategy.

A growing export sector, for example, can provide a dynamic base for the expansion of production and employment within a state. In case after case during the 1970s, states reported growth in production for exports running two or three times higher than general manufacturing production. Benefits to a state's economy from increased exports, especially when indirect and other "multiplier" effects are considered, can also go far beyond immediate production jobs into area such as transportation, finance, insurance, and greater state tax revenues.

The particular experience of several states might help to illustrate both the economic importance and the organizational support now given to international trade as a central facet of a state's economy. Illinois became involved i n

actively promoting exports in 1967, utilizing the Illinois Department of Business and Economic Development in which an International Marketing Department was established. By 1976 over 346,0[illegible] workers in Illinois were employed full time in manufacturing exports, [illegible] percent of the state's total work force earning all or part of their income [illegible] export activities. Exports jumped from 4.3 percent of the gross state product in 1972 to 10.2 percent in 1974. The following year, the state exported $6.8 billion in manufactured goods, $2.2 billion of agricultural products, and in the process collected $680 million in taxes from this export production.

In the Chicago area, manufacturing employment declined from the mid-1960s to the mid-1970s, but jobs attributable to manufacturing exports almost doubled during this decline. The Chicago Association of Commerce and Industry estimated that the city's export growth had added 60,000 jobs in the area over this ten-year period. More dollar shipments of manufactured goods were sent out of Chicago than any other statistical metropolitan area.[1]

Florida is another state that consciously set out to tie its economic fortunes into the foreign-trade sector. The oil-price shocks in the early 1970s nearly decimated the tourism and construction industries that formed the backbone of Florida's economy. In response Florida conceived a strategy of aggressively promoting foreign trade, especially focusing on its port activities, which by 1978, had paid off handsomely. Exports from the Tampa and Miami areas alone generated $4 billion annually in revenue and involved over 167,000 people. Statewide the export trade accounted for 8 percent of total personal income, double the proportion for the 1960s. State initiatives in terms of trade missions, information, establishment of foreign-trade zones, authorization of foreign-bank activity, and others helped link the state more securely into expanding world markets.[2]

While exports have provided a beneficial area for state business development, the importance of this role goes beyond its utility as a timely area of economic growth, as useful as that may be. Many other purely domestic sectors have also provided spurts of economic activity at different times. The export area, however, offers some additional benefits in terms of the countercyclical potential of foreign-market sales.

Countercyclical benefits of foreign trade stem from the normally different economic growth rates prevailing in various parts of the world at any given time. While there are occasions when the worst-case scenario of global recession sets in, it seldom occurs simultaneously, and the more normal pattern has been for some countries to be gearing up their economies while others are sliding into slower-growth periods. Exports can help stabilize U.S. employment if demand from abroad counters declining U.S. sales, while later U.S. economic recovery then could cushion a falloff in overseas economic activity.

The practical utility of ties to broader world markets became apparent in business experiences during the 1974–1975 U.S. recession. At a series of public hearings around the country sponsored by the U.S. Commerce Department in 1976, numerous witnesses testified to the production and employment impact of export sales during the recession. Typical of the stories were these:

> More than 6,000 employees (out of 31,000 total) at Dow Chemical Corporation were engaged in $650 million of export business in 1975. Exports provided enough of a cushion during the recession that only 100 employees were laid off even though production volume declined 20 percent.[3]
>
> Emerson Electric Company of St. Louis, Missouri concentrated on domestic growth until 1970, when international market development became a corporate objective. By the 1974–1975 recession, Emerson's international business was growing by 22 percent while domestic business declined by 5 percent, counterbalancing by some 900 jobs the employment loss brought on by the recession.[4]
>
> The Executive Director of the Texas Industrial Commission (which includes the state's International Trade Division) testified that the state was one of the least affected during the recession due to involvement in the export sector. Information from major Texas companies showed that expansion of international sales had allowed them to maintain or even add to their labor forces during the recession.[5]

This last testimony pinpoints the direct interest of state governments in the countercyclical benefits of foreign trade—keeping people employed (and paying taxes rather than drawing state unemployment-compensation benefits). An international-trade base is best built, of course, during relatively good economic periods when time and resources are available to develop the strong export position needed to help counteract later cyclical downturns. Studies by the Indiana Department of Commerce showed a large number of small- to medium-sized companies interested in exporting that needed assistance to enter overseas markets. The state reportedly concluded that export-promotion efforts also offered the best avenue for increasing and diversifying the state's economic base in the face of declines in the domestic durable-goods market. As a result, a private nonprofit corporation, Indiana Export, Inc. (IEI), was created to provide specialized counseling to firms on how to expand into export operations. It is estimated that up to 20,000 jobs may be created over the next five years as a result of expected increases in export sales.[6]

International-trade ties thus help provide a better, broader "cushion" against hard times than business plans limited to intra- or even interstate economic expansion. Along with the positive benefits of normal industrial expansion from increased exports, this countercyclical potential helps provide an additional rationale for an active state-government role in trade promotion.

Structuring State Promotional Activities

From rather modest beginnings, state promotional activities have expanded tremendously over the last decade. This section discusses the nature, growth, and current dimensions of these programs, using both aggregate measures and specific state examples. It should be noted, however, that the rapid changes occurring in this area quickly overtake specific, snapshot examples, which are therefore employed for illustrative purposes only. Descriptions of individual state programs and statistics would need to be updated almost continuously to retain their complete accuracy.

While foreign-trade promotion can be seen as an extension of traditional state business-development programs, the actual methods employed demonstrate a mix of both normal and rather unconventional state services. Programs include trade missions, information and training seminars, trade shows at home and abroad, export directories and newsletters, computerized distribution of trade leads, and other such aids, administered through international business departments and often with the assistance of overseas state offices.[2]

The organizational pattern for administration of state trade-promotion activities reflects the diversity one might expect given the fifty states' historical, geographic, economic, and policy priority differences. While most efforts seem to be coordinated out of international divisions within a state's commerce department, a significant and sometimes lead role is played in other states by the agriculture department. Other forms of public and sometimes private bodies can also serve as central directing, coordinating, and/or advisory devices. Linking mechanisms within a state are essential since many "partners" are often required to formulate an effective trade-promotion program, including port authorities, tourism agencies, foreign-trade-zone authorities, transportation and economic development departments, chambers of commerce, world-trade councils, and local governments. (For a more complete discussion including examples of several state organizational structures, see the 1981 NGA report on *Export Development and Foreign Investment: The Role of the States and Its Linkage to Federal Action.*)[3]

State expenditures on trade promotion have become very substantial in dollar amounts as well as in the establishment of specialized program mechanisms and state executive-time commitment. As shown in table 5-1, the states in 1980 reported spending $18,855,550 on export-promotion activities. Utah was the sole state with no direct expenditures, while nearly two-thirds of the states allocated $100,000 or more to export promotion and four states (Ohio, Illinois, Virginia, and Maryland) spent over $1 million.

The allocation of state personnel to international business activities shows a similar impressive commitment. While the numbers include individuals working on investment promotion as well as trade activities, some

ource: Adapted from *Export Development and Foreign Investment: The Role of the State and s Linkage to Federal Action* (Washington, D.C.: National Governors' Association, 1981).

50 personnel were engaged in state international business activities in 1980. Only two states devoted less than a full-time position to these tasks while the verage state designated eleven individuals to this function and Virginia opped the list with fifty-nine employees. While fully comparable data is ot available from all states for preceding years, reported figures for at least ne-half the states demonstrate a clear expansion in both personnel and budet expenditures from 1976 to 1980. New Mexico was the only state in twenty-our to show a decrease, while the average state quadrupled its expenditures nd at least doubled its personnel commitment.[9]

Few states provide direct financial incentives for exports (in contrast to nvestment promotion, as will be discussed). New York offers an export tax ncentive, Michigan subsidizes booth space in state-sponsored trade shows, nd several states provide free product advertising through overseas export atalogs or other promotional devices. A few states are now exploring various xport-financing aids. The recent NGA study speculates that this interest in tate export incentives may expand in the future,[10] and indeed there is increasng evidence of such a development.

The primary objectives of state trade-promotion programs are to introuce new firms to the export market and to expand the overseas sales of comanies already exporting, essentially matching up instate firms with overseas uyers for their products. To this end the states employ trade missions, trade hows, overseas offices, catalogs and advertising, computerized information systems, how-to export seminars and virtually any other nonfinancial device used at the national level or elsewhere. Through coordination and referral with national-government agencies, the states can also link their clients up with other services, including such aids as the Export-Import Bank or now, the new Foreign Commercial Service.

While state programs are usually designed to handle a broad range of companies and products, in reality they are targeted more at medium- to smaller-sized companies, especially new-to-export firms that lack the experi-

ence and resources of major U.S. multinational corporations. In a survey response concerning their export-promotion programs, state agencies reported that nearly two-thirds of their export services are used by small businesses, over 30 percent by medium-sized firms and only 5 percent by large companies. The same essential distribution was maintained when services were apportioned by the length of a firm's experience in export markets, although a few states, most notably Alaska, seemingly focused on larger, experienced firms. Probably as a result of this relative inexperience in their usual clients, state export-promotion agencies also appear to target well-established markets abroad (Europe, Asia, and Latin America over Africa, West Asia, or Eastern Europe).[11]

These major export markets are also the logical site for overseas state offices—one of the most evident structural symbols of direct state involvement in the international marketplace. Trade missions abroad, often led by the governor or other top officials, have long been a useful device to open doors and facilitate trade contacts for local companies with potential foreign buyers. A permanent state presence abroad, however, is more novel.

The specific country location of state offices has tended to undergo periodic changes as experience is gained or shifts occur in functional objectives between export marketing and investment attraction. Change also occurs in the use of foreign-consultant representatives versus a full office structure, or the chosen configuration of individual state, regional, or port-authority sponsorship. A fully accurate picture of office locations would therefore require frequent updating, as would other elements of a state's promotional activity. A view of recent comparative growth was offered, however, by the NGA survey report released in 1981.

While about twenty states maintained overseas offices at the time of the 1977 Council of State Governments' study, the NGA data in table 5-2 shows that by October 1980 thirty-three states were represented by sixty-six offices, including some organized on a regional basis or through port authorities. While established European and Japanese markets were the initial locales for these offices, seventeen countries are now reported to host state representatives, including Mexico, Brazil, Panama, Colombia, Australia, Hong Kong, and Singapore.

Developments since the NGA survey have witnessed the opening of additional state offices in several countries, including Mexico and Canada, as well as a new venture in Korea. At the same time there has been a decrease in regionally funded representation efforts, partly due to a loss of financial support and partly to competitive allocation difficulties. Financing has been a particularly uncertain aspect of these state programs since the existence of an overseas office costing several hundred thousand dollars annually to operate can face funding difficulties in budget-conscious state legislatures.

For example, an office in Brussels, Belgium, operated by the Pennsylvania Commerce Department's Bureau of International Commerce (PENBIC) was

closed in 1977 after the Pennsylvania General Assembly passed a general-appropriations act prohibiting the expenditure of money for offices outside the state. Two years later the Pennsylvania Secretary of Commerce was back

before the General Assembly's Appropriations Committees arguing for a state office in Europe to boost the state's economy and create more jobs.[12] The NGA report shows the state as operating through private offices abroad at the time of its survey, but by 1981 Pennsylvania offices were being established in multiple European locations, Japan, and later in Mexico.

Other states have been more successful in sustaining support for their foreign operations. The Illinois Department of Business and Economic Development operates three foreign offices (Brussels, Belgium; Hong Kong; and Sao Paulo, Brazil) to help Illinois manufacturers sell their goods overseas. This activity received bipartisan support from four governors and the state legislature[13] largely because the department has paid close attention to illustrating the practical benefits of such offices. A report, "On Selling Illinois South of the Border," noted that since the Sao Paulo office was established in May 1976, some 1,000 Illinois businesses had received assistance while firms participating in the department's trade shows had nearly $20 million in estimated first-year sales.[14]

Other overseas-office programs claim similar cost-benefit successes. The director of Ohio's International Trade Division estimated that one dollar of expenditures generated approximately $260 in export sales for the state's companies. New York state's representative in Tokyo reported about $10 million worth of export business attributable to the office's operation there.[15]

Michigan's Office of Economic Expansion founded an International Division in 1972, which now maintains offices in Tokyo and Brussels. These offices offer the Exporter's Travel Assistance Program (EX-TAP), which helps arrange appointments, make reservations and, at times, accompany visiting state businessmen on their calls to potential foreign distributors.[16] Donald Hufford, President of Hufford Industries, Inc., a $2-million company located in Charlevoix, Michigan, was reportedly one of the beneficiaries of such state assistance. He told of answering a state export advertisement in a local newspaper. The state office set up a trip for him to Europe, provided translaters and screened possible distributors. Hufford Industries began exporting to Britain, West Germany, the Netherlands, and France and projects that one-half of its market may lie overseas.[17]

As is evident from table 5-3, an overseas office is only one part of state export-promotion programs (and may actually be more useful for investment promotion, as will be discussed). For example, a number of states have developed computerized hookups that allow them access to general trade leads or even the capability to conduct searches tailored to the needs of specific state firms. New Jersey's International Trade Office, which utilizes a computerized information-matching system, also publishes an international trade directory listing all New Jersey firms engaging in international trade and sponsors workshops for small businesses seeking to break into the export market. The trade-promotion program in Illinois includes state subsidized

Source: Export Development and Foreign Investment: The Role of the States and Its Linkage to Federal Action (Washington, D.C.: National Governors' Association, 1981).

trade fairs, trade missions, and catalog shows, with companies charged fees ranging from $400 to $1,500 per firm for these services that the state claimed increases the average company's export sales by $25,000.[18]

These examples are simply a few of the many active but diverse trade-promotion efforts being conducted by state governments and related instrumentalities. While legislated-funding authorizations have often been difficult to secure, the growing importance of international trade to the U.S. economy and the demonstrated success of some sister states in generating increased trade benefits have brought more and more states into active promotional programs.

The same basic promotional pattern has been followed in the area of foreign-investment programs. Just as the states started to gear up their trade activities in the early 1970s, the United States began to experience significant inflows of foreign direct investment, which added a new dimension to domestic economic-development activities. In a GAO survey, only ten states were found to have committed budgetary resources to attracting foreign investment before 1969. Twenty-one states began active promotional efforts between 1969–1975 as these reverse-investment flows picked up, while fourteen more began in the 1975–1978 period. By the time of the 1979 survey, only three states reported no active program to encourage foreign investment.[19]

Early state experience with investment promotion stemmed from overseas missions led by state governors. During 1977–1978 states reported sponsoring 113 missions abroad to promote foreign investment as well as participating in nearly thirty additional missions sponsored by the U.S. government and other organizations. Many overseas state offices discussed earlier were actually established largely for investment-promotion purposes to followup on the initial success of a governor's trip.

Even more than with trade flows, direct investment activities almost by definition require significant state-government involvement. Charters, siting,

January 17, 1984

MEMORANDUM

TO: Representative Joe Hayes
Attn: Jeff Day

FROM: Jonathan Sherwood
Legislative Analyst

RE: Alaska State Trade Office in Korea
Research Request 83-245

Jeff Day of your staff requested that our agency provide information on state foreign trade offices and on Alaska-Korea trade. It is our understanding that this information is to be used by a consultant, Michael Gay, in a study he is preparing on the feasibility of a State trade office in Korea. Specifically, we were asked to perform the following research:

- Outline the current structure of the State's Asian office including staffing, duties, and costs.
- Describe the history of Alaska-Korean trade efforts.
- Identify and report on activities of other states which have established offices in Korea and other Pacific Rim countries.

In the course of our research, we have contacted several individuals familiar with the history of Alaska-Korean trade or with the activities of other state's trade offices. In addition, we have obtained information from the Department of Commerce and Economic Development (DCED) pertaining to the operations of the State's Asian Office and the extent of Alaska's trade with Korea and other Asian nations.

Whenever possible we have obtained statistics and other quantitative data concerning the issues we were asked to address and included many of these materials as attachments to the memorandum. This has allowed us to spend more time collecting data while still providing the information to the consultant in a useful form--perhaps more useful given the problems inherent in using secondary and tertiary sources.

THE STATE OF ALASKA'S ASIAN OFFICE

The State's Asian Office, in Tokyo, is the major component of the Alaska Department of Commerce and Economic Development's Office of International Trade. In addition to the Asian Office, the Office of International Trade includes one Development Specialist position in Juneau. However, this position is not currently filled.

Staffing. The State's Asian Office is staffed by one State employee, a Far East Representative. This position is currently filled by W. D. Overstreet, former Mayor of Juneau. Mr. Overstreet reports to Deputy Commissioner Vince O'Reilly or Commissioner Lyon. Four Japanese employees also work for the Asian Office; they are hired on a contractual basis to avoid the complications of having foreign employees in the State personnel system. These employees, with their current annual salaries, are listed below:

1 Bilingual Executive Secretary	$20,500
1 Translator/Research Analyst	$20,000
1 Clerk-Typist/Receptionist	$18,000
1 Assistant/Translator	$14,500

Duties and Activities. According to the FY 85 executive budget documents, the purposes and functions of the Office of International Trade are to:

- provide the Alaska business community with pertinent intelligence on market prices and conditions, product utilization, etc.;
- locate and establish business contacts which are interested in Alaska products and investments;
- act as a catalyst to assist Alaska and foreign business persons to meet and conduct business;
- establish foreign government contacts which are important to Alaska, and introduce them to the State's economic trade and developmental policies; and
- establish a favorable image of Alaska in foreign countries.

According to the FY 84 Executive Budget, the office serves Alaska and foreign companies, State agencies, and Alaska and foreign tourists. Based on conversations with Vince O'Reilly, Deputy Commissioner of Commerce and Economic Development, and on DCED documents, it appears that the Asian Office serves all of these functions. Mr. O'Reilly, stated that the target area of the Asian office is currently Japan, Korea, Taiwan, and the People's Republic of China.

Mr. O'Reilly was not able to estimate the amount of time the Asian Office devotes to countries other than Japan; however, based on our discussion and the Far East Representative's reports, it appears that Mr. Overstreet intents to make a significant effort to expand contacts with Korea. For example, according to Mr. O'Reilly, the Representative is participating in the discussions between the State and Korea concerning liquified natural gas exports.

Based on the monthly reports from the Far East Representative to the Commissioner's office, it would appear that a significant amount of the Representative's time is spent meeting with Japanese business persons who are interested or involved in Alaska trade activities. The Far East Representative also meets with and assists members of the media who are interested in publishing information about Alaska.

One of the duties of the Far East Representative is to represent the State of Alaska and, to some extent, Alaska industry at trade shows, political functions, and business-related social functions. In addition, the Asian Office hosts receptions and luncheons for visiting Alaska businessmen and State officials. Vince O'Reilly explained that business relations in Japan traditionally involve more social activities than in the United States.

The Far East Representative also serves as the official representative of the Governor of Alaska at state functions. For example, Mr. Overstreet represented the Governor at the funeral of the Korean government officials assasinated this autumn.

Another responsibility of the Asian office is to provide assistance and support for trade delegations and visiting State officials. For example, when Governor Sheffield and his party travelled to Japan and Korea this last fall, the Asian Office was responsible for some of the arrangements; Mr. Overstreet and staff members also accompanied the Governor. According to Mr. O'Reilly, the Asian Office was also responsible for arranging a tour of the Far East for an Alaska logging industry group in the spring of 1983; the Office identified appropriate contacts and arranged meetings with Asian firms.

One of the activities of the Asian Office is the compilation and/or the dissemination of market information, both for Asian businesses interested in trade or investment in Alaska and to Alaska firms interested in marketing their products in the Orient. Two of the Japanese support staff translate information published in Japanese to English.

Productivity. One convenient method of determining the productivity of the Asian Office is to look at the extent to which it meets its

own performance objectives. The following performance measures were listed in the monthly reports submitted by the Far East Representative:

- the number of trade/marketing shows in which staff members participate;
- the number of conferences attended;
- the number of firms contacted or assisted;
- the number of Japanese organizations provided information;
- the number of pamphlets distributed;
- the number of Alaska firms provided information; and
- the number of government representatives assisted.

We have already provided the consultant with two of the Asian Office monthly reports which provides information on the extent to which each staff member performs these duties (see Attachment A). At his request, we will attempt to obtain additional reports from DCED.

Costs. The State Asian Office is included in the International Trade component of the DCED budget. This component also includes one development specialist position in Juneau and some travel funds used for DCED officials and others to participate in international trade events.[1]

The FY 85 Executive Budget request for the International Trade component is $543,500. According to the FY 85 budget documents (Attachment B), this represents a maintenance level budget for the new fiscal year.[2] Of the total amount, approximately $455,900 is for the Asian Office. Table 1 provides a breakdown of these costs. The remainder of the International Trade component budget goes to support the Juneau-based development specialist and to finance international trade promotion activity by State officials, legislators, and others.

---

[1] While we have been able to separate most of the costs of the State Asian office, it should be noted that there are a few items, e.g. office supplies, for which approximations have been used. However, this should not result in a significant error in our calculations.

[2] According to Joan Brown, service level SL 1 (identical to SL 2) was included in the included in the Governor's budget. Budget levels for SL 1 are used in this memorandum and should be used when looking at Attachment B.

TABLE 1
Alaskan Asian Office Costs
(in $thousands)

Personal Services	
Salary	85.0
Employee Benefits	18.3
Travel	
Field and administrative	35.6
Contractual	
Communications	35.0
Printing and advertising	13.0
Space expense and fees	90.0
Repair and maintenance	2.0
Equipment rental	4.0
Professional fees	
Tokyo office staff	90.0
Contracts*	9.0
Other fees and expenses, risk management	60.0
Supplies and Materials†	
Household and institutional supplies	1.5
Structural materials and supplies	.5
Equipment parts and supplies	.5
Office and library supplies	11.5
TOTAL	455.9

* This item is for consulting contracts; the amount expended by the Asian Office varies from year to year. For our purposes, we have allocated one-half of the total amount to the Asian Office.

† Some supplies and materials may be charged to the Juneau Development Specialist position; however, we are unable to separate these expenses at this time.

Source: Department of Commerce and Economic Development, FY 85 budget documents, C series for International Trade Component, and conversations with Joan Brown, DCED. Table prepared by House Research Agency, 1984.

One should note that the allocation for space rent not only includes office space in Tokyo, but also an apartment for the Far Eastern Representative. According to Joan Brown, administrative assistant with the Department of Commerce and Economic Development, the cost of office rent is currently about $54,200 per year and the apartment costs about $32,000 per year. The $60,000 shown for other fees and expenses, and risk management includes $10,000 for membership fees, $8,000 for conference registration, and $37,300 for hospitality.

History. The Alaska State Asian Office was opened at the end of 1964 following the passage of the legislation which created and funded it for $25,000 (SLA 1964 Ch. 91 & 92). Originally, it was adminstratively located in the Office of the Governor; however it was transferred to the Department of Commerce and Economic Development in 1980.

Based on comments we received in the course of our interviews and on information included in previous consultants' studies of the Asian office, it appears that the Office has operated without strong direction or support from some of the past administrations. For further information on the past activities of the Asian Office we refer you to the Alaska Trade Offices Study published for the Alaska Legislature by Dupere and Associates in January of 1982 and to the Alaskan State Asian Office Study, performed by Agritrade International Inc.; these reports are included with the memorandum. Both contain information on past operations of the office as well as evaluations of the office's performance and support from State government in Alaska.

OTHER STATES' TRADE OFFICES

According to a 1980 survey, 33 states were represented in that year by trade offices in 66 foreign countries. This had increased from 20 states in 1977.[3] While some states may have added or closed foreign trade offices in the last three years, international trade staff for such national organizations as the National Association of State Development Agencies (NASDA), the National Conference of State Legislators (NCSL), and the Council of State Governments (CSG) indicated that the level of activity is about the same currently. NASDA is in the process of compiling an updated list of states' foreign trade offices, which should be available later this year.

In almost all cases, the foreign trade offices are associated with their state's economic development agency. In a few cases, the office represents the state's agriculture agency, and in some states, different agencies share an office. In some cases, rather than representing a state, an office will represent a port authority or some other regional entity. For the purposes of our discussion, we have not included any state offices which are limited to promoting tourism, although some state trade offices do serve this function in addition to other duties.

Foreign trade offices are most frequently staffed by personnel employed directly by state government, as is the case with Alaska. In many cases, these are regular employees of the parent agency, who are routinely rotated to their home state. However, some states contract with one or more foreign consultants to represent their state. In addition, several western states operate the Old West Commission, which has had joint trade offices in both Europe and Asia.

Foreign trade--and consequently the activities of state foreign offices--is often classified into two broad categories: (1) investment; and (2) trade. Investment, also called reverse investment or foreign investment, refers to business transactions in which foreign companies invest capital in the state, frequently by opening a manufacturing plant.

Trade, the second kind of activity, involves the exporting of goods to foreign markets. According to Marsha Clarke, with NASDA, state foreign trade office activity is fairly evenly divided between the promotion of these two functions, at least on the global scale. State

---

[3] National Governors' Association, Export Development and Foreign Investment: Ther Role of States and Its Linkage to Federal Action, 1981, p. 22.

offices in developed countries like Japan may place a higher priority on encouraging investment; in developing nations, state offices may place a greater priority on expanding export markets, as these countries are less likely to have firms interested in developing operations in the U.S.

The trade offices of other states also collect trade intelligence for their state. However, according to Ms. Clarke, it is difficult to identify how much time is devoted to this activity, as it tends to be performed in conjunction with the office's promotional activities.

According to a 1982 study prepared for the Alaska Legislature by Dupere and Associates, once a state foreign office has made contact with a foreign firm interested in doing business with the U.S., the state's home office provides the U.S. business contact.

The Dupure report and other articles on foreign trade offices emphasize the importance of strong direction and support for state foreign offices from their parent agency. The home office must be able to identify the appropriate business contacts for foreign business interests who contact the state's foreign office, and to identify which in-state businesses expressing interest in exporting their products are serious candidates for foreign trade.

Ms. Clarke stated that the typical cost for a foreign trade office would be between $100,000 and $300,000. She noted that the upper limit generally provides for a large operation, but also cautioned that Tokyo was substantially more expensive than other locations. A 1982 survey indicated that the number of employees per office varied from 1 to 8, with 2 or 3 employees being the most common staffing pattern. The largest number of employees in the Japanes offices surveyed was 6.

Asian Offices. According to Marsha Clarke, her most recent information shows that 19 states now have foreign trade offices in Japan.[4] In addition, California, which does not have a state office there, has several port authorities, including Long Beach and Oakland, which operate offices in Japan. Most of these offices are regional in scope; however, some of the offices are intended to deal strictly with Japan. States which currently have offices in Japan are listed below:

Alabama	Indiana	Michigan	Pennsylvania
Alaska	Kentucky	Missouri	South Carolina
Florida	Louisiana	New York	Virginia
Georgia	Maryland	North Carolina	Washington
Illinois	Massachussetts	Ohio	

[4]This compares with 14 states in 1980.

In addition, Illinois has an office in Hong Kong and Missouri has an agriculture representative in Singapore. None of the individuals we contacted was aware of any state with an office in Korea.[5]

According to Ms. Clarke, state foreign trade offices in Japan usually place much more emphasis on encouraging foreign investment and little emphasis on increasing exports. Ms. Clarke explained that this is a result of Japan's long-standing trade restrictions on the importation of manufactured goods and agricultural products. Traditionally, these have made it very difficult for U.S. businesses to export goods to Japan. While some of these restrictions have been lifted in recent years, Ms. Clarke stated that the direction of states' trade office activities in Japan have not changed significantly. The Dupere study also found that most state offices in Japan devote more time to promoting Japanese investment in the U.S. than to promoting trade.

For additional information, we refer you to the Dupere study, which includes an examination of eight state offices in Tokyo and ten offices in Europe. The study provides a substantial amount of information on their activities and procedures. We also refer you to Attachment C, which provides several articles on state foreign trade offices sent to our agency from the Western Conference of the Council of State Governments.

---

5 We received an excerpt of a recently published book on foreign trade office activity which refers to a possible office in Korea. The excerpt does not provide detail on the status of the office; it is not clear whether an office has been opened or was merely planned.

HISTORY OF ALASKA-KOREAN TRADE

There are very few documents available which specifically address the past and current trade activities between the Republic of Korea and the State of Alaska. Most of our information was obtained either through conversations with individuals familiar with Alaska-Korea trade activities, or from publications which addressed only a small portion of trade activities or included information on Korea incidental to other topics. As a result, the information presented in this section does not represent a comprehensive summary of Korea-Alaska trade activities.

In this section, we will present a general overview of Alaska-Korea trade, including an informal chronology of events. We then discuss the history and status of specific areas of trade, including examples and statistics whenever we have found them readily available.

Overview

Historically, direct trade between Alaska and Korea has been relatively sparse compared to trade activities between Alaska and Japan, or Alaska and the contiguous United States. According to the individuals we contacted, trade activities between the two countries have generally involved exporting Alaska natural resource products, particularly fish and timber, to Korea. In addition, some Korean firms have supplied industrial materials for large capital projects, and in a few cases, Korean firms have received contracts to construct all or portions of such projects. In recent years, Korean firms have also begun participating in joint ventures with Alaska businesses involved in natural resource extraction.

Presented below is a brief chronology of Alaska-Korea trade activities based primarily on our interviews with those knowledgeable about the history of Alaska-Korea trade. While it is not comprehensive, it should help to place the discussion in a clearer perspective.

Year	Event
1950s	--- Little direct trade between Alaska and Korea. Timber and fish products exported from Alaska to Korea through Japanese trading companies.
Late 1960s	--- Korean fishing fleet begins fishing in Alaska waters.
	--- Hyundai Corporation builds Parks Highway bridge at Hurricane Gulch.

Year	Event
Early 1970s	--- More wood products exported to Korea, still through Japanese trading companies.
	--- Sun Eel Corporation begins exploring the possibility of exporting coal from Alaska to Korea.
1975	--- Anchorage businessman, Loren Lounsbury, appointed honorary consul by Korean government.
Mid 1970s	--- Koreans begin participating in joint timber ventures with Alaska businesses.
Late 1970s	--- U.S.-Korean joint ventures in Alaska fisheries begin.
1980	--- Korean government establishes Consul-General post in Anchorage. First Consul-General appointed.
	--- Sun Eel exports test shipment of Usibelli steam coal to Korea.
1981	--- Sun Eel agrees to export 800,000 metric tons of coal annually through Seward for 15 years.
	--- Hyundai awarded contract to erect transmission towers on the Anchorage to Fairbanks electrical intertie. Also provides structural steel for the new Sohio building in Anchorage.
	--- Daewoo Corporation provides saltwater treatment facility to Atlantic Richfield Corporation on the North Slope.

In addition, we located some general statistics on the volume of Alaska-Korea trade in past years. Attachment D is a table, taken from the Alaska Statistical Review, 1980, which gives the value of Alaska imports and exports by nation for selected years between 1970 and 1979. The table shows that in 1970, Korea ranked fourth as a recipient of Alaska exports behind Japan, India, and Canada. In 1979, Korea again ranked fourth as a recipient of exports, this time behind Japan, India, and the People's Republic of China. Japan is clearly the dominant export market for Alaska, receiving over 80 percent of all Alaska exports. Korea does not appear to have been a significant source of imports to Alaska in the 1970s.

Attachment E provides information on Alaska's exports to East Asian markets for the years 1978 through 1982. This information was provided by the Alaska Department of Commerce and Economic Development. As the table shows, Korea had consistently ranked behind Japan and the People's Republic of China until 1982, when it surpassed China. However, it should be noted that in 1982, two reconditioned jet aircraft were exported to Korea from Alaska accounting for over half of the total figure. This is not a common export item for Alaska and, to some extent, distorts the export figures for 1982.

It should be noted that these statistics reflect only exports which are shipped directly to Korea from Alaska. Many of the individuals interviewed stated that some Alaska products are exported to Japan and are then sold to Korea by Japanese trading companies. Also, some Alaska products may be transported to the contiguous U.S. before being shipped to Korea. We have not located any statistics which indicate the extent to which this occurs.

In the sections that follow, we provide information on the history and current status of specific areas of trade, a summary of trade promotion activities, and a brief discussion of the potential for increased trade between Alaska and Korea. Much of the information is qualitative in nature, based on interviews and descriptive reports on Alaska commerce. Whenever possible, we have included existing summary data on the volume of specific items of trade.

Comprehensive information on the level of trade is available in the U.S. Department of Commerce reports for the Alaska customs district, which may be obtained from the U.S. Department of Commerce International Trade Office in Anchorage. In fact, the information in the two attachments discussed above was compiled using these reports. The reports go back to 1964 and provide export and import totals for the district as well as specific dollar and piece amounts for individual items. Unfortunately, these reports do not provide any summary data by general type of product, for example, forest products or seafood.

We have not attempted to compile any summary data using these reports, as we lack ready access to the reports in Juneau (the International Trade Office in Anchorage does not have duplicating equipment capable of making copies of the microfiche records for recent years). The task of obtaining copies and compiling summaries ourselves was not possible within the time constraints of this request. However, as previously noted, some of the information has already been summarized by other agencies and these are included in the attachments.

There are several indications that the potential for increased joint venture activities with Korea is great. Of the seventeen joint-ventures approved by the North Pacific Fisheries Management Council in December of 1983, eight involved Korean firms. In addition, some of the Native corporations we contacted reported that they were currently negotiating with Korean firms for joint ventures. Furthermore, foreign allotments of the Alaskan FCZ fisheries are now determined to some extent by that nation's level of joint-venture activity in the fishery. This increases the incentives to foreign processors to participate in joint ventures.

Timber

For the period 1977 through 1982, forest products were the most consistent and most valuable export from Alaska to Korea. The value of forest products exported to Korea in the first eleven months of 1982 was $9.7 million. However, for the same five-year period, 1977 to 1982, Korea generally ranked behind Japan and the People's Republic of China as a market for Alaska timber. Japan frequently imported twenty times the amount of Alaska forest products imported by Korea during this period.

The Alaska timber export market to Korea includes hemlock, used in the hidden interiors of homes, Sitka spruce, used in musical instruments, and red cedar, which has recently become a popular paneling material in Korea.

There have been some joint-timber ventures between Korean and U.S. firms in Alaska. According to Robert Breeze, Korean firms have been involved in joint timber ventures with some Native corporations. Robert Loescher, with the Sealaska Corporation, reported that his firm is undertaking a joint venture with the Korean Alaska Development Corporation (KADCO), a consortium of several Korean trading companies, including Hyundai Corporation and Samsung Corporation. Mr. Loescher also mentioned that his corporation has been exporting timber to Korea for the last several years. In 1983, Sealaska exported 25 million board feet of round logs to Korea.

A recent study of the markets for Alaska timber compiled for the U.S. Forest Service predicts that the Korean market for spruce will hold steady or increase slightly in the future. However, it also points out that the Korean market for hemlock is likely to decline as the Japanese market improves. This is because the Koreans are currently buying a higher grade of hemlock than they require, due to its low price compared to inferior quality woods from other sources. If Japan begins paying more for this hemlock, the Korean market will probably substitute other woods. The study does anticipate an increase in the demand for red cedar, and mentions that there may be some potential for selling Alaska cottonwood, white spruce, and possibly birch to Korean markets.

Attachment H contains the pertinent section of this Forest Service report, which includes tables with some Korean timber import information.

Minerals

Coal. While there has been Korean interest in Alaska coal since the early 1970s, actual exports did not begin until 1980, when the Sun Eel Shipping Co., Ltd. Corporation purchased a test shipment of steam coal from the Usibelli Coal Mines near Healy for trial in power generators in Korea. Following a successful trial, Sun Eel signed a ten-year contract to buy 7 million metric tons of coal. Last year, Sun Eel, along with Korea Electric Power Corporation agreed to export 800,000 metric tons of coal annually through the coal loading facility currently under construction at Seward. As Usibelli is the only working coal mine in Alaska, this will represent the only regular export of coal from the state.

There is also a coal development project currently underway involving Korea. This is the Bering River Coal field located 60 miles east of Cordova on land owned by Chugach Natives, Inc. This field is being developed by the Bering River Development Corporation, a joint venture between Chugach Native, Inc. and KADCO. Although the coal lies approximately 30 miles from tidewater, and there is no existing transportation or loading facility, the coal has a higher BTU value than the Usibelli coal. To date, no mining has occured, and it is uncertain if and when this field will actually begin exporting to Korea.

Petroleum. Petroleum exports do not appear to be significant part of the Alaska-Korea trade historically. Of course, export of crude oil, and the potential export of LNG for Alaska's North Slope is restricted by federal law. According to Robert Maynard, Assistant Attorney General, provisions in the Congressional authorization of the Trans-Alaska Pipeline make it almost impossible to export North Slope crude oil, and provisions in the Congressional authorization of the Northwest gasline project make it very difficult to export large amounts of LNG. This limits, to a large extent, the potential for trade in oil. However, in the first eleven months of 1982, Korea imported $16.6 million worth of urea from Alaska. No urea was exported in the four previous years. We have not obtained any figures for 1983.

It was the general consensus of the individuals I interviewed that Korean firms would be very interested in importing liquified natural gas (LNG) if a gasline was built and might also import oil if federal laws were changed. However, it was mentioned that Korea does have other sources of energy, and that it was not clear the extent to which unrefined Alaska petroleum products would be competitive. Alaska

petroleum does have relatively high extraction costs associated with it. Any decision regarding the export of Alaska petroleum to Korea would be based on the price of Alaska petroleum relative to the price of petroleum from other sources.

According to Robert Breeze, the Korean trading company, Samsung, is considering importing unleaded gasoline and reformate from Alaska to Korea. He also stated that another Korean firm, Sangyong, is considering exporting leaded gasoline and #2 fuel oil from Korea to western Alaska. In addition, Korea Shipbuilding and Engineering Corporation is exploring the possibility of importing residual fuel oil to Korea, to be purchased from Tesoro.

Other Minerals. Although there does not appear to be any Alaska-Korea trade in minerals other than coal and petroleum at this time, both Loren Lounsbury and Robert Breeze mentioned strategic minerals as another source of future trade with Korea. However, as several individuals mentioned, Alaska presently lacks the infrastructure to develop these mineral resources. Presumably, any development of Alaska-Korea trade in this area is dependent on future infrastructure development.

Agriculture

To date, there does not appear to be much agricultural trade between Alaska and Korea. There has been some shipment of beef and lifestock from Alaska to Korea; Loren Lounsbury cited an operation near Homer which is currently exporting beef. Robert Breeze stated that two Korean firms are currently attempting to lease University of Alaska lands in the Kenai area for cattle raising. Mr. Breeze stated that current plans call for the firms to export cattle as well as process cattle in Alaska.

Several of the people with whom we spoke mentioned the possibility of exporting barley to Korea. Japan and Korea are considered the primary markets for Alaska barley exports. However, the lack of a grain terminal at railhead appears to be a major impediment in the development of this market.

Finally, an article in Forbes (Attachment I) notes that without the Korean market for reindeer antlers, Nana Corporation's reindeer herd would cease to be an economically viable enterprise. In addition to the antlers, the herd also provides a source of fresh meat for local residents.

Korean Investment in Alaska

We have already discussed many of the areas in which Korea has invested in Alaska in our discussion of joint ventures in resource development. These include timber, fisheries, and coal. It should be noted, however, that joint ventures in fisheries do not usually entail foreign investment onshore. The foreign processor simply buys fish from a U.S. fishing vessel and processes the fish on board.

Mr. Breeze also mentioned that the Korea Shipbuilding and Engineering Corporation has proposed building a ship repair facility in Seward that might eventually include a small rolling mill and some ship building facilities as well.

While many of the individuals with whom we spoke stated that there was the potential for substantial Korean investment, particularly in the extraction of Alaska's natural resources, Korea's Consul General Hwang cautioned that Korean firms are reluctant to invest in the infrastructure necessary to develop some of these resources. He explained that other natural resource producers, such as Canada, are willing to build the necessary facilities to make their resources available to foreign firms at dockside. This reduces the total cost to Korean firms purchasing these products.

Imports

According to those we interviewed, Korean firms provide a significant amount of heavy industrial goods used in Alaska. We have not located any information which evaluates the relative size of Korean exports to Alaska in this field. However, our sources did provide several examples. The Korean firm, Daewoo, delivered a saltwater treatment plant to Atlantic Richfield Corporation on the North Slope last year valued at over $200 million. The Hyundai Corporation provided the structural steel for the new Sohio building in Anchorage. Hyundai also is erecting the transmission towers for a section of the Anchorage-Fairbanks power intertie. In addition, Hyundai build the bridge at Hurricane Gulch on the Parks Highway in the late 1960s. Robert Breeze also mentioned that cement and electrical transformers were also imported from Korea.

For consumer goods, the potential for import does not appear great. Consul-General Hwang stated that Alaska is generally considered too small of a market to make importing likely. Although many Korean products eventually are consumed in Alaska, these are usually distributed by compa.ies operating out of the contiguous U.S. A small Korean products import trade had existed in Anchorage for some years; however, this primarily serves the Korean community there and is not likely to increase significantly.

Trade Promotion Activities

In addition to actual trade activities, there are a number of activities related to the promotion or enhancement of Alaska-Korea trade which merit mention. For example, for the last several years, delegations of business persons and/or political officials have either gone to Korea, or come from Korea to visit Alaska. According to Robert Breeze, trade delegations have regularly travelled from Alaska to Korea or vice versa for the last few years. Governor Hammond and several State officials (including legislators), made a tour of the Far East to discuss trade in early 1979 (see Attachment H), and Governor Sheffield led a similar delegation last fall.

In 1975, the Korean government appointed Loren Lounsbury, a long-time Anchorage businessman, honorary consul for Korea in Alaska. In 1980, the Korean government established a regular consulate in Anchorage, staffed by a Consul-General.

The Alaska-Korea Business Council, an Alaska organization, was formed a few years ago to enhance trade and other relations between the two locales. A similar organization, the Korea-Alaska Economic Cooperation Committee, exists in Korea.

Several major Korean trading companies have opened offices in Anchorage or announced plans to open offices in Anchorage. These include Hyundai, Sun Eel, Daewoo, and Korea Shipbuilding and Engineering.

Potential for Future Trade

Virtually everyone with whom we spoke stated that there was the potential for greatly increased trade between Alaska and Korea. Export of Alaska's natural resources was cited as the most promising area of trade between the two. It should be noted, however, that the infrastructure necessary to develop many of these resources is not yet in place, and until it is, there are probably limited opportunities for increasing this trade. In addition, federal restrictions on the export of North Slope crude oil and LNG will have to be lifted before Korea can take full advantage of Alaska's petroleum resources.

Among the advantages cited for Alaska as a potential trading partner with Korea are:

- the proximity of Alaska to Korea;
- the quantity and diversity of Alaska's natural resources; and

- the political stability of the United States compared to other resource exporting countries.

The individuals with whom we spoke also cited several negative features which the Koreans see as drawbacks to Alaska as a trading partner, including:

- the lack of adequate infrastructure for resource development;
- the lack of sophistication and expertise of Alaska business firms;
- the lack of consistent, positive State government policy concerning resource development; and
- State and federal restrictions and permit requirements which add time and expense to resource development.

Robert Breeze, Loren Lounsbury, and Bill Bittner, attorney for Hyundai in Alaska, all stated that Korean trading companies are interested in becoming involved in Alaska's infrastructure development, both as a supplier of industrial materials, and as a contractor. Korean companies reportedly have a similar posture toward Alaska Power Authority hydroelectric power projects.

While it appears that Korean companies are neither used to or inclined to invest heavily in infrastructure development, they have begun investing in Alaska's resource development, as evidenced by the Bering River Development Corporation and joint ventures in the timber industry.

* * *

This concludes our research on Korean trade and foreign trade offices. As noted throughout this memorandum, we have supplied several attachments which should be useful to the consultant in preparing his report. We are, of course, willing to assist the consultant in obtaining further information to the degree that time permits. Should you have any questions, or if we can provide further information on any of the issues addressed in this memorandum, please do not hesitate to contact us.

REPORT TO THE ALASKA LEGISLATURE
OF THE
LEGISLATIVE MISSION TO JAPAN AND KOREA
JANUARY 14-21, 1984

Bettye Fahrenkamp
SENATOR BETTYE FAHRENKAMP

Robert H Bettisworth
REPRESENTATIVE ROBERT BETTISWORTH

John J Cowdery
REPRESENTATIVE JOHN COWDERY

JANUARY 24, 1984

REPORT OF LEGISLATIVE MISSION TO JAPAN AND KOREA

I. Executive Summary

This report describes the legislative mission of Senator Bettye Fahrenkamp, Representative Bob Bettisworth and Representative John Cowdery to Japan and Korea. The purpose of the mission was severalfold:

1) to return the visit of Japanese Diet members who visited Alaska in August 1983;

2) to join with Senator Murkowski in requesting Japan and Korea to formally request Alaska oil from the United States government;

3) to let Japan and Korea know of the Legislature's intent to seek a long term resource relationship, particularly energy resources, with those countries as provided in the respective communiques signed during President Reagan's November 1983 trip to those countries; and

4) to seek a summit meeting on energy among Japan, Korea, the Republic of China and the United States to form a financing plan for the construction of a gas pipeline and the marketing of the North Slope gas. The briefing material contained in Appendix A was submitted to officials of each government.

The Export Administration Act, which contains the prohibition on the export of Alaska oil, will be considered in mid-February 1984 by the United States Senate. If Japan's and Korea's formal requests for the oil are to do any good, they must be made soon. This legislative mission went at this time to these countries along with Senator Murkowski to show Alaska's solidarity in making this request and to stress the need for immediate action.

In Japan we found continued interest in purchasing Alaskan crude oil if the law can be changed to allow its export. We recommend that Alaska continue to establish relations with our friends in the Japanese Diet who prescribe energy policy for Japan. The interest of these Diet members will insure closer cooperation of the officials in the Ministry of International Trade and Industry (MITI).

On natural gas the Japanese continue to talk of an oversupply of gas extending into the 1990's. The Japanese look to private enterprise to perform any necessary marketing or financing studies. The MITI ministry appears to desire to operate solely within the United States-Japan Energy Working Group. This working group does not now favor an energy summit. Continued efforts with the Diet should be pursued to convince MITI to participate. Further, if Korea and Taiwan agree to a summit meeting, it would be difficult for Japan to refuse to attend.

The Koreans were very positive with respect to the oil and the gas. On oil, Energy Minister Choi stated that Korea wanted to purchase Alaskan oil and that it would point that fact out to the United States government. The Koreans favor the energy summit on gas and have taken preliminary steps with private industry in Korea to participate in the financing and marketing study. We recommend increased efforts with the Korean government to encourage this continued positive attitude.

While the legislative mission did not visit the Republic of China, Senator Murkowski reports from his meetings there during the week of January 9, 1984 that the Republic of China's government has the same attitude as the Korean government with respect to the oil and gas. Again, this attitude should be encouraged.

A word needs to be said about Alaska's Asian Office, which is located in Tokyo. It is the mission's impression that the Office is doing an excellent job. In the opinion of the mission, its effectiveness could be increased if offices were established in Seoul and Taiwan. We urge a review of this proposal by the Alaska Department of Commerce and Economic Development with a report by Commerce to the Legislature during this legislative session. Bill Overstreet, Director of the Alaskan Asian Office, was with the mission in Japan and Korea. His assistance throughout was most helpful and appreciated. The mission is firmly committed to the Asian Office.

It is the observation of the authors of this report that Asians and students of American history recognize that the United States is entering the "Century of the Pacific". Alaska, as a central point in the Pacific Rim geography, should be an integral part of the future trade pattern of the Pacific Rim region. Further, it is our observation that the United States will not be Alaska's primary market in the years and decades to come. We believe that the real market

for Alaskan resources is with and in Pacific Rim nations with which the United States of America has economic and strategic treaties (Japan, Korea, and Taiwan).

Asian countries have historically looked to Southeast Asia for trade and commerce. Those countries must be made aware of Alaska's other resources. This will take an effort by Alaskans. Moreover, Alaskans must be made aware of the potential.

It is our perception that IF Alaska is to maintain its high production in hydrocarbons and IF Alaskans continue to receive revenues it believes it needs, then the State leaders must plan for the future.

It is asserted by some economists and futurists that the center of world commerce has already shifted from the historic north Atlantic to the north Pacific Rim region. We believe this to be true and want our State to be aware of the potentials, opportunities and/or hazards.

II. Recommendations.

It is the opinion of the Alaska legislative mission that for Alaska to realize the promise of that portion of the Reagan/Nakasone communique of November 1983, that calls for Alaska to be the focal point of an energy relationship between the U. S. and Japan and other countries on the Pacific Rim, most notably Korea and the Republic of China (Taiwan), the State of Alaska must be an active party. Recognizing this, we recommend the following:

1. That in cooperation with the Alaska Congressional delegation and the Governor, the Alaska Legislature take an active role in seeking to market Alaska's energy resources in the Pacific Rim, recognizing that such an undertaking will require the expenditure of funds and will probably take some time;

2. That the Alaska Legislature establish a procedure for exchanging visits with members of the legislative bodies of Pacific Rim countries interested in Alaska's energy and other resources, with a view toward establishing with those legislators an understanding of Alaska's resources and the desirability of purchasing those resources. In particular, the Alaska Legislature should support Senator Murkowski's efforts to arrange an energy summit meeting between the United States, Japan, Korea and the Replublic of China (Taiwan) with representatives from Alaska in attendance.

3. That the Alaska Legislature assist the Governor and the Alaska Congressional delegation in seeking to lift the ban on the export of Alaska crude oil, including the expenditure of funds for Congressional lobbying and general education efforts, recognizing that this may take some time to achieve.

If Congress fails to lift the ban on the export of Alaska crude when the issue is debated in the Senate in February this year, all appropriate action should be undertaken by the State of Alaska, assisted by the Alaska Congressional delegation, to permit the export of a portion of the State's royalty crude oil. Such actions may include a request by the Governor for an export permit for State royalty crude oil as suggested by Senator Murkowski, or a lawsuit to establish the State's right to sell its own oil as suggested by Congressman Young.

4. That the Alaska Legislature support the efforts of private groups to arrange for marketing of Alaska's gas and financing of a gas pipeline, including marketing of the gas to the Pacific Rim countries. The Alaska Legislature should consider procedures which would require that any foreign companies which obtain contracts to help build the natural gasline, are from countries that agree to provide markets or financing for the gasline.

5. That the State of Alaska take all appropriate measures to assure that existing coal contracts take place on schedule and that additional opportunities for the sale of Alaska coal be found. In proposing this, the Alaska legislative mission recognizes that large scale coal contracts with the Pacific Rim cannot be expected to occur earlier than the mid 1990's. However, some assurance of sales at this time would be of great assistance to the Legislature in making proper decisions for construction of the infrastructure needed for coal development.

6. That the mission of Alaska's Asian Office be expanded to agressively market Alaska's resources on the Pacific Rim. In this regard we envision its mission for Alaska as similar to that which the Ministry of International Trade and Industry provides for Japan. To perform this function, Alaska's Tokyo office would have to be upgraded and offices established in Seoul and Taiwan. Given the interest in Alaska's resources we have seen in Japan and Korea, the money expended would be a wise investment. We recommend that the Alaska Department of Commerce and

Economic Development study this proposal and report back to the full Legislature before the end of this legislative session.

III. Discussion of Trip Details

The mission left Juneau for Anchorage on January 13th. That evening the mission attended a dinner hosted by Consul General Huang of Korea, to which Consul General Inamura of Japan was invited. Energy matters were generally discussed. The main purpose of the dinner, however, was to firm up the arrangement for the visit. The mission very much appreciated the information provided by the Consuls General.

The mission left Anchorage on January 14, 1984 and arrived in Tokyo on January 15, 1984, having lost a day crossing the international dateline. January 16, 1984 was a holiday in Japan, during which the mission adjusted to the time and was briefed by the Alaska Asian office.

On the evening of January 16, 1984 the mission had dinner at Bill Overstreet's home, which was attended by Senator Murkowski, for the purpose of rehearsing for the meetings. It was decided that after the introduction of the legislative mission by Senator Murkowski, Senator Fahrenkamp, as the mission's senior member, would make the following points:

1. The mission was returning the August 1983 visit of the Diet with the idea of continuing such exchanges in the future;

2. The mission felt it was in the interest of both Japan and Alaska to work to implement that portion of the November 1983 communique from the meeting of President Reagan and Prime Minister Nakasone which named Alaska as the focal point for an energy relationship between Japan and United States;

3. The mission recognized that realizing Alaska's position as the focal point of an energy relationship will take time and commitment, which Alaska for its part was willing to pursue;

4. The mission endorsed the efforts of the Congressional delegation to change that portion of the

Export Administration Act which precluded the export of Alaska oil and the effort to arrange for an energy summit meeting.

It was agreed that Senator Murkowski would speak to these subjects on behalf of the combined group.

The first meeting on January 17, 1984 was a briefing by Ambassador Mansfield. After Senator Murkowski had introduced the legislative mission, Ambassador Mansfield gave an in-depth and exceptionally knowledgeable review of both the oil and gas issues from both the U. S. and Japanese perspectives. He stated his unequivocal support for the export of Alaskan crude oil, Pacific Rim, and promised to be of assistance in any appropriate way. He detailed the numerous publications and occasions in which he had made known his views on this subject. He is clearly a friend of Alaska.

The combined mission met with MITI Vice Minister Komatsu on January 17, 1984. Vice Minister Komatsu is one of the two senior Japanese officials who sit on the U. S.-Japan Energy Working Group. After Senator Murkowski had made the introductions and Senator Fahrenkamp had made the above listed introductory remarks on behalf of the legislative mission, Senator Murkowski made the following points to the Vice Minister:

1) The purchase of Alaska's energy resources would provide Japan an opportunity to redress its balance of payment problem with the United States that opening its market to U. S. citrus and beef cannot do;

2) The U. S. Senate would soon take up the Export Administration Act, while Japan has informally indicated its desire to purchase 50,000 barrels per day (bbl/d); a formal request by the government of Japan for the oil would be very helpful in Senate debate;

3) The group felt that an energy summit among the U.S., Japan, Korea and Taiwan to discuss Alaska oil and gas would be a good means of implementing the Reagan-Nakasone comminique as it pertains to Alaska energy resources.

Mr. Komatsu replied that energy is an area where Alaska and Japan can cooperate. Japan told the U.S.-Japan Energy Working Group that it wanted the oil, and the Japan Refiners' Association said the same thing on its trip to Washington, D. C. Mr. Komatsu said that that request

constituted a "formal" request. Japan believes that lifting the crude oil ban is critical. However, it understands that lifting the export ban will be difficult in the short run; this must be a long-term effort.

Mr. Komatsu declared that the potential exists for Japan's purchase of LNG from Alaska in the 1990's. The development of this potential is up to private enterprise in each country.

Mr. Komatsu said that coal is also the responsibility of private industry, although there are many more difficulties connected with this resource than with LNG.

On January 17th the combined delegation met with Mr. Nagayama of the Japan Refiners' Association and his staff. After Senator Murkowski and Senator Fahrenkamp had made their prepared presentations, Senator Murkowski stated that the Export Administration Act and Senator Murkowski's amendment to allow the export of Alaska oil will be debated in February. The Senator described the proposed amendment and advised Mr. Nagayama that there is strong objection by the maritime unions to the export of Alaska oil. If this objection can be overcome there will be a market in the U. S. for replacement oil from Mexico and an opportunity for Japan to redress its balance of payments problems with the U. S. A formal request for the oil from Japan to the U. S. would help in the Senate debate.

Mr. Nagayama replied that he had made a request for the oil during his trip to Washington, D. C. on the issue. Furthermore, he felt that the Japanese side had requested the oil during the U. S.-Japan Energy Working Group discussions. Mr. Nagayama said he understood that it would be politically difficult to have the amendment pass.

Mr. Nagayama expressed concern about that portion of the Senator's proposed amendment that called for the oil to go to Japan on U. S. bottoms. He stated that he was concerned that this would make the price of the oil commercially unreasonable. A discussion then ensued which explained to Mr. Nagayama that the transportation price would be absorbed at some point in the distribution system and thus Japan would pay no more than the market price for the oil. Mr. Nagayama replied that even if the delivered price were the same the U. S. tanker proviso precluded Japanese oil companies from using their tankers which were surplus to the present demand. Dr. Thayer responded that

having the oil on American tankers provided security to the Japanese, because it would be an act of war to stop an American tanker. Mr. Nagayama acknowledged the point.

Mr. Nagayama then expressed concern that the proposed amendment called for the oil to be cut off in case of an emergency. Senator Murkowski explained that this was because Japan as an OECD nation would receive oil pursuant to the International Energy Act were there to be an emergency.

Mr. Nagayama stated that he agreed that importing Alaska crude oil would go a long way toward resolving Japan's imbalance of trade problems. He had spoken with people during his U. S. trip on the issue who had told him that changing the balance with Alaska oil was not a desirable way to do it. The reason he had been given was that this would possibly take the pressure off Japan to resolve other trade difficulties. He thus expressed concern that even if Japan purchased the oil, U. S. criticism of the trade imbalance would continue.

Nevertheless, Mr. Nagayama believed that Japan should buy limited quantities of oil to reduce the balance of payments problem. Furthermore, he felt it important to diversify Japan's source of supply and reduce its dependence on Middle East oil.

Senator Murkowski responded by saying that the efforts of the U. S. in Lebanon and the Middle East to secure peace were of ~~less~~ more benefit to Japan than the U. S. because the U. S. was more dependent than Japan on oil from that area. Mr. Nagayama reiterated the desirability of a diversified oil supply but said it would be inappropriate for him to comment on the Lebanon situation.

There was some confusion on the Japanese side regarding the 200,000 bbl/d amendment. Mr. Takahashi asked if this represented royalty oil only. Senator Murkowski replied that the 200,000 bbl/d representated oil from all sellers including the State. The Senator said that the 200,000 bbl/d was selected because it was the amount of oil which could be sold without causing a job loss among existing maritime workers as a result of oil export. He cited the Putnam, Hayes and Bartlett report prepared for Alaska Lumber and Pulp Co., Inc. (ALP) as the authority for this proposition. He said it was only a coincidence that this 200,000 bbl/d was the same amount as the total of the State's royalty oil. Mr. Ishiyama of ALP later informed members of the group that because of the political good will

involved with it, the Japanese are far more interested in State royalty oil than oil from the other producers. As Mr. Ishiyama understood it this had a lot to do with the fact that the Japan Refiners' Association had expressed interest only in 50,000 bbl/d of royalty oil.

Representative Bettisworth told Mr. Nagayama that Alaska looked upon the oil export issue as a long-term proposition. He said the Alaska Legislature expected to push hard to achieve oil export over whatever period it took to succeed. During this period he hoped that further visits between the Diet and the Alaska Legislature could be arranged.

The combined group then met with Mr. Murata, the Director General of the Economic Affairs Bureau of the Ministry of Foreign Affairs. After Senator Murkowski and Senator Fahrenkamp made their initial presentation Senator Murkowski explained the amendment he intended to introduce to the Export Administration Act to permit the export of a limited amount of Alaska crude oil. Senator Murkowski told Mr. Murata that it would enhance chances for the amendment's success if Japan would formally request the oil. The Senator pointed out that the State of Alaska was prepared to spend money to help get the amendment passed. The Senator said that passage of this amendment would help the Japanese avoid criticism due to the balance of payments problem. The Senator then outlined his proposal for an energy summit.

Mr. Murata responded that Japan would like to purchase Alaska crude oil in order to diversify its sources of supply and to help its balance of payments problem. He stated that Japan was reluctant to make a formal request for the oil because it could be interpreted to be interference with the internal affairs of the United States (i.e., the deliberations on the Export Administration Act). Accordingly, the problem has "chicken and egg" aspects: Japan says the U.S. should make the oil available before it takes action to purchase it; Senator Murkowski wants Japan to indicate a desire to purchase the oil first.

Senator Murkowski stated that it would be very embarrassing if the U.S. lifted the oil export ban only to find that Japan was not interested in purchasing any oil. He stated that it was difficult to understand the rationale for Japanese refusal to make a formal request for the oil when Taiwan had agreed to do so. It was anticipated that Korea would also do so. The Senator pointed out that the U.S. was securing Japan's oil supply as well as that of the United States by its actions in the release. Thus, it was

hard to understand why the Japanese invested in Sahkalin rather than Alaska. The Senator asserted that it would be much better if Japan invested in Alaska.

Mr. Murata asked what would happen if no amendment to the Export Administration Act allowing crude oil export was achieved in February. Senator Fahrenkamp responded that Alaska would try again. She stated that the State Legislature was prepared to spend money to obtain the amendment but recognized that it could take some time to have this happen.

On January 18, 1984 the combined group met with Minister Okonogi, the Minister of International Trade Industry. Senator Murkowski and Senator Fahrenkamp made initial remarks as outlined previously. Senator Murkowski then stated that purchasing crude oil from Alaska would help Japan reduce the balance of payments problem. The Senator declared that opening the beef, citrus food barriers to U.S. producers would not provide sufficient balance of payment offset. The Senator stated that the answer to the balance of payments problem was not for the U.S. to restrict import of Japanese products, but for the Japanese to buy more U.S. products. The Senator then described his proposal for an energy summit as outlined above. Mr. Okonogi replied that he will be in Washington, D.C. at the end of the month and these issues will be discussed. Mr. Okonogi said he preferred using the U.S.-Japan Energy Working Group in the energy summit proposal, but would consider the proposal.

Senator Murkowski pointed out that Vice President Bush has responsibility to follow through on the Reagan/Nakasone communique. He stated his intention to meet with the Vice-President concerning the energy summit.

The combined group then had lunch with three of the four Diet members who had visited Alaska in August, 1983: Namely Mr. Watanabe, Mr. Harada, and Mr. Yosano. Mr. Kato, a Diet member interested in energy, also attended. Mr. Uetake, a former Diet member, was present as was Mr. Matsune, Chairman of Alaska Kai. Mr. Nakayama, senior counselor to the Industrial Bank of Japan, and a long-time friend of Alaska, attended as did Ishiyama, the President of Alaska Lumber and Pulp Company. The discussion focused on the desirability of exchanging visits between Diet members and members of the Alaska Legislature. Senator Fahrenkamp expressed the view that Alaska was prepared, on its part, to take the actions necessary to implement that portion of the Reagan/Nakasone communique which calls for Alaska to be the focal point of an energy relationship between Japan and the

U.S. Minister Watanabe stated that this was a worthwhile goal which he would be unable to pursue because of his recent promotion to Minister of Health and Welfare. He stated that the other Diet members present were prepared to be helpful in the effort. In their various remarks the Diet members expressed an interest in the energy summit proposed by Senator Murkowski and promised to consider it.

Following lunch the Alaska legislative mission held a press conference with the Japanese press. Senator Fahrenkamp presented the points she had made in meetings with government officials. The press was extremely interested in the oil and gas issues and the interview had to be terminated to allow the mission to take the flight to Korea.

The combined group was met at Kimball International Airport on the evening of January 18, 1984 by former Korean Energy Minister S.K. Lee, a strong advocate of development of Alaska's energy resources. The group was joined by another long-time friend of Alaska, Mr. T. J. Kim at the Shilla Hotel.

The first meeting of the morning of January 19, 1984 was breakfast with the corporate leaders of Sun Il Corporation concerning its coal purchase contract with Usabelli Coal Company. The group was assured that the project was on schedule.

The combined group then received a briefing from Mr. Walter Lundy, economic counselor to Ambassador Walker. Mr. Lundy briefly outlined the dramatic expansion of the Korean economy in the last ten years. The Korean economy is growing at approximately ten percent per year. Much of this is due to the expanding domestic market in Korea. The Koreans are presently trying to enter the export market and participate in the hi-tech area. For the first time, Korea will have an unfavorable balance of payments problem with the United States in 1983 - approximately $1 billion. The Koreans are extremely worried about this.

Mr. Lundy felt that the Korean government would respond favorably to the proposal of formally requesting oil and to the idea of an energy summit. He warned that due to their recent prosperity the Koreans had been deluged with requests to purchase foreign goods. The Koreans have sufficient energy in the short run but need assured, long-term supplies over the long run. Mr. Lundy viewed the

creation of the five company consortium to participate in the marketing and financing study of the gas as very favorable.

Mr. Lundy advised that although there was no specific mention of Alaska, as there had been in the Reagan/Nakasone communique, the communique between President Reagan and President Chun in November, 1983 contained a paragraph in which the United States pledged to be an energy supplier to Korea and to help Korea obtain energy resources in case of emergency. Mr. Lundy suggested that in its discussion with the Korean government, the group point to this paragraph as the basis for its proposal that the Koreans make a formal request for oil and an energy summit meeting. Mr. Lundy stated that the embassy would provide all possible assistance in achieving these goals.

The combined group met next with Minister of Commerce and Industry Kum. After Senator Murkowski and Senator Fahrenkamp had made their opening statements Senator Murkowski urged that the Korean government make a formal request for crude oil from Alaska that there be a four nation energy summit meeting. Mr. Kum responded that while Korea was interested in purchasing energy resources from Alaska, the specifics of that discussion would have to await the group's meeting with Energy Minister Choi. Mr. Kum stated that Korea would buy the oil if the export ban were lifted and asked Senator Murkowski to explain the procedures for changing the law. Following Senator Murkowski's explanation, Senator Murkowski did give reasons why Alaska was looking to Pacific Rim as a market.

The combined group had lunch with National Fisheries Administrator Kang. After an exchange of introductions, Senator Murkowski applauded Korea's adherence to the 200-mile limit. He asked if the Korean government was interested in obtaining more joint ventures with Alaska fishermen as opposed to fishermen from elsewhere. The conversation centered on these two points.

In the afternoon the combined group met with Ambassador Walker. The Ambassador stated his support for the export of Alaska crude oil and for the energy summit meeting. He promised to do everything he could to assist in Korea's purchase of natural gas from Alaska. To that end he planned to host a dinner for Yukon Pacific officials in the five company consortium which had agreed to do the financing and marketing study on the gas during Governor Hickel's visit in February, 1984. Senator Fahrenkamp thanked the

Ambassador and explained that Alaska intended to aggressively market its resources on the Pacific Rim and to make any necessary changes in federal or state law toward that aim.

The combined group then met with Minister Choi, Minister of Energy and Resources. Senator Murkowski and Senator Fahrenkamp made opening remarks. Senator Murkowski asked that Korea make a formal request for Alaska oil and that there be an energy summit between the U.S., Korea, Japan and the Republic of China (Taiwan). Senator Fahrenkamp asked the Minister to assist in making certain that the coal contracts between Sun Il Company and Usabelli Coal Company occur on schedule.

Minister Choi stated that Korea wanted to diversify its sources of energy supply. Korea would buy Alaska crude oil if it were made available and would seriously consider making a formal request for it. He said that while there was no need for gas right now because of purchases from Indonesia, his ministry's upgraded projections show a need by 1989. Accordingly, his ministry would assist private enterprise of Korea to coordinate Korea's portion of the financing and marketing feasibility study. Minister Choi said that he is uncertain that the Sun Il/Usabelli contract would occur on schedule. The Minister said that he views favorably the proposed energy summit. He then asked Senator Murkowski to explain his proposed amendment to export crude oil and to describe the prospects for passage in the Senate.

Senator Murkowski gave a detailed account of the proposed amendment. He stated that changing the law would be a hard fought battle. Accordingly, he appreciated the Minister's consideration of the proposal that Korea make a formal request for the oil as this would be a great help.

The group then met with Mr. Lee, Chairman of the Board of Samsung Corporation. Senator Murkowski pointed out that the gasline construction would involve assistance from companies such as Samsung. The Chairman stated that Samsung Corporation had always looked for natural resources, particularly in the United States, and more specifically Alaska.

The combined group then met with the President of the Korean Electric Power Company, Mr. Park. After Senator Murkowski and Senator Fahrenkamp had made initial remarks, Senator Murkowski stated that he hoped that the Sun Il Usabelli coal contract would go forward as scheduled. He was assured by Mr. Park that it would. Senator Fahrenkamp

then brought up the issue of all of Alaska's resources focusing specifically on Alaska's energy resources. An informal discussion ensued regarding the opportunities for marketing those resources on the Pacific Rim.

At this point Senator and Mrs. Murkowski left the group to return to the United States. Following departure of Senator Murkowski the discussion continued and was led by Senator Fahrenkamp.

The legislative mission met for breakfast on January 20, 1984, to discuss the points it would make in its meetings during the day, all of which were with Korean companies interested in Alaska's energy resources and their construction projects in Alaska. It was decided that Senator Fahrenkamp, as senior member, would make the following points at each of the meetings:

1. That the Alaska Legislature intended to make a major effort to market Alaska's resources on the Pacific Rim.

2. That the mission has come to Japan and Korea at this time to demonstrate the Alaska Legislature's support of the congressional delegation's effort to lift the ban on the export of Alaska oil to the Pacific Rim.

3. That this issue will be debated in Congress in mid-February. The Alaska legislative mission believes that the ban on Alaska crude oil exported is inconsistent with Paragraph 12 of the communique between President Chun and President Reagan, which provided that the U.S. would be a reliable supplier of energy and help Korea obtain stable energy supplies.

4. That the legislative mission urges the Korean government to contact the U.S. government to formally request the Alaska oil. In particular the U.S. Defense Department should be contacted regarding Korea's desire for the oil.

5. That Alaska has extensive natural gas supplies. Senator Murkowski is trying to put together a four-country energy summit meeting to discuss financing and marketing of the gas.

6. That the Alaska legislative mission understands that former Governor Hickel will be in Korea in February to discuss the natural gas issue. Ambassador Walker told the mission yesterday that he will help coordinate that visit

with key industry leaders. The Alaska legislative mission supports this initiative.

7. That coal is one of Alaska's major resources. Contracts have been entered to sell Alaska coal to Korea. The legislative mission is delighted to learn that arrangements for coal delivery are still on schedule. The Alaska legislative delegation would like to see more coal sold in Korea.

8. That in April a delegation from the Alaska Loggers' Association will be in Korea to discuss Alaska's timber resources. The Alaska legislative mission urges the Korean business community to work with the Alaska timber industry to sell more of Alaska's timber in Korea.

The Alaska legislative mission met with Fisheries Minister Kang for lunch. The Alaska legislative mission applauds the efforts made by the Korean fishing industry to comply with the requirements of the 200-mile limit and requests that the Korean fishing industry enter into more joint ventures with Alaska fishermen.

The mission met first with Mr. Kim, President of Ssangyong Construction Company. Senator Fahrenkamp made the remarks outlined above. Mr. Kim expressed the hope that Korea would enter into a long-term energy relationship with the United States. He stated that his firm had purchased some Alaskan coal in connection with its cement plant operations, but the coal was wet and had to be mixed with other coals. Ssangyong is not now using Alaska coal.

Mr. Kim expressed his company's interest in any construction contracts which may arise from construction of the gas pipeline. Senator Fahrenkamp responded that it was her personal view that in awarding such contracts consideration would be given to companies of nations that participated in the financing and marketing of the gas and were themselves helpful in causing the project to happen.

The legislative mission then met with officials of the Doosan group. Senator Fahrenkamp made the points outlined above. Mr. Keh stated that Korea was interested in Alaska's resources. While Doosan was smaller than the big Korean trading companies, he was quite interested in those resources and also interested in participating in the construction of the natural gasline. Senator Fahrenkamp repeated the point about assistance causing the project to happen, previously made to Ssangyong officials.

The group met next with Mr. Cheon of Hyundai Construction Company. Hyundai is the largest of the Korean trading companies. Mr. Cheon stated that he had prior experience in construction projects in Alaska. He plans to be in Alaska in April. He expressed interest in construction of the gas pipeline. Senator Fahrenkamp repeated what she had told the other companies. Mr. Cheon wanted to know if the Hyundai built the project, could it be paid in natural gas. Representative Bettisworth stated that in his opinion, this was the only way the project would work. General discussion about Alaska's potential then followed.

The legislative mission then met with Mr. Roh, Vice Chairman of the Federation of Korean Industries (FKI), which is similar to the Keidenren. Mr. Roh stated that approximately 400 of the largest Korean companies are members of FKI. The FKI makes recommendations to the government after reaching an internal consensus.

Senator Fahrenkamp delivered her prepared remarks, whereupon there was a general discussion about the desirability of Korea purchasing Alaska's energy resources and other resources. Mr. Roh stated that the business community was anxious to expand its activities in Alaska.

Following the FKI meeting, the legislative mission was met with Mr. Lee, Vice-President of Daelim Construction Company. After Senator Fahrenkamp delivered her prepared remarks there again was a general discussion about construction activity in Alaska. Senator Fahrenkamp repeated her remark that any construction company that participated in the natural gas line would have to be from a country which participated in the financing and marketing study and itself was helpful in causing the project to happen.

In the evening the group attended a reception put on by Ambassador Walker for the Alaska legislative mission and a congressional mission which was then in Korea. During the course of this reception, members of the Alaska legislative mission had the opportunity to talk with members of the Korean National Assembly and with members of Congress regarding these energy issues. In particular, there was an opportunity to talk with Congressman Jack Hightower of Texas. Congressman Hightower stated that the congressional attitude against exporting Alaska oil was not strongly held, although he doubted it would pass the Congress at this time because of the power of maritime unions. The members of the National Assembly with whom conversations were conducted were very anxious that the oil export ban be lifted and that Korea participate in the purchase of Alaska's energy

resources. Members of the legislative mission also talked with Ambassador Walker and economic counselor Lundy and were promised all possible support from the Embassy in assisting the legislative mission in achieving its goal.

On Saturday, January 21, the Alaska legislative mission traveled to Pamunjon. The purpose of the trip was primarily to view the demilitarized zone and, secondarily, to experience first hand, Korean life which has been dramatically affected by its relationship with North Korea.

IV. Conclusion.

In conclusion, we believe that the objectives of the mission we set out to achieve were accomplished. However, much more work needs to be done. In this regard, we would urge that the recommendations made in Section II of this report be adopted.

ATTACHMENT I

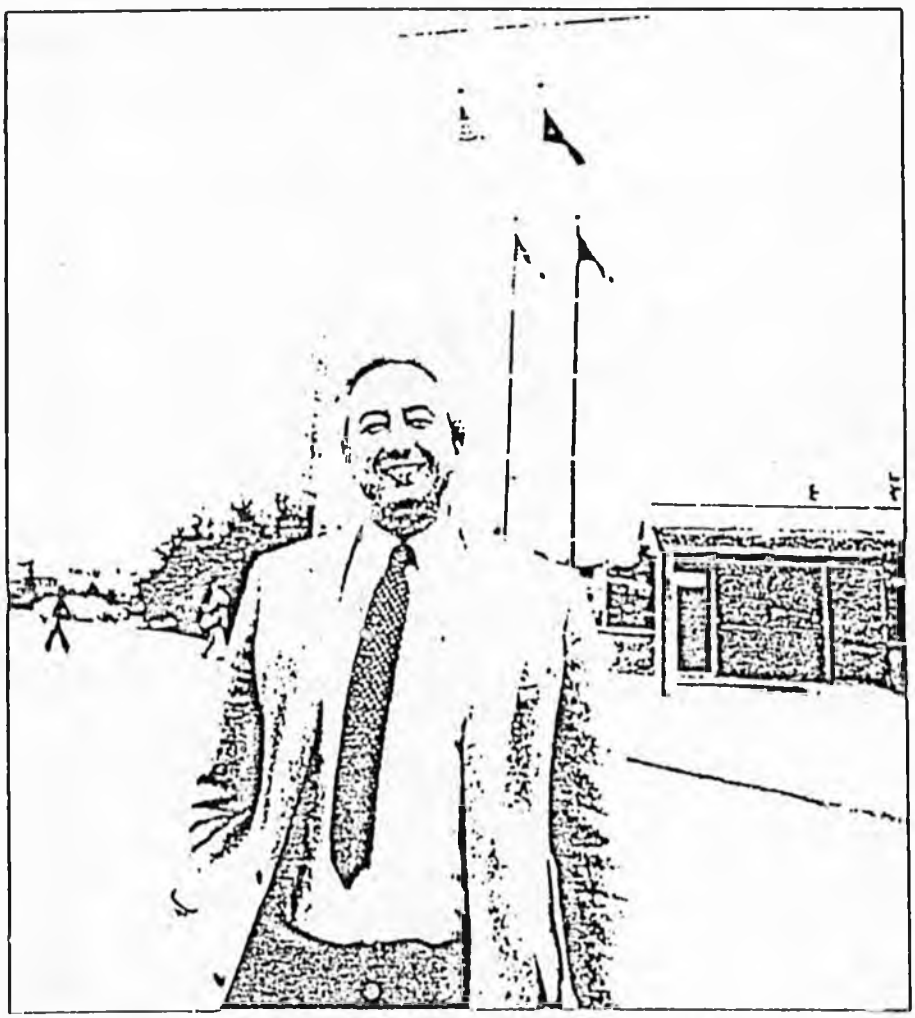
Forbes, November 7, 1983--"Northwest Passage"

Asia covets Alaskan fish, timber, coal and, especially, oil, and the state's little-known Native corporations are finding new trading partners.

Northwest passage

By Allan Dodds Frank

WHEN THE residential housing market slumps in Tokyo, it hurts Alaska Natives in Juneau and Sitka. When South Koreans get depressed, aphrodisiac prices there decline and Eskimos in Kotzebue lose profits. What's going on is that the Natives of Alaska, the Eskimos, Indians and Aleuts, are establishing business empires increasingly tied to the fortunes of the Pacific Rim. Japan and South Korea provide major markets for timber, fish, minerals and, yes, even reindeer horn, which old-fashioned apothecaries in Seoul finely grind into much-savored sex potions.



Cook Inlet Region, Inc. President Roy Huhndorf at headquarters in Anchorage
Alaskan coal to Japan?

Being in the export business is just one offshoot of the 1971 settlement, enacted by Congress, of the land claims of Alaska's 80,000 Eskimos, Indians and Aleuts. The Natives were granted 44 million acres, a land area equal to 2% of the entire U.S. To help them enter the capitalist mainstream, $962.5 million was thrown into the pot (FORBES, *OCT. 24*) to establish 203 village and 12 giant regional corporations. These are to administer the land and begin profitmaking ventures. Each Native received 100 shares in a regional corporation. To prevent takeovers by outsiders, Congress prohibited any stock sale until 1991.

"Until I became a Native American businessman, I always thought a strong American dollar was a good thing," says Roger Lang, a Tsimshian Indian who fishes commercially for salmon and halibut when not attending to his duties as a director of Sealaska Corp., a company with estimated timber assets in hemlock, spruce and cedar worth more than $200 million. He now knows a weak yen means weak sales. Lang adds that Canada, which he accuses of dumping logs, has hurt Sealaska timber sales to Japan, which last year were nearly 190 million board feet, mostly in round logs.

Overall the 12 Alaska Native corporations' profits have been improving *(see table, p. 222)*, but the big move forward will occur when world prices for oil, timber and fish improve. Until then the corporations will work on honing skills in scouting out new joint ventures. Several Native corporations have opened branches in Tokyo and Seoul, and more will follow. Alaska is midway between Tokyo and New York by air, and by water it's far easier to ship bulk commodities to the Pacific Rim than to the U.S. East Coast. Raw salmon is a big seller in the Orient, so several Native corporations, like Calista Corp. in southwest Alaska and Nana Regional Corp. in Kotzebue, have negotiated wholesale deals to sell fish caught by Natives to Japan.

For Nana, the South Korean market for reindeer horn is the margin that makes it possible to maintain a herd of 6,000 animals that also provides fresh meat for local Eskimos, all of whom are stockholders. The herd still loses money, which makes it a tax-loss carryforward on the hoof, but the slaughterhouse also is used in summer to process fish. Besides, Nana stockholders are constantly entertained by management's amusing efforts at rounding up the reindeer. Using tax-deductible toys—helicopters,

aircraft, three-wheeled vehicles and dog teams—they try to separate the reindeer from thundering herds of wild caribou. [They look alike and are compatible.] Nana also mines decorative quality jade that it sells to Taiwan for carving into clocks, ashtrays and little animals, even reindeer.

"In Japan they understand the Alaska market much better than anyone else," says Alex Raider, Calista Corp. president. Raider has enticed several major Japanese corporations, including Mitsui Engineering & Shipbuilding, Ltd. and Kawasho International Corp., into joint ventures to supply engineering expertise and steel for building offshore oil rigs in the Bering and Chukchi seas. It's not just the Asians who are doing business with the Native corporations. Remember, the dozen corporations control 44 million acres of the state and deal with the major U.S. oil companies, handling service and construction contracts. Natives and oilmen lobby together against environmentalists for sale of Alaska oil to Japan.

In the main, the Native corporations have staked their future on resource development, with nearly every corporation involved in joint ventures with oil companies.

Roger Izony, a Tsimshian Indian who is a Sealaska director
Learning that a strong dollar doesn't always help.

The most profitable Native corporation, Cook Inlet Region, Inc., is seeking a blend of Pacific Rim and domestic markets that other Native corporations are trying to duplicate. Cook Inlet President Roy Huhndorf says improvement of coal prices could make it economically feasible to ship to Japan from the corporation's massive Beluga coalfield near Anchorage, to be operated under lease by Placer Amex Inc. In the meantime, with proved oil and gas reserves, Cook Inlet "is going to stick to joint ventures with expert operators like Arco and Texaco," says Huhndorf.

The Native corporations always look for ventures that will employ shareholders, a notion that produces company ties akin to the Japanese cradle-to-grave employment approach. The Native leaders strive to create shareholder loyalty—William L. Hensley, president of Nana Development Corp., a Nana subsidiary, calls it "Sivuniigvik," spirit in Eskimo—to work against the temptation to sell out when 1991 comes around.

The Native corporations, however, have lost a friend with the resignation of James Watt, the Interior Secretary. Watt had pushed hard to unlock their lands for exploration and to get their land titles to them. He put federal lawyers to work on projects to make the Natives self-sufficient, even if it meant fighting The Sierra Club, which it has. As he told FORBES before his resignation, "The no-growth advocates who try to destroy the success of these corporations shouldn't be tolerated."

But then Watt believed in self-reliance for the Natives, not handouts. ■

On native ground

These 12 corporations, established by Congress, control most subsurface and surface rights to 44 million acres of Alaska and were given $962.5 million to set up businesses and manage the assets to make Alaskan Natives self-supporting. They can't sell their stock until 1991. Here's a situation report.

Corporation	Reporting year	Stockholders	Acreage (millions)	Settlement money	Equity	Long term debt	Current assets	Current liabilities	Earnings per share	Equity per share
				(in thousands)						
Ahtna Inc	1983	1,074	1.8	$15,085	$17,755	$ 877	$12,304	$1,354	$ 2.69	$17.34

MARKETS FOR ALASKAN TIMBER PRODUCTS PACIFIC RIM COUNTRIES

To

Forest Service, Region 10
U.S. Department of Agriculture

P-509
May 1983

B. The Market for Alaskan Timber Products in Korea

Korea is a country of few forest resources but a sizeable wood products industry that relies heavily on the export market. It exports large volumes of plywood worldwide and some lumber to Japan and the Middle East where Korean contractors are very active.

1. Market Structure for Alaskan Timber

Our investigation of the Korean market showed that only four firms import from southeast Alaska and one of these, a red cedar importer, was beyond the scope of the study. Each of the three applicable users is an integrated importer/processor importing hemlock and spruce directly from Alaska. The three importers used 75,500 m^3 of Alaska spruce and hemlock timber in 1981, most of which (83%) was western hemlock imported by one firm. Table 5 summarizes survey results of the three Alaskan timber importers. Alaskan timber represented 29 percent of their total timber volume, ranging from 25 percent to 75 percent. For all Korea, Alaskan timber represented only about one percent of the total timber usage in 1981.

2. End Use

The greatest single use of Alaskan timber is western hemlock in hidden interiors of houses. Western hemlock is also used in exposed house interiors and boxes and crates. Sitka spruce usually goes into the growing musical instruments industry, particularly Korean pianos.

3. Timber Quality and Desirable Characteristics

Most Korean concern about quality pertain to Sitka spruce which is used in the higher valued musical instruments industry. They are less concerned about the quality of western hemlock which they use primarily because of price consideration. The quality of hemlock logs is not good but acceptable at the low price Koreans pay (recently $200 per MBF, p.e.s.).

Table 5. Information summary on sawmills importing SE Alaskan timber, Korea 1/

Item	Survey results
Total annual volume:	
• Timber processed, all sources	260,667 m³
• SE Alaskan timber	75,500 m³
• SE Alaskan logs (n=1)	67,500 m³
• SE Alaskan cants (n=2)	8,000 m³
• SE Alaskan Sitka spruce (n=3)	13,000 m³
• SE Alaskan western hemlock - all logs	62,500 m³
Alaskan timber as % of total	1 mill - 27%, 2 mills - 75%
Recovery on logs	Sitka spruce - 65%, hemlock - 60%
Recovery on cants (n=2)	Sitka spruce - 70% and 75%
End Use	
o SE Alaskan western hemlock logs (n=1)	50%, House const. - hidden interiors 20%, House const. - exposed interiors 30%, boxes and crates
o SE Alaskan Sitka spruce scants	100%, Musical instruments

1/ A total of three integrated sawmills were surveyed and to the best of our knowledge they are the only Korean users of SE Alaskan Sitka Spruce and western hemlock. Each does its own importing of timber.

Koreans prefer the same qualities in Sitka spruce as the Japanese; high ring count, free of small knots and specific uniform grain angle. There have been problems attaining acceptable quality in most of these areas.

4. General Timber Situation in Korea

Demand

In 1981, total timber demand was 7.3 million m^3 (log equivalents), sawn from 11.6 million m^3 in 1978. Traditionally, most of Korea's demand for timber was for re-export. Recently domestic demand has become dominant mainly due to declines in the export market. In 1982, domestic demand is expected to account for 65 percent of the timber use and lower export demand will account for only 35 percent of the log use.

Most of the wood product exports is in the form of plywood, 2.5 million m^3 log equivalents in 1981 or 93 percent of exports. However, this is down sharply from a peak of 4.9 million m^3 in 1977.

The reduction in plywood exports is attributed to decreased supplies of suitable hardwood logs, more so than reduced plywood markets. Key hardwood exporting countries have significantly restricted log exports in recent years.

By 1990, Korean forestry officials expect annual timber demand to be 19 million m^3 annually. They expect the domestic demand to be 14.5 million m^3 and export demand to be 4.8 million m^3. We believe the export demand projection may decline faster than the government estimates. Domestic demand projections are reasonable if Korea can maintain its economic growth and increase housing starts which recently ranged from 200,000 to 250,000 per year.

Supply

In 1965 domestic timber accounted for 48 percent of the total supply. Imports became more and more important as the plywood and lumber re-export industry grew, and domestic sources supplied only 8 percent in 1978. Their proportional importance has increased sharply since 1978, however, up to 16 percent in 1981. This is largely because of reduced hardwood imports for the plywood re-export industry as discussed earlier. The actual volumes have been 800,000 to 900,000 cubic meters since the mid 1960's, topping 1 million m^3 in 1981.

Imported supplies reached a peak of 10.6 million m^3 in 1978, declining to 6.1 million m^3 in 1981. Most of this decline has been in the hardwood area and while the volume of imported softwoods is down some. Softwoods now represent a larger share of imports, 22 to 23 percent in 1978 to 1981 versus 8 percent in 1975.

5. Trends and Opportunities in the Korean Market

Due to a combination of increased demand for softwood and limited domestic resources, use of North American softwoods will presumably grow. Most of this will be in the form of logs but the share of processed timber is expected to grow.

If Alaska suppliers can be price competitive, they should expect increased exports to Korea. If current manufacturing practices hold, demand for Sitka spruce in musical instruments should increase. However, if spruce is replaced by other woods in piano keys, legs and frame, spruce demand could decline but such substitution does not appear likely.

While Korea can probably use more hemlock in the future, their actual hemlock imports will depend on what the Japanese do. If the Japan market strengthens, the Koreans will not likely compete with the Japanese for hemlock logs and cants. They will seek lower cost and lower quality substitutes. Thus, relative to Japan, the hemlock market in Korea does not look particularly good.

- Alaskan Sitka spruce is preferred over essentially all foreign spruces. Assuming prices are competitive no major threats to substitution exist and Alaskan volume should be a direct function of Japanese demand for spruce. At higher prices, substitutes do exist and will be used.

- The Japanese sawmills have had problems with quality control on Alaskan timber. We recommend Alaskan exporters start a program with key traders to identify specific problems and improve sorting and grading of timber for Japanese customers.

- The Japanese sawmillers are very interested in discussing their trading problems and establishing long-term trading relationships.

Korea is a much smaller importer than Japan but offers potential for growth in Alaskan timber imports. We offer the following specific conclusion and recommendations:

- Korea sawmillers and importers, compared to Japanese, are more price conscious and less quality conscious, particularly regarding hemlock.

- We recommend that Alaskan traders develop a sort specifically for the Koreans, like the K-sort used in the Pacific Northwest. This will complement the need to maintain higher quality and prices for the Japanese market. The lower quality material can be sorted out and sold to Korea at a fair price.

- Korean plywood mills are facing great difficulty securing Southeast Asian hardwood. They may be able to substitute some Alaskan species, e.g., cottonwood or the larger white spruce logs, to replace part of the hardwood needs and Alaska should investigate this potential.

Taiwan offers potential for Alaskan timber primarily by increasing volume in current use areas. Both spruce and hemlock markets are exploitable and current volumes could be increased in multiples. However, even if increased the volume scale will be low compared to Japan.

The People's Republic of China is a large potential market but the purchasing process is complex and not conducive to seller initiated marketing. We recommend the Alaskan traders establish a representative to work with the U.S. Chinese trade officials (The China National Native Produce and Animal By-Product Import and Export Corporation (Tuhsu)) to assure that Alaskan exporters are informed about Chinese buy orders and can respond accordingly.

V. THE POTENTIAL MARKETS FOR ALASKAN TIMBER PRODUCTS IN KOREA

A. Background

Korea is a country with few forest resources, but with a sizeable wood products export industry. The domestic forests were heavily cut in the later years of Japanese occupation for military construction purposes and before they could recover were again cut over for firewood during and just after the Korean War. They now consist largely of planted pines, growing slowly on rather poor sites, and planted poplars, plus limited old growth hardwoods, pines, and other conifers. The acreage is extensive but stocking is low, except in the poplar plantations. Total forest area is 6.6 million hectares, with an estimated 111 million cubic meters of growing stock, or 16.8 cubic meters per hectare.

Exports consist mostly of plywood produced from imported Southeast Asia hardwood logs. In recent years American softwood logs have provided the raw material for construction lumber exported to Japan and the Middle East, where Korean contractors are very active. As of 1981, Korea depended on imports for 83 percent of its timber requirements.

B. The Market Structure for Alaskan Timber in Korea

1. Importers, Sawmills and Channels of Distribution

To the best of our knowledge there are four firms that import from southeast Alaska, but only three fall strictly within the scope of this study. The fourth is a red cedar importer and falls outside the scope of this study. For the applicable cases, the market structure is the same. Each is an integrated importer/processor who imports directly from Alaska. One importer does sell a minor quantity to small independent sawmills.

The three importer/processors imported about 75,500 m³ of Alaskan timber in 1981 according to survey responses. Most of this, 83 percent, was K-sort hemlock logs imported by one firm (Table V-1). Sitka spruce imports totaled 13,000 m³ of which 8,000 m³ were cants. In 1980, one firm reported they had imported hemlock cants also, but lost money on the venture and have not repeated it.

The Alaskan timber represents about 29 percent of the total volume of the three processors and ranges from 27 percent to 75 percent. For the total Korean industry, Alaskan imports represented only about one percent of total timber usage in 1981.

2. End Use

As shown in Table V-1, the greatest share of the Alaskan timber, 31,250 m³ of western hemlock, went into hidden interiors of houses. The remainder of the western hemlock was used in exposed house interiors and boxes and crates. Sitka spruce, logs or cants, usually went into the growing musical instruments industry, particularly Korean pianos.

3. Preferences

Korean preferences for Sitka spruce require a high ring count, an even knot distribution and a specific uniform grain angle. They tend to be less concerned about quality characteristics in hemlock which is used in lower value or hidden end products.

In the case of the hemlock logs, they are generally satisfied and accept the trade-off in quality for the low price they pay (recently $200 per MBF, FAS). Alaskan logs are criticized, however, for a high percentage of center defects. While specifications do allow up to 40 percent deduction from gross for these defects, the usual deduction is less than 20 percent. Also, the overall recovery rate on logs is relatively high, 60 percent, considering the low grade of logs imported.

Table V-1. Information summary on sawmills importing SE Alaskan timber, Korea 1/

Item	Survey results
Total annual volume:	
• Timber processed, all sources	260,667 m³
• SE Alaskan timber	75,500 m³
• SE Alaskan logs (n=1)	67,500 m³
• SE Alaskan cants (n=2)	8,000 m³
• SE Alaskan Sitka spruce (n=3)	13,000 m³
• SE Alaskan western hemlock - all logs	62,500 m³
Alaskan timber as % of total	1 mill - 27%, 2 mills - 75%
Recovery on logs	Sitka spruce - 65%, hemlock - 60%
Recovery on cants (n=2)	Sitka spruce - 70% and 75%
End Use	
• SE Alaskan western hemlock logs (n=1)	50%, House const. - hidden interiors 20%, House const. - exposed interiors 30%, boxes and crates
• SE Alaskan Sitka spruce cants	100%, Musical instruments

1/ A total of three integrated sawmills were surveyed and to the best of our knowledge they are the only Korean users of SE Alaskan Sitka Spruce and western hemlock. Each does its own importing of timber.

Preferences or criticisms of the spruce timber were at least more vigorous, if not more serious. One importer notes that only 40 percent or so of the Sitka spruce is really suitable for sounding boards in pianos, its intended use. They complain about knots, unacceptably wide grain, wavy grain, pitch pockets or lines, excessive hardness and instability in drying. As a result of these defects, one processor has accumulated about 500 MBF of material that they cannot use--presumably it could be used for legs but the requirement for legs is not large enough to use defective material. In contrast, the other Sitka spruce importer did not have major complaints about quality.

C. The General Situation for Timber in Korea

Given the status of Alaskan timber imports in Korea, we now provide an overview of the aggregate timber market. Topics covered include demand and supply which will lead to a final section on opportunities for Alaskan timber in Korea.

1. Demand

The total demand for timber in Korea was 11.6 million cubic meters (log equivalent) in 1978, declining to 7.3 million in 1981. The Office of Forestry forecasted, about a year ago, that 1982's demand would be up to 8.3 million cubic meters. 1982 data were not available at the time of the visit, but it is apparent that there has been an appreciable increase over 1981. Table V-2 shows the demand from 1965 to date by category of domestic use, and by domestic vs. re-export requirements.

According to the Korean Office of Forestry, Korea's domestic needs were much less than those of the Korean re-export industry through the late 1960's and up to 1977. During those years the re-export sector took almost 60 percent of the total demand, reaching 66 percent in 1976. Still, its importance has declined recently, and is likely to decline even more in the future.

Table V-2. Korea's wood products demand

	1965	1970	1975	1978	1979	1981	1982
	----------1000 m³ log equivalents----------

Plywood	-	-	-	541	1,792	1,345	1,132
Other	403	1,057	2,159	4,875	3,965	2,115	2,911
Total	748	1,713	2,889	6,346	6,616	4,585	5,417
Export use							
Plywood	511	2,279	3,226	4,528	3,031	2,497	2,413
Other	1	17	350	737	1,293	183	460
Total	511	2,287	3,576	5,265	4,324	2,680	2,873
Total Demand	1,259	4,000	6,465	11,611	10,940	7,265	8,290

Note: 1982 figures are a forecast perpared at the end of 1981, apparently reasonably accurate.

Source: Assembled from data obtained from the Korean Office of Forestry.

a. Domestic requirements

The categories of domestic use into which the Office of Forestry groups its figures, and which are shown in Table V-2, are pitprops, pulpwood, plywood and general use (presumably lumber in its various applications and particle board). The plywood and general use categories cover housing and other construction, furniture and musical instruments, and boxes and crating material.

Since Korea is heavily export-oriented, an unknown but certainly quite large part of domestic use should perhaps be assigned to the re-export sector - e.g., furniture, musical instruments and the packing materials needed for all kinds of export items. These requirements would exist in most countries, but in Japan and the United States, for example, they are small compared to other domestic needs. In Korea, they probably inflate domestic demand to a significant degree.

Domestic use peaked in 1979, at 6.6 million cubic meters, declined to 4.6 million in 1981. Government stimulation of the housing industry was to increase domestic use to 5.4 million in 1982.

The current rate of housing starts is between 200,000 and 250,000 annually, and is expected to increase slightly. Data were not available on the number of multi-unit vs. single-family dwellings. However, in terms of wood use it is probably not as significant as in Japan because there are very few wood-frame buildings. Wood is used primarily in door and window frames, floors, ceilings and roofs to some extent, doors and some cabinetry, and in concrete forming.

The volume of wood used per housing unit is estimated to be 7.1 m^3. Housing, therefore, would be using 1.4 to 1.8 million cubic meters per year, plus whatever is used temporarily for concrete forming, perhaps another 0.2 or 0.3 million. Plywood and general use took 3.5 million cubic meters is 1981, so roughly another 0.5 million were required for other construction, furniture, crating, etc.

b. Re-export

Starting in the early 1960's, Korea became the world's most important in-transit processor/producer of hardwood plywood, using Southeast Asian logs. This activity peaked in 1977, with 4.9 million cubic meters of logs--half of Korea's total log requirements in that year. It has since dropped sharply, to 2.5 million in 1981.

Reduced plywood markets in North America, Europe, Japan, etc. are not the only factor in the decrease in Korea's plywood re-export trade. The declining availability of suitable logs is more significant and promises more future problems for the industry. Indonesia and the Philippines have severely restricted log exports, leaving only Papua New Guinea and the Malaysian states of Sabah and Sarawak as places from which logs may be exported on a reasonably open market basis As a result, Korea must compete with Taiwan, Singapore and Japan for these remaining log sources.

The Korean plywood industry has two options for dealing with this problem. They are:

- shift their operations to the resource country which many companies either have done or are planning to do. This, of course, removes their log requirements from Korea's total demand.

- Substitute other woods for Southeast Asian hardwoods, in core and cross-band veneer. The possibilities include Korean plantation poplar, cottonwood from North America, tight-knotted softwood logs from North America, or imported veneer of softwoods, aspen, etc.

Korea also exports lumber, moldings and other remanufactured wood products, although this is much less important than plywood export. The raw material for this includes North American softwoods, re-exported to Japan and to

Korean construction companies working in the Middle East. This sector took 1,293,000 cubic meters of logs in 1979, dropping to 183,000 in 1981 and supposedly increasing to 460,000 in 1982.

Export statistics cast doubt on the above figures, however. In 1981, Korea apparently exported 262,000 cubic meters of lumber, moldings, and other processed lumber of which 219,000 cubic meters were softwoods for Japan and the Middle East. Probably about 400,000 cubic meters of logs would have been needed to produce this volume, suggesting that lumber re-export is much more important than the 183,000 cubic meters shown in Table V-2.

c. Future demand

The Office of Forestry has prepared a forecast of timber demand and supply up to the year 2030. This was done in 1978 and their estimate for 1980, not surprisingly, missed significantly as the world-wide economic climate suddenly worsened. Their long-term forecasts are presumably more reliable, if their analysis of underlying domestic trends is soundly based. These forecasts are:

	Domestic use	Export use	Total
	million cubic meters		
1990	14.5	4.8	19.3
2000	19.5	3.0	22.5
2010	22.7	2.5	25.2
2020	24.6	2.0	26.6
2030	25.6	1.5	27.1

It would not be surprising if the export sector's demand declined faster than these figures suggest, particularly with respect to plywood. As domestic demand increases and as the plywood industry struggles with its raw materials problems, a larger decline in exports is possib

2. Supply of Timber

a. Domestic supplies

In 1965 domestic timber accounted for 48 percent of the total supply. Imports became more and more important as the plywood and lumber re-export industry grew, and domestic sources supplied only 8 percent in 1978. Their proportional importance has increased sharply since 1978, however, up to 16% in 1981. This is largely because of reduced imports for the plywood re-export industry as discussed earlier. The actual volumes have been 800,000 to 900,000 cubic meters since the mid 1960's, topping 1 million in 1981.

Data were not obtainable on the species composition of domestic production, but from our knowledge of Korea it estimated that well over half would be pine, about one-tenth plantation poplar, and the balance other conifers, oak, chestnut and miscellaneous other hardwoods (e.g., walnut, persimmon, Paulownia).

Domestic logs are mostly small and of rather low grade and poor form. Their end uses are:

- Conifers: construction, generally utilizing small cross-section and short lengths.
- Poplar: packing material, chopsticks, blockboard.
- Hardwoods: furniture, sliced veneer (particularly in narrow widths and short lengths for items such as plywood parquet), and specialty purposes such as golf club heads (persimmon), and Japanese-style solid or veneered furniture (Paulownia).

Table V-3 shows the sources of Korea's timber supply from 1965 to date.

Table V-3. Sources of Korea's timber supply

Source and species	1965	1970	1975	1978	1979	1981
	----------1000 m³ log equivalents----------

Total supplies	1,259	4,000	6,465	11,611	10,940	7,265

Source: Assembled from data obtained from the Korean Office of Forestry.

b. Imports

Imports reached a peak of 10.6 million cubic meters in 1978, declining to 6.1 million in 1981. Industry sources consider an increase to 6.3 million, likely in 1982. Southeast Asia and the South Pacific are the principal sources, and from 1965 to 1977 this area supplied 85-95 percent of imports. Softwood imports increased sharply in 1978, and as of 1981 they reduced tropical hardwoods' share of the market to 72 percent.

Tropical hardwoods are used mostly for plywood, but also for other purposes such as lumber and remanufactured product exports, furniture, domestic moldings, window frames, and construction. Table V-4 compares the Office of Forestry data on domestic and export plywood raw material requirements, and on tropical hardwood imports, in order to get some idea of the hardwood volume that goes into these uses.

Softwood imports have so far come mainly from the United States. New Zealand and Chile are suppliers of Monterey pine, accounting for about 27 percent in 1981. Korea has also started to buy Siberian logs, either transshipped or redocumented in Japan. There has been some imports from Canada in the past few years, the volume is not available. We suspect that it is quite small.

With a few exceptions, Korean importers have but one criterion for softwoods--price. Color, grain characteristics, knot placement, ring count and log size mean little. Knot size is of some significance, however, since Korea, like other Asian countries, uses lumber in some very small cross-section, it does not seem to be a serious problem. Also, logs with smaller knots are selected for this type of end product. One product that can accept large knots, provided they are tight, is crating material for machinery exports, etc. Monterey pine, from New Zealand and Chile, is used for this, as it is in Japan.

Table V-4. Korean plywood requirements and tropical hardwood imports

Tropical hardwood used for lumber, moldings, etc. (domestic and export)	3,128	3,063	950

Source: Assembled from data obtained from the Korean Office of Forestry and the Korean Traders Association.

West Coast exporters prepare a class of logs for the Korean market, appropriately called "K Sort." Ideally this consists of small second-growth logs, in long lengths, so that the Korean mills can benefit from the very high Scribner MBF/cubic meter conversion factor. While the Japanese market accepts small logs (down to 6":), the Koreans also accept a considerable degree of roughness, i.e. more knots, sweep, crook bark seams, center rot and, catfaces. The Korean market will also accept larger logs with considerable center defect (say, up to 35-40 percent of the gross volume), provided it is scaled out and the poorer stowage on board ship is accounted for in the price.

U.S. lumber grading rules are not applicable to Korean usage, because with a wide variety of small sizes the Korean sawmillers can recover clear lumber where U.S. sawmillers could not. However it may be useful to describe Korea's lumber use in terms of these rules to provice an idea of what is needed from their softwood supplies. Some characteristics are:

- A moderate amount of improvement in recovery--upgrading from purchase basis by remanufacturing into small sizes. This end result, achievable directly in the sawmill, will not be very large because most of the logs imported are small second-growth, with tight knots.

- A moderate amount of utility grade lumber, used domestically, probably most of it as boxes or packing material.

- A moderate amount of Standard grade, used domestically or exported to Japan or the Middle East.

- Some Construction grade--probably most of which is exported to Japan.

- A little No. 1, Select Structural, Shop Grades, or Clears, probably used locally for miscellaneous special uses or exported to Japan.

Two exceptions to these remarks are:

- Sitka spruce for the musical instrument manufacturers, whose requirements are even more stringent than those of their Japanese counterparts. Korea does not have the same outlets as Japan for spruce which, while not meeting musical instrument specifications, is still of rather high grade, and

- Red cedar, which has come into fashion in Korea for wall panelling. In this case the Koreans are forced into taking lower grade sawlogs in order to get the larger logs that yield clear lumber for panelling; the lower grade logs then go into general uses, probably including crating.

D. Trends and Opportunities in the Korean Market

1. Future Timber and Lumber Supplies

The production forecasts developed by the Office of Forestry indicates an aggressive production level for domestic timber. Supplies are projected to increase to 13 million m^3 by 2030 or 42 percent of the projected demand in that year. By 1990, however, domestic supplies are expected to be at only the 3 million m^3 level, or 15 percent of demand. These forecasts rely heavily on poplar, which of course grows much faster than any native species. Poplar volume is expected to reach a plateau of 5 million cubic meters per year by 2010.

Imports are forecast to grow, with domestic demand, to 16.4 million cubic meters in 1990, but to decline to 14.1 million in 2030, as domestic supplies increase. The importance of North America as a supply source is likely to increase, as Korea's overall demand comes to consist more of domestic construction needs and less of (mostly plywood) re-export raw material.

Table V-5 shows the Office of Forestry's estimates of where supplies will come from between now and 2030, plus our own estimate of how much North America might provide. Our estimate is based on these assumptions:

- Korea's re-export industry will continue to have difficulties competing for South Seas hardwoods to supply the necessary component for the plywood component.

- The domestic plywood requirement will account for about one-third of total domestic demand. A part of the domestic demand will be filled by softwood plywood imports; some softwoods will be used for veneer in domestic plywood production.

- As a result of increasing difficulty in obtaining tropical hardwood logs, the volume of tropical hardwoods used for purposes other than plywood will decline. The combined domestic and export plywood demand will approximate the extent of tropical hardwood imports.

Up to now Korea has imported almost all its lumber requirements as logs, with relatively little material in cants, squares, lumber, particle board, etc. From our analysis of the market, we believe Korea will gradually import more and more finished of semi-finished wood products. It is difficult to quantify this, but the areas in which such imports are likely to show the most growth are:

- Korean specification construction lumber sawn in North American mills from K Sort logs--similar to those mills that now produce to Japanese specifications,

- hardwood lumber as by-products of Korean plywood operations in Indonesia, etc.,

- softwood veneer and plywood, and

Table V-5. Future sources of Korea's timber supply

- North American particle board.

2. Opportunities for Alaskan Timber Species

Within the general setting, it is also possible to gain some insight about opportunities for Sitka spruce, western hemlock and some other Alaskan products.

a. Sitka spruce

As mentioned, the Korean musical instrument industry uses about 5 million BF or (13,000 cu. m.) of spruce per year. This figure is likely to increase somewhat, according to the largest piano manufacturer. They report increasing demand for Korean-made pianos, and to satisfy this they are increasing their capacity. Within a couple of years the total demand will probably be about 7 million BF or (18,000 m^3).

Also as mentioned, the demand could theoretically be halved, or at least reduced, if spruce are supplied only in sounding board quality and basswood and other species are used for keys, legs, etc. In practice, basswood might not be as convenient to import as spruce, and so it seems rather likely that spruce will maintain its position.

Since even the highest grade log is bound to contain considerable non-music grade material, we think it is reasonable to say that cants, containing as much as possible of music grade cuttings, would be preferred if the end-users could get them. Some of the smaller companies are now making efforts in this direction.

b. Hemlock and lower grade spruce

Only a very small percentage of Southeast Alaska hemlock and spruce is really suitable for the Korean market - top grade spruce for musical instruments, and small, knotty and preferably sound logs of either species.

What lies in between is too good, in the sense that it possesses characteristics (tight grain and generous yield of clear lumber) that command a premium in Japan but are in most cases of no importance in Korea.

Korea's current log imports from Alaska are covering not only the small low quality, knotty logs but also the next layer of quality upwards - as previously described, logs that will yield a considerable amount of clear lumber but which have a lot of defect. This is probably due to two factors:

- the current low prices for all logs which brings more logs within the range that Korean importers are willing to pay, and

- the overall lower level of logging activity in the Pacific Northwest, which reduces the volume of K Sort logs available there.

When the Japanese market improves, or as the yen strengthens against the dollar, it is almost certain that some of the logs now being bought by Korea will be priced out of the Korean's reach, and either imported by Japan in the round or custom sawn into cants. When this happens exports to Japan from the Pacific Northwest will pick up, producing more K Sort logs as a kind of by-product; some of the Koreans' buying will presumably then shift back to that area.

One might suppose that the small percentage of "true K Sort" logs produced from National Forest land in Southeast Alaska could be sawn into cants that would then be suitable and reasonably priced for the Korean market. We do not think so, for these reasons:

- such logs are, at most, 16" in diameter, and the lower productivity with small logs makes the canting process inordinately expensive, and

- with larger logs, the cost of producing cants may be partly offset by a real freight saving, as defective material is sawn out. With small, knotty but reasonably sound logs this saving is not available.

In short, these logs should, perhaps, be available for export to Korean in the round.

c. Red cedar

Unless red cedar panelling is a passing fad, the projected growth of Korean domestic demand, based on housing and other building construction, will mean more demand for red cedar, and more opportunities to supply it to small scale importers or end users in the form of cants.

d. Other Alaskan possibilities

Moving north and west along the Gulf of Alaska coast, the percentage of logs that are suitable for Korea rises sharply. In places such as Seldovia, Port Chatham and Afognak and Kodiak Islands about half of the volume could be considered K Sort.

Possibilities for Korea's plywood industry exist in cottonwood, white spruce, and perhaps birch, as log or maybe even veneer imports.

In general, the Korean market prospects are good for high grade spruce logs or cants and for red cedar. The market size is small compared to Japan, however. The Korean market does not look particularly good for hemlock or low grade spruce, as Koreans will not compete price-wise with the Japanese for this timber. As described above, some other Alaskan timbers also have some market potential and deserve some attention.

HB

680

Orate #1

AOGA PROPOSED TESTIMONY ON HOUSE BILL NO. 680

HOUSE LABOR AND COMMERCE COMMITTEE

MARCH 7, 1984

Good morning. I'm ~~Dave Yesland~~, Senior Staff Environmental Engineer with Shell Western E & P. ~~I'm~~ representing the Alaska Oil and Gas Association ~~this morning~~ and I will comment on the proposed Committee Substitute for HB680.

~~Our Association supports the intent of CSHB680~~, which is to provide the legislation necessary to enable the State to be the sole administrator of a permitting program for underground injection wells related to oil and gas production activities, or Class II wells, as they are identified in the Federal program. I will ~~discuss the~~ reasons for our support.

Without State preemption of the Federal program there will be redundant State and Federal programs with nothing but duplicated record-keeping and administrative delay as a result.

We have had a concern that existing statutes might prevent the State from preempting the Federal program because confidentiality provisions and penalty imposition limits may not meet the Federal requirements. We believe this bill will eliminate that concern.

Our Association prefers that the permitting process for injection wells, related to oil and gas operations, be controlled by the

state. The regulation of oil and gas operations by the Alaska Oil and Gas Conservation Commission is an example of regulatory control based on well-established knowledge of the regulated activity.

Therefore, we believe the Alaska Oil and Gas Conservation Commission is the appropriate administrator of regulations that bear on the technical elements of oil and gas operations and it should be the sole administrator of Class II wells in the state.

Finally we have seen that the Federal program, as proposed, would reduce the production rate of secondary recovery projects (water floods) by requiring that current injection pressure be reduced. The EPA's basis for lower pressures is no more than a "rule-of-thumb" which they acknowledge may be changed on a case-by-case review. But, until that review is completed, pressure would have to be reduced to comply with the regulations. This reduction would not only reduce current production rates, but even if only temporary, would reduce the ultimate total production of the formation causing revenue losses to both the State and producer. It is therefore a matter of mutual urgency.

If the proposed Federal rules are promulgated in the absence of State intent and ability to assume the program there will be a loss with no measure of compensation.

We urge the State to assume primacy in the regulation of Class II injection wells and we believe this bill contains specific statutory language which will serve this purpose.

Thank you.

BILL SHEFFIELD
GOVERNOR

HB 680

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 13, 1984

The Honorable Joe Hayes
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the Alaska Oil and Gas Conservation Commission. This bill would give the state the authority to assume control and regulation of injection wells associated with oil and gas production, such as salt water disposal or enhanced recovery of natural gas or oil. The U.S. Environmental Protection Agency currently has that authority. A 1980 amendment to the Safe Drinking Water Act (42 U.S.C. sec. 300f -- j) added a new sec. 300h-4 that would allow a state to obtain primary enforcement responsibility from the federal government for those portions of its Underground Injection Control program related to the recovery and production of oil and gas. Instead of imposing the existing federal regulatory requirement, sec. 300h-4 would give a state that authority if the state could demonstrate that it had an effective program to prevent underground injection which endangers drinking water sources. This bill would give the state that authority.

Sincerely,

Bill Sheffield
Governor

QUESTIONS

HB#680--3/7/84

MEMO:

FROM:MERRILL

TO: JOHN

1.) HAVE THE FEDS BEEN DOING THIS ELSEWHERE? AND EVEN IF WE PASS THIS BILL GIVING THE STATE THE AUTHORITY SO THAT IT MAY APPLY FOR TRANSFER, DOES IT GUARANTEE THAT WE'LL GET IT?

2.) IF THE FEDS ARE MAKING THIS TRANSFER POSSIBLE, ARE THEY PROVIDING ANY PROGRAMS TO HELP THE STATE FUND IT?

A.) FOLLOW UP: IF THERE ARE GOING TO BE FEDERAL FUNDS AVAILABLE, ISN'T THE FISCAL NOTE RATHER HIGH?

HB# 680

Rules by request of the Governor
Relating to oil & gas recovery

ANALYSIS FOR LABOR & COMMERCE COMMITTEE
7 March, 1984

This bill will basically give the state authority, enabling it to apply to the EPA for transfer of authority to control and regulate injection wells associated with oil & natural gas production. The Governor in his message transmitting this bill to the House, stated:

"THIS BILL WOULD GIVE THE STATE THE AUTHORITY TO ASSUME CONTROL AND REGULATION OF INJECTION WELLS ASSOCIATED WITH OIL AND GAS PRODUCTION, SUCH AS SALT WATER DISPOSAL OR ENHANCED RECOVERY OF NATURAL GAS OR OIL. THE U.S. ENVIRONMENTAL PROTECTION AGENCY CURRENTLY HAS THAT AUTHORITY. A 1980 AMENDMENT TO THE SAFE DRINKING WATER ACT, ADDED A NEW SECTION 300h-4 THAT WOULD ALLOW A STATE TO OBTAIN PRIMARY ENFORCEMENT RESPONSIBILITY FROM THE FEDERAL GOVERNMENT FOR THOSE PORTIONS OF ITS UNDERGROUND INJECTION CONTROL PROGRAM RELATED TO THE RECOVERY AND PRODUCTION OF OIL AND GAS. INSTEAD OF IMPOSING THE EXISTING FEDERAL REGULATORY REQUIREMENT , SEC. 300h-4 WOULD GIVE A STATE THAT AUTHORITY IF THE STATE COULD DEMONSTRATE THAT IT HAD AN EFFECTIVE PROGRAM TO PREVENT UNDERGROUND INJECTION WHICH ENDANGERS DRINKING WATER SOURCES. THIS BILL WOULD GIVE THE STATE THAT AUTHORITY."

AOGA PROPOSED TESTIMONY ON HOUSE BILL NO. 680

HOUSE LABOR AND COMMERCE COMMITTEE

MARCH 7, 1984

Good morning. I'm Dave Yesland, Senior Staff Environmental Engineer with Shell Western E & P. I'm representing the Alaska Oil and Gas Association this morning and I will comment on the proposed Committee Substitute for HB680.

Our Association supports the intent of CSHB680, which is to provide the legislation necessary to enable the State to be the sole administrator of a permitting program for underground injection wells related to oil and gas production activities, or Class II wells, as they are identified in the Federal program. I will discuss the reasons for our support.

Without State preemption of the Federal program there will be redundant State and Federal programs with nothing but duplicated record-keeping and administrative delay as a result.

We have had a concern that existing statutes might prevent the State from preempting the Federal program because confidentiality provisions and penalty imposition limits may not meet the Federal requirements. We believe this bill will eliminate that concern.

Our Association prefers that the permitting process for injection wells, related to oil and gas operations, be controlled by the

state. The regulation of oil and gas operations by the Alaska Oil and Gas Conservation Commission is an example of regulatory control based on well-established knowledge of the regulated activity.

Therefore, we believe the Alaska Oil and Gas Conservation Commission is the appropriate administrator of regulations that bear on the technical elements of oil and gas operations and it should be the sole administrator of Class II wells in the state.

Finally we have seen that the Federal program, as proposed, would reduce the production rate of secondary recovery projects (water floods) by requiring that current injection pressure be reduced. The EPA's basis for lower pressures is no more than a "rule-of-thumb" which they acknowledge may be changed on a case-by-case review. But, until that review is completed, pressure would have to be reduced to comply with the regulations. This reduction would not only reduce current production rates, but even if only temporary, would reduce the ultimate total production of the formation causing revenue losses to both the State and producer. It is therefore a matter of mutual urgency.

If the proposed Federal rules are promulgated in the absence of State intent and ability to assume the program there will be a loss with no measure of compensation.

We urge the State to assume primacy in the regulation of Class II injection wells and we believe this bill contains specific statutory language which will serve this purpose.

Thank you.

PROPOSED AMENDMENT NO. 1

FOR

CS House Bill No. 680 L & C

Add to the Bill a new Section 4 as follows and renumber subsequent Sections accordingly:

* Sec. 4 AS 31.05.170 is amended by adding a new subsection to read:

(14) regular production means continuing production of oil or gas from a well into production facilities and means for transportation to market, but does not include short term testing, evaluation, or experimental pilot production activities which have been approved by permit or order of the commission.

RE: Petition for Rehearing, ARCO Alaska, Inc. to the Alaska Oil and Gas Conservation Commission

Dear Barbara,

Attached for your review is the Stipulation and Settlement in the above-entitled matter. This document includes the comments we reviewed on Monday, February 27, 1984. I have executed 2 original copies of the settlement on behalf of ARCO. After you and the members of the Commission have executed the settlement, please transmit a copy to me.

If you have any questions, please advise me. Thank you for your assistance in resolving this matter.

Very truly yours,

S. M. Williams

Attachment

Before the Alaska Oil and Gas
Conservation Commission

In the matter of)
ARCO Alaska, Inc.) Stipulation and Settlement
)

This Stipulation and Settlement is entered into by ARCO Alaska, Inc. (ARCO) and the State of Alaska Oil and Gas Conservation Commission (AOGCC);

WHEREAS ARCO is the owner of certain acreage located on the North Slope of Alaska, including Section 35 of ADL 25649, located within the boundaries of the Kuparuk River Unit; and

WHEREAS ARCO applied to the AOGCC for approval to conduct the West Sak Sands Pilot Project to determine the optimum techniques for development of the West Sak Reservoir, and gather data for use in pool rules hearings; and

WHEREAS the AOGCC approved the West Sak Sands Pilot Project by Conservation Order No. 191; and

WHEREAS, since that time, ARCO has conducted the West Sak Sands Pilot Project in accordance with Conservation Order No. 191; and

WHEREAS oil and gas test production has ensued from the West Sak Sands Pilot Project Area; and

WHEREAS ARCO has filed confidential reports setting forth the production levels on the West Sak Sands Pilot Project Area for the month of December 1983, and January 1984; and

WHEREAS there is a dispute between ARCO and the AOGCC on whether the test production must be reported on Form 10-405; and

WHEREAS the AOGCC, by Order dated January 25, 1984, ordered ARCO to file the December 1983 production data on Form 10-405; and

WHEREAS ARCO, on February 10, 1984, petitioned the AOGCC for rehearing and reconsideration in accordance with the provisions of AS 31.05.080; and

WHEREAS it is the desire of both the AOGCC and ARCO to settle these matters;

NOW THEREFORE, ARCO and the AOGCC agree to stipulate and settle these issues as follows:

1. Until the date the pilot production facility to be located at the West Sak Sands Pilot Project Area commences normal operations and processes, and treats production from West Sak Sands Pilot production wells, or July 1, 1984, whichever date is earlier, ARCO shall file a monthly report on or before the 20th day of the month, commencing with a report on March 20, 1984 showing the test production levels, injection levels, and other test production data and information gathered by ARCO for the previous month. Such report shall be in the form and provide the specific information included in the reports filed by ARCO for December 1983, and January 1984. These reports will be kept and maintained confidential by the AOGCC in accordance with AS 31.05.035(d). Such reports shall be in addition to the quarterly report

required by Conservation Order No. 191, Rule 11.

2. Upon commencement of normal operations of the West Sak pilot production facility or July 1, 1984, whichever is earlier, ARCO must file all previously filed production reports on Form 10-405, or appeal to the Superior Court within 20 days of July 1, 1984 pursuant to the provisions of AS 31.05.080(b).

3. The AOGCC agrees to not claim, contend, or bring any action against ARCO under AS 31.05.150 of the Alaska Oil and Gas Conservation Commission statutes, or contend that ARCO violated AOGCC regulations for failure to file Form 10-405 showing West Sak Pilot test production information so long as ARCO is in compliance with the provisions of this Stipulation and Settlement, Conservation Order No. 191, and the AOGCC Regulations.

4. Because a dispute exists between ARCO and the AOGCC, this settlement shall not be construed as setting precedent or predjudicing any claims, arguments, or contentions of either ARCO or the AOGCC with respect to any of the issues set forth in this stipulation. Both the AOGCC and ARCO agree not to use this settlement as evidence in any proceeding before any court of law or administrative body, except as necessary to enforce the provisions set forth in this stipulation and settlement.

5. The AOGCC order issued January 25, 1984 is hereby amended to conform to this Stipulation and Settlement.

Agreed to and approved this 29th day of February, 1984.

PROPOSED AMENDMENT No. 2

FOR

CS House Bill No. 680 L & C

Add to the Bill a new Section 2 as follows and renumber subsequent sections accordingly:

* Sec. 2 AS 31.05.030 is amended by adding a new subsection to read:

(i) The commission shall have the authority to act as the jurisdictional agency over applications involving natural gas price determinations for all wells in Alaska not under federal jurisdiction, pursuant to the "Natural Gas Policy Act" of 1978, Public Law 95-621 and applicable regulations.

Subpart E—Identification of State and Federal Jurisdictional Agencies

[¶ 24,451]

Sec. 274.501 Jurisdictional agency.

(a) *Definition.* Except as provided in paragraph (b), "jurisdictional agency" means:

(1) with respect to a well the surface location of which is on the OCS, the Federal or State agency having regulatory jurisdiction with respect to the production of natural gas. The following agencies have notified the Commission of their authority in this regard.

(i) for OCS wells located in the Gulf Coast Region:

Area Oil & Gas Supervisor
Suite 336
3301 N. Causeway Blvd.
Metairie, LA 70010

(ii) for OCS wells located in the Atlantic Region:

Area Oil and Gas Supervisor
Atlantic OCS Operations
Suite 204
1725 K Street, N.W
Washington, DC 20244

(iii) for OCS wells located offshore Alaska:

Area Oil & Gas Supervisor
P.O. Box 259
Suite 109
800 A Street
Anchorage, AK 99510

(iv) for OCS wells located offshore California:

Area Oil & Gas Supervisor
160 Federal Building
1340 W. 6th Street
Los Angeles, CA 90017

(2) with respect to a well the surface location of which is on lands within the boundaries of a State (including Federal lands and offshore State lands), the Federal or State agency having regulatory jurisdiction with respect to the production of natural gas. The following agencies have notified the Commission of their authority in this regard:

State in which well is located	Jurisdictional agency for wells on Federal lands	Other lands
Alabama	Area Oil & Gas Supervisor, Suite 204, 1725 K. St., N.W., Washington, D.C. 20006.	Oil & Gas Supervisor, State Oil & Gas Board, Drawer O, University, AL 35486.
Alaska	Area Oil & Gas Supervisor, P.O. Box 259, Suite 109, 800 A Street, Anchorage, AK 99510.	Oil & Gas Conservation Commission, 3001 Porcupine Drive, Anchorage, AK 99501
Arizona	Area Oil & Gas Supervisor, P.O. Box 26124, 505 Marquette Ave., N.W., Albuquerque, NM 87125.	Oil & Gas Conservation Commission, Suite 420, 1645 W. Jefferson, Phoenix, AZ 85007.
Arkansas	Area Oil & Gas Supervisor, 6136 E. 32nd Place, Tulsa, OK 74135.	Oil & Gas Commission, A Division of the Arkansas Dept. of Commerce, 314 East Oak, El Dorado, AR 71730.
California	Area Oil & Gas Supervisor, 160 Federal Building, 1340 West 6th Street, Los Angeles, CA 90017	Department of Conservation, Division of Oil & Gas, 1416 Ninth St., Rm. 1316, Sacramento, CA 95814.
Colorado (except for the west ranges of the New Mexico Principal Meridian)	Area Oil & Gas Supervisor, P.O. Box 2859, 2002 Federal Building & Post Office, Casper, WY 82602.	Oil & Gas Conservation Commission, 1313 Sherman Street, Rm. 721, Denver, CO 80203.
(or)		
Colorado (only the west ranges of the New Mexico Principal Meridian)	Area Oil & Gas Supervisor, P.O. Box 26124, 505 Marquette Ave., N.W. Albuquerque, NM 87125.

Wyoming	Area Oil & Gas Supervisor, P.O. Box 2859, 2002 Federal Bldg. & Post Office, Casper,	Oil & Gas Conservation Commission, Box 2640, Casper, WY 82602.

(b) *Waiver.* In the case of any determination to which a waiver under Subpart C of Part 274 is applicable, "jurisdictional agency" means the Commission.

(c) *Federal lands.* For purposes of this section, "Federal lands" means

(1) all lands leased under:

(i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. § § 181 *et seq.;* and

(ii) the Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. § § 351 *et seq.;* and

(2) all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221); and

(3) all Indian lands which are under the supervision of the Osage Indian Agency, Bureau of Indian Affairs, U.S. Department of the Interior.

(d) *Divided-interest leases.* Unless an agreement under paragraph (f) of this section provides otherwise, where a well is located on a divided-interest lease involving Federal (or Indian) and private (or State) ownership:

(1) the Federal jurisdictional agency shall make the determination where the majority lease interest is Federal (or Indian);

(2) the State jurisdictional agency shall make the determination where the majority lease interest is private (or State); and

(3) the State jurisdictional agency shall make the determination where the lease is divided equally

(e) *Drilling units.* Unless an agreement under paragraph (f) of this section provides otherwise, where a drilling unit is drained by two or more wells, the Federal jurisdictional agency shall make the determination if the completion location of the well in question is located on a Federal (or Indian) lease, and the State jurisdictional agency shall make the determination if the completion location of the well in question is located on a private (or State) lease.

(f) *Agreements.* If the United States Geological Survey and any State jurisdictional agency enter into an agreement authorizing such State agency to make determinations under Subpart A of this part with respect to wells located on Federal lands, or authorizing the U.S. Geological Survey to make such determinations with respect to wells located on State lands, such agreement shall be filed with the Commission. Upon the filing of such an agreement the agency so authorized in the agreement shall be considered the jurisdictional agency with respect to wells on the designated lands to the extent provided in the agreement.

[0]: 44 F.R. 48664 (August 20, 1979)

[5] *Historical record.*—Section 274.501 originated in 43 F.R. 56448 (12/1/78), effective 12/1/78.

Subsection (a), appearing in 43 F.R. 56448 (12/1/79), effective 12/1/78, read as follows until its amendment in 44 F.R. 48664 (8/20/79), effective 8/1/79:

(a) *Definition.* Except as provided in paragraph (b), "jurisdictional agency" means:

(1) With respect to a well on the OCS, one of the following offices of the United States Geological Survey:

(i) for OCS wells located in the Gulf Coast Region:

Area Oil & Gas Supervisor
Suite 336
3301 N. Causeway Blvd
Metairie, LA 70010

(ii) for OCS wells located in the Atlantic Region:

Area Oil & Gas Supervisor
Atlantic OCS Operations
Suite 204
1725 K Street, N.W.
Washington, DC 20244

(iii) for OCS wells located offshore Alaska:

Area Oil & Gas Supervisor
P.O. Box 259
Suite 109
800 A Street
Anchorage, AK 99510

(iv) for OCS wells located offshore California:

Area Oil & Gas Supervisor
160 Federal Building
1340 West 6th Street
Los Angeles, CA 90017

(2) With respect to a well the surface location of which is on lands within the boundaries of a State (including Federal lands and offshore State lands), the agency specified in the following table:

[Note: the list of jurisdictional agencies, appearing in 43 F.R. 56448 (12/1/78), effective 12/1/78, is not reproduced.]

Subsection (c), appearing in 43 F.R. 56448 (12/1/78), effective 12/1/78, read as follows until its amendment in 44 F.R. 48664 (8/20/79), effective 8/1/79:

(c) *Federal lands.* For purposes of this section, "Federal lands" means

(1) all lands leased under:

(i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. § § 181 *et seq.*, and

(ii) the Mineral Leasing Act for Aquired Lands, as amended, 30 U.S.C. § § 351 *et seq.*, and

(2) all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221).

Subsections (d) and (e) newly originated in 44 F.R. 48664 (8/20/79), effective 8/1/79.

Subsection (f) (formerly designated as subsection (d)), appearing in 43 F.R. 56448 (12/1/78), effective 12/1/78, read as follows until its amendment in 44 F.R. 48664 (8/20/79), effective 8/1/79:

(d) *Agreements.* If the United States Geological Survey and any state jurisdictional agency enter into an agreement authorizing such state agency to make determinations under Subpart A with respect to wells located on Federal lands, such agreement shall be filed with the Commission. If such an agreement is filed, then such state agency shall be considered the jurisdictional agency with respect to wells on Federal lands in such state to the extent provided in the agreement.

[Part 275 begins on page 14,541.]

(b) *Waiver.* In the case of any determination to which a waiver under Subpart C of Part 274 is applicable, "jurisdictional agency" means the Commission.

(c) *Federal lands.* For purposes of this section, "Federal lands" means

(1) all lands leased under:

(i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. § § 181 *et seq.;* and

(ii) the Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. § § 351 *et seq.;* and

(2) all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221).

(d) *Agreements.* If the United States Geological Survey and any state jurisdictional agency enter into an agreement authorizing such state agency to make determinations under Subpart A with respect to wells located on Federal lands, such agreement shall be filed with the Commission. If such an agreement is filed, then such state agency shall be considered the jurisdictional agency with respect to wells on Federal lands in such state to the extent provided in the agreement.

(Sections 102, 103, 107 and 108)

GENERAL INSTRUCTIONS

Complete this form if you are applying for price classification under sections 102, 103, 107 or 108 of the NGPA.

Complete each anpropriate item on the reverse side of this page. The code numbers used in items 4 and 6 can be obtained from the Buver/Seller Code Book. If there is more than one purchaser or contract, identify the additional information in the space below. Also enter any additional remarks in the space below. The data reported on this form are not considered to be confidential and will not be treated as such.

Submit the completed application to the appropriate Jurisdictional Agency as listed in title 18 of the CFR, part 274.501. If there are any questions, call (202) 357-8585.

SPECIFIC INSTRUCTIONS

Use the codes in the table below for type of determination in item 2.

Section of NGPA (a)	Category Code (b)	Description (c)
102	1	New OCS lease
102	2	New onshore well (2.5 mile test)
102	3	New onshore well (1000 feet deeper test)
102	4	New onshore reservoir
102	5	New reservoir on old OCS lease
103	-	New onshore production well
107	0	Deep (more than 15,000 feet) high cost gas
107	1	Gas produced from geopressured brine
107	2	Gas produced from coal seams
107	3	Gas produced from Devonian shale
107	5	Production enhancement gas
107	6	New tight formation gas
107	7	Recompletion tight formation gas
108	0	Stripper well
108	1	Stripper well – seasonally affected
108	2	Stripper well – enhanced recovery
108	3	Stripper well – temporary pressure buildup
108	4	Stripper well – protest procedure

Enter the appropriate information regarding other Purchasers/Contracts.

PROPOSED AMENDMENT NO. 3

FOR

CS House Bill No. 680 L & C

Add to the Bill a new Section 3 as follows and renumber subsequent sections accordingly:

* Sec. 3 AS 31.05.030 is amended by adding a new subsection to read:

(j) The commission in accordance with I.R.C. Section 4993(d)(5)(A)(i) shall have the authority to act as the state jurisdictional agency over applications involving tertiary recovery projects on lands in Alaska not under federal jurisdiction, pursuant to requirements of I.R.C. of Section 4993(c)(2)(A), (B), and (C) of the "Crude Oil Windfall Profits Tax Act" of 1980 and applicable regulations.

JAY S. HAMMOND
GOVERNOR

Exhibit I-2

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

September 23, 1980

The Honorable W. Michael Blumenthal
Secretary of the Treasury
15th Street and Pennsylvania Avenue
Washington, D.C. 20220

Dear Mr. Secretary:

Pursuant to the requirements of Section 4993 (d)(5)(A) of the recently enacted Crude Oil Windfall Profits Tax Act of 1980, I have appointed the Alaska Oil and Gas Conservation Commission (AOGCC) as the jurisdictional agency over applications involving tertiary recovery projects on lands in Alaska not under federal jurisdiction. The AOGCC will review and take suitable action on any application for a tertiary recovery project within the stipulations of the Crude Oil Windfall Profits Tax Act of 1980, and applicable regulations.

This notification fulfills the responsibilities of the Governor of Alaska to provide a written submittal of agency designation in accordance with Section 4993 (d)(5)(A) of the Act.

Acknowledgement of receipt of this letter is requested.

Sincerely,

Jay S. Hammond
Governor

cc: Hoyle H. Hamilton, Chairman/Commissioner
Alaska Oil and Gas Conservation Commission

The Honorable William P. Clements, Governor of Texas
Interstate Oil Compact Commission

William W. Hopkins
Alaska Oil and Gas Association

The Honorable Robert E. LeResche, Commissioner
Department of Natural Resources

Amendments:	Sec. as amended effective:
P.L. 96-223, § 101(a)(1)	.....

P.L. 96-223, § 101(a)(1):

Added Code Sec. 4992 to read as above. For the effective date and transitional rules, see P.L. 96-223, § 101(i), following Code Sec. 4986.

[Sec. 4993]

SEC. 4993. INCREMENTAL TERTIARY OIL.

[Sec. 4993(a)]

(a) IN GENERAL.—For purposes of this chapter, the term "incremental tertiary oil" means the excess of—

(1) the amount of crude oil which is removed from a property during any month and which is produced on or after the project beginning date and during the period for which a qualified tertiary recovery project is in effect on the property, over

(2) the base level for such property for such month.

Source: New

[Sec. 4993(b)]

(b) DETERMINATION OF AMOUNT.—For purposes of this section—

(1) BASE LEVEL.—The base level for any property for any month is the average monthly amount (determined under rules similar to rules used in determining the base production control level under the June 1979 energy regulations) of crude oil removed from such property during the 6-month period ending March 31, 1979, reduced (but not below zero) by the sum of—

(A) 1 percent of such amount for each month which begins after 1978 and before the first month beginning after the project beginning date, and

(B) 2½ percent of such amount for each month which begins after the project beginning date (or after 1978 if the project beginning date is before 1979) and before the month for which the base level is being determined.

(2) MINIMUM AMOUNT IN CASE OF PROJECTS CERTIFIED BY DOE.—In the case of a project described in subsection (c)(1)(A), for the period during which the project is in effect, the amount of the incremental tertiary oil shall not be less than the incremental production determined under the June 1979 energy regulations.

(3) ALLOCATION RULES.—The determination of which barrels of crude oil removed during any month are incremental tertiary oil shall be made—

(A) first by allocating the amount of incremental tertiary oil between—

(i) oil which (but for this subsection) would be tier 1 oil, and

(ii) oil which (but for this subsection) would be tier 2 oil,

in proportion to the respective amounts of each such oil removed from the property during such month, and

(B) then by taking into account barrels of crude oil so removed in the order of their respective removal prices, beginning with the highest of such prices.

Source: New

[Sec. 4993(c)]

(c) QUALIFIED TERTIARY RECOVERY PROJECT.—For purposes of this section—

(1) IN GENERAL.—The term "qualified tertiary recovery project" means—

(A) a qualified tertiary enhanced recovery project with respect to which a certification as such has been approved and is in effect under the June 1979 energy regulations, or

(B) any project for enhancing recovery of crude oil which meets the requirements of paragraph (2).

(2) REQUIREMENTS.—A project meets the requirements of this paragraph if—

(A) the project involves the application (in accordance with sound engineering principles) of 1 or more tertiary recovery methods which can reasonably be expected to result in more than an insignificant increase in the amount of crude oil which will ultimately be recovered,

(B) the project beginning date is after May 1979,

(C) the portion of the property to be affected by the project is adequately delineated,

(D) the operator submits (at such time and in such manner as the Secretary may by regulations prescribe) to the Secretary—

(i) a certification from a petroleum engineer that the project meets the requirements of subparagraphs (A), (B), and (C), or

(ii) a certification that a jurisdictional agency (within the meaning of subsection (d)(5)) has approved the project as meeting the requirements of subparagraphs (A), (B), and (C), and that such approval is still in effect, and

(E) the operator submits (at such time and such manner as the Secretary may by regulations prescribe) to the Secretary a certification from a petroleum engineer that the project continues to meet the requirements of subparagraphs (A), (B), and (C).

Source: New.

[Sec. 4993(d)]

(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

(1) TERTIARY RECOVERY METHOD.—The term "tertiary recovery method" means—

(A) any method which is described in subparagraphs (1) through (9) of section 212.78(c) of the June 1979 energy regulations, or

(B) any other method to provide tertiary enhanced recovery which is approved by the Secretary for purposes of this chapter.

(2) PROJECT BEGINNING DATE.—The term "project beginning date" means the later of—

(A) the date on which the injection of liquids, gases, or other matter begins, or

(B) the date on which—

(i) in the case of a project described in subsection (c)(1)(A), the project is certified as a qualified tertiary enhanced recovery project under the June 1979 energy regulations, or

(ii) in the case of a project described in subsection (c)(1)(B), a petroleum engineer certifies, or a jurisdictional agency approves, the project as meeting the requirements of subparagraphs (A), (B), and (C) of subsection (c)(2).

(3) PROJECT ONLY AFFECTS PORTION OF PROPERTY.—If a qualified tertiary recovery project can reasonably be expected to increase the ultimate recovery of crude oil from only a portion of a property, such portion shall be treated as a separate property.

(4) SIGNIFICANT EXPANSION TREATED AS SEPARATE PROJECT.—A significant expansion of any project shall be treated as a separate project.

(5) JURISDICTIONAL AGENCY.—The term "jurisdictional agency" means—

(A) in the case of an application involving a tertiary recovery project on lands not under Federal jurisdiction—

(i) the appropriate State agency in the State in which such lands are located which is designated by the Governor of such State in a written notification submitted to the Secretary as the agency which will approve projects under this subsection, or

(ii) if the Governor of such State does not submit such written notification within 180 days after the date of the enactment of the Crude Oil Windfall Profit Tax Act of 1980, the United States Geological Survey (until such time as the Governor submits such notification), or

(B) in the case of an application involving a tertiary recovery project on lands under Federal jurisdiction, the United States Geological Survey.

(6) BASIS OF REVIEW OF CERTAIN QUALIFIED TERTIARY RECOVERY PROJECTS.—In the case of any project which is approved under subsection (c)(2)(D)(ii) and for which a certification is submitted to the Secretary, the project shall be considered as meeting the requirements of subparagraphs (A), (B), and (C) of subsection (c)(2) unless the Secretary determines that—

(A) the approval of the jurisdictional agency was not supported by substantial evidence on the record upon which such approval was based, or

(B) additional evidence not contained in the record upon which such approval was based demonstrates that such project does not meet the requirements of subparagraph (A), (B), or (C) of subsection (c)(2).

If the Secretary makes a determination described in subparagraph (A) or (B) of the preceding sentence, the determination of whether the project meets the requirements of subparagraphs (A), (B), and (C) of subsection (c)(2) shall be made without regard to the preceding sentence.

(7) RULINGS RELATING TO CERTAIN QUALIFIED TERTIARY RECOVERY PROJECTS.—In the case of any tertiary recovery project for which a certification is submitted to the Secretary under subsection (c)(2)(D)(ii), a taxpayer may request a ruling from the Secretary with respect to whether such project is a qualified tertiary recovery project. The Secretary shall issue such ruling within 180 days of the date after he receives the request and such information as may be necessary to make a determination.

Amendments:	Sec. as amended effective:
P.L. 96-223 § 101(a)(1)	....

P.L. 96-223, § 101(a)(1):

Added Code Sec. 4993 to read as above. For the effective date and transitional rules, see P.L. 96-223, § 101(i) following Code Sec. 4986.

[Sec. 4994]

SEC. 4994. DEFINITIONS AND SPECIAL RULES RELATING TO EXEMPTIONS.

(a) QUALIFIED GOVERNMENTAL INTEREST.—For purposes of section 4991(b)—

(1) IN GENERAL.—The term "qualified governmental interest" means an economic interest in crude oil if—

(A) such interest is held by a State or political subdivision thereof or by an agency or instrumentality of a State or political subdivision thereof, and

(B) under the applicable State or local law, all of the net income received pursuant to such interest is dedicated to a public purpose.

(2) NET INCOME.—For purposes of this paragraph, the term "net income" means gross income reduced by production costs, and severance taxes of general application, allocable to the interest.

(3) AMOUNTS PLACED IN CERTAIN PERMANENT FUNDS TREATED AS DEDICATED TO PUBLIC PURPOSE.—The requirements of paragraph (1)(B) shall be treated as met with respect to any net income which, under the applicable State or local law, is placed in a permanent fund the earnings on which are dedicated to a public purpose.

Source: New.

[Caution: Code Sec. 4994(b), below, as amended by P.L. 97-34, is applicable to taxable periods beginning after December 31, 1980.—CCH.]

[Sec. 4994(b)]

(b) QUALIFIED CHARITABLE INTEREST.—For purposes of section 4991(b)—

(1) IN GENERAL.—The term "qualified charitable interest" means an economic interest in crude oil if—

(A) such interest is—

(i) held by an organization described in clause (ii), (iii), or (iv) of section 170(b)(1)(A) which is also described in section 170(c)(2),

(ii) held by an organization described in section 170(c)(2) which is organized and operated primarily for the residential placement, care, or treatment of delinquent, dependent, orphaned, neglected, or handicapped children, or

(iii) held—

(I) by an organization described in clause (i) of section 170(b)(1)(A) which is also described in section 170(c)(2), and

(ii) There has been a material change of circumstances since the time that the project or expansion was initiated; and

(iii) The project is certified under the criteria and pursuant to the procedures provided in paragraph (d). For purposes of determining eligibility for certification, an existing project shall be examined prospectively, on the basis of the circumstances existing at the time such certification is sought.

(c) *Definitions.* For purposes of this section—

A "qualified tertiary enhanced recovery project" is a project for the enhanced recovery of crude oil, to the extent that such project involves the application of one or more of the following techniques and is certified pursuant to paragraph (d) of this section as being uneconomic at the otherwise applicable ceiling prices:

(1) Miscible fluid displacement, *i. e.*, an oil displacement process in which gas or alcohol is injected into an oil reservoir, at pressure levels such that the injected gas or alcohol and reservoir oil are miscible. The process may include the concurrent, alternating, or subsequent injection of water. The injected gas may be natural gas, enriched natural gas, a liquefied petroleum gas slug driven by natural gas, carbon dioxide, nitrogen, or flue gas. Gas cycling, *i. e.*, gas injection into gas condensate reservoirs, is not a miscible fluid displacement technique nor a tertiary enhanced recovery technique within the meaning of this section.

(2) Steam drive injection, *i. e.*, the continuous injection of steam into one set of wells (injection wells) or other injection source to effect oil displacement toward and production from a second set of wells (production wells).

(3) Microemulsion, or micellar/emulsion, flooding, *i. e.*, an augmented waterflooding technique in which a surfactant system is injected in order to enhance oil displacement toward producing wells. A surfactant system normally includes a surfactant, hydrocarbon, cosurfactant, an electrolyte and water, and polymers for mobility control.

(4) In situ combustion, *i. e.*, combustion of oil in the reservoir, sustained by continuous air injection, to displace unburned oil toward producing wells.

(5) Polymer augmented waterflooding, *i. e.*, augmented waterflooding in which organic polymers are injected with the water to improve areal and vertical sweep efficiency.

(6) Cyclic steam injection, *i. e.*, the alternating injection of steam and production of oil with condensed steam from the same well or wells.

(7) Alkaline (or "caustic") flooding *i. e.*, an augmented waterflooding technique in which the water is made chemically basic as a result of the addition of alkali metals.

(8) Carbon dioxide augmented waterflooding, *i. e.*, injection of carbonated water, or water and carbon dioxide, to increase waterflood efficiency.

(9) Immiscible carbon dioxide displacement, *i. e.*, injection of carbon dioxide into an oil reservoir to effect oil displacement under conditions in which miscibility with reservoir oil is not obtained.

(10) Specific variations of any of the above-listed general techniques, as determined in any particular case by the certifying authority.

"Certifying authority" means the Administrator, Economic Regulatory Administration, Department of Energy, or any officer of the Department of Energy to whom the Administrator has delegated such functions.

"Incremental crude oil" (resulting from the implementation of a qualified tertiary enhanced recovery project) means, in the case of a new project, the amount of crude oil which is or will be produced as a result of such a project and which is in excess of the amount of crude oil ("nonincremental crude oil") which could have been produced from the property or project area through continued maximum feasible production from methods of production employed on the property prior to the receipt of the certifications provided for in paragraph (d) of this section. As applied to expansion of existing tertiary enhanced recovery projects, the term means the amount of crude oil which is or will be produced as a result of the expanded project and which is in excess of the amount of crude oil ("nonincremental crude oil") which could have been produced from the property or project area through continued maximum feasible production from the methods of production employed on the property prior to the receipt of the certification provided for in paragraph (d) of this section. As applied to an existing project within the meaning of paragraph (b)(2) of this section, the term means the amount of crude oil which is or will be produced as a result of the continuation of the project or of the particular highcost phase of the project and which is in excess of the amount of crude oil ("nonincremental crude oil") which could have been produced from the property or project area through continued maximum feasible production from methods of production (other than the tertiary method, or that phase of such method, that would be discontinued in the

ALASKA OIL AND GAS CONSERVATION COMMISSION

ANALYSIS

INTRODUCTION: The fiscal impact results soley from subsection (h) Section 1 of the Bill.

Code 100 Are advised by Environmental Protection Agency (EPA) and by other states who have been delegated enforcement primacy by EPA that there is a substantial increase in the technical clerical workload. Accordingly request personal services funding for a Clerk Typist III.

Code 200 Field inspection requirements will nearly double the current level of trips to the field. Accordingly additional travel funding is required.

Code 300 a) Contractual cost to prepare an application package to EPA for obtaining primacy is estimated to cost $60,000 which will be expended in FY'84.

b) A word processing machine will be obtained for the additional Clerk Typist III on a four year rental/purchase agreement.

Code 400 Additional clerical supplies will be required for the new Clerk Typist III.

Code 500 A one-time expenditure for office equipment (desk, chair, etc.) will be necessary in FY'85.

the owner of the well gives written permission to release the reports and information at an earlier date. If the commissioner finds that the required reports and information contain significant information relating to the valuation of unleased land in the same vicinity, he shall keep the reports and information confidential for a reasonable time after the disposition of all affected unleased land, unless the owner of the well gives written permission to release the reports and information at an earlier date. Well location, depth, status and production data and production reports required by the commission to be filed subsequent to the 30-day filing period shall be considered public information and shall not be classified confidential. Production data, as used in this subsection, means volume, gravity and gas-oil ratio of all production of oil or gas after the well begins regular production.

(d) Engineering, geological, and other information not required by (a) of this section but voluntarily filed with the commission shall be kept confidential if the person filing the information so requests. (§ 2 ch 209 SLA 1970; am § 5 ch 158 SLA 1978; am §§ 3 — 6 ch 160 SLA 1978)

Effect of amendments. — The first 1978 amendment substituted "commission" for "department" throughout the section.

The second 1978 amendment in subsection (a), inserted "flow test information and" in paragraph (2), deleted "dipmeter surveys" following "experimental logs" in paragraph (2), and added paragraph (3). In subsection (c), the amendment substituted "required in (a) of this section" for "marked confidential" in the first sentence and added the present second sentence. The amendment also added subsection (d).

