MEMORANDUM

January 10, 1984

To: House Labor and Commerce Committee Members

From: Rep. John Cowdery, Labor and Commerce Committee Chairman J.C.

RE: Committee Staff

Due to the change of chairmanship of the House Labor and Commerce Committee, the committee staff has also changed. The committee aide for the coming session will be Ken Johnson. Linda Firestone has been appointed committee secretary. Either of these staff members would be glad to assisst you or answer any questions you may have concerning the Labor and Commerce Committee. The office phone number for the committee is 465-3873.

The Hon. John J. Cowdery, Chairman
House Labor & Commerce Committee
Alaska State Legislature
Pouch V (MS 3100)
Juneu, Alaska 99811

Dear Mr. Cowdery:

House Bill #683, presently in the Labor and Commerce Committee, would authorize Bradley Lake as a State project. It requests no funding. Bradley Lake must be authorized in order for the Alaska Power Authority to file for a FERC license. Filing for an FERC license should be done concurrently with development of a financing plan and power sales agreements.

Approval of HB #683 does not conflict with the four-dam pool, and Bradley Lake is not competition to Susitna. Power from Bradley Lake is needed for the winter of 1988/89. Without Bradley Lake natural gas generation facilities must be added. I believe all studies thus far show no negative impact of Bradley Lake on Susitna feasibility or financing.

We need your support! HB #683 should be passed out of its assigned Committees for full House consideration as soon as possible to keep the project on schedule. Funding will be requested only after a financing plan is developed. Funding is not requested in HB #683.

Thank you in advance for your consideration. Please let us know if we can answer any of your questions.

Sincerely yours,

HOMER ELECTRIC ASSOCIATION, INC.

MILO FRITZ

MEMORANDUM

TO: Representative John Cowdry
Labor & Commerce Chairman

FROM: Representative Milo Fritz
Finance Committee Member

DATE: March 13, 1984

SUBJ: HB 683

I would greatly appreciate your springing HB 683 out of your Committee. As I look at it, there is no threat to the Susitna Damn and with the population of the Kenai Peninsula growing in the neighborhood of between nine and ten percent every year, we will need the power from Bradley Lake within the next two years. Your consideration in getting HB 683 out of your Committee and on to the next Committee of referral will be very greatly appreciated. If there is anything about this matter that you would care to discuss with me I am at your service.

From: Representative Ron Wendte G.W.W.

Date: March 9,1982

Re: Review of Alaska Power Authority

In recent weeks, there has been much discussion concerning Alaska Power Authority, the Tyee Hydro Project, Susitna, etc. in legislative committees and in the news. The Alaska Power Authority (APA) and hydro power in themselves are viable concepts. However, the questions surrounding APA leave considerable doubts in the mind of the public. I believe that we, in the House Labor and Commerce Committee, should begin a review of the Alaska Power Authority in order to outline what the problems are and to make recommendations to resolve those problems.

Because Tyee is only nine months from completion and has been very nearly an APA project from inception, I feel that it would be an extremely good example for review.

It is my suggestion that the Labor and Commerce Committee appoint a sub-committee of one-month duration to look into Alaska Power Authority and the Tyee Project with a final report and recommendations due on April 15, 1983. Because of the vast amounts of material and the workload already placed on most staff people, I would also suggest that an aide or researcher be hired to serve as staff to the sub-committee during that one-month.

The Sub-committee should do an overview of Tyee that would consist of the following points:

1) Were the proper feasibility studies done, in particular, were they rechecked when the original cost estimates of the project were shown to be too low?

2) Did APA look carefully at alternat[illegible]ites, smaller projects, or even alternative power sources?

3) Has APA followed legislative mandate in all annual reports and project status reports?

   a) On the basis of what information did the Legislature approve the funding of Tyee?

   b) [illegible] statements made to the Legislature been consis[illegible]h development of information on Tyee as the [illegible]ogressed?

4) Was managem[illegible]orough in using correct contracting procedures?

   a) The problem of wrap-up has been discussed and legislation has been recommended. However, further study should be done on wrap-up as one element of the total project and what impact wrap-up had on cost over-runs and contracting procedures.

   b) What were the trade-offs in the decision to not relieve the engineer of responsibility for the project?

4) What procedures are used in developing cost estimates and how thorough is management in checking those estimates?

   a) What is the explanation for significant differences in the various estimates on the project costs?

   b) Do we know with certainty at this time what the final costs of the project will be?

5) Did the project costs get out of control and, if so, at what time did the project costs get out of control?

   a) What steps were taken to control the escalating costs of the project?

   b) There are excessive numbers of change orders in the Tyee project. Were all of these necessary and what could have been done to prevent this problem?

6) Has the Legislature been at fault by constantly changing the ground rules by which APA operates or allowing too much latitude in the operation of APA?

7) What has been the specific impact of each legislative change

as the Tyee project progressed (i.e., "Blackmail Clause, SB 25 and 26, HB 9, etc.)?

8) What steps are necessary to resolve the crisis we face with the Tyee project?

a) Do the problems with Tyee apply to other APA projects?

b) Who should bear the burden for the cost over-runs -- the utilities, municipalities (customers) or the State of Alaska?

And finally and most importantly,

9) What recommendations or legislation should be adopted by the Labor and Commerce Committee to prevent these problems from arising again?

Increased energy usage throughout the State, declining oil revenues and an eventual end to fossil fuels demand a workable energy plan for Alaska. Some corrections have been made within APA by changes in legislation, by the APA board and by the APA management. This review should not be a surgical procedure, but rather, an examination, diagnosis and cure.

MEMORANDUM

TO: All members of the Special Committee on State Loans
FROM: Representative Rick Uehling, Chairman
DATE: February 14, 1983

RE: Committee schedule for week of February 14

The House Special Committee on State Loans will meet on Tuesday, February 15, 1983, at 3:00 p.m., in Capitol Room 504 (Senate HESS Committee).

The first witness will be Bert Wagnon, Executive Director of Alaska Industrial Development Authority. Mr. Wagnon will present an overview of AIDA and its many individual programs. A copy of the AIDA annual report is attached.

The second witness will be Don Hostak, Director of the Division of Business Loans and Veterans' Affairs. Mr. Hostak will present an overview of his agency and the many programs it offers. Individual programs within the Division of Business Loans include Alternative Technology and Energy, Bulk Fuel, Child Care Facility, Commercial Fishing, Fisheries Enhancement, Historical District, Mining, Residential Energy Conservation, Small Business, Tourism, Veterans', and Water Resources Revolving Loan Funds. Although the Division of Business Loans and Veterans' Affairs has no pre-printed annual report, Mr. Hostak is preparing a special hand-out for the committee's use.

I look forward to seeing you at the meeting tomorrow.

REPLY TO:

FEB 4 1983

January 26, 1982

The Honorable Joe L. Hayes, Speaker
Alaska House of Representatives
P.O. Box 1821
Anchorage, Alaska 99510

RE: Alaska Power Authority
Wrap-up Insurance
Contract
Our File: 4306-2

Dear Mr. Speaker:

Our office has completed its review and evaluation of the materials furnished us by the House Labor and Commerce Committee relating to the Alaska Power Authority's "wrap-up" insurance contract with Marsh and McLennan-Corroon & Black/Dawson & Co. as insurance brokers for the Alaska Power Authority and Pacific Marine as workers' compensation insurers. For reasons more fully explained below, it is our belief that a legislative lawsuit on the matter does not appear advisable at this time, even though one could argue that several state laws may have been violated.

Before explaining the basis of our opinion, a brief description of the process through which our analysis evolved is in order. In April of last year, we were given an oral briefing by Mr. Jeff Barry, Legislative Assistant for Representative Terry Martin, Chairman of the House, Labor and Commerce Committee. Mr. Barry brought with him a few basic documents which we reviewed. Legislative subpoenas were then issued by you, as Speaker of the House, to Marsh and McLennan-Corroon & Black/Dawson & Co. who had contracted to broker the wrap-up insurance and provide risk management services for the Alaska Power Authority. You also issued a legislative subpoena to Pacific Marine the insurance carrier selected by Marsh and McLennan-Corroon & Black/Dawson & Co. to provide workers' compensation insurance for the Alaska Power Authority projects. In May, we completed some basic research in the area of public finance, competitive bidding, monopoly and restrain of trade, and the general scope of powers of the Alaska Power Authority. We

also collected some background information concerning problems encountered with the Alaska Pipeline wrap-up insurance program.

It was determined that we should await receipt of the subpoenaed information before continuing further. This information was brought to us on July 19, 1982 by Mr. Barry. It consisted of four large boxes of documents which were not organized in any fashion and had not been indexed in any way. As a consequence, we had to review, sort and index the material and it proved to be very time consuming process. A summary of the contents of the boxes and the files in which they are now organized is set forth in the attached memorandum of August 26, 1982 by Mr. Wev Shea of our office together with two related memoranda of September 9, 1982. After reviewing the documents and categorizing them according to their importance, a brief summary of major documents and points was compiled. The legal authority cited by counsel for both the Alaska Power Authority and Insurance Brokers was studied and analyzed as were the legal briefs and memoranda surrounding the Alaska Pipeline decision issued by the Director of Insurance in April 1970. A summary of some of the select documents and a brief background summary was then prepared. A copy of the memorandum of October 6, 1982 with exhibits is attached for your perusal. An "Indemnity Agreement", Exhibit "F", to this memorandum is particularly disturbing since it appears to require the State of Alaska to indemnify APCOP (Marsh and McLennan-Corroon & Black/Dawson & Co.) for its own negligence. The problem is compounded since the agreement is unsigned and in draft form. It was one of hundreds of documents received pursuant to your legislative subpoenas which we examined.

Upon learning that legislative audit had compiled a report addressing the Alaska Power Authority wrap-up insurance program, we refrained from issuing our opinion until a copy of that report could be obtained and studied. The report was not delivered to us until November 10, 1982. After reviewing the report and documents subpoenaed, it would appear the problems identified and the questions raised in this matter would best be addressed through dealing directly with the executive branch or holding legislative hearings and adoption of remedial legislation.

This approach is especially applicable in light of the numerous factual, legislative and administrative changes since the initial wrap-up issue was addressed by us last April. Perhaps most important is the decision by the Alaska Power Authority to limit the wrap-up insurance brokerage by Marsh and McLennan-Corroon & Black/Dawson & Co. to the Tyee Lake construction. Initially Marsh and McLennan-Corroon & Black/Dawson & Co. had an open-ended contract with the Alaska Power Authority. Secondly, the recent Superior Court ruling in Barnes v. Palmer, et al., holding that the legislature and taxpayers lack

standing to challenge violations of the Alaska competitive bidding statutes. Thirdly, the revision of the competitive bidding statutes by the legislature effective last July. Finally, the election of Bill Sheffield as Governor and your success in dealing with the executive branch in Barnes. All of the foregoing affected our analysis and influenced our conclusion regarding the superiority of informal administrative remedies to judicial alternatives.

In addition to the standing problem in the Barnes ruling, the nebulous complex areas of the law that surround the Alaska Power Authority wrap-up insurance program are neither clear-cut nor easily determined. They overlap each other in various shades of gray rather than black or white definitive areas. Illustrative of this problem is that despite the overwhelming volume of material supplied, we find that a few of the possible legal violations could not be adequately analyzed due to a lack of relevant information; these issues included the questions of possible:

1. Fictitious group insurance violations.
2. Worker's Compensation insurance violations.
3. Anti-trust violations.

The key issue of lack of competitive bidding in contracting the wrap-up insurance brokerage with Marsh and McLennan-Corroon & Black/-Dawson & Co. is illustrative of the myriad of legal arguments which can be raised on both sides of this entire matter without arriving at a clear cut conclusion. The following analysis of competitive bidding is also illustrative of the complexity of the legal issues surrounding the Alaska Power Authority wrap-up insurance program.

The contracting provisions of AS 37.05, the Fiscal Procedures Act, were until July 22, 1982 applicable to only state agencies and departments which were defined in AS 37.05.320(2) to mean:

> ...department, officer, institution, board, commission, bureau, division, or other administrative unit forming the state government and includes the Alaska Pioneer's Home and the University of Alaska.... (emphasis added)

AS 44.83.020 declares the Alaska Power Authority:

> ...is a public corporation of the State in the Department of Commerce and Economic Development but with separate and independent legal existence. (emphasis added)

Further insight into the legal significance of the Alaska Power Authority is provided by the following citation in AS 44.83.010(3):

> ...establishing and operating power projects in the state will be accelerated and facilitated by the creation of an instrumentality of the state with power to construct, acquire, finance and operate power projects. (emphasis added)

Since the University of Alaska is also a public corporation like the Alaska Power Authority with separate and independent legal existence, one could argue that the specific listing of the Pioneer's Home and the University of Alaska in the definition section of AS 37.05.320(2) exhibits legislative intent to exclude all other public corporations having separate and independent legal existence. This conclusion would be based upon the statutory construction doctrine of "expressio unius est exclusio alterius" (the express mention of one thing implies exclusion of all other of similar nature). If the intent had been to make the University of Alaska only an example of the type of public corporations included within the definition it should have been phrased: "including all statutorially created public corporations such as the University of Alaska."

Despite the above, one could readily argue on the other hand that by being an "instrumentality of the State" the Alaska Power Authority is an "administrative unit forming state government". The addition of the word "authority" to the definition of a state agency in AS 36.98.080(5) effective July 22, 1982, made applicable to Title 37 by virtue of AS 37.05.230(10), makes a slightly stronger case for the applicability of competitive bidding laws to the Alaska Power Authority. However, it certainly does not totally negate the applicability of the expressio unius doctrine mentioned above.

Even if one were to assume the applicability of Title 37 to the Alaska Power Authority, it does not necessary follow that any provision of that title has been violated since there are two very broad exclusions to the competitive bid requirements. It is provided in AS 37.05.230(1) that the competitive bids need not be required for "professional services" and the department may negotiate directly if it finds pursuant to AS 37.05.230(2) that it is in the "best interests of the state".

Unfortunately at the time of the brokerage contract between the Alaska Power Authority and Marsh and McLennan-Corroon & Black/Dawson & Co. when the wrap-up insurance program in question arose, the statut[illegible] were not explicit as to what constituted "professional services". T[illegible] phrase was not defined in Title 37. However, some insight may be

drawn from the definition set forth in the Alaska Corporation Act in AS 10.45.250(1), wherein it is stated that:

> 'Professional Services' means a type of highly skilled, technical, and specialized personal service rendered to the public by persons licensed by the state.

Insurance brokers are required to be licensed by virtue of AS 21.27.040. This fact, creates an argument that the insurance expertise provided by Marsh and McLennan-Corroon & Black/Dawson & Co., falls into the professional service exclusion of AS 37.05.230(1) and, was not subject to the competitive bidding requirements until the enactment of the "Professional Service Contract" statutes in Title 36 effective July . , 1982, which provide in AS 36.98.080(2):

> 'Profess.onal Services' means professional, technical, or consultant services that are predominately intellectual in character and that
>
> (a) include analysis, evaluation, prediction, planning or recommendation; and
>
> (b) result in the production of a report of the completion of a task.

AS 36.98.030 effective July 22, 1982 specifically governs the procedure for "Solicitation of Proposals". However, irrespective of the enactment of Chapter 98 of Title 36 governing "Professional Service Contracts", a serious question still exists as to whether under any statutory definition of "professional services", the legislature intended to include the activities engaged in by insurance brokers Marsh and McLennan-Corroon & Black/Dawson & Co. on behalf of the Alaska Power Authority. It appears the activities in which the brokers have engaged are much broader in scope than the mere giving of "analysis and recommendations" or the "production of a report or task" as set forth in AS 36.98.080(2), supra. The insurance brokers have entered into contracts for everything from public safety to legal services to public relations on behalf of the Alaska Power Authority's project at Tyee Lake. Thus, while their insurance brokerage services to Alaska Power Authority may fit within the professional services exclusion, it is arguable whether the legislature intended or even envisioned insurance brokers entering such a broad range of contracts on behalf of the State.

The intended scope and meaning of the "best interests" exception of AS 37.05.230(2) adds even greater uncertainty to the competitive bid issue. The State has only issued guidelines concerning the use of

this exception and has not transformed these guidelines into actual regulations. The guidelines require:

> The Commissioner of Administration or his designee may consider waiving the requirement of issuing invitations to bid when it can be substantiated by the requested department and confirmed by the department of administration that such action would be in the best interest of the State. To be considered, a request for waiver must be fully justified on an individual basis. A previously approved waiver will not be justification for additional purchases of the same item. Request for waiver may not be approved, regardless of the situation where it is apparent that poor or no planning was exercised or as a routine expediting service. (Emphasis added) (Department of Administration, Purchasing Regulations, Chapter 3, Section 6)

As near as we could determine from the documents provided us, the Alaska Power Authority did not comply with the requirements of the above-cited guidelines. However, there is no judicial precedent in Alaska for determining whether such failure negated the availability of such exemption. While a line of case authority can be found mandating the presentation of objective criteria on which to base such a finding there does appear to be data of record from which the State arguably could conclude that it was in the "best interests" of the State (Alaska Power Authority) to follow the procedure in question. This argument centers around the fact that Marsh and McLennan-Corroon & Black/Dawson & Co. have been providing insurance coverage to the State of Alaska and that it was therefore logical to have those insurance brokers handle the Alaska Power Authority wrap-up insurance program. While we would not reach a similar conclusion, we cannot say with any degree of certainty that a court would concur in our belief.

Given the nature of the argument that can be raised on both sides of the issue and the inordinate amount of time required for judicial litigation, it would seem that executive or legislative action would be a much speedier remedy. While such remedies may not change the Tyee Lake contract, the availability and practicality of judicial remedies for the Tyee Lake contract is quite questionable. In fact, given the Superior Court's ruling in the case of Barnes concerning the lack of legislative and taxpayer's standing to challenge State violation of the competitive bidding laws, one cannot even be certain that a court would decide the issues in question unless they were raised by one of the aggrieved bidders on the Tyee Lake project.

The other issues identified on page 3 of this letter, certainly warrant further scrutiny and the involvement of the Director of Insurance since we have been advised by Mr. Barry that no filings had been made with the Director of Insurance as required by statute. The report of the legislative audit tends to indicate certain filings were made. Various arguments and issues relevant to the fictitious group and workers' compensation insurance violations are set forth in the memorandum of November 22, 1982 attached hereto. Another memorandum relating to the issue of anti-trust violations dated November 22, 1982 is also attached for your perusal. Both of these memoranda have been synopsized for purposes of this letter. While we are inclined to think that the likelihood of violations of the above referenced areas are quite possible we feel that since a new administration is in power, it would be prudent for discussions to ensue with the Director of Insurance, Department of Administration, and Department of Law as to each of the various questions.