Sec. 31.05.040. Rules and regulations of commission. (a) The commission shall prescribe rules and regulations governing practice and procedure before it under this chapter.

(b) All orders issued by the commission shall be in writing, shall be entered in full and indexed in books kept by the commission for that purpose, and shall be public records open for inspection at all times during reasonable office hours. A copy of an order certified by the commission, under its seal, shall be received in evidence in all courts of the state with the same effect as the original. (§ 9 1, 5 ch 40 SLA 1955; am § 5 ch 158 SLA 1978)

Revisor's note. — Subsection (b) of this section and AS 31.05.050—31.05.080 are generally superseded by the Administrative Procedure Act (AS 44.62). However, the department has the power to hold hearings and make orders relating to "pooling," etc. (AS 31.05.100 and 31.05.110), which may or may not fall under the Administrative Procedure Act. If those hearings and orders do not fall under the Administrative Procedure Act, then the procedure in (b) of this section and in AS 31.05.050 — 31.05.080 would apply.

Effect of amendment. — The 1978 amendment substituted "commission" for "department" throughout the section.

Section 6, ch. 158, SLA 1978, provides: "After the effective date of this Act [January 1, 1979], all orders, regulations, and other rulings of the division of oil and gas shall remain in effect until expressly revoked or modified by the commission."

AOGA PROPOSED TESTIMONY ON HOUSE BILL NO. 680

HOUSE LABOR AND COMMERCE COMMITTEE

MARCH 7, 1984

Good morning. I'm Dave Yesland, Senior Staff Environmental Engineer with Shell Western E & P. I'm representing the Alaska Oil and Gas Association this morning and I will comment on the proposed Committee Substitute for HB680.

Our Association supports the intent of CSHB680, which is to provide the legislation necessary to enable the State to be the sole administrator of a permitting program for underground injection wells related to oil and gas production activities, or Class II wells, as they are identified in the Federal program. I will discuss the reasons for our support.

Without State preemption of the Federal program there will be redundant State and Federal programs with nothing but duplicated record-keeping and administrative delay as a result.

We have had a concern that existing statutes might prevent the State from preempting the Federal program because confidentiality provisions and penalty imposition limits may not meet the Federal requirements. We believe this bill will eliminate that concern.

Our Association prefers that the permitting process for injection wells, related to oil and gas operations, be controlled by the

state. The regulation of oil and gas operations by the Alaska Oil and Gas Conservation Commission is an example of regulatory control based on well-established knowledge of the regulated activity.

Therefore, we believe the Alaska Oil and Gas Conservation Commission is the appropriate administrator of regulations that bear on the technical elements of oil and gas operations and it should be the sole administrator of Class II wells in the state.

Finally we have seen that the Federal program, as proposed, would reduce the production rate of secondary recovery projects (water floods) by requiring that current injection pressure be reduced. The EPA's basis for lower pressures is no more than a "rule-of-thumb" which they acknowledge may be changed on a case-by-case review. But, until that review is completed, pressure would have to be reduced to comply with the regulations. This reduction would not only reduce current production rates, but even if only temporary, would reduce the ultimate total production of the formation causing revenue losses to both the State and producer. It is therefore a matter of mutual urgency.

If the proposed Federal rules are promulgated in the absence of State intent and ability to assume the program there will be a loss with no measure of compensation.

We urge the State to assume primacy in the regulation of Class II injection wells and we believe this bill contains specific statutory language which will serve this purpose.

Thank you.

MILO FRITZ

MEMORANDUM

TO: Representative John Cowdry
Labor & Commerce Chairman

FROM: Representative Milo Fritz
Finance Committee Member

DATE: March 13, 1984

SUBJ: HB 683

I would greatly appreciate your springing HB 683 out of your Committee. As I look at it, there is no threat to the Susitna Damn and with the population of the Kenai Peninsula growing in the neighborhood of between nine and ten percent every year, we will need the power from Bradley Lake within the next two years. Your consideration in getting HB 683 out of your Committee and on to the next Committee of referral will be very greatly appreciated. If there is anything about this matter that you would care to discuss with me I am at your service.

cc: D. Kent Wicke

The Hon. John J. Cowdery, Chairman
House Labor & Commerce Committee
Alaska State Legislature
Pouch V (MS 3100)
Juneu, Alaska 99811

Dear Mr. Cowdery:

House Bill #683, presently in the Labor and Commerce Committee, would authorize Bradley Lake as a State project. It requests no funding. Bradley Lake must be authorized in order for the Alaska Power Authority to file for a FERC license. Filing for an FERC license should be done concurrently with development of a financing plan and power sales agreements.

Approval of HB #683 does not conflict with the four-dam pool, and Bradley Lake is not competition to Susitna. Power from Bradley Lake is needed for the winter of 1988/89. Without Bradley Lake natural gas generation facilities must be added. I believe all studies thus far show no negative impact of Bradley Lake on Susitna feasibility or financing.

We need your support! HB #683 should be passed out of its assigned Committees for full House consideration as soon as possible to keep the project on schedule. Funding will be requested only after a financing plan is developed. Funding is not requested in HB #683.

Thank you in advance for your consideration. Please let us know if we can answer any of your questions.

Sincerely yours,

HOMER ELECTRIC ASSOCIATION, INC.

March 29, 1984

To: Representative Bob Bettisworth
Vice Chairman, House Finance

From: Representative Joe Hayes
House Speaker

Per our recent telephone conversation, I am sending a copy of Governor Sheffield's letter dated March 29, 1984, proposing a formula to the solution of the 4-Dam Pool problem.

Would you please check out the disposition of various pieces of legislation relating to "the package". I believe most or all of them may be in House Finance. I would appreciate your suggestions for a resolution to the Governor's requirements.

Please feel free to discuss this with the Governor and his staff.

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 29, 1984

The Honorable Joe Hayes
The Capitol
Juneau

Dear Joe,

From our discussion at lunch today, it is my understanding that you would consider an agreement to ensure that a solution to the 4-dam pool problem is brought to the House floor for a vote.

I propose the following formula as the solution, and due to the time constraints imposed on us by the four capital budgets now on my desk, the vote on all but one portion of the formula needs to be taken during your floor session this evening.

The package includes:
--Repeal of the Susitna Clause
--Approval of $49 million for the Rate Stabilization Fund
--Repeal of the prohibition against industrial rates
--Inclusion of Watana and Bradley Lake into a new, 6-dam pool
--$200 million appropriated to the Power Development Fund. I understand the time problem involved on this item, and I would agree that it could be handled later.

It would be my intention to publicly support this formula, and I also would reiterate my longstanding support for the Susitna Hydroelectric Project. The only qualifications to my support for Susitna is the same as always: that we first arrive at a positive finding of feasibility, a workable financing plan and pre-signed power sales agreements with the Railbelt utilities.

As we also discussed, the issue of the Major Projects Fund also should be subjected to a floor vote today. I strongly believe that only a "clean" constitutional amendment represents good public policy. I reiterate that if a vote is taken today, it should be on House Joint Resolution 57 as I introduced it.

I understand your personal opposition to some of these points. I appreciate your agreement to refrain from lobbying others in opposition, and your willingness to allow the members of your caucus to vote their own consciences. I also can assure you that positive action on these issues will greatly influence my budget decisions over the next few days.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

FEBRUARY 29, 1984

TO: JOHN
FROM: KEN
RE: HB 683 "APPROVING THE BRADLEY LAKE HYDROELECTRIC PROJECT"

HB 683 IS A BILL WHICH ASKS THE LEGISLATURE TO APPROVE THE BRADLEY LAKE HYDROELECTRIC PROJECT AS A PROJECT OF THE ENERGY PROGRAM FOR ALASKA. THIS LEGISLATION ALSO ASKS FOR APPROVAL OF THE COST OF BRADLEY LAKE, ESTIMATED TO BE 354 MILLION DOLLARS. THE BILL, HOWEVER, IS NOT AN APPROPRIATIONS BILL. FUNDING FOR BRADLEY LAKE PROJECT WOULD NOT BE ASSURED BY PASSAGE OF HB 683.

QUESTIONS:

1. HOW LONG WILL IT BE BEFORE THE A.P.A. COMPLETES ITS FINDINGS AND RECOMMENDATION REPORT AND SENDS IT ON TO O.M.B. ?

2. HOW LONG DO YOU EXPECT IT TO TAKE O.M.B. TO PRODUCE ITS REPORT ONCE THE A.P.A. HAS PASSED ON ITS FINDINGS ?

3. ISN'T THIS LEGISLATION A BIT UNTIMELY SINCE THE LEGISLATURE HAS NO ASSURANCE AT THIS POINT THAT THE A.P.A.'S AND O.M.B.'S FINAL REPORTS WILL SUPPORT THE FEASIBILITY STUDY ?

4. WHERE WILL THE INITIAL FUNDING FOR THE CONSTRUCTION OF BRADLEY LAKE COME FROM AND HOW WILL THE ENTIRE PROJECT BE FUNDED ?

5. IF THE STATE APPROPRIATES FUNDS FOR BRADLEY LAKE, ISN'T THAT USING FUNDS THAT COULD GO TOWARD CONSTRUCTION OF THE WATANA PHASE OF THE SUSITNA PROJECT ?

6. WILL THERE BE A NEED FOR THE STATE TO PROVIDE SUBSIDY TO STABILIZE POWER RATES DURING THE FIRST FEW YEARS BRADLEY LAKE IS IN OPERATION ?

7. WILL BRADLEY LAKE POWER BE AN ADDITIONAL SOURCE OF POWER TO CUSTOMERS ON THE KENAI PENINSULA OR WILL IT REPLACE THE CURRENT SOURCE OF POWER ?

8. WHAT PERCENTAGE OF THE POWER PRODUCED AT BRADLEY LAKE CAN BE SOLD WHEN THE PROJECT COMES ON LINE ?

9. IS THE A.P.A. CERTAIN THAT POWER PRODUCED AT BRADLEY LAKE COULD BE SOLD ?

10. ARE THERE NOW OR HAS THERE BEEN ANY POWER SALES NEGOTIATIONS WITH UTILITY COMPANIES FOR BRADLEY LAKE POWER ?

11. WITH WHAT UTILITY COMPANIES HAVE THOSE NEGOTIATIONS OR TALKS TAKEN PLACE ?

12. WHAT IS THE STATUS OF THE F.E.R.C. LICENSING PROCESS FOR BRADLEY LAKE ?

13. HOW LONG BEFORE CONSTRUCTION COULD ACTUALLY START ?

14. ARE THE COMMUNITIES TO BE SERVED BY BRADLEY LAKE SET UP TO HANDLE THE TRANSMISSION OF THAT POWER ?

15. THEN, ARE THERE CAPITAL PROJECTS ASSOCIATED WITH BRADLEY LAKE THAT ARE NOT INCLUDED IN THE 354 MILLION DOLLAR COST FIGURE ?

STATUS REPORT

Bradley Lake Hydroelectric Project February 27, 1984

The Bradley Lake Hydroelectric Power Project was authorized by the U.S. Congress as a Federal project in the Flood Control Act of 1962.

After lengthy study the project was found to be economically feasible by the U.S. Army, Corps of Engineers in 1978.

The Corps of Engineers started work in 1978 and published a General Design Memorandum in February 1982 and a final Environmental Impact Statement in August 1982.

The 1981 Alaska State Legislature, by joint resolution, requested that the United States Congress provide a system to permit the Corps to design and construct the project as a project of the Alaska Power Authority, provided that the financing for the project be solely the responsibility of the State of Alaska and the Power Authority. The Legislature also appropriated $15 million from the General Fund to the Power Development Fund for the Bradley Lake project.

The 1982 Alaska State Legislature in HB 9 stated that subject to the review of the feasibility study and plan of finance by the Division of Budget and Management in the Office of the Governor the Bradley Lake Hydroelectric Project is approved as a project of the Power Authority. The Letter of Intent accompanying HB 9 stated that it was the intent of the Legislature that the Power Authority proceed with the Bradley Lake Hydroelectric Project by expending the funds received and by securing, if necessary, additional financing. The Legislature also appropriated $3 million for the Bradley Lake project.

The Power Authority attempted to negotiate an agreement with the Corps concerning the Bradley Lake project. Due to lack of Federal legislation to allow the Corps to accept State funds, impact of Federal ownership on ability of the Power Authority to obtain bonding for the project, and lack of State control of cost overruns and power rates, the Power Authority Board of Directors in October 1982 voted to pursue design and construction of the project by the Power Authority and supported Federal deauthorization of the project.

The Bradley Lake project was deauthorized by the U.S. Congress in December 1982.

In March 1983, the Board of Directors approved the selection of the firm of Stone and Webster Engineering Company as design engineer for the project, and authorized an award of a contract for preliminary design and feasibility study to focus on the determination of the feasibility and optimum plan for development of Bradley Lake. The project's conceptual design has been modified from that planned by the Corps to lessen the environmental impact and the cost of the project.

103/080 D1

Results of the Feasibility Study were presented to the Power Authority Board of Directors in September 1983. The project is attractive economically, both with or without Susitna. A sensitivity analysis at zero percent load growth indicates that Bradley Lake's economic feasibility remains positive. Consequently, the Board authorized preparation of a Federal Energy Regulatory License Application. Preliminary cost of power determinations were made under various funding scenarios which indicate that the Bradley Lake power costs are competitive with the thermal alternatives. The project was sized at 90 megawatts, constructed so that it could be expanded to 135 Megawatts in the future if necessary. In 1983 dollars the project cost is $283 million. The 1985 bid price is $354 million, not including financing costs.

Meetings have been held with the various utilities who are potential power purchasers and Letters of Interest to purchase power have been received from a sufficient number of utilities to indicate that Bradley power is marketable.

Environmental aspects of the project have been discussed with the various Resource Agencies. The 60 day agency consultation period required by the Federal Energy Regulatory Commission (FERC) has been initiated and the draft license application has been forwarded to interested agencies. Minimum Bradley River instream flow requirements, which was a major concern of the Resource Agencies expressed in their review of the Corps' Final EIS, have been established and concurred with following Power Authority field study and analysis in 1983. A moose migration study is also underway to establish mitigation requirements for possible impacts on the moose population.

Current Status and Future Actions

1. The Finance Plan is in final preparation. The Plan considers information gained from the 4 Dam Pool negotiations and is based on Bradley Lake being in the Energy Program for Alaska. It should be finalized by March 18, 1984.

2. The Power Authority is currently working with the Office of Management and Budget on their review of the Feasibility Study and the Plan of Finance.

3. The submittal of the FERC license application will be considered by the Power Authority Board of Directors meeting during the week of mid March 1984.

4. Although funds have been appropriated for Bradley Lake, the project has not been specifically authorized by the Legislature at a specified construction cost nor has it been included in the Energy Program for Alaska. Design cannot be initiated until the project is authorized at a specified construction cost. HB 683 provides the required authorization and includes the project in the Energy Program for Alaska.

5. If the Legislature authorizes the project, design can commence if approved by the Power Authority Board of Directors. No design funds will be expended until power sales agreements with specified power rates have been signed by the participating utilities.

6. Sufficient funds have been appropriated to fund FERC license support and design activities in FY 85. Additional funds, dependent on the requirements of the Finance Plan, will be required in FY 86 and later years.

7. If design can be initiated by July 1, 1984, construction could commence in August 1985 with first power on line in late 1988. The construction start is dependent on receipt of the FERC license. FERC has indicated in writing that due to extensive Federal environmental work on the project, it may be possible to receive the license as early as 11 months after submittal.

MEMORANDUM

TO: Representative Hugh Malone
Attn: Spike Dale

FROM: Jack Kreinheder and David Teal
Research Staff

RE: Bradley Lake Financing Analysis
Research Request 82-122

You requested that we convert the power cost figures in the Bradley Lake financing analysis prepared by Sterling Gallagher into 1982 dollars, so that the costs can be more accurately compared to current power costs. Tables 1 and 2, below, show annual project and energy costs, based on 100 percent bond financing, and on 50 percent State financing, respectively. These tables correspond to Tables III and VIII of Mr. Gallagher's analysis.

TABLE 1
BRADLEY LAKE COST ANALYSIS (1982 DOLLARS)
Financing: 100 Percent Tax Exempt 14% Bonds
(7% inflation, 3% real discount rate)

Year	Debt Service[1] ($000)	Operating Costs[2] ($000)	Total Annual Cost ($000)	Energy Sales (MWH)	Power Cost (Cents/KWH)
1989	$69,658	$1,063	$70,721	340,000	20.80
1994	42,845	917	43,762	340,000	12.87
1999	26,350	791	27,141	340,000	7.98
2004	16,206	683	16,889	340,000	4.97
2009	9,967	589	10,556	340,000	3.10
2014	6,130	508	6,638	340,000	1.95

[1] Debt service in nominal dollars would be $137.6 million per year.
[2] Operating costs are constant in real terms and are discounted at a real rate of 3 percent per year.

TABLE 2

BRADLEY LAKE COST ANALYSIS (1982 DOLLARS)
Financing: 50 Percent State Grant,
50 Percent Tax Exempt 14% Bonds
(7% inflation, 3% real discount rate)

Year	Debt Service ($000)	Operating Costs ($000)	Total Annual Cost ($000)	Energy Sales (MWH)	Power Cost (Cents/KWH)
1989	$31,799	$1,063	$32,862	340,000	9.67
1994	19,557	917	20,474	340,000	6.02
1999	12,028	791	12,819	340,000	3.77
2004	7,398	683	8,081	340,000	2.38
2009	4,550	589	5,139	340,000	1.51
2014	2,798	508	3,306	340,000	0.97

These cost figures are based on the Gallagher analysis, discounted at an inflation rate of 7 percent and a real discount rate of 3 percent. The resulting power costs are much lower than those cited in the Gallagher analysis, particularly in the more distant years. For example, Gallagher's figures for the cost of power under the 100 percent bond financing case range, in nominal dollars, from 41 cents/KWH in 1989 to 44 cents in 2014.

In 1982 dollars, these costs are equivalent to 21 cents/KWH in 1989 and 2 cents/KWH in 2014. Although the actual power cost in 2014, under Mr. Gallagher's assumptions, would be about 44 cents/KWH, this amount is comparable to only about 2 cents/KWH in terms of today's dollars.

We are presently working on the second part of your request, which was to apply the analysis used by Mr. Gallagher for Bradley Lake to the Susitna project, and to review the Bradley Lake analysis for accuracy and completeness. This work should be completed by tomorrow, April 27. If you have any questions in the meantime, please let us know.

MEMORANDUM

TO: Representative Hugh Malone

ATTN: Spike Dale

FROM: Jack Kreitzer and David Teal
Research Staff

RE: Bradley Lake Financing Analysis--Supplemental Information
Research Request Number 82-122

This memorandum is in response to your request for a comparison of the Bradley Lake and Susitna hydroelectric projects, based on Sterling Gallagher's recent Bradley Lake financing analysis. The memorandum contains 1) several tables which present energy costs of the two projects and 2) a review of Mr. Gallagher's Bradley Lake analysis for accuracy and completeness. The major finding is that application of Gallagher's analysis to both projects shows that the Bradley Lake project is capable of producing energy at lower cost than the combined Watana and Devil Canyon portions of the Susitna project.

The source of data on the Susitna project is the Susitna Hydroelectric Project Draft Feasibility Report prepared by ACRES for the Alaska Power Authority. That report gives annual operating costs of the Watana portion of the Susitna project as $10 million and lists project construction costs as $3,647 million. Construction and annual operating costs of the Devil Canyon project are $1,480 million and $5.2 million, respectively. All of these figures are in 1982 dollars.

Table 1 presents projected costs of the Watana and Devil Canyon projects in nominal dollars. A seven per cent annual interest rate was used to convert 1982 dollars to projected bonding requirements and operating costs in the year of project completion, and a 14 percent interest rate was used to compute interest costs during the construction periods. Both computations used the construction cost schedules presented in the draft feasibility report.

Table 1
PROJECTED COSTS OF THE WATANA AND DEVIL CANYON
HYDROELECTRIC PROJECTS
(in millions of nominal dollars)

	Watana (Completed 1993)	Devil Canyon (Completed 2002)
Total Construction Cost	$ 6,006	$ 4,503
Interest to Completion of Construction--Capitalized	4,555	2,800
Total Investment Cost	10,561	7,302
Financing Expense	327	226
Reserve Fund	1,804	1,247
TOTAL CAPITAL REQUIREMENT	$12,692	$ 8,775
Annual Debt Service	$ 1,804	$ 1,247
Coverage (20% of Debt Service)	361	249
Interest on Reserve (at 13%)	(234)	(162)
NET ANNUAL DEBT SERVICE	$ 1,930	$ 1,334
Operating Costs in First Year	$ 21	$ 20
TOTAL ANNUAL COST--FIRST YEAR	$ 1,951	$ 1,354

Source: House Research Agency 4/82

==========

The remainder of the tables in this memorandum are based on the information above and on average annual energy sales of 3,450,000 MWH and 3,340,000 MWH from the Watana and Devil Canyon projects, respectively.[1]

[1]ACRES anticipates that sale of power from the Devil Canyon project will be less than plant capacity during an initial operating period of about ten years. The resulting higher per unit power costs during that period are reflected in the tables in this memorandum.

Each of the tables is described below. In all cases, debt service is based on assumptions used in Gallagher's analysis of the Bradley Lake project. That is, the projects are supported by a tax exempt bond issue at 14 percent interest, a reserve fund equal to one year of debt service requirements, and coverage of 20 percent of annual debt service requirements. These figures are not identical to the financing details used by ACRES to determine the debt service requirements of the Susitna project. We have used Mr. Gallagher's approach on both the Bradley Lake and Susitna projects in order to minimize differences in the computation of total cost of the projects.

Although financing has been made equivalent, energy cost comparisons may not be accurate if some components of total cost have been omitted from one or more of the projects or if the methodology for estimating costs is not comparable. We have reviewed the construction cost estimates of the Bradley Lake project and find Mr. Gallagher's figures acceptable for comparison with the Susitna project.

Table 2 shows project and energy costs of the Watana project in nominal dollars and is comparable to Gallagher's Table III. Debt service is constant--payments are fixed at the time bonds are sold--and operating costs increase at seven percent per year, which is the assumed rate of inflation. As in Gallagher's analysis, energy costs increase throughout the evaluation period. Table 2 shows energy costs of 56.55 cents per kwh in 1994 and 58.46 cents per kwh in 2014.

Table 2
WATANA HYDROELECTRIC PROJECT COST ANALYSIS
(in millions of nominal dollars)

Year	Debt Service	Operating Costs	Total Annual Cost	Energy Sales (GWH)	Power Cost (cents/kwh)
1994	$1,929.85	$22.52	$1,952.37	3,450	56.59
1999	1,929.85	31.59	1,961.44	3,450	56.85
2004	1,929.85	44.30	1,974.15	3,450	57.22
2009	1,929.85	62.13	1,991.98	3,450	57.74
2014	1,929.85	87.15	2,017.00	3,450	58.46

Source: House Research Agency 4/82

Table 3 shows project and energy costs of the Watana project in 1982 dollars. The table corresponds to Table 1 in memorandum number 82-122 delivered to you on April 26.[2] Debt service is deflated at seven percent per year to reflect the declining real value of a fixed payment. Operating costs are constant because it is assumed that the increase in operating costs is exactly equal to the rate of inflation. Energy costs decline from 25.13 cents per kwh in 1994 to 6.71 cents per kwh in 2014.

Table 3
WATANA HYDROELECTRIC PROJECT COST ANALYSIS
(in millions of 1982 dollars)

Year	Debt Service	Operating Costs	Total Annual Cost	Energy Sales (GWH)	Power Cost (cents/kwh)
1994	$856.88	$10.00	$866.88	3,450	25.13
1999	610.94	10.00	620.94	3,450	18.00
2004	435.59	10.00	445.59	3,450	12.92
2009	310.57	10.00	320.57	3,450	9.29
2014	221.43	10.00	231.43	3,450	6.71

Source: House Research Agency 4/82

==========

Table 4 compares energy costs of the Bradley Lake, Watana, and Devil Canyon projects. Estimated costs are in nominal dollars. Table 5 makes the same comparison in 1982 dollars. In both tables, the "percentage difference" columns refer to change from the projected energy costs of the Bradley Lake project. In both tables, the energy costs listed for the Susitna project are weighted averages of the Watana and Devil Canyon projects. In 2004 and 2009, the figures for Devil

---

[2] In Table 1 of our memorandum of April 26, the discount rate included a three percent rate for the time value of money. That factor has been omitted from the computations in this memorandum. This "real interest rate" does not affect the percentage changes shown in tables 4 and 5 of this memorandum.

Canyon are adjusted for operation at less than plant capacity. Note that power produced at Devil Canyon is expected to be about six percent cheaper than power from Bradley Lake once Devil Canyon is at full capacity but that the combined cost of energy from the Susitna project remains higher than energy produced at the Bradley Lake project.

Table 4
PROJECTED ENERGY COSTS OF THREE HYDROELECTRIC PROJECTS
(NOMINAL CENTS PER KWH)

2014	5.03	6.71	33	4.74	(6)	5.74	14

Source: House Research Agency 4/82

We were also asked to review the Bradley Lake analysis for accuracy and completeness. In Mr. Gallagher's Table III, the cost components are inaccurately summed. However, the energy cost computation is correct so there is no major flaw in the analysis. The construction cost estimates of both projects appear to include similar items, and the assumptions on financing appear reasonable.[3] Mr. Gallagher apparently used a project cost of $360 million and transmission costs of $70 million, compared to costs of $367 million and $47 million, respectively, cited in the Corps of Engineers' design memorandum. However, these cost differences do not have a major effect on projected energy costs. In short, we believe Mr. Gallagher's analysis was both complete and reasonably accurate.

* * *

We hope the information presented in this memorandum is helpful. If you would like additional information or would like to discuss the information presented here, please call.

[3]The "financing expense" included in Mr. Gallagher's analysis was not verified. We simply used the ratio of financing expense to total construction costs to determine a similar expense for the Susitna project.

BLACKMAIL FOR "SUSITNA FUND"

Repeal of the so-called Susitna "blackmail clause" may be linked to the Governor's Major Projects Fund, and a new proposal to channel a portion of those revenues to Susitna and Bradley Lake. The inclusion of Bradley Lake in the potential compromise may also be significant as a future alternative and compromise should Susitna falter. The problem with the Susitna "equity/blackmail" clause--attached to the authorization of the four-dam pool now in controversy--is that it presents a "catch-22" situation, especially for Susitna backers and Southcentral region lawmakers. The clause effects $280 million in state grants (a gift) already invested in the four dams, and would convert that equity to interest bearing debt/equity if $5 billion is not invested in Susitna by 1991.

The short term debt used to construct the four dams is now coming due, beginning in May. This means the state must either: (1) appropriate and pay cash for the remaining $200 million in short-term debt, (2) finance the remaining $200 million with longer term revenue bonds, or (3) go into default.

The state and the Alaska Power Authority have proposed financing the remaining debt with longer term revenue bonds, (option 2). However, this requires (for bond buyers) evidence of feasibility and ability to repay, which means power-use contracts with the communities to be served. However, the communities to be served would not sign those agreements unless guaranteed that their wholesale power rates would be at, or below, their present alternative diesel capacity. Hence, the Alaska Power Authority has proposed a rate stabilization package, requiring $35 million initially (as a bond reserve) and a total of $65 million. On this basis bond buyers appear to have assurances they need to buy the bonds. (continued page 5)

Projects Bills Moving Quickly

The six capital projects bills are now moving swiftly in the House and Senate. The swift pace of the bills means project lobbyists had best be alert concerning their projects. By the end of this week each House will probably have sent their three bills to the "other House." The bills will quickly find their way to the Finance Committees where they will "pause" for a time to get finishing touches. The bills are: HB-635, Development, HB-636, Transportation, HB-637, University of Alaska, SB-364, Erosion Control, SB-403, Education, and SB-420, Water and Sewer.
(continued page 4)

-- Inside --

Bargaining Over The "Blackmail Clause"

(Continued from page 1)

However, the Susitna "equity/blackmail" clause presents further problems if buyers are to be attracted. What the clause means to bond buyers is that they do not know whether their risk should be assessed against $200 millio. (present remaining debt), or $480 million, should the blackmail clause come into effect and grants be converted to debt. It is as if the bond buyer is being asked to take a second mortgage behind Susitna, which is an unlikely position for either buyers to take or bond houses to recommend. What is remarkable about the four-dam package is that the combined project is already salted with $280 million in grant dollars and apparently still fails feasibility tests without further subsidy.

How did we get to this position. Well, of course things were different back when the dams were authorized and original appropriations made. The state was wallowing in enough money that these latter costs might easily have simply been appropriated if need be. If things were to be done over again, with benefit of hindsight, certainly with a $280 million gift to the projects, the users (communities) would have been required to sign off on power use contracts before construction began and assume a share of the risk based on energy cost projections. They might have won big had the energy crisis continued, or lost. But that's the way most energy projects are financed.

Now the four-dam financing package is all tangled up with Susitna. The problem for Susitna backers and Southcentral lawmakers is that they may have to "give up" something they thought they had, something no politician likes to do. The Railbelt lawmakers would like to maintain what they feel are political guarantees on Susitna. If they give up the "blackmail clause" they will want some similar provision such as guarantees for Susitna in the Major Projects Fund. If they can't get pound for pound collateral for trading the "blackmail

(continued from previous column)
clause", then some kind of reduced collateral will have to do. Lastly, any politician wants to "save face".

The legislature could up and pay the $200 million due and maintain the "blackmail clause", but it would be politically difficult to squeese $200 million out of the current capital pie. Next, they could do what the APA and Sheffield Administration propose, and devise whatever they can as a collateral payment for repealing the clause. Lastly, the state could "default", a move that would leave a terrible fiscal mess and likely a negative impact on state and local bond ratings of all kinds. Default would most certainly kill any chances of financing Susitna, or similar large scale state related revenue bond projects, unless the state were to use its own cash dollars.

The situation is not a happy one for anyone. Even the four-dam pool communities find that the dams produce no "rate benefits" presently, or are likely to in the near future. Perhaps the only lament is that everything would have been wonderful if energy rates had soared as projected.

Eklutna Where Are You ???

With the major legislative capital bills now being kicked into their respective "other houses", the biggest missing piece from those bills is the Anchorage Eklutna water project. The giant $220 million project, designed to meet Anchorage water demands in the late 1980's, received $13.7 million in 1982 and $22.5 million last year. In November 1983, Anchorage voters also committed to the project with approval of $55 million in local bonds. Plans called for 25% of funds to be local and 75% to be state ($55 million vs. $165 million).

A push and pull over Eklutna could develop in the latter stages of capital bill funding within the legislature, or or negotiations between the executive and the legislature.

HB

684

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 13, 1984

The Honorable Joe Hayes
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill making a special appropriation to the Alaska Power Authority. This special appropriation is for rate stabilization for the utilities that will be purchasing power from the Lake Tyee, Swan Lake, Terror Lake, and Solomon Gulch hydroelectric facilities. The money will be used to reduce the wholesale power rate for these utilities during the early years of the operation of the hydroelectric facilities when hydroelectric costs will be significantly higher than their projected costs for diesel generation.

At the current stage of negotiations on the power sales agreements the rate stabilization fund is treated as a grant, and the special appropriation bill reflects this approach. However, the authority is still looking at the possibility of funding rate stabilization with a loan rather than a grant. If the loan approach is used, an amendment to this bill will be proposed to reflect the change.

Sincerely,

Bill Sheffield
Governor

LEGISLATIVE BRIEFING
LABOR AND COMMERCE COMMITTEES
PROPOSED RATE STABILIZATION FUND

A major issue involved with the establishment of the Energy Program for Alaska's Four Project Pool is the cost of power in the early years of operation. As is often the case with hydropower projects, the high fixed cost of bringing the projects on-line combined with relatively low utilization in the early years and lower than expected costs of operating diesel units has meant that the cost of power will exceed that of existing diesel generation. The Alaska Power Authority has, therefore, suggested a Rate Stabilization Plan that would provide an entry rate competitive with existing generation, protect the communities from rate shock, and allow the communities access to hydropower until the project's capacity is utilized enough to make it more desirable than diesel generation.

The power sales agreements proposed to the communities involved in the Four Project Pool recognize that the full power cost of the Power Authority's hydroelectric project will initially exceed that of the purchasing utilities' existing generation. This situation is likely to continue for several years until the increased usage of hydroelectric power brings its unit cost down and the unit cost of diesel generation, including the cost of additional generating capacity increases. The attached graph illustrates this relationship. It shows, in concept, the average unit revenue requirements with and without the hydroelectric projects. The average unit revenue requirement represents the total costs projected to be paid by the utility from sales revenue in each year divided by the forecasted sales of electricity. In the long run this approximates the average rate per unit of electricity sold to each type of customer including commercial, industrial, and residential.

The intent of the Rate Stabilization Fund is to offset the higher costs of the hydroelectric projects in these early years in amounts equivalent to the costs avoided by not operating diesel generation. The amount of the Fund is represented by the shaded area on the graph. The amount initially deposited in the Fund and the annual amounts withdrawn from the Fund to offset each utility's power costs from the Power Authority are established in advance and the power sales agreement will be conditional upon the establishment of the Fund. The calculations to determine the size of the Fund and the schedule of payments are detailed and complex. They rely on large amounts of data and numerous assumptions and involve analytical models that have been developed over the last several months with the purchasing utilities.

In general, the methodology involves projecting each utilities' costs with and without the hydroelectric projects and determining the difference. The costs without the projects include diesel fuel, operation and maintenance costs, major repairs and overhauls, and additions or replacements of generating capacity. By purchasing power from the Power Authority, the utilities can avoid some or all of the costs associated with these items. If the amount paid for power from the Power Authority is equal to the avoided cost of diesel, then the resulting costs to the ratepayers is no greater than it would otherwise have been. Once the avoided cost of diesel exceeds the fully allocated costs of Power Authority power, there is no further need for rate stabilization payments. The point at which this occurs is generally referred to as the "cross-over point." At the cross-over

point power costs tend to stabilize as the slight increases in the operating costs of the hydroelectric projects are off-set by increasing power sales.

The amount in the Rate Stabilization Fund needs to be carefully considered as well as the variables that will effect it. The amount is approximately $61.5 million consisting of $35 million in a State grant, $12 million from the bond proceeds, and about $14.5 million in interest earned on the $47 million invested during the approximately eight years that the Fund would be needed. These funds would be held by the Bond Trustee, not the communities, and each utility would take annual credits that would be necessary to stabilize their rates. Each utility would have a specific, maximum amount which could be drawn from the fund. While this amount could not be exceeded, the utility could elect not to take the entire annual amount and the remainder would be held in the Rate Stabilization account and reinvested. In this way, the utility could use the excess money to provide for future rate shock insurance.

Due to provision in House Bill 9 (HB 9), an amendment to the Energy Program for Alaska which established the pooled debt concept, there is the possibility of return on the State's investment to these four projects. Because of the "system increment" mechanism imposed by HB 9, when a new project is introduced to the Energy Program, the debt service on that project is pooled with the projects already in the system. The projects then continue to pay on the pooled debt at their established proportionate share. System increments, however pose problems for rate stability if a heavily debt financed project enters the system. As part of the proposed power sales agreements, the Power Authority is proposing a "cap" on the amount that rates can be raised due to a system increment. (See attached graph.) This will provide protection for the Four Project Pool utilities from future rate shock due new projects being brought into the system while at the same time it will return a portion of the State's investment in these four facilities.

MEMORANDUM

TO: Representative Ron Wendte

FROM: Jack Kreinheder
Research Staff

RE: Power Rates for Alaska Power Authority Projects
Research Request 83-182

Suzanne Mullen of your staff requested that we review and summarize the power rate analysis provided to you by the Alaska Power Authority. This analysis compared power rates for the four projects now completed or under construction -- Solomon Gulch, Swan Lake, Terror Lake, and Tyee Lake -- under the following cases or scenarios:

- a base case, with all four projects under the current rate structure established by HB 9, and minimum expected power sales.
- power sales for Swan Lake assumed to increase to 90 percent of project capacity, with remaining assumptions identical to the base case.
- a "stand alone" case, in which all four projects are separated and responsible for the payment of their own debt service. Under the current system, debt service is pooled for the four projects.
- a stand alone case identical to the one just described, except that all projects are assumed to be fully utilized (all power sold). Swan Lake was assumed to be 90 percent utilized.

General Comments

In general, the rate calculations provided by the Power Authority appear to be accurate for the cases specified. Some of the power sales figures in the base case do differ slightly from earlier estimates provided by the Power Authority, but the differences are not major. However, the rate tables which were provided to you do not match all of the cases described in the cover letter. For example, the cover letter states that the analysis includes a case for Terror Lake, Swan Lake and Solomon Gulch under the current HB 9 rate system (Tyee excluded), and a case

for Terror Lake and Solomon Gulch (Tyee and Swan Lake excluded). However, neither of these two cases were included in the tables I reviewed. The only similar case was one for Terror Lake, Solomon Gulch, and Tyee Lake, with Swan Lake excluded from the system.

If you specifically requested these two cases from the Power Authority, you may wish to inform the Authority staff that the correct rate analysis was not provided for these cases.

Comparison of Rate Scenarios

The attached graph and table provide a summary comparison of wholesale power rates in FY 1986 for the four scenarios described on the first page of this memo. Under the "current system" or base case scenario, the Tyee project would have the highest power rate, at 16.6 cents per kilowatt hour (KWH), with progressively lower rates for Swan Lake, Terror Lake, and Solomon Gulch.

Under the second scenario, increasing utilization of Swan Lake from 40 percent to 90 percent reduces the power rates for all projects except Solomon Gulch. The explanation for the higher Solomon Gulch rate is rather complex, but basically, Solomon Gulch would have to carry a larger portion of debt service because of the lower system average rate which would result from increased utilization of Swan Lake. Swan Lake rates would decrease the most, but Terror Lake and Tyee would also benefit because of the debt-sharing formula included in the HB 9 rate structure.

The third scenario is the stand alone case. The power rates for this scenario should be compared to the current system case, rather than the 90 percent Swan Lake usage case. Separation of the four power projects would have a large impact on rates, with large rate decreases for the Solomon Gulch and Swan Lake projects, and substantial rate increases for the Terror Lake and Tyee Lake projects. The primary reason for the differences in rates is the debt/equity ratio of the four projects. Solomon Gulch has no debt, while Swan Lake was 26 percent debt financed. On the other hand, Terror Lake ane Tyee were 58 percent and 36 percent debt financed, respectively. The higher level of debt for these two projects means that their power rates would increase if they were separated from the current APA system, unless some other action were taken to limit their rates, such as the Petersburg proposal for the Tyee project.

Finally, the fourth scenario shows the power rates for the four projects on a stand alone basis, with full utilization of the projects' capacities, except for Swan Lake, which is 90 percent utilized. The largest decrease in rates under this scenario is for the Tyee project,

because of the low (26 percent) level of utilization for this project in the early years of operation. Swan Lake rates would also decrease substantially. Power rates for Terror Lake would decrease by a lesser amount, because it is already expected to be 68 percent utilized in its first year of operation. Solomon Gulch is essentially fully utilized now, and so would not have any rate decrease under this scenario.

I hope this information is helpful. If you have any questions or would like additional research, please let us know.

FROM: Jack Kreinheder
Research Staff

RE: Power Rates for APA Projects
Research Request 83-182 (Additional Information)

Suzanne Mullen of your staff provided a set of additional rate projections made by the Alaska Power Authority and asked that we prepare a comparative graph and table similar to that which was included in my memo of May 26. The graph and table are attached, and a brief explanation of the rate comparison follows.

The first scenario shown in the graph and table is identical to the second scenario included in my previous memo, and is repeated here as a basis for comparison with the other cases. The power rates shown for this first scenario are based on the current four-project APA system in FY 1986, with Swan Lake power sales at 90 percent of project capacity.

The second scenario shows the effect on power rates of excluding the Tyee Lake project from the APA system, with the other three projects remaining in the system. The power rates for Tyee would increase from 14.3 cents to 19.1 cents in 1986 if it were separated from the system, unless additional power from the project could be sold or some other action was taken to reduce rates. The rates for the other three projects would all decline if Tyee were removed from the APA system, because they would not have to share the higher cost of Tyee power.

Swan Lake is excluded from the APA system under the third scenario, with Tyee, Solomon Gulch, and Terror Lake remaining in the system. The power rates for Swan Lake would decline by more than 50 percent, from 8.2 cents to 3.7 cents, if this separation occurred, and if 90 percent of the power from the project can be sold in 1986. The rates for Tyee and Terror Lake would increase substantially if Swan Lake were removed from the power system, because of the loss of Swan Lake's relatively low cost power to share the system debt service. Solomon Gulch would have a minor rate increase.

Under the fourth scenario, Tyee and Swan Lake are both removed from the APA system, leaving only Solomon Gulch and Terror Lake. Tyee and Swan would both have the same power rates as if they had independently been excluded from the system. Terror Lake rates would increase from 11.3 cents in the base case to 13.7 cents under this scenario, while Solomon Gulch rates would stay about the same.

Please contact me if you have any questions or would like additional information.

RE: Susitna "Blackmail Clause" [AS 44.83.398(b)(2)]
Research Request 83-145

Suzanne Mullen of your staff asked that we briefly explain the current effect of [AS 44.83.398(b)(2)], commonly referred to as the Susitna "blackmail clause," on the viability of the Susitna hydroelectric project and on other Alaska Power Authority projects.

As you know, the clause states that if $5 billion is not appropriated to the power development fund by July 1, 1986, the power rate for each project owned by the Power Authority will increase to a level sufficient to return to the State 10 percent of the State investment in the project each year. There has been some controversy over the definition of the term "State investment" as used in the clause, which has resulted in uncertainty over the power rates that would occur if the clause went into effect. In any case, the clause would result in a substantial increase in power rates, up to 100 percent or more for some projects. The higher rates under the clause would apply not only to current projects, but to Susitna and other future projects, as well.

The "blackmail clause" was enacted as part of SB 25 in 1981, and was intended to provide some assurance that Susitna or another large Railbelt power project would receive appropriations comparable to those made in 1980 and 1981 for power projects in other regions of the state. At that time, $5 billion was considered sufficient to pay for almost the full cost of Susitna and the other projects under development.

As a result of the sharp declines in State revenues over the last two years, the blackmail clause is now considered by the Power Authority and other experts to be an obstacle, rather than an aid, to development of Susitna and other projects. As you know, the Power Authority has introduced (through the Governor's Office) legislation to repeal the clause.

The basic problem is that falling State revenues have made it extremely unlikely, barring a complete reversal in oil price trends, that the State can afford to appropriate $5 billion for power projects by FY 86. Approximately $500 million has been appropriated for power projects to date, so that an additional $4.5 billion would have to be appropriated in the next three fiscal years to meet the requirements of the clause. The latest Department of Revenue figures (30th percentile) project about $8.8 billion in total general fund revenues from FY 84 to FY 86. At current levels, the operating budget alone would require about $5.8 billion over these three years, leaving only $3 billion for all loan and capital appropriations. Under more optimistic revenue forecasts, it would be more practical to appropriate the required $4.5 billion for power projects, but very little money would remain for other capital projects or loans.

Because it appears almost certain that the "blackmail clause" would take effect if it remains law,* the electric utilities in the Railbelt and other areas of the state have become concerned about the effect of the clause on them. The clause, as part of the Power Authority's rate statutes, must be included in every power sales contract negotiated by the Authority. Although the Authority has obtained power sales contracts for the Solomon Gulch, Terror Lake, and Swan Lake projects, the utilities involved are very concerned about the prospect that their rates for purchased power could double in three years.

The Power Authority's financial advisors also fear that the clause could affect the issuance of revenue bonds for existing and future power projects, because the bond markets could be concerned about the ability and willingness of utilities to pay the higher rates under the clause. The financial advisors have stressed the importance of having the Power Authority's first bond issues be as straightforward and risk-free as possible in order to establish a sound credit rating.

With respect to Susitna, both the Governor and the Federal Energy Regulatory Commission (FERC) have stated that construction cannot begin, nor will a FERC license be issued, until power sales agreements for Susitna power have been signed by Railbelt utilities. As mentioned earlier, the "blackmail clause" applies to future power projects, not just projects now under construction or in operation. One of the

---

* There have been questions raised about the constitutionality of the clause, and it is possible that the clause would be struck down in court. The clause is currently the subject of a lawsuit by the Trustees for Alaska; however, the suit has been stayed pending legislative action on the measures to repeal the clause.

largest obstacles to the successful negotiation of the Susitna power sales agreements is that the power rates for Susitna depend heavily on the level of State funding for the project, which is uncertain at this time. The clause accentuates this problem by creating the prospect that Susitna power rates could be considerably higher than estimated by recent studies.

I hope this information is useful. If you have any questions or would like additional research, please let us know.

FROM: Jack Kreinheder JK
Research Staff

RE: Swan Lake Hydroelectric Project
Research Request 83-89

In response to a request made by Rena Bukovich of your staff, this memorandum provides the following information on the Swan Lake hydro project near Ketchikan:

(1) the expected construction cost and completion date of the project;

(2) a comparison of the projected cost of power from the project and current power rates in Ketchikan; and

(3) the status of the power sales agreement between Ketchikan and the Alaska Power Authority.

PROJECT STATUS

The Swan Lake hydro project is expected to be completed and begin operation by January 1984. According to John Ferguson, the Swan Lake project manager for the Alaska Power Authority, the project was 84 percent complete as of March 31, 1983. The project will have an installed generating capacity of 22.5 megawatts and an annual firm energy production of about 70 million kilowatt hours per year.

The total completed cost of the project was estimated at $99.2 million as of February 1, 1983, including about $2 million in contingencies. At that time, $72.4 million had been spent by the Power Authority on the project. The financing for the project consists of $69 million in State appropriations and $35 million in short-term interim financing obtained by the Power Authority. The interim financing comes due in March 1984, and will have to be refinanced at that time, probably through the issuance of long-term revenue bonds.

CURRENT AND PROJECTED POWER RATES

As you know, concerns have developed in recent months about the high projected cost of power from the APA hydro projects now under construction, primarily in regard to the Tyee Lake project.* Initial rate projections done by the Power Authority early this year indicated that power rates from the Swan Lake project might also exceed the cost of diesel generation in the first years of project operation. However, current rate analyses conclude that the cost of power from Swan Lake will be competitive with diesel generation from the beginning of project operation, even without any additional State funding or other legislative action. In addition, there appears to be a good chance of marketing surplus power from the project to industrial users, thus reducing power rates substantially.

Current Diesel Generation Costs

Bob Arnold, General Manager of the Ketchikan electric utility, stated that the current cost of diesel power generation for the utility is about 13 cents per kilowatt hour. This cost is up from 12 cents per kilowatt hour (KWH) in 1982, despite the decline in world oil prices. Mr. Arnold said that there has been only a small drop in diesel fuel prices in Ketchikan (about five cents per gallon) and that this drop was offset by increased operation and maintenance costs for the diesel generating units.

Ketchikan also generates about 45 percent of its power requirements from three hydro plants. The average cost of power from these plants is only about 4 cents per KWH. These existing hydro facilities will continue to be operated after Swan Lake begins operation, unless increased utilization of the project makes it economic to shut the smaller plants down.

Swan Lake Power Rates

The current "base case" power rate for Swan Lake is expected to be about 12.5 cents per KWH in FY 86, according to Mike Yerkes, Director of Operations for the Power Authority. This base case rate forecast assumes no additional State appropriations to the energy program and no sale of surplus power from Swan Lake. FY 86 is the critical year for power rates, because that is when the Terror Lake project would begin operation. Under the rate structure established last year by

---

* For a more detailed discussion of the Tyee Lake rate situation, see my memo of 2/11/83 to Representative Clocksin (Request No. 83-39).

HB 9, each power project has a separate rate, but the debt service is pooled for all of the projects under the energy program for Alaska. Therefore, the addition of new projects to the system can affect the rates for earlier projects such as Swan Lake.

The higher ratio of debt to equity for Terror Lake and the way in which debt is pooled among the four projects -- Swan, Tyee, Terror, and Solomon Gulch -- results in power rates for all of the projects peaking when Terror Lake is added to the system in FY 86.

As noted earlier, Swan Lake is expected to begin operation in January 1983. During the first few months of operation, until long-term debt is issued, the power rate will be set at a level to cover only operation and maintenance costs. This rate will probably be in the range of 4 to 5 cents per KWH. As of July 1, 1985, the power rate is projected to increase to about 9 cents per KWH, with a further increase in July 1986 to the 12.5 cents per KWH rate cited above. The rate is then expected to decline slowly to 11 cents in FY 90, 8.5 cents in 1995, and just over 6 cents in the year 2000. See attachment A for a chart of this rate trend.

It should be noted that these rate projections are somewhat arbitrary in that they do not account for the addition of other power projects such as Bradley Lake or Susitna. However, the future of these projects is still uncertain and their impact on power rates depends largely on the financing used to build them.

If these rate estimates are accurate, there should be no difficulty in marketing power from the Swan Lake project. The highest power rate would be in FY 86 at 12.5 cents per KWH, less than the 13 cents per KWH which it now costs Ketchikan to generate diesel power. If oil prices drop substantially or revenue bond interest rates are higher than expected by the Power Authority, a rate problem could develop for Swan Lake; however, this appears unlikely.

Sale of Surplus Power

About 40 percent of the generation capacity of the Swan Lake project would be used in the first years of project operation, based on current Ketchikan power demand and growth rates. Mr. Arnold has had discussions with the managers of industrial plants in Ketchikan who now generate their own power about the possibility of purchasing Swan Lake power. He believes it is likely that agreements to market surplus Swan Lake power can be negotiated and that the power output of the project can be fully utilized from its first year of operation.

Full utilization of Swan Lake's capacity would decrease the power rate from 12.5 cents to about 8 cents per KWH in FY 86. Under this arrangement, power sales to industrial users would be made on an interruptible basis, meaning that sales to industrial users would be reduced as the power demand of residential and commercial users increased in future years.

Full or increased utilization of the Swan Lake project would also reduce power rates for the other three projects under the energy program, because of the pooling of debt service among the projects. With higher utilization, Swan Lake would pay for a larger percentage of the debt service for all the projects. This effect is most important for the Tyee project because it has the highest power cost of the four projects. For Tyee, full utilization of Swan Lake would reduce the power rate from 16 cents per KWH to about 13.5 cents.

This lower rate would substantially improve the marketability of Tyee power, although a further decrease in rates through other means could still be necessary. It should be noted that increasing the utilization of Tyee itself would be the most effective means of lowering the power rate from that project. Consideration is being given to this option, but the market for surplus power in Petersburg and Wrangell appears weaker than in Ketchikan. One longer-term option would be to construct an intertie between the Tyee and Swan Lake projects, in order to make additional capacity available to Ketchikan when the power from Swan Lake is fully utilized. The Power Authority is currently conducting a study to evaluate this option, as well as other power sources for Ketchikan.

Attachment B illustrates the relationship between increased utilization of Swan Lake and power rates for the project. The figures also show that Swan Lake covers an increasing percentage of debt service for the energy program as utilization rises. This increasing share of debt borne by Swan Lake is what causes the decline in power rates for other projects.

The one drawback or limitation to the increased utilization of Swan Lake is that the contracts for the sale of surplus power will not be firm take-or-pay contracts. This means that if an industrial purchaser shuts down because of market conditions or a strike, for example, the purchaser will not have to pay for the power which is not used. As a result, the power rate paid by the Ketchikan utility would have to revert to a higher rate to cover the debt service and operating costs of the project.

This situation would not be as problematic for Ketchikan as for Petersburg and Wrangell, because the highest rate for Ketchikan would still be below the cost of diesel generation (according to current estimates).

However, for Petersburg and Wrangell, the increased power rate resulting from reduced utilization of Swan Lake could be higher than the cost of diesel generation for these communities. Therefore, Petersburg and Wrangell may be reluctant to sign power sales agreements based on a power rate that depends on full utilization of Swan Lake. It may be necessary to implement some type of "backup plan" based on State appropriations or loans to ensure that the power rates for these cities will not exceed an acceptable level.

The Power Authority Board of Directors will consider the power rate issue at their board meeting scheduled for Monday, April 18 in Juneau.

SWAN LAKE POWER SALES AGREEMENT

An agreement for the purchase of Swan Lake power was signed by the Power Authority and the City of Ketchikan in the spring of 1982. The agreement now needs to be revised to incorporate the substantial changes made by HB 9, which was enacted at the end of the 1982 legislative session. The original agreement specified that the contract was subject to statutory changes and would be changed to reflect any changes.

The Power Authority and the City of Ketchikan decided last fall to wait until the end of the current legislative session before revising the existing contract, rather than risk having to revise the contract a second time if changes to the Power Authority's statutes are made during this session. As the project will not begin operation until at least January 1984, this delay should not have any significant effect on the project.

MEMORANDUM

TO: Representative Don Clocksin

FROM: Jack Kreinheder
Research Staff

RE: Lake Tyee Power Costs and Project History
Research Request 83-39

You requested that we summarize the current status of contract negotiations for the sale of power from the Lake Tyee hydro project. You asked that we address the expected cost of power from the project, current power costs in Petersburg and Wrangell, and alternatives for reducing Tyee power costs to marketable levels.

The attached letter from the Alaska Power Authority outlines the sequence of construction cost estimates for the Tyee project and the decisions made by the Power Authority Board concerning project construction.

It is important to emphasize that the power cost projections in this memorandum are preliminary and are currently being revised by the Power Authority to reflect detailed financing arrangements for the Tyee project. These revised cost estimates will probably be somewhat lower than the figures cited here.

SUMMARY OF FINDINGS

The basic power marketing problem for the Tyee project is that the wholesale cost of power from the project in its first years of operation is projected to be about 40 percent higher than current power generation costs for Petersburg and Wrangell. The Power Authority estimates that Tyee power will cost about 16.5 cents per kilowatt hour (KWH) in FY 1986. Recent press reports have cited claims by Petersburg officials that the retail cost of power from Tyee would be 100 percent higher than current levels. However, these claims are disputed by the Power Authority, as discussed later.

Power generation in Petersburg and Wrangell now costs about 12 cents per KWH and this cost is not likely to increase substantially over the next several years unless oil prices increase more than expected by most forecasters. These communities are understandably not willing

to sign contracts to purchase Tyee power at rates substantially higher than current generation costs.

If no action is taken by the legislature to reduce Tyee rates, it appears that power sales agreements could not be obtained and the Power Authority would not be able to sell the necessary revenue bonds to repay the interim financing for the project. Although I did not research the possible steps the Power Authority might take in this situation to avoid a default on the Tyee debt, the Authority would probably be in a precarious financial position.

There are several possible approaches to reducing power rates for the Tyee project, most of which require more State money:

(1) Make an additional lump sum appropriation to the hydro program to reduce the amount of debt financing required for Tyee and other projects. About $70-80 million may be required to reduce Tyee rates to the level of current power costs. If desired, this appropriation could be structured as a loan, to be repaid to the State after Tyee power becomes competitive with the cost of power from present generation facilities.

(2) Appropriate a smaller amount of about $20 million only to the Tyee project and enact temporary legislation which would reduce only the Tyee rates. (Under present law, an appropriation to any power project would reduce the power rates by an equal percentage for all projects.)

(3) Make annual appropriations of about $2-3 million to cover a portion of the debt service costs for the Tyee project, allowing power rates to be reduced until the project becomes competitive with diesel generation costs.

Administration Choice → (4) Amend the rate structure under present law to spread the higher cost of Tyee power among other power projects.

(5) Restructure the long-term debt for the Tyee project to reduce debt service costs in the early years of project operation (the viability of this approach is uncertain).

TYEE POWER COSTS

The following table shows projected wholesale power costs for the Tyee project from FY 85 to FY 90.

PROJECTED TYEE WHOLESALE POWER COSTS
(Cents per Kilowatt Hour)

Fiscal Year	1985	1986	1987	1988	1989	1990
Power Cost	12.8	16.5	16.7	16.8	17.0	17.2
Power Sales (Millions of KWH)	32.0	32.8	33.6	34.5	35.3	36.2

Source: Alaska Power Authority for FY 85-86, adjusted by House Research Agency for FY 87-90 for 4 percent annual increase in debt service cap, 3 percent average annual load growth for all APA projects, and 5 percent annual inflation in operation and maintenance costs. Debt service calculations based on 35-year revenue bonds at 11 percent interest, with a 1.1 coverage level.

Again, these projections are preliminary, and more accurate figures will be available within a week. These projected rates are probably on the high side because they do not account for the interest earned on debt reserve funds or the lower-than-expected cost of the interim financing for the project. The Power Authority's financial advisors are now working to incorporate these and other adjustments to arrive at more accurate rate projections. One uncertainty in these rates is that they assume the Wrangell sawmill will buy about 7 million KWH per year -- about 20 percent of total projected power sales from the project. The sawmill was shut down for over a month this winter and could be an uncertain buyer of Tyee power.

The Tyee project is scheduled to be completed in early 1984, and may be on line as soon as October 1983 if work continues at its current pace. When the project begins generating power, the initial rate will be set to cover only operation and maintenance costs (4-5 cents/KWH) until the start of the 1985 fiscal year, when the rate will increase to cover the costs of long-term financing for Tyee and the Swan Lake project. The power rate will increase again in FY 86 to reflect the cost of

revenue bonds issued for the Terror Lake project. After 1986, the Tyee power rate will probably increase by about two percent per year.*

PROJECT FINANCING

The completed cost of the Tyee project is now estimated at $115 to $125 million. Construction of the project has been financed by $82 million in appropriations from the legislature and $50 million in interim financing. This interim financing will have to be repaid in the spring of 1984 through the issuance of revenue bonds, additional State appropriations, or a combination of the two. The Swan Lake project also has $50 million in interim financing which will be repaid at about the same time. Terror Lake has $100 million in short-term debt which will be due in 1985.

HB 9 RATE STRUCTURE

The financing and power costs for Tyee are tied to those of other Power Authority hydro projects under legislation enacted in 1982 (CCSHB 9 -- Chapter 155). This statute requires each hydro project to pay its "proportionate share" of the total debt service costs for all projects, as determined under a formula in the statute. Basically, the statute means that if the construction cost of Tyee is 25 percent of the total cost of all projects in the system, Tyee must pay 25 percent of the total debt service costs for all projects. The wholesale power rate for each project is then determined by adding operation and maintenance expenses to debt service costs and dividing this sum by the expected power sales for each project.

The HB 9 rate structure replaced the "postage stamp" or single statewide rate formula which was enacted in 1981 by SB 25. The major purpose for the change in the rate structure was to increase the incentive for building cost-effective and properly sized projects, by linking power costs more directly with project construction costs.

When the conference committee on HB 9 reviewed rate projections for the four power projects, there was concern that the rates for the Tyee and Swan Lake projects would be excessive under the HB 9 rate structure. As a result, the committee included in the legislation a limit or cap on the debt service cost for each project. Under this cap, no project must pay more than the average debt service cost for all Power Authority

---

* The rate calculation is complex, but the three main factors that affect the project rates after 1986 are: inflation in O&M costs, the rate of growth in power sales, and the 4 percent annual increase in the HB 9 debt service cap. The addition of the Bradley Lake project or other projects could also affect Tyee rates substantially.

projects, plus a certain percentage which increases each year (8 percent in FY 85, 12 percent in FY 86, and so on). Although this debt service limit reduces the power rate for Tyee substantially, it does not reduce the rate to a marketable level.

Because the debt service costs are pooled for all projects in the system, an appropriation to Tyee or any other project would reduce the power costs for all projects by an equal percentage.

PETERSBURG AND WRANGELL POWER COSTS

Current Costs

Exact power costs for Wrangell and Petersburg were not readily available at this writing. However, the busbar generation cost (equivalent to the wholesale power cost from Tyee) for both communities is approximately 12 cents per KWH. Wrangell generates all of its electricity from diesels, while Petersburg obtains about half its power from the Crystal Lake hydro project, which was built many years ago. The Petersburg utility apparently has a higher level of debt than the Wrangell utility, which offsets the lower cost of power from the hydro facility.

While most of the recent publicity concerning the Tyee project has focused on the city of Petersburg, the Power Authority staff maintains that Wrangell would face a larger rate increase if Tyee power were purchased at current projected rates than would Petersburg. According to Mike Yerkes, who is negotiating the Tyee contracts for the Power Authority, this is because Wrangell would convert entirely from diesel generation to Tyee power, while Petersburg would continue to generate about half its power from the low-cost Crystal Lake hydro project, which was built decades ago.

Future Costs

The rate of increase in future generation costs for Petersburg and Wrangell is one of the basic questions to consider in determining what approach the State might take to the Tyee situation. The cost of diesel fuel is the largest expense component for these utilities, averaging about 9-10 cents per KWH generated over the past year. As you know, the future of world oil prices is highly uncertain and the range of forecasts is considerable. However, the most recent Department of Revenue forecast projects a 28 percent cumulative decrease in the real price of oil through FY 87. In nominal terms, oil prices in FY 88 are forecast to be about the same as today.

If this projection is accurate, it may be the early to mid-1990s before diesel generation costs would increase to the level of Tyee

costs. However, an additional consideration is that Wrangell and Petersburg may have deferred expansion of their generation facilities in expectation of receiving Tyee power. Therefore, new generators might have to be added to meet increases in load growth during the 80s, which would increase power rates.

Retail Power Rates

Part of the publicity over the Tyee project centered on claims by Petersburg officials that they would have to add about 9 cents per KWH to the wholesale cost of power from Tyee for distribution and overhead costs, thus doubling the retail power costs from current levels. The Power Authority staff believe this figure is highly inflated and does not account for savings in diesel maintenance costs which would occur when Tyee comes on line. The staff is preparing documented estimates of what they feel are more realistic distribution and overhead costs.

Other Concerns

It is important to note that the cost of power from current projects is not the only concern of Petersburg, Wrangell, and other cities or utilities to be served by Power Authority projects. These groups are also concerned that under the current rate structure, their power rates could increase substantially as additional projects are added to the system. Whether this would occur depends on the level of State funding for the additional projects. If the ratio of State funding to bonded costs for new projects is lower than the average for current projects, the rates for current projects would rise.

The "Susitna Blackmail Clause" [AS 44.83.398(b)(2)] is an additional source of concern for municipalities and utilities, as the clause could dramatically increase power rates if not repealed. This clause would increase power rates by requiring a 10 percent annual return on investment to the State if $5 billion has not been appropriated for power projects by 1986.

POSSIBLE APPROACHES TO THE TYEE RATE PROBLEM

There are several possible approaches to the Tyee rate problem, as summarized earlier. The choice among them is complex and depends on basic policy issues relating to the power development program. Some of the more important factors to consider are discussed below.

Lump Sum Appropriation

This approach would be the most expensive; preliminary calculations indicate that $70-80 million would be necessary to lower the Tyee power rates to the cost of diesel generation.* Although the outstanding debt on the Tyee project is only $50 million, the pooling of debt service among all projects under the APA rate structure requires a larger appropriation to reduce Tyee rates sufficiently. A lump sum appropriation would also lower the power rates for Solomon Gulch, Swan Lake, and Terror Lake by an equal percentage (about 40 percent). This raises two questions.

First, is it necessary or desirable to reduce the power rates for other projects that already have reasonably priced power? Second, what effect would lowering the rates for all projects now on line or under construction have on future projects? Lowering the average power rate would reduce the debt/equity ratio for current projects and require a higher level of State appropriations for future projects unless power rates were to be increased for all projects.

Special Tyee Legislation

If special legislation were passed so that a one-time appropriation would be used to reduce only Tyee power rates, roughly $20 million would be required to provide the necessary rate reduction. However, this approach could be viewed as creating a precedent for "bailing out" high-cost projects which might result in similar problems for future projects.

Annual Appropriation

In lieu of a one-time appropriation, the legislature could make annual appropriations of about $2.4 million to cover the debt service shortfall that will result if power is sold at 12 cents rather than 16.5 cents per KWH. These appropriations would continue and eventually diminish

---

* I have not included these calculations here for the sake of brevity, but can provide them if desired.

to zero as the cost of diesel generation increased to match the cost of Tyee power or the cost of Tyee power fell. Although it is uncertain how long these annual appropriations would be required, depending on fuel escalation rates and other factors, the total cost would probably be half or less the cost of a lump sum appropriation.

The Petersburg and Wrangell utilities would be eligible for rate relief under the power cost assistance program, but only for the portion of retail rates above 16 cents in FY 86. This floor increases by one cent each fiscal year. Also, cost assistance is available only for the first 600 KWH per month sold to each customer. Therefore, a separate appropriation specifically for Tyee debt service might be required each year in order to reduce power rates sufficiently.

Modification of Rate Structure

It would be technically possible to modify the statutory rate structure to reallocate at least part of the Tyee debt service to other lower cost projects, primarily Solomon Gulch and Terror Lake. The communities served by these projects would probably strongly oppose this change. In addition, the bond markets could view this juggling of the rate structure with some concern.

Restructure Project Debt

It may be possible to reduce the debt service costs for the first few years of operation of the Tyee project by borrowing additional funds with which to pay part of the interest on the bonds for several years. According to Sterling Gallager of John Nuveen and Associates, it is legally possible to have this type of arrangement for five years without violating federal arbitrage regulations. However, the financial viability of this approach is uncertain and would require additional research.

Another possibility would be to use a geometric financing approach, in which the debt service schedule would be shifted so that debt service costs would be lower in the early years and increase gradually as the project power sales increased. This approach has been used in a few utility bond issues, but it is uncommon and would also require more investigation to determine its viability for the Tyee situation.

IMPLICATIONS FOR OTHER POWER PROJECTS

A number of legislators and other observers have expressed concern about the possibility of the Tyee marketing problem occurring with Susitna or other hydro projects. This is a controversial issue with numerous points of view, but a few observations may be helpful in understanding the problem.

It is important to recognize the distinction between the economic feasibility of a hydroelectric project and the marketing feasibility of the same project. Although the economic feasibility of the Tyee project is an issue itself, the point is that even a clearly feasible hydro project will usually require some sort of grant or low-cost financing to lower power rates to marketable levels in its early years of operation. After a period of years, increasing power sales and higher fuel costs for the alternative generation source should result in a break-even point, after which the hydro power becomes less expensive. The initial subsidy to the project can then be repaid, if necessary.

In the case of the Tyee project, the continually increasing cost estimates for the project made it difficult to determine how much State money was required to achieve marketable power rates. The power-marketing problem for Tyee is also accentuated by the fact that Tyee has the largest excess generation capacity of the four projects now on line or under construction -- only about 25-30 percent of the project's capacity will be used in the first years of operation. This lower level of utilization means that a higher proportion of State funds is necessary to obtain reasonable power rates.

A major element of the Tyee problem appears to be that neither the legislature nor the Power Authority placed sufficient emphasis until recently on the marketing of power from the projects under construction. Part of the reason for this apparent oversight is that in 1980 and 1981, State revenues were increasing rapidly and it was expected that most of the project costs would be funded through direct appropriations or low-cost loans, rather than by revenue bonds. With this expectation, power marketing was not an issue because of the low power costs. The sharp decline in State revenues has resulted in more reliance on debt financing, causing higher power rates and the marketing problem demonstrated by the Tyee project.

With respect to the Power Authority, an additional problem was the lack of staff with experience in marketing and rate issues. It was only about 10 months ago that the Power Authority hired someone with rate setting and utility experience. Until then, the focus of the staff

was more on the feasibility, design, engineering and financing aspects of power development.

A final contributing factor to the Tyee situation was that the revisions to the Power Authority rate structure enacted in 1982 by HB 9 were not based on a full assesment of the effect of these rate revisions on the marketability of power from Tyee and the other projects.

The likelihood of the Tyee rate problem occurring with other power projects is difficult to assess. The Power Authority appears to have made good progress in dealing with the marketing issue. Several measures have been taken to avoid the recurrence of the Tyee cost escalation problem, and a number of recent bids for construction of the Terror Lake and Anchorage-Fairbanks projects have been substantially lower than engineering estimates.

In addition, the Authority has proposed changing its procedures to require power sales contracts to be signed before project construction begins, and this was done for the Terror Lake project. In the past it has been difficult to obtain contracts because it was uncertain how much funding would be provided by the legislature, and there is a natural incentive for communities to lobby the legislature for additional funds to reduce their power rates. It may also be difficult to obtain pre-construction power sales agreements for the Susitna project because of the long lead time of the project.

The chances of the Tyee power marketing problem occurring with future power projects would be reduced if the legislature made certain it had sound estimates of the maximum appropriation necessary for power marketing purposes before approving construction of a project, and committed itself to the appropriation of the necessary amount. Any changes in the rate structure should also be made only after detailed evaluation of the impact on project power rates and marketability.

Subject: Tyee Hydroelectric Project-Summary of Estimated Total Costs

Dear Jack:

As per your request, following is a brief summary on the sequence of events on the Tyee hydropower project primarily relating to cost. The summary of Board actions was extracted from our corporate minutes. Most of the actions taken by the Board were based on advice from myself and my staff.

On December 19, 1979, the Alaska Power Authority submitted a revised application to the Federal Energy Regulatory Commission (FERC) for the construction of the Tyee Hydroelectric Project in the vicinity of Wrangell and Petersburg, Alaska. Our engineers, R.W. Retherford Associates/International Engineering Company (IECO) estimated the total cost of the project at that time at $49,590,000 (1980$'s). With an allowance for inflation and interest during construction the estimated total capital investment at that time came to $53,333,000.

In September 1980, IECO submitted a revised cost estimate of $50,976,000 (August 1980$'s).

Early in 1981, the Power Authority retained EBASCO Services, Inc., to prepare an independent cost estimate. EBASCO subsequently estimated the total project cost at $96,693,000 (May 1981$'s). Escalated to the midpoint of construction, this would represent a completed cost of approximately $110 million. After reviewing the EBASCO estimate, IECO conceded that its previous estimates were low and IECO raised its estimate to $81,069,000 (June 1981$'s). EBASCO refuted this revised estimate.

Procurement of long-lead-time turbines began in July 1981 in anticipation of a FERC license. The Board of Directors was realigned by Statute in the latter part of July 1981. The FERC issued a license on August 5, 1981 and the award of several additional procurement and one construction contract followed almost immediately thereafter.

IECO continued to make monthly reports on the status of the project, including estimated total project costs. It is important to note that by the end of March 1982, IECO had increased its project estimate to $97,072,000,

including engineering costs prior to construction. In the March report the overhead transmission line was estimated to cost $12,840,000 plus a $6,000,000 contingency. Less than two months later, during the bid opening for that contract, IECO provided an engineer's estimate of $23,280,887.00--an estimate that is 24 percent above any previous estimate, including contingency funds. The actual low bid was even higher at $24,901,466.

Starting with the IECO estimate from the March 1982, report, adjusting for the actual low bid on the transmission line, and adding the estimated cost for a proposed separate substation construction contract, the estimated total project cost was increased by IECO to $110,133,000 (May 1982). This did not include approximately $5 million for owner provided insurance. During the months that followed, the total project cost has decreased and increased, slightly, as adjustments have been made for actual bids on relatively small procurement contracts..

In December 1982, and again in January 1983, senior staff of IECO and IECO's parent company, Morrison Knudson (M-K), met with representatives of the Power Authority to discuss construction management of the project, including total project costs. The latest information from IECO is that the total project cost will not exceed $124,886,100. The Power Authority has asked the parent company, M-K, to completely review this estimate. A report from the M-K staff is anticipated the second week of March 1983.

A summary of Board actions, as extracted from our corporate minutes, is as follows:

October 4, 1978 Board receives report on Tyee Project indicating that, according to the reconnaissance study by Robert W. Retherford Associates, (RWR) the Project looks favorable and that Thomas Bay Power Commission (TBPC) will soon enter into contract with RWR for Federal Energy Regulatory Commission (FERC) work and that TBPC may request the Alaska Power Authority to take over the project.

November 18, 1978 APA Board voted to make $120,000 loan to TBPC for Tyee FERC work and this would supplement the $300,000 available from the Water Resources Revolving Loan Fund (WRRLF) in order to cover the $475,000 contract with RWR.

June 21, 1979 Board makes a loan to TBPC of $60,000 for Tyee Project. TBPC and Representative E.J. Haugen request the APA take over Tyee. The Board directed staff to bring information back at next Board meeting for Project take-over.

September 27, 1979 Tyee Letter of Understanding with TBPC adopted by Board.

November 2, 1979 Board authorized Executive Director to submit FERC license application. Also passed "stop-the-clock" resolution needed for bonding.

February 7, 1980 Board agreed to extend contract for advanced Engineering

and Design to IECO for Tyee but it was later decided with legal council to seek competitive proposals.

April 13, 1980 Board selects IECO for the Engineering and Design from among three proposals.

October 23, 1980 Board informed that costs have increased from $39,000,000 to $51,000,000 and has IECO explain to Board.

April 20, 1981 Board selects consultant panel as required by FERC.

May 14, 1981 Board awards Bids for Turbines.

July 6, 1981 Board considered awarding contract for Steel Towers and Conductors but defers "notice to proceed" until after opening of major Civil Contract so that the Board could get a better fix on the true cost of the Project.

August 18, 1981 FERC license has been received. Bids for Civil construction were reviewed as were the economics of the Project based on new cost estimates. Notice-to-proceed was given on Towers and Conductors. The Board was informed that existing funds were insufficient and that interim financing would be necessary. Board deferred action until the next meeting.

September 10, 1981 Board awards Civil Works contract to Southeast Harrison Western (SEHW) after lengthy debate.

October 2, 1981 Board informed on legal actions against Tyee construction contracts. Need for interim financing was discussed and indicated a proposal would be presented to the Board in December, 1981. Risk Management's desire to use "Wrap-up Insurance" on Tyee Project was discussed and actions that would be taken to effectuate such a program.

December 15, 1981 A Finance Plan was presented to the Board. It was recommended that the Board appoint a subcommittee to review the feasibility of the Tyee Project based on present knowledge of the costs. Commissioners Warr and Mueller and Dr. Weeden were appointed to the subcommittee. The Board moved that final financing documents for financing be prepared. The economics of the Project was reviewed.

January 22, 1982 Senator Dankworth and Representative Haugen addressed the Board and recommended proceeding with interim financing. Board authorized securing of $50,000,000 in interim financing. Board awarded a contract for Underwater Cables.

May 25, 1982 The Board awarded the Overhead Transmission Line contingent upon the Legislature not passing a piece of legislation that was being considered but that subsequently was not passed. Thus on June 3, 1982 the Executive Director informed the Board of his intent to issue the award for Transmission Tower construction.

October 22, 1982 The Board awarded contract for Transformers.

I trust this information is of assistance to you. If there is any further information you need, please call on me.

Sincerely,

Eric P. Yould
Executive Director

MEMORANDUM

TO: Representative Jack McBride

FROM: Jack Kreinheder
Research Staff

RE: History of Hydro Projects in Election District 1
Research Request 83-54

You requested that we summarize the development of hydro projects in Election District 1, focusing on the Swan Lake, Lake Grace and Tyee Lake sites. As you know, the Swan Lake and Tyee Lake projects are under construction by the Alaska Power Authority, while Lake Grace was considered as an alternative to the Swan Lake site.

Existing Hydro Projects in Ketchikan and Petersburg

The City of Ketchikan's electric utility generates about 45 percent of its annual power production from three existing hydro facilities at Ketchikan, Beaver Falls, and Lake Silvis. The generation capacity of these hydro units is 4,200, 5,000, and 2,100 kilowatts, respectively. The first generating unit at the Ketchikan site was installed in 1938, with another unit added in 1957. The first Beaver Falls unit was installed in 1946, with two more generators added in 1954. The Lake Silvis plant was installed in 1968.

Ketchikan's remaining power demand is met by diesel generators with a total capacity of about 18,300 kilowatts. These diesel units will be retired except for standby generation purposes when the Swan Lake project is completed.

Petersburg generates about 50 percent of its current power requirements from the Crystal Lake hydro project. This project was originally developed in 1929, with a major expansion in 1955. The current generation capacity of the Crystal Lake plant is about 2,000 kilowatts.

The City of Wrangell presently generates all of its electricity from diesel plants.

Lake Grace

Lake Grace is located about 15 miles east of Swan Lake on the west side of Behm Canal. The proposed hydro plant at Lake Grace would have been substantially larger than Swan Lake in terms of power output and cost. The Lake Grace project would provide 25,000 kilowatts (KW) of capacity and 102 million kilowatt hours (KWH) of average annual energy, in comparison to 18,000 KW of capacity and 85.4 million KWH of energy for the Swan Lake project.

You expressed an interest in how the decision was made by Ketchikan to proceed with development of the Swan Lake hydro site, rather than the Lake Grace site. The principal basis for this decision was an appraisal report prepared by R.W. Beck and Associates in June 1977 for Ketchikan Public Utilities. This report evaluated the technical and economic feasibility and compared the cost of power for hydro developments at Swan Lake, Lake Grace, and Mahoney Lake, which is a smaller site.

The R.W. Beck report found that although hydro development was feasible at each of the three sites, Swan Lake was the most economic hydro alternative which would eliminate Ketchikan's reliance on diesel fuel. The average 10-year cost of power for the Swan Lake project was estimated at 6.7 cents per KWH, compared to 7.8 cents per KWH for the Lake Grace alternative. The Mahoney Lake alternative was competitive with Swan Lake with a power cost of 6.7 cents per KWH, but the Mahoney Lake site would not generate enough power to replace all of Ketchikan's diesel generation. A summary comparison of the three projects is included in Appendix A, taken from the R.W. Beck report.

You also indicated an interest in whether the U.S. Borax mineral development at Quartz Hill was considered in the evaluation of alternative hydro projects for Ketchikan. It appears that the power requirements of the Borax development were not given significant consideration, for at least two reasons. When the Borax molybdenum discovery was first announced in 1977, Borax planned to meet its power needs by constructing its own hydro project at Wilson Lake (this plan was later dropped because of strong local opposition, due in large part to the high sport fishing value of Wilson Lake). In addition, the City of Ketchikan was primarily concerned with meeting the power needs of its residents, not of mining or other industries outside of the city.

R.W. Beck recommended that Lake Grace and Mahoney Lake be reevaluated as additional hydroelectric developments when the power output from Swan Lake nears full utilization. Lake Grace is now within the Misty Fjords National Monument, which may make future development of this site more difficult. The Lake Grace area was withdrawn under federal land classification at one time as a power project site, but is unclear whether this withdrawal was superceded by the National Monument designation.

Swan Lake

The Alaska Power Authority prepared the following brief history of the Swan Lake project, which is expected to begin producing power by January or February of 1984.

> The City of Ketchikan, having made the decision to discontinue its reliance on the use of diesel electric generation to meet rising energy demands, authorized the engineering firm of R.W. Beck in September of 1977 to investigate the feasibility of developing, as a major hydroelectric generating resource, the Swan Lake Project which is located approximately 22 miles northeast of Ketchikan near the northern end of Carroll Inlet in the central portion of Revillagigedo Island.
>
> In June of 1978, R.W. Beck issued a feasibility report indicating that a hydroelectric project which would demonstrate a benefit/cost ratio of 1.25 could be constructed at Swan Lake at a total investment cost of $80,924,000. Subsequently, the City of Ketchikan, Ketchikan Public Utilities (KPU) authorized R.W. Beck to proceed with preparation of final design of the project.
>
> The 1980 Legislature through joint resolution authorized the Alaska Power Authority to issue bonds up to the maximum amount of $120,000,000 for financing the construction of the Swan Lake Project.
>
> Construction was initiated by KPU in November of 1980. Funding for project design and initial construction was secured primarily through the proceeds of loans from the Power Authority's Power Project Revolving Loan Fund.
>
> On May 28, 1981, the Power Authority loaned KPU $35,000,000 for construction from funds which had been raised through the sale of General Obligation Bonds.
>
> On May 21, 1982, the Power Authority and KPU executed an acquisition agreement under which, in return for providing funds to complete project construction, the Power Authority will receive title to the project and as operation of the project [begins] will provide sufficient power for the City of Ketchikan's needs via a Power Sales Agreement.

The total construction cost for the Swan Lake project is now estimated at $93.5 million in nominal dollars. The target completion date is April 1984; however, the construction work is ahead of

schedule and the project may be completed as early as January 1984. Swan Lake will have an installed generation capacity of 22.5 megawatts and an annual firm energy production of about 70 million KWH. The project is expected to have about 50 percent utilization in its first years of operation; that is, about 35 million KWH of the 70 million KWH available will be used by Ketchikan Public Utilities. The year in which the full capacity of Swan Lake will be consumed depends largely on the rate of increase in future power demand, which is uncertain. However, current Power Authority projections show the project being fully utilized in about 2002.

Lake Tyee

I believe that you have seen a copy of my memo on the Tyee project to Representative Clocksin, dated February 11. Attached to that memo was a Tyee chronology prepared by the Power Authority which focused mainly on cost estimates. This chronology is also attached here as Appendix 2.

The Tyee project was originally proposed by the Thomas Bay Power Authority, a local Petersburg and Wrangell group. This group was first interested in the development of the Thomas Bay hydro site, but a reconnaissance study by the Corps of Engineers indicated that the smaller Tyee project was more feasible and cost-effective. Based on the Corps study, the Thomas Bay Power Authority dropped the Thomas Bay site in favor of the Tyee project. When the Alaska Power Authority became operational in 1978, an agreement was reached for the Authority to take over the development of the project and proceed with design and licensing work.

The Alaska Power Authority prepared the following brief history of the Tyee project.

> On December 19, 1979, the Alaska Power Authority submitted an application to the Federal Energy Regulatory Commission (FERC) for the construction of the Tyee Hydroelectric Project in the vicinity of Wrangell and Petersburg, Alaska. Our engineers, R.W. Retherford Associates/International Engineering Company (IECO), estimated the cost of the project at that time at $53,333,000, including an allowance for inflation at the rate of seven percent per year during the construction period. Procurement of long-lead-time turbines began in July 1981, in anticipation of a FERC license. FERC issued a license August 5, 1981, and the award of several additional procurement and one construction contract followed almost immediately thereafter.

The power-on-line date is scheduled for January 1984. The current estimate of the total project cost is $124 million. Available funds include $82 million in State grants and $50 million in interim financing.

The powerhouse is located in the Tongass National Forest, approximately 40 miles east-southeast of Wrangell, Alaska. The project is designed to develop the energy potential of Tyee Lake--a natural lake at Elevation 1396--convert it to electricity, and transmit the energy to the communities of Wrangell and Petersburg for distribution.

Tyee will have an initial generating capacity of 20 megawatts, expandable to 30 megawatts with the addition of a third generating unit. The project will be able to produce about 110 million KWH per year, of which about 34 million KWH (31 percent) is expected by the Power Authority to be sold to Petersburg and Wrangell in the first year of operation. Based on the Power Authority's estimate of 2.5 percent annual increase in power demand, the power output from the Tyee project will not be fully utilized until the year 2033.

I have also attached as Appendix C a memorandum by George Matz of the Office of Management and Budget which outlines the history of the Tyee project from the perspective of studies and approvals.

If you have any questions or would like more specific information on any of these hydroelectric projects, please do not hesitate to contact me. Also, I plan to complete a response to your research request on Swan Lake power rates (#83-89) by March 25. This analysis will compare projected power rates for the Swan Lake project with current power generation costs in Ketchikan and discuss alternatives for reducing Swan Lake rates, if necessary.

Subject: Tyee Hydroelectric Project-Summary of Estimated Total Costs

Dear Jack:

As per your request, following is a brief summary on the sequence of events on the Tyee hydropower project primarily relating to cost. The summary of Board actions was extracted from our corporate minutes. Most of the actions taken by the Board were based on advice from myself and my staff.

On December 19, 1979, the Alaska Power Authority submitted a revised application to the Federal Energy Regulatory Commission (FERC) for the construction of the Tyee Hydroelectric Project in the vicinity of Wrangell and Petersburg, Alaska. Our engineers, R.W. Retherford Associates/International Engineering Company (IECO) estimated the total cost of the project at that time at $39,590,000 (1980$'s). With an allowance for inflation and interest during construction the estimated total capital investment at that time came to $53,333,000.

In September 1980, IECO submitted a revised cost estimate of $50,976,000 (August 1980$'s).

Early in 1981, the Power Authority retained EBASCO Services, Inc., to prepare an independent cost estimate. EBASCO subsequently estimated the total project cost at $96,693,000 (May 1981$'s). Escalated to the midpoint of construction, this would represent a completed cost of approximately $110 million. After reviewing the EBASCO estimate, IECO conceded that its previous estimates were low and IECO raised its estimate to $81,069,000 (June 1981$'s). EBASCO refuted this revised estimate.

Procurement of long-lead-time turbines began in July 1981 in anticipation of a FERC license. The Board of Directors was realigned by Statute in the latter part of July 1981. The FERC issued a license on August 5, 1981 and the award of several additional procurement and one construction contract followed almost immediately thereafter.

IECO continued to make monthly reports on the status of the project, including estimated total project costs. It is important to note that by the end of March 1982, IECO had increased its project estimate to $97,072,000,

including engineering costs prior to construction. In the March report the overhead transmission line was estimated to cost $12,840,000 plus a $6,000,000 contingency. Less than two months later, during the bid opening for that contract, IECO provided an engineer's estimate of $23,280,887.00--an estimate that is 24 percent above any previous estimate, including contingency funds. The actual low bid was even higher at $24,901,466.

Starting with the IECO estimate from the March 1982, report, adjusting for the actual low bid on the transmission line, and adding the estimated cost for a proposed separate substation construction contract, the estimated total project cost was increased by IECO to $110,133,000 (May 1982). This did not include approximately $5 million for owner provided insurance. During the months that followed, the total project cost has decreased and increased, slightly, as adjustments have been made for actual bids on relatively small procurement contracts..

In December 1982, and again in January 1983, senior staff of IECO and IECO's parent company, Morrison Knudson (M-K), met with representatives of the Power Authority to discuss construction management of the project, including total project costs. The latest information from IECO is that the total project cost will not exceed $124,886,100. The Power Authority has asked the parent company, M-K, to completely review this estimate. A report from the M-K staff is anticipated the second week of March 1983.

A summary of Board actions, as extracted from our corporate minutes, is as follows:

October 4, 1978 Board receives report on Tyee Project indicating that, according to the reconnaissance study by Robert W. Retherford Associates, (RWR) the Project looks favorable and that Thomas Bay Power Commission (TBPC) will soon enter into contract with RWR for Federal Energy Regulatory Commission (FERC) work and that TBPC may request the Alaska Power Authority to take over the project.

November 18, 1978 APA Board voted to make $120,000 loan to TBPC for Tyee FERC work and this would supplement the $300,000 available from the Water Resources Revolving Loan Fund (WRRLF) in order to cover the $475,000 contract with RWR.

June 21, 1979 Board makes a loan to TBPC of $60,000 for Tyee Project. TBPC and Representative E.J. Haugen request the APA take over Tyee. The Board directed staff to bring information back at next Board meeting for Project take-over.

September 27, 1979 Tyee Letter of Understanding with TBPC adopted by Board.

November 2, 1979 Board authorized Executive Director to submit FERC license application. Also passed "stop-the-clock" resolution needed for bonding.

February 7, 1980 Board agreed to extend contract for advanced Engineering

and Design to IECO for Tyee but it was later decided with legal council to seek competitive proposals.

April 18, 1980 Board selects IECO for the Engineering and Design from among three proposals.

October 23, 1980 Board informed that costs have increased from $39,000,000 to $51,000,000 and has IECO explain to Board.

April 20, 1981 Board selects consultant panel as required by FERC.

May 14, 1981 Board awards Bids for Turbines.

July 6, 1981 Board considered awarding contract for Steel Towers and Conductors but defers "notice to proceed" until after opening of major Civil Contract so that the Board could get a better fix on the true cost of the Project.

August 18, 1981 FERC license has been received. Bids for Civil construction were reviewed as were the economics of the Project based on new cost estimates. Notice-to-proceed was given on Towers and Conductors. The Board was informed that existing funds were insufficient and that interim financing would be necessary. Board deferred action until the next meeting.

September 10, 1981 Board awards Civil Works contract to Southeast Harrison Western (SEHW) after lengthy debate.

October 2, 1981 Board informed on legal actions against Tyee construction contracts. Need for interim financing was discussed and indicated a proposal would be presented to the Board in December, 1981. Risk Management's desire to use "Wrap-up Insurance" on Tyee Project was discussed and actions that would be taken to effectuate such a program.

December 15, 1981 A Finance Plan was presented to the Board. It was recommended that the Board appoint a subcommittee to review the feasibility of the Tyee Project based on present knowledge of the costs. Commissioners Ward and Mueller and Dr. Weeden were appointed to the subcommittee. The Board moved that final financing documents for financing be prepared. The economics of the Project was reviewed.

January 22, 1982 Senator Dankworth and Representative Haugen addressed the Board and recommended proceeding with interim financing. Board authorized securing of $50,000,000 in interim financing. Board awarded a contract for Underwater Cables.

May 25, 1982 The Board awarded the Overhead Transmission Line contingent upon the Legislature not passing a piece of legislation that was being considered but that subsequently was not passed. Thus on June 3, 1982 the Executive Director informed the Board of his intent to issue the award for Transmission Tower construction.

October 22, 1982 The Board awarded contract for Transformers.

I trust this information is of assistance to you. If there is any further information you need, please call on me.

Sincerely,

Eric P. Yould
Executive Director

MEMORANDUM State of Alaska

TO Gordon Harrison
Associate Director
Office of Management and Budget
Division of Strategic Planning

DATE February 23, 1983

FILE NO

TELEPHONE NO 465-3573

FROM George Matz GM
Division of Strategic Planning
Office of Management and Budget

SUBJECT Tyee Lake Project

There has been controversy recently regarding the Tyee Lake Project. The City of Petersburg has stated that the cost of power from the project is too expensive and they may not want to sign a power sales contract under the terms initially proposed by the Alaska Power Authority (APA). This situation has lead to an examination of other questions including the projects economic feasibility and the process by which this is determined. The purpose of this memo is to provide an historical perspective on the question of economic feasibility. The information in this memo should supplement rather than duplicate information in a February 9, 1983 memo from Eric Yould to Jack Kreinheder and a February 11, 1983 memo from Jack Kreinheder to Representative Don Clocksin.

The feasibility study for the Tyee Lake Project was completed for the APA in December of 1979. The statute at this time (AS 44.56.180) required the Office of the Governor to evaluate APA feasibility studies. Since the APA was in its infancy and the Tyee Lake Project was its first project to have completed a feasibility study, no formal review was undertaken.

In 1980, the Legislature passed an omnibus energy bill (Ch 83, SLA 1980) which amended requirements for APA reconnaissance and feasibility studies. This bill also requires the Division of Budget and Management (now Office of Management and Budget) to review these studies for statutory compliance and provide a recommendation to the Governor and the Legislature for feasibility studies. However, certain projects, including the Tyee Lake Project, had been previously approved by the Legislature and were exempted from review by the Division of Budget and Management. House Joint Resolution No. 62, which had been approved by the Legislature earlier in the 1980 session, stated that the general design of the Tyee Lake Project was approved and that the APA could incur $70,000,000 in revenue bond indebtedness to finance the project.

In 1981, the Legislature once again made significant amendments to the APA statutes (Ch 118, SLA 1981). One of the more significant amendments established a Power Development Fund to be used primarily for financing construction of State owned power projects. Restrictions were placed on the use of this fund. One of these restrictions (AS 44.83.394) states that "the authority may not use money in the fund for a power project except in compliance with AS 44.83.177-44.83.187 and unless the authority determines that the project is economically feasible."

Ch 90, SLA 1981 (which was the appropriation bill which accompanied Ch 118, SLA 1981) made appropriations to begin construction on three power projects. These projects, and the amount of their respective appropriations are Tyee Lake Project - $48,000,000, Swan Lake Project - $53,000,000, and the Terror Lake Project $81,500,000. Additional appropriations in the form of a loan, had previously been made to each of these projects. These loans were converted to grants by another bill Ch 91, SLA 1981.

Although each of these projects had completed feasibility studies and received legislative approval, AS 44.83.394 required a final review of the economic feasibilty of each project before the APA could make expenditures from the Power Development Fund. The statutes are not specific as to how the economic feasibility should be determined. The APA assumed that the feasibility assessment should be treated as an updated supplement to previous feasibility studies rather than repeat the entire process.

Apparently, the APA's first attempt at complying with AS 44.83.394 was an August 13, 1981 memo from Robert Mohn, Director of Engineering to the Record (see Attachment A). The information in this memo was presented to the August 18, 1981 meeting of the APA Board of Directors to demonstrate that even with more recent and higher construction cost estimates, the Tyee Lake Project was economically feasible at the "most likely" load growth rates. Following this presentation, the Board was asked to approve the award of construction contracts which would obligate funds in the Power Development Fund. It should be noted that this was the first meeting of a newly appointed Board of Directors and not all of the Board members were familiar with statutory requirements for power projects.

Ron Lehr, a Board member and Director of Budget and Management at that time, questioned some of the points used in the presentation and requested backup information. This information was sent to Budget and Mangement where staff found the information inadequate to make a determination regarding the economic feasibility of the Tyee Lake Project. APA staff was informed of this and responded in a September 10, 1981 letter with copies of the calculations used for the August 13, 1981 memo.

Budget and Management staff reviewed these calculations, found some technical errors, and requested that corrections be made in the analysis. Apparently, the request led to a decision by the APA to provide a more complete and adequate explanation of the economic feasibility of the project. The product of this effort was a "Findings and Recommendations" report that was completed on December 2, 1981 and distributed to the Board at its December meeting. This report fully explained the assumptions that were being used and provided enough details to review the economic feasibility of the project.

Although a review by Budget and Management of the "Findings and Recommendations" report was not required by statute, a review was undertaken for the benefit of Ron Lehr who's interest was both as a Board member and State Budget Director. Ron Lehr distributed this review to the Board at its January, 1982 meeting.

The Budget and Management review (Attachment B) questioned several assumptions and calculations used in the "Findings and Recommendations" report. The conclusion of the review is that the Tyee Lake Project may not be economically feasible based on the "most likely" load forecast but should be economically feasible if the actual load should exceed the "most likely" load forecast. Some of the more significant points brought out in the review are given below.

1) If and When - The economic feasibility analysis of a power project, particularly projects having a long life such as hydro power, should not only determine "if" the project is feasible but "when" is the most economic time to begin construction. A timing exercise of this nature was not done for the Tyee Lake Project even though such an exercise is most applicable to projects which have initial overcapacity, such as the Tyee Lake Project.

2) Reserve Capacity - Neither this economic analysis or cost of power calculation considered the cost of reserve capacity.

3) Load Forecast - The base year for the load forecast was higher than actual data. Also, the load forecast assumed an increase in electric space heating even though fuel oil appears to be a less expensive alternative.

4) Alternative - A number of smaller and less remote hydroelectric alternatives were not given detailed consideration. U.S. Army Corps of Engineers data indicates that some of these projects could have lower power costs than the Tyee Lake Project. Also, since all of the projects were smaller, overcapacity would not be a significant problem.

The load forecast in the most significant and perhaps the most uncertain parameter which applies to the economic feasibility of the Tyee Lake Project. Since the load forecasts were made a few years ago, we now have the benefit of hindsight to assess the accuracy of the first few years of the forecast. This information is presented below based on the "most likely" forecast for the "Findings and Recommendations" report and the "expected" forecast for the Feasibility Study. The Feasibility Study used 1978 as the last year of actual data. Neither of these forecasts, as presented, subtract out approximately 11,700 MWh of annual generation from an existing hydroelectric facility near Petersburg.

Energy Sales (MWh) for Wrangell and Petersburg

Year	Actual	Findings and Recommendations Report	Feasibility Study
1978	29,981	---	29,981
1979	29,087	---	31,445
1980	29,788	30,535	32,990
1981	29,222	31,726	35,275
1982	30,989	32,963	37,710

In summary, commitments to the Tyee Lake Project have been slightly ahead of establishing a more rigorous process for assessing the economic feasibility of proposed APA projects. Specifically:

1) the feasibility study for the project was completed before an independent review process was firmly established by the Legislature;

2) the Legislature approved the project without benefit of an independent cost analysis as now required by statute; and

3) construction contracts had been awarded before the "Findings and Recommendations" report had been completed and before the provisions of AS 44.83.394 has been met.

Anchorage Daily News Thursday, February 23, 1984

Four towns may agree soon on dams, APA director says

By DEAN FOSDICK
The Associated Press

JUNEAU — The head of the Alaska Power Authority said Wednesday the utility is near agreement on long-term power contracts with four of five communities in the "Four Dam Pool," but Petersburg is uncomfortable with the deal and will let the voters decide in a special election, a spokesman says.

Larry Crawford, APA executive director, told board members that negotiations continued until nearly midnight Tuesday with representatives of Ketchikan, Wrangell, Petersburg, Kodiak and Valdez.

"I think at this point it's probably a little more dialogue with the communities," Crawford said. "I think we're getting closer with four of them."

He indicated, however, that an "all or none" provision that had been carried through the contract talks be modified so the state could act in the place of any community excluded from the agreement — a reference to Petersburg.

The APA has embarked on a $462.5 million hydro program involving four new dams to supply power to the five coastal Alaska cities. The projects, either finished or near-finished, were built with $282.83 million in state loans and the rest in interim financing.

The agency has been trying to get the cities to sign power contracts so the state can refinance about $179.67 million in short-term loans that begin coming due this year. The resulting long-term revenue bonds would be used for paying project costs not covered by grants.

But the cities have resisted, contending they'll not sign contracts until assured that hydro costs don't overly exceed what they now pay for diesel.

They also contend that the "Susitna Blackmail Clause," which was tacked on by the legislature, would increase consumer rates by as much as 50 percent.

The clause states that if $5 billion is not appropriated by 1991 to build two hydroelectric dams on the Susitna River to serve Southcentral Alaska, state grants to other projects would have to be repaid at a rate of 10 percent annually.

Jim Fillingame, manager of the Copper Valley Electric Association Inc. at Glennallen, said customers in the Valdez area served by the new Solomon Gulch Dam were promised two years ago they'd be getting "good, cheap electric power."

"It was no little job to sell the program to the people," Fillingame told APA directors. "Now, I've got to go back and tell these same people that good hydro power will cost several cents more per hour than what we can generate by diesel."

Proposed "entry costs" for that utility would mean about a 40 percent increase for large power users and a 22 percent rate hike for residential users, he said.

Wrangell representatives, meanwhile, said that city was about a week away from making a decision on the proposals.

David Neese, general manager for the Kodiak Electric Association, said that community was ready to agree to the deal.

Ketchikan Public Utility Manager Rick Newland said, "We're very close to agreement on the major issues. There are several yet to be resolved but the groundwork is there to reach resolution."

But Richard Underkofler, Petersburg city manager, told a reporter that city has problems with the entry rate and system increment issues.

"We're about $1.5 million away on their assumption of what the difference between what diesel and hydro costs would be," he said. "That's for the life of the program so it's really not that broad.

"But the system increment issue is philosophical," Underkofler said. "The power authority will have a license to increase our rates over the term of the agreement to pay for its endeavors elsewhere. It's our feeling we should be released from further debt service if we pay off our loans.

684
S89

Alaska Power Authority
Commissioner: D Lyon
Executive Director: Lary Crawford

Board meeting, 22 February 1984

Power Sales agreements;

1. Copper Valley: close to an agreement. Jim Billingame, manager of utilitiesstates that he shows some concern of confronting his public with a cost not seen before. Presently Glennallen diesel generation is .06 PKH and proposed APA power will be .07 PKW. This constitutes a 40% increase to some. Valdez is an emphatic NO! Average monthly consumption in Glennallen is 340 KWH and translates to $90 per month, while Valdez is running an average monthly bill of 550 KWH or $151. per month. A 40% increase can be devastating.

2. Wrangell: Matt Cole (position unknown) will be taking power sales agreement to city council Thursday night (Feb 23rd) for consideration. He says discussion (informal) with council members appears good and contract may be forthcoming.

3. Kodiak: David Neese, Mgr of Muni-power. Municipality has agreed to purchase power from APA. Two suggestions: possible loans to consumers and the establishment of an advisory board.

4. Ketchikan: Rick -?--. mgr of utilities says it looks very good, contract in the making with questions as to wording of legal documents.

5. Petersburg: NO!

Management study (status report) presented by Roger McMannus of Mead consultants for FY 84, FY 85, FY 86.

Presently APA employes 69 persons

Executive Dept----------4
Planning ---------- 9
Projects ----------18
Operations ---------- 7
Finance-Administration ---31

APA is asking for an immediate increase of 16, 17 more FY 85, and an additional 9 for FY 86 to total 111 persons.

1934 Susitna contingency fund: 3.18 Million dollars
Drilling request (wantana dam) 1.9 million. if approved this will leave in the contingency fund 1.28 million.

Competitive bidding on Watana Dam drilling will be let 27 Feb 84 with awarding of contract sometime in mid April 84.

economic and environmental practicality of completing a proposed power project under AS 44.83.181;

(B) includes engineering and design work to meet the requirements for submission of a license application for a proposed new project to the Federal Energy Regulatory Commission;

(9) "small-scale power production facility" means a facility which, by design, is to produce less than 25 megawatts of power. (§ 1 ch 278 SLA 1976; am §§ 21, 22 ch 156 SLA 1978; am §§ 26, 27 ch 83 SLA 1980; am §§ 10, 11 ch 133 SLA 1982)

Effect of amendments. — The 1982 amendment substituted the present definition for "power project" or "project" in paragraph (4) for the definition set out in the main pamphlet and substituted "electrical and thermal energy needs" for "power needs" in paragraph (7).

Article 7. Susitna River Hydroelectric Project.

Sec. 44.83.325. Restrictions on contracting.

Editor's note. — Section 21, ch. 133, SLA 1982, provides: "Notwithstanding the provisions of AS 44.83.325, the Alaska Power Authority may enter into contracts under AS 44.83.300 — 44.83.360 for preliminary work without the approval required by AS 44.83.325. In this section, 'preliminary work' means the preparation of plans and studies and the preparation and submission of license applications, as well as other types of work, that must be completed before actual construction of the Susitna River hydroelectric project, described in AS 44.83.300, may begin. This section does not authorize the Alaska Power authority to enter into contracts for the actual construction of the Susitna River hydroelectric project or for the preparation of the site of the Susitna River hydroelectric project without the approval required by AS 44.83.325."

Article 8. Rural Electrification Revolving Loan Fund.

Section

Sec. 44.83.361. Rural electrification revolving loan fund.

(a) The rural electrification revolving loan fund is established in the Alaska Power Authority. The fund consists of

(1) appropriations made to the fund; and

(2) principal payments on loans made under this section.

(b) The authority may make loans from the rural electrification revolving loan fund to electric utilities certified by the Alaska Public Utilities Commission. A loan from the fund may be made only for the purpose of extending new electric service into an area of the state that an electric utility may serve under a certificate of public convenience and necessity issued by the Alaska Public Utilities Commission. A loan may be made from the fund to an electric utility if the utility invests the money necessary to provide one pole, one span of line, one transformer, and one service drop for each consumer for whom immediate service would be provided by the extension of electric service. However, a loan may not be made from the fund unless

(1) the loan is recommended by a loan advisory committee appointed under AS 44.83.363; and

(2) the extension of electric service would provide immediate service to at least three consumers.

(c) A loan from the rural electrification revolving loan fund shall bear an annual rate of interest of two percent of the unpaid balance of the loan. Interest received on a loan made under this section must be transferred monthly to the commissioner of revenue for deposit in the general fund.

(d) When a loan is made by the authority under this section, the electric utility receiving the loan

(1) shall, in addition to the rates that it is authorized to charge, charge the consumers served by the electric service extended with the loan proceeds an amount sufficient to pay the interest costs of the loan;

(2) shall pay to the authority annually an amount equal to

(A) interest of two percent on the unpaid balance of the loan; and

(B) payments on the unpaid balance of the principal of the loan for each new consumer served by the electric service extended with the loan proceeds; payments on the unpaid balance of the principal of the loan shall be made at a rate equal to the difference between the actual cost of making the service connection to the consumers and the minimum investment per consumer required of the utility before a loan is made under (b) of this section.

(e) The authority shall

(1) adopt regulations necessary to carry out the provisions of this section;

(2) administer the rural electrification revolving loan fund; and

(3) submit to the legislature within the first 10 days of each regular legislative session a report of actions taken by the authority under this section and an accounting of the rural electrification revolving loan fund.

(f) In this section,

(1) "consumer" means a person, as defined in AS 01.10.060(7), or a governmental agency, if the person or governmental agency requests and offers to pay for electrical service to a facility or part of a facility;

the authority shall consider a person who, or a governmental agency that, offers to pay for electrical service to several facilities to be a separate consumer for each facility, if each facility is physically separate from another facility, other than through electric service lines, and if the person or governmental agency requests and offers to pay for electrical service to each facility;

(2) "facility" means a structure capable of receiving and using electrical energy; and

(3) "governmental agency" includes, with respect to the state or federal government or a municipal government, a legislative body, board of regents, administrative body, board, commission, committee, subcommittee, authority, council, agency, public corporation, school board, department, division, bureau, or other subordinate unit, whether advisory or otherwise, of the state, federal, or municipal government. (§ 1 ch 118 SLA 1981; am §§ 10 — 13 ch 89 SLA 1983)

Effect of amendments. — The 1983 amendment, effective July 22, 1983, deleted "and interest" following "principal" in paragraph (a)(2), added the second sentence of subsection (c), substituted "extended with the loan proceeds" for "during the preceding year for which the loan was made" in paragraph (d)(2)(B), and added subsection (f).

Sec. 44.83.363. Loan advisory committee. When an application for a rural electrification loan is submitted to the authority under AS 44.83.361, the authority shall appoint a local advisory committee from persons residing in the area that the applicant utility is certified to serve. The loan advisory committee shall consider the loan application, and shall recommend whether the loan application is to be approved or disapproved. A favorable recommendation from the loan advisory committee shall be based on a determination that development in the area of the proposed extension of electric service is likely to provide for full repayment of the loan under AS 44.83.361(d) within 10 years. In making that determination the committee shall consider

(1) permanence of the premises to be served by the extension;

(2) land use patterns in the area;

(3) access for the line that would be installed with loan proceeds;

(4) availability of other utility service in the area; and

(5) the economic feasibility of the extension of electric service with the proceeds of the loan. (§ 1 ch 118 SLA 1981)

House Special Committee on State Loans

To: Rep. John Cowdery, Chairman
House Labor & Commerce Committee

From: Rep. Rick Uehling, Chairman
House Special Committee on State Loans

Subject: HB 689

Date: March 5, 1984

HB 689, An Act relating to the rural electrification loan fund, is presently in your Committee.

During our Loans Committee hearings on HB 650, which contains an appropriation for the Alaska Power Authority - Rural Electrification Loan Fund, testimony was received about the Loan fund and the need to clarify the existing statues.

As Chairman of the House Loans Committee I would like to request that you schedule action on this measure because it will eliminate those discrepancies and make it possible to use the funds in the Rural Electrification Loan Fund. It is important that this be done before additional appropriations are made for projects such as the Craig-Klawock Intertie.

Thank you very much for your attention to this matter.

March 16, 1984

Representative John Cowdery, Chairman
House Labor and Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Cowdery:

House Bill 689 is essential to clean up the statutory language authorizing the rural electrification revolving loan fund so that program can finally be made to work as intended.

This loan fund was created as a section of SB 25 in 1981 by including in that historic legislation the contents of a bill sponsored by then Representative Pappy Moss. As a result, there is almost no separate legislative history which would have given the power authority some guidance in administering the program. For anyone not intimately involved with line extensions of an electric utility, the present statutory language is quite confusing. The result of all this is that the rural electrification revolving loan fund has never worked as intended.

The purpose of this loan fund is to extend the backbone electric distribution system through developing rural areas. The target areas at present do not have enough population to meet the definitions of feasibility set out by the lending institutions such as the Rural Electrification Administration. However, the target areas are expected to develop rather quickly once utility service becomes available.

This is a narrow purpose program, and I would not envision that it would ever become very large in terms of the total funding it requires. The concept for this program was originally developed to meet specific problems around Fairbanks like the Goldstream area and in the Mat-Su Borough like the Caswell Lakes area. After three years, not one dime has gone to meet the very serious needs of those areas and other like them across the state.

Enclosed is a sectional analysis which briefly describes the contents of HB 689. The key feature of this program necessary to make it work is that the payback period has to be for an indeterminate period rather than for a set term of years. This is

an unusual feature of a loan program, but it is essential in this case. If the term of years is fixed, the utility is the one at risk that the anticipated development will in fact occur. REA will not permit its borrowers to accept loans for projects which do not meet the REA definition of feasibility. If these projects could meet the REA feasibility test, we would borrow from REA and would not need this program.

The concept of making the term of the loan indeterminate and having the payback schedule tied to the actual rate of development was contained in the original legislation. The power authority has never accepted that legislative policy, and they have in fact arbitually set a 20 year term by regulation. That is why this program has never worked.

We think HB 689 is a very good bill, and we ask you and your committee to support it. However, there is one amendment which is needed to prevent possible confusion in the future. As used in this program, the term "rural" simply means an area where the population density is low. I would propose that a new definition be included in section 5 of the bill to read:

> "rural area" means an area in which the number of consumers to be served by an electric distribution line in the year in which it is constructed does not exceed five per mile of line.

Sincerely,

David Hutchens

David Hutchens
Executive Director

House Bill No. 689

Sectional Analysis

Section 1 states the legislative intent that this program is to help finance pioneer electric distribution lines through developing rural areas.

Section 2 provides that loans may be made to public utilities to build distribution lines into rural areas not receiving electric service if (1) the loan is recommended by a loan advisory committee, (2) the line extension will serve at least three consumers in its first year and (3) the utility has a certificate from the APUC to serve that area.

Section 3 provides that the utility shall collect 2% interest on this loan from its consumers served by the line extension and shall pay that interest to the APA annually with its principal payment. The principal repayment formula is geared to the number of new consumers being served by this line extension rather than to a specific term of years. The cost of the line is divided into units consisting of its average cost per 350 feet (the approximate distance of a span of line). The utility repays one unit of the principal for each new consumer served by the line.

Section 4 vests the administrative authority with the APA and requires an annual report to the legislature.

Section 5 defines the terms used in this legislation.

Section 6 limits the amount of a loan to the amount necessary to build an overhead line, but a more expensive method of construction may be used if the additional cost is financed from some other source. The utility is required to invest from other sources one unit of cost (the average cost for 350 feet of line) for each consumer to be served in the first year.

Section 7 authorizes the executive director of the APA to appoint a loan advisory committee from residents of the assigned service area of the applicant utility. The committee has the responsibility to advise whether or not development of the area in question is likely to occur rapidly enough to provide full repayment of the loan within 20 years.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 21, 1984

The Honorable Joe Hayes
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to amend AS 43, the Revenue and Taxation Code, by repealing AS 43.20.031(d) and AS 43.70.030(b).

This bill repeals AS 43.20.031(d), which exempts banks and savings and loan associations from taxation under AS 43.20, the corporate income tax chapter. It also repeals AS 43.70.030(b), which taxes banks, trust companies, and savings and loan associations under AS 43.70, the Business License Act.

Currently, banks and savings and loan associations are specifically exempted from the corporate income tax under AS 43.20 because of federal restrictions which required states to tax national banks and savings and loan associations separately from other corporations. Those federal restrictions no longer exist. Therefore, we may now tax banks under AS 43.20 along with all other corporate taxpayers, and that is what this bill will accomplish.

Sincerely,

Bill Sheffield
Governor

Currently banks are required to file returns and pay tax under a statute separate from all other corporations (AS 43.70). This results in significant administrative and legal problems. The Department of Revenue therefore recommends that banks be taxed under the same income tax statutes as other corporations (AS 43.20).

Although state and municipal interest is currently taxable under AS 43.70 and would not be subject to tax under AS 43.20, we estimate that requiring banks to file under AS 43.20 rather than AS 43.70 will result in no loss of revenue to the State. The Department's position is that under IRC sec. 265(2), which is adopted by reference in AS 43.20.021(a), no deduction is allowed for expenses and interest incurred or continued to purchase or carry obligations the interest on which is exempt from tax. This includes not only expenses and interest related to tax exempt state and municipal interest income, but also expenses and interest related to tax exempt U.S. interest income. Therefore, the total amount of nondeductible expenses under AS 43.20 will be close to the amount of nontaxable income.

HB

704

*Sec. 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 59.

AUTOMOBILE SERVICE CORPORATIONS

Sec. 21.59.010. SCOPE OF CHAPTER. (a) This chapter applies to every individual, person, firm, corporation, or organization of any kind hereafter engaging or purporting to engage in the provision of all or part of an automobile service corporation coverage as defined in AS 21.59.900, for its subscribers in exchange for periodic prepayments by the subscriber.

(b) This chapter does not apply to a person issued a certificate of authority under AS 21.09.

(c) No provision of this title may apply to an automobile service corporation unless contained or referred to in this chapter.

Sec. 21.59.020. INCORPORATION - CERTIFICATE OF AUTHORITY REQUIRED. (a) A person engaged in or purporting to engage in the provision of an automobile service corporation service shall be incorporated under the laws of Alaska as a nonprofit corporation and be currently authorized as an automobile service corporation under a certificate of authority issued by the director under this chapter.

(b) Before the articles of incorporation of the proposed corporation or amendments to existing articles of incorporation are filed with the commissioner of commerce, they shall be submitted to the director, and the commissioner of commerce shall not file the articles or amendments unless the director's approval is endorsed thereon. The director shall approve the articles or amendments unless he finds that they do not comply with law. If not approved, the director shall return the proposed articles of incorporation to the incorporators or amendments to the corporation, together with his written statement of particulars of the reasons for nonapproval.

Sec. 21.59.030 QUALIFICATIONS FOR CERTIFICATE OF AUTHORITY. The director may not issue or permit to exist a certificate of authority to be or act as an automobile service corporation to a corporation which does not fulfill the following qualifications:

(1) it must be incorporated as an automobile service corporation;

(2) it must intend to and actually conduct its business in good faith as a nonprofit corporation;

(3) if a newly formed corporation, it must possess sufficient available working funds to pay all reasonably anticipated cost of acquisition of new business and operating expenses, other than losses, for a period of not less than six months following the date of issuance of the certificate of authority;

(4) it must post with the director, a bond in the amount of $50,000, issued by a corporate surety authorized under AS 21 to act as surety and conditioned upon the organization's faithful fulfillment of its contracts; and,

(5) it must fulfill all other applicable requirements of this chapter.

Sec. 21.59.040 CERTIFICATE OF AUTHORITY. (a) Application for a certificate of authority to transact business as an automobile service corporation shall be made to the director, on forms as prepared and furnished by the director and requiring the information relative to the applicant, its directors, officers, and affairs as the director may

reasonably require consistent with this chapter.

(b) The application shall be accompanied by the following documents:

(1) one copy of the applicant's articles of incorporation and all amendments, certified by the commissioner of commerce;

(2) one copy of the applicant's bylaws, certified by its corporate secretary;

(3) one copy of each subscribers' contract proposed to be offered;

(4) a financial statement of the applicant as of the date not more than 30 days before the filing of the application, showing the amount of working funds available to the applicant, the source of the funds, any pertinent data related thereto, and accompanied by a copy of the agreement under which the funds were contributed to or provided for the applicant;

(5) the bond required in as 21.59.030(4); and,

(6) a copy of any other relevant document reasonably requested by the director.

Sec. 21.59.050. RESERVES. (a) Each automobile service corporation shall establish and maintain unimpaired reserves as follows:

(1) a reserve in an amount not less than all legal obligations of the corporation, other than claims originating under subscriber's contracts, due but unpaid;

(2) a reserve equal to not less than the amount necessary by reasonable estimate to pay all claims incurred under subscriber's contracts but currently unpaid, and including a reasonable additional amount to cover claims incurred but not reported to the corporation at the time of determination of the corporation's financial condition; and,

(3) a reserve equal to 50 per cent of all sums charged and received by the corporation during the calendar period covered by the financial statement, on account of indemnity benefits provided in subscriber's contracts for terms for which premium was last paid and unexpired at the date of the financial statement.

(b) The reserves required under (a) of this section constitute a liability of the corporation in a determination of its financial condition.

Sec. 21.59.060. RECORDS AND ACCOUNTS. (a) An automobile service corporation shall establish and maintain complete and accurate records and accounts covering its transactions and affairs, in accordance with common and accepted principles and practices of insurance accounting and record keeping as applied to the business of the corporation.

(b) The corporation shall establish a separate record of each claim received for benefits under a subscriber's contract, whether the claim is for service or for indemnity. The claim record shall contain information reasonably necessary for the determination of:

(1) the identity of the claimant;

(2) the nature of the claim;

(3) the probable amount to be paid by the corporation on account of the claim; and,

(4) the amounts actually paid by the corporation on account of the claim.

Sec. 21.59.070. OTHER PROVISIONS APPLICABLE. In addition to the provisions contained in this chapter, other chapters and provisions of this title shall apply to automobile service corporations, to the extent applicable and not in conflict with the express provisions of this chapter and the reasonable implications of the express provisions, and

for the purposes of the application the corporations shall be considered to be mutual insurers, as follows:

(1) AS 21.03
(2) AS 21.06
(3) AS 21.09.050
(4) AS 21.09.100-260
(5) AS 21.12
(6) AS 21.36
(7) AS 21.69
(8) AS 21.78
(9) AS 21.90.

Sec.21.59.900. DEFINITIONS. In this chapter

(1) "automobile service corporation" means a corporation providing all or part of one or more automobile service corporation services for subscribers in exchange for periodic prepayment in identifiable amount by or as to the subscribers;

(2) "services" means any professional service, technical service, replacement of goods which the corporation may become obligated to provide upon a contingent event or a certain event which may occur at an uncertain time and for which a specified single or periodic prepayment is charged or collected, including, but not limited to

(A) emergency road service;

(B) reimbursement of legal fees for representation on traffic offenses;

(C) providing bail bonds for traffic offenses;

(D) providing maps and trip planning services; and,

(E) arrangement of discounts, rebates or price reductions on travel related goods and services.

(3) "subscribers contracts" means the contract between the automobile service corporation and its subscriber under which all or a part of one or more services is to be rendered to or on behalf of the subscriber by an automobile service corporation or by a provider that has entered into a service agreement with the automobile service corporation.

*Sec. 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 59.

AUTOMOBILE SERVICE CORPORATIONS

Sec. 21.59.010. SCOPE OF CHAPTER. (a) This chapter applies to every individual, person, firm, corporation, or organization of any kind hereafter engaging or purporting to engage in the provision of all or part of an automobile service corporation coverage as defined in AS 21.59.900, for its subscribers in exchange for periodic prepayments by the subscriber.

(b) This chapter does not apply to a person issued a certificate of authority under AS 21.09.

(c) No provision of this title may apply to an automobile service corporation unless contained or referred to in this chapter.

Sec. 21.59.020. INCORPORATION - CERTIFICATE OF AUTHORITY REQUIRED. (a) A person engaged in or purporting to engage in the provision of an automobile service corporation service shall be incorporated as a nonprofit corporation and be currently authorized as an automobile service corporation under a certificate of authority issued by the director under this chapter.

(b) If a proposed corporation is to formed under the laws of Alaska, the articles of incorporation of the proposed corporation or amendments to existing articles of incorporation are to be submitted to the director before they shall be filed with the commissioner of commerce, and the commissioner of commerce shall not file the articles or amendments unless the director's approval is endorsed thereon. The director shall approve the articles or amendments unless he finds that they do not comply with law. If not approved, the director shall return the proposed articles of incorporation to the incorporators or amendments to the corporation, together with his written statement of particulars of the reasons for nonapproval.

Sec. 21.59.030 QUALIFICATIONS FOR CERTIFICATE OF AUTHORITY. The director may not issue or permit to exist a certificate of authority to be or act as an automobile service corporation to a corporation which does not fulfill the following qualifications:

(1) if a newly formed corporation, it must possess sufficient available working funds to pay all reasonably anticipated cost of acquisition of new business and operating expenses, other than losses, for a period of not less than six months following the date of issuance of the certificate of authority;

(2) it must post with the director, a bond in the amount of $50,000, issued by a corporate surety authorized under AS 21 to act as surety and conditioned upon the organization's faithful fulfillment of its contracts; and,

(3) it must fulfill all other applicable requirements of this chapter.

Sec. 21.59.040 CERTIFICATE OF AUTHORITY. (a) Application for a certificate of authority to transact business as an automobile service corporation shall be made to the director, on forms as prepared and furnished by the director and requiring the information relative to the applicant, its directors, officers, and affairs as the director may reasonably require consistent with this chapter.

(b) The application shall be accompanied by the following documents:

(1) one copy of the applicant's articles of incorporation and all amendments, certified by the appropriate official of the state of incorporation;

(2) one copy of the applicant's bylaws, certified by its corporate secretary;

(3) one copy of each subscribers" contract proposed to be offered;

(4) an audited financial statement of the applicant for the most recent fiscal year; or, a financial statement of the applicant as of the date not more than 30 days before the filing of the application, showing the amount of working funds available to the applicant, the source of the funds, any pertinent data related thereto, and accompanied by a copy of the agreement under which the funds were contributed to or provided for the applicant;

(5) the bond required in as 21.59.030(2); and,

(6) a copy of any other relevant document reasonably requested by the director.

Sec. 21.59.060. RESERVES. (a) Each automobile service corporation shall establish and maintain unimpaired reserves as follows:

(1) a reserve in an amount not less than all legal obligations of the corporation, other than claims originating under subscriber's contracts, due but unpaid;

(2) a reserve equal to not less than the amount necessary by reasonable estimate to pay all claims incurred under subscriber's contracts but currently unpaid, and including a reasonable additional amount to cover claims incurred but not reported to the corporation at the time of determination of the corporation's financial condition; and,

(3) a reserve equal to 50 per cent of all sums charged and received by the corporation during the calendar period covered by the financial statement, on account of indemnity benefits provided in subscriber's contracts for terms for which premium was last paid and unexpired at the date of the financial statement.

(b) The reserves required under (a) of this section constitute a liability of the corporation in a determination of its financial condition.

(c) The requirements of (a) and (b) of this section do not apply if the automobile service corporation shall in lieu of the bond required in AS 21.59.030(2), file a bond under that section in the amount of $200,000.

Sec. 21.59.060. RECORDS AND ACCOUNTS. An automobile service corporation shall establish and maintain complete and accurate records and accounts covering its transactions and affairs, in accordance with generally accepted accounting principles as applied to the business of the corporation.

Sec. 21.59.070. OTHER PROVISIONS APPLICABLE. In addition to the provisions contained in this chapter, other chapters and provisions of this title shall apply to automobile service corporations, to the extent applicable and not in conflict with the express provisions of this chapter and the reasonable implications of the express provisions, and for the purposes of the application the corporations shall be considered to be mutual insurers, as follows:

(1) AS 21.03
(2) AS 21.06
(3) AS 21.09.050
(4) AS 21.09.100-260
(5) AS 21.12

(6) AS 21.36
(7) AS 21.69
(8) AS 21.78
(9) AS 21.90.

Sec.21.59.900. DEFINITIONS. In this chapter

(1) "automobile service corporation" means a corporation providing all or part of one or more automobile service corporation services for subscribers in exchange for periodic prepayment in identifiable amount by or as to the subscribers;

(2) "automobile service corporation services" means any professional service, technical service, replacement of goods which the corporation may become obligated to provide upon a contingent event or a certain event which may occur at an uncertain time and for which a specified single or periodic prepayment is charged or collected, including, but not limited to

(A) emergency road service;

(B) reimbursement of legal fees for representation on traffic offenses; and,

(C) providing bail bonds for traffic offenses.

An automobile service corporation may provide other services or benefits which do not fall within the definition of an automobile service corporation services.

(3) "subscriber's contract" means the contract between the automobile service corporation and its subscriber under which all or a part of one or more services is to be rendered to or on behalf of the subscriber by an automobile service corporation or by a provider that has entered into a service agreement with the automobile service corporation.

*Sec. 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 59.

AUTOMOBILE CLUBS

Sec. 21.59.010. SCOPE OF CHAPTER. (a) This chapter applies to every individual, person, firm, corporation, or organization of any kind hereafter engaging or purporting to engage in the provision of all or part of an automobile club service as defined in AS 21.59.900, for its subscribers in exchange for periodic prepayments by the subscriber.

(b) This chapter does not apply to a person issued a certificate of authority under AS 21.09.

(c) No provision of this title may apply to an automobile club unless contained or referred to in this chapter.

Sec. 21.59.020. INCORPORATION - CERTIFICATE OF AUTHORITY REQUIRED. (a) A person engaged in or purporting to engage in the provision of an automobile club service shall be incorporated as a nonprofit corporation and be currently authorized as an automobile club under a certificate of authority issued by the director under this chapter.

(b) If a proposed corporation is to formed under the laws of Alaska, the articles of incorporation of the proposed corporation or amendments to existing articles of incorporation are to be submitted to the director before they shall be filed with the commissioner of commerce, and the commissioner of commerce shall not file the articles or amendments unless the director's approval is endorsed thereon. The director shall approve the articles or amendments unless he finds that they do not comply with law. If not approved, the director shall return the proposed articles of incorporation to the incorporators or amendments to the corporation, together with his written statement of particulars of the reasons for nonapproval.

Sec. 21.59.030 QUALIFICATIONS FOR CERTIFICATE OF AUTHORITY. The director may not issue or permit to exist a certificate of authority to be or act as an automobile club to a corporation which does not fulfill the following qualifications:

(1) if a newly formed corporation, it must possess sufficient available working funds to pay all reasonably anticipated cost of acquisition of new business and operating expenses, other than losses, for a period of not less than six months following the date of issuance of the certificate of authority;

(2) it must post with the director, a bond in the amount of $50,000, issued by a corporate surety authorized under AS 21 to act as surety and conditioned upon the organization's faithful fulfillment of its contracts; and,

(3) it must fulfill all other applicable requirements of this chapter.

Sec. 21.59.040 CERTIFICATE OF AUTHORITY. (a) Application for a certificate of authority to transact business as an automobile club shall be made to the director, on forms as prepared and furnished by the director and requiring the information relative to the applicant, its directors, officers, and affairs as the director may reasonably require consistent with this chapter.

(b) The application shall be accompanied by the following documents:

(1) one copy of the applicant's articles of incorporation and all amendments, certified by the appropriate official of the state of

incorporation;

(2) one copy of the applicant's bylaws, certified by its corporate secretary;

(3) one copy of each subscribers' contract proposed to be offered;

(4) an audited financial statement of the applicant for the most recent fiscal year; or, a financial statement of the applicant as of the date not more than 30 days before the filing of the application, showing the amount of working funds available to the applicant, the source of the funds, any pertinent data related thereto, and accompanied by a copy of the agreement under which the funds were contributed to or provided for the applicant;

(5) the bond required in as 21.59.030(2); and,

(6) a copy of any other relevant document reasonably requested by the director.

Sec. 21.59.050. RESERVES. (a) Each automobile club shall establish and maintain unimpaired reserves as follows:

(1) a reserve in an amount not less than all legal obligations of the corporation, other than claims originating under subscriber's contracts, due but unpaid;

(2) a reserve equal to not less than the amount necessary by reasonable estimate to pay all claims incurred under subscriber's contracts but currently unpaid, and including a reasonable additional amount to cover claims incurred but not reported to the corporation at the time of determination of the corporation's financial condition; and,

(3) a reserve equal to 50 per cent of all sums charged and received by the corporation during the calendar period covered by the financial statement, on account of indemnity benefits provided in subscriber's contracts for terms for which premium was last paid and unexpired at the date of the financial statement.

(b) The reserves required under (a) of this section constitute a liability of the corporation in a determination of its financial condition.

(c) The requirements of (a) and (b) of this section do not apply if the automobile club shall in lieu of the bond required in AS 21.59.030(2), file a bond under that section in the amount of $250,000.

Sec. 21.59.060. RECORDS AND ACCOUNTS. An automobile service corporation shall establish and maintain complete and accurate records and accounts covering its transactions and affairs, in accordance with generally accepted accounting principles as applied to the business of the corporation.

Sec. 21.59.070. OTHER PROVISIONS APPLICABLE. In addition to the provisions contained in this chapter, other chapters and provisions of this title shall apply to automobile club, to the extent applicable and not in conflict with the express provisions of this chapter and the reasonable implications of the express provisions, and for the purposes of the application the corporations shall be considered to be stock insurers, as follows:

(1) AS 21.03
(2) AS 21.06
(3) AS 21.09.050
(4) AS 21.09.100
(5) AS 21.09.120-210
(6) AS 21.12

(7) AS 21.36
(8) AS 21.69
(9) AS 21.78
(10) AS 21.90.

Sec.21.59.900. DEFINITIONS. In this chapter

(1) "automobile club" means a corporation providing all or part of one or more automobile club services for subscribers in exchange for periodic prepayment in identifiable amount by or as to the subscribers;

(2) "automobile club services" means any professional service, technical service, replacement of goods which the corporation may become obligated to provide upon a contingent event or a certain event which may occur at an uncertain time and for which a specified single or periodic prepayment is charged or collected, including, but not limited to

(A) emergency road service;

(B) reimbursement of legal fees for representation on traffic offenses; and,

(C) providing bail bonds for traffic offenses.

An automobile club may provide other services or benefits which do not fall within the definition of automobile club services.

(3) "subscriber's contract" means the contract between the automobile club and its subscriber under which all or a part of one or more services is to be rendered to or on behalf of the subscriber by an automobile club or by a provider that has entered into a service agreement with the automobile club.

SECTION BY SECTION ANALYSIS OF CSHB 704(L&C). 4/3/84.

This proposal is intended to permit auto clubs to form and operate in Alaska. Since auto clubs do provide very limited forms of insurance, they are currently required to form as an insurer under Title 21. This is effectively a barrier since those requirements are aimed at a different kind of entity. The division recognizes that the requirements for an auto club do not need to be as stringent as for a normal insurer and support the concept encompassed in HB 704. HB 704, however presented a dilemna that we have attempted to resolve with a suggested substitute. HB 704 provided the director with duties to do certain things, yet the statute giving him the authority to do those things is made not effective. While this may be a minor consideration, there are other things in the insurance code that should be made applicable, hence the redraft. We have used the statute allowing hospital or medical service corporations as a guide in structuring this substitute.

Sec. 21.59.010.
This section requires that an auto club is subject to the provisions of the new chapter. It excludes insurers with a certificate of authority issued under AS 21.09. It also provides that only provisions referred to or contained in AS 21.59 apply to an auto club.

Sec. 21.59.020.
This section requires that the auto club be a nonprofit corporation and hold a certificate of authority issued by the director. It also establishes some procedural requirements about order of filing certain documents if the auto club is a domestic.

Sec. 21.59.030.
This section establishes qualifications for a certificate of authority. The auto club must be financially sound and it must post a bond assuring that it will meet its contractual obligations.

Sec. 21.59.040.
This section lists the documents needed to obtain a certificate of authority. (4) provides an option of two ways to provide some evidence of financial soundness. The rest is almost boilerplate requirements for issuance of a certificate of authority.

Sec. 21.59.050.
Subsections (a) and (b) provide the reserves needed if the bond filed under Sec. 21.59.030(2) is for $50,000. Subsection (c) makes no special reserve requirements if the bond filed under Sec. 21.59.030(2) is for $250,000. Since the amounts for which the auto club will be at risk are very low for each subscriber, the bond is a good substitute.

Sec. 21.59.060.
This section requires that records be kept on a generally accepted accounting principles basis rather than that usual to an insurer, a statutory basis.

Sec. 21.59.070.
Since this is an exclusive statute, one to which provisions outside of the chapter do not apply, this section is needed to bring other appropriate sections of the insurance code to bear on auto clubs.

AS 21.03. This chapter deals with the scope of the insurance code.

AS 21.06. This chapter establishes the authority and powers of the director of insurance.

AS 21.09.050. This section bars misleading or duplication of insurer names.

AS 21.09.100. This section deals with management and affiliations of insurers.

AS 21.09 120-170. These sections deal with the certificate of authority. Issuance, refusal to issue, ownership, continuance, expiration, reinstatement, ammendment, revocation, suspension, and duration of suspension of a certificate of authority.

AS 21.09.180-190. These sections deal with service of process.

AS 21.09.200. This section deals with an annual statement.

AS 21.09.210. This section deals with taxation.

AS 21.12. This chapter defines the kinds of insurance.

AS 21.36. This chapter deals with unfair trade practices and frauds.

AS 21.69. This chapter deals with organization and corporate procedure for domestic corporations.

AS 21.78. This chapter deals with rehabilitation and liquidation of impaired or insolvent insurers.

AS 21.90. This chapter contains the general penalty section and general definitions for the insurance code.

Sec 21.59.900.
Definition section.

RE: HB 704 "RELATING TO AUTOMOBILE CLUBS"

THE INTENT OF HB 704 IS TO AMEND ALASKA STATUTES TO PERMIT THE TRIPLE A AUTOMOBILE CLUB TO INCORPORATE IN ALASKA AS A NON-PROFIT CORPORATION. BECAUSE SEVERAL OF THE SERVICES OFFERED BY TRIPLE A WOULD FALL UNDER THE DEFINITION OF INSURANCE, THE DIVISION OF INSURANCE FELT A NUMBER OF CHANGES WERE NECESSARY TO PREVENT PROBLEMS IN THE STATUTES FOR BOTH THE DIVISION AND FOR TRIPLE A.

IT IS MY UNDERSTANDING THAT DURING THE PAST TWO REPRESENTATIVES OF TRIPLE A AND THE DIVISION OF INSURANCE HAVE WORKED TO DEVELOP A COMPROMISE PIECE OF LEGISLATION WHICH ACCOMMODATES TRIPLE A'S REQUEST FOR INCORPORATION AND SOLVES STATUTE PROBLEMS CITED BY THE DIVISION. A BRIEFING PAPER HAS BEEN SUPPLIED BY TRIPLE A'S REPRESENTATIVES WHICH DETAILS SOME OF THE STATUTORY PROBLEMS. THE RESULTING DRAFT LEGISLATION IS IN ALL MEMBERS PACKETS. A SECTIONAL ANALYSIS IS ATTACHED TO THE BACK.

QUESTIONS

1. WHY HAS THE TRIPLE A AUTO CLUB NOT SOUGHT TO ORGANIZE IN ALASKA BEFORE ?

2. WHY HAS THIS BILL BEEN EXPANDED SO MUCH FROM THE ORIGINAL VERSION ?

REALTOR®

HB 705

ALASKA ASSOCIATION OF REALTORS®
1818 W. Northern Lights Blvd., Suite 104 • Anchorage, Alaska 99503
Telephone 907-272-8016

Attached is a summary of a problem area of vital concern to the real estate industry. The ALASKA ASSOCIATION OF REALTORS is suggesting content for a bill which will address the issue. We seek your consideration and support.

ALASKA ASSOCIATION OF REALTORS - Position Paper, RE: The Surety Fund

History

From its creation in 1964, as reflected in AS 08.88, the Real Estate Commission's primary purpose has been the protection of the public through the examining and licensing of real estate practitioners. Through 1975, the public's guarantee of monetary relief was a required bond in the amount of $1000/Salesman and $5000/broker.

Through the early '70's there were few claims against the bonds; however, the industry realized that the bonding level was not adequately protecting the public's interests. Following the example of twelve other states, (Footnote: 1974 NARELLO Report, page 25) the industry together with the Real Estate Commission actively lobbied for the 1974 legislation (Attachment A: 45.85.010-110 & 08.88.281, .071, & .401) to create a surety fund with a two-fold purpose:

1) to provide indemnification up to $10,000/transaction for judgments awarded by the courts to persons who suffered financial loss because of a licensee's actions that involved fraud, deceit, misrepresentation, or conversion of trust funds, and

2) to provide funding for real estate education of both the public and the licensees from funds collected in excess of the specified $250,000 minimum balance in the fund.

The 1974 legislation, which was patterned after the California model, required court action and a judgment against a licensee prior to any disbursement of Surety Fund dollars. However, Alaska's enacted version did not require an attempt to collect money from or attach the assets of the named licensee, nor did it provide for any review by the Commission prior to payment from the fund.

Thus from the 1976 license renewal cycle when the first fees were paid into the surety fund, judges were able to order payment directly from the fund to satisfy a judgment.

These conditions were in effect until 1980 when the statute was amended, initiated by the Legislative Audit Committee during the Sunset Review, to charge the Real Estate Commission with the responsibility to both hear cases and award payments, but without ensuring the full protection of due process and judicial precedent (Attachment B).

The use of hearing officers (as allowed by the Administrative Procedures Act) starting in January 1982 and the regulations adopted by the Commission in December 1982 (effective April 1983) have further attempted to work within the current statute (Attachment C).

Attachments: A) 1974 Surety Fund Statute

B) 1980 Amended Surety Fund Statute

C) 1982 Surety Fund Regulations

Current Situation

The real estate industry in Alaska consists of some 4000 licensees who support sensible legislation to regulate the industry and to protect the public against illegal real estate practices. This sense of professional responsibility has not changed throughout the 20-year historical summary period outlined above.

Currently there are no filing fees or costs if a claim is denied, nor is the claimant required to exhaust other remedies before receiving satisfaction from the Surety Fund. Thus, the "no-risk" and "no-costs incurred" status of claimants simply encourages claims. Further, the state entity, either contracted or appointed, is in the position of being both judge and jury.

It is the consensus of the industry that a concentrated effort must be made immediately to restore the integrity of the surety fund, both in concept and in actual administration.

Points to Achieve

1. Ensure the rights of all parties to due process through the court system with the determination of a claim's validity and resultant damage assessment in the courts.

2. Maintain the Surety Fund as a resource to be drawn upon only when funds are not collectable from the judgment debtor by any other means.

3. Charge the Real Estate Commission with the responsibility of timely license action on the licensee whose action has resulted in a draw from the Fund.

4. Direct the Real Estate Commission to provide quality education programs to licensees and the public as to licensees' responsibilities under the real estate statutes and regulations.

HB

706

MEMO:

3 April, '84

TO: John
FROM: Merrill

RE: HB# 706

John, I have written a short analysis of this bill which is attached, Chat Chatterton will be standing by for a conference call this morning, so that he may testify and answer any questions. Industry will also have someone present. Larry Vavra of Union Oil has suggested an amendment changing the words "price determinations" to "well classifications", because this is actually what the commission does and the price is determined by the classification. Everyone has signed off on the change, but when I talked with Chatterton late Monday, he wanted a slightly different wording to conform with federal regs. I wasn't able to contact Vavra, but am sure it can be worked out during the committee meeting this morning.

QUESTIONS:

1.) As more and more gas wells are discovered in Alaska, is this process going to become burdensome to the commission budget wise?

2.) What would the effects of natural gas decontrol have on this process?

3.) Is there any real need to put this in the statutes if you have been operating without any problems since 1979?

a.) FOLLOW UP: If this is not put into the statutes, could the Governor at a future date transfer the authority to another agency?

4.) Is the decision of the Commission final, or does the applicant have any course of appeal, if there is a disagreement as to the classification of the well?

HB# 706 by Labor & Commerce
RE: The authority of the Oil & Gas Conservation Commission

This bill was introduced by the committee as a result of testimony at a March 7th hearing by the Labor & Commerce Committee on HB# 680, a bill relating to underground injection wells. At that hearing Mr. Chat Chatterton, Chairman of the Alaska Oil & Gas Commission, suggested several amendments to HB# 680. the Committee adopted one of the amendments to HB# 680, and recommended that a separate bill be introduced to take care of the other issues.

HB# 706 adds a new subsection to AS. 31.05.030 to make the Alaska Oil and Gas Conservation Commission the state jurisdictional agency over applications for natural gas price determinations, for wells that are outside federal jurisdiction.

Since the Oil & Gas Conservation Commission was established Jan. 1, 1979, by the Governor, it has been performing this function. What the Commission actually does is determine the category for the well, and the price of the gas is determined according to the well category. They have been doing this in compliance with federal law that requires the state Oil & Gas regulatory authority to become the jurisdictional agency. This bill simply adds this authority to state statute.

ANALYSIS

HB# 706 by Labor & Commerce
RE: The authority of the Oil & Gas Conservation Commission

This bill was introduced by the committee as a result of testimony at a March 7th hearing by the Labor & Commerce Committee on HB# 680, a bill relating to underground injection wells. At that hearing Mr. Chat Chatterton, Chairman of the Alaska Oil & Gas Commission, suggested several amendments to HB# 680, the Committee adopted one of the amendments to HB# 680, and recommended that a separate bill be introduced to take care of the other issues.

HB# 706 adds a new subsection to AS. 31.05.030 to make the Alaska Oil and Gas Conservation Commission the state jurisdictional agency over applications for natural gas price determinations, for wells that are outside federal jurisdiction.

Since the Oil & Gas Conservation Commission was established Jan. 1, 1979, by the Governor, it has been performing this function. What the Commission actually does is determine the category for the well, and the price of the gas is determined according to the well category. They have been doing this in compliance with federal law that requires the state Oil & Gas regulatory authority to become the jurisdictional agency. This bill simply adds this authority to state statute.

PROPOSED AMENDMENT No. 2

FOR

CS House Bill No. 680 L & C

Add to the Bill a new Section 2 as follows and renumber subsequent sections accordingly:

* Sec. 2 AS 31.05.030 is amended by adding a new subsection to read:

(i) The commission shall have the authority to act as the jurisdictional agency over applications involving natural gas price determinations for all wells in Alaska not under federal jurisdiction, pursuant to the "Natural Gas Policy Act" of 1978, Public Law 95-621 and applicable regulations.

Subpart E—Identification of State and Federal Jurisdictional Agencies

[¶ 24,451]

Sec. 274.501 Jurisdictional agency.

(a) *Definition.* Except as provided in paragraph (b), "jurisdictional agency" means:

(1) with respect to a well the surface location of which is on the OCS, the Federal or State agency having regulatory jurisdiction with respect to the production of natural gas. The following agencies have notified the Commission of their authority in this regard.

(i) for OCS wells located in the Gulf Coast Region:

Area Oil & Gas Supervisor
Suite 336
3301 N. Causeway Blvd.
Metairie, LA 70010

(ii) for OCS wells located in the Atlantic Region:

Area Oil and Gas Supervisor
Atlantic OCS Operations
Suite 204
1725 K Street, N.W.
Washington, DC 20244

(iii) for OCS wells located offshore Alaska:

Area Oil & Gas Supervisor
P.O. Box 259
Suite 109
800 A Street
Anchorage, AK 99510

(iv) for OCS wells located offshore California:

Area Oil & Gas Supervisor
160 Federal Building
1340 W 6th Street
Los Angeles, CA 90017

(2) with respect to a well the surface location of which is on lands within the boundaries of a State (including Federal lands and offshore State lands), the Federal or State agency having regulatory jurisdiction with respect to the production of natural gas. The following agencies have notified the Commission of their authority in this regard:

State in which well is located	Jurisdictional agency for wells on	
	Federal lands	Other lands
Alabama	Area Oil & Gas Supervisor, Suite 204, 1725 K. St., N.W., Washington, D.C., 20006.	Oil & Gas Supervisor, State Oil & Gas Board, Drawer O, University, AL 35486.
Alaska	Area Oil & Gas Supervisor, P.O. Box 259, Suite 109, 800 A Street, Anchorage, AK 99510.	Oil & Gas Conservation Commission, 3001 Porcupine Drive, Anchorage, AK 99501.
Arizona	Area Oil & Gas Supervisor, P.O. Box 26124, 505 Marquette Ave., N.W., Albuquerque, NM 87125.	Oil & Gas Conservation Commission, Suite 420, 1645 W. Jefferson, Phoenix, AZ 85007.
Arkansas	Area Oil & Gas Supervisor, 6136 E. 32nd Place, Tulsa, OK 74135.	Oil & Gas Commission, A Division of the Arkansas Dept. of Commerce, 314 East Oak, El Dorado, AR 71730.
California	Area Oil & Gas Supervisor, 160 Federal Building, 1340 West 6th Street, Los Angeles, CA 90017.	Department of Conservation, Division of Oil & Gas, 1416 Ninth St., Rm. 1316, Sacramento, CA 95814.
Colorado (except for the west ranges of the New Mexico Principal Meridian). (c)	Area Oil & Gas Supervisor, P.O. Box 2859, 2002 Federal Building & Post Office, Casper, WY 82602.	Oil & Gas Conservation Commission, 1313 Sherman Street, Rm. 721, Denver, CO 80203.
Colorado (only the west ranges of the New Mexico Principal Meridian)	Area Oil & Gas Supervisor, P.O. Box 26124, 505 Marquette Ave., N.W., Albuquerque, NM 87125.	
Florida	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	Administrator of Oil & Gas, Bureau of Geology, Department of Natural Resources, 903 W. Tennessee Street, Tallahassee, FL 32304.
Georgia	Area Oil & Gas Supervisor, Suite 204, 1725 K St., N.W., Washington, D.C. 20006.	Department of Natural Resources, Geologic & Water Resources Division, 19 Martin Luther King Drive, SW., Atlanta, GA 30334.
Idaho	Area Oil & Gas Supervisor, 160 Federal Building, 1340 West 6th Street, Los Angeles, CA 90017.	Idaho Public Utilities Commission, Statehouse Mail, Boise ID 83720.
Illinois	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	Department of Mines and Minerals, Oil & Gas Division, 704 Stratton Office Building, 400 S. Spring Street, Springfield, IL 62706.
Indiana	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	Department of Natural Resources, Oil & Gas Division, 606 State Office Bldg., 100 N. Senate Avenue, Indianapolis, IN 46204.
Kansas	Area Oil & Gas Supervisor, 6136 East 32nd Place, Tulsa, OK 74135.	Corporation Commission, Suite Office Building, Topeka, KS 66612.
Kentucky	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	Department of Mines and Minerals, Oil & Gas Division, Box 680, Lexington, KY 40501.
Louisiana	Area Oil & Gas Supervisor, 6136 East 32nd Place, Tulsa, OK 74135.	Office of Conservation, Box 44275, Baton Rouge, LA 70804.
Maryland	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	Energy and Coastal Zone Administration, Department of Natural Resources, Tawes State Office Bldg., Annapolis, MD 21404.
Michigan	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	Department of Natural Resources, Box 30028, Lansing, MI 48909.
Mississippi	Area Oil & Gas Supervisor, Suite 204, 1725 K Street, N.W., Washington, D.C. 20006.	State Oil & Gas Board, Box 1332, Jackson, MS 39205.
Montana	Area Oil & Gas Supervisor, P.O. Box 2859, 2002 Federal Bldg. & Post Office, Casper, WY 82602.	Oil & Gas Conservation Division, Department of Natural Resources and Conservation, 2535 St. Johns Ave., Billings MT 59102, or P.O. Box 217, Helena, MT 59601.

State in which well is located	Jurisdictional agency for wells on Federal lands	Other lands
Nebraska	Area Oil & Gas Supervisor, P.O. Box 2859, 2002 Federal Bldg. & Post Office, Casper, WY 82602.	Oil & Gas Conservation Commission, Box 393, Sidney, NE 69162.
Nevada	Area Oil & Gas Supervisor, 160 Federal Building, 1340 West 6th Street, Los Angeles, CA 90017	Department of Conservation and Natural Resources, Division of Mineral Resources, Capitol Complex, 201 S. Fall Street, Carson City, NV 89710.

(b) *Waiver.* In the case of any determination to which a waiver under Subpart C of Part 274 is applicable, "jurisdictional agency" means the Commission.

(c) *Federal lands.* For purposes of this section, "Federal lands" means

(1) all lands leased under:

(i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. § § 181 *et seq.;* and

(ii) the Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. § § 351 *et seq.;* and

(2) all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221); and

(3) all Indian lands which are under the supervision of the Osage Indian Agency, Bureau of Indian Affairs, U.S. Department of the Interior.

(d) *Divided-interest leases.* Unless an agreement under paragraph (f) of this section provides otherwise, where a well is located on a divided-interest lease involving Federal (or Indian) and private (or State) ownership:

(1) the Federal jurisdictional agency shall make the determination where the majority lease interest is Federal (or Indian);

(2) the State jurisdictional agency shall make the determination where the majority lease interest is private (or State); and

(3) the State jurisdictional agency shall make the determination where the lease is divided equally.

(e) *Drilling units.* Unless an agreement under paragraph (f) of this section provides otherwise, where a drilling unit is drained by two or more wells, the Federal jurisdictional agency shall make the determination if the completion location of the well in question is located on a Federal (or Indian) lease, and the State jurisdictional agency shall make the determination if the completion location of the well in question is located on a private (or State) lease.

(f) *Agreements.* If the United States Geological Survey and any State jurisdictional agency enter into an agreement authorizing such State agency to make determinations under Subpart A of this part with respect to wells located on Federal lands, or authorizing the U.S. Geological Survey to make such determinations with respect to wells located on State lands, such agreement shall be filed with the Commission. Upon the filing of such an agreement the agency so authorized in the agreement shall be considered the jurisdictional agency with respect to wells on the designated lands to the extent provided in the agreement.