The Insurance Director's office should be able to handle the insurance issues concerning fictitious group insurance and worker's compensation. The Department of Administration could review the competitive bid waiver authorizations and perhaps revoke those which still are prospective in effect. The Department of Law could address the "Indemnity Agreement" problem as well as the anti-trust issues. The state liability arising from its potential exposure from it's "Indemnity Agreement" with Marsh and McLennan-Corroon & Black/Dawson & Co. might very well justify filing a judicial action to have the agreement declared void on any one or more of the grounds mentioned in this letter and attached memoranda. On the other hand, the State may prefer to wait until actual demand is made on the State for payment under the "Indemnity Agreement" before challenging its legality so as to avoid the expense of litigation without knowing whether the loss experienced from the Tyee Lake project will ever be high enough to bring the "Indemnity Agreement" into play. If more information is needed, or if the Legislature is desirous of pursuing its own investigation of these matters it could do so through the Legislative hearing process. This approach appears more appropriate now that Alaska Power Authority has amended it's brokerage contract with Marsh and McLennan-Corroon & Black/Dawson & Co. so that it is no longer open-ended, but instead is restricted only to the Tyee Lake project.

As you might well appreciate, the volume of factual data and the various nuances of each major legal issue is quite considerable. Thus, not all of them could be readily summarized in this letter when combined with the changing facts, administrations and statutory authority. Accordingly, if you have any questions, please do not hesitate to contact us. This letter and attached memoranda constitute work completed pursuant to the attorney-client relationship and

attorney work-product. Dissemination of this letter and attachments may waive the related privileges and we would request that you contact us prior to making the letter and attachments available to others. In the meantime, we will await your further instructions as to whatever action, if any, you wish us to pursue in this matter.

Please let us know if you need the subpoenaed documents we have retained. If litigation is desired we stand ready to undertake it. If assistance is desired for structuring of legislative hearing inquiries or contacts with the various executive branch we will be happy to assist you in any way you see fit.

Sincerely,

HARTIG, RHODES, NORMAN,
MAHONEY & EDWARDS

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY

February 2, 1983

The Honorable Walt Furnace, Chairman
House Labor & Commerce Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Furnace:

While appearing before your committee on H.B. 26 several questions were asked that I was unable to answer at the time. I indicated these questions would be resolved and answers provided to the committee in writing.

Question: (from Representative Malone)

Please provide asset base, cash flow and amount pledged for bonds as of 12/31/82.

Answer:

Total assets as of 12/31/82 are $344 million. All assets of the Authority are pledged as payment for the bonds (i.e. full faith and credit of the Authority). Cash flow projections on appropriated and federal guaranteed loans are prepared twice a year (6/30 and 12/31). Attachment "A" was compiled using 6/30 figures. I will furnish updated 12/31 figures in approximately 2 weeks. Cash flows representing repayment of loans from bond proceed and from other investments are updated when required for Official Bond Sale Statements. Attachment "A" is from a December 1982 Official Statement.

Question:

Would you please furnish a written position paper on H.B. 26 & H.B. 22.

Answer:

Attached are position papers on H.B. 26 and H.B. 22.

In addition your committee requested extra copies of our annual report which I have included. If I can furnish any further information please advise.

1577 "C" STREET • SUITE 304 • ANCHORAGE, ALASKA 99501-5177 • (907) 274-1651

Sincerely,

Bertram L. Wagnon
Executive Director

BLW:mr

Enclosure(s)

CC: Catherine Wallen, Information Officer

Aggregate Debt Service and Estimated Coverage Schedule

The following table sets forth, for each respective annual period ending June 30, the total Debt Service Requirements for the outstanding Economic Development Bonds, Series 1-231 and Consolidated Bonds, Series A-D, and includes estimated Debt Service Requirements for the Bonds and $3,335,000 Economic Development Bonds expected to be issued concurrently with the Bonds. The estimated total Net Income of the Authority, and the estimated Debt Service Coverage are calculated by dividing estimated total Net Income (including projected loan repayments) by the total Debt Service Requirements.

	Annual Debt Service Requirements				Estimated Net Income					
Period Ending June 30	Outstanding Bonds Principal & Interest	Current Issues Principal	Current Issues Interest	Total Debt Service Requirements	From repayment of loans made from bond proceeds of Outstanding Bonds(1)	From repayment of loans made from bond proceeds of Current Issue(1)	From repayment of loans appropriated to the Authority (2)	From investment of certain assets and annual excess net revenues (3)	Estimated total Net Income	Estimated Coverage (4)
1983	$13,559,480	$ -	$ 274,599	$13,834,079	$13,419,745	$ 409,269	$24,731,541	$ 3,210,270	$41,770,826	3.02

(1) Revenues are net of all fees and expenses on a fiscal year basis.

(2) Represents revenues from the loans appropriated to the Authority, net of all fees, plus estimated holding period interest calculated at 6.5% and other revenues. Principal and interest on loans delinquent more than 90 days are not included. This column includes Small Business Administration loan repayments.

(3) Includes income from investment of certain assets and excess net revenues of the Authority at an assumed rate of 5.50% compounded annually for periods after December 1, 1982.

(4) There are currently outstanding $6,035,000 principal amount of Economic Development Bonds which may be tendered for payment by the holders thereof commencing on April 1, 1987. If all of such Bonds were tendered on April 1, 1987 estimated coverage for the period ending on June 30, 1987 would decline from 3.19 to 2.21. However, the reduction in annual debt service requirements thereafter would result in higher coverage multiples than those shown above.

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY

Position Paper

Sponsor Substitute for House Bill Number 22

We appreciate the opportunity to comment on SSHB22. The effect of the bill would be to preclude utilizing the credit of the Authority for any loan in which the applicant was not a resident of the state. The current statutes of the Authority require that the "project" be located within the state (44.88.070). The purpose of the Authority is to promote, develop and advance the general prosperity of the people of Alaska. By having "non-resident" corporations construct facilities within the state and accordingly have the construction and operation employment within the state seems an appropriate way of furthering that purpose.

SSHB22 does not define residents so regulations would be needed. The constitutional questions regarding residency are well known and to what extent regulations could limit residency and still pass a legal challenge are unknown. A considerable portion of the benefit of utilizing financing though the Authority is obtained by Federal law regarding tax-exemption. It is possible that a definition of residency would have to be of a very short duration in that the benefits flow from federal legislation.

A review of our loan report indicates that out of 266 loans that pledged the full faith and credit of the Authority 6 were to possible non-residents. These 6 loans supposedly created or retained 65 jobs within the State of Alaska.

While we certainly understand the desire to ensure that benefits of the program are provided to Alaskans, rather than outside corporations, we believe that the present program already generates this result.

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY

Department of Commerce & Economic Development
Alaska Industrial Development Authority

Position Paper
House Bill No. 26

Thank you for the opportunity to comment on HB 26. This bill changes the Statutes of both the Alaska Industrial Development Authority as well as the Alaska Permanent Fund. Our comments will consider the impact only on the authority, as we assume the Permanent Fund will be presenting their own testimony on the bill.

The initial effect of this bill is that any qualifying business having an outstanding loan with an interest rate in excess of 10.9% will seek refinancing under the program. As the interest rate on an eligible loan is set at the lesser of 10.9% or 1% above prime, should the prime rate fall below 9.9% the demand for refinancing will be correspondingly greater. Furthermore, any new qualifying borrowers would undoubtedly prefer this program over existing higher priced alternative financing. It is impossible to accurately estimate volume, but it seems reasonable to expect that within two years the 25% Permanent Fund allotment will have been exhausted, and the program will be reduced to a much lower level (25% of annual Permanent Fund Contributions).

Another possible effect of the interest rate ceiling is that if the prime rate drops below 9.6%, AIDA would have to begin subsidizing loans. For instance, if prime is 9%, then the loan rate is 10%, with .6% going to a bank for servicing fees, and 9.4% going to AIDA. However, AIDA is required to pay 10% to the Permanent Fund on its bonds, or a loss of .6%.

Another feature of the bill is that it appears to preclude AIDA from making any credit decisions on loans, but rather requires that the authority purchase any loan that a bank certifies is eligible.

The combination of the above factors, when coupled with the requirement that these loans must be guaranteed by the authority most likely means that AIDA will no longer be able to issue any other bonds based on the general obligation of the authority. This results from the fact that the general credit worthiness of the authority will have been so weakened that it will no longer be possible to sell bonds at any reasonable rates.

Unfortunately, this bill seems to follow the historic patterns of State loan programs. Phase one begins with a program put in place that provides a source of funds requiring no ongoing subsidy yet structured to provide an attractive interest rate to borrowers. Phase two is the expansion of a successful program to include other forms of borrowing and allow a larger number of individuals access to the program, often with some form of slightly below market interest rates. Phase three is additional liberalization and

subsidization resulting in a massive increase in loan volume. This is eventually followed by Phase four, the demise of the program brought about because of the now large costs that can no longer be sustained.

In our opinion, not only does the bill jeopardize the continued useful functioning of one of the authority's main programs, it does not appear to be necessary. Presently the authority can finance a significant portion of small business expansion with tax-exempt bond financing. For much of the demand for financing that is ineligible for bond financing, the authority also has the small enterprise loan account (AS 44.88.156).

This program provides funds ($47 million thus far) for business refinance, working capital, inventory, acquisition and expansion of business. First lien position is not required since these loans are guaranteed by the federal government. Banks and financial institutions originate the loans and the authority purchases the guaranteed portion without underwriting delay. The interest rate is fixed and the loan term may be as long as 25 years and may be prepaid without penalty. The maximum loan is $500,000; however, there is no limit as to the number of loans a business may have. The authority collects no fee and the banks are allowed a 1 or 1-1/2 percent fee depending on loan size. The authority's interest rate is set as the Aa corporate bond rate, which is currently 12.25%.

Although this program is not as lucrative to a borrower as the proposed program, it does provide for a wide variety of financing uses at a competitive interest rate, and, further, is a sustainable program that complements, rather than jeopardizes other programs of the authority.

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying:
Board of Barbers and Hairdressers

Please list any other Board or Commission on which you serve:

Name	Previous Name applied under
Carolyn S. Janzen	
Mailing Address	**Residence Address**
SR Box 2586-A	
City, State and Zip Code	
Anchorage, AK 99516	
Home Telephone	**Business or Message Telephone**
344-9885	337-1244

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election:

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional) Democrat (HD #08) Social Security Number (Optional)

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☒ YES ☐ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating?

No

CONFLICTS OF INTEREST. Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☐ YES ☒ NO

Could you or any member of your family be affected financially be decisions to be made by the Board or Commission for which you have applied?
☐ YES ☒ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-012(2/81)

TRAINING & EXPERIENCE: (If résumé attached, it is not necessary to complete items A-D)

A. List any professional licenses, certifications, or registrations and dates obtained that may be used as qualifying criteria:

Licensed Hairdresser - Alaska
Trained at Anchorage Beauty School

B. List both formal and informal education and training experiences: (Use additional paper if necessary)

High School graduate

C. List any community service positions, municipal government positions, state positions held, and list any awards received. These include both compensat and uncompensated positions (for example, president of a service organization or a mayor). Also include length of time served in the positions.

N/A

D. Employment work history: paid, unpaid or voluntary: (Use additional paper if necessary)

Owner/operator - Hair Rack for 4 years

The Office of the Governor and the State of Alaska have an Affirmative Action Equal Employment Opportunity Program. To assist in the program, you are asked to voluntarily answer the following questions to provide the information necessary for reporting purposes. Under State and Federal law, the information you provide will not be used to illegally discriminate against you.

SEX
☐ Male
☒ Female

ETHNIC BACKGROUND
☒ White ☐ Black ☐ Hispanic ☐ Alaska Native ☐ Asian or Pacific Islander ☐ American Indian

Date of Birth	Military Service (If applicable, give dates)
11/05/42	N/A

CERTIFICATION: I swear that the information I have entered on this form is true to the best of my knowledge. I understand that if I deliberately conceal or enter false information on the form my application may be rejected, I may be removed from the list of eligible candidates or I may be removed from the position. I agree that the Office of the Governor may contact present or former employers or other persons who know me to obtain additional information about my skills and abilities. I understand that the information on this application is public information and may be released through a legal request for such information.

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying:
Barber and Hairdressers' Board

Please list any other Board or Commission on which you serve:

Name	Previous Name applied under
LETHA BRAY ASHCRAFT	
Mailing Address	**Residence Address**
3609 Richmond Avenue, Anch, AK 99504	Same
City, State and Zip Code	
Anchorage, AK 99504	
Home Telephone	**Business or Message Telephone**
907-277-9219	

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election.

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional)

Social Security Number (Optional) 574-18-4591

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☒ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating? No

CONFLICTS OF INTEREST Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☒ YES ☐ NO

Could you or any member of your family be affected financially be decisions to be made by the Board or Commission for which you have applied?
☐ YES ☒ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-012(2/81)

TRAINING & EXPERIENCE: (If résumé attached, it is not necessary to complete items A-D)

A. List any professional licenses, certifications, or registrations and dates obtained that may be used as qualifying criteria:

State of Alaska Hairdresser & Cosmetologist Instructor, owner and operator licenses. 1963-83

B. List both formal and informal education and training experiences: (Use additional paper if necessary)

SEE ATTACHED RESUME

C. List any community service positions, municipal government positions, state positions held, and list any awards received. These include both compensated and uncompensated positions (for example, president of a service organization or a mayor). Also include length of time served in the positions.

SEE ATTACHED RESUME

D. Employment work history: paid, unpaid or voluntary: (Use additional paper if necessary)

SEE ATTACHED RESUME

The Office of the Governor and the State of Alaska have an Affirmative Action Equal Employment Opportunity Program. To assist in the program, you are asked to voluntarily answer the following questions to provide the information necessary for reporting purposes. Under State and Federal law, the information you provide will not be used to illegally discriminate against you.

SEX
☐ Male
☒ Female

ETHNIC BACKGROUND
☒ White ☐ Black ☐ Hispanic ☐ Alaska Native ☐ Asian or Pacific Islander ☐ American Indian

Resident of Alaska since 1946---37 years

Date of Birth
14 June 1944

Military Service (If applicable, give dates)
None

CERTIFICATION: I swear that the information I have entered on this form is true to the best of my knowledge. I understand that if I deliberately conceal or enter false information on the form my application may be rejected, I may be removed from the list of eligible candidates or I may be removed from the position. I agree that the Office of the Governor may contact present or former employers or other persons who know me to obtain additional information about my skills and abilities. I understand that the information on this application is public information and may be released through a legal request for such information.

PERSONAL DATA

LETHA BRAY ASHCRAFT
3609 Richmond Avenue
Anchorage, AK 99504
907-277-9219

LETHA BRAY ASHCRAFT was raised in Anchorage and was educated in the Anchorage School System. She has been an Alaskan resident since 1946. Her initial cosmetology training was taken at MAXINE'S BEAUTY COLLEGE, 1010 Fireweed Lane, Anchorage, Alaska. She then took advance training at BEETCH'S BEAUTY COLLEGE in Enid, Oklahoma. Letha worked as a cosmetologist for several years while continuing her advanced training to become a licensed cosmetology instructor.

She has served as an instructor for several beauty colleges. She feels that membership in professional organizations is an important part of any cosmetologist's career. She has been a member of Anchorage Affiliate #293 and a member of the Alaska State Hairdresser & Cosmetologists Association since 1963. During that time she has served in many capacities, among these are: Alaska State Styles Director and Chairman of the Alaska State Hair Fashion Committee. As a member of the National Hairdressers and Cosmetologists Association, she has a[illegible] many national conventions and shows both as a participant, delegate and as a c[illegible]ion instructor. In 1975, she became Alaska's first representative on the Official Hair Fashion Committee. She is extremely interested in helping Alaskans keep up-to-date with the latest trends in hair styling. Membership on the OHFC of America is based on a comprehensive three-day competitive examination. The committee is not only honorary, but serves as the educational body to relay the current trends to each state. Membership on the committee also makes the individual member eligible to serve as a guest artist for any state hairdresser & cosmetologists convention.

Letha was the owner of the Nordstrom Beauty Salon from 1975 til 1982. She is married and has two children.

RESUME FOR ROGER D. SLAVEN
February 4, 1984

Date & Place of Birth:	Janaury 16, 1955 Eugene, Oregon
Social Security Number:	557-11-2144
Business Address & Phone:	310 Front Street Ketchikan, Alaska 99901 (907) 225-3022
Resident of Alaska:	8 Years

I attended the Modern School of Hairstyling and Barbering in Seattle, Washington from June 1979 through March 1980, completing all the requirements for Washington and Alaska. I took the Alaska Board Exam in Anchorage in April of 1980. I was owner/operator of the Windward Barber Shop in Petersburg from May 1980 through June 1981. He moved to Ketchikan and worked for Elmo's Hair Design from June 1981 through July 1981. Then I opened the Stedman Barber and Styling where I am presently the owner and operator. This gives me a total of four years of barbering in Alaska.

Previous to barbering I was a commercial fisherman for 2 years and worked for the U.S. Forest Service for 4 years.

HOUSE LABOR AND COMMERCE COMMITTEE

MEMORANDUM

February 20, 1984

To: All Committee Members

From: Rep. John Cowdery, Chairman JC

RE: Confirmation Hearings

As you are aware, a number of the Governor's appointments to boards and commissions have been referred to the Labor and Commerce Committee for confirmation. While the committee is in Anchorage on the 24th of this month, it is my intention to hold confirmation hearings for those appointed by Governor Sheffield who live in the Anchorage area. It is also my intention to reserve taking action on these appointments until a later date. The confirmation hearings have been scheduled for 2:30pm, Feb. 24, 1984, at 1024 W. 6th Ave. in downtown Anchorage. The Labor and Commerce Committee staff has prepared a file for each committee member which contains information on all the appointments referred to the committee for confirmation.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

Sandra L. Benson, A.I.A. — Sampson
P. O. Box 104757
Anchorage, Alaska

Licensed: Alaska - No. A6747, 1978
Degree: Bachelor of Architecture - 1973
University of Oregon

Alaska Resident since 1977

INTEREST

Interest in serving on the State of Alaska Board of Registration stems from a desire to assist in organizing the process by which interm architects and engineers are admitted to the profession. Working with several persons currently involved in the registration process has led to a conviction that clear communications between the Board and potential registrants are of utmost importance.