.01 44 F.R. 48664 (August 20, 1979)

.05 *Historical record.*—Section 274.501 originated in 43 F.R. 56448 (12/1/78), effective 12/1/78.

Subsection (a), appearing in 43 F.R. 56448 (12/1/79), effective 12/1/78, read as follows until its amendment in 44 F.R. 48664 (8/20/79), effective 8/1/79:

(a) *Definition.* Except as provided in paragraph (b), "jurisdictional agency" means:

(1) With respect to a well on the OCS, one of the following offices of the United States Geological Survey:

(i) for OCS wells located in the Gulf Coast Region:

Area Oil & Gas Supervisor
Suite 336
3301 N. Causeway Blvd.
Metairie, LA 70010

(ii) for OCS wells located in the Atlantic Region:

Area Oil & Gas Supervisor
Atlantic OCS Operations
Suite 204
1725 K Street, N.W.
Washington, DC 20244

(iii) for OCS wells located offshore Alaska:

Area Oil & Gas Supervisor
P.O. Box 259
Suite 109
800 A Street
Anchorage, AK 99510

(iv) for OCS wells located offshore California:

Area Oil & Gas Supervisor
160 Federal Building
1340 West 6th Street
Los Angeles, CA 90017

(2) With respect to a well the surface location of which is on lands within the boundaries of a State (including Federal lands and offshore State lands), the agency specified in the following table:

[Note: the list of jurisdictional agencies, appearing in 43 F.R. 56448 (12/1/78), effective 12/1/78, is not reproduced.]

Subsection (c), appearing in 43 F.R. 56448 (12/1/78), effective 12/1/78, read as follows until its amendment in 44 F.R. 48664 (8/20/79), effective 8/1/79:

(c) *Federal lands.* For purposes of this section, "Federal lands" means

(1) all lands leased under,

(i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. § § 181 *et seq.*, and

(ii) the Mineral Leasing Act for Aquired Lands, as amended, 30 U.S.C. § § 351 *et seq.*, and

(2) all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221).

Subsections (d) and (e) newly originated in 44 F.R. 48664 (8/20/79), effective 8/1/79.

Subsection (f) (formerly designated as subsection (d)), appearing in 43 F.R. 56448 (12/1/78), effective 12/1/78, read as follows until its amendment in 44 F.R. 48664 (8/20/79), effective 8/1/79:

(d) *Agreements.* If the United States Geological Survey and any state jurisdictional agency enter into an agreement authorizing such state agency to make determinations under Subpart A with respect to wells located on Federal lands, such agreement shall be filed with the Commission. If such an agreement is filed, then such state agency shall be considered the jurisdictional agency with respect to wells on Federal lands in such state to the extent provided in the agreement.

[Part 275 begins on page 14,541.]

(b) *Waiver.* In the case of any determination to which a waiver under Subpart C of Part 274 is applicable, "jurisdictional agency" means the Commission.

(c) *Federal lands.* For purposes of this section, "Federal lands" means

(1) all lands leased under:

(i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. § § 181 *et seq.*; and

(ii) the Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. § § 351 *et seq.*; and

(2) all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221).

(d) *Agreements.* If the United States Geological Survey and any state jurisdictional agency enter into an agreement authorizing such state agency to make determinations under Subpart A with respect to wells located on Federal lands, such agreement shall be filed with the Commission. If such an agreement is filed, then such state agency shall be considered the jurisdictional agency with respect to wells on Federal lands in such state to the extent provided in the agreement.

[Part 275 begins on page 14,541.]

Form Approved
OMB No. 1902-0038
(Expires 12/31/84)

APPLICATION FOR DETERMINATION OF THE MAXIMUM LAWFUL PRICE UNDER THE NATURAL GAS POLICY ACT (NGPA)
(Sections 102, 103, 107 and 108)

GENERAL INSTRUCTIONS

Complete this form if you are applying for price classification under sections 102, 103, 107 or 108 of the NGPA.

Complete each appropriate item on the reverse side of this page. The code numbers used in items 4 and 6 can be obtained from the Buyer/Seller Code Book. If there is more than one purchaser or contract, identify the additional information in the space below. Also enter any additional remarks in the space below. The data reported on this form are not considered to be confidential and will not be treated as such.

Submit the completed application to the appropriate Jurisdictional Agency as listed in title 18 of the CFR, part 274.501. If there are any questions, call (202) 357-8585.

SPECIFIC INSTRUCTIONS

Use the codes in the table below for type of determination in item 2.

Section of NGPA (a)	Category Code (b)	Description (c)
102	1	New OCS lease
102	2	New onshore well (2.5 mile test)
102	3	New onshore well (1000 feet deeper test)
102	4	New onshore reservoir
102	5	New reservoir on old OCS lease
103	-	New onshore production well
107	0	Deep (more than 15,000 feet) high cost gas
107	1	Gas produced from geopressured brine
107	2	Gas produced from coal seams
107	3	Gas produced from Devonian shale
107	5	Production enhancement gas
107	6	New tight formation gas
107	7	Recompletion tight formation gas
108	0	Stripper well
108	1	Stripper well – seasonally affected
108	2	Stripper well – enhanced recovery
108	3	Stripper well – temporary pressure buildup
108	4	Stripper well – protest procedure

Enter the appropriate information regarding other Purchasers/Contracts.

Line No.	Contract Date (Mo, Da, Yr) (a)	Purchaser (b)	Buyer Code (c)

RE: HB 711 "RELATING TO THE BOARD OF PUBLIC ACCOUNTANCY"

BY MANDATE OF ALASKA STATUTES 44.66.050 AND 08.03.010 THE HOUSE LABOR AND COMMERCE COMMITTEE MUST CONSIDER FOR SUNSET REVIEW, THE STATE BOARD OF PUBLIC ACCOUNTANCY. HB 711 WOULD EXTEND THAT BOARD THROUGH 1988.

IF THE COMMITTEE MEMBERS HAVE AND A CHANCE TO REVIEW THE PERFORMANCE REPORT OF THE BOARD OF PUBLIC ACCOUNTANCY, YOU WOULD HAVE NOTED UNDER THE RECOMMENDATIONS SECTION, THERE ARE NO RECOMMENDATIONS MADE BY THE REPORT WHICH INDICATE STATUTE CHANGES ARE NECESSARY. SINCE THE BOARD OF PUBLIC ACCOUNTANCY HAS BEEN GIVEN A CLEAN SLATE IN THE PERFORMANCE REPORT, IT IS MY INTENTION TO PASS HB 711 ON TO THE NEXT COMMITTEE OF REFERAL, WHICH WOULD BE RULES.

RE: Board of Registration for Architects, Engineers and Land Surveyors

Representative Cowdry, Chairman
Labor and Commerce Committee
Room 209 Behrends Building
Juneau, Alaska

Dear Representative Cowdry:

Thank you for the opportunity to comment on the Committee bill regarding the continuation of the Board of Registration for Architects, Engineers and Land Surveyors. I understand that your committee proposes to continue the board for another four years, to reduce the length of terms to four years, to leave the composition of the board unchanged, and to delete the requirements in CS SB 438 for registrants providing evidence of "continued competence" for renewal of registration.

As President of the board I concur with these positions and feel that the board will also concur. If I can be of further assistance please contact me or any other board member.

Sincerely,

Wayne Jensen

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

May 17, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the provisions of Titles 24 and 44 of the Alaska Statutes (sunset), the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE
BOARD OF PHARMACY

July 1, 1980 to February 28, 1983

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Pharmacy for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Pharmacy should be reestablished. The law now specifies that the Board will terminate June 30, 1984, and have one year from that date to conclude its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.

2. Interviews with the license examiners.

3. Tests of files and documents of licensees.

4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman Office.

5. Discussions with Board members.

6. Minutes of Board meetings and Division correspondence files.

7. Attorney General Opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Pharmacy is a regulatory board with seven members; two public members having no direct financial interest in the health care industry, and five professional members with three years practical experience and licensed in Alaska. Whenever possible, each judicial district should be represented by a Board member.

The Board regulates five types of licenses; pharmacists, retail pharmacies, wholesale pharmacies, hospital pharmacies and drug rooms. The Board sets the minimum standards to practice in Alaska by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing, amending, or eliminating regulations controlling pharmacy practices.

3. Revoking, annulling or suspending licenses in accordance with the Administrative Procedures Act when a person has violated pharmacy statutes or regulations.

Applicants for registration as a pharmacist are required to pass the National Association of the Boards of Pharmacy Licensing Examination (NABPLEX), and a jurisprudence exam covering Alaska pharmacy law and the Federal Controlled Substance Act.

Pharmacists licensed to practice in another state who apply for licensure in Alaska can be licensed by credentials, except for those applicants from California or Louisiana. These two states require applicants to pass a state exam, not the national exam. Consequently, these applicants must take the national exam when applying in Alaska.

The Board may also issue temporary or emergency permits. Temporary permits allow qualified applicants to practice until the Board can formally license them; emergency permits allow pharmacists licensed in another state to practice in Alaska in an emergency. Both permits are limited in their duration and application.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committees should take into consideration the findings and recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Board of Pharmacy should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

However, the following findings describe areas where weaknesses or conflicts exist. We have made recommendations which, if implemented, will improve the efficiency and effectiveness of the Board.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Pharmacy should allow the Division of Occupational Licensing (OL) to perform its administrative duties as described in AS 08.01.050 to improve documentation and file management.

The Secretary of the Board receives license fees and applications, keeps applicant files, sends notification of exam results, and issues temporary permits. Each of these responsibilities has been assigned by the Legislature to the Department of Commerce and Economic Development, Division of Occupational Licensing. The above situation exists because the previous Secretary believed he could be more efficient in maintaining the files and processing the applications. We disagree.

The Division of Occupational Licensing is able to provide continuous, uninterrupted service while Board membership changes causing address changes and file transfers.

Additionally, the Secretary of the Board may not be equipped with the space or security needed to maintain confidentiality of files and to safeguard State assets. Furthermore, applicants become confused about where to send their documents.

Noncompliance with AS 08.01.050 is the major cause of the following problems:

A. In seven of ten files reviewed for proper permanent licensure, we were unable to assure ourselves the applicant had passed the jurisprudence exam.

B. In two of the files, we were unable to verify the applicants had satisfied the internship requirement. The Board reviewed these files and was unable to satisfy us that the requirements had been met. One file was missing documentation and the other file had documentation we considered insufficient in relation to that required of other applicants. Most applicants were required to have certified copies of hours worked from supervising pharmacists. In this case, documentation consisted of an internship permit issued by the Board with no evidence any hours had been worked.

C. Temporary permits are being issued by individual Board members without complete documentation on file in DOL. This procedure has resulted in inconsistent issuances of temporary permits. Furthermore, it allows for the possibility of unqualified individuals being licensed.

Prior to the February 1983 Board meeting, we reviewed each application for permanent licensure scheduled for Board consideration. Each applicant had already been issued a temporary permit. In five of eleven cases, there was insufficient documentation in the applicant's file to show that all requirements for temporary licensure had been met.

By the time of the February 1983 meeting, all necessary documentation to support issuance of temporary permits, except for a jurisprudence exam, had either been received by OL or brought to the meeting by the Secretary of the Board. With the additional documentation, we determined that no temporary permit had been issued to an unqualified applicant. However, the possibility exists for a person to be improperly licensed for a short time.

The Board should ensure all documentation is sent directly to OL. When the file is complete, a member of the Board can either issue the permit or direct OL to issue the permit. This procedure will ensure that all necessary documentation is on file at OL before issuance of temporary permits.

D. Alaska Statute 08.80.157 requires proof that an applicant for a retail or wholesale pharmacy license has the land, facilities and equipment necessary to carry on business. Also, that the applicant be free of any conviction of a federal or state drug offense and free of any addiction.

We reviewed seven pharmacy files and none of the files contained sufficient documentation to issue a license. We discussed our finding with the Board and determined it was not their policy to include this documentation. They knew who had the facilities and relied on a telephone call from the Drug Enforcement Administration to satisfy the conviction requirement.

We believe the Board should adopt a policy to document satisfaction of the licensing requirements. The procedures need not be elaborate, but should supply sufficient proof that the applicant complies with law.

We recommend the Board ensure that all files, applications, fees and exam results are sent directly to OL. Also, that temporary permits are only issued after all documentation has been received by OL.

Recommendation No. 2

The Board of Pharmacy should reevaluate its regulations governing continuing education.

The following requirements of continuing education should be reviewed.

A. Regulations require nonacademic programs to have an examination or another method of assuring satisfactory completion of the program before continuing education credit will be given. The Board allowed continuing education credit to be given to an individual when the nonacademic requirement had not been met. The reason given for allowing these credits was that the regulations were too stringent.

   If the Board believes its regulations to be arbitrary or unreasonable, those regulations should be changed before accepting nonregulation continuing education credits. Compliance with existing regulations will ensure that all licensees are treated equally and consistently until changes can be made.

B. The Board has described four instances when they will excuse a licensee from continued competency requirements. These causes are chronic illness, retirement, military service, or hardships as individually determined by the Board.

   In our opinion, it is more reasonable to require individuals who have been chronically ill, retired or in the military to demonstrate their continued competency, than those who have not interrupted their practice. We also understand that those persons who have been chronically ill should not be penalized for their illness.

   However, the Board has the ability, under the hardship clause, to determine each case individually. They should evaluate the changes in the profession and develop a plan for the individual that would allow him or her to practice while fulfilling the continuing education requirements. This would fulfill the Board's primary purpose to protect the public while not unduly penalizing the professional.

Recommendation No. 3

The Board of Pharmacy and the Division of Occupational Licensing should introduce legislation that will clarify certain statutory requirements.

Alaska Statute 08.01.050(19) places the responsibility for

performing investigations with the Division; Alaska Statute 08.01.070 assigns to the Board the requesting authority. However, AS 08.80.030(3) also gives the Board the authority to conduct investigations. This conflict has caused friction between the Division and the Board.

The Board is concerned that the Division is not informing them of complaints or investigations concerning pharmacy, while the Division is concerned that the Board not become involved in the investigation to such an extent as to prejudice the case. Also, the Board must remain impartial in case they become involved in any disciplinary action against the licensee.

Legislation is necessary to clarify the responsibilities of the Board and the Division so both will be confident they are properly performing their statutory duties.

Recommendation No. 4

The Office of the Governor should ensure that Board members are properly appointed.

In July of 1980, the Legislature limited the number of consecutive terms a Board member could serve to two and reduced the term from five years to four. The intent of AS 08.80.020 as amended, was to make service on the Board accessible to more individuals in the profession.

In discussions with Legislative Affairs' attorneys, it became clear that the intent of the Legislature was to include service prior to July, 1980, in determining the limitation. Three members of the Board of Pharmacy have served longer than is allowed when prior service is applied.

One member has served for sixteen years as of March 31, 1983, thirteen of those years prior to July, 1980. This same member was reappointed after the effective date of AS-08.80.020. At the end of his present term, he will have served nineteen years. Two other members will have served twelve and ten years at the end of their present terms on March 31, 1984 and March 31, 1985, respectively.

Additionally, three members of the Board appointed after the effective date of the legislation, have been appointed for five year terms instead of four.

We recommend the Office of the Governor ensure that Board members are appointed in accordance with statute.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board has held public meetings three times a year.

B. The Board administers the pharmacy test yearly.

C. The Board has passed regulations concerning dangerous drugs, continuing education as proof of continued competency, false or misleading advertisement of drugs, and prepackaging of drugs in hospital drug rooms.

D. The Board was instrumental in passage of the Controlled Substance Act and the Marijuana Therapeutic Research Program.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board adopted continuing education regulations that may be too stringent. The Board is reconsidering these regulations (see Recommendation No. 2).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board actively supported passage of the Controlled Substance Act; it became effective January 1, 1983.

B. The Board succeeded in having various obsolete or vague statutory requirements repealed which provided for smoother operation of the Board.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. Board meetings are announced to the public. Comments on regulation changes are solicited by announcement in public newspapers. The Board does not actively solicit comments on its effectiveness.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board announces proposed regulation changes or additions in newspapers according to the Administrative Procedures Act.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board, or commission is administratively assigned, or with the Office of the Ombudsman have been processed and resolved.

A. We found no problems in this area.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. We found no instances where the Board had licensed unqualified practitioners.

B. The Board has licensed 83 pharmacists in the last three years, all but eight were licensed by credentials.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. Applications for licensure as a pharmacist require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with factors enumerated in this subsection.

Please refer to the recommendation section of this report.

(Intentionally left blank)

APPENDIX A

BOARD OF PHARMACY
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended June 30, 1982

(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$42,763
Less: Expenditures (Note 3)	46,166
Excess of Expenditures Over Revenues	$ 3,403

Revenue Type	Amount	Collection Time
Examination Fee	$ 50	With application
Re-examination Fee	15	With application
Investigation Fee	25	With application
Pharmacist Fee	200	With license issuance
Pharmacist Renewal Fee	200	Every four years
Temporary License Fee	20	With permit issuance
Wholesale Drug Dealer Fee	200	With license issuance
Wholesale Drug Dealer Renewal Fee	200	Every four years
Retail Pharmacy Fee	200	With license renewal
Retail Pharmacy Renewal Fee	200	Every four years
Pharmacy Interim Fee	10	With license issuance
Emergency Permit Fee	10	With permit issuance
Hospital Pharmacy Fee	200	With license issuance
Hospital Pharmacy Renewal Fee	200	Every four years
Hospital Drug Room Fee	100	With license issuance
Hospital Drug Room Renewal Fee	100	Every four years
Nursing Home and Related Facility Fee	100	With license issuance
Nursing Home and Related Facility Renewal Fee	100	Every four years
License Amendments or Renewal Fee	10	When applicable

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and accordingly we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of revenues collected.

Note 3

Expenditures include those made by board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments (such as the Department of Law) assisting the boards and the Division.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

OFFICE OF THE COMMISSIONER

June 28, 1983

Mr. Gerald Wilkerson, CPA
Legislative Auditor
Audit Division
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: Board of Pharmacy - Performance Report

Thank you for the opportunity to respond to the performance audit of the Board of Pharmancy and the Division of Occupational Licensing which is dated July 1, 1980 to February 28, 1983.

We concur with your evaluation that the Board of Pharmacy should continue to exist in interest of the public's health and safety. Your suggestions will be evaluated for implementation. Those determined to improve the efficiency and effectiveness of the division and the board will be strongly supported and recommended. We have reviewed each of your recommendations and will provide you with this agency's position if we do not agree.

RECOMMENDATION #1.

The board of Pharmacy should allow the Division of Occupational Licensing (DOL) to perform its administrative duties as described in AS 08.01.050 to improve documentation and file management.

We concur in this recommendation, and cooperative efforts have recently improved. As mandated by legislation, and in the interest of efficiency, DOL is committed to assisting the Board of Pharmacy in all areas.

RECOMMENDATION #2.

The Board of Pharmacy should reevaluate its regulations governing continuing education.

03-H2LH

This agency is continuing a review on requirement of continuing education by licensing agencies (boards). We do not agree that continued education ensures continued competency. As a licensing agency we determine that competency is the most important. Competency ensures the safety of the consumer. We also take the position that initial licensing is based on minimum qualifications; retesting on the entrance level may serve the purpose of ensuring continued competency. Continued education would, or should, be viewed as the professional association's responsibility to ensure knowledgeable professionals. This would also be in keeping with less government regulations and letting industry regulate itself.

RECOMMENDATION #3.

The Board of Pharmacy and the Division of Occupational Licensing should introduce legislation that will clarify certain statutory requirements.

We concur with this recommendation. This agency has been working with the Legislative Code Revision Committee in rewriting Title 8. This would have deleted the fragmentation throughout Title 8 and the various chapters. This effort was resisted by the board as an effort to diminish its authority. We will seek to have legislation submitted to clarify the issue of conflict within the statutes.

RECOMMENDATION #4.

The Office of the Governor should ensure that board members are properly appointed.

We would assure the auditors this has been addressed by the Governor's Office and by the Department of Law.

Again, thank you for the opportunity to respond to your report. Please feel free to contact this agency or the Division of Occupational Licensing if additional information or clarification is needed. Be assured, we determine your comments and findings to be fair and in the best interest of Alaskan consumers and professional pharmacist.

Sincerely,

Richard A. Lyon
Commissioner

ALASKAN MERCHANTS SINCE 1954

23 March 1984

Honorable Joe L. Hayes
SPEAKER OF THE HOUSE
of Representatives
Pouch V
Juneau , Alaska 99811

Dear Joe,

Many thanks for your letter of March 17. It is gratifying to me to know that you , Representative Cowdery, and Senator Eliason are taking a hard look at what is happening regarding implementation of Alaska's Controlled Substance Act and particularly AS 17.30 of that Act.

The Board of Pharmacy was handed the ball by the Legislature,along with funding to hire an Executive Secretary and Investigator. Unfortunatly these titles were not included as specific wording in the law , although these positions were repeatedly mentioned when the legislation was being considered and passed.

Board requests for an Executive Secretary , have repeatedly been ignored by the Governor, the Commissioner of Commerce , and the Director of Occupational Licensing (DOL). I believe all of them have a misconception of the intent , the importance , and the timely implementation of the Law.

Federal statistics,on file with the Alaska Department of Law , show that controlled substance from the legitimate industry account for some 60 % of deaths of patients brought to hospital emergency rooms with drug related problems (nation wide). Statistics also show ,over 60% of drug related problems of patients being treated in hospital emergency rooms, come from drugs from the legitimate industry. These drugs are obtained by armed robbery, by after hour breakins, by prescriptions from unscrupulous practitioners, by forgery of precsriptions, or by sale by unscrupulous pharmacists.....but all from the legitimate industry.

The federal Drug Enforcement Administration(DEA) and state and local drug enforcement units have their hands full dealing with the "street traffic" illegitimate entrance of and use of controlled substances in all states . They rely on state laws, such as Alaska's AS 17.30 to deal with the legitimate industry. Most states effectively do this through their Boards of Pharmacy. No big buearacy is needed . Wyoming does it quietly, and cost effectively with one Executive Secretary and one Investigator, Under the direction of its Board of Pharmacy. Alaska would do well to emulate this program and the Board planned just that.

ALASKAN MERCHANTS SINCE 1954

23 March 1984

Honorable Joe L. Hayes
page 2.

You and Representative Cowdery and Senator Eliason all have documented evidence of the valient effort by the Board of Pharmacy to carry out the intent of the Legislature. I will not repeat all of that here, but it is important for you to know that I did spend many long hours drafting both .....proposed regulations and job qualifications and a job description for the Executive Secretary. The later may be of value to you when you propose legislation to mandate creation of the position.

Again thanks for your letter, your interest, and your help in drafting and passing legislation that will clarify legislative intent. If I can be of assistance in this effort, please call me.

Since the Governor removed me from the Board, and refused to reappoint the member from Sitka and has indicated that he will not reappoint the present experienced Secretary of the Board, the Board will be down to one professional and one lay member with any real experience. The new inexperienced Board will desperately need the Executive Secretary.

Sincerely,

Eldon R. Ulmer, R.Ph

Pouch "D"
Juneau , Alaska 99811

Dear Mr. Treager:

Please consider this letter and supportive information attached , as an official request for action by you , from the Board of Pharmacy .

When you met with the Board in Juneau on February 25, 1933, you requested that I write to you asking your help in obtaining changes in the "designation of personnel" portion of the budgeted line items for implementation of AS 17.30 and As 17.35 by the Board of Pharmacy.

You also asked for a job description for the Boards designation of "EXECUTIVE-SECRETARY-INSPECTOR " . In the five pages, attached, stating purpose , and including narrative , conclusion , and an addendum, I have attempted to do that . It is complex , to say the least, but I do believe it conveys the intent of the legislature and a means of implementing that intent.

Please expedite your request for the line item change so we may proceed at once. We are already two months into 1983 , and need to go at full speed in the next month or two .

Let me know as soon as you have hired the regulation specialist that you promised to hire and base in Anchorage. I have five pages of suggested regulations covering not only AS 17.30, but also AS 17.35 . I have a commitment from all four of the physicians to serve in the various categories on the Patient Qualification Review Committee and need the specialist to aid in getting my proposed applications for those positions . into printed form, so letters of appointment may be sent.

Sincerely,

Eldon R. Ulmer, R.Ph.

ALASKA STATE BOARD OF PHARMACY

IMPLEMENTATION

CONTROLLED SUBSTANCE STATUTE AS.17.30
AND
MARIJUANA THERAPEUTIC RESEARCH
PROGRAM STATUTE AS.17.35

The Legislature passed the CONTROLLED SUBSTANCE STATUTE AS 17.30 AND THE MARIJUANA THERAPEUTIC RESEARCH PROGRAM STATUTE AS 17.35 IN 1982 with an effective date of January 1, 1983.

Much of the responsibility for the implementation of these two statutes rests with the Board of Pharmacy . The legislation did not specifically address the funding for the implementation, nor the number or type of personnel that would be needed for implementation.

The Board of Pharmacy has been planning , since 1981 , for the responsibilities that many believed would be vested with the Board , but could make no definite plans until enactment was accomplished and an effective date established.

The Board is now faced with problems of selecting and funding personnel to insure a timely implementation of it's responsibliy.

N A R R A T I V E:

Under Sec 17.30.010 Regulations must be promulgated.

Under Sec 17.30.020 ,(a),(b),(c),(d),(e) & (f) Registration requirements must be met .

Under Sec 17.30.030 (a), (b), & (c) Registration must be accomplished.

Under Sec 17.35 Marijuana Therapeutic Research , a program must be established , physcians interviewed and appointed to the Patient Qualification Review Committee and regulations must be adopted to assure this program is administered at a state level that is compatible with Federal Statutes.

All of above can not be accomlished in three meetings of two days each presently budgeted for the Board.

Competent, qualified and experienced personnel must be hired, and fast , to accomplish the mandate of the legislature.

With this in mind the Board as early as June 1981 , started setting up a proposed budget and establishing goals and objectives , even though no law was on the books at that time.

At two of its three meetings in 1982 , after the enactment of the legislation , but still prior to the effective date, the Board again established goals and an accompaning proposed budget . This fact may be verified by the minutes of all of the above cited meetings and the attached goals and objectives to those minutes.

Throughout the meetings, evidence of the Board's intent can be clearly identified . Never did the Board waver from it's intent to hire a " Executive- Secretary " type person to come on board in a full time position . Various budget figures were submitted in the range of $ 85,000.00 for the period January 1, 1983 through June 30 , 1983 (a half year) to fit the fiscal budget time frame from effective date of January 1 , 1983.

N A R R A T I V E : (continued)

The Board does not enjoy budget-bypass priveledges and must submit a budget through the Division of Occupational Licensing . It is the Boards understanding that this budget is then submitted through the Division of Commerce and Economic Developemnt and on to the House and Senate Budget Committees .

The Board DID submit a budget , both for the fiscal year 1983 and again for the half-fiscal year 1983(January 1,1983 through June 30 , 1983. The 1983-84 Fiscal year budget was submitted to the Division of Occupational Licensing also, and it is presently in the process.

With each budget request , a breakdown was also submitted. In every request there is an audit trail established in the minutes of meetings and in letters. The Board always included expenses for a position that was labeled various ways , but either was called " Executive-Secretary" or a combined position of "Executive-Secretary-Investigator-Examiner.

The Board realized that a regulation specialist would be needed to promulgate all of the regulations mandated by statute and budgeted for that position also . The Board also ralized that , although it has always been assigned an inspector , by the DOL , that a full time inspector would aslo be needed , in addition to sharing the one used in the past . This would then amount to an investigator and a half (the half one being shared with other boards) and the full time one being used in the extensive investigatory work anticipated in the drug enforcement area .

Somewhere, in the translation from Board minutes and vocal requests, made by the Board to the Director of Occupational Licensing , MUCH WAS LOST. The Board recently was made aware that line item budget items were requested OR AT LEAST GRANTED in the budget , TIED to specific personnel. This personnel is defined, according to the DOL for two regulation specialists and two investigators . These people are in addition to the regular licensing examiner that is assigned to each board and usualy shared by at least one other board. The regulation specialists and the two investigators were to be the people that would aid the Board in emplenting its work.

This will just NOT WORK. The Board needs an Executive-Secretary type person , comparable to those in the employee of other states , such as Washington, Oregon, and Wyoming, where state pharmacy boards have full responsibility for their states controlled substance statutes. The Board has in mind at least three people , two of which would be excellent and who have indicated a desire to come to Alaska . These people have been employed for at least five years as executive-secretaries, and also have investigate exeperience , and have been involved in the administration of both controlled substance legislation and marijuana research programs . Just the type of person with just the type of experience needed in the initial

N A R R A T I V E :(continued)

stage of the program in Alaska . Unfortunately ,no such position is specifically listed in the job classification program of the state, directly identified with the Pharmacy Board . Similiar positions do exist with the Board of Nursing and others, but not Pharmacy.

The Board of Pharmacy does not need, in the initial organization , two investigators . The Board does desperately need an experienced executive-secretary type, on a day-by-day basis to get the programs initiated and then properly administrated .

The Director of the Division of Occupational Licensing has agreed to submit the Boards desires as to changing the budget line item identification from two regulation specialists and two investigators to the personnel that could do the job , as long as the Board stays within the budgeted dollars. The Board has been informed that it has , budgeted dollars covering the four people mentioned above, in the amount of $ 75,000.00 for the period January 1, 1983 through June 30 ,, 1983 . The Board has asked the director of DOL to make the following request:

-Investigator/ Executive-Secretary-Inspector	range of $45,000.00/yr
Estimated 30 % of salary for office etc	13,500.00/yr
One full time regulation specialist	33,000.00/yr
Estimated 30% of salary for office	9,900.00/yr
Licensing Examiner(or secretary type)	28,000.00/yr
Estimated 30 % for office etc.	8,400.00/yr
TOTAL FOR ONE YEAR	$ 137.800.00/yr

This would break down to $ 68,900.00 for the remainder of fiscal year 1983(half year Jan 1 through June 30 , 1983).and well under the $75,000.00 budgeted . The figures above may be slightly off , but should be fairly close and definitely on the conservative side considering the licensing examiner budgeted above for full time Pharamcy Board work , when she would probably be used part time with another board.

The Director of The Division of Occupational Licensing has , asked that the President of The Board Of Pharmacy write him a letter asking for his cooperation in requesting the change and in addition attempt to write a job experience qualification requirements and a job description for the position of Executive-Secretary-Investigator .

The letter has been written and will be sent to the Director along with this narrative and a conclusion statement. Copies of all material will also be sent to The Governor, The Commissioner of Commerce & Economic Developement, The Speaker of the House of Representatives, The President of the Alaska State Senate. all Board of Pharmacy Members, and Legislative Sunset Review Committee, and The Attorney General , and Dapartment of Law.

C O N C L U S I O N:

EXECUTIVE-SECRETARY-INVESTIGATOR FOR BOARD OF PHARMACY:

Qualifications:

1. Five years experience with another Board of Pharmacy, of which three years must be in the position of executive-secretary and the remainder in the position of investigator.

2. Experienced in administering controlled substance law of a state , under direction and supervision of a pharmacy board.

3. Experience in administering a marijuana therapeutic research program under the direction and supervision of a board of pharmacy.

4. Experience maintaining files and registration and licensing of pharmacists and controlled substance registratants at the direction and under the supervision of a board of pharmacy.

5. Be a registered pharmacist in a state recognized by the National Association of Boards of Pharmacy and be required to become registered as a pharmacist in the State of Alaska within six months of being hired as Executive-Secretary-Investigator by the State of Alaska.

JOB DESCRIPTION:

UNDER THE SUPERVISION AND AT THE DIRECTION OF THE BOARD OF PHARMACY AND UNDER THE MANDATES OF AS.08.01., CENTRALIZED licensing statute and AS 08.80 PHARMACY ACT.:

1. Assist Board in process of registration of all Drug enforcement registrants under the Federal Law under the AS 17.30 Alaska State Statute , including design of application form and license .

2. Maintain record of registration and licensure under AS 17.30 with such records properly maintained at the Division of Occupational Licensing .

3. INVESTIGATE violations of any state or federal law under the jurisdiction of the Board of Pharmacy and at the direction of the Board of Pharmacy and the Division of Occupational Licensing.

4. Aid Board in the administration of the Marijuana Therapeutic Research Program AS.17.35 , including maintaining records at the Division of Occupational Licensing , and aiding the Patient Qualification Review Committee in processing applicants under that program.

5. Cooperate with all state and federal law enforcement agencies at direction of Board of Pharmacy

C O N C L U S I O N : (continued)

6. Follow direction of DOL in maintaining records, issueing licenses , receiving fees, and any other job requirements assigned to licensing examiners , including:

   (a) Collecting fees & issueing receipts;
   (b) Maintaining records and files ;
   (c) Issueing & receiving application forms;
   (d) Notifying applicants of acceptance or rejection of applicants as determined by Board;
   (e) At direction of DOL & Board, notifying applicants for any licensure under AS 08.80 or AS 17.30 of examination dates or license renewal dates.
   (f) Arrange space for holding examinations
   (g) Notify applicants of results of examinations;
   (h) Issue licenses & certificates or temporary licenses or certificates as authorized by Board
   (i) Answer routine inquires ;
   (j) Maintain a current registry of all licenses issued under AS 08.80 & AS 17.30
   (k) Perform other services as requested by board consistant with requirements of AS 08.80 & AS -7.30 & As 17.35.

7. Perform the following job description duties as mandated by and established by investigative proceedures of DOL & Board.

   (a) (b) (c) etc.....to be inserted by DOL & consistant with job description duties of INVESTIGATORS .

NOTE: It is the intent of the Board of Pharmacy that the above person be employed, under state employment laws , by the Division of Occupational Licensing . , The Director would, in effect , be the person's boss , and would direct the duties and performance of the person, at the request and with direct input , from the Board of Pharmacy. The person would reside in the Anchorage area , working out of the Division of Occupational License office in Anchorage.

ADDENDUM:

The above job decription, narrative, and conclusion solves the problem temporarily., however the problem may ultimately have to be addressed by the legislature . The Board of Pharmacy in offering the solution , listed here, is attempting to carry out the wishes of the Legislature, so the important programs may be started at once and carried out to the best of the ability of all involved.

Dear Chairmen Cowdery and Eliason:

Your Committees will be considering legislation as to the Sunset of the Board of Pharmacy, and in the process (should the Board be continued passing legislation that would modify or change the laws that mandate how the Board will operate in the future.

The Legislature in 1982 passed the Controlled Substance Act . The portions of that act that deal with the legitimate industry are AS 17.30 and As 17.35. The Legislature placed the responsibility of administering these sections with the Board of Pharmacy. These sections , AS 17.30 and As 17.35 went into effect on January 1 , 1983.

You have copies of the Board's REPORT TO THE LEGISLATURE FY'83 . The report is voluminous and will not be repeated here,other than to state the fact that the Board has been frustrated by lack of support from the administration and from the Division of Occupational Licensing , in its dedicated effort to implement the intent of the Legislature.

The key to the successful implementation of the law lies in the request made by the Board involving the personnel being hired to aid the Board in doing the job.

The Board requested , within the budget, that an executive director be hired . The Board President wrote both a job description for this position and the qualifications for the job. Special exemption implementation was requested so this position could be added to the appropriate personnel section of the department of personnel.

ALASKAN MERCHANTS

7 March 1984

No action was taken by either the Administration or the Division of Occupational Licensing . Result.....the implementation floundered. All of the legitimate industry that is allowed by Federal Law to be involved with controlled substances , and that is licensed by the Federal Drug Enforcement Agency (DEA) should have been licensed by the State of Alaska during calendar year 1983 . They were not . This inspite of a valient effort by the Board of Pharmacy. This situation must be changed, either by the special exemption route or by legislation establishing an executive secretary position for the Board of Pharmacy.

Federal studies ,obtained by the Department of Law, show that in excess of 60 % of drug related deaths that involve emergency rooms of hospitals are caused by drugs secured through the legitimate industry . These drugs were obtained by a number of ways and include armed robbery of drug stores, break ins after hours of drug stores or other places legitimately handeling controlled substances, unscrupulous writing of prescriptions by practitioners, forged prescriptions , dishonest pharmacists , physicians, nurses , warehousemen, or employees of establishments legally handling controlled substances.

The Board of Pharmacy has been promised copies of all controlled substance order forms that are processed from Alaska, IF AND WHEN the Board licenses the practitioners. This information will allow Alaska to determine where the controlled substances are going and at what volume. Practitioners using large quantities can then be cost effectively investigated and possible illegal transactions uncovered and stopped . The Federal DEA is not now doing this. They will cooperate with any state to aid the state BUT DEA FUNCTION IS LARGELY WITH THE ILLEGITIMATE DISTRIBUTION , AND SO CALLED STREET TRAFFIC AND AIRPORT TRAFFIC OF DRUGS. Each state is expected to police its own legitimate industry, and the DEA will supply any information that will aid the state , providing a licensing proceedure is established.

In closing , may I suggest that the legislature write the necessary legislation establishing an executive secretary to function under the direction of the Board of Pharmacy

so the original intent of the 1982 Legislature can be effectively carried out.

As a former Board of Pharmacy member of some seventeen years and as President of the Board for much of that time, I am concerned that AS 17.30 & AS 17.35 be implemented as rapidly and as cost effectively as possible.

The Administration has removed one experienced member from the Board,and has told the Board through his staff, that no members will be reappointed at the expiration of their terms ,whether partial or complete terms. The make up of the future Board , when the present Secretary is replaced in a few months , will be mostly new inexperienced people . No matter how dedicated these people may be, it will take time for them to be effective members. They will desperatly need an experienced and qualified executive secretary . Several very qualified and experienced people who have been functioning as executive secretaries of Boards of Pharmacy for some of the Western States, have indicated an interest to come to Alaska and accept such a position here. Their experience in all areas of controlled substance law administration covers some eight to ten years. Once the position is mandated by legislation one of these people should be brought on board at the earliest date.

Thank you for considering my remarks and suggestions, If I may be of further service or of any help . I will be glad to travel to Juneau at my own expense to offer testimony .

Sincerely,

Eldon R. Ulmer, R.Ph.

2 March 1984

Honorable John J. Cowdery
Representative ....District 8
Alaska State Legislature
Pouch V (MS 3100)
Juneau , Alaska 99811

Dear John:

I am enclosing the REPORT TO THE LEGISLATURE for FY 83 by the Board of Pharmacy. Except for part 2 and 3 , I prepared the whole thing.

The report, along with the Addendums, will give you the story.

I am off the board , as I told you . Fired by the Governor on a trumped up excuse that I had been appointed illegally by Hammond. I am just as interested now ,as when Iwas on the board , in making sure the intent of the Legislature is carried out and that the Controlled Substance Act AS 17.30 and companion act AS 17.35 is implemented. The present administration has done almost nothing to help the Board of Pharmacy get this important piece of legislation in place and functioning.

I would like to testify on behalf of myself, as to the need to continue the Board of Pharmacy and to the urgency of an early implementation of As 17.30 and AS 17.35 , by the Board as was intended by the enactment of the legislation.

Please let me know when you plan hearings and where they will be held. The word I have now is that you will be addressing the Sunset of the Board on March 8 , 1984 , in Juneau. If this date and place is correct , please let me know time of day and place in Juneau, or where ever , that the hearings will be held.

Good talking to you in Anchorage last week end. Thanks for your help.

Sincerely,

Eldon R. Ulmer, R.Ph

ENCL: Report to Legislature

BOARD OF PHARMACY

Report to the Legislature FY ' 83.

President
Board of Pharmacy

Enclosure A six part report with the inclusion of five addendums.

8-HBLH

Part 2.

Narrative Statement prepared and submitted by Margaret Soden , R.Ph., Secretary of the Board for FY '83

FY '83 was a significant year for the Alaska Board of Pharmacy. Not only did we have our usual number of requests for information, applicants for licensure, and general Board business to conduct at each meeting, but the Alaska Controlled Substances Act became effective on January 1, 1983. The Act impacts our Board to a great extent in that we are the responsible administrator of Title 17, Chapter 30, Regulation of Manufacture, Distribution, Prescription and Dispensing of Controlled Substances and Title 17, Chapter 35, Marijuana Therapeutic Research Program.

Because Title 17 did not become effective until January 1, 1983, we could not actually begin working on our duties as outlined in the two Sections cited above. We did, however, do much preliminary work in ascertaining how best we could handle state registration of Federal Drug Enforcement Administration (DEA) registrants (estimated to be 1000-2000 in number), the procedure for obtaining therapeutic marijuana for the research program, seeking out physicians to serve on the Patient Qualification Review Committee established in Section 35, and a number of miscellaneous administrative details.

In April 1983 the Regulations Specialist budgeted to work with the Board was hired. At our June 1983 meeting she presented regulations for the state registration of all Alaskan DEA license holders and for the Marijuana Therapeutic Research Program's Patient Qualification Review Committee. With some changes, the regulations were approved and are now in the "notice and hearing' phase. We are hopeful they will be adopted before November or December so we can begin registration and officially appoint the four physicians who have agreed to serve on the Patient Qualification Review Committee.

In general business of the Board this year we:

1. Completed inspection of all pharmacies, drug room, hospital pharmacies and nursing home drug rooms with the exception of those in Seward, Glenallen and Seldovia. We also followed up on violations observed in prior inspections such as security in two retail pharmacies and general physical conditions in one Anchorage pharmacy.

2. Observed non-compliance with prescription advertising regulations in a Fairbanks pharmacy, corresponded with the outlet in question and the problem was resolved.

3. Rewrote several questions on our Jurisprudence exam to include the Controlled Substances Statute and Marijuana Program.

4. Approved a form for the reporting of Continuing Education that will be required of pharmacists with their June 1984 renewals.

5. Asked that updated statute books be sent to all licensees. This required two printings so is in progress.

6. Sought and had preliminary approval for the Board to participate in the National Association of Boards of Pharmacy (NABP) Foundation's newsletter program. This newsletter is published quarterly with two pages of Federal regulations news and two pages of state news. It is a very worthwhile and timely publication. The DOL felt it would be more cost effective to publish a newsletter locally so withdrew approval. However no state publication has been done since Fall 1981 with the exception of a very short several paragraph letter sent to licensees in early 1982. Although $1000 was budgeted for FY'83, no newsletter type communication from the DOL or Board of Pharmacy was sent to licensees.

7. Held a joint meeting with the Medical and Nursing Boards in February 1983 in which we discussed matters of common interest. One matter of particular concern was the emergency room dispensing of controlled substances on weekends, evenings or at other times when the pharmacist or pharmacist/consultant is not available. ~~This is a~~

This is a special problem throughout Alaska. DEA had a proposed rule change which would have allowed emergency controlled substances ~~to be allowed~~ in such situations, but nationally it met with a great deal of opposition. We were the "cry in the wilderness" in favor. DEA has now dropped the whole idea. The Alaska Board of Pharmacy cannot write regulations counter to Federal law so the problem will remain.

8. Reviewed several requests from individuals and groups for approval of Continuing Education programs not strictly meeting the requirements of our regulations.

9. Received a favorable opinion from Attorney General, Wilson Condon, covering our Board's desired policy regarding investigations handled by DOL.

10. Attempted to come to some understanding with the Alaska Dental Society and the Board of Dental Examiners relating to the practice by some dentists of writing prescriptions outside their area of expertise. Many pharmacists were refusing to fill prescriptions for non-dental related conditions and some tension was the result.

11. Acted on proposals or legislation of interest either as a Board or individually. Some of them were:

a. Alaska Code Revision-did not support as currently written.
b. HB 10 Imitation Controlled Substances-supported with qualification.
c. HB 225 Use of Drugs by Optometrists-did not support as written.
d. Proposed change in regulations regarding "keys to a pharmacy."
e. Repealed several CE regulations-a "housekeeping" measure.

12. Began preparing for Sunset Review in 1984. Carol Carroll, Legislative Audit, attended our February 1983 meeting and we discussed several activities and questions she had with regard to Pharmacy Board policy or procedure. We individually received and responded to "Interim Letter No. 1" from the Committee.

Our primary continuing concern is with the need to proceed with implementation of Title 17, Sections 30 and 35 with all due haste. Over seven months have passed and little concrete progress appears to have been made. We are particularily concerned with the staff budgeted to put Title 17, Sections 30 and 35 into effect. The Board was budgeted for two Regulations Specialists and two Investigators. We feel very strongly that two Regulations Specialists are not needed nor are two Investigators needed to do the work our portion of Title 17 requires. We have requested on several occasions that the one Regulations Specialist and one Investigator positions budgeted (but unfilled to this date) be somehow changed to encompass an "executive secretary/inspector" (various titles may be used) type person who would directly attend to the administrative duties we are now required to handle. Our licensing examiner cannot be expected to fulfill these functions along with her other duties. It is important that this position be filled by someone familiar with pharmacy nomenclature, pharmacy procedures, the administration of a Controlled Substances Act and Marijuana Program, and be able to handle and review the registration of 1000 to 2000 Alaska Controlled Substances licensees as a year long, on going process. This person could also serve as an inspector since that activity will increase with the implementation of Title 17. This

would also release the Pharmacy Board members from an inspection function which they do as personal time and funds allow. For a more complete discussion, see the attached letter and review of the Board's position written by Mr. Eldon Ulmer, Chairman.

The second major concern is for some sort of timely publication to be sent to all licensees. Since we are currently implementing a whole new section of regulations that very directly impact the practice of the pharmacy profession in this state, some means of communication is vital. The Board would prefer participation in the NABP program since it encompasses both Federal and state activities. Since many other states participate in the program, the cost of publication is shared. Timely communication to licensees is the key to our concern and in FY '83 there was none.. We are hopeful the $1000 we included in Budget FY '84 for a newsletter will be used to achieve this goal.

Part 3

BOARD OF PHARMACY
FISCAL YEAR 1983
STATISTICAL REPORT

EXPENDITURES

Travel & Per Diem.....$9,196.25
Contractual.....$1,600.11

RECEIPTS

Application & License Fees.....$8,128.00

BOARD MEETINGS

October 7-8, 1982 Fairbanks, AK

February 24-25, 1983 Juneau, AK

June 28-29, 1983 Anchorage, AK

Part 3.

Statistical Overview prepared and submitted by Licensing Examiner Barbara Branson for FY '83.

Part 4: Review of Prior Year Objectives

The Board of Pharmacy enumerated eight objectives for FY '83. Several of these have been discussed previously in the " Narrative Statement " but will be repeated here to comply with the requested format. The eight objectives were:

1. Inspect all pharmacies licensed under the Board of Pharmacy Jurisdiction. The board's activity as to inspections was limited due to lack of funds and time. The board realized that the implementation of its responsibilities under AS 30 and AS 35 would make it impossible to inspect all pharmacies. The board decided to follow up in problem areas that were revealed in the massive inspections conducted in FY '81 and FY '82. Almost all pharmacies had been inspected in those two years. This would delay the next statewide inspection of pharmacies until FY '84, rather then to spend funds that might jeopardize the boards fiscal ability to conduct the three board meetings programed for FY '83. The problem area follow up revealed that the installation of a sink in one pharmacy had been accomplished , that adequate security of those pharmacies(who closed their prescriptions departments when other areas of the store were open) had been accomplished, and that house keeping measures had been improved in those areas where adequate cleanliness had been found to be below approved standards.

2. Establish continuing eduaction method of reporting and auditing for licensure requirements for 1984. The board adopted the reporting and auditing system developed by Sid Fry , R.Ph., professional member of the board from Sitka. A form was approved , to be mailed with the license renewal statement. Pharmacists will be required to submit the completed form , showing they have completed the required number of continuing education hours, with the understanding that a spot check system of those hours will be conducted .

3. Meet the requirements of the Controlled Substance Act AS 30 and The Marijuana Therapeutic Research Program Statute AS 35 . These two statutes , although passed by the legislature in 1982, did not go into effect until January 1 ,1983. There were no funds available for half of FY '83 for the implementation of the statutes . This crammed all effort by the board into the six month period from January 1 , 1983 until June 30 , 1983. The board was aware of this and spent many hours individually , and collectively , prior to the first meeting of the board in February of 1983 , preparing proposed regulations so that a running start could be made at the February meeting. Pages of these proposals were prepared by the president of the board and brought to the February meeting. The board had requested that a representative from the Attorney General's office and a representative from the Special Prosecutor's Office be in attendance at the February meeting. This request was granted and these two professionals were very helpful in the area of regulations.

3. (continued)
The many pages of proposed regulations presented by the president of the board, were considered in depth by the board. It was agreed that this was a starting point , but that many more pages would be necessary before all subjects and requirements were met. Several facts were made available to the board at the February meeting , that here-to-fore were not known by the board. The board started as early as FY'81 (as substantiated by minutes of meetings in Fy 81 adn FY '82) planning for action under the then proposed controlled substance act that was being considered by the legislature The board realized (again substantiated by minutes of meetings of FY'81 and FY'82) that the board would need certain personnel , within the Division of Occupational Licensing (DOL) to effectively administer a controlled substance act , if the board was given the responsibility of administering the act. The board placed high priority on the hiring of an executive-secretary type person , on a full time basis, who would work within the jurisdiction of the DOL , but at the direction and guidance of the board. The board realized that it would need a full time regulation specialist and after the regulations had been adopted, and a licensing system had been extablished, possible the service of an investigative person. Some of these requests were provided for when the DOL submitted the board's budget to the budget process for FY'83. The most needed position request was completely ignored by the DOL when the line items were submitted to the legislature via the budget process. The position of executive-secretary had been left out and instead , the budgeted dollars for personnel that were allowed with enactment of the Controlled Substance Act and AS 35 , were submitted requesting two investigators. The board was frustrated by this action of the DOL, since the board had not been made aware of the line item requests made by the DOL. An investigator will be needed in FY 85 or FY'86. Investigators are not needed until the licensing process is established so there are licenses to investigate, if problems occur. The hiring of investigators will accomplish nothing in the early stages of implementation of AS 30 and AS 35. Dollars will be wasted . Investigators specifically hired(not under the intent of the legislature when enacting AS 30 and AS 35) will sit on their hands, or be used by the director of DOL in other areas outside the budget of the board of pharmacy and in violation of the intent of the legislation. The board knows that the Controlled Substance Acts of Washington, Oregon , and Wyoming were all put in place effectively , with the aid of an executive secretary type person. These three states have established programs and have been effectively operating them for from five to seven years. They do so with the help of a full time executive secretary type person . The board has knowledge that there are a number of people who have been working in the programs of those three states , both as executive secretaries and investigators , who are interested in coming to Alaska in a like position . The board does not know of any person presently with the DOL or available in Alaska who could qualify for this highly technical and specialized position.

3. (continued)
When the director of DOL advised the board that the budget line items could not be changed and that his plan was to hire the two investigators, the board was in shock. An immediate evaluation of what would happen under such a plan revealed the fact that the program would be in jeopardy and indeed probably completely delayed until the action by the director of the DOL could be changed or altered. The director then advised the board that the only remedy was to submit a request to the department of personnel that a "special exemption" status be enacted and that an executive-secretary position be created under the special exemption process. The other alternative is to seek legislative action . Since time is already a prime factor , a delay until legislative action can be taken in January or February of 1984 , would seriously delay placing the provisions of AS 30 and AS 35 on stream. The board requested that the director of DOL apply for a special exemption status and proceed full spead with the request . The director asked the president of the board to write him a letter , requesting that this action be taken . He also requested that the president of the board write a job description for the executive-secretary position and provide the qualifications for the job. The president of the board spent many hours drafting the qualifications and the job description and sent them with a cover letter to the director of DOL with copies to the Governor , the Legislative Audit Committe, and the Speaker of the House and President of the Senate as well as to the Attorney General and the Commissioner of Commerce & Economic Development. A copy of that letter and the qualification paper and job description are attached to this report as Addendum # 1 . A copy of the letter from the Governor, in reply to the receipt of all the material that went to the director of DOL, is attached to this report as Addendum # 2. The request, through the personnel officer of the DOL to the personnel office of the state, was garbled . This is evident from the letter of reply written to the request . The letter rejecting the request states that an exchange of the "positions" of investigators to the " positions' of executive type personnel was denied. The board did not ask that the two investigator positions be exchanged for two secretary type positions. It asked that the two positions of investigators be changed to ONE POSITION OF EXECUTIVE-SECRETARY. This exchange would result in one less persom being hired and would be cost effective due to the elimination of one position . Not only would the exchange benifit the board in implementaion of AS 30 and AS 35 , BUT DOLLARS WOULD BE SAVED. A copy of the memorandum of April 13 , 1983 to the director of DOL from the personnel officer of DOL , Jim Lawson , is attached as Addendum # 3. The board meeting in June of 1983 , again asked the director of DOL to appeal the decision of the personnel director, and to specifically state that only one person was being asked for instead of two . The director apparently did appeal and a copy of the letter of July 29, 1983 written by the director of DOL to the president of the board, advising of the failure of the appeal , is attached as Addendum # 4 .

3. (continued)
The board has spent much valuable time in FY'83 trying to convince the director of DOL, the Commissioner of Commerce & Economic Development, and the Governor that the board believes the intent of the legislature in the enactment of AS 30 and AS 35 was to get the job done. The board believes that the pressure by-pass special exemption method of securing the necessary qualified personnel in the DOL to aid the board in implementing AS 30 and AS 35 should and could be used, if it were presented properly . The progress of the board in implementing the statutes has been greatly impeded by the lack of the qualified personnel . The director of DOL finally hired a regulation specialist , who came on board in mid April 1983. This regulation specialist has been of great help and with the help of a regular regulation specialist in the Juneau office of DOL, prepared regulations that were patterned after those written by the president of the board. These proposed regulations were presented to the board at the June 1983 meeting . Changes were made and the proposed regulations were asked to be put in final form and promulgated as soon as possible. An outline copy of these regulations is attached as Addendum #5.
Irregardles to all the road blocks that have impeded implementation of AS 30 and AS 35, the following has been accomplished:

A. The baord president contacted , first by phone, and then where needed , by letter.....the following : Federal Drug Administration (FDA)
The National Institute of Drug Abuse(NIDA)
The Drug Enforcement Administration (DEA)
(State level, Regional level, National level.
The National Eye Institute (NEI)
The National Cancer Institute (NCI)

The FDA sent copies of the Group Guidlines for the use of Delta-9-Tetrahydrocannabinol (THC) NSC 134454 along with registration forms, order forms, and information on obtaining marijuana for use when implementing AS 35. The DEA sent a complete print out of all DEA reistrations in Alaska(some 1000) , when the board president wrote them and explained that the list was imperative to the program in Alaska. The board president further asked and received a letter from DEA allowing limited distribution of this list to pharmacies (as the only people other than the board and it's extentions) who have a need for this list . The NIDA , the federal agency authorized to issue THC , promised to co-operate with the board when regulations are implemented, so we have a source of THC (marijuana derivitive) for the research program.

B. The president of the board contacted many opthalmologists, radiologists' , psychiatrists and members of the Medical Board, in an effort to stimulate as much interest as possible with those professionals so they would apply for appointment to the Patient Qualification Review Committee (As 17 35). Copies of the law were handed out at a meeting of the psychiatry Association meeting,

3. (continued)
resulting in the application from a psychiatrist, a radiologist, a ophthalmologist and a response from a member (professional member) of the medical board. The president of the board ,with the help of the regulation specialist,designed an application form to be used by these professionals. The professionals filled the forms out and sent them to the president of the board, who presented them at the June meeting. All were approved for appointment and the prsident of the board (attested to by the secretary) mailed official letters of appointment to the four physicians. As soon as promulgations are finalized,this Patient Qualification Review Committee will meet and the program will be initiated.

C. The board is still persuing with vigor the attempt to bring an executive -secretary on board at DOL.

D. Controlled substance license forms are being designed with the help of the regulation specialist. The concept, if not the actual form, was approved at the June meeting. This form will speed up the licensure of those that are required to be licensed under AS 30, as soon as all regulations are promulgated , hopefully early FY '84.

E. The president of the board did write a qualification paper for an executive secretary and also a job description (see Addendum #1).

F. Regulations as evidenced by Addendum # 5 are being promulgated , after approval at June meeting of the board.

G. In summary , a great deal has been done and a great deal of it by individual action by dedicated board members. A great deal more could have been accomplished with the help of qualified personnel.

4. Promulgate regular regulations (other than those mandated by AS 30 & AS 35. . The board at a regular meeting voted on the need for regulations that would specifically allow the secretary of the board to keep " copies"of applications for registration and back up material copies to aid all board members in the issuing of temporary permits. A board member assumes a great responsibility when he/she issues one of these permits. The board member needs to be able to verify that all material submitted is factual and all necessary requirements are met. The personnel at DOL have demonstrated a lack of knowledge to look at documents and verify facts. A board member, assuming the responsibility for the qualifications of an applicant, when a temporay permit is issued, would be remiss indeed if all material is not checked by a professional member of the board. This person should be the secretary, who should have copies of all documents , so the proper information can be transmitted to the issuing board member. The board member is responsible , not a member of DOL staff, who might interpret information wrong and result in a license being issued without proper qualification. The director of DOL told the regulation specialis to put that regulation "on the back burner" and not do anything about it. Result.....no regulation, even though voted on

5. News letter in cooperation with the National Association of Boards of Pharmacy(NABP). The NABP in cooperation with most of the 50 states , prints a news letter and mails it to pharmacists within the states. The NABP, uses 50 % of the space in the news letter for national news, and the boards of pharmacy of participating states send in state news , thus supplying the other 50 % of the news letter The NABP puts this together and mails each state the news letter pertaining to their individual states. This usually is mailed from the NABP after approval of the participating state. The board in regular session unanimously approved participation in this program. The secretary was instructed to obtain all the details and if it could be done within the budget , to preceed with the letter. The director of DOL had a ten or fifteen minute telephone conversation with a member of the attorney general's office, and as a result nixed the letter. Result .....No news letter , although it is greatly needed to make regulons aware of ANP and PA licensure as well as regulation changes and board actions. Most states , if they have the financial means (board's budget prived funds) participate in this very worth while project. Alaska does not and the board wonders why , when it was passed in regular session and funds budgeted for it.

6. Department news letter.(DOL). The board was told that the DOL was planning a department news letter that could and would contain news items from all boards that are associated with DOL . The board (or boards) were to submit news items when this publication was to go to press. To the boards knowledge no such letter was published in FY '83 and if it was, no news was solicited from the pharmacy board.

7. Conduct three regular board meetings during FY '83. The board did conduct three meetings during FY'83 . The dates and location of these meetings was: October 7 & 8 , 1982 in Fairbanks: February 24 & 25, 1983 in Juneau: June 28 & 29 ,1983 in Anchorage. Most material covered in those meetings is reported in the "Narrative Report " , so will not be repeated here other than to note that the goal of holding three meetings was met.

8. Board response to sunset. The members of the board of pharmacy were made aware of the provisions of sunset legislation by the receipt of a letter written February24, 1983 , fromthe Legislative Audit Committee. The letter asked that the board respond to a questionnaire. The board did. The next communication from the Legislative Audit Committee was in the form of"Interim "Letter No. 1" that was written April 12, 1983 and addressed to each board member. Most board members answered this letter. Documents, letters, and facts were submitted by some board members. The board stands ready , willing , and able to testify , within the budget, or board members indivudual means, when so asked by the Legislative Audit Committee. The board welcomes the opportunity to present it's argument as to why the board should stay in existance.

Part 5 . New Goals and Objectives FY 84 :

1. Inspections:

Inspections of pharmacies was at a minimum during FY '83 due to the pressing demand on the board's time and funds. It is believed that a full scale state wide inspection of pharmacies will be initiated in FY '84. The two professional board members from South Eastern Alaska will team up to cover all of South Eastern. These board members will take advantage of super saver fares when possible and will schedule their inspection so the entire area is covered on one trip . Ideally the board likes to have a professional member team with a non-professional, but there is no non-professional in South Eastern Alaska. This mandates that two professionals conduct that portion of the state wide inspections. Central and North Western Alaska can be covered by having the non-professional member from Anchor Point travel to Fairbanks and team with the professional member there. The two can then inspect all of the Fairbanks area, fly on to Nome and other areas in Central and cover all pharmacies in those areas. The two professional members in the Anchorage area can team with the non-professional member in Anchorage and cover all of the Anchorage area as well as the Matanuska Valley , and areas along the highway . The non-professional member from Anchor Point will be met on the Kenai by one of the professional members from Anchorage to cover all of the Kenai Peninsula . One of the professional members from Anchorage will join with the non-professional from Anchorage and inspect Cordova, Valdez and Kodiak. This plan should effectively cover the state in FY '84, and within the budgeted amount of $ 5,000.00 (requested).

2. Continuing Education Requirements for Licensure in 1984 and the Future. All regulons will be coming up for re-licensure during 1984 . The board has adopted a program that will allow continuing education credits to be used to satisfy the requirements for competency under AS 08.80.240(8). The board has adopted regulation that will be in force during the registration and re-registration of regulons in 1984 and following years. The board will follow these regulations in 1984 and re-register all applicants who submit the required hours of continuing eduacation and pay the fee. A system for spot checking requirements is established and will be in effect utilizing personnel from the DOL and board members .

3. Establish,by Regulation , the Procedure for Administration of the Controlled Substance Act AS 17 35 and the Marijuana Therapeutic Research Program, AS 17 35 and Proceed to Administer the Acts: The Federal Controlled Substance Act of 1970 as ammended was put in place in 1970. From that time until January 1 , 1983 , Alaska did not have a workable state controlled substance act. All other 49 states did pass controlled substance acts . Alaska was the last. When the legislature was considering a controlled substance act in the many years between 1970 and 1983 , they always ran into problems and for one reason or another always aborted the efforts . The legitimate industry must have an Alaskan State Controlled Substance Act to exist in harmony with

3. (continued)
Federal Statutes. During 1982 a serious effort by the legislature resulted in the passage of an' Alaskan Controlled Substance Act AS 17.30 and a companion act The Marijuana Therapeutic Research Program ,AS .35. The board of pharmacy attended hearings with the legislative committees and contributed information and expert testimony. In doing so they worked, with the help of those in state government who desired the passage of the act, to write the legitimate industry portion of the act. This portion is known as AS 17 30. The legislature was in doubt as to what board or commission or department should administer the act. During the hearings the board of pharmacy demonstrated knowledge , both in writing the legitimate industry portion , and in an understanding of how it would relate and function with the Federal Act. The question was asked " Does the Board of Pharmacy have the ability and knowledge to administer AS 17 30 and AS 17 35 ?". The answer given by board members who testified was a resounding "YES " , but a qualified "YES". The board has knowledge as to how Washington, Oregon and Wyoming administer their controlled substance acts and the board knew that it could do the same .....given the proper tools and funds. One of the qualifications was that qualified personnel , be hired within the DOL , to assist the board. This qualified personnel should be in the form of an exective-secretary , who should be a pharmacist , and if not registered in the state , be required to become registered in the state. With this qualified and experienced help, the board would be able to properly and promptly put in place all the requirements of AS 17 30 & AS 17 35. The board believed that this would take place, and investigated the availability of qualified people ,and found at least three people who qualified. These people had many years (from 5 to 8 years) of experience with pharmacy boards fwom our neighboring states to the south. The board planned to bring one of these people on line at an early date. The board , as outlined in Section 4 of this report , ran into difficulties , not of their doing, but brought on by the erroneous submission of the request for two investigators, instead of the one executive-secretary that the board,in documented minutes,requested. It is the boards goal for FY ' 84, to have the executive-secretray position placed in the personnel division of the state, so this position may be filled. It can be done by special exception, and done rather rapidly , or it can be done by legislative action early in 1984 . It must be done to assure proper implementation of AS 17 30 & AS 17 35 and at the earliest date possible . The board has submitted FY '84 budget as part 6 of this report and has budgeted $ 35,000.00 for what remains of FY '84, and $ 52,000.00 in FY '85 and $ 56,000.00 in FY' 86 . These budget requests are reasonable and are necessary to get the job done. One person does the job in Washington , in Oregon and in Wyoming . Two investigator are not needed . The board has submitted a budget of $15,000.00 per year for each of the years FY'84, FY '85 and FY '86 , as a travel expense item for the executive-secretary. The executive-secretary , in future years, could take over

3 (continued)
much of the inspection of pharmacies , in conjunction with board members in the various geographic areas of the state. The executive-secretary could also do most of the investigation work , with the help of investigators now employed by the DOL, without hiring additional investigators. This is how the program works in the three states referred to previously in this report. It is effective and it is cost effective. The board has requested $ 35,000.00 for a regulation specialist for the FY '84 and reduced this to $ 33,000.00 in FY '85 and to zero in FY'86. Most of the regulations needed should be in place by the end of FY '85. The board has requested that no money be spent or put in the board's budget for investigators for FY 84. The licenses must be issued and in place prior to being able to investigate license violations . The board has requested $ 45,000.00 a year for investigator hire in FY 85 and again in FY' 86 , as by that time investigations will be in order and indeed needed. The board has requested $15,000.00 for licensing regulons in each year of FY'84, FY '85 and FY '86., and this amount of money represents the board's share of the expense for a licensing examniner that is shared by other boards. The board has submitted the amount of $ 1,000.00 per year for each of FY '84, FY '85 and FY '86 for the production of anews letter. It is one of the board goals that this be done in conjunction with the NABP news letter . The board has requested the sum of $18,000.00 to conduct three board meetings in FY '84 and the sum of $ 20,000.00 for FY '85 and the sum of $22,000.00 for FY '86 . The board has requested the sum of $ 5,000.00 to help defray the cost of board members being represented at hearings during sunset . In 1979 board members paid their own way to these hearings at a considerable out of pocket expense that should not be a responsibility of board members. Total budget requests for FY '84 is $158,400.00, for FY '85 it is $ 194,000.00 and for Fy '86 it is $163,000.00

4. Promulgate Regulations to Carry Out the Purpose of AS 80, That Have Not Been Previously Considered Due to Work Loads
The board is projecting an expense (budget request) of $3,000.00 for each year,FY '84, FY '85, and FY '86. This amount should cover actual costs ,not including salary for the regulation specials ,that is submitted elsewhere in budget request.

5. News Letter:
Although the board has been temporarily stopped by action of the director of DOL , from a cooperative effort with the NABP in the production of a news letter, the board has as a goal in FY '84 the establishment of the news letter. The board has asked the attorney general representative , who gave an unofficial negative response to the request the first time, to take an indepth look at the legal problems that are imagined ,to determine that they really do not exist. Most other states have this program with no problems. Alaska should also benefit from the cooperation of NABP in supplying a good news letter to all regulons.

6. The Board Plans Three Regularly Scheduled Meetings for FY' 84 and is Projecting a Like Amount for Each year FY'85 & FY'8
The board will continue to hold at least one meeting a year in Juneau and for FY '84 , has scheduled the fall 1983 meeting in Juneau on October 27 & 28 , 1983. There will probably also be a meeting in Juneau in February 1984 and the June meeting will be held (at an undecided location) and at the time the NABPLEX (national) examination is scheduled nation wide . The board may also hold telephone teleconferences ,in FY '84 , in an attempt to expedite implimentation of AS 30 & AS 35 and as a necessity due to limited funds and time. Projected costs are FY'83-'84 &'85 is $18,20, and $22,000.0

7. The Board Will Respond to Legislative audit Under "Sunset" Legislation to Justufy the Existance of the Board.
The board strongly feels that the board system is the best method of administering pharmacy laws and regulations, and to this end will present testimony to the legislative audit committee and the various committees of the legislature, when this is necessary . The pharmacy board was given a vote of confidence , when the Controlled Substance Act was implemented . The legislature felt at that time that the pharmacy board cound administer the Act in a knowledgable and cost effective way. The board in reacting to that confidence is attemtimg to do just that and to conduct the duties of the board in a responsive and effective manner. Costs are projected as $ 5,000.00 for FY'84 and no costs for FY '85 & FY' 86 as the two later years are non-sunset years.

Part 6. Budget Recommendations FY '84 With Estimates Budget Recommendations for FY '85 and FY'86:

ITEM	BUDGET FY '84	BUDGET FY'85	BUDGET FY '86'
1.Inspections	$5,000.00	$ 5,500.00	$ 6,000.00
2.Continuing Education	5,000.00	-0-	-0-
3.Controlled Substance Act. AS 30 & AS .35			
A. Executive Secretary	$35,000.00	$52,000.00	$56,000.00
B. Travel for Ex-Sect.	$15,000.00	$15,000.00	$15,000.00
C. Regulation Specialist	$35,000.00	$33,000.00	-0-
D. Investigator	-0-	$45,000.00	$45,000.00
E. Licensing Examiner (Shared expense)	$15,000.00	$15,000.00	$15,000.00
4. Registration Of Regulons	$ 3,000.00	$ 3,000.00	$ 3,000.00
5. News Letter	$ 1,000.00	$ 1,000.00	$ 1,000.00
6. Board Meetings (3 a year)	$18,000.00	$20,000.00	$22,000.00
7. Response to Sunset	$ 5,000.00	-0-	-0-
TOTALS	$158,400.00	$194,000.00	$163,000.00

ADDENDUM # 1

William Sheffield,
[redacted], Governor

DEPARTMENT OF COMMERCE &
ECONOMIC DEVELOPMENT
DIVISION OF OCCUPATIONAL LICENSING

POUCH D
JUNEAU, ALASKA 99811

5 March 1983

Eldon R. Ulmer , R.Ph.
President, Board of Pharmacy
P.O. Box 101420
Anchorage, Alaska 99510

Mr. Harry Treager
Director
Division of Occupational Licensing
Pouch "D"
Juneau , Alaska 99811

Dear Mr. Treager:

Please consider this letter and supportive information attached , as an official request for action by you , from the Board of Pharmacy .

When you met with the Board in Juneau on February 25, 1983, you requested that I write to you asking your help in obtaining changes in the "designation of personnel" portion of the budgeted line items for implementation of AS 17.30 and As 17.35 by the Board of Pharmacy.

You also asked for a job description for the Boards designation of "EXECUTIVE-SECRETARY-INSPECTOR " . In the five pages, attached, stating purpose , and including narrative , conclusion , and an addendum, I have attempted to do that . It is complex , to say the least, but I do believe it conveys the intent of the legislature and a means of implementing that intent.

Please expedite your request for the line item change so we may proceed at once. We are already two months into 1983 , and need to go at full speed in the next month or two .

Let me know as soon as you have hired the regulation specialist that you promised to hire and base in Anchorage. I have five pages of suggested regulations covering not only AS 17.30, but also AS 17.35 . I have a commitment from all four of the physicians to serve in the various categories on the Patient Qualification Review Committee and need the specialist to aid in getting my proposed applications for those positions into printed form, so letters of appointment may be sent.

Sincerely,

Eldon R. Ulmer, R.Ph.

ALASKA STATE BOARD OF PHARMACY

IMPLEMENTATION

CONTROLLED SUBSTANCE STATUTE AS.17.30
AND
MARIJUANA THERAPEUTIC RESEARCH
PROGRAM STATUTE AS.17.35

The Legislature passed the CONTROLLED SUBSTANCE STATUTE AS 17.30 AND THE MARIJUANA THERAPEUTIC RESEARCH PROGRAM STATUTE AS 17.35 IN 1982 with an effective date of January 1, 1983.

Much of the responsibility for the implementation of these two statutes rests with the Board of Pharmacy . The legislation did not specifically address the funding for the implementation, nor the number or type of personnel that would be needed for implementation.

The Board of Pharmacy has been planning , since 1981 , for the responsibilities that many believed would be vested with the Board , but could make no definite plans until enactment was accomplished and an effective date established.

The Board is now faced with problems of selecting and funding personnel to insure a timely implementation of it's responsibliy.

N A R R A T I V E:

Under Sec 17.30.010 Regulations must be promulgated.

Under Sec 17.30.020 ,(a),(b),(c),(d),(e) & (f) Registration requirements must be met .

Under Sec 17.30.030 (a), (b), & (c) Registration must be accomplished.

Under Sec 17.35 Marijuana Therapeutic Research , a program must be established , physcians interviewed and appointed to the Patient Qualification Review Committee and regulations must be adopted to assure this program is administered at a state level that is compatible with Federal Statutes.

All of above can not be accomlished in three meetings of two days each presently budgeted for the Board.

Competent, qualified and experienced personnel must be hired, and fast , to accomplish the mandate of the legislature.

With this in mind the Board as early as June 1981 , started setting up a proposed budget and establishing goals and objectives , even though no law was on the books at that time.

At two of its three meetings in 1982 , after the enactment of the legislation , but still prior to the effective date, the Board again established goals and an accompaning proposed budget . This fact may be verified by the minutes of all of the above cited meetings and the attached goals and objectives to those minutes.

Throughout the meetings, evidence of the Board's intent can be clearly identified . Never did the Board waver from it's intent to hire a " Executive- Secretary " type person to come on board in a full time position . Various budget figures were submitted in the range of $ 85,000.00 for the period January 1, 1983 through June 30 , 1983 (a half year) to fit the fiscal budget time frame from effective date of January 1 , 1983.

The Board does not enjoy budget-bypass priveledges and must submit a budget through the Division of Occupational Licensing . It is the Boards understanding that this budget is then submitted through the Division of Commerce and Economic Developemnt and on to the House and Senate Budget Committees .

The Board DID submit a budget , both for the fiscal year 1983 and again for the half-fiscal year 1983(January 1,1983 through June 30 , 1983. The 1983-84 Fiscal year budget was submitted to the Division of Occupational Licensing also, and it is presently in the process.

With each budget request , a breakdown was also submitted. In every request there is an audit trail established in the minutes of meetings and in letters. The Board always included expenses for a position that was labeled various ways , but either was called " Executive-Secretary" or a combined position of "Executive-Secretary-Investigator-Examiner.

The Board realized that a regulation specialist would be needed to promulgate all of the regulations mandated by statute and budgeted for that position also . The Board also ralized that , although it nas always been assigned an inspector , by the DOL , that a full time inspector would aslo be needed , in addition to sharing the one used in the past . This would then amount to an investigator and a half(the half one being shared with other boards) and the full time one being used in the extensive investigatory work anticipated in the drug enforcement area .

Somewhere,in the translation from Board minutes and vocal requests, made by the Board to the Director of Occupational Licensing , MUCH WAS LOST. The Board recently was made aware that line item budget items were requested OR AT LEAST GRANTED in the budget , TIED to specific personnel. This personnel is defined, according to the DOL for two regulation specialists and two investigators . These people are in addition to the regular licensing examiner that is assigned to each board and usualy shared by at least one other board. The regulation specialists and the two investigators were to be the people that would aid the Board in emplenting its work.

This will just NOT WORK. The Board needs an Executive-Secretary type person , comparable to those in the employee of other states , such as Washington, Oregon, and Wyoming, where state pharmacy boards have full responsibility for their states controlled substance statutes. The Board has in mind at least three people , two of which would be excellent,and who have indicated a desire to come to Alaska . These people have been employed for at least five years as executive-secretaries, and also have investigate exeperience , and have been involved in the administration of both controlled substance legislation and marijuana research programs . Just the type of person with just the type of experience needed in the initial

N A R R A T I V E :(continued)

stage of the program in Alaska . Unfortunately ,no such position is specifically listed in the job classification program of the state, directly identified with the Pharmacy Board . Similiar positions do exist with the Board of Nursing and others, but not Pharmacy.

The Board of Pharmacy does not need, in the initial organization , two investigators . The Board does desperately need an experienced executive-secretary type, on a day-by-day basis to get the programs initiated and then properly administrated .

The Director of the Division of Occupational Licensing has agreed to submit the Boards desires as to changing the budget line item identification from two regulation specialists and two investigators to the personnel that could do the job , as long as the Board stays within the budgeted dollars. The Board has been informed that it has , budgeted dollars covering the four people mentioned above, in the amount of $ 75,000.00 for the period January 1, 1983 through June 30 , 1983 . The Board has asked the director of DOL to make the following request:

Investigator /c	
Executive-Secretary-Inspector range of	$45,000.00/y
Estimated 30 % of salary for office etc	13,500.00/y
One full time regulation specialist	33,000.00/y
Estimated 30% of salary for office	9,900.00/y
Licensing Examiner(or secretary type)	28,000.00/y
Estimated 30 % for office etc.	8,400.00/y
TOTAL FOR ONE YEAR $	137.800.00/y

This would break down to $ 68,900.00 for the remainder of fiscal year 1983(half year Jan 1 through June 30 , 1983) and well under the $75,000.00 budgeted . The figures above may be slightly off , but should be fairly close and definitely on the conservative side considering the licensing examiner budgeted above for full time Pharamcy Board work , when she would probably be used part time with another board.

The Director of The Division of Occupational Licensing has asked that the President of The Board Of Pharmacy write him a letter asking for his cooperation in requesting the change and in addition attempt to write a job experience qualification requirements and a job description for the position of Executive-Secretary-Investigator .

The letter has been written and will be sent to the Director along with this narrative and a conclusion statement. Copies of all material will also be sent to The Governor, The Commissioner of Commerce & Economic Developement, The Speaker of the House of Representatives, The President of the Alaska State Senate. all Board of Pharmacy Members, and Legislative Sunset Review Committee, and The Attorney General , and Dapartment of Law.

C O N C L U S I O N:

EXECUTIVE-SECRETARY-INVESTIGATOR FOR BOARD OF PHARMACY:

Qualifications:

1. Five years experience with another Board of Pharmacy, of which three years must be in the position of executive-secretary and the remainder in the position of investigator.

2. Experienced in administering controlled substance law of a state , under direction and supervision of a pharmacy board.

3. Experience in administering a marijuana therapeutic research program under the direction and supervision of a board of pharmacy.

4. Experience maintaining files and registration and licensing of pharmacists and controlled substance registratants at the direction and under the supervision of a board of pharmacy.

5. Be a registered pharmacist in a state recognized by the National Association of Boards of Pharmacy and be required to become registered as a pharmacist in the State of Alaska within six months of being hired as Executive-Secretary-Investigator by the State of Alaska.

JOB DESCRIPTION:

UNDER THE SUPERVISION AND AT THE DIRECTION OF THE BOARD OF PHARMACY AND UNDER THE MANDATES OF AS.08.01., CENTRALIZED licensing statute and AS 08.80 PHARMACY ACT.:

1. Assist Board in process of registration of all Drug enforcement registrants under the Federal Law under the AS 17.30 Alaska State Statute , including design of application form and license .

2. Maintain record of registration and licensure under AS 17.30 with such records properly maintained at the Division of Occupational Licensing .

3. INVESTIGATE violations of any state or federal law under the jurisdiction of the Board of Pharmacy and at the direction of the Board of Pharmacy and the Division of Occupational Licensing.

4. Aid Board in the administration of the Marijuana Therapeutic Research Program AS.17.35 , including maintaining records at the Division of Occupational Licensi g , and aiding the Patient Qualification Review Commi tee in processing applicants under that program.

5. Cooperate with all state and federal law enforcement agencies at direction of Board of P' rmacy .

6. Follow direction of DOL in maintaining records, issueing licenses , receiving fees, and any other job requirements assigned to licensing examiners , including:

   (a) Collecting fees & issueing receipts;
   (b) Maintaining records and files ;
   (c) Issueing & receiving application forms;
   (d) Notifying applicants of acceptance or rejection of applicants as determined by Board;
   (e) At direction of DOL & Board, notifying applicants for any licensure under AS 08.80 or AS 17.30 of examination dates or license renewal dates.
   (f) Arrange soace for holding examinations
   (g) Notify applicants of results of examinations;
   (h) Issue licenses & certificates or temporary licenses or certificates as authorized by Board
   (i) Answer routine inquires ;
   (j) Maintain a current registry of all licenses issued under AS 08.80 & AS 17.30
   (k) Perform other services as requested by board consistant with requirements of AS 08.80 & AS -7.30 & As 17.3[illegible].

7. Perform the following job description duties as mandated by and established by investigative proceedures of DOL & Board.

   (a) (b) (c, etc.....to be inserted by DOL & consistant with job description duties of INVESTIGATORS .

NOTE: It is the intent of the Board of Pharmacy that the above person be employed, under state employment laws , by the Division of Occupational Licensing . The Director would, in effect , be the person's boss , and would direct the duties and performance of the person, at the request and with direct input , from the Board of Pharmacy. The person would reside in the Anchorage area , working out of the Division of Occupational License office in Anchorage.

ADDENDUM:

The above job decription, narrative, and conclusion solves the problem temporarily., however the problem may ultimately have to be addressed by the legislature . The Board of Pharmacy in offering the solution , listed here, is attempting to carry out the wishes of the Legislature, so the important programs may be started at once and carried out to the best of the ability of all involved.

Dear Mr. Ulmer:

Thank you for a copy of your recent correspondence to Mr. Harry Treager regarding your request in obtaining changes in the "designation of personnel" portion of the budgeted line items for implementation of AS 17.30 and AS 17.35 by the Board of Pharmacy. You may be assured that I will give serious consideration to your comments on this important issue.

I appreciate your personally informing me of your views, and I have copied the Department of Commerce & Economic Development for Commissioner Richard Lyon's review.

Dear Mr. Ulmer:

Re: Executive Officer Position

This correspondence is to advise you that efforts of Mr. Jim Lawson, personnel officer, Department of Commerce and Economic Development, were to no avail in changing the position of the investigator to an executive officer.

We should proceed immediately to fill the position as mandated by legislation.

Sincerely,

Harry D. Treager

NOTICE OF PROPOSED CHANGES IN THE REGULATIONS OF THE
DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT
BOARD OF PHARMACY

Notice is hereby given that the Department of Commerce and Economic Development, Board of Pharmacy, under authority vested by AS 08.80.030, AS 17.30.010, and AS 17.35.020, proposes to adopt regulations in Title 12 of the Alaska Administrative Code, Chapter 52, dealing with regulation of manufacture, distribution, prescription and dispensing controlled substances, marijuana therapeutic research program and definitions to implement AS 17.30.020, AS 17.30,030, AS 17.30.040 and AS 17.35.030 as follows:

Article 5, General Provisions is renumbered to Article 7, General Provisions, with Article 5 being assigned to the "Regulation of Manufacture, Distribution, Prescription and Dispensing of Controlled Substances," and Article 6 being assigned to the "Marijuana Therapeutic Research Program."

12 AAC 52 is amended by adding a new article to read:

ARTICLE 5
REGULATION OF MANUFACTURE, DISTRIBUTION, PRESCRIPTION
AND DISPENSING OF CONTROLLED SUBSTANCES

Section

400. Registration requirements
405. Registration
410. Application forms for registration
415. Fee for registration and renewal
420. Exemption from registration and fees
425. Separate registration for independent activities and locations
430. Certificate of registration
435. Termination of registration
440. Denial, revocation and suspension of registration

12 AAC 52.400 provides that every person who manufactures, distributes, or dispenses any controlled substance, or who proposes to do so, must obtain a certificate of registration for such activity with the Board of Pharmacy.

12 AAC 52.405 provides for the effective date and expiration dates of all certificates of registration.

12 AAC 52.410 provides for the application forms for registration and procedures for an applicant applying for registration.

12 AAC 52.415 provides for an annual fee of $10.00 for each certificate of registration issued.

12 AAC 52.420 provides for the exemption from registration and fees for any person exempted from registration under the Federal Controlled Substance Act of 1970, as amended.

12 AAC 52.425 provides that a separate registration shall be required for any person engaging in more than one group of independent activities and sets forth the categories of independent activities.

12 AAC 52.430 provides for the issuance of the Certificate of Registration by the board, the information contained on the certificate, and other requirements the board may impose on an applicant to determine if a certificate should be issued or denied.

12 AAC 52.435 provides for the termination of any registration in the event of the death of the registrant, or ceases legal existence or discontinues business or professional practice.

12 AAC 52.440 provides for the procedures for the denial, revocation or suspension of any registration and sets forth the procedures for the board, and the applicant or registrant, to follow in the event of any such action to ensure all parties' rights are protected.

12 AAC 52 is amended by adding a new article to read:

ARTICLE 6
MARIJUANA THERAPEUTIC RESEARCH PROGRAM

Section

600. Patien[illegible]alification Review Committee
610. Application for appointment
620. Term of appointment
630. Duties of committee

12 AAC 52.600 establishes a Patient Qualification Revie[illegible]ee of four members to oversee the marijuana therapeutic resear[illegible]m.

12 AAC 52.610 sets forth the application for appointmen[illegible] Patient Qualification Review Committee by the Board of Pharmacy.

12 AAC 52.620 provides for the term of appointment for each of the four members appointed and designating which appointee will be the chairman of the committee.

12 AAC 52.630 sets forth the duties of the committee in the management of the marijuana therapeutic research program.

12 AAC 52.900 DEFINITIONS (ARTICLE 7) is amended by adding new paragraphs to provide definitions for "compounder" and "committee."

Notice is also given that any person interested may present written statements or arguments, relevant to the action proposed by mailing or delivering them so they are received by 4:30 p.m., September 30, 1983 to:

Department of Commerce and Economic Development
Division of Occupational Licensing
Board of Pharmacy - Regulations
Century Plaza
142 East 3rd Avenue
Anchorage, Alaska 99501

Copies of the proposed regulations may be obtained by writing to the above address, or by telephoning (907) 276-7969.

This action is expected to require an increased appropriation to implement and maintain the registration requirements, as specified in 12 AAC 52.400-.440. It is anticipated that the additional funding required for one-half of Fiscal Year 1984 will amount to $17,500.00 to cover personal services, contractual, commodities and equipment (the equipment is a one-time cost). Fiscal Year 1985 is estimated to require $26,700.00 and Fiscal Year 1986 is estimated to require $27,900.00.

The action in regard to 12 AAC 52.600-.630 and 12 AAC 52.900(16) and (17) is not expected to require an increased appropriation.

The Department of Commerce and Economic Development, Board of Pharmacy, upon its own motion or at the instance of any interested persons, may thereafter adopt the proposals substantially as described above without further notice, or may decide to take no action on them.

Richard A. Lyon, Commissioner

FROM: KEN

RE: HB 716 RELATING TO THE BOARD OF PHARMACY

THE PRIMARY PURPOSE OF HB 716 IS TO ENSURE THE STATE BOARD OF PHARMACY IS EXTENDED FOR ANOTHER FOUR YEAR PERIOD. ALONG WITH THAT EXTENTION THE BOARD OF PHARMACY WOULD BE GIVEN NEW RESPONSIBILITIES AND EXPANDED POWERS. WITH THIS NEW AUTHORITY THE BOARD WOULD HIRE AN EXECUTIVE SECRETARY. THE PROPOSED JOB DESCRIPTION FOR THE EXECUTIVE SECRETARY HAS BEEN PROVIDED BY THE BOARD TO THE DIVISION OF OCCUPATIONAL LICENSING. THIS NEWLY CREATED POSITION WOULD GIVE THE BOARD THE STAFF NECESSARY TO CARRY OUT ITS RESPONSIBILITIES.

QUESTION:

1. IN OTHER STATES WHERE THE BOARD OF PHARMACY HAS STAFF SUCH AS AN EXECUTIVE SECRETARY, HOW HAS THE PROGRAM WORKED ?

2. HAS SUCH A PROGRAM BEEN MORE EFFICIENT THAN ONE LIKE WE HAVE HERE IN ALASKA ?

3. DO YOU FEEL THAT THE PHARMACY IS A VULNERABLE ENOUGH INDUSTRY TO NEED A CONSTANT WATCHDOG SUCH AS THE EXECUTIVE SECRETARY WOULD BE ?

4. HOW MUCH WOULD FISCAL NOTES CHANGE IF AN EXECUTIVE SECRETARY IS HIRED ?

5. WOULD THIS LESSEN THE WORK LOAD OF THE DIVISION OF OCCUPATIONAL LICENSING ?

6. DON'T YOU FEEL THAT SOMEONE WITH A PHARMACY BACK GROUND WOULD BE A BETTER WATCHDOG FOR THE INDUSTRY THAN AN INVESTIGATOR WHO HAS TO MONITOR SEVERAL INDUSTRIES ?

MARCH 14, 1983

THE BOARD OF PHARMACY IS MADE UP OF SEVEN MEMBERS, TWO OF WHICH MUST BE PUBLIC MEMBERS WITH NO DIRECT FINANCIAL INTEREST IN THE HEALTH CARE INDUSTRY. FIVE PROFESSIONAL MEMBERS WITH AT LEAST THREE YEARS EXPERIENCE FILL THE OTHER FIVE SEATS. THE BOARD REGULATES LICENSES, PHARMACISTS, ALL PHARMACIES AS WELL AS HOSPITAL DRUG ROOMS.

QUESTIONS:

1. DO YOU CONCUR WITH THE FINDINGS AND RECOMMENDATIONS MADE BY THE LEGISLATIVE AUDIT DIVISION FOR THE BOARD OF PHARMACY ?

2. HOW OFTEN DO YOU FEEL THE BOARD OF PHARMACY SHOULD BE REVIEWED BY THE LEGISLATURE ?

3. WHAT SUGGESTIONS DO YOU HAVE FOR IMPROVEMENT OF THE BOARD OF PHARMACY ? C & S Soc. #1

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 716 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the Board of Pharmacy; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.03.010(c)(4) is amended to read:

(4) Board of Pharmacy (AS 08.80.010) -- June 30, 1988 [1984].

* Sec. 2. AS 08.80.030 is amended to read:

Sec. 08.80.030. POWERS OF THE BOARD. The board may

(1) elect a president and secretary from its membership and adopt rules for the conduct of its business;

(2) examine applicants for registration as pharmacists;

(3) investigate individually, collectively, or through its agent, for violations of this chapter, or of any other state or federal statute relating to the practice of pharmacy;

(4) adopt regulations [AND DO WHATEVER ELSE IS NECESSARY AND ADVISABLE] to carry out the purposes of this chapter;

(5) [PROMULGATE REGULATIONS TO CARRY OUT THE PURPOSES OF THIS CHAPTER;

(6) Repealed

(7)] register intern pharmacists and adopt regulations [PROMULGATE RULES] relating to their minimum experience requirements;

(6) adopt [(8) PROMULGATE] regulations to ensure adequate security for all dangerous drugs;

(7) [(9)] adopt requirements for licensing in addition to

the requirements set out in this chapter;

(8) hire an executive secretary.

* Sec. 3. AS 08.80 is amended by adding new sections to read:

Sec. 08.80.095. EXECUTIVE SECRETARY. The board may hire an executive secretary to assist in implementing this chapter. The executive secretary shall be a member of the partially exempt service under AS 39.25.120.

Sec. 08.80.097. INVESTIGATIONS. (a) The executive secretary may inspect pharmacies and investigate complaints to determine whether any person has violated this chapter or a regulation adopted under this chapter or to secure information useful in the administration of this chapter.

(b) If the executive secretary believes that a person may have engaged in or be about to engage in an act or practice in violation of this chapter or a regulation adopted under it, the executive secretary shall ~~refer the matter to the department and immediately send written notice to each board member of the referral.~~ Follow the procedures adopted in AS 17.30 & AS 08.80 which are applicable.

(c) The department shall begin to investigate each matter referred by the executive secretary within five working days after the referral and shall report the results of its investigation to the board.

* Sec. 4. AS 39.25.120(c) is amended to read:

(c) The following positions in the state service constitute the partially exempt service:

(1) deputy and assistant commissioners of the principal departments of the executive branch, including the assistant adjutant general of the Department of Military Affairs;

(2) the directors of the major divisions of the principal departments of the executive branch and the regional directors of the

Department of Transportation and Public Facilities;

(3) attorney members of the staff of the Department of Law and of the public defender agency;

(4) one private secretary for each head of a principal department in the executive branch;

(5) employees of councils, boards, or commissions established by statute in the Office of the Governor or the office of the lieutenant governor, unless a different classification is provided by statute;

(6) the executive director, deputy director, hearing officers, and administrative law judges of the Alaska Public Utilities Commission;

(7) the director, deputy director, staff legal counsel, and hearing officers of the Alaska Transportation Commission;

(8) not more than two special assistants to the commissioner of each of the principal departments of the executive branch, but the number may be increased if the partially exempt service is extended under AS 39.25.130 to include the additional special assistants;

(9) the principal executive officer of the following boards, councils, or commissions:

(A) Alaska Public Broadcasting Commission;

(B) Professional Teaching Practices Commission;

(C) Parole Board;

(D) Board of Nursing;

(E) Real Estate Commission;

(F) Alaska Royalty Oil and Gas Development Advisory Board;

(G) Alaska Historical Commission;

(H) Alaska State Council on the Arts;

(I) Alaska Police Standards Council;

(J) Council on Science and Technology;

(K) Older Alaskans Commission;

(L) Board of Pharmacy;

(10) Alaska Pioneers' Home managers;

(11) hearing examiners in the Department of Revenue;

(12) the comptroller in the division of treasury, Department of Revenue;

(13) investment officers in the Department of Revenue;

(14) airport managers in the Department of Transportation and Public Facilities employed at the Anchorage and Fairbanks International Airports;

(15) the deputy director of the division of tourism and the deputy director of the division of insurance in the Department of Commerce and Economic Development;

(16) the executive director and staff of the Alaska Public Offices Commission;

(17) the director, deputy director, personnel analysts II, labor relations analysts I, labor relations analysts II, senior negotiators, and research directors of the division of labor relations in the Department of Administration;

(18) the rehabilitation administrator of the Workers' Compensation Board.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.-10.070(c).

ALASKA STATE BOARD OF PHARMACY

IMPLEMENTATION

CONTROLLED SUBSTANCE STATUTE AS.17.30
AND
MARIJUANA THERAPEUTIC RESEARCH
PROGRAM STATUTE AS.17.35

The Legislature passed the CONTROLLED SUBSTANCE STATUTE AS 17.30 AND THE MARIJUANA THERAPEUTIC RESEARCH PROGRAM STATUTE AS 17.35 IN 1982 with an effective date of January 1, 1983.

Much of the responsibility for the implementation of these two statutes rests with the Board of Pharmacy . The legislation did not specifically address the funding for the implementation, nor the number or type of personnel that would be needed for implementation.

The Board of Pharmacy has been planning , since 1981 , for the responsibilities that many believed would be vested with the Board , but could make no definite plans until enactment was accomplished and an effective date established.

The Board is now faced with problems of selecting and funding personnel to insure a timely implementation of it's responsibliy.

N A R R A T I V E:

Under Sec 17.30.010 Regulations must be promulgated.

Under Sec 17.30.020 ,(a),(b),(c),(d),(e) & (f) Registration requirements must be met .

Under Sec 17.30.030 (a), (b), & (c) Registration must be accomplished.

Under Sec 17.35 Marijuana Therapeutic Research , a program must be established , physcians interviewed and appointed to the Patient Qualification Review Committee and regulations must be adopted to assure this program is administered at a state level that is compatible with Federal Statutes.

All of above can not be accomlished in three meetings of two days each presently budgeted for the Board.

Competent, qualified and experienced personnel must be hired, and fast , to accomplish the mandate of the legislature.

With this in mind the Board as early as June 1981 , started setting up a proposed budget and establishing goals and objectives , even though no law was on the books at that time.

At two of its three meetings in 1982 , after the enactment of the legislation , but still prior to the effective date, the Board again established goals and an accompaning proposed budget . This fact may be verified by the minutes of all of the above cited meetings and the attached goals and objectives to those minutes.

Throughout the meetings, evidence of the Board's intent can be clearly identified . Never did the Board waver from it's intent to hire a " Executive- Secretary " type person to come on board in a full time position . Various budget figures were submitted in the range of $ 85,000.00 for the period January 1, 1983 through June 30 , 1983 (a half year) to fit the fiscal budget time frame from effective date of January 1 , 1983.

N A R R A T I V E : (continued)

The Board does not enjoy budget-bypass priveledges and must submit a budget through the Division of Occupational Licensing . It is the Boards understanding that this budget is then submitted through the Division of Commerce and Economic Developemnt and on to the House and Senate Budget Committees .

The Board DID submit a budget , both for the fiscal year 1983 and again for the half-fiscal year 1983(January 1,1983 through June 30 , 1983. The 1983-84 Fiscal year budget was submitted to the Division of Occupational Licensing also, and it is presently in the process.

With each budget request , a breakdown was also submitted. In every request there is an audit trail established in the minutes of meetings and in letters. The Board always included expenses for a position that was labeled various ways , but either was called " Executive-Secretary" or a combined position of "Executive-Secretary-Investigator-Examiner.

The Board realized that a regulation specialist would be needed to promulgate all of the regulations mandated by statute and budgeted for that position also . The Board also ralized that , although it has always been assigned an inspector , by the DOL , that a full time inspector would aslo be needed , in addition to sharing the one used in the past . This would then amount to an investigator and a half(the half one being shared with other boards) and the full time one being used in the extensive investigatory work anticipated in the drug enforcement area .

Somewhere,in the translation from Board minutes and vocal requests, made by the Board to the Director of Occupational Licensing , MUCH WAS LOST. The Board recently was made aware that line item budget items were requested OR AT LEAST GRANTED in the budget , TIED to specific personnel. This personnel is defined, according to the DOL for two regulation specialists and two investigators . These people are in addition to the regular licensing examiner that is assigned to each board and usualy shared by at least one other board. The regulation specialists and the two investigators were to be the people that would aid the Board in emplenting its work.

This will just NOT WORK. The Board needs an Executive-Secretary type person , comparable to those in the employee of other states , such as Washington, Oregon, and Wyoming, where state pharmacy boards have full responsibility for their states controlled substance statutes. The Board has in mind at least three people , two of which would be excellent ,and who have indicated a desire to come to Alaska . These people have been employed for at least five years as executive-secretaries, and also have investigate exeperience , and have been involved in the administration of both controlled substance legislation and marijuana research programs . Just the type of person with just the type of experience needed in the initial

N A R R A T I V E :(continued)

stage of the program in Alaska . Unfortunately ,no such position is specifically listed in the job classification program of the state, directly identified with the Pharmacy Board . Similiar positions do exist with the Board of Nursing and others, but not Pharmacy.

The Board of Pharmacy does not need, in the initial organization , two investigators . The Board does desperately need an experienced executive-secretary type, on a day-by-day basis to get the programs initiated and then properly administrated .

The Director of the Division of Occupational Licensing has agreed to submit the Boards desires as to changing the budget line item identification from two regulation specialists and two investigators to the personnel that could do the job , as long as the Board stays within the budgeted dollars. The Board has been informed that it has , budgeted dollars covering the four people mentioned above, in the amount of $ 75,000.00 for the period January 1, 1983 through June 30 , 1983 . The Board has asked the director of DOL to make the following request:

-Investigator/ Executive-Secretary-Inspector range of	$45,000.00/yr
Estimated 30 % of salary for office etc	13,500.00/yr
One full time regulation specialist	33,000.00/yr
Estimated 30% of salary for office	9,900.00/yr
Licensing Examiner(or secretary type)	28,000.00/yr
Estimated 30 % for office etc.	8,400.00/yr
TOTAL FOR ONE YEAR	$ 137.800.00/yr

This would break down to $ 68,900.00 for the remainder of fiscal year 1983(half year Jan 1 through June 30 , 1983) and well under the $75,000.00 budgeted . The figures above may be slightly off , but should be fairly close and definitely on the conservative side considering the licensing examiner budgeted above for full time Pharamcy Board work , when she would probably be used part time with another board.

The Director of The Division of Occupational Licensing has asked that the President of The Board Of Pharmacy write him a letter asking for his cooperation in requesting the change and in addition attempt to write a job experience qualification requirements and a job description for the position of Executive-Secretary-Investigator .

The letter has been written and will be sent to the Director along with this narrative and a conclusion statement. Copies of all material will also be sent to The Governor, The Commissioner of Commerce & Economic Developement, The Speaker of the House of Representatives, The President of the Alaska State Senate. all Board of Pharmacy Members, and Legislative Sunset Review Committee, and The Attorney General , and Dapartment of Law.

C O N C L U S I O N:

EXECUTIVE-SECRETARY-INVESTIGATOR FOR BOARD OF PHARMACY:

Qualifications:

1. Five years experience with another Board of Pharmacy, of which three years must be in the position of executive-secretary and the remainder in the position of investigator.

2. Experienced in administering controlled substance law of a state , under direction and supervision of a pharmacy board.

3. Experience in administering a marijuana therapeutic research program under the direction and supervision of a board of pharmacy.

4. Experience maintaining files and registration and licensing of pharmacists and controlled substance registratants at the direction and under the supervision of a board of pharmacy.

5. Be a registered pharmacist in a state recognized by the National Association of Boards of Pharmacy and be required to become registered as a pharmacist in the State of Alaska within six months of being hired as Executive-Secretary-Investigator by the State of Alaska.

JOB DESCRIPTION:

UNDER THE SUPERVISION AND AT THE DIRECTION OF THE BOARD OF PHARMACY AND UNDER THE MANDATES OF AS.08.01., CENTRALIZED licensing statute and AS 08.80 PHARMACY ACT.:

1. Assist Board in process of registration of all Drug enforcement registrants under the Federal Law under the AS 17.30 Alaska State Statute , including design of application form and license .

2. Maintain record of registration and licensure under AS 17.30 with such records properly maintained at the Division of Occupational Licensing .

3. INVESTIGATE violations of any state or federal law under the jurisdiction of the Board of Pharmacy and at the direction of the Board of Pharmacy and the Division of Occupational Licensing.

4. Aid Board in the administration of the Marijuana Therapeutic Research Program AS.17.35 , including maintaining records at the Division of Occupational Licensing , and aiding the Patient Qualification Review Committee in processing applicants under that program.

5. Cooperate with all state and federal law enforcement agencies at direction of Board of Pharmacy .

C O N C L U S I O N : (continued)

6. Follow direction of DOL in maintaining records, issueing licenses , receiving fees, and any other job requirements assigned to licensing examiners , including:

   (a) Collecting fees & issueing receipts;
   (b) Maintaining records and files ;
   (c) Issueing & receiving application forms;
   (d) Notifying applicants of acceptance or rejection of applicants as determined by Board;
   (e) At direction of DOL & Board, notifying applicants for any licensure under AS 08.80 or AS 17.30 of examination dates or license renewal dates.
   (f) Arrange space for holding examinations
   (g) Notify applicants of results of examinations;
   (h) Issue licenses & certificates or temporary licenses or certificates as authorized by Board
   (i) Answer routine inquires ;
   (j) Maintain a current registry of all licenses issued under AS 08.80 & AS 17.30
   (k) Perform other services as requested by board consistant with requirements of AS 08.80 & AS -7.30 & As 17.35.

7. Perform the following job description duties as mandated by and established by investigative proceedures of DOL & Board.

   (a) (b)(c) etc.....to be inserted by DOL & consistant with job description duties of INVESTIGATORS .

NOTE: It is the intent of the Board of Pharmacy that the above person be employed,under state employment laws , by the Division of Occupational Licensing . The Director would, in effect , be the person's boss , and would direct the duties and performance of the person, at the request and with direct input , from the Board of Pharmacy. The person would reside in the Anchorage area , working out of the Division of Occupational License office in Anchorage.

ADDENDUM:

The above job decription, narrative, and conclusion solves the problem temporarily., however the problem may ultimately have to be addressed by the legislature . The Board of Pharmacy in offering the solution , listed here, is attempting to carry out the wishes of the Legislature, so the important programs may be started at once and carried out to the best of the ability of all involved.

Bill No. House Bill 719

Date May 15, 1984

Title "An Act relating to the rights of contractors on public works projects."

Contact: Eileen Plate
465-2700

L AND H ENTERPRISES

Bob Bacolas
465-4870

This bill would protect a prime contractor on a public works project from being required to pay wage claims to a principal or owner/operator of a subcontractor whenever a dispute arises between the prime contractor and the subcontractor concerning the performance of work under the subcontract.

Under this bill, the Department of Labor would be required to undertake investigations of the subcontractor's performance, hold hearings, and issue determinations as to whether or not the subcontractor has "substantially failed to perform the subcontract." These types of contract performance disputes frequently involve complicated questions of law and facts which are normally by the courts, not by administrative agencies. The Department would have to make what is ultimately a legal determination as to performance under the subcontract, which would likely involve the Department in third party court litigation and would not be in the best interests of either the Department or the State of Alaska.

Moreover, as the attached fiscal note makes clear, the Department would be required to retain certain professional, consulting, and legal services in order to make the necessary determinations of contract performance.

While the Department is not opposed to the idea of withholding payment to owner/operators of subcontractors during litigation of contract performance disputes, we believe that there is a much less costly way of accomplishing this result. In cases where a contract dispute arises between a prime contractor and a subcontractor, the contracting agency administering the public works project would withhold accrued payments from the prime contract as provided in AS 36.05.070 and .090 but would not disburse any wage payments to owner/operators or persons with an ownership interest in that subcontractor until the contract performance dispute has been resolved. During the pendency of litigation, the contracting agency could be directed to hold those amounts in escrow and disburse only in accordance with an order of the court or by stipulation of the parties.

Specifically, the Department recommends that in Section 1 of House Bill 719, the added language on line 15 be deleted. In Section 2 of the bill, proposed AS 35.05.095 should read as follows:

> CONTRACTORS AND SUBCONTRACTORS. (a) A contractor may inform the Department of Labor that a contract dispute exists with respect to the performance of a subcontractor and that a court action has been filed concerning such dispute Within ten days of receiving such notification, the department shall verify this information and transmit it to the contracting agency administering the public works project.

POSITION PAPER/Department of Labor

(b) Upon receipt of notification from the Department of Labor that a court action has been filed with respect to the performance of a subcontractor on a public works project, the contracting agency shall withhold but may not disburse any accrued payments from the public construction contract to pay wages to any person having an ownership interest in the subcontractor until directed to do so by court order or by stipulation of the parties.

(c) The Department of Labor may not exercise any of its statutory remedies under AS 36.05.010-110 against a contractor because of that contractor's failure to make payment to any person having an ownership interest in a subcontractor until such time as the contract performance dispute between the contractor and subcontractor has been resolved by court order or by stipulation of the parties.

A fiscal note is attached.

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HB 719
TITLE: "An Act relating to rights of contractors on public works projects."
AGENCY AFFECTED: Department of Labor
Page 2

Under this bill the Department of Labor would be required to conduct complex investigations, issue formal determinations, and hold hearings in certain instances upon the request of a prime contractor. A request may occur when a wage claim is filed against the prime contractor by a subcontractor when litigation is pending between the parties arising out of a dispute concerning quality of work, or specific performance under the sub-contract.

The Wage and Hour Administration routinely handles about 20 enforcement actions each year that involve owners/operators who perform on public works projects as laborers, mechanics, or field surveyors. This fiscal note assumes that fifty percent of these actions will involve disputes between the prime contractor and subcontractor. In order to meet the investigation requirements of this bill, the cost associated with staffing full-time professionals, who have the required expertise to evaluate performance, would be prohibitive. Therefore, such activity would be handled through professional service contracts on an as-needed basis. Under this plan, the following assumptions can be made.

1. Contract attorney to handle the legal needs of the program ($140 per hour).

2. Professional consultant fees associated with investigating, determining, and issuing reports ($250 per hour).

3. A part-time Clerk Typist III in the Wage and Hour Administration to provide the required clerical support for the Department's involvement in the program.

We approximate it will take 16 hours per complaint for a private consultant to investigate, make a determination, and issue a report; and 16 hours per complaint by a contract attorney for legal involvement.

Based on these assumptions, the following formulas were used to compute the Fiscal Year 1985 costs to operate the program.

Consultant Fees:	10 investigations x 16 hours x $250 per hour =	$ 40.0
Attorney Fees:	10 investigations x 16 hours x $140 per hour =	$ 22.4
Miscellaneous other routine contractual services would include reporting and recording services		$ 7.5

Costs associated with the Clerk Typist III are shown on the attached Form 13. Of these costs, only the equipment costs of $2.5 would be one-time items.

DEPARTMENT OF LABOR
OFFICE OF THE COMMISSIONER

RECEIVED
MAY 2 1984
OFFICE OF THE COMMISSIONER

BRIEFING PAPER ON L & H ENTERPRISES

L & H ENTERPRISES IS THE PRIME CONTRACTOR ON THE ANCHORAGE SERVICE-HANSHEW SPORTS COMPLEX IN ANCHORAGE. GROUND UP CONSTRUCTION WAS UNDER SUBCONTRACT TO L & H ENTERPRISES FOR EXCAVATION AND INSTALLATION OF WATER AND SEWER LINES.

GROUND UP FAILED TO PAY WAGES FOR THE WORK PERFORMED ON THE PROJECT. AT LEAST FOUR PEOPLE PERFORMED WORK FOR GROUND UP ON THE PROJECT. THEY ARE:

GARY STERBA -LABORER- OWNER OF GROUND UP CONSTRUCTION

DENNIS THOMAS -LABORER & OPERATOR- REPUTED BY L & H TO BE CO-OWNER OF GROUND UP

ANDY STERBA -OPERATOR & LABORER- GARY STERBA'S BROTHER

ED GUTOWSKY-TRUCK DRIVER & LABORER

L & H HAS WITHHELD ALL PAYMENTS TO GROUND UP CONSTRUCTION FOR THIS PROJECT DUE TO A DISPUTE OVER THE QUALITY/QUANTITY OF WORK PERFORMED. IN FEBRUARY 1984, GROUND UP CONSTRUCTION FILED A CHAPTER 7 BANKRUPTCY. THE DEPARTMENT AUDITED AVAILABLE TIME RECORDS AND HAS REQUESTED THAT THE CONTRACTING AGENCY WITHHOLD $17,639.54 WHICH REPRESENTS THE WAGES DUE FOR LABOR PERFORMED ON THIS PROJECT BY THE FOUR MEN LISTED ABOVE. THE AMOUNT TO BE WITHHELD WAS DETERMINED FROM AN AUDIT OF CERTIFIED PAYROLL RECORDS SUBMITTED TO THE DEPARTMENT ON DECEMBER 20, 1983 AND AUTHENTICATED BY A SWORN STATEMENT FROM GARY STERBA, THE OWNER OF GROUND UP CONSTRUCTION. WITHHOLDING WAS REQUESTED IN ACCORDANCE WITH AS 36.05.070(c).

COUNSEL FOR L & H ENTERPRISES HAS OBJECTED TO: THE HOURS SUBMITTED BY GROUND UP; THE DEPARTMENT SEEKING COLLECTION OF WAGES FOR COMPANY OWNERS OR REPUTED OWNERS; THE DEPARTMENT SEEKING COLLECTION FROM THE CONTRACTING AGENCY.

THE DEPARTMENT IS FOLLOWING ESTABLISHED PROCEDURES IN PURSUING THIS MATTER. THE CONTRACTOR/EMPLOYER IS IN BANKRUPTCY AND THE DEPARTMENT HAS NO ALTERNATIVE IN TITLE

36.05 ENFORCEMENT ACTIONS BUT TO SEEK FINAL PAYMENT OF WAGE DISCREPANCIES FROM THE CONTRACTING AGENCY. THE FACT THAT SOME OF THE LABOR WAS PERFORMED BY AN OWNER OF THE COMPANY DOES NOT NEGATE OUR OBLIGATION TO INSURE THAT ALL LABOR IS COMPENSATED FOR AT PREVAILING RATES. THIS MIRRORS FEDERAL POLICY FOR DAVIS-BACON ENFORCEMENT. THE ISSUE AS TO ACTUAL HOURS WORKED HAS YET TO BE RESOLVED.

AN INFORMAL CONFERENCE WAS HELD IN ANCHORAGE ON APRIL 26. L & H AND GROUND UP CONSTRUCTION WERE REPRESENTED. NO RESOLUTION COULD BE REACHED SO THE MATTER WILL BE SET FOR HEARING TO DETERMINE THE NUMBER OF HOURS WORKED AND THE AMOUNT OF WAGES DUE TO BE PAID BY THE CONTRACTING AGENCY IN ACCORDANCE WITH AS 36.05.090(a).

MAY 16, 1984

TO: JOHN

FROM: KEN

RE: HB 719 RELATING RIGHTS OF CONTRACTORS

THE PURPOSE OF THIS BILL IS TO PROTECT PRIME CONTRACTORS ON PUBLIC WORKS JOBS FROM PAYING WAGE CLAIMS TO A SUBCONTRACTOR WHEN A DISPUTE ARISES OVER THE PERFORMANCE OF THE WORK BY THE SUBCONTRACTOR. IT IS PRESENTLY THE DEPARTMENT OF LABORS POLICY TO HAVE THE CONTRACTING AGENCY WITH HOLD AND SOMETIMES DISBURSE FUNDS EARMARKED FOR THE PRIME CONTRACTOR WHEN WAGE CLAIMS ARE MADE AGAINST THAT CONTRACTOR. THE MAIN INTENT OF THIS BILL IS TO PREVENT THE OWNER OF [illegible] OF A SUBCONTRACTING FIRM FROM COLLECTING ON A WA[illegible]LAIM UNTIL ALL LITIGATION OVER THE PERFORMANCE OF THAT SUBCONTRACTOR HAS BEEN RESOLVED.

Bill No. House Bill 719

Date May 15, 1984

Title "An Act relating to the rights of contractors on public works projects."

Contact: Eileen Plate
465-2700

Bob Bacolas
465-4870

This bill would protect a prime contractor on a public works project from being required to pay wage claims to a principal or owner/operator of a subcontractor whenever a dispute arises between the prime contractor and the subcontractor concerning the performance of work under the subcontract.

Under this bill, the Department of Labor would be required to undertake investigations of the subcontractor's performance, hold hearings, and issue determinations as to whether or not the subcontractor has "substantially failed to perform the subcontract." These types of contract performance disputes frequently involve complicated questions of law and facts which are normally by the courts, not by administrative agencies. The Department would have to make what is ultimately a legal determination as to performance under the subcontract, which would likely involve the Department in third party court litigation and would not be in the best interests of either the Department or the State of Alaska.

Moreover, as the attached fiscal note makes clear, the Department would be required to retain certain professional, consulting, and legal services in order to make the necessary determinations of contract performance.

While the Department is not opposed to the idea of withholding payment to owner/operators of subcontractors during litigation of contract performance disputes, we believe that there is a much less costly way of accomplishing this result. In cases where a contract dispute arises between a prime contractor and a subcontractor, the contracting agency administering the public works project would withhold accrued payments from the prime contract as provided in AS 36.05.070 and .090 but would not disburse any wage payments to owner/operators or persons with an ownership interest in that subcontractor until the contract performance dispute has been resolved. During the pendency of litigation, the contracting agency could be directed to hold those amounts in escrow and disburse only in accordance with an order of the court or by stipulation of the parties.

Specifically, the Department recommends that in Section 1 of House Bill 719, the added language on line 15 be deleted. In Section 2 of the bill, proposed AS 35.05.095 should read as follows:

> CONTRACTORS AND SUBCONTRACTORS. (a) A contractor may inform the Department of Labor that a contract dispute exists with respect to the performance of a subcontractor and that a court action has been filed concerning such dispute. Within ten days of receiving such notification, the department shall verify this information and transmit it to the contracting agency administering the public works project.

POSITION PAPER/Department of Labor

(b) Upon receipt of notification from the Department of Labor that a court action has been filed with respect to the performance of a subcontractor on a public works project, the contracting agency shall withhold but may not disburse any accrued payments from the public construction contract to pay wages to any person having an ownership interest in the subcontractor until directed to do so by court order or by stipulation of the parties.

(c) The Department of Labor may not exercise any of its statutory remedies under AS 36.05.010-110 against a contractor because of that contractor's failure to make payment to any person having an ownership interest in a subcontractor until such time as the contract performance dispute between the contractor and subcontractor has been resolved by court order or by stipulation of the parties.

A fiscal note is attached.

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HB 719
TITLE: "An Act relating to rights of contractors on public works projects."
AGENCY AFFECTED: Department of Labor
Page 2

Under this bill the Department of Labor would be required to conduct complex investigations, issue formal determinations, and hold hearings in certain instances upon the request of a prime contractor. A request may occur when a wage claim is filed against the prime contractor by a subcontractor when litigation is pending between the parties arising out of a dispute concerning quality of work, or specific performance under the sub-contract.

The Wage and Hour Administration routinely handles about 20 enforcement actions each year that involve owners/operators who perform on public works projects as laborers, mechanics, or field surveyors. This fiscal note assumes that fifty percent of these actions will involve disputes between the prime contractor and subcontractor. In order to meet the investigation requirements of this bill, the cost associated with staffing full-time professionals, who have the required expertise to evaluate performance, would be prohibitive. Therefore, such activity would be handled through professional service contracts on an as-needed basis. Under this plan, the following assumptions can be made.

1. Contract attorney to handle the legal needs of the program ($140 per hour).

2. Professional consultant fees associated with investigating, determining, and issuing reports ($250 per hour).

3. A part-time Clerk Typist III in the Wage and Hour Administration to provide the required clerical support for the Department's involvement in the program.

We approximate it will take 16 hours per complaint for a private consultant to investigate, make a determination, and issue a report; and 16 hours per complaint by a contract attorney for legal involvement.

Based on these assumptions, the following formulas were used to compute the Fiscal Year 1985 costs to operate the program.

Consultant Fees:	10 investigations x 16 hours x $250 per hour =	$ 40.0
Attorney Fees:	10 investigations x 16 hours x $140 per hour =	$ 22.4
Miscellaneous other routine contractual services would include reporting and recording services		$ 7.5

Costs associated with the Clerk Typist III are shown on the attached Form 13. Of these costs, only the equipment costs of $2.5 would be one-time items.

DEPARTMENT OF LABOR
OFFICE OF THE COMMISSIONER

BRIEFING PAPER ON L & H ENTERPRISES

L & H ENTERPRISES IS THE PRIME CONTRACTOR ON THE ANCHORAGE SERVICE-HANSHEW SPORTS COMPLEX IN ANCHORAGE. GROUND UP CONSTRUCTION WAS UNDER SUBCONTRACT TO L & H ENTERPRISES FOR EXCAVATION AND INSTALLATION OF WATER AND SEWER LINES.

GROUND UP FAILED TO PAY WAGES FOR THE WORK PERFORMED ON THE PROJECT. AT LEAST FOUR PEOPLE PERFORMED WORK FOR GROUND UP ON THE PROJECT. THEY ARE:

GARY STERBA -LABORER- OWNER OF GROUND UP CONSTRUCTION

DENNIS THOMAS -LABORER & OPERATOR- REPUTED BY L & H TO BE CO-OWNER OF GROUND UP

ANDY STERBA -OPERATOR & LABORER- GARY STERBA'S BROTHER

ED GUTOWSKY-TRUCK DRIVER & LABORER

L & H HAS WITHHELD ALL PAYMENTS TO GROUND UP CONSTRUCTION FOR THIS PROJECT DUE TO A DISPUTE OVER THE QUALITY/QUANTITY OF WORK PERFORMED. IN FEBRUARY 1984, GROUND UP CONSTRUCTION FILED A CHAPTER 7 BANKRUPTCY. THE DEPARTMENT AUDITED AVAILABLE TIME RECORDS AND HAS REQUESTED THAT THE CONTRACTING AGENCY WITHHOLD $17,639.54 WHICH REPRESENTS THE WAGES DUE FOR LABOR PERFORMED ON THIS PROJECT BY THE FOUR MEN LISTED ABOVE. THE AMOUNT TO BE WITHHELD WAS DETERMINED FROM AN AUDIT OF CERTIFIED PAYROLL RECORDS SUBMITTED TO THE DEPARTMENT ON DECEMBER 20, 1982 AND AUTHENTICATED BY A SWORN STATEMENT FROM GARY STERBA, THE OWNER OF GROUND UP CONSTRUCTION. WITHHOLDING WAS REQUESTED IN ACCORDANCE WITH AS 36.05.070(c).

COUNSEL FOR L & H ENTERPRISES HAS OBJECTED TO: THE HOURS SUBMITTED BY GROUND UP; THE DEPARTMENT SEEKING COLLECTION OF WAGES FOR COMPANY OWNERS OR REPUTED OWNERS; THE DEPARTMENT SEEKING COLLECTION FROM THE CONTRACTING AGENCY.

THE DEPARTMENT IS FOLLOWING ESTABLISHED PROCEDURES IN PURSUING THIS MATTER. THE CONTRACTOR/EMPLOYER IS IN BANKRUPTCY AND THE DEPARTMENT HAS NO ALTERNATIVE IN TITLE

36.05 ENFORCEMENT ACTIONS BUT TO SEEK FINAL PAYMENT OF WAGE DISCREPANCIES FROM THE CONTRACTING AGENCY. THE FACT THAT SOME OF THE LABOR WAS PERFORMED BY AN OWNER OF THE COMPANY DOES NOT NEGATE OUR OBLIGATION TO INSURE THAT ALL LABOR IS COMPENSATED FOR AT PREVAILING RATES. THIS MIRRORS FEDERAL POLICY FOR DAVIS-BACON ENFORCEMENT. THE ISSUE AS TO ACTUAL HOURS WORKED HAS YET TO BE RESOLVED.

AN INFORMAL CONFERENCE WAS HELD IN ANCHORAGE ON APRIL 26. L & H AND GROUND UP CONSTRUCTION WERE REPRESENTED. NO RESOLUTION COULD BE REACHED SO THE MATTER WILL BE SET FOR HEARING TO DETERMINE THE NUMBER OF HOURS WORKED AND THE AMOUNT OF WAGES DUE TO BE PAID BY THE CONTRACTING AGENCY IN ACCORDANCE WITH AS 36.05.090(a).

March 28, 1984

Joe L. Hayes
Speaker of the House of Representatives
Pouch WO (Mail Stop 3100)
Juneau, AK 99811

Dear Speaker Hayes:

Enclosed is a copy of a request for investigation I have sent to Mr. Chenoweth, the State Ombudsman, pertaining to an investigation being performed by the Wage & Hour Administration, Labor Standards & Safety Division of the Department of Labor.

After you have had a chance to read the contents of my letter to Mr. Chenoweth, which sets forth the issues involved, perhaps it would be useful for you and other members of the legislature to address the impact of the interpretation that is being placed on the regulations and the enabling statute as to who the beneficiaries of the law are. Mr. Silverthorn, the investigator assigned, takes the position that the statute in question pertains to payment of wages to all personnel who provide work on a construction project for the State of Alaska or one of its political subdivisions, even if some of those people are the owners of the contractor who undertook to perform the services by contract. In the instant case, the subcontract between L & H Enterprises, Inc. and Ground Up Construction, a partnership owned by Gary Sterba and Dennis Thomas, was for $14,550. Due to the failure of Ground Up to properly perform the work, and the requirement that L & H had to make good that portion of the work, as part of its duties as general contractor, L & H had back charges for almost the full amount of the contract.

Nevertheless, Mr. Sterba and Mr. Thomas have made wage claims of approximately $11,000, in addition to wage claims by two other men they claim worked for them on the project amounting to a little over $6,000. Based on Mr. Silverthorn's "investigation," the school district has been ordered to withhold the full $17,639.54, including almost $11,000 for Sterba and Thomas, from

General Contractors/Design Build Services
P.O. Box 111593/Anchorage, Alaska 99511/Phone: (907) 349-2559

authorized builder atlantic

L & H Enterprises, Inc., since Ground Up Construction did not pay any wages to any of the personnel involved in the project.

You will note from our report to Mr. Chenoweth the criticisms we have of the methods of investigation that are being employed by this division of the State of Alaska. However, even more distressing, and the subject that I would appreciate the legislature addressing itself to, is the impact of this kind of enforcement practice on contracting on public works projects in the State of Alaska.

If Mr. Silverthorn is right in his interpretation, anytime a subcontractor fails to perform on a public works projects, the owners of the subcontractor can essentially get back all or even more than what they expected to make from the project through wage claims, breach their contract and fail to perform, cause their upstream contractor to expend substantial sums of money to complete the work that subcontractor has undertaken to perform, and, in addition, have to pay out of its pocket so-called "wages" of the owners of the subcontractor that defaulted. If that in fact is the law of the State of Alaska, I suspect the state and its political subdivisions are going to find it increasingly difficult to obtain reasonable bids from contractors to perform their projects.

Your inquiry into this matter would be very much appreciated. If Mr. Silverthorn is incorrectly interpreting the law, perhaps he should be set straight. If he is correctly interpreting it, obviously the legislature needs to take some corrective action. Thank you for your assistance.

Very truly your,

Len Hannaman, President
L & H Enterprises, Inc.

March 28, 1984

Jack Chenoweth
Ombudsman
State of Alaska
Pouch WO (Mail Stop: 3000)
Juneau, AK 99811

Re: Department of Labor Wage & Hours v. L & H Enterprises

Dear Mr. Chenoweth:

Bruce Silverthorn, investigator for the Wage & Hour Administration, Labor Standards and Safety Division of the Department of Labor in Anchorage has initiated a proceeding which has resulted in the Anchorage School District withholding the sum of $17,639.54 from my company, L & H Enterprises, Inc., in connection with work we are performing on the Anchorage Service-Hanshew Sports Complex, PWA 1183-025.

Because of the process that Mr. Silverthorn is employing, and some of the rationale he is proceeding under, I hereby request that you investigate this matter. On or about November 18, 1982, L & H Enterprises, Inc., as general contractor, contracted with the Municipality of Anchorage School District for the turnkey construction of the Service-Hanshew Sports Complex. On May 24, 1983, L & H subcontracted with Ground Up Construction for certain excavation work, installation of water lines, backfilling, compacting, testing and inspection, for a total subcontract price of $14,550. The subcontract was signed by Dennis Thomas, reflecting that he was "co-owner" of Ground Up Construction. This subcontract was signed on June 3, 1983.

In the course of performance by Ground Up Construction, Ground Up damaged underground utility lines and existing concrete curbing, improperly compacted and filled in trenches, and otherwise failed properly to perform under its subcontract. As a result, L & H back charged Ground Up Construction the sum of $12,290.20 to correct and complete Ground Up's work.

General Contractors/Design Build Services
P.O. Box 111593/Anchorage, Alaska 99511/Phone: (907) 349-2559

At the time that Mr. Silverthorn began investigating the matter, and notified L & H of his investigation, due to the size of the back charge, and the fact that L & H had not yet been paid by the municipality for a portion of the work covered by the Ground Up subcontract, L & H had not disbursed any payment to Ground Up under the subcontract.

In late November, Mr. Silverthorn was in touch with L & H to advise that he was conducting an investigation into a claim for unpaid wages being asserted by Mr. Thomas, Gary Sterba, the other owner of Ground Up Construction, Ed Grakovsky and Andy Sterba, a relative of Gary Sterba.

Although required by law to provide timely certified payrolls sworn under oath in connection with the project in question, Ground Up Construction failed to do so. However, at some point about the commencement of Mr. Silverthorn's investigation, Ground Up did submit a breakdown indicating when each of the four men in question worked on the project in question, the amount they were entitled to per hour and the amount of hours they put in, including overtime.

Mr. Silverthorn sent this document to L & H Enterprises, and requested that we evaluate it. Our superintendent on the project, Junior Russell, did compare the "payroll" documents submitted by Ground Up, and provided an affidavit dated December 16, 1983, a copy of which was sent to Mr. Silverthorn. In the affidavit, Mr. Russell points out that there were many glaring errors in the job log and time sheets submitted to the department by Ground Up. For example, those records claimed eight days of employment for a truck driver, when in fact a truck was only used on a maximum of four different days, for not more than one-half day each, for a total of two full days. Furthermore, the time sheets turned in by Ground Up in no way matched L & H's job log.

Mr. Russell also pointed out that Ground Up entered a separate contract with the school district to perform some repairs to a broken pipe, which was not part of the subcontract with L & H, and which might have accounted for a portion of the time claimed by Ground Up employees in connection with the Service-Hanshew project. Of course, that was not the responsibility of L & H.

Finally, he pointed out that Andy Sterba was never on the job, notwithstanding the indication of the time sheets provided by

Ground Up. Futhermore, he pointed out that Ed Grakowsky and Gary Sterba both were listed as operators of equipment on the same day, and were claiming eight hours a piece, or a combination of 16 hours as operators on the same piece of equipment on the same day. They only had one backhoe, and between them, during a straight time day, could not have gotten in more than an aggregate of eight hours.

These and other substantial discrepancies were promptly made known to Mr. Silverthorn.

Nevertheless, based upon the time sheets submitted by Ground Up Construction, on December 22, 1983, Jeane Morgan, Mr. Silverthorn's supervising investigator, sent a letter to the school district instructing the school district, pursuant to A.S. 36.05.070(c) to withhold $13,129 from L & H Enterprises' contract. Thereafter, in February 1984, Mr. Silverthorn received a new "certified payroll" provided by Gary Sterba of Ground Up Construction. Mr. Sterba apparently informed him that the first report was erroneous, but the second report, after considering Mr. Russell's affidavit, was more accurate. A copy of that was sent to L & H Enterprises. That so-called "certified payroll" was not certified, was not presented under oath, nor was it signed by Mr. Sterba or anyone else. It radically departed from the earlier "certified payroll" that Ground Up had submitted to the Department of Labor, and as a result of it, Ms. Morgan sent a new letter to the school district on January 31, 1984 instructing the school district to withhold an even larger sum, $17,639.54, from L & H's contract.

My attorney, Stephen S. DeLisio, on February 21, 1984, spoke with Mr. Silverthorn about the document we had now been provided as the latest "certified payroll" of Ground Up Construction. Mr. Silverthorn advised Mr. DeLisio that it was neither signed nor sworn to by Mr. Sterba or anyone else, since, by signing it, they would be representing that the wages had been paid, when the wages had not been paid. Apparently no wages whatever were paid to any of the four men in question, including the two owners, Gary Sterba and Dennis Thomas. Mr. DeLisio then requested Mr. Silverthorn to obtain an affidavit from someone at Ground Up Construction to the effect that the information contained in the most recent documents submitted by Ground Up was accurate. Mr. Silverthorn indicated that he should be able easily to do so.

However, a month elapsed after that conversation, before we were provided such affidavit or further documentation from Mr. Silverthorn or anyone else. It finally arrived March 22, 1984, and a copy is enclosed.

Mr. Silverthorn asked L & H to make an analysis of the second payroll document from Ground Up, but we advised him that Junior Russell, the superintendent who would have to do the analysis, was traveling in the Lower 48 States, and was not expected back until approximately May. We do not have contact with Mr. Russell during the winter months, when he is off duty, and, although we have made attempts to locate him, we have not yet done so. Accordingly we have not been able to further analyze Ground Up's most recent reconstruction of the time its personnel allegedly worked on the project except as previously done by Junior Russell. Of course, Mr. Russell's critique was then into account by Ground Up in reworking its analysis.

Although the regulations under which Mr. Silverthorn is operating entitle L & H Enterprises to a full hearing, and an opportunity to examine the evidence supporting the Wage & Hour's instructions to the school district to withhold funds from L & H, and although L & H has requested an opportunity for such a hearing, none has yet been made available, although the matter has been under investigation now for more than four months, and a substantial sum of money has been withheld from L & H by the school district for more than three months.

Furthermore, and even more incredibly, Mr. Silverthorn takes the position that the two owners of the company, Gary Sterba and Dennis Thomas, are entitled to be paid their wages by L & H Enterprises, due to the failure of Ground Up Construction to do so, just as any of the employees of that company might be entitled under the law. Of the $17,639.54 being withheld from L & H Enterprises by the school district, on instructions of the Department of Labor, $10,618.16 is withheld on behalf of Gary Sterba and Dennis Thomas.

Under this arrangement, although Mr. Thomas and Mr. Sterba, as owners of the Ground Up Construction Company proprietorship, breached their contract with L & H Enterprises, entitling L & H to back charge almost the full amount of the contract price originally negotiated between the parties, these men will be able to take a sum of money representing almost three-quarters of

their contract price in the form of wage claims from L & H Enterprises, if Mr. Silverthorn has his way. This notwithstanding Ground Up's breach of contract and the back charge that almost equals the full amount of the contract price, due to that breach. Mr. Silverthorn is operating on the premise that his Division's function is to recover wages for owners of subcontractors who perform work on the job themselves, notwithstanding their failure to perform the project correctly, timely or economically.

He also makes the rather unusual argument that, because Dennis Thomas now claims he was not an owner of Ground Up Construction for the purpose of this project, Thomas should not be treated as as owner, in any event, but just as another employee. This notwithstanding the fact that he has verified that Mr. Thomas signed the subcontract in question and identified himself on that contract, when he signed it, as well as otherwise during the course of the project to L & H Enterprises personnel, as a co-owner of Ground Up Construction.

I am deeply alarmed at the rather bizarre direction that this wage claim investigation has taken by Mr. Silverthorn and the Department of Labor. I do not feel that L & H has been dealt with fairly or reasonably in the matter. Mr. Silverthorn has compelled the school district to withhold very substantial sums of money from my company, based upon information which was suspect to say the least in the first instance and has been even more suspect when the first presentation was so substantially impeached by Mr. Russell's analysis, that a second presentation had to be made by Ground Up. Until March 20, 1984, none of these documents from Ground Up have ever been signed or submitted under oath, so that there could be recourse against the persons responsible for preparing them if one could eventually prove that the documents were false, and that the authors were misrepresenting the facts. Nonetheless, Mr. Silverthorn has proceeded on this documentation as if the information was Holy Writ.

Furthermore, Mr. Silverthorn's attempt to collect wages for owners of the company is grossly inappropriate. Our attorney has urged him to consult with the Attorney General's office in this regard, and although he says he has, he has never shown anything to our attorney that would indicate that such a consultation has been had or that the Department of Law was fully apprised of the

issues in question. If the Department of Labor is going to pursue a policy to pay wages to owners of subcontractors who failed to fulfill their contract obligations on public projects, the whole underpinning of the free enterprise system in Alaska will be jeopardized, particularly as they regard public works. How can any responsible contractor afford to involve himself with a public contract in Alaska, governed by these Alaska statutes, where he may be compelled to pay the bulk if not all of the contract price to a defaulting subcontractor through that subcontractor's personal wage claims?

As I understand the law that Mr. Silverthorn is attempting to enforce, it is aimed at seeing to it that wages of hired employees on public works' projects are paid by someone - if not by the employer, then by one of the upper tier contractors from the public funds on the project. However, Mr. Silverthorn attempts to carry the matter one step further and withhold funds from us of which approximately two-third are for the benefit of the owners of the defaulting contractor.

Furthermore, although our attorney has inquired of Mr. Silverthorn regarding his intent to prosecute Ground Up for its obvious violations of the law requiring it to file certified payrolls on a timely basis and to pay its employees as required by law, Mr. Silverthorn has indicated that his only purpose in the investigation is to extract funds with which to pay the four men involved, including the two owners. This seems to me a severe lapse on the part of the Department of Labor in pursuing and prosecuting obvious wrongdoers under the law. Essentially what the department is attempting to do is to shift to L & H Enterprises, Inc., a blameless general contractor, the financial burden of a defaulting subcontractor for payment not only of wages, but also loss profits, etc.

I would very much appreciate it if you would look into the matter, and advise me of your conclusions. I am enclosing herewith copies of documents that may be of help to you in your investigation, including the two sets of time records received from Ground Up Construction by the Department of Labor, a copy of Junior Russell's affidavit regarding the first set, Ms. Morgan's letters to the school district of December 22, 1983 and January 31, 1984, and my attorney's letters to Mr. Silverthorn dated December 22, 1983, February 6, 1984 and March 20, 1984.

Also enclosed is a copy of Mr. Silverthorn's letter to L & H Enterprises of January 31, 1984.

If we can provide you with any further information in regard to this matter, we will be happy to do so.

Very truly yours,

Len Hannaman, President

Gentlemen,

This letter is to inform you that as of this date, L & H Enterprises has not received a copy of your certified payroll records for the Service Hanshew Sports Complex project.

Furthermore, our accounting office has checked with the Alaska Department of Labor and they too, have not received the required reports.

Unless this information is forwarded in its entirety to L & H Enterprises' accounting department by the completion of your scope of this project, we will be forced to withhold all payments for this work, pending to audit by the Department of Labor.

You immediate cooperation on this matter is necessary.

Sincerely,

L & H ENTERPRISES, INC.

Ground Up Construction
707 N Bunn
Anchorage, AK 99508

Gentlemen:

In response to your recent phone calls, we at L & H Enterprises have enclosed a summary of all backcharges against your company herein.

Since our last meeting, there has been a significant increase in the charges due to corrective measures taken, to repair the problems created by your original work.

Your performance on this job was entirely inadequate, and caused us time and monetary losses far in excess of that documented herein. Furthermore the legal jeaporcy that you placed L & H Enterprises in with your non - OSHA approved trenching practices is unexcusable.

In addition we at L & H Enterprises have had a lien placed on your contract by Tope Equipment for a sum of $22,423.84 and any left over funds from your contract with us must be turned over to Tope Equipment immediately. Please note copy of lien enclosed.

Furthermore, our bookkeeper, Judy Zundel, has had a conversation with the Alaska Department of Labor regarding your claim against L & H Enterprises, Inc. for employee wages. She was told that your claim was invalid since the claimants were both co-owners of Ground Up Construction. That includes Mr. Denny Thomas who represented himself as a co-owner at the time he signed the contract.

In summation I will comment that in my entire construction career I have never had a subcontractor perform as badly, and with as little concern for the overall project as your firm so did.

Please direct any future communication in the form of typewritten letter to the attention of Mr. Len Hannaman.

Sincerely,

L & H ENTERPRISES, INC.

Gentlemen:

Attached you will find a copy of our subcontract with Ground-Up Construction, where you will see that Denny Thomas represented himself to us a Co-owner of his company.

Secondly, I have enclosed a memorandum from Bob Kirkman, our project manager for the job, showing some of the problems which were caused by Ground-Up Construction.

If you need further information, do not hesitate to contact me.

Sincerely,

L & H ENTERPRISES, INC.

Re: Service Hanshew Sports Complex Ground Up Construction

I advise that all payments to Ground Up Construction be withheld pending back-charges incurred in the following areas:

1. Damage to underground utility lines
2. Damage to existing concrete curbing
3. Improper compaction and non-spec fill material in trenches
4. Charges for plumbing equipment and accessories purchased on L & H Enterprises account
5. Additional supervision, labor and management charges

The above mentioned items, along with any additional back charges, are currently being itemized for an accurate accounting.

In addition, serious consideration should be given to the project delays incurred through Ground Up's mismanagement of their scope of the work, and the resulting dollar impact suffered by L & H Enterprises therein.

Robert E. Kirkman
Project Manager

ENTERPRISES INC.

SUBCONTRACT

THIS SUBCONTRACT, made and entered into as of this 24 day of May, 1983, by and between

L & H Enterprises, Inc.

whose mail address is

P.O. Box 111593
Anchorage, AK 99511

hereinafter called "Contractor", and

Ground Up Construction

hereinafter called "Subcontractor", whose mail address is

630 Western Drive
Anchorage, AK 99501

WITNESSETH

WHEREAS, Contractor entered, or is about to enter into a contract, Numbered C-20397, and dated November 18, 1983, with

Municipality of Anchorage

hereinafter called "Owner", for the performance of certain work according to the terms and conditions of said contract and the general specifications and supplements to the specifications, addenda, general and special provisions and conditions, plans, drawings, bid schedule, maps and other documents made a part thereof, and all change orders or amendments thereto, all of which are herein collectively referred to as the "General Contract", said work under the General Contract being generally described as follows:

Turnkey construction of the Service Hanshew Sports Complex.

Atlantic

and,

WHEREAS, the parties are desirous of entering into a subcontract whereby Subcontractor shall undertake the performance of a part of the work to be done under the General Contract, on the terms and conditions herein stated;

NOW, THEREFORE, the parties hereto, in consideration of the mutual promises and conditions herein contained, do hereby agree, one with the other, as follow:

I WORK TO BE PERFORMED

The subcontractor agrees to furnish all materials, labor, tools, equipment, supervision, supplies, and other things, unless otherwise provided herein, necessary or required to perform, and to perform fully and completely, at the price or prices set out herein, all that portion of the work required to be done by Contractor under the General Contract described as follows:

Item No.	Estimated Quantity	Item Description	Unit Price	Total
1	As General Spec-	Cut asphalt, remove from job		
2	ifications and	Excavate		
3	prints for Ser-	Install 2" water line		
4	vice Hanshew	Install 4" water line		
5	Sports Complex	Backfill		
6		Compaction		
7		All testing as required		
8		All inspections as required		$14,300.00

9- TAP SEWER LINE ——— 250.00
10 Homes

It is understood and agreed that quantities shown above are quantities estimated to be required under the General Contract and that the actual quantities shall be in such amounts as may eventually be required and determined under the General Contract or under the General Conditions of this Subcontract.

II PAYMENTS

In consideration of the promises, covenants and agreements of Subcontractor herein contained, and the full, faithful and prompt performance of this Subcontract by Subcontractor, Contractor agrees to pay and Subcontractor agrees to receive and accept as full compensation for doing all work and furnishing all materials, supplies and equipment contemplated and embraced herein and for well and faithfully completing the work aforesaid and the whole thereof in the manner and according to the requirements of this Subcontract, the General Contract, the Owner and the Contractor, the sum of Fourteen thousand three hundred and no/100. ($14,300.00) subject to additions and deductions, if any, by reason of variance from estimated quantities, change orders, deletions or extra work orders pertaining to the Subcontract items.

III SPECIAL CONDITIONS

The Special Conditions, consisting of Paragraphs through attached hereto are a part of this Subcontract and by this reference are incorporated herein and made a part hereof as fully as though set forth herein.

IV GENERAL CONDITIONS

The General Conditions, consisting of Paragraphs 1 through 27, attached hereto are a part of this Subcontract and by this reference are incorporated in this Subcontract and made a part hereof as fully as though set forth herein.

V SUPPLEMENTS

The Supplements, consisting of Numbers _____, attached hereto are a part of this Subcontract and by this reference are incorporated in this Subcontract and made a part hereof as fully as though set forth herein.

IN WITNESS WHEREOF, the parties have executed this Subcontract the day and year first hereinabove written.

SCHAIBLE, STALEY, DeLISIO AND COOK, INC.

Anchorage School District
Pouch 6-614
Anchorage, AK 99502

Attention Lowell T. Freeman

Dear Mr. Freeman:

RE: ASD-SERVICE HENSHEW SPORTS COMPLEX

As we explained to you in our phone conversation of December 21, we are currently investigating Ground Up Construction for alleged violations of Title 36 of the Alaska Statutes. Ground Up Construction is a subcontractor with L & H Enterprises on this public works project.

Ground Up Construction has failed to pay its employees on this project in accordance with the law. As a part of our investigation we are attempting to determine the exact hours worked by these employees and the total wages due. Our best available information currently show three employees are owed a total of $13,129 in wages for work performed on the Service Henshew Sports Complex. These wages are broken down as follows:

Ed Gutosky			
112 hours s.t. @ $23.84 per hour	=	$2670.08	
61 hours o.t. @ $35.76 per hour	=	2181.36	
173 hours fringe benefit @ $5.45	=	942.85	
Total			$5794.29
Dennis Thomas			
133 hours s.t. @ $22.45 per hour	=	$2985.85	
43.5 hours o.t. @ $33.675 per hour	=	1464.86	
176.5 hours fringe benefit @ $5.45	=	961.93	
Total			$5412.64
Andy Sterba			
72 hours s.t. @ $26.69 per hour	=		$1921.68
Total wages due			$13,129.00

AS 36.05.070(c) states, in part:

"A contract for public works in the state or a political subdivision shall contain provisions that

(4) the state or political subdivision shall withhold so much of the accrued payments as is necessary to pay to laborers, mechanics, or field surveyors employed by the contractor or subcontractors the difference between

(A) the rates of wages required by the contract to be paid laborers, mechanics, or field surveyors on the work, and

(B) the rates of wages in fact received by laborers, mechanics, or field surveyors."

In accordance with the above, I am directing the Anchorage School District to withhold from this public construction contract the amount of thirteen thousand one hundred twenty-nine dollars ($13,129) pending the conclusion our investigation into this matter.

Any questions you may have regarding this may be directed to me or Bruce Silverthorn, the investigator on the case.

In closing, I would like to ask that you confirm to us in writing that these funds have been withheld. We feel it our responsibility to advise you that failure to comply with this demand for retention of funds may result in further action in accordance AS 36.05.030(b).

Very truly yours,

Jean Morgan

Re: Ground Up Construction Certified Payroll -
Service Hansnew Sports Complex

Dear Mr. Silverthorn:

This is to follow up on telephone conversations we have had concerning wage claims of the owners and employees of Ground Up Construction with regard to work performed on the Service Hanshew High School Sport Complex project. As I have advised you, I am counsel for L & H Enterprises, the contractor to whom Ground Up subcontracted for certain work in connection with that project.

By now you will have received the affidavit of Junior Russell which demonstrates, under oath, that a substantial amount of the information contained in the certified payrolls received from Ground Up Construction is at least erroneous, and at worst false. Accordingly, it becomes incumbent upon you, in the course of your investigation, to require all evidence from Ground Up and its employees to be received in a sworn form. Whether or not that is your usual procedure is irrelevant in this case. Here we have sworn testimony in hand reflecting that the information you are being provided by Ground Up is incorrect. Obviously, a search for the truth in making a determination by you is the bottom line.

In furtherance of the search for truth, I would strongly recommend that Sterba, Thomas and anyone else who provides information concerning these matters be informed, upon

Telex No. 25-257

giving sworn testimony, the penalties of perjury. With that sombering information, the chance of you receiving truthful information should be enhanced.

Based on Mr. Russell's affidavit, the information contained in Ground Up's payroll pertaining to this project is incorrect. Moreover, from the face of the document, the certified payroll was not filed timely pursuant to A.S. 36.05.040. A.S. 36.05.060 sets forth the penalty for violation of the Chapter, including violation of A.S. 36.05.040. In your "even handed" approach to such a matter, one would assume that appropriate criminal prosecution of a contractor would follow from false and untimely filing of certified payroll, as provided by law. However, when I discussed this possibility with you, you seemed to take the view that your department was not interested in prosecution violators of the statute in question.

The fact that the Ground Up payroll was prepared and submitted so long after the fact should raise some serious questions in your and everyone else's minds as to the legitimacy of what is happening here. Considering the close similarity between the amount being claimed as wages and the amount of the contract price that has not been paid to Ground Up by L & H, one should ask whether the procedure which was instituted by Mr. Thomas and is being pursued by Gary Sterba, the co-owners of Ground Up Construction, is merely a back door effort to obtain payment under the contract to which they are not otherwise entitled due to their breach of contract.

As I advised you by telephone on December 19, 1983, some of the time set forth in the certified payroll charged against L & H's contract was actually performed directly by Ground Up Construction under a separate contract directly with the School District. Accordingly, those services had nothing to do with the relationship between L & H and Ground Up Construction.

On the question of whether the owners of the company would be entitled to payment of wages through the process you are pursuing in your agency, and whether Dennis Thomas is or

should be considered for such purposes as an owner of Ground Up Construction in regard to the work in question are matters which we have discussed at length. I have strenuously urged you to seek the advice of a qualified attorney assigned to the Dept. of Labor from the Attorney General's office on these issues. Since you are not an attorney, you are in no position to make a legal evaluation of those issues, although you seem fully prepared to take that on yourself without legal advice. That is an issue that L & H intends to pursue legally to the full limits of the law, should an adverse ruling be made by your division. I am confident that a qualified, experienced attorney will come to the same conclusion that I have: that neither Gary Sterba nor Dennis Thomas are entitled to payment of any wages through Division of Wage and Hour procedures under the Act, for the reason that they are owners of the company.

On the face of the subcontract between L & H and Ground Up, Dennis Thomas signed his name as a co-owner. He made the same representation to L & H's representative in negotiating the contract. Gary Sterba made the same representation to L & H's representatives. Regardless of the fact that Sterba's name may appear to be the only one on the contractor's bond filed with the state or on the state business license, that does not mean that Dennis Thomas was not, at least for the purposes of this one project, a co-owner of Ground Up Construction. He was apparently added as a partner after the contractor's license and business license were obtained. Whether or not he and Sterba would have applied for an amended or new business license or contractor's bond, or even would be required to do so under the law, is wholly irrelevant. Moreover, even if it were to develop unequivocally that Dennis Thomas was in fact not a genuine owner of Ground Up at any time, by having signed the contract with L & H as an owner, he is estopped legally from denying that he was an owner of the company for purposes of enforcement of this contract. He is civilly liable to L & H for breach of contract under the law, just as co-owner Gary Sterba is.

You indicated that the normal enforcement policy of your division is to require payment of wages to owners. I am

curious to know how frequently the issue has come up. I would be surprised if it came up more than on a rare occasion. However, regardless of whether there is in fact a policy or if that is simply the way that some enforcement officer for Wage and Hour Division handled an individual situation in the past, there is no authority under the enabling legislation to permit such a result.

You have indicated that the regulations permit that approach, but I would remind you that the regulations can do no more than what the enabling statutes authorize. Any effort on the part of the regulations to go beyond the authority granted by the statutes is null and void as a matter of law. You also seem to think that the regulations and this so-called "policy" is justified under the provisions of the Act that require owners to include on certified payrolls their hours and rates of pay for doing the same sort of work as their employees. However, it is quite obvious from the statute that there is essentially one reason for doing this: to make sure that, for determining the appropriate average wage applicable to the given type of work for enforcement purposes, the division receives all data germane to making that calculation. The amount that owners pay themselves for doing the identical type work in question is obviously important data to that determination.

You indicated that there is a second use for this information: in reviewing contracts and public works, you are able to make certain that the contractor submits a valid competitive bid with sufficient funds to in fact pay wages to employees who are actually performing the work in question. If such review of contracts is a legitimate exercise of your division, still the purpose of requiring the owner to submit his hours and rates of pay on certified payroll is for data collection purposes. In short, nothing in the statute authorizes your division to enforce payment of wages to owners.

Finally, I am somewhat concerned about the approach that is being taken in this entire matter. Under the Act, the contractor who is in violation of the Act for nonpayment of wages is Dennis Thomas and Gary Sterba d/b/a Ground Up Construction. Quite apart from your investigation in determining validity of wage claims, etc., what effort is being made to compel Ground Up Construction to pay its

employees? Again, violation of the Act carries criminal penalties. Have Sterba and Thomas been informed of those penalties and is any prosecution under consideration should they fail to meet their obligations as employer under the Act with regard to payment of the employees?

From my conversations with you, it seems as if your primary thrust is to satisfy yourself, primarily based on unsworn information received from Sterba, Thomas and their employees, as to how much wages are involved, and then seek to force L & H, the general contractor on the project, or the school district to pay those wages. Obviously the entity responsible for payment of the wages is Ground Up Construction, and every effort available to the Division should be exhausted in seeking to compel Ground Up to pay its employees, before the Division even considers pursuing other sources of payment. I trust that is exactly what you will do, and that my uneasy feeling in this regard is unfounded.

As I had indicated before, if we can be of any further assistance in developing data or factual information that will assist you in getting at the truth in this matter, we will be happy to cooperate. However, my client has a right to be treated fairly under the law and according to due process of law, just as anyone else does. The Wage and Hour Division function should not be prostituted to become a method of subcontractors getting their money out of an upstream contractor, when the subcontractor has breached his contract and failed to fulfill his obligations to the upstream contractor. Such a process would constitute at best a gross abuse of the enabling legislation, as well as a major miscarriage of justice.

With best regards,

Attention: Len Hannaman

Dear Mr. Hannaman:

RE: ANCHORAGE SERVICE-HANSHEW SPORTS COMPLEX
PWA 1183-025

Enclosed is a copy of our letter to the Anchorage School District requiring the withholding of funds on the project referenced above. The total to be withheld has been increased to $17,640.00. This new figure is based upon the following:

1. Ground Up Construction has submitted revised certified payrolls to our office, along with its payroll records.
2. The Attorney General's Office has informed us that wages earned by owner/operators must be paid at prevailing wage rates; specifically, 29 CFR 5.2(i) states,

   "Every person paid by a contractor or subcontractor in any manner for his labor in the construction prosecution; completion or repair of a public building or public work...is 'employed' and receiving 'wages' regardless of any contractual relationship alleged to exist."

Therefore, we have adjusted the amount of funds being retained.

As you will see from the payroll copies enclosed, the hours of work shown vary from the original payrolls submitted by Ground Up Construction. If you have any dispute with the hours shown, please submit any documentation or other evidence you may have that supports your contention(s) to me at the address shown above.

If you agree with the time shown, please inform our office of the action you wish to take to have these wages paid. Whatever the case, please respond to this letter by February 10, 1984.

If you have any questions, please feel free to contact me.

Yours,

Bruce Silverthorn

Re: Anchorage Service-Hanshew Sports Complex
PWA 1183-025

Dear Mr. Silverthorn:

Your letter to L & H Enterprises of January 31, 1984, with regard to the above matter has been referred to me for response on behalf of L & H. I have ceased to be amazed at the lack of due process which your department appears to favor in these matters, at least as it as been demonstrated in this case.

To begin with, the thrust of your letter is directed at my client, the general contractor, not at the employer of the employees who have not been paid as required by the law you seek to enforce. What action is being taken with regard to Ground Up Construction and its co-owners, Gary Sterba and Dennis Thomas, in this regard? What do they propose to do about paying the wage claims of their employees, is the more appropriate question that should be asked at this time. Furthermore, what action does your department intend to take with regard to the statutes that set forth sanctions for failure of an employer to file timely certified payroll records and fail to properly pay prevailing wage rates to its employees?

Under any reasonable procedure, one would have every reason to expect that the administrative procedures available to your agency would be exhausted in dealing with the party who is directly responsible for the problem - the employer. Yet your letter does not even address that subject matter, but addresses the subject to L & H Enterprises as if L & H was the actual employer of the workmen in question.

FILE COPY

(907) 279-9574

Post Office Box 102840
Cable Address - MERANCH

Anchorage, Alaska 99510-2840
Telex No. 25-257

As you very well know, we do dispute the hours shown by Ground Up Construction. For whatever reason, your letter completely fails to address the fact that, without any obligation to do so, we submitted to you a sworn affidavit of Junior Russell dated December 16, 1983, setting forth the basis for our challenging the payroll record of Ground Up Construction, as then known. We realize that you have received more recent information, but that more recent information has resulted in a substantial increase in the amount of hours allegedly worked, whereas Mr. Russell's affidavit demonstrated that the earlier smaller alleged payroll record was grossly excessive.

Furthermore, the form in which you have provided us the alleged hours worked is utterly useless in our being able to make a response with regard to disputing those hours. No attempt is made in your attached letter of January 31, 1984 to the school district, wherein the hours are set forth, to show on what days each increment of hours was put in. Obviously that is the only way that we would have to challenge the hours shown.

Third, whatever happened to the right to a hearing on a dispute of this type. From the tone of your letter, our entitlement to be heard is apparently going to limited to submission of documentation or other evidence that we have that supports our contentions. This is very disturbing inasmuch as your letter failed to note that we had already submitted a substantial sworn document which very extensively challenged the claims being asserted by Ground Up Construction and its employees.

In addition, we had previously advised you that a portion of the work provided by Ground Up Construction at Anchorage Service-Hanshew Sports Complex was performed directly to the account of the Anchorage School District, and not under the subcontract with L & H Enterprises. Nevertheless, neither your letter to L & H Enterprises or your letter to the school district, both of which are dated January 31, 1984, deal with this question. A hundred percent of what you are asking the school district to withhold is being asked to be withheld from L & H Enterprises contract. Obviously, no matter how the statute and regulations you are attempting to enforce are interpreted in the final analysis, there would be absolutely no right for anybody to have the school district withhold monies from L & H Enterprises for wages owed by Ground Up Construction to its employees for performing services to the direct account of the Anchorage School District.

Concerning your advise with regard to the entitlement of owner/ operators, as you well know, we intend to challenge that, if necessary, to the highest court. The interpretation is being made

of a regulation which does not expressly say what you say it says. In other words you are interpreting what the words mean. The regulation only has such scope, force and effect as the enabling statute gives it, and there is nothing under the statute that gives the Department of Labor the right to establish a regulation which would require an upstream contractor to pay a defaulting subcontractor owner/operator prevailing wage rates.

We hereby demand our rights as established by law to the benefit of the administrative procedures pertaining to such matters. Furthermore, we request an answer to the inquiries we have made above.

Should you see fit to provide us with a breakdown of the hours claimed by Ground Up's employees and owners, on a day-by-day basis so that we can evaluate them, we will be happy to make a further evaluation. However, we question whether such an analysis would be a waste of time, since you have obviously disregarded Mr. Russell's previous sworn analysis.

Very truly yours,

Re: Anchorage Service-Hanshew Sports Complex
PWA 1183-025

Dear Mr. Silverthorn:

You will recall on February 21, 1984 our telephone conversations regarding the fact that, even the most recent revised proported payroll records produced to you by Ground Up Constructions were not presented under oath. You stated that Mr. Sterba was unwilling to provide a "certified payroll", on the ground that he felt such certification constituted a representation that the payroll had been paid, when it had not.

Accordingly, I requested that you obtain from Ground Up Construction a sworn affidavit to the accuracy of the information contained in whatever payroll record Ground Up intends now to rely upon. You advise that that would be an easy thing to accomplish, and that you would do so and send me a copy of the affidavit immediately.

We are now approximately one full month since that discussion, and I have not received any such affidavit. Has Mr. Sterba declined to provide one? When may we expect to see some sworn support for this oft changed and perhaps in the future often changing payroll "record?"

I attempted to call your office on March 19, only to be advised that you were gone on personal leave until April 1. I trust you will respond to this promptly after your return.

Very truly yours,

SCHAIBLE, STALEY, DeLISIO & COOK, INC.

RE: ASD-SERVICE HANSHEW SPORTS COMPLEX
PWA1183-025

Enclosed are the amended certified payrolls submitted by Gary Sterba, on behalf of Ground Up Construction, for work performed on the above referenced project. Mr. Sterba's certification is attached for your review.

Please compare these payrolls for consistancy with your own records and provide this office with any comments you might have by April 6, 1984.

If you have any questions, please don't hesitate to contact our office at 264-2435.

Yours,

MEMORANDUM

TO: File

FROM: SSD

DATE: 12/19/83

Re: L & H Enterprises v. Ground Up Construction

On this date I spoke at length with Bruce Silverthorn regarding the status of the matter. He is expecting to meet with Gary Sterba on the morning of December 20, 1983. He indicated that he had not told Sterba that he would be ordering the School District to pay the wages. He will, however, be instructing the School District to withhold a sufficient sum to cover wages that he thinks from his preliminary inquiry may be due.

I informed him of the affidavit prepared by Junior Russell from the L & H job logs, and agreed to deliver a copy of the affidavits to him as soon as possible. I sent it with Sharon on the afternoon of 12/19/83. I also read from it the conflicting information from the certified payroll records.

He indicates that a couple of the employees have even filed conflicting claims indicating that there is more owing them than is shown on the certified payroll submitted by Sterba.

Once again he reiterated his belief that owners were entitled to payment under the Act as well as regular employees. I pointed out to him that, before he made a major mistake in enforcement, he should inquire for an opinion of the assistant attorney general that advises the Department of Labor. He also indicated that his research had shown that Gary Sterba was the only owner shown on the contractor's bond and business license. I pointed out to him that was irrelevant, for purposes of this job, since Denny Thomas had held himself out and signed the contract as a co-owner. Hence Thomas should also be dealt with as an owner with regard to this claim. I further urged him to obtain an opinion on this from the attorney general's office.

Silverthorn admitted that he was not attorney, but was simply following enforcement practices that are apparently well established in the department. They have apparently routinely been enforcing payment of wages to owners, as well as to employees, where the situation has arisen.

I also insisted that he take any further information from Sterba, Thomas or the employees under oath, since we wanted the sanction of perjury over their heads if they lied. He sounded as if he really did not intend to do that since his only purpose was to determine whether wages were due, and not to make a case for anybody. I pointed out to him that, obviously, his function was to get to the truth and the best way to get to the truth was to take testimony under oath

particularly where there were major conflicts. I pointed out that, if he required all of the evidence to come in under oath, he was much more likely to get to the real truth earlier.

I also pointed out that some of this work had been done by Ground Up directly for the account of the School District, and that we were being charged as if it was done for us. He indicated that he would check with Hanscomb Herry to find out about this aspect.

cc: Len Hannaman

State of Alaska)
) ss.
Third Judicial District)

To Whom it May Concern:

I am no longer an employee of L & H Enterprises, Inc. Therefore, not having the employee to company loyalty I have also had a past acquaintance and friendship with Ground-Up Construction, as well as a working relationship with them. I believe I am a neutral party in this matter of L & H Enterprises, Inc. vs. Ground-Up Construction.

I remember the contract very well, as I negtoiated it with Denny Thomas per instructions from Gary Sterba. Denny Thomas informed me that he was co-owner. I did not question if that meant, all past work, all future work or just this particular job.

On August 3, 1983 and August 4, 1983, Denny Thomas called Bob Kirkman (L & H Office per phone record,) to get L & H Enterprises' record of days worked on this job by Ground-Up personnel. These I supplied after our office notified Ground-Up to send copies of Certified Payroll. I have noted several discrepancies from our job log and time sheets turned in by Gary Sterba.

The record shows 2 loads of pipe hauled in, 2 loads of asphalt and broken concrete hauled off. The last load going with trailer and backhoe, therefore, the work was not in excess of four each ½ days for the truck driver, or a total of 2 full days. Note: Total job they show the time for truck driver as 8 days. There was not any fill or bedding hauled to the job. This man was not on the job 8 days.

A copy of the Certified Payroll time sheets turned in by Ground-Up Construction no way matches the job log. Time sheets for the week ended July 3, 1983 and for the day of June 27 show Gary Sterba working 16 hours. The job log shows him arriving on the job at 10:00am. As he indicated working 16 hours, this would mean he would not have gotten off until 2:00am the next morning. Also his certified payroll show his men working the same day, only got 11 hours. Something is amiss in their records. On July 11, 1983 the log book shows Ground-Up (Gary Sterba and Denny Thomas) arriving on the job at 3:00pm then showing on the time sheet only Gary Sterba working 12 hours. No one else from Ground-Up was working. On July 14, 1983 shown by log book, Gary Sterba left the job at 11:30am yet claimed 8 hours.

We have to assume the time sheet of week ending June 26, 1983 is really week ending July 17, 1983. Week ending June 26, 1983 is a week before their job even started. It looks as if after L & H Enterprises, Inc. gave dates of work on job, that Ground-Up went back 6 weeks and guessed on hours worked, and not very accurately I might add.

On July 17, 1983, Ground-Up Construction worked on contract between Anchorage School District and Ground-Up, a separate contract to that of ours, yet Sterba is claiming 8 hours of time to the L & H job. On July 15, 1983 they were working on the afore mentioned contract and charged L & H Enterprises 12 man hours. This is confirmed by our job log. Perhaps Certified

Payroll on the other contract with the School District will show this discrepancy. Maybe an oversight on their part. It is impossible from the Ground-Up time sheets to match our job log.

Andy Sterba was never an operator on this job yet time sheets show him as such. It is real confusing as to what they are trying to do. It looks as if they are guessing on their hours rather than being accurate.

I have no argument on hours for Denny Thomas. Though accurate hours on him were not properly kept, as he would leave the job during work hours and did so on many occasions and would also show up late. He was looking and bidding other work and charging hours to L & H job as it appears and was told to me.

The most accurate hours would be on Ed Growkoski. However, both Ed Growkoski and Gary Sterba are listed as operators on the same days. It is very hard in an 8 hour day to get in 16 hours of operators time on one piece of equipment. They only had one backhoe.

As a former employee of L & H Enterprises, Inc. I am under no obligation, connection, or ties with L & H Enterprises, Inc. at this time.

If I may be of further assistance please be advised that I will be gald to help. Log books, time sheets and personal knowledge of the above is true to the best of my knowledge.

Best Regards,
JR Russel

Mr. Len Hannaman
President, L & H Enterprises, Inc.
P.O. Box 111593
Anchorage, Alaska 99511

Dear Mr. Hannaman:

Thank you for the letter and information regarding the investigation you have requested of a recent Wage and Hour Administration probe. I appreciate the amount of time and effort you spent compiling this information.

Investigations of this nature often prove to be difficult and time consuming. However, errors are often made during this process. Therefore, I am forwarding your letter and information to Representative John Cowdery, Chairman of the House Labor and Commerce Committee, for further review. This committee is best equipped to conduct such an investigation and determine whether new legislation would be required to rectify the situation.

Thanks again for your input. If I can be of additional assistance, please feel free to contact me at my Juneau office.

Very truly yours,

Joe L. Hayes
SPEAKER OF THE HOUSE

March 28, 1984

Joe L. Hayes
Speaker of the House of Representatives
Pouch WO (Mail Stop 3100)
Juneau, AK 99811

Dear Speaker Hayes:

Enclosed is a copy of a request for investigation I have sent to Mr. Chenoweth, the State Ombudsman, pertaining to an investigation being performed by the Wage & Hour Administration, Labor Standards & Safety Division of the Department of Labor.

After you have had a chance to read the contents of my letter to Mr. Chenoweth, which sets forth the issues involved, perhaps it would be useful for you and other members of the legislature to address the impact of the interpretation that is being placed on the regulations and the enabling statute as to who the beneficiaries of the law are. Mr. Silverthorn, the investigator assigned, takes the position that the statute in question pertains to payment of wages to all personnel who provide work on a construction project for the State of Alaska or one of its political subdivisions, even if some of those people are the owners of the contractor who undertook to perform the services by contract. In the instant case, the subcontract between L & H Enterprises, Inc. and Ground Up Construction, a partnership owned by Gary Sterba and Dennis Thomas, was for $14,550. Due to the failure of Ground Up to properly perform the work, and the requirement that L & H had to make good that portion of the work, as part of its duties as general contractor, L & H had back charges for almost the full amount of the contract.

Nevertheless, Mr. Sterba and Mr. Thomas have made wage claims of approximately $11,000, in addition to wage claims by two other men they claim worked for them on the project amounting to a little over $6,000. Based on Mr. Silverthorn's "investigation," the school district has been ordered to withhold the full $17,639.54, including almost $11,000 for Sterba and Thomas, from

L & H Enterprises, Inc., since Ground Up Construction did not pay any wages to any of the personnel involved in the project.

You will note from our report to Mr. Chenoweth the criticisms we have of the methods of investigation that are being employed by this division of the State of Alaska. However, even more distressing, and the subject that I would appreciate the legislature addressing itself to, is the impact of this kind of enforcement practice on contracting on public works projects in the State of Alaska.

If Mr. Silverthorn is right in his interpretation, anytime a subcontractor fails to perform on a public works projects, the owners of the subcontractor can essentially get back all or even more than what they expected to make from the project through wage claims, breach their contract and fail to perform, cause their upstream contractor to expend substantial sums of money to complete the work that subcontractor has undertaken to perform, and, in addition, have to pay out of its pocket so-called "wages" of the owners of the subcontractor that defaulted. If that in fact is the law of the State of Alaska, I suspect the state and its political subdivisions are going to find it increasingly difficult to obtain reasonable bids from contractors to perform their projects.

Your inquiry into this matter would be very much appreciated. If Mr. Silverthorn is incorrectly interpreting the law, perhaps he should be set straight. If he is correctly interpreting it, obviously the legislature needs to take some corrective action. Thank you for your assistance.

Very truly your,

Len O. Hannaman

Re: Department of Labor Wage & Hours v. L & H Enterprises

Dear Mr. Chenoweth:

Bruce Silverthorn, investigator for the Wage & Hour Administration, Labor Standards and Safety Division of the Department of Labor in Anchorage has initiated a proceeding which has resulted in the Anchorage School District withholding the sum of $17,639.54 from my company, L & H Enterprises, Inc., in connection with work we are performing on the Anchorage Service-Hanshew Sports Complex, PWA 1183-025.

Because of the process that Mr. Silverthorn is employing, and some of the rationale he is proceeding under, I hereby request that you investigate this matter. On or about November 18, 1982, L & H Enterprises, Inc., as general contractor, contracted with the Municipality of Anchorage School District for the turnkey construction of the Service-Hanshew Sports Complex. On May 24, 1983, L & H subcontracted with Ground Up Construction for certain excavation work, installation of water lines, backfilling, compacting, testing and inspection, for a total subcontract price of $14,550. The subcontract was signed by Dennis Thomas, reflecting that he was "co-owner" of Ground Up Construction. This subcontrac was signed on June 3, 1983.

In the course of performance by Ground Up Construction, Ground Up damaged underground utility lines and existing concrete curbing, improperly compacted and filled in trenches, and otherwise failed properly to perform under its subcontract. As a result, L & H back charged Ground Up Construction the sum of $12,290.20 to correct and complete Ground Up's work.

At the time that Mr. Silverthorn began investigating the matter, and notified L & H of his investigation, due to the size of the back charge, and the fact that L & H had not yet been paid by the municipality for a portion of the work covered by the Ground Up subcontract, L & H had not disbursed any payment to Ground Up under the subcontract.

In late November, Mr. Silverthorn was in touch with L & H to advise that he was conducting an investigation into a claim for unpaid wages being asserted by Mr. Thomas, Gary Sterba, the other owner of Ground Up Construction, Ed Grakowsky and Andy Sterba, a relative of Gary Sterba.

Although required by law to provide timely certified payrolls sworn under oath in connection with the project in question, Ground Up Construction failed to do so. However, at some point about the commencement of Mr. Silverthorn's investigation, Ground Up did submit a breakdown indicating when each of the four men in question worked on the project in question, the amount they were entitled to per hour and the amount of hours they put in, including overtime.

Mr. Silverthorn sent this document to L & H Enterprises, and requested that we evaluate it. Our superintendent on the project, Junior Russell, did compare the "payroll" documents submitted by Ground Up, and provided an affidavit dated December 16, 1983, a copy of which was sent to Mr. Silverthorn. In the affidavit, Mr. Russell points out that there were many glaring errors in the job log and time sheets submitted to the department by Ground Up. For example, those records claimed eight days of employment for a truck driver, when in fact a truck was only used on a maximum of four different days, for not more than one-half day each, for a total of two full days. Furthermore, the time sheets turned in by Ground Up in no way matched L & H's job log.

Mr. Russell also pointed out that Ground Up entered a separate contract with the school district to perform some repairs to a broken pipe, which was not part of the subcontract with L & H, and which might have accounted for a portion of the time claimed by Ground Up employees in connection with the Service-Hanshew project. Of course, that was not the responsibility of L & H.

Finally, he pointed out that Andy Sterba was never on the job, notwithstanding the indication of the time sheets provided by

Ground Up. Futhermore, he pointed out that Ed Grakowsky and Gary Sterba both were listed as operators of equipment on the same day, and were claiming eight hours a piece, or a combination of 16 hours as operators on the same piece of equipment on the same day. They only had one backhoe, and between them, during a straight time day, could not have gotten in more than an aggregate of eight hours.

These and other substantial discrepancies were promptly made known to Mr. Silverthorn.

Nevertheless, based upon the time sheets submitted by Ground Up Construction, on December 22, 1983, Jeane Morgan, Mr. Silverthorn's supervising investigator, sent a letter to the school district instructing the school district, pursuant to A.S. 36.05.070(c) to withhold $13,129 from L & H Enterprises' contract. Thereafter, in February 1984, Mr. Silverthorn received a new "certified payroll" provided by Gary Sterba of Ground Up Construction. Mr. Sterba apparently informed him that the first report was erroneous, but the second report, after considering Mr. Russell's affidavit, was more accurate. A copy of that was sent to L & H Enterprises. That so-called "certified payroll" was not certified, was not presented under oath, nor was it signed by Mr. Sterba or anyone else. It radically departed from the earlier "certified payroll" that Ground Up had submitted to the Department of Labor, and as a result of it, Ms. Morgan sent a new letter to the school district on January 31, 1984 instructing the school district to withhold an even larger sum, $17,639.54, from L & H's contract.

My attorney, Stephen S. DeLisio, on February 21, 1984, spoke with Mr. Silverthorn about the document we had now been provided as the latest "certified payroll" of Ground Up Construction. Mr. Silverthorn advised Mr. DeLisio that it was neither signed nor sworn to by Mr. Sterba or anyone else, since, by signing it, they would be representing that the wages had been paid, when the wages had not been paid. Apparently no wages whatever were paid to any of the four men in question, including the two owners, Gary Sterba and Dennis Thomas. Mr. DeLisio then requested Mr. Silverthorn to obtain an affidavit from someone at Ground Up Construction to the effect that the information contained in the most recent documents submitted by Ground Up was accurate. Mr. Silverthorn indicated that he should be able easily to do so.

However, a month elapsed after that conversation, before we were provided such affidavit or further documentation from Mr. Silverthorn or anyone else. It finally arrived March 22, 1984, and a copy is enclosed.

Mr. Silverthorn asked L & H to make an analysis of the second payroll document from Ground Up, but we advised him that Junior Russell, the superintendent who would have to do the analysis, was traveling in the Lower 48 States, and was not expected back until approximately May. We do not have contact with Mr. Russell during the winter months, when he is off duty, and, although we have made attempts to locate him, we have not yet done so. Accordingly we have not been able to further analyze Ground Up's most recent reconstruction of the time its personnel allegedly worked on the project except as previously done by Junior Russell. Of course, Mr. Russell's critique was then into account by Ground Up in reworking its analysis.

Although the regulations under which Mr. Silverthorn is operating entitle L & H Enterprises to a full hearing, and an opportunity to examine the evidence supporting the Wage & Hour's instructions to the school district to withhold funds from L & H, and although L & H has requested an opportunity for such a hearing, none has yet been made available, although the matter has been under investigation now for more than four months, and a substantial sum of money has been withheld from L & H by the school district for more than three months.

Furthermore, and even more incredibly, Mr. Silverthorn takes the position that the two owners of the company, Gary Sterba and Dennis Thomas, are entitled to be paid their wages by L & H Enterprises, due to the failure of Ground Up Construction to do so, just as any of the employees of that company might be entitled under the law. Of the $17,639.54 being withheld from L & H Enterprises by the school district, on instructions of the Department of Labor, $10,618.16 is withheld on behalf of Gary Sterba and Dennis Thomas.

Under this arrangement, although Mr. Thomas and Mr. Sterba, as owners of the Ground Up Construction Company proprietorship, breached their contract with L & H Enterprises, entitling L & H to back charge almost the full amount of the contract price originally negotiated between the parties, these men will be able to take a sum of money representing almost three-quarters of

their contract price in the form of wage claims from L & H Enterprises, if Mr. Silverthorn has his way. This notwithstanding Ground Up's breach of contract and the back charge that almost equals the full amount of the contract price, due to that breach. Mr. Silverthorn is operating on the premise that his Division's function is to recover wages for owners of subcontractors who perform work on the job themselves, notwithstanding their failure to perform the project correctly, timely or economically.

He also makes the rather unusual argument that, because Dennis Thomas now claims he was not an owner of Ground Up Construction for the purpose of this project, Thomas should not be treated as as owner, in any event, but just as another employee. This notwithstanding the fact that he has verified that Mr. Thomas signed the subcontract in question and identified himself on that contract, when he signed it, as well as otherwise during the course of the project to L & H Enterprises personnel, as a co-owner of Ground Up Construction.

I am deeply alarmed at the rather bizarre direction that this wage claim investigation has taken by Mr. Silverthorn and the Department of Labor. I do not feel that L & H has been dealt with fairly or reasonably in the matter. Mr. Silverthorn has compelled the school district to withhold very substantial sums of money from my company, based upon information which was suspect to say the least in the first instance and has been even more suspect when the first presentation was so substantially impeached by Mr. Russell's analysis, that a second presentation had to be made by Ground Up. Until March 20, 1984, none of these documents from Ground Up have ever been signed or submitted under oath, so that there could be recourse against the persons responsible for preparing them if one could eventually prove that the documents were raise, and that the authors were misrepresenting the facts. Nonetheless, Mr. Silverthorn has proceeded on this documentation as if the information was Holy Writ.

Furthermore, Mr. Silverthorn's attempt to collect wages for owners of the company is grossly inappropriate. Our attorney has urged him to consult with the Attorney General's office in this regard, and although he says he has, he has never shown anything to our attorney that would indicate that such a consultation has been had or that the Department of Law was fully apprised of the

issues in question. If the Department of Labor is going to pursue a policy to pay wages to owners of subcontractors who failed to fulfill their contract obligations on public projects, the whole underpinning of the free enterprise system in Alaska will be jeopardized, particularly as they regard public works. How can any responsible contractor afford to involve himself with a public contract in Alaska, governed by these Alaska statutes, where he may be compelled to pay the bulk if not all of the contract price to a defaulting subcontractor through that subcontractor's personal wage claims?

As I understand the law that Mr. Silverthorn is attempting to enforce, it is aimed at seeing to it that wages of hired employees on public works' projects are paid by someone - if not by the employer, then by one of the upper tier contractors from the public funds on the project. However, Mr. Silverthorn attempts to carry the matter one step further and withhold funds from us of which approximately two-third are for the benefit of the owners of the defaulting contractor.

Furthermore, although our attorney has inquired of Mr. Silverthorn regarding his intent to prosecute Ground Up for its obvious violations of the law requiring it to file certified payrolls on a timely basis and to pay its employees as required by law, Mr. Silverthorn has indicated that his only purpose in the investigation is to extract funds with which to pay the owners involved, including the two owners. This seems to me a severe lapse on the part of the Department of Labor in pursuing and prosecuting obvious wrongdoers under the law. Essentially what the department is attempting to do is to shift to L & H Enterprises, Inc., a blameless general contractor, the financial burden of a defaulting subcontractor for payment not only of wages, but also loss profits, etc.

I would very much appreciate it if you would look into the matter, and advise me of your conclusions. I am enclosing herewith copies of documents that may be of help to you in your investigation, including the two sets of time records received from Ground Up Construction by the Department of Labor, a copy of Junior Russell's affidavit regarding the first set, Ms. Morgan's letters to the school district of December 22, 1983 and January 31, 1984, and my attorney's letters to Mr. Silverthorn dated December 22, 1983, February 6, 1984 and March 20, 1984.

Also enclosed is a copy of Mr. Silverthorn's letter to L & H Enterprises of January 31, 1984.

If we can provide you with any further information in regard to this matter, we will be happy to do so.

Very truly yours,

Len Hannaman, President

Gentlemen,

This letter is to inform you that as of this date, L & H Enterprises has not received a copy of your certified payroll records for the Service Hanshew Sports Complex project.

Furthermore, our accounting office has checked with the Alaska Department of Labor and they too, have not received the required reports.

Unless this information is forwarded in its entirety to L & H Enterprises' accounting department by the completion of your scope of this project, we will be forced to withhold all payments for this work, pending to audit by the Department of Labor.

You immediate cooperation on this matter is necessary.

Sincerely,

L & H ENTERPRISES, INC.

Gentlemen:

In response to your recent phone calls, we at L & H Enterprises have enclosed a summary of all backcharges against your company herein.

Since our last meeting, there has been a significant increase in the charges due to corrective measures taken, to repair the problems created by your original work.

Your performance on this job was entirely inadequate, and caused us time and monetary losses far in excess of that documented herein. Furthermore the legal jeapordy that you placed L & H Enterprises in with your non - OSHA approved trenching practices is unexcusable.

In addition we at L & H Enterprises have had a lien placed on your contract by Tope Equipment for a sum of $22,423.84 and any left over funds from your contract with us must be turned over to Tope Equipment immediately. Please note copy of lien enclosed.

Furthermore, our bookkeeper, Judy Zundel, has had a conversation with the Alaska Department of Labor regarding your claim against L & H Enterprises, Inc. for employee wages. She was told that your claim was invalid since the claimants were both co-owners of Ground Up Construction. That includes Mr. Denny Thomas who represented himself as a co-owner at the time he signed the contract.

In summation I will comment that in my entire construction career I have never had a subcontractor perform as badly, and with as little concern for the overall project as your firm so did.

Re: Service Hanshew Sports Complex Ground Up Construction

I advise that all payments to Ground Up Construction be withheld pending back-charges incurred in the following areas:

1. Damage to underground utility lines
2. Damage to existing concrete curbing
3. Improper compaction and non-spec fill material in trenches
4. Charges for plumbing equipment and accessories purchased on L & H Enterprises account
5. Additional supervision, labor and management charges

The above mentioned items, along with any additional back charges, are currently being itemized for an accurate accounting.

In addition, serious consideration should be given to the project delays incurred through Ground Up's mismanagement of their scope of the work, and the resulting dollar impact suffered by L & H Enterprises therein.

Robert E. Kirkman
Project Manager

Anchorage School District
Pouch 6-614
Anchorage, AK 99502

Attention Lowell T. Freeman

Dear Mr. Freeman:

RE: ASD-SERVICE HENSHEW SPORTS COMPLEX

As we explained to you in our phone conversation of December 21, we are currently investigating Ground Up Construction for alleged violations of Title 36 of the Alaska Statutes. Ground Up Construction is a subcontractor with L & H Enterprises on this public works project.

Ground Up Construction has failed to pay its employees on this project in accordance with the law. As a part of our investigation we are attempting to determine the exact hours worked by these employees and the total wages due. Our best available information currently show three employees are owed a total of $13,129 in wages for work performed on the Service Henshew Sports Complex. These wages are broken down as follows:

Ed Gutosky			
112 hours s.t. @ $23.84 per hour	=	$2670.08	
61 hours o.t. @ $35.76 per hour	=	2181.36	
173 hours fringe benefit @ $5.45	=	942.85	
Total			$5794.29
Dennis Thomas			
133 hours s.t. @ $22.45 per hour	=	$2985.85	
43.5 hours o.t. @ $33.675 per hour	=	1464.86	
176.5 hours fringe benefit @ $5.45	=	961.93	
Total			$5412.64
Andy Sterba			
72 hours s.t. @ $26.69 per hour	=		$1921.68
Total wages due			$13,129.00

AS 36.05.070(c) states, in part:

"A contract for public works in the state or a political subdivision shall contain provisions that

(4) the state or political subdivision shall withhold so much of the accrued payments as is necessary to pay to laborers, mechanics, or field surveyors employed by the contractor or subcontractors the difference between

(A) the rates of wages required by the contract to be paid laborers, mechanics, or field surveyors on the work, and

(B) the rates of wages in fact received by laborers, mechanics, or field surveyors."

In accordance with the above, I am directing the Anchorage School District to withhold from this public construction contract the amount of thirteen thousand one hundred twenty-nine dollars ($13,129) pending the conclusion our investigation into this matter.

Any questions you may have regarding this may be directed to me or Bruce Silverthorn, the investigator on the case.

In closing, I would like to ask that you confirm to us in writing that these funds have been withheld. We feel it our responsibility to advise you that failure to comply with this demand for retention of funds may result in further action in accordance AS 36.05.030(b).

Very truly yours,

Jean Morgan

Re: Ground Up Construction Certified Payroll -
Service Hansnew Sports Complex

Dear Mr. Silverthorn:

This is to follow up on telephone conversations we have had concerning wage claims of the owners and employees of Ground Up Construction with regard to work performed on the Service Hanshew High School Sport Complex project. As I have advised you, I am counsel for L & H Enterprises, the contractor to whom Ground Up subcontracted for certain work in connection with that project.

By now you will have received the affidavit of Junior Russell which demonstrates, under oath, that a substantial amount of the information contained in the certified payrolls received from Ground Up Construction is at least erroneous, and at worst false. Accordingly, it becomes incumbent upon you, in the course of your investigation, to require all evidence from Ground Up and its employees to be received in a sworn form. Whether or not that is your usual procedure is irrelevant in this case. Here we have sworn testimony in hand reflecting that the information you are being provided by Ground Up is incorrect. Obviously, a search for the truth in making a determination by you is the bottom line.

In furtherance of the search for truth, I would strongly recommend that Sterba, Thomas and anyone else who provides information concerning these matters be informed, upon

giving sworn testimony, the penalties of perjury. With that sombering information, the chance of you receiving truthful information should be enhanced.

Based on Mr. Russell's affidavit, the information contained in Ground Up's payroll pertaining to this project is incorrect. Moreover, from the face of the document, the certified payroll was not filed timely pursuant to A.S. 36.05.040. A.S. 36.05.060 sets forth the penalty for violation of the Chapter, including violation of A.S. 36.05.040. In your "even handed" approach to such a matter, one would assume that appropriate criminal prosecution of a contractor would follow from false and untimely filing of certified payroll, as provided by law. However, when I discussed this possibility with you, you seemed to take the view that your department was not interested in prosecution violators of the statute in question.

The fact that the Groun Up payroll was prepared and submitted so long after the fact should raise some serious questions in your and everyone else's minds as to the legitimacy of what is happening here. Considering the close similarity between the amount being claimed as wages and the amount of the contract price that has not been paid to Ground Up by L & H, one should ask whether the procedure which was instituted by Mr. Thomas and is being pursued by Gary Sterba- the co-owners of Ground Up Construction, is merely a back door effort to obtain payment under the contract to which they are not otherwise entitled due to their breach of contract.

As I advised you by telephone on December 19, 1983, some of the time set forth in the certified payroll charged against L & H's contract was actually performed directly by Ground Up Construction under a separate contract directly with the School District. Accordingly, those services had nothing to do with the relationship between L & H and Ground Up Construction.

On the question of whether the owners of the company would be entitled to payment of wages through the process you are pursuing in your agency, and whether Dennis Thomas is or

should be considered for such purposes as an owner of Ground Up Construction in regard to the work in question are matters which we have discussed at length. I have strenuously urged you to seek the advice of a qualified attorney assigned to the Dept. of Labor from the Attorney General's office on these issues. Since you are not an attorney, you are in no position to make a legal evaluation of those issues, although you seem fully prepared to take that on yourself without legal advice. That is an issue that L & H intends to pursue legally to the full limits of the law, should an adverse ruling be made by your division. I am confident that a qualified, experienced attorney will come to the same conclusion that I have: that neither Gary Sterba nor Dennis Thomas are entitled to payment of any wages through Division of Wage and Hour procedures under the Act, for the reason that they are owners of the company.

On the face of the subcontract between L & H and Ground Up, Dennis Thomas signed his name as a co-owner. He made the same representation to L & H's representative in negotiating the contract. Gary Sterba made the same representation to L & H's representatives. Regardless of the fact that Sterba's name may appear to be the only one on the contractor's bond filed with the state or on the state business license, that does not mean that Dennis Thomas was not, at least for the purposes of this one project, a co-owner of Ground Up Construction. He was apparently added as a partner after the contractor's license and business license were obtained. Whether or not he and Sterba would have applied for an amended or new business license or contractor's bond, or even would be required to do so under the law, is wholly irrelevant. Moreover, even if it were to develop unequivocally that Dennis Thomas was in fact not a genuine owner of Ground Up at any time, by having signed the contract with L & H as an owner, he is estopped legally from denying that he was an owner of the company for purposes of enforcement of this contract. He is civilly liable to L & H for breach of contract under the law, just as co-owner Gary Sterba is.

You indicated that the normal enforcement policy of your division is to require payment of wages to owners. I am

curious to know how frequently the issue has come up. I would be surprised if it came up more than on a rare occasion. However, regardless of whether there is in fact a policy or if that is simply the way that some enforcement officer for Wage and Hour Division handled an individual situation in the past, there is no authority under the enabling legislation to permit such a result.

You have indicated that the regulations permit that approach, but I would remind you that the regulations can do no more than what the enabling statutes authorize. Any effort on the part of the regulations to go beyond the authority granted by the statutes is null and void as a matter of law. You also seem to think that the regulations and this so-called "policy" is justified under the provisions of the Act that require owners to include on certified payrolls their hours and rates of pay for doing the same sort of work as their employees. However, it is quite obvious from the statute that there is essentially one reason for doing this: to make sure that, for determining the appropriate average wage applicable to the given type of work for enforcement purposes, the Division receives all data germane to making that calculation. The amount that owners pay themselves for doing the [illegible]al type work in question is obviously important data [illegible]t determination.

You indicated that there is a second u[illegible]e this information: in reviewing contracts and public works, you are able to make certain that the contractor submits a valid competitive bid with sufficient funds to in fact pay wages to employees who are actually performing the work in question. If such review of contracts is a legitimate exercise of your division, still the purpose of requiring the owner to submit his hours and rates of pay on certified payroll is for data collection purposes. In short, nothing in the statute authorizes your division to enforce payment of wages to owners.

Finally, I am somewhat concerned about the approach that is being taken in this entire matter. Under the Act, the contractor who is in violation of the Act for nonpayment of wages is Dennis Thomas and Gary Sterba d/b/a Ground Up Construction. Quite apart from your investigation in determining validity of wage claims, etc., what effort is being made to compel Ground Up Construction to pay its

employees? Again, violation of the Act carries criminal penalties. Have Sterba and Thomas been informed of those penalties and is any prosecution under consideration should they fail to meet their obligations as employer under the Act with regard to payment of the employees?

From my conversations with you, it seems as if your primary thrust is to satisfy yourself, primarily based on unsworn information received from Sterba, Thomas and their employees, as to how much wages are involved, and then seek to force L & H, the general contractor on the project, or the school district to pay those wages. Obviously the entity responsible for payment of the wages is Ground Up Construction, and every effort available to the Division should be exhausted in seeking to compel Ground Up to pay its employees, before the Division even considers pursuing other sources of payment. I trust that is exactly what you will do, and that my uneasy feeling in this regard is unfounded.

As I had indicated before, if we can be of any further assistance in developing data or factual information that will assist you in getting at the truth in this matter, we will be happy to cooperate. However, my client has a right to be treated fairly under the law and according to due process of law, just as anyone else does. The Wage and Hour Division function should not be prostituted to become a method of subcontractors getting their money out of an upstream contractor, when the subcontractor has breached his contract and failed to fulfill his obligations to the upstream contractor. Such a process would constitute at best a gross abuse of the enabling legislation, as well as a major miscarriage of justice.

Dear Mr. Hannaman:

RE: ANCHORAGE SERVICE-HANSHEW SPORTS COMPLEX
PWA 1183-025

Enclosed is a copy of our letter to the Anchorage School District requiring the withholding of funds on the project referenced above. The total to be withheld has been increased to $17,640.00. This new figure is based upon the following:

1. Ground Up Construction has submitted revised certified payrolls to our office, along with its payroll records.
2. The Attorney General's Office has informed us that wages earned by owner/operators must be paid at prevailing wage rates; specifically, 29 CFR 5.2(1) states,

> "Every person paid by a contractor or subcontractor in any manner for his labor in the construction prosecution; completion or repair of a public building or public work...is 'employed' and receiving 'wages' regardless of any contractual relationship alleged to exist."

Therefore, we have adjusted the amount of funds being retained.

As you will see from the payroll copies enclosed, the hours of work shown vary from the original payrolls submitted by Ground Up Construction. If you have any dispute with the hours shown, please submit any documentation or other evidence you may have that supports your contention(s) to me at the address shown above.

If you agree with the time shown, please inform our office of the action you wish to take to have these wages paid. Whatever the case, please respond to this letter by February 10, 1984.

If you have any questions, please feel free to contact me.

Yours,

Bruce Silverthorn

Dear Mr. Freeman:

RE: ASD-SERVICE HANSCOM SPORTS COMPLEX
PWA 1183-025

On December 22, 1983, we wrote to the Anchorage School District to explain that we were investigating the wages paid to the employees of Ground Up Construction. Ground Up Construction is a subcontractor of L & H Enterprises, Inc. on this project. Our letter directed you to withhold a total of $13,129.00.

Since that time, we have been provided with additional information on the total hours worked by the Ground Up Construction employees, as follows:

Gary Sterba

Laborer

157 s.t. hrs.	@ $ 18.82	=	$ 2,954.74
59 o.t. hrs.	@ 28.23	=	1,665.57
216 f.b. hrs.	@ 5.65	=	1,220.40
			$ 5,840.71

$ 5,840.71

Denny Thomas
(117 s.t. hours, 51 o.t. hours)

Laborer (80%)

93 1/2 s.t. hrs.	@ $ 18.82	=	$ 1,759.67
41 o.t. hrs.	@ 28.23	=	1,157.43
134 1/2 f.b. hrs.	@ 5.65	=	759.93
			$ 3,677.03

Operator (20%)

23 1/2 s.t. hrs.	@ $ 23.84	=	$ 560.24
10 o.t. hrs.	@ 35.76	=	357.60
33 1/2 f.b. hrs.	@ 5.45	=	182.58
			$ 1,100.42

$ 4,777.45

Ed Gutosky
(117 s.t. hours, 51 o.t. hours)

Operator (80%)			
93 1/2 s.t. hrs.	@ $ 23.84	= $	2,229.04
41 o.t. hrs.	@ 35.76	=	1,466.16

		$	4,428.23

Laborer (20%)			
23 1/2 s.t. hrs.	@ $ 13.82	= $	442.27
10 o.t. hrs.	@ 28.23	=	282.30
33 1/2 f.b. hrs.	@ 5.65	=	189.28
		$	913.85

$ 5,342.08

Andy Sterba
(64 s.t. hours)

Truckdriver (80%)			
51 s.t. hrs.	@ $ 19.80	= $	1,009.80
51 f.b. hrs.	@ 6.89	=	351.39
		$	1,361.19

Laborer (20%)			
13 s.t. hrs.	@ $ 18.82	= $	244.66
13 f.b. hrs.	@ 5.65	=	73.45
		$	318.11

$ 1,679.30

TOTAL WAGES EARNED = $ 17,639.54

In accordance with the provisions of Title 36 of the Alaska Statutes quoted in our previous letter, we are hereby directing the Anchorage School District to adjust the amount of funds withheld from the L & H Enterprises, Inc. contract to $17,640.00.

In closing, I would like to ask once again that you confirm to us in writing that you have complied with this demand for withholding. As mentioned in our first letter, failure to comply may result in further action by the Department of Labor in accordance with A.S. 36.05.030(b).

If you have any questions, please contact Bruce Silverthorn or myself, and we will assist you.

Very truly yours,

Jean Morgan

Re: Anchorage Service-Hanshew Sports Complex
PWA 1183-025

Dear Mr. Silverthorn:

Your letter to L & H Enterprises of January 31, 1984, with regard to the above matter has been referred to me for response on behalf of L & H. I have ceased to be amazed at the lack of due process which your department appears to favor in these matters, at least as it as been demonstrated in this case.

To begin with, the thrust of your letter is directed at my client, the general contractor, not at the employer of the employees who have not been paid as required by the law you seek to enforce. What action is being taken with regard to Ground Up Construction and its co-owners, Gary Sterba and Dennis Thomas, in this regard? What do they propose to do about paying the wage claims of their employees, is the more appropriate question that should be asked at this time. Furthermore, what action does your department intend to to take with regard to the statutes that set forth sanctions for failure of an employer to file timely certified payroll records and fail to properly pay prevailing wage rates to its employees?

Under any reasonable procedure, one would have every reason to expect that the administrative procedures available to your agency would be exhausted in dealing with the party who is directly responsible for the problem - the employer. Yet your letter does not even address that subject matter, but addresses the subject to L & H Enterprises as if L & H was the actual employer of the workmen in question.

As you very well know, we do dispute the hours shown by Ground Up Construction. For whatever reason, your letter completely fails to address the fact that, without any obligation to do so, we submitted to you a sworn affidavit of Junior Russell dated December 16, 1983, setting forth the basis for our challenging the payroll record of Ground Up Construction, as then known. We realize that you have received more recent information, but that more recent information has resulted in a substantial increase in the amount of hours allegedly worked, whereas Mr. Russell's affidavit demonstrated that the earlier smaller alleged payroll record was grossly excessive.

Furthermore, the form in which you have provided us the alleged hours worked is utterly useless in our being able to make a response with regard to disputing those hours. No attempt is made in your attached letter of January 31, 1984 to the school district, wherein the hours are set forth, to show on what days each increment of hours was put in. Obviously that is the only way that we would have to challenge the hours shown.

Third, whatever happened to the right to a hearing on a dispute of this type. From the tone of your letter, our entitlement to be heard is apparently going to limited to submission of documentation or other evidence that we have that supports our contentions. This is very disturbing inasmuch as your letter failed to note that we had already submitted a substantial sworn document which very extensively challenged the claims being asserted by Ground Up Construction and its employees.

In addition, we had previously advised you that a portion of the work provided by Ground Up Construction at Anchorage Service-Hanshew Sports Complex was performed directly to the account of the Anchorage School District, and not under the subcontract with L & H Enterprises. Nevertheless, neither your letter to L & H Enterprises or your letter to the school district, both of which are dated January 31, 1984, deal with this question. A hundred percent of what you are asking the school district to withhold is being asked to be withheld from L & H Enterprises contract. Obviously, no matter how the statute and regulations you are attempting to enforce are interpreted in the final analysis, there would be absolutely no right for anybody to have the school district withhold monies from L & H Enterprises for wages owed by Ground Up Construction to its employees for performing services to the direct account of the Anchorage School District.

Concerning your advise with regard to the entitlement of owner/ operators, as you well know, we intend to challenge that, if necessary, to the highest court. The interpretation is being made

of a regulation which does not expressly say what you say it says. In other words you are interpreting what the words mean. The regulation only has such scope, force and effect as the enabling statute gives it, and there is nothing under the statute that gives the Department of Labor the right to establish a regulation which would require an upstream contractor to pay a defaulting subcontractor owner/operator prevailing wage rates.

We hereby demand our rights as established by law to the benefit of the administrative procedures pertaining to such matters. Furthermore, we request an answer to the inquiries we have made above.

Should you see fit to provide us with a breakdown of the hours claimed by Ground Up's employees and owners, on a day-by-day basis so that we can evaluate them, we will be happy to make a further evaluation. However, we question whether such an analysis would be a waste of time, since you have obviously disregarded Mr. Russell's previous sworn analysis.

Very truly yours,

Re: Anchorage Service-Hanshew Sports Complex
PWA 1183-025

Dear Mr. Silverthorn:

You will recall on February 21, 1984 our telephone conversations regarding the fact that, even the most recent revised proported payroll records produced to you by Ground Up Constructions were not presented under oath. You stated that Mr. Sterba was unwilling to provide a "certified payroll", on the ground that he felt such certification constituted a representation that the payroll had been paid, when it had not.

Accordingly, I requested that you obtain from Ground Up Construction a sworn affidavit to the accuracy of the information contained in whatever payroll record Ground Up intends now to rely upon. You advise that that would be an easy thing to accomplish, and that you would do so and send me a copy of the affidavit immediately.

We are now approximately one full month since that discussion, and I have not received any such affidavit. Has Mr. Sterba declined to provide one? When may we expect to see some sworn support for this oft changed and perhaps in the future often changing payroll "record?"

I attempted to call your office on March 19, only to be advised that you were gone on personal leave until April 1. I trust you will respond to this promptly after your return.

Very truly yours,

MEMORANDUM

TO: File

FROM: SSD

DATE: 12/19/83

Re: L & H Enterprises v. Ground Up Construction

On this date I spoke at length with Bruce Silverthorn regarding the status of the matter. He is expecting to meet with Gary Sterba on the morning of December 20, 1983. He indicated that he had not told Sterba that he would be ordering the School District to pay the wages. He will, however, be instructing the School District to withhold a sufficient sum to cover wages that he thinks from his preliminary inquiry may be due.

I informed him of the affidavit prepared by Junior Russell from the L & H job logs, and agreed to deliver a copy of the affidavits to him as soon as possible. I sent it with Sharon on the afternoon of 12/19/83. I also read from it the conflicting information from the certified payroll records.

He indicates that a couple of the employees have even filed conflicting claims indicating that there is more owing them than is shown on the certified payroll submitted by Sterba.

Once again he reiterated his belief that owners were entitled to payment under the Act as well as regular employees. I pointed out to him that, before he made a major mistake in enforcement, he should inquire for an opinion of the assistant attorney general that advises the Department of Labor. He also indicated that his research had shown that Gary Sterba was the only owner shown on the contractor's bond and business license. I pointed out to him that was irrelevant, for purposes of this job, since Denny Thomas had held himself out and signed the contract as a co-owner. Hence Thomas should also be dealt with as an owner with regard to this claim. I further urged him to obtain an opinion on this from the attorney general's office.

Silverthorn admitted that he was not attorney, but was simply following enforcement practices that are apparently well established in the department. They have apparently routinely been enforcing payment of wages to owners, as well as to employees, where the situation has arisen.

I also insisted that he take any further information from Sterba, Thomas or the employees under oath, since we wanted the sanction of perjury over their heads if they lied. He sounded as if he really did not intend to do that since his only purpose was to determine whether wages were due, and not to make a case for anybody. I pointed out to him that, obviously, his function was to get to the truth and the best way to get to the truth was to take testimony under oath

particularly where there were major conflicts. I pointed out that, if he required all of the evidence to come in under oath, he was much more likely to get to the real truth earlier.

I also pointed out that some of this work had been done by Ground Up directly for the account of the School District, and that we were being charged as if it was done for us. He indicated that he would check with Hanscomb Herry to find out about this aspect.

cc: Len Hannaman

State of Alaska)
) ss.
Third Judicial District)

To Whom it May Concern:

I am no longer an employee of L & H Enterprises, Inc. Therefore, not having the employee to company loyalty I have also had a past acquaintance and friendship with Ground-Up Construction, as well as a working relationship with them. I believe I am a neutral party in this matter of L & H Enterprises, Inc. vs. Ground-Up Construction.

I remember the contract very well, as I negtoiated it with Denny Thomas per instructions from Gary Sterba. Denny Thomas informed me that he was co-owner. I did not question if that meant, all past work, all future work or just this particular job.

On August 3, 1983 and August 4, 1983, Denny Thomas called Bob Kirkman (L & H Office per phone record,) to get L & H Enterprises' record of days worked on this job by Ground-Up personnel. These I supplied after our office notified Ground-Up to send copies of Certified Payroll. I have noted several discrepancies from our job log and time sheets turned in by Gary Sterba.

The record shows 2 loads of pipe hauled in, 2 loads of asphalt and broken concrete hauled off. The last load going with trailer and backhoe, therefore, the work was not in excess of four each ½ days for the truck driver, or a total of 2 full days. Note: Total job they show the time for truck driver as 8 days. There was not any fill or bedding hauled to the job. This man was not on the job 8 days.

A copy of the Certified Payroll time sheets turned in by Ground-Up Construction no way matches the job log. Time sheets for the week ended July 3, 1983 and for the day of June 27 show Gary Sterba working 16 hours. The job log shows him arriving on the job at 10:00am. As he indicated working 16 hours, this would mean he would not have gotten off until 2:00am the next morning. Also his certified payroll show his men working the same day, only got 11 hours. Something is amiss in their records. On July 11, 1983 the log book shows Ground-Up (Gary Sterba and Denny Thomas) arriving on the job at 3:00pm then showing on the time sheet only Gary Sterba working 12 hours. No one else from Ground-Up was working. On July 14, 1983 shown by log book, Gary Sterba left the job at 11:30am yet claimed 8 hours.

We have to assume the time sheet of week ending June 26, 1983 is really week ending July 17, 1983. Week ending June 26, 1983 is a week before their job even started. It looks as if after L & H Enterprises, Inc. gave dates of work on job, that Ground-Up went back 6 weeks and guessed on hours worked, and not very accurately I might add.

On July 17, 1983, Ground-Up Construction worked on contract between Anchorage School District and Ground-Up, a separate contract to that of ours, yet Sterba is claiming 8 hours of time to the L & H job. On July 15, 1983 they were working on the afore mentioned contract and charged L & H Enterprises 12 man hours. This is confirmed by our job log. Perhaps Certified

Payroll on the other contract with the School District will show this discrepancy. Maybe an oversight on their part. It is impossible from the Ground-Up time sheets to match our job log.

Andy Sterba was never an operator on this job yet time sheets show him as such. It is real confusing as to what they are trying to do. It looks as if they are guessing on their hours rather than being accurate.

I have no argument on hours for Denny Thomas. Though accurate hours on him were not properly kept, as he would leave the job during work hours and did so on many occasions and would also show up late. He was looking and bidding other work and charging hours to L & H job as it appears and was told to me.

The most accurate hours would be on Ed Growkoski. However, both Ed Growkoski and Gary Sterba are listed as operators on the same days. It is very hard in an 8 hour day to get in 16 hours of operators time on one piece of equipment. They only had one backhoe.

As a former employee of L & H Enterprises, Inc. I am under no obligation, connection, or ties with L & H Enterprises, Inc. at this time.

If I may be of further assistance please be advised that I will be gald to help. Log books, time sheets and personal knowledge of the above is true to the best of my knowledge.

Best Regards,
JR Russel

720

Bill No. House Bill 720

Title "An Act relating to electrical codes."

Date

Contact: Eileen Plate 465-2750
Bob Bacolas 465-4870

The National Electrical Code is updated every three years, and the 1984 code is the most recent effort in this regard. The 1981 code presently in effect for the state of Alaska is, therefore, outdated and will not be reprinted. Adoption of the 1984 code would bring Alaska's minimum standards into conformity with those commonly accepted and used by industry across the nation. The latest edition of the National Electrical Code is also commonly adopted by political subdivisions in the state as the minimum standards enforced under their building inspection programs.

The Department supports adoption of the 1984 code. It will not have a fiscal impact on the Department.

SEAFOOD'S FUTURE

SALES STILL FLAT

As economists talk healthy retail sales, surprising unemployment drops, and steady economic recovery, seafood dealers are becoming weary of the good news. The recovery has not yet touched seafood sales, which remain depressingly flat.

Holiday sales of specialty and shellfish items did not materialize as expected. Confusion in the shrimp and scallop markets has kept buying at a hand-to-mouth level. Fish inventories are running 13 percent higher and shellfish inventories 16 percent higher than one year ago, mostly due to cod and shrimp.

The strong U.S. dollar has attracted imports from all over the world, intensifying competition for traditional suppliers. In the shrimp and scallop markets, prices have hit resistance levels. The U.S. dollar continues at record-high levels and is expected to remain strong, dampening exports.

With Lent starting almost one month later this year than last (March 7 as opposed to February 16), more time is available for planning promotions and for suppliers and buyers to establish programs.

Despite the doldrums, there is good news on the horizon for seafood consumption. Beef, pork, and broiler prices are expected to rise in the spring, as supplies dwindle. An explanation by David Stroud follows on page 11.

The relationship between higher prices in competing protein sources and increased seafood consumption is made clear by a recent USDA report tying changing incomes and prices to consumption. Data on per capita consumption and prices of red meats, poultry, and fish in the U.S. from 1950 to 1978 showed that for every 1 percent rise in the price of red meats, red meat consumption is reduced 0.68 percent. At the same time, poultry consumption increases 0.56 percent, and fish consumption increases 0.16 percent. Thus, if beef prices rise the 2 percent predicted in the first half of the year, fish consumption should increase a minimum of 0.32 percent. Since the price of broilers is also expected to rise, more consumers should turn to seafood.

As incomes rise, as they are expected to, shellfish consumption should benefit. According to the USDA study, a 1 percent rise in consumer incomes prompts a 0.68 percent increase in dollars spent on shellfish, the category among all meats and poultry with the highest positive reaction. Finfish expenditures increase 0.14 percent with a 1 percent rise in income.

Retail Price Index for Meat, Fish, Poultry

Amendments made to limited entry regulations

Plenty of changes have been made to limited entry regulations, and copies of the new regulations are available from: Commercial Fisheries Entry Commission, Pouch KB, Juneau, AK 99811, or call (907) 586-3456.

Some of the changes include the broadening of the definition of sablefish; rewording of gear codes to include power jigging equipment; changes in the boundaries of king crab administrative areas in the Bering Sea and Norton Sound; increasing the annual fee for Class VI permits from $15 to $30 for Alaska residents, and from $45 to $90 for non-residents; requiring applicants in limited entry fisheries to notify the Commission if they have not received confirmation that the Commission has received their application. □

Whitney processing plant closes

The *Whitney*, a processing barge owned by Whitney-Fidalgo Seafoods, is closing its doors following precipitous declines in shrimp and crab stocks. Plant supervisor Mike Thompson said the Dutch Harbor plant will probably remain closed in the near future.

Twenty people will be laid off by the closure and only one person will remain behind to maintain the barge. □

Naknek demo to chair new fish committee

Representative-elect Adelheid Herrmann (D-Naknek) has been selected by the majority coalition of the Alaska State House of Representatives to chair the Special Committee on Fisheries.

Herrmann is one of six rural legislators who have joined with other House members to form a coalition of twenty-seven members.

A Cold Winter Coming

for salmon buyers

by Brent Evans

'Salmon in the ice-box,
Salmon in the sink.
Salmon on consignment,
Floating in red ink.'

Step inside the corridors of any major processor or broker of frozen salmon and feel the chill. It's the cold draft of millions and millions of unsold frozen salmon; it's the despair of playing Japanese Roulette and losing.

"I've been in the fish business all my life. My father was a canner in Alaska . . . I've never seen it as bad as it is this year," says a manager of one seafood company. "Somebody's going to get hurt."

This year's Bristol Bay record run is a classic case of how volatile and dangerous the salmon market can be. By all accounts, both American processors and Japanese importers (trading companies and fishing companies) stand to "lose big" in 1983. Some companies, like Vanguard Fisheries, which filed for bankruptcy under Chapter 7 in Seattle, August 12, don't have the capital resources necessary to withstand initial losses. Other companies, already weakened financially by high interest rates and poor cash flows, could be forced into selling product at a loss in order to make their first quarterly payments to, as yet, friendly bankers.

Japanese buyers, too, are suffering from the plunge in the price of salmon. "We're absorbing most of the loss this year, not American processors," says a spokesman for one Japanese trading company. "We had the pre-season contracts based on the projected run and we lost. We had to take the salmon at the agreed upon price no matter what wholesalers in Japan will pay us for it. Unfortunately, most American fishermen and processors never, ever believe we lose money."

By all accounts, the knife cut both ways this year. Some American companies have reportedly done well by wisely sticking to pre-season arrangements and avoiding the temptation of bidding for fish without a guaranteed buyer. Most, however, took the fish. The excitement of the enormous run must have infected buyers as much as fishermen. How else to explain the enthusiastic buying of salmon that went on and on, days, even weeks after it was common knowledge that the Japanese weren't buying, that the Japanese were desperately trying to back away from previous commitments?

Frozen storage facilities in Seattle and Tokyo are bulging with salmon. The question is: whose is it? Reportedly, many American brokers and packers either didn't believe their Japanese counterparts that the market was bad, feeling they could hold out for higher prices, or they found transportation routes south overloaded and shipped salmon to Japan without a buyer. No one knows how many million pounds of sockeye left on trampers from Bristol Bay with no place to call home, but *everyone* knows there is a tremendous plug of fish in Japanese and American cold storage which inevitably has to be offered to the market at a price the market will accept. This year, for many, the price won't be enough.

How did matters get so bad, you ask. Well, fishermen aren't the only ones who know the price goes up sometimes, and sometimes it goes down. Despite the enormous financial and economic leverage of Japanese trading companies, the price of salmon *in Japan* depends to a great extent on the confidence of those closest to the market, the primary wholesaler. The Japanese wholesaler, or niuke (nee-oo-kay), is currently buying very little salmon, even though the price is low. He knows it will go lower. The danger for both American and Japanese

"Imported salmon fits neatly into an allotted time frame in the minds of most Japanese buyers," says one American processor who sells a great deal to Japan," right behind deliveries of Japan's mothership fleet and coastal fishermen, and right before the large Hokkaido chum runs in September and October. If the wholesalers lack the confidence to buy and distribute imported salmon aggressively during that interim, imported salmon could be largely ignored by the market."

That is the current dilemma. Though prices are low, wholesalers are only buying what they need on a daily basis. Why buy on speculation when any day now, some American packer is going to break, sell off his product at a loss and pay his banker?

Under normal conditions; the salmon market in Japan develops slowly each year. Buyers and sellers of the number and quality of fish available, of overall consumption, of last year's inventories, of weather and any number of other factors. Their profit margins are close, the volumes involved are large, and mistakes can be costly. They've all been burned before.

As a result, salmon consumption builds slowly. As projections and estimates match with actual harvests, as price expectations match actual prices, enthusiasm among wholesalers and retailers builds. Salmon gets sold . . . and eaten.

This year that scenario quickly fell apart. Even before the season began, the market was depressed by large inventories of frozen salmon from last year. Some estimates pegged the holdover as high as 70,000 metric tons, the highest level seen since the disastrous year, 1980. Still, Japanese buyers projected a

see **SALMON BUYERS** page 48

Fall 1983 Journal

continued from page 7

starting price for Japanese mothership salmon (semi-dressed, 3 fish/10 kilo box) at 1,750 yen/kilo, down from 2,000 yen the year before, but not all that bad either.

Every year, American and Canadian salmon get linked to this price, usually starting 200-300 yen lower for False Pass sockeye, and so on, for other areas. This year, working back from these prices and using projected runs in Alaska to estimate the overall harvest, Japanese importers made pre-season contracts with some American packers for a reported $1.65-1.75/pound. These prices in turn influenced processor-fishermen negotiations for ex-vessel prices. By July, the market, the importers, the processors, the fishermen—all were expecting an estimated 21 million salmon to be taken in Bristol Bay. Instead, 36 million were taken from the largest run in history. Wholesale prices plummeted. Mothership prices slid to 1,250 yen/kilo and purchasing of imported salmon ground to a halt.

Conditions were made worse, however, by a number of other factors. Russia closed its north Pacific waters to Japanese fishing ahead of schedule this year. Japan's mothership fleet returned home and its catch went on the market all at once, forcing down prices. In Bristol Bay, the salmon tended to be small, 2-4 pounds instead of 4-6 pounds and the enormous run coincided with sultry weather and warmer water. Combined with long holding times, these factors resulted in poorer quality, lower grade fish. The small sizes impinged upon both the pink and chum markets, and price fell.

For those who think having fish is the same as having money, the buying continued. Wiser heads got out fast. Japanese wholesalers were for a while "in an absolute panic." The buying stopped in Japan in the second week of July but went on for another two weeks in Alaska. For some who had turned down Japanese offers to buy at $1.60 the week before, there was only the bitterness of knowing no one would now buy their fish at any price.

Vanguard Fisheries is perhaps just the first to fall out. Owned and operated by Vince Goddard, a talented young entrepreneur with lots of Japanese expertise, Vanguard Fisheries aggressively sought fishermen and fish deals this spring. An agreement to market fish from the Copper River Fishermen's Co-op was one such arrangement. The company also took the plunge and set up processing operations and hired floaters, moving from brokering to buying their own, a calculated risk that didn't pay off. When the company filed for bankruptcy in early August, it listed assets of $300,000 and liabilities of $1,000,000.

The problem, then, is salmon: too much bought from fishermen at too high a price. Rumors in Seattle say that anyone that relied heavily on the frozen market this year could be in trouble. Most readers will know who they are.

The market right now is like the great earthen dam at the base of Mount St. Helens holding back what once was Spirit Lake. Everyone knows it's going to go, the only question is *when*. In the case of the salmon market in Japan, everyone knows the plug of salmon will have to go and that the price will fall with it. For some, there may be an axe on the way down, too. □

Tanner crab

Still scratching in Aleutians

There was little effort on the Aleutian tanner crab stocks after the April 15 closure of the Adak brown king crab fishery.

In the Western Aleutian District there was no fishing the last part of April and the season's catch stands at 463,000 pounds.

In the Eastern Aleutians a few local boats continued to scratch into May delivering about 10,000 pounds a week. As of May 4, the total harvest for the season was 516,000 pounds. □

Small fleet still on Bering Sea

In the Bering Sea the tanner crab fishery continued to be a shadow of days gone by. estimated 30 to 40 vessels continued to fish into the spring and, by May 4, had delivered 4.3 million pounds of bairdi and 11.7 million pounds of opilio tanner crab.

In 1982 the bairdi deliveries had reached 8.4 million pounds by the first of May and the opilio deliveries had reached 17.7 million pounds. There were more than 100 boats on the grounds during the 1982 fishery, about double the number of boats which fished the 1983 season. □

Shrimp

No joy at all in Kodiak

Kodiak fishermen have pretty much written off a spring shrimp fishery and are looking for whitefish markets. On April 25 the 86-foot stern trawler *Dawn*'s owners removed the vessel's outriggers as part of the conversion of the vessel from a double-rigged shrimp trawler

to a single-rigged dragger capable of mid-water trawling.

"It's the end of an era," commented part owner Al Burch. The *Dawn* was the first double-rigged trawler with a stern ramp to fish shrimp in Alaskan waters. It sailed into Kodiak in 1971, the year of the record 180 million pound shrimp harvest.

Robert J. Browning described the *Dawn* as "a pioneer vessel" which "quickly became a highliner," in his book "Fisheries of the North Pacific."

"We hope this will be the beginning of a new era—the era of whitefish," said Burch.

The Fish and Game research vessel *Resolution* left Kodiak May 9 to begin the annual shrimp survey, though biologists doubted there were any concentrations of shrimp left.

Recent work by Fish and Game biometrician Steve Thompson indicates there is a strong correlation between the decline of the Kodiak shrimp stocks and increasing water temperatures.

The recent warming trend, which began about 1975, was enough to cause stock reduction, Thompson's analysis of historic data showed. His work also indicated that shrimp stock declines are also correlated with the presence of pollock on the shrimp grounds. The presence of cod on the grounds is followed by a decline in the shrimp stocks a year later.

All three elements—warm temperatures, increased pollock stocks and increased cod stocks—are present in the Kodiak area. □

Shrimp
Cook Inlet looks bad

Cook Inlet's shrimp stocks appear to be collapsing and whether there will be a 1983-84 season depends on the results of the May 18-24 shrimp survey. "Even the areas not fished, the Outer and Eastern Districts, are affected the same way as the areas fished," reported the Homer shrimp management biologist.

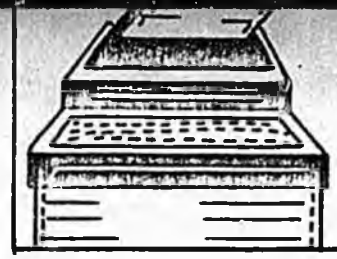
The disappearance of Cook Inlet's shrimp stocks coincided with the appearance of an unusually large biomass of young pollock. The pollock do not appear to stay in the inlet for more than a year.

Last year biologists saw the first evidence of a decline in the Cook Inlet shrimp stocks and slashed the quota from 6 million to 3 million pounds. Humpy shrimp populations were the first to disappear, followed by pink shrimp populations.

Despite one of the most conservative management strategies in the state, the shrimp population continued to spiral downward during the 1982-83 season. □

Whitefish
New pollock school found

A second major school of spawning pollock was discovered about April 20 by Mel Wick while enroute to Prince William Sound



FROM THE GROUNDS

Herring

PWS a bust with 2,600 tons

Bad weather and reluctant herring plagued this year's Prince William Sound herring fishery. During the only opening for seiners 2,600 tons of the projected 5,000 ton harvest was taken in the Naked Island area. The fleet then settled in to wait for the Montague run, but the Montague run never showed.

By the first week in April, marine mammals and birds were congregating in Prince William Sound right along with the seiners and tenders. Biologists estimated that the 20 companies buying herring had fielded "a tender for every seiner."

As 70 knot winds whipped the sound April 3, most of the fleet huddled in Cordova Bay. "It's like a floating city out there," commented one resident.

On April 11 snow fell in Prince William Sound and some boats reported three inches of the stuff on their decks. Snow and fog kept the spotter planes out of the air and fishermen worried that the herring might spawn befo anyone knew the fish were ripe.

On April 14, despite blowing snow and rain, the Naked Island run boiled up. Spotter planes were forced to fly at 200 feet in order to see the fish. In one hour the estimated 70 seiners on the Naked Island grounds took nearly 2,600 tons of herring.

In Montague Island's Rocky Bay the weather was so bad and the water so stirred up no one could see fish and the boats had to set blind.

"Even so six or seven boats managed to set on herring," said the Cordova Fish and Game management biologist. Total catch from Rocky Bay was 146 tons.

The big surprise was the size of the herring in the Naked Island area. "They're the biggest herring we've ever seen—very comparable

Spring 1983 Fish Journal

station in Cordova for five-day periods, and will bring with it a double crew to insure 24-hour operation. □

Processing Wrangell plant closed for 1983 season

Harbor Seafoods, Wrangell's only seafood processing plant, closed its doors in early May and says it will not operate for the remainder of the 1983 season. A spokesman for Harbor Seafoods said the company has suffered significant operating losses during the past several years and would have again lost money had the plant remained open.

Harbor Seafoods is owned by the Alaska Lumber and Pulp Company, a subsidiary of a Japanese-owned corporation. The timber company acquired Harbor Seafoods in 1974. The Wrangell plant employed about 20 people, but during the peak of the salmon runs the work force swelled to over 100. Harbor canned and froze all species of salmon from seiners, gillnetters and trollers delivering there and to the company's tenders. □

Canadian seized for poaching

The U.S. Coast Guard seized the Canadian halibut longliner *Cassiar 67* in Dixon Entrance for illegally fishing in U.S. waters. The cutter *Cape Hatteras* intercepted the Canadian fisherman 40 miles south of Ketchikan shortly after midnight on May 11.

any renegotiation of the U.S.-Canada salmon treaty which has been stalled by vehement opposition from Alaska's fishermen. The British Columbia position was conveyed to Canada's Minister of Fisheries, Pierre De Bane, in Ottawa on May 11. De Bane is expected to issue a statement on his country's position on the treaty by the end of May.

The Canadians have threatened a fish war in the event the U.S. refused to begin managing along treaty guidelines this season. In such a "war" Canada would cut enhancement efforts on rivers shared with the U.S., increase catches on those rivers, and allow their troll fishery to take king salmon in much larger numbers

Alaska and the U.S. responded to the Canadian threats by categorically refusing to consider a fish war as a viable response. Alaska Commissioner of Fish and Game Don Collinsworth said, "Alaska will not fire the first fish," when asked about participation in a dispute. Alaska Governor Bill Sheffield is personally overseeing the feelers from Alaska, through the State Department to Canada and has thus far assumed a conciliatory stance. However, Sheffield has outlined his objections to the current version of the treaty and clearly will not accede unless some changes are made. The consensus among U.S. fishing interests and politicians remains in favor of a treaty, but against the present version. □

Hoax brings false lead in 'Investor' murder case

Mike Douville

A former mental patient in Indiana claiming to know the whereabouts of a surviving crewman from the fishing vessel *Investor* led Alaska detectives on a chase to that midwestern state in April, according to a story in the *Bellingham Herald*. The *Investor* burned off Craig during the 1982 season after its skipper, his family and crew were murdered.

The tip from Indiana proved to be a hoax. It began on April 11 when a man telephoned long distance to Alaska State Troopers in Ketchikan and asked where he could contact the parents of one of the *Investor* [illegible]

impossible.

The man who called Ketchikan described the crewman "down to the last hair," according to the Troopers. He also knew the answers to questions about the case that investigators believed were known only to them and the killer or killers.

Investigators learned that the long distance call was made from a home in Goshen, Indiana, and they contacted the Goshen police. Two Alaska detectives then flew to Indiana and, with the Goshen police, took the caller into custody April 24.

Under questioning, the man's story held up for about two hours, according to the investigators, but eventually it broke down and deteriorated into a wild tale laced with paranoid conspiracy theory and inaccuracies about the murders.

Investigators then learned the man's real name from a mental hospital to which he had [illegible]

Hard times

Sealaska backs out of NEFCO deal

After flirting with the idea for over two years, Sealaska has backed out of buying the Alaska processing plants of the bankrupt New England Fish Company (NEFCO).

The December 16 announcement is a blow to the settlement of the NEFCO estate, which is still trying to pay off a reported $35 million in unsettled claims.

Shortly after NEFCO went broke in May 1980, Sealaska agreed to pay the NEFCO estate $11.1 million for properties at Sand Point, Uganik, Chatham, Noyes Island, the Ketchikan Cold Storage, and the Totem Packing Company (formerly Nefco-Fidalgo Packing Company).

Sealaska lowered their original offer to $8 million in November because of the severe recession in the salmon industry. The purchase was also hampered by a still-pending class-action lawsuit called the Domingo case, in which a federal court found NEFCO liable for racial discrimination.

Sealaska spokespeople on numerous occasions said the deal would only be consummated if the lawsuit is settled.

Sealaska Corporation is Alaska's largest privately-owned business corporation and is the Alaska native regional corporation for Southeast Alaska.

Grace capsized and sank 22 miles north of Dutch Harbor on Aug. 14, bound for St. Matthews Island with fuel tanks full and loaded down with crab pots.

Lost are skipper Harold Pederson of Seattle; Randy Ficks of Seattle; Jim Converse of Engadine, Mich.; and Annette Fletcher of Port Townsend, Wash.

Surviving the sinking was a fifth crewman, Jeff Anderson of Everett, Wash., who escaped in a liferaft. He was picked up about 24 hours later by a Panamanian fishing vessel and taken to Dutch Harbor in good condition.

Anderson reported to Coast Guard authorities in Dutch Harbor that the crabber capsized so quickly that there wasn't time to send a May Day or put on survival suits. Other crewmen had escaped the capsizing vessel, he said, but they were limp in the water, and he was unable to paddle to them in the heavy seas.

The vessel had left Dutch Harbor after some temporary repairs had been made to her rudder system. Anderson reported to investigating Alaska State Trooper John Leonard that the vessel departed Dutch Harbor with "a slight list to port" and that the boat had been responding "sluggishly" during the trip. The search for the missing crewmen was hampered by heavy fog, said the Coast Guard. □

which sank after being hit by two giant waves, watched as a shark bit off the leg of crewman Dennis Murphy who then swam off to lure sharks away from him and a female crewmate. Crying, Boundy told the story to reporters from a hospital bed in Townsville, Australia. Murphy was killed, he said, and the sharks returned a few hours later and killed the woman. Six planes and a fleet of local trawlers searched for survivors for two days before finally spotting Boundy on Lodestone Reef, part of the Great Barrier Reef. □

Old NEFCO cannery to become a resort

The Chatham salmon cannery, located on the southeast corner of Chichagof Island, is slated to become a recreational community. The 55-acre property was purchased by three Juneau residents, including former Attorney General Av Gross. Built in 1905, the Chatham Cannery was purchased from the holdings of the former New England Fish Co. for an undisclosed amount. NEFCO closed the cannery in 1974 when it failed to meet E.P.A. standards; the following year a fire burned the main building. Plans call for a fuel dock, marina and general store. Other partners in the venture are Lee Coffman, president of Alaska Savings and Loan, and Bill Goertzen, a contractor. □

Low Prices and Short Season Squeezes Trollers to the Limit

by Karl Ohls

In the year when management had apparently stabilized, the Southeast troll fleet suffered an unexpected shock when salmon prices, all species, hit the lowest level in years.

"I hear it over and over again," said Jacqui LaRue, the Elfin Cove fish buyer for Pelican Cold Storage. "A guy bringing in a load of fish will say this is half of what he got last year."

Trollers have gotten used to premium prices for their fish, caught while feeding in saltwater, dressed on board the vessel and destined for the top quality market. From the fishermen's vantage point, the reasons for the price drop weren't clear.

Cal Boord, manager of Pelican Cold Storage, would only say that the prices "are reflective of the market situation worldwide." This means they were driven down by a combination of events, such as a devalued franc, high inventories, and, almost certainly, competition from Norwegian pen-raised salmon.

Whatever the exact cause, fishermen had the same answer when they were asked how their seasons were: "lots of fish, lousy price."

(At the dock in Pelican, the prices were $1.90 a pound for large red kings, $1.10 for medium kings, 73¢ for coho, and 35¢ for pinks. The buying stations, because of transportation costs, paid 5¢ less for each species.)

"I'd be sitting on top of a real nice season, except for the price," said Loren Carter of Tenakee Springs, skipper of the *F/V Relief*. He added that he won't be hurt by the season "because I've got the old slab paid for," but some other guys might not be so lucky.

Juneau resident Rod Pruitt, owner of the *F/V Kipling*, said, "Fishwise, I'm okay. I [illegible] I don't know if I'm going to make ends meet or not."

Chuck Piedra (*F/V Mercedes*) of Port Protection described 1983 as, "Financially, the worst season I've had in eight years."

The price for fresh troll-caught, dressed cohos is the real shocker. Jim Wild, an Elfin Cove power troller and handtroller since 1973, said that in a normal year he gets $10 for each 12 pound coho. "This year it's $6."

Jacqui LaRue, interviewed shortly before the Aug. 4 coho closure, said some guys had already

Troller Jim Wild: "We need help with the markets." Wild has developed his own markets for winter fish, but in the summer there are too many fish and not enough time.

Heading out from Elfin Cove: For Alaskan trollers, seasons are getting shorter and prices lower.

hung up the season and left. Some get disgusted and come in for most of the day. "Some are out twice as long because they're getting half as much."

Hugh Rietze, who, along with his wife Mary, buys fish in Elfin Cove for the Excursion Inlet Packing Co., said, "Of course nobody is happy with the price. But the fishermen have to realize there are ups and downs. I think most of them are taking it pretty well."

Alternate markets aren't really feasible for the trollers of the isolated north end. Jim Wild has his own markets for winter kings, but said that in the summer he handles too many fish. "It would take too much time to box them up and ship them out."

Wild is a recently elected member of the Alaska Trollers Association board of directors. He said he brought up at a recent meeting the idea of ATA somehow getting involved in the market situation. But the other board members felt there were too many issues upon us—the treaty, the single species fishery—to spend energy on it now." Others felt market problems should be left to the Seafood Producers Cooperative. Wild said there may be more interest in pursuing the matter at the end of the season.

"We need help with the markets," Wild said as he maneuvered his boat, the *Euphoria*, in the waters off Three Hill Island. Occasionally the conversation would be interrupted as he raised the line to bring in a coho or pink. "We can't dump off cohos at 68¢/lb. and expect to make any money."

With the troll seasons unlikely to improve, people in Elfin Cove and Pelican are starting to explore other ways of making a living, such as tourism. But there is uncertainty that people used to the rough and tumble commercial fishery would be able to comfortably cater to the needs of tourists and sportsmen. Also, no one knows if it would really generate enough business.

As for the future of the troll fishery, the fleet is divided into optimists and pessimists.

Jim Wild is an optimist. He points to the chinook quota not taking any further cuts and the unratified Canada-U.S. salmon interception treaty. "The governor is giving us support," he said, as he cleaned a humpy on one particularly slow day of fishing. "The state is starting to stand up for us and admit we exist. There's a heck of a lot more optimism than there was at this time last year."

He admits that there still may be some tough times ahead. "We've still got the treaty threat hanging over our heads."

Alaska trollers were outspoken in their opposition to the draft treaty because they felt the chinook cuts they would have to take were inequitable compared to what the Canadians would do in return.

Fred Howard, on the *Jolene M*, is also hopeful of better times ahead. He said there may be a light at the end of the tunnel in the governor standing up for the fishermen.

"Washington and Oregon are trying to get Alaska to sign the treaty," he said. "They ought to put their goddamn pressure on Canada and forget about Alaska because Alaska has things under control."

Rod Darnell of Elfin Cove is a pessimist. "As long as they keep a quota, there's no hope," he said. The managers aren't managing on the strength of the run, he added, and if there's a poor run it could be wiped out. Darnell's attitude toward management is that he's fighting a foreign government.

Darnell had spent the last couple days before the Aug. 4 closure rigging up a new trolling pole for his boat, the *F/V Pinta*. "I've only got one day of fishing left," he said. "Why should I rush out for 60¢ a pound?"

Darnell was optimistic about the fishery until he saw the price reduction. He caught 23 more king salmon than last year, but still isn't ahead. "I don't see how I'm going to make boat payments now," he said. "The state or the bank is going to repossess half the boats. The fishermen will become shoe clerks in town." He added that the only solution is to diversify into rockfish, cod and halibut.

Most of the fishermen on the north end commented on the high availability of king salmon in recent years. This was attributed to foreign trawlers being regulated a couple years ago to the west side of a longitudinal line running south of Yakutat.

The outcry over the presence of mysterious net-marks on troll-caught salmon also seems to have tapered off. Teresa Moen, the quality control supervisor for Pelican Cold Storage, said she does see quite a lot of them, possibly "more than one out of every hundred" fish. Rarely, though, are the marks bad enough that a troll salmon would be graded number two instead of number one.

Fish buyer Hugh Reitz in Elfin Cove said he's not seeing as many marks as in past years.

Still, almost everyone seems to have samples of nets, floats and other foreign fishing gear that they either found washed up on beaches or caught on their lines and stabilizers. The lack of marine organisms on much of the debris is evidence that it hasn't been in the water very long. This leads to the suspicion that some illegal foreign fishing is taking place close to Southeast.

All of these things add up to the conclusion that the troll fishery's problems aren't likely to be solved anytime soon.

Despite the preoccupation with the market problems, trollers still have plenty of complaints about the Alaska Department of Fish and Game's management of the fishery. For the last four to five years, trollers have been engaged in an ongoing battle with the state and federal fisheries managers over the optimum yield (OY) figure, or quota for king salmon. Each year, until this year, the trollers saw their allocation and seasons reduced so more chinooks could get back to the fisheries and spawning grounds of British Columbia, Washington and Oregon.

One common complaint was that when this year's quota was figured out, no one realized the prices would be so low.

"We could live with those prices if we could (continue to) fish," said Ernst Rasmussen, skipper of the

F/V Golden Eagle.

Even though all kinds of boats are used in the troll fishery, Rasmussen's vessel was one of the more unique sights in the Pelican boat harbor. It looks like a 53-foot pleasure craft. Rasmussen said he saw the trend in the troll fishery when he had it built in 1977. Just remove the trolling polls "and I can sell it as a yacht." No one would be able to buy it as a troller.

Myrl Hancock of Port Townsend, Wash., said his boat, the *F/V Murrlett*, and permit are now up for sale "for the simple reason that they've got me shut-down. I'm not allowed to fish." Hancock expects that his boat will stay tied up next year because no one will want to buy the package.

While Fish and Game catch statistics show that trollers are going to do the same or better than last year, no one in Pelican or Elfin Cove was very pleased with all the closures (Apr. 15 to May 15, most of June, and Aug. 4 to 14; also all federal waters from three to 200 miles shut down July 20).

Cal Boord at Pelican Cold Storage said the closure of the fisheries conservation zone certainly reduced his plant's ability to attract landings.

Rasmussen said that except for July, the closures came just when the fishing was getting good each month. Pulling out a tidebook and pointing to the series of building tides in early August, he said he would "trade all the rest of the year for the days from August 7th to the 17th."

'There's going to be more people winter fishing than anybody has seen before.'

The seasons and the prices are going to "force people to winter fish," said Fred Howard, from Whidbey Island, Wash. "There's going to more goddamn people winter fishing than anybody has seen before. Half the goddamn quota will be filled" (by spring).

The closures and the prices also have a major impact on the troll fishing communities and on the businesses that service the fleet.

"I have a feeling a lot of people are just making do with what they have to have," Walton said. "If it's not essential, they're getting it fixed. He added that between prices and the pressure of the season, a lot of fishermen don't want to lose fishing time driving into the cove to get something repaired.

Leslie Dudley manages Swanson's General Store in Elfin Cove. She has noticed that fishermen are very cautious with their money; they just buy the basics, "milk, eggs, bread."

Vivian Max, a lifelong Pelican resident and the owner for the last ten years of Vivi's Cafe, said she used to be able to get up in the morning, look at the boat harbor, and tell how busy her day was going to be. Now, they "all come in at once and leave at once."

Sitting at a table in her cafe, Max said, "Today (Aug. 5) probably is one of my busiest days all season. You can see the difference between yesterday and today." This unevenness causes problems in ordering food and hiring employees. Nonetheless, "I'll still keep going as long as it doesn't get worse."

Still, some people have tried to think up solutions. Juneau troller Rod Pruitt on the *F/V Kipling* has a simple solution to the whole dilemma. First, he said, adjust the Fraser River section of the proposed treaty so that the Canadians get 60% of the sockeye run and the Americans 40%. In return for this, he believes, the Canadians will allow the Alaska trollers the 20 year average of their king catch, 300,000. The last thing that needs to be done is reopen the traditional trolling grounds west of Cape Suckling to relieve pressure on Southeast.

"With those three simple things, we could do it," Pruitt said. "We could survive under a number and the troll fleet could return to a state of health."

Management and market problems often have a way of resisting simple solutions. Unforeseen things crop up.

Asked about the future of trolling, 23-year-old Dwight Riederer, skipper of the *Wendy A*, said his hope was that "20 years from now, I don't want to be down in Ketchikan, huddled around my stove, waiting for a 10-day opening in July." □

King crab demise hastens switch to groundfish

By ANDREW MacLEOD
United Press International

KODIAK — Collapse of Alaska's red king crab stocks — once the jewel of the Bering Sea — has spurred American fishermen to enter the foreign-dominated deep water fishery, officials say.

"The decline in the king crab fishery is largely responsible for the development of the bottom fishery as we know it today," said Jeff Stephan, manager of the United Fishermen's Marketing Association.

While some in the crab fleet are shifting to such species as cod and halibut, owners of many of the larger boats are concentrating on the ground fishery.

The ground fishery includes pollock and other high-volume, low-price species. It traditionally has been bypassed by American fishermen who concentrated on catches of lower volumer and higher prices.

Until the passage of the 200-mile limit in 1976, Americans had little opportunity to claim the 1.5 million metric-ton harvest of ground fish off Alaska.

"It is hard to say, but I would say you're looking in the next two years at 40 to 60 percent of the crab fleet seriously looking into, if not making, the necessary (mechanical) conversions," Stephan said.

The collapse of the red king crab industry came only three years after a record harvest of 190-million tons worth $169 million. The collapse has been particularly hard felt because recovery of the stocks is expected to be a slow process.

Cancellation of the season in September, the first time since statehood it had been closed, was prompted by decimated stocks. The exact cause, or causes, of the sharp drop in crab population is not known.

Disease, increased predation, a warming of water temperatures and just a natural change in the life cycle of the crab have been offered as answers.

What is known is that for several years biologists noted a drop in the number of young males entering the population and an alarming increase in the number of barren females.

"I don't think there is any one factor that is more responsible than others," said Martin Eaton, a state shellfish biologist who has studied the problem.

Biologists believe it will be at least eight years before the stocks recover. During that period, no commercial harvest is expected.

"The whole thing makes us pretty uncomfortable," said fisherman Vern Hall. "We've got a resource that is going down hill in several

See Page J-3, FISHERMEN

Fishermen gear up for ground fishery

Continued from Page J-1

ways."

With the prospect of a long wait before the red kings return, fishermen have an added incentive for considering the $300,000 to $750,000 cost involved in coverting their boats for the ground fishery.

Along the misty docks of Kodiak, which bills itself as the "King Crab Capitol of the World," not all are happy about the looming changes.

Control of the multimillion-dollar ground fishery off Alaska will not occur fast enough for some fishermen.

"Overall, I would say the vast majority of the people don't have the money to convert," said Ron Jolin, who operates a 90-foot schooner and 44-foot seiner.

In addition, there is little onshore processing capacity and the Alaskan fleet, for the most part, is diversified. To enter the ground fishery, some fishermen will have to forego other lucrative catches.

Jack Hill, operator of a 90-foot boat, said he would have to give up tendering salmon and fishing for tanner crabs and halibut to enter the ground fishery.

"Why should I convert?" he asked. "So I can give up (a good income) to get into a high-volume, low-price fishery."

However, some of the key historic obstructions to American fishermen entering the ground fishery, which is concentrated in the Bering Sea and dominated by the Japanese, are crumbling.

Japanese officials, faced with the prospect of being forced out of the 200-mile limit, agreed in November to nearly double their purchase from U.S. fishermen of the annual ground fish catch.

"The U.S. harvest has increased 10 fold since 1980 and the new agreement will put us in the range of 500,000 to 600,000 metric tons," said Bill Phillips, a fisheries expert on the staff of Sen. Ted Stevens, R-Alaska.

Anchorage Daily News/Craig Bartlett

Kodiak king crab fishermen deliver their prized catch in 1981 during better times.

Lack of onshore processing facilities has been addressed by legislation backed by Stevens that would ease financing for converting onshore plants to handle ground fish.

"I think the transition that is now under way is off the ground and rolling," Phillips said. "The full integrated system is within reach in 10 years. The (control of the) harvesting is within reach in five years."

Counting onshore processing, Phillips estimates the ground fishery off Alaska could develop into one of the largest in the nation.

"We've called it a billion-dollar fishery when you look at the processing and associated industries," he said.

The shift in product harvested also would bring a change in markets and put the U.S. into competition with large-scale fishing nations, according to industry officials.

"With a ground fishery, you're talking a different ballgame. You're looking at a world market," Stephan said.

Strapped gillnetters blame politics

by Andy Ryan
Times Juneau Bureau

Juneau — Despite record runs of sockeye and pink salmon this year, gillnet fishermen in Southeastern Alaska say they are on the brink of financial ruin.

They blame their problems largely on past policies of the state Board of Fisheries, which they say have discriminated against them in favor of purse seine fishermen.

Two weeks ago, gillnetters presented Gov. Bill Sheffield and Fish and Game Commissioner Don Collingsworth with a set of statistics — culled from state records — showing that average Southeastern purse seine catches have jumped by 500 percent since 1975, while gillnet catches have stayed about the same.

The figures, compiled by Jeron Bruce, director of the United Southeast Alaska Gillnetters Association, also show that Alaskans hold about 69 percent of the state's 486 gillnet permits but just 45 percent of the 421 seine permits.

Seiners use a larger, different kind of net than gillnetters use. Also, seiners typically have a six or seven-person crew, compared to gillnetters, who tend to be soloists.

This year will bring the largest salmon harvest in the region since 1949, Bruce said.

But gillnetters' share of the take is expected to be about the same as in the past few years.

In fact, gillnetters' percentage of the total catch may be the lowest since 1900.

"Some people may be able to weather it better than others, but everybody is taking a beating this year," Bruce said.

The plight of the gillnetters, he said, has been caused by mismanagement in the Division of Commercial Fisheries and by "the political nature" of the Board of Fisheries.

Politics, he said, has kept gillnetters out of prime fishing areas, while purse seiners have filled their holds with salmon.

With Sheffield's election, however, and with his appointment of new members to the Board of Fisheries, gillnetters have begun to talk about a return to prosperity.

"We're real hopeful with the new administration," Bruce said. "There's a new commissioner of fish and game and an entire new board of fisheries. The time has finally come when the state is going to respond to the problems facing the gillnet fishery since 1977."

At their spring meeting, members of the Board of Fisheries voted that when they meet again in February they will take up how salmon should be allocated among fishermen using different type of gear. Previous boards had refused to consider the issue of allocation.

Steve Pennoyer, commercial fisheries director, said Sheffield and Collingsworth have agreed to try to bring seiners and gillnetters together before the board meeting to try to iron out their differences. But the state has been careful not to take sides in the matter, he said.

There is no doubt that seine catches have risen while gillnetters have been treading water, Pennoyer said.

But he noted that seine fishing on pink salmon stocks was cut back during the early 1970s for conservation reasons. It has been only recently, he said, that pink salmon — the mainstay of the seine industry — have made such a formidable comeback.

In the past, he said, the Board of Fisheries operated under the general axiom that fish stocks should not be reallocated — that is, dramatically shifted from one gear group to another.

"They thought that you shouldn't simply be able to waltz in and take the fish away from somebody else," Pennoyer said. If board members do decide to reallocate the fish, he said, they will be in for some tough choices.

Terry Gardiner, a former state representative from Ketchikan and a gillnet fisherman for 14 years, hung up his net this year and stayed home to work at his seafood packing business.

Before the number of salmon fishermen was restricted in the early 1970s, he said, there was a 35 percent annual turnover among gillnetters.

Gardiner said figures showing higher catches by seiners are a result of dramatic increases in pink salmon runs. And the areas where gillnetters fish aren't the areas where pinks are being caught.

As to the question of whether the Board of Fisheries has discriminated against gillnetters in assigning the areas in which they may fish, Gardiner said the board has simply maintained the status quo for the past 15 years.

"The board really hasn't done anything one way or the other. So they really haven't discriminated for or against someone, unless you initially make the moral judgement that the status quo was wrong," he said.

Gardiner was asked if, in light of changes in catch patterns in Southeastern Alaska, the salmon fishery needs to be reallocated between different gear groups.

"If I was a gillnetter I'd say it does, if I was a seiner I'd say no," Gardiner said. "If I was God, I'd say cut the baby in half."

Alaskan gillnetters feel they are being shorted in favor of purse seiners

Finance

$3 million in fed. loans ok'd

Three million dollars in emergency, low-interest loans have been made available from the federal fisheries loan fund through the Department of Commerce. The funds are intended to help fishermen avoid default on fishing vessel mortgages.

According to NMFS, the administrative agency in charge of the fund, mortgages must be on vessels of at least five net tons to be eligible for assistance. The money can be used to pay off mortgages incurred to finance the building, rebuilding, or reconditioning of those vessels.

One million dollars has been set aside for fishermen whose vessels are financed under the Federal Fisheries Obligation Guarantee Program. The deadline for application is June 1, 1984.

The remaining two million dollars is earmarked for fishermen whose vessels are not financed through the federal program. Application for this money is open from January 15 to March 31, 1984.

Sea Galley wants out of Seldovia plant

Sea Galley Stores, Inc., which owns Sea Galley restaurants, is trying to sell the Seldovia seafood packing plant it has owned for two years. The company blames heavy losses partially on the decline in king crab production and other operating problems.

The Seldovia plant produced portion controlled packages of crab, halibut, and salmon, most of which was for the Sea Galley restaurants. The company is also selling its meat processing and packing plant near Seattle.

At press time, no buyer had been found for the Seldovia plant on the south side of Kachemak Bay on lower Cook Inlet. Opening of the plant for the 1984 season will depend upon a successful sale. Numerous local fishermen have been delivering to Sea Galley.□

Crab stocks decimated; seasons canceled

By CHUCK KLEESCHULTE
Daily News business reporter

For the first time since statehood, Alaska officials Thursday canceled king crab seasons this year off Kodiak and in Bristol Bay because surveys show crab populations at critically low levels.

The closures by the state Department of Fish and Game in the two areas that produce most of the state's red king crab mean Alaska fishermen may harvest as little as 4 million pounds of red king crab this year, compared to 175 million pounds just three years ago.

Overall, the total harvest of all species of king crab — red, blue and brown — likely will be less than 25 million pounds in the 1983-84 season, officials say. That compares to 193.1 million pounds hauled in at the peak of modern crab catches in 1980-81.

The economic impact of the closure could be devastating for many Kodiak fishermen, who already are reeling from poor salmon harvests off the Southcentral island this summer.

"I've never seen a season this bad. It will just be disaster for a lot of fishermen. Hopefully, most will be able to hang on until tanner crab season opens (in February), but it is going to be tough," said Hank Eaton, a Kodiak commercial fisherman for 44 years.

Marty Eaton, a state regional biologist in Kodiak, said preseason surveys in Bristol Bay estimate there are only 9.6 million female crabs in the bay, down 50 percent from last year. The state estimates that 20 million females are needed to maintain healthy breeding stocks in the bay.

The number of male crabs in those waters was estimated at 1.5 million, the lowest ever recorded.

Last year Bristol Bay produced 3 million pounds of red king crab. The state estimates the bay could have produced only 1 million pounds this year if the season had opened, but only at the risk of destroying future harvests.

Off Kodiak, where stocks are sampled by a different method, estimates are that there are only 5.5 million pounds of male crab, compared to 30 million pounds just two years ago. Many of

See Back Page, KING

King crab

Continued from Page A-1

the female crabs surveyed off Kodiak were barren of eggs, leaving less than 70 percent capable of reproduction, compared to more than 90 percent two years ago.

Biologist Eaton said that in Uganik Bay off Kodiak, every female crab tested was barren of eggs.

"If this isn't a disaster, I don't know what is. It is precedent setting for us to close entire grounds, but we've never seen such dismal stocks before," Eaton said.

He said the state closed the Kodiak season, which would have opened Sept. 25, and the Bristol Bay season, which would have opened Oct. 1, because stocks are still declining after last year's sharp decline.

Eaton said the main cause of the fall in stocks seems to be the increase in cod and halibut that feed on king crab larva and immature crabs. "Our surveys are sampling record cod and halibut stocks. And we are seeing a decrease in undersized crabs that points a finger at cod as the cause," the biologist said.

The state is still trying to determine the cause for the great increase in barren females over the past two years.

Last year, fishermen netted $116 million off state crab stocks. With further increase in king crab prices likely to be triggered by the reduced harvest, state officials said it is too early to predict the final value of this year's catch.

The closure means that the total Alaska red king crab catch this year will consist of:

- 200,000 pounds caught off Southeast;
- 300,000 pounds caught in early August in Cook Inlet;
- 750,000 to 1 million pounds that are expected to be caught off the Alaska Peninsula; and,
- About 2.5 million pounds predicted for harvest off Adak.

UNITED FISHERMEN OF ALASKA

319 Seward Street, Suite #10
Juneau, Alaska 99801-1188
(907) 586-2820

Cass M. Parsons
Executive Director

RESOLUTION NO. 1

WHEREAS market value of Alaska salmon is depressed from the high levels achieved during the late 1970's and early 1980's by as much as 40% on some species; and

WHEREAS salmon fishermen from all areas of the state in response to the favorable economic conditions of the immediate past made substantial investments in up-grading their vessels and gear; and

WHEREAS many of these fishermen now in the areas of Kodiak and Cordova and tomorrow in other areas of the state are over-capitalized in relationship to the current market value of their products; and

WHEREAS many of these fishermen, who are professionals with years of productive experience, will soon be faced with the dismal prospect of defaulting on their vesssel and permit loans.

NOW THEREFORE BE IT RESOLVED that the United Fishermen of Alaska requests Governor Sheffield to take immediate action in determining the magnitude of this problem; and

BE IT FURTHER RESOLVED that a program be created and funded to assist those fishermen who can demonmstrate the potential to regain their economic viability in solving their immediate financial problems.

President

Date: 2/2/84

Juneau fish processing plant to close Dec. 31

By CHUCK KLEESCHULTE 12-6-83
Daily News business reporter

The only fish processing plant in Juneau will shut down and be put up for sale at the end of the year, the victim of high Southeast operating costs.

Kodiak King Crab Inc., a subsidiary of Ocean Beauty Seafoods, said it will close Juneau Cold Storage and sell the downtown waterfront property Dec. 31.

Victor Horgan, president of Kodiak King Crab, said in a phone interview from Seattle that the Juneau plant has consistently recorded operating losses. In recent years, it has been processing and freezing 3 million to 4 million pounds of seafood — red, chum, pink and coho salmon.

While declining to discuss the size of the losses, Horgan said the company had tried new measures during the past two years to stem the red ink.

"It's been a steady decline for the past three or four years. And we're convinced it just can't be turned around," Horgan said.

He said the plant was closing since its older equipment resulted in inefficiency and higher operating costs than newer ones in the state. And he said Juneau's location, a long distance from major Southeast fishing grounds, also hurt its chances for profitability.

The closing will idle seven full-time employees and nine hourly workers. During the summer, an additional 16 hourly workers were hired. The plant is Juneau's largest non-governmental employer.

Horgan said this summer the plant bought fish from 101 fishermen. The company is trying to help the fishermen find new buyers.

Horgan said the closing likely will not have a major effect on the state's fish processing industry.

The Juneau plant is owned jointly by the Japanese trading company Marubeni Corp. and by Ocean Beauty, a wholly owned subsidiary of the Sealaska Native Regional Corp. based in Juneau.

The closing will not affect Kodiak King Crab's Kodiak processing plant, Horgan said.

MEMORANDUM

State of Alaska
Community and Regional Affairs

TO: Lennie Boston, Special Assistant
Office of the Governor

DATE: January 24, 1984

FILE NO:

TELEPHONE NO: 465-4700

FROM: Jeff Smith
Deputy Commissioner

SUBJECT: Kodiak Near-Term Assistance Project

Attached is an executive summary for the project effort, as well as individual reports produced by each of the Departments represented on the interdepartmental working group. The executive summary represents a distillation of the positive action steps proposed by each Department that would contribute towards near-term economic relief on Kodiak Island.

DRAFT

Kodiak Near-Term Assistance Working Group

Executive Summary

An interdepartmental working group was convened January 12, 1984 to address Kodiak Island's current economic difficulties. The working group consisted of members from the Departments of Commerce and Economic Development; Community and Regional Affairs; Health and Social Services; labor; and Transportation and Public Facilities. The object of this working group has been to produce a report regarding the options and prospects for near-term assistance which the State could provide to Kodiak Island residents who are coping with dramatic declines in the region's fisheries related economy. This report focuses on specific actions which the State could take in the near future to provide for some level of immediate economic relief to the region.

This executive summary presents the cumulative positive actions proposed by the separate agencies which participated in the project working group. The work plan for this project is attached as well as the separate reports as provided by the participating agencies.

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

A. Loan Extensions. The Division of Accounting and Collections considers formal requests for loan extension on commercial fisheries loans issued by the Division of Investments. Most annual interest and principal payments are due in a lump sum each October and November. This year, 53 loan extension requests have been received from Kodiak Island.

Action Steps: Processing of extension requests are receiving priority attention. As of 1/20/84, 38 requests were approved, 1 request was disapproved, and 14 requests are under varying stages of review. All applications are expected to be processed by early February, 1984.

B. Bulk Fuel Loan. The Division of Investments has a bulk fuel loan program to assist small communties in the purchase of bulk fuel. The six outlying communities on Kodiak Island are eligible for this program. Loans are interest-free the first year, 5% the second year, and graduated upwards thereafter. Karluk presently has a loan; Akhiok would qualify for a second-year loan. All of the other communities could qualify for the interest free loan. Application requires a letter from an authorized community representative.

Action Steps: The DCED has initiated steps to inform all communities of the availability of these loans and procedures required to apply.

C. National Marines Fisheries Services loan Program. NMFS has a limited loan program ($3 million nationwide) designed to assist fishermen in making loan payments on their vessels. Tax and accounting records are required, the borrower must be in risk of default but not in bankruptcy proceedings, and the vessel cannot be secondhand. One year loans can be paid off over ten years at a rate of 3%.

Action Steps: The DCED has initiated steps to provide the Borough of Kodiak with appropriate regulations and information.

D. Fishermen/Vessel Matching services. Out-of-state vessels which fish off the Alaskan coast traditionally employ few Alaskans, since most gear up in Seattle. Alaskans have not actively pursued these positions. It is likely that many under-employed Kodiak Island fishermen are more skilled in Alaskan fishing than the present crews on these vessels.

Action Steps: The Office of Commercial Fisheries Development, DCED, has initiated conversations with the North Pacific Fishing Vessel Owners' Association for the purpose of determining the nature of potential job openings and to initiate a pilot program for matching those openings with fishermen on Kodiak Island interested in such employment. The Association responded positively to initial inquiries.

E. Tourism Survey. Several rural Kodiak communities have expressed an interest in tourism. There is, however, a lack of specific information on the characteristics of these communities that might attract tourists as well as a lack of market survey information on what potential tourists might be interested in and the kinds of services they would seek.

Action Step: The Division of Finance & Economics in Coordination with advocacy divisions within DCED has initiated a study which will survey rural communities on one hand and a sample of Anchorage's population on the other to determine the potential of tourism for rural kodiak communities.

F. Coast Guard Uniformed Service Provision. A number of maintenance services presently performed by Coast Guard personnel in Kodiak could be performed by the private sector.

Action Step: A letter has been transmitted from the Governor's Office to the Alaskan Delegation in Washington encouraging that such a transfer of maintenance services from the Uniformed Service to the private sector be considered.

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

A. Job Training Partnership Act (JTPA), Division of Community Development (DCD).

1. Matching Fund Assistance. JTPA offers a Dislocated Workers Program for residents who have been terminated due to industrial decline. Approximately $340,000 will be available (as of contract award in Feb., 84), $67,000 of which is state money. Program respondants (private-for-profit or non-profit) must provide an additional 25% in matching funds.

Action Step: The state could pick-up the 25% matching funds to facilitate access. Additionally, the DCRA will assist where possible in the local vendor application process.

2. Vocational Educational Funds. JTPA provides funding for a.) Employment Security counseling staff and b.) Pre-apprenticeship Training in building maintenance.

Action Steps: A supplemental appropriation could be targeted at providing such positions in Kodiak Island on a per-community basis. The building maintenance positions could be linked to proposed RDA building and hydropower projects.

3. Other JTPA Programs. JTPA offers On-The-Job-Training (OJT), Institutional Skills Training (IST) and Youth Programs (YP); all of which could be applicable to the diversification of Kodiak's fisheries industries. Direct infusion of job training/employment dollars into these small communities could provide for immediate economic relief. Lack of a private economy makes use of federal funds unlikely. Short-term assistance with OJT in the public sector, perhaps one to six jobs per community, could be accomplished through a direct grant to the regional non-profit for implementation.

Action steps: The state could provide additional immediate funding to these programs through a supplemental appropriation. Estimated cost would be $150,000 to $225,000. The Department's regional representative is in contact with City officials and community service agencies in regard to application of existing funding. DCRA's regional representative is currently negotiating with private industry in Kodiak with regard to IST contracts.

B. State Employment and Training Program (SETP), DCD. This program provides upgrade training and internships and would be applicable to the retraining needs of fishermen and fish processors in adapting to the new bottomfish industry. This state-funded program requires annual appropriations.

Action Step: An FY84 supplemental appropriation could be targeted to the Kodiak region.

C. State Low-income Weatherization Program, DCD. The Department has recently received two proposals from the Kodiak area: one from KANA ($182,000) to weatherize homes in Akhiok and Karluk; and one from ACDC for $1.5 million to weatherize homes in the City of Kodiak. At present, these proposals must pass through a competitive evaluation process and may or may not be approved and may be funded at a lower level than requested. The Department has received aproximately $15 million in requests and has aproximately $5.5 million available in program funds.

Action Step: The state could target a supplemental appropriation to assure the funding of these proposals, and perhaps additional, weatherization proposals and "fast track" the evaluation process.

D. Child Care Programs, DCD. Because of the economic difficulties in Kodiak, an increasing number of mothers wish to enter the active labor force. The lack of adequate child care facilities is a major constraint. There are three areas of critical need for which the state could provide additional near-term day care assistance: 1) more licensed child care facilities; 2) more program dollars to allow eligible families access to services; 3) additional training of staff and administrators.

Action step: The state could target a supplemental appropriation in the form of Child Care Grants to the communties on Kodiak Island.

E. Technical Assistance Grants, Municipal and Regional Assistance Division (MRAD). Existing FY84 program funds have been expended or committed.

Action Steps: A supplemental appropriation could be directed to providing technical assistance to Kodiak Island communities. Near-term benefits would derive most quickly from labor intensive projects such as community surveys performed in conjunction with longer term development concepts. Additional, funding could be targeted towards occupational training schemes which provide residents with maintenance and operational skills required for anticipated equipment or capital facilities purchases.

F. Rural Development Assistance, MRAD. Present program guidelines limit grants to $100,000 per community per fiscal year. FY 84 RDA funds have been disbursed or committed. At this time, there are several proposals submitted to the Department for FY85 consideration.

Action steps: A state supplemental appropriation could be targeted to each of the outlying six communities to be disbursed along the lines of the existing RDA program. The appropriation would be administered through the Kodiak Island Borough which has planning powers for Kodiak Island. Two general areas of program application would be the construction, expansion, and maintenance of community halls and the construction and maintenance of equipment storage facilities for existing or anticipated city equipment (oil trucks, graders, fire engines, etc.).

G. Capital Improvements Projects: Force Accounts, MRAD. Force accounts are where the community performs its own construction projects, in-house, rather than going out-to-contract. In this case, the community could hire local residents to perform the project. Small communities would need technical assistance/training in the efficient formulation and implementation of such programs.

Action Step: The Department would offer a program of training and follow-up technical assistance to support communities in this effort. This program would be well suited for placement in the Municipal and Regional Assistance Division and could be implemented rapidly.

DEPARTMENT OF HEALTH AND SOCIAL SERVICES

A. Office of Alcohol and Drug Abuse. The program caseload in the Kodiak area has more than doubled in the last year. The current economic problems have been identified as a major cause of this increase. This increase has forced the program to exceed appropriate counseler to client ratios. The Office reports that budget cuts last year necessitated the cessation of client services to residents of the outlying villages on Kodiak Island. In FY84 the Kodiak Council received a grant award of $265,000 requiring a local match of $29,400. The state has the option of waiving this match at any time.

Action Steps: An additional staff counseler should be added to the regional staff. This position would allow for increased aftercare and renewed outreach services to the six outlying communities. Additional travel funds would also be required. Total projected costs for the additional position and travel would be about $30,000.

B. Division of Mental Health and Developmental Disabilities. Based upon current trend information, there will be a major increase in demand for mental health services in Kodiak. This increase may be directly linked to the present economic difficulties. Unemployment both precipitates mental problems and precludes access to treatment without some form of financial assistance.

Action Steps: Two to five new positions are required. These should be local hire positions that would be involved with the residential training program as well the vocational rehabilitation cases (Trainers and Aides).

C. Division of Public Assistance. There is an increasing level of need and demand on DPA programs. Many households are seeking energy assistance (EAP) much earlier in the winter heating season than usual.

Action Steps: While DPA programs are reported to be well known in the region, DPA will initiate an outreach effort, including additional display advertisements in the local paper. An EAP outreach contract with the Kodiak Area Native Association has recently been executed. While recent increases in DPA caseloads have not been dramatic, DPA is "being particulary mindful" of monitoring caseloads in the Kodiak region in order to anticipate any dramatic increase in program demand.

D. Division of Family and Youth Services. The Division has experienced a 10-15% increase in caseloads in the Kodiak area during the last year.

Action Steps: Additional staff will be required. These would preferably be entry level positions such as Social Worker I or Social Service Associate III. Using an entry level position would promote local hire.

DEPARTMENT OF LABOR

A. Job Placement Assistance. Job Service personnel in Kodiak provide a wide range of employment placement services. These personnel work closely with managers of all plants on Kodiak Island to provide a service that promotes consideration of available workers in and around Kodiak.

Action Steps: To improve consideration for local hire of seafood workers, the State Seafood Placement Coordinator will revisit the Seattle offices of Kodiak plants in February and further encourage the use of job service in Kodiak ito obtain their workers. A special effort will be made to access federal emergency Veteran's Job Training funds by assisting local employers in the development of significant job training programs. Up to $10,000 in wage subsidy are available thrcugh this program, which offsets the employer's costs of trainings

B. Job Training Partnership Act (JTPA). Job Services functions as a liaison with the Department of Community and Regional Affairs and the Department of Education, to coordinate and provide JTPA services.

Action Step: Job Service will coordinate with the JTPA efforts described earlier under the Department of Community and Regional Affairs.

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

A. Local Service Roads and Trails Program. The Local Service Roads and Trails (LSR&T) program was initially created in 1971 to provide State grant funds to improve local community roads. The distribution formula and funding cycle for the LSR&T program significantly affects its ability to be responsive to Kodiak needs in any significant fashion. As an example, if the present annual appropriation were devided evenly among the six outlying Kodiak communities, roughly $22,000 would be available per community, which would barely cover equipment mobilization costs.

Action Step: Designate some type of add-on or supplemental funding for the Kodiak Island Borough Local Service Road and Trail Program. Given such funding as indicated, the following local projects, which have been identified for immediate construction, would in each case provide some near-term employment opportunities for local laborers:

1. Cuzinkie Boardwalk; $60,000.

2. Old Harbor Landfill Access Road Improvements; $250,000.

3. Port Lyons Road Rebuilding and Extensions; $2,000,000.

4. Karluk Upgrade of Road to Sanitary Landfill; $200,000

B. Early Implementation of Funded Capital Improvement Projects. The DOT/PF has identified a number of projects on Kodiak Island for which funding exists and which are essentially ready for construction. However, the only project which could in some manner be facilitated is the Mission Road Reconstruction Project. The Project will be ready for construction this spring, but at a reduced scope unless supplemental funding is made available. An expanded project would translate into immediate employment opportunities.

Action Step: Supplemental appropriation for the Mission Road Reconstruction Project of $340,000.

C. Expediting Federal Construction Programs. There is currently only one outstanding program reservation for HUD housing in the Kodiak area. The reservation is for 15 units in Old Harbor. The Kodiak Island Housing Authority has been unable to proceed because they cannot ensure HUD of physical access to the site. KIHA is working with BIA to secure a commitment for road construction; however, BIA has very limited resources.

Action Step: The DOT/PF could be useful in expediting the HUD construction project by supporting an Old Harbor access road. Near-term benefits would derive from both the road and housing projects. It is anticipated that such a project could begin by late spring and would cost approximately $400,000.

D. "Other" Projects. The DOT/PF has identified several Kodiak Island Projects which could provide some level of near-term economic benefit to local residents.

Action Steps:

1. Upgrade Dog Bay Small Boat Harbor; $800,000.

2. Construct Community Equipment facilities; $100,000 per facility.

3. Port Lions Ferry Dock Repair; $500,000.

4. Old Harbor Fuel Dock Repairs; $800,000.

KODIAK PROJECT
NEAR-TERM ASSISTANCE

WORKING GROUP PLAN

Work Group Members

DCRA: Jeff Smith (lead agency)
DHSS: Jerry Harris
DOT/PF: Riley Snell
ASMI: Bill Hudson
DCED: Bill Beardsley
DOL: Jim O'Connor

The object of this working group is to produce a report regarding the options and prospects for near-term assistance which the State may provide to Kodiak Island residents who are coping with dramatic declines in the region's fisheries related economy. This report should present specific actions which the State could take in the near future to provide for some level of immediate economic relief to the region. Where appropriate, supplemental funding requirements should be defined. If possible, the effects of various levels of supplemental funding should be identified. The report is to be presented, in final form, to the Governor's mini-Cabinet on Tuesday morning, 1/24/84.

In order to achieve this timeframe, the following work plan is suggested:

1/12 (Thursday, a.m.): First group meeting; scoping session to review the general task, discuss the interagency report on Kodiak economic conditions, discuss specific agency assignments and areas of research/report coordination. We should leave this meeting with a clear idea of what each individual is responsible for producing, as well as agreed upon times for submission of draft materials.

1/18 (Wednesday, p.m.): Second group meeting; exchange preliminary findings, discuss research/report problem areas.

1/20 (Friday, p.m.): Submission of final draft materials for inclusion into final report.

1/23 (Monday): Preparation of executive summary.

1/24 (Tuesday, a.m.): Report to Cabinet.

Preliminary task assignments, by department, are as follows:

I. DCRA

A. Lead agency responsible for working group coordination and production of executive summary.

B. Investigate "matching fund" constraints to community access to federal funding (BIA, HUD, etc.)

C. Investigate requirements of increased facilitation of RDA projects.

D. Investigate requirements for expanding the LEAP program (fuel supplement).

E. Assess levels of most critical, immediate, needs (Fuel, Food)

II. DHSS

A. Inventory the Departments programmatic activity in the Kodiak Island Area.

B. Investigate "matching fund" constraints to community access to federal funding (HSS, HUD, etc.)

C. To the degree possible, define present and projected increases in program use (WIC, Food Stamp, ADF, Mental health, Y&FS, etc.) attributable to the recent economic slowdown. Investigate the cost requirements of serving this increased need.

D. Assess levels of most critical, immediate, needs (health, social)

E. Research temporary employment opportunities of DHSS program activity.

III. DOT/PF

A. Investigate the costs and effects of supplemental appropriations for Local Service Roads and Trails funds.

B. Investigate the specific steps of early implementation of funded capital improvements in the Kodiak Island area.

C. Investigate facilitating early implementation of proposed federal construction projects (BIA, PHS, HUD) insofar as they might provide immediate employment opportunities.

D. Erosion Control Programs

E. To research availability for contracting out to communities maintenance for State facilities.

IV. DOL

A. Supplemental Job Service Activity.

B. Research DOL regulations to obtain hiring at the community level for capital construction this summer.

V. DCED

A. Investigate short-term projects, loan vehicles, that could provide interim employment opportunities.

B. Investigate expedient implementation of the Raw Fish Tax Credit Incentive Program as recommended by Governor's Fisheries Policy Task Force.

C. Investigate status of the Fisheries Industrial Technological Center proposed for Kodiak Island.

D. Summarize recent/ongoing studies regarding economic diversification on Kodiak Island (State, Chamber of Commerce activity, etc.).

E. Look at transitioning Coast Guard enlistment employment to civilian at Kodiak Base.

cc: Bruce Twombly, Commercial Fisheries Limited Entry Commission

NEAR TERM ASSISTANCE TO KODIAK
DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT
SYNOPSIS AND ACTION STEPS

Loan Extensions:

Synopsis: The Division of Accounting and Collections considers formal requests for loan extension on commercial fisheries loans issued by the Division of Investments. Most annual interest and principal payments are due in a lump sum each October and November. This year 53 loan extension requests have been received from Kodiak Island.

Action Step: As of 1/20/84, 38 requests were approved, 1 request was disapproved, and 14 requests are under varying stages of review. Processing of extension requests are receiving priority attention, and all applications are expected to be processed by early February, 1984.

Bulk Fuel Loans:

Synopsis: The Division of Investments, DCED, has a bulk fuel loan program, the purpose of which is to assist small communities in the purchasing of bulk fuel. Any "organized municipality or unincorporated village with a population under 2,000, or individual endorsed by the municipality" is eligible. All communities on Kodiak Island, except for the City of Kodiak, qualify for this program. Loans are interest-free the first year that a community applies, 5 % interest the second year, and graduated upward thereafter. Karluk presently has a loan. Akhiok would qualify as a second-year candidate (i.e., for the 5% loan). The remaining communities qualify for interest-free loans. Application procedures are very simple (basically a letter to the Division of Investments from an authorized community representative).

Action Step: DCED has initiated steps to inform all communities of the availability of these loans and the procedures required to apply.

National Marine Fisheries Loan Program:

Synopsis: NMF has a very limited loan program ($3 million nationwide) designed to assist fishermen in making loan payments on their vessels. Tax and accounting records are required, the borrower must be in risk of default but not in bankruptcy proceedings, and the vessel cannot be secondhand. One year loans can be paid off over 10 years at a rate of 3%.

Action Step: DCED has initiated steps to provide the Borough of Kodiak with appropriate regulations and information.

Fisherman/Vessel Matching:

Synopsis: Out-of-state vessels and fleets which fish off the Alaskan coast traditionally employ few Alaskans, since most gear up in Seattle, and Alaskans have not actively pursued these positions. Many of the crews hired are not skilled fishermen and few know the Alaskan fisheries environment. Further, on the surface it appears that there may be a significant number of Kodiak fishermen who might be available and qualified for such employment.

Action Step: The Office of Commercial Fisheries Development, DCED, has initiated conversations with the North Pacific Fishing Vessel Owners' Association for the purpose of determining the nature of potential job openings and to initiate a pilot program for matching those requirements with fishermen on Kodiak Island interested in such emplcyment. The Association responded positively to initial inquiries.

Tourism Survey:

Synopsis: Several rural Kodiak communities have expressed an interest in tourism. There is, however, a lack of specific information on the characteristics of these communities that might attract tourists and a lack of market survey information on what potential tourists might be interested in and the kinds of services they seek.

Action Steps: The Division of Finance & Economics, DCED, in coordination with advocacy divisions within the DCED has initiated a study which will survey rural communities on one hand and a sample of Anchorage's population on the other to determine the potential of tourism for rural Kodiak communities.

WHB:gr/1-23-84

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT
OFFICE OF COMMERCIAL FISHERIES DEVELOPMENT

POUCH D
JUNEAU, ALASKA 99811
PHONE: (907) 465-2518

January 20, 1984

Mr. Barry Collier, Manager
North Pacific Fishing Vessel
Owners' Association
Fishermen's Terminal
Bldg. C-3, Room 218
Seattle, WA 98119

Further to our telephone conversation this morning I would like to explain in greater detail the fisheries related economic problems being experienced by rural Kodiak fishermen and the possibility of our working together to place some of those fishermen as crewmen in the upcoming Shelikof Straits joint venture fishery. As you may know, two years of poor Pink salmon returns in the Kodiak area have combined with the collapse of the King Crab fishery to severely disrupt the economy of rural Kodiak. In such villages as Old Harbor, Ahkiok, Larsen Bay, and Ouzinke experienced purse seine/crab fishermen who own their vessels or operate cannery owned vessels are virtually without alternate employment opportunities, fisheries related or otherwise.

As I indicated in our conversation earlier today, I would propose that our office, NPFVOA, and possibly the Kodiak Area Native Association (KANA) work together in a "matchmaking" role, exploring the possibility of creating employment opportunities aboard some of your members' vessels during the 1984 Shelikof Straits fishery. I would perceive that the respective roles of our organizations would be as follows:

NPFVOA would identify vessel owners interested in participating with the program and outline basic requirements for potential crewmembers.

KANA would perform the outreach function and preliminary screening of potential crewmembers.

OCFD would coordinate the program and would further screen potential crewmembers to insure that only truly qualified applicants were introduced to vessel owners.

I would appreciate it greatly if you could present this idea to your Board of Directors and subject to their approval

proceed with some more detailed discussions, possibly during the upcoming NPFMC meeting here in Juneau. Clearly we are only in the conceptual stage with this idea and I'm certain that more discussion would lead to a better understanding of the options. Should we be able to reach some agreement, I fully understand that in no way would NPFVOA be in a position to guarantee any actual employment and that any hiring decisions will ultimately rest with the vessel owner(s) involved.

Barry, thank you again for your interest in this issue and I look forward to seeing you here in Juneau for the Council meeting.

Best regards,

F. Gregory Baker
Director

MEMORANDUM

State of Alaska
Community & Regional Affairs

RECEIVED
JAN 26 1984
COMMISSIONER'S OFFICE
COMMUNITY & REGIONAL AFFAIRS

TO: The Honorable Jeff Smith
Deputy Commissioner
Office of the Commissioner

DATE: January 20, 1984

FILE NO:

TELEPHONE NO: 465-4861

FROM: Mark Mickelson
Grant Administrator
Division of Community Development

SUBJECT: Kodiak Island Near-Term Assistance Project

Attached for your information and use are individual program manager reports from within the Division of Community Development which address' the Kodiak Near-Term Assistance Project. The major issues that our Division would like to put forward as practical suggestions are as follows:

1. Supplemental Funding Request - For the State Employment and Tr ning Program. Funds specifically earmarked for the Upgrade Skills Training component could effecti ly promote retraining efforts for fishermen and fish processors on Kodiak Island to adopt to the evolving bottom fisheries and related support occupations. Under this program other components could also provide short term subisidized employment in the form of vocational exploration for youth and internship possibilities.

2. JTPA Dislocated Worker Program - Because of lay-offs in the fishing industry and changes in species harvest/ processing, this special program might well be utilized in Kodiak. We can better promote the program there and provide assistance with application preparation.

3. Low-Income Weatherization - Pending proposed selection, two contracts may be issued which could impact on Kodiak Island communities. Because there is an obvious need there, supplemental funding under this program could reach more communities on Kodiak, with secondary effects of economic stimulus to local economies. Once contracts are awarded we can expedite their implementation.

4. Increased Child Care Funding - In addition to the obvious assistance provided to low income families which in turn enables them to work with affordable child care, additional child care industry jobs are created with more economic stimulus to the local economy.

5. Increased Outreach and Technical Assistance Efforts - Pursuant to all Departmental grant programs we can improve the Kodiak Communities access to and expertise in application procedures and successfully obtaining grant funds. Cross training of Departmental staff, a strong committment to Regionalization and circuit-riding educational and technical assistance efforts would all reap longer term results. Board, commission or council vacancies filled by Kodiak representatives could also potentially have a longer term benefit in program planning/design and allocation of grant funds for Kodiak communities.

If you have any questions on these recommendations on the attached reports please feel free to contact me.

MEMORANDUM State of Alaska

TO: Mark Mickelson
Grants Administrator
Div. of Community Development

DATE: January 18, 1984

FILE NO:

TELEPHONE NO:

FROM: Deborah Smith
JTPA Program Manager
Div. of Community Development

SUBJECT: Kodiak Near Term
Asst. Project

I. The following State JTPA programs may be available for use in the Kodiak area.

1. The Older Workers program for economically disadvantaged residents who are at least 55 years old.

   An RFP has been issued and awarded. The one respondent from Kodiak, KANA, did not receive a contract. However, another RFP for approximately $26,600 will be issued in April and any private-for-profit, non-profit, or state agency may respond.

2. The Dislocated Workers program is for Alaskan residents who have either been terminated or have received a lay-off notice due to industrial decline and are unlikely to return to that industry.

   The RFP was issued 1/18/84, is due in 2/17/84, and the contracts will be awarded 2/24/84.

   Approximately $336,900 is available, which includes $67,394 of State money. The respondents must provide an additional 25% in matching funds. Any private-for-profit or non-profit agency may apply.

3. The following recommendations for the Vocational Education monies have been made:

   a) $16,000 to S.E.R.R.C. for Skagway Host program.

   b) $65,085 to Employment Security for counseling staff to work in E.S. offices and community colleges.

   c) $60,000 in Pre-Apprenticeship Training in Building Maintenance.

The Kodiak area may be able to obtain some of the funds available under sections b & c of this program.

II. Kodiak's need appears to be a diversification of economy from a fishing base. The projections for the fishing industry are dismal at best for the Kodiak area. The completion of the Terror Lake Hydro project should provide some incentive for alternate industry to relocate, thus providing a stable year-round economy, but the nature and extent of that industry are unknown at this time. The harbor completion would assist in the fishing industry expansion, but at this point the current fisheries would receive little benefit.

III. It is possible that the Title III program under JTPA could be used to assist the Dislocated Worker in Kodiak, provided a proposal is received from a vendor to serve that population. The matching requirement of the program could be met through the State funded share of the unemployment benefits the participants are receiving.

Field Representative II
Region V

SUBJECT: Kodiak Project Near Term Assistance

Programs available, Dollar amounts, Planned Activities in Kodiak.

JTPA OJT	$ 86,400	(total Region V Adult and Youth)
JTPA IST	$ 43,000	(total Region V)
JTPA Youth Programs	$100,000	(total Region V)
SETP Programs	$ unknown	(Upgrade, In-School Counseling, Internship and VEP)
Displaced Homemakers	$ unknown	
Legislative Grants	$ unknown	

These funds are controlled by the legislature.

We are currently in contact with several employers in the Kodiak area in pursuit of OJT contracts. The RFP's are still out for Institutiona Skills Training and the Youth Programs; therefore, no projections can be made on the number of vendors to be served or the dollar amounts involved. As stated above, the SETP, Displaced Homemaker, and the name recipient legislative grants are controlled solely by the legislature and projections on the numbers and dollar amounts available can not be made.

OJT Contracts project as follows:

*North Star Seafoods	70 position	$ 5,000 $10,000
City of Port Lions	1 position	$ 2,500
City of Ouzinkie	1 position	$ 2,500
City of Larson Bay	1 position	$ 2,500
	Total	$17,500

*This is a possibility for a Performance Based contract however negotiations will not take place until January 18 or 19, 1984. If the contract is written on performance basis the amount may be higher

I will be traveling to Kodiak on January 18 through 20th to negotiate the North Star Seafoods contract and begin the necessary applicant pool. I plan to meet with other cannery representatives and interest employers to discuss the programs available. I also plan to meet with Tom Peterson from Kodiak Area Native Association to discuss a possible cooperative agreement.

Currently the economic picture in Kodiak is down due to the poor fish take and the closedown of crab fishing. The OJT contract we are negotiating with North Star is directly related to the changing fishing industry. The fishermen and canneries are turning towards bottom fishing. However they are both unprepared and untrained to deal with this total change in techniques. We are hopeful to assist in this change.

Action Plans:

We will keep in contact with the City offices and community service agencies. We will remain available to the private employers for input and we will work with KANA to provide cooperative services to Kodiak residents.

MEMORANDUM

State of Alaska

COMMUNITY AND REGIONAL AFFAIRS

TO: Mark Mickelson
Grants Administrator
Div of Community Development

DATE: January 16, 1984

FILE NO:

TELEPHONE NO:

FROM: Robert L. Brean
Deputy Director
Div of Community Development
Office of Energy Programs

SUBJECT: Kodiak Funding

The State's Low-Income Weatherization Program is the only program within the Office of Energy Programs having a potential funding impact on Kodiak. I use "potential" because we do not currently have any contracts in that area, but have just received two proposals (one from KANA for $182,296 to weatherize homes in Akhiak and Karluk and one from ACDC for about $1.5 million to weatherize homes in the city of Kodiak.)

These proposals must go through an evaluation and may or may not be funded or may be funded at a lesser amount than that requested.

We believe that weatherization is probably of greatest benefit of any energy conservation program since it improves the housing stock while simultaneously lowering fuel costs and also provides some temporary employment for local individuals.

By expediting the weatherization contracts once they're awarded, Kodiak will have their program available as soon as possible.

cc. Karen Perdue

MEMORANDUM

State of Alaska
Community & Regional Affairs

TO: Mark Mickelson
Grants Administrator
Division of Community Development

DATE: January 16, 1984

FILE NO: 6.1.8

TELEPHONE NO: 465-4890

FROM: Sherry Valentine
Block Grants Administrator
Division of Community Development

SUBJECT: Program Funds
Re: Kodiak Island

Pursuant to your request for potential and/or actual funding available to Kodiak Island, I have identified the following source of funds:

1. (A) Community Development Block Grant Program:

These federal Department of Housing and Urban Development funds are passed through to states in the form of a block grant. The state disseminates CDBG funds to incorporated communities on a competitive basis for community development and planning projects.

(B) Funding Available: $1,500,000

In FY84, the State will receive approximately $1.5 million. Cities are eligible to apply for community development funds up to $105,000 maximum per applicant, or $55,000 maximum for planning funds. Grantees are selected on the basis of a competitive review and scoring process.

(C) Matching Requirements:

There are no matching funds required of sub-grantees. However, due to the limited federal funding available for this program, the leveraging of other sources of funds is encouraged. An applicant can receive up to 40 points depending on the amount of other funds leveraged.

(D) Present Funding for Kodiak Island Communities:

The City of Kodiak was designated a three year comprehensive grantee by HUD for the period FY81-83. When the State accepted the CDBG program in FY82, it agreed to honor this three year commitment. As a result the City of Kodiak has received the following funds:

FY81:	$500,000	(directly from HUD)
FY82:	500,000	(through the State of Alaska)
FY83:	500,000	(through the State of Alaska)
TOTAL	$1,500,000	

Funds are being utilized for street construction, a mini park, and teen center renovation.

Utilizing FY82/83 combined competitive funds the City of Port Lions has been selected to receive a CDBG grant:

FY82/83: $78,000

These funds will be used to add an addition to the City offices. The community will use local hire to help offset high unemployment.

2. Critical Needs:

Most rural alaskan communities need capital project and planning funds. Funding which can create needed facilities, supply jobs, and aid in developing some level of economic development are critical. Employment opportunities are essential in Kodiak.

3. Action Plan:

Because of the competitive nature of the CDBG program, quick access to funding is not possible. However, other potential resources might be the federal Economic Development Administration (EDA) with an outreach office located in Anchorage. HUD should also be contacted concerning their Urban Development Action Grant (UDAG) program which can provide a percentage of funding for the overall cost of a project in distressed communities.

CDBG-84 grant cycle - deadline not known yet applications will probably not be available until mid April 84. (State Plan - still needs to be finalized + approved. Congress held up process)

Technical Assistance = Funds

MEMORANDUM State of Alaska

FILE NO:

Dept. of Community & Regional Affairs
Division of Community Development

FROM: Lare'
Child Care Coordinator

SUBJECT: Kodiak Island:
Child Care Programs

I. Child Care Programs Available

The Child Care programs administered by the Department and operating on Kodiak Island are:

	Program	Total '84 Budget $	Kodiak Island '8 $
1. a.	Day Care Assistance	5,693,393	150,121
b.	Local Administration for Day Care Assistance	569,739	15,012
2.	Child Care Grant	1,117,963	34,479 (Estimate
3.	Education & Training	84,500	2,430
4.	Developmentally Disabled	194,400	Not operati
5.	Head Start	2,768,000	(B

(A) Reallocation of Day Care funds takes place by the end of January. Kodiak is requesting $30,000 more to alleviate Waiting Lists caused by lack of program dollars for eligible families.

(B) RurAL CAP administers the Head Start program in Kodiak and is one of approximately 30 sites. The budgeted dollar figures for Head Start in Kodiak for FY '83 was $45,000 (federal and State dollars)

II. What are most critical needs?

From the child care perspective, the most critical needs are (1) more licensed child care facilities, (2) more program dollars to allow eligible families access to child care services (3) additional training of staff and parents in early childhood issues (4) additional training for early childhood administrators.

Because of the "recession" in Kodiak, more and more mothers are entering the active labor force. This will further increase the demand for child care, as well as place an even greater demand on limited State Day Care dollars for this community.

From a broader persepctive, diversification of employment is essential if Kodiak is to move from the rollercoaster syndrome of a one industry community. This will include not only attracting new and small industries but also developing a trained and diversified labor force.

III. Expansion and Infusion of Dollars:

Day Care: Day Care Assistance dollars are allocated by the number of licensed child care spaces in a given community. In the past two years (1981 to 1983) the number of licensed child care spaces has increased by 50. However, even with this increase, each year Kodiak requests additional program dollars to allow eligible parents to participate in the program. This has a direct impact on employment and training.

There is also a need for additional child care spaces. While there are six licensed child care centers, the number of licensed homes has dropped from 17 to 9 family day care homes in the past year. This issue has been discussed with the Department of Health & Social Services.

Thus, if more homes are licensed, there will be both a larger number of child care spaces as well as alternatives where parents can have their children in care.

Child Care Grant: The Child Care Grant has allowed Kodiak child care facilities to augment budgets in salaries, food and age appropriate equipment expenditures. The Child Care Grant Program has assisted child care providers in not drastically raising rates.

Education & Training: Kodiak's Small World Child Care Center was awarded two Education & Training grants in FY '84. One grant will provide a series of audio tapes on infant development for the Kodiak area, as well as Anchorage, Juneau, Bethel, Fairbanks, Kotzebue and Nome. The other grant provides funding for three Small World staff members to participate in the AAEYC annual conference in April of '84.

Kodiak, as with other rural areas in Alaska, is rather isolated. The Education & Training grants provide Kodiak child care staff an opportunity to work with other child care professionals within the State.

MEMORANDUM

State of Alaska
Community and Regional Affairs

TO: Jeff Smith, Deputy Commissioner
Municipal & Regional Assistance Div.

DATE: January 20, 1984

FILE NO:

TELEPHONE NO.

FROM: Michael Cushing, Research Analyst
Municipal & Regional Assistance Div.

SUBJECT: Kodiak Island Assistance

MRAD community assistance programs were reviewed with regard to their application to the immediate needs of the economically depressed communities of Kodiak Island. More specifically, the focus was on employment generation in the next 30 to 180 days. Appendix A presents an overview of the range of program options available within the Division. A number of these assistance options are not immediately applicable to the situation at hand, either because of lack of existing funding or because the program is inherently directed at longer range solutions. Budgeted FY 84 program funds are already expended or committed. FY 85 program funding will not be available until July or later. This essentially narrows the range of possible options to those which could be funded by a supplemental appropriation to the FY 84 budget.

Following is a presentation of selected options which could provide some form of short-term economic relief:

1. Planning Grants/Technical Assistance

Given a supplemental appropriation, funds could begin to enter the communities as early as March. The most immediate form of employment opportunity would be provided by a local-hire survey program. In this program two or more individuals would be employed in each community for several months to assist in the performance of an updated attitude and/or economic assessment survey of their community. The survey would be designed to provide baseline information in support of developing longer range solutions for the communities. Local people could be brought to Kodiak/Anchorage for initial training workshops, to assist in developing the survey instrument, and later, to assist in the assessment of survey results. These efforts would be coordinated through the Kodiak Island Borough/KANA.

Timeframe:

Jan/Feb: MRAD Staff Assignment; draft program requirements (budget) in preparation for supplemental appropriation request.
Feb/March: draft preliminary survey; coordinate with Kodiak Island Borough; select and hire local individuals.
March-June: hold training sessions, perform and assess survey.

2. Rural Development/Bulk fuel storage Grants

Present program guidelines limit grants to $100,000 per community per fiscal year. The six outlying Kodiak Island communities would require a designated supplemental appropriation totaling $600,000. The community of Old Harbor has an FY 85 request in for $27,000 and Larsen Bay is formulating a request for harbor development. Other project possibilities mentioned by communities which could generate some short term local employment are:

Akhiok: equipment storage buildings
road to new bulk fuel site
phase II bulk fuel storage facility ($65,000)
Karluk: equipment (proposed fire truck, existing fuel truck)storage buildings
Larsen Bay: community center
tie-down spaces at airstrip
Old Harbor: community building
Ouzinkie: water & sewer repair
Port Lyons: upgrade community building and Library
site preparation for cannery or cold storage

3. Coastal Energy Impact Program (CEIP) loan program

While all grant monies from the CEIP program have been disbursed, loan monies are available ($20,000,000). The present terms are unapproachable by smaller communities (10% interest), especially when potential default is already a major problem in the community. One possible approach that the State could consider would be the creation of a loan subsidy program whereby the State would pay all or part of the interest on a federal CEIP loan to communities. A further depth of subsidy would include the State's paying the costs of deferring the loan repayment for a period of time until the immediate economic problems are past. This loan subsidy concept should be pursued by the Department of Revenue and, more specifically, by the Municipal Bond Bank which presently maintains the CEIP loan account. Depending upon the mechanics of installing such a program, funds could be available in the communities by late-summer (84)

cc: Marty Rutherford, Director
Municipal & Regional Assistance Div.

Appendix A

KODIAK ASSISTANCE PROJECT

OUTLINE OF POTENTIAL MRAD ASSISTANCE OPTIONS

I. EXISTING PROGRAMS/ Existing (FY 84) funding

A. Summary: Primarily because such funding is expended or committed, existing MRAD programs and FY 84 funding provide no means of immediate employment generation on Kodiak Island.

B. RDA Grants/Bulk Fuel Storage: FY 84 funds have been almost entirely disbursed. There is a small RDA reserve which is committed to an appeals process.

C. General Planning Grant Money/ Technical Assistance: Of the original $180,000 for FY 84, approximately $33,000 remain. These remaining funds are to be distributed to existing proposals, none of which come from Kodiak Island. There were over a million dollars in requests for these funds, again, none of which came from Kodiak Island communities.

D. CEIP funds: All grant monies from this have been disbursed. Kodiak City received $140,000 in a grant; the Borough received $307,000 in 6 grants (1978-1983). While loan monies are available ($20,000,000), the present terms are unapproachable by smaller communities (10% interest), especially when potential default is already a major problem in the community. One possible approach that the State could consider would be the creation of a loan subsidy program whereby the State would pay all or part of the interest on a federal CEIP loan to communities. A further depth of subsidy would include the State's paying the costs of deferring the loan repayment for a period of time until the immediate economic problems are past. This loan subsidy concept should be pursued by the Department of Revenue and, more specifically, by the Municipal Bond Bank which presently maintains the CEIP loan account. Depending upon the mechanics of installing such a program, funds could be available in the communities by late-summer (84)

II. EXISTING PROGRAMS/ Supplemental FY 84 Funding

A. Summary: With regard to supplemental funding providing specific assistance to Kodiak Island, a major consideration is that existing MRAD programs function on a statewide basis incorporating distribution equity

guidelines. Therefore, in the case of supplemental appropriations to existing programs, Kodiak Island communities would be competing with communties throughout the State for supplemental funding. As an alternative, a supplemental appropriation to the Department could be provided which specifically targets Kodiak Island and then directs that the Department's RDA/Technical Assistance mechanisms be employed in the distribution/management of those funds to the community level.

Assuming that such a supplemental appropriation were passed in February, funds could probably enter the communities by March or April. This would require that community proposals for funding requests be in the works now and submitted as soon as possible after passage of the supplemental appropriation. Another time frame consideration is the necessary coordination of efforts through the Kodiak Island Borough, which has planning powers in the region.

B. RDA: Present RDA guidelines limit grants to $100,000 per community per fiscal year. Assuming this maximum were to be provided to each of the six outlying communities on Kodiak Island, this would require a supplemental appropriation of $600,000.

C. Planning Grants/Technical Assistance: Given a supplemental appropriation in late February, these funds could begin to enter the community by March/April, 84. One employment possibility would be a local attitude and economic conditions survey effort. This could include workshops, training, survey, and assessment activities at the local level. This would require coordination with the Kodiak Island Borough.

III. EXISTING PROGRAMS/ FY 85 funding

A. Summary: The time frame of FY 85 program funding would essentially preclude any immediate employment generation. The first effect of these funds, if proposals were successful, would begin in late summer(84). There are several ways in which the Department might be able to facilitate the disbursement of these funds.

B. RDA/Bulk Fuel: Community proposals are to be submitted to the Department by June 1. Depending on the duration of the legislative session, it could be mid-summer before an appropriation level is determined. A Statewide competative selection process must then disburse the available funding amongst submitted

proposals. One possiblity of facilitating this process would be to provide technical assistance to the communities during the process of proposal submission. This service is available, time and funding permitting, upon formal request from the community. A second possibility would be to advance the deadline date for proposal submission and begin a preliminary selection process before the final program appropriation level is actually known.

C. General Planning Grant/ Technical Assistance: These are general fund monies and the actual level of funding is determined contingent upon other internal funding requirements. Given the present budgeting process, the level of money available for such grants and assistance is not clearly established until July, or disbursed until at least August. This process might be fast tracked to disburse funds a month earlier, but probably no earlier than mid-July. The FY35 amount is estimated to be about $200,000, similar to the FY 84 figure.

KODIAK PROJECT

Options and Projects for Near-Term Assistance

Working Group Plan

Department of Health and Social Services

The Department of Health and Social Services was assigned the task of reviewing five specific areas to determine levels of services presently being provided, additional services or programs which may be needed and special projects which may be undertaken to provide economic relief to the Kodiak area. These five areas included:

(A) Inventory of DHSS programmatic activity in the Kodiak Island area

(B) Investigate "matching fund" constraints to community access to federally funded grants, projects, etc.

(C) To the degree possible, define present and projected increases in program use (WIC, Food Stamp, AFDC, Mental Health, Family and Youth Services, etc.) attrributable to the recent economic slowdown. Investigate the cost requirements of serving this increased need.

(D) Assess levels of most critical, immediate needs (health, social and financial)

(E) Research temporary employment opportunities of DHSS program activity.

I. Inventory of DHSS Programmatic Activity in the Kodiak Island Area:

(A) Division of Public Assistance

The Division of Public Assistance provides services to Kodiak and the surrounding villages through a network of fee agents, two full time Eligibility Technicians in Kodiak and field unit staff support from Anchorage. The Division offers a variety of cash, food and medical assistance programs which include the following:

Aid to Families with Dependent Children (AFDC) A nationwide state/federal financial aid program helping needy children who are deprived because at least one parent is absent, disabled, or dead. Assistance is intended to provide the basic necessities for the children, thereby enabling them to remain within the family unit.

Adult Public Assistance (APA) APA Includes Aid to the Blind, Aid to the Disabled, and Old Age Assistance. These programs provide cash assistance to needy adults who are unable to provide for their own basic needs.

Energy Assistance Program (EAP) EAP is a 100 percent federally funded program to aid low-income households. Cash assistance in the form of payments to home energy supplieers are made on behalf of eligible households to offset the impact of rising home energy costs. Renters and homeowners are served.

General Relief Assistance (GRA) The GRA program provides assistance for obtaining the necessities of life for people who temporarily have absolutely no other personal, private, or public resources available to meet their needs.

Food Stamp Program Food stamps provide assistance to low-income households in purchasing food. The objective is to improve nutrition of recipients.

Medicaid Medicaid is a joint state/federal program which pays providers of medical care for medical services delivered to eligible low-income Alaskans. Early and Periodic Screening, Diagnosis and Treament (EPSDT), a component of Medicaid, is a preventive health program for children of eligible low-income families.

General Relief Medical (GR Med) This state program pays providers for medical care and emergency dental care for low-income persons.

Catastrophic Illness Program This is a state-funded program established to financially assist residents of Alaska who have suffered a serious illness or injury resulting in unpaid medical expenses exceeding $1000.

(B) Office of Alcoholism/Drug Abuse

The Kodiak Council on Alcoholism is presently operating an Intensive Intermediate Care, 45 day non-medical treatment program at Hope House, utilizing 13 beds in the facility. Non-medical detox for those persons wishing to enter the treatment program is accomplished in a

seperate 1-bed and bath wing of Hope House. Outpatient, aftercare, family counseling, outreach and intervention are provided from a seperate clinic. Education and consultation, youth alternative and the alcohol safety action program (drunk driving diversion) are also provided through a subcontract with the Kodiak Area Native Association. Information, education and prevention services are provided through Community Health representatives to six villages on Kodiak Island.

(C) Division of Family and Youth Services

The Kodiak office provides services to residents of the island of Kodiak plus 15 villages on the peninsula. Services provided include child abuse investigations, individual and family assessments, adult protective services, individual and family counseling, information and referral, foster care for children and adults, residential care for children and adults, and protective services day care. Licensing services include homemaker support, residential child care, and day care. Our Kodiak staff also provides a good deal of community service serving as memebers of committees and boards.

(D) Division of Public Health

The Division of Public Health provides health services to Kodiak and surrounding villages through a staff of three Public Health nurses and two support staff. The Kodiak Area Native Association (KANA) receives a $120,500 rural itinerant health care grant. The Division offers a variety of services which include the following provided by Public Health nurses:

Immunizations: Immunizations to infants, preschool, school children and adults.

Tuberculosis: Give TB tests annually to preschool and school-aged children. TB testing and surveillance of cases and contacts.

Venereal Disease: Conducts VD clinics, obtains lab tests for diagnostic purposes and does surveillance and treatment of cases including follow-up of contacts.