EMPLOYMENT

Kumin Associates, Inc.
Architects and Planners
3301 Denali Suite 200
Anchorage, Alaska 99503
1977 To The Present

Project architect experience in work located throughout Alaska, comprising a variety of occupancy groups and building types such as schools, dormitory and camp facilities, offices and commercial buildings, clinics and residential construction.

PROFESSIONAL ACTIVITIES

American Institute of Architects - Anchorage Chapter.
International Conference of Building Officials
Governors Task Force on Fire Prevention and Control 1981-1982

June 22, 1983

Honorable Bill Sheffield
Governor of Alaska
Pouch A
Juneau, Alaska 99811

Re: Board of Registration for Architects,
Engineers, and Land Surveyors
Willingness to Serve

Dear Governor:

It is my understanding that the Board of Examiners for Architects, Engineers, and Land Surveyors has a vacancy. I would like to express, at this time, my desire to serve on said board.

A brief summary of qualifications is as follows;

- Registered Land Surveyor - Alaska (1410S), 1965
- Registered Civil Engineer - Alaska (1855E), 1969
- Registered Civil Engineer - Washington (22222), 1970 (Reciprocity)
- U.S. Mineral Surveyor, 1982

The writer is one of the founders and a principal member of the firm R & M Consultants, Inc. This firm has offices in Juneau, Anchorage, and Fairbanks, Alaska, and has expanded to Salt Lake City, Utah, and Irvine, California. The firm was founded in Alaska in 1969. The writer is a vice president of said firm and manages the Juneau office. Prior to forming R & M, the writer was employed by the Alaska Department of Highways for a period of six years as Southeast Alaska area resident engineer, construction project engineer, and district location engineer. In addition, two years were spent with the U.S. Army, Corps of Engineers, and seasonal work in Alaska for the U.S. Bureau of Public Roads.

In addition, the writer is a member fo the following societies: American Society of Civil Engineers (and the Alaska Section), the National and

Alaska Societies of Professional Engineers (past state secretary and treasurer), the Alaska Society of Professional Land Surveyors (past vice chairman, secretary, and treasurer), the American Congress of Surveying and Mapping, the Alaska Section of the American Congress of Surveying and Mapping (past chairman, vice chairman, secretary, and board of directors), the American Society of Photogrammetrists, as well as the Canadian Institute of Surveying.

The writer has served for a period in excess of seven years as a member and presently chairman of the City and Borough of Juneau's Planning and Zoning Commission, Platting Board, and Board of Adjustment.

A personal history is as follows;

- A graduate of the school of special advanced studies for surveying in the U.S. Army, Corps of Engineers, Fort Bolvoir, Virginia.
- A graduate of Chicago Technical College with a Bachelor of Science degree in Civil Engineering - 1963 (cum laude).
- A part-time Alaska resident working seasonal in Alaska from 1960 to 1963, and a full-time resident of Alaska since 1963 having resided for 15 of those years in Juneau, and the remaining time being spent in Petersburg, Ketchikan, and Fairbanks.
- The writer is married and has three children; the oldest (Scot) is attending the University of Alaska--Fairbanks as a civil engineering major on a partial academic scholarship. The second oldest (RobRoy) is a student in Juneau-Douglas High School, while the youngest (Holly) is attending first grade.

I desire to serve both the State of Alaska and my chosen profession by being a member of the Board of Examiners for Architects, Engineers, and Land Surveyors. Should there be questions with regard to my professional or personal history, please do not hesitate to contact me at your convenience.

Sincerely,

R & M CONSULTANTS, INC.

Malcolm A. Menzies

SUMMARY OF QUALIFICATIONS

Three (3) years Board of Directors of the Alaska Conference of Employers (ACE). This is a non-profit corporation structured solely to study Workman's Compensation problems and/or laws in Alaska.

Three (3) years Vice-President of the Workers Compensation Committee of Alaska (WCCA). This is a political action committee (PAC) to effect changes in the Workers Compensation laws and/or system:

An original and continuing member of the ad-hoc Labor/Management committee formed by member companies of the WCCA and a number of labor union leaders to work together to effect needed changes in the Workers Compensation system. HB 311 signed by Govenor Sheffield on 7-15-83 was the product of this committee.

Knowledgeable in labor/management relation and have been a member of many boards of arbitration and greivances at the request of several Alaskan employers.

My past three and one/half years of intense involvement in the Workers Compensation system and my past six years as General Manager of Air Van Lines, Inc., which had serious Workers Compensaion loss problems, has given me a broad overview of the system. My involvement with Teamster Local 959 as an employer has given me an area of expertise vis-a-vis worker safety, safety programs and labor/management objectives in a Workers Compensation system.

EDUCATION

1948-1950	Graduated	Gonzaga High School-Spokane, Washington
1954	Attended	University of California at Santa Barbara, California
1955	Attended	Gonzaga University-Spokane, Washington
1962	Attended	Sophia University-Tokyo, Japan

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election:

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional)

Social Security Number (Optional) 033-20-9972

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☒ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating? Any that would be beyond my control.

CONFLICTS OF INTEREST: Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☒ YES ☐ NO

Could you or any member of your family be affected financially be decisions to be made by the Board or Commission for which you have applied?
☐ YES ☒ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-012(2.81)

TRAINING & EXPERIENCE: (If résumé attached, it is not necessary to complete items A-D)

A. List any professional licenses, certifications, or registrations and dates obtained that may be used as qualifying criteria:

R.N. in 1949

BSN in 1979

B. List both formal and informal education and training experiences: (Use additional paper if necessary)

February 14, 1983

State of Alaska
Department of Commerce and
Economic Development
Attention: Mr. Richard A. Lyon
Commissioner
Pouch D
Juneau, Alaska 99811

Dear Mr. Lyon:

I desire appointment as a Public Member to the State of Alaska, Real Estate Commission. I have eleven years of real estate experience both for the Federal Government and that gained from personal investments. My real estate experience includes the appraisal and acquisition of sites for navigational and communication aviation facilities throughout the State of Alaska. I have also learned much about commercial real estate matters while acquiring and managing a variety of real estate for myself, i.e. four-plex, mobile home, condos, single family residences.

I believe these and other experiences and the training listed on the addendum to my resume uniquely qualifies me to serve on the Real Estate Commission. I appreciate the opportunity to use my real estate experience in service to my State.

Respectively submitted,

LaVerne F. Collins

EXPERIENCE AND EDUCATION

1975 - Present Business Development

After leaving the Governor's Office late in 1974, my family and I returned to our home in Fairbanks, and became involved in small business development which included:

1. Chena Valley Development - a small earth-moving and construction company which my wife and I purchased in the spring of 1975.

2. Anders Transportation, Inc. - a small school bus contracting company started by my parents in 1959. In 1975, I purchased the company following my father's death, and have worked to expand its operations.

3. Valley Center - a retail business located at mile 23, Chena Hot Springs Road. Includes retail grocery, liquor and full-service garage. It holds the Chevron dealership and other miscellaneous retail functions such as propane, tire repair, etc.

1972 - 1974 Administrative Assistant to Governor Egan

The primary duties of that position were:

1. Responsibility for the organization, managerial, and fiscal responsibilities of the office.

2. With the executive assistant, coordinate the short-range and long-range program development with the various department heads.

3. Serve on the Governor's Budget Review Committee, and coordinate the development and completion of departmental budgets.

4. Review and supervise all bidding and contractual arrangements for the Governor's Office and for other departments when necessary.

EXPERIENCE AND EDUCATION (Continued)

1971 - 1972 — Alaska Administrative Code Coordinator
Carried out the complete revision of the A.A.C. This had been mandated by legislation, and assumed by then Lieutenant Governor H.A. "Red" Boucher. Acted as liaison with all state departments and the Department of Law in the publication, review and submission of materials for publication in the Alaska Administrative Code. Also had responsibilities for speech writing, personnel management and the Division of Elections.

1971 — Academic Counselor, Deputy Director of Career Planning and Placement, University of Alaska, Fairbanks.
Responsible for academic and personal counseling; worked with potential employers to arrange job interviews. Also had some staff supervisory responsibilities.

1967 - 1971 — Undergraduate - University of Alaska, Fairbanks
B.A. degree in political science, cum laude with a minor in economics and a minor in history. Have done some graduate studies in political science.

1964 - 1967 — Department of Highways (DOT/PH)
Worked in Fairbanks and Valdez in maintenance operations.

ED ANDERS

OVERVIEW

The areas where I believe my background can best be applied are:

1. Governor's Office - policy and program management; legislative experience.

2. Education - University of Alaska and rural Alaska education programs. (Have been a board member of University of Alaska Alumni Association for approximately six years.)

3. Administration - personnel management experience.

4. Community and Regional Affairs - good working relationship with and appreciation for rural Alaska.

5. Transportation and Public Facilities - good working knowledge of personnel and programs - Fairbanks office.

RESUME: John E. Benson, Real Estate Broker
P. O. Box 7076 Ketchikan, Alaska

I was born in Roseau, Minnesota on March 21, 1913. I attended grade and high school in Roseau. I attended the University of Minnesota taking courses in Civil Engineering and worked toward a minor in Business Administration.

My father was in the real estate business working with the Great Northern Railroad locating a land grant railroad in Northern Minnesota and locating immigrant farmers on land in that area. This was my early exposure to engineering and real estate and influenced my future endeavors.

On completing school I entered the field of Construction and Civil Engineering mainly in the field of Bridge and Highway construction. In 1941 I joined Morrison-Knudsen Company, Inc as their Chief Cost Engineer on their wartime projects in South America, Puerto Rico and finally in Travis Air Force Base in California leaving them in 1949.

For the next two years I was in Construction Engineering in Northern Minnesota for the County and State Highway Departments.

In 1951 I accepted an assignment to Alaska from the Alaska Public Works Department (Federal) and was located in Ketchikan, Alaska. I was the Construction Engineer on the street widening, bridges, sewer, water, health centers, schools and related facilities.

With Statehood in 1959 I accepted an offer from the State of Alaska as their Construction Engineer in Juneau. I supervised their statewide public facilities construction travelling extensively and advancing to the top position as Director of the Division of Buildings.

In 1964 I passed the Real Estate Examination and became a licensed Broker with license number 0064. I practiced Real Estate part time in Juneau with the firm of Capital Realty.

In 1976 I returned to my home in Ketchikan and opened a Real Estate Office as Broker and Owner. This practice has been very successful. I have supervised a staff of four Associate Brokers and two salesmen. I have also tutored several people who are now licensed to practice real estate.

I would appreciate being confirmed as a member of the State Real Estate Commission as I feel that my experience is very valuable to this commission.

John E. Benson

RESUME

Gil Serrano

Professional Resume

I. Education

1977 - Sonoma State University, Department of Nursing, B.S.N.
Public Health Nursing - Certificate
Family Nurse Practitioner - Certificate

1973 - Ventura Junior College, Department of Nursing, A.S.

II. Work Experience

1982 - Consultant, UAA - School of Nursing

Over a six-week period, I served as a co-investigator in research on a sexually transmitted infection.

1978 to Present - Family Nurse Practitioner, Municipality Family Planning Clinic.

My duties include physical exam, diagnosis and management of common gynecologic complaints, and prescribing birth control methods. For two years I have been acting as a preceptor for WAMI medical and UAA nursing students on rotation through the family planning clinic. Other activities include: starting a sickle-cell screening program for the clinic, writing and instituting an adult health screening program, writing and updating nursing protocols, and representing the clinic at the Board of Nursing meetings.

1980 - Executive Director, Alaska Nurses Association Continuing Education, Approval and Recognition Program

As staff support for the continuing education committee, I processed educational programs and classes for approval, supervised and updated office organization, and coordinated fundraising activities.

1974 to 1978 - Director of Inservice
Director of Employee Health
Staff Nurse - ICU
Warrack Medical Center, Santa Rosa, CA.

Following graduation, I assumed responsibility for continuing education for the nursing staff. I designed and implemented an in-patient, out-patient diabetic teaching program which was the first of its kind in the area. With the administration's backing, I began an employee health program which included counseling and yearly screening physical exams.

1977 - Family Nurse Practitioner, Common Health Club

On a contractural basis I provided screening physicals and health education for members.

1973 to 1974 - Staff Nurse
Intensive Care Unit
University of California Medical Centers
UCLA - UCSF

1971 to 1973 - Nurses' Aide, Ventura County Hospital, Ventura, CA.

1969 to 1970 - Nurses' Aide, Oxnard Convalescent Home, CA.

III. Other Professional Training and Experiences

1978 to 1982 - Certificate of Achievement - Alaska CEARP. This requires 60 or more hours of continuing education every two years.

1982 - Rural Nursing - I assisted a local nurse practitioner on her yearly visit to an Eskimo village, providing women's health care.

1980 - Authorization to practice as an Advanced Nurse Practitioner through the Alaska Division of Occupational Licensing.

1979 - Certification by examination as a Family Nurse Practitioner through the American Nurses Association.

1977 - Certification as a continuing education instructor by the California Board of Registered Nurses.

1974 - Coronary Care Certification

IV. Professional Involvement

1982 to Present - Advisory Committee for the nurse practitioner component of UAA School of Nursing Master's Program.

1978 to Present - California Coalition of Nurse Practitioners.

1978 to Present - "PEER" Group - statewide association of nurse practitioners in Alaska.

1976 to Present - American Nurses Association:
A. Council of Primary Health Care Nurse Practitioners

1978 to Present - Alaska Nurses Association:
A. State Convention Committee - 1982-3
B. District Nominations Committee - 1982-3
C. District Program Committee - 1981-82
D. State Continuing Education Committee - 1978-1980

V. Community Involvement

1978 to 1982 - Member KAKM, public TV.

1982 - Member KSKA, public radio.

1982 - Member, Unitarian Universalist Fellowship.

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying: Board of Dental Examiners

Please list any other Board or Commission on which you serve:

Name	Previous Name applied under
Paul Stuart Buxton	NA
Mailing Address	**Residence Address**
Bx 1376	Tischer Ave.
City, State and Zip Code	
Soldotna, Ak. 99669	
Home Telephone	**Business or Message Telephone**
907-262-4685	907-262-5454

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election:

Are you a registered voter? ☑ YES ☐ NO

Voter Registration Number (Optional)

Social Security Number (Optional) 515 44 8136

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☑ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☑ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating? No

CONFLICTS OF INTEREST: Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☑ YES ☐ NO

Could you or any member of your family be affected financially be decisions to be made by the Board or Commission for which you have applied?
☐ YES ☑ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-012(2/81)

TRAINING & EXPERIENCE: (If résumé attached, it is not necessary to complete items A-D)

A. List any professional licenses, certifications, or registrations and dates obtained that may be used as qualifying criteria:

Licensed in the State of Washington

Licensed in the State of Alaska

B. List both formal and informal education and training experiences: (Use additional paper if necessary)

Dental Continuing Education in the Areas of:
- Periodontal Diagnosis & Treatment
- Dental Materials
- Restorative Dentistry
- TMJ & Equilibration treatment

HOUSE LABOR AND COMMERCE COMMITTEE

April 16, 1934

To: Rep. Joe Hayes, Speaker of the House
From: Rep. John Cowdery, Chairman
RE: Confirmation of Appointments to Boards and Commisssions

Pursuant to your request, the House Labor and Commerce Committee has held public hearings on the confirmation of appointments to State Boards and Commissions made by Governor Sheffield. Appointments to eleven boards and commissions were referred to this committee for confirmation. It is the recommendation of the House Labor and Commerce Committee that the following appointments be confirmed:

Architects, Engineers, and Land Surveyors
- Malcom Menzies
- Sandra Sampson

Barbers and Hairdressers
- Letha Ashcraft
- Carolyn Janzen
- Roger Slaven

Dental Examiners
- Paul Buxton
- Jerry Zemlicka

Nursing
- Lynn Hartz
- Alice Solomon

Pharmacy
- Joy Donelson
- Christy Nielson
- William Larson

Public Accountancy
- Marianne Burke
- Michael Cook
- Ida Mc Mahon
- Edward Mecham

Medical
- Delores Hughes

Veterinary Examiners
Stephen Mersch
Pamela Tuomi

Worker's Compensation
Delia Pruhs
David Richards
Jack Thompson
Joe Thomas, II

Real Estate Commission
Ed Anders
LaVerne Collins
Barbara Hill
Gilbert Serrano
John Benson

Sam Pestinger
Rick Kelly
Walter Tomack
Ron Landeros
Tito Kopperud
John Painter
John J. Cannelenes
John J. Cannelenes
Chairman

Architects, Engineers, and Land Surveyors
Malcolm Menzies
Sandra Sampson

Barbers and Hairdressers
Letha Ashcraft
Carolyn Janzen
Roger Slaven

Dental Examiners
Paul Buxton
Jerry Zemlicka

Nursing
Lynn Hartz
Alice Solomon

Pharmacy
Joy Donelson
Christy Nielson
William Larson

Public Accountancy
Marianne Burke
Michael Cook
Ida McMahon

Pamela Tuomi

Worker's Compensation
Delia Pruhs
David Richards
Jack Thompson
Joe Thomas II

Real Estate Commission
Ed Anders
LaVerne Collins
Barbara Hill
Gilbert Serrano
John Benson

and recommends confirmation. The report was signed by Cowdery (Chairman) and concurred in by Pestinger, Uehling, Furnace, Wendte, Koponen and Ringstad.

The Transportation Committee has reviewed the qualifications of the following individuals who have been appointed by the Governor to serve on the Board of Marine Pilots:

James A. Hodgman
Judith M. Brady

and recommends confirmation. The report was signed by Cato (Chairman) and concurred in by Abood, Herrmann, Flood, M. W. Miller and Szymanski.

CSSB 382(Fin)(title am)

The Finance Committee has had COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 382 (Finance) (title amended) (relating to the payment of costs of post mortem examinations, autopsies, embalming, and related services; effective date) under consideration, recommends it be replaced with HOUSE COMMITTEE SUBSTITUTE FOR COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 382 (Finance) (same title) and reports it back as follows: Adams (Chairman), Martin, Furnace, Grussendorf, Duncan and Fritz recommend do pass. A new fiscal note was attached.

CSSB 382(Fin)(title am) was referred to the Rules Committee for placement on the calendar.

The fiscal note appears in House Journal Supplement No. 121.

CSSB 456(L&C)

The Labor & Commerce Committee has had COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 456 (Labor & Commerce) (relating to embalmer and funeral director trainees) under consideration, recommends it be replaced with HOUSE COMMITTEE SUBSTITUTE FOR COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 456 (Labor & Commerce) (same title) and reports it back as follows: Cowdery (Chairman), Uehling, Furnace, Ringstad and Koponen recommend do pass.