Early Periodic Screening, Diagnosis and Treatment (EPSDT): Inform and outreach high risk Medicaid eligible children. Screen children according to guidelines. Refer for medical or dental evaluation. Track referrals to resolution.

Handicapped Children: Case finding through EPSDT and well child conferences; complete HCP application and coordinates case management until condition resolved.

Communicative Disorders: Cooperate with school personnel to screen hearing of preschool and school children according to schedule. Coordinate patient referrals, treatment, clinics and follow-up.

Infancy and Preschool: Early identification and intervention through home visits of newborn infants at risk for health or social reasons. Well child conferences to screen, refer and facilitate medical care; (target pop.0-3 years).

School Age: Coordinate with school nurses as indicated in TB, vision, hearing, screening and school entry immunization.

Child Bearing Years: Provide family planning outreach, education, counseling and referral services. Identify early pregnancy through testing, promote physician evaluation in first trimester and make home visits to postpartum referrrals and at risk infants or families.

Middle and Late Years: Promote adult health services aimed at reducing risks associated with the following: heart disease, stroke, cancer, accidents. Provide cancer screening services, pap smears, breast exam, stool testing, blood pressure, etc.

Health education is integrated into each individual encounter or through the utilization of group classes and sponsoring of local community health fairs.

Home Health Aides: PHNs set up plan of care and supervise HHA who provides health related personal care to individuals at their place of residence.

The public health nurse that works in the villages also teach and work with the community health aides.

HEALTH EDUCATION

Positive health practices are promoted by integrating health teaching into each encounter and through group classes, i.e., prenatal, childbirth, child rearing, family planning, stress management, etc. The focus of health education is personal responsibility for quality of life and the relationship between personal choices and health.

(E) Division of Mental Health and Developmental Disabilties

The Division of Mental Health and Developmental Disabilities offers a comprehensive services to include outpatient services, school counseling services, day care services, 24 hour emergency services, child and adolescent services, inpatient services, diagnostic and testing services to vocational rehabilitative clients, chemotherapy and residential training services.

II. Investigate "Matching Fund" Contraints to Community Access to Federally Funded Grants, Projects, etc.

(A) Division of Public Assistance

In the domain of cash, food and medical assistance DPA is offering communities all available state and federal resources for such aid. There are no constraints to a particular community's access to DPA programs. Communities do not have the option to operate these programs in most instances. In the event they could, it would not generally profit a community to duplicate an existing and currently available DPA service.

The Kodiak Area Native Association will soon be serving the area temporarily through the Bureau of Indian Affairs General Assistance program. They have limited one-time funding, but there is a possibility of additional funds being available this year if there is a caseload increase. Though not a major source of assistance it will provide temporary cash assistance to some households.

DHSS has transferred $500,000 from its Low Income Home Energy Assistance block grant to the Department of Community and Regional Affairs to augment their state and federal funding for low-income weatherization. This has helped create more flexibility in the program, thus allowing the weatherization program to be offered in the Kodiak area for the first time. It will create some temporary jobs and result in considerable energy savings to those households served. The work should occur this spring and summer.

(B) Office of Alcoholism and Drug Abuse

In FY'84 the Kodiak Council received a grant award of $265,000 requiring a local match of $29,400. The State Office has the ability to waive this match at any time. It should be noted that the program has ample funds to meet the match requirement this year and during the coming fiscal year.

(C) Division of Family and Youth Services

No impact as no local match required.

(D) Division of Public Health

KANA receives $120,600 which is a rural itinerant health care project and community health aide supervision and training. There are no matching fund constraints.

(E) Division of Mental Health and Developmental Disabilities

Currently, the Kodiak program is required to match the mental health grant by 25%. Reducing the match requirement to a proverty level 10% will have no appreciable effect upon the program since it now far exceeds the match requirement meeting nearly 50% of the program costs.

III. To the Degree Possible Define Present and projected increases in program use (WIC, Food Stamp, AFDC, Mental Health, Family and Youth Services, etc.) attributable to the recent economic slowdown. Investigate the cost requirements of serving this increased need.

(A) Division of Public Assistance

Some DPA programs are more likely to experience caseload increases than others. Aid to Families with Dependent Children, Adult Public Assistance, and Medicaid have had no significant recent increase in participation from the Kodiak area, nor is an increase anticipated.

This is due largely to the nature of these programs and their qualifying standards. If caseload increases occurred in these programs, applicants could be handled. Kodiak does not have a large enough population of potential eligibles to seriously impact program budgets.

The Energy Assistance Program, Food Stamps, and General Relief Assistance are the programs most likely affected by an economic slowdown. EAP has increased response from Kodiak this year. Last year approximately $275,000 in EAP benefits went to eligible applicants on the island. The increase in benefits and qualifying income guidelines this year, coupled with the poor economic situation have resulted in more applicants applying and being found eligible. There has also been increasing demand for additional emergency benefits to avoid home energy crisis such as utility service termination and running out of heating fuel. The FY 84 estimate is for expenditures in excess of $300,000. The FY 84 EAP budget can accommodate the projected caseload and emergency service increases. With its liberal eligibility requirements, EAP is the DPA program most accessible and drawn upon by Kodiak households facing economic difficulties.

The Food Stamp program has more restrictive eligibility requirements including an assets test. The food stamp program caseload in the Kodiak area is up only slightly in the last year.

DATE	HOUSEHOLDS	DATE	HOUSEHOLDS
May 1982	253	May 1983	268
Sept 1982	181	Sept 1983	201
Nov 1982	216	Nov 1983	211

Workers in the Kodiak DPA district office reported an overall increase in inquires and applicants, particularly from persons involved in the fishing related occupations. They also noticed an increase in first time applicants which had not previously applied for public assistance. A lengthy economic slump in the area could bring a rise in the food stamps caseload. In the event that this were to occur, it would not impact the food stamps program budget since it is 100 percent federally funded and can cover all qualifying applicants.

General Relief Assistance is a program of last resort aiding the destitute with basic subsistence needs. The caseload during October to December 1982 is identical to the same period in 1983. Its highly restrictive qualifying standards and low assistance amount make GRA available only to those in desperate need. There were but two such cases in Kodiak in December.

It is not anticipated that GRA will be drawn upon heavily in coming months. If it were, the FY 1984 GRA budget does appear able to accommodate a moderate increase in demand.

DPA programs basically have income and resource tests, and are designed to serve low-income households. Most have strict federal regulations concerning eligibility and benefit amounts. Many households facing temporary economic hardship may not qualify for public assistance, however, those falling to the point of eligibility have a range of services available to meet their basic needs. DPA is meeting the needs of those who currently qualify for its programs, and is capable of aiding those who may soon need to draw upon its services.

(B) Office of Alcoholism/Drug Abuse

The program has seen an increase in outpatient case load which may be due to the recent economic slowdown. During the past year, they have seen 325 clients compared to 152 the prior year. This is due in part to an improved program, but unemployment has been a major factor. Budget cuts last year necessitated the cessation of client services to residents of the outlying villages other than in Kodiak.

(C) Division of Family and Youth Services

The Division of Family and Youth Services is experiencing increases in caseloads. Child Protective Service investigations are estimated to increase this fiscal year by 10% and individual and family counseling cases will increase by 15%. Just how much of this projected increase may be attributed to the economic down-turn is unknown.

(D) Division of Public Health

In 1983 4,990 individuals were served by the Section of Nursing Services. This represents an increase of 770 over the previous year. At present, the current staff is able to meet the service demands. No significant demand for service resulting from the recent economic slowdown is anticipted.

(E) Division of Mental Health and Developmental Disabilities

The active number of cases in July 1983, was 370. This increased to 406 in August, 382 in September when several staff were on vacation, 400 in October, 435 in November and 415 in December. There has also been a noticeable increase in collaborative type cases between mental health and vocational rehabilitation since July. Thus, during the first half of FY84, the number of active cases served by the Kodiak Mental Health Program ranged from 370 in July to 435 in November, an increase of 18% in four months.

Based upon the current trend, there will be a major increase in the demand for mental health services in the Kodiak. There is an expected increase in the number of shared mental health/vocational rehabilitation cases. Patients who are carrying private insurance are dropping insurance coverage due to their inability to pay the premiums. This is resulting in an increased number of no-charge cases and an expected decrease in revenue for the program.

IV. Assess levels of most critical, immediate needs (Health, Social, Financial)

(A) Division of Public Assistance

From the DPA viewpoint there is an increasing level of need and demand on its programs. The DPA district office in Kodiak and village Fee Agents are busier than usual, but are currently meeting that demand. The Energy Assistance Program has been very active. Many households are contacting DPA seeking additional energy assistance much earlier in the winter heating season than usual. This program is well known and widely used in the area. To ensure that those unfamiliar with the program are made aware, additional display advertisements will be run in the local paper. The DPA network is good in the Kodiak area. The Fee Agents are of high quality and have been recently trained. The Kodiak Area Native Association has a good social services staff, and works cooperatively with DPA by referring needy households. An EAP outreach contract with the Kodiak Area Native Association has been recently executed.

DPA programs do form a "safety net" which can help needy families. The network is in place, and the services available to those who qualify. There has not been a crisis situation to date. Applicants are being served in a timely way by existing staff. Caseloads have

not dramatically expanded. With the economic slowdown in the area, many families are experiencing genuine hardships. This has not yet translated into a major migration to DPA programs. It may be that many of these households still have income and resources that keep them above the DPA qualifying standards. The most critical and immediate need is for DPA to be prepared to meet the demand should it increase suddenly, being particularly mindful of caseload trends.

(B) Office of Alccholism/Drug Abuse

The increase in the outpatient load has forced the program to exceed the appropriate counselor to client ration necessary for effective counseling interaction. The addition of another staff counselor would reduce the overload and improve service quality. The additional counselor position would also allow Kodiak Council on Alcoholism to provide increased aftercare and outreach services to strengthen those components of the program, and community development services to the six other villages on the island. Some additional travel funds would also be required. Total projected costs for an additional worker and travel would be $30,000.

(C) Division of Family and Youth Services

Unmet needs. In view of the anticipated workload, additional staff will be required, preferably at the entry level and/or paraprofessional level, either a Social Worker I or a Social Service Associate III. Using an entry level position should result in local

hire. Additional funds for support, such as office equipment, space, travel and per diem will be needed. This is the best projection we can give for needs for FY 85. A supplemental for this fiscal year would not be required.

(D) Division of Public Health

The existing staff is able to meet the service demands

(E) Division of Mental Health and Developmental Disabilities

The program has an immediate need to increase their residential training program and had plans to do so had they been allowed to apply for CSP monies. They would need 2-5 local hire positions that would be involved with the residential training program as well as the vocational rehabilitation cases. These people would be trainers and aides.

V. Temporary Employment Opportunities of DHSS Program Activity

The opportunity available for temporary employment through the expansion of DHSS appears minimal. The Department of Health and Social Services has not yet realized a significant increase in the demand for services which can be attributed to the recent economic slowdown in the Kodiak area. For the most part, the present level of demand for services can be met with the existing level of staff. Various program enhancements could be made which would provide employment opportunities in the Kodiak area, if the

department were to receive additional resources. These enhancements would be of benefit to both the programs and the people who are served. At the same time opportunity for employment, although minimal would be available to residents of the Kodiak Island area.

MEMORANDUM State of Alaska

TO: Jeff Smith
Deputy Commissioner
Department of Community & Regional Affairs

DATE: January 23, 1984

FILE NO:

THRU: Bob Landau
Assistant Commissioner

TELEPHONE NO: 465-4842

FROM: James J. O'Connor
Regional Supervising Investigator
Department of Labor

SUBJECT: Kodiak
Near-Term Assistance

1. Grants to City and/or Borough for capital improvements projects, to be used as force account. Force account are a do-it-yourself type of construction, wherein the City or Borough decides not to contract out the work, but actually performs it "in-house" with its own employees. Therefore, the City or Borough could hire local people, to provide interim employment opportunities.

2. Alaska's 34,000-miles coastline represent the world's largest and most productive commercial fishery. Therefore, the Governor's Fisheries Task Force, should communicate with, and contact all floating or shore based processors in/or outside the State, and ask them for assistance in hiring Kodiak residents, through private sources, or the state employment centers.

3. Contact all businesses working on the North Slope and ask for assistance in hiring Kodiak residents.

4. A joint effort between the state and private industries, to train Alaskan residents in the field of tourism.

MEMORANDUM

ALASKA DEPARTMENT OF LABOR

State of Alaska

Employment Security Division

TO: Jeff Smith, Director
Dept. of Community & Regional Affairs
Division of Municipal & Regional Assistance

DATE: January 23, 1984

FILE NO: AK (EMS 9)

TELEPHONE NO: 465-2712

THRU: Robert Landau
Assistant Commissioner

SUBJECT: Kodiak Near-Term Assistance

FROM: John W. Shay, Jr.
Director

During the current drastic economic downturns the Employment Security Division will provide the residents of Kodiak with direct placement assistance, employer tax credits, Veterans Job Training enrollment and unemployment insurance benefits. In addition, the office will maintain information on job and training opportunities in other locations and can assist job seekers and employers in taking advantage of Job Training Partnership Act and other programs.

ESD operates a full-service office in Kodiak staffed by three Employment Service (ES) and two Unemployment Insurance (UI) workers who have the capability to deliver all division programs on site immediately.

UNEMPLOYMENT INSURANCE IN KODIAK

The Job Service office in Kodiak contains a full-service unemployment insurance contingent. The staff via direct satellite communication with the Employment Security Division's main frame computer, are able to directly input claim transactions which result in overnight payments or determinations of eligibility. The staff in Kodiak and the support system behind them in Anchorage and Juneau are capable of paying timely Unemployment Insurance benefits to those eligible and out of work in a falling economy. Those benefits not only provide partial wage replacement to the individuals affected, but provide much needed cash flow to the local economy. Without modification, unemployment insurance is designed for just such a situation.

EMPLOYMENT SERVICE

Basic Placement Assistance

The Kodiak Employment Center, as part of the Employment Service network, provides the full range of employment services for job applicants who are seeking employment and employers who are recruiting qualified employees.

Kodiak job applicants are assisted in matching their job skills to labor market demands through the registration process, referral to appropriate

jobs, job development, and through special referral for applicants who need pre-employment assistance from other appropriate service agencies.

Employers, through the Kodiak Employment Center, are able to recruit workers who meet their specific industrial needs.

The Kodiak Employment Center registered for work over 3,000 new job applicants during the 1983 Federal Fiscal Year. Over 1,200 of those registered applicants were identified as being qualified for occupations in the seafood industry. In addition, 1,325 job openings were filled and it is estimated that 42 percent of the openings were in the seafood processing industry.

The following special programs are administered by the Employment Service:

Job Placement Assistance For The Seafood Industry

With the exception of seafood plants outside of Kodiak City, housing for workers is a constant problem. As a result, there is a strong tendency for these plants to hire workers who live in Kodiak. On the other hand, those plants located away from the city have adequate quarters and have hired many of their workers from the mainland and from the Lower 48.

Job Service personnel in Kodiak are working closely with managers of all plants on Kodiak Island to provide a service that promotes consideration of available workers in and around Kodiak. Considerable progress is reflected in statistics for the local office as placement to seafood worker positions has nearly doubled over the past two years, from 310 in 1981 to 585 in 1983.

As a measure to further improve consideration for local hire of seafood workers, the State Seafood Placement Coordinator will revisit the Seattle offices of Kodiak plants in February and further encourage the use of Job Service in Kodiak to obtain their workers.

The ES Computer Network

The Kodiak Employment Center is assisted in its efforts to find jobs for people by an extensive statewide computerized network. Information describing both job orders and applicants for Kodiak, as well as statewide, is stored in the ES computer files and is retrievable from the computer via terminals at the Employment Centers. The computer is programmed to match employer job openings with qualified registered applicants.

This computerized network can also provide applicants with information on job openings and identify qualified applicants for employers in Kodiak and throughout the state. Current labor market information for areas within the state served by other Employment Centers is also available.

Job Training Partnership Act (JTPA)

Job Service functions as a liaison with the Department of Community and Regional Affairs and the Department of Education, to coordinate and provide JTPA services to eligible individuals and locate interested employers.

During the registration process, Job Service makes an assessment of an individual's need for training or other assistance to become employable. Applicants interested in JTPA are pre-screened for eligibility and enrollment is facilitated by referring the applicants to the Division of Community Development (DCD). Since DCD has no staff on site, Job Service is able to channel interested and eligible individuals for JTPA service that otherwise might not be reached in a rural area.

Job Service also promotes JTPA among employers to develop On-the-Job Training (OJT) slots, provides information on and recruits for JTPA openings and does pre-apprenticeship aptitude and proficiency testing.

Job Service will also provide placement services to JTPA-trained clients, such as job seeking skills assistance, job search information, specialized job development, and job referral.

Emergency Veterans' Job Training - (VJT)

A special effort can be made through Job Service, Job Service Employer Committees and its links with the private sector to assist employers to prepare significant training programs for eligible veterans. VJT will subsidize with federal funds up to $10,000 in wages. The subsidy will help offset employer's cost of training and bring federal dollars into the community while training eligible veterans to perform significant jobs. VJT can also be linked with other subsidized programs such as Targeted Jobs Tax Credit (TJTC).

Targeted Jobs Tax Credit

The Targeted Jobs Tax Credit (TJTC) program stimulates private sector employment opportunities by providing a federal income tax credit to those employers who hire and pay wages to eligible individuals. The potential two-year savings can amount to as much as $3,870 per eligible employee, depending upon the amount of wages paid and the employer's tax bracket.

Eligibility of applicants for the program is determined by Job Service. Those targeted groups who are eligible for TJTC certification include certain youth, Vietnam-Era veterans, ex-convicts, handicapped individuals, recipients of Supplemental Security Income (SSI) payments and recipients of Aid to Families with Dependent Children or general assistance.

SUPPLEMENTAL FUNDING REQUIREMENTS

Most of the above programs are currently funded with the exception of some of the Job Training Partnership Act (JTPA) activity. We are currently planning to request additional staffing to assist the statewide coordination of this program. Any increase in Unemployment Insurance payment activity costs will be covered by reimbursement from the Federal Government.

Kodiak Project
Options and Prospects for Near-Term Assistance
Working Group Plan
Department of Transportation and Public Facilities

The Kodiak Working Group assigned the Department of Transportation and Public Facilities the task of reviewing five specific areas to determine options and prospects for near-term assistance which might be undertaken to provide for some level of immediate economic relief to the Kodiak area. The five transportation areas identified for review are listed below, along with specific recommended action. The areas and projects include:

A. Investigation of the costs and effects of supplemental appropriations for the Local Service Roads and Trails Program;

1.	Akhiok Access Road from Airport to Floating Dock	$500,000
2.	Ouzinkie Boardwalk	$60,000
3.	Old Harbor Landfill Access Road Improvements	$250,000
4.	Port Lions Road Rebuilding and Extension	$2,000,000
5.	Karluk Upgrade of Road to Sanitary Landfill	$200,000

B. Investigate the specific steps of early implementation of <u>funded</u> capital improvements in the Kodiak Island area;

1.	Mission Road Supplemental	$340,000

C. Investigate facilitating early implementation of proposed Federal construction projects (BIA, PHS and HUD), in so far as they might provide immediate employment opportunities;

1.	Old Harbor Access Road to Proposed HUD Housing Project	$400,000

D. Erosion Control Program; and

E. DOT&PF Maintenance and Operations Program

Findings and conclusions regarding each of the five areas are detailed below. In addition, we have summarized one additional category which includes a variety of activities not identified above. In summary, the "other" activities include:

F. "Other"

1.	Dog Bay Small Boat Harbor Upgrade	$800,000
2.	Village Equipment Storage Facilities	$100,000
3.	Port Lions Ferry Dock Repairs	$500,000
4.	Old Harbor Fuel Dock Repairs	$800,000

A. Local Service Roads and Trails Program

Findings: The Local Service Roads and Trails (LSR&T) program was initially created in 1971 to provide State grant funds to improve local roads within municipalities, boroughs and small cities. In July 1982, the program was phased out. However, an appropriation was identified by the 1983 State Legislature and the program was reauthorized.

The allocation for the Kodiak Island Borough, determined on the basis of a formula which includes population, road miles and other factors, has amounted to $1,027,710, since the program's inception. This year the LSR&T allocation to the Kodiak Island Borough was $130,821. Individual projects for the program are determined by the Borough according to State Statute.

Practical application of this program in the villages within the Borough is very limited. Mobilization costs for equipment and machinery sufficiently inflate any single project cost to far exceed any cost-benefit ratio given the limited funds in the LSR&T program. As an example, if the annual appropriation were divided evenly among the six villages, roughly $22,000 would be available per village. This amount would barely cover mobilization costs for two pieces of heavy equipment to a village. For this reason, the Kodiak Island Borough has elected to use LSR&T program funding only for preliminary engineering design preparation for projects on the contiguous road system.

Actions: The distribution formula and funding cycle for the LSR&T program significantly affects its ability to be responsive to Kodiak needs in any significant fashion. However, if some type of add-on or supplemental funding were made available, designated for the Kodiak Island Borough and not the statewide Local Service Road and Trail program, several local projects have been identified for immediate construction. They include:

1. Akhiok Access Road from Airport to Floating Dock $500,000

   The project would fund construction of a road from the airport to the floating dock. Preliminary engineering estimates the project will cost $500,000. Most of the remaining work will involve heavy equipment work for grading, hauling and other construction activities. Consequently, near-term economic benefit to the community would be limited since little labor intensive work remains to be done.

2. Ouzinkie Boardwalk $60,000

   Boardwalk improvements are needed to provide safe access for pedestrians around the harbor area. It is estimated the project could be constructed, using local labor, at a cost of approximately $50,000-$60,000. Near-term economic benefit would be limited, but would provide immediate income for the laborers.

3. Old Harbor Landfill Access Road Improvements $250,000

   Improvements are needed to the existing landfill access road to prevent its continued erosion by tidal action. The project was originally estimated to cost $250,000. Some near-term economic benefit would accrue villagers employed as labors on the job.

4. Port Lions Road Rebuilding and Extensions $2,000,000

The Port Lions City Council has identified a number of local roads which need rebuilding and/or extensions to better serve the residential and commercial areas of the city. The roads include:

a. Main Street - 1,500 feet
b. Spruce Drive - 1,800 feet including 400' extension
c. Birch Drive - 1,200 feet
d. Birch Street - 1,800 feet
e. Beach Drive - 750 feet
f. Cove Drive - 300 feet
g. Bayview Drive (Phase II) including sewer and water - 1,300 feet

5. Karluk Upgrade of Road to Sanitary Landfill $200,000

Improvements are needed to the existing landfill access road. The project is estimated to cost $200,000 and would provide some near-term economic benefit to villagers used on local labor crew.

B. Early Implementation of Funded Capital Improvement Projects

Findings: The Department's annual capital budget has included a number of Kodiak area projects. The following construction projects are presently funded:

1. Pedestrian Safeway $670,000

Kodiak Borough has accepted funds through a TORA for project management and construction of a pedestrian bicycle path to run parallel to Rezanoff Drive from East Elementary School to Fort Abercrombie State Park.

2. Mill Bay Road $1,285,000

Mill Bay Road paving (CDS 1.90-2.59) and construction of a pedestrian walkway with curb and gutter.

3. Mission Road Reconstruction $1,000,000

Funds will be used to upgrade, realign, pave and aquire R-O-W for Mission Road between Cutoff Road and Shahafka Cove.

4. Kodiak Highway Repair $1,276,000

Emergency repairs on the Kodiak road in the area of Pillar Mountain. A $1,000,000 setaside remains from the original appropriation. A portion of the remaining funds will be used for rip-rap maintenance project this summer.

5. Port Lions Innerharbor $1,650,000

Project consists of construction to complete boat harbor mooring facilities with 50 berths and 10 transient mooring berths.

Three of the above five projects are ready for construction this spring, including the Pedestrian Safeway Project, Mill Bay Road and Port Lions Innerharbor. The Kodiak Highway Repair project is still in the design stage. The repair project includes a Pillar Mountain stabilization element and, because of the complexity of the design problem, probably could not provide any near-term economic benefit, even if accelerated. The Mission Road project has been identified as having a funding short-fall. If so, the project will not be able to proceed until additional funds could be secured or the project scope reduced.

Actions: Three of the funded Capital Improvement projects are already on line and ready for construction as soon as the weather allows. Nothing can be done to accelerate their implementation, barring an early spring. Little can be done to expedite the Kodiak Highway Repair project because of the design phase which must precede any construction activity. A small maintenance project using some of those funds has been planned for this summer. Mission Road will be ready for construction this spring, but with a reduced scope unless supplemental funding is made available. A supplemental appropriation for Mission Road could be considered for immediate action for its near-term benefit.

1. Mission Road Supplemental $340,000

C. Federal Construction Programs (BIA, PHS, HUD)

Findings: The Department has contacted the Bureau of Indian Affairs (BIA), the Public Health Service (PHS) and the Department of Housing and Urban Development (HUD) to determine if early implementation of any proposed Federal construction projects could be facilitated. All three of these agencies already seem to work in close concert with one another in the development of projects.

A large share of the housing in rural Kodiak is HUD housing, constructed and financed by HUD through the Kodiak Island Housing Authority. The Public Health Service generally piggybacks the housing construction projects by funding off-site water and sewer development. At the same time, the BIA generally tries to develop road projects which support the housing projects.

There is currently only one outstanding program reservation for HUD housing in the Kodiak area. The reservation is for 15 family units in Old Harbor. The Kodiak Island Housing Authority has not been able to proceed with the project because they cannot ensure HUD they have physical access to the site. The Housing Authority is working with BIA, at this time, to secure a commitment for the road construction. BIA, unfortunately, has very limited sources and is concerned it will not be able to make any financial commitment to the project. The housing units cannot be built without the access road because HUD will not release the reserved funds unless they are assured of site access.

Many village road needs have been met recently by the BIA construction program. The BIA recently completed road reconstruction projects in Akhiok and Old Harbor. This fall their road equipment was moved to Larsen Bay to await a spring start-up on a project there which will construct 8,000' of road to the village's new sanitary landfill. After Larsen Bay, the Bureau road crew and equipment will move to Ouzinkie for a road reconstruction

project. BIA operators travel with the equipment since few villagers are licensed as heavy machine operators. Whenever possible the Bureau employs local labor through force account hiring. Generally that work is limited to brush clearing and labor intensive tasks.

Actions: The Department could be useful in expediting the Federal construction project by supporting an Old Harbor Access Road project. A financial commitment here would allow the Kodiak Island Housing Authority to proceed with construction of the 15 housing units. It is likely at least some near-term economic benefit would be directly realized by Old Harbor residents given PHS and HUD local hire efforts.

1. Old Harbor Access Road to Proposed HUD Housing Project. $400,000

   This project would fund construction of a road from the village to the proposed new HUD housing area. Only preliminary cost estimates from the Kodiak Island Housing Authority are available at this time. Near-term economic benefit to the village residents for this project would include labor intensive work associated with brush clearing and site preparation. Lead time would be required to coordinate the road project's development with HUD. It is possible that construction could proceed late this Spring.

D. Erosion Control Programs

Findings: Three erosion control studies, completed by the Department, have identified potential problem areas and have recommended solutions. The three areas include:

1. Cape Chiniak Road Erosion Control Study

   Cape Chiniak road is located on Kodiak Island and connects Cape Chiniak residential area to the City of Kodiak. Wave erosion is cutting into a section of the highway at MP 0-1.0. The recommended alternative for mitigating erosion damage and maintaining access on Cape Chiniak Road is to relocate approximately 0.8 miles of road to the south of the existing route. The report includes a conceptual road relocation alignment. A ground survey and additional engineering studies will be needed to refine the final project, but preliminary estimates place the project cost at $1,069,000. The near-term economic benefit of this project would be limited since this would be a large scale construction project involving road relocation with much preliminary engineering yet required.

2. Karluk Erosion Control Study

   The recommended structural alternatives for mitigating damage include the construction of a rubblemound revetment at Karluk, a rip-rap revetment at Old Karluk, and a sacrifical gravel berm along the bank of the new townsite. Estimated project cost for this alternative is $631,500. Near-term economic benefit for this project would be limited because of the emphasis on heavy equipment work inherent in the structual alternative recommendation.

Recommended non-structural measures include the relocation or replacement of two endangered structures. This measure would provide several local employment opportunities. Total replacement cost are approximately $532,000. However, these types of improvements do not have strong local support.

3. Ouzinkie Erosion Control Study

The study recommends that a slope revegetation project be implemented to reduce the rate of side slope erosion. Other non-structural remedial measures include the regulation or control of foot traffic and reduction of the practice of hauling firewood over the eroding slope. It is further recommended the City's sewer outfall system be regularly inspected and future construction near the top of the bluff be discouraged.

The recommended structural alternative includes construction of a quarry stone revetment. Estimated costs for such a revetment is $407,000, assuming a breakwater project is not implemented. The revetment project should be reevaluated if harbor breakwater plans are ever finalized. If a breakwater is constructed, a less substantial revetment structure would be required. No funds have been identified either for harbor development or erosion control measures at this time. Near-term economic benefit for this project would be limited because of the emphasis on heavy equipment work inherent in the structual alternative recommendation.

Actions: Very little near-term economic development could be realized with the early implementation of any of these projects. All three of the projects emphasize heavy equipment work in their preferred structural alternatives. The most direct economic benefit would probably accrue to the Kodiak metropolitan area where contractors are prepared to handle such work.

E. Maintenance and Operations Effort

Findings: The State of Alaska currently provides maintenance service at the State Airport and on the Island's contiguous highway network of State roads. Services in the villages are limited to the airports and are provided, on a contract basis, with the local unit of government or a private individual.

The following table summarizes major expenses associated with the Kodiak Maintenance and Operations program:

Kodiak and Kalsin Hill Maintenance & Operations Staff	
Average Annual Salaries for 13 permanent full-time positions (including overhead)	$631,500
Kodiak Airport Annual Maintenance Contracts (local purchase)	
Petroleum Products	$ 32,000
Sand & Gravel	$ 50,000
Kodiak Highways Annual Maintenance Contracts (local purchase)	
Highway Grading Material	$ 60,000

Equipment Transportation Between Villages	
Barge (two trips per year)	$ 6,500
Personal Services Contracts (Village Airport Maintenance Program)	
Karluk - Airport (City)	$ 4,000
Larsen Bay - Airport (Private)	$ 4,000
Old Harbor - Airport (City)	$ 2,750
Port Lions - Airport and Road to Small Boat Harbor (City)	$ 14,000
Akhiok	-0-
Ouzinkie - Airport (being advertised)	$ 3,500
Total Maintenance & Operations	$808,250

Actions: The Department's Maintenance effort, to the greatest extent practical, is already being passed through to the local economy. No new positions are expected to be added to staff since no increase in the FY'85 operating budget is expected. Any additional maintenance funding of Kodiak would create inconsistencies in maintenance level within the region.

F. "Other"

Findings: The Department has reviewed the Kodiak Island Borough Capital Improvement Program and other DOT&PF projects in order to identity other possible funding opportunities. A number of projects which did not fall into one of the above five categories might be identified for funding given the special needs of Kodiak. Some of the projects might be most appropriately administered by DOT&PF, some by other Departments, and even others by local units of government.

Actions: DOT&PF Design has identified an improvement project for the Dog Bay Small Boat Harbor facility which would increase its moorage capabilities and provide some safeguards against future failures occurring as a result of strong winds.

1. Dog Bay Small Boat Harbor Upgrade $800,000

   The project would upgrade "N" float, replace finger float hinges and stall float hinges re-drive miscellaneous piling and replace exterior pile collars and overhead lighting.

Community equipment storage facilities have been identified as a need in many of the communities. The communities are beginning to acquire various types of equipment for providing community services (i.e. fire fighting trucks, bulk fuel delivery trucks, small road maintenance equipment). While the villages have been able to acquire funding for the equipment they have not been able to secure funds for construction of storage sheds. The Borough is confident that with a construction foreman a number of local residents can be employed in the construction of the sheds. The Borough estimates the sheds could be constructed for an average $100,000 per building.

1. Village Equipment Storage Facilities $100,000/facility

In addition, two dock improvement projects have village priority. They may be implemented with a minimum amount of design work.

2. Port Lions Ferry Dock Repair $500,000

3. Old Harbor Fuel dock Repairs 800,000

Other projects, including small equipment purchases and preliminary design (i.e. small boat harbors) have been identified, but their ability to respond to the near-term economic benefit criteria are much more limited.

MEMORANDUM

June 21, 1983

TO: House Labor & Commerce Committee

FROM: Teresa B. Cramer Teresa B Cramer
Administrative Assistant

SUBJECT: CS for Senate Bill No. 55 (Rules)
Relating to Collective Bargaining

The Public Employment Relations Act provides that the monetary terms of any agreement entered into between the state and an employee representative are subject to funding through legislative appropriation. AS 23.40.215. The PERA does not set out a system of legislative review for the monetary terms. If the legislature is dissatisfied with the negotiated terms, there is no formal vehicle to explain to the parties to the agreement (the Administration and the employee union or association) the substance of the legislature's concerns. Therefore, the parties do not have a concrete set of limitations from which to work should they decide to renegotiate the original agreement. Furthermore, legislative delay and rejection of negotiated contracts has, in the past, led to the calling of a Special Session, which is an expensive way to resolve the issue.

The Blue Ribbon Commission recommends legislation to encourage legislative review of collective bargaining agreements early in the session. If the legislature is dissatisfied with the monetary terms, the parties may choose to renegotiate before the session adjourns with a clear understanding of the legislature's concerns.

Bill Analysis

Page 1 Line 9	The first section requires that the monetary terms of a collective bargaining agreement be submitted to the legislature within 10 days of agreement by the parties. If the parties reach an agreement while the legislature is not in session, then the monetary terms are to be submitted within 10 days of the convening of the next regular session. The legislature is given 60 days to consider the agreement and express its opinion by concurrent resolution.

Line 17 — Any approval given by the legislature is a "nonbinding, advisory expression of legislative intent." This language makes clear that the resolution does not take the place of an appropriation bill to fund the contract and permits the legislature to change its mind, should circumstances warrant.

Line 19 — If the legislature dissapproves the negotiated agreement, the parties may resume negotiations.

Line 23 — The second section adds a definition of "monetary terms of an agreement" to the Public Employment Relations Act to set out those items which are subject to legislative review.

Line 29 — The third section provides for an immediate effective date.

CS FOR SENATE BILL NO. 55 (Rules)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to collective bargaining; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.40.215 is amended by adding a new subsection to read:

(b) The Department of Administration shall submit the monetary terms of an agreement to the legislature within 10 days after the agreement of the parties, if the legislature is in session, or within 10 days after the convening of the next regular session. The legislature shall advise the parties by concurrent resolution if it approves or disapproves of the monetary terms within 60 days after the agreement is submitted to the legislature. The approval of the monetary terms of an agreement under this subsection is a nonbinding, advisory expression of legislative intent. If within 60 days after the agreement is submitted the legislature advises the parties by concurrent resolution ~~that it disapproves~~ the monetary terms of the agreement, ~~the parties may resume negotiations.~~ ARE CONSIDERED DISAPPROVED

* Sec. 2. AS 23.40.250 is amended by adding a new paragraph to read:

(8) "monetary terms of an agreement" means the changes in the terms and conditions of employment resulting from an agreement that will require an appropriation for their implementation or will result in a change in state revenues or productive work hours for state employees.

* Sec. 3. This Act takes effect immediately in accordance with

RE: CSSB 67

Dear Senator Eliason:

The Committee Substitute for Senate Bill 67 makes the cost of relocating utility facilities incident to a municipal highway project a cost of the highway project. This practice in regard to municipal highway projects would then be identical to the practice relating to State highway projects.

By making these utility relocation costs a part of the cost of the highway project, the local utility rate payer is relieved of this burden. In most cases a State grant is the funding source for the road project. In those cases, these relocation costs would be transferred to the State government.

In some cases the expense will be assumed by the municipality. When this expense is transferred from the local utility rate payer to the local municipal taxpayer, there is no net change for residents who are in both roles. However, a utility's consumers and the municipality's taxpayers are not always the same people. Fairness requires that if a municipal project causes the cost of relocating utility facilities, then the municipality should be responsible for that cost. It is also important that all of the costs as well as all of the benefits of a proposed project be considered at the time a municipality decides to relocate or widen a highway. Without Senate Bill 67, the municipality considers all of the benefits of a proposed project, but it only considers a part of the cost.

Sincerely,

Dave

re: SB 67 - Utility Relocation Costs

Municipalities oppose SB 67 because the issue is a local one and should be resolved at the local level. This bill would amend Title 19, Chapter 25 - Protection and Use of State Highways and Roads (emphasis added). The changes in SB 67, however, don't relate to state roads; they deal with local roads, paid for by local funds.

It is easy to understand why there is a provision in law for the state to pay the utility relocation costs since much of the funding is paid by the federal government. In municipal road projects, however, there is no way to shift 95% of the costs to a non-resident third party. The costs are paid by the local taxpayer unless the municipality receives a specific state grant for a specific project.

Since cost figures vary widely depending on the circumstances of each road project, I was not able to generate any average municipal cost per mile figures, but I do have general comments from several municipalities:

City of Palmer - Manager Dave Soulak estimates the provisions of SB 67, without section 5, would cause a 5 to 15% increase on 3 road projects currently being planned. In many cases, utilities are not where they're supposed to be. He doesn't think that municipalities should have to pay for utility mistakes, but does not oppose the municipality paying to relocate the utility if it is put in according to a permit.

Matanuska-Susitna Borough - Manager Gary Thurlow basically agrees with Soulak.

City & Borough of Sitka - Administrator Rocky Gutierrez believes that municipalities shouldn't be in state statutes except in Title 29. Sitka has worked out an agreement with the non-municipal utilities.

City of Kodiak - Manager Sam Gesko opposes section 3 of the bill, making the relocation costs a municipal responsibility.

City of Fairbanks - Manager Wally Droz says there would be

Committee on Labor & Commerce
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Gentlemen:

I am writing in support of SB67, relating to the relocation of utility facilities. In doing so, the telecommunications industry joins the other utilities in our state in asking for passage.

SB67 asks fair treatment in paying the costs of relocating facilities required by a municipal government. It asks, simply, that the entity which causes the cost pay the cost. This is a responsibility already recognized by the federal and state governments in existing statutes.

Under current statutes, a municipal government may order a utility to relocate its facilities at its own expense. Since ratepayers aren't necessarily the same as taxpayers in a given situation, this places an unnecessary burden on the ratepayer.

Many communities have recognized their responsibility to reimburse the utility for costs resulting from relocations required by the municipal government. However, they are under no obligation to do so. Consequently, utilities are at a disadvantage in recovering costs.

I would be happy to answer any questions you may have. I ask your support for the bill.

Sincerely,

Gordon Parker

Re: SB-67

Dear Senator Eliason:

The passage of SB 67 will resolve a long standing disparity between the Federal and State laws on one hand, and local government policies on the other hand, as to reimbursements to utilities when they are required to relocate installed facilities to accommodate road and highway construction.

The Federal and State governments have historically reimbursed local utilities all reasonable costs associated with such relocation requests. The Municipality of Anchorage, for one, has refused such reimbursement.

Passage of SB 67 will be of significant, positive benefit to all Municipal utilities and their customers. No longer will the utilities have to bear unreasonable expenses incurred due to the failure of local governments to properly absorb relocation costs as a rightful part of their projects. Also rectified is the improper assignment of such relocation costs to all customers of a particular utility when only those living within a particular road improvement district or along a particular street may actually receive the benefits.

Cordially,

Dear Senator Eliason:

In response to a request by you directed through the Alaska Municipal League in providing you with information on how much it will cost municipalities to pay for relocation of utilities in connection with municipal highway projects, please consider the following:

Homer Electric which is the provider of electrical power for the City of Kenai and the surrounding areas has indicated to the City that during the years 1980, 1981 and 1982, the cost for relocating their utility poles in conjunction with road projects undertaken by the City of Kenai cost in excess of $300,000. In addition, for the last half of 1982, Homer Electric submitted a bill for $60,000 for a particular road project that the City had under construction.

At this time, the City has refused to pay that bill and as a matter of fact, we now find ourselves in court with that utility over the dispute of whether or not the utility or the City is going to pay those costs. The City's contention is and will remain until directed otherwise that the utilities are in our right of ways at the sufferance of the public and therefore when the City undertakes a major road redesign or improvement project, the utility shall bear the cost for moving the poles to comply with the road design.

In addition to that, in 1982 the City had a downtown road project for which we were asphalting almost a mile and a half of road, we requested that Homer Electric bury their lines in that area on the basis that it was downtown property. Homer Electric refused to bury those lines and we sat down and negotiated with Homer Electric and the City ended up paying for the burying of those lines and the cost to the City was $75,000.

Now, as a matter of fact, we could have fixed two or three of our roads in this community that during breakup no-one can even drive down, citizens have to park their cars as far away as four or five city blocks from their home because the roads are in such condition during breakup they cannot be traversed.

It is for these reasons that the City opposes SB 67. The City's contention is that it always has been and should remain the utility's responsibility for relocating their utility lines when the City is improving the highway system from a safety standpoint and for a convenience standpoint for the traveling public in these communities.

At this point we have only talked about the electric utility, you must remember that if those costs are representative for the electric utility, most all of the telephone lines must be at the same time moved and on many occasions, the gas lines also have to be moved. If you multiply $300,000+ then the City over the last three years was looking at a total expenditure of approximately $1 million just to relocate the utilities in order to permit the City to repair and maintain the roads to benefit the traveling public.

It becomes obvious that a city of 5,000 people does not have the kind of money necessary in order to do the roadwork that we feel is our obligation and at the same time provide the money for all of the utilities which are private entrepreneurs and in the profit making business.

Sincerely,

Wm. J. Brighton
City Manager

RE: SB-67

Dear Senator Eliason:

From the perspective of water and wastewater facilities, passage of the subject legislation should not have a significant impact on the cost of municipal road improvements.

In Anchorage for example, it is rare when a municipal road improvement impacts much more than the surface or above surface water and wastewater facilities. Generally this would include moving fire hydrants, adjusting sewer manhole elevations, adjusting water valve box elevations, etc. These type of relocations cost AWWU approximately $100,000 in 1982, a year with significant road improvement activity.

An exception to the above would be a situation where a road improvement project necessitated relocating an entire stretch of water or sewer main. Generally this only occurs when the road grade is lowered so much that freezing becomes a potential problem for an existing facility. In these cases relocation could cost as much as $100 per lineal foot of pipe, including apurtenances.

If the Anchorage Water and Wastewater Utility can provide any further information please contact either myself or Brian Crewdson at 265-5561.

Sincerely,

Robert E. Smith

BILL ANALYSIS

RE: CSSB 67
SPONSOR: SENATE LABOR & COMMERCE COMMITTEE

PROGRAM EFFECTS OF BILL

The current statute requires that if, as a result of a state highway construction project, utility facilities must be relocated the State may order the utility to relocate that facility and the State must also pay the cost of that relocation. This bill would also expand the statute to include Municipal highway construction. It also restricts the costs payable to utility facilitites located as a result of valid easement or permits.

COMMENTS

It is reasonable to allow municipalities, which are responsible for construction of local roads and highways, this type of authority. We do, however, have some concern about relocation costs in instances where strict easement and right-of-way procedures have not been adhered to. Many of the smaller, older utilities do not have formal easements or right-of ways. It would seem that strict interpretation of new language could cause undue hardship for some of the smaller utility companies.

It would be our recommendation that some individual case by case discretion should be considered.

Members Present: Senator Dick Eliason, Chair
Senator Bob Mulcahy
Senator Pat Rodey

Members Absent: Senator Don Bennett
Senator John Sackett

COMMITTEE CALENDAR

Senate Bill 67 - "An Act relating to the relocation of utility facilities incident to the construction of highway projects by a municipality; and providing for an effective date."

WITNESS REGISTER

Dave Hutchens, Executive Director
Alaska Rural Electric Cooperative Association, Inc.
237 East Fireweed Lane
Anchorage, Alaska 99503
586-2660
Position Statement: Supports SB 67, proposed amendment.

Ginny Chitwood, Executive Director
Alaska Municipal League
204 North Franklin St.
Juneau, Alaska 99801
586-1325
Position Statement: Opposes SB 67, issue should be determined on local level, placement should be in Title 29.

Patrick Anderson
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502
264-4431
Position Statement: Voiced objection to specific portions of bill, and will provide specific recommendations by Friday.

Gordon Parker
Alaska Telephone Association
3201 C Street, Suite 601
Anchorage, Alaska 99501
276-3293
Position Statement: Supports measure.

PREVIOUS ACTION

No previous action to record.

ACTION NARRATIVE

TAPE #3
Recording
Number 004

Senator Eliason, Chair, called the meeting of the Labor and Commerce Committee to order at 1:35 pm with members Senator Mulcahy and Senator Rodey in attendance.

Number 020

Dave Hutchens, Executive Director of Alaska Rural Electric Cooperative Association, Inc., provided the first testimony on SB 67. He expressed support for the measure and offered an amendment to the bill. Several years ago, he stated, the legislature made a policy; whenever a state highway was being constructed utility relocation would be part of the construction cost. Presently the utility bears the cost when municipal road projects are in construction and a utility facility needs to be relocated. SB 67 will make the cost of the project include utility relocation. Last year the same measure passed the Senate late, and did not get through the House. The objections voiced last year included one concern with language (line 15, "under its jurisdiction" rather than "within its jurisdiction") and one concern dealt with by SB 67: for projects for which funding is in place (such as projects financed by bonding) and for which a municipality would not have adequate funds to cover utility relocation costs, an exemption is made. One of the major points stressed by Mr. Hutchens was that the utility does not cause the cost, but still pays. Dave Hutchens proposed an amendment prepared by Gary Thurlow of the Mat-Su Borough (Matanuska-Sustina); it amends Section 5 to read that "a municipality is not obligated for costs for relocating utility facilities which are not located in a municipal right of way pursuant to a valid easement or permit nor for costs for relocating utility facilities associated with a highway project for which general obligation bonds have been approved or for which state or federal grants have been received before the effective date of this act."

Number 300

Ginny Chitwood, Executive Director of the

Alaska Municipal League, provided testimony in opposition to SB 67. She stated that the measure did not belong in Title 19, Chapter 25, a section of the statutes concerned with state highways and roads. She further stated that the issue is a municipal one, and should be locally determined. In Anchorage a city ordinance is about to be adopted addressing the subject. Local determination more readily permits case by case determination. Ms. Chitwood stated that in the case of state grants going to a municipality for road construction it would be appropriate for the legislature to impose conditions. In the case of roads funded with federal dollars (state/federal) the cost is passed on to the feds.

Senator Rodey commented that the question is one of fairness. (Taxpayers end up paying...)

Number 380 Ms. Chitwood noted that most municipal officials are chiefly concerned about the proper placement of utilities.

Sen. Mulcahy commented that he didn't know why the measure wasn't placed in Title 29--that it seemed to be "sneaking in the back door".

Sen. Eliason commented that the measure seems to spread the cost, assigning some of it to the municipality rather than concentrating the burden on the users (utility users).

Number 428 Pat Anderson, representing the Municipality of Anchorage, stated that the cost to the Municipality (of paying for utility facility relocation) would be $1-2 million for what is on the street today. One objection of the Municipality not handled by Dave Hutchens' proposed amendment concerns the upgrading of utilities, and another concerns the question of general depreciation and whether the municipality bears the cost of replacement, thereby subsidizing the consumer. On a philosophical note, the Municipality of Anchorage maintains that the decision is best made at a local level. Mr. Anderson stated that he would submit the figures the committee had requested and would submit specific recommendations by Friday.

Number 505 Gordon Parker, representing the Alaska Tele-

phone Association (20 telephone companies) testified in support of the bill. He pointed out that although it is true that some communities do negotiate with the utility, but they are not compelled to do so under current law. He also clarified that there is not an intent to have municipalities fund expansion.

Number 538 There being no further testimony or questions, Sen. Eliason adjourned the meeting.

FLOOR COMMENTS ON SB 67

CSSB 67 MAKES THE COST OF RELOCATING UTILITY FACILITIES INCIDENT TO A MUNICIPAL HIGHWAY PROJECT A COST OF THE HIGHWAY PROJECT. THIS WOULD ALLOW ALL OF THE COSTS, AS WELL AS ALL THE BENEFITS, OF A PROPOSED PROJECT TO BE CONSIDERED AT THE TIME A MUNICIPALITY DECIDES TO RELOCATE OR WIDEN A ~~HIGHWAY.~~ STREET.

UNDER CURRENT STATUTES, A MUNICIPAL GOVERNMENT MAY ORDER A UTILITY TO RELOCATE ITS FACILITIES AT ITS OWN EXPENSE. IT SEEMS ONLY FAIR THAT IF A MUNICIPAL PROJECT CAUSES THE COST OF UTILITY RELOCATION, THEN THAT MUNICIPALITY SHOULD BE RESPONSIBLE FOR THAT COST. CSSB 67 WOULD ALLOW THIS TO HAPPEN.

HOWEVER, IF UTILITY FACILITIES ARE NOT LOCATED IN A MUNICIPAL RIGHT-OF-WAY UNDER THE CONDITIONS OF A VALID EASEMENT OR PERMIT, A MUNICIPALITY WOULD NOT BE OBLIGATED TO PAY THE COST OF THE RELOCATION.

CSSB 67 IS A FAIR RESPONSE TO THE QUESTION OF WHO WILL BEAR THE COST OF UTILITY RELOCATION AND I URGE YOUR SUPPORT TO THIS LEGISLATION.

ANSWER TO POSSIBLE CONCERN:

1) A MUNICIPALITY IS NOT OBLIGATED FOR UTILITY FACILITY RELOCATION COSTS ASSOCIATED WITH A HIGHWAY PROJECT FOR WHICH GENERAL OBLIGATION BONDS HAVE BEEN APPROVED OR FOR WHICH STATE GENERAL FUND APPROPRIATIONS HAVE BEEN RECEIVED BEFORE THE EFFECTIVE DATE OF THE BILL.

2) CURRENTLY STATE AND FEDERAL HIGHWAY PROJECTS RECOGNIZE UTILITY RELOCATION AS AN ALLOWABLE EXPENSE.

ANALYSIS OF CSSB 67 (L&C) am

C.S.S.B. 67 (L&C) am is very similar to H.B. 244. (The basic difference is the addition of an amendment to Sec. 5. AS 19.45.001 (4).)

The Department of Transportation and Public Facilities currently has the authority to relocate utilities that are located in highway rights-of-way under the Department's jurisdiction. Current State Statutes also require the State to pay the cost of any change, relocation or removal of utilities necessitated by highway construction.

C.S.S.B. 67 am would give the municipalities the same authority and responsibility for highways and streets under their jurisdiction.

C.S.S.B. 67 am would have no effect on highways constructed by DOT&PF; however, if municipalities receive grants from the State for highway purposes, these grants would need to be adjusted to compensate for added costs of utility relocation.

It should be noted that the Department has had trouble with the present wording of Sec. 4. AS 19.25.020 (c) as the phrase "...notwithstanding the terms or provisions of any existing permit, agreement, regulation, or statute to the contrary." has been interpreted that no special condition regarding relocation costs on previously issued permits would be valid. This may also then affect municipalities which have allowed conditional utility installation permits within their rights-of-way to provide for certain rapid system expansions where code wasn't in all cases followed. If this situation within a municipality exists, they may, under this proposed statute, be liable for higher relocation costs than would normally be allowed. It is recommended that consideration be given to deleting this phrase from any new legislation.

HCS CSSB 67 (C&RA)

House of Representatives
Committee on Community & Regional Affairs

Dear Mr. Speaker,

A majority of the House Committee on Community and Regional Affairs oppose HCSCSSB 67 (C&RA). The provisions of HCSCSSB 67 (C&RA) changes the historical relationship between utility companies and municipalities in matters pertaining to the use of public rights-of-way and streets by various utility companies. Present Alaska Statutes require municipalities to allow utility companies to use the public right-of-way and thereby avoid the expense of securing easements from private property owners. The proposed legislation is designed to further benefit the utilities by requiring municipalites to pay the costs of relocating the utilities when the relocaton is incident to a municipal street project. The requirement for municipalities to bear the burden of the relocation costs is contrary to practices establised in common law and contrary to procedures used throughout the United States. Imposition of such costs would amount to a public subsidy of private profit making ventures as well as for private non-profit utility companies.

Enactment of any legislation that would require municipalities to pay utility relocation costs will not, in the long run, reduce operating costs for utilities but in all probability will increase costs to the utilities. Municipalities will undoubtedly be highly restrictive in the conditions of future permits for the installation of utilities and will begin to charge maximum fees for the use of the public right-of-way as opposed to the general practice of providing use at no charge.

The Committee has found that municipalities are fair and reasonable in their relationships with utilities, and that the particular needs of each type of utility is considered when negotiations for the use of a public right-of-way are conducted. The continuation of reasonable fees, permit conditions, and equitable allocation of utility relocation costs is insured by the availability of arbitration and redress provided by the Alaska Public Utilities Commission. The considerable diversity of types and purposes of profitable private and of non-profit utility companies further reinforces the Committee's belief that the allocation of utility relocation costs can best be negotiated on the local governmental level, on a case by case basis.

In summary, the Committee believes that the proposed legislation is an unnecessary and unwarranted usurption of local governmental authority which may have an adverse monetary effect on the utility consumer and the municipal tax payer. Therefore, any attempt to legislatively interfere with the existing relationships between municipalities and utility companies should not be favorably considered.

/s/ Representative Lacher

Comments on House CS for CS for SB 67 (L&C)
by
Dave Palmer, City Administrator
City of Craig, Alaska
P.O. Box 23
Craig, Ak. 99921

I want to start by mentioning some specific problems with the bill, and follow with some general comment.

The first section (AS 19.25.020 [a] adds "municipality" as an entity with the authority to order the relocation of a utility within a right of way under its jurisdiction.

COMMENT: The municipal authority to regulate activity within rights of way already exists and in found in AS 29.48.035. This amendment duplicates existing authority.

AS 19.25.020 (c) references the definition of "cost" as in AS 19.45.001(4) a copy is attached.

COMMENT: No definition of "highway construction" is given. However, "highway" is defined at AS 19.45.001(8) and reads:

"highway" includes a highway (whether included in primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure and other similar or related structure of facility, and right-of-way thereof, and further includes a ferry system, whether operated solely inside the state or to connect with a Canadian highway, and any such related facility;"

This is an overly broad definition including minor activities such as the relocation of utilities for drainage culverts, driveways, and minor street improvements. The provisions of this bill extend beyond the transfer of cost of the relocation of utilities in major grant funded projects. Apparently, the relocation cost for any "highway" project is transferred to the municipality.

AS 19.25.020(c) in the bill contains several exclusions and exceptions, primarily battle scars of several committee hearings and it is difficult to understand.

First, relocation cost is identified as an allowable cost of construction and that cost is to be borne by the municipality...there is no discretion allowed, the bill states the cost is <u>TO BE PAID</u> by the state or municipality EXCEPT

(notwithstanding a valid permit system) a municipality is relieved of the relocation cost UNLESS

1. The facilities have been placed in the municipal right of way under a valid easement or permit; or
2. The facilities were placed BEFORE a system of permits existed.

In other words, the municipality pays if placement falls under a permit or agreement and the municipality pays if the placement occurred absent a permit process.

So: the municipality pays both when a process exists and when a process does not exist.

It appears that the bill would prohibit the municipality and a utility company from negotiating an agreement that would provide for the utility to assume the cost of relocation [from the mandatory language of 19.25.020(c)].

It appears that for facilities placed under a former (but now expired) agreement, the municipality would pay, regardless of the terms of the agreement, since the permit is not currently valid.

It appears that facilities placed without permission and without authority (absent a permit process) must be relocated at municipality expense, as well. I question the equity of requiring a municipality or any government to pay for actions taken by a utility company without permission or authority.

This bill reaches back in time and makes the municipality responsible to pay to move existing utilities, regardless of the authority--or lack of authority, granted to the utility. The bill places a burden on the municipality for actions taken in the past. It also commits the municipality for future costs.

DISCUSSION ON THE MERITS OF THE BILL:

The granting of permission to use rights of way is just that, a discretionary grant of permission to use land a utility does not own. There is a substantial benefit to a utility company for private use of public property. Acceptance of the cost to move utilities when necessary for the public good is a very reasonable cost of operation compared to the option of negotiating of purchasing easements privately. The use by the private sector of publically owned land is, in effect, a subsidy to that operation. To require the public, the owners of that land, to pay the cost incident to the use of public land is not a fair division of costs. The transfer of relocation costs from the private sector to the public sector does not benefit the public. It benefits the private utility company and the utility company's profit and loss picture. Further, this transfer removes from local control a legitimate negotiable item that can be and is dealt with at the local level. In exchange for a long term authority to operate in public rights of way, utility companies have not found the assumption of relocation costs unacceptable.

The City of Craig is served by Alaska Power and Telephone Company of Port Townsend, Washington. They serve Skagway, Hydaburg,Tok-Dot Lake and Craig. Their agreement with Skagway provides that the company will move utilities when necessary at their expense. In exchange, they are assured of a 20 year commitment to use the right of way and other aspects of their operation are clarified.

The 20 year permit in Craig expired about 2 years ago. Therefore, under the terms of the bill, Craig is liable for relocation expenses for all past installations (done under the then valid system) as well as current installations (placed before a system is put into place).

Alaska Power and Telephone officials ;have indicated to me that a permit system similar to Skagway's would be acceptable to them. This bill would obviously change the terms of our negotiation.

Basically, we believe the authority of a municipality to exercise its regulatory authority over rights of way pursuant to AS 29.48.035 should not be transferred by the state to private utility companies. Requiring a municipality to assume direct costs when it exercises its discretionary authority reduces the municipality's ability to properly protect the public interest (because some negotiating points with the utility have already been given away).

This is a local control issue. There is a satisfactory process in place to deal with this issue now. In this case, the old saying applies: "If it's not broke, don't fix it".

40 C.J.S., Highways, §§ 232, 233.

Sec. 19.25.020. Relocation of utilities incident to highway projects. (a) If, incident to the construction of a highway project, the department determines and orders that a utility facility located across, along, over, under, or within a state right-of-way must be changed, relocated or removed, the utility owning or maintaining the facility shall change, relocate or remove it in accordance with the order. The order shall provide a reasonable time period for compliance.

(b) If the utility facility is not changed, relocated or removed in accordance with the order, the facility becomes an unauthorized encroachment and may be disposed of in accordance with AS 19.25.240 — 19.25.250. In addition, the owner of the facility shall indemnify the state for any amount for which the state may be liable to a contractor by reason of the encroachment.

(c) The cost of change, relocation, or removal necessitated by highway construction is a cost of highway construction to be paid by the state in accordance with AS 19.45.001(4), notwithstanding the terms or provisions of any existing permit, agreement, regulation or statute to the contrary.

(d) If requested by a municipality, the department shall implement this chapter by requiring to the maximum extent possible location underground of electric power transmission lines within the municipality. (§§ 2, 3 ch 57 SLA 1961; am § 4 ch 106 SLA 1977)

Revisor's notes. — A reference to AS 19.45.001(4) was substituted for a reference to AS 19.05.130(4) in subsection (c) to conform to the renumbering of that section by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1977 amendment rewrote this section.

Opinions of attorney general. — This section is constitutional. 1961 Op. Att'y Gen., No. 12.

Article 2. Damages and Obstructions.

Section

30. Damages to obstructions, signs, and construction

Sec. 19.25.030. Damages to obstructions, signs, and construction. The driver or owner, or both, of a vehicle, self-propelling or otherwise, which passes through, over or around an obstruction placed under authority of AS 19.10.100, or a person who opens, removes or defaces an obstruction or warning sign without written permission

Ken Johnson, House Labor & Commerce Committee 2/6/84

BILL SHEFFIELD, GOVERNOR

STATE OF ALASKA

ALASKA PUBLIC UTILITIES COMMISSION
DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

420 "L" STREET
SUITE 100
ANCHORAGE, ALASKA 99501
(907) 276-6222

The Commission has been requested to provide comments in regard to legislation that addresses relocation of utility facilities.

The Commission, at this time, takes no position on the subject legislation. However, it would bring to the attention of the Committee the following observations.

1. If costs are incurred by a utility to relocate its facilities, the utility will generally be allowed to recover that expense in its rates. There is no "free lunch;" if a utility is not reimbursed by a governmental entity for its cost of relocation, the utility, absent neglect, would recover the cost from its consumers. Therefore, the issue of who should pay for the relocation of utility facilities appears to be a public policy issue of how best to distribute the economic burden.

2. However, it is respectfully suggested that the legislature should consider the likely sources of governmental funds that would be expended if the government, rather than the utility's customers continued to assume the costs of relocation. Frequently matching funds are involved which help defray the governmental entity's project costs, including utility relocations. However, if consumers are forced to pay, they will receive no such offset. Thus, the resultant dollar burden on consumers may exceed the actual dollar savings to the actual governmental entity directing the relocation.

3. The statute of the Alaska Public Utilities Commission speaks to the Commission's authority in this area.

> Section 42.05.251: Use of streets in cities and boroughs. Public utilities have the right to a permit to use public streets, alleys and other public ways of a city or borough, whether home rule or otherwise, upon payment of a reasonable permit fee and on reasonable terms and conditions and with reasonable exceptions the city or borough requires. A dispute as to whether fees, terms, conditions or exceptions are reasonable shall be decided by the commission. The commission may require a utility to add the amount of any permit fee paid as a pro rata surcharge to its bills for service rendered at locations within the boundaries of any city or borough which requires payment of a permit fee.

> Section 42.05.640: Regulation by municipality. The commission's jurisdiction and authority extend to public utilities operating within a city or borough, whether home rule or otherwise. In the event of a conflict between a certificate, order, decision or regulation of the commission and a charter, permit, franchise, ordinance, rule or regulation of such a local governmental entity, the certificate, order, decision or regulation of the commission shall prevail.

The Commission assumes that the enactment of HCSCSSB 67 (C&RA) would not dimish the existing jurisdiction of the Commission.

4. The Commission currently has three proceedings under consideration in which the subject of utility relocation and the expense thereof is at issue, specifically which ratepayers should bear the relocation expense charged by a municipality to a utility providing service in an area greater than the municipaliy.

If there are specific questions, the Commission would be glad to respond.

ALASKA PUBLIC UTILITIES COMMISSION

Carolyn S. Guess
Chairman

Amendments Not Made

AMENDMENT
page 2, after ln. 10 add:

(d) Notwithstanding the terms or provisions of any existing permit, agreement, regulation or statute to the contrary, the municipality may charge the utility a fee for past use of a right of way under the municipality's jurisdiction, equal to the cost of change, relocation or removal neccessitated by highway construction, except that a utility is not obligated to pay the fee for past use of a municipal right of way unless

(1) the facilities were placed in the municipal right-of-way before the municipality had a system for granting easements or permits for utility facilities; or

(2) the facilities have been placed in the municipal right of way under a valid easement or permit.

RE: HCSCSSB 67--RELATING TO UTILITY RELOCATION INCIDENT TO HIGHWAY CONSTRUCTION.

WHAT THE BILL DOES

If this bill were to pass the House, it of course has passed the Senate, it would place the burden of cost-of relocating utilities-incident to highway construction-on the municipality. In other words, if the municipality decides to widen a road and utilities have to be moved, the utility would have to bear the cost.

COMMENTS

At present the state includes the relocating of utilities in its planning costs. Municipalities at present do not include such costs in planning proposals.

At issue is whether a utility's rate rate-payers get stuck with the cost of relocating the facility, or municipal taxpayers as a whole bare the cost. If a road is widened or built for the use of all, why should a few incur a major portion of the cost, such as utility relocation. These are the points the bill hits on.

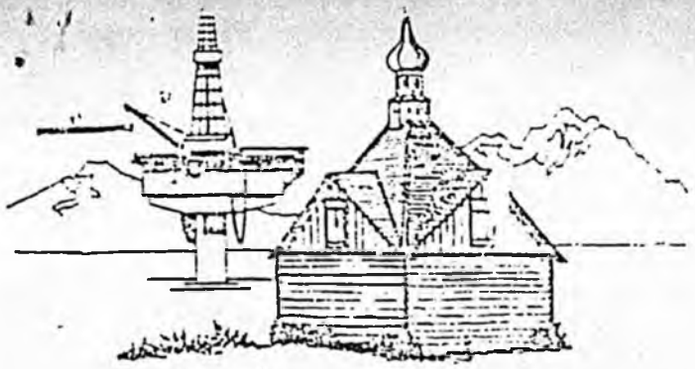
This committee substitute will make the fourth time the bill has either been amended or redrafted. The substitute planned for introduction by the Labor and Commerce Committee is much like the one passed out of the Senate Labor and Commerce Committee, except it has an amendment which softens the impact on municipalities. This amendment re-defines the cases in which the municipality must pay the cost of utility relocation.

QUESTIONS

1. Why is it a problem for municipalities to include in planning, the cost of relocating utility facilities ?

2. Has the state ever balked at appropriating funds for relocating utilities ?

3. Why has it been a practice in the past not to include utility relocation in planning costs ?



CITY OF KENAI

Alaska Public Utilities Commission
1100 McKay Building
338 Denali Street
Anchorage, Alaska 99510

RE: Tariff No. 35-32

Dear Commissioners:

The City of Kenai adamantly opposes TA #35-32 by Homer Electric Association, Inc. (HEA) which would result in a surcharge to the consumers within our municipality for utility facility relocations required by the City of Kenai to accommodate municipal construction projects.

The present request of HEA is an attempt to do indirectly what it has not been able to accomplish directly under the common law, by contract, by legislation or by court order as a result of litigation. To permit this surcharge to the consumers within a municipality would be to give them exactly that which they have so far been denied and to which they are not entitled.

Under Alaska Statutes (AS 42.05.251) the electric company is entitled to a permit to use the streets, alleys, and other public ways "upon payment of a reasonable permit fee and on reasonable terms and conditions with reasonable exceptions" [emphasis supplied] the city requires. The contract of Homer Electric with the City to operate the electric system of the city contained no agreement as to terms for use of city streets nor did it provide for any permit fee. In contrast, Kenai Utility Service Corporation pays the City 2% of its gross income within the City for a permit to exercise the privilege which Homer Electric exercises without any payment whatsoever. This lack of a contractual requirement by the City to assume the responsibility or liability for any relocation expenses incurred by the utility because of work within the city right-of-way makes 12 McQuillim Municipal Corporations, Section 34.72 very applicable:

"The grantee of a franchise to use the streets takes it subject to the right of the municipality to make public improvements whenever and wherever the public interests demands, and if the improvement causes injury to the company, as by requiring it to relay or change the location of its pipes, tracks, or poles, or otherwise, the grantee of the franchise cannot recover damages from a municipality therefor."

In this same section it goes on to state that the damages may be recovered from a municipality:

"If the statutes or the charter of a municipality provide for a recovery of damages resulting from the grading or changing of grade of a street."

In Section 34.74 a of McQuillim, it is stated that:

"The fundamental common-law right applicable to franchises in streets is that the utility company must relocate its facilities in public streets when changes are required by public necessity. Accordingly, it is generally held that the municipality may require a change in the location of pipes or other underground facilities of the grantee of the franchise, where public convenience or security require it, even at the grantee's own expense,..."

In the same section it is stated that the common-law duty of the utility to relocate its facilities at its own expense when public convenience or necessity so requires:

"may be changed by contract between the utility and a municipality so that relocation expenses are borne by the municipality, or may be changed by statute so that relocation expenses in certain cases are borne by the State" [emphasis supplied]

Since there is nothing in state law, nor by contract, nor by legislation, nor by court order which would require the municipality of Kenai to bear such relocation expenses, nor does the charter of Kenai so require, there exists no basis upon which to assess either the City of Kenai directly or its citizens individually directly or indirectly for the costs of relocations required to accommodate municipal construction projects. Any requirements to the contrary would be arbitrary, capricious and unreasonable and in derogation of the common-law, present state law, contract law and the intent of our state legislative body.

The lack of any contractual obligation is apparent from a reading of the contract entered pursuant to Ordinance No. 199-71 which is attached hereto and consists of 24 pages and is designated as Exhibit 2. The Commission's attention is specifically drawn to page number 12, Section 9-3 regarding relocations. This document is also the subject of present litigation between the City of Kenai and HEA which is discussed elsewhere in this communication.

As previously noted, there exists litigation in the Superior Court for the State of Alaska, Third Judicial District at Kenai captioned Homer Electric Association, Inc. Plaintiff v. City of Kenai Municipal Corporation, Defendant, Case No. 3KN-83-461 CI, which concerns solely the responsibility for the costs of relocation and the amount. The present litigation was preceeded by a PETITION FOR DECLARATORY RELIEF by HEA dated January 6, 1983 which subsequently was dismissed by the Commission after responsive pleading by the City of Kenai.

The amended complaint and answer thereto are attached to this communication and designated as Exhibit 3. Again, only a cursory reading of the relevant documents is needed to ascertain that the sole thrust of the complaint is to burden the municipality of Kenai with relocation costs.

The attempt of HEA to burden the City with relocate costs is evidenced by their unsuccessful attempt to have SB 67 passed. In support of that bill, find attached a letter from HEA's attorney dated March 18, 1983 and marked as Exhibit 1, indicating relocation claims against the City in the amount of $150,000 which may give some indication of the magnitude of assessments that would be levied against the individual citizens of the municipality should they be granted the relief they are requesting. Similar legislation failed in the 1982 legislature.

It is the City's position that had that legislation passed or if the present relief were granted it would be in violation of AS 42.05.391 in that it would be an unreasonable preference or advantage and create an unreasonable difference as to rates as between localities served and categories of customers all to the detriment of those within municipalities.

Where state rights-of-way are concerned AS 19.25.020 specifically provides that the costs of relocations caused by highway construction are to be paid by the state. Obviously, the legislature has drawn a distinction between state right-of-ways and municipal right-of-ways.

Without legislation such as SB 67 it is the City's position that the rights of the public are paramount and the City is without power to accommodate HEA even if it wanted to. As stated by 39 Am Jur 2d, Highways, Streets, and Bridges, Section 278:

> "A municipal corporation has no right directly or indirectly to burden itself or its citizens with the cost of removing and replacing the structures and appliances of public service companies that may necessarily be interfered with in laying sewers in the streets,..."

In the same section, it is also stated:

> "with respect to municipally owned public service companies, it is generally held that the municipality is acting in a proprietary and not a governmental, capacity, and is therefore responsible for the cost of removal or relocation of its structures and appliances when required for highway purposes."

The latter statement correctly distinguishes between a utility service owned by a municipality as a "proprietary" activity and not a "governmental" activity, and it can hardly be assumed then the sale of the proprietary function the municipality intends to give up any of its governmental powers.

The above quoted 39 Am Jur 2d at Section 232 is in accord with the City's position wherein it states:

> "Rights and streets or highways granted to individuals or corporations are at all times held in subordination to the superior rights of the public. The grantee takes them subject to the paramount right of the public authorities to grade and improve the way and to make such requirements and regulations as are necessary and reasonable in order make it suitable and convenient for the use of the travelling public, and the grantee may be required to abandon the use granted, or to remove or change the location of structures erected under the grant, when demanded by the public necessity, convenience, or welfare. <u>This power of the public authority cannot be limited by contract</u>." [emphasis supplied]

It is the City's position that it would be inappropriate for the APUC to do either indirectly or directly that which the City is not empowered to do especially when one applies the rule stated in the above cited volume of 39 Am Jur 2d at Section 225 that states that:

"As a general rule, every grant in derogation of the right of the public to the use of the streets will be construed strictly against the grantee and in favor of the public."

Unfortunately, it appears that the commission itself may have precipitated the present filing by HEA in their communication of June 3, 1983 to Council where it is suggested that HEA "...should consider filing a special tariff to authorize collection of the unreimbursed costs of any municipally-directed relocation as a surcharge on the bills of customers residing within the political boundaries of the City of Kenai. The City takes exception to this position and also to any inference contained in the next paragraph of the letter that would infer that the City of Kenai negotiate away its immunity for having to pay relocation costs in any franchise or permit agreement.

The arguments being made by HEA before this Commission, the legislature and in the courts are not new but seem to be made more frequently along with other arguments nationally as shown by the communications with NIMLO and a copy of Chesapeake and Potomac Telephone Company of Virginia vs. Landries 674 Fed Second 298 (1982) attached as Exhibit 4, in which the courts have gone so far as to declare utilities "displaced persons" so that they can be reimbursed for a facility relocation. Hopefully, the decision of the Commission will not be circuitous or tortured in its reasoning nor arbitrary, capricious and unreasonable in application but will follow the common-law as well as the better reasoned and majority case law and applicable Alaska Statutes as well as the intent of our last two state legislative bodies.

In the alternative, the City would request that in view of the Commission's previous decision not to take jurisdiction of the controversy between HEA and the City insofar as relocation costs, that it also decline to directly assess the citizens of Kenai individually, at least until the courts decide the ultimate responsibility for relocation costs in order that conflicting decisions not be reached by the courts on one hand and an administrative body on the other.

While HEA may draw a distinction between a direct assessment to the citizens of Kenai versus an indirect assessment by a levy on the governmental and taxing authority for the City of Kenai, the City does not draw such a distinction. Any assessment against the City would be passed on to the citizens of Kenai by assessment or taxes or decreased services, facilities or improvements. The ultimate deep pocket remains the same; the

individual citizen. When one remembers that the municipalities provide services for those outside the immediate boundaries of the city and that taxes should be spread on as large a base as possible, it seems only just and equitable that the relief requested by HEA be denied.

Respectfully submitted,

Tim Rogers
City Attorney

EXHIBIT 1

March 16,1983

Senator Don Gilman
Pouch V, Mail Stop 3100
Juneau, Alaska 99811

Re: SB 67

Dear Don:

I note that the above bill is now in the Community and Regional Affairs Committee. Please give serious consideration to a favorable report to the bill. Homer Electric has gotten into a real bind with the City of Kenai due to the significant increase in road construction which has been funded primarily by the State. The City has not allocated any portion of those proceeds to the costs of relocating utilities and has called upon Homer Electric to move the utilities and to bear the costs. Obviously the costs don't go away they just spread over a larger rate base. Fortunately the rest of the cities on the Peninsula have not taken this position but just a quick review of the Common Law convinces me that they might be within their legal rights to do so.

At the present time the claim by HEA against the City is well over $150,000.00, and the matter is being determined by the Public Utilities Commission which has jurisdiction over the purchase contract between HEA and the City. Any determination by the PUC will not affect the relationship of HEA with the other cities because basically the PUC is only being asked to interpret the contract under which HEA is purchasing the old KCL system.

It makes more sense and will be less expensive in the long run if the cities will fund the costs of relocation up front instead of requiring the Utilities to do the work, advance the money, and then attempt at some later date to

RECEIVED

collect that money thru a rate increase.

Thanks for your attention to a subject which is a vital concern to Homer Electric.

Very truly yours

C. R. BALDWIN

EXHIBIT 2

CITY OF KENAI, ALASKA

ORDINANCE NO. 199-71

AN ORDINANCE of the City of Kenai, Alaska, providing for the submission to the qualified electors of the City at a special election to be held therein on 3 August, 1971 of a proposition of whether the City should enter into an agreement with Homer Electric Association, Inc. which would provide for the operation of the City's electric system by Homer Electric Association, Inc. and would further provide for the transfer of the ownership of the electrical system from the City to Homer Electric Association, Inc. upon the successful consumation of the agreement and would authorize, as a part of such agreement, a franchise or permit wherein Homer Electric Association, Inc. would be authorized to construct, direct, operate and maintain in, upon, along, across, above, over and under the streets, alleys, public ways and public places now laid out or dedicated and all extensions thereof and additions thereto in the City, poles, wires, cables, underground conduits, manholes and other electric fixtures necessary or proper for the maintenance and operation in the City of an electric distribution system and wires connected therewith and declaring an emergency.

WHEREAS, the City has established and is presently maintaining and operating a municipal electric power system, and in connection therewith owns and operates properties for the purchase, transmission, distribution, supply and sale of electric power and energy; and is engaged in the business of selling and supplying electric power and energy to residential, commercial, industrial and governmental consumers within and about the City of Kenai, Alaska; and

WHEREAS, Homer Electric Association, Inc. (hereinafter called "HEA"), as an electric cooperative created and existing under the laws of the State of Alaska, engages, among other utility activities, in the business of purchasing, transmitting, distributing, supplying, and selling electric energy within the State of Alaska; and

WHEREAS, HEA's electrical system is or can be interconnected with the system of the City for the purpose of furnishing standby electric power; and

WHEREAS, the City Council of the City of Kenai ("Council") deems that the operation by HEA of City's electric system would be beneficial to the City and to City's users and consumers of electric energy; and

WHEREAS, the Council has resolved that such operation of the City's electric system can be accomplished by means of an operating agreement between the City and HEA; and

WHEREAS, the Board of Directors of HEA has determined that it is to the interest of HEA that an agreement should be entered into for the operation of the City's electrical system under the terms and conditions hereinafter set forth; and

WHEREAS, the parties have reached a basic understanding concerning the terms and conditions relative to the transfer of the operation and management of the electric system to HEA and the conveyance of the City's electrical system to HEA and the City Council desires to have the voters approve their entry into such Agreement within the guidelines set forth herein; and

WHEREAS, the Board of Directors of HEA desire to have a franchise or permit to operate within the City of Kenai and the Council has resolved that such a franchise or permit should be granted as is more fully set forth hereinafter; and

WHEREAS, the charter of the City requires that the question of whether the City should enter into the Agreement for the operation and transfer of its electric system to HEA and whether as a part of such Agreement a franchise or permit to operate an electrical distribution system should be granted to HEA should be submitted to the qualified electors of the City for their ratification or rejection;

NOW, THEREFORE BE IT ORDAINED by the Council of the City of Kenai, Alaska as follows:

Section 1. Definitions.

1. The "System" means all tangible properties and property rights which, (as of the effective date of the Agreement) are being used by the City for, or are useful for, the transmission and distribution of electric energy and power within the limits of the City and in such area adjacent thereto as may be presently served by said System. Said tangible property shall include real property, rights-of-way, easements, poles and pole lines, crossarms, sub-stations, transformers, station equipment, meters, and other tangible property of every kind and description which are now used, owned and operated by the City in the operation of said System, together with any and all additions, betterments, improvements and extensions thereof which may hereafter be acquired and made a part of said System under the terms of this agreement; the System shall also include all rights and obligations which the City shall have under that certain contract existing between the City and Consolidated Utilities, Ltd., dated September 11, 1963, covering the generation by Consolidated and the purchase by the City of electric energy. The aforesaid definition of the System shall not include cash in the Revenue Fund of the System as of the effective date of the agreement, nor shall it include any of the funds, securities, investments or assets in any of the Bond Redemption Funds or Reserve Accounts of the Bond Redemption Funds or any sinking fund pertaining thereto, provided, however, that funds, securities, investments or assets in any such Bond Redemption Funds, Reserve Accounts or sinking funds shall be held and applied by the City for the purpose of redeeming Electric Light and Power Bonds of the City as herein defined in accordance

with the provisions of said bonds and the ordinances of the City.

2. "Outstanding Bonds" shall mean the City of Kenai, Alaska Electric Light and Power Revenue Bonds issued as follows: the 1963 City of Kenai, Alaska, Electric Light and Power Revenue Bonds in the original principal amount of $425,000, authorized by Ordinance No. 54 of the City, passed and approved on October 10, 1963; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1964, in the original principal amount of $25,000, authorized by Ordinance No. 70 of the City, passed and approved on the 26th day of August, 1964; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1967, in the original principal amount of $300,000, authorized by Ordinance No. 124 of the City, passed and approved on September 20, 1967; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1969, in the original principal amount of $25,000, authorized by Ordinance No. 174, passed and approved February 4, 1970; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1970, in the original principal amount of $275,000, authorized by Ordinance No. 180 of the City, passed and approved on May 20, 1970. Attached hereto, marked Exhibit C, is a schedule showing (1) the total amount of outstanding indebtedness upon each of the aforesaid Electric Light and Power Revenue Bond issues, and (2) the amounts of principal and interest payments required to be made each year hereafter upon each such issue of revenue bonds from the date hereof to the final maturity date of the bonds of each such issue.

3. The "Kenai 1963 Electric Light and Power Revenue Fund" shall mean the fund of that name created by Ordinance No. 54 into which are paid all gross earnings and revenue derived by the City from the operation of its System and all additions and improvements thereto and extensions thereof.

Section 2. The City shall, if approved by the voters, at the special election herein provided for, enter into an Agreement (hereinafter Agreement) with HEA which Agreement shall provide substantially as follows:

1. For HEA to manage and operate the System for and on behalf of the City of Kenai.

2. For the maintenance of the Kenai 1963 Electric Light and Power Revenue Fund as a trust fund for the payment of the Outstanding Bonds.

3. For HEA to assume and agree to perform all of the services and to provide all supplies and materials necessary to maintain and operate the System and for HEA to covenant and agree to maintain the System in good condition and repair and to meet all of the covenants heretofore made by the City with the holders of the Outstanding Bonds.

4. For HEA to interconnect its existing electrical distribution system with that of the City to the extent that the same may become necessary to provide continuous uninterrupted service for the inhabitants of the City of Kenai.

5. For HEA to provide for additions, improvements, betterments and extensions of the System which, in its judgment, will provide for the full, complete, efficient operation of electric power, light and energy as may be required from time to time by such consumers and users.

6. For HEA to pay into such accounts as may be created by the Agreement, sufficient sums to pay the Outstanding Bonds, maintenance and operation costs, protection of all reserve accounts and payment of any other necessary costs and expenses for maintaining and operating the System and for the payment of any balance to

HEA as reimbursement for wholesale power costs (as defined in the Agreement); its normal costs of maintenance and operation; costs of renewals and replacements of the System and additions, and betterments thereto and as payment for the services of HEA rendered in the management and operation of the System.

7. For HEA to pay to the City upon the effective date of the Agreement (1) a sum in cash equal to the money in value on such date of the investments in the several reserve accounts now held in the several bond funds, (2) a sum in cash sufficient to reimburse the City for moneys expended from the City General Fund for purposes of the system and (3) a sum equal to the value of all personal property used in the operation of the System which may be payable according to the terms of a negotiable note in equal monthly installments to bear interest at the rate of 6% per annum upon diminishing balances.

8. For HEA to account to the City for the operations of the System during each month it operates the System, including an itemized statement of all receipts and disbursements including amounts expended for maintenance, labor cost, additions, improvements, betterments and extensions. The City shall reserve the right to inspect books and records of HEA in so far as they pertain to the operation of the System.

9. For HEA to utilize the same billing policies and procedures as have heretofore pertained to the operation of the System by the City.

10. For the City to grant to HEA a franchise or permit to operate an electical distribution system within the City for a period of 30 years from the effective date of this Agreement.

11. For HEA to make any and all renewals and replacements, extensions, additions, improvements, and betterments

to the System in accordance with the same standards and criteria which HEA would operate its own electric properties and business.

12. For HEA to render an accounting to the City each year, showing in reasonable detail all retirements and renewals, replacements, additions, betterments, extension and improvements to the System made during the preceding calendar year.

13. For HEA to seek and secure the approval of the administrator for the Rural Electrification Administration Department of Agriculture, United States of America to the Agreement.

14. For HEA to endeavor to take into its employ all of the employees of the City's electrical system, excepting supervisory employees, at the same wage scale which are applicable to present employees of HEA in the same classification of employment and the seniority measurment by their continuous employment by the City immediately prior to the beginning of the Agreement.

15. For HEA to base a working crew within the City sufficient and adequate to properly service the System.

16. For HEA to agree not to discriminate in the sale of electrical energy between those who live within the City of Kenai and those who live without the City of Kenai unless there is a rational and justifiable cost basis for so doing.

17. For either party to suspend its obligations under the Agreement during the time it is prevented from doing so by force majeure, which means acts of God, strikes, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, washouts, arrest and restraints of government and people, civil disturbances, explosions, breakdown of machinery or equipment and any other

cause not within the control of the party claiming suspension.

18. For the City to retain the right to terminate the Agreement should HEA become insolvent or become default in any of its obligations, or ask for a receiver or file a petition in bankruptcy or under the reorganization provisions of the Bankruptcy Act of the United States.

19. For the City to retain title and ownership of the System until the full performance of the Agreement.

20. For transfer of the System to HEA upon full performance of the Agreement according to its terms and upon payment of or provision for payment of all principal and interest on all of the Outstanding Bonds.

21. For the Agreement to become effective upon the first day of the calendar month after the voters have approved the entry by the City Council into the Agreement and after the Agreement shall have been ratified and approved by the Board of Directors of HEA and by the Rural Electrification Administration of the Department of Agriculture, United States of America which ever date shall last occur.

22. For the City to continue to operate the System for the sole account and benefit of the City until the Agreement is effective.

23. For such other terms and conditions to be made a part of the Agreement as the Council shall deem necessary or desirable for the protection of the City and the System.

Section 3. If the voters approve the entry into the Agreement between the City and HEA as hereinabove set forth, the City will be obligated to grant a franchise or permit to HEA, and HEA desires to have a franchise or permit to operate an electrical distribution system during the time the Agreement

is in force, and thereafter when the System will be transferred to HEA as provided in the Agreement. The City therefore does grant to HEA, a franchise or permit to operate an electrical distribution system within the City on the terms and conditions set forth hereinafter.

During the time HEA is operating the System and prior to the time the System is transferred to HEA, HEA shall maintain the System, and HEA's system as separate entities, and maintain separate books and accounts, and the provisions of this ordinance relative to the franchise shall not be applicable to the system as distinguished from HEA's system. Following the transfer of the System to HEA, all of the provisions of this ordinance relative to the franchise or permit shall be applicable to any extension of the HEA's System into the City.

Section 4. Grant of Authority.

There is hereby granted by the City to HEA the right and privilege to construct, erect, operate and maintain, in, upon, along, across, above, over and under the streets, alleys, public ways and public places now laid out or dedicated, and all extensions thereof, and additions thereto, in the City, poles, wires, cables, underground conduits, manholes and other electric fixtures necessary or proper for the maintenance and operation in the City of an electric distributuion system and wires connected therewith.

The right to use and occupy said streets, alleys, public ways and places for the purposes herein set forth shall not be exclusive, and the City reserves the right to grant a similar use of said streets, alleys, public ways and places, to any person at any period of this franchise.

Section 5. Compliance with Applicable Laws and Ordinances.

HEA shall, at all times during the life of this franchise, be subject to all lawful exercise of the police power by the City, and to such reasonable regulation as the City shall hereafter by resolution or ordinance provide.

Section 6. HEA Liability - Indemnification.

It is expressly understood and agreed by and between HEA and the City that HEA shall save the City harmless from all loss sustained by the City on account of any suit, judgement, execution, claim, or demand whatsoever, resulting from negligence on the part of HEA in the construction, operation or maintenance of its electric system in the City. The City shall notify HEA's representative in the City within ten (10) days after the presentation of any claim or demand, either by suit or otherwise, made against the City on account of any negligence as aforesaid on the part of HEA.

Section 7. Service Standards.

HEA shall maintain and operate its plant and system and render efficient service in accordance with the rules and regulations as are, or may be, set forth by the Council as provided in Section 5 of this ordinance, or by the Public Utilities Commission of the State of Alaska.

1. Meter Accuracy. All electric service shall be supplied through meters which shall accurately measure the amount of electricity supplied to any consumer.

   a. Request for Meter Check. HEA shall at any time when requested by a consumer make a test of the accuracy of any electrical service meter.

   b. Result of Meter Check. If, upon test, it is found that such meter overruns to the extent of

2 percent or more, HEA shall pay the cost of such tests and shall make a refund for overcharges collected since the last known date of accuracy but for not longer than 60 months, on the basis of the inaccuracy found to exist at the time of the tests. If the meter is found to be accurate or slow or less than 2 per cent fast, the customer shall pay the reasonable cost of such testing.

c. Compulsory Check. Every meter, whether complained of or otherwise, shall be removed from service at least once each seven years and thoroughly tested for its accuracy. Any meter found inaccurate upon any test beyond a tolerance of 2 percent shall not be returned to service until properly adjusted.

2. Notice of Interruption for Repairs. Whenever it is necessary to shut off or interrupt service for the purpose of making repairs, adjustments, or installation, HEA shall do so at such time as will cause the least amount of inconvenience to its customers, and unless such repairs are unforeseen and immediately necessary, it shall give reasonable notice thereof to the consumers.

Section 8. HEA Rules.

HEA shall have the authority to promulgate such rules, regulations, terms and conditions governing the conduct of its business as shall be reasonably necessary to enable HEA to exercise its rights and perform its obligations under this franchise, and to assure an uninterrupted service to each and all of its customers. Such rules, regulations, terms and conditions shall not be in conflict with the provisions hereof or of laws of the

State of Alaska, and shall be subject to approval by the Public Utilities Commission of the State of Alaska.

Section 9. Conditions on Street Occupancy.

1. Use. All transmission and distribution structures, lines and equipment erected by HEA within the City shall be so located as to cause minimum interference with the proper use of streets, alleys and other public ways and places, and to cause minumum interference with the rights or reasonable convenience of property owners who adjoin any of the said streets, alleys or other public ways and places.

2. Restoration. In case of any disturbance of pavement, sidewalk, driveway or other surfacing, HEA shall, at its own cost and expense and in a manner approved by the City Inspector, replace and restore all paving sidewalks, driveway or surface of any street or alley disturbed, in as good condition as before said work was commenced.

3. Relocation. In event that at any time during the period of this franchise the City shall lawfully elect to alter, or change the grade of, any street, alley or other public way, HEA, upon reasonable notice by the City, shall remove, relay, and relocate its poles, wires, cables and other electrical fixtures at its own expense.

4. Placement of Fixtures. HEA shall not place poles or other fixtures where the same will interfere with any electric light, telephone wire or conduit, water hydrant or water main, and all such poles or other

fixtures shall be placed at the outer edge of the sidewalk and inside the curb line, and those placed in alleys shall be placed close to the line of the lot abutting on said alley, and then in such a manner as not to interfere with the usual travel on said streets, alleys and public ways.

5. Temporary Removal of Wire for Building Moving. HEA shall, on the request of any person holding a building moving permit issued by the City temporarily raise or lower its wires to permit the moving of buildings. The expense of such temporary removal, raising or lowering of wires shall be paid by the person requesting the same, and HEA shall have the authority to require such payment in advance. HEA shall be given not less than forty-eight hours' advance notice to arrange for such temporary wire changes.

6. Tree Trimming. HEA shall have the authority to trim trees upon and overhanging streets, alleys, sidewalks and public places of the City so as to prevent the branches of such trees from coming in contact with the wires and cables of HEA, all trimming to be done under the supervision and direction of the City and at the expense of HEA.

Section 10. Preferential or Discriminatory Practices Prohibited. HEA shall not, as to rates, charges, service facilities, rules, regulations, or in any other respect, make or grant any preference or advantage to any person, nor subject any person to any prejudice or disadvantage, provided that nothing in this franchise shall be deemed to prohibit the establishment, of a graduated scale of charges and classified rate schedules to which

any customer coming within such classification would be entitled.

Section 11. Extension Policy. HEA shall file with the City Clerk its extension policy as filed, with, and approved by, the City Council and the Public Utilities Commission of the State of Alaska and HEA shall not make or refuse to make any extension except as permitted by this ordinance.

1. Publication. Upon acceptance of this franchise, HEA at its own expense, shall cause to have published in a newspaper of general circulation in the City its extension policy as filed with, and approved by, the City Council and the Public Utilities Commission of the State of Alaska and shall annually send to each of its customers living within the corporate limits of the City a copy of such extension policy.

Section 12. Approval of Transfer. HEA shall not sell or transfer its plant or system to another, nor transfer any rights under this franchise to another without Council approval. No sale or transfer shall be effective until the vendee, assignee or lessee has filed in the office of the City Clerk an instrument, duly executed, reciting the fact of such sale, assignment or lease, accepting the terms of the franchise, and agreeing to perform all the conditions thereof.

Section 13. City Rights in Franchise.

1. City Rules. The right is hereby reserved to the City to adopt, in addition to the provisions herein contained and existing applicable ordinances, such additional regulations as it shall find necessary in the exercise of the police power, provided that such regulations, by ordinance or otherwise, shall not be in conflict with the laws of the State of Alaska.

2. Use of System by City. The City shall have the right, during the life of this franchise, free of charge, where aerial construction exists, of maintaining upon the poles of the City within the City limits wire and pole fixtures necessary for a police and fire alarm system, such wires and fixtures to be constructed and maintained to the satisfaction of the City and in accordance with its specifications.

a. Compliance with HEA Rules. The City in its use and maintenance of such wires an fixtures, shall at all times comply with the rules and regulations of HEA so that there may be a minimum danger of contact or conflict between the wires and fixtures of HEA and the wires and fixtures used by the City.

b. Liability. The City shall be solely responsible for all damage to persons or property arising out of the construction or maintenance of said wires and fixtures authorized by this Section and shall save HEA harmless from all claims and demands whatsoever arising out of the attachment, maintenance, change or removal of said wires and fixtures to the poles of HEA. In case of rearrangement of HEA plant or removal of poles or fixtures the City shall save HEA harmless from any damage to persons or property arising out of the removal or construction of its wires or other fixtures.

3. Supervision and Inspection. The City shall have the right to supervise all construction or installation work performed subject to the provisions of this

ordinance and to make such inspections as it shall find necessary to insure compliance with governing ordinances.

4. Procedure after Termination or Revocation. Upon the revocation of this franchise by the Council, or at the end of the term of this franchise, the City shall have the right to determine whether HEA shall continue to operate and maintain its plant and distributing system pending the decisions of the City as to the future maintenance and operation of the plant and distribution system.

5. Right of Acquisition by the City. At the expiration of the term for which this franchise is granted, the City, at its election, and upon the payment of an amount which shall be determined by a valuation provided by the Alaska Public Utilities Commission or its successor, shall have the right to purchase and take over the property of HEA within the City limits of Kenai. Upon the exercise of this option by the City by the service of an official notice upon HEA to that effect, HEA shall immediately execute such deeds or instruments of conveyance to the City as shall be required to convey to the City title to the property in fee simple, free from any and all liens and encumbrances. HEA shall make it a condition of each contract entered into by it with reference to operations under this franchise that the contract shall be subject to the exercise of this option by the City and that the City shall have the right to be substituted for HEA as a party to any such contract and shall have the right to succeed to all privileges and the obligations thereof at its option.

6. Payment to City. HEA shall pay to the City for the privilege of operating its system under this franchise a sum equivalent to ____per cent (%) of the annual gross operating revenues taken in and received by it on all retail sales of electricity with the City.

7. Rates. Rates charged by HEA for service hereunder shall be fair and reasonable and designed to meet all necessary costs of the service, including a fair rate of return on the net valuation of its properties devoted thereto, under efficient and economical management. When this franchise takes effect HEA shall have the authority to charge and collect not to exceed the rates presently in effect or as approved by the Public Utilities Commission of the State of Alaska.

1. Savings to Customers. If during the term of this franchise HEA purchases electric energy, other than dump or emergency energy, for distribution, any savings which accrue to HEA by reason of such purchase of the electric energy used in the City shall be forthwith passed on to its consumers. If during the term of the franchise HEA receives refunds, or if the cost to HEA of providing electric service is reduced, by order of any regulatory body having competent jurisdiction the Company shall pass on to its customers such refunds or any savings resulting therefrom.

8. Records and Reports. The City shall have access at all reasonable hours to HEA's plans, contracts, and

engineering, accounting, financial statistical, customer and service records relating to the property and the operation of HEA and to all other records required to be kept hereunder. The following records and reports shall be filed with the City Clerk and in the local office of HEA.

1. Rules and Regulations. Copies of such rules, regulations, terms and conditions adopted by it for the conduct of its business.

2. Meter Checks. Reports of the results of all requested and compulsory meter checks.

3. Gross Revenue. An annual summary report showing gross revenues received by HEA from its operations with the City during the preceding year and such other information as the City shall request with respect to properties and expenses related to HEA service within the City.

9. Term of Franchise. The franchise and rights herein granted shall take effect and be in force from and after the approval by the voters of the City of this franchise at a special election to be called and; upon final execution and approval of the Agreement between HEA and the City which is set forth hereinabove and; upon filing of the required acceptance by HEA with the City Clerk and shall continue in force and effect for a term of thirty (30) years from the effective date of the Agreement.

10. Publication Costs. HEA shall assure the cost of publication of this franchise ordinance as such publication is required by law. A bill for publication

costs shall be presented to HEA by the City Treasurer upon the Company's filing of acceptance and shall be paid at that time.

11. Penalties. Any violation by HEA, its vendee, lessee or successors of the provisions of this franchise or any material portions thereof, or the failure promptly to perform any of the provisions thereof, shall be cause for the forfeiture of this franchise and all rights hereunder and the City, after written notice to HEA, advising of the default and continuation of such violation, failure or default for a period of sixty (60) days following said written notice, may declare this franchise void.

Section 14. A copy of this ordinance shall be filed in the office of the City Clerk and subject to public inspection for thirty (30) days after it is filed.

Section 15. A public hearing on whether or not this ordinance should be adopted shall be held at 8:00 o'clock P.M. at City Library 30 June, 1971 and the City Clerk is hereby directed to give notice of such public hearing by publication in the Cook Inlet Courier at least one week prior to the time set for the hearing.

Section 16. Within two (2) weeks after this ordinance has been finally adopted, HEA must file with the City Clerk its unconditional acceptance of all terms of the franchise or permit as set forth herein. HEA further must deposit with the Department of Finance of the City, an amount of money estimated by the City Clerk to be adequate to pay all expenses of holding the special election provided for herein.

Section 17. The proposition of whether or not the

City shall be authorized to enter into the Agreement with HEA on the terms and conditions set forth herein, or terms and conditions substantially similar thereto, and whether the City shall, as a part of such Agreement, adopt the franchise provisions of this ordinance, as described hereinabove, shall be submitted to the qualified electors of the City at a special election to be held therein on 3 August, 1971. Said proposition shall be in the following form:

PROPOSITION NO. 1

ELECTRIC LIGHT AND POWER
OPERATING AND FRANCHISE AGREEMENT

Shall the City of Kenai, Alaska enter into an Agreement with Homer Electric Association, Inc. (HEA) for the operation and management of the City's Electrical distribution system by HEA and if all the terms of the Agreement are met, provide for the transfer of all of the City's electrical distribution system to HEA and will as a part of said Agreement, grant a franchise or permit to HEA to operate and maintain an electrical distribution system on the public streets and alleys and other public places of the City of Kenai, for a period of thirty (30) years all as is more specifically provided in Ordinance No. 199 adopted June 30, 1971, which ordinance is hereby submitted for ratification?

OPERATING AND FRANCHISE ORDINANCE YES . . . /___/

OPERATING AND FRANCHISE ORDINANCE NO . . . /___/

Section 18. Those eligible to vote at said special election must possess the following qualifications:

1. They must be at least 19 years of age.

2. They must be citizens of the United States, and for at least one (1) year preceding the election citizens of the State of Alaska, and for thirty (30) days immediately preceding the election residents of the City of Kenai, Alaska.

3. They must be able to read and write the English language, as prescribed by law.

4. They must not be barred from voting by any other provision of law.

5. They must be registered in the manner prescribed in Section 6-3, 6-4, 6-5, 6-6, 6-7 and 6-8 of the Kenai Code, 1963.

Section 19. For elector or voter registration the book will be open daily in the office of the City Clerk, City Administration Building, Kenai, Alaska, from 9:00 o'clock A.M. until 5:00 o'clock P.M. daily, except Saturdays, Sundays and holidays. Registration shall be closed five (5) days preceding the Special election.

A duplicate registration index shall be furnished by the City Clerk-Registrar to the precinct judges and clerks of the election.

Section 20. Notice of this special election shall be published once a week for not less than two (2) consecutive weeks in a newspaper of general circulation in the City, and the first publication thereof shall be not less than fourteen (14) days prior to said election date. Said notice shall be published in the "Cook Inlet Courier" which is hereby determined to be a newspaper of general circulation within the City.

Notice of this special election shall also be posted on the official City bulletin board in or on the City Administration Building and in two (2) other conspicuous places with the City.

Section 21. The designated polling places will be the City Administration Building, and the Kenai Airport Terminal Building. Said polls shall be open from 8:00 o'clock A.M. to 8:00 o'clock P.M. on the 3 day of August, 1971.

Section 22. The following qualified electors of the

City are hereby designated and appointed to serve as judges and clerks at said special election:

	Judges		Clerks
Precinct No. 1	Frances Meeks	Chairman	Frances Meeks
	Marion Kempf		
	Sharon Young		
Precinct No. 2	Nedra Evenson	Chairman	Nedra Evenson
	Louise Carter		
	Peggy Nevers		

If a replacement shall be required for any of the above-named officials, such replacement may be appointed at any meeting of the City Council.

Section 23. This ordinance shall be published in full after its passage not more than four (4) weeks and at least two (2) weeks before the election hereinabove called is held.

Section 24. An emergency is hereby declared and the rules governing the introduction, reading, passage, and approval of this ordinance are hereby suspended and this ordinance will be immediately effective upon its passage and approval.

PASSED AND APPROVED this 29 day of December, 1971.

PROPOSITION NO. 1

ELECTRIC LIGHT AND POWER
OPERATING AND FRANCHISE AGREEMENT

Shall the City of Kenai, Alaska enter into an Agreement with Homer Electric Association, Inc. (HEA) for the operation and management of the City's Electrical distribution system by HEA and if all the terms of the Agreement are met, provide for the transfer of all of the City's electrical distribution system to HEA and will as a part of said Agreement, grant a franchise or permit to HEA to operate and maintain an electrical distribution system on the public streets and alleys and other public places of the City of Kenai, for a period of thirty (30) years all as is more specifically provided in Ordinance No. 199 adopted June 30, 1971, which ordinance is hereby submitted for ratification?

OPERATING AND FRANCHISE ORDINANCE YES . . . /☐/

OPERATING AND FRANCHISE ORDINANCE NO . . . /☐/

EXHIBIT 3

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA
THIRD JUDICIAL DISTRICT
AT KENAI

HOMER ELECTRIC ASSOCIATION, INC.,

Plaintiff,

vs.

CITY OF KENAI, a municipal corporation,

Defendant.

Case No. 3KN-83-461 CI.

ANSWER TO FIRST AMENDED COMPLAINT FOR DECLARATORY JUDGMENT

Comes now Defendant, City of Kenai, a home rule municipality, organized and existing under the laws of the State of Alaska, whose mailing address is as shown in the margin, and pleads and alleges as follows:

I

Defendant admits Paragraph 1 of the above captioned Amended Complaint.

COUNT I

II

Defendant admits Paragraphs 2, 3, and 6 of Count I of the First Amended Complaint.

III

Defendant is without sufficient knowledge or belief with which to answer Paragraph 5 of Count I of the First Amended Complaint and therefore denies the same.

IV

Defendant denies Paragraph 4 of Count I of the First Amended Complaint insofar as it alleges or infers an obligation or indemnification to Homer Electric Association, Inc. (hereinafter "HEA") by the City of Kenai for costs of relocation of electrical transmission facilities.

CITY OF KENAI

COUNT II

V

Defendant is without sufficient knowledge or belief with which to answer Paragraph 7 of Count II of the First Amended Complaint and therefore denies the same.

VI

Defendant admits Paragraph 8 of Count II of the First Amended Complaint.

FIRST AFFIRMATIVE DEFENSE

Plaintiff has a common law obligation to relocate facilities at its own expense when necessary to make way for proper governmental use of the streets.

SECOND AFFIRMATIVE DEFENSE

Any rights of Plaintiff are subject to Defendant's exercise of its police powers which include required relocations of facilities to make way for public improvements.

THIRD AFFIRMATIVE DEFENSE

Any rights of Plaintiff are subject to the paramount right of the public to use of the right-of-way and Plaintiff must bear expenses of relocation or improvement incident to facilitating a public use.

FOURTH AFFIRMATIVE DEFENSE

The agreement between Plaintiff and Defendant, a copy of which is attached to the First Amended Complaint in the instant case, is not, wholly or partially, a "relocation agreement" in derogation of the common law.

FIFTH AFFIRMATIVE DEFENSE

Defendant could not, and cannot, directly or indirectly burden itself or its citizens with the costs of utility relocations.

SIXTH AFFIRMATIVE DEFENSE

Defendant maintains that any cost relocation subsequent to August 10, 1971, is provided for by Paragraph 11 of the agreement which provides in part:

"HEA covenants to indemnify and save the City harmless from any and all claims and liabilities by reason of any matter or thing arising out of the operation and management by HEA of the System during the term of this agreement."

SEVENTH AFFIRMATIVE DEFENSE

Defendant maintains a failure of consideration as to any alleged duty of payment by Defendant to Plaintiff for relocation costs.

EIGHTH AFFIRMATIVE DEFENSE

Defendant specifically reserves until specific dates are known, the affirmative defense of the Statute of Limitations, or latches as its alternative, as to any claimed relocation for which Plaintiff claims Defendant is financially responsible.

NINTH AFFIRMATIVE DEFENSE

Defendant asserts as an alternate partial affirmative Defense that amounts claimed as relocation costs by Plaintiff are excessive, and do not reflect appropriate, accurate charges relative to the value of equipment and facilities being replaced.

TENTH AFFIRMATIVE DEFENSE

Defendant maintains requiring HEA to bear relocation costs is reasonable and, pursuant to A.S. 42.05.251 constitutes a portion of the reasonable terms, conditions, and exceptions for the right to a permit to use public streets, alleys, and other public ways of Defendant.

COUNTERCLAIM

As a Counterclaim herein Defendant, City of Kenai, a home rule municipality, organizing and existing under the laws of the State of Alaska, alleges and pleads as follows:

1

The Agreement incorporated by reference in Plaintiff's First Amended Complaint provides as the last sentence to Paragraph 14 of said agreement that:

"HEA further covenants and agrees to base at all times a working crew within the City sufficient and adequate to properly service the system."

II

Since shortly after execution of the Agreement quoted immediately above, Plaintiff has been in breach of Paragraph 14 of the Agreement.

Wherefore, the Court is requested to construe the terms of the Agreement between the parties and:

1. Confirm the obligation of HEA to acquiesce to the reasonable exercise of Defendant's rights and powers in regard to electrical utility facilities relocations.

2. Declare that the Agreement between the parties contains no "relocation agreement" such as would burden Respondent with costs of relocations incident to public improvements.

3. Declare the obligation of HEA to establish and base an adequate working crew within the City of Kenai.

4. Such other and further relief as is just and equitable in the premises.

DATED at Kenai, Alaska, this 22 day of July, 1983.

Tim Rogers
City Attorney for Plaintiff

CITY OF KENAI

THIRD JUDICIAL DISTRICT
AT KENAI

HOMER ELECTRIC ASSOCIATION, INC.,	)
Plaintiff,	)
vs.	)
CITY OF KENAI, a municipal corporation,	)
Defendant.	)

Case No. 3KN-83-461CI

FIRST AMENDED COMPLAINT

Plaintiff, HOMER ELECTRIC ASSOCIATION, INC., through its attorney, C. R. BALDWIN, alleges as follows:

1. Plaintiff, hereinafter called HEA, is a co operative organized and existing under and by virture of the laws of the State of Alaska and has filed its report and paid its taxes last due.

COUNT I

2. On August 10, 1971, HEA entered into an Agreement with the City of Kenai, a home rule municipality existing under the laws of the State of Alaska. A copy of the Agreement, without exhibits, is attached hereto as Exhibit A.

3. In the Agreement the City of Kenai granted to HEA the right to manage and operate the electrical utility system owned by the City of Kenai.

4. Paragraph 13 of the Agreement provides in part:

> The City covenants to indemnify and save HEA harmless from any and all claims and liabilities by reason of any matter or thing arising out of the ownership or operation by the City of the System prior to the effective date of this Agreement.

5. The City of Kenai has made demand upon HEA to relocate certain electrical transmission facilities which had

C R BALDWIN
ATTORNEY
KENAI ALASKA 99611

been installed by the City of Kenai prior to August 10, 1971, and HEA has complied with such demands.

6. HEA has made demand upon the City of Kenai for payment of the costs associated with such work and the City of Kenai has refused to pay the same and has denied any liability therefor.

COUNT II

7. The City of Kenai has made demand upon HEA to relocate certain electrical transmission facilities which have been installed by HEA, and HEA has complied with such demands.

8. HEA has made demand upon the City of Kenai for payment of the costs associated with such work and the City of Kenai has refused to pay the same and has denied any liability therefor.

WHEREFORE, Plaintiff requests this Court to grant relief as follows:

1. To declare the rights and obligations of the parties with respect to the terms of the contract referred to above and to render a judgment declaring that said Agreement obligates the City of Kenai to indemnify HEA for the costs associated with relocating all electrical transmission facilities which were constructed by the City of Kenai prior to August 10, 1971, when such relocation is done at the instance of the City of Kenai.

2. To award Plaintiff a judgment against the Defendant in an amount in excess of $10,000.00, for costs associated with relocating Plaintiff's facilities, the exact sum to be such as shall be proven at trial.

3. To grant Plaintiff such other and further

relief as may be appropriate under the circumstances.

DATED: AT Kenai, Alaska, this 13 day of July, 1983.

C.R. BALDWIN
Attorney for Plaintiff

CERTIFICATE OF SERVICE

The undersigned hereby certifies that on the 13 day of July 19 83 a true and correct copy was hand delivered to attorney of record.

AGREEMENT FOR THE OPERATION OF ELECTRIC UTILITY
OF THE CITY OF KENAI, STATE OF ALASKA

THIS AGREEMENT, made the 10th day of August, 1971, by and between the CITY OF KENAI, STATE OF ALASKA (hereinafter called "City"), and HOMER ELECTRIC ASSOCIATION, INC., a cooperative organized and existing under and by virtue of the laws of the State of Alaska (hereinafter called "HEA");

W I T N E S S E T H:

WHEREAS, the City has established and is presently maintaining and operating a municipal electric power system, and in connection therewith owns and operates properties for the purchase, transmission, distribution, supply and sale of electric power and energy; and is engaged in the business of selling and supplying electric power and energy to residential, commercial, industrial and governmental consumers within and about the City of Kenai, Alaska; and

WHEREAS, HEA, as an electric cooperative created and existing under the laws of the State of Alaska, engages, among other utility activities, in the business of purchasing, transmitting, distributing, supplying and selling electric energy within the State of Alaska; and

WHEREAS, HEA's electrical system is or can be interconnected with a system of the City for the purpose of furnishing standby electric power; and

WHEREAS, the City Council of the City of Kenai ("Council") deems that the operation by HEA of City's electric system would be beneficial to the City and to City's users and consumers of electric energy; and

WHEREAS, the Council has resolved that such operation of the City's electric system can be accomplished by means of an operating agreement between the City and HEA; and

WHEREAS, the Board of Directors of HEA has determined that it is to the interest of HEA that an agreement should be entered into for the operation of the City's electrical system under the terms and conditions hereinafter set forth;

NOW, THEREFORE, in consideration of the premises and of the mutual undertakings and agreements hereinafter set forth, the parties hereto agree as follows:

1. The electric utility system (hereinafter referred to as the "System") of the City shall include all tangible properties and property rights which, as of the effective date of this agreement, are being used by the City for, or are useful for, the transmission and distribution of electric energy and power within the limits of the City and in such area adjacent thereto as may be presently served by said System. Said tangible property shall include real property, rights-of-way, easements, poles and pole lines, crossarms, sub-stations, transformers, station equipment, meters, and other tangible property of every kind and description which are now used, owned and operated by the City in the operation of said System, together with any and all additions, betterments, improvements and extensions thereof which may hereafter be acquired and made a part of said System under the terms of this agreement; the System shall also include all rights and obligations which the City shall have under that certain contract existing between the City and Consolidated Utilities, Ltd., dated September 11, 1963, covering the generation by Consolidated and the purchase by the City of electric energy. The aforesaid definition of the System shall not include cash in the Revenue Fund of the System as of the effective date of the agreement, nor shall it include any of the funds, securities, investments or assets in any of the Bond Redemption Funds or in any of the Reserve Accounts of the Bond Redemption Funds or any sinking fund pertaining thereto, provided, however, that funds, securities, investments or assets in any such Bond Redemption Funds and Reserve Accounts or sinking funds shall be held and applied by the City for the purpose of redeeming Electric Light and Power Bonds of the City as herein defined in accordance with the provisions of said bonds and the ordinances of the City.

The properties and business as hereinbefore mentioned are more fully listed and described in Exhibit A hereto attached and made a part hereof. Said properties are situated and located as shown on Exhibit B attached hereto and made a part hereof.

2. Pursuant to proper authorization there have been issued revenue bonds of the City, generally known as "City of Kenai, Alaska, Electric Light and Power Revenue Bonds." The said issues of revenue bonds and the original

amounts of the bonds issued are as follows: the 1963 City of Kenai, Alaska, Electric Light and Power Revenue Bonds in the original principal amount of $425,000, authorized by Ordinance No. 54 of the City, passed and approved on October 10, 1963; The City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1964, in the original principal amount of $25,000, authorized by Ordinance No. 70 of the City, passed and approved on the 26th day of August, 1964; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1967, in the original principal amount of $300,000, authorized by Ordinance No. 124 of the City, passed and approved on September 20, 1967; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1969, in the original principal amount of $25,000, authorized by Ordinance No. 174, passed and approved February 4, 1970; the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, 1970, in the original principal amount of $275,000, authorized by Ordinance No. 180 of the City, passed and approved on May 20, 1970. Attached hereto, marked Exhibit C, is a schedule showing (1) the total amount of outstanding indebtedness upon each of the aforesaid Electric Light and Power Revenue Bond issues, and (2) the amounts of principal and interest payments required to be made each year hereafter upon each such issue of revenue bonds from the date hereof to the final maturity date of the bonds of each such issue.

Pursuant to the provisions of Ordinance No. 54 aforesaid, a special fund was created, designated as the "Kenai 1963 Electric Light and Power Revenue Fund." Said ordinance and all of the aforesaid ordinances subsequently enacted provided, also, for the establishment of Bond Redemption Funds. Under each of said ordinances the City pledged and bound itself to pay into said Electric Light and Power Revenue Fund as collected all of the gross earnings and revenue derived by the City from the operation of its electric light and power system, and all additions and improvements thereto and extensions thereof, and all of the Electric Light and Power Revenue Bonds aforesaid excepting the $25,000 of bonds authorized by Ordinance No. 174 aforesaid were payable on a parity out of said Electric Light and Power Revenue Fund.

3. The City agrees that during the term of this agreement said Kenai 1963 Electric Light and Power Revenue Fund shall be maintained at the National Bank of Alaska, Kenai, Alaska, as a special trust fund for the uses and purposes herein set forth. Said Fund is hereinafter referred to as the "Escrow Account". Deposits into said Escrow Account and withdrawals therefrom shall be made in the manner hereinafter provided.

4. The City does hereby grant to REA the right, power and authority to manage and operate the System and REA does hereby agree to assume said management and operation for and on behalf of the City of Kenai, subject to the terms and conditions hereof.

5. REA does hereby assume and agree to perform all of the services and to provide all supplies and materials necessary to maintain and operate the System; REA covenants and agrees to maintain said System in good condition and repair, to operate the same in an efficient manner and at a reasonable cost, and to cooperate with the City to establish, maintain and collect rates and charges for light and power for so long as any of the aforesaid Electric Light and Power Revenue Bonds of the City shall be outstanding, sufficient to provide revenue available for the payment into the various Bond Redemption Funds of the City amounts equal to at least 1.4 times the average annual amount required to pay the principal of and interest on said bonds as the same shall become due, as provided in each of the aforesaid ordinances, and to be sufficient, further, to provide for the payment of normal costs of maintenance and operation of said System but before depreciation and before any taxes or payments in lieu of taxes. REA further agrees to comply with all covenants made by the City in the various ordinances authorizing the outstanding light and power revenue bonds of the City.

During the term of this contract and subject to the conditions hereinafter stated, REA covenants and agrees to provide a continuous, uninterrupted electric power and light service to the consumers and users of the System, which shall include the inhabitants, commercial and industrial users located within the City of Kenai and the vicinity thereof presently bei

served by the System, and to all such additional users and consumers who may be served thereby in the event that said System is enlarged, improved or expanded, whether within or without the corporate limits of the City; to accomplish such end MEA agrees to interconnect its existing electrical distribution system with that of the City to the extent that the same may become necessary to provide the continuous uninterrupted service required hereunder. MEA shall provide for such additions, improvements, betterments and extensions of the System as in the exercise of its best judgment shall be necessary and advisable to provide for the full, complete and efficient operation of the System and to provide such additional service to the consumers of electric power, light and energy as may be required from time to time by such consumers and users.

6. MEA shall pay into the aforesaid Escrow Account, on or before the first day of each month following the first month of the effective date of this agreement all of the gross earnings and revenues derived from the operation of the aforesaid electric light and power system and all additions and improvements thereto and extensions thereof.

In the event such gross earnings and revenues in any month shall not be at least equal to one-twelfth of 1.4 times the average annual amount required to pay the principal of and interest on the aforesaid Electric Light and Power Bonds of the City or the sum of $8,000, whichever is greater, MEA agrees to deposit additional funds each said month into said Escrow Account to supply such deficiency.

7. It is agreed that moneys in the Escrow Account shall be disbursed monthly in the following manner and in the following order of priority:

First. There shall be disbursed to the aforesaid several Bond Redemption Funds the sums required by ordinance to be deposited therein for the payment of the principal of and interest on the outstanding Electric Light and Power Revenue Bonds of the City.

Second. There shall be disbursed to the aforesaid several Reserve Accounts in the Bond Redemption Funds the sums required by ordinance to be deposited therein.

Third. The balance of the minimum amount required to be deposited into the Escrow Account by HEA pursuant to the last sentence of section 6 hereof shall be disbursed to a special trust fund which the City shall establish at the National Bank of Alaska, Kenai, Alaska. Moneys in said special trust fund shall be used solely to pay the principal of and interest and premium, if any, on the aforesaid bonds.

Fourth. The balance of the funds deposited in said Escrow Account shall be disbursed to HEA as reimbursement for Wholesale Power Costs, the normal costs of maintenance and operation, costs of renewals and replacements of the System and additions and betterments thereto and as payment for the services of HEA rendered in the management and operation of the System.

"Wholesale Power Costs" as referred to herein shall include wholesale power costs which shall be paid by HEA for the City under the contract dated September 11, 1963, as heretofore amended, between the City and Consolidated Utilities, Ltd. and any other power costs that may be incurred by HEA hereunder.

The payments required by this section to be made into the Bond Redemption Funds, the Reserve Accounts and the special trust fund shall continue until there has been set aside therein money and investments maturing at such time or times and bearing interest to be earned thereon in amounts sufficient to redeem and retire all the outstanding light and power revenue bonds of the City in accordance with their terms.

It is agreed and understood that nothing herein shall in any manner change, modify or affect the existing aforesaid Bond Redemption Funds and Reserve Accounts therein of the City or change in any way, alter, modify or affect any of the covenants, obligations or contracts of the City with respect to each of said Bond Redemption Funds and Reserve Accounts, all as provided in the aforesaid ordinances respectively.

8. HEA, upon the effective date of this agreement, agrees to pay to the City the following sums:

(1) A sum in cash equal to the money and value on such date of the investments in the several Reserve Accounts.

(2) The sum of $100,000 in cash to reimburse the City for moneys expended from the City's General Fund for the purposes of the System.

(3) A sum equal to the value of all personal property used in the operation of the System, which shall be payable according to the terms of a negotiable promissory note in 120 equal monthly installments, the first of which shall be paid on the first day of the month following the effective date of this agreement. Said promissory note shall provide for interest at the rate of 6% per annum upon the diminishing balances thereof.

9. At the time of its monthly deposit into the aforesaid Escrow Account, HEA shall deliver to the City an itemized account of the operations of the System during the preceding month, including an itemized statement of all receipts and disbursements, including amounts expended for maintenance, labor costs, additions, improvements, betterments and extensions. The City shall have the right at the end of each quarterly period of each year to inspect the books and records of HEA insofar as the same pertain to the operation of the System as herein defined. HEA will utilize the same billing policies and procedures relating to all bills for electric service rendered as have been in effect heretofore and shall have the same rights and power with reference to the collection of charges due for electric service as have heretofore pertained to the operation of the System by the City.

10. The City agrees to grant to HEA to such extent as may be required by law a permit to operate the System within the City's streets, alleys and rights-of-way, which permit shall be for a period of thirty (30) years from and after the effective date of this agreement. Said permit will remain in force and effect following the termination of this agreement for any unexpired portion of said 30-year period following such termination.

11. HEA, within a reasonable time and at its own expense, shall make any and all renewals and replacements, extensions, additions, improvements and betterments to the System in accordance with the said standards and criteria under which HEA would operate its own electric properties and busines HEA agrees, on or before the first day of February each year, to furnish the city with an annual statement in reasonable detail showing all retirements of and renewals, replacements, additions, betterments, extensions and improvement to the System made during the preceding calendar year. Such statement shall include the following information:

(1) A description of the replacement, addition, betterment, extension or improvement; and

(2) A statement of the cost of the replacement, betterment, extension or improvement.

All of any such replacements, betterments, extensions or improvements shall upon installation become and thereafter remain a part of the System.

12. The Council of the City of Kenai agrees upon the execution of this agreement to enact an ordinance and call an election in the manner and form provided by the Charter of the City of Kenai to effectuate this agreement

13. Upon the execution of this agreement the Board of Directors of HEA shall approve and ratify this agreement by appropriate action. Any such approval shall be subject to and not be effective until the same is approved by the Administrator, Rural Electrification Administration, Department of Agriculture, United States of America. HEA undertakes to diligently make, file and apply for any orders and authority from the Rural Electrification Administration of the United States of America which may be required.

The City Attorney of the City of Kenai shall furnish HEA with an opinion in writing satisfactory to HEA to the effect that the City is duly and legally authorized to make and enter into this agreement for the term thereof and to carry out and perform all of the terms, provisions and conditions of this agreement binding upon the City in a manner consistent with the intent hereof. The City covenants to indemnify and save HEA harmless from any and all claims and liabilities by reason of any matter or thing arising out of the ownership or operation by the City of the System prior to

the effective date of this agreement. MEA covenants to indemnify and save the City harmless from any and all claims and liabilities by reason of any matter or thing arising out of the operation and management by MEA of the System during the term of this agreement.

14. MEA agrees, effective as of the date of the beginning of this agreement, that it will endeavor to take into its employ all of the employees of City's electric system excepting supervisory employees at the same wage scales which are applicable to present employees of MEA in the same classification of employment and with seniority measurement by their continuous employment by the City immediately prior to the beginning of this agreement. MEA further covenants and agrees to base at all times a working crew within the City sufficient and adequate to properly service the System.

15. In the event of either party hereto being rendered unable wholly or in part by force majeure to perform its obligations hereunder other than to make payments due hereunder, it is agreed that upon such party giving notice and full particulars of such force majeure in writing or by telegraph to the other party as soon as possible after the occurrence of the cause relied on, then the obligations of the party giving such notice so far as they are affected by such force majeure shall be suspended during the continuance of any inability so caused, but for no longer period, and such cause, so far as possible, shall be remedied with all reasonable speed. The term "force majeure" as employed herein shall mean acts of God, strikes or other industrial disturbance, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, f washouts, arrests and restraints of government and people's civil disturbances explosions, breakdown of machinery or equipment and any other causes, whether of a kind herein enumerated or otherwise, not within the control of the party claiming suspension, and which by the exercise of due diligence such party is unable to prevent or overcome.

It is understood and agreed that the settlement of strikes shall be entirely within the discretion of the party experiencing same and the above requirement that any force majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes by acceding to the demands of the organization on strike when such course is, in the judgment of the party experiencing the strike, inadvisable.

11. HEA, within a reasonable time and at its own expense, shall make any and all renewals and replacements, extensions, additions, improvements and betterments to the System in accordance with the said standards and criteria under which HEA would operate its own electric properties and business. HEA agrees, on or before the first day of February each year, to furnish the city with an annual statement in reasonable detail showing all retirements of and renewals, replacements, additions, betterments, extensions and improvements to the System made during the preceding calendar year. Such statement shall include the following information:

(1) A description of the replacement, addition, betterment, extension or improvement; and

(2) A statement of the cost of the replacement, betterment, extension or improvement.

All of any such replacements, betterments, extensions or improvements shall upon installation become and thereafter remain a part of the System.

12. The Council of the City of Kenai agrees upon the execution of this agreement to enact an ordinance and call an election in the manner and form provided by the Charter of the City of Kenai to effectuate this agreement.

13. Upon the execution of this agreement the Board of Directors of HEA shall approve and ratify this agreement by appropriate action. Any such approval shall be subject to and not be effective until the same is approved by the Administrator, Rural Electrification Administration, Department of Agriculture, United States of America. HEA undertakes to diligently make, file and apply for any orders and authority from the Rural Electrification Administration of the United States of America which may be required.

The City Attorney of the City of Kenai shall furnish HEA with an opinion in writing satisfactory to HEA to the effect that the City is duly and legally authorized to make and enter into this agreement for the term thereof and to carry out and perform all of the terms, provisions and conditions of this agreement binding upon the City in a manner consistent with the intent hereof. The City covenants to indemnify and save HEA harmless from any and all claims and liabilities by reason of any matter or thing arising out of the ownership or operation by the City of the System prior to

16. HEA agrees that unless required by order of the Public Service Commission of the State of Alaska, it will not sell or deliver electric utility power or electric power or lighting service to users or consumers living outside the corporate limits of the City of Kenai at a more favorable rate or under more favorable terms than those served within the City of Kenai after taking into consideration wholesale power sources and the cost thereof.

17. In the event of any default in any of the obligations of HEA or in the event that any proceeding in bankruptcy or for an arrangement or reorganization under the Bankruptcy Act of the United States, or in the event of the appointment of a Receiver for the business, property or affairs of HEA, and in the event that any such action or proceeding be not dismissed within sixty (60) days from the commencement thereof, the City may, at its election, at any time thereafter declare this operating agreement to be terminated and at an end. In any such event the City shall be entitled to receive payment of any and all moneys then due under the terms of this agreement by HEA. Upon any such notice of cancellation and termination being given, HEA shall forthwith return the operation and management of the System to the City and shall deliver to the City all books of account, records, papers and documents pertaining to the operation of the said system.

18. The title to and ownership of the System and all of the properties and rights constituting the System shall remain with the City until the full performance of this operating agreement according to the terms herein set forth. Upon the payment of all principal and interest of each of the City of Kenai, Alaska, Electric Light and Power Revenue Bonds, as set forth in paragraph 2 hereof and in the exhibits hereto attached and upon the full retirement of all of said bonds the title to the System as herein defined and all of the component parts thereof shall thereupon pass to HEA, and at such time the City shall make, execute and deliver to HEA such grants, conveyances, assignments and title documents as may be necessary to effectuate such transfer of title.

19. At the effective date of this agreement the City shall deposit in a special escrow account at the aforesaid bank all meter deposits or secured deposits theretofore received from the consumers of the System. Said

deposits shall be retained in said Escrow Account for the purpose of complying with the provisions of the several agreements under which the same were deposited. In the event that any such deposits shall become forfeited to the City, the same shall be deposited in the aforesaid Escrow Account and be considered as part of the revenues of the System.

20. The effective date of this agreement shall be on the first day of the calendar month after a favorable election shall have been held by the City pursuant to this agreement and after the agreement shall have been ratified and approved by the Board of Directors of HEA and by the Rural Electrification Administration of the Department of Agriculture, United States of America, whichever date shall last occur. Pending said date the City shall continue to operate said System for the sole account and benefit of the City and at the City's risk.

This agreement shall terminate when all outstanding rights and obligations of the parties hereto have been fulfilled, and all of the outstanding Electric Light and Power Revenue Bonds have been retired or provision for such retirement has been duly made in accordance with the terms of such bonds, whichever is sooner.

21. Notices and communications required hereunder shall be deemed to be duly given and properly delivered if in writing and sent by United States mail, postage prepaid, addressed to the respective parties at the addresses stated below, or such other address as they shall respectively hereafter designate in writing, or personally delivered to any officer of the respective parties at such respective addresses unless otherwise provided herein:

Presently, under AS 42.05.251 a utility company is entitled to a permit to use of the streets, alleys and other public ways "upon payment of a reasonable permit fee and on reasonable terms and conditions and with reasonable exceptions" required by the City. Absent a contractual relationship to the contrary the applicable law is stated at 12 McQuillim Municipal Corporations, Section 3472 in that "the Grantee of a franchise to use the streets takes it subject to the right of the municipality to make public improvements whenever and wherever the public interest demands, and if the improvement causes injury to the company, as by requiring it to relay or change the location of its pipes, tracts, or poles, or otherwise, the Grantee of the franchise cannot recover damages from a municipality therefor." McQuillim further maintains in Section 34.74 (a) that "the fundamental common-law right applicable to franchises and streets is that the utility company must relocate its facilities and public streets when changes are required by public necessity. Accordingly, it is generally held that the municipality may require a change in the location of pipes or other underground facilities of the Grantee of the franchise where public convenience or security requires it, even at the Grantee's own expense,....".

The recent success of the utility industry in the case of Chesapeake and Potomac Telephone Company of Virginia vs. Landrieu 674 Fed Second 298 (1982) wherein public utilities created under state law were found to qualify as "displaced persons" under the Uniform Relocation Assistance and Real Property Acquisitions Policy Act of 1970, so as to entitle them to reimbursement for relocation costs seems to have precipitated some sort of concerted activity on the utility industry's part to change the ingrained long standing common law rules of the game. The copy of the attached communication from the National Institute of Municipal Law Officers dated January 26, 1983, is indicative of a national concern regarding the potential economic impact of assessing municipalities for utility relocates.

We respectfully request that no legislation be passed which would burden municipalities with the cost of utility relocates. Thank you in advance for your assistance and cooperation in this matter.

Respectfully yours,

Tim Rogers
City Attorney

National Municipal Litigation Center of the National Municipal Legal Defense Fund

January 26, 1983

Dear NIMLO Member:

We are compiling information about the potential econor impact of a recent Fourth Circuit decision on municipalities nationwide. The decision in C&P Telephone Co. v. Landrieu, 674 F.2d 298 (4th Cir. 1982), if upheld, will mean that pub utilities created under state law may qualify as "displaced persons" under the Uniform Relocation Assistance and Real P perty Acquisition Policies Act of 1970, so as to entitle th to reimbursement for the cost of removing equipment from pu rights-of-way to accommodate projects funded with federal monies. On January 17, 1983, the United States Supreme Cou granted certiorari to review the Fourth Circuit ruling in t case (Norfolk Redevelopment and Housing Authority v. C&P Telephone Co. of Virginia, No. 81-2332).

There is concern about the potential impact of the de- cision on the availability of redevelopment funds if, contr to state common law, utilities are to be reimbursed for the cost of relocating utility facilities from project areas. For example, in the NRHA v. C & P Tel. Co. case, projection are that the utility's claim could reach $1 million with interest accrued since the mid-1970's.

In order to determine the implications of the Fourth Circuit ruling, we ask that all NIMLO members take time to answer, either affirmatively or negatively, the questions i the short survey on the back of this letter. The informati gathered from your responses will be compiled for use eith any NIMLO amicus brief that may be approved and prepared o the petitioner Authority or other amici involving in the c BECAUSE THE BRIEFING SCHEDULE REQUIRES THAT ANY SUCH INFOR TION TO BE CONSIDERED BY THE COURT MUST BE PRESENTED BY MA 3, WE REQUEST THAT YOUR RESPONSES BE MAILED TO THE NIMLO W INGTON OFFICE AT THE ABOVE ADDRESS BY FEBRUARY 10 (postmark

While we realize that this is a short turnaround time, we hope that you will understand the circumstances and nee for urgency. As in the past, the information provided to ours by NIMLO members may have significant persuasive val in this case.

Sincerely,

Charles S. Rhyne

RE: SB 67

House Committee Substitute For Committee Substitute for Senate Bill 67 would change Alaska statutes reguarding the relocation of utility facilities incident to highway construction. Current statutes place the burden of these cost on the utility companies themselves. If this bill were to become law, a much greater percentage of utility facility relocation would be paid for by municipalities.

The intention of this legislation is to define the cost of relocation and give a clearer understanding as to the responsibility of both the municipailties and the utilitiy companies in determining which party will bear the cost of relocation.

Senate Bill 67 passed first from Labor and Commerce in the other body. It was amended on the floor and sent to the House where it was referred to Community and Regional Affairs and then to Labor and Commerce. Each committee of referal has made amendments to the bill.

By direction of the chairman, this committee had a committee substitute of SB 67 drafted. This is the bill before the committee today. In concept it is very similar to the draft which passed from the Senate and this committee has heard testimony on this version of the bill in the past. The purpose of this hearing today is not to take the same testimony offered before. It is to examine the areas of the bill or the effects of SB 67 that have not yet been addressed.

Re: SB 67 - Utility Relocation Costs

The League opposes SB 67, as introduced, relating to the relocation of utility facilities incident to the construction of road or highway projects by a municipality.

The League opposes any effort to shift to municipalities the cost of all non-municipal utility relocation within existing rights-of-way associated with municipal street work.

Municipalities are already facing decreased revenues from reductions in Municipal Assistance and State Revenue Sharing Programs. The additional burden of paying utility relocation costs could only come from an increase in property taxes, unless the municipality owned the utility and could pass the cost on to the ratepayers directly. The problem is further exacerbated in municipalities with limited road powers. The cost of relocating utilities would reduce the amount of money available to the road service districts for road construction and maintenance. Road service districts rely heavily on state funds and their ability to levy taxes is limited.

HCS CSSB 67 (C&RA)

House of Representatives
Committee on Community & Regional Affairs

Dear Mr. Speaker,

A majority of the House Committee on Community and Regional Affairs oppose HCSCSSB 67 (C&RA). The provisions of HCSCSSB 67 (C&RA) changes the historical relationship between utility companies and municipalities in matters pertaining to the use of public rights-of-way and streets by various utility companies. Present Alaska Statutes require municipalities to allow utility companies to use the public right-of-way and thereby avoid the expense of securing easements from private property owners. The proposed legislation is designed to further benefit the utilities by requiring municipalites to pay the costs of relocating the utilities when the relocaton is incident to a municipal street project. The requirement for municipalities to bear the burden of the relocation costs is contrary to practices establised in common law and contrary to procedures used throughout the United States. Imposition of such costs would amount to a public subsidy of private profit making ventures as well as for private non-profit utility companies.

Enactment of any legislation that would require municipalities to pay utility relocation costs will not, in the long run, reduce operating costs for utilities but in all probability will increase costs to the utilities. Municipalities will undoubtedly be highly restrictive in the conditions of future permits for the installation of utilities and will begin to charge maximum fees for the use of the public right-of-way as opposed to the general practice of providing use at no charge.

The Committee has found that municipalities are fair and reasonable in their relationships with utilities, and that the particular needs of each type of utility is considered when negotiations for the use of a public right-of-way are conducted. The continuation of reasonable fees, permit conditions, and equitable allocation of utility relocation costs is insured by the availability of arbitration and redress provided by the Alaska Public Utilities Commission. The considerable diversity of types and purposes of profitable private and of non-profit utility companies further reinforces the Committee's belief that the allocation of utility relocation costs can best be negotiated on the local governmental level, on a case by case basis.

In summary, the Committee believes that the proposed legislation is an unnecessary and unwarranted usurption of local governmental authority which may have an adverse monetary effect on the utility consumer and the municipal tax payer. Therefore, any attempt to legislatively interfere with the existing relationships between municipalities and utility companies should not be favorably considered.

/s/ Representative Lacher

THE CITY AND BOROUGH OF JUNEAU

CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

May 4, 1983

House Community & Regional
Affairs Committee
Room 102 Capitol Building
Juneau, Alaska 99801

FILE: Legislature - 1983-84 - SB 67
(Utility Relocation Costs)

SUBJECT: CSSB 67(L&C)am and proposed HCSCSSB 67(CNRA)

Ladies and Gentlemen:

In considering the subject Bills, please bear in mind the following:

1. The primary and superior use of streets is for transportation purposes for the general public. Use of streets for utility facilities is a mere convenience to the utility with the benefits accruing to the utility and its utilities, not the general public.

2. The state generally owns its highways in fee while municipalities generally hold their streets by way of dedication. The state is not required to permit a utility to be located within its right-of-way while municipalities are required by statute to permit utilities to locate within their streets.

3. Most state highway projects are substantially funded by federal grants; therefore, the cost of utility relocation is spread to all the people of the United States rather than just the State of Alaska. Municipal road projects are not funded by federal grants.

4. Many utility facilities are installed in municipal streets without permission or with an informal, oral authorization. Some facilities may be installed under a permit which does not address relocation. The common law controlling these situations is that such utilities must be moved at the expense of the utility when required by the municipality. Many utilities are installed under a franchise or a permit which deals specifically with the allocation of costs in the event of a required relocation.

CSSB 67(L&C) would not only reverse the common law, but it would also have the effect of altering the contracts or agreements which municipalities have with utilities regarding relocation. The legislature should not make a retrospective change in the common law. Also, existing agreements not involving the State of Alaska but which are in effect on the effective day of any change in the statute should not be altered by law.

At the teleconference hearing several points were raised by utilities which deserve further comment. First was the concept of "cost causer-cost payer." This is a catchy phrase that identifies the rate making principle that when one utility customer causes the utility to undergo an expense in excess of what it would undergo for the average customer, the customer necessitating the expense should pay the expense. For example, a customer who requires a line extension into an area that has no other customers should bear a major portion of the cost of such extension. Similarly, if a new industrial customer makes demands for energy which are in excess of what the lines and facilities serving his property can handle, then it is this customer who should bear the expense of the upgrade attributable to his increased energy demands. The principle does not apply to people who cause a utility expense who are not customers of the utility or who cause the expense in a capacity other than as a customer. For example, if the principle were to apply to non-customers, we could say that the landlord who leases office space to the utility causes a cost to the utility in charging it rent or in increasing the rent. A regulatory agency could require that the utility install certain pollution reduction devices on its generation facilities. A municipality, in the exercise of its zoning or street powers, could require that a utility suspend its above ground facilities a minimum distance above the street. In none of these cases does the "cost causer-cost payer" principle come into play. It applies only when a customer of the utility causes the utility to undergo an expense to serve that customer. The principle simply does not apply outside the customer-utility relationship; therefore, it is not appropriate to apply that principle to the allocation of costs of relocation caused by municipal street work.

It was pointed out by the utilities that if the utility must bear the burden of relocation then it would have to pass those costs on to its utility customers in the form of even higher rates. For that reason, the utilities said, the general public should bear this burden. That is, local government should raise its taxes to assume an expense that is normally borne by a utility that generally serves less than all those persons who are taxpayers. Not only does this shift what is normally a utility cost to non-utility users, it also overlooks the fact that utilities have generally been getting a break in the free use of public streets; that is, if the lines had been located on private property, the rate payers would have picked up the cost of an easement or a lease and the property owner would have received compensation for the use of his property. Here, municipalities have generally not received compensation for the private use of public streets. It would merely add insult to injury if municipalities are required to bear the burden of relocating utility facilities which have generally had free use of public

property. Even if a utility is a co-op, it generates income through its use of public, taxpayer-supported streets. Public use of the streets for transportation purposes does not generate a revenue. Why should the primary and higher use of a street (transportation) which generates no revenue be made subservient to a non-governmental, revenue-producing use of a public facility?

The City and Borough of Juneau opposes CSSB 67(L&C) am.

I have reviewed a proposed House C&RA Committee substitute for the Bill dated 4/29/83. This Bill is certainly more palatable than the

Senate version. However, it appears that the Bill would have the effect of reviving permits or franchises which were temporary or had expired or were otherwise invalid on the effective date of the Act. If it is not the committee's intent to revive such permits or franchises, I suggest that on page 2, in line 8, the word "before" be changed to "on".

May I add my voice to those who have questioned placing these provisions under Title 19 of the Alaska Statutes. That title deals with state highways and transportation systems and not with local government streets and roads. Because state highways are quite different from local streets, the two should not be lumped together. A later change in the statute to accommodate a state highway problem may have an unintended adverse affect on local streets if both are controlled by the same statute. Title 29 would be a much more logical place for these provisions if they are to be added to the law.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

Juneau, Alaska 99811

House of Representatives
Committee on Community & Regional Affairs

TO: Representative Barbara Lacher

FROM: Staff

DATE: April 29th, 1983

RE: CSSB 67 and HB 244

During previous hearings on HB 244, several problems with the proposed legislation were identified which appeared to be unreasonable in view of past practices regarding the use of municipal right-of-way by utilities.

1) The purpose legislation would nulify the existing agreements under which utilities were located in the rights-of-way. It seems improper to arbitrarily revoke perhaps hundreds of contractual agreements that have been lawfully entered into by municipalities and utilities.

The proposed substitute re ains any existing permit, franchise agreement.

2) CSSB 67 and HB 244 would require municipalities to pay for all costs of utility relocations.

The proposal is not in accordance with long established law and the usual practice of the past, or of cities within the rest of the United States.

For the state to legislate such a requirement, is a considerable usurption of a municipalities legislative authority.

Additionally, if such a law were to be enacted, municipalities would undoubtedly become very restrictive in the conditions of any permit they would issue, and, would in all probability begin to charge significant permit or franchise fees which would be designed to cover their cost of utility relocations. In this event, there would be no net gain for utilities.

The Committee substitute bill allows for negotiation to take place between the municipality and the utility so that the costs of relocation can be allocated and some give-and-take can occur.

3) CSSB 67 and HB 244 would require municipalities to pay for utility relocations in those cases where utilities were installed without a permit.

Under existing law, utilities would generally be required to pay any costs of relocating these facilities. The existance of this practice may have played a large part of municipalities not instituting a permitting system. To change the existing practice, without notice, may cause an unreasonable and unexpected expense to municipalities.

The provisions of the proposed committee substitute establish a date certain from which the cost of relocations will be in accordance with the terms of a permit. Utility companies may obtain new permits for existing facilities whether or not they were installed with a permit.

4) The definition of relocation costs, as proposed in CSSB 67 does not require payment for depreciated cost, but no clarification of "service life" is provided.

The proposed substitute bill defines how service life may be determined.

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES
RESEARCH AGENCY

Pouch Y, State Capitol
Juneau, Alaska 99811
(907) 465-3991

April 28, 1983

MEMORANDUM

TO: Representative Barbara Lacher

FROM: Jonathan Sherwood
Research Staff

RE: HB 244--Sectional Analysis
Research Request 83-135

EXCEPTS

Section 7. This section of the bill provides an effective date of July 1, 1983.

The Impact of the Proposed Legislation on Municipalities

Permits and Easements. There was considerable uncertainty among the individuals we contacted regarding the effects of the provision in Section 3 which exempts municipalities from paying for the relocation of utility facilities not located under the conditions of a valid easement or permit. Very few municipalities have had permit systems for utility facility placement in place for any length of time. Therefore, most utility facilities have not been installed under the conditions of a valid permit.

Municipalities are required by AS 42.05 to grant easements to utilities for the use of their right-of-ways. However, both Lee Sharp, Juneau City Attorney, and Dave Soulak, Palmer City Manager, stated that utility facilities are not always properly placed within the right-of-way. Mr. Sharp expressed concern that municipalities might be required to pay for the cost of relocating utilities that are not properly placed within the right-of-way. According to Linn Asper, facilities which are not correctly placed within the right-of-way would not generally be considered to be located under the conditions of a valid easement. However, he acknowledged that utilities have located their facilities under a variety of different arrangements with municipalities, and that it is difficult to anticipate the effects of this proposed amendment on every case.

Reimbursement Issues. Another impact of the bill is to apply the current and proposed provisions of AS 19.45.001(4) to municipalities. AS 19.45.001(4) currently defines the costs to be paid for relocating utility facilities, and would be amended to permit the State and municipalities to reduce this payment if the service life of the facility is extended. According to Peter Sokolov, Chief Engineer for the Alaska Public Utilities Commission (APUC), most regulated utilities have service life schedules, approved by the APUC, which are used to calculate depreciation. However, Mr. Sokolov stated that the actual service life of utility equipment varies considerably, with location of the facility being the most important factor affecting service life.

Mr. Sokolov stated that municipalities might experience difficulties determining when the equipment was installed. According to Mr. Sokolov, many of the smaller utilities do not have adequate records to determine when its facilities were installed and even some of the larger utilities may not have complete records of their facilities installation. He noted that the service life for some facilities can be as much as fifty years, a long time to maintain records.

According to Bob Lesher, auditor for the Alaska Department of Transportation and Public Facilities, the State currently reimburses utilities according to the federal guidelines established for federally funded highway projects; almost all of the Department's highway projects receive some federal funding. Under federal guidelines, depreciation of equipment is not taken into account unless the utility is forced to move at least one mile of their facilities as a result of the project. When this is the case, there are explicit formulas established by the federal government to calculate the depreciation. As a result, Mr. Lesher stated, State law is rarely applied to State reimbursement policies.

Mr. Lesher noted that the State has experienced no difficulties using the federal requirements for reductions in payments for service life extension. He stated that the most frequent area of disagreement between the State and utilities is the determination of what constitutes legitimate overhead charges for the relocation of utility facilities.

Cost to Municipalties. Several sources, including Lee Sharp, Juneau City Attorney, stated that under common law, utilities are generally held responsible for the cost of relocation in absense of any agreement to the contrary. The courts have found that right-of-ways primarily serve transportation needs, and the utility rights are therefore subservient to the transportation function of the right-of-way.

There are a variety of municipal policies in Alaska concerning reimbursement for the cost of utility relocation. A number of municipalities, including the Fairbanks North Star Borough, and the City of Fairbanks, are currently paying for the cost of relocating utility facilities. According to Pat Lancaster, Right-of-way Agent for the Matanuska-Susitna Borough, the borough recently adopted a new policy of paying for utility relocation, although no reimbursements have been paid yet. According to Lee Sharp, the City and Borough of Juneau decides whether or not to pay the cost of utility relocation on an individual basis. In some communities, some or all of the utilities are municipally owned. Muncipalities which are currently paying for utility relocation or own their own utilities should not be greatly affected by the legislation.

However, many municipalities do not now pay for the cost of relocating utility facilities. The City of Kenai currently requires utilities to pay for the relocation of facilities in municipal right-of-ways, as does the Municipality of Anchorage and the City of Palmer. According to Lloyd Hodson, General Manager of Alaska Village Electric Co-Op, his utility generally must pay for utility relocation in the 48 communities in western Alaska it serves. Although very little relocation has occurred in the past, he noted that road expansion in these communities has been increasing over the last few years.

We were unable to identify the exact percentage of municipalities that do not currently pay for relocating utility facilities. Both Dave Hutchins, with the Alaska Rural Electric Co-Op Association, and Gordon Parker, of the Alaska Telephone Association, stated that most municipalities in Alaska currently pay the utility relocation costs associated with their road projects. However, they both noted that a significant number of municipalities do not.

We are unable to determine the cost to the municipalities should this proposed legislation be enacted. Several municipal officials and utility representatives explained that relocation costs vary greatly according to the types of facilities to be relocated, the initial placement of the facilities, and the location of the project.

However, it is possible to state that those municipalities that are not currently reimbursing utilities may be faced with significant increases in the cost of road projects if this legislation is adopted. Pat Lancaster, Right-of-way Agent for the Matanuska-Susitna Borough, stated that the Mat-Su Borough uses a rough estimate of $25,000 per mile for utility relocation costs, although he emphasized that the actual cost varies tremendously among projects. Dave Soulak, City Manager for Palmer, estimates that paying for utility relocation will increase Palmer's road project costs between 5 and 15 percent.

One impact of the bill on municipalities might be to restrict the use of local improvement districts[1] by municipalities to fund road improvements. The City of Kenai, for example, currently restricts the assessments on property owners in a district to 25 percent of the value of the property and the improvement. According to Tim Rogers, City Attorney for Kenai, the ability of local improvement districts to finance projects could be reduced if utility relocation costs are added to the cost of the project. Mr. Rogers stated that in some cases, local improvement districts would be unable to finance projects at all; in some other instance, projects might have to be scaled down.

Dave Soulak, Palmer's City Manager, stated that some street improvement projects in Palmer might become cost prohibitive if local assessment districts were required to pay for utility relocation. Pat Lancaster also noted that the bill would place hardships on local improvement districts, although he felt that it was appropriate to include utility relocation in road project costs. However, local improvement districts are used to finance road projects in at least one municipality which

---

[1] Local improvement district refers to any district or service area used to finance improvements through assessments against all of the property owners in the district.

pays for utility relocation. According to Dennis Holtry in the Fairbanks North Star Borough Engineering Department, local improvement districts in that borough pay for utility relocation resulting from their road improvements.

According to Peter Sokolov, with APUC, shifting the cost of relocating utility facilities to municipalities is not likely to result in a reduction of utility rates. However, he did state that future utility rate increases might be lower, as the APUC would expect any reduction in operating costs to be incorporated into future rate proposals.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502-0650
(907) 263-8160

TONY KNOWLES, MAYOR

DEPARTMENT OF PUBLIC WORKS
(3500 East Tudor Road)

April 11, 1983

Alaska Municipal League
204 North Franklin
Juneau, Alaska 99801

Dear Sir:

Re: UTILITY RELOCATION COSTS, HB244, CSSB67

I advised in an earlier telephone conversation with the Alaska Municipal League staff that the Municipality of Anchorage was considering revising our Title 24 in regard to reimbursement to utilities for relocation due to road construction. That revision has not been finalized as of this time, however, you may find the enclosed results of our recent telephone survey of interest. It appears that HB244 and CSSB67 are establishing new presidence for expenditure that other cities in the U.S.A. would not consider. In fact most officials insist the right-of-ways are first for traffic and public use and use by utilities is a privilege which many are required to pay for through their franchise agreements.

The telephone survey was conducted in an effort to confirm the direction we should take, especially concerning private utilities. Essentially all cities surveyed require the utilities to pay for their own relocation. This included cable TV. For the State to mandate paying relocation costs for a utility establishes a significant precedent which has not been required of local governments in other states.

The Municipality is not in favor of the proposed legislation. It is an unreasonable assumption of local authority. The local government should have the right to legislate the conditions upon which they will make reimbursement for relocation and how they will control use of their right-of-ways. Equally important, since some utility relocations are quite costly, requiring the local government to pay for those relocations will have a serious impact on the amount of monies available for upgrading or construction of new roads.

In some cases allowing the utilities to utilize the right-of-way for free and then paying for their relocation will preclude a local government from being able to finance constructing or upgrading the street.

Sincerely,

Everett P. Diener
Director of Public Works

EPD/clg

Document #9

TELEPHONE SURVEY METHODOLOGY

Thirteen cities throughout the United States were contacted by telephone last week. These cities were chosen at random with an emphasis on West Coast cities which are somewhat similar in size to Anchorage. In each case the Director of Public Works or the City Engineer was asked four specific questions relating to how utility costs are handled with respect to locally funded street improvement projects and relating to how cable television relocation costs are handled.

SUMMARY OF FINDINGS

In every case the costs associated with relocating utilities as a result of a locally funded street improvement project are borne by the utility companies. In three cases, (Tacoma, Washington; San Diego, California; and Denver, Colorado) and exception is made with respect to public utilities owned by the local government. These cases are discussed below.

In every City contacted, the local government has a franchise with the utility companies whereby the City takes a percentage of their gross revenues, on an annual basis, for the utility's use of the public right-of-way. Although undergrounding of utilities was not one of the questions asked, in one case (San Diego) it was learned that the San Diego Gas & Electric Company franchise recently came up for renegotiation and the annual percentage of gross income was increased to help fund their undergrounding program. This new program was discussed as a "model" for the United States. In the case of San Diego Gas & Electric Company, $4 million per year is collected from them and used in San Diego's undergrounding program.

CITY BY CITY RESULTS

Seattle, Washington: By ordinance, the utility companies pay all costs of relocation in every case unless the relocation is temporary because of the city's direction or error.

Portland, Oregon: Private utilities pay all costs associated with relocations. City owned utilities also pay relocation costs except if a street was changed after an improved location had been given. In such cases the costs are part of the project and they are assessed. All utilities exist in the right-of-way under a franchise, and the franchise with the cable television company specifically requires that this company pay all its relocation costs.

Spokane, Washington: Gas, telephone and electric are all private utilities and they pay for any relocation costs in a street improvement project. The same is true for city owned utilities, water and sewer only, except where Public Works establishes a

grade for the streets and if there is a change in grade, then Public Works bears the cost unless the relocation work was done without a grade or the city-owned utility disregarded the street grade. Spokane's cable television company has a pole agreement with the private owner of the pole and not with the City.

Tacoma, Washington: Private utilities, including gas, telephone and cable television pay all costs of relocation. Public utilities, which are another part of the local government, receive reimbursement for materials only, plus an overhead charge. If the street improvements are locally funded, this charge is usually 15 percent; if federally funded, normally the charge is limited to 10 percent. If the public utilities are being relocated from a recently assigned location, the project pays the relocation costs. Public utilities do not include those coming into Tacoma from the county subsequent to the passage of their local ordinance.

San Diego, California: In San Diego the city owns the water and sewer utilities and in the case of relocations, the city pays such costs. In every other case the individual utility companies pay the cost of relocation. The city has a franchise with each company whereby the city collects an annual percentage of their gross receipts. There are utility coordinating committees which meet monthly to work out utility conflicts before they actually occur. This City has just started an extensive undergrounding program which is paid for through the franchise agreements with the utility companies.

Minneapolis, Minnesota: All utility companies pay their own relocation costs including the water and sewer utility which is owned by the city of Minneapolis. However, once a utility is relocated, it cannot be asked to relocate again for another ten years. Otherwise, the city pays for the relocation costs. The City has franchise agreements with each of its utilities. Cable television is going in now in the Minneapolis area, and they will be paying any relocation costs pursuant to their franchise.

Boise, Idaho: Except for federal aid projects, local utilities relocate at their own expense. This is considered to be a cost of doing business.

Tucson, Arizona: All utilities are considered to be secondary users of the right-of-way. A utility coordination section contacts utilities when there is a need for relocation because of street or storm improvements. Utilities are given a schedule for

the work and they must relocate their utilities at their own expense in advance of the street construction.

Anaheim, California: All utilities, including the city-owned water and electrical utilities, pay for their own relocation costs. This City reported that they knew of no city in California where any relocation costs were paid for a privately owned utility company. Cable television is going into the Anaheim area this summer under a franchise with the City, and this company is required to pay all relocation costs.

Kansas City, Missouri: Utility companies pay their own relocation costs. The local cable television company is not entitled to reimbursement for relocations under their agreement with the City.

Denver, Colorado: All utilities pay their own costs for relocation except water and sewer, which is a city-owned utility and under the authority of the Director of Public Works, where the cost of relocation is borne by the project. This city is just getting started with cable television, and they have a franchise whereby this utility pays all relocation costs.

Knoxville, Tennessee: Every utility company pays its own relocation costs. The cable television company is on Bell poles and has its own agreement with Bell.

Re: SB 67 - Utility Relocation Costs

Municipalities oppose SB 67 because the issue is a local one and shcuild be resolved at the local level. This bill would amend Title 29, Chapter 25 - Protection and Use of State Highways and Roads (emphasis added). The changes in SB 67, however, don't relate to state roads; they deal with local roads.

It is easy to understand why there is a provision in law for the state to pay the utility relocation costs since 95% of the funding is paid by the federal government. In municipal road projects, however, there is no way to shift 95% of the costs to a non-resident third party. The costs are paid by the local taxpayer unless the municipality receives a specific state grant for a specific project.

Since cost figures vary widely depending on the circumstances of each road project, I was not able to generate any average municipal cost per mile figures, but I do have general comments from several municipalities.

City of Palmer - Manager David Soulak estimates the provisions of SB 67, without section 5, would cause a 5% to 15% increase on three road projects currently being planned. In many cases, utilities are not where they're supposed to be. He doesn't think that municipalities should have to pay for utility mistakes, but does not oppose the municipality paying to relocate the utility if it is put in according to a permit.

Matanuska-Susitna Borough - Manager Gary Thurlow basically agrees with Soulak.

City and Borough of Sitka - Administrator Rocky Gutierrez believes that municipalities shouldn't be in state statutes except in Title 29. Sitka has worked out an agreement with the non-municipal utilities.

City of Kodiak - Manager Sam Gesko opposes section 3 of the bill, making the relocation costs a municipal responsibility.

City of Fairbanks - Manager Wally Drez says there would be no effect on

the City of Fairbanks because their policy is to pay r[illegible]cation costs, although the utility pays for any upgrades.

Fairbanks North Star Borough - Public Works Director Don Moore reports that current borough practice is for the utility to pay relocation costs so shifting the cost to municipalities would cut down on the amount of road work that could be done with the available money.

City and Borough of Juneau - Public Works Director George Porter says that cost allocations are decided on a case by case basis, depending on whether the utility is where it was supposed to be, the age of the line, etc.

City of Ketchikan - City Manager Jim Van Altvorst estimates that the bill would cost the city an estimated $50,000 this year.

Municipality of Anchorage - Public Works Director Paul Diener believes that this is a local issue. Anchorage has a new ordinance in the works that would require the municipality to pay the relocation costs if the utility has a permit and is at the location specified in the permit; in other cases, the utility would be required to pay.

City of Kenai - Paying relocation costs would cut down the amount of road work the city could do. Attorney Tim Rogers points out that common law indicates that "Rights in streets or highways....are at all times held in subordination to the superior rights of the public".

CITY OF KENAI

RESOLUTION NO. 83-32

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA REQUESTING THE THIRTEENTH LEGISLATURE OF THE STATE OF ALASKA NOT TO BURDEN LOCAL GOVERNMENT WITH ADDITIONAL AND UNNECESSARY COSTS IN BUILDING, MAINTAINING OR REPAIRING ROADS WHICH ARE THE RESPONSIBILITY OF LOCAL GOVERNMENT BY PASSING SB 67 WHICH FORCES MUNICIPALITIES TO PAY THE COSTS OF RELOCATING UTILITY POLES AND/OR LINES IN CONJUNCTION WITH ANY OF THE MUNICIPALITIES' ROAD PROJECTS.

WHEREAS, the common law in the State of Alaska has always been that when a municipality requested a utility to move its poles or lines in conjunction with a road project undertaken by said municipality, that cost has been borne by the utility company, and

WHEREAS, the passage of SB 67 will only burden local taxpayers with additional costs which in the past have not been borne by the local taxpayers, and

WHEREAS, electric utilities have been provided an easement along said roads by municipalities without any cost to the utility,

WHEREAS, the utility will be a major benefactor from SB 67 at the expense of the local taxpayers, and

WHEREAS, transferring the burden of the cost of relocating utility transmission lines and poles to the public sector is contrary to the public good and welfare of the taxpaying public, and

WHEREAS, there is a strong possibility that with the passage of SB 67 it would discourage municipalities in many cases from trying to make appropriate and adequate repairs to existing streets because of the additional burden and therefore be detrimental and perhaps even dangerous to the motoring public in many municipalities.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, that said Council go on record urging the Thirteenth Legislature of the State of Alaska to defeat SB 67 on the basis that it appears not to be in the best interests of the citizens of the State of Alaska, and further that immediately after the adoption of this resolution the Clerk of the City of

Kenai shall mail copies thereof to Governor William J. Sheffield, Senators Don Gilman and Paul Fischer, Representatives Hugh Malone, Milo Fritz, Bette Cato and Vern Hurlbert; in addition, the Chairman and Vice-Chairman of the House Labor and Commerce Committee, Representatives Walt Furnace and Rick Uehling and Chairman and Vice-Chairman of the Senate Labor and Commerce Committee, Senators Richard Eliason and Bob Mulcahy as well as the Alaska Municipal League.

PASSED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA this 16th day of March, 1983.

CITY OF KENAI

"Oil Capital of Alaska"

P. O. BOX 580 KENAI, ALASKA 99611
TELEPHONE 283 - 7535

March 11, 1983

Honorable Richard Eliason, Chairman
Senate Labor and Commerce Committee
State of Alaska
Pouch V
Juneau, Alaska 99811

Dear Senator Eliason:

In response to a request by you directed through the Alaska Municipal League in providing you with information on how much it will cost municipalities to pay for relocation of utilities in connection with municipal highway projects, please consider the following:

Homer Electric which is the provider of electrical power for the City of Kenai and the surrounding areas has indicated to the City that during the years 1980, 1981 and 1982, the cost for relocating their utility poles in conjunction with road projects undertaken by the City of Kenai cost in excess of $300,000. In addition, for the last half of 1982, Homer Electric submitted a bill for $60,000 for a particular road project that the City had under construction.

At this time, the City has refused to pay that bill and as a matter of fact, we now find ourselves in court with that utility over the dispute of whether or not the utility or the City is going to pay those costs. The City's contention is and will remain until directed otherwise that the utilities are in our right of ways at the sufferance of the public and therefore when the City undertakes a major road redesign or improvement project, the utility shall bear the cost for moving the poles to comply with the road design.

In addition to that, in 1982 the City had a downtown road project for which we were asphalting almost a mile and a half of road, we requested that Homer Electric bury their lines in that area on the basis that it was downtown property. Homer Electric refused to bury those lines and we sat down and negotiated with Homer Electric and the City ended up paying for the burying of those lines and the cost to the City was $75,000.

Now, as a matter of fact, we could have fixed two or three of our roads in this community that during breakup no-one can even drive down, citizens have to park their cars as far away as four or five city blocks from their home because the roads are in such condition during breakup they cannot be traversed.

It is for these reasons that the City opposes SB 67. The City's contention is that it always has been and should remain the utility's responsibility for relocating their utility lines when the City is improving the highway system from a safety standpoint and for a convenience standpoint for the traveling public in these communities.

At this point we have only talked about the electric utility, you must remember that if those costs are representative for the electric utility, most all of the telephone lines must be at the same time moved and on many occasions, the gas lines also have to be moved. If you multiply $300,000+ then the City over the last three years was looking at a total expenditure of approximately $1 million just to relocate the utilities in order to permit the City to repair and maintain the roads to benefit the traveling public.

It becomes obvious that a city of 5,000 people does not have the kind of money necessary in order to do the roadwork that we feel is our obligation and at the same time provide the money for all of the utilities which are private entrepreneurs and in the profit making business.

Sincerely,

Wm. J. Brighton
City Manager

Juneau, Alaska 99811

RE: SB-67

Dear Senator Eliason:

From the perspective of water and wastewater facilities, passage of the subject legislation should not have a significant impact on the cost of municipal road improvements.

In Anchorage for example, it is rare when a municipal road improvement impacts much more than the surface or above surface water and wastewater facilities. Generally this would include moving fire hydrants, adjusting sewer manhole elevations, adjusting water valve box elevations, etc. These type of relocations cost AWWU approximately $100,000 in 1982, a year with significant road improvement activity.

An exception to the above would be a situation where a road improvement project necessitated relocating an entire stretch of water or sewer main. Generally this only occurs when the road grade is lowered so much that freezing becomes a potential problem for an existing facility. In these cases relocation could cost as much as $100 per lineal foot of pipe, including apurtenances.

If the Anchorage Water and Wastewater Utility can provide any further information please contact either myself or Brian Crewdson at 265-5561.

Sincerely,

ROBERT E. SMITH
General Manager

THE HEART OF THE MATANUSKA VALLEY

CITY OF PALMER

COUNCIL-MANAGER GOVERNMENT
P.O. BOX 1368 • PHONE (907) 745-3271
PALMER, ALASKA 99645

February 7, 1983

The Honorable Richard Eliason
Alaska State Senate
State Capitol
Pouch V
Juneau, Alaska 99811

RE: SB ~~69~~ 67

Dear Senator Eliason,

The City of Palmer opposes SB ~~69~~ 67 in its entirety and for good reason.

Matanuska Telephone Association (MTA) has operated since 1972 without a franchise with the City of Palmer after the original franchise lapsed after twenty years. During the last ten years plus, MTA has embarked upon an underground burial program without obtaining permits or approval of the City for use of their right of way.

While Matanuska Electric Association has had a franchise since 1952 and renewed this in 1972. The MEA franchise stipulates that all relocations will be at their expense.

MTA's burial program may have not been too bad if they would have stayed adjacent to the property line as the municipal code spells out, but this was not the case.

Last September, we let contracts for paving of various streets using per capita money as seed money for special assessment districts. From the onset of construction we had problems. In one street, we had cable buried, from the left to right at 6'-0"±, 12'-0"± and 18'0"± in a sixty (60) foot right of way. Since this street according to our Comprehensive Plan is designated as a residential collector street its design width is forty four (44) feet back of curb to back of curb. The bill MTA has sent to the City of Palmer for relocating approximately six hundred (600) feet in this situation is $19,329.06.

In addition to this sum, we received a bill from the cable television installation company for damages too.

Now, this brings up another item. Prior to the cable television installation, we advised the contractor along with MTA representatives that the cable should be buried no more than six (6) feet from the property line and all street crossings to be a minimum three (3) feet deep. This was sent formally to MTA in the form of a letter. Since MTA hired a private contractor for this work, it was the private contractor's goal to bury as much as soon as possible. Even though every single parcel of land in the City has been surveyed at one time or the other, neither MTA nor the private contractor took the time to locate any property pins. There were instances we had them relocate cable since they were well beyond the six feet. Their reasoning was that they measured off the centerline of our dirt streets. Even so, the centerline of a street is not always the centerline of the right of way. This is especially true of non-permanent streets.

Further, the cable drop services to the residents which crossed the street were buried less than one (1) foot deep. MTA was advised of this fact and they said to cut the service as they are in the wrong.

On another street that was bid in the September street bid package, MTA has billed us $22,248.55 for relocation expense when the cable meandered through the right of way up to twelve (12) feet into the right of way and was from six (6) inches to two (2) feet deep.

On another street, we were billed $2,414.79 for cable relocation that varied from being on private property to ten (10) feet into the right of way to avoid bushes and branches. The reason for these costs being so small is that the street was not located in the center of the right of way and the shifting of the street did not cause as much relocation as normal, besides it was in an open area lacking of vegetation.

These costs will add between five and fifteen (5-15%) percent to the project cost depending upon street design. Each street will vary with the degree of encroachment.

We would agree that if utilities were placed in accordance with a permit issued by the City or Municipality and relocation was at our request, then we would be willing to pay for the costs. But to absolve the utilities, as in our case, Matanuska Telephone Association and Matanuska Electric Association, of prior helter skelter installation is inequitable and unjustified.

This naturally is a concern to the utility companies as they, in most cases, have gone about placing their utilities without care for proper placement.

Now with the possibility of natural gas being brought into many parts of the Matanuska Valley, utility corridor placement plays a larger role especially in the City of Palmer.

When the City of Palmer installs water, sewer or storm sewer, we engage the services of a professional engineer to design and stake out the construction to insure proper alignment and grade. It increases our costs marginally, but this is what all utilities should be required to do and we wouldn't have the conflicts that now exist. Anyone can draw lines on paper but the field installation is where it counts.

The problems and costs previously cited caused contractor delays which may or may not show up in the final construction costs since only the excavation and sub-base were completed last fall.

As City Manager of Palmer and Secretary-Treasurer of the Alaska Municipal Manager's Association, I urge you to vote against this bill in its present form.

Should you have any questions, please contact me.

Yours truly,

David L. Soulak
City Manager
City of Palmer

A. Assumptions: Since this bill will make the three member State Labor Relations Agency (LRA) serve as the majority of the new, five member Educational Employees Labor Relations Agency (EELRA), it will add to the LRA's workload. Our experience with implementation of the Public Employment Relations Act leads us to believe that the workload increase will be most pronounced during the first year of operation under the new law, as bargaining units are set up and representation elections conducted. Subsequent years' workloads will be permanently higher than present, since a larger client group will permanently be served, but the lasting impact on workload will be significantly less than the initial impact. We have assumed a 40% workload increase (above present) for the first year; subsequent years' workloads are assumed to be 25% higher than the present.

While serving as the EELRA, travel and perdiem costs will be proportionately higher, since five members will be participating instead of the present three.

B. Program Summary: Present Labor Relations Agency services include bargaining unit determination; conducting representation elections, investigation and conciliation of complaints, holding hearings, and issuing orders and decisions. A larger client group - educational employees, their representatives, and school boards - will receive these services. No new positions will be required; none presently are authorized. Since office and legal services are contracted for, there will be a significant increase in contractual services. Travel and perdiem will also increase with the size and workload of the Agency.

C. Computations: 1. First year under CS SB 78 - FY84

200 Travel: Funded @ $11.2 for FY83. This is for three members ($3.7 ea.) with an assumed workload of 1.00. If workload is increased to 1.40 and five members participate in the new case load, the increase in travel funding requirements will be:

Three existing members: $11.2 x .40 = $4.5
Two new members: $3.7 x .80 = 3.0

Total FY84 Travel Increase $7.5

300 Contractual: Funded during FY83 at $69.0. Increase of .40 = $27.6

400 Commodities: Funded during FY83 at $1.0. Increase of .40 = $.4

Total FY84 Increase $35.5

2. Subsequent years under CS SB 78 - FY85-88

200 Travel:

Three existing members: $11.2 x .25 = $2.8
Two new members: $3.7 x .50 = $1.9

Total FY85-88 Travel Increase $4.7

300 Contractual: $69.0 x .25 = $17.3

400 Commodities: $1.0 x .25 = $.3

Total FY85-88 Increase $22.3

SENATE COMMITTEE REPORT (HESS) - CSSB 78

Mr. President:

For years, the representatives of certificated school employees have asked for a change in the way disputes between their bargaining groups and school districts are resolved.

The matter is important to the public for several reasons. Alaska needs to attract and retained qualified school personnel. Alaska should avoid disruptions in the school year. An orderly and fair way to resolve disputes should be provided for.

The administration recommended that school boards be given the right to choose among three procedural options -- granting employees the right to strike, submitting to mediated arbitration, or granting employees the right to "limited strike" (strike for a limited time period).

The administration proposed that school boards be allowed to exercise these options after a dispute has arisen.

Your Committee preserves the idea of the school boards' right to select procedural options, but the Committee Substitute would require that the school boards make their respective option choice within 90 days after enactment of the bill, or thereafter from time to time but not while a dispute is in progress. The so-called "limited strike" option is removed, since testimony showed no compelling reason for its inclusion and indicated that this option would rarely, if ever, be chosen.

The Committee Substitute introduces the "last best offer" approach to mediation and arbitration. The Committee Substitute reflects the belief that by requiring the arbitrator to select between the settlement package proposed by management and the settlement package proposed by the employees, both sides will be induced to narrow the differences between them and to adopt reasonable positions.

The Committee Substitute expressly retains the boards' right to make final decisions on educational policies.

At present, there exists within the Department of Administration the State Labor Relations Agency. In school employee matters, this agency would serve as part of the educational employees labor relations agency. The agency would consist of three members of the State Labor Relations Agency augmented by two additional members to be selected by the Governor, one from a list submitted by the National Education Association-Alaska, and one selected from a list submitted by the Alaska Association of School Boards.

Among the educational employees labor relations agency's functions would be the determination of appropriate negotiation units; determinations as to the need for elections to resolve questions of representation in a negotiation unit; the determination of the eligibility of voters in such elections and the rules governing elections.

Sectional Analysis:

14.20.540. Declares the policy supporting collective bargaining in the public schools.

14.20.550. Includes noncertificated employees in the requirement that school boards negotiated with employees on matters pertaining to their employment, in good faith; defines "certificated employees" to include teachers, counselors, principals, assistant principals, and 'other certificated administrative personnel', but excludes superintendents, assistant superintendents, and other 'certificated executive administrative personnel who the educational employees labor relations agency determines to be inappropriate members of an employee negotiating unit.'

14.20.555(a). Corrects language in the existing law to address the new provisions for negotiations with noncertificated personnel in REAAS.

14.20.560. Provides that the educational employees labor relations agency will decide the appropriate unit for purposes of negotiation, and sets out criteria or factors to be used by the agency.

14.20.560(b). Contains procedures for representation elections within a proposed negotiation unit.

14.20.560(c). Prohibits a representation election in a negotiating unit if a valid election has been held within the preceding 12 months.

14.20.560(d). Permits a school board to recognize an employees' organization as the employees' exclusive representative, by consent of the board.

14.20.560(e). Limits the agency's power to direct an election to the 90-day period before the expiration date of the employer-employee agreement, except upon a petition of persons in the negotiating unit, who are not parties to the agreement, if more than three years have elapsed since the execution of the agreement or the last timely renewal of the agreement.

14.20.560(f). Permits noncertificated employees, or certificated administrated personnel groups, to decide by secret ballot to negotiate independently of other school personnel. Requires the educational employees labor relations

agency to conduct a representation election in such circumstances, upon petition of 25 percent of the employees in a proper negotiating unit.

14.20.565. Requires the school board, on request of an employee bargaining organization, to meet with the organization's representatives within 20 days after the request. Reciprocally, requires the employee bargaining organization to meet with a school board or its representatives within 20 days after its request.

14.20.565(b). Permits negotiation meetings to be in executive session, except that all final agreements shall be made at a public meeting of the school board.

14.20.570(a). When an employee bargaining agency or a school board certifies that the parties cannot agree on an independent private mediator, and that good faith negotiations have terminated in an impasse, and the requesting party asks for mediation from the U. S. Federal Mediation and Conciliation Service, the requesting party must notify the educational employees labor relations agency. This paragraph deletes provisions requiring a mediator to reduce "all the agreed terms, conditions and other items to a written contract" within 30 days "of the initial meeting of the parties (unless the parties mutually agree to extend the period)." This paragraph also deletes language in present law governing the size of the negotiating team that appears before the mediator.

14.20.580. Requires the mediator to notify the educational employees labor relations agency either when the parties reach agreement or when the mediator determines that they are at impasse. Provides for a 10-day cooling-off period following mediation.

14.20.581. Provides the "local option", i.e., the school board's right by resolution adopted following public hearing to decide "whether last best offer mediated arbitration or the right to strike shall follow the mediation procedure." However, the board's resolution shall be adopted before the "mediation process begins." (However, the parties may mutually agree to modify the option selected originally by the board).

14.20.582. Provides that where a school board has taken the right-to-strike option, a strike may occur if a majority of the employees in the bargaining agency elect to strike. Provides that where the employees vote not to strike, the school board shall not be required to particiaate in arbitration. Provides that "an aggrieved person" may apply to the Superior Court to enjoin a strike, and an injunction can issue if the strike "threatens the health, safety, or welfare of the public." If a strike is enjoined by the Court, after considering "the total equities", and an impasse still

remains, the parties shall submit to arbitration. Provides that elections under this section will be conducted by the educational employees labor relations agency.

14.20.583. Provides for arbitration if the school board's "local option" is the non-strike option, or if arbitration arises after a Court injunction against a strike, or where a strike has occurred in a district which permits strikes and a majority of the employees in the bargaining agency have elected to strike. Provides that the educational employees labor relations agency may direct the parties to use the services of and comply with the procedures of the Federal Mediation and Conciliation Service or the American Arbitration Association, if the parties are unable to otherwise agree upon a mutually selected arbitrator.

14.20.582(b). Provides for mediated arbitration. The parties are to submit evidence to support their respective positions before the arbitrator. Each party can respond to the other's evidence. The arbitrator may propose compromises. The arbitrator, on his own motion or the request of either party, may call for a public meeting to allow the parties to present and explain their "last best offer(s)". Before final submission to the arbitrator for decision, the arbitrator shall allow each party "to revise its last best offer."

14.20.582(c). Sets out the factors which the arbitrator will take into consideration.

14.20.582(d). Requires the arbitrator to adopt "without modification" the last best offer of either of the parties.

14.20.582(3). Requires the parties to share the cost of the arbitrator equally.

14.20.584. Provides for the confirmation by the Court of the arbitrator's award, and provides for Court vacation of an award in certain circumstances similar to those applicable under the Alaska Arbitration Act.

14.20.585. Provides for modification or correction of an award, under circumstances similar to those applicable in the Alaska Arbitration Act where modification or correction is provided for.

14.20.590. Requires grievance procedures and a definition of "grievances" in all agreements. Requires each agreement to provide a method for the selection of an arbitrator to resolve grievances.

14.20.600. Requires the educational employees labor relations agency to set forth procedures to safeguard the rights of "nonassociation" of employees having "bona fide religious convictions."

14.20.605. Establishes the educational employees labor relations agency, as explained above. Members of the agency receive no compensation, but are entitled to per diem and travel expenses. The agency may employ staff to implement the provisions of the chapter.

14.20.606. Functions set out in AS 23.40.120 - 23.40.180 are to be performed by the educational employees labor relations agency, as well as specific functions set out in this chapter. The school board and the employee organization alike are prohibited from "unfair labor practices", as described in AS 23.40.110.

14.20.610. Reiterates the power of school boards to "make final decisions on educational policies."

Sec. 13. (Temporary Provision). School Boards must make their initial local option decision between last best offer mediated arbitration and the right-to-strike within 90 days after enactment of the chapter.

Sec. 14. (Temporary Provision). "Grandfather" clause for existing negotiating units and negotiating agreements.

Sec. 15. (Temporary Provision). The effective date is to be immediate.

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 134 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to surety bond and financial requirements for insurers of surplus lines."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. A 21.33.160 is amended to read:

Sec. 21.33.160. FILING SURETY BOND AS A CONDITION TO LICENSE. Before receiving a license the applicant shall file with the department a surety bond in favor of the state and insureds in the penal sum of $50,000 [$25,000]. The bond shall be issued by an authorized corporate surety approved by the department. The bond shall be conditioned on the conduct of business under the license in conformity with the provisions of this title, including the payment of all taxes required to be paid by this title. The applicant shall keep the bond in effect during the period of the license. The surety may terminate the bond by giving at least 30 days written notice to the department.

25,000

* Sec. 2. AS 21.33.180(a) is amended to read:

(a) A surplus line broker shall ascertain the financial condition of an insurer before placing insurance with the insurer [HIM]. A broker may not place or renew surplus line insurance with an insurer which the broker [HE] knows or should with due diligence, determine to be financially unsound, nor may the broker place surplus line insurance with an insurer which has capital and surplus of less than $1,500,000 [$600,000] unless there is on file with the department a copy of a trust agreement, certified by the trustee, evidencing an existing trust of at least $1,500,000 [$450,000] which is deposited by

the insurer in a United States bank or a United States trust company and held for the protection of the insurer's United States policyholders. The department may waive the financial requirements in this subsection in circumstances in which insurance on risks located in this state cannot be procured under the requirements.

Alaska State Legislature

Senate

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

SB 134

Sectional Analysis:

Section 1) Increases the surety bond requirements for a surplus lines broker from $25,000 to $50,000. This proposed increase whould have the effect of placing the surplus lines broker under more thorough scrutiny by the surety posting the bond. The bond can be accessed by the state for recovery of unpaid taxes by the broker, and the addition of the words and insureds would allow the consumer to recover at least partial recompense for losses resulting from a policy placed with an insolvent company.

Section 2) Increases the capital and surplus requirements for surplus lines insurance from $600,000 to $1,500,000. In the alternative to that capital and surplus requirement, a trust agreement of $1,500,000 [currently $450,000] would be sufficient.

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER:

LEGISLATION:

Senate Bill No. 134

PURPOSE:

An act relating to surety bond and financial requirements for insurers of surplus lines.

SUBSTANCE:

This measure would increase the bonding requirements for surplus line brokers and would increase the surplus requirements for surplus line insurers permitted for use in this State by surplus line brokers.

POSITION:

Not opposed.

ACTION:

No action is necessary, however, if asked you might suggest certain improvement amendments.

BACKGROUND:

In order to do business in the State of Alaska, an insurer must be authorized by the Division of Insurance to transact insurance in this State. As a condition of issuing the Certificate of Authority to an insurer, the Division requires that the insurer comply with the rating and form requirements imposed upon all insurers. Often times risks require coverages which a carrier cannot provide within the framework of approved rates and forms; and, thus, goes outside the State of Alaska to procure the insurance from carriers which are not authorized to write business in this State. Surplus line brokers are those brokers who are specially licensed to procure insurance outside the State of Alaska from carriers not authorized to write in this State for risks in this State that cannot otherwise acquire those coverages. Examples would be aviation liability or hull insurance, insurance on special properties located in remote areas and other hard to place risks.

This business is referred to as surplus lines or excess insurance.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Though the Division of Insurance has no jurisdiction over these unauthorized insurers, it does have jurisdiction over the surplus-line brokers which procure the insurance and it attempts to protect the buying public by limiting the actions of the surplus line broker. This is, since the insurers are not regulated, only brokers with special experience are permitted to access these otherwise unauthorized insurers. It is appropriate that the bond be increased and it is appropriate that the surplus requirements for those unauthorized insurers which the surplus line brokers uses, be increased.

One of the difficulties with the existing law is that it does not require the surplus line broker to maintain any kind of surveillance over the financial condition of the unauthorized insurers; and only requires that at the time the insurance is placed, the broker have no knowledge of the insurers financial unsoundness.

I would argue that the broker has an ongoing responsibility to review the financial condition of the unauthorized insurers which it uses, and I would suggest that the language be modified to read as follows:

> 21.33.180 (a) "A surplus line broker shall ascertain the financial condition of an insurer before placing insurance with the insurer. A broker may not place or <u>continue</u> surplus line insurance with an insurer which the broker knows <u>or should with due diligence, determine</u> to be financially unsound, ... [Emphasis on language recommended to be added-other language as per amendment proposed by SB 134]".

SB 134, Line 21 to 24.

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

POSITION PAPER

SB 134: An act relating to surety bond and financial requirements for insurers of surplus lines.

The Administration favors the passage of SB 134. This bill is admittedly a "band-aid" approach to resolving the shortcomings of the surplus lines law in the insurance code. It does allow time to effect a more thorough review of the surplus lines law by correcting some of the more glaring deficiencies in the law.

The bond requirements for a surplus lines broker was last revised in 1970. The purpose of such a bond is to prequalify the license holder. If the bond is of sufficient size, this is accomplished as the surety providing bond does a more thorough job of checking the person to be bonded. If the bond is not large enough, the surety may tend to be lax in its efforts. The bond should also be sufficient to provide some protection for the State and the public. Recent occurrences suggest that a $25,000 bond may no longer be adequate. A $50,000 bond is a reasonable step up until the issue is considered as part of a broader action.

The current minimum for an admitted multiple line property and casualty insurance company is $1,500,000. The surplus lines law which is unchanged in this regard since 1970 requires only $600,000. This is woefully inadequate, particularly since that market is basically not subject to State regulation except, perhaps, in its domiciliary state. An increase to a level that is required of an admitted company or one newly forming in this State is a reasonable step.

This is a good bill and we would urge its passage.

INSIDE INSURANCE

Big losses raise question of 'moral hazards'

'Most people are not in a position to make money off of sinking their vessel'

by Robert Mann

Millions of dollars worth of fishing vessel losses in 1982 have broken over Seattle's marine insurance community like a rogue wave at sea. The result, according to brokers and underwriters, could be that fishermen will be paying higher deductibles and premiums in the very near future.

Although the Coast Guard does not keep track of the total number of fishing vessels and processors lost in a given year, some worried underwriters are drawing up lists of their own. The 1982 numbers look pretty grim to companies that are insuring Alaskan fishing vessels.

According to one list, there have been over $48 million worth of total losses of crabbers, seiners, draggers, processors and gillnetters through November of 1982. Five processors, three of which burned and sank within a six week period, accounted for $29 million worth of the total; the *Al-Ind-Esk-A-Sea*, which burned and sank off Everett on October 22, was perhaps the most spectacular of the losses. Another underwriter said over $22 million worth of crabbers sunk, burned, or ran aground this year.

Bad times seem to bring an increase in the number of reports of vessel owners burning or deliberately sinking their boats to collect the insurance money so they can get out of the business. The fact is, though, that not much is usually gained from that kind of act, according to several underwriters.

"When people are going broke, it seems that the friction of the mortgage against one's wallet seems to heat up the back of the boat, and away she goes," quipped John Adams. Adams manages Pacific General Agency, Inc., a company that insures millions of dollars worth of fishing vessels throughout the U.S.

Adds Adams: "It really does a fisherman no good to file a claim or have a convenient loss, if he is going to lose his ability to make a living. Most people are not in a position to make money off of sinking their vessel. At best, they usually get the mortgage paid off."

Maurice Oaksmith, an insurance broker, agrees with Adams for different reasons. "I really don't think that 'moral hazards' (intentional sinkings and burnings) are a factor right now, even with the depressed state of some of the fisheries. I've got great faith in human nature, particularly in the fishing industry."

Others in the insurance business, however, do not share Oaksmith's "faith" in human nature in the fishing fleets. One president of an insurance company here instructed his underwriters not to carry any more lines on converted processors, which he labeled, "floating fire hazards." Another marine insurance underwriting firm, Mathews & Livingston, Inc., bailed out of the fish vessel business in 1981 because "it is a volatile market and we were looking at doubling our rates from our London connection," says a company spokesperson.

"My friends at Lloyd's say the Northwest and Alaska losses have just about destroyed their marine underwriting syndicate," says a former British underwriter who has worked in the U.S. marine insurance industry for two years.

Lloyd's and other western European companies that assume part of the risk on American fishing vessels are quoting prices that many U.S. brokers and underwriters are finding hard to sell to customers. An understanding of why the European insurers are shying away from the fishing vessel business requires a brief explanation of how marine insurance works.

Imagine a pyramid with the broker or underwriter sitting at the top. The fisherman comes into the office, and tells the broker or underwriter what kind of policies he wants and what he is willing to pay. (Most fishermen are covered for losses or damage to the hull and

machinery. A fisherman, no matter what his past record, can usually find someone to insure him.) The broker then goes to his underwriters—the first set of risk-takers, who usually carry only a small percentage of risk themselves. The risk on expensive fishing vessels is always spread out among reinsurers.

The most reliable re-insurers are in London at Lloyd's or the Institute of London Underwriters and other western European countries. Those companies, though, may spread the risk even further down the pyramid. At the bottom of the pyramid, you might find that a company you never heard of in Latin America might be assuming a fraction of a percentage of the total risk on an Alaskan fishing vessel. When claims are made, payment starts at the pyramid's bottom and works its way up.

According to Adams and others, North Pacific fishing vessels have a bad reputation in the European reinsurance market, hence the doubling and tripling of rates in the last two or three months. As a result of the increases, some smaller companies have been forced to seek reinsurance with unproven foreign security firms.

"The London and Western European reinsurance markets have just dried up," says Adams. "It's imprudent for a company like ours to hold all the risk on a crabber with a high degree of hazard. We have to have re-insurers and as these re-insurers drop out, there goes the market."

In the competitive marine insurance business, some companies are so hungry for premium dollars they are re-insuring through companies in South Africa, the Bahamas, and Hong Kong. "You have to realize that there are over 600 companies based in Hong Kong alone, and most of them are only a name in the phone book," said Adams, who adds that many claims go unpaid. "Many of the foreign securities firms will disappear before the claims can get in."

Says Maurice Oaksmith, "Insurance companies and syndicates make money from underwriting *and* investment income. Now that interest rates are lower on short-term money, the competition for insurance premium dollars is getting even heavier. Some people want to make a quick killing by buying their reinsurance as cheaply as possible so that they can keep most of the premium. They tend to stray into left field reinsurers."

Oaksmith says that "If underwriters are selective, and properly re-insured, they can make money writing fish boats at or near the level of where premiums are today."

John Adams knocks on his desk and says his firm has made money. "We have tried to be cautious with those people that we suspect." But Adams feels that most marine insurance underwriters and brokers today do not know their market. "In the past few years we've seen the inundation of the marine insurance market with inexperienced people with all kinds of capacity. There have been more and more companies coming in and diving right out again after a few hard licks."

damn good salesmen who are very gullible because they don't want to know the truth about the security they're representing. If it's an undesirable risk, it will usually end up with what we consider to be the less inquisitive underwriters who fail to ask the questions they should ask."

Adams maintains that there are very few underwriters who truly understand the fishing business well enough to know when to ask if a person is a "known troublemaker with a poor record in the past. Some people, though, are not crooked, they're just doggone unlucky," says Adams.

Adams feels most underwriters insuring fish boats should know how machinery operates so that they can know if a claim is legitimate or not. "Most underwriters don't know anything about claims. Unfortunately, the claims people think the underwriters know everything," says Adams.

Although Adams has worked around fishing boats a long time, he says he is often too busy to get the chance to visit the docks to inspect fishing vessels he insures, although he says he tries to as often as possible. Like others, he relies on marine surveyors, the eyes and ears of every underwriter or broker. (See accompanying story.)

Marine surveyors perform condition and valuation (C&V) surveys for vessel owners, insurance companies, and banks. They check a vessel's wiring, construction, deck equipment, rigging, navigation equipment, electronics, cabin arrangements, safety and life saving equipment, hydraulics, engine room, and even the vessel's housekeeping and appearance. They also note any recommendations for improving the vessel before reaching what they feel is a fair market value for the boat.

"Surveyors have a pretty good feeling for what a boat's value is, and they understand replacement costs," says Oaksmith. "But there can be honest differences of opinion between a surveyor and a boat owner."

Some surveyors say they are pressured to keep boat values high even though their market values might be depressed in a weak market. According to one surveyor who ran a C & V survey on a large floating processor in 1979, the vessel's owners pressured him to keep the value high because the bank had loaned them a lot of money on processing equipment. The surveyor says he told the owners that the boat had no track record and needed more work, so he valued it substantially less than what the owners had wanted.

"I gave them two legal-sized sheets of repair and safety recommendations, and two months later they had somebody else doing the survey. They obviously wanted someone who would agree with their value," the surveyor says. He asked to remain anonymous. "I have quit one job before because the guy hasn't done what I've asked him to do. But within a week he's got insurance from somebody else."

"What's happening in the present market is that a lot of people are not insuring market values. They're insuring investment value," says another veteran surveyor. "A lot of money had to be put into that processor to get her operable, and

Maurice Oaksmith

BOAT INSURANCE

continued from page 31

the company wanted to insure that investment."

However, other surveyors say they are rarely pressured into inflating vessel values. John Adams, for instance, says "Sometimes the vessel owner wants surveyors to deflate the value because he doesn't want to pay the money on high insurance premiums on boats that are fully paid for."

"Most surveyors know what they're doing," says one claims investigator, "but some have great gaps in their experience and training. Some surveyors specialize in cargo only, others in tug boats, others in yachts, and some in crab boats. Frequently their expertise is limited to their specialty class of vessels, and they're not able to adapt well to new classes."

Adams adds, "The jam is that many people will accept a surveyor's report on a matter for which he is not truly qualified."

Surveyors have already formed their own national association fifteen years ago in an effort to police their own trade. In order to join the National Association of Marine Surveyors an applicant must have at least five years full-time surveying experience and he must pass an exam on his specialty class of vessel. "It's still in its infancy," says one member.

Whether an underwriter or vessel owner decides to hire, fire or believe a surveyor does not diminish the importance of their C & V surveys. When claims are paid, they are the most important records available, because foul play is almost impossible to prove. Underwriters rarely go to the bother and expense of trying to prove arson or intentional sinking; they simply pay the claims based on a vessel's surveyed value. Raising the vessel and re-surveying it is the only way to change the surveyed value.

Adams jogs his memory back to 1958 when a wooden seiner sank in the Puget Sound and the underwriters raised the vessel. "There were funny ax holes in the bottom of the boat that were made from the inside. These rapid termite jobs are good for some people, but when an owner gets caught with evidence like that, it is a federal crime and the punishment can be severe. From an underwriter's standpoint, you have to look at how much a mortgage is on a vessel before thinking about deliberate sinkings.

"It's easy to say that when the mortgage is high and the values are dropping beneath the mortgage, it becomes advantageous to have an accident. But that's only part of the story," says Adams.

"The other part is that people are working harder and pushing their crews harder and harder trying to make a profit. Everybody gets tired."

Maurice Oaksmith, who grew up on Alaskan fishing boats, says, "I think fishing vessels in many ways are a better risk today than they were four years ago. There are many more alarms, detection devices, and better navigational equipment. But one thing you've got to guard against, as technology advances, is complacency."

Adams blames accidents involving some crabbers on "electronic creature comforts" along with drug use by younger crew members who doze during their wheel watch.

In some cases, though, he says accidents are not due to overwork, drugs, or high-tech instruments. "In Bristol Bay we never have a total loss prior to the season unless it's truly accidental. It always seems to happen just before the end of the season, and "Oh, my god, the fire started," or "I hit a rock." There aren't very many rocks in Bristol Bay, so they either swamp or burn.

"It always happens where it's hard to recover the boat, in the dark of night; a friend just happened to be coming along and he saw the fire, and 'I got off without getting my tennie runners wet.'"

Adams admits that he is speaking somewhat facetiously; he knows that Bristol Bay permits can cost up to $100,000. Yet he sincerely feels that 'moral hazards'—"sinking the damn boat"—are higher these days,

John Adams

and the way to prevent them is to make sure the owner starts accepting some of the risk.

He looks back to the 1930's during the Great Depression when there were a lot of similar vessel losses occurring. According to Adams, an underwriter would co-insure the vessel, assuming only part of the risk in case of partial losses; the owner would pick up the rest. The other alternative he sees is charging very high deductibles.

Adams thinks strict Coast Guard enforcement of safety regulations helps reduce risk, too. Under Section 46, Parts 24 through 26 of the Code of Federal Regulations, the Coast Guard can board uninspected fishing vessels and check for safety and fire fighting equipment violations. But Coast Guard spokespeople say they do not have the manpower to check fishing vessels unless they receive a specific

See BOAT INSURANCE page 45

BOAT INSURANCE

continued from page 34

complaint.

Maurice Oaksmith, one of the founders of the National Council of Fishing Vessel Safety and Insurance, says the "industry ought to consider self-regulation. The principal reason for forming this national group was that insurance costs were high, and the only way to bring them down was to decrease the severity and frequency of accidents. I would say that about 90% of all accidents and fatalities are avoidable. Usually they result from somebody doing something they shouldn't do."

There is a general consensus among marine surveyors, underwriters, and claims investigators that human error, due to lack of adequate training, is responsible for many legitimate accidents. In the case of converted floating processors, however, there are other dangers.

During the conversion process, bulkheads and cofferdams are usually removed to make more room for processing equipment, forklifts, and elevators. "They cut out watertight bulkheads so it's easier to move cargo down to the freezing holds and along the processing deck," explains surveyor Jim Goldade.

"In the case of one processor," says another surveyor, "all three holds had been cut through all the way back to the engine room. You can pump such a vessel full of water, but you've got no way to pump it out again. There are no subdivisions to control flooding or fire in these vessels."

Highly flammable polyurethane foam is also an acknowledged fire hazard aboard such processors.

"We've glossed over these problems in the last few years because of a very competitive insurance market, due to excess capacity and underwriters seeking premiums at any cost," says one concerned claims investigator. "Now that interest rates are declining and losses are continuing to accelerate, the conditions are set for a scarcity of insurance and possibly a recognition that standards will be necessary if losses are to be controlled." □

SB

174

1978

Recommendation No. 1

The statutory requirements for the ATC to regulate bulk-type carriers and recreational air carriers should be eliminated.

The Commission has supported the deregulation of bulk carriers in dump-type equipment. As pointed out in the "78" audit, a considerable amount of Staff time is spent in reviewing applications for authority and collection of annual reports. For calendar year 1982, 59% of all original applications for motor carriers was filed for dump-type authority.

The Commission has taken steps to make the application process for dump trucks as simple as possible while still insuring that the applicant is fit, willing, and able. The method the Commission has used to ease entry is to find in several orders that a continuing need exists in the construction industry for dump trucks and have found that public need can be satisfied by written shipper support. The Commission cannot prevent existing carriers from protesting new applicants as happened in 1982, which resulted in 31 1/2 hours of hearings.

It would be the Commission's suggestion that dump trucks involved in supporting the construction industry be deregulated as to entry, tariffs, and annual reports. Such carriers should be required to register, pay weight fees, provide proof of insurance necessary to protect the public, and be fully covered by the commercial vehicle safety program.

By amending Regulation 3 AAC 68.010 in 1980, the Commission defined who did not need an air taxi certificate. The Regulation as approved basically states that a certificate is not needed if the air transportation is incidental to another business. It has been the Commission's policy that guides and lodge owners would not need certificates if the air transportation is part of the package offered to the guest or client, and as long as such operators do not charge specifically for the transportation. A certifcate would be needed if the only service provided is transportation.

The Commission involvement with such air carriers has become very limited and generally there appears to be little problem with the current policy.

Recommendation No. 2

The Statutes and Regulations governing the ATC should be reviewed.

The Commission has taken steps to clarify the regulations and the Legislature in 1980 passed several major revisions to the statutes. Since the audit report provided six specific examples, we will answer in the same format.

1. "Cease and desist authority is needed to stop illegal carriers." The Commission was given authority to issue Stop Orders in 1980 with the passage of Chapter 115 SLA 1980. The Stop Order authority has proven to be very effective for enforcement where clearly illegal activities of a continuing nature is discovered.

2. "A definition of scheduled air carrier and clarification of the definition of an air taxi operator should be provided." The necessary clarification was made by the Legislature with the passage of Chapter 115 SLA 1980 effective January 1, 1981.

3. "Procedural regulations for hearings conducted by the ATC should be adopted." The revised procedural regulations were formally adopted effective April 28, 1982. The revisions have proven quite effective in both speeding up the hearing process and shortening the length of oral hearings.

4. "A clarification of incidental transportation to some other primary business is needed." As stated earlier, the Commission amended 3 AAC 68.010 in 1980. While it could be argued that further definition in the statutes would assist in clarifying such carriage, the problem has generally not been serious for legitimate private carriers. The carriers that have had a problem are those that have in fact been proven to be operating without proper authority under the guise of private carriage.

5. "A statutory amendment is needed to give the Commission the authority to delegate their duty to preside over hearings to a hearing examiner." The use of hearing examiners without the presence of a Commissioner was found acceptable by the Supreme Court. The Court found that the use of hearing examiners violated neither the statutes nor constitutional due process. The case in point is ATC vs. Gandia, Sup. Ct. Op. No. 1964, 602 P2d 402 (1979). Therefore, this matter has been resolved.

6. "Registration fees (air only), weight fees (motor freight and passengers) and application fees for all types of carriers have not been increased for at least nine years." Fees have still not been increased. Such increases would require revision of the statutes which the Commission would support. The only fees that cannot be increased are registration fees for interstate carriers which are fixed by Federal Law.

This recommendation also pointed out that the maximum allowable civil penalty was only $150 per violation. The Legislature in Chapter 115 SLA 1980 raised the maximum to $1,000. The Commission has taken the higher maximum into consideration when levying civil penalties.

Recommendation No. 3

The Commission should seek the repeal of the Alaska Ferry Transportation Act.

Chapter 115 SLA 1980 removed ferry transportation from the jurisdiction of the Commission.

Recommendation No. 4

ATC should regulate the economics of the transportation industry as required by the Alaska Statutes.

A. Carriers should be required to submit all pertinent financial data necessary for economic regulation.

The Staff of the Commission now files accusations against carriers who do not file the required annual or quarterly reports. Failure to file reports can lead to either civil penalties or the revocation of the authority.

While the Commission still agrees that the collection of financial information could be of great benefit, the Commission also recognizes that the completion of detailed financial reports can be done only at a cost to the carrier. There is also a cost to the State since such reports would require considerable Staff time in verifying reports, enforcement of filings, completion of data and the dissemination of information. With current staffing, it is not possible to significantly improve the quantity of information gathered. There is a continuing effort to improve the quality of financial data currently received by improving reporting forms and utilizing the programs already in existence to catalogue the information.

B. ATC should audit the Carrier's accounting records to ensure they are prepared in accordance with regulatory accounting requirements and to determine the reasonableness of the financial data.

It has not been possible to significantly improve the survey of carrier's accounting records. While such indepth surveys or audits could be beneficial in determining whether or not the carrier is utilizing good accounting techniques, the fact is that numerous requests for positions to do such work have not been funded.

Further, this recommendation clearly demonstrates the unfortunate situation that exists in both the "78" and "82" audits, which is a continuing attempt to compare the APUC and the ATC. The two agencies deal with two different regulatory schemes. The APUC deals primarily with monopolies which in Alaska generally belong to either a governmental unit or the rate payers. The ATC deals with competitive privately owned businesses. While in both areas there are economic regulations designed to generate adequate rates to maintain the companies, there are within the transportation industries strong market forces at work that directly affect rates and markets. Another major difference is that utilities normally have necessary accounting staffs to maintain a complicated accounting system necessary to satisfy federal lending agencies, federal regulatory agencies, local governmental units, and bonding covenants required for revenue bonds. Transportation companies in Alaska tend to be of a much smaller size and, in many cases, use public accounting firms to maintain their accounts. The greatest difference between the two industries is in their control of their respective markets. The utilities have a fixed number of customers that over periods of time use a predictable amount of their service. On the other hand the transportation industry has little control over customers and certainly no control over the amount of services needed.

C. ATC should establish written basic policies and procedures for analysis of rate changes.

This recommendation was answered in part by the revisions to 3 AAC 69.395 and 3 AAC 68.180 that were effective May 8, 1980.

The major continuing problem in controlling tariffs that would insure a specific rate of return to a carrier, is that in a competitive market place such actions are impossible.

Transportation tariffs are not nearly as stable as utility tariffs for the reasons explained in B above. Stated simply, if one carrier drops its rates for a commodity between points A and B, then all other carriers servicing the same market must match it in short order or give up the freight. In utilities there is generally no alternative.

Recommendation No. 5

Improvement is needed in the enforcement of the ATC statutes and regulations.

A. ATC does not process enforcement actions in a timely manner.

An effort has been made to reduce the processing time for enforcement actions. The biggest problem in significantly reducing the processing time is in preparation of the case for hearing and getting the respondent to hearing. The lack of adequate Staff to handle the volume of work in enforcement has and will continue to cause some delays in processing each phase of the enforcement procedures.

Standard operating procedures have been developed for enforcement and are in use. Further, several memos and instruction sheets have been developed to standardize the enforcement effort.

B. The Commission frequently suspends all or part of the civil penalties assessed for violations.

The Commission still considers the suspension of part of a fine as a valid deterrent in its enforcement of the statutes and regulations. In determining the appropriate civil penalty to be levied in any case, various factors are normally taken into consideration by the Hearing Examiner and the Commission. Among the factors are:

1. revenue received as a result of the violation or violations;

2. duration and number of violations;

3. possibility of emergency circumstances;

4. availability of authorized carriers;

5. extent of respondent's experience in the transportation industry;

6. the quality of evidence submitted as provided in 3 AAC 60.290;

7. previous Commission orders assessing penalties for similar or comparable violations;

8. the nature and severity of the violations; and

9. mitigating circumstances provided by the respondent.

The value of suspending a portion of the penalty is that the suspended portion is a constant reminder to the respondent that new violations will result in not only new penalties but also the automatic levy of the suspension. With the current $1,000 limit per violation, suspension of several thousands of dollars is a very effective reminder.

C. ATC enforcement staff duplicates the motor safety inspection done by the Department of Public Safety.

There have been several changes in the commercial vehicle safety program since the 1978 audit. Generally, the Commission would still contend that the work being done by enforcement agents at the time of the audit was a worthwhile augmentation of Public Safety's program. However, with the transfer of the scale house personnel and the completion of a federal grant that funded the scale house program, the entire commercial vehicle safety program reverted to the ATC effective March 12, 1983. The existing staff is developing a safety program that will effectively protect the public, the commercial drivers, and the cargo.

The auditor was correct in pointing out that safety activities detract from carrier surveys and investigations. However, the Commission believes the implementation of a safety program designed to identify and remove unsafe vehicles from the highways is of great importance.

Public Safety and local police agencies are still conducting safety inspections based on thier police powers, but their program is designed to apprehend violators while a commercial vehicle safety program should concentrate on prevention of violations. Further, with the ATC authority under AS 42.07 and AS 42.10, action can be taken against the carriers that allow unsafe vehicles to be operated.

Recommendation No. 6

Applications should be processed by the ATC in a more timely manner and temporary operating authority should be granted in accordance with Alaska Statutes.

The Commission and the Staff have reduced the processing time of applications. In calendar year 1982 the processing time of non protested applications was less than two months. To further speed the processing of air applications, the Legislature in Chapter 115 SLA 80 provided in AS 02.05.070 that the Commission must get a completed application to hearing within 120 days of receipt or must deny the completed application within 60 days of a hearing if held. Failure to meet these dates results in an automatic grant of authority. To date there have been no automatic grants since the amendment.

The entire question of the grant of temporary authorities is unclear as to the intent of the law. Currently, the Commission has greatly reduced the number of temporaries granted. However, the Commission believes that the very tight definition placed on emergency or temporary authorities by the auditor was not the intent of the statutes. The audit implies that the statute would allow the issuance of a temporary only under emergency circumstances. The Commission disagrees, and believes it has some latitude in granting temporary authorities, especially where no current service exists or when a transfer of ownership takes place. Further, the Air Act gives the Commission the authority to consider the impact of denial of a temporary request on the applicant.

Recommendation No. 7

The Commission and Hearing Examiners should write the formal written decisions (orders) on application before the ATC.

The Staff normally does not prepare orders in cases that have gone to hearing. All such orders are prepared by the presiding Hearings Examiner. If a quorum of Commissioners is not present at the hearing, then the order is termed a Proposed Order and both parties have an opportunity to respond before the final Commission decision is issued.

To further expedite the issuance of orders, an effort has been made to use standard formats, so that drafting time is reduced.

It should be noted that any order written by staff is only a draft and must be approved by at least two Commissioners before issued.

The Commission is still of the opinion that little benefit would be derived by having one Commissioner with a legal background. As a quasi-judicial body, the decisions made must be based on the facts presented and not on the Commissioner's personal opinion as to what happened. Further, a Commissioner that had a legal background still could not represent the Commission in Court, as only the Attorney General's office can represent the State.

To overcome the problem of needing legal advise on matters in the hearing stage, the Commission uses one of the Hearing Examiners, both of whom are members of the Alaska Bar, as presiding officers. Since the Hearing Examiner is present in an official capacity, he can advise the Commission on evidentary matters, motions, etc., from a legal standpoint. The assigned Assistant Attorney General represents Staff before the Commission at hearings and represents the Commission when rulings are appealed to the Superior Court. Further, the Assistant Attorney General researches legal questions posed by Commissioners and assists in responses to both the Civil Aeronautics Board and the Interstate Commerce Commission.

The need by the Commissioners for legal advice on procedural matters has been reduced by training programs that they have attended. The Commissioners have taken courses at the National Judicial College in Administrative Law Procedures. The courses provided by their institution are attended by persons appointed or elected to the various quasi-judicial boards and commissions throughout the United States. Many states also send judges recently appointed to their various courts to this same college.

Recommendation No. 8

The ethical conduct regulations should be complied with in matters before the ATC.

The Commission and Staff have made a concerted effort to remove any doubt that the ATC is a quasi-judicial agency and as such cannot accept information not correctly presented. Stated simply, most people both within the regulated industries and outside those industries do not understand the distinction between a quasi-judicial agency and the typical

agency in the executive branch of government. Therefore, these people think it totally proper to attempt to convince the ATC Commissioners or the staff as to how they would hope a matter should be handled. While very few of these people would ever dream of calling a judge to discuss a legal matter currently before his bench, to call the ATC is considered okay.

The Commissioners quite frankly are refusing to discuss cases that are in the adjudication process. They will talk with individuals who have general questions about transportation regulation or Commission procedures, but all such conversations are limited to generalities.

Recommendation No. 9

Neither Commissioners nor ATC staff should accept free transportation from any regulated carrier.

Since the incident of August 1978, no free transportation has been accepted by any Commissioner or staff member. Every effort is made to ensure that no one carrier is seemly given preference over another.

Recommendation No. 10

ATC should issue orders in accordance with the Alaska Statute.

The Commission did continue to issue some orders by telegram during the period 1979 to 1981. However, since early 1982 very few authorities, whether for temporary authority or not, have been issued by telegram. In all cases since 1981, a confirming order has been issued whenever a telegram was used.

A more thorough discussion of the ATC's disagreement with this audit recommendation can be found with this same finding in the 1982 audit.

Recommendation No. 11

The Statutory Qualifications for Commissioners of the ATC should require specific areas of expertise.

This matter was resolved by the passage of Chapter 115 SLA 1980 which amended AS 41.07.041. The amended section establishes that each of the three positions will have specific experience in various fields.

Recommendation No. 12

The ATC should give notice, hold open to the public, and maintain complete minutes of the Commissioners' weekly meetings.

The weekly meetings are currently held solely to make decisions in adjudicatory matters and are thus not open to the public as stated in the Response to Recommendation No. 8. The Commission can only listen to testimony if all parties are present so the concept of a weekly public meeting would only increase the possibility of accusation that decisions were made based on ex parte communication.

The specific regulation, 3 AAC 60.470, referred to in the Audit was repealed effective April 20, 1982. All hearings are open to the public and are duly noticed in the ATC Journal as required by AS 44.62.310. If any change to the administrative code is under consideration, notice is published in local newspapers as required.

Recommendation No. 13

An index system should be developed for the final orders issued by the ATC and decisions on appeals from the courts.

The staff and a Hearing Examiner has completed an indexing of all Commission Orders in a legal digest. The project began in 1980 and will be completed by July 1, 1983. The digest will be over 900 pages in length and will be made available to the public. The digest took about six man months of Hearing Examiner's time and about 12 man months of clerical support time.

It is believed that the digest will speed up processing time and possibly reduce hearing time as past decisions will be readily available so that the the same arguments will not have to be presented during each case.

Recommendation No. 14

The Assistant Attorney General and Tariff Analyst positions at Department of Law which are assigned to ATC matters should be placed organizationally and physically within the ATC.

The Assistant Attorney General position is still assigned to the Department of Law. In September of 1982, the incumbent in the position was required to relocate his office back

to the Department of Law's office area in Anchorage. Prior to the move, the attorney had been allowed to work at the Commission's office.

The move has caused some difficulties and does interrupt the work flow especially in the handling of enforcement cases.

The Commission has no idea what happened to the Tariff Specialist position assigned to the Department of Law.

The Commission is still of the opinion that the attorney should at the very least be assigned to physically work at the Commission's office. Further, with the current work load the Commission needs to add either another attorney or a paralegal assistant.

1982 Audit

Recommendation No. 1

The Alaska Transportation Commission should become a section within the Alaska Public Utilities Commission (APUC).

The Commission has prepared several written statements in depth as to its reasons for opposing this recommendation.

The principle reason for the ATC not agreeing with this recommendation is that the ATC and APUC provide economic regulation of two totally different industries. The APUC regulates essentially monopolistic utilities that are generally owned either by cooperatives or local governments. The ATC regulates highly competitive air and service transportation companies that are in private or cooperate ownership. The APUC's attention is primarily concentrated on rate cases while the ATC is primarily involved in determining applicant fitness and enforcement activities.

The work load of both agencies would appear to justify the continuance of the existing structure. In fact as of May 16, 1983, the ATC has opened 262 dockets as compared to 250 in the same time period in 1982 and has issued 341 orders as compared to 233 in 1982. It would appear that to combine the two agencies would place a very heavy work load on the remaining Commissioners. It could very well lead to the same problems that lead to the splitting of the old Public Utilities Commission in 1966. That split was designed to reduce delays and increase service to the regulated industries and created the APUC and the ATC.

Recommendation No. 2

Temporary authority should be granted in accordance with statutes.

The Commission does not agree that temporary authorities are being granted without considering the statutes.

In the past some temporary authorities were granted in what appears to have been an expedited manner. This is no longer the practice. While temporary authorities are still being granted, most are not granted until after publication in the Journal and then by written order. The use of telegrams has been greatly curtailed and restricted to only rare cases where there is a need for expedited service.

If there are known protestants to the application, the Commission will hold a short notice hearing limited to the question of the need for the temporary. In this way all known parties are guaranteed due process and the Commission can hear evidence as to the emergency situation that applicant believes exists.

The Commission is still of the opinion that the statutes provide adequate latitude to allow for the issuance of temporary exemptions. To limit the issuance of temporary exemptions to the narrow parameters suggested in this recommendation could be more of a disservice to both the public and the regulated industry than the granting of such permission.

It is also indicated in this recommendation that the processing time for applications not requiring a hearing was five months. A review by Staff of the 1982 orders issued for all applications that did not require a hearing indicated an average of approximately three months. This average time has been further reduced in 1983 with many applications being processed within 45 days.

Recommendation No. 3

The economic regulatory procedures of ATC should include financial analysis of data submitted by the carrier.

A. Processing of applications should include financial statements and financial data.

All applications are being reviewed by either a tariff specialist or an accounting technician during the initial processing. A review sheet is included in all dockets indicating the financial condition of the applicant. The applicant is contacted by letter if any additional information is needed to complete the evaluation. Failure on the part of the applicant to supply the information may result in rejection of the application as incomplete.

The Staff is considering a new application form that will require the applicant to submit both additional data as well as confirmation of assets and liabilities. However, it now appears that new regulations will have to be published and approved as the confirmation requirement would be an addition to the application process and can only be initiated through regulation.

B. ATC should require supporting documentation of tariff changes for review and analysis.

This recommendation would seem to be based, in part, on the failure of Staff to document its actions. While with only three tariff specialists it would not be possible for the ATC to control and set the rates for 200 common motor carriers and 225 air carriers, the Staff has rejected many tariff filings that do not meet filing requirements and that might be discriminatory toward selected shippers.

The Staff is now requiring rate justification to be submitted for some motor tariff filings and all air tariff filings. The motor carriers have indicated some opposition to the requirement to justify all rate increases. In a recent hearing before the Commission the carriers indicated that a requirement to submit cost justification for tariff adjustments is both costly and very time consuming. Further, in many cases the changes are only for a small section of their tariff and are based on competition rather that specific cost for the operation.

The Staff expects that the final determination of how much cost data will be required for tariff filings will have to be reduced through the promulgation of regulation. With the reduction of filing requirements by the federal agencies, ICC and CAB, there has developed a dual system wherein the federal filing requirements are more lenient than the State requirements.

C. Annual and quarterly financial reports should be analyzed.

The question of what is needed on annual and quarterly reports is most difficult to answer. The carriers generally resent having to file any reports, contending that reports are expensive to prepare and are open to the public, i.e., their competitors. The Staff is of the opinion that some carrier information is needed and can only be supplied by the carrier.

The ATC generally agrees that more financial reviews could be done. However, it should be noted that to do so will require more funding to cover support cost such as data entry, programming, computer time and support equipment. Possibly of even greater importance in considering

more review is the impact of its collection on the carriers as any increase in reporting requirements will directly impact them in increased cost of preparing the input documentation.

It should be noted that many jurisdictions are reducing reporting requirements as part of deregulation.

Recommendation No. 4

Complaints and accusations should be investigated and processed in a timely manner and accurate records of the complaint resolution process should be maintained.

Steps have been taken to improve the enforcement effort and to ensure that complaints, citations, and accusations are processed in as timely manner as possible. Part of the problem has been resolved by a better record keeping system for the agents and the assignment of specific cases to an agent. The objective is to have each agent be responsible for a case through the hearing process.

To further reduce delays the Hearing Examiners are closely monitoring the calendar to ensure that cases simply do not die because of failure to complete the hearing process.

While every effort is being made to increase the productivity of the enforcement agents, there is no way to ensure that cases are not going to extend over what appears to be an unusual length of time. The effort to collect adequate evidence takes time especially when the violators seldom cooperate. Further, the quasi-judicial process takes time as every reasonable effort must be made to guarantee the accused of his due process rights.

Recommendation No. 5

The number of field surveys performed each year should be increased and should include a limited financial compliance audit of accounting records.

The number of field surveys for both surface and air carriers has been increased. A new motor carrier survey format has been of assistance in discovering violations especially in the area of drivers' records and hauling unauthorized loads.

Normally, the survey team conducting surface surveys includes a tariff specialist who reviews the bills of ladings against the posted tariff. Such surveys normally take at least two days and one survey took about two weeks. If an accusation results from the survey, several more weeks of Staff time is needed to finalize the investigation and prepare for the hearing.

It is Staff's opinion that surveys are a very important element in the enforcement of economic regulation. However, there is a direct conflict for time between the recommendation to promptly resolve all complaints and to conduct more indepth surveys. To do both would require more Staff.

Recommendation No. 6

The Commissioners and Hearing Examiners should write all the formal written decisions (orders) on docketed matters before the ATC.

The ATC does not disagree with this recommendation. However, it should be noted that the Hearing Examiners do write all of the orders generated by hearings over which they preside.

Since January 1, 1983, there have been 41 hearings in Anchorage and in 25 of them at least a quorum of Commissioners have been present. By attending the hearings, the Commissioners can render a decision without the interim step of a proposed order. This both shortens the time between hearings and final orders and speeds up the time necessary to grant an authority if applicant prevails. A side benefit is that in some cases it reduces the cost of all parties as the necessity of submitting legal briefs is reduced.

Recommendation No. 7

ATC should establish procedures for the accountability and collection of civil penalties.

Since this audit a greater effort is being made to ensure the collection of civil penalties is being made. Currently, there is a systematic call-up of overdue fines in order that reminder letters can be sent. If such letters prove unsuccessful, several alternatives are used.

The first is legal action either through the Department of Law for cases over $2,000 or Small Claims for under $2,000. If a certificated carrier is involved, a show cause order is issued requiring payment or revocation will be ordered. All three efforts have produced positive results.

Recommendation No. 8

Alaska Statutes should be amended to exempt dump truck operators from certification and economic regulation.

The Commission continues to concur that dump truck operation should be exempt from economic regulation and regulated only as to the safety of operation as commerical vehicles and to the filing of adequate insurance to protect the public.

The ATC does take exception to the comment that the Commission has "essentially exempted dump truck operation from economic regulation." What the Commission has done is to recognize the nature of the dump truck industry and to effect regulation with the least burden possible on applicants and permitted carriers while at the same time adhering to State law.

Recommendation No. 9

Regulation should be promulgated in a timely manner.

Of the four proposed regulations mentioned in the audit, two have been approved and published in the Administrative Code. The proposed regulation on tariffs and insurance is being rewritten and will need to be renoticed for hearing. The reason in both cases is that the original proposed regulations are no longer applicable to current situations.

There is no question that revised regulations should not take two years, but in some cases it is better for the revisions to die under public comment than for an agency to push them through and create unworkable situations.

A major review of the regulations is needed, but would require the service of an additional attorney from the Department of Law. While the Staff can draft changes, the services of an attorney are required prior to and during the hearing process since all of ATC's regulations are quasi-judicial in nature and actions taken are directly appealable to the Superior Courts. Therefore, the ATC's regulations

must be reviewed not only from the basis of applicable State law, but also based on current State and Federal case law since in many cases interstate commerce is affected.

Recommendation No. 10

ATC should seek legislation to increase fees.

The ATC supports the concept of increased fees and further believes that language should be included in AS 42.07 to allow for the assessment of costs to participants similar to the language appearing in AS 42.05.651.

RE: SSSB 174 Preferential Hire

Dear Mr. President:

While support for the substance of SSSB 174 appears virtually unanimous among the public and the legislators, some concerns regarding the fiscal note have emerged.

The Department of Labor has asked for six (6) new employees to enforce the provisions of SSSB 174 should it become law. The Department of Labor has very conservatively estimated wage savings to Alaskans in excess of 3.4 million dollars from the level of enforcement this funding would permit. Given the very conservative nature of Department of Labor's estimates this equals a greater than ten to one return to the citizens of Alaska for each State dollar.

The Senate Finance Committee has already included funding for four of the positions requested by the SSSB 174 fiscal vote as a special Alaska Hire unit within the Department of Labor. I believe we can anticipate a more active enforcement of Alaska hire by the new administration. I believe this fact, combined with the craft by craft requirement of SSSB 174, justifies the addition of all the requested six employees.

I would request your guidance and assistance as to how to best formulate the fiscal note to clarify this situation, guarantee adequate funding of Alaska Hire enforcement, and promote the passage of this legislation.

RE: SS SB 174 Preferential Hire

Dear Colleague:

Over the past three weeks, I have received numerous letters, telephone calls and POM's concerning this legislation. You and I, and the people, want to strengthen the employment position of Alaskans in the face of outside employers using outside labor on local projects.

SB 174 was fashioned after an executive order approved in White v. Mass. Council of Constr. Emp., the United States Supreme court decision announced on February 28, 1983. The Court upheld a City of Boston executive order which required at least 50% bona fide resident hire on "any construction project funded in whole or in part by City funds, or funds which... the City expends or administers, and to which the city is signatory." The Court, in the face of a federal constitution Commerce Clause challenge, held that "the application of the mayor's executive order to the contracts in question did not violate the Commerce Clause...".

A recent Washington Supreme Court decision, has cast legal doubt about the validity of AS 36.10 as presently constituted. SB 174 takes advantage of the White decision and puts AS 36.10 in a form that should create a constitutionally permissible employment preference statute.

Subsection (a) addresses employment preference in municipalities only, thus falling well within the boundaries established in White, and avoiding the Commerce Clause challenge.

Subsection (b) addresses employment preference on construction projects partly or wholly funded by state money. This subsection requires that 95 per cent of all workers on such projects be Alaska residents. It also requires that each craft of workers be composed of 95% Alaskan residents. This craft by craft provision will insure that Alaskans will be offered jobs in all craft areas and prevent the importation of a particular craft of workers at the expense of Alaskan residents.

3/8/83

Under this bill the Department of Labor will be required to closely scrutinize certified payrolls to assure that residents of an area, which has been designated as an area impacted by economic disaster, are given first preference for employment, where they are available and qualified, so that the economic effects of alleviating the disaster will be maximized. If resident labor is not available, the contractor will inform the department of the number of additional workers needed, the positions to be filled, and the efforts made at recruitment in the area. The department will investigate, and if it is determined that a good faith effort has been made by the contractor, will authorize the recruitment of qualified and available workers from areas adjoining the area impacted by such economic disasters then followed by residents of the region, and then by residents of the State at large. This expansion of auditing and investigative service will be significant and labor intensive.

Staffing would provide a technician for full-time resident audits, and a full-time investigator in the office to review audit results, make investigations of violations uncovered by the audits, and investigate complaints from sources outside the agency. The investigator would travel throughout the state to provide a quick reaction capability to remote job sites where a majority of the violations occur.

Additional workload results from the requirement that residency is based on worker hours on a craft-by-craft basis.

Assumptions:

Effective date of July 1, 1983
Inflation rate of 6% per annum
Equipment Costs of $9,000 is a one time item
Inclusion of additional funding ($251.8 in the Senate Budget) in the final appropriations bill.

The original fiscal note submitted for Sponsor Substitute for Senate Bill 174 requested $349.0 (6 positions). Of this amount, $251.8 (4 positions) has been included in the Senate Budget for the Department. This fiscal note is the difference between the original amount requested and the amount included in the Senate Budget 97.3 (2 positions).

JUSTIFICATION

This position will be required to audit certified payrolls to ascertain if contractors on public projects are employing local residents; if good faith efforts have been made to hire local residents; and further if labor from adjancent areas is being utilized when local skilled labor is not available.

Contractual service includes $3,120 for indirect support services, and $3,400 for rent. All other costs are normal operating expenses.

The $1,500 in the equipment line item is to purchase basic office equipment.

JUSTIFICATION

This position would provide professional review of the audit trail for resident hire; make investigations of suspected non-compliance and enforce the required quotas of resident to non-resident. This position would also provide quick reaction response capability to remote areas to apprehend violators while the project is still in process and funds are available for retention by the contacting agency that would have been paid to displaced residents.

Contractual services include $4,068 for indirect support services and $3,400 for rent and $2,000 for basic operating cost.

The position will require $1,500 to purchase basic office equipment.

Date May 4, 1983

Title "An Act relating to employment preferences for state residents; and providing for an effective date."

Contact: Judy Knight
465-2700

Bob Bacolas
465-4780

During the years when the Trans-Alaska Pipeline was being built, the department maintained an effective resident hire program, both within the construction of the pipeline and public construction contracts. A resident hire unit for enforcement of Title 36 was located within the Wage and Hour Administration, which was staffed with 12 employees, eight professional and four clerical support. Their activities were supportive of the activities of the three staff members assigned to public construction enforcement. Many newcomers finding it difficult to obtain oilfield work turned to traditional construction activities for employment. The resident requirements for "pipeline" employment were substantially more stringent than those for public construction. The result was that employers hiring for public construction and the Title 36 enforcement unit could rely on the activities of the "pipeline" enforcement unit for much of the legwork required to verify residency. It was a simple matter to check for the "resident card" required under Title 38.

In 1978 the Supreme Court in the matter of Hicklin v. Orbeck, overturned the residency aspect of Title 38. Subsequently, in the budget process all twelve "pipeline" positions were deleted and the entire staff was laid off. Consequently, since 1978 the department has not had any positions funded for enforcement of resident hire.

The Department recently completed a survey to determine the wages paid to non-residents that should have been paid to residents on public construction. Based on this survey we projected the figures for the entire fiscal year ending June 30, 1983. To arrive at the dollar value of wages lost by displaced residents we used a 40 hour work week and a base level wage, plus benefits, for the lowest paid job class subject to our wage surveys. Therefore, the actual dollar value of wages lost to residents in FY 83 would be more than the figure estimated from certified payrolls.

Number of displaced residents:	3767
Estimated value of lost wages:	$3,394,160.00

The Department supports this legislation which addresses resident preference in light of recent court decisions. This bill, coupled with the necessary staff resources to enforce resident preference, will do much to increase employment opportunities for Alaskan residents.

Approved:

Detail Analysis Senate Bill 174

Under this bill, the Department of Labor will be required to closely scrutinize certified payrolls to assure that residents of an area, which has been designated as an area impacted by economic disaster, are given first preference for employment, where they are available and qualified, so that the economic effects of alleviating the disaster will be maximized. If resident labor is not available, the contractor will inform the department of the number of additional workers needed, the positions to be filled, and the efforts made at recruitment in the area. The department will investigate and, if it is determined that a good-faith effort has been made by the contractor, will authorize the recruitment of qualified and available workers from areas adjoining the area impacted by such economic disaster; then followed by residents of the region; and then by residents of the State at large. This expansion of auditing and investigative service will be significant and labor intensive.

Staffing would provide a technician in each regional office for full-time resident audits. The staffing would also provide a full-time investigator in each office to review audit results, make investigations of violations uncovered by the audits, and investigate complaints from sources outside the agency. The investigators would have a travel budget which provides a quick reaction capability to remote job sites where a majority of the violations occur.

TO: Senator Josephson
FROM: H.M. Lancaster II
DATE: March 22, 1983

RE: Senate bill 174--Alaska Hire Preference Law

The current preferential hire law facially discriminates against non-residents in public works employment. Residency, as applied in AS 36.010.100, is based upon one's domicile which is defined in AS 36.95.010(5). Simple residency requirements are analyzed under the Privileges and Immunities Clause of the U.S. Constitution, Article IV, sec. 2.

Not all discrinination under the clause is invalid. Toomer v. Witsell, 334 U.S. 385, 396 (1948). However, the discrimination must be motivated by an independent and valid state purpose, and the clause "does not bar discrimination beyond the mere fact that they are citizens of other states." Id. To demonstrate a substantial relationship between a valid state purpose and the discrimination at issue, the state must show that the "noncitizens constitute a particular source of evil at which the statute is aimed." Toomer, at 398; Hicklin v. Orbeck, 437 U.S. 518, 526 (1978). The Privileges and Immunities Clause ensures that this retained sovereignty will not render an individual an alien within his own nation. Paul v. Virginia, 8 Wall 168, 180 (1869).

States, do however, routinely act in capacities other than as a sovereign. In Hughes v. Alexandria Scrap Corp., 426 U.S. 794 (1976) and in Reeves Inc. v. Stake, 447 U.S. 429 (1980), the Court held that state and local governments, in the face of a Commerce Clause challenge, may participate in the market place and exercise the right to favor its own citizens over others.

The propriety of the principal of AS 36.010.100 has recently been tested in Labors Local Union No. 374 v. Felton Construction, 654 P2d. 67(Washington 1982). The Court decided the threshold inquiry of whether the interest of preferential hire subject to state legislation is a privilege or immunity within the meaning of the U.S. Constitution, Article IV, sec. 2. In the spring of 1980, the City of Aberdeen awarded a sanitary sewer project to the lowest bidder, the Felton Construction Company, a Montana corporation. The project was funded by 25 percent

state and local funds and 75 percent federal funds. Appellant sued Felton and the city alleging that Appellees ahd not employed the statutorily required percentage of Washington residents on the city sewer project.

The Washington court in its analysis stated the following rationale for discharging the state's preferential hire law:

> (1) no valid independent reason shown for discriminating against nonresidents
>
> (2) nothing was shown to indicate that noncitizens constituted a peculiar source of evil at which the statute was aimed.
>
> (3) no reasonable relationship between the danger represented by non citizens, as a class, and the discrimination praticed upon them.

The Court cited Baldwin v. Fish & Game Comm'n, 436 U.S. 371, 383 (1978) for the proposition that the extent to which the privileges and immunities clause protects a citizen's right to be placed on the same footing with citizens of other states so far as the advantages resulting from citizenship in the States are concerned, those rights are fundamental. The right to pursue a livelihood in a State other than one's own is a right that is protected by the Clause and points to those interests basic to the maintenance or wellbeing of the Union.

The Court analyzed the motive of the State and declared that" While the State's proprietary role would not exempt it from privileges and immunities scrutiny, it might justify an otherwise illegitimate legislative purpose of seeking to forster state economic welfare." Felton, at p. 70. The State failed to demonstrate a valid state interest. Secondly,"absent an indentified peculiar evil" stated the Court, " it is difficult to determine if the statute is closely related to eliminating the evil non-residents present."

The Court did not dispute the proprietary interest of the State. The project was a public works effort involving state tax dollars. However, the Court found that the statute was not limijted to the ownership rights of the State. It specifically placed linitations on private contractors and their subcontractors. And in doing so the Court found

inappropriate the the hardship created by the statute because it affected private employers who had no direct dealings with the state. Felton, at p. 71.

It is at this juncture where the current Alaska employment preference law is infirm. It applies to "... any other retention of services necessary to complete any given project,". That language carries with it the prohibition elicited in Hicklin,"that an attempt to force virtually business that benefits in some way from the economic ripple effect... biases their employment practices in favor of the State's residents." at p. 532. The current statute is probably too broad in its application.

The viability of SB 174 rests upon the White Case. The court did not reach the Privileges and Immunities question. (NOTE: see the March 9, 1983 memo from Billy Berrier). However, the Court does quote the prohibition of Hicklin as to the broadness of applicability, and hints that a more narrowly drawn means of hiring local workers with a statement of local economic need may pass the test. The state as a market participant may be affroded the privileges of other private enterprises in the execution of its policy with its own resources.

TO: Senator Eliason, Chairman
Senate Labor & Commerce

FROM: Senator Josephson

DATE: April 5, 1983

RE: SENATE BILL 132 "An act relating to elevator safety standards."

Mr. Chairman and members of the committee, Senate Bill 182 is before you today as another of those concerns to which we legislators must pay close attention. It is a house cleaning measure.

Every three years, the American Society of Mechanical Engineers revises and adopts the safety code for installation and operation of elevators, escalators, dumb waiters, and moving sidewalks, recognizing the most recent technology in the field. The 1981 code described in this bill is the most recent effort in this state to meet those standards.

Adoption of the 1981 Elevator Safety Code would bring Alaska's minimum standards into conformity with the Basic Building Code, the National Building code, the Standard Building Code, and the Uniform protective devices, alteration, repairs, and/or replacements. Other important features which are incorporated in the code are those regarding venting, as well as the operation of elevators under fire or other emergency conditions. It adopts the current National Safety Practice's inspector's manual as the guide for Department of Labor elevator inspectors.

The bill further permits municipalities to adopt their own standards for safety as long as the minimum standards do not conflict with minimum state standards. Currently, the Municipality of Anchorage has adopted an elevator code and performs inspections within its jurisdiction.

The bill has no fiscal impact.

Bill No. Senate Bill 182

Date March 31, 1983

Title "An Act relating to elevator safety standards."

Contact: Judy Knight
465-2700
Bob Bacolas
465-4870

Every three years, the American Society of Mechanical Engineers revises the safety code for installation and operation of elevators, escalators, dumbwaiters and moving sidewalks to incorporate technological advances. The 1981 code described in this bill is the most recent effort in this regard. The 1978 code presently in effect for the State of Alaska is, therefore, outdated and will not be reprinted by or otherwise be available from the American Society of Mechanical Engineers.

Adoption of the 1981 Elevator Safety Code would bring Alaska's minimum standards into conformity with the Basic Building Code, the National Building Code, the Standard Building Code, and the Uniform Building Code which are commonly accepted and used by industry as minimum standards. These codes are also commonly adopted by political subdivisions as the minimum standards enforced under their building inspection programs.

This bill also provides that municipalities may adopt and enforce their own elevator safety standards as long as the standards are at least as effective as the state standards. This would permit municipalities to extend their self-governing powers to this aspect of public safety if they wished. The Municipality of Anchorage presently has an elevator inspection program and conducts inspections in its jurisdiction.

The 1981 elevator safety code addresses the emergency power source provisions set out in AS 18.60.810. Repeal of this section as proposed in Section 5 of the bill is, therefore, appropriate.

The Department of Labor supports passage of this bill. It would not have any fiscal impact.

Liability of installer or maintenance company for injury caused by door of automatic passenger elevator. 64 ALR3d 1005.

Liability of owner or operator for injury caused by failure of automatic elevator to level at floor. 64 ALR3d 1020.

Sec. 18.60.800. Elevator safety standards. (a) The 1978 edition of the American National Standards Institute Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks published by the American Society of Mechanical Engineers is adopted as the minimum elevator safety code in the state.

(b) The Department of Labor shall

(1) adopt or change regulations to carry out the provisions of AS 18.60.800 — 18.60.820;

(2) inspect and certify elevators to meet the safety requirements;

(3) establish, by regulation, fees for inspections performed under AS 18.60.800 — 18.60.820; and

(4) maintain a record of all inspections performed and of all inspection fees collected.

(c) Inspections of elevators by the department shall be performed in accordance with the procedures set out in the American National Standards Institute's Practice (Inspector's Manual — ANSI 17.2), as approved May 29, 1973.

(d) In AS 18.60.800 — 18.60.820, "elevator" includes elevators, dumbwaiters, escalators and moving walks. (§ 1 ch 44 SLA 1976; am § 1 ch 20 SLA 1979)

Effect of amendments. — The 1979 amendment, in subsection (a), substituted "1978 edition of the American National Standards Institute Safety Code" for "Department of Labor shall adopt the 1971 edition of the American National Standard Safety Code" and "elevator safety code in" for "elevator safety standards of" and inserted "is adopted"; in subsection (b), deleted "and" from the end of paragraph (1) and added paragraphs (3) and (4); and added subsections (c) and (d).

Sec. 18.60.810. Emergency power source. All elevators which do not have an alternate power source shall be equipped with an emergency power source which will produce sufficient power to provide lights inside the elevator and a ringing alarm which can be heard in the building for five hours. (§ 1 ch 44 SLA 1976)

Sec. 18.60.820. Enforcement of compliance. A Department of Labor inspector shall give written notice to the owner of an elevator of each violation of safety standards as a result of his inspection. If within 15 days after receipt of written notice of a safety violation the person notified does not rectify the condition, the commissioner of the Department of Labor shall authorize the elevator to be closed until the safety violations are rectified. (§ 1 ch 44 SLA 1976)

Article 11. Snow Safety.

Section
822. Snow safety and operation plan

Collateral references. — 39A C.J.S., Health and Environment, §§ 3, 5, 47.

Sec. 18.60.822. Snow safety and operation plan. A ski area may not be operated except under a snow safety and operation plan approved

(1) by the commissioner of public safety; or

(2) by the agency of the United States that manages land on which the ski area operates. (§ 3 ch 80 SLA 1980)

Cross references. — As to limitations on claims arising from skiing, see AS 09.65.135.

Chapter 62. Certificates of Fitness.

Section
10. Certificate of fitness required
20. Application for and issuance of certificate
30. Fee
40. Duration of certificate
50. Issuance and contents of certificate
60. Power of the department
70. Persons required to obtain certificate
80. Penalty

NOTES TO DECISIONS

For comparison of this chapter with AS 08.40.005 — 08.40.200, "Electrical Administrators," see Allison v. State, Sup. Ct. Op. No. 1703 (File No. 3716), 583 P.2d 813 (1978).

LEGISLATIVE PROPOSAL ANALYSIS

Subject of Proposed Bill:

"Elevator Safety Standards"

Background Information:

Every three years, the American Society of Mechanical Engineers revises and adopts the safety code for installation and operation of elevators, escalators, dumb waiters, and moving sidewalks, recognizing the most recent technology in this field. Existing elevator installations will not be required to meet the updated standards.

Summary:

The bill amends AS 18.60.800 to adopt the 1981 Safety Code which conforms to 1) the Basic Building Code; 2) the National Building Code; 3) the Standard Building Code; and 4) the Uniform Building Code with respect to fire resistance ratings, earthquake protective devices, alteration, repairs, and/or replacements. Therefore, all codes are uniform in addressing the safety codes for installation of elevators, escalators, etc. Other important features which are incorporated in the code are those regarding venting, as well as the operations of elevators under fire or other emergency conditions. It adopts the current National Safety Practice's inspector's manual as the guide for Department of Labor elevator inspectors.

The bill adds AS 18.60.830, to provide that municipalities may adopt their own standards as long as those standards are at least as stringent as those required under AS 18.60.800. Currently, the Municipality of Anchorage has adopted an elevator code and performs inspections within its jurisdiction. AS 18.60.810 is repealed in Section 4 of the bill. The current safety code adopted in Section 1 of the bill requires an emergency power source for elevators, making AS 18.60.810 unnecessary.

Alaska State Legislature
Pouch V (MS-3100)
Juneau, AK. 99811

Subject: Senate Bill No. 182 - Referred by the Department of Labor and Commerce - March 17, 1983

Dear Senator Josephson,

We have reviewed Senate Bill No. 182 and must express our concern regarding the change to the elevator safety standards.

Section 2 - AS18.60.800 (b)(2) permits inspections to be made in a Municipality at the option of the Municipal Inspection Division.

OTIS Elevator installs the majority of all elevators within and outside the Municipality of Anchorage and have found that the State of Alaska Elevator Inspection Division is most competant, fair and thorough although somewhat short handed.

Inspections for new installations have to be scheduled in advance (two to six weeks) to assure that an Inspector is available at the time the project is completed.

The code you are adopting does not permit the operation of the elevator without the approved inspection tests, which we feel is appropriate.

However, due to the number of installations we install and maintain, the single inspector the State has is extremely pressed to make all the additional annual safety inspections.

Moreover, we express our concern within the Municipality of Anchorage because of the degree of sopnistication of the elevator equipment and the large population of people using this type of equipment.

In the last several years the State has given over the inspection duties to the Municipality on the assumption that all inspections would be made in accordance with the ANSI code and will be at least as stringent if not more so than State Inspections.

The State at that time kept the right to make spot checks on Municipal elevators should it be determined that safety hazards and other considerations be involved.

It is the writers opinion that current inspections being made by the Muncipality are not as indepth as those made by the State.

Certain requirements being forced upon owners outside the Municipality are not being requested on similar installations within the Anchorage area.

Every nine days OTIS Elevators alone move the equivalent of the worlds population and we are exposed to tremendous liabilities. Subsequently, we encourage professional safety inspections by both our service mechanics, installation crews and the appropriate inspection agency to ensure that all aspects of the installation are within the ANSI guidelines.

By the same token we would encourage the Municipality to become more stringent in their inspections as we fear that any new competitors that come into our State may take shortcuts in installation and maintenance services to provide more attractive pricing with their products or services.

Although we realize the section indicates that it is up to the Commissioner to determine that the inspection and certification by the Municipality adequately protect the public we feel that this is a provision which will be ineffectively regulated and enforced. We feel the Commissioner is not intimately familiar with elevator systems and unless the inspectors are in constant training they themselves will not be able to understand the "workings" of the new computerized equipment.

We respectfully request that you reconsider your Senate Bill and not ammend Section 2 AS18.60.800 (b)(2).

Respectfully submitted,

OTIS ELEVATOR COMPANY

SENATE
LETTER OF INTENT
FOR
CSSB 184

During the scheduled hearings in which the Alaska Transportation Commission (A.T.C.) was discussed and reviewed, many problem areas were identified. The Performance Review of the Alaska Transportation Commission conducted by the Division of Legislative Audit, April 1, 1982, concluded that the functions of A.T.C. could be better performed if A.T.C. were to merge with the Alaska Public Utilities Commission.

However, several questions were raised which remain unanswered:

1) Is State involvement in the Essential Air Service Program required?

2) Does the State want to deregulate surface and air transportation within Alaska?

3) What method does the State wish to employ to assure the public that air and motor carriers have sufficient insurance coverage to protect the public's interest?

4) What is the role of the Alaska Transportation Commission in regard to a commercial vehicle safety program?

5) Would a citizen's board be an appropriate mechanism to perform the oversight functions which are currently the responsiblity of the Commissioners of the Alaska Transportation Commission.

6) Do the Alaska Transportation Commission's policies regarding light aircraft ensure that innovative competition which could be beneficial to the public is not eliminated?

With the passage of this legislation, it is the intent of the Senate Labor and Commerce Committee that the Office of Management and Budget conduct a thorough performance review of the functions of A.T.C. The review will include, but will not be limited to, the scope of areas previously outlined.

The Office of Management and Budget will report back to the Thirteenth Legislature within ten days after the second session convenes in 1984. The report shall outline the findings of the audit as well as specific actions to implement any changes recommended.

Adopted in the Senate, April 27, 1983.

SUPPLEMENTAL
SENATE LETTER OF INTENT
TO CSSB 184 (L&C)

In the interim it is the intent of the Senate that the Alaska Transportation Commission fulfill its statutory responsibility with concentration on protection of the public.

Adopted in the Senate, April 27, 1983.

SB 184 FISCAL NOTE ANALYSIS

The submitted FY '84 budget request for ATC follows:

Operating Expenditures	FY '83	FY '84
Personal Services	1,356.6	1,293.1
Travel	57.7	61.2
Contractual	182.5	192.2
Commodities	16.2	16.9
Equipment	1.2	-0-
	1,614.2	1,563.4
Capital Expenditures	Ø	Ø
Revenue	145.2	155.2

If the legislation fails to pass and ATC sunsets, there will continue to be a financial impact to the State for the administration of the State's share in the Essential Air Services Program and for verification of insurance registration. The reduced responsibilities would be reflected in the FY '85 budget request. In this case, the budget would be as follows:

Operating Expenditures	FY'83	FY '84	FY '85	FY '86	FY '87
Personal Services	1,356.6	1,293.1	69.6	73.8	78.2
Travel	57.7	61.2	Ø	Ø	Ø
Contractual	182.5	192.2	16.5	17.5	18.5
Commodities	16.2	16.9	2.0	2.1	2.2
Equipment	1.2	Ø	Ø	Ø	Ø
Total Operating	1,614.2	1,563.4	88.1	93.4	98.9
Capital Expenditures	Ø	Ø	Ø	Ø	Ø
Revenue	145.2	155.2	Ø	Ø	Ø

ALASKA STATE SENATE

M E M O R A N D U M

DATE: March 21, 1983

TO: Senator Patrick OK

FROM: Jim Kelly, Aide

RE: Senate Bill 188: "An Act relating to bank holding companies."

This bill would make a single change in the domestic bank holding companies section of the Alaska Banking Code. The change, accomplished by the deletion of the words "unless the bank is a recently formed bank" in AS 06.05.235(b), is intended to restore the principle of parity for banks doing business in Alaska.

The problem is that domestic bank holding companies, of which Alaska presently has four - Alaska Pacific Bancorp, Alaska Bancshares, Alaska Bancorporation and United Bancorporation of Alaska, are prohibited from establishing new banks in the state; and recently formed banks, such as the Alaska Continental Bank, are prohibited from establishing domestic bank holding companies.

These legal prohibitions went into effect on July 1, 1982, as a result of passage last session of SB 752, the interstate banking bill. That bill, being the first of its kind enacted anywhere in the country, though carefully drafted, was nonetheless quite complex. The major effect of SB 752 was to allow Outside banks to enter the local market; that has happened, and was intended. The problem mentioned above was not intended, and, in fact, was not even discovered until Alaska Continental Bank made application to establish its own domestic bank holding company and was informed by the Division of Banking that that was prohibited.

It is unfair to allow some Alaskan banks to form relationships with domestic bank holding companies, and prohibit some other Alaskan banks from doing likewise. As there can be significant economic advantages to such relationships, it is not in the public interest to grant the opportunity to some, and withhold it from others. For the consumer to realize the very real benefits of true competition, that is competitive services and competitive prices, it is necessary for rivals within the banking industry to be competing on a "level playing field". This legislation would help accomplish that.

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 281 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to energy development and conservation functions of the Department of Commerce and Economic Development and the Department of Community and Regional Affairs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.20.037(d)(2)(K) is amended to read:

(K) any other energy conservation [ENERGY-SAVING] device approved by the commissioner of community and regional affairs [COMMERCE AND ECONOMIC DEVELOPMENT UNDER AS 44.33.040-(12)].

* Sec. 2. AS 44.47.050 is amended by adding a new paragraph to read:

(19) plan, study, implement, and assist programs for energy development and energy conservation, including weatherization, to meet community and regional needs.

* Sec. 3. AS 44.83.162(1) is amended to read:

(1) In order to qualify for power cost assistance, each electric utility must make every reasonable effort to minimize administrative, operating, and overhead costs, including using the best available technology consistent with sound utility management practices. In reviewing applications for power cost assistance, the commission has the authority to require the elimination of duplicative or otherwise unnecessary operating expenses. Each eligible electric utility shall cooperate with appropriate state agencies [, INCLUDING BUT NOT LIMITED

TO THE ALASKA PUBLIC UTILITIES COMMISSION, THE ALASKA POWER AUTHORITY, THE ALASKA ENERGY CENTER, AND THE DIVISION OF ENERGY AND POWER DEVELOPMENT IN THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT,] to implement cost-effective energy conservation measures, and to plan for and implement feasible alternatives to diesel generation.

* Sec. 4. AS 44.83.177(d) is amended to read:

(d) In completing a reconnaissance study, the authority shall consult with the [DIVISION OF ENERGY AND POWER DEVELOPMENT IN THE] Department of Community and Regional Affairs [COMMERCE AND ECONOMIC DEVELOPMENT] to determine the information that each may require for energy planning and the development of technology.

* Sec. 5. AS 44.83.400(2)(B) is amended to read:

(B) the [DIVISION OF ENERGY AND POWER DEVELOPMENT,] Department of Community and Regional Affairs [COMMERCE AND ECONOMIC DEVELOPMENT]; and

* Sec. 6. AS 45.89.010 is amended to read:

Sec. 45.89.010. FUND ESTABLISHED. There is established in the Department of Commerce and Economic Development the residential energy conservation fund to carry out the purposes of this chapter. Loans and [REFUNDS,] grants [AND LOANS] made under this chapter may be used to purchase, construct, and install an energy conservation improvement in residential buildings. The fund may not be used for any [NO] other purpose.

* Sec. 7. AS 46.11.040(3)(B) is amended to read:

(B) is located or is to be located in an area where thermal and lighting energy standards are not justified because of the high cost of implementation of the standards, as determined under regulations adopted by the commissioner of community and regional affairs [COMMERCE AND ECONOMIC DEVELOPMENT], or

* Sec. 8. AS 46.11.900(3) is amended to read:

(3) "energy audit" means a determination and written summary prepared under [AS 46.11.030 OR] sec. 215(b)(1)(A) of the National Energy Conservation Policy Act (42 U.S.C. 8216(b)(1)(A)) of

(A) the energy consumption characteristics of a building, including the size, type, and rate of energy consumption of major energy consuming systems of the building and the climate characterizing the region where the building is located; and

(B) the energy conservation and cost savings likely to result from appropriate energy-conserving maintenance and operating procedures and modifications, including the purchase and installation of energy-related fixtures; for purposes of this subparagraph when a fossil fuel is the energy source, the energy cost savings shall be determined with reference to the projected price of that fossil fuel over a 10-year period;

* Sec. 9. AS 46.11.900(9)(B) is amended to read:

(B) by the commissioner of community and regional affairs [COMMERCE AND ECONOMIC DEVELOPMENT UNDER AS 44.33.040-(12)] for buildings and structures that [WHICH] are not public facilities.

* Sec. 10. The following laws are repealed: AS 44.33.030 - 44.33.060; AS 45.88.500(2)(C); AS 45.89.020, 45.89.500(3)(A); AS 46.11.030, 46.11.-900(1)(B)(iii); and AS 46.12.120(4).

* Sec. 11. On the effective date of this Act a program or project that is supervised by the section of power development in the Department of Commerce and Economic Development, including an unexpended appropriation for a program or project, is transferred to the Department of Community and Regional Affairs. The Department of Community and Regional Affairs may delegate supervision of a program or project transferred under this section

to a state department or agency, including the Alaska Power Authority and the University of Alaska.

* Sec. 12. Notwithstanding the repeal of AS 45.89.020 made by sec. 10 of this Act, a refund or grant shall be paid under AS 45.89.020 if an energy audit is performed before July 1, 1983 for the residential building that is the subject of the refund or grant application and if the refund or grant application is filed before January 1, 1984.

* Sec. 13. This Act takes effect July 1, 1983.

Fisher, DFC
6-21-83

CS for SB 281 (L&C)

AN ACT RELATING TO ENERGY DEVELOPMENT AND CONSERVATION FUNCTIONS

Sectional Analysis

This bill would repeal the statutes concerning the division of energy and power development and substitute general powers for the Department of Community and Regional Affairs to implement energy development and conservation programs. The energy audit/grant program would be repealed, and other energy responsibilities reassigned from the Department of Commerce to Community and Regional Affairs. Energy programs remaining in Commerce would be some energy planning (in Finance and Economics) and energy conservation loans (in Business Loans). The transition sections allow for program transfer and phase-out.

Sec. 1. Approval of an energy conservation device for the purpose of a business energy conservation credit is transferred from Commerce to C&RA.

Sec. 2. C&RA is given a general power to implement energy programs.

Sec. 3. The list of state agencies with which utilities shall cooperate in implementing energy conservation, for the purpose of the power cost assistance program, is deleted.

Sec. 4. The Alaska Power Authority, in completing reconnaissance studies, is required to consult with C&RA rather than Commerce.

Sec. 5. The APA, under the Energy Program for Alaska, shall ensure that communities cooperate on energy conservation with C&RA rather than Commerce.

Sec. 6. The residential energy conservation fund is changed from a refund, grant, and loan fund to primarily a loan fund, although the ability to use it to fund grants in the future is retained.

Sec. 7. Thermal and lighting energy standards are adopted by C&RA rather than Commerce.

Sec. 8. The definition of energy audit is amended to delete the state program.

Sec. 9. Thermal and lighting energy standards are defined as those adopted by C&RA rather than Commerce.

Sec. 10. Repealers.

44.33.030-060 are the division of energy statutes.

45.88.500(2)(C) is the part of the definition of an alternative energy system as one approved by Commerce under the division of energy statutes.
45.89.020 is the refunds and grants provision under the energy audit program.
45.89.500(3)(A) is the definition of an energy audit as established by the division of energy for the audit program.
46.11.030 is the energy audit program.
46.11.900(1)(B)(iii) is the portion of the definition of an alternative energy system as one approved by Commerce under the division of energy statutes.
46.12.120(4) is the requirement that the Energy Center consult with the division of energy and other state agencies.

Sec. 11. Transition. Energy programs or projects of the division of energy are tranferred to C&RA, and C&RA may delegate supervision to another agency.

Sec. 12. Transition. Those who have received energy audits before July 1, 1983 will have until Jan. 1, 1984 to apply for grants or refunds.

Sec. 13. July 1 effective date.

IN THE SENATE

HOUSE CS FOR CS FOR SENATE BILL NO. 286 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to motor vehicle warranties."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.45 is amended by adding a new section to read:

ARTICLE 6. MOTOR VEHICLE WARRANTIES.

Sec. 45.45.300. MOTOR VEHICLE WARRANTIES. (a) If a new motor vehicle does not conform to an express warranty that is applicable to it and the owner of the vehicle reports the defect or condition to the manufacturer of the vehicle or to the manufacturer's or distributor's dealer during the term of the warranty, the manufacturer, distributor, dealer, or a repairing agent shall make the necessary repairs to conform the vehicle to the express warranty.

(b) If during the term of the express warranty or within one year from the date of delivery of the motor vehicle to the original owner, whichever period terminates first, the manufacturer, distributor, dealer, or repairing agent is unable to conform the motor vehicle to an applicable express warranty after a reasonable number of attempts, the manufacturer or distributor shall accept the return of the nonconforming motor vehicle, (at the owners option) - legal to change and shall refund the full purchase price to the owner, less a reasonable allowance for the use of the motor vehicle from the time it was delivered to the original owner. A refund under this subsection shall be made to a lienholder of record, if any, and the owner, as their interests may appear.

(c) Before claiming a refund under (b) of this section, the owner shall give written notice by certified mail to the manufacturer

and its dealer or repairing agent at any time before 60 days have elapsed after the expiration of the express warranty or the one-year period after the date of delivery of the motor vehicle to the original owner, whichever period terminates first (1) stating that the vehicle has a nonconformity; (2) providing a reasonable description of the nonconformity; (3) stating that the manufacturer, distributor, dealer, or repairing agent has made a reasonable number of attempts to conform the vehicle; and (4) stating that the owner demands that he receive intends to claim a refund within 60 days after mailing the written notice. Within 30 days after receiving the notice required by this subsection the manufacturer may make a final attempt to conform the vehicle before a refund is made under (b) of this section.

(d) An owner may not receive a refund under this section if the manufacturer or distributor shows that the nonconformity complained of

(1) does not substantially impair either the use or the market value of the motor vehicle; or

(2) is the result of

(A) alteration of the motor vehicle by the owner or a person other than a dealer or repairing agent that is not authorized by the manufacturer or distributor; or

(B) abuse or neglect by the owner or a person other than the dealer or repairing agent.

(e) A presumption that a reasonable number of attempts have been made to conform a motor vehicle under an applicable express warranty is established if:

(1) the same nonconformity has been subject to repair three or more times by the manufacturer, distributor, dealer, or repairing agent during the term of the express warranty or the one-year period after delivery of the motor vehicle to the original owner, whichever

period terminates first, but the nonconformity continues to exist;

(2) the nonconformity makes the vehicle unsafe to operate and the same nonconformity has been subject to repair at least twice by the manufacturer, distributor, dealer, or repairing agent during the express warranty term or the one-year period referred to in (1) of this section, whichever period terminates first, but the nonconformity continues to exist; or

(3) the vehicle is out of service for repair for a total of 30 or more business days during the express warranty term or the one-year period referred to in (1) of this subsection, whichever period terminates first; any period of time that repairs are not performed for reasons that are beyond the control of the manufacturer, distributor, dealer, or repairing agent is excluded from the 30-day time period referred to in this paragraph.

(f) A manufacturer whose vehicles are sold in the state through an authorized dealer shall provide its dealer or repairing agent with any part necessary to make a repair of a nonconformity covered under an express warranty, as soon as possible, without additional charge for freight or handling, if the part is not in the dealer's or agent's inventory when the nonconforming vehicle is brought to the dealer or repairing agent for repair.

(g) A manufacturer or distributor who fails to refund the full purchase price of a motor vehicle when there is a requirement to do so under this section is presumed to have committed an unfair trade practice under AS 45.50.471.

(h) A motor vehicle returned under (b) of this section may not be resold by the manufacturer or distributor in the state unless full disclosure of the reason for the return is made to the prospective buyer before the resale is concluded.

(i) The provisions of this section do not limit other rights and remedies that may be available to the owner of a motor vehicle under other provisions of law. This subsection does not create a new cause of action against a dealer or repairing agent who sells or attempts to repair a motor vehicle found to be nonconforming under this section.

(j) A manufacturer or distributor of motor vehicles who authorizes the sale of the manufacturer's or distributor's motor vehicles in the state shall maintain authorized dealership facilities within the state that are able to perform the service and make the repairs required by the manufacturer's express warranty and by this section.

(k) A manufacturer or distributor who accepts the return of a nonconforming motor vehicle under (b) of this section shall reimburse the owner for any reasonable cost incurred in shipping the vehicle to and from the nearest authorized facility for warranty service and repair of a nonconformity that causes the return of the vehicle.

(l) If a manufacturer or distributor has established an informal dispute settlement procedure that substantially complies with the requirements of 16 C.F.R. 703, as that section may be amended, or if the manufacturer or distributor, after receipt of notice required by (c) of this section, offers in writing to participate in an arbitration or mediation process with the owner and the arbitration or mediation decision is binding on the manufacturer or distributor but not on the owner, and if the informal dispute settlement or arbitration or mediation process is approved by the attorney general, the provisions of (b) of this section concerning refund or (k) of this section concerning shipping costs do not apply to an owner who has not first resorted to the informal dispute settlement procedure or arbitration or mediation process.

(m) In this section,

(1) "dealer" means a person who has obtained a franchise from, or is authorized by, a motor vehicle manufacturer to engage in the retail sale and warranty repair of the manufacturer's new motor vehicles in the state;

(2) "distributor" means a person who is authorized by a manufacturer to engage in the wholesale distribution of the manufacturer's new motor vehicles in the state;

(3) "express warranty" or "warranty" means an express written warranty provided by the manufacturer of a new motor vehicle;

(4) "full purchase price" means the total price paid for a motor vehicle by the original owner, including costs added to the manufacturer's suggested retail price, such as original registration fees, transportation fees, dealer preparation, dealer installed options, and accrued finance charges;

(5) "manufacturer" means a person who by labor transforms raw materials and component parts into motor vehicles for wholesale or retail sale;

(6) "motor vehicle" or "vehicle" means a land vehicle having four or more wheels, that is self-propelled by a motor, is normally used for personal, family, or household purposes, and is required to be registered under AS 28.10; but does not include a tractor, farm vehicle, or a vehicle designed primarily for off-road use;

(7) "nonconformity" means a defect or condition in a motor vehicle caused by a manufacturer, distributor, dealer or repairing agent that substantially impairs the use or market value of a vehicle;

(8) "owner" means a purchaser, other than for resale, of a new motor vehicle, and a person to whom ownership of the motor vehicle is transferred in conformity with AS 28;

(9) "reasonable allowance" means an amount attributable to an owner's use of a motor vehicle; a "reasonable allowance" may not exceed an amount equal to the depreciation in value of the vehicle for the period during which the vehicle is available for use by the owner, calculated by a straight line depreciation method over ~~seven~~ 10 years, plus an amount equal to the depreciation in value of the vehicle that is caused by

(A) any neglect or abuse by the owner; or

(B) body damage not caused by a nonconformity;

(10) "repairing agent" means a person who has been specifically authorized by a motor vehicle manufacturer or distributor to perform warranty repairs in the state on one or more of the manufacturer's or distributor's motor vehicles;

(11) "substantially impairs the market value" means a nonconformity that substantially decreases the dollar value of a vehicle to the owner when compared to the dollar value of a similar vehicle that does not have the nonconformity;

(12) "substantially impairs the use" means a nonconformity that prevents a motor vehicle from being operated or makes the vehicle unsafe to operate.

'Lemon law' needs strong support to keep its teeth

By MIKE MILLER

One of the most important consumer protection bills before the legislature this year would, if passed, force automobile manufacturers to repair or replace "lemons" sold to Alaska car purchasers.

This legislation is literally a matter of life and death. One Kenai Peninsula resident lost family members because of defects in a car he purchased as new. This is just one of the many actual and potential tragedies on our roads due to defective automobiles — vehicles supposedly brand new and just off the showroom floor.

According to the Consumer Protection Division of the Alaska Attorney General's Office, between 800 and 900 Alaskans purchase defective vehicles each year.

Most of us are car owners, and purchasing a new car is one of the major financial commitments we make. As sponsor of the House version of the "lemon law," I feel very strongly that automobile manufacturers have a responsibility to those who purchase their cars. Unfortunately, case after case shows that the manufacturers often turn a deaf ear to the owners of cars that spend most of their time in the shop.

The Senate version of the lemon bill, CSSB 286, has passed the Senate. The House Labor and Commerce Committee is currently conducting public hearings. I strongly encourage citizens to testify in favor of this legislation.

Unfortunately, powerful economic interest groups are currently trying to water the bill

down, so that business can go on as usual. That is the reason strong citizen response is so important right now.

The bill passed by the Senate gives strong protection to the purchaser of a defective car, while putting the responsibility on the manufacturer, not the Alaskan dealer. The bill requires the manufacturer to buy back defective vehicles if the defect is not repaired — under the terms of the manufacturer's own warranty — within a year after purchase. A car is considered a "lemon" if the same defect has been subject to repair three or more times within that year, or if the vehicle has been in the repair shop for a total of 30 or more business days during the year.

If these conditions are not met, the owner of the lemon vehicle then has the right to full refund of the purchase price of the car, including finance charges, less depreciation and any damage done while in the owner's possession.

Among other provisions the bill requires manufacturers to notify the buyers of their rights under this legislation. What could be more fair? This is already being done in Massachusetts and California, and there is no reason for Alaska not to protect its citizens in this manner.

Unfortunately, both dealers and manufacturers are attempting to take the teeth out of the bill.

Dealers want the bill amended to change the number of allowed repairs from three to four; to delete finance charges from the reimbursement requirement; and to place responsibility of notifying consumers of their warranty rights with the state, not the manufacturer.

Manufacturers also want the bill weakened. Currently, Alaska is the only state in the nation in which the car owner must pay air freight if parts must be ordered from Outside. The bill would close this loophole by requiring the manufacturer to pay air freight just as they do in the other 49 states. Manufacturers want this section of the bill deleted.

Manufacturers also want to delete the section that requires them to pay back finance charges to the lemon owner. The reason for requiring the repayment of financing interest charges is simple: according to the attorney general's testimony, 75 percent of all cars purchased in Alaska are financed. Many cars are financed through dealerships and manufacturer's subsidiaries. In fact, General Motors Acceptance Corporation finances 80 percent of all GM cars sold in the state. Dealers make money if a car is financed in this way. They certainly don't want to have to give it back, even if the car they sold is a lemon.

I also have some amendments that I would like to see, because in contrast with the opinions of the dealers and manufacturers, I don't think the bill goes far enough.

I think that purchasers of lemons also should be reimbursed for their out-of-pocket expenses for necessary car rental while their lemon is being repaired, and also for any towing charges resulting from warranted failures.

If the defect is one affecting the life safety of passengers, I think the dealer should be allowed only two attempts at repair instead of three before the refund process is triggered.

I strongly urge all Alaskans to call or write their legislators in support of this all-important consumer protection issue, as written or stronger. I can think of few issues this year that will affect public safety and well-being as much as the passage of this bill. Unfortunately, I am afraid that economic interests may be talking louder than the public interest.

Don't let the House Labor and Commerce Committee turn the lemon car bill into a law that is itself a weak lemon.

☐ A teleconference committee hearing on the "lemon law" bill will be held today at 8:15 a.m. Residents may participate by going to the Legislative Information Office at 624 West 6th Avenue.

☐ Mike Miller, D-Juneau, is minority leader in the Alaska House of Representatives and a six-term legislator.

By REP. MIKE MILLER

One of the most important consumer protection bills before the legislature this year would, if passed, force automobile manufacturers to repair or replace "lemons" sold to Alaskan car purchasers.

This legislation is literally a matter of life and death. One Kenai Peninsula resident lost family members because of defects in a car he purchased as new. This is just one of many actual and potential tragedies on our roads due to defective automobiles — vehicles supposedly brand new and just off the showroom floor.

According to the Consumer Protection Division of the Alaska Attorney General's Office, between 800 and 900 Alaskans purchase defective vehicles each year.

Most of us are car owners, and purchasing a new car is one of the major financial commitments we make. As sponsor of the House version of the "lemon bill," I feel very strongly that automobile manufacturers have a responsibility to those who purchase their cars. Unfortunately, case after case shows that the manufacturers often turn a deaf ear to the owners of the cars that spend most of their time in the shop.

CSSB 286, the Senate version of the lemon bill, was introduced by Sen. Bill Ray and has passed the Senate. The House Labor and Commerce Committee is currently conducting public hearings on this legislation. I strongly encourage citizens to testify in favor of this crucial legislation.

Unfortunately, powerful economic interest groups are currently trying to water the bill down, so that business can go on as usual. That is the reason strong citizen response is so important right now.

The bill passed by the Senate gives strong protection to the purchaser of a defective car, while putting the responsibility on the manufacturer, not the Alaskan dealer. The bill requires the manufacturer to buy back defective vehicles if the defect is not repaired — under the terms of the manaufacturer's own warranty — within a year after purchase. A car is considered a "lemon" if the same defect has been subject to repair three or more times within that year, or if the vehicle has been in the repair shop for a total of 30 or more business days during the year.

If these conditions are not met, the owner of the lemon vehicle then has the right to full refund of the purchase price of the car, including finance charges, less depreciation and any damage done while in the owner's possession.

Among other provisions, the bill requires manufacturers to notify the buyers of their rights under the legislation.

What could be more fair? This is already being done in Massachusetts and California, and there is no reason for Alaska not to protect its citizens in this manner.

Unfortunately, both dealers and manufacturers are attempting to take the teeth out of the bill.

Dealers want the bill amended to change the number of allowed repairs from three to four; to delete finance charges from the reimbursement requirement; and to place responsibility of notifying consumers of their warranty rights with the state, not the manufacturer.

Manufacturers also want the bill weakened. Currently, Alaska is the only state in the nation in which the car owner must pay air freight if parts must be ordered from outside. The bill would close this loophole by requiring the manaufacturer to pay air freight just as they do in the other 49 states. Manufacturers want this section of the bill deleted.

Manufacturers also want to delete the section that requires them to pay back finance charges to the lemon owner. The reason for requiring the repayment of financing interest charges is simple: According to the Attorney General's testimony, 75 percent of all cars purchased in Alaska are financed. Many cars are financed through dealerships and manufacturer's subsidiaries. In fact, General Motors Acceptance Corp. finances 80 percent of all GM cars sold in the state. Dealers make money if a car is financed in this way. They certainly don't want to have to give it back, even if the car they sold is a lemon.

I also have some amendments that I would like to see, because in contrast with the opinions of the dealers and manufacturers, I don't think the bill goes far enough.

I think that purchasers of lemons should also be reimbursed for their out-of-pocket expenses for necessary car rental while their lemon is being repaired, and also for any towing charges resulting from warranted failures.

If the defect is one affecting the life safety of passengers, I think the dealer should be allowed only two attempts at repair instead of three before the refund process triggers.

Your local Legislative Information Office can provide you with a copy of the bill, and with dates and times of upcoming committee hearings, the next one being Wednesday at 8:15 a.m. You can also call the L.I.O. to send a Public Opinion Message to your legislators in support of this all-important consumer protection issue, as written or stronger.

I can think of few issues this year that will affect public safety and wellbeing as much as the passage of this bill.

Unfortunately, I am afraid that economic interests may be talking louder than the public interest.

Don't let the House Labor and Commerce Committee turn the lemon car bill into a law that is itself a weak lemon!

Rep. Mike Miller of Juneau is House Democratic minority leader and a six-term veteran in the state House of Representatives.

Juneau Empire 4/17/84

from Connie Sipe
4/24 - hearing

Deleting finance charges from refund, continued--

Under the "Rule of 78s" which Alaska law says must be used to compute interest on early payment of a retail sales installment loan, here is an example of how a consumer will be penalized for the use of a lemon, if the finance charges are deleted from the bill.

Buyback of a lemon, used 12 out of 13 months:

Original cost of vehicle	$12,000.00
Maximum allowance for consumer use (deduction)	- 1,710.00
Buyback Refund	$10,290.00

If accrued finance charges are dropped from the bill, consumer's true purchase cost (without additional damages) is:

Down Payment	$ 2,000.00
12 payments (of 36)	3,350.04
Loan payoff	8,096.42
Total cost	$13,446.46
Less Buyback Refund	$10,290.00
Consumer's cost to use car 12 months:	$ 3,156.46

PRECEDENT:

Massachusetts, Delaware, and New Jersey specifically include finance charges in the refund. Six or seven more states allow refund of "full purchase price" plus a broad category of collateral charges (interest not specifically included or excluded).

RE: CSSB 286 RELATING TO MOTOR VEHICLE WARRANTIES

THIS MORNING THE COMMITTEE IS AGAIN ADDRESSING COMMITTEE SUBSTITUTE FOR SENATE BILL 286 "RELATING TO MOTOR VEHICLE WARRANTIES. THE SUB-COMMITTEE APPOINTED TO REVIEW THIS LEGISLATION MET LAST THURSDAY. THE MEMBERS OF THAT SUB-COMMITTEE CONSIDERED AMENDMENTS TO THE BILL THAT WERE PROPOSED BY AUTOMOBILE MANUFACTURERS, AUTO DEALERS, CONSUMERS, AND BY OTHER MEMBERS OF THE LEGISLATIVE BODY. A HOUSE LABOR AND COMMERCE COMMITTEE SUBSTITUTE FOR SB 286 WAS ADOPTED BY THE SUB-COMMITTEE AND WILL BE PRESENTED TO THE FULL COMMITTEE THIS MORNING FOR CONSIDERATION. AT THIS TIME I WOULD LIKE ASK REP. FURNACE, WHO CHAIRED THE SUB-COMMITTEE, TO GO OVER THE CHANGES MADE IN THE PROPOSED COMMITTEE SUBSTITUTE.

Analysis
HCSSB 286 (Labor & Commerce)

Revised
5/4/84

The latest version of SB 286, HCSSB 286 (Labor & Commerce), clarifies and defines the legal warranty rights and responsibilities between owners of new motor vehicles and the vehicle manufacturer, when a new vehicle is seriously defective. Subsection (g) of the bill makes the manufacturer's refusal or failure to fulfill its warranty duties an unfair trade practice under AS 45.50.471. AS 45.50.471, which is enforced by the Consumer Protection Section of the Department of Law, already covers warranties and repairs in a more general manner. The specific legal standards of the bill should not cause additional fiscal impact on Consumer Protection because the bill merely gives a better definition and therefore a better enforcement tool in the auto warranty area.

AS 45.50.471 also provides for the vehicle owner's private enforcement lawsuit, so some of the bill's impact will be in the private legal sector.

STATE OF ALASKA

Bill Sheffield, Governor

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3600

February 28, 1984

The Honorable Richard Eliason
Chairman, Senate Labor and
Commerce Committee
Alaska State Senate
Pouch V
Juneau, AK 99811

Re: Committee Substitute for
House Bill 286

Dear Senator Eliason:

My testimony before this Committee this day can be concise and to the point: namely, that on behalf of the consuming public in the State of Alaska, I urge you to now pass out, with "do-pass" recommendations, the Committee Substitute for House Bill 286, known as the "Lemon Law".

I thank the Committee, and especially the Committee Chair, for the significant effort and time which has been spent studying this bill. It is worthy of note how much time this Committee gave to the important task of hearing public testimony, from industry representatives and from consumers all over the state.

In the final draft of this Committee Substitute it is also clear that the Committee has succeeded in its endeavor to refine the concepts of this bill to Alaskan needs; both the needs of our consumers and of our automobile dealers. The Committee has made reasonable accommodation to the interests of the manufacturers, attempting at all times to balance the interests of consumers, dealers and manufacturers. The balance reflected in this bill will further the underlying intent of this bill, to provide a strong new protection to the consumers of our State when they make the second largest financial investment of their lives, the purchase of a new automobile.

Nationwide, forty states are expected to have lemon laws by the end of the 1984 legislative sessions. Alaskans need this bill passed into law now. I would urge the Committee and all members of the Legislature to remember that should this bill be delayed from passage for another year, over 20,000 Alaskan consumers will purchase new vehicles in this state, without the much needed protections offered by the Lemon Law. Therefore, I urge the Committee to pass this bill out, and for each Committee member to voice strong support for its passage on the floor of the Senate.

Sincerely,

Norman C. Gorsuch
Attorney General

#3

Dear Representative Cowdery:

The Motor Vehicle Manufacturers Association would like to advise the House Labor & Commerce Committee that we are in opposition to SB 286. We do not find ourselves opposing the general concept of the "lemon car" provisions in the bill which provides for a mechanism by which the consumer can have a problem with his vehicle remedied in an expeditious manner. We do, however, find ourselves in opposition with sections of the bill which relate to the internal industry relationships between the dealers and manufacturers.

In particular, I am referring to page 3, section (g) which basically centers around the possibility of altering the industry-related Sales and Service Agreement between the manufacturer and dealer. Under this paragraph as written, a dealer would be encouraged to invest in little or no parts inventory and any parts could be ordered VIP air freight as they are needed. Obviously the shipping expense would end up in the new vehicle purchase price in Alaska.

This will not provide for a better "lemon law" statute in Alaska. The manufacturer does have the responsibility and liability under the proposed statute for buying the car back if the four times or 30 days provision were not met for the same nonconforming defect, but having the Legislature dictate in statute the contractual relationships goes far beyond the intent of this type of legislation.

In addition, section (j) on page 4, for all intents and purposes exempts the dealer or repairing agent from any responsibility for repairs under the express warranty. We feel this section either should be deleted, or additional language inserted. The manufacturer would be held totally responsible for the actions of the repairer or dealer. The manufacturer might as well do his own repairing rather than trust an independent franchiser if this language were to be left in the statute. The suggested

language could include, on page 4, line 3, after the word "section:"

> "except with respect to failure by an authorized dealer to properly effect preparation, installation of options or repairs when such preparation, installation of options or repairs would have prevented the occurrence of or cured a nonconformity."

These, along with several other areas, are provisions in the bill with which we have serious concerns. It is our understanding there will be further hearings on this issue and some proposed amendments will be considered from the committee and others. We would like to keep in touch with you and participate in these future hearings in Juneau.

Thank you very much for your consideration and we look forward to working with the Committee on this issue.

Sincerely,

James W. Austin
Public Affairs Manager
Pacific Coast Region

Enclosure: SB 286, dated 2/29/84

cc: Members, House Labor & Commerce Committee

Lemon law: Automakers feel squeezed by Senate plan

By K.C. MOON
Daily News reporter

Legislators agree chances are good that Alaska will have a so-called "lemon law" this year, but some fear the bite of the consumer bill will be compromised before it becomes law.

"Lemon" is slang for a car that would have been better off not built. Attempts at repair are fruitless.

No one — not even the most quality-conscious carmaker — denies such miscarriages occasionally end up in the hands of a not-so-proud owner.

If SB 286 becomes law, auto manufacturers will be forced to give refunds to customers who unwittingly bought a new car gone sour.

Under the bill, a new car is labeled a lemon if it has spent 30 or more business days in the shop for repair of serious defects, or if mechanics are unable to fix the same defect after three tries.

The law would cover only those cars under warranty or less than a year old, whichever period ends first.

Those definitions are part of the bill passed unanimously last month by the Senate, which for months worked to reach a compromise between consumer and auto interests.

Now the bill faces more molding in the House Labor and Commerce Committee.

The prime issue isn't whether a refund should be issued for lemon cars, but how much of a refund.

The Senate decided a lemon buyer should be able to get back the sale price of the car — plus the expense of financing the purchase.

Auto manufacturers, represented by lobbyist Jim Austin of the Motor Vehicle Manufacturers Association, do not feel that would be fair.

"I've never seen a situation where people don't have to pay for the use of money," Austin said. A refund including interest charges would mean a consumer paid nothing to borrow the money to buy a car, he said.

Henry Pratt, lobbyist for the newly formed Alaska Auto Dealers Association, also would like to scratch finance charges from refunds. "When you buy something on credit from Sears and turn it in for a refund, they don't give you back the interest you paid on it."

The consumer protection section of the Attorney General's office, which has vigorously pushed the bill, maintains Alaska's lemon law would be gutless if finance charges were not included in a lemon car refund.

Scotty Dawkins, auto investigator for the office, said, "If interest costs are not refunded, we'd just as soon not have the bill."

He said a consumer who financed the purchase of a $12,000 lemon car would lose more than $3,000 if his interest payment were not refunded. "How's that consumer supposed to turn around and buy another car to replace the lemon?" he asked.

Dawkins also said about 80 percent of new cars sold in Alaska are financed by automakers' own financing programs. "If the auto interests have their way, they would still make money by selling lemons to people."

Rep. Mike Miller, D-Juneau, the sponsor of the origional lemon-law bill, said deletion of interest for the price refunded would be "debilitating."

Sen. Richard Eliason, whose Senate Labor and Commerce Committee worked much of the compromises into the bill, doubts the Senate would accept a law without privisions for a full refund. "We wanted a strong consumer advocacy bill."

Rep. John Cowdery, chairman of the House Labor and Commerce Committee which now is considering the bill, said he has no philosophical objection to returning interest.

But he added: "If we decide to return (interest), I can forsee a tie-up as to how much interest we should refund. And I want this bill to make it through."

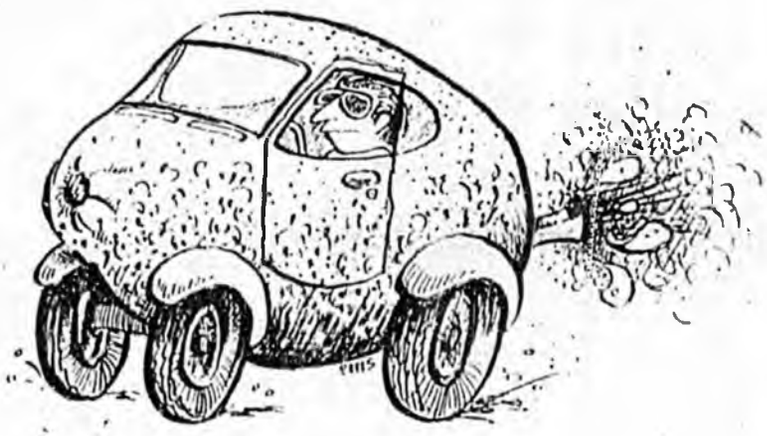
Manufacturers and dealers are at odds over a provision that would require automakers to air-freight parts to Alaska dealers for warranty-related repairs.

It was Alaska dealers who asked legislators to add the air-freight requirement. They say without the provision they would have little leverage to convince automakers to expedite shipment of parts.

Austin said, "This is something to be worked out between us and the dealers. It doesn't have to involve the legislature.

"We'd have to air-freight the parts anyway," he said. "The 30-day repair clock is running against us, not the dealers. We're the ones who have to sign the refund check."

Dawkins said the air-freight requirement should stay. "Most manufacturers air-freight parts to every other state in the union, including Hawaii," he said. "I can see no reason Alaskans shouldn't get the same treatment."



Another part of the bill under dispute is the three repair-attempt cutoff for defining a lemon. Auto interests maintain that should be increased to four attempts.

Auto interests also oppose a requirement that they notify car buyers of rights under the lemon law.

Cowdery's committee now is faced with the challenge of completing a compromise agreeable to three interests — that of consumers, dealers and automakers.

"I'd expect we'll pass it out of committee within 10 days," he said. "But I want to make sure it's in a form where it won't get tied up on down the line."

If Cowdery's committee does pass the bill out, it would go to House Rules Committee for scheduling a vote on the House floor.

If the House amends the bill, the law would be considered by a joint conference committee of House and Senate members before going to the governor's desk.

Perhaps the last public hearing on the bill will be held Wednesday morning by House Labor and Commerce.

Automakers, dealers disagree on 'lemon law' shipping provision

By K.C. MOON
Daily News reporter

4/11/84

Alaska auto dealers are at odds with carmakers over who should pay for fast shipping of parts needed for warranty repair work.

The conflict surfaced Tuesday during a statewide teleconference on a proposed "lemon law." The law would require auto manufacturers to buy back new cars that defy repair.

The bill is the subject of a series of hearings by the House Labor and Commerce Committee. A provision of it would force automakers to pay air freight on parts dealers need to fix a car under warranty.

Jim Austin, lobbyist for the Motor Vehicle Manufacturers Association, asked the committee to delete the provision. He said the air freight issue should be worked out between the dealers and manufacturers — not by the legislature.

Alaska dealers want the provision in the bill. Without it, they say, dealers or their customers would be forced to pay the extra costs of air freight, or wait two to six weeks for land or sea shipment.

Under the bill, a new car that spends six weeks of its first year in the shop is a "lemon" and must be bought back by the manufacturer.

The bill unanimously passed the Senate last month.

The arguments by auto interests took up most of the two-hour committee hearing. Only one consumer group testified before the hearing ended. It will continue today.

One Anchorage car dealer said that without the air freight requirement, automakers would not have to expedite the shipment of parts. If a lack of parts lengthened repair time, it could cause the buy-back provision to be invoked.

If forced to buy back a lemon, manufacturers and dealers said, they should not have to refund interest paid by consumers who borrowed money to make the purchase. They said they should only have to repay the sale price.

Consumer interests, led by the consumer protection section of the attorney general's office, disagreed. They say interest charges are a big portion of car payments in the first year and should be included in the refund.

Re: Committee Substitute for
House Bill 286

Dear Senator Eliason:

My testimony before this Committee this day can be concise and to the point: namely, that on behalf of the consuming public in the State of Alaska, I urge you to now pass out, with "do-pass" recommendations, the Committee Substitute for House Bill 286, known as the "Lemon Law".

I thank the Committee, and especially the Committee Chair, for the significant effort and time which has been spent studying this bill. It is worthy of note how much time this Committee gave to the important task of hearing public testimony, from industry representatives and from consumers all over the state.

In the final draft of this Committee Substitute it is also clear that the Committee has succeeded in its endeavor to refine the concepts of this bill to Alaskan needs; both the needs of our consumers and of our automobile dealers. The Committee has made reasonable accommodation to the interests of the manufacturers, attempting at all times to balance the interests of consumers, dealers and manufacturers. The balance reflected in thi bill will further the underlying intent of this bill, tc provide a strong new protection to the consumers of our State when they make the second largest financial investment of their lives, the purchase of a new automobile.

Nationwide, forty states are expected to have lemon laws by the end of the 1984 legislative sessions. Alaskans need this bill passed into law now. I would urge the Committee and all members of the Legislature to remember that should this bill be delayed from passage for another year, over 20,000 Alaskan consumers will purchase new vehicles in this state, without the much needed protections offered by the Lemon Law. Therefore, I urge the Committee to pass this bill out, and for each Committee member to voice strong support for its passage on the floor of the Senate.

Sincerely,

Norman C. Gorsuch
Attorney General

Dear John:

#2

The Fairbanks dealers of the Alaska Automobile Dealers Association recently met and considered Senate Bill No. 286, as passed through the Labor and Commerce Committee and adopted by the entire Senate (The Lemon Law).

Although we had opportunity to give some input into the Committee we still have changes we would like made before it passes the House. Since you are on the Labor and Commerce Committee, I have been deligated to explain to you what changes we would like to see and our supporting rationale on an item by item basis. I hope to be able to do so in such a way that it's obvious we are not trying to water down the bill but rather to make it even better.

In order to show you exactly what we suggest, I have prepared a draft, enclosed with this letter, and also have enclosed a marked copy of the Senate Bill showing those areas we have addressed.

We specifically object to any statement or inference which might mislead anyone into believing that dealerships are "agents" of manufacturers or distributors. We absolutely are not "agents" of the manufacturer or distributor. We have sales and service agreements (contracts) with manufacturers or distributors which specifically outline our respective relationships. I have enclosed a copy of page 14 of the Ford Sales and Service Agreement under which this dealership operates. Notice that paragraph 14 specifically addresses this concern and absolutely supports our arguement. Therefore, we feel it necessary to make a distinct difference between "dealers" and "repairing agents", which will be evident in our suggested changes.

With that out of the way, let me address each concern on an item by item basis.

Page 2, line 1...add "<u>dealer or</u>" just prior to "repairing agent". This request results from our earlier discussion.

Page 2, lines 11 & 12...remove (30 days or more) and add "within 30 days". We feel there should be a time certain under which this process should begin. In it's present form, the customer could wait for months or even years before claiming the refund. To leave it open-ended would be unfair to the manufacturer.

Page 2, lines 13, 14. 15 & 16...Delete this entire section. We can not find any other industry, in any other state, which is required to give the purchasers of it's merchandise a notice that explains how that buyer can bring legal action against it.

Page 2, line 23...add "dealer or" just prior to "repairing agent".

Page 2, line 25...add "dealer or" just prior to "repairing agent".

Page 3, line 1...delete (three) and substitute "four". This is the number used in ALL other similar legislation nation-wide.

Page 3, line 25...delete (or repairing agent) and add, in it's place, "in the state". We do not believe "repairing agents" should be in the sales business and we would just as soon see the vehicle leave the state.

Page 4, lines 4 & 5...delete (sold in the state shall maintain repair facilities or authorize repairing agents) and replace it with "who authorizes the sale of their motor vehicles in the state shall maintain authorized dealership facilities". First, we don't feel any manufacturer or distributor should be required by law to supply repair facilities in the state, either through dealerships or repairing agents, unless their vehicles are authorized for sale in the state. Secondly, we don't want legislation which would infer that any manufacturer or distributor was either required by or allowed by state law to step around the normal dealer/manufacturer relationship and maintain their own repair facilities in Alaska, either in lieu of or in addition to those which we are required to maintain in order to be authorized dealers. We feel the wording presently in the Senate version would open that door.

Page 4, line 28...Insert "or entity" between "person" and "who". Most of us operate as corporations and would feel

more comfortable with this insertion.

Page 5, line 1...Insert "warranty" just prior to "repair". This is for obvious reasons since this is a bill referencing just that, warranty repair.

Page 5, line 3...Insert "or entity" between "person" and "who". Same reasoning as above.

Page 5, line 12...Delete (and accrued finance charges;). The owner has enjoyed the use of the vehicle for a specific time, chose to finance the vehicle rather than pay in full for it at the time of purchase, has probably written these charges off on his income taxes and, for these and other sound reasons, we feel would not fairly expect to have them refunded.

Page 5, line 13...Insert "or entity" between "person" and "who".

Page 6, line 3...Substitute "five" for (seven). We believe a seven year straight line depreciation unfairly burdens the manufacturer. Standard depreciation within the industry for the first year of ownership is 2.5% per month. We feel five years on a straight line basis is more than fair to the owner and urge you to adopt this shorter period of time.

Page 6, line 8...Delete (includes a dealer or other person) and substitute "means a person or entity, other than a dealer,". This change in definition helps accomplish the differentiation between dealers and repairing agents and is consistent with the contractual relationships we have with our manufacturers or distributors.

Additionally, we have, in our enclosed draft, re-arranged the definition section in a more logical and sequential order. This was done simply for easier comparison in our local discussions but may be something which you may wish to consider.

The one portion we do NOT want changed in any manner is section (g) on page 3. We definitely believe this section alone will do much to mitigate current problems experienced by Fairbanks dealerships in administering warranty repairs and will avoid many future problems. This section will do the most for the owner by keeping us dealers from being caught between the manufacturers or distributors and the owners.

With these changes, we feel we can whole-heartedly support this bill as a dealer body.

We look foreward to your positive actions regarding our requests and carrying this legislation into action. The Fairbanks dealer body is willing to discuss any portion of this legislation with you at any time and would like to do so if you are in Fairbanks any time in the near future.

I am sending an identical letter to Niilo Koponen since he is on the committee with you.

Thank you for your time and consideration.

Sincerely,

SEEKINS FORD-LINCOLN-MERCURY, INC.

Dear John,

Regarding our phone conversation of April 2 regarding Senate Bill 286 offered on February 29, the following are requested changes that the Dealer's Association would like to see. I feel confident that with these changes the Association would give you their full support for the passage of the bill.

#4

* Page 1 line 12 should read "it and the owner of the vehicle reports in writing the defect or condition to the....."

* Page 2 should have lines 13, 14, 15 & 16 deleted in their entirety.

* Page 3 line 1 should read "(1) the same nonconformity has been subject to repair four....."

* Page 4 line 23 should read "of (b) of this section concerning refund or (1) of this section..."

* Page 5 line 11 should read "fees, transportation fees, dealer preparation, and dealer installed options." PLEASE NOTE WE DELETED THE PHRASE "and accrued finance charges;"

* Page 5 line 20 we would like to change to read "tractor, farm vehicle, motor home or a vehicle designed....." (John, we're open on this one.)

We have indicated any word or phrase changes by underlining for clarification. John, if you need any additional information or clarification I would be pleased to discuss it with you personally, or you may wish to speak with Doug Hulen or Henry Pratt. I'm sure Henry will be in touch with you in the near future.

Appreciate any assistance you may provide.

Sincerely,

Section Analysis of CSSB 286 (2/23/84 version)

Subsection (a)

If a new vehicle does not conform to an express warranty, the manufacturer must make the necessary repairs. No time limitation is mentioned in this section. It merely requires the manufacturers to honor their own express warranty for whatever term they give it (1 to 5 years, or by mileage limits).

Subsection (b)

If the manufacturer is unable to repair a nonconformity vehicle within one year, the manufacturer must accept the return of the car and shall refund the full purchase price to the consumer.

Subsection (c)

This section clarifies exactly how and when a consumer must give notice to the manufacturer that the consumer believes he or she has a lemon car for which a refund is requested.

Subsection (d)

This section, following the lemon laws in the states of Massachusetts and California, requires the manufacturer to deliver some type of explanation to all new owners of vehicles about their rights under the lemon law.

Subsection (e)

This section states that an owner may not receive a refund if the manufacturer can show that the nonconformity does not impair the use or value of the vehicle or that the nonconformity is the result of alteration or abuse by the owner or a person other than the repairing agent.

Subsection (f)

A vehicle is considered a "lemon" if the same nonconformity has been subject to repair ~~four~~ or more times within a one-year period or if the vehicle has been in the repair shop for a total of 30 or more business days during the one-year period.

Subsection (g)

A manufacturer must provide its dealers with any part necessary to make repairs of a nonconformity covered under the warranty as soon as reasonably possible without additional charge for freight or handling.

Subsection (h)

Under this subsection, a manufacturer who fails to refund the purchase price of a "lemon" is "presumed to have committed" an unfair trade practice. "Presumed to have committed" sets out a legal presumption which the manufacturer can then rebut by showing the courts that the manufacturer had some valid reason (when applicable).

Subsection (i)

This subsection states that when a "lemon" is resold, a full disclosure of the reason for the return must be made to the prospective buyer.

Subsection (j)

This bill does not limit the rights of a vehicle owner as stated in other provisions of law.

Subsection (k)

This subsection requires manufacturers to retain repair facilities within the state, able to service the vehicles they sell.

Subsection (l)

Once a "lemon" car has been returned to the manufacturer for a refund, the manufacturer must compensate the owner for all reasonable costs which the owner incurred in shipping the vehicle back and forth from the nearest authorized repair facility for warranty service.

Subsection (m)

This subsection allows the manufacturer to use any arbitration or mediation process, even if the manufacturer has not set up in advance a Magnuson-Moss type (16.C.F.R. 703) informal dispute settlement procedure. In all cases, the attorney general must approve the process and the arbitration decision must be binding on the manufacturer but not on the owner. This subsection insures that as many of these lemon law disputes as possible will stay out of the court system, and that both consumer and manufacturer will be encouraged to use informal settlement processes.

Subsection (n)

The definition section outlines the specific meanings of terms used in this legislation. Note should be taken of the following definitions:

Subsection (n) (4) - "full purchase price" includes all fees paid at the time of the sale, including finance charges.

Subsection (n) (6) - "motor vehicle" includes land vehicles with four wheels "normally" used for personal, family or household purposes.

Subsection (n) (9) - "resonable allowance" is set at a sum which will include no more than straight-line depreciation figured over seven years, plus, when applicable, an amount for depreciation in value of the vehicle caused by neglect or abuse by the owner.

January 31, 1984

The Honorable Dick Eliason
Chair, Senate Labor and Commerce
Committee
Alaska State Senate
Pouch V
Juneau, AK 99811

Re: Committee Substitute for
SB 286 "Lemon Law"

Dear Senator Eliason:

The Office of the Attorney General takes the position that it supports and urges the Legislature to adopt the proposed "Lemon Law" before it.

My decision to support this bill is based on the realities of the automotive industry. Today a consumer's purchase of an automobile is the second largest purchase, next to a home, made throughout the consumer's lifetime. In Alaska, where consumers pay the highest retail prices for automobiles of anywhere in the United States, new, basic automobile prices start at $7,000, and quickly mount to $12,000 or $15,000. Consumers reasonably expect to be able to use and enjoy these automobiles for five to ten years after their purchase, and if sold earlier, to be able to recoup a reasonable portion of their purchase price upon resale.

The Lemon Law before you merely addresses how the manufacturers are required to perform upon the express warranties that they themselves offer to consumers as part of the inducement to buy their vehicles. The mass-marketing of automobiles puts heavy emphasis on warranties. We can estimate that the cost of a new car warranty, which is rolled into the sale price of a vehicle, is as much as $500 to $1,000 on every new car.

Across the nation, numerous states have recognized the need to address this problem of consumer warranties. Within a year after the first lemon laws were passed in Connecticut and California, 16 states had passed similar statutes. By the end of this legislative session there may be 25 states with lemon laws. This indicates national recognition of a problem, namely, con-

sumers' inability to obtain adequate redress under the warranties that they purchase as part of their vehicles, and a need to restore consumer confidence and manufacturer responsiveness in the new car market.

I support the "lemon law," not only for these general reasons, but as a fitting answer to problems in the Alaskan new car market. For many Alaskans, as soon as they take a new vehicle, wherever purchased, more than a few miles from the four major cities, they have rendered the warranty portion of their vehicle purchase useless. Very few Alaskans living outside major cities ever receive any benefit for the warranties that they purchase.

Even those Alaskans who can get their ailing vehicle to a manufacturer's authorized repair facility (dealership) are often met with inordinate delays due to the nonavailability of parts, the shortage of repair personnel or facilities, and at times, additional expenses incurred through the need to supply their own alternative transportation while their vehicle is being repaired or parts are being shipped.

Alaskans have more reason to complain against the manufacturers than anyone else in the country, since it is apparent through the experience of the staff in my consumer protection office, that the major manufacturers consistently discriminate against Alaskan consumers and dealers. They provide less backup to our dealers and service to our customers on their warranties than to residents of other states. This discriminatory treatment is especially grievous in light of the huge volume of sales made by these manufacturers in our state. This type of discrimination by manufacturers against Alaskans can be seen in these facts:

A. Despite the fact that many of the highest volume-selling dealerships in the country are in Alaska, until a few months ago not a single manufacturer authorized even one service representative employee to be stationed in the state of Alaska, nor travel here more than once every six to eight weeks in order for a service representative to review consumer warranty disputes and to authorize major warranty repairs. (Without this authorization dealers cannot satisfy their own customers, or else run the risk of not being compensated for their warranty work.) These same manufacturers have numerous employees in the state to deal with the financing and selling of these vehicles but none to deal with the warranties.

B. Several of the major manufacturers are willing to airfreight, at their own expense, necessary parts for warranty repairs to 49 of the 50 states including Hawaii, when the dealer does not have a part readily available. The one state where the manufacturer insists that the consumer must pay to have a part airfreighted if he/she does not wish to wait for surface freight is Alaska.

C. Despite the fact that many of the vehicles sold to Alaskans are used in remote parts of the state where the residents do not have access to the few dealerships, and despite the fact that the manufacturers have programs on their corporate books for designating independent repair shops as authorized repair facilities, as they do all over Europe, no manufacturer has ever authorized a shop anywhere in Alaska to be designated as an authorized repair facility for those consumers who cannot reach a dealership.

D. Many of our dealerships have often complained that the manufacturer does not adequately reimburse the dealers for their labor on doing warranty work, refusing to take into account the higher cost of doing business in Alaska and therefore a need for a higher reimbursement level.

E. In many other parts of the country manufacturers have set up "Autolines" or other types of consumer complaint handling programs, but despite the fact that several major manufacturers state in their warranty booklets that such programs are available to Alaskans, to this date not a single manufacturer has set up a consumer complaint handling program in the state of Alaska.

I wish to emphasize that I understand that our Alaskan dealers are often caught in the middle between their unhappy consumers and their manufacturers. We know that the Alaskan dealers do not always sell all the cars that they are being asked to service, and we also understand that dealers do not wish to jeopardize their relationship with the manufacturer. However, we know that every franchise dealership takes on both the benefits inherent therein and the burdens, such as the requirement to honor the manufacturer's national warranties for all vehicles which come to their facility. In addition, we know that if prodding a recalcitrant manufacturer to fix a problem car is difficult for the dealer, that difficulty is magnified ten-fold for the consumer. This bill should help our local dealers, not hurt them, as it should help them to better service and satisfy their own customers.

It is my understanding that the National Automobile Manufacturers Association does not oppose the passage of a lemon law in our state and in other states. Many consumers appeared last year at public teleconferences to testify to the need for a lemon law. Alaskan consumers continue to have numerous problems with manufacturers. For example, since late December when a Federal Trade Commission consent judgment with General Motors over several major defects was settled, over 350 Alaskan consumers have contacted my consumer protection office to say that they have suffered economic harm due to one of these defects and would like to seek redress.

The concept of a lemon law is one my office supports because whether or not we have lemon law statutes, consumers and their attorneys are bringing "lemon" lawsuits against the manufacturers over what they allege to be defective autos. With the lemon law in place, the manufacturers, the consumers, and the courts have clear standards to apply as to what is a "lemon", what is a reasonable number of attempts or time period for repair of a vehicle, how a consumer should be compensated, and what type of notice the consumer should give the manufacturer before demanding a refund or replacement. A lemon law clearly places the obligation to provide a refund or replacement upon the manufacturer, but only based upon the express warranties written by the manufacturer itself.