CSSB 456(L&C) was referred to the Rules Committee for placement on the calendar.

HJR 14

The Judiciary Committee has had HOUSE JOINT RESOLUTION NO. 14 (proposing amendments to the Constitution of the State of Alaska providing for ratification of appropriations by the qualified voters of the state) under consideration, and reports it back as follows: Bussell (Chairman), Liska, Barnes and Hayes recommend do pass; Wendte, Clocksin and Malone recommend do not pass.

HJR 14 was referred to the Finance Committee.

HB 279

The Finance Committee has had HOUSE BILL NO. 279 (authorizing participation by magistrates in the judicial retirement system; effective date) under consideration,

APRIL 16, 1984

FROM: KEN

RE: CONFIRMATION HEARINGS

OVER THE PAST YEAR GOVERNOR SHEFFIELD HAS MADE A CONCERTED EFFORT TO FILL VACANCIES ON STATE BOARDS AND COMMISSIONS. A LARGE NUMBER OF APPOINTMENTS HAVE BEEN MADE. AS IS OFTEN THE CASE, MOST OF THOSE APPOINTMENTS ARE BEFORE THE HOUSE LABOR AND COMMERCE COMMITTEE FOR CONFIRMATION. THE CONFIRMATION OF 29 APPOINTMENTS MUST BE ADDRESSED BY THIS COMMITTEE.

LAST WEEK THE RESUMES OF EACH OF THE PEOPLE APPOINTED TO A BOARD OR COMMISSION BY THE GOVERNOR WAS PLACED IN A PACKET AND DELIVERED TO EACH MEMBER OF THE COMMITTEE. I HOPE EVERYONE HAS HAD A CHANCE TO REVIEW THESE RESUMES AND ARE READY TO PROCEED WITH THE CONFIRMATION PROCESS.

Date: April 12, 1984

To: Rep. John Cowdery, Chair
House Labor & Commerce Committee

From: Rep. Rick Uehling, Vice-Chair
House Labor & Commerce Committee

Subject: Confirmations

Because I am unable to attend the Confirmation Hearings of the Governor's appointments to the Boards and Commissions before the House Labor & Commerce Committee, I would like to express my full support of the following appointments:

Joy Donelson to the Board of Pharmacy
Jack Thompson to the Worker's Compensation Board

I have known both Joy Donelson and Jack Thompson for some time and believe that the Governor made excellent choices in their appointments.

APRIL 9, 1984

TO: JOHN

FROM: KEN

RE: BARBERS AND HAIRDRESSERS

THE HOUSE LABOR AND COMMERCE COMMITTEE HAS CONDUCTED THREE WORK SESSIONS AND HELD ONE PUBLIC HEARING ON LEGISLATION RELATING TO THE BOARD OF BARBERS AND HAIRDRESSERS. THIS ISSUE HAS PROBABLY CONSUMED MORE OF THE COMMITTEE'S TIME THIS SESSION THAN ANY OTHER SINGLE ISSUE. STILL, THE PROBLEMS OF THE BOARD AND THE INDUSTRY THAT NEED TO BE ADDRESSED IN LEGISLATION HAVE NOT BEEN RESOLVED. THE SENATE LABOR AND COMMERCE COMMITTEE HAS SUGGESTED THE BOARD BE GRANTED A ONE YEAR EXTENTION AND THAT A COMMITTEE BE APPOINTED TO WORK WITH THE BOARD AND MEMBERS OF THE INDUSTRY DURING THE COMING INTERIM. THE GOAL OF THIS COMMITTEE WOULD BE TO DRAFT COMPREHENSIVE LEGISLATION WHICH MEETS THE REQUIREMENTS AND NEEDS OF THE BOARD, THE PROFESSIONALS OF THE INDUSTRY, AND THE PUBLIC. IN AN EFFORT TO CLOSE COMMITTEE BUSINESS AS SCHEDULED I WOULD ASK THE COMMITTEE MEMBERS TO CONSIDER THIS APPROACH.

Willingness to Serve

Dear Governor:

It is my understanding that the Board of Examiners for Architects, Engineers, and Land Surveyors has a vacancy. I would like to express, at this time, my desire to serve on said board.

A brief summary of qualifications is as follows;

- Registered Land Surveyor - Alaska (1410S), 1965
- Registered Civil Engineer - Alaska (1855E), 1969
- Registered Civil Engineer - Washington (22222), 1970 (Reciprocity)
- U.S. Mineral Surveyor, 1982

The writer is one of the founders and a principal member of the firm R & M Consultants, Inc. This firm has offices in Juneau, Anchorage, and Fairbanks, Alaska, and has expanded to Salt Lake City, Utah, and Irvine, California. The firm was founded in Alaska in 1969. The writer is a vice president of said firm and manages the Juneau office. Prior to forming R & M, the writer was employed by the Alaska Department of Highways for a period of six years as Southeast Alaska area resident engineer, construction project engineer, and district location engineer. In addition, two years were spent with the U.S. Army, Corps of Engineers, and seasonal work in Alaska for the U.S. Bureau of Public Roads.

In addition, the writer is a member fo the following societies: American Society of Civil Engineers (and the Alaska Section), the National and

Alaska Societies of Professional Engineers (past state secretary and treasurer), the Alaska Society of Professional Land Surveyors (past vice chairman, secretary, and treasurer), the American Congress of Surveying and Mapping, the Alaska Section of the American Congress of Surveying and Mapping (past chairman, vice chairman, secretary, and board of directors), the American Society of Photogrammetrists, as well as the Canadian Institute of Surveying.

The writer has served for a period in excess of seven years as a member and presently chairman of the City and Borough of Juneau's Planning and Zoning Commission, Platting Board, and Board of Adjustment.

A personal history is as follows;

- A graduate of the school of specia advanced studies for surveying in the U.S. Army, Corps of Engineers, Fort Bolvoir, Virginia.
- A graduate of Chicago Technical College with a Bachelor of Science degree in Civil Engineering - 1963 (cum laude).
- A part-time Alaska resident working seasonal in Alaska from 1960 to 1963, and a full-time resident of Alaska since 1963 having resided for 15 of those years in Juneau, and the remaining time being spent in Petersburg, Ketchikan, and Fairbanks.
- The writer is married and has three children; the oldest (Scot) is attending the University of Alaska--Fairbanks as a civil engineering major on a partial academic scholarship. The second oldest (RobRoy) is a student in Juneau-Douglas High School, while the youngest (Kolly) is attending first grade.

I desire to serve both the State of Alaska and my chosen profession by being a member of the Board of Examiners for Architects, Engineers, and Land Surveyors. Should there be questions with regard to my professional or personal history, please do not hesitate to contact me at your convenience.

Sincerely,

R & M CONSULTANTS, INC.

Malcolm A. Menzies

TO WHOM IT MAY CONCERN:

RESUME: John E. Benson, Real Estate Broker
P. O. Box 7076 Ketchikan, Alaska

I was born in Roseau, Minnesota on March 21, 1913. I attended grade and high school in Roseau. I attended the University of Minnesota taking courses in Civil Engineering and worked toward a minor in Business Administration.

My father was in the real estate business working with the Great Northern Railroad locating a land grant railroad in Northern Minnesota and locating immigrant farmers on land in that area. This was my early exposure to engineering and real estate and influenced my future endeavors.

On completing school I entered the field of Construction and Civil Engineering mainly in the field of Bridge and Highway construction. In 1941 I joined Morrison-Knudsen Company, Inc as their Chief Cost Engineer on their wartime projects in South America, Puerto Rico and finally in Travis Air Force Base in California leaving them in 1949.

For the next two years I was in Construction Engineering in Northern Minnesota for the County and State Highway Departments.

In 1951 I accepted an assignment to Alaska from the Alaska Public Works Department (Federal) and was located in Ketchikan, Alaska. I was the Construction Engineer on the street widening, bridges, sewer, water, health centers, schools and related facilities.

With Statehood in 1959 I accepted an offer from the State of Alaska as their Construction Engineer in Juneau. I supervised their statewide public facilities construction travelling extensively and advancing to the top position as Director of the Division of Buildings.

In 1964 I passed the Real Estate Examination and became a licensed Broker with license number 0064. I practiced Real Estate part time in Juneau with the firm of Capital Realty.

In 1976 I returned to my home in Ketchikan and opened a Real Estate Office as Broker and Owner. This practice has been very successful. I have supervised a staff of four Associate Brokers and two salesmen. I have also tutored several people who are now licensed to practice real estate.

I would appreciate being confirmed as a member of the State Real Estate Commission as I feel that my experience is very valuable to this commission.

John E. Benson

Real Estate Commission

Health: Excellent

EXPERIENCE AND EDUCATION

1975 - Present — Business Development

After leaving the Governor's Office late in 1974, my family and I returned to our home in Fairbanks, and became involved in small business development which included:

1. Chena Valley Development - a small earth-moving and construction company which my wife and I purchased in the spring of 1975.

2. Anders Transportation, Inc. - a small school bus contracting company started by my parents in 1959. In 1975, I purchased the company following my father's death, and have worked to expand its operations.

3. Valley Center - a retail business located at mile 23, Chena Hot Springs Road. Includes retail grocery, liquor and full-service garage. It holds the Chevron dealership and other miscellaneous retail functions such as propane, tire repair, etc.

1972 - 1974 — Administrative Assistant to Governor Egan

The primary duties of that position were:

1. Responsibility for the organization, managerial, and fiscal responsibilities of the office.

2. With the executive assistant, coordinate the short-range and long-range program development with the various department heads.

3. Serve on the Governor's Budget Review Committee, and coordinate the development and completion of departmental budgets.

4. Review and supervise all bidding and contractual arrangements for the Governor's Office and for other departments when necessary.

EXPERIENCE AND EDUCATION (Continued)

1971 - 1972 — Alaska Administrative Code Coordinator
Carried out the complete revision of the A.A.C. This had been mandated by legislation, and assumed by then Lieutenant Governor H.A. "Red" Boucher. Acted as liaison with all state departments and the Department of Law in the publication, review and submission of materials for publication in the Alaska Administrative Code. Also had responsibilities for speech writing, personnel management and the Division of Elections.

1971 — Academic Counselor, Deputy Director of Career Planning and Placement, University of Alaska, Fairbanks.
Responsible for academic and personal counseling; worked with potential employers to arrange job interviews. Also had some staff supervisory responsibilities.

1967 - 1971 — Undergraduate - University of Alaska, Fairbanks
B.A. degree in political science, cum laude with a minor in economics and a minor in history. Have done some graduate studies in political science.

1964 - 1967 — Department of Highways (DOT/PH)
Worked in Fairbanks and Valdez in maintenance operations.

ED ANDERS

OVERVIEW

The areas where I believe my background can best be applied are:

1. Governor's Office - policy and program management; legislative experience.

2. Education - University of Alaska and rural Alaska education programs. (Have been a board member of University of Alaska Alumni Association for approximately six years.)

3. Administration - personnel management experience.

4. Community and Regional Affairs - good working relationship with and appreciation for rural Alaska.

5. Transportation and Public Facilities - good working knowledge of personnel and programs - Fairbanks office.

February 14, 1983

State of Alaska
Department of Commerce and
Economic Development
Attention: Mr. Richard A. Lyon
Commissioner
Pouch D
Juneau, Alaska 99811

Dear Mr. Lyon:

I desire appointment as a Public Member to the State of Alaska, Real Estate Commission. I have eleven years of real estate experience both for the Federal Government and that gained from personal investments. My real estate experience includes the appraisal and acquisition of sites for navigational and communication aviation facilities throughout the State of Alaska. I have also learned much about commercial real estate matters while acquiring and managing a variety of real estate for myself, i.e. four-plex, mobile home, condos, single family residences.

I believe these and other experiences and the training listed on the addendum to my resume uniquely qualifies me to serve on the Real Estate Commission. I appreciate the opportunity to use my real estate experience in service to my State.

Respectively submitted,

LaVerne F. Collins

RESUME FOR ROGER D. SLAVEN
February 4, 1984

Date & Place of Birth:	Janaury 16, 1955 Eugene, Oregon
Social Security Number:	557-11-2144
Business Address & Phone:	310 Front Street Ketchikan, Alaska 99901 (907) 225-3022
Resident of Alaska:	8 Years

I attended the Modern School of Hairstyling and Barbering in Seattle, Washington from June 1979 through March 1980, completing all the requirements for Washington and Alaska. I took the Alaska Board Exam in Anchorage in April of 1980. I was owner/operator of the Windward Barber Shop in Petersburg from May 1980 through June 1981. He moved to Ketchikan and worked for Elmo's Hair Design from June 1981 through July 1981. Then I opened the Stedman Barber and Styling where I am presently the owner and operator. This gives me a total of four years of barbering in Alaska.

Previous to barbering I was a commercial fisherman for 2 years and worked for the U.S. Forest Service for 4 years.

ROGER D. SLAVEN

PERSONAL DATA

LETHA BRAY ASHCRAFT
3609 Richmond Avenue
Anchorage, AK 99504
907-277-9219

LETHA BRAY ASHCRAFT was raised in Anchorage and was educated in the Anchorage School System. She has been an Alaskan resident since 1946. Her initial cosmetology training was taken at MAXINE'S BEAUTY COLLEGE, 1010 Fireweed Lane, Anchorage, Alaska. She then took advance training at BEETCH'S BEAUTY COLLEGE in Enid, Oklahoma. Letha worked as a cosmetologist for several years while continuing her advanced training to become a licensed cosmetology instructor.

She has served as an instructor for several beauty colleges. She feels that membership in professional organizations is an important part of any cosmetologist's career. She has been a member of Anchorage Affiliate #293 and a member of the Alaska State Hairdresser & Cosmetologists Association since 1963. During that time she has served in many capacities, among these are: Alaska State Styles Director and Chairman of the Alaska State Hair Fashion Committee. As a member of the National Hairdressers and Cosmetologists Association, she has attended many national conventions and shows both as a participant, delegate and as a convention instructor. In 1975, she became Alaska's first representative on the Official Hair Fashion Committee. She is extremely interested in helping Alaskans keep up-to-date with the latest trends in hair styling. Membership on the OHFC of America is based on a comprehensive three-day competitive examination. The committee is not only honorary, but serves as the educational body to relay the current trends to each state. Membership on the committee also makes the individual member eligible to serve as a guest artist for any state hairdresser & cosmetologists convention.

Letha was the owner of the Nordstrom Beauty Salon from 1975 til 1982. She is married and has two children.

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying:
Workmen's Compensation Board

Please list any other Board or Commission on which you serve:
None

Name	Previous Name applied under
DELIA I. PRUHS	n/a
Mailing Address	**Residence Address**
P.O. Box 1735	2915 Westgate Place
City, State and Zip Code	
FAIRBANKS, ALASKA 99707	
Home Telephone	**Business or Message Telephone**
(907) 456-4743	(907) 456-2945

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election:

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional)

Social Security Number (Optional) 033-20-9972

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☒ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating? Any that would be beyond my control.

CONFLICTS OF INTEREST: Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☒ YES ☐ NO

Could you or any member of your family be affected financially by decisions to be made by the Board or Commission for which you have applied?
☐ YES ☒ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-01212/811

SUMMARY OF QUALIFICATIONS

Three (3) years Board of Directors of the Alaska Conference of Employers (ACE). This is a non-profit corporation structured solely to study Workman's Compensation problems and/or laws in Alaska.

Three (3) years Vice-President of the Workers Compensation Committee of Alaska (WCCA). This is a political action committee (PAC) to effect changes in the Workers Compensation laws and/or system:

An original and continuing member of the ad-hoc Labor/Management committee formed by member companies of the WCCA and a number of labor union leaders to work together to effect needed changes in the Workers Compensation system. HB 311 signed by Govenor Sheffield on 7-15-83 was the product of this committee.

Knowledgeable in labor/management relation and have been a member of many boards of arbitration and greivances at the request of several Alaskan employers.

My past three and one/half years of intense involvement in the Workers Compensation system and my past six years as General Manager of Air Van Lines, Inc., which had serious Workers Compensaion loss problems, has given me a broad overview of the system. My involvement with Teamster Local 959 as an employer has given me an area of expertise vis-a-vis worker safety, safety programs and labor/management objectives in a Workers Compensation system.

EDUCATION

1948-1950	Graduated	Gonzaga High School-Spokane, Washington
1954	Attended	University of California at Santa Barbara, California

Professional Resume

I. Education

1977 - Sonoma State University, Department of Nursing, B.S.N.
Public Health Nursing - Certificate
Family Nurse Practitioner - Certificate

1973 - Ventura Junior College, Department of Nursing, A.S.

II. Work Experience

1982 - Consultant, UAA - School of Nursing

Over a six-week period, I served as a co-investigator in research on a sexually transmitted infection.

1978 to Present - Family Nurse Practitioner, Municipality Family Planning Clinic.

My duties include physical exam, diagnosis and management of common gynecologic complaints, and prescribing birth control methods. For two years I have been acting as a preceptor for WAMI medical and UAA nursing students on rotation through the family planning clinic. Other activities include: starting a sickle-cell screening program for the clinic, writing and instituting an adult health screening program, writing and updating nursing protocols, and representing the clinic at the Board of Nursing meetings.

1980 - Executive Director, Alaska Nurses Association Continuing Education, Approval and Recognition Program

As staff support for the continuing education committee, I processed educational programs and classes for approval, supervised and updated office organization, and coordinated fundraising activities.

1974 to 1978 - Director of Inservice
Director of Employee Health
Staff Nurse - ICU
Warrack Medical Center, Santa Rosa, CA.

Following graduation, I assumed responsibility for continuing education for the nursing staff. I designed and implemented an in-patient, out-patient diabetic teaching program which was the first of its kind in the area. With the administration's backing, I began an employee health program which included counseling and yearly screening physical exams.

1977 - Family Nurse Practitioner, Common Health Club

On a contractural basis I provided screening physicals and health education for members.

1973 to 1974 - Staff Nurse
Intensive Care Unit
University of California Medical Centers
UCLA - UCSF

1971 to 1973 - Nurses' Aide, Ventura County Hospital, Vencura, CA.

1969 to 1970 - Nurses' Aide, Oxnard Convalescent Home, CA.

III. Other Professional Training and Experiences

1978 to 1982 - Certificate of Achievement - Alaska CEARP. This requires 60 or more hours of continuing education every two years.

1982 - Rural Nursing - I assisted a local nurse practitioner on her yearly visit to an Eskimo village, providing women's health care.

1980 - Authorization to practice as an Advanced Nurse Practitioner through the Alaska Division of Occupational