A lemon law actually saves the public time and money, as consumers are required to go to informal mediation and arbitration procedures before they run into court. Statistics around the country show that 95 to 98 percent of the cases get settled at these levels and will never reach the courts. The clear guidelines of the lemon law provide a backdrop for the settlement and arbitration proceedings. Without these guidelines, consumer willingness to settle in mediation or arbitration would be greatly diminished, as the consumer and manufacturer would both jockey for the "best" position.

Eighteen other states have enacted a lemon law. It is clear that Alaskans pay more than any other residents in the United States for their new automobiles, receive in many instances less value from their warranties, and are probably most deserving of a well thought out lemon law establishing clearly their rights and responsibilities vis-a-vis the manufacturer.

Therefore I urge this committee and the rest of the Legislature to duly pass out the lemon law.

Sincerely,

Norman C. Gorsuch
Attorney General

CONSUMER PROTECTION SECTION

February 20, 1984

Senator Richard I. Eliason
Chairman, Senate Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Eliason:

Re: C.S. for Senate Bill 286, incorporating suggestions of Alaska Automobile Dealers Association

The new draft of a proposed committee substitute presently before you is the result of the efforts of my staff and the representative of the Alaska Automobile Dealers Association to refine the bill so as to better accommodate the needs of the Alaskan automobile dealers who will, of necessity, be affected by this bill's passage.

Also, with apologies to the committee, and recognizing all of the prior hard labor that has gone into this bill, as these new amendments were added to the bill, in order to maintain clarity, we took the liberty of streamlining the language somewhat, most of which was done by removing some clauses which were repeated throughout the bill, and incorporating them instead into the definitions section. Therefore, I would urge that anyone looking at this new committee substitute first read the definitions.

I.
DEFINITIONS

I would also start my analysis of this draft with a discussion of the definitions. There are now twelve.

First of all, we have included a definition of "dealer" to include only those persons or legal entities holding franchises or retail sale authorization from the manufacturers.

"Distributor" and "manufacturer" have been carefully defined to make it clear that the manufacturer runs the factory producing the cars, and the distributor is someone in the distribution

chain who has the manufacturer's authorization to make wholesale sales of the vehicles.

"Express warranty" has been defined to mean the express written warranty, so that this term did not have to be included throughout the bill.

(Changed! IMPORTANT) "Full purchase price" has been defined to include most of the collateral charges taking place at the time of the sale, including any already accrued finance charges. (The committee members should note: both the Automobile Dealers Association and the manufacturers' representatives oppose the inclusion of finance charges, but it was my understanding that the committee wanted finance charges included.)

"Motor vehicle" has been limited to land vehicles, that are purchased primarily for personal-type use. Also, the definition excludes several categories of vehicles normally thought of as off-road or farm vehicles.

An important new definition is of "nonconformity." "Nonconformity" is a defect or condition which substantially impairs the use or market value of a vehicle and we moved this language from page 1,), into the definition section, so as to streamline the many places in the bill where this term occurs. The intent of nonconformity has not changed from prior bill drafts, although the definition more clearly states that the type of nonconformity covered by the bill is only one caused by a manufacturer, distributor, authorized dealer, or repairing agent, and not any nonconformity caused either by the consumer or some third party or circumstance. This was an important change in the mind of the dealers' association which I thought could be accommodated without any harm to the consumer interests.

The definitions of "owner," "substantially impairs the market value," and "substantially impairs the use" have not been changed since previous drafts.

However, debate is still going on over "reasonable allowance." "Reasonable allowance" is to be the amount deducted from a return or replacement of a vehicle for the owner's use. The dealers felt quite strongly that we should delete the language saying that there would be no deduction for the owner's use after the very first report of any nonconformity to the manufacturer or dealer. I agreed to this, but wish the committee to be aware of it, and to alter this decision if it is your desire. Also, the committee should make a final policy choice on how "reasonable allowance" would be calculated. The Automobile Dealers

Association very strongly wishes it to be tied to the IRS method of depreciation, which at this time is a 3-year depreciation. Their less-favored alternative is a 5-year straight line depreciation. On the other hand, our office's auto investigator, Scotty Dawkins, tells me that the average age of vehicles on the road in America today is 6.9 years, from which he and I both derived the idea that from a practical use standpoint, perhaps as opposed to a market value concept, the life expectancy of a vehicle should be around seven years, and that should be the time period for the depreciation deduction. (If a consumer drives a vehicle for 11 months out of the first 12 of the warranty, but at the end of that time still has unrepaired nonconformities, the consumer should not lose more than approximately 1/7th of the purchase price of the vehicle when trading it in, certainly not as much as 20% [1/5th] or even 33 1/3% [1/3rd]). However, the manufacturers' and dealers' representatives disagree strongly with the seven year method.

A new definition the committee has not previously seen is that of "repairing agent." A repairing agent is either an authorized franchise dealer or some other person who has been specifically authorized to do warranty repair by a manufacturer or distributor. The attorney for the dealers' association and myself felt that this definition was necessary to bring within the act those independent repair facilities who are sometimes authorized by a manufacturer to do warranty repairs, and who could cause problems in the chain of events causing a "lemon" vehicle. In addition, if the sections of the bill requiring the manufacturers to expeditiously ship warranty parts to Alaskan dealers passes, a repairing agent authorized by the manufacturer should also be able to get the parts quickly without extra cost to the repairing shop or the consumer. "Repairing agent" is definition 10 on page 6 of this draft.

II.
SUBSTANTIVE PROVISIONS OF THE BILL

The analysis returns to the beginning of the bill. While working on the bill, it seemed that the first two sections of the bill, (a) and (b), contained some fairly confusing language.

Basically, paragraph (a) merely requires manufacturers to live up to their warranties by attempting to repair vehicles. Therefore, at page 1, line 12, it was important that we clarify that in order to receive warranty repair service, the consumer needs merely to "report" the nonconformity either to the manufacturer or to an authorized dealer. This is not the section where a

procedure for written formal notice is necessary, but oral notice or taking the car to the dealer's shop should be sufficient notice. Also, at line 15, the word "original" has been inserted to make it clear that the one-year period covered by this bill starts with delivery to the first owner, even though a subsequent owner might file a claim under the bill.

Subsection (b), starting at page 1, line 18, is the section of the bill which requires a refund or replacement for nonconforming vehicles. You will note that wherever the word "defective" appeared, it has been replaced with "nonconforming." This was considered important by the dealers' association and, I believe, is to the benefit of consumers. (In product liability law, it is very difficult to prove that a vehicle is "defective," and therefore it is better to stay within the language of the statute and just talk about "nonconforming" vehicles.)

Also, you will notice in subsection (b) at line 21, that instead of setting out the substantive definition of nonconformity, the definition is incorporated by reference. This greatly helped the flow of the language of the rest of subsection (b).

At page 1, line 24, you will note that the words "full purchase price" are no longer followed by "including all collateral charges." This is because the term "full purchase price" has been defined in (m) so as to include most collateral charges incident to the purchase. In line 26 again, the word "original" is inserted before "owner" to make it clear that the allowance for use runs from and covers all use from when the vehicle was delivered.

The rest of the changes on page 1, lines 26 through 29, and the top of page 2, lines 1 and 2, were made at the suggestion of the dealers' association to properly cover the interests of lienholders on vehicles. Lines 26 to 28 are not new, but page 1, line 29, through page 2, line 2, now mandate that in the case of a refund, the manufacturer would first extinguish the interests of all lienholders of record, and only then pay the remaining amount to the owner. A consumer could of course go out and arrange for a new loan to finance the purchase of a new car, so that the consumer is not hurt by this language.

Page 2, lines 3 through 20. This is a new subsection (c) which significantly modifies the bill's operation, and deserves the committee's close attention. Many debates have gone on in committee, also between various persons discussing the bill with me, as to exactly how, when, and where consumers should have to give written notice to the manufacturer about a "lemon" car.

Finally, I wrote this new subsection (c), which the dealers' association representative approved, to set out exactly how the consumer has to give notice. This may seem more formalistic than the general reference to "report" made in the previous bill drafts, but in fact it would probably create less work for lawyers and courts to have the notice provisions clearly spelled out. (Also remember that should a consumer somehow fail to make the notice required by this bill, they still have other legal causes of action against the manufacturer for a lemon car, just not the provisions of this bill.)

New subsection (c) states that before consumers can claim a refund or replacement, they must mail to both the manufacturer and to the repairing dealer, within 60 days from when their express warranty or the one-year period from delivery terminates, a written notice. The notice must contain three pieces of information: (1) the fact that the vehicle has nonconformities which are reasonably described, (2) the fact that either the manufacturer, distributor, dealer or repairing agent have made a reasonable number of attempts to conform the vehicle, as those terms are used already in the bill, and (3) that the owner will, on the 30th day after the mailing of the written notice, demand a refund or replacement of the vehicle.

(This new section could be inferred to give the manufacturer and dealer yet another 30 days to satisfy the consumer by making one last attempt to fix the vehicle. If the consumer is still willing to work with the manufacturer and dealer, this is good. If, however, the relationship has become so strained that the consumer sends this notice and does not wish to allow any more repair, this is another outcome that the manufacturers will have to work to avoid in how they run their warranty system. Under this section, the manufacturer has still had the 30 business days during the first year to make repairs, or the four attempts to cure nonconformities per subsection (f).)

Subsection (d) is also a new section which goes along with the formalistic notice requirements of subsection (c). Basically (d) requires the manufacturer to deliver to every original owner a brochure explaining the Alaska lemon law, and how a consumer can use it.

Subsection (e) is the old subsection (c) from the previous draft. The language has been changed slightly at page 2, line 21 so that instead of saying that the manufacturer has a "affirmative defense" to a consumer's claim, it now reads that the consumer will not be entitled to a claim for refund or replacement if, as

set out at line 23, the manufacturer or the distributor "shows" that the nonconformity complained of does not impair use nor market value or is the result of a consumer's abuse or neglect. The dealers' representative and I agree that this new revision better sets out for all parties involved, including arbitrators and the courts, the fact that it is the manufacturer's duty to counteract a consumer's claim for refund by bringing up these two defenses.

Starting at page 2, line 30, subsection (f) is the old subsection (d), which sets out what is going to be the legal presumption about a reasonable number of attempts to repair a vehicle under a warranty. This language has stayed basically the same, with some clarifying amendments and the addition of words such as "original" owner. On page 3, starting at lines 2 through lines 13, we broke the two conditions for a lemon into subparagraphs for clarity of reading.

The committee should note in subparagraph (f)(2), page 3, lines 7 to 13, that we deleted the language previously at page 3, lines 7 through 9, which excluded from the one year period any time during which repair services were not available to the owner for reasons not the responsibility of the owner. (The dealers' representative and I discussed this at great length, and decided that if the intent of the deleted lines was to extend the consumer's warranty by every day that the car was in the shop, that there was really no need to do this in the case of a lemon car, because the consumer was going to be demanding a refund or replacement. I agreed that this term did not really seem necessary in light of the other consumer remedies in this bill.)

Page 3, line 14, subsection (g), is a new section, inserted specifically to meet the concerns of Alaskan dealers. This new subsection requires manufacturers to ship needed warranty repair parts in as quick a manner as reasonably possible at no additional freight charge, if the Alaskan dealer does not have a part in inventory. (This section only covers serious nonconformities as defined in the statute, so it would not require a manufacturer to air freight every brake light or windshield wiper, but only parts necessary to cure substantial nonconformities.) I believe that this would be a great benefit to Alaska consumers and dealers, and I urge the committee to adopt this language. However, I am sure that the manufacturers' representatives may have some disagreement with this stance.

Page 3, lines 21 through 24, subsection (h), has stayed basically the same, and basically makes it an unfair trade practice to refuse to replace or refund the motor vehicle when the manufacturer is required to do so. An addition is to make it also an unfair trade practice for a manufacturer to refuse to reimburse a "lemon" owner's costs for shipping a vehicle for repair or to ship warranty parts quickly to the dealer at no cost.

Page 3, lines 25 through 29, subsection (i), has not been significantly changed except for renumbering, and as the committee desired, requires full disclosure before a returned "lemon" vehicle is resold. However, the subsection now incorporates the dealers' association suggestion that this disclosure requirement only be imposed upon the manufacturer, distributor, or actual repairing dealer so that a innocent used car dealer or private consumer not be required to make this disclosure.

Page 3, line 29, through page 4, lines 1-5. The first part of this subsection (j) was already in the bill, and basically says that the provisions of the lemon law do not limit other rights or remedies available to the consumer. However, at the top of page 4, three new lines have been added to state that the lemon law does not create a new type of legal cause of action against a dealer or repairing agent, who either sells or attempts to repair a nonconforming vehicle. (This was a concern brought up by the dealer's association, and it is one which I believe can be accommodated without significant harm to the consumer. It never appeared to be the intent of the original sponsors of this bill, nor of this committee, to make the lemon law penalties directly apply to dealers. Although we all acknowledge that the dealers will be affected by the bill and their manner of doing warranty work may be altered, this bill was not meant to give consumers new legal rights against the dealer. The dealer is, of course, subject to being sued or complained about under any other existing statutes or common law theories, but just not under the lemon law.)

Page 4, lines 6 through 19, subsection (k), is a reworking of the section regarding repair facility requirements within the state. The committee should note at lines 9 through 13 that the concept of "population centers" has been reinserted in the bill. This section is meant to strongly encourage manufacturers to set up additional repair facilities or to select, train and compensate authorized repair facilities. I believe that the manufacturers' association will have a great deal of concern about this section, and the committee must make the choice.

In the same subsection (k), page 4, lines 13 through 19, we added a section which the committee saw at its last hearing, requiring the manufacturer who actually buys back a "lemon" vehicle to also pay for any shipping costs which the consumer had already incurred for getting the vehicle back and forth to a dealer for warranty work. I urge the committee to adopt this language, since this really makes a fair offset against the reasonable deduction for the consumer's use. It allows consumers who live in Sitka or Bethel, if they initially bear the cost of shipping their motor vehicle back to a dealer for repair, to recover those costs if and when the vehicle is found to be a "lemon." This section would not give all consumers back their shipping costs when, for example, they shipped a vehicle back to the dealership and it was repaired and the vehicle did not become a "lemon." Only when the car is a "lemon" and it is going to be bought back or replaced do these shipping charges get mandatorily added in.

Page 4, line 20, subsection (l) is about the informal dispute settlement procedures. You will note the addition of some new language at lines 23 through 30. The thrust of this amendment was suggested by the dealer's association, so as to allow maximum flexibility. In case the manufacturer does not set-up, in advance, a strict arbitration program under the federal Magnuson-Moss Act (16 C.F.R. 703), but is willing to participate in some other arbitration or mediation process, such as with a local conflict resolution center, or a local better business bureau, as long as that arbitration/mediation process is procedurally fair, and has been approved by the attorney general, there is no reason to limit the manufacturer to only using 16 C.F.R. 703 type of procedures. It is good policy to encourage settlement outside the courts and I believe this is a good change.

However, since subsection (l) requires consumers to go through this arbitration/mediation process before litigating, I wanted to make sure that manufacturers could not stall the consumer by negotiating for months and then suddenly offering to go to arbitration, delaying the consumer's right to go on to court. Therefore, I have inserted a requirement that once the owner sends the 30-day notice that they are going to claim a refund or replacement, if the manufacturer then offers to the consumer in writing to participate in an arbitration/mediation process which has been approved by the attorney general, then the consumer is bound to try this method of informal settlement before getting a refund or replacement or getting their shipping costs replaced as paid in subsection (k).

One more major change to the bill, which is significant by its absence is the deletion of the former subsection (j), which had set out the time limits of when consumers could file a court cause of action for a failure to refund or replace by a manufacturer. The dealers' representative and I had significant discussion over this point, and decided that since subsection (h) of this present draft makes the failure to refund or replace an unfair trade practice, that the statute of limitations in that other statute is sufficient. As the draft stands before the committee today, consumers have up to the length of their express warranty or one year from delivery, whichever comes first, plus 60 days, to give written notice to the manufacturer that they intend to file a claim within 30 days. Then at 30 days (this is now up to as much as one year and three months), the consumer can demand the refund or replacement. If the manufacturer offers to go to an approved mediation or arbitration process, the consumer has to go through that process. If the arbitrators award a refund or replacement, and then the manufacturer refuses to follow the award, the manufacturer would at that time be committing an unfair trade practice, and a consumer would have two years to file a lawsuit under the private cause of action section of the Unfair Trade Practices Act, AS 45.50.531(f). Similarly, if the manufacturer does not offer to go to arbitration, they would be "refusing" the consumer's claim and the unfair trade practice two-year filing limit of .531(f) would start to run.

III.
MATTERS OF CONTINUING DEBATE BETWEEN THE ATTORNEY GENERAL'S CONSUMER PROTECTION SECTION AND THE DEALERS' ASSOCIATION

I believe that the committee draft before you reflects a substantial agreement between the Attorney General's Consumer Protection Section and the dealers' representatives. However, there remain several areas of major disagreement, including specifically:

1. The length of time or depreciation method for calculating the "reasonable allowance" deduction for a consumer's use of a nonconforming vehicle. The dealers would prefer the IRS method, which is now three years, or at the longest, five years. Consumer Protection urges that seven years more accurately reflects the amount of time consumers can expect the vehicle to be useable.

2. The dealers' association, like the manufacturers' representatives, strongly disagree with subsection (b) at page 1, line 23, where the "lemon" vehicle is to be replaced by a "new, comparable" vehicle. They wish the word "new" to be deleted. This committee rejected such a proposal at its 1/31/84 hearing on the bill. The dealers and manufacturers feel that if a consumer-owner of a "lemon" drove the vehicle for nearly a year, or drove very hard, or damaged, or maintained it poorly, the replacement car should only be "comparable," but not necessarily "new." I understand their concern, but giving the "lemon" owner a comparable used car and also deducting a "reasonable allowance" for the owner's use of the "lemon" would be an unjust "double-whammy" against the consumer. (Further, if the owner of a "lemon" were thus penalized, the owner ought to be able to collect consequential damages such as lost wages, taxi or rental car fees, from the manufacturer.)

If the committee feels inclined to compromise further on this point, I would suggest a moderate amendment to the definition of "reasonable allowance," to read:

> (m)(9) "reasonable allowance" means an amount attributable to all owners use of a motor vehicle since its delivery to the original owner. A "reasonable allowance" on a vehicle which has been the subject of only normal wear and tear by the owner may not exceed an amount equal to the depreciation in value of the vehicle for the period during which the vehicle is available for use by the owner, calculated by a straight line depreciation method over seven years.

3. The Dealers' Association would prefer that this bill only cover vehicles sold by authorized franchise dealers within the State of Alaska. This would mean that a car sold by a franchise dealer in Texas and then moved to Alaska within the warranty or one-year period would not be covered by the statute. This would also mean that cars sold by dealers in the Pacific Northwest and shipped directly to Alaskans would not be covered by the bill. I do not support this proposed limitation of the bill.

The committee should note that under this draft in front of you, the bill has already become somewhat limited in that when a new vehicle is sold to an Alaskan by a dealer who does not have franchise authorization, then the consumer will not be covered by this bill if that non-franchise dealer causes the nonconformity defect to the vehicle. If the consumer buys from a non-franchise dealer, but then takes the vehicle to a properly authorized dealership for repair, the consumer should be covered for repairs

and for any lemon condition caused by the original manufacturer or by the authorized repairing dealer. However, I can contemplate some occasions where both manufacturer and repairing dealer would argue that a defect or nonconformity condition was caused by the improper setup or preparation of the vehicle by the non-franchise seller.

IV.
REMAINING AREA OF POSSIBLE AMBIGUITY

When I agreed to delete the words "including collateral charges" from subsection (b) at page 1, line 25, I did so because I believed the committee meant "collateral charges" to be only those additional costs incidental to the original purchase of the vehicle (which costs are in this draft included in the definition of "full purchase price.")

However, the committee members may wish to compensate "lemon" owners for a different type of "collateral charges," somewhat like consequential damages. These "collateral charges" could include costs incurred by the consumer directly due to the nonconformities of a "lemon," such as: taxi fares, rental car fees, towing charges, telephone calls. If this is the desire of the committee, I propose the addition of a definition to read:

> (m)(3) "collateral charges" means those additional charges or expenses incurred by the owner of a non-conforming vehicle, not part of the purchase price of the vehicle, which may include, but are not limited to, expenses for replacement transportation, towing, and long-distance telephone calls to the manufacturer, distributor, dealer or repairing agent.

I believe the manufacturers' representatives and the dealers' association would not support this additional amendment, but I wanted to be sure we all understood the intent of the committee.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

THE NEW LEMON LAWS—DO THEY WORK?

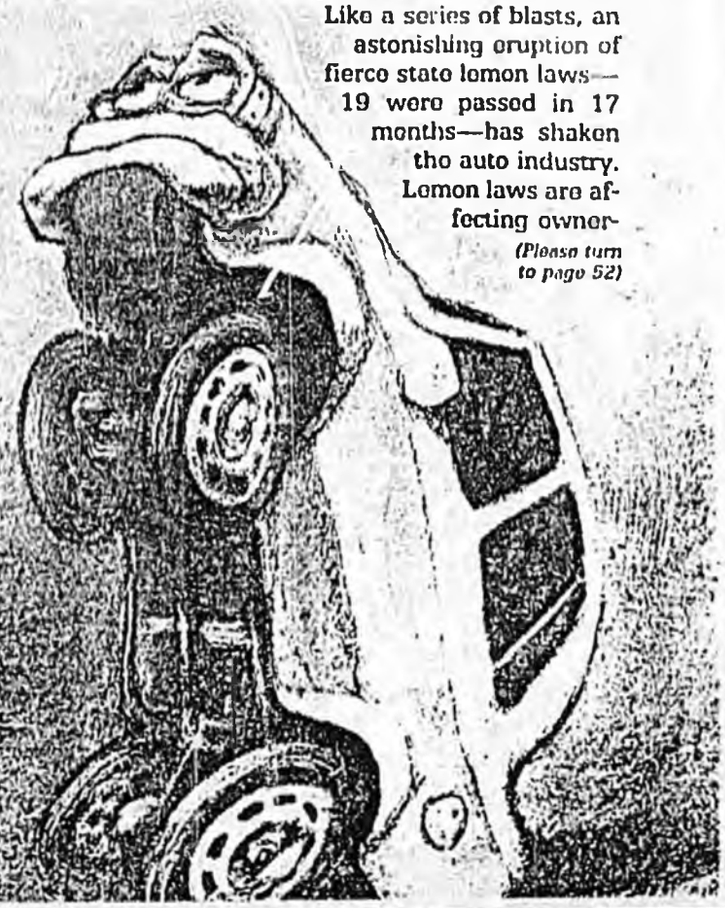
New laws in 19 states promise a fair shake for new car buyers. They are a last-resort alternative to lawsuits.

BY ED FALES; Illustration by Howard Lewis

When Anthony Conti's dealer in Connecticut couldn't fix his Lincoln Continental, he sued—under old credit laws that say any "appliance" must work. Sure enough, he got his money back. But it took seven years.

When Prof. Henry Adelman's feet got wet in his new '82 VW Quantum, his dealer couldn't find the trouble (open boltholes that let the rain in). Adelman, however, didn't sue. He waved a copy of California's brand new "lemon law." He got his money back in 100 days.

When Chester Sobolewski's new Ford wouldn't back up, his dealer couldn't cure it. Chet didn't sue, either. He know his rights under Connecticut's new lemon law: (1) a new car or (2) his money back. He got the new car—in seven days.



Like a series of blasts, an astonishing eruption of fierce state lemon laws—19 were passed in 17 months—has shaken the auto industry. Lemon laws are affecting owner-

(Please turn to page 52)

(Continued from page 50)

service manager relationships wherever they're in effect, from Oregon to Florida.

Although they vary, in general, they provide that any car under warranty that a dealer can't fix in four tries (Florida, Wyoming and Massachusetts say three) is a lemon. U.S. law says warranteed repairs must be made. But the lemon laws now add that if repairs are not made, you're entitled to a new car. Or you can get your money back. But your problem must be genuine—must involve a major problem that affects your car's value or use.

In some states your claim must be made in the first 18 months, in others within 24. New York allows four years. Some give no time limit. The cure is the factory's responsibility.

Buyers get more respect

All this is a drastic attempt—some say too drastic (and needless)—to soothe the angry owner who feels shafted. As written, the new laws are supposed to protect new-car owners. In fact, legislators say, there's a trickle-down effect. Even old-car owners say they're getting more respect from car dealers.

What really shook the industry is the dismaying enthusiasm with which 19 legislatures rushed to act. In some states, the vote was overwhelming. In New York's huge legislative body it was unbelievable: 201 to 3. All this has put backbone in owners who used to feel intimidated by some service managers. "I didn't get a new car," says one owner." (Few really do.) "But I did feel stronger at the service door."

Under lemon laws, settlements are free. The factory or dealer must do as ordered by a remarkable crop of quasi-judicial auto dispute juries that have sprung up from coast to coast.

Are the laws working?

How are the lemon laws really working? Even the first—Connecticut's—is only 17 months old. Some were born only weeks ago. So in most states, actual cases are few. But in Connecticut, Rep. John Woodcock, who fathered the law, estimates that in the first 17 months alone, 40 owners were either awarded new cars or refunds. "And in most cases," says Woodcock, who has become the nation's lemon law guru, "they got new cars."

Here's a small, early sampling of 13 cases in Connecticut, Minnesota and California:

- Got a new car: 1.
- Secretly settled, possibly with a new car: 1.
- Got money back: 3.
- Got troublesome problems fixed at last: 1.
- Owners lost their appeals, got no benefits, are "disappointed with the lemon law": 2.
- Cases pending: 5.

How appeals juries work

Many of these new juries—there are now at least 300—sprang up while lawmakers were busy drafting lemon laws. The most interesting, Autocap (Automotive Consumer Action Program), suddenly has 15,000 dealer-sponsors who pay to run its 41 appeals panels. The others were created by the manufacturers, U.S. and foreign, partly in self-defense, but partly in an honest try at winning back your loyalty.

Most lemon laws require that, before you can claim a refund or new car, you must go before an appeals jury that meets dispute-settlement standards established by the Federal Trade Commission. According to John Woodcock's staff, Ford and Chrysler juries do. Some Autocaps do, others are working toward it. The Better Business Bureau (BBB) is trying to find out whether it qualifies.

Here's what to do if you appeal:

1. Make one last try to settle the problem with the dealer, zone office, or factory. Local dealers have phone numbers of the zone office and factory.

2. If this won't get results, phone or write your appropriate jury (see list at the end of the story). Gather every scrap of evidence—bills, invoices, work orders, memos, dates. In Texas, you're required to appeal any dispute first to the State Motor Vehicle Commission.

Usually, the jury's staff will call the dealer or factory and try to coax a settlement. If this fails, most invite you to sit around their table, informally, with you and your dealer both telling your story. Some investigate very thoroughly. You may have to bring your car and they may test it.

You may get a decision in days, or

(Please turn to page 54)

Questions You Might Ask

What is a lemon?

The new laws in most states say a lemon is a car with a substantial defect that the dealer fails to fix in three to four tries. The defect must affect the value, use or safety of a car. Most laws also say a car must have been laid up for a total of 30 days. (Massachusetts and Florida say 15, Nebraska says 40.) Minnesota's tough law cites any car that has to be fixed just once for steering or brakes. Kentucky, although not considered strictly a lemon law state, has a law that involves any car with serious mechanical problems, even if not on warranty.

How old can a lemon be?

Most states say a car must still be on warranty, or, if warranty mileage has run out, no older than a year. New York stretches the limit to two years or 18,000 miles, and even lets the law be invoked if the owner warned the carmaker during the warranty period of troubles that might grow worse.

Are motorcyles covered?

Lawyers are still interpreting the laws in different ways. Center for Auto Safety attorneys say motorcycles appear to be covered in all lemon law states except California, Delaware, Illinois, Minnesota, New Hampshire, New Jersey and New York.

Are pickups covered?

Yes, in all states but Delaware. Most laws say pickups must be bought for personal, not commercial, use to be covered.

How much of a refund can an owner get?

Minnesota lets the carmaker deduct 10 cents a mile for past use (or a small percentage of the car's cost). New York allows a deduction for mileage over 12,000. Florida allows carmakers 20 cents a mile. Otherwise, you get what you paid for the car if you win.

Does the owner get back taxes, prep and other charges?

Several states, including Massachusetts and Florida, say refunds must include collateral items like sales tax, license fee, finance costs, and (in Florida) undercoating, towing, car-rental and dealer-prep charges.

Do lemon laws give free repairs?

They do not address this. U.S. law, however, says a manufacturer must stand behind his repair warranties. Lemon laws indirectly encourage dealers or carmakers to complete any entitled warranty repairs. And an owner who appeals to Autocap or some of the factory juries may get good-will bill adjustments if there has been mistreatment.

Can a lemon be resold by the factory or a dealer?

In Minnesota, no lemon with defective brakes or steering can ever be resold. In some states, the carmaker must give any buyer a note saying that the car had been a lemon (in some states, "an incurable lemon").

Are noncritical items like defective radios or upholstery covered?

Not by lemon laws. Autocap and some auto juries will consider such items, however.

If you lose a lemon law claim, can you still go to court?

Yes.

LEMON LAWS

(Continued from page 52)

even hours, and it binds the manufacturer and/or dealer. By contract, he must do what the jury says—unless, of course, you lose.

You don't usually need a lawyer. In fact, as this is written, BBB juries won't admit them. You can appeal to such juries in any state, whether it has lemon laws or not. Some juries have awarded new cars or refunds in states that have no such laws.

Who are the jurors? Mainly, they're unpaid volunteers, often leading citizens who give time as a public service. Often, they're merchants, independent mechanics, editors, housewives, teachers, ministers, lawyers. Some boards, like Autocap, have dealer members. But for every dealer, there's a consumer rep sitting opposite.

Most juries are fair

Are their decisions fair? There are gripes, but many juries seem surprisingly fair. Says Gerald Murphy, head of Autocap's Washington, D.C., jury office: "Funny thing, our dealer members are usually tougher on dealers, and our consumer reps are usually tougher on car owners!"

For U.S. and foreign-car owners in general, there are now 41 dealer-established Autocap panels coast to coast. Many have 10-member juries and they'll consider reasonable disputes about anything from a 1984 AMC to a Rolls-Royce that's gone 150,000 miles. Half the jurors are consumer reps, half are dealers.

For Ford-Lincoln-Mercury owners, a new network of over 30 Consumer Appeals Boards (CABs) will hear any honest product or service dispute, no matter how old your car. In fact, Ford's Mike Davis says: "We find most complaints are on out-of-warranty cars." CABs have five voting members (three consumer reps, one Ford, one Lincoln-Mercury dealer).

In its first five years, CABs have had 42,000 inquiries and accepted 10,000 cases for investigation. Ford says more than two in five get a better break on appeal. A few new cars have been given, there have been some refunds, and some major parts like transmissions or engines have been replaced. Only 43 owners went to court.

Reviewing warranty repairs

For Chrysler-Dodge-Plymouth owners, at least 52 Chrysler Customer Satisfaction Boards (CSBs) review only service-related disputes over warranty repairs. They won't handle disputes over alleged design defects or out-of-warranty cars.

CSBs have five members: a consumer rep, a public rep (who could be a public official), a technician certified by the National Institute for Automotive Service Excellence (NIASE), a Chrysler rep and a Dodge or Chrysler-Plymouth dealer.

Chrysler's routine is more stringent than some. Your appeal is all handled in writing. You do not appear. If your car must be tested, you get a free loaner. CSB decisions bind Chrysler or the dealer.

Keeping customers happy

Believe it or not, GM is getting tips from IBM, AT&T and even McDonald's on good ways to keep customers happy. GM began testing a Customer Assistance Program in 1978 and now pays the Council of Better Business Bureaus to administer the mediation of disputes in its 140 Bureaus. GM doesn't discuss details, but according to one report, each Bureau gets $15 to mediate a dispute or, if that fails, $35 for binding arbitration. GM calls mediation "an informal process of re-establishing communication between both parties." Arbitration binds GM but not the owner, if he doesn't like the decision. BBB will look at GM cars up to five years old, with no mileage limitation.

First, as noted, an owner must try to settle with (1) his dealer, or (2) GM's zone office or (3) by contacting GM Customer Service (see *Where To Call If You Have A Dispute* on this page).

If all this fails, BBB sends you a list of five names of possible jurors, with a biography on each. You score your preferences 1 to 5. So does the factory. The highest scorer becomes your jury. Some states require a panel of three.

According to CBBB, of 26,300 appeals in eight months last year, 17,000 were settled by mediation and 1,800 by arbitration. Some 7,500 are still pending.

Auto age limit

For VW, Datsun-Nissan and Porsche-Audi owners, BBB arbitrates as it does for GM, except that cars can be no more than three years old.

For Jaguar, Rover and Triumph owners, the procedure is the same as above, but cars must still be on warranty.

Disputes in some states are resolved by the attorney general, secretary of state or the motor vehicle commission. These have clout because they enforce commercial laws and license dealers and manufacturers.

Even if you lose a jury decision, you can still hire lawyers and sue, and whatever any auto-dispute jury has ruled now becomes legal evidence for or against you. But suing is expensive, can take months or years, and may cost more than your car is worth. Some suits fall under the Magnuson-Moss federal warranty act of 1975, which says manufacturers must stand behind their warranties.

Lemon law results

In Washington, D.C., an industry-advisory group cites a survey which shows that owners who get good treatment tell eight friends. Those who get bad treatment tell 16. With manufacturers and dealers more responsive than ever to consumer complaints, perhaps we'll see the day when lemon laws are no longer needed. **PM**

Where To Call If You Have A Dispute

Owners' manuals, especially the recent ones, often give phone numbers and/or addresses of owner-assistance boards. But first talk with your dealer, then the carmaker's zone office, then the carmaker's headquarters. Some zone offices will relay your inquiry to the head office.

Autocap is listed in many big-city Yellow Pages. For phone numbers and addresses in all states, contact NADA Autocap Office, 8400 Westpark Dr., McLean, Va. 22102 (or call 703-821-7144).

For GM cars, write GM Customer Service, GM Building, 3044 West Grand Blvd., Detroit, Mich. 48202, or phone 313-556-2294.

Better Business Bureaus appear in city Yellow Pages. For a full list, with phones, write to Council of Better Business Bureaus, Wilson Blvd., Arlington, Va. 22209, or call 800-228-6505.

Ford Consumer Appeals Boards: From most places, dial 800-241-8450.

Chrysler Customer Satisfaction Boards won't take calls. Contact them by mail. Address for your area is in owners' manuals (look under "Service Assistance"). Or ask dealer or zone office for a list of boards. Detroit Customer Relations address is Box 1718, Detroit, Mich., 48288. Phone 313-956-5970.

Lemon Law Tally

- There were 19 states with lemon laws as this report was drafted. The Center for Auto Safety in Washington, D.C., lists: California, Connecticut, Delaware, Florida, Illinois, Maine, Massachusetts, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, Oregon, Texas, Washington, Wyoming and Wisconsin.
- A federal lemon law has been proposed in Congress.
- These 18 states have considered, or are considering, lemon laws: Alaska, Arizona, Colorado, Georgia, Hawaii, Indiana, Kansas, Louisiana, Maryland, Missouri, New Mexico, North Carolina, North Dakota, Oklahoma, Pennsylvania, Rhode Island, South Carolina and Vermont.

Lemon goes back to Buick

By K.C. MOON
Daily News reporter

Since he bought his Buick Century new in 1982, Dennis Stovall has been cursing the car, trying to find some way to get rid of it.

Window cranks fell off in his hand. Transmission failures left him stranded. Windshield wipers quit during heavy rains. Warning lights flickered as the engine sputtered and grumbled.

Now, in what Stovall says is a monumental victory for consumers, Buick must buy back the car.

The buy-back is the result of the first Alaska arbitration of consumer complaints

Car to be bought back by Buick after owner wins his case in arbitration

Continued from Page A-1

against General Motors, the maker of Buick models and one of the world's largest corporations.

The arbitration program is similar to one mandated three months ago by the Federal Trade Commission, which in a 1980 suit accused GM of failing to notify its customers of serious defects with many GM cars.

Instead of pursuing its federal court suit, the commission voted in November to accept GM's offer to arbitrate all consumer complaints through local Better Business Bureaus.

Since Alaska has no bureau, the bureau in Seattle handles consumer complaints for Alaskans.

Stovall's arbitration hearing was held Jan. 20 in Anchorage. He and a Buick representative argued their cases for about eight hours before three volunteer arbitrators, all from Anchorage.

Over the weekend, Stovall received a letter stating he had won his case. All arbitrators agreed with Stovall's contention that he "did not get the reliability he bargained for when he bought the 1982 Buick and does not foresee the situation improving" according to the letter.

Stovall will get most of what he asked for, but the arbitrators decided to deduct from Stovall's $9,865 purchase price 20 cents for each of the 7,500 miles the car has been driven.

"That deduction is the only part that upsets me," Stovall said. "But I would have put a lot more miles on it had I not been scared to drive it."

Stovall should get a check for more than $8,300 when he turns the car over to Alaska Sales and Service, the GM dealership that sold him the car.

"I'll be glad when I never have to deal with this car again," Stovall said. "It's taken a lot of work and a lot of time, but I finally got what I wanted."

Stovall showed copies of about 50 letters he had written to the dealership and Buick customer relations offices in an effort to get the car fixed.

In the two years of ownership, the car had been almost 60 days in the Alaska Sales and Service repair shop, according to repair documents. In the first seven weeks after the sale, the car was in the shop five weeks.

Buick representative Kerry Stasch, who defended the automaker at the Jan. 20 hearing, said he could not comment on the outcome of the arbitration. Buick zone manager Bill Powell said he would answer only those questions presented in writing.

Richard Hiatt, service manager for Alaska Sales, said Monday, "We support the Better Business Bureau and whatever decision is rendered."

He said Buick, not Alaska Sales, is responsible for paying Stovall. Hiatt said he had not been in contact with Buick headquarters to find out when and where the transaction would take place.

"Most likely the car will be resold, either by us or some other dealer," Hiatt said. "It's not a bad car.

"Unfortunately, (Stovall) had problems with it, but in my opinion it's completely safe."

Hiatt said that although it is not Alaska Sales' policy to buy back cars sold, "we have bought back cars before."

Normal procedure for handling a complaint like Stovall's "is to try to trade the customer into another car," he said.

That offer was made to Stovall several times, but the 33-year-old schoolteacher turned it down. "I could have traded my car in at any dealership," he said. "I wanted my money back."

"We've been bowing and curtsying to these huge coporations for too long," Stovall said. "It's time we stand up and fight them.

"What I hope my case does is open Alaska up to the arbitration process," he said. "People need to know they don't have to sit there and get kicked around after they've bought a 'lemon.'

"I know a lot of people who had worse cars than mine and couldn't do anything about it."

The arbitration program set up for Alaskans by the Seattle Better Business Bureau still is being developed. Wendy Bennington, who manages automobile arbitrations for the office, said the bureau is planning to contract with a local organization to monitor Alaska hearings until the Anchorge bureau office opens.

Two of those who heard Stovall's case were volunteers from the Anchorage Conflict Resolution Center. The state Consumer Protection Office helped coordinate Stovall's hearing.

Bennington said her office has received 200 calls from Alaska GM owners since the November FTC ruling. The next arbitration hearing in Anchorage will be held in four weeks, she said.

Demands that manufacturers buy back autos are rare, she said. Most consumers simply seek reimbursement for repairs.

Bennington said of the complaints her office has received, only about 3 percent make it to arbitration. The rest are settled when consumers accept automakers' mediation offers.

Bennington said Alaskans wanting to participate in the arbitration program can call the Seattle Better Business Bureau collect at 206-622-2578.

GM's earnings could set industry record

DETROIT (AP) — General Motors Corp.'s 1983 earnings could set a record for the nation's largest automaker and lift combined U.S. car industry profits for the year to an all-time high, analysts say.

Many analysts see GM surpassing its record profit of $3.51 billion set in 1978, a year before the American car industry plunged into a four-year sales slump that Detroit began to shake off just last year.

David Healy, an automotive industry analyst for Drexel Burnham Lambert Inc. in New York, said the earnings will be "in the neighborhood of" $3.7 billion.

"Dollars weren't what they were in 1978, so it won't be a record in real dollars. But that's still a very good figure," Healy said.

GM Chairman Roger B. Smith, who has led the company on its way out of the industry's sales slump, was to make the earnings announcement in an address to the National Press Club in Washington this afternoon.

When Ford Motor Co., Chrysler Corp. and American Motors Corp. close their books later in the month, the U.S. car industry is expected to have racked up profits far exceeding the industry record of $5.18 billion in 1977.

The record earnings for a year by a U.S. corporation was set in 1982 when AT&T recorded a profit of $7.23 billion, earning more than $2 billion in one quarter alone.

Analysts predict that Ford's earnings could approach, or even exceed, its record of nearly $1.7 billion in 1977. Chrysler is a sure bet to set a record for 1983. Its record for a year was $422.6 million in 1976 and it eclipsed that in just three quarters of 1983, earning $582.6 million. AMC says it will post a profit for the fourth quarter, but has not predicted a profit for the year.

Healy said GM's results came "from a combination of three things: the recovery in car sales, a reduction in their break-even point — doing it with fewer people — and the market mix, which is very profitable. They were selling more of the profitable big cars and not as many of the smaller cars."

Gary Glaser, an automotive analyst for Sanford C. Berstein & Co. Inc. in New York, said GM piled up the profits because of improved sales in big cars, GM's specialty, the improved sales market that has aided all carmakers and better efficiency, which has dramatically lowered GM's break-even point.

"The overriding factor has been the significant increase in (cars and trucks) sold as the market comes back," Glaser said. "Certainly, part of it relates to the fact that GM is the most significant player in the higher end of the market."

He also cited "the excellent programs GM has made in lowering and containing costs."

Glaser said that in 1978, when GM hit its previous record profit, "they needed to build 5 million vehicles to break even. By 1983, Glaser said, GM had lowered that "to 4 million. This is really the key, with the fact that sales have indeed come back."

RE: CSSB 286 RELATING TO MOTOR VEHICLE WARRANTIES

COMMITTEE SUBSTITUTE FOR SENATE BILL 286 IS BEFORE THE COMMITTEE AGAIN THIS MORNING FOR I EXPECT WILL BE THE LAST TIME. AT OUR LAST HEARING ON THIS LEGISLATION, THE COMMITTEE ADOPTED A HOUSE SUBSTITUTE FOR THE SENATE VERSION OF THE BILL. AFTER CAREFUL CONSIDERATION OF THE CHANGES MADE IN THE BILL BY THE APPOINTED SUB-COMMITTEE, I HAVE ASKED LEGAL SERVICES TO PROVIDE A SECOND COMMITTEE SUBSTITUTE WHICH MAKES ONLY TWO CHANGES. SUBSECTION (2) OF PARAGRAPH (e) HAS BEEN DELETED AND THE NUMBER OF YEARS USED IN THE STRAIGHT LINE DEPRECIATION METHOD HAS AGAIN BEEN SET AT 7 YEARS. THE LANGUAGE IN THE PARAGRAPH TWO WAS TOO VAGUE AND DID NOT CLEARLY DEFINE "UNSAFE TO OPERATE." I FELT IT MAY CAUSE PROBLEMS IN THE FUTURE. AFTER CONSIDERING THE DATA AVAILABLE, I BELIEVE THERE ARE VERY FEW CARS IN ALASKA THAT HAVE A LIFE SPAN OF TEN YEARS. I FEEL THE 7 YEAR FIGURE IS MORE FAIR. I WOULD ENTERTAIN MOTIONS TO ADOPT THIS COMMITTEE SUBSTITUTE AND MOVE THE BILL ON TO ITS NEXT COMMITTEE OF REFERAL.

Section Analysis of CSSB 286 (2/23/84 version)

Subsection (a)

If a new vehicle does not conform to an express warranty, the manufacturer must make the necessary repairs. No time limitation is mentioned in this section. It merely requires the manufacturers to honor their own express warranty for whatever term they give it (1 to 5 years, or by mileage limits).

Subsection (b)

If the manufacturer is unable to repair a nonconformity vehicle within one year, the manufacturer must accept the return of the car and shall refund the full purchase price to the consumer.

Subsection (c)

This section clarifies exactly how and when a consumer must give notice to the manufacturer that the consumer believes he or she has a lemon car for which a refund is requested.

Subsection (d)

This section, following the lemon laws in the states of Massachusetts and California, requires the manufacturer to deliver some type of explanation to all new owners of vehicles about their rights under the lemon law.

Subsection (e)

This section states that an owner may not receive a refund if the manufacturer can show that the nonconformity does not impair the use or value of the vehicle or that the nonconformity is the result of alteration or abuse by the owner or a person other than the repairing agent.

Subsection (f)

A vehicle is considered a "lemon" if the same nonconformity has been subject to repair ~~four~~ or more times within a one-year period or if the vehicle has been in the repair shop for a total of 30 or more business days during the one-year period.

Subsection (g)

A manufacturer must provide its dealers with any part necessary to make repairs of a nonconformity covered under the warranty as soon as reasonably possible without additional charge for freight or handling.

Subsection (h)

Under this subsection, a manufacturer who fails to refund the purchase price of a "lemon" is "presumed to have committed" an unfair trade practice. "Presumed to have committed" sets out a legal presumption which the manufacturer can then rebut by showing the courts that the manufacturer had some valid reason (when applicable).

Subsection (i)

This subsection states that when a "lemon" is resold, a full disclosure of the reason for the return must be made to the prospective buyer.

Subsection (j)

This bill does not limit the rights of a vehicle owner as stated in other provisions of law.

Subsection (k)

This subsection requires manufacturers to retain repair facilities within the state, able to service the vehicles they sell.

Subsection (l)

Once a "lemon" car has been returned to the manufacturer for a refund, the manufacturer must compensate the owner for all reasonable costs which the owner incurred in shipping the vehicle back and forth from the nearest authorized repair facility for warranty service.

Subsection (m)

This subsection allows the manufacturer to use any arbitration or mediation process, even if the manufacturer has not set up in advance a Magnuson-Moss type (16.C.F.R. 703) informal dispute settlement procedure. In all cases, the attorney general must approve the process and the arbitration decision must be binding on the manufacturer but not on the owner. This subsection insures that as many of these lemon law disputes as possible will stay out of the court system, and that both consumer and manufacturer will be encouraged to use informal settlement processes.

Subsection (n)

The definition section outlines the specific meanings of terms used in this legislation. Note should be taken of the following definitions:

Subsection (n) (4) - "full purchase price" includes all fees paid at the time of the sale, including finance charges.

Subsection (n) (6) - "motor vehicle" includes land vehicles with four wheels "normally" used for personal, family or household purposes.

Subsection (n) (9) - "resonable allowance" is set at a sum which will include no more than straight-line depreciation figured over seven years, plus, when applicable, an amount for depreciation in value of the vehicle caused by neglect or abuse by the owner.

Repair law would offer 'lemon aid'

It's called the lemon law, but it sounds sweet to Alaskans stuck with new cars that scream out — and out and out — for repair. Now before the Senate Labor and Commerce Committee, SB 286 sets specific standards for determining when a car can officially be declared "a lemon," and lays some legal groundwork for resolving habitual car repair hassles.

In doing so, it promises to put some teeth into the express warranties offered by manufacturers as part of virtually every new car package.

SB 286 stipulates that if new-car dealers fail to correct a serious defect after four attempts, or if a car has spent more than 30 working days under repair, manufacturers must replace the car or refund the purchase price. The law would apply only to those defects covered under new-car warranties, and only during the first year of ownership.

Although real duds comprise only a small fraction of the automobiles sold in this country, anyone who has ever suffered the maddening outrage of repeated — futile — attempts to rectify a warranty-covered problem will appreciate the need for some firm guidelines for all concerned.

Not surprisingly, some opposition to the measure has been voiced by some local automobile dealers. Although the dealers say they don't oppose the concept of the law itself, they fear they will be caught between such a law and manufacturer-caused delays they have no control over. They claim that much of the delay with auto repairs in the 49th state can be placed at the hands of the manufacturers themselves — who air-freight parts for warranty repairs to every state except Alaska. (If Alaskans want parts air-freighted, they must pay the additional cost.) The dealers also claim manufacturers are loathe to reimburse them fully for the higher cost of doing warranty repairs in Alaska.

Although we can sympathize with the dealers' often frustrating long distance role in the new car equasion, they represent the front line of automobile responsibility to consumers. They are the people who sell the cars; they must shoulder the responsibility to stand behind the cars they sell.

The Consumer Protection Division of the Attorney General's Office receives more complaints each year about warranty-related problems than any other consumer problem. And, as Attorney General Norm Gorsuch put it, "If prodding a recalcitrant manufacturer to fix a problem car is difficult for the dealer, that difficulty is magnified ten-fold for the consumer." It shouldn't be. A car is one of the major purchases most people make in their lifetimes, second only to a home.

So far, 18 states have passed lemon laws. Another seven states are now considering them. Alaskans pay more for their cars than anyone else; they have the right

Anchorage Daily News Wednesday, February 15, 1984

1983 sales of $74.58 billion also an alltime high

GM earns a record $3.73 billion

By Kathleen Hamilton
Financial Editor

When General Motors reported its 1983 financial results last week, it was hard to find a performance indicator that didn't set a record.

Sales of $74.58 billion were a record. Fourth-quarter sales of $20.82 billion were an any-quarter high. Profits for both 1983 ($3.73 billion) and the quarter ($1.30 billion) were records. Income per share was a fourth-quarter record.

GM of Canada and GMAC both set revenue and income records. And GM's results no doubt led the U. S. auto industry to a record profit total for 1983.

GM's earnings of $3.73 billion ($11.48 a share) were nearly four times 1982's $963 million ($3.09 a share).

Sales of $74.58 billion were 24 percent more than 1982's $60.03 billion. Unit sales also were up 24 percent — from 6.24 million to 7.77 million.

The old GM profits record was set in 1978, when GM made $3.51 billion — $222 million less than last year — but sold 9.48 million vehicles, 18 percent more than last year's 7.77 million.

Last year's sales value, meanwhile, was 18 percent higher than in 1978, and 12 percent higher than the old GM record of $66.31 billion, set in 1979.

"It's certainly true that we did get a lift from the rising economy, but our improved operating performance was the key," GM Chairman Roger B. Smith said in announcing the 1983 results in a speech at the National Press Club in Washington.

"For example, if we had operated in 1983 at our 1983 volume but at our 1978 performance rates, we would have barely broken even last year," he said.

Smith said GM still "has a long way to go" toward a record performance if its profits are adjusted for inflation.

GM's before-tax income skyrocketed from $22.8 million in 1982 to $4.97 billion last year — a far larger increase than the hefty after-tax increase — because GM paid out 45 percent of its income in taxes last year. In 1982, it garnered a tax credit of $252.2 million. GMAC contributions to GM income aren't included in the pre-tax figures.

In addition, GM said a new accounting procedure for foreign currency translations reduced its 1983 profits $422.5 million.

Almost all the pre-tax earnings increase — $4.22 billion worth — was attributable to domestic income increases, according to the GM figures.

After-tax income generated in the U. S. more than tripled, from $1.08 billion to $3.47 billion, on a sales gain of only 31 percent (from $50.32 billion to $66.16 billion).

Unit sales in the U. S. rose 27 percent, from 4.04 million to 5.12 million.

• In Canada, net income of $592.3 million was a $626 million turnaround from money-losing 1982.

(Those are the consolidated figures reported by GM in Detroit, and don't exactly match the figures issued from GM of Canada because of exchange rates and adjustments for cross-border shipments. GM of Canada reported record sales of $13.8 billion (Canadian) and net income of $675.6 million.)

Results from Europe weren't so rosy. Sales rose 8 percent to $7.97 billion, and GM set a record in market penetration, but it turned in a loss of $228.3 million. The company attributed most of the loss to the change in accounting procedures, but the competitive European market has led all makers to cut their margins there. Using the old accounting methods, GM broke even in Europe in 1982, with profits of $6.2 million.

GM also lost money in 1983 in Latin America ($15 million) and the Australia/Oceania region.

GMAC set another income record, this time $1 billion, compared with its old record of $688 million, in 1982.

GM added more than $3 billion to its cash pot during the year, ending 1983 with a stunning $6.22 billion in cash and marketable securities.

It spent $2.60 billion on R&D, up 20 percent from 1982's $2.18 billion.

Capital spending of $4.01 billion was 35 percent less than 1982's $6.21 billion. Capital spending is expected to be about $6 billion this year, GM said.

• GM contributed $180 million to its executive bonus plan, the first contribution in four years and the maximum allowable under the 1977 formula. As GM promised the UAW, the sum is less than allowed under the 1982 formula, which was approved by stockholders shortly after UAW members granted the company concessions.

Another $26.5 million accrued to the Performance Achievement Plan for 1983, the first such accrual since the plan was approved in 1982. It is the estimate of what will be paid to about 500 top executives for 1983 if they and GM achieve long-term performance objectives. Payouts are scheduled for 1985 and 1987.

Profit-sharing payouts for 1983 to lower-level salaried workers and hourly workers will amount to $322 million. GM paid $892 million in dividends during the year.

Fourth-quarter profits of $1.30 billion ($4.11 a share) were nearly nine times the $145 million (45 cents a share) made in the fourth quarter of 1982. Quarterly sales of $20.82 billion were 50 percent more than the $13.88 billion of a year earlier. Unit sales for the quarter rose 48 percent, from 1.43 million to 2.12 million.

Dealers bullish, cite strong sales prospects

By Al Fleming
Industry Editor

DALLAS. — Richard J. Gillis figures his timing couldn't be better.

Last June, he bought a Ford dealership in Sterling, Va. Its break-even volume was 950 new vehicles a year, but it sold only 256 vehicles in 1982 and was $300,000 in the red.

In the first half of 1983, Sterling Ford ("Home of the Silver Dollar Deal") sold 869 vehicles to wind up with 755 sales for the year.

"I'm excited about the next two, three, four years," gushed Gillis during a respite at the NADA convention last week.

"People are perceiving that now's a good time to buy a car," he said. "They're feeling good about their jobs and the cost of money and are turning in their old clunkers on new ones they've postponed buying."

AMENDMENTS MADE TO CSSB 286 BY THE HOUSE LABOR AND COMMERCE COMMITTEE SUB-COMMITTEE

1. Page 1, Line 29:
Insert the word "certified" following "by".

2. Page 2, Line 1:
Insert the words "dealer or" following "its".

3. Page 2, Line 11:
Delete "30 days or more" and in its place insert "within 60 days".

4. Page 2, Line 12:
A new sentence is added to paragraph (4) which reads "Within 30 days after receiving the notice required by this subsection the manufacturer may make a final attempt to conform the vehicle before a refund is made under (b) of this section."

5. Page 2, Line 13:
Delete paragraph (d).

6. Page 2, Line 23:
Insert the words "dealer or" before the word "repairing".

7. Page 2, Line 26:
Insert the words "dealer or" before the word "repairing".

8. Page 3, Line 6:
A new paragraph (2) is added which reads " the nonconformity makes the vehicle unsafe to operate and the same nonconformity has been subject to repair at least twice by the manufacturer, distributor, dealer, or repairing agent during the express warranty term or the one-year period referred to in (1) of this section, whichever period terminates first, but the nonconformity continues to exist; or"

9. Page 3, Line 6:
The original paragraph (2) is re-titled (3) and is inserted following the new paragraph (2).

10. Page 3, Line 20:
Insert the word "full" following "the".

11. Page 3, Line 25:
Insert the word "or" following manufacturer, delete "or repairing agent" and insert the words "in the state" following distributor. Both commas on this line are also deleted.

12. Page 4, Line 4:
Delete "sold in the state shall maintain repair facilities or authorize repairing agents" and insert "who authorize the sale of the manufacturer's or distributor's motor vehicles in the state shall maintain authorized dealership facilities".

13. Page 5, Line 1:
insert the word "warranty" following "and".

14. Page 6, Line 8:
Delete the words "includes a dealer or other person" and insert the words "means a person".

AMENDMENTS MADE TO CSSB 286 BY THE HOUSE LABOR AND COMMERCE COMMITTEE SUB-COMMITTEE

Deleting finance charges from refund, continued--

Under the "Rule of 78s" which Alaska law says must be used to compute interest on early payment of a retail sales installment loan, here is an example of how a consumer will be penalized for the use of a lemon, if the finance charges are deleted from the bill.

Buyback of a lemon, used 12 out of 13 months:

Original cost of vehicle	$12,000.00
Maximum allowance for consumer use (deduction)	- 1,710.00
Buyback Refund	$10,290.00

If accrued finance charges are dropped from the bill, consumer's true purchase cost (without additional damages) is:

Down Payment	$ 2,000.00
12 payments (of 36)	3,350.04
Loan payoff	8,096.42
Total cost	$13,446.46
Less Buyback Refund	$10,290.00
Consumer's cost to use car 12 months:	$ 3,156.46

PRECEDENT:

Massachusetts, Delaware, and New Jersey specifically include finance charges in the refund. Six or seven more states allow refund of "full purchase price" plus a broad category of collateral charges (interest not specifically included or excluded).

By REP. MIKE MILLER

One of the most important consumer protection bills before the legislature this year would, if passed, force automobile manufacturers to repair or replace "lemons" sold to Alaskan car purchasers.

This legislation is literally a matter of life and death. One Kenai Peninsula resident lost family members because of defects in a car he purchased as new. This is just one of many actual and potential tragedies on our roads due to defective automobiles — vehicles supposedly brand new and just off the showroom floor.

According to the Consumer Protection Division of the Alaska Attorney General's Office, between 800 and 900 Alaskans purchase defective vehicles each year.

Most of us are car owners, and purchasing a new car is one of the major financial commitments we make. As sponsor of the House version of the "lemon bill," I feel very strongly that automobile manufacturers have a responsibility to those who purchase their cars. Unfortunately, case after case shows that the manufacturers often turn a deaf ear to the owners of the cars that spend most of their time in the shop.

CSSB 286, the Senate version of the lemon bill, was introduced by Sen. Bill Ray and has passed the Senate. The House Labor and Commerce Committee is currently conducting public hearings on this legislation. I strongly encourage citizens to testify in favor of this crucial legislation.

Unfortunately, powerful economic interest groups are currently trying to water the bill down, so that business can go on as usual. That is the reason strong citizen response is so important right now.

The bill passed by the Senate gives strong protection to the purchaser of a defective car, while putting the responsibility on the manufacturer, not the Alaskan dealer. The bill requires the manufacturer to buy back defective vehicles if the defect is not repaired — under the terms of the manaufacturer's own warranty — within a year after purchase. A car is considered a "lemon" if the same defect has been subject to repair three or more times within that year, or if the vehicle has been in the repair shop for a total of 30 or more business days during the year.

If these conditions are not met, the owner of the lemon vehicle then has the right to full refund of the purchase price of the car, including finance charges, less depreciation and any damage done while in the owner's possession.

Among other provisions, the bill requires manufacturers to notify the buyers of their rights under the legislation.

What could be more fair? This is already being done in Massachusetts and California, and there is no reason for Alaska not to protect its citizens in this manner.

Unfortunately, both dealers and manufacturers are attempting to take the teeth out of the bill.

Dealers want the bill amended to change the number of allowed repairs from three to four; to delete finance charges from the reimbursement requirement; and to place responsibility of notifying consumers of their warranty rights with the state, not the manufacturer.

Manufacturers also want the bill weakened. Currently, Alaska is the only state in the nation in which the car owner must pay air freight if parts must be ordered from outside. The bill would close this loophole by requiring the manaufacturer to pay air freight just as they do in the other 49 states. Manufacturers want this section of the bill deleted.

Manufacturers also want to delete the section that requires them to pay back finance charges to the lemon owner. The reason for requiring the repayment of financing interest charges is simple: According to the Attorney General's testimony, 75 percent of all cars purchased in Alaska are financed. Many cars are financed through dealerships and manufacturer's subsidiaries. In fact, General Motors Acceptance Corp. finances 80 percent of all GM cars sold in the state. Dealers make money if a car is financed in this way. They certainly don't want to have to give it back, even if the car they sold is a lemon.

I also have some amendments that I would like to see, because in contrast with the opinions of the dealers and manufacturers, I don't think the bill goes far enough.

I think that purchasers of lemons should also be reimbursed for their out-of-pocket expenses for necessary car rental while their lemon is being repaired, and also for any towing charges resulting from warranted failures.

If the defect is one affecting the life safety of passengers, I think the dealer should be allowed only two attempts at repair instead of three before the refund process triggers.

Your local Legislative Information Office can provide you with a copy of the bill, and with dates and times of upcoming committee hearings, the next one being Wednesday at 8:15 a.m. You can also call the L.I.O. to send a Public Opinion Message to your legislators in support of this all-important consumer protection issue, as written or stronger.

I can think of few issues this year that will affect public safety and wellbeing as much as the passage of this bill.

Unfortunately, I am afraid that economic interests may be talking louder than the public interest.

Don't let the House Labor and Commerce Committee turn the lemon car bill into a law that is itself a weak lemon!

Rep. Mike Miller of Juneau is House Democratic minority leader and a six-term veteran in the state House of Representatives.

MARCH 22, 1984

TO: JOHN

FROM: KEN

RE: CSSB 296 "RELATING TO CERTAIN LICENSES, PERMITS, AND REGISTRATIONS"

THE PURPOSE OF SENATE BILL 296 IS TO REDUCE THE AMOUNT PAPERWORK AND PREPARATION REQUIRED TO OBTAIN OR RENEW A LICENSE, PERMIT, OR REGISTRATION. UNDER CURRENT STATUTES REGISTRATION AND RENEWAL FEES ARE PAID ON AN ANNUAL BASIS. THIS LEGISLATION SET UP A BIENNIAL RENEWAL SYSTEM AND DOUBLE THE DOUBLE THE FEES.

FOR YOUR CONSIDERATION:

JOHN LINDAUER HAS PROPOSED A NUMBER OF AMENDMENTS TO THIS BILL WHICH WOULD AIDE THE DEPARTMENT OF LABOR IN THEIR FEE AND CERTIFICATE STRUCTURE. THE DEPARTMENT OF COURSE SUPPORTS THE AMENDMENTS. HALFORD AND BENNETT, WHO SPONSORED THE BILL ORIGINALLY, SAY THEY SEE NOTHING WRONG WITH ALLOWING THE AMENDMENTS TO BE ADDED.

QUESTIONS:

1. WHY DOES SB 296 RESTRICT ITS APPLICATION TO ONLY THESE BILLS ?

2. WHY HAS THE DEPARTMENT CHOSEN 296 FOR THESE SUGGESTED AMENDMENTS AND WHY ARE THEY NECESSARY ?

CS SENATE BILL NO. 296

FISCAL ANALYSIS:

The analysis of this bill is confined to Sec. 1 & 2, registration and renewal fees for construction contractors; Sec. 3, initial license and renewal fees for guides; and Sec. 8, renewal of registration for concert promoters. The remainder of this bill has no impact on the Division of Occupational Licensing functions.

The provisions of this bill has no impact on expenditures and provides a net zero fiscal impact on revenue generated from licen sing in succeeding fiscal years.

Under existing statutes, contractor registration, guide licenses and concert promoter registrations must be renewed annually. This bill provides an amendment to those statutes to extend the renewal of the licenses/registrations to biennial.

This bill provides for initial and renewal fees for contractor registration, guide licensing, and the renewal fee only for concert promoters registration, to be increased 100%.

In effect this is no net increase in the fee structure. The increased fees would cover a two year period instead of the present annual period. This would be reflected in the amount of revenue generated in a license/registration renewal year versus that of the off year. Over a period of two fiscal years the revenue generated would be identical to that if the annual renewal requirement is maintained.

FISCAL NOTE: SB 296

ANALYSIS

The implementation of optional two year licensing of commercial fishing vessels will increase operating costs by approximately $14.1 in the first year of implementation as system analysis and programming necessary to adapt on-line licensing files is estimated to take three months. In subsequent years there will be no increase in operating costs.

Revenue will not increase or decrease as a result of this legislation because the number of vessel licenses issued per year will not be affected. Vessel owners that choose the two year option will receive the license for the first year immediately upon the Commission's receipt of the application and the license for the second year will automatically be issued prior to the start of that year.

ALASKAN MERCHANTS SINCE 1954

23 March 1984

Honorable Joe L. Hayes
SPEAKER OF THE HOUSE
of Representatives
Pouch V
Juneau , Alaska 99811

Dear Joe,

Many thanks for your letter of March 17. It is gratifying to me to know that you , Representative Cowdery, and Senator Eliason are taking a hard look at what is happening regarding implementation of Alaska's Controlled Substance Act and particularly AS 17.. of that Act.

The Board of Pharmacy was handed the ball by the Legislature,along with funding to hire an Executive Secretary and Investigator. Unfortunatly these titles were not included as specific wording in the law , although these positions were repeatedly mentioned when the legislation was being considered and passed.

Board requests for an Executive Secretary , have repeatedly been ignored by the Governor, the Commissioner of Commerce , and the Director of Occupational Licensing (DOL). I believe all of them have a misconception of the intent , the importance , and the timely implementation of the Law.

Federal statistics,on file with the Alaska Department of Law , show that controlled substance from the legitimate industry account for some 60 % of deaths of patients brought to hospital emergency rooms with drug related problems (nation wide). Statistics also show ,over 60% of drug related problems of patients being treated in hospital emergency rooms, come from drugs from the legitimate industry. These drugs are obtained by armed robbery, by after hour breakins, by prescriptions from unscrupulous practitioners, by forgery of precsriptions, or by sale by unscrupulous pharmacists.....but all from the legitimate industry.

The federal Drug Enforcement Administration(DEA) and state and local drug enforcement units have their hands full dealing with the "street traffic" illegitimate entrance of and use of controlled substances in all states . They rely on state laws, such as Alaska's AS 17.30 to deal with the legitimate industry. Most states effectively do this through their Boards of Pharmacy. No big buearacy is needed . Wyoming does it quietly, and cost effectively with one Executive Secretary and one Investigator, Under the direction of its Board of Pharmacy. Alaska would do well to emulate this program and the Board planned just that.

ALASKAN MERCHANTS SINCE 1954

23 March 1984

You and Representative Cowdery and Senator Eliason all have documented evidence of the valient effort by the Board of Pharmacy to carry out the intent of the Legislature. I will not repeat all of that here, but it is important for you to know that I did spend many long hours drafting both .....proposed regulations and job qualifications and a job description for the Executive Secretary. The later may be of value to you when you propose legislation to mandate creation of the position.

Again thanks for your letter , your interest , and your help in drafting and passing legislation that will clarify legislative intent . If I can be of assistance in this effort , please call me.

Since the Governor removed me from the Board, and refused to reappoint the member from Sitka and has indicated that he will not reappoint the present experienced Secretary of the Board, the Board will be down to one professional and one lay member with any real experience . The new inexperienced Board will desperately need the Executive Secretary .

Sincerely,

Eldon R. Ulmer, R.Ph

JUNEAU, ALASKA 99811

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

May 17, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the provisions of Titles 24 and 44 of the Alaska Statutes (sunset), the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE
BOARD OF PHARMACY

July 1, 1980 to February 28, 1983

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Pharmacy for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Pharmacy should be reestablished. The law now specifies that the Board will terminate June 30, 1984, and have one year from that date to conclude its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.
2. Interviews with the license examiners.
3. Tests of files and documents of licensees.
4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman Office.
5. Discussions with Board members.
6. Minutes of Board meetings and Division correspondence files.
7. Attorney General Opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Pharmacy is a regulatory board with seven members; two public members having no direct financial interest in the health care industry, and five professional members with three years practical experience and licensed in Alaska. Whenever possible, each judicial district should be represented by a Board member.

The Board regulates five types of licenses; pharmacists, retail pharmacies, wholesale pharmacies, hospital pharmacies and drug rooms. The Board sets the minimum standards to practice in Alaska by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing, amending, or eliminating regulations controlling pharmacy practices.

3. Revoking, annulling or suspending licenses in accordance with the Administrative Procedures Act when a person has violated pharmacy statutes or regulations.

Applicants for registration as a pharmacist are required to pass the National Association of the Boards of Pharmacy Licensing Examination (NABPLEX), and a jurisprudence exam covering Alaska pharmacy law and the Federal Controlled Substance Act.

Pharmacists licensed to practice in another state who apply for licensure in Alaska, can be licensed by credentials, except for those applicants from California or Louisiana. These two states require applicants to pass a state exam, not the national exam. Consequently, these applicants must take the national exam when applying in Alaska.

The Board may also issue temporary or emergency permits. Temporary permits allow qualified applicants to practice until the Board can formally license them; emergency permits allow pharmacists licensed in another state to practice in Alaska in an emergency. Both permits are limited in their duration and application.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committees should take into consideration the findings and recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Board of Pharmacy should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

However, the following findings describe areas where weaknesses or conflicts exist. We have made recommendations which, if implemented, will improve the efficiency and effectiveness of the Board.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Pharmacy should allow the Division of Occupational Licensing (OL) to perform its administrative duties as described in AS 08.01.050 to improve documentation and file management.

The Secretary of the Board receives license fees and applications, keeps applicant files, sends notification of exam results, and issues temporary permits. Each of these responsibilities has been assigned by the Legislature to the Department of Commerce and Economic Development, Division of Occupational Licensing. The above situation exists because the previous Secretary believed he could be more efficient in maintaining the files and processing the applications. We disagree.

The Division of Occupational Licensing is able to provide continuous, uninterrupted service while Board membership changes causing address changes and file transfers.

Additionally, the Secretary of the Board may not be equipped with the space or security needed to maintain confidentiality of files and to safeguard State assets. Furthermore, applicants become confused about where to send their documents.

Noncompliance with AS 08.01.050 is the major cause of the following problems:

A. In seven of ten files reviewed for proper permanent licensure, we were unable to assure ourselves the applicant had passed the jurisprudence exam.

B. In two of the files, we were unable to verify the applicants had satisfied the internship requirement. The Board reviewed these files and was unable to satisfy us that the requirements had been met. One file was missing documentation and the other file had documentation we considered insufficient in relation to that required of other applicants. Most applicants were required to have certified copies of hours worked from supervising pharmacists. In this case, documentation consisted of an internship permit issued by the Board with no evidence any hours had been worked.

C. Temporary permits are being issued by individual Board members without complete documentation on file in DOL. This procedure has resulted in inconsistent issuances of temporary permits. Furthermore, it allows for the possibility of unqualified individuals being licensed.

Prior to the February 1983 Board meeting, we reviewed each application for permanent licensure scheduled for Board consideration. Each applicant had already been issued a temporary permit. In five of eleven cases, there was insufficient documentation in the applicant's file to show that all requirements for temporary licensure had been met.

By the time of the February 1983 meeting, all necessary documentation to support issuance of temporary permits, except for a jurisprudence exam, had either been received by OL or brought to the meeting by the Secretary of the Board. With the additional documentation, we determined that no temporary permit had been issued to an unqualified applicant. However, the possibility exists for a person to be improperly licensed for a short time.

The Board should ensure all documentation is sent directly to OL. When the file is complete, a member of the Board can either issue the permit or direct OL to issue the permit. This procedure will ensure that all necessary documentation is on file at OL before issuance of temporary permits.

D. Alaska Statute 08.80.157 requires proof that an applicant for a retail or wholesale pharmacy license has the land, facilities and equipment necessary to carry on business. Also, that the applicant be free of any conviction of a federal or state drug offense and free of any addiction.

We reviewed seven pharmacy files and none of the files contained sufficient documentation to issue a license. We discussed our finding with the Board and determined it was not their policy to include this documentation. They knew who had the facilities and relied on a telephone call from the Drug Enforcement Administration to satisfy the conviction requirement.

We believe the Board should adopt a policy to document satisfaction of the licensing requirements. The procedures need not be elaborate, but should supply sufficient proof that the applicant complies with law.

We recommend the Board ensure that all files, applications, fees and exam results are sent directly to OL. Also, that temporary permits are only issued after all documentation has been received by OL.

Recommendation No. 2

The Board of Pharmacy should reevaluate its regulations governing continuing education.

The following requirements of continuing education should be reviewed.

A. Regulations require nonacademic programs to have an examination or another method of assuring satisfactory completion of the program before continuing education credit will be given. The Board allowed continuing education credit to be given to an individual when the nonacademic requirement had not been met. The reason given for allowing these credits was that the regulations were too stringent.

   If the Board believes its regulations to be arbitrary or unreasonable, those regulations should be changed before accepting nonregulation continuing education credits. Compliance with existing regulations will ensure that all licensees are treated equally and consistently until changes can be made.

B. The Board has described four instances when they will excuse a licensee from continued competency requirements. These causes are chronic illness, retirement, military service, or hardships as individually determined by the Board.

   In our opinion, it is more reasonable to require individuals who have been chronically ill, retired or in the military to demonstrate their continued competency, than those who have not interrupted their practice. We also understand that those persons who have been chronically ill should not be penalized for their illness.

   However, the Board has the ability, under the hardship clause, to determine each case individually. They should evaluate the changes in the profession and develop a plan for the individual that would allow him or her to practice while fulfilling the continuing education requirements. This would fulfill the Board's primary purpose to protect the public while not unduly penalizing the professional.

Recommendation No. 3

The Board of Pharmacy and the Division of Occupational Licensing should introduce legislation that will clarify certain statutory requirements.

Alaska Statute 08.01.050(19) places the responsibility for

performing investigations with the Division; Alaska Statute 08.01.070 assigns to the Board the requesting authority. However, AS 08.80.030(3) also gives the Board the authority to conduct investigations. This conflict has caused friction between the Division and the Board.

The Board is concerned that the Division is not informing them of complaints or investigations concerning pharmacy, while the Division is concerned that the Board not become involved in the investigation to such an extent as to prejudice the case. Also, the Board must remain impartial in case they become involved in any disciplinary action against the licensee.

Legislation is necessary to clarify the responsibilities of the Board and the Division so both will be confident they are properly performing their statutory duties.

Recommendation No. 4

The Office of the Governor should ensure that Board members are properly appointed.

In July of 1980, the Legislature limited the number of consecutive terms a Board member could serve to two and reduced the term from five years to four. The intent of AS 08.80.020 as amended, was to make service on the Board accessible to more individuals in the profession.

In discussions with Legislative Affairs' attorneys, it became clear that the intent of the Legislature was to include service prior to July, 1980, in determining the limitation. Three members of the Board of Pharmacy have served longer than is allowed when prior service is applied.

One member has served for sixteen years as of March 31, 1983, thirteen of these years prior to July, 1980. This same member was reappointed after the effective date of AS-08.80.020. At the end of his present term, he will have served nineteen years. Two other members will have served twelve and ten years at the end of their present terms on March 31, 1984 and March 31, 1985, respectively.

Additionally, three members of the Board appointed after the effective date of the legislation, have been appointed for five year terms instead of four.

We recommend the Office of the Governor ensure that Board members are appointed in accordance with statute.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board has held public meetings three times a year.

B. The Board administers the pharmacy test yearly.

C. The Board has passed regulations concerning dangerous drugs, continuing education as proof of continued competency, false or misleading advertisement of drugs, and prepackaging of drugs in hospital drug rooms.

D. The Board was instrumental in passage of the Controlled Substance Act and the Marijuana Therapeutic Research Program.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board adopted continuing education regulations that may be too stringent. The Board is reconsidering these regulations (see Recommendation No. 2).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board actively supported passage of the Controlled Substance Act; it became effective January 1, 1983.

B. The Board succeeded in having various obsolete or vague statutory requirements repealed which provided for smoother operation of the Board.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. Board meetings are announced to the public. Comments on regulation changes are solicited by announcement in public newspapers. The Board does not actively solicit comments on its effectiveness.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board announces proposed regulation changes or additions in newspapers according to the Administrative Procedures Act.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board, or commission is administratively assigned, or with the Office of the Ombudsman have been processed and resolved.

A. We found no problems in this area.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. We found no instances where the Board had licensed unqualified practitioners.

B. The Board has licensed 83 pharmacists in the last three years, all but eight were licensed by credentials.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. Applications for licensure as a pharmacist require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with factors enumerated in this subsection.

Please refer to the recommendation section of this report.

(Intentionally left blank)

APPENDIX A

BOARD OF PHARMACY
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended June 30, 1982

(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$42,763
Less: Expenditures (Note 3)	46,166
Excess of Expenditures Over Revenues	$ 3,403

Revenue Type	Amount	Collection Time
Examination Fee	$ 50	With application
Re-examination Fee	15	With application
Investigation Fee	25	With application
Pharmacist Fee	200	With license issuance
Pharmacist Renewal Fee	200	Every four years
Temporary License Fee	20	With permit issuance
Wholesale Drug Dealer Fee	200	With license issuance
Wholesale Drug Dealer Renewal Fee	200	Every four years
Retail Pharmacy Fee	200	With license renewal
Retail Pharmacy Renewal Fee	200	Every four years
Pharmacy Interim Fee	10	With license issuance
Emergency Permit Fee	10	With permit issuance
Hospital Pharmacy Fee	200	With license issuance
Hospital Pharmacy Renewal Fee	100	Every four years
Hospital Drug Room Fee	100	With license issuance
Hospital Drug Room Renewal Fee	100	Every four years
Nursing Home and Related Facility Fee	100	With license issuance
Nursing Home and Related Facility Renewal Fee	100	Every four years
License Amendments or Renewal Fee	10	When applicable

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and accordingly we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of revenues collected.

Note 3

Expenditures include those made by board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments (such as the Department of Law) assisting the boards and the Division.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

June 28, 1983

Mr. Gerald Wilkerson, CPA
Legislative Auditor
Audit Division
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: Board of Pharmacy -
Performance Report

Thank you for the opportunity to respond to the performance audit of the Board of Pharmancy and the Division of Occupational Licensing which is dated July 1, 1980 to February 28, 1983.

We concur with your evaluation that the Board of Pharmacy should continue to exist in interest of the public's health and safety. Your suggestions will be evaluated for implementation. Those determined to improve the efficiency and effectiveness of the division and the board will be strongly supported and recommended. We have reviewed each of your recommendations and will provide you with this agency's position if we do not agree.

RECOMMENDATION #1.

The board of Pharmacy should allow the Division of Occupational Licensing (DOL) to perform its administrative duties as described in AS 08.01.050 to improve documentation and file management.

We concur in this recommendation, and cooperative efforts have recently improved. As mandated by legislation, and in the interest of efficiency, DOL is committed to assisting the Board of Pharmacy in all areas.

RECOMMENDATION #2.

The Board of Pharmacy should reevaluate its regulations governing continuing education.

08-H2LH

This agency is continuing a review on requirement of continuing education by licensing agencies (boards). We do not agree that continued education ensures continued competency. As a licensing agency we determine that competency is the most important. Competency ensures the safety of the consumer. We also take the position that initial licensing is based on minimum qualifications; retesting on the entrance level may serve the purpose of ensuring continued competency. Continued education would, or should, be viewed as the professional association's responsibility to ensure knowledgeable professionals. This would also be in keeping with less government regulations and letting industry regulate itself.

RECOMMENDATION #3.

The Board of Pharmacy and the Division of Occupational Licensing should introduce legislation that will clarify certain statutory requirements.

We concur with this recommendation. This agency has been working with the Legislative Code Revision Committee in rewriting Title 8. This would have deleted the fragmentation throughout Title 8 and the various chapters. This effort was resisted by the board as an effort to diminish its authority. We will seek to have legislation submitted to clarify the issue of conflict within the statutes.

RECOMMENDATION #4.

The Office of the Governor should ensure that board members are properly appointed.

We would assure the auditors this has been addressed by the Governor's Office and by the Department of Law.

Again, thank you for the opportunity to respond to your re[illegible]lease feel free to contact this agency or the Division of Occupa[illegible]i-censing if additional information or clarification is needed[illegible]ssured, we determine your comments and findings to be fair and in the interest of Alaskan consumers and professional pharmacist.

Sincerely,

Richard A. Lyon
Commissioner

SENATE
LETTER OF INTENT

It is the intent of the Senate Labor and Commerce Committee to extend the existence of the Board of Barbers and Hairdressers one year until July 1, 1985. During this period of time a committee composed of, but not limited to, representatives from the current Board Members, practicing barbers and/or hairdressers, Office of the Governor, Division of Occupational Licensing, and Legislature will review the current statutes and regulations governing the operations of the Board of Barbers and Hairdressers.

This committee will review: 1) recommendations proposed by the Division of Legislative Audit in the Performance Report of April 29, 1983; 2) public testimony taken during the current Sunset Review process; and 3) other concerns brought to the attention of this committee. Necessary statutory and/or regulatory changes will be proposed by the committee to the 14th Legislature for consideration.

Adopted by the Senate 4/26/84.

HOUSE LABOR AND COMMERCE COMMITTEE

MEMORANDUM

To: All Committee Members

From: Committee Staff

RE: CSSB 438 "Relating to the State Board of Architects, Engineers, and Land Surveyors."

As a result of "Sunset Review", legislation was drafted which would extend the the Board of Architects, Engineers, and Land Surveyors through 1988 and make changes in statutes which govern the board. The legislation, SB 438 was amended by the Senate Labor and Commerce Committee to include the following changes:

1. The term of a board member is reduced from six years to four years.
2. A public member is added and the requirement that a mining engineer be named to the board was deleted.
3. A requirement for proven continued competency was added to statute.

The House Labor and Commerce Committee substitute deletes the last two statute changes made in the Senate Labor and Commerce Committee substitute.

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

April 15, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the provisions of Titles 24 and 44 of the Alaska Statutes (sunset), the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE
BOARD OF REGISTRATION FOR
ARCHITECTS, ENGINEERS,
AND LAND SURVEYORS

July 1, 1980 - April 15, 1983

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Registration for Architects, Engineers, and Land Surveyors for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Registration for Architects, Engineers, and Land Surveyors should be reestablished. The law now specifies that this Board will terminate on June 30, 1984, and have one year from that date to conclude its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.

2. Interviews with Board members.

3. Tests of files and documents of licensees.

4. Interviews with license examiners.

5. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman's Office.

6. Minutes of Board meetings and Division correspondence files.

7. Attorney General's opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Architects, Engineers, and Land Surveyors is a regulatory board with nine members consisting of two civil engineers, one land surveyor, one mining engineer, two engineers from other branches of the engineering profession, and three architects.

The Board sets the minimum standards to practice in Alaska by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing, amending, or eliminating regulations controlling architect, engineer, and land surveyor practices.

3. Revoking, annulling, or suspending licenses in accordance with the Administrative Procedures Act when a person has violated architect, engineer, and land surveyor statutes or regulations.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committees should take into consideration the findings and recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Board of Registration for Architects, Engineers, and Land Surveyors should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

However, the following findings describe areas where weaknesses or conflicts exist. We have made recommendations which, if implemented, will improve the efficiency and effectiveness of the Board.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

Legislation should be introduced requiring continuing education for architects, engineers, and land surveyors.

Architects, engineers, and land surveyors must demonstrate a high degree of educational and practical competence before they can become registered in Alaska. However, renewal of certificates is not dependent upon evidence of a professional's continued competence.

In our questionnaire to registered professionals, 93% of the architects, 78% of the engineers, and 64% of the land surveyors responding reported that they had attended courses and/or seminars in the last two years. Most were concerned, however, that continuing education requirements would be too narrowly defined or too difficult to satisfy. To address these concerns, there must be active involvement by individuals and professional societies in the development of continuing education standards.

Architects, engineers, and land surveyors are acutely aware of the public's trust that they maintain their professional competency. Required continuing education is one means of fulfilling that trust. In addition, a program of continuing education will assist in avoiding professional obsolescence and keep practitioners aware of changes taking place in the profession.

Recommendation No. 2

The Board should repeal its anticompetitive and restrictive regulations prohibiting competitive bidding (12 AAC 36.230(b)).

We reviewed the Board's regulations to determine if they are anticompetitive and restrictive. Regulation 12 AAC 36.230(b) provides that an architect, engineer, or land surveyor may not knowingly solicit or submit proposals for professional services on the basis of competitive bidding. We find this regulation restrictive, anticompetitive, and absent of clear and statutory policy to restrain competition.

This point of view is supported by memorandum A66-191-79A from the Attorney General's Office dated October 29, 1980. That memo states in part:

> There must exist clear statutory policy to restrain competition before a state regulatory agency may promulgate regulations to restrain competition if federal antitrust immunity is to occur. No direct

authorization for such an anticompetitive provision [12 AAC 36.230(b)] appears in the statutes. In such a situation, federal courts have specifically held such regulations to be violative of antitrust law.

This regulation is now being challenged by the United States' Department of Justice in the Anchorage Federal District Court (U.S. v. AK Board of Registration for Architects, Engineers, and Land Surveyors).

Recommendation No. 3

The Board should approve for examination only those applicants eligible to take the examination.

The Board has approved applicants for the fundamentals of engineering examination when they do not meet the eligibility requirements for the examination. 12 AAC 36.062 requires successful completion of at least 85% of an accredited engineering curriculum, or, if curriculum is unaccredited, a number of years in experience. At a November, 1982, Board meeting and a February, 1983, Board meeting, applicants were approved for examination who were in an unaccredited curriculum and did not have the requisite experience.

While we do not question the quality of the applicants approved for examination, we do believe that if the Board no longer believes that these requirements are necessary, they should propose regulation changes that would ensure that all applicants would be treated in a consistent and fair manner.

Recommendation No. 4

In order to ensure that the Board adequately represents the general public, the qualifications and conditions of Board membership should be reviewed and amended.

AS 08.48.011-.031 creates the State Board of Registration for Architects, Engineers, and Land Surveyors, specifies the qualifications and professions of the nine Board members, and establishes the members' terms of office. In order that the Board better represent the general public, these statutory provisions should be reevaluated. Some specific areas that should be reevaluated are:

A. The Board is the only licensing board that has no lay representation. In general, lay members with no direct financial interest in the regulated professions can and should contribute to policy formulation and enforcement decisions. It should be recognized that the public is the ultimate interest group and we recommend, as we did in the 1979 audit, that at least two lay members be included on the Board.

B. The term of Board members is currently set at 6 years with no limitation on the number of terms that can be served by one individual. This Board is the only licensing board that has a six year term for its members and only two other State licensing boards have an unlimited number of terms that can be served by their members. Such conditions might hamper the flow of new ideas since individuals could serve for an extended period of time. We recommend that a statutory change be considered to limit the number of terms a Board member can serve as well as reducing the years in a Board member's term.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our examination.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board holds at least four regular meetings each year.

B. The Board holds written exams at least twice each year, except for certain national examinations that are held only once a year.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board approved engineer in training (EIT) applicants for the fundamentals of engineering examination when the applicants did not meet the eligibility requirements of 12 AAC 36.062 (see Recommendation No. 5).

III. The extent to which the board, commission, or agency has recommended statutory changes which are generally of benefit to the public interest

A. The Board adopted regulations that clarified various vague statutory and regulatory requirements.

IV. The extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. The Board has advertised certain proposed regulations changes in only one city. The Board does not actively solicit comments on its effectiveness.

V. The extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

A. Certain examinations and meetings have not been advertised in an adequate and timely manner.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the Office of the Ombudsman have been processed and resolved.

A. The Attorney General's Office has record of a case filed against the Board by the United States' Department of Justice concerning the Board's regulation banning competitive bidding. (12 AAC 36.230(b)). This case is pending in U.S. District Court (see Recommendation No. 4).

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. We found no instances where the Board had licensed unqualified practitioners.

B. Architects, engineers, and land surveyors are not required to demonstrate their continued competence through a continuing education program (see Recommendation No. 1).

VIII. The extent to which State personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

A. Applications for licensure require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendations.

APPENDIX

(Intentionally left blank)

APPENDIX A

BOARD OF REGISTRATION FOR ARCHITECTS
ENGINEERS, AND LAND SURVEYORS
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ending June 30, 1982
(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$108,052
Less: Expenditures (Note 3)	99,967
Excess Revenues Over Expenditures	$ 8,085

Schedule 1
Type of Revenues (See Note 2)

Revenues	Amount	Collection Time
Application for Examination Fee		
(A) NCARB Examination		
(i) Qualifying Exam	$50	With application
(ii) Section A	$50	With application
(iii) Section B	$75	With application
(B) NCEE Examination	$50/exam	With application
Reexamination Fee	$50/exam	Upon reexam
Comity Application Fee	$50	With application
Corporate Authorization Application Fee	$100	With Application
Individual Registration Fee	$15/year	Renewals paid biennially; new registrants pay $15/year for balance of biennial period.
Corporate Authorization Registration Fee	$50/year	Renewals paid biennially; new registrants pay $50/year for balance of biennial period.
Amendment to Corporate Authorization	$20	With amendment
Delinquent Renewal Fee	$30	With reinstatement
Postponement of Examination Fee	$20	With request for postponement
Late Fee Fine	$10	With late payment
Improper Payment Fine	$10	When payment is found to be improper

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and, accordingly, we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenue in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of collected revenues.

Note 3

Expenditures include those made by Board members, such as travel and per diem and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments, such as the Department of Law, assisting the boards and the Division.

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

OFFICE OF THE COMMISSIONER

August 11, 1983

Mr. Gerald Wilkerson
Legislative Auditor
Legislative Audit Division
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Thank you for the opportunity to comment on the preliminary findings of your audit of the Board of Registration for Architects, Engineers and Land Surveyors. The following comments address each recommendation individually:

Recommendation No. 1: Legislation should be introduced requiring continuing education for architects, engineers and land surveyors.

The department is in substantial agreement with the intent of this recommendation. However, we feel that the emphasis of legislation should be put on continuing competency rather than on continuing education per se. It is appropriate for the State as a licensing agency to be concerned with continuing competency and with continuing education only to the extent that it is a vehicle for assuring competency and necessary public protection.

By focusing on continuing education exclusively, we are equating education and competency. The effectiveness in continuing education as a vehicle for assuring continuing competency is still open to debate. It would be premature to end that debate through legislation.

Additionally, both administrative costs and increased costs to the consumer must be considered.

Any additional costs that a professional incurs gets passed on to the consumer in the form of higher fees. The costs of services will increase to the extent that professionals are not presently taking continuing education courses. Yet, it is not known whether there will actually be an increase in public protection.

08-H2LH

Similarly, continuing education programs can be very expensive to administer and would probably require that an additional staff person be hired. There are presently 4,000 active licensees under the Board of Registration for Architects, Engineers and Land Surveyors. Assuming that the continuing education regulations are straightforward enough to be completely administered by the licensing examiner, this means that at a minimum, the Division of Occupational Licensing will have to manage an additional 4,000 pieces of paper every two years.

In this connection, it should also be borne in mind that approximately 95% of the active files are presently stored in Archives. Continuing competency requirements would most likely generate a need for the files to be kept in the office to be managed properly. There would also be a significant increase in both telephone calls and written correspondence, especially during the phasing in of the new regulations.

If the board review were required as part of the new continuing education requirements, the workload would increase that much more dramatically. Between FY '80 and FY '82, the State has experienced an increase of over 100% in the number of new applications for licensure received. At the present, this board is understaffed.

Since it is not known whether continuing education leads to a greater public benefit through continuing competency, serious consideration should also be given to funding research to determine whether present and proposed regulation in this area is actually effective.

Recommendation No. 2: The board should repeal its anticompetitive and restrictive regulations prohibiting competitive bidding (12 AAC 36.230(b).

The department concurs with this recommendation.

Recommendation No. 3: The board should approve for examination only those applicants eligible to take the examination.

The department concurs with this recommendation.

Recommendation No. 4: In order to ensure that the board adequately represents the general public, the qualifications and conditions of board membership should be reviewed and amended.

The department concurs with the recommendation and specifically with the suggestions contained therein for the addition of at least two public members and limitations on the terms of board members.

Sincerely,

Richard A. Lyon
Commissioner

RAL/kkk/C32

(1) at all times recognize his primary obligation to protect the safety, health, property, and welfare of the public in the performance of his professional duties; if his professional judgment is overruled under circumstances where the safety, health, and welfare of the public are endangered, he shall inform his employer or client of the possible consequence and notify such other proper authority of the situation as may be appropriate; and

(2) undertake to perform assignments only when he or his associates, consultants, or employees are qualified by education, training, experience, and licensing in the specific technical branches or fields involved;

(3) be completely objective and truthful in all professional reports, statements, or testimony and shall include all relevant and pertinent information in such reports, statements, or testimony when the result of an omission would, or reasonably could, lead to a fallacious conclusion; and

(4) not affix his signature or seal to any plan or document dealing with professional services in which he is not qualified by virtue of education, experience, and licensing; and

(5) issue no statements, criticisms, or arguments on architectural, engineering, or land surveying matters connected with public interests which are inspired or paid for by his interested party or parties unless he has prefaced his comment by explicitly identifying himself by disclosing the identities of the party or parties on whose behalf he is speaking, and by revealing the existence of any pecuniary interest. (Eff. 5/23/74, Reg. 50; am 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)
AS 08.48.111

12 AAC 36.220. CONFLICT OF INTEREST. (a) Each architect, engineer, or land surveyor shall avoid conflicts of interest with his employer or client but, when unavoidable, the architect, engineer, or land surveyor shall promptly inform his employer or client of any business association, interests, or circumstances and identify any circumstances which could influence his judgment or the quality of his service to his employer or client.

(b) An architect, engineer, or land surveyor may not accept compensation, financial or otherwise, from more than one party for services on the same project or for services pertaining to the same project unless the circumstances are fully disclosed to and agreed to by all interested parties or their authorized agents.

(c) An architect, engineer, or land surveyor may not solicit or accept financial or other valuable consideration from suppliers for specifying their products.

(d) An architect, engineer, or land surveyor may not solicit or accept gratuities from other parties dealing with his client or employer in connection with the work for which he is responsible. (Eff. 5/23/74, Reg. 50; am 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)(5)

12 AAC 36.225. PUBLIC SERVICE. When in public service as a member, advisor, or employee of a government body, an architect, engineer, or land surveyor may not participate in considerations or actions with respect to services provided by him or his organization. An architect, engineer, or land surveyor, in his capacity as an elected, retained, or employed public official, may not review or approve work that he has performed, whether it was under his direction or on behalf of another employer or client. (Eff. 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)(5)

12 AAC 36.230. SOLICITATION OF EMPLOYMENT. (a) An architect, engineer or land surveyor may not pay, solicit nor offer, directly or indirectly, any bribe or commission for professional employment with the exception of his payment of the usual commission for securing salaried positions through licensed employment agencies.

(b) Deleted 11/18/83.

(c) An architect, engineer or land surveyor may not falsify or permit misrepresentation of his or her associates' academic or professional qualifications. He may not misrepresent or exaggerate his degree of responsibility in or for the subject matter of prior assignments.

(d) Brochures or other presentations incident

to an architect's, engineer's or land surveyor's solicitation of employment may not misrepresent pertinent facts concerning employers, employees, associates, joint ventures, or his or their past accomplishments with the intent and purpose of enhancing his qualifications and his work. (Eff. 5/23/74, Reg. 50)

Authority: AS 08.48.101
AS 08.48.111

Editor's Note: As of Register 88, Jan. 1984, 12 AAC 36.230(b) was deleted by the regulations attorney under AS 44.62.125 (b)(6) and in accordance with a Stipulation and proposed Final Judgment filed on November 18, 1983 by the Board of Architects, Engineers and Land Surveyors and the United States Department of Justice in the United States District Court for the District of Alaska in United States v. Alaska Board of Registration for Architects, Engineers and Land Surveyors, Civil Action No. A82-423 CIV. This Stipulation and proposed Judgment were filed because 12 AAC 36.230(b) was in violation of section 1 of the Sherman Antitrust Act [15 U.S.C. § 1 (1977)]. The proposed Final Judgment which may become final on or soon after January 16, 1984 will, also prohibit further enforcement of any ban or board policy against competitive bidding.

12 AAC 36.235. ADVERTISING. An architect, engineer, or land surveyor may not advertise his or her services in a deceptive or untruthful manner. (Eff. 9/30/78, Reg. 67; am 5/30/82, Reg. 82)

Authority: AS 08.48.101(a)(5)

12 AAC 36.240. IMPROPER CONDUCT. (a) An architect, engineer, or land surveyor may not knowingly associate with or permit the use of his name or firm name in a business venture by any person or firm which he knows or has reason to believe is engaging in business or professional practices in a fraudulent or dishonest manner.

(b) If an architect, engineer, or land surveyor has knowledge or reason to believe that another person or firm may be in violation of the provisions of AS 08.48, or any of these rules of professional conduct, he or she shall present that information to the board in writing and shall cooperate with the board in furnishing such further information or assistance as may be required. (Eff. 5/23/74, Reg. 50; am 9/30/78, Reg. 67)

RE: SB 456 RELATING TO EMBALMER AND FUNERAL DIRECTOR TRAINEES

UNDER THE CURRENT ALASKA STATUTES A PERSON INTERESTED IN PURSUING A CAREER AS AN EMBALMER OR A FUNERAL DIRECTOR MUST GRADUATE FROM A SCHOOL OF MORTUARY SCIENCE BEFORE BEING ALLOWED TO DO AN APPRENTICESHIP IN THE STATE. SINCE THERE ARE NO SCHOOLS OF THIS NATURE IN ALASKA ONE MUST TAKE RESIDENCE OUTSIDE TO STUDY IN THIS FIELD. SB 456 WOULD ALLOW ALASKANS TO APPRENTICE BEFORE GOING OUTSIDE FOR SCHOOLING SO HE OR SHE COULD GET A BETTER IDEA OF WHAT THE PROFESSION IS REALLY LIKE BEFORE LAYING OUT THE TIME AND MONEY FOR THE EDUCATION.

QUESTIONS:

1. HOW MANY EMBALMER OR FUNERAL TRAINEES ARE GOING TO BE AFFECTED BY THIS LEGISLATION ?

2. ISN'T THERE SOME NEED FOR FORMAL TRAINING BEFORE ENTERING AN APPRENTICESHIP ? SUCH PROGRAMS ARE TRADITIONALLY DONE AFTER THE EDUCATION ?

3. No Fees? How many other Trainees have
No Fee's charged.

Bill No. Committee Substitute for House Bill No. 540 (L&C) Date

Title "An Act relating to contractors' payment bonds." Contact: Eileen Plate 465-2700
Bob Bacolas 465-4870

Committee Substitute for House Bill No. 540 makes editorial changes to provisions in Title 36 with respect to action against a contractor's payment bond by persons performing labor for subcontractors on public construction projects. In this regard, the bill provides a sample form for a person performing labor for a subcontractor to notice the contractor when a claim for payment of labor is filed against the contractor's bond. The sample form will assist persons performing labor in filing adequate notice as it depicts the specific information which must be included.

The committee substitute also contains a number of more significant changes to Title 36 with respect to action against a contractor's payment bond by persons who supply materials, supplies, or equipment to subcontractors on public construction projects. Inasmuch as persons who supply materials, supplies or equipment on public construction projects fall outside of the department's authority or responsibility as far as collection of monies due them, we have no comments on these particular provisions.

The Department's position on Committee Substitute for House Bill 540 is neutral. It will not have a fiscal impact on the Department.

MEMO TO: Representative John Cowdry, Chair
House Labor and Commerce Committee

FROM: Senator Paul Fischer PF.

SUBJECT: Senate Bill 456

SB 456, "An Act relating to embalmer and funeral director trainees," enables a person at least 18 years of age to undertake a traineeship with a suitably licensed embalmer or funeral director prior to that person's completing the necessary schooling required for licensure. The purpose of this bill is to permit a person to gain some experience in the profession of embalming or funeral directing without having to leave Alaska, prior to undertaking the formal academic program in fulfillment of the requirements for licensure.

As presently structured, Alaska Statutes require a person seeking to become an embalmer or funeral director to complete a required academic curriculum prior to undertaking any traineeship. An embalmer is required to graduate from an accredited college of mortuary science, a minimum two-year program. There are no such schools in Alaska, and the individual must therefore make a great expenditure of time and funds to receive the degree prior to returning to Alaska to undertake a traineeship. A funeral director candidate must have completed a year of college prior to undertaking a traineeship.

By permitting traineeships prior to completion of the academic curriculum, an individual will have an opportunity to get a realistic idea of the requirements of the profession and determine whether or not to then pursue the necessary academic course of study to become a professional embalmer or funeral director. There are currently 102 licensed embalmers, funeral directors, and funeral establishments in Alaska.

If any additional information in support of SB 456 is needed, please let me know.

SB

470

CSSB470(L&C) Section by Section Analysis. 3/15/84

This proposal upgrades the Unauthorized (nonadmitted) Insurers Act and the Surplus Lines Insurance Act to comport with the recently adopted models of the National Association of Insurance Commissioners(NAIC). Currently, these two acts, along with a third, the Unauthorized Insurers Service of Process Act appear in AS 21.33.

This proposal continues the Unauthorized (nonadmitted) Insurers Act and the Unauthorized Insurers Service of Process Act in AS 21.33. Access to that market is more clearly stated. Most of the changes in AS 21.33 are not substantive. However the Surplus Lines Insurance Act has been removed from AS 21.33 and placed in a new chapter, AS 21.34. This chapter makes some substantial revisions with respect to how a surplus lines business can be conducted in this state. It will give the regulator a clearer ability to deal with the competence of the licensee and provide more meaningful protection for the public through:
-clarification of the duties and responsibilities of the licensee;
-higher financial requirements for the nonadmitted insurer;
-permission to form a surplus lines association with an active role in regulating the market; and,
-allowing admitted markets to compete with the nonadmitted markets.

Section 1. Page 1, lines 8-17.
Current law provides that when the state examines an insurance company, the insurance company pays for that examination. A surplus lines broker is also subject to examination but does not pay for that examination. The position of the surplus lines broker is in many respects similar to an insurer, particularly when the broker has utilized an insurer that is not able to meet its obligations. This section provides that the surplus lines broker must also meet the cost of its examination.

Section 2. Page 1, lines 18-29 & page 2, lines 1-7.
The change here is on page 1, lines 24-25. This section ties in with Section 1. It lists those entities subject to examination without charge.

Section 3. Page 2, lines 8-29 & page 3, lines 1-3.
This rewrite of the purpose section does not contain substantive changes. It is formatted in a more readable form and the application of the chapter to surplus lines brokers has been deleted.

Section 4. Page 3, lines 4-24.
The changes in this section are editorial. The phrase "doing an insurance business" has been changed to "transaction of insurance", and gender oriented references have been changed.

Section 5. Page 3, lines 25-29 & page 4, lines 1-13.
This section contains more of the same changes noted in Section 4. No substantive change.

Section 6. Page 4, lines 14-29 & page 5, lines 1-8.
The changes in this section are similar to those in Section 4. No substantive changes.

Section 7. Page 5, lines 9-29 & page 6, lines 1-4.
The difference here is found on page 6, lines 2-4. It is primarily a clarification. No substantive change.

Section 8. Page 6, lines 5-13.
Changes similar to those in Section 4.

Section 9. Page 6, lines 14-26.
The sole change in this section is the insertion of the word "nonadmitted" on line 16. This has been done in several of the earlier sections without comment. It is a clarification, and ond that is defined in the definition section on page 12, lines 15-18. Previously the words "insurer", "nonadmitted insurer", and, "unauthorized insurer" have been used synonymously. That is inconsistent and has led to some confusion. This change should clear up that situation.

Section 10. Page 6, lines 27-29 & page 7, lines 1-29.
This section is a consolidation of several other sections. (a) replaces AS 21.33.015 with no substantive difference. (b) replaces AS 21.33.075 with some shift in an individuals ability to enter and use the nonadmitted market place. This ability is broadened in this bill by removing the specific description of an industrial insured found in AS 21.33.075(9). (c) replaces the combination of AS 21.33.015 and AS 21.33.075(6) with no substantive difference. (d) replaces AS 21.33.041 with no substantive difference.

Section 11. Page 8, lines 1-24.
This is a new section and it limits a nonadmitted insurers access to Alaska courts. This is as to those not placed through a surplus lines broker in AS 21.34. It clarifies the standing of those insurers.

Section 12. Page 8, lines 25-29 & page 9, lines 1-6.
This is the same kind of change noted in Section 9. One additional change is that access by the director to an insureds purchases in the admitted or authorized market has been removed. This ability to access admitted purchases is probably unreasonable when placed on the insured. Presumably access to these records through other sources is sufficient.

Section 13. Page 9, lines 7-13.
This section reinforces the ability of the director to obtain records and information under this section. This is accomplished by allowing the director to apply for a court order to compel production of records and information.

Section 14. Page 9, lines 14-29 & page 10, lines 1-10.
"Unauthorized" has been changed to "nonadmitted" as noted in section 9. The penalty provision has been revised so that it is more readily calculable. This penalty will generally be stiffer than that now provided.

Section 15. Page 10, lines 11-26.
More editorial changes like those in section 9. Since the surplus lines law has been removed from AS 21.33 and placed in AS 21.34, that reference has been noted. The time for reporting has been shortened from 60 days to 30 days.

Section 16. Page 10, lines 27-29 & page 11, lines 1-6.
Same editorial change noted in section 9.

Section 17. Page 11, lines 7-15.
The penalty provision has been upgraded in the same fashion as section 14.

Section 18. Page 11, lines 16-21.
This section is intended to avoid any potential conflict with new sections AS 21.33.037 and AS 21.33.042.

Section 19. Page 11, lines 22-29 & page 12, lines 1-4.
This section upgrades the penalty section by increasing the per violation penalty from $500 for the first offense to $1,000 and by increasing the second offense penalty from $500 to $2,000. A new penalty is also structured for allowing a violation to continue uncorrected in the amount of $1,000 for each month of continuation.

Section 20. Page 12, lines 5-29 & page 13, lines 1-25.
This definition section is new. There is nothing representing a substantive difference from current law except in (9)(A) where vessels of 50 displacement tons or less are not included in the definition of marine and are therefor included in the requirements of this proposed law.

Section 21. Page 13, lines 26-29, all of pages 14-30, & page 31, lines 1-16
This section adds a new chapter to the insurance code dealing with surplus lines insurance. This chapter has essentially been removed from AS 21.33. A number of changes have been made to provide for a stronger regulation of the surplus lines market. This is accomplished by strengthening the financial requirements of a company in that market before it can be used in this state. The line of responsibility for the surplus lines broker is clarified. The bill permits the creation of a surplus lines association that can have a substantial self-regulatory role which has experienced substantial sucess in California and in Washington. This would allow the division to more effectively use its resources to avoid problems for persons insured in that market.

Sec 21.34.010. Page 13, lines 28-29 & page 14, lines 1-14.
This is the purpose section for the new chapter

Sec 21.34.020. Page 14, lines 15-23
This section conditions what can be placed in the nonadmitted market. There is no substantive difference from current law.

Sec 21.34.030. Page 14, lines 24-29 & page 15, lines 1-12.
This section permits workers compensation to be written in the surplus lines market provided the director finds it to be in the public interest. It is substantially the same as current law except that this proposal has financial requirements that are higher than other placements in that market.

Sec 21.34.040. Page 15, lines 13-29 & page 16, lines 1-29.
This section substantially increases the minimum capital and surplus requirements used in the surplus lines market. It also recognizes distinctions among insurers, Lloyds type organizations, and insurance exchanges.

Sec 21.34.050. Page 17, lines 1-9.
This section is a new provision which substantially tracks current practice. It provides for the listing of eligible surplus lines insurers. It also permits the surplus lines association to perform that task when approved by the director.

Sec 21.34.060. Page 17, lines 10-23.
This section requires that when a policy is written by more than one insurer and one or more of those insurers are not eligible, the insured must be notified. This prevents a practice where some brokers conceal the fact that there are ineligible insurers on a risk. One way that this is done is to list the insurers as "underwriters at Lloyd's and other companies." The division does not accept this practice now, but is not certain that even in those cases where we correct it, the insured is adequately informed. A little information at this stage can prevent a lot of problems later.

Sec 21.34.070. Page 17, lines 24-29 & page 18, lines 1-11.
This section establishes a procedure for removing an insurer from the eligible list and sets forth a notice requirement to all licensees.

Sec 21.34.080. Page 18, lines 12-29.
This section is similar to an existing requirement to file affidavits of coverage. It adds a requirement on the surplus lines broker to provide evidence of insurance to an insured within 30 days of placement of the coverage. It also provides that these filing requirements may be transferred to the surplus lines association upon an order by the director.

Sec 21.34.050. Page 19, lines 1-29 & page 20, lines 1-15.
This section permits the formation of a surplus lines association and sets forth the powers and purposes for which it may be formed. It establishes the requirements for its formation and makes it subject to examination by the director. It provides that the director may require membership in the association as a condition of licensure in this state.

Sec 21.34.100. Page 20, lines 16-29, all of page 21, & page 22, line 1.
This section describes the evidence of insurance which a surplus lines broker must provide for an insured. The basic idea is to require a full disclosure of the facts relating to a placement in the nonadmitted market. This also applies to changes made in coverage. The broker is required to maintain a full copy of all documents pertinent to the insurance transaction. A warning is required to apprise the insured that a policy placed in the nonadmitted market is not covered by the Alaska Insurance Guaranty Association Act.

Sec 21.34.110. Page 22, lines 2-13.
This section provides that the insured has no liability for premium until the broker has provided a notice to the insured to the effect that the insurer is nonadmitted, and there is no insolvency protection provided under state law. This is a new approach.

Sec 21.34.120. Page 22, lines 14-16.
This is similar to present law. I provides that contracts in the surplus lines market place are valid contracts.

Sec 21.34.130. Page 22, lines 17-22.
Section provides that payment to the broker is payment to the insurer.

Sec 21.34.140. Page 22, lines 23-29, all of page 23, and page 24, lines 1-6.
This section sets forth the licensing standards and requirements for a surplus lines brokers license. The requirements are not substantially different than those in current law. The bond requirement is higher. This proposal does permit nonresident surplus lines brokers licensees. (e) does provide a penalty for late renewal of license.

Sec 21.34.150. Page 24, lines 7-12.
This section clarifies the scope of a surplus lines brokers license. It allows the surplus lines broker to accept business from other surplus lines brokers and other brokers but not from agents.

Sec 21.34.160. Page 24, lines 13-29 & page 25, lines 1-11.
This section clearly outlines the kinds of records that must be maintained by a surplus lines broker and that such records must be open for examination by the director.

Sec 21.34.170. Page 25, lines 12-18.
This section requires a monthly report of business placed in the sulplus lines market.

Sec 21.34.180. Page 25, lines 19-29 & page 26, lines 1-27.
This section is substantially the same as current law. The premium tax is established here and the director may have the tax collected by the surplus lines association. The director has the ability to establish adequate safeguards to protect the monies collected in this fashion.

Sec 21.34.190. Page 26, lines 28-29 & page 27, lines 1-3.
A filing fee of 1% is established. This is presently at 1/2%.

Sec 21.34.200. Page27, lines 4-21.
This section provides for two alternate means of tax collection. The first is by the director in the usual manner. The second is by the surplus lines association upon an order by the director after establishing those safeguards deemed appropriate.

Sec 21.34.210. Page 27, lines 22-29 & page 28, lines 1-16.
In the current law, the director has discretionary suspension or revocation authority. The restructuring found in this section is more specific and lists those actions which can result in suspension or revocation.

Sec 21.34.220. Page 28, lines 17-28.
This section ties into AS 21.33 for service of process on a nonadmitted insurer used through the surplus lines market. The presence of a nonadmitted insurer on a surplus lines contract assumes that the insurer has subjected itself to AS 21.34.

Sec 21.34.230. Page 28, line 29 & page 29, lines 1-7.
This penalty section is an upgrade from the present law. It also includes an ability to take action under AS 21.33.320-330 in the unfair trade practices act.

Sec 21.34.240. Page 29, lines 8-12.
Separability section.

Sec 21.34.250. Page 29, lines 13-14.
This section enables the director to promulgate those regulations necessary to implement, define and enforce the provisions of this new chapter.

Sec 21.34.900. Page 29, lines 15-28, all of page 30, & page 31, lines 1-14.

The definitions here take the same explanation as those in Sec 20. There are a few additional definitions but these are not substantively different than current usage in the insurance code.

Sec 22. Page 31, lines 15-19.
This added section in the unfair trade practices act makes it an unfair trade practice to fail to make the required disclosures and reports.

Sec 23. Page 31, lines 20-29 & page 32, lines 1-2.
This section gives admitted insurance companies the ability to compete with the nonadmitted market. It ties in with sections 24 & 25.

Sec 24. Page 32, lines 3-9
This section ties in with Sec 23 and Sec 25 in allowing the admitted market to compete with the nonadmitted market. This is accomplished by providing these exceptions in the rate law which has to date acted as an impediment to that kind of competition.

Sec 25. Page 32, lines 10-15.
This section ties in with the previous two sections. It specifies those conditions under which an admitted insurer can work outside of its filings made with the director. This provides the ability to directly compete with the surplus lines market. This is in the public interest since most admitted market coverages are protected by the guaranty association act.

Sec 26. Page 32, lines 16-17.
This section repeals those sections in AS 21.33 which are no longer needed or have been replaced in the new chapter in section 21.

SB470 Section by Section Analysis.

This proposal upgrades the Unauthorized (nonadmitted) Insurers Act and the Surplus Lines Insurance Act to comport with the recently adopted models of the National Association of Insurance Commissioners(NAIC). Currently, these two acts, along with a third, the Unauthorized Insurers Service of Process Act appear in AS 21.33.

This proposal continues the Unauthorized (nonadmitted) Insurers Act and the Unauthorized Insurers Service of Process Act in AS 21.33. Access to that market is more clearly stated. Most of the changes in AS 21.33 are not substantive. However the Surplus Lines Insurance Act has been removed from AS 21.33 and placed in a new chapter, AS 21.34. This chapter makes some substantial revisions with respect to how a surplus lines business can be conducted in this state. It will give the regulator a clearer ability to deal with the competence of the licensee and provide more meaningful protection for the public through:
-clarification of the duties and responsibilities of the licensee;
-higher financial requirements for the nonadmitted insurer;
-permission to form a surplus lines association with an active role in regulating the market; and,
-allowing admitted markets to compete with the nonadmitted markets.

Section 1. Page 1, lines 8-17.
Current law provides that when the state examines an insurance company, the insurance company pays for that examination. A surplus lines broker is also subject to examination but does not pay for that examination. The position of the surplus lines broker is in many respects similar to an insurer, particularly when the broker has utilized an insurer that is not able to meet its obligations. This section provides that the surplus lines broker must also meet the cost of its examination.

Section 2. Page 1, lines 18-29 & page 2, lines 1-7.
The change here is on page 1, lines 24-25. This section ties in with Section 1. It lists those entities subject to examination without charge.

Section 3. Page 2, lines 8-29 & page 3, lines 1-3.
This rewrite of the purpose section does not contain substantive changes. It is formatted in a more readable form and the application of the chapter to surplus lines brokers has been deleted.

Section 4. Page 3, lines 4-24.
The changes in this section are editorial. The phrase "doing an insurance business" has been changed to "transaction of insurance", and gender oriented references have been changed.

Section 5. Page 3, lines 25-29 & page 4, lines 1-13.
This section contains more of the same changes noted in Section 4. No substantive change.

Summary

Section 6. Page 4, lines 14-29 & page 5, lines 1-8.
The changes in this section are similar to those in Section 4. No substantive changes.

Section 7. Page 5, lines 9-29 & page 6, lines 1-4.
The difference here is found on page 6, lines 2-4. It is primarily a clarification. No substantive change.

Section 8. Page 6, lines 5-13.
Changes similar to those in Section 4.

Section 9. Page 6, lines 14-26.
The sole change in this section is the insertion of the word "nonadmitted" on line 16. This has been done in several of the earlier sections without comment. It is a clarification, and ond that is defined in the definition section on page 12, lines 15-18. Previously the words "insurer", "nonadmitted insurer", and, "unauthorized insurer" have been used synonymously. That is inconsistent and has led to some confusion. This change should clear up that situation.

Section 10. Page 6, lines 27-29 & page 7, lines 1-29.
This section is a consolidation of several other sections. (a) replaces AS 21.33.015 with no substantive difference. (b) replaces AS 21.33.075 with some shift in an individuals ability to enter and use the nonadmitted market place. This ability is broadened in this bill by removing the specific description of an industrial insured found in AS 21.33.075(9). (c) replaces the combination of AS 21.33.015 and AS 21.33.075(6) with no substantive difference. (d) replaces AS 21.33.041 with no substantive difference.

Section 11. Page 8, lines 1-24.
This is a new section and it limits a nonadmitted insurers access to Alaska courts. This is as to those not placed through a surplus lines broker in AS 21.34. It clarifies the standing of those insurers.

Section 12. Page 8, lines 25-29 & page 9, lines 1-6.
This is the same kind of change noted in Section 9. One additional change is that access by the director to] insureds purchases in the admitted or authorized market has been rem(ed. This ability to access admitted purchases is probably unreasonable when placed on the insured. Presumably access to these records through other sources is sufficient.

Section 13. Page 9, lines 7-13.
This section reinforces the ability of the director to obtain records and information under this section. This is accomplished by allowing the director to apply for a court order to compel production of records and information.

Section 14. Page 9, lines 14-29 & page 10, lines 1-10.
"Unauthorized" has been changed to "nonadmitted" as noted in section 9. The penalty provision has been revised so that it is more readily calculable. This penalty will generally be stiffer than that now provided.

Section 15. Page 10, lines 11-26.
More editorial changes like those in section 9. Since the surplus lines law has been removed from AS 21.33 and placed in AS 21.34, that reference has been noted. The time for reporting has been shortened from 60 days to 30 days.

Section 16. Page 10, lines 27-29 & page 11, lines 1-6.
Same editorial change noted in section 9.

Section 17. Page 11, lines 7-15.
The penalty provision has been upgraded in the same fashion as section 14.

Section 18. Page 11, lines 16-21.
This section is intended to avoid any potential conflict with new sections AS 21.33.037 and AS 21.33.042.

Section 19. Page 11, lines 22-29 & page 12, lines 1-4.
This section upgrades the penalty section by increasing the per violation penalty from $500 for the first offense to $1,000 and by increasing the second offense penalty from $500 to $2,000. A new penalty is also structured for allowing a violation to continue uncorrected in the amount of $1,000 for each month of continuation.

Section 20. Page 12, lines 5-29 & page 13, lines 1-25.
This definition section is new. There is nothing representing a substantive difference from current law except in (9)(A) where vessels of 50 displacement tons or less are not included in the definition of marine and are therefor included in the requirements of this proposed law.

Section 21. Page 13, lines 26-29, all of pages 14-30, & page 31, lines 1-16.
This section adds a new chapter to the insurance code dealing with surplus lines insurance. This chapter has essentially been removed from AS 21.33. A number of changes have been made to provide for a stronger regulation of the surplus lines market. This is accomplished by strengthening the financial requirements of a company in that market before it can be used in this state. The line of responsibility for the surplus lines broker is clarified. The bill permits the creation of a surplus lines association that can have a substantial self-regulatory role which has experienced substantial sucess in California and in Washington. This would allow the division to more effectively use its resources to avoid problems for persons insured in that market.

Sec 21.34.010. Page 13, lines 28-29 & page 14, lines 1-14.
This is the purpose section for the new chapter

Sec 21.34.020. Page 14, lines 15-23
This section conditions what can be placed in the nonadmitted market. There is no substantive difference from current law.

Sec 21.34.030. Page 14, lines 24-29 & page 15, lines 1-12.
This section permits workers compensation to be written in the surplus lines market provided the director finds it to be in the public interest. It is substantially the same as current law except that this proposal has financial requirements that are higher than other placements in that market.

Sec 21.34.040. Page 15, lines 13-29 & page 16, lines 1-29.
This section substantially increases the minimum capital and surplus requirements used in the surplus lines market. It also recognizes distinctions among insurers, Lloyds type organizations, and insurance exchanges.

Sec 21.34.050. Page 17, lines 1-9.
This section is a new provision which substantially tracks current practice. It provides for the listing of eligible surplus lines insurers. It also permits the surplus lines association to perform that task when approved by the director.

Sec 21.34.060. Page 17, lines 10-23.
This section requires that when a policy is written by more than one insurer and one or more of those insurers are not eligible, the insured must be notified. This prevents a practice where some brokers conceal the fact that there are ineligible insurers on a risk. One way that this is done is to list the insurers as "underwriters at Lloyd's and other companies." The division does not accept this practice now, but is not certain that even in those cases where we correct it, the insured is adequately informed. A little information at this stage can prevent a lot of problems later.

Sec 21.34.070. Page 17, lines 24-29 & page 18, lines 1-11.
This section establishes a procedure for removing an insurer from the eligible list and sets forth a notice requirement to all licensees.

Sec 21.34.080. Page 18, lines 12-29 & page 19, line 1.
This section is similar to an existing requirement to file affidavits of coverage. It adds a requirement on the surplus lines broker to provide evidence of insurance to an insured within 30 days of placement of the coverage. It also provides that these filing requirements may be transferred to the surplus lines association upon an order by the director.

Sec 21.34.090. Page 19, lines 2-29 & page 20, lines 1-16.
This section permits the formation of a surplus lines association and sets forth the powers and purposes for which it may be formed. It establishes the requirements for its formation and makes it subject to examination by the director. It provides that the director may require membership in the association as a condition of licensure in this state.

Sec 21.34.100. Page 20, lines 17-29, all of page 21, & page 22, lines 1-2.
This section describes the evidence of insurance which a surplus lines broker must provide for an insured. The basic idea is to require a full disclosure of the facts relating to a placement in the nonadmitted market. This also applies to changes made in coverage. The broker is required to maintain a full copy of all documents pertinent to the insurance transaction. A warning is required to apprise the insured that a policy placed in the nonadmitted market is not covered by the Alaska Insurance Guaranty Association Act.

Sec 21.34.110. Page 22, lines 3-14.
This section provides that the insured has no liability for premium until the broker has provided a notice to the insured to the effect that the insurer is nonadmitted, and there is no insolvency protection provided under state law. This is a new approach.

Sec 21.34.120. Page 22, lines 15-17.
This is similar to present law. I provides that contracts in the surplus lines market place are valid contracts.

Sec 21.34.130. Page 22, lines 18-23.
Section provides that payment to the broker is payment to the insurer.

Sec 21.34.140. Page 22, lines 24-29, all of page 23, and page 24, lines 1-6.
This section sets forth the licensing standards and requirements for a surplus lines brokers license. The requirements are not substantially different than those in current law. The bond requirement is higher. This proposal does permit nonresident surplus lines brokers licensees. (e) does provide a penalty for late renewal of license. The language on page 23, lines 9 & 10 starting with the word "except", should be removed as it provides too broad a grandfather right.

Sec 21.34.150. Page 24, lines 9-14.
This section clarifies the scope of a surplus lines brokers license. It allows the surplus lines broker to accept business from other surplus lines brokers and other brokers but not from agents.

Sec 21.34.160. Page 24, lines 15-29 & page 25, lines 1-13.
This section clearly outlines the kinds of records that must be maintained by a surplus lines broker and that such records must be

open for examination by the director.

Sec 21.34.170. Page 25, lines 14-20.
This section requires a monthly report of business placed in the sulplus lines market.

Sec 21.34.180. Page 25, lines 21-29 & page 26, lines 1-29.
This section is substantially the same as current law. The premium tax is established here and the director may have the tax collected by the surplus lines association. The director has the ability to establish adequate safeguards to protect the monies collected in this fashion.

Sec 21.34.190. Page 27, lines 1-5.
A filing fee of 1% is established. This is presently at 1/2%.

Sec 21.34.200. Page27, lines 6-23.
This section provides for two alternate means of tax collection. The first is by the director in the usual manner. The second is by the surplus lines association upon an order by the director after establishing those safeguards deemed appropriate.

Sec 21.34.210. Page 27, lines 24-29 & page 28, lines 1-18.
In the current law, the director has discretionary suspension or revocation authority. The restructuring found in this section is more specific and lists those actions which can result in suspension or revocation.

Sec 21.23.220. Page 28, lines 19-29 & page 29, line 1.
This section ties into AS 21.33 for service of process on a nonadmitted insurer used through the surplus lines market. The presence of a nonadmitted insurer on a surplus lines contract assumes that the insurer has subjected itself to AS 21.34.

Sec 21.34.230. Page 29, lines 2-9.
This penalty section is an upgrade from the present law. It also includes an ability to take action under AS 21.33.320-330 in the unfair trade practices act.

Sec 21.34.240. Page 29, lines 10-14.
Separability section.

Sec 21.34.250. Page 29, lines 15-17.
This section enables the director to promulgate those regulations necessary to implement, define and enforce the provisions of this new chapter.

Sec 21.34.900. Page 29, lines 18-29, all of page 30, & page 31, lines 1-16.
The definitions here take the same explanation as those in Sec 20. There are a few additional definitions but these are not substantively different than current usage in the insurance code.

Sec 22. Page 31, lines 17-21.
This added section in the unfair trade practices act makes it an unfair trade practice to fail to make the required disclosures and reports.

Sec 23. Page 31, lines 22-29 & page 32, lines 1-2.
This section is intended to give admitted insurance companies the ability to compete with the nonadmitted market, however, some language was inadvertantly omitted. On page 31, line 23 remove "Under regulations which the director [HE] shall adopt". On page 31, line 27 following the word "used" add the phrase "or the filing and approval of which are in the director's opinion, not desirable or necessary for the protection of the public." On page 31, line 27, remove the words "and regulations."

Sec 24. Page 32, lines 3-9
This section ties in with Sec 23 and Sec 25 in allowing the admitted market to compete with the nonadmitted market. This is accomplished by providing these exceptions in the rate law which has to date acted as an impediment to that kind of competition.

Sec 25. Page 32, lines 10-15.
This section ties in with the previous two sections. It specifies those conditions under which an admitted insurer can work outside of its filings made with the director. This provides the ability to directly compete with the surplus lines market. This is in the public interest since most admitted market coverages are protected by the guaranty association act.

Finally, a section has been inadvertantly omitted. It is the repealer section. That section should read, "AS 21.33.015, AS 21.33.041, AS 21.33.045(b), AS 21.33.051, and AS 21.33.068-21.33.300 are repealed."

MAY 22, 1984

RE: SB 470 RELATING TO INSURANCE

SPECIFICALLY, THIS BILL DEALS WITH SURPLUS LINES INSURANCE. THE LEGISLATION IS AN ALASKA VARIATION OF THE MODEL ACT DRAFTED FOR THIS PART OF THE INDUSTRY BY THE NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS. THE BILL WOULD AD A NEW SECTION TO TITLE 21 OF THE STATUTES WHICH WOULD GOVERN SURPLUS LINE TRANSACTIONS IN THE STATE.....WITH THAT, I WOULD ASK KEN MOORE, DIRECTOR OF THE DIVISION OF INSURANCE TO COME FORWARD AND OUTLINE THE LEGISLATION FOR THE COMMITTEE.

STATE OF ALASKA 1984 LEGISLATIVE SESSION
FISCAL NOTE

Revision Date:

REQUEST
Bill/Resolution No.: CS SB 470 (Loc)
Title: Relating to Insurance
Sponsor: Mulcahy

Provided by Division of Insurance

CSSB470(L&C) Section by Section Analysis. 3/15/84

This proposal upgrades the Unauthorized (nonadmitted) Insurers Act and the Surplus Lines Insurance Act to comport with the recently adopted models of the National Association of Insurance Commissioners(NAIC). Currently, these two acts, along with a third, the Unauthorized Insurers Service of Process Act appear in AS 21.33.

This proposal continues the Unauthorized (nonadmitted) Insurers Act and the Unauthorized Insurers Service of Process Act in AS 21.33. Access to that market is more clearly stated. Most of the changes in AS 21.33 are not substantive. However the Surplus Lines Insurance Act has been removed from AS 21.33 and placed in a new chapter, AS 21.34. This chapter makes some substantial revisions with respect to how a surplus lines business can be conducted in this state. It will give the regulator a clearer ability to deal with the competence of the licensee and provide more meaningful protection for the public through:
-clarification of the duties and responsibilities of the licensee;
-higher financial requirements for the nonadmitted insurer;
-permission to form a surplus lines association with an active role in regulating the market; and,
-allowing admitted markets to compete with the nonadmitted markets.

Section 1. Page 1, lines 8-17.
Current law provides that when the state examines an insurance company, the insurance company pays for that examination. A surplus lines broker is also subject to examination but does not pay for that examination. The position of the surplus lines broker is in many respects similar to an insurer, particularly when the broker has utilized an insurer that is not able to meet its obligations. This section provides that the surplus lines broker must also meet the cost of its examination.

Section 2. Page 1, lines 18-29 & page 2, lines 1-7.
The change here is on page 1, lines 24-25. This section ties in with Section 1. It lists those entities subject to examination without charge.

Section 3. Page 2, lines 8-29 & page 3, lines 1-3.
This rewrite of the purpose section does not contain substantive changes. It is formatted in a more readable form and the application of the chapter to surplus lines brokers has been deleted.

Section 4. Page 3, lines 4-24.
The changes in this section are editorial. The phrase "doing an insurance business" has been changed to "transaction of insurance", and gender oriented references have been changed.

Section 5. Page 3, lines 25-29 & page 4, lines 1-13.
This section contains more of the same changes noted in Section 4. No substantive change.

Section 6. Page 4, lines 14-29 & page 5, lines 1-8.
The changes in this section are similar to those in Section 4. No substantive changes.

Section 7. Page 5, lines 9-29 & page 6, lines 1-4.
The difference here is found on page 6, lines 2-4. It is primarily a clarification. No substantive change.

Section 8. Page 6, lines 5-13.
Changes similar to those in Section 4.

Section 9. Page 6, lines 14-26.
The sole change in this section is the insertion of the word "nonadmitted" on line 16. This has been done in several of the earlier sections without comment. It is a clarification, and ond that is defined in the definition section on page 12, lines 15-18. Previously the words "insurer", "nonadmitted insurer", and, "unauthorized insurer" have been used synonymously. That is inconsistent and has led to some confusion. This change should clear up that situation.

Section 10. Page 6, lines 27-29 & page 7, lines 1-29.
This section is a consolidation of several other sections. (a) replaces AS 21.33.015 with no substantive difference. (b) replaces AS 21.33.075 with some shift in an individuals ability to enter and use the nonadmitted market place. This ability is broadened in this bill by removing the specific description of an industrial insured found in AS 21.33.075(9). (c) replaces the combination of AS 21.33.015 and AS 21.33.075(6) with no substantive difference. (d) replaces AS 21.33.041 with no substantive difference.

Section 11. Page 8, lines 1-24.
This is a new section and it limits a nonadmitted insurers access to Alaska courts. This is as to those not placed through a surplus lines broker in AS 21.34. It clarifies the standing of those insurers.

Section 12. Page 8, lines 25-29 & page 9, lines 1-6.
This is the same kind of change noted in Section 9. One additional change is that access by the director to an insureds purchases in the admitted or authorized market has been removed. This ability to access admitted purchases is probably unreasonable when placed on the insured. Presumably access to these records through other sources is sufficient.

Section 13. Page 9, lines 7-13.
This section reinforces the ability of the director to obtain records and information under this section. This is accomplished by allowing the director to apply for a court order to compel production of records and information.

Section 14. Page 9, lines 14-29 & page 10, lines 1-10.
"Unauthorized" has been changed to "nonadmitted" as noted in section 9. The penalty provision has been revised so that it is more readily calculable. This penalty will generally be stiffer than that now provided.

Section 15. Page 10, lines 11-26.
More editorial changes like those in section 9. Since the surplus lines law has been removed from AS 21.33 and placed in AS 21.34, that reference has been noted. The time for reporting has been shortened from 60 days to 30 days.

Section 16. Page 10, lines 27-29 & page 11, lines 1-6.
Same editorial change noted in section 9.

Section 17. Page 11, lines 7-15.
The penalty provision has been upgraded in the same fashion as section 14.

Section 18. Page 11, lines 16-21.
This section is intended to avoid any potential conflict with new sections AS 21.33.037 and AS 21.33.042.

Section 19. Page 11, lines 22-29 & page 12, lines 1-4.
This section upgrades the penalty section by increasing the per violation penalty from $500 for the first offense to $1,000 and by increasing the second offense penalty from $500 to $2,000. A new penalty is also structured for allowing a violation to continue uncorrected in the amount of $1,000 for each month of continuation.

Section 20. Page 12, lines 5-29 & page 13, lines 1-25.
This definition section is new. There is nothing representing a substantive difference from current law except in (9)(A) where vessels of 50 displacement tons or less are not included in the definition of marine and are therefor included in the requirements of this proposed law.

Section 21. Page 13, lines 26-29, all of pages 14-30, & page 31, lines 1-16.
This section adds a new chapter to the insurance code dealing with surplus lines insurance. This chapter has essentially been removed from AS 21.33. A number of changes have been made to provide for a stronger regulation of the surplus lines market. This is accomplished by strengthening the financial requirements of a company in that market before it can be used in this state. The line of responsibility for the surplus lines broker is clarified. The bill permits the creation of a surplus lines association that can have a substantial self-regulatory role which has experienced substantial sucess in California and in Washington. This would allow the division to more effectively use its resources to avoid problems for persons insured in that market.

Sec 21.34.010. Page 13, lines 28-29 & page 14, lines 1-14.
This is the purpose section for the new chapter

Sec 21.34.020. Page 14, lines 15-23
This section conditions what can be placed in the nonadmitted market. There is no substantive difference from current law.

Sec 21.34.030. Page 14, lines 24-29 & page 15, lines 1-12.
This section permits workers compensation to be written in the surplus lines market provided the director finds it to be in the public interest. It is substantially the same as current law except that this proposal has financial requirements that are higher than other placements in that market.

Sec 21.34.040. Page 15, lines 13-29 & page 16, lines 1-29.
This section substantially increases the minimum capital and surplus requirements used in the surplus lines market. It also recognizes distinctions among insurers, Lloyds type organizations, and insurance exchanges.

Sec 21.34.050. Page 17, lines 1-9.
This section is a new provision which substantially tracks current practice. It provides for the listing of eligible surplus lines insurers. It also permits the surplus lines association to perform that task when approved by the director.

Sec 21.34.060. Page 17, lines 10-23.
This section requires that when a policy is written by more than one insurer and one or more of those insurers are not eligible, the insured must be notified. This prevents a practice where some brokers conceal the fact that there are ineligible insurers on a risk. One way that this is done is to list the insurers as "underwriters at Lloyd's and other companies." The division does not accept this practice now, but is not certain that even in those cases where we correct it, the insured is adequately informed. A little information at this stage can prevent a lot of problems later.

Sec 21.34.070. Page 17, lines 24-29 & page 18, lines 1-11.
This section establishes a procedure for removing an insurer from the eligible list and sets forth a notice requirement to all licensees.

Sec 21.34.080. Page 18, lines 12-29.
This section is similar to an existing requirement to file affidavits of coverage. It adds a requirement on the surplus lines broker to provide evidence of insurance to an insured within 30 days of placement of the coverage. It also provides that these filing requirements may be transferred to the surplus lines association upon an order by the director.

Sec 21.34.090. Page 19, lines 1-29 & page 20, lines 1-15.
This section permits the formation of a surplus lines association and sets forth the powers and purposes for which it may be formed. It establishes the requirements for its formation and makes it subject to examination by the director. It provides that the director may require membership in the association as a condition of licensure in this state.

Sec 21.34.100. Page 20, lines 16-29, all of page 21, & page 22, line 1.
This section describes the evidence of insurance which a surplus lines broker must provide for an insured. The basic idea is to require a full disclosure of the facts relating to a placement in the nonadmitted market. This also applies to changes made in coverage. The broker is required to maintain a full copy of all documents pertinent to the insurance transaction. A warning is required to apprise the insured that a policy placed in the nonadmitted market is not covered by the Alaska Insurance Guaranty Association Act.

Sec 21.34.110. Page 22, lines 2-13.
This section provides that the insured has no liability for premium until the broker has provided a notice to the insured to the effect that the insurer is nonadmitted, and there is no insolvency protection provided under state law. This is a new approach.

Sec 21.34.120. Page 22, lines 14-16.
This is similar to present law. I provides that contracts in the surplus lines market place are valid contracts.

Sec 21.34.130. Page 22, lines 17-22.
Section provides that payment to the broker is payment to the insurer.

Sec 21.34.140. Page 22, lines 23-29, all of page 23, and page 24, lines 1-6.
This section sets forth the licensing standards and requirements for a surplus lines brokers license. The requirements are not substantially different than those in current law. The bond requirement is higher. This proposal does permit nonresident surplus lines brokers licensees. (e) does provide a penalty for late renewal of license.

Sec 21.34.150. Page 24, lines 7-12.
This section clarifies the scope of a surplus lines brokers license. It allows the surplus lines broker to accept business from other surplus lines brokers and other brokers but not from agents.

Sec 21.34.160. Page 24, lines 13-29 & page 25, lines 1-11.
This section clearly outlines the kinds of records that must be maintained by a surplus lines broker and that such records must be open for examination by the director.

Sec 21.34.170. Page 25, lines 12-18.
This section requires a monthly report of business placed in the sulplus lines market.

Sec 21.34.180. Page 25, lines 19-29 & page 26, lines 1-27.
This section is substantially the same as current law. The premium tax is established here and the director may have the tax collected by the surplus lines association. The director has the ability to establish adequate safeguards to protect the monies collected in this fashion.

Sec 21.34.190. Page 26, lines 28-29 & page 27, lines 1-3.
A filing fee of 1% is established. This is presently at 1/2%.

Sec 21.34.200. Page27, lines 4-21.
This section provides for two alternate means of tax collection. The first is by the director in the usual manner. The second is by the surplus lines association upon an order by the director after establishing those safeguards deemed appropriate.

Sec 21.34.210. Page 27, lines 22-29 & page 28, lines 1-16.
In the current law, the director has discretionary suspension or revocation authority. The restructuring found in this section is more specific and lists those actions which can result in suspension or revocation.

Sec 21.23.220. Page 28, lines 17-28.
This section ties into AS 21.33 for service of process on a nonadmitted insurer used through the surplus lines market. The presence of a nonadmitted insurer on a surplus lines contract assumes that the insurer has subjected itself to AS 21.34.

Sec 21.34.230. Page 28, line 29 & page 29, lines 1-7.
This penalty section is an upgrade from the present law. It also includes an ability to take action under AS 21.33.320-330 in the unfair trade practices act.

Sec 21.34.240. Page 29, lines 8-12.
Separability section.

Sec 21.34.250. Page 29, lines 13-14.
This section enables the director to promulgate those regulations necessary to implement, define and enforce the provisions of this new chapter.

Sec 21.34.900. Page 29, lines 15-28, all of page 30, & page 31, lines 1-14.

The definitions here take the same explanation as those in Sec 20. There are a few additional definitions but these are not substantively different than current usage in the insurance code.

Sec 22. Page 31, lines 15-19.
This added section in the unfair trade practices act makes it an unfair trade practice to fail to make the required disclosures and reports.

Sec 23. Page 31, lines 20-29 & page 32, lines 1-2.
This section gives admitted insurance companies the ability to compete with the nonadmitted market. It ties in with sections 24 & 25.

Sec 24. Page 32, lines 3-9
This section ties in with Sec 23 and Sec 25 in allowing the admitted market to compete with the nonadmitted market. This is accomplished by providing these exceptions in the rate law which has to date acted as an impediment to that kind of competition.

Sec 25. Page 32, lines 10-15.
This section ties in with the previous two sections. It specifies those conditions under which an admitted insurer can work outside of its filings made with the director. This provides the ability to directly compete with the surplus lines market. This is in the public interest since most admitted market coverages are protected by the guaranty association act.

Sec 26. Page 32, lines 16-17.
This section repeals those sections in AS 21.33 which are no longer needed or have been replaced in the new chapter in section 21.

CSSB470(RLS) · Section by Section Analysis. 5/18/84

This proposal upgrades the Unauthorized (nonadmitted) Insurers Act and the Surplus Lines Insurance Act to comport with the recently adopted models of the National Association of Insurance Commissioners(NAIC). Currently, these two acts, along with a third, the Unauthorized Insurers Service of Process Act appear in AS 21.33.

This proposal continues the Unauthorized (nonadmitted) Insurers Act and the Unauthorized Insurers Service of Process Act in AS 21.33. Access to that market is more clearly stated. Most of the changes in AS 21.33 are not substantive. However the Surplus Lines Insurance Act has been removed from AS 21.33 and placed in a new chapter, AS 21.34. This chapter makes some substantial revisions with respect to how a surplus lines business can be conducted in this state. It will give the regulator a clearer ability to deal with the competence of the licensee and provide more meaningful protection for the public through:
-clarification of the duties and responsibilities of the licensee;
-higher financial requirements for the nonadmitted insurer;
-permission to form a surplus lines association with an active role in regulating the market; and,
-allowing admitted markets to compete with the nonadmitted markets.

Section 1. Page 1, lines 8-17.
Current law provides that when the state examines an insurance company, the insurance company pays for that examination. A surplus lines broker is also subject to examination but does not pay for that examination. The position of the surplus lines broker is in many respects similar to an insurer, particularly when the broker has utilized an insurer that is not able to meet its obligations. This section provides that the surplus lines broker must also meet the cost of its examination.

Section 2. Page 1, lines 18-29 & page 2, lines 1-7.
The change here is on page 1, lines 24-25. This section ties in with Section 1. It lists those entities subject to examination without charge.

Section 3. Page 2, lines 8-29 & page 3, lines 1-3.
This rewrite of the purpose section does not contain substantive changes. It is formatted in a more readable form and the application of the chapter to surplus lines brokers has been deleted.

Section 4. Page 3, lines 4-24.
The changes in this section are editorial. The phrase "doing an insurance business" has been changed to "transaction of insurance", and gender oriented references have been changed.

Section 5. Page 3, lines 25-29 & page 4, lines 1-13.
This section contains more of the same changes noted in Section 4. No substantive change.

Section 6. Page 4, lines 14-29 & page 5, lines 1-8.
The changes in this section are similar to those in Section 4. No substantive changes.

Section 7. Page 5, lines 9-29 & page 6, lines 1-4.
The difference here is found on page 6, lines 2-4. It is primarily a clarification. No substantive change.

Section 8. Page 6, lines 5-13.
Changes similar to those in Section 4.

Section 9. Page 6, lines 14-26.
The sole change in this section is the insertion of the word "nonadmitted" on line 16. This has been done in several of the earlier sections without comment. It is a clarification, and ond that is defined in the definition section on page 12, lines 15-18. Previously the words "insurer", "nonadmitted insurer", and, "unauthorized insurer" have been used synonymously. That is inconsistent and has led to some confusion. This change should clear up that situation.

Section 10. Page 6, lines 27-29 & page 7, lines 1-29.
This section is a consolidation of several other sections. (a) replaces AS 21.33.015 with no substantive difference. (b) replaces AS 21.33.075 with some shift in an individuals ability to enter and use the nonadmitted market place. This ability is broadened in this bill by removing the specific description of an industrial insured found in AS 21.33.075(9). (c) replaces the combination of AS 21.33.015 and AS 21.33.075(6) with no substantive difference. (d) replaces AS 21.33.041 with no substantive difference.

Section 11. Page 8, lines 1-24.
This is a new section and it limits a nonadmitted insurers access to Alaska courts. This is as to those not placed through a surplus lines broker in AS 21.34. It clarifies the standing of those insurers.

Section 12. Page 8, lines 25-29 & page 9, lines 1-6.
This is the same kind of change noted in Section 9. One additional change is that access by the director to an insureds purchases in the admitted or authorized market has been removed. This ability to access admitted purchases is probably unreasonable when placed on the insured. Presumably access to these records through other sources is sufficient.

Section 13. Page 9, lines 7-13.
This section reinforces the ability of the director to obtain records and information under this section. This is accomplished by allowing the director to apply for a court order to compel production of records and information.

Section 14. Page 9, lines 14-29 & page 10, lines 1-10.
"Unauthorized" has been changed to "nonadmitted" as noted in section 9. The penalty provision has been revised so that it is more readily calculable. This penalty will generally be stiffer than that now provided.

Section 15. Page 10, lines 11-26.
More editorial changes like those in section 9. Since the surplus lines law has been removed from AS 21.33 and placed in AS 21.34, that reference has been noted. The time for reporting has been shortened from 60 days to 30 days.

Section 16. Page 10, lines 27-29 & page 11, lines 1-6.
Same editorial change noted in section 9.

Section 17. Page 11, lines 7-15.
The penalty provision has been upgraded in the same fashion as section 14.

Section 18. Page 11, lines 16-22.
This section is intended to avoid any potential conflict with new sections AS 21.33.037 and AS 21.33.042.

Section 19. Page 11, lines 23-29 & page 12, lines 1-5.
This section upgrades the penalty section by increasing the per violation penalty from $500 for the first offense to $1,000 and by increasing the second offense penalty from $500 to $2,000. A new penalty is also structured for allowing a violation to continue uncorrected in the amount of $1,000 for each month of continuation.

Section 20. Page 12, lines 6-29 & page 13, lines 1-26.
This definition section is new. There is nothing representing a substantive difference from current law except in (9)(A) where vessels of 50 displacement tons or less are not included in the definition of marine and are therefor included in the requirements of this proposed law.

Section 21. Page 13, lines 27-29, all of pages 14-30, & page 31, lines 1-12.
This section adds a new chapter to the insurance code dealing with surplus lines insurance. This chapter has essentially been removed from AS 21.33. A number of changes have been made to provide for a stronger regulation of the surplus lines market. This is accomplished by strengthening the financial requirements of a company in that market before it can be used in this state. The line of responsibility for the surplus lines broker is clarified. The bill permits the creation of a surplus lines association that can have a substantial self-regulatory role which has experienced substantial sucess in California and in Washington. This would allow the division to more effectively use its resources to avoid problems for persons insured in that market.

Sec 21.34.010. Page 13, line 29 & page 14, lines 1-15.
This is the purpose section for the new chapter

Sec 21.34.020. Page 14, lines 16-24
This section conditions what can be placed in the nonadmitted market. There is no substantive difference from current law.

Sec 21.34.030. Page 14, lines 25-29 & page 15, lines 1-13.
This section permits workers compensation to be written in the surplus lines market provided the director finds it to be in the public interest. It is substantially the same as current law except that this proposal has financial requirements that are higher than other placements in that market.

Sec 21.34.040. Page 15, lines 14-29, page 16, & page 17, line 1.
This section substantially increases the minimum capital and surplus requirements used in the surplus lines market. It also recognizes distinctions among insurers, Lloyds type organizations, and insurance exchanges.

Sec 21.34.050. Page 17, lines 2-10.
This section is a new provision which substantially tracks current practice. It provides for the listing of eligible surplus lines insurers. It also permits the surplus lines association to perform that task when approved by the director.

Sec 21.34.060. Page 17, lines 11-24.
This section requires that when a policy is written by more than one insurer and one or more of those insurers are not eligible, the insured must be notified. This prevents a practice where some brokers conceal the fact that there are ineligible insurers on a risk. One way that this is done is to list the insurers as "underwriters at Lloyd's and other companies." The division does not accept this practice now, but is not certain that even in those cases where we correct it, the insured is adequately informed. A little information at this stage can prevent a lot of problems later.

Sec 21.34.070. Page 17, lines 25-29 & page 18, lines 1-12.
This section establishes a procedure for removing an insurer from the eligible list and sets forth a notice requirement to all licensees.

Sec 21.34.080. Page 18, lines 13-29 & page 19, line 1.
This section is similar to an existing requirement to file affidavits of coverage. It adds a requirement on the surplus lines broker to provide evidence of insurance to an insured within 30 days of placement of the coverage. It also provides that these filing requirements may be transferred to the surplus lines association upon an order by the director.

Sec 21.34.090. Page 19, lines 2-29 & page 20, lines 1-16.
This section permits the formation of a surplus lines association and sets forth the powers and purposes for which it may be formed. It establishes the requirements for its formation and makes it subject to examination by the director. It provides that the director may require menbership in the association as a condition of licensure in this state.

Sec 21.34.100. Page 20, lines 17-29, all of page 21, & page 22, line 1-2.
This section describes the evidence of insurance which a surplus lines broker must provide for an insured. The basic idea is to require a full disclosure of the facts relating to a placement in the nonadmitted market. This also applies to changes made in coverage. The broker is required to maintain a full copy of all documents pertinent to the insurance transaction. A warning is required to apprise the insured that a policy placed in the nonadmitted market is not covered by the Alaska Insurance Guaranty Association Act.

Sec 21.34.110. Page 22, lines 3-14.
This section provides that the insured has no liability for premium until the broker has provided a notice to the insured to the effect that the insurer is nonadmitted, and there is no insolvency protection provided under state law. This is a new approach.

Sec 21.34.120. Page 22, lines 15-17.
This is similar to present law. I provides that contracts in the surplus lines market place are valid contracts.

Sec 21.34.130. Page 22, lines 18-23.
Section provides that payment to the broker is payment to the insurer.

Sec 21.34.140. Page 22, lines 24-29, page 23, and page 24, lines 1-7.
This section sets forth the licensing standards and requirements for a surplus lines brokers license. The requirements are not substantially different than those in current law. The bond requirement is higher. This proposal does permit nonresident surplus lines brokers licensees. (e) does provide a penalty for late renewal of license.

Sec 21.34.150. Page 24, lines 8-13.
This section clarifies the scope of a surplus lines brokers license. It allows the surplus lines broker to accept business from other surplus lines brokers and other brokers but not from agents.

Sec 21.34.160. Page 24, lines 14-29 & page 25, lines 1-12.
This section clearly outlines the kinds of records that must be maintained by a surplus lines broker and that such records must be open for examination by the director.

Sec 21.34.170. Page 25, lines 13-18.
This section requires a monthly report of business placed in the sulplus lines market.

Sec 21.34.180. Page 25, lines 19-29 & page 26, lines 1-27.
This section is substantially the same as current law. The premium tax is established here and the director may have the tax collected by the surplus lines association. The director has the ability to establish adequate safeguards to protect the monies collected in this fashion.

Sec 21.34.190. Page 26, lines 28-29 & page 27, lines 1-3.
A filing fee of 1% is established. This is presently at 1/2%.

Sec 21.34.200. Page27, lines 4-21.
This section provides for two alternate means of tax collection. The first is by the director in the usual manner. The second is by the surplus lines association upon an order by the director after establishing those safeguards deemed appropriate.

Sec 21.34.210. Page 27, lines 22-29 & page 28, lines 1-16.
In the current law, the director has discretionary suspension or revocation authority. The restructuring found in this section is more specific and lists those actions which can result in suspension or revocation.

Sec 21.23.220. Page 28, lines 17-28.
This section ties into AS 21.33 for service of process on a nonadmitted insurer used through the surplus lines market. The presence of a nonadmitted insurer on a surplus lines contract assumes that the insurer has subjected itself to AS 21.34.

Sec 21.34.230. Page 28, line 29 & page 29, lines 1-7.
This penalty section is an upgrade from the present law. It also includes an ability to take action under AS 21.33.320-330 in the unfair trade practices act.

Sec 21.34.240. Page 29, lines 8-12.
Separability section.

Sec 21.34.250. Page 29, lines 13-14.
This section enables the director to promulgate those regulations necessary to implement, define and enforce the provisions of this new chapter.

Sec 21.34.900. Page 29, lines 15-29, all of page 30, & page 31, lines 1-12.

The definitions here take the same explanation as those in Sec 20. There are a few additional definitions but these are not substantively different than current usage in the insurance code.

Sec 22. Page 31, lines 13-17.
This added section in the unfair trade practices act makes it an unfair trade practice to fail to make the required disclosures and reports.

Sec 23. Page 31, lines 18-29.
This section gives admitted insurance companies the ability to compete with the nonadmitted market. It ties in with sections 24 & 25.

Sec 24. Page 32, lines 1-7
This section ties in with Sec 23 and Sec 25 in allowing the admitted market to compete with the nonadmitted market. This is accomplished by providing these exceptions in the rate law which has to date acted as an impediment to that kind of competition.

Sec 25. Page 32, lines 8-13.
This section ties in with the previous two sections. It specifies those conditions under which an admitted insurer can work outside of its filings made with the director. This provides the ability to directly compete with the surplus lines market. This is in the public interest since most admitted market coverages are protected by the guaranty association act.

Sec 26. Page 32, lines 14-15.
This section repeals those sections in AS 21.33 which are no longer needed or have been replaced in the new chapter in section 21.

ALASKA SURPLUS LINES BROKERS ASSN.

3605 Arctic Blvd. #1795

Anchorage, Ak. 99503

Representative John Cowdery
House Committee on Labor & Commerce
Juneau, Ak.

Dear Rep. Cowdery

RE: Senate Bill 470, Hearing May 22, 1984

As president of the Alaska Surplus Lines Brokers Association I wish to draw your attention to particular item of concern to our membership. Firstly, our association does basically support SB 470. We testified to that fact before Senator Mulcahay's Committee in March of this year.

However, Section 21.34.120 (b)(4), lines 9 through 18 are of concern and might seriously affect the public's ability to procure surplus lines insurance coverages (e.g. specialty and Lloyds London policies) unless adequately addressed by the Dept. of Insurance. This section increases a broker's bond liability to $200,000. We have no particular objection to this, however line16 makes a provision that the surety bond be available (inaddition to other items) "to pay proper losses promptly ". We have canvassed several corporate sureties, all of which are not interested in writing the bond until a proper definition of "promptly" is made by the Division of Insurance.

We feel this terminology is vague and that it would severly impact our particular line of insurance business. Many of the smaller agencies would not be able to procure the bond with the present text unqualified. Please delay your decision to pass out the legislation until proper definitions are made.

Sincerely,

Henry F. George
President
Alaska Surplus Lines Brokers Assn.

MEMORANDUM

March 8, 1984

SUBJECT: Sectional analysis of SB 481

TO: Senator Jalmar Kerttula
President of the Senate

FROM: Edward H. Hein
Legislative Counsel

Section 1 allows a nonprofit cemetery to incorporate under AS 10.20 as an alternative to forming as a cemetery association.

Section 2 adds clean-up provisions necessitated by section 1.

Section 3 expands to which a cemetery's endowment fund may be put to include improvement of the grounds, buildings, and lots, and the repayment of debts.

Section 4 adds clean-up provisions necessitated by section 1.

Section 5 expands a nonprofit cemetery's authority borrow money to construct and repair buildings and mausoleums, to purchase or lease equipment, and other purposes. Such debts may be secured by mortgages on the cemetery's land, except those burial lots in which association members or corporate officers, trustees, or employees have more than a one-half interest.

Sections 6 - 11 add clean-up language necessitated by section 1.

Section 12 adds a definition of the term "cemetery lot" for purposes of AS 10.30.

Section 13 adds a definition of the term "cemetery lot" for purposes of the consumer protection statutes in AS 45.50.

Senator, Jalmar M. Kerttula
Alaska State Legislature
Juneau, Alaska

Dear Mr. Kerttula:

The Board of Trustees of Angelus Memorial Park Association approved a motion to present to the Legislature, amendments to the Alaska Cemetery Statutes, pertaining to non-profit cemetery associations. A committee was appointed consisting of Mr. Alvah C. Buswell, Jr. and Mr. Robert F. Shary, who are board members and Mr. Sidney Abbott, park manager, to work on the proposed amendments of the present statutes.

The present Alaska non-profit cemetery statutes were patterned after the Oregon Statutes many years ago before Statehood and are badly out dated. The State of Oregon has since amended their Statutes, twice, and now Alaska needs to do the same, so that a non-profit cemetery can better serve the community. To our knowledge Angelus is the only non-profit cemetery in the state.

Enclosed are copies of Oregon Statutes that have been amended and a copy of our proposed revisions to the Alaska State Cemetery Statutes.

The association realy needs these changes in order to grow, as it is now, we can not serve the community as a modern cemetery, because of the way the laws are written. The public wants all the services a cemetery is suppose to supply, such as, a columbarium for inurnment of cremated remains, mausoleum, niches and storage vault. Also we can not even build a much needed administration building. We now have to rent a very inadequate building for an office. The association has never had a maintenance building. The present laws prevent our growth.

The reason we included association and or corporation in our amendments is that Angelus intends to incorporate in order to help lessen the personal individual liability of the board members. Angelus board members are non-paid.

Sincerely,
Mr. Harry L. Wimmer
Vice-President, Board of Trustees

ANGELUS MEMORIAL PARK ASSOCIATION

Enclosures
This material has also been sent to Representatives Joe Hayes and Randy Phillips.

ALASKA STATUTES

CHAPTER 30. Cemetery Associations

Sec. 10.30.070. Creation of irreducible fund. The association may by its bylaws provide that a stated percentage of the money realized from the sale of lots and donations (AND OTHER SOURCES OF REVENUE) constitutes an irreducible fund, which may be invested in the manner or loaned upon the securities the association or the trustees consider proper. The interest or income from the irreducible fund provided for in any bylaw or as much as may be necessary shall be devoted exclusively to the preservation and embellishment of the (CEMETERY) grounds, buildings and property of the association and or corporation and the lots and space in buildings or grounds sold to the members of the association and or corporation, or to the payment of the interest or principal of the debts authorized by the association for the purchase of land, equipment, erecting buildings and improvements. Where a bylaw has been enacted for the creation of an irreducible fund, (IT) the set amount or percentage stated in the bylaw, may not be amended except for the purpose of increasing the fund. (36-5-5 ACLA 19

I was told to put in caps and brackets words to be deleted and underline the new wording.

ALASKA STATUTES

CHAPTER 30. Cemetery Associations

Sec. 10.30.090. Debts of association and or corporation. A cemetery association and or corporation may (NOT) contract debts in anticipation of future receipts, (EXCEPT) for the (ORIGINAL) purchase of cemetery land and or for other cemetery purposes, the laying out and embellishmen of the grounds and avenues of the cemetery, repairing their buildings, erection of new buildings, mausoleums, columbariums, and purchasing necessary equipment, for which debts the association may issue bonds or notes. The association may secure these debts by mortgage upon its lands, except lots which have been conveyed to the members of the Association, or by security interest in no more than 50% of the irreduci fund. (36-5-5 ACLA 1949).

ALASKA STATUTES

CHAPTER 30. Cemetery Associations.

Sec. 10.30.125 Definition of "Cemetery Lot", one or more than one adjoining, lot, plot, space, grave, nich, mausoleum crypt, vault, and columbarium, for the interment of human remains.

61.738 Procedure for revoking certificate of authority. ORS 57.735, relating to revocation of certificate of authority, is applicable to nonprofit corporations. [1963 c.492 §38 (enacted in lieu of 61.735)]

61.740 [Renumbered 61.984]

61.741 Application to corporation authorized to transact business in this state on December 31, 1959. Foreign corporations which are duly authorized to transact business in this state on December 31, 1959, for a purpose or purposes for which a corporation might secure such authority under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, shall, subject to the limitations set forth in their respective certificates of authority, be entitled to all the rights and privileges applicable to foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950, and from December 31, 1959, such corporations shall be subject to all the limitations, restrictions, liabilities and duties prescribed herein for foreign corporations procuring certificates of authority to transact business in this state under ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1959 c.580 §80]

61.745 Transacting business without certificate of authority. (1) No foreign corporation transacting business in this state without a certificate of authority shall be permitted to maintain any action, suit or proceeding in any court of this state, until such corporation shall have obtained a certificate of authority. No action, suit or proceeding shall be maintained in any court of this state by any successor or assignee of such corporation on any right, claim or demand arising out of the transaction of business by such corporation in this state, until a certificate of authority shall have been obtained by such corporation or by a corporation which has acquired all or substantially all its assets.

(2) The failure of a foreign corporation to obtain a certificate of authority to transact business in this state shall not impair the validity of any contract or act of such corporation, and shall not prevent such corporation from defending any action, suit or proceeding in any court of this state. [1959 c.580 §81]

CEMETERIES AND CREMATORIES

61.755 Lands of cemetery or crematory corporation; exemption from execution, taxation and condemnation. A nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains, may purchase or take, by gift or devise, and own and hold lands for the sole purpose of either a cemetery or a crematory and burial place for incinerate remains. Such lands shall be exempt from execution and taxation, and from any appropriation for public purposes, and lots or portions of such land and space in any buildings thereon may be sold, if intended to be used exclusively for burial purposes, and in no wise with a view to the profit of the members of such corporation. The land so held for cemetery purposes shall not exceed 600 acres, but if the land already held for such purpose by the corporation is all practically used, the amount thereof may be increased by adding thereto not more than 20 acres at any one time. The land so held for the purposes of a crematory and the burial of incinerate remains shall not exceed 40 acres, but if the land already held for such purposes by the corporation is all practically used, the amount thereof may be increased by adding thereto not more than 10 acres at any one time. [1959 c.580 §95]

61.760 Revenues; restrictions on uses thereof. (1) A nonprofit corporation organized or existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains may, by its bylaws, provide that a stated percentage of the money received from the sale of lots and burial space, cremation of bodies, donations, gifts or other sources of revenue shall constitute an irreducible fund. Any bylaw enacted for the creation of the irreducible fund cannot be amended to reduce the fund.

(2) The board of directors may direct the investment of the money in the irreducible fund, but all investments of money deposited in the fund on or after January 1, 1972, shall be in securities in classes and amounts approved by the State Treasurer and published in a list pursuant to ORS 97.820. If a bank or trust company qualified to engage in the trust business is directed by the board of directors to invest the money in the irreducible fund,

Oregon

SPECIAL PROVISIONS RELATING TO ORS 97.010 TO 97.040, 97.110 TO 97.450, 97.510 TO 97.730, 97.810 TO 97.920 and 97.990

97.010 Definitions for ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990. As used in ORS 97.010 to 97.040, 97.110 to 97.450, 97.510 to 97.730, 97.810 to 97.920 and 97.990:

(1) "Human remains" or "remains" means the body of a deceased person in any stage of decomposition or after cremation.

(2) "Cemetery" means any place dedicated to and used, or intended to be used, for the permanent interment of human remains.

(3) "Burial park" means a tract of land for the burial of human remains in the ground used, or intended to be used, and dedicated for cemetery purposes.

(4) "Mausoleum" means a structure for the entombment of human remains in crypts or vaults in a place used, or intended to be used, and dedicated for cemetery purposes.

(5) "Crematory" means a structure containing a retort for the reduction of bodies of deceased persons to cremated remains.

(6) "Columbarium" means a structure or room containing niches for permanent inurnment of cremated remains in a place used, or intended to be used, and dedicated for cemetery purposes.

(7) "Interment" means the disposition of human remains by cremation, inurnment, entombment or burial.

(8) "Cremation" means the reduction of a body of a deceased person to cremated remains in a crematory.

(9) "Inurnment" means placing cremated remains in an urn and depositing it in a niche.

(10) "Entombment" means the placement of human remains in a crypt or vault.

(11) "Burial" means the placement of human remains in a grave.

(12) "Grave" means a space of ground in a burial park used, or intended to be used, for burial of the remains of one person.

(13) "Crypt" or "vault" means a space in a mausoleum of sufficient size used, or intended to be used, to entomb uncremated human remains.

(14) "Niche" is a recess in a columbarium used, or intended to be used, for the interment of the cremated remains of one or more persons.

(15) "Cemetery authority" includes cemetery corporation, association, corporation sole or other person or persons owning or controlling cemetery lands or property.

(16) "Cemetery association" means any corporation or association authorized by its articles to conduct any or all the businesses of a cemetery, but does not include a corporation sole or a charitable, eleemosynary association or corporation.

(17) "Cemetery business," "cemetery businesses" and "cemetery purposes" are used interchangeably and mean any business and purpose requisite or incident to, or necessary for establishing, maintaining, operating, improving or conducting a cemetery, interring human remains, and the care, preservation and embellishment of cemetery property.

(18) "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

(19) "Lot," "plot" or "burial space" means space in a cemetery owned by one or more individuals, an association or fraternal or other organization and used, or intended to be used, for the permanent interment therein of the remains of one or more deceased persons. Such terms include and apply with like effect to one, or more than one, adjoining grave, crypt, vault or niche.

(20) The term "plot owner" or "owner" means any person in whose name a burial plot stands as owner of the right of sepulture therein in the office of the cemetery authority, or who holds from such cemetery authority a conveyance of the right of sepulture or a certificate of ownership of the right of sepulture in a particular lot, plot or space.

(21) "Endowment care" means the general care and maintenance of developed portions of a cemetery and memorials erected thereon financed from the income of a trust fund established and maintained pursuant to the provisions of ORS 97.810 to 97.860. Endowment care cemeteries owned by a city or a county may supplement their general care and maintenance trust funds from general revenues.

(22) "Special care" is any care in excess of endowed care in accordance with the specific directions of any donor of funds for such purposes. [Amended by 1955 c.545 §1; 1965 c.396 §1]

the bank or trust company shall be governed by the provisions of ORS 128.057 and shall not be required to invest the money according to the list approved by the State Treasurer. An officer of the corporation shall file with the Secretary of State on or before April 15 of each year a verified statement in duplicate containing the same information pertaining to the irreducible fund as provided in ORS 97.810 (2) regarding endowment care funds. The Secretary of State may require the corporation to file, as often as he considers it to be necessary, a detailed report of the conditions and assets of the irreducible fund.

(3) The interest or income arising from the irreducible fund provided for in this section or by any bylaws, or so much thereof as is necessary, shall be devoted exclusively to the preservation and embellishment of the grounds, buildings and property of the corporation and the lots and space in buildings or grounds sold to the members of the corporation, or to the payment of the interest or principal of the debts authorized by subsection (5) of this section for the purchase of land, erecting buildings, and improvements. Any surplus thereof not needed or used for such purposes shall be invested as provided in this section and shall become part of the irreducible fund.

(4) After paying for the land and the erection of the original buildings and improvements thereon, all the future receipts and income of the corporation subject to the provisions in this section relating to the creation of an irreducible fund, whether from the sale of lots and burial space, cremation of bodies, donations, gifts and other sources, shall be applied exclusively to laying out, preserving, protecting, embellishing and beautifying the cemetery or the crematory and grounds thereof, and the avenues leading thereto, and to the erection of such buildings and improvements as may be necessary or convenient for cemetery or crematory purposes, and to pay the necessary expenses of the corporation.

(5) No debts shall be contracted by such corporation in anticipation of any future receipts, except for originally purchasing the lands authorized to be purchased by it, laying out and embellishing the grounds and avenues, erecting buildings and vaults on such land, and improving them for the purposes of the corporation. The corporation may issue bonds or notes for debts so contracted and may secure them by way of mortgage upon any of its lands, buildings, property and improvements excepting lots or space conveyed to the members. [1969 c.580 §96; 1971 c.225 §1]

61.765 Selling land unsuited for burials. If in the board of directors' opinion, any portion of the lands of a nonprofit corporation organized and existing solely for the purposes of either owning or operating a cemetery or the cremation of dead bodies and the burial and care of incinerate remains is unsuitable for burial purposes or other purposes of the corporation, the board of directors may sell such portion and apply the proceeds to the general purposes of such corporation in the same proportion and manner as provided by ORS 61.005 to 61.125, 61.131 to 61.370, 61.375 to 61.481 and 61.505 to 61.950. [1969 c.580 §97]

61.770 Burial lots or space; use, exemption from taxation, execution and liens; lien for purchase price of gravestone. Burial lots or space for burial of incinerate remains in buildings or grounds sold by a nonprofit corporation organized and existing solely for the purposes of either owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall be for the sole purpose of interment or deposit and safekeeping of incinerate remains. Such lots or space shall be exempt from taxation, execution, attachment or other lien or process, if used as intended by the purchaser thereof from such corporation, or his assigns or representatives, exclusively for burial purposes, and in no wise with a view to profit. The vendor of any gravestone, however, shall not be prevented from having and enforcing a lien thereon for all or part of its purchase price. If a suit is brought to enforce such a lien, the decree therein is enforceable thereafter; and, for the purpose of enabling the lien to be had and enforced, the gravestone shall be deemed personal property and may be severed and removed, under execution and order of sale, from the lot where it is situated and may be sold in the same manner as any other personal property. [1969 c.580 §98]

61.775 Recording plan; power to improve and regulate grounds. A nonprofit corporation organized and existing solely for the purposes of owning and operating a cemetery or cremating dead bodies and burying and caring for incinerate remains shall cause a plan of its land and grounds and of the lots laid out by it and of the niches or burial space in the buildings erected thereon to be made and recorded in the county in which such grounds and land are located, such lots or

Calif Code

HEALTH AND SAFETY CODE

DIVISION 7. DEAD BODIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. DEFINITIONS

7000. The definitions in this chapter apply to this division and to Divisions 8 and 9 of this code.

7001. "Human remains" or "remains" means the body of a deceased person, and includes the body in any stage of decomposition and cremated remains.

7002. "Cremated remains" means human remains after incineration and necessary processing under Section 7054.1 in a crematory.

7003. "Cemetery" means any one, or a combination of more than one, of the following, in a place used, or intended to be used, and dedicated, for cemetery purposes:

(a) A burial park, for earth interments.

(b) A mausoleum, for crypt or vault interments.

(c) A crematory, or a crematory and columbarium, for cinerary interments.

7004. "Burial park" means a tract of land for the burial of human remains in the ground, used or intended to be used, and dedicated, for cemetery purposes.

7005. Except in Part 5 of Division 8 of this code, "mausoleum" means a structure or building for the entombment of human remains in crypts or vaults in a place used, or intended to be used, and dedicated, for cemetery purposes.

7006. "Crematory" means a building or structure containing one or more furnaces for the reduction of bodies of deceased persons to cremated remains.

7007. Except in Part 5 of Division 8 of this code, "columbarium" means a structure, room, or other space in a building or structure containing niches for inurnment of cremated human remains in a place used, or intended to be used, and dedicated, for cemetery purposes.

7008. "Crematory and columbarium" means a building or structure containing both a crematory and columbarium.

7009. "Interment" means the disposition of human remains by inurnment, entombment, or burial in a cemetery or, in the case of cremated remains, by inurnment, entombment, burial, or burial at sea as provided in Section 7117.

7010. "Cremation" means the reduction of the body of a deceased person to cremated remains in a crematory and the placement of the cremated remains in a grave, vault or niche or burial at sea as provided in Section 7117 of this code.

7011. "Inurnment" means placing cremated remains in an urn and placing it in a niche.

7012. "Entombment" means the placement of human remains in a crypt or vault.

7013. "Burial" means the placement of human remains in a grave.

7014. "Grave" means a space of ground in a burial park, used, or intended to be used, for burial.

7015. "Crypt" or "vault" means a space in a mausoleum of sufficient size, used or intended to be used, to entomb uncremated human remains.

7016. "Niche" means a space in a columbarium used, or intended to be used, for inurnment of cremated human remains.

7017. "Temporary receiving vault" means a vault used or intended to be used for the temporary placement of human remains.

7018. "Cemetery authority" includes cemetery association, corporation sole, or other person owning or controlling cemetery lands or property.

7019. "Cemetery corporation," "cemetery association," or "cemetery corporation or association" mean any corporation now or hereafter organized which is or may be authorized by its articles to conduct any one or more or all of the businesses of a cemetery, but do not mean or include a corporation sole.

7020. "Cemetery business," "cemetery businesses," and "cemetery purposes" are used interchangeably and mean any and all business and purposes requisite to, necessary for, or incident to, establishing, maintaining, operating, improving, or conducting a cemetery, interring human remains, and the care, preservation, and embellishment of cemetery property, including, but not limited to, any activity or business designed for the benefit, service, convenience, education, or spiritual uplift of property owners or persons visiting the cemetery.

7021. "Directors" or "governing body" means the board of directors, board of trustees, or other governing body of a cemetery association.

7022. "Lot," "plot," or "interment plot" means space in a cemetery, used or intended to be used for the interment of human remains. Such terms include and apply to one or more than one adjoining graves, one or more than one adjoining crypts or vaults, or one or more than one adjoining niches.

7023. "Plot owner," "owner," or "lot proprietor" means any person in whose name an interment plot stands of record as owner, in the office of a cemetery authority.

7024. "Permit for Disposition of Human Remains" includes "burial permit" and is a permit, issued pursuant to law, for the interment, disinterment, removal, reinterment or transportation of human remains.

DIVISION 8. CEMETERIES

PART 1. GENERAL PROVISIONS

CHAPTER 1. CEMETERY DEFINED

8100. Six or more human bodies being buried at one place constitute the place a cemetery.

CHAPTER 2. VANDALISM

8101. (a) Every person is guilty of a misdemeanor and punishable by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not exceeding one year, or by both, who maliciously does any of the following:

(1) Destroys, cuts, mutilates, effaces, or otherwise injures, tears down, or removes any tomb, monument, memorial, or marker in a cemetery, or any gate, door, fence, wall, post or railing, or any inclosure for the protection of a cemetery or any property in a cemetery.

(2) Obliterates any grave, vault, niche, or crypt.

(3) Destroys, cuts, breaks or injures any building, statuary, ornamentation, tree, shrub, or plant within the limits of a cemetery.

Re: HB 481

HB 481 relating to cemetery associations is being referred to your committee today. This bill is almost identical to the House Labor and Commerce version of HB 569 which you passed earlier this session.

I would appreciate your quick action on SB 481.

Thanks.

RE: SB 481 RELATING TO CEMETARY ASSOCIATIONS

SB 481 IS DESIGNED TO UPGRADE STATUTES WHICH COVER CEMETARY ASSOCIATIONS, NON-PROFIT CEMETARY CORPORATIONS AND CEMETARY LOTS. THIS BILL IS ALMOST IDENTICAL TO HB 569 WHICH THIS COMMITTEE PASSED EARLIER THIS SESSION. HB 569 HAS ALSO BEEN PASSED ON THE FLOOR. IT IS MY UNDERSTANDING THAT THE STATUTES GOVERNING CEMETARY OPERATIONS HAVE NOT BEEN REVISED SINCE THEY WERE ORIGINALLY ADOPTED IN 1949 DURING TERRITORIAL DAYS. THE BILL WOULD GIVE THOSE OPERATING IN THE INDUSTRY MORE FLEXIBILITY IN DEALING WITH CONSUMERS IN TODAYS MARKET.

RE: SB 517 RELATING TO WORKERS COMPENSATION

SB 517 IS DESIGNed TO [redacted] SOLVE THE PROBLEMS OF INCONSISTENCY OF TIME PERIODS WHICH NOW EXIST IN THE WORKERS COMPENSATION ACT. THE END DESIRED RESULT WOULD BE LESS CONTROVERTED WORKER COMPENSATION CLAIMS.

A DETAILED SECTIONAL ANALYSIS HAS BEEN PROVIDED AND I WOULD NOW ASK THE DEPARTMENT OF LABOR TO COME FORWARD AND GO THROUGH THE BILL WITH THIE COMMITTEE.

Section-By-Section Analysis

HCS CSSB 517 (L&C)

Section 1. This section requires the physician rendering treatment to file a medical report within 14 days following treatment instead of 20 days.

Section 2. This section extends the maximum time period for an employer to notify the board and employee that the payment of compensation has begun or has been increased, decreased, suspended, terminated, resumed, or changed in type, from 14 days to 28 days.

Section 3. This section extends the maximum time period for an employer to file a controversion from 14 days to 21 days from date of knowledge of the alleged injury or death, or, if payments have begun, within 7 days after an installment or compensation payable without an award is due.

Section 4. This section shortens the maximum time period for an employer to pay compensation to an injured worker from 28 days to 21 days.

Section 5. Provides for an effective date of July 1, 1984.

ANALYSIS

The proposed legislation rectifies many of the incompatible and inconsistent time periods presently existing in the Workers' Compensation Act. The bill changes the maximum time periods to file physician's notice of treatment, file notice of controversion, pay compensation benefits to injured workers and to notify the board and employee on the payment status of workers' compensation benefits.

Currently, the employer has a maximum time period of 28 days to pay compensation, but only 14 days to controvert a claim. A further conflict in making a determination to either pay or deny is the time period of 20 days for the physician to file notice of treatment verifying that the injury is work connected and that the worker is unable to work. This leaves little or no time for the employer/insurers to make an informed decision to accept or deny the claim. As a result, many employer/insurers controvert claims which unnecessarily delays payment of compensation for a longer period than the additional 7 days proposed under this legislation to investigate the claim.

This legislation will require the physician to file the medical report within 14 days instead of 20. The time period to file a controversion will be extended to 21 days instead of 14 days and the maximum time to pay compensation will be shortened from 28 to 21 days. In other words, the physician must file the medical report within 14 days and the insurer must either pay or controvert the claim within 21 days.

The proposed amendment allows an additional 14-day grace period for the employer/ insurer to notify the board and employee on the payment status of workers' compensation benefits by extending the maximum time period from 14 days to 28 days to file compensation reports.

LABOR

The following assumptions were made in preparing the forecasted costs:

1. State employment will continue to increase through FY 1986. Thereafter, state employment will level off with consolidation of administrative jobs and belt tightening being offset by jobs based on increased population.

2. There is no wage increase for calendar year 1984. The wages through FY 1986 reflect the recent agreement with APEA. A 5 percent yearly increase continues throughout the remainder of the forecast period.

3. As provided in this bill, the maximum weekly benefit amount paid for unemployent insurance claims will increase from $156 to $188, effective October 1, 1984.

As a result, the State of Alaska would be required to pay more in its personal service benefit costs for unemployment insurance. The total amount of the increased costs (which would affed all Departments in the State) is projected from past experience and a computerized modeling technique. The estimated increase in the average payment using this method is 12.7%. This increase would not uccur immediately in FY '85, because claimants are paid for an entire year at the rates in effect when they first claim benefics. The total effect of the increase would not be felt unitl FY '87.

MEMORANDUM FOR: DESIGNATED EMPLOYMENT SECURITY AGENCY

Alaska - John W. Shay
Idaho - Scott B. McDonald
Oregon - Raymond P. Thorne
Washington - Norward J. Brooks

SUBJECT: Revision of Between Terms Denial Provisions Required by P.L. 98-21

This is a follow-up to earlier discussions and correspondence with individual States in this region regarding the provisions of P.L. 98-21. The national office has completed its analysis of current State law provisions and its determination of what States need to do to bring their laws into conformity with P.L. 98-21. They are also requesting our assistance in confirming information pertaining to the grace period allowed by Section 521 (b)(2) of P.L. 98-21.

Section 521(a)(2) of P.L. 98-21 amended Section 3304(a)(6)(A) of FUTA to provide as follows:

> "Clauses (ii)(I), (iii), and (iv) of such sections are each amended by striking out "may be denied" and inserting in lieu thereof "shall be denied".

This amendment means that the States no longer have the option of applying these clauses, but instead must do so as a condition for certification of the State law. Accordingly, for consistency with these new requirements in amended Section 3304(a)(6)(A), all States must:

- Deny benefits based on nonprofessional services performed by employees of educational institutions between terms under clause (ii) (and also provide for retroactive payment for these employees as specified);

- Deny benefits on any services performed by employees of educational institutions during vacation or holiday periods under clause (iii);

- Deny benefits based on any services performed by employees of educational service agencies who perform such services in an

educational institution both between terms and during vacation or holiday periods under clause (iv).

In addition, Section 521(a)(1) of P.L. 98-21 amended Section 3304(a)(6)(A), FUTA, by adding new clause (v) as follows:

"(v) with respect to services to which Section 3309(a)(1) applies, if such services are provided to or on behalf of an educational institution, compensation may be denied under the same circumstances as described in clauses (i) thru (iv), and..."

New clause (v) is not mandatory but rather gives States the option to apply the denials in clauses (i) through (iv) to employees of nonprofit organizations or government entities who provide services to or on behalf of educational institutions. However, if adopted by a State clause (v) must be accepted in toto and must be applied equally to both professional and nonprofessional services.

The changes made by Section 521(a)(1) and (2) of P.L. 98-21 will become effective for compensable weeks beginning on or after April 1, 1984. However, there may be an exception to the April 1, 1984, effective date. Certain States, depending on when their legislatures are in session may be allowed additional time after April 1, 1984, to amend their State laws. Specifically, Section 521(b)(2) of P.L. 98-21 provides that:

"In the case of a State with respect to which the Secretary of Labor has determined that State legislation is required in order to comply with the amendment made by this section, the amendment made by this section shall apply in the case of compensation paid for weeks which begin on or after April 1, 1984, and after the end of the first session of the State legislature which begins after the date of the enactment of this Act, or which began prior to the date of the enactment of this Act and remained in session for at least twenty five calendar days after such date of enactment. For purposes of the preceding sentence, the term 'session' means a regular, special, budget, or other session of a State legislature."

This means that States have until the end of the first legislative session which begins after April 20, 1983, (the date of enactment of P.L. 98-21), or April 1, 1984, whichever is later, to amend their law. If the State legislature was in session on April 20, 1983, and remained in session for at least 25 calendar days, the State has until the end of that session or April 1, 1984, whichever is later. The term session is defined in P.L. 98-21 as a regular, special, budget or other session of the legislature. It is irrelevant whether the legislature actually meets or whether it is in recess. It is only required that the

legislature be in session.

We request that you:

(1) Review the attached summary and verify the accuracy of the legislative session dates.

(2) If corrective legislation is not being sought, summarize how the State intends to remedy the issues described in the summary.

(3) Provide the information requested above, in writing, within 14 days of receipt of this letter. This information is needed in order for the Secretary of Labor to make the grace period determination and for certification required by the Secretary for employer tax credits and State administrative grants.

ROBERT E. JOHNSON
Associate Regional Administrator
for Unemployment Insurance

Enclosure

ALASKA

Status of Between/Within Terms Denial Provisions Required by P.L. 98-21

Section 521(a)(2) of P.L. 98-21 amended Section 3304(a)(6)(A) of the Federal Unemployment Tax Act to make clauses (ii) through (iv) mandatory rather than optional. Following is the status of the implementation of those clauses in Alaska's employment security law, according to our Commerce Clearing House (CCH) reports.

The Alaska employment security law currently does not implement either of the three clauses that are now mandatory. Consequently, all three clauses must be enacted by April 1, 1984, since Alaska does not have a grace period which extends beyond the April 1, 1984 effective date.

Alaska has no grace period because its legislature convened on January 17, 1983 and adjourned June 27, 1983, more than 25 days after April 20, 1983, the date P.L. 98-21 was enacted.

MEMORANDUM State of Alaska

TO: Ken Johnson
Administrative Assistant
Representative Cowdery's Office

DATE: May 10, 1984

FILE NO:

TELEPHONE NO: 465-2700

FROM: Eileen Plate
Special Assistant
to the Commissioner
Department of Labor

SUBJECT: CS for SB 525

This will confirm our telephone conversation and your request for additional information.

1. The UI Trust Fund currently has a balance of $148 million.

2. Sections 10 and 13 of the UI bill, CS for SB 525, are conformity items with the Federal Unemployment Tax Act (FUTA). The additional cost to Alaska for not remaining in conformity with FUTA is the loss of $21 million in Administrative funds to the State for operation of the Unemployment Insurance (UI) and Job Service programs; $86.4 million in increased FUTA taxes to all employers in the state; and loss of $4.8 million in benefit payments for their Extended Benefits program. The total cost would be $112.2 million.

   Attached is a copy of a letter from the U.S. Department of Labor regarding the conformity requirements of Section 10.

3. Sections 2 and 3, which are not strictly conformity items, would cost the employers in this state an additional $2 million annually if not passed. Attached is a paper that was prepared on this subject in cooperation with the House Research Agency. On page 4 of the paper, the affect on employers is detailed. On page 7 the options are listed--we elected to propose the option that would have the least affect on Alaskan employers.

If Sections 2 and 3 had been in effect for 1984, there would have been no impact on employers. This is because of the requirement that employers with the same payroll decline percentage must be placed in the lower rate class rather than splitting the group. In 1983 there would have been 163 employers affected, for a total of $2,800 (or $17 per employer).

If you need any additional information on CS for SB 525, please contact me at 465-2700 or Jack Shay at 465-2712.

MEMORANDUM

TO: Representative Joe Hayes

FROM: David Teal
Legislative Analyst

RE: Provisions for Financing Unemployment Compensation
Research Request 84-101

Among other provisions, SB 525 would increase the maximum amount of unemployment compensation from the current level of $156 per week to a new maximum of $198.[1] According to the Department of Labor, this change in the benefit schedule would cause Alaska employers to contribute an additional $21.5 million to the unemployment insurance system during the next four years.

You asked me to review the provisions for financing Alaska's unemployment insurance system in order to determine the possibility of reducing the fiscal impact on employers of implementing SB 525. The result of that review is a proposal that:

- increases current benefits by $12.1 million per year (i.e., the proposal retains the benefit schedule contained in SB 525);
- decreases employer contributions by $12.5 million per year without shifting the financing burden to some other group; and
- maintains the adequacy of the trust fund.

Details of the proposal are discussed below. A table is included to aid your comparison of the current law, SB 525 and the proposed revisions to SB 525. The table shows values through 1988 because three years are required to absorb the full impact of a change in the benefit schedule. A shorter period would understate the amount of contributions required to finance an increase in benefits.

---

[1]These benefit amounts do not include allowance for dependents. Additional weekly benefits of $24 per dependent can be claimed by those who are eligible.

TABLE 1

Unemployment Insurance Benefits and Contributions
State of Alaska--1985 through 1988
(in millions of dollars)

	Benefits Paid By Alaska		Employer Contributions		Reserve Ratio in 1988*
	Amount	Change from Current Amount	Amount	Change from Current Amount	
Current Law	$342.8	--	$328.7	--	5.2%
HB 525	391.0	$48.2	350.2	$21.5	4.7
Proposal	391.0	48.2	278.5	(50.2)	3.2

*The reserve ratio is defined as the trust fund balance divided by total wages paid in the state. It is often used as a measure of the ability of the trust fund to pay future benefits.

Source: Alaska Department of Labor

* * * * *

The above table shows that the proposed revisions to SB 525 would require employer contributions of $71.7 million less (over a four-year period) than can be expected under the current version of the bill. The reduced contributions would be the result of two possible revisions to the existing mechanism for financing Alaska's unemployment insurance system.

Revision #1. Classify the interest earnings of the trust fund as income to the fund for the purpose of determining contribution rates.

Revision #2. Alter the solvency tax provisions to reduce employers' contributions when the trust fund is determined to be adequate.

Interest earnings of the trust fund are currently excluded from the formula which determines contribution rates. Because the financing system is designed to recover benefit outlays regardless of the size of the trust fund, the trust fund balance will spiral upward at a compound rate of growth unless this deficiency is corrected. Inclusion of

interest earnings in the rate formula would lower contributions required of employers and employees. This deficiency in the financing mechanism can be corrected by the following amendment to AS 23.20.290(e):

> (2) the department shall subtract from the amount determined in (1) of this subsection the amount of any benefits reimbursed to the fund and the amount of interest earned on the trust fund balance during those computation years;

The second proposed revision to the law modifies AS 23.20.290(f) to give employers tax credits when the trust fund is judged to be adequate. Current law assesses additional contributions when the trust fund is judged to be inadequate but has no provision for tax credits.[2] The figures in Table 1 are based on the following additions to the solvency tax table contained in section 290 (f):[3]

Reserve Rate at least (percent)	but less than (percent)	Fund Solvency Contribution (percent)
3.4		-.4
3.3	3.4	-.3
3.2	3.3	-.2
3.1	3.2	-.1
3.0	3.1	0.0
2.9	3.0	.1

At reserve rates of less than 2.9 percent, the solvency tax table remains as shown in AS 23.20.290(f). (For your convenience, a copy of AS 23.20.290 is attached to this memorandum.) The modifications should cause Alaska's reserve ratio to stabilize at about three percent. The current reserve ratio is about 3.2 percent.

---

[2] If the solvency tax table in AS 23.20.290(f) is modified, several references to "solvency contributions" should be changed to refer to "solvency adjustments" in order to eliminate confusion.

[3] Assuming interest were included in the formula for determining contribution rates, the impact of the solvency tax revision would diminish once the reserve ratio falls to three percent. Because the period of analysis is relatively short (four years), the figures in Table 1 make the solvency tax revision more attractive than it would appear if the period of analysis were longer.

As shown in the attached graph, Alaska's 1982 reserve ratio (i.e., balance to wage ratio) was the highest of any state. Alaska's reserve ratio has increased since that time, and Department of Labor projections show that Alaska's reserve ratio will continue to increase under current law and under SB 525.

As you know, the reserve ratio is often used as a measure of the adequacy of a trust fund to pay future benefits. It is difficult to judge the point at which a trust fund is adequate because there is no accepted standard for reserve ratios. However, it is clear that systems which respond quickly to increases in benefit outlays do not need as large a reserve balance as systems that respond more slowly. Many states use experience of 20 years or more to determine contribution rates. These states respond very slowly and therefore require a larger balance to achieve a given level of adequacy. Alaska's system uses only three years of experience, placing it among those states with the quickest reaction to changes in benefit outlays.

In addition, Alaska's financing system differs from those of other states in that a large trust fund balance does not necessarily have a stabilizing effect on contribution rates when benefit outlays increase. Even if the trust fund were as large as the Permanent Fund, contribution rates under the current law would be determined solely by the level of benefits paid. That is, the system is designed so that the trust fund balance can increase to keep pace with economic growth, but can decrease only under unusual circumstances.

* * *

This subject is extremely complex and, given the time available to complete this request, I have not given adequate coverage to all the issues that deserve to be addressed in this memorandum. Some points you may wish to consider in your deliberation of the proposed revisions to SB 525 are listed below.

- The two tax revisions suggested in this memorandum are independent. Either could be implemented separately, with or without a change in the benefit schedule.

- The solvency tax revision would reduce contributions only for employers, while the inclusion of interest would reduce contributions by both employers and employees.

- "Excess" contributions are a drain on Alaska's economy. However, contributions during a period of economic growth may be preferable to contributions made during a period of economic

decline. A delay in implementing the suggested provisions would increase the trust fund balance. A large trust fund balance would generate interest that could be used to reduce contributions if Alaska experiences an economic downturn in the future.

I would be pleased to expand the scope of this memorandum or to discuss the subject at your convenience. Please call the agency if you would like additional information.

(b) This penalty does not attach if within 30 days after mailing or personal delivery of the demand, arrangements for payments are made with the department, and payment is made in accordance with the arrangements.

(c) Penalties collected under this section shall periodically be transferred from the clearing account to the training and building fund. (§ 513 ch 5 ESLA 1955; am § 4 ch 106 SLA 1969; am § 22 ch 9 SLA 1980; am §§ 60, 61 ch 59 SLA 1982)

Effect of amendments. — The 1982 amendment corrected an error in the designation of subsection (c). As originally enacted in § 4, ch. 106, SLA 1969, subsection (c) was designated as subsection (d).

Article 4. Experience Rating.

Section
290. Rate determination

Sec. 23.20.290. Rate determination. (a) The department shall determine each eligible employer's ratable payroll. The department shall then put all eligible employers in the order of their average quarterly decline quotients beginning with the smallest average decline quotient and shall determine, with respect to each employer, the cumulative ratable payroll during the four consecutive quarters ending with the computation date of the employer together with all employers who precede him on the list.

(b) The department shall segregate the employers into groups in accordance with cumulative ratable payroll. The limits of the groups are those set out in column B of the table in (c) of this section. Each of these groups shall be identified by the rate class number in column A which is opposite the figures in column B which represent the percentage limits of each group. An employer shall be assigned the experience factor in column C which is opposite the rate class in which the greater part of the employer's ratable payroll falls. If one-half of the employer's ratable payrolls falls in one class, and one-half in another, he shall be assigned to the lower numbered rate class. No employer may be assigned to a higher numbered rate class than is assigned to another employer with the same average quarterly decline quotient.

(c) Beginning January 1, 1981, the rate of contributions for each employer is 82 percent of the average benefit cost rate multiplied by the employer's experience factor set out in column C of the table in this subsection opposite his applicable rate class set out in column A plus the fund solvency contribution required under (f) of this section. However, the rate of contributions for an employer may not be less than one percent or more than six and one-half percent. The rate of contributions for an employer must be rounded to the nearest one-hundredth of one percent.

COLUMN A Rate Class	COLUMN B Cumulative Ratable Payroll		COLUMN C Experience Factor
	at least (percent)	but less than (percent)	
1		5	.30
2	5	10	.35
3	10	15	.50
4	15	20	.55
5	20	25	.60
6	25	30	.65
7	30	35	.70
8	35	40	.80
9	40	45	.90
10	45	50	1.00
11	50	55	1.09
12	55	60	1.10
13	60	65	1.20
14	65	70	1.30
15	70	75	1.35
16	75	80	1.30
17	80	85	1.35
18	85	90	1.50
19	90	95	1.55
20	95		1.60

(d) Beginning January 1, 1981, and for each succeeding year thereafter, the rate of contributions payable by each employee of an employer who is subject to AS 23.20.165 is 18 percent of the average benefit cost rate as determined in (e) of this section rounded to the nearest one-tenth of one percent. However, the rate of contributions for an employee may not be less than one-half percent or more than one percent.

(e) The department shall determine the average benefit cost rate as follows:

(1) the department shall determine the amount of benefits paid to insured workers during the last three computation years;

(2) the department shall subtract from the amount determined in (1) of this subsection the amount of any benefits reimbursed to the fund during those computation years;

(3) the department shall divide the amount determined in (2) of this subsection by the total wages paid by all employers required to pay contributions under this chapter during the first three of the last four computation years;

(4) the department shall determine the amount of total wages subject to contributions under this chapter paid during the preceding computation years;

CHANGES IN FEDERAL UNEMPLOYMENT TAX CREDITS UNDER THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

PREPARED BY

THE ALASKA DEPARTMENT OF LABOR

and

THE ALASKA HOUSE OF REPRESENTATIVES RESEARCH AGENCY

August 1983

CHANGES IN FEDERAL UNEMPLOYMENT TAX CREDITS UNDER THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

SUMMARY

Since the mid 1970s, this nation's unemployment insurance system has been plagued with shortages of funds for administrative purposes and for payment of unemployment compensation. The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) made changes to the unemployment tax system which provided additional administrative funds and which were intended to bolster the state trust funds used for payment of unemployment benefits. The changes which provide additional administrative funds were implemented in 1983. Alaska strongly supports the 1983 TEFRA changes. However, the State cannot support the changes scheduled for implementation in 1985. In that year, states must adopt a maximum tax rate of at least 5.4 percent or face the prospect of employers in the state losing federal tax credits. The loss of tax credits would cause employers to make additional contributions to the federal unemployment insurance system.

If the intent of the 1985 TEFRA revisions was to encourage increased tax collection efforts by those states which have failed to provide collections necessary to finance unemployment compensation, the legislation clearly fails to fulfill its objective. When TEFRA was passed in 1982, only three of the 30 states affected by the revisions had insolvent trust funds, while 13 of the 20 states not affected by the revisions were insolvent. Clearly, the legislated attempt to increase tax collection efforts fails to affect the majority of states that have demonstrated by their insolvency that increased revenue is necessary. In addition to the misdirected encouragement of fiscal responsibility, the 1985 TEFRA revisions are likely to cause some states to reverse fiscally responsible actions of the past.

Although technical problems associated with adopting a 5.4 percent state tax rate are not insurmountable, adoption of that state tax rate may redistribute the burden of financial support of the unemployment insurance system among employers and could upset the program balance that some states have achieved. The cause of the redistribution and imbalance is TEFRA's focus on tax rates rather than tax effort. Tax effort depends on the amount of earnings subject to tax as well as the rate at which those earnings are taxed. Although the State of Alaska mildly objects to the 1985 TEFRA revisions because they fail to encourage fiscal responsibility where a need for such responsibility has been demonstrated, we strongly object to the failure of the law to recognize collection efforts other than increases in tax rates. The treatment (under the 1985 TEFRA revisions) of states that have demonstrated fiscal responsibility adds insult to injury because other tax efforts--such as employee contributions and high tax bases--are recognized under provisions dealing with states that have insolvent trust funds.

As is often the case with federal intervention in the unemployment insurance system, compliance with the revisions is optional. However, the incentive to comply with the 1985 TEFRA revisions is so strong that "mandate" is an accurate description of states' potential courses of action. This paper discusses potential state actions, but the only attractive option is a revision of federal law. A revision need not remove the incentive to increase tax efforts at the state level; it could simply give states the flexibility to demonstrate effort in ways other than tax rates. We urge others to join the campaign to revise the TEFRA provisions so that states have a voice in the determination of tax effort.

CHANGES IN FEDERAL UNEMPLOYMENT TAX CREDITS UNDER THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

Prepared by
The Alaska Department of Labor and
The Alaska House of Representatives Research Agency
August 1983

The unemployment insurance system in the United States is administered as a partnership of the federal and state governments. Employers contribute a portion of their payroll to both the federal and state partners. Contributions to the federal government are used for program administration and for unemployment compensation for which the federal government is liable. Contributions to state governments are used only for payment of unemployment compensation.

In recent years, the federal unemployment insurance tax has been 3.4 percent of the first $6,000 paid to each employee in each calendar year. However, employers could receive credit for contributions made to an approved state unemployment insurance program. These tax credits could reduce employers' net federal contribution to .7 percent of the first $6,000 paid to each employee in each year, or $42 dollars per employee. Each state was free to set a tax base (the amount of earnings subject to state tax) and contribution rates which it deemed sufficient to support the unemployment compensation paid through its own program. However, full federal credit could be obtained by all employers in a state only if the tax base was at least $6,000 and the highest state contribution rate was at least 2.7 percent. Alaska's tax base in 1983 is $20,200, and Alaska employers pay state rates that range from 1.0 percent to 3.8 percent.

REVISIONS TO THE CONTRIBUTION SYSTEM UNDER TEFRA

Contributions to the unemployment insurance system in recent years have provided insufficient administrative funds and have seriously underfinanced benefit payments in many states. It was in this context of inadequate federal administrative funds and insolvent state trust funds that system changes were made by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). Effective in 1983, the federal unemployment insurance contribution rate was raised to 3.5 percent and the federal tax base was increased to $7,000. The provision for a federal tax credit of 2.7 percent for contributions to an approved state program was unchanged, so contributions to the federal government by employers eligible for full federal tax credits were increased by $14 to $56 per employee per year.

The 1983 TEFRA changes also had an impact on state financing of unemployment compensation. In those states which use the federal tax base as the amount of earnings subject to state tax, the acceptance of a higher tax base can increase revenue to state unemployment insurance programs.

TEFRA also included revisions scheduled for implementation in 1985. In that year, the federal contribution rate will increase from the current 3.5 percent to a rate of 6.2 percent. Simultaneously, the potential federal tax credit for contributions to state programs will be increased to 5.4 percent. These changes appear to leave employers' net rate of contributions to the federal government unchanged (from the 1983 level) at .8 percent of each employee's first $7,000 of earnings, or $56 per employee per year.

IMPACT OF REVISIONS EFFECTIVE IN 1985

Although the 1985 TEFRA revisions maintain the $56 per year net federal unemployment insurance contribution that is currently applicable and therefore appear to have no effect on employers' costs, that appearance is deceptive. The revisions effective in 1985 force states with maximum state contribution rates of less than 5.4 percent to choose between 1) increasing their maximum state contribution rate to at least 5.4 percent or 2) allowing some employers in the state to lose federal tax credits.[1] Loss of federal tax credits would cause affected employers to pay additional federal taxes for support of the unemployment insurance system.

The 1983 TEFRA changes were clearly designed to increase contributions for both administrative purposes and for state benefit trust funds, but the 1985 changes leave the net federal contributions unchanged and are clearly designed to encourage states to take additional action that will increase their tax collection efforts. Alaska supports national efforts to improve the fiscal integrity of the unemployment insurance system, but we strongly object to the way in which the 1985 TEFRA revisions address the problem of insolvent state trust funds.

Although some states or groups of employers may have seen national legislation as an attractive alternative to state action, we do not believe that the 1985 TEFRA revisions will significantly reduce the number of states with insolvent trust funds. Insolvency occurs when benefits exceed contributions. The states themselves have been given--and should retain--the ability to implement a benefit schedule of their own choice. Along with that freedom comes the responsibility to implement an experience rating system that will adequately

---

[1] Section 3302(a) of the Federal Unemployment Tax Act (FUTA) allows credit against federal tax liabilities for amounts actually paid to an approved state unemployment insurance program. Section 3302(b) of FUTA provides an employer with additional credit against the tax for the difference between actual payments to a state system and the amount he would have paid "if throughout the taxable year he had been subject under such State law to the highest rate applied thereunder in such 12-month period to any person having individuals in his employ, or to a rate of 5.4 percent, whichever rate is lower." Unless a state has a tax rate of at least 5.4 percent after 1984, some employers are likely to lose additional credits provided by section 3302(b).

support the chosen level of benefits.[2] We are convinced that tax collection efforts depend on the amount of earnings subject to tax as well as the rate at which those earnings are taxed. The 1985 TEFRA revisions address tax rates but ignore the equally important function of the tax base. Further, the revisions do not appear to address the problem of solvency where that problem needs to be addressed.

Effect on States

If the intent of the 1985 TEFRA revisions was to encourage increased tax collection efforts by those states which have failed to provide the collections necessary to finance unemployment compensation, the legislation clearly fails to fulfill its objective. If the legislation does encourage increased tax collection efforts, it will do so primarily in those states that have the least need to generate additional collections. In addition, the legislation may have the unintended effect of encouraging states to reverse fiscally responsible acts of the past.

According to figures published by the Nevada Employment Security Department, 20 states already had maximum tax rates greater than 5.4 percent in 1982. If the TEFRA revisions requiring a 5.4 percent tax rate had been effective in that year, only those states with maximum tax rates below 5.4 percent would have been affected. Table 1 shows that Alaska is one of the 30 states affected by the 1985 TEFRA revisions.

The significance of this observaton does not lie in the number of states affected by the revisions, but in which states are affected. Thirteen of the 20 states which would not be affected by the federal revisions have insolvent state trust funds. In addition, only one of those 20 states has a

---

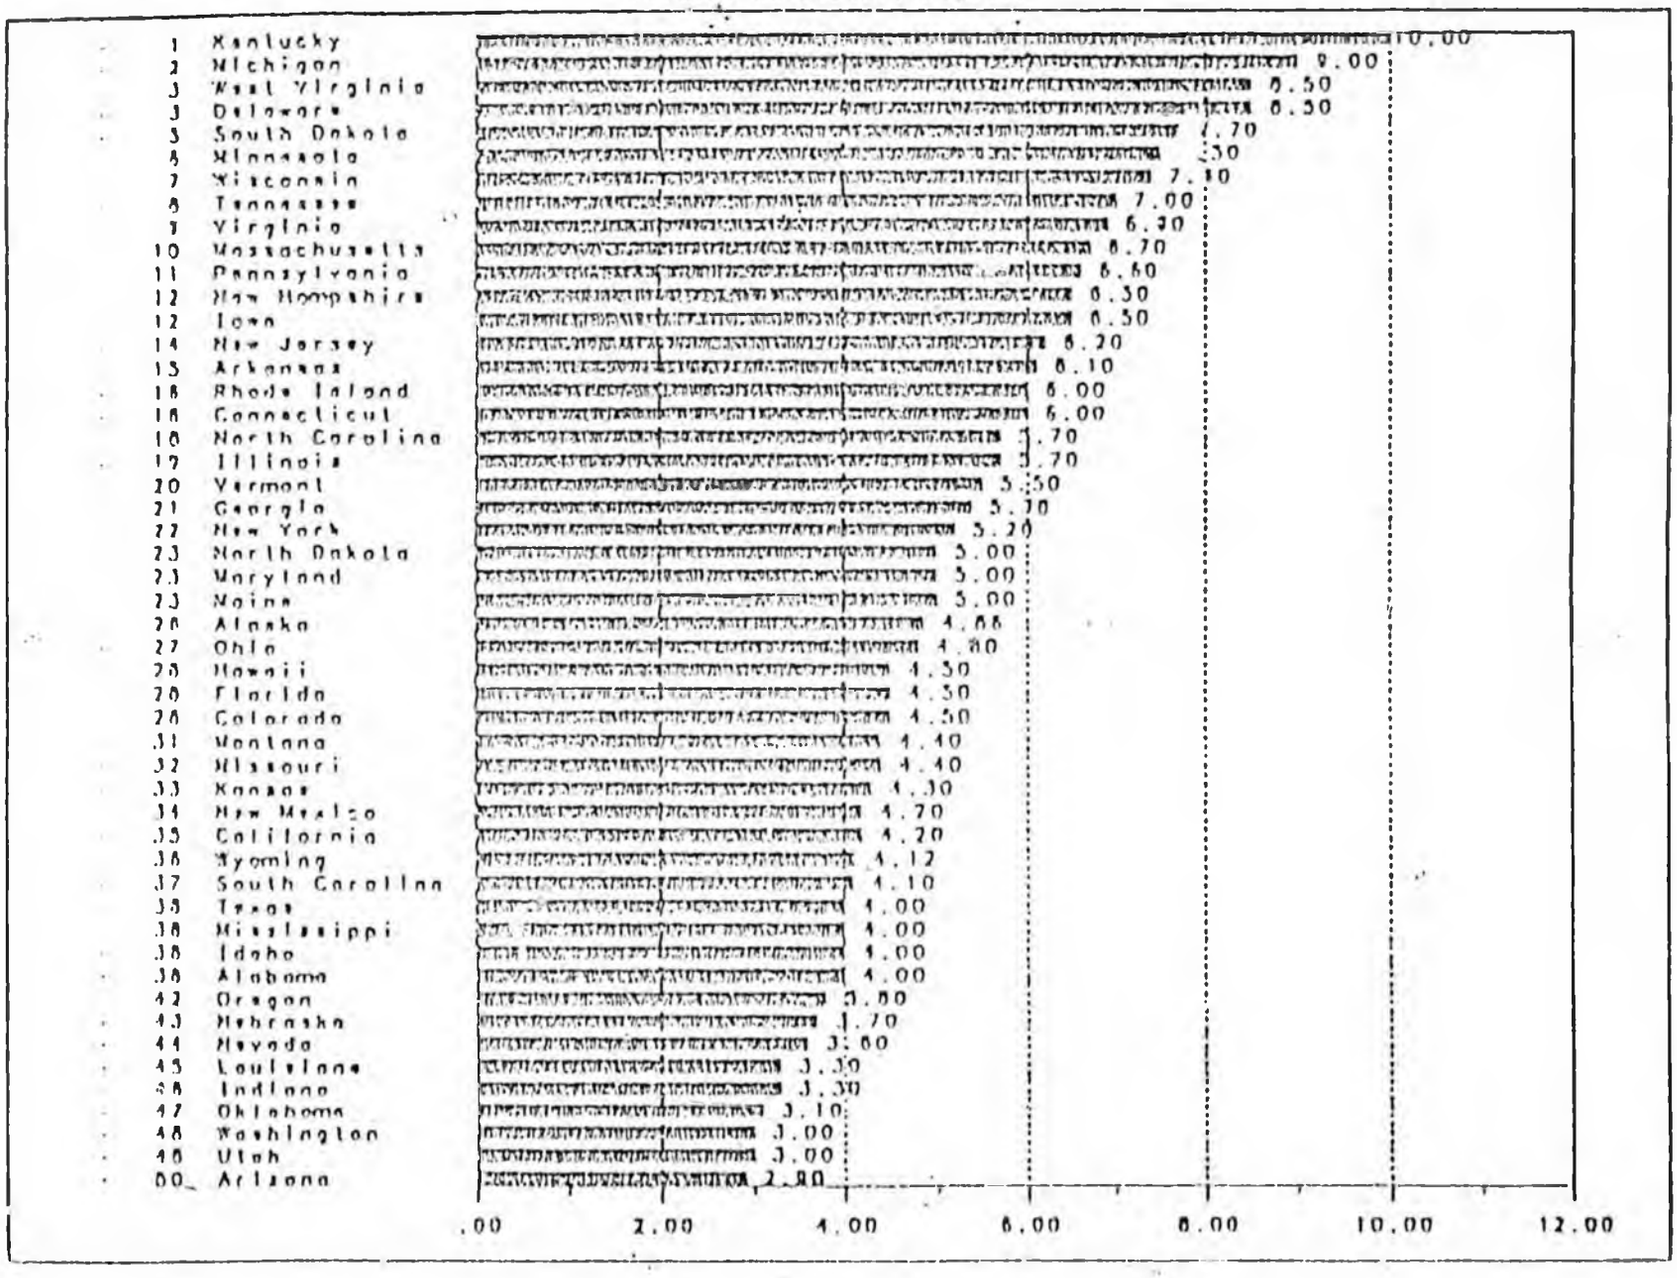
[2] Experience rating is a system whereby employers are assigned reduced contribution rates if they demonstrate a history of low unemployment risk for their employees. Theoretically, experience rating should increase employers' motivation to stabilize employment and to monitor the claims of the unemployed. When benefit payout is high and there is a need for additional tax collections, states with a low tax base must place more and more employers in higher tax brackets. As employers crowd into the higher tax brackets, the experience rating concept is eroded; a good record of unemployment risk has diminished influence on tax rates when all employers are at or near the top of the tax rate schedule.

We realize that some states may face great difficulty in moving tax increases through state legislatures and that states may therefore passively await federal "mandates" to increase taxes. We also realize that the simple solution to the erosion of experience rating--increasing the tax base--is unpopular in the majority of states which still use the antiquated "reserve ratio" experience rating system. (A mathematical quirk in that rate-making formula causes tax rates to rise when the tax base is increased.) However, we believe that adjustments to experience rating systems should be made by the individual states, not by the federal government.

TABLE 1

Maximum Tax Rate

Percent On Taxable Payroll



Nevada Department of Employment Security,

tax base greater than $9,000 and only three have a ratio of trust fund balance to total wages that exceeds one percent.[3] Of the 30 states that would be affected by the revisions, only three are insolvent, eight have a tax base greater than $9,000 and 15 have a ratio of trust fund balance to total wages that exceeds one percent.

Clearly, the legislated attempt to increase tax collection efforts fails to affect the majority of states that have demonstrated by their insolvency that increased revenue is necessary. The law does affect many states which have a trust fund of a size that indicates that additional collection efforts are unnecessary. Further, the law affects many states that have responded to the need for increased tax collections by increasing their tax base as an alternative (or supplement) to increased tax rates.

For those states that have already raised their tax base above the federal tax base in order to keep pace with increases in wages and unemployment compensation, the federal revisions are particularly troublesome. The new federal law may be counterproductive because it encourages states to reverse the fiscally responsible act of increasing their tax base. Although we mildly object to the law because it fails to encourage fiscal responsibility where a need for such responsibility has been demonstrated, we believe that the indirect encouragement for states to lower their tax bases is unconscionable. Lower tax bases diminish the ability of states to control total tax revenue and can distort an otherwise equitable distribution of program costs.

Effect on Employers

Adoption of a maximum unemployment tax rate of at least 5.4 percent is a state option. If a state fails to implement a tax rate at or above that level, some employers in that state may lose a portion of the additional credits granted by section 3302(b) of the Federal Unemployment Tax Act (FUTA). The attached table shows the cost to selected Alaska employers under the current contribution rate schedule and under the following scenarios applicable after 1984: 1) Alaska's maximum tax rate remains at 3.8 percent; and 2) Alaska adopts a 5.4 percent maximum tax rate with no change in the tax base. The impact of these scenarios on various groups of employers is summarized below.

Low Wage/Low Rate Employers

Employers who pay annual wages under $7,000 and contribute at the minimum state tax rate will be strongly affected if the state does not adopt a 5.4 percent maximum tax rate. These employers would lose federal tax credits and thus pay additional federal taxes. The maximum additional federal tax would be $112 per employee for employers paying annual wages of $7,000. In Alaska, trade and service employers tend to be in this category.

---

[3] The ratio of trust fund balance to total wages is a measure of the adequacy of the trust fund. The one percent level is arbitrary. All figures concerning tax rates and tax bases are for 1982, the latest year for which data are available.

*Contributions under current law assume a state tax base of $20,200 and a maximum state tax rate of 3.8%.

**"Increase" refers to additional taxes owed by employers if the state adopts a maximum tax rate of 5.4% after 1984. Negative numbers show savings associated with adopting a maximum tax rate of 5.4% relative to retaining the current law after 1984.

Low Wage/High Rate Employers

Employers who pay annual wages under $7,000 but contribute at the maximum state tax rate would pay increased taxes regardless of which alternative is chosen. Contributions to the state by this group of employers would, of course, be higher if the maximum state tax rate were increased to 5.4 percent. However, the increased state contribution under a 5.4 percent state tax rate would be the same amount that would be paid in additional federal taxes if a 5.4 percent state tax rate were not adopted. The sum of federal and state contributions would therefore be the same for this group of employers whether or not the state adopts a 5.4 percent maximum tax rate. Although total contributions would be unchanged, a larger share of total contributions would go to the federal government if the state does not adopt a maximum state tax rate of 5.4 percent. In Alaska, many fish processors are in this group of employers.

High Wage Employers

Under Alaska's current maximum tax rate of 3.8 percent, employers paying annual average wages of at least $10,000 would earn sufficient federal tax credits to offset the loss of tax credits on wages below $7,000. That is, there would be no net loss of federal tax credits--and no additional federal taxes owed--by these employers even if the state does not adopt a 5.4 percent maximum tax rate. If the state does adopt a 5.4 percent maximum tax rate, the amount of state contributions owed would depend on the tax base adopted by the state and the tax rate assigned to the employer.

For those employers paying annual average wages between $7,000 and $10,000, total contributions can decline as wages increase. Between those levels of earnings, the gain in federal tax credit may exceed the higher taxes owed to the state. (See attached table.)

Impact on the Equity of the State Program

Alaska faces no significant technical problems in adopting a 5.4 percent state tax rate; our objections to the 1985 TEFRA revisions focus on the damage to Alaska's "user pay" philosophy of financial support for unemployment compensation. As the attached table shows, adoption of a 5.4 percent state tax rate will redistribute the tax burden among Alaska employers.

Alaska expended a good deal of effort to develop a contribution system that fits the needs of the state. In Alaska, many high-wage occupations tend to be seasonal, which allows employees in those occupations to collect unemployment compensation despite their high earnings. By raising the tax base while lowering tax rates, Alaska has been able to redistribute program costs so that employers in high-wage, seasonal industries contribute approximately as much as employees in those industries draw in unemployment compensation.

Adoption of a 5.4 percent state tax rate without a corresponding reduction in the tax base would cause Alaska to collect contributions that are un-

necessary. Alaska's benefit payment account is adequate and our contribution system is designed to protect the financial integrity of the fund in the future. Alaska has accepted the responsibility of providing adequate funds for unemployment compensation and currently collects a maximum tax over twice as large as the $378 annual contribution that the federal revisions attempt to encourage. Unless adoption of a 5.4 percent state tax rate is accompanied by a corresponding reduction in the state tax base, potential employer contributions at the maximum rate would increase by 42 percent to nearly $1,100 per employee per year. In order to avoid this unnecessary drain on the state economy, Alaska may be forced to reduce its tax base.

A reduced tax base is objectionable not only because it implies acceptance of the federal view that tax effort can be measured by tax rates instead of by tax rates and tax base in combination, but also because a reduced tax base would introduce serious problems of equity. The above discussion mentioned that the tax base can be used to redistribute the tax burden among employers. A lower tax base in Alaska would disturb the balance we have achieved in this area.

In addition, a reduction in the state tax base would disturb the balance between benefit eligibility and taxes paid. Unless the tax base is equal to the amount of wages that are used to compute the amount of weekly compensation a claimant may receive, the system is unbalanced. If the tax base exceeds the earnings used to determine benefit eligibility, taxes are being paid on wages that cannot contribute to claimants' compensation. If the tax base is set at a level below the amount of earnings used to determine benefit eligibility, compensation is being paid on wages that have no corresponding tax liability.

If the Alaska Employment Security Act had been revised to ensure a maximum tax rate of 5.4 percent in 1983 under the current rate formula, adequate collections would have been obtained at a tax base of $13,400. Alaska's benefit schedule currently reaches a maximum at $16,000 in annual earnings and the state is preparing legislation to extend the schedule to $20,200, which is the 1983 state tax base. The options for designing a benefit schedule that peaks at $13,400 in annual earnings are not attractive to the state.

Impact on Program Costs

The costs associated with the decision to adopt a 5.4 percent state tax rate are difficult to estimate because there are many options and the cost of each option may change over time. One approach is to examine the effects of retaining the current law. Under this approach, it is clear that some employers will lose federal tax credits and will therefore have greater federal tax liability if a 5.4 percent maximum state tax rate is not adopted. This option could drain an additional $2 million per year from employers in Alaska. The additional contributions would go entirely to the federal government.

If Alaska does adopt a 5.4 percent state tax rate, any additional contributions would go to the state trust fund rather than to the federal govern-

ment. There are several options that could maintain total state collections at the current level, but all of the options redistribute the tax burden among Alaska employers. In summary, failure to adopt a 5.4 percent maximum state tax rate will redistribute the tax burden among employers and increase total contributions, while the impact of adopting a 5.4 percent maximum state tax rate may be limited to a redistribution of the tax burden.

OPTIONS FOR ACTION

Under current federal law a "no action" option would cost Alaska employers an estimated $2 million per year in increased contributions to the federal government. Unless it can be shown that a "no action" option is preferable to the distortion that would be introduced by adopting a 5.4 percent state tax rate, failure to act is obviously not an economically attractive option.

Another option is to work to enact a change in federal law that will recognize Alaska's tax collection efforts and will revise the criteria for obtaining federal tax credits. This option is clearly preferable to the "no action" alternative, but there is limited time to enact revised legislation before the scheduled implementation date of 1985.

Prior to the implementation date, the state may wish to examine alternatives that meet the requirements of the law to determine which alternative introduces the least amount of distortion to the present system. State action in this direction need not preclude attempts to revise the federal criteria. Some options for state action are discussed below.

Include Employee Contributions in the Definition of Tax Effort

Alaska is one of three states in which employees contribute to the unemployment insurance system. In Alaska, employees provide 18 percent of the contributions to the state trust fund. Despite this significant support, the Federal Unemployment Tax Act does not recognize employee contributions as a part of Alaska's tax effort for purposes of determining normal federal tax credits. The Act does, however, include employee contributions in the definition of "employer contribution rate" for purposes of determining federal tax credits in those states that have insolvent state trust funds and have outstanding advances under Title XII of the Social Security Act.

If employee contributions were included for normal FUTA tax credit purposes, the impact of increasing Alaska's maximum tax rate to 5.4 percent would be diminished by about one-third. State action to consolidate employer and employee contributions might face a legal challenge if the employee contribution were then interpreted as a deduction from employees' paychecks for the purpose of paying employers' taxes. A better approach toward the goal of achieving recognition of employee contributions is to push for a revision of federal law so that the rules concerning employee contributions are applied consistently. Whatever the approach on this issue, action taken to ensure recognition of employee contributions can be used in combination with, rather than as a substitute for, other actions discussed below.

Assign the Maximum Rate only to Delinquent Employers

Federal law may allow full federal tax credits to employers in those states that charge a 5.4 percent rate to some or all delinquent employers, even if no other employers are charged that rate. Section 3302(b) of the Federal Unemployment Tax Act (FUTA) states that all employers in a state may be eligible for full federal tax credits if the maximum state tax rate is at least 5.4 percent (after 1984) and any reduced tax rates meet the criteria of Section 3303. The provision allows employers to claim federal tax credits each year as if they had been subject under state law to "the highest rate applied thereunder in such 12-month period to any person having individuals in his employ, or to a rate of 5.4 percent, whichever rate is lower." (Emphasis added.)

Section 3303 of FUTA discusses criteria for assigning reduced contribution rates. That provision says that for a pooled benefit payment account such as exists in Alaska, a "taxpayer shall be allowed an additional credit under section 3302(b) with respect to any reduced rate of contributions permitted by State law" if reduced tax rates are assigned solely "on the basis of his (or their) experience with respect to unemployment or other factors bearing a direct relation to unemployment risk."

The implication of these provisions is that all employers could be assigned a standard tax rate of 5.4 percent, with reductions from that rate assigned to non-delinquent employers on the same basis as is currently accepted by the Secretary of Labor for rate assignments in Alaska. The 5.4 percent tax rate would then be the standard rate and any reductions from that rate would be based on an accepted experience rating system. The fact that some employers would be ineligible for reduced tax rates because of their delinquent status is irrelevant; the law does not require states to grant reduced rates, it requires only that no reduced rates be granted unless they are based solely on employers' experience with respect to unemployment or other factors bearing a direct relationship to unemployment risk. This option appears to meet the legal criteria for obtaining the additional tax credits allowed under the Federal Unemployment Tax Act.

Add a Rate Class with a 5.4 Percent Rate

Addition of a rate class to Alaska's experience rating system is a potential solution to the problem of assigning a 5.4 percent state tax rate. As an example, rate class 20 could be redefined to include employers whose payroll consists of 4.99 percent of total statewide payroll instead of the current 5 percent.[4] Employers with the remaining .01 percent of total

[4] Alaska's experience rating system currently includes 20 rate classes, each containing five percent of total statewide payroll. Starting with employers with the best unemployment experience, employers are placed in rate class 1 (lowest tax rate) until five percent of total statewide payroll is accounted for. The next-best-ranked employers are placed in rate class 2 until it also contains employers whose total payroll equals five percent of total statewide payroll. This continues through all 20 rate classes.

statewide payroll would then be assigned to (the new) rate class 21. Employers in that rate class would be assigned a contribution rate of 5.4 percent. This alternative would probably affect fewer employers than the option discussed above, particularly if delinquent employers were no longer assigned the highest tax rate on the rate schedule.

The above options would introduce minimal distortion to the current program, but their legal support should be examined before implementing them. Other options involving adjustments to the state tax base could ensure a state tax rate of 5.4 percent while maintaining secure legal standing. The most attractive option is to work toward a revision of federal law; that option would cause no distortion and would leave no grounds for legal challenge.

RECOMMENDED REVISIONS TO FEDERAL LAW

This paper has shown that tax effort can be measured only by considering both the amount of wages subject to tax and the tax rate applied to those wages. The 1985 TEFRA revisions focus only on tax rates and therefore penalize those states that have increased their tax efforts by increasing the state tax base. Incorporation of provisions similar to those adopted recently in Public Law 98-21 would substantially alleviate this penalty.

Public Law 98-21 revised the formula for computing the tax effort of states that have outstanding advances from the federal government. The revised formula recognizes the role of the state tax base in determining tax effort and may grant additional credit to employers in states which have a tax base higher than the federal tax base.

If a similar provision were applied to the tax credits available to those states without insolvent state trust funds, the penalties (in the form of lost federal tax credits) scheduled to take effect in 1985 would be decreased, but a problem would still exist. The problem relates to the amount of tax effort that is required in a state. States with liberal benefit provisions obviously need a greater tax effort than states with stringent eligibility requirements and/or low levels of unemployment compensation.

The level of tax effort that is adequate for a state is easy to determine; if total revenue to a state trust fund equals or exceeds benefit payments in the long-run, tax effort in that state is adequate. Determination of the tax base and tax rates used to produce the necessary revenue is the responsibility of the states. When states fail to accept that responsibility, federal action should be taken. The number of states with insolvent trust funds indicates that federal action is needed now. This paper has shown, however, that the 1985 TEFRA revisions fail to address the solvency problem where it needs to be addressed.

A provision that bases federal tax credits on adequacy of contributions rather than simply on maximum tax rates would be fair to all states and would allow the flexibility for state action that is necessary in a true partnership. We strongly urge that federal law be revised to reflect the principles of equity and flexibility.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF LABOR

OFFICE OF THE COMMISSIONER

P.O. BOX 1149
JUNEAU, ALASKA 99802
PHONE: (907) 465-2700

March 14, 1984

The Honorable Richard Eliason
Chairman, Senate Labor and
Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Eliason:

This is in reply to the questions asked by the Senate Labor and Commerce Committee on March 13 concerning SB 525, the unemployment insurance bill.

Question: What will be the total cost to employers and employees if we raise maximum benefits from $156 to $198 per week?

As indicated during the hearing, the employer rates are projected to decline after 1984 (even with an increase in benefits); however, the rates will not go down as fast when benefits are raised. The tax base is also expected to increase somewhat. The projected tax base figures were compiled by the Research and Analysis section of the Department and reflect an approximate increase of 2½ percent annually. The net result is projected as:

Year	Tax Base	Maximum Employer Tax Rate w/o/incr.	Maximum Employer Tax Rate w/incr.	Employee Tax Rate w/o/incr.	Employee Tax Rate w/incr.	Total Cost of Increase To Employers	Total Cost of Increase to Employees
1985	$22,600	4.08%	4.08%	.6%	.6%	$ 0	$ 0
1986	23,000	3.34	4.02	.5	.6	3.7 million	.8 million
1987	23,600	3.70	4.03	.5	.6	7.1 million	1.5 million
1988	24,500	3.42	3.90	.5	.5	10.3 million	2.3 million

Question: What sections of the bill are conformity items with the Federal Government?

Sections 8 and 11 are conformity items. Sections 2 and 3, while not strictly conformity items, are necessary to have our law relate to the federal FUTA law and save employers in this state between $1.5 and $2.0 million annually in increased FUTA taxes.

07-G9LH

Question: Do you have information on firms affected by Sections 2 and 3 of the bill?

Yes, the enclosed listing identifies the industry make-up of the 163 firms potentially eligible for the 21st rate class. If this law change had been in effect currently, it would have affected 163 employers in 1983 for a total increase of $2,800, or an average of $17 per employer. In 1984, it would not have affected any employers in the state.

I hope this answers the questions posed by your committee. We will respond to the query from Senator Pettyjohn concerning tax base period calculations in a separate memorandum. If you need additional information, please contact me.

Sincerely,

Jim Robison

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HCS CSSB 525 (L&C)
TITLE: "An Act relating to Unemployment Insurance."
AGENCY AFFECTED: Department of Labor
Page 2

The following assumptions were made in preparing the forecasted costs:

1. State employment will continue to increase through FY 1986. Thereafter, state employment will level off with consolidation of administrative jobs and belt tightening being offset by jobs based on increased population.

2. There is no wage increase for calendar year 1984. The wages through FY 1986 reflect the recent agreement with APEA. A 5 percent yearly increase continues throughout the remainder of the forecast period.

3. As provided in this bill, the maximum weekly benefit amount paid for unemployment insurance claims will increase from $156 to $188, effective October 1, 1984.

As a result, the State of Alaska would be required to pay more in its personal service benefit costs for unemployment insurance. The total amount of the increased costs (which would affect all Departments in the State) is projected from past experience and a computerized modeling technique. The estimated increase in the average payment using this method is 12.7%. This increase would not occur immediately in FY '85, because claimants are paid for an entire year at the rates in effect when they first claim benefits. The total effect of the increase would not be felt until FY '87.

LEG:A:4

QUESTIONS:

1. HOW MUCH MONEY DOES THE STATE AND EMPLOYERS IN ALASKA STAND TO LOSE IF THIS BILL DOES NOT PASS ? WHY ?

2. HOW ID YOU ARRIVE AT THE 3.3 PERCENT FIGURE ? (THE UNEMPLOYMENT INSURANCE FUND IS 3.3% OF THE STATES TOTAL WAGES)

3. WHY DID THE FED'S DECIDE TO CUT OUT CERTAIN EDUCATIONAL INSTITUTION WORKERS FOR WEEKLY UNEMPLOYMENT BENEFITS ?

4. WILL THIS NEW SECTION CREATING A BENEFIT PROGRAM ALLOW THOSE PEOPLE TO DRAW UNEMPLOYMENT WITHOUT CAUSING FEDERAL CONFORMITY PROBLEMS ?

5. HOW MANY PEOPLE ARE EFFECTED BY THIS CHANGE ?

MEMORANDUM State of Alaska

TO: Ken Johnson
Administrative Assistant
Representative Cowdery's Office

DATE: May 10, 1984

FILE NO:

TELEPHONE NO: 465-2700

FROM: Eileen Plate
Special Assistant
to the Commissioner
Department of Labor

SUBJECT: CS for SB 525

This will confirm our telephone conversation and your request for additional information.

1. The UI Trust Fund currently has a balance of $148 million.

2. Sections 10 and 13 of the UI bill, CS for SB 525, are conformity items with the Federal Unemployment Tax Act (FUTA). The additional cost to Alaska for not remaining in conformity with FUTA is the loss of $21 million in Administrative funds to the State for operation of the Unemployment Insurance (UI) and Job Service programs; $86.4 million in increased FUTA taxes to all employers in the state; and loss of $4.8 million in benefit payments for their Extended Benefits program. The total cost would be $112.2 million.

   Attached is a copy of a letter from the U.S. Department of Labor regarding the conformity requirements of Section 10.

3. Sections 2 and 3, which are not strictly conformity items, would cost the employers in this state an additional $2 million annually if not passed. Attached is a paper that was prepared on this subject in cooperation with the House Research Agency. On page 4 of the paper, the affect on employers is detailed. On page 7 the options are listed--we elected to propose the option that would have the least affect on Alaskan employers.

If Sections 2 and 3 had been in effect for 1984, there would have been no impact on employers. This is because of the requirement that employers with the same payroll decline percentage must be placed in the lower rate class rather than splitting the group. In 1983 there would have been 163 employers affected, for a total of $2,800 (or $17 per employer).

If you need any additional information on CS for SB 525, please contact me at 465-2700 or Jack Shay at 465-2712.

SUBJECT: House CS for
CS for SB 525

This will confirm our telephone conversation and your request for additional information.

1. The UI Trust Fund currently has a balance of $148 million.

2. Sections 11 and 14 of the UI bill, House CS for CS for SB 525 (L&C), are conformity items with the Federal Unemployment Tax Act (FUTA). The additional cost to Alaska for not remaining in conformity with FUTA is the loss of $21 million in Administrative funds to the State for operation of the Unemployment Insurance (UI) and Job Service programs; $86.4 million in benefit payments for their Extended Benefits program. The total cost would be $112.2 million.

   Attached is a copy of a letter from the U.S. Department of Labor regarding the conformity requirements of Section 11.

3. Sections 2 and 3, which are not strictly conformity items, would cost the employers in this state an additional $2 million annually if not passed. Attached is a paper that was prepared on this subject in cooperation with the House Research Agency. On page 4 of the paper, the affect on employers is detailed. On page 7 the options are listed--we elected to propose the option that would have the least affect on Alaskan employers.

If Sections 2 and 3 had been in effect for 1984, there would have been no impact on employers. This is because of the requirement placed in the lower rate class rather than splitting the group. In 1983 there would have been 163 employers affected, for a total of $2,800 (or $17 per employer).

If you need any additional information, please contact me at 465-2700 or Jack Shay at 465-2712.

RE: L & C COMMITTEE HEARINGS (OPENING REMARKS)

THERE ARE FOUR BILLS ON SCHEDULED TO BE HEARD IN COMMITTEE TODAY. BECAUSE OF THE COMPLEXITY OF THE FIRST BILL TO COME BEFORE THE COMMITTEE, WE MAY NOT BE ABLE TO HEAR ALL THIS LEGISLATION TODAY. IF WE ARE NOT FINISHED WITH THIS LEGISLATION TODAY, IT IS MY INTENTION TO RECESS UNTIL TOMORROW MORNING AT 8:15. WE WILL CONTINUE THE PROCESS UNTIL THE COMMITTEE HAS COMPLETED THE WORK NECESSARY ON THESE BILLS.

THE FIRST PIECE OF LEGISLATION TO HEARD IS SB 525, "AN ACT RELATING TO UNEMPLOYMENT INSURANCE." THE MAIN PURPOSE OF THIS BILL IS TO BRING THE STATES UNEMPLOYMENT INSURANCE LAWS IN TO CONFORMITY WITH FEDERAL LAWS. IT ALSO WOULD INCREASE WEEKLY UNEMPLOYMENT BENEFITS AND CALLS FOR A NEW METHOD OF CALCULATING THE UNEMPLOYMENT TAX THAT EMPLOYERS PAY. THAT IS JUST A BRIEF OUTLINE FOR A VERY COMPLEX BILL. I WOULD NOW ASK THE DEPARTMENT OF LABOR TO COME FORWARD TO GO THROUGH THIS BILL WITH THE COMMITTEE.

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HCS CSSB 525 (L&C)
TITLE: "An Act relating to Unemployment Insurance."
AGENCY AFFECTED: Department of Labor

The following assumptions were made in preparing the forecasted costs:

1. State employment will continue to increase through FY 1986. Thereafter, state employment will level off with consolidation of administrative jobs and belt tightening being offset by jobs based on increased population.

2. There is no wage increase for calendar year 1984. The wages through FY 1985 reflect the recent agreement with APEA. A 5 percent yearly increase continues throughout the remainder of the forecast period.

3. As provided in this bill, the maximum weekly benefit amount paid for unemployment insurance claims will increase from $156 to $188, effective October 1, 1984.

As a result, the State of Alaska would be required to pay more in its personal service benefit costs for unemployment insurance. The total amount of the increased costs (which would affect all Departments in the State) is projected from past experience and a computerized modeling technique. The estimated increase in the average payment using this method is 12.7%. This increase would not occur immediately in FY '85, because claimants are paid for an entire year at the rates in effect when they first claim benefits. The total effect of the increase would not be felt until FY '87.

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HCS CSSB 525 (L&C)
TITLE: "An Act relating to Unemployment Insurance."
AGENCY AFFECTED: Department of Labor
Page 2

This bill would require the Department of Labor to pay unemployment insurance benefits to qualifying persons between school terms. Two costs would be associated with this bill, the actual costs of the benefits paid and the administrative costs to run the program.

The estimated benefits to be paid in Fiscal Year 1985 are calculated as follows:

Number of Eligible Claimants	$ 1,400
Average Weekly Benefit Amount	x 135
	$ 189,000
Average Length of Claim	x 10 wks
	$1,890,000
Adjustment for Increase in Average Weekly Benefit Amount from $135 to $150	+ 110,000
Total Benefits Fiscal Year 1985	$2,000,000

The estimated benefits to be paid in fiscal years 1986 - 1989 are as follows:

Number of Eligible Claimants	$ 1,400
Average Weekly Benefit Amount	x 150
	$ 210,000
Average Length of Claim	x 10 wks
Total	$2,100,000

Administration costs to run this program would include the salaries of eight seasonal Unemployment Insurance Specialist I's for four months each. Contractual and Supply costs associated with these positions would include postage and forms, as well as normal expenses. One-time expenses would include $10,000 in Contractual in Fiscal Year 1985 to complete automation of the claims processing function, and $5,000 in Fiscal Year 1985 to purchase equipment for this function.

In preparing the cost estimate for benefits to be paid the following assumptions were made:

1. An effective date of May 22, 1984.
2. The average weekly benefit amount would increase from $135 to $150 on October 1, 1984.
3. No increase in claims would be seen from Fiscal Year 1985 - 1989.
4. There would be no further increase in benefit amount from Fiscal Year 1985 - 1989.

The following assumptions were made in preparing the forecasted costs:

1. State employment will continue to increase through FY 1986. Thereafter, state employment will level off with consolidation of administrative jobs and belt tightening being offset by jobs based on increased population.

2. There is no wage increase for calendar year 1984. The wages through FY 1986 reflect the recent agreement with APEA. A 5 percent yearly increase continues throughout the remainder of the forecast period.

3. As provided in this bill, the maximum weekly benefit amount paid for unemployent insurance claims will increase from $156 to $188, effective October 1, 1984.

As a result, the State of Alaska would be required to pay more in its personal service benefit costs for unemployment insurance. The total amount of the increased costs (which would affed all Departments in the State) is projected from past experience and a computerized modeling technique. The estimated increase in the average payment using this method is 12.7%. This increase would not uccur immediately in FY '85, because claimants are paid for an entire year at the rates in effect when they first claim benefits. The total effect of the increase would not be felt unitl FY '87.

HCS FOR CS FOR SB 525 (L&C)

BILL ANALYSIS

Section 1. This is a "housekeeping" amendment which would make a technical change to the training and building fund provision so that unobligated money in the training and building fund could be held an additional 30 days past the end of the fiscal year. The law currently requires that any unobligated money over $100,000 in the training and building fund must lapse to the unemployment trust fund on the last day of the fiscal year. This money is obligated in appropriations bills prior to the end of the fiscal year, but the bills are often not signed until after the end of the fiscal year. The money is therefore not technically obligated until after the money has already lapsed back to the unemployment trust fund. The proposed amendment solves this "accounting" problem by holding the money in the training and building fund until the appropriation is signed.

Sections 2 and 3. The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248) amended the Federal Unemployment Tax Act (FUTA) to increase the gross FUTA tax on employers from 3.5 percent to 6.2 percent. It also increased the additional credit against the FUTA tax for contributions to a state unemployment fund from 2.7 percent to 5.4 percent. These amendments are effective January 1, 1985. Because of the language of the FUTA, all employers in the state cannot be guaranteed the full FUTA credit of 5.4 percent unless the state law includes a maximum (standard) state tax rate of at least 5.4 percent.

Section 2 of the bill amends AS 23.20.170 to enact a standard rate of 5.4 percent. Rates below 5.4 percent would continue to be granted under AS 23.20.290.

Section 3 of the bill amends AS 23.20.290 by adding a 21st rate class comprised of employers with the highest quarterly decline quotients whose cumulative payroll is .01 percent of the total payroll in the state. This small minority of employers would receive a rate not less than 5.4 percent. The FUTA requires that the 5.4 percent rate be actually assessed at least one employer in the state, in order for all employers in the state to be guaranteed the maximum additional FUTA credit of 5.4 percent. This amendment meets the requirements of the FUTA with the least distortion to the present rate structure.

Section 4. This section amends AS 23.20.290(e) to include interest earned on the unemployment trust fund in the benefit cost rate computation. Unemployment tax contributions are computed as a percentage of the benefit cost rate, under a formula designed to recover all outlays from the fund. Interest earnings are not currently shown as income to the fund. Unless corrected, this will continue to cause higher than necessary taxes.

Section 5. This section complements the amendment made to AS 23.20.290(e) under sec. 4 of the bill. It amends AS 23.20.290(f) to provide for a negative fund solvency adjustment (in effect, a fund solvency credit) when the unemployment trust fund reaches a certain level of adequacy, defined as a reserve rate (ratio of fund balance to total state wages) of at least 3.3 percent.

Section 6. This section amends the benefit schedule in AS 23.20.350(d) to provide a maximum UI weekly benefit amount of $188, not counting dependents allowance. This will provide approximately 60 percent of claimants with replacement of 50 percent of their average weekly wages. Federal benefit adequacy guidelines suggest that a state's benefit schedule should provide 50 percent wage replacement for at least 80 percent of claimants. However, Alaska's liberal eligibility provisions make application of the federal guidelines too costly. The benefit schedule was amended in 1980 to provide a maximum weekly benefit of $150. This schedule replaced 50 percent of wages for approximately two-thirds of claimants, but wage inflation since 1980 has steadily eroded this level of wage replacement. Although a small increase of $6 was approved in 1982, only about 56 percent of claimants receive 50 percent wage replacement under the current schedule. The proposed schedule would increase costs to the trust fund by about 12.7 percent.

Sections 7 and 8. These two sections would change the requirements for the receipt of dependents allowance. The amendments do not change the amount of the allowance.

Under the current statute, an individual claiming dependents allowance must certify (and be able to prove) that he or she is providing more than 50 percent of the dependents' support. The dependents must be claimed when the claimant first files for benefits, and the number of dependents cannot be changed during the benefit year unless the claimant acquires an additional dependent by birth or adoption. These two features of the present law -the "primary support" requirement and the requirement that dependents must be claimed at the beginning of the benefit year -- are not necessary for the administration of the dependents provision, and they may frustrate its purpose.

In households where both parents work, the children are jointly supported. However, under the "primary support" requirement only one parent may claim dependents in the household, even though the other parent may be providing a larger percentage of his or her wages for support of the children. The proposed changes would pay dependents allowance to either parent having physical custody of the child. The same dependent could not be claimed by both parents, but a parent could claim any dependents in the household which are not being claimed by the other parent. The "primary support" requirement has been retained as an alternative, so that a non-custodial parent may qualify for the dependents allowance. In other words, "dependent" has been redefined to mean one who is either in the physical custody of the claimant or dependent on the claimant for more than 50 percent of support. However, to claim a dependent over 18 years of age the claimant would still be required to show primary support, the same as in the current law.

The proposed changes would also allow a claimant to add dependents (up to a limit of three) for any reason while drawing regular benefits during his benefit year. For example, a claimant whose wife is claiming their two children would not be able to claim the children when he first files his claim. However, he would be able to claim the children after his wife's benefit year ends, for the remainder of his own benefit year. Under the current law, this claimant would be unable to claim the dependents for his entire benefit year.

Section 9. This section establishes an interim benefits program to pay benefits to employees of educational institutions who would have their regular unemployment benefits reduced or denied under the changes proposed in sec. 11 of this bill. Section 11 adds a new subsection (h) to AS 23.20.381 to disqualify employees

other than instructional, research, and administrative employees during the period between academic years or terms. This change is required in all state laws by Public Law 98-21. The interim benefits program would pay these employees the difference between their regular amount and the amount they would receive under AS 23.20.381(h). The administrative and benefit costs of interim benefits must be financed from the general fund, because financing the benefits from the unemployment trust fund would constitute noncompliance with Public Law 98-21.

Section 10. This section amends AS 23.20.362(c) by adding severance and termination payments to the list of income which is deducted from UI benefits. Under the provision as it now stands, wages in lieu of dismissal notice and payments for accrued vacation, sick leave, and holidays are deducted dollar for dollar from UI benefits payable. These payments are treated differently from regular wage payments, which are deducted under AS 23.20.360 at the rate of $.75 for every $1 earned for the week in excess of $50. The vacation, sick, and holiday pay, and wages in lieu of notice, unlike regular wage payments, do not show any new attachment to the labor market, but are paid on for these payments is justifiable on the basis that unemployment insurance should not be paid for a week if the claimant is already receiving a "wage replacement" for that week based on his previous work. However, because of the language of the provision, "severance" and "termination" pay are not deductible, even though the rationale for deducting them is the same as for the other "wage replacement" payments.

Section 11. AS 23.20.381(e) currently disqualifies an individual working in an instructional, research, or principal administrative capacity in an educational institution, during the period between two academic years or terms, or during a period of paid sabbatical leave. This provision is required in all state laws for conformity with Sec. 3304 (a)(6)(A) of the Federal Unemployment Tax Act (FUTA).

The FUTA has now been amended by Public Law 98-21 to extend the disqualification to:

1. All employees of educational institutions.

2. Employees of "educational service agencies" serving in educational institutions.

3. Any established vacation period or holiday recess.

These changes are required in all state laws to avoid denial of certification for the FUTA tax offset credit and administrative grants.

Section 12. Section 202 of the Federal State Extended Unemployment Compensation Act previously required the indefinite disqualification of an extended benefit claimant who did not actively engage in seeking work, regardless of the reason the claimant did not seek work. This requirement has been relaxed by P.L. 98-21. A state is now permitted to apply regular state able and available provisions if the extended benefit claimant failed to seek work because he was hospitalized or on jury duty. This is entirely optional, but we recommend enactment of conforming legislation to take advantage of the relaxation of federal requirements.

BILL ANALYSIS

Section 1. This is a "housekeeping" amendment which would make a technical change to the training and building fund provision so that unobligated money in the training and building fund could be held an additional 30 days past the end of the fiscal year. The law currently requires that any unobligated money over $100,000 in the training and building fund must lapse to the unemployment trust fund on the last day of the fiscal year. This money is obligated in appropriations bills prior to the end of the fiscal year, but the bills are often not signed until after the end of the fiscal year. The money is therefore not technically obligated until after the money has already lapsed back to the unemployment trust fund. The proposed amendment solves this "accounting" problem by holding money in the training and building fund until the appropriation is signed.

Sections 2 and 3. The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248) amended the Federal Unemployment Tax Act (FUTA) to increase the gross FUTA tax on employers from 3.5 percent to 6.2 percent. It also increased the additional credit against the FUTA tax for contributions to a state unemployment fund from 2.7 percent to 5.4 percent. These amendments are effective January 1, 1985. Because of the language of the FUTA, all employers in the state cannot be guaranteed the full FUTA credit of 5.4 percent unless the state law includes a maximum (standard) state tax rate of at least 5.4 percent.

Section 2 of the bill amends AS 23.20.170 to enact a standard rate of 5.4 percent. Rates below 5.4 percent would continue to be granted under AS 23.20.290.

Section 3 of the bill amends AS 23.20.290 by adding a 21st rate class comprised of employers with the highest quarterly decline quotients whose cumulative payroll is .01 percent of the total payroll in the state. This small minority of employers would receive a rate not less than 5.4 percent. The FUTA requires that the 5.4 percent rate be actually assessed at least one employer in the state, in order for all employers in the state to be guaranteed the maximum additional FUTA credit of 5.4 percent. This amendment meets the requirements of the FUTA with the least distortion to the present rate structure.

Section 4. This section amends AS 23.20.290(e) to include interest earned on the unemployment trust fund in the benefit cost rate computation. Unemployment tax contributions are computed as a percentage of the benefit cost rate, under a formula designed to recover all outlays from the fund. Interest earnings are not currently shown as income to the fund. Unless corrected, this will continue to cause higher than necessary taxes.

Section 5. This section complements the amendment made to AS 23.20.290(e) under sec. 4 of the bill. It amends AS 23.20.290(f) to provide for a negative fund solvency adjustment (in effect, a fund solvency credit) when the unemployment trust fund reaches a certain level of adequacy, defined as a reserve rate (ratio of fund balance to total state wages) of at least 3.3 percent.

Section 6. This section amends the benefit schedule in AS 23.20.350(d) to provide a maximum UI weekly benefit amount of $188, not counting dependents allowance. This will provide approximately 60 percent of claimants with replacement of 50 percent of their average weekly wages. Federal benefit adequacy guidelines suggest that a state's benefit schedule should provide 50 percent wage replacement for at least 80 percent of claimants. However, Alaska's liberal eligibility provisions make application of the federal guidelines too costly. The benefit schedule was amended in 1980 to provide a maximum weekly benefit of $150. This schedule replaced 50 percent of wages for approximately two-thirds of claimants, but wage inflation since 1980 has steadily eroded this level of wage replacement. Although a small increase of $6 was approved in 1982, only about 56 percent of claimants receive 50 percent wage replacement under the current schedule. The proposed schedule would increase costs to the trust fund by about 12.7 percent.

Sections 7 and 8. These two sections would change the requirements for the receipt of dependents allowance. The amendments do not change the amount of the allowance.

Under the current statute, an individual claiming dependents allowance must certify (and be able to prove) that he or she is providing more than 50 percent of the dependents' support. The dependents must be claimed when the claimant first files for benefits, and the number of dependents cannot be changed during the benefit year unless the claimant acquires an additional dependent by birth or adoption. These two features of the present law -the "primary support" requirement and the requirement that dependents must be claimed at the beginning of the benefit year -- are not necessary for the administration of the dependents provision, and they may frustrate its purpose.

In households where both parents work, the children are jointly supported. However, under the "primary support" requirement only one parent may claim dependents in the household, even though the other parent may be providing a larger percentage of his or her wages for support of the children. The proposed changes would pay dependents allowance to either parent having physical custody of the child. The same dependent could not be claimed by both parents, but a parent could claim any dependents in the household which are not being claimed by the other parent. The "primary support" requirement has been retained as an alternative, so that a non-custodial parent may qualify for the dependents allowance. In other words, "dependent" has been redefined to mean one who is either in the physical custody of the claimant or dependent on the claimant for more than 50 percent of support. However, to claim a dependent over 18 years of age the claimant would still be required to show primary support, the same as in the current law.

The proposed changes would also allow a claimant to add dependents (up to a limit of three) for any reason while drawing regular benefits during his benefit year. For example, a claimant whose wife is claiming their two children would not be able to claim the children when he first files his claim. However, he would be able to claim the children after his wife's benefit year ends, for the remainder of his own benefit year. Under the current law, this claimant would be unable to claim the dependents for his entire benefit year.

Section 9. This section establishes an interim benefits program to pay benefits to employees of educational institutions who would have their regular unemployment benefits reduced or denied under the changes proposed in sec. 11 of this bill. Section 11 adds a new subsection (h) to AS 23.20.381 to disqualify employees

other than instructional, research, and administrative employees during the period between academic years or terms. This change is required in all state laws by Public Law 98-21. The interim benefits program would pay these employees the difference between their regular amount and the amount they would receive under AS 23.20.381(h). The administrative and benefit costs of interim benefits must be financed from the general fund, because financing the benefits from the unemployment trust fund would constitute noncompliance with Public Law 98-21.

Section 10. This section amends AS 23.20.362(c) by adding severance and termination payments to the list of income which is deducted from UI benefits. Under the provision as it now stands, wages in lieu of dismissal notice and payments for accrued vacation, sick leave, and holidays are deducted dollar for dollar from UI benefits payable. These payments are treated differently from regular wage payments, which are deducted under AS 23.20.360 at the rate of $.75 for every $1 earned for the week in excess of $50. The vacation, sick, and holiday pay, and wages in lieu of notice, unlike regular wage payments, do not show any new attachment to the labor market, but are paid on for these payments is justifiable on the basis that unemployment insurance should not be paid for a week if the claimant is already receiving a "wage replacement" for that week based on his previous work. However, because of the language of the provision, "severance" and "termination" pay are not deductible, even though the rationale for deducting them is the same as for the other "wage replacement" payments.

Section 11. AS 23.20.381(e) currently disqualifies an individual working in an instructional, research, or principal administrative capacity in an educational institution, during the period between two academic years or terms, or during a period of paid sabbatical leave. This provision is required in all state laws for conformity with Sec. 3304 (a)(6)(A) of the Federal Unemployment Tax Act (FUTA).

The FUTA has now been amended by Public Law 98-21 to extend the disqualification to:

1. All employees of educational institutions.

2. Employees of "educational service agencies" serving in educational institutions.

3. Any established vacation period or holiday recess.

These changes are required in all state laws to avoid denial of certification for the FUTA tax offset credit and administrative grants.

Section 12. Section 202 of the Federal State Extended Unemployment Compensation Act previously required the indefinite disqualification of an extended benefit claimant who did not actively engage in seeking work, regardless of the reason the claimant did not seek work. This requirement has been relaxed by P.L. 98-21. A state is now permitted to apply regular state able and available provisions if the extended benefit claimant failed to seek work because he was hospitalized or on jury duty. This is entirely optional, but we recommend enactment of conforming legislation to take advantage of the relaxation of federal requirements.

Section 13. This amendment to AS 23.20.505 addresses circumstances under which workers on "R and R" might qualify as "unemployed" and thus be potentially eligible for benefits under the Act. Under current Sec. 505 a person is "unemployed" for a week in which he performs no service and receives no wages. This allows potential abuse by individuals who are fully employed but receive "R and R" for a week (or more) as part of their regular work schedule. For example, an individual may work 60 hours per week for two weeks and then receive a week off. This "two weeks on, one week off" schedule may continue indefinitely. This individual is technically unemployed under Sec. 505 during his week off. But we do not believe it is correct to pay benefits when the employment relationship has not been severed and the individual is actually fully employed, i.e., working an average of at least 40 hours per week.

Section 14. AS 23.20.526(a) was amended in 1982 by adding paragraph (22) to exclude from UI coverage certain corporate officers who control at least 25 percent of corporate stock. Subparagraph (D) of paragraph (22) specifies that the corporate officer must agree to noncoverage. The U.S. Department of Labor now believes that subparagraph (D) constitutes a waiver of benefit rights. This raises an issue of conformity with Sec. 303(a)(1) of the Social Security Act, which is interpreted as forbidding any waiver, assignment, pledge, or encumbrance of a right to unemployment compensation. (Such a waiver would also be contrary to AS 23.20.395).

This conformity issue could result in the withholding of administrative grants to Alaska. The proposed repeal of subparagraph (D) would remove the "waiver", resulting in an outright exclusion of coverage for these corporate officers and resolving the conformity problem.

MAY 15, 1984

RE: L & C COMMITTEE HEARINGS (OPENING REMARKS)

THERE ARE FOUR BILLS ON SCHEDULED TO BE HEARD IN COMMITTEE TODAY. BECAUSE OF THE COMPLEXITY OF THE FIRST BILL TO COME BEFORE THE COMMITTEE, WE MAY NOT BE ABLE TO HEAR ALL THIS LEGISLATION TODAY. IF WE ARE NOT FINISHED WITH THIS LEGISLATION TODAY, IT IS MY INTENTION TO RECESS UNTIL TOMORROW MORNING AT 8:15. WE WILL CONTINUE THE PROCESS UNTIL THE COMMITTEE HAS COMPLETED THE WORK NECESSARY ON THESE BILLS.

THE FIRST PIECE OF LEGISLATION TO HEARD IS SB 525, "AN ACT RELATING TO UNEMPLOYMENT INSURANCE." THE MAIN PURPOSE OF THIS BILL IS TO BRING THE STATES UNEMPLOYMENT INSURANCE LAWS IN TO CONFORMITY WITH FEDERAL LAWS. IT ALSO WOULD INCREASE WEEKLY UNEMPLOYMENT BENEFITS AND CALLS FOR A NEW METHOD OF CALCULATING THE UNEMPLOYMENT TAX THAT EMPLOYERS PAY. THAT IS JUST A BRIEF OUTLINE FOR A VERY COMPLEX BILL. I WOULD NOW ASK THE DEPARTMENT OF LABOR TO COME FORWARD TO GO THROUGH THIS BILL WITH THE COMMITTEE.

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HCS CSSB 525 (L&C)
TITLE: "An Act relating to Unemployment Insurance."
AGENCY AFFECTED: Department of Labor
Page 2

This bill would require the Department of Labor to pay unemployment insurance benefits to qualifying persons between school terms. Two costs would be associated with this bill, the actual costs of the benefits paid and the administrative costs to run the program.

The estimated benefits to be paid in Fiscal Year 1985 are calculated as follows:

Number of Eligible Claimants	$ 1,400
Average Weekly Benefit Amount	x 135
	$ 189,000
Average Length of Claim	x 10 wks
	$1,890,000
Adjustment for Increase in Average Weekly Benefit Amount from $135 to $150	+ 110,000
Total Benefits Fiscal Year 1985	$2,000,000

The estimated benefits to be paid in fiscal years 1986 - 1989 are as follows:

Number of Eligible Claimants	$ 1,400
Average Weekly Benefit Amount	x 150
	$ 210,000
Average Length of Claim	x 10 wks
Total	$2,100,000

Administration costs to run this program would include the salaries of eight seasonal Unemployment Insurance Specialist I's for four months each. Contractual and Supply costs associated with these positions would include postage and forms, as well as normal expenses. One-time expenses would include $10,000 in Contractual in Fiscal Year 1985 to complete automation of the claims processing function, and $5,000 in Fiscal Year 1985 to purchase equipment for this function.

In preparing the cost estimate for benefits to be paid the following assumptions were made:

1. An effective date of May 22, 1984.
2. The average weekly benefit amount would increase from $135 to $150 on October 1, 1984.
3. No increase in claims would be seen from Fiscal Year 1985 - 1989.
4. There would be no further increase in benefit amount from Fiscal Year 1985 - 1989.

BILL/RESOLUTION NO: HCS CSSB 525 (L&C)
TITLE: "An Act relating to Unemployment Insurance."
AGENCY AFFECTED: Department of Labor
Page 3

In preparing the cost estimates for administrative costs the following assumptions were made:

1. An effective date of May 22, 1984.
2. An annual inflation rate of six percent.

Section 13. This amendment to AS 23.20.505 addresses circumstances under which workers on "R and R" might qualify as "unemployed" and thus be potentially eligible for benefits under the Act. Under current Sec. 505 a person is "unemployed" for a week in which he performs no service and receives no wages. This allows potential abuse by individuals who are fully employed but receive "R and R" for a week (or more) as part of their regular work schedule. For example, an individual may work 60 hours per week for two weeks and then receive a week off. This "two weeks on, one week off" schedule may continue indefinitely. This individual is technically unemployed under Sec. 505 during his week off. But we do not believe it is correct to pay benefits when the employment relationship has not been severed and the individual is actually fully employed, i.e., working an average of at least 40 hours per week.

Section 14. AS 23.20.526(a) was amended in 1982 by adding paragraph (22) to exclude from UI coverage certain corporate officers who control at least 25 percent of corporate stock. Subparagraph (D) of paragraph (22) specifies that the corporate officer must agree to noncoverage. The U.S. Department of Labor now believes that subparagraph (D) constitutes a waiver of benefit rights. This raises an issue of conformity with Sec. 303(a)(1) of the Social Security Act, which is interpreted as forbidding any waiver, assignment, pledge, or encumbrance of a right to unemployment compensation. (Such a waiver would also be contrary to AS 23.20.395).

This conformity issue could result in the withholding of administrative grants to Alaska. The proposed repeal of subparagraph (D) would remove the "waiver", resulting in an outright exclusion of coverage for these corporate officers and resolving the conformity problem.

3AAC26.070. Standards for Prompt, Fair and Equitable Settlements Applicable to All Insurers. (a) An insurer or a person designated by the insurer to act on its behalf involved in the settlement of a claim must, within 15 days or the time frame specified in the insurance contract, after receiving a properly executed proof of loss or other evidence of loss acceptable to the insurer from a first party claimant, advise the claimant of the acceptance or denial of the claim.

(b) A claim denial must be in writing and a copy or the capability of reproducing its text must be included in the claim file.

(c) A claim denial based on a specific policy provision, condition or exclusion must include, in the written denial, reference to that specific provision, condition, or exclusion.

(d) If an insurer or a person designated by the insurer to act on its behalf needs more time to determine whether the claim of a first party claimant should be accepted or denied, notification must be given to the first party claimant within 15 working days after the receipt of the proof of loss giving the reason more time is needed. 45 days from the date of the initial notification and every 45 days thereafter while the investigation remains incomplete, written notification must be provided to the claimant stating the reason additional time is necessary to complete the investigation.

(e) An insurer or a person designated by the insurer to act on its behalf may not fail to settle a claim for first party claimant on the grounds that responsibility for payment should be assumed by others, except as may be expressly provided otherwise by the provisions of the insurance policy issued by the insurer.

(f) If negotiations for settlement of a claim continues directly with a claimant who is neither an attorney nor represented by an attorney to a point in time when the claimant's rights may be affected by a statute of limitations or a policy time limit, written notification must be provided to the claimant stating that the time limit may be expiring and may affect the claimant's rights. Notice must be given to first party claimants not less than 30 days before, and to third party claimants not less than 60 days before, the date on which the insurer believes the time limit may expire.

(g) A statement may not be made that indicates the rights of a third party claimant may be impaired if a form or release is not completed within a given period of time, unless the statement is given for the purpose or notifying the third party claimant of the provision of a relevant statute of limitation.

(h) If an insurer has a reasonable basis, supported by specific information available for inspection by the division of insurance, for suspecting that a first party claimant has fraudulently caused or contributed to the loss, the insurer is relieved from the requirements of this section. However, the insurer must, within a reasonable time for full investigation and after receipt of a properly executed proof of loss, advise the claimant of the acceptance or denial of the claim. (Eff. / / , Reg.)

Sec. 43.20.036. Federal tax deductions and credits. (a) For purposes of calculating the income tax payable under this chapter, the taxpayer may not apply as a credit against his tax liability the foreign tax credit allowed as to federal taxes under 26 U.S.C. 33 (Internal Revenue Code).

(b) For purposes of calculating the income tax payable under this chapter, the taxpayer may apply as a credit against tax liability the

license. 1960 Op. Att'y Gen., No. 27.

AS 43.70.110 and this section make no provision for the exemption from the license requirement of a religious corporation which is doing business. 1960 Op. Att'y Gen., No. 25.

A religious corporation receiving rents from the renting of an apartment or apartments must obtain an Alaska business license as a condition precedent to engaging in such business. 1960 Op. Att'y Gen., No. 25.

The state may revoke the license of a collection agency which does not have a proper bond on file with the tax commission. 1960 Op. Att'y Gen., No. 27.

A guide to a workable procedure for license revocation is found in chapter 2 of the Alaska Administrative Procedure Act. 1960 Op. Att'y Gen., No. 27.

NOTES TO DECISIONS

A license confers no right of property. Thlinket Packing Co. v. Harris & Co., 5 Alaska 471 (1916).

It merely authorizes the holder to carry on a certain business, but does not grant to the holder any place of business, any more than the issuance of a saloon license grants to the holder a building in which to conduct a saloon, or the issuance of a mercantile license, a building in which to conduct a store. Columbia Salmon Co. v. Berg, 5 Alaska 538 (1916).

Purpose of tax. — Although this section requires a license for the "privilege" of engaging in a business in Alaska, this language does not render it invalid nor destroy the legislative intent that the purpose of the tax is to raise revenue, and not to regulate any business. Territory of Alaska v. Journal Printing Co., 15 Alaska 676, 135 F. Supp. 169 (D. Alaska 1955).

Sec. 43.70.030. Levy and computation of license fee. (a) The license fee for each business is $25.

(b) The license fee for each national bank and state bank, trust company and savings and loan association is seven percent of its net income. Net income means the taxable income of each taxpayer before net operating loss deduction and special deductions, computed as required under the Internal Revenue Code of the United States and includes all other income, including income from federal, state or municipal obligations. Each of these taxpayers required to make a return under the provisions of the Internal Revenue Code shall at the same time file with the department a return setting out the amount of tax due under this chapter, and other information for the purpose of carrying out the provisions of this chapter which the department requires. Each of these taxpayers shall also at the same time file a true and correct copy of the tax return which it has filed with the Internal Revenue Service. A taxpayer filing under this subsection shall use the same tax year as the taxpayer uses for federal income tax purposes. Any approved extension of time to file the taxpayer's federal income tax return automatically extends the time for filing under this chapter. Any agreement which a taxpayer enters into with the Internal Revenue Service which extends the statute of limitations for any federal income tax return will apply to returns filed under this chapter. The department may, in its discretion, grant an extension of time to file or an extension of the statute of limitations independent of federal action. Every taxpayer shall notify the department in writing, within 90 days, of any alteration in, or modification of its federal income tax return and

of a recomputation of tax or determination of deficiency. For purposes of applying the statute of limitations, this notification constitutes a separate return, and failure to file this notification will have the same effect as the failure to file a return under this title.

(c) The license for the privilege of taking orders through use of catalogs and by mail order offices in the state is the same as set out in this chapter for business generally.

(d) The fee of $25 applies to all of the provisions of this section, and shall accompany the application. The balance is due and payable on the last day of the taxpayer's tax year and shall be paid before the 15th day of the third month following the end of the tax year, except that the time for filing the return may be extended as provided in (b) of this section. To enable accurate determination of the balance of the tax due at the end of each year, each person to whom this chapter applies shall keep records, give statements under oath, and make returns which the department requires. Returns are made under penalty of perjury. (§ 5 ch 43 SLA 1949; am § 1 ch 128 SLA 1955; am § 1 ch 101 SLA 1960; am § 1 ch 68 SLA 1973; am § 1 ch 50 SLA 1975; am § 3 ch 144 SLA 1978)

NOTES TO DECISIONS

Tax imposed on state obligations and bonds. — To the extent that all federal obligations are subject to the business license tax, including those obligations afforded a specific tax exemption by Congress, subsection (b) of this section must equally impose the tax on state obligations and bonds, which are otherwise tax exempt pursuant to specific state tax exemptions, in order to avoid any unlawful discrimination against federal securities. National Bank v. State, Dep't of Revenue, Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982).

The legislature intended to define the term "net income" broadly for business license tax calculation purposes. National Bank v. State, Dep't of Revenue Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982).

The "all other income" category in subsection (b) is interpreted as an attempt by the legislature to reach those types of income, such as bond interest, which are not otherwise subject to federal income taxation. National Bank v. State, Dep't of Revenue, Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982).

Alaska State Housing Authority and Alaska Housing Finance Corporation bonds are not "state obligations" for purposes of subsection (b) of this section. National Bank v. State, Dep't of Revenue, Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982).

Alaska State Housing Authority and Alaska Housing Finance Corporation bond interest falls within the meaning of the phrase "all other income" in subsection (b) of this section and is to be considered as "net income" of the banks for purposes of determining their business license tax liability pursuant to subsection (b). National Bank v. State, Dep't of Revenue, Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982).

The purpose of excluding "insurance businesses" from the coverage of subsection (a) by virtue of the definition in AS 43.70.110(1) is apparently to avoid taxing these businesses twice, since insurers are subject to a premiums tax imposed by AS 21.09.210. Northern Adjusters, Inc. v. Department of Revenue, Sup. Ct. Op. No. 2332 (File No. 5128), 627 P.2d 205 (1981).

Adjusters. — Because adjusters are not "insurers" subject to the premiums tax, they should not be viewed as "insurance businesses" exempt from the general license tax. Northern Adjusters, Inc. v. Department of Revenue, Sup. Ct. Op. No. 2332 (File No. 5128), 627 P.2d 205 (1981).

BILL SHEFFIELD
GOVERNOR

hb 532

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 21, 1984

The Honorable Jalmar Kerttula
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Kerttula:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to amend AS 43, the Revenue and Taxation Code, by repealing AS 43.20.031(d) and AS 43.70.030(b).

This bill repeals AS 43.20.031(d), which exempts banks and savings and loan associations from taxation under AS 43.20, the corporate income tax chapter. It also repeals AS 43.70.030(b), which taxes banks, trust companies, and savings and loan associations under AS 43.70, the Business License Act.

Currently, banks and savings and loan associations are specifically exempted from the corporate income tax under AS 43.20 because of federal restrictions which required states to tax national banks and savings and loan associations separately from other corporations. Those federal restrictions no longer exist. Therefore, we may now tax banks under AS 43.20 along with all other corporate taxpayers, and that is what this bill will accomplish.

Sincerely,

Bill Sheffield
Governor

Currently banks are required to file returns and pay tax under a statute separate from all other corporations (AS 43.70). This results in significant administrative and legal problems. The Department of Revenue therefore recommends that banks be taxed under the same income tax statutes as other corporations (AS 43.20).

Although state and municipal interest is currently taxable under AS 43.70 and would not be subject to tax under AS 43.20, we estimate that requiring banks to file under AS 43.20 rather than AS 43.70 will result in no loss of revenue to the State. The Department's position is that under IRC sec. 265(2), which is adopted by reference in AS 43.20.021(a), no deduction is allowed for expenses and interest incurred or continued to purchase or carry obligations the interest on which is exempt from tax. This includes not only expenses and interest related to tax exempt state and municipal interest income, but also expenses and interest related to tax exempt U.S. interest income. Therefore, the total amount of nondeductible expenses under AS 43.20 will be close to the amount of nontaxable income.

RE: SCR 18

You requested that I research SCR 18, a Senate resolution by Sen. Vic Fischer to encourage Small Businesses in the State of Alaska.

The bottomline is to create a task force to assess state policy in contracting, local hire, and small business advocacy and to recommend measures that will promote, assist and assure that small business get a fair shake in state funded construction projects.

The Governor is requested to appoint the Attorney General to recommend measures available to the state to make sure the said small businesses get a reasonable portion of the state-funded construction projects.

NFIB® National Federation of Independent Business

The Guardian of Small Business

February 13, 1984

The Honorable John Ringstad
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Ringstad:

Small business continues to be the largest generator of new jobs in the United States, however, the number of jobs which are created often are significantly effected by state legislative actions. To ensure that legislators have the benefit of knowing how existing law and proposed legislation affects small business, the National Federation of Independent Business has been working with, not only the Alaska Legislature, but state legislatures nationwide for several years.

In Alaska, NFIB currently has a membership in excess of 3,600 which means that we usually represent a significant majority of the retail and service businesses in each city in Alaska. Each year we send a ballot to all of our members requesting their input on issues of current interest in Alaska. This ballot permits each member to express their feelings on these issues and gives me direction regarding which issues should be pursued legislatively. I do not take a position on an issue for NFIB unless the members have voted on it and a majority favor the position being taken.

Enclosed for your information is a copy of our 1983 State Ballot showing the vote of the membership on the various issues. The issues which received strong support are ones which I will be discussing with legislators during this and subsequent legislative sessions.

If I can provide you any additional information on NFIB or if you would like to know our position on a particular issue, feel free to contact me.

Very truly yours,

Gary L. Jenkins, Director
Governmental Relations/Alaska

STATE BALLOT

Dear NFIB Member:

This Ballot is solicited by NFIB Research and Education Foundation to gather information pertaining to small business issues in your state.

Your answers are valuable and will enhance the survey.

Please return the entire Ballot. Thank you.

Very truly yours,

John E. Sloan, Jr., President
NFIB Research and Education Foundation

GENERAL BUSINESS

Interest Rates

1. Should interest rate ceilings be repealed on: (vote on each)

a. Bank loans of $25,000 or less

32% Favor (1) 60% Oppose (2) 8% Undecided (3) (11)

b. Savings and loan association loans of $25,000 or less

34% Favor (1) 58% Oppose (2) 8% Undecided (3) (12)

c. Retail installment contracts

36% Favor (1) 54% Oppose (2) 10% Undecided (3) (13)

d. Retail open-ended charge accounts

34% Favor (1) 56% Oppose (2) 10% Undecided (3) (14)

e. Credit card revolving accounts

33% Favor (1) 58% Oppose (2) 9% Undecided (3) (15)

f. State chartered credit unions

35% Favor (1) 55% Oppose (2) 10% Undecided (3) (16)

g. Small loan finance company loans of $10,000 or less

33% Favor (1) 58% Oppose (2) 9% Undecided (3) (17)

BACKGROUND: HB 246, presently in the Senate Labor and Commerce Committee proposes to remove all limitations on all types of credit in Alaska. The measure would permit each financial institution and all businesses extending credit to charge whatever interest rate they wish, subject only to competition of the marketplace and negotiation with each individual customer.

Current law limits banks and savings and loan associations to a maximum interest rate of 5% over the federal discount rate in effect at the time of the loan on any loan of $25,000 or less. There are no interest rate limitations on loans in excess of $25,000. During the past few months, the federal discount rate has been 8.5%, thereby setting the maximum allowable interest rate at 13.5%.

A retail business selling merchandise on a retail installment contract is presently limited to a maximum interest rate of 10% per year on the first $1,000 of credit extended, and 8% on credit in excess of $1,000. However, for retail businesses as well as credit card companies extending open-ended revolving charge accounts, the maximum interest rate is 18% per year on the first $1,000 of credit extended and the federal discount rate plus 5% on credit in excess of $1,000. A state chartered credit union is presently limited to 15% or 5% over the federal discount rate, whichever is higher on loans of any amount. Small loan finance companies can now levy a maximum interest rate of 36% per year on the first $850 of credit extended and 24% on credit up to $10,000.

Proponents of the removal of all interest rate limitations argue that many financial institutions and businesses lost money on their credit transactions during the period of very high interest rates and, further, the limits are no longer necessary. If the limitations were removed, the marketplace, i.e., competition for the financing, would set the rates at reasonable levels in line with the risks inherent in the particular credit transaction.

Opponents argue that Alaska does not have a well developed marketplace and there are many communities where no competition exists either for banking or retail credit. The removal of all limits would permit the charging of unreasonably high rates. Further, it has also been pointed out that in the case of consumer loans and small business loans under $25,000, the marketplace seems to react very slowly when interest rates are falling in general. For example during the first few months in 1983 in California, where there are no interest rate limitations, interest rates being charged on small loans by banks were running at 20% to 25%, while rates in Alaska were about 14%.

Interest Rates

2. Should interest rates on balances of $1,000 or less that are limited to a maximum, such as the 18% for business credit or credit card companies, be modified so the maximum rate could be increased with the federal discount rate, once the federal discount rate reached a pre-set level?

39% Favor (1) 52% Oppose (2) 9% Undecided (3) (18)

BACKGROUND: Proponents of this concept feel that businesses extending financing and credit should not be so limited in the rates they charge that they lose money; therefore, the limitations should be allowed to rise when interest rates are generally high. It has been proposed that the maximum rate on accounts with balances of $1,000 or less be set at 18%, or 6% over the federal discount rate, whichever is higher.

Opponents argue that the federal discount rate does not necessarily indicate the cost of funds to financial institutions or businesses. A variety of other factors affect the cost of funds to a particular entity. They argue, therefore, that it is more appropriate to remove all limitations and let market conditions establish the rates.

Bad Check Penalties

3. Do you favor or oppose increased civil and/or criminal penalties as an effective deterrent to the writing of bad checks?

95% Favor (1) 4% Oppose (2) 1% Undecided (3) 19

BACKGROUND: It is well established that bad checks are a problem that every business must deal with to some degree. However, the question has been raised whether the laws of Alaska are presently adequate to deal with the problem. It has been suggested that either or both the civil or criminal penalties should be made stronger to attempt to reduce the impact of this problem.

Bad Check Civil Penalties

4. Should legislation be adopted to require that bad-check writers repay not only the face value of the check and any court costs incurred by the receiver but also civil damages of $100 (minimum) or triple the amount of the check?

86% Favor (1) 10% Oppose (2) 4% Undecided (3) 19

BACKGROUND: Law enforcement officials frequently do not pursue those who write bad checks for small amounts. Thus, the only deterrent to writing a bad check is the receiver's (merchant) collection efforts. Checks written for small amounts, which together may represent a deep cut in a business's profit, frequently cost more to collect than they are worth.

If the merchant was allowed to collect from the bad-check writer a minimum of $100 or triple the amount of the check as damages, in addition to the base value of the check and any court costs incurred, there would be a real incentive for the merchant to collect and a deterrent to bad-check writing.

Check Information

5. Should financial institutions be required to number checks on new accounts beginning at #101 and display on the face of the check the month and year the account was opened?

41% Favor (1) 49% Oppose (2) 10% Undecided (3) 21

5A. Should banks be allowed to disclose to merchants the bank account information of those who issue checks which are returned because of insufficient funds? Such information might include account status, current address, phone number, and history of returned checks.

66% Favor (1) 33% Oppose (2) 1% Undecided (3) 23

BACKGROUND: In the United States, approximately 400,000 worthless checks are written every day. Eighty percent of those checking accounts are six months old or less. Numerical listing and date of account opening would alert merchants to new accounts and to take care in deciding whether to accept those checks. Additionally, several states have given financial institutions permission to disclose account information to either law enforcement officials or merchants who receive a worthless check.

Opponents of the numbering system believe it would create problems for individuals and businesses who for continuity purposes want to continue to number checks from where the old account left off.

LABOR

Mandatory Overtime Wages

6. Should existing law be repealed which requires a business with four or more employees to pay overtime to an employee who works more than 8 hours in one day, but does not work over 40 hours per week?

73% Favor (1) 24% Oppose (2) 3% Undecided (3) 23

BACKGROUND: Most small businesses require that a particular job be accomplished within a certain period. This may require an employee to work more than 8 hours on a particular day. However, the employee is given time off on other days of the week so as not to work more than 40 hours that particular week. Proponents of a change say that law is particularly unfair to smaller businesses whose workload is heavy at certain times and slack on other days of the week. This flexibility of worker time should not impose an additional financial burden on smaller businesses.

Opponents to changing the law argue that employees working more than 8 hours in any one day should be given extra compensation in the form of overtime pay, whether they worked voluntarily or were required to do so by their employer. They feel daily overtime pay should be independent of the requirement to pay overtime to an employee who works more than 40 hours a week.

GOVERNMENT

Permanent Fund Income

7. Should the unused portion of the income from the Permanent Fund not allocated to the Dividend Program be authorized for the following?

a. The Longevity Bonus Program for the elderly

41% Favor (1) 51% Oppose (2) 8% Undecided (3) 24

Municipal Assistance Program

24% Favor (1) 66% Oppose (2) 10% Undecided (3) 23

BACKGROUND: During the 1983 Legislative Session bills were introduced which would require that part of the income of the Permanent Fund be held to finance the Longevity Bonus program and/or finance the municipal revenue sharing program. In the past, funding for such programs has been from the state's General Fund.

Proponents of using the income from the Permanent Fund to provide funds for these programs contend that this would not violate the intent of the Permanent Fund financing activities to benefit the maximum number of residents of the state. They argue that programs like the municipal assistance program are helping all communities of the state directly and thus benefit the residents of the various communities indirectly by reducing local taxation and providing needed services.

Opponents argue that the Legislature is merely looking for new sources to fund the expensive programs they have created the past few years which they do

not want reduced in levels of funding, now that General Fund revenues are declining. Obviously, the most enticing source for funds is the Permanent Fund. They strongly argue that the income of the Permanent Fund should be kept for the original purposes established when the program was created and not used to fund other programs of the Legislature. They state that the Legislature should be required to fund all programs of the state from General Fund revenues or from revenues other than the Permanent Fund.

Government Competition

8. Does the State of Alaska maintain operations which are in direct competition with your business?

29%(1) YES 56%(2) NO 15%(3) DON'T KNOW (26)

BACKGROUND: Past Alaska State Ballots have asked whether the state should desist from activities which directly compete with private enterprise. The membership has always strongly supported this concept. However, the question has been raised about how much competition there actually is. This question is intended to determine the present level of competition by state agencies.

Answer "Yes" only if you are specifically aware of significant areas of state competition in your type of business. Answer "No" if you are reasonably certain that the state does not compete with your business. If you "don't know", please so indicate. If you are aware of specific areas of competition, please list them in the Comments section of this Ballot.

Interest Payment On Overdue Bills

9. Do you favor or oppose legislation to require local governments to pay interest on their unpaid bills after 30 days?

92%(1) Favor 5%(2) Oppose 3%(3) Undecided (27)

BACKGROUND: During 1983, legislation was nearly enacted which would mandate state agencies to pay interest on bills not paid within 30 days of receipt of invoice. It has been suggested that the prior legislation should have been applicable to local governments as well as state agencies. The problem of local governments not paying bills on time should be addressed in future legislation.

Opponents of prompt pay say that local governments frequently need to have extended periods to pay their bills and should not be penalized with interest that amounts to taxpayer dollars.

Equal Access to Justice

10. Should the state enact legislation authorizing courts to require state agencies to reimburse reasonable attorney fees and court costs to small businesses who prevail over an agency in civil actions relating to alleged violations of governmental regulations?

96%(1) Favor 2%(2) Oppose 2%(3) Undecided (28)

BACKGROUND: Aggressive agency regulatory enforcement frequently result in what is considered unwarranted fines and citations. The intent of the proposed act is to remedy the imbalance of power and legal resources between government and small businesses by giving small business the means to challenge if their position is justified.

Proponents of this legislation believe that making agencies responsible for attorney fees and court costs will discourage unnecessary actions against small businesses and reduce bureaucratic interference with business. Costs and fees would be reimbursed from the agency's operating budget if the courts finds an agency acted unreasonably in pressing a claim or punitive action against a small business.

Opponents say such legislation will unduly tie the hands of regulators. (Please use the Comment section to cite instances where you paid a fine in order to avoid the cost of litigation.)

Senate Committee on State Affairs

Vic F[illegible]her, Chair • Pouch V
Juneau, Alaska 99811
(907) 465-4954

Official Business

February 28, 1984

To: Rep. John Cowdery, Chair, and Members
House Labor and Commerce Committee

From: Senator Vic Fischer

Re: SCR 18 - relating to small business development

During the 1982 interim, the Senate State Affairs Committee conducted an investigation into the effects of state contracting procedures on small, minority and female owned businesses in Alaska.

In the course of that study, and through subsequent testimony before recent committee hearings on small business development in Alaska, it's become apparent that problems facing minorities and women are basically the same as those facing all small Alaska-owned businesses.

Besides the obvious problems associated with high costs, extreme weather, lack of infrastructure, and vast distances, small businesses face major problems in dealing with the state, particularly on state funded construction projects.

The state has no comprehensive policy of support and advoc[illegible] small business development. We don't even having a working defina[illegible] "small" business that realistically reflects the kind of "m[illegible] pop" operations most of us think of when we think of "small".

State construction projects are contracted in a manner that, often as not, preclude any Alaska-owned business from successfull bidding, at least as a prime contractor. That leaves Alaskans in the position of competing for sub-contracts, usually with a large "outside" prime.

Lack of technical assistance, inability to secure adequate bonding, credit or financing, and an impossibly tight cash flow, makes successful competition for a sub-contract extremely difficult for small local businesses. Meanwhile the concrete continues to be poured and Alaskans continue to stand in the cold while someone else reaps the benefits of state funded construction projects.

It will take a push from both the legislative and executive branch to end this policy of "benign neglect" and take an active lead in assuring that small Alaska-owned businesses benefit from state capitol projects. I believe SCR 18 is a step in that direction.

SCR 18 asks the Governor to address these concerns through several measures including appointing a task force to assess state policy in contracting, local hire, and small business advocacy and to recommend measures that will:

- emphasize and promote small business development and maintenance

- assist in securing adequate sources of bonding, credit, and loans for small, Alaska-owned businesses

- specify, modify and contract state-funded construction projects in a manner to assure a reasonable portion of the work is performed by small, Alaska-owned businesses

Further, SCR 1 asks the Governor to direct the Attorney General to investigate and recommend measures available to the state to assure that a reasonable portion of state-funded construction and procurement dollars be contracted through small Alaska-owned businesses, consistent with provisions of the United States and state of Alaska's constitution.

Encouraging small business development in Alaska is the single most effective thing the state can do to provide for new industry and a stable economic base, opportunities for future growth to Alaska's young people, a diversified economy, and jobs for Alaskans.

More than that, the state benefits greatly from local businesses with strong community, family, and cultural committments to Alaska. That business community, with proper nurturing, can maintain and strengthen the overall economy, mobilize the states full productive capacity, and preserve and expand the competition basic to our free enterprise system.

SCR 18 passed the Senate unanimously earlier this session. I hope it finds such favor in the House and appreciate your consideration of the bill in committee.

Senate State Affairs Committee
1982 Interim Report

EFFECTS OF STATE CONTRACTING PROCEDURES ON SMALL AND MINORITY-OWNED ALASKAN BUSINESSES

During the 1982 interim, the Senate State Affairs committee investigated the effects of state construction contracting procedures on small and minority-owned business in Alaska. This is a report on that effort.

Specifically, the committee examined an interagency agreement between the state Department of Transportation and Public Facilities (DOTPF) and the Alaska State Commission on Human Rights (ASCHR) affecting minority owned businesses contracting with the state.

The following report includes a review of that agreement, description of development and transmittal of a polling questionnaire, an analysis of the results, and recommendations based on suggestions and information received during the course of administering the questionnaire.

ASCHR/DOTPF AGREEMENT

In 1980 the ASCHR entered into an agreement with DOTPF to increase participation of minority owned businesses in contracting for state funded capital projects.

DOTPF agreed to take affirmative action in insuring minority owned business had an equitable chance to successfully bid state funded projects. Included in the agreement were provisions requiring that DOTPF:

- create the position of Minority Business Enterprise officer in DOTPF
- Prepare and distribute a policy and procedure memorandum outlining the scope and authority of the MBE officer
- charge the MBE officer with responsibility for developing and implementing an affirmative action plan
- identify and certify MBE's
- require successful prime contract bidders to submit proof of having contacted MBE's as subcontractors (when they intend to subcontract) for information and to solicit bids
- be responsible for notifying and informing minority owned businesses of contracting bids and procedures
- establish, print, maintain, update and distribute a MBE directory

DOTPF and ASCHR also agreed on goals for assuring a reasonable percent of total state construction dollars were contracted to minority owned businesses. Those goals required that 7.5% of total construction dollars for projects under $100,000, not subject to competitive bid, to be contracted through MBE's in FY 1981 (the first year of the agreement), 11.5% in FY 1982, and 15% in FY 1983. Identical percentage goals were agreed upon for total subcontracting dollars on wholly state funded construction projects.

These goals were not considered quotas, and terms of the agreement provided that justified failure by DOTPF to meet these goals would not be considered to be a breach of the agreement.

The agreement further required that ASCHR actively monitor DOTPF's compliance and required DOTPF to provide adequate and accurate records to enable the Commission to document their compliance.

This agreement represented final resolution of a complaint originally filed with the Commission in December, 1978. After several months of negotiations between agencies, it was finalized and went into effect for the first time in 1980.

By June of 1982, a quest editorial in the Anchorage Times by E. Louis Overstreet, charged that DOTPF had not complied with the agreement. He based this charge on an "unreleased report" that "documents the failure of DOTPF to live up to the provision of an agreement it entered into with the Alaska Human Right commission in February 1980".

Shortly after that editorial appeared, a constituent delivered a copy of the ASHRC file charging DOTPF with non-compliance to the Senate State Affairs Committee. That constituent requested the committee to review the effectiveness of the agreement in increasing minority business participation and to find out why the ASCHR was "suppressing" a report of non-compliance under the "cover" of confidentiality.

The committee formally requested a compliance report from the ASCHR. ASCHR, however, was statutorily prevented from meeting the committees request due to terms of the agreement with DOTPF* and restrictions under state law (AS 18.80.115).

The ASCHR subsequently filed an action in superior court charging DOTPF with non-compliance on October 14, 1982. However, until they had exhausted conciliation efforts, and met the time provisions for filing and rebuttal laid out in the agreement, they were prevented from disclosing any information about DOTPF's compliance or non-compliance.

---

* Part III, paragraph 4, of the agreement states: "Whether or not a breach of this agreement has occurred shall be determined by the superior court. Prior to filing an action seeking any such determination by the superior court, the parties agree to maintain strict confidentiality regarding any alleged breach and any conciliation efforts".

Because of the confidentiality restrictions, the committee was unable to enlist the help of the Commission or the Department in determining compliance with and effectiveness of the agreement. At the time they were asked to investigate, it was impossible to predict whether there had been compliance, how long conciliation efforts may take or, indeed, if they were being pursued at all.

The Committee met the same restriction and frustration the minority business community faced when asking for swift and affirmative state action in increasing opportunities to participate in state funded construction projects. In addition, as the committee of oversite, Senate State Affairs was vitally interested in how seriously state agencies complied with agreements made with the Commission.

In order to independently determine the effectiveness of this agreement, the committee prepared and distributed a questionnaire to prime and subcontractors relating to state construction contract award procedures, specifically as they apply to minority owned businesses and the DOTPF/ASCHR agreement.

Following is a description of that questionnaire, an analysis of the results, and recommendations based on suggestions and information received during the course of administering the questionnaire.

QUESTIONNAIRE DESCRIPTION AND METHOD

Two questionnaires were prepared by Committee staff with help from minority businesses, DOTPF's Minority Business Enterprises officer, the Minority Business Assistance Center, and the ASCHR Systemic Discrimination Unit. One was directed to prime contractors, the other to minority owned businesses eligible to subcontract a DOTPF project. (Copies of questionnaire are attached).

Committee staff obtained a list of bid applicants for DOTPF construction projects from 1980 to 1982 and were able to compile a mailing list from that information. When it could be determined, only successful bidders for DOTPF contracts were sent prime contractor questionnaire.

A mailing list for minority owned business was compiled from a directory provided by DOTPF's Minority Business Enterprise officer, the Minority Business Assistance Center, and other constituent sources. Each was sent a Minority Business Enterprise questionnaire.

In addition to returned questionnaires, some recipients phoned or wrote to the committee to provide additional comments or suggestions regarding state contracting procedures and small or minority owned businesses. Copies of that correspondence is available on request.

The two questionnaires covered a time period from June of 1980 through June of 1982 (the same time period as ASCHR's affirmative action agreement with DOTPF), and limited themselves to state funded construction projects.

Besides specific contracting information, contractors were also asked to provide suggestions and recommendations for legislation (or no legislation), to address the philosophical and public policy considerations of minority business set aside programs, and, in some cases, to provide business and personal history (residency, years in business, etc.)

Each questionnaire was accompanied by a Senate State Affairs Committee cover letter explaining the purpose of oversite on the DOTPF/ASCHR agreement. The committee requested return of the questionnaires within two weeks of transmittal and enclosed a self addressed, stamped envelope in an attempt to increase timely participation in the polling process.

STATISTICAL ANALYSIS OF QUESTIONNAIRES

Prime Contractor Questionnaire:

- 436 questionnaires mailed, 49 returned = 11.2% return rate
- nearly half the respondents claimed to have been a successful DOTPF contractor during the time period covered.
- 20% claimed not to be aware of the MBE Directory, 25% didn't use the directory to locate sub-contractor, and nearly half said the "maintained their own list" for locating sub-contractors.
- significant number of respondents were not aware that a MBE contact form was required as part of a DOTPF bid package.
- 36% of respondents said they have never been contracted by DOTPF regarding minority owned businesses and state contracting.
- most prime contractors felt DOTPF was making a serious effort in assuring MBE's adequate opportunity to bid state construction contracts.
- 20 % of prime contractors said they were philosophically opposed to minority owned set aside or advocacy programs and that current MBE programs should be eliminated.
- 18% of respondents felt no legislative action was necessary.

Subcontractor Questionnaire:

- 450 mailed out, 58 returned = 12.9% return rate
- 79% of the respondents were certified as MBE's (12 in 1982, 17 in 1981, 11 in 1980)

- Over half the respondents indicated no awareness of MBE officer services
- over half claimed never to have received bid information from DOTPF.
- 28% of respondents had subcontracted on DOTPF projects.
- 33% of respondents claimed to have been contacted by prime contractors
- 67% of respondents claimed never to have been contacted by prime contractors
- of the successfully bid contracts, most were less than $100,000.
- less than half of the respondents knew about the MBE contact form requirement.
- a majority of likely construction project bidders said they had problems getting bonding and credit.
- over half the respondents businesses have been operating in Alaska for over 3 years with half of those over five years.
- over half the respondents have lived in Alaska over 10 years with over half of them having lived here more than 20 years.

The general questions in the minority business questionnaire addressed and identified problems preventing small Alaskan owned businesses from successfully bidding on state funded construction contracts. A discussion of those problems follows.

PROBLEMS IDENTIFIED

In the last ten years, billions of dollars have been allocated for state funded construction contracts. The sudden explosion of construction, coupled with the size and scope of many projects, has placed small and minority owned Alaskan businesses at a tremendous disadvantage in successfully bidding for contracts.

Besides the "normal" problems with Alaskan-based businesses (high cost of labor and transportation, vast distances, little infrastructure etc.), small and minority owned businesses face special problems.

Minority owned businesses are usually small businesses (under $1 million dollars in gross revenues per fiscal year) and are often unable to get bonding, loans or credit, for large-scale contracts. In

addition, they are often unaware of bidding procedures or notices, and are out of the mainstream of the contracting "network".

A brief review of DOTPF construction contract awards from 1978 through 1982 illustrates the problem well. While nearly 50% of the awards are in amounts under $1 million dollars, they represent less than a third of total contract dollars. The vast majority of total construction dollars go to a relative handful of contracts over $1 million dollars.

Most large-scale construction projects are awarded to out-of-state contractors. Even the existing state statute giving a bidders preference to Alaskan-based business, is not sufficient to overcome the competitive edge large, national or international companies have in bidding state funded construction contracts.

Since most of these prime contractors tend to subcontract to other "outside" companies, small and minority owned Alaskan businesses are excluded from taking advantage of the massive input of state dollars into capital projects.

The executive branch has attempted to address this issue through the ASCHR/DOTPF agreement but, so far, has been unable to insure that a reasonable portion of state funded construction dollars remain in Alaska through contracting with small and minority owned businesses.

LEGISLATIVE RECOMMENDATIONS

Specific statutes need addressed by the legislature, to assure a reasonable opportunity for Alaskan owned small businesses to participate in the current flood of state funded construction projects.

Following are recommendation for legislation based on information obtained from the questionnaires:

1. Establish an Alaska Small Business Administration under the Department of Commerce and Economic Development (DCED), modeled after the federal program that would: a) define small businesses for the purpose of this administration, b) provide a source of credit and bonding for Alaska based small businesses, c) promote and advocate for small business development and maintenance in Alaska.

2. Create a statewide office of minority business enterprises in the Department of Commerce and Economic Development, to aide, advocate and support small, minority owned businesses in Alaska.

3. Define "small" Alaskan-based businesses to realistically reflect the average assets and capabilities of existing contractors. Defining "small" as a business having under $2 million dollars in gross revenues for the year preceeding application for certification under an Alaskan small business administration, appears, from the questionnaire, to be a reasonable definition for Alaska.

4. Give adequate bidder preference to Alaska-based businesses that are small and/or minority owned. The current 5% bidders preference should be raised to a 15% preference to small, Alaskan based businesses. The 15% preference should require that the low bidder receive the contract if they re-submit a bid within 10% of the next lowest bid submitted.

5. Require prime contractors and joint ventures to award no less than 50% of total subcontract dollars to small or minority owned Alaskan businesses identified and certified by the Department of Commerce and Economic Development.

6. Include women, Viet Nam veterans and other economically disadvantaged classes of Alaskans in minority status for the purpose of these contracting considerations.

7. Require that no less than 30% of state funded construction contracts be awarded in amounts under $1 million dollars with half of those in amounts under $250,000.

8. Pass a legislative resolution calling upon the Governor to create a task force to address state policy in contracting, local hire, and small business advocacy. Require that the executive, judicial, and legislative branch, as well as other working Alaskans, are included in the task force to assure full representation.*

9. Require surety bonders to keep adequate records to document why businesses are denied credit or bonding.

---

* Court decisions on the jurisdiction and authority of states to limit employment and contracting opportunities to residents or "protected" classes of citizens have been many and varied. A U.S. supreme court decision, issued in February 1983, upheld a Boston Mayor's Executive Order requiring that 50% of wages paid on city funded or administered construction projects be limited to Boston residents.

Based on the findings of that decision, Senate Bill 174, was introduced in the Alaska legislature on March 10, 1983, by Senator Joe Josephson. SB 174 requires that, when a construction project is wholly funded by state money and the state or an agency of the state is signatory to the contract, worker hours on a craft-by-craft basis must be performed at least 50% by bona fide state residents.

SB 174 adopts the specific language of the U.S. Supreme Court decision and replaces AS 36.10.010 in an attempt to strengthen Alaska hire preference laws to meet anticipated court challenges.

While not directly affecting small and minority business contracting, it appears that the Boston decision puts Alaska "back in the residency business". Alaska's authority to grant bidder preferences to resident owned small businesses, for instance, is strengthened by the supreme courts decision.

Senate State Affairs Committee

Date: September 29, 1982

Re: Minority business contracting

In the last five years, massive amounts of public dollars have gone to the State Department of Transportation and Public Facilities (DOTPF) for statewide construction projects.

It is the intent of the legislature that all Alaskan businesses are assured an equal chance to bid on and participate in state funded capital projects.

In order to assure this, the State Human Rights Commission entered into an agreement with DOTPF in June of 1980 to increase participation of minority owned small businesses in state construction contracting.

As the committee of oversite for the Human Rights Commission, the Senate State Affairs Committee is vitally interested in how seriously state agencies comply with agreements made with the Commission. We cannot determine this without your help.

The enclosed questionnaire was prepared by the Committee to help determine just how effective that agreement has been. Direct information from you is the only way to verify or refute the success of this agreement. Your response will be greatly appreciated.

The scope of this questionnaire includes contracts and sub-contracts involving minority owned businesses from June 1980 to June 1982. It does not include female owned businesses nor projects paid through federal, municipal or private funds.

The purpose of the agreement is to help, not hinder, your efforts to include small minority owned businesses in subcontracting procedures. We need to know if you think it has been successful and where you feel the system could be improved.

Please return this questionnaire by ~~October 15~~ 22 to Senator Vic Fischer, Chair, Senate State Affairs Committee, 1024 W 6th Avenue, Suite 204-C, Anchorage, Alaska 99501. We have enclosed a self-addressed, stamped envelope for your convenience. For further information call Ginger Baim, in my office, at 278-3654.

MARCH 8, 1984

TO: JOHN

FROM: KEN

RE: SCR 18

IF THE GOVERNOR WERE TO IMPLEMENT THE REQUEST MADE IN THIS RESOLUTION, A STATE TASK FORCE WOULD BE APPOINTED. ITS PURPOSE WOULD BE TO PROMOTE SMALL BUSINESS DEVELOPMENT AND MAINTENANCE IN ALASKA.

SMALL BUSINESSES OPERATING IN ALASKA TODAY ARE PLAGUED BY A NUMBER PROBLEMS. I BELIEVE THE INTENTION OF THIS RESOLUTION IS TO SEEK THE ADMINISTRATIONS ASSISTANCE IN ESTABLISHING POLICY THAT WILL AIDE AND PROMOTE SMALL BUSINESS IN ALASKA.

QUESTIONS:

1. IN A REPORT FROM THE SENATE STATE AFFAIRS COMMITTEE IT WAS RECOMMENDED THAT THE LEGISLATURE ADDRESS SOME NEEDED STATUTE CHANGES THAT WOULD HELP SMALL BUSINESS. CAN YOU PERHAPS DEFINE THOSE REGULATIONS AND UPDATE THE STATUS OF ANY LEGISLATION THAT MIGHT AMEND THEM ?

2. HOW HAS THE DEPARTMENT OF COMMERCE REACTED TO THE SUGGESTION OF ESTABLISHING AN ALASKA SMALL BUSINESS ADMINISTRATION ?

3. HOW MUCH MONEY DO YOU THINK IT WOULD COST TO OPERATE THE OFFICES OF THE SMALL BUSINESS ADMINISTRATION AND THE MINORITY BUSINESS ENTERPRISES ?

4. HOW WOULD YOU DEFINE SMALL BUSINESS ?

5. HAS THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES IMPROVED ITS CONTRACTING RECORD SINCE THE SENATE STATE AFFAIRS RELEASED ITS REPORT ?

6. WHY DO YOU THINK THERE WAS SUCH A LOW NUMBER OF RESPONSES TO THE COMMITTEE'S QUESTIONAIRE ?
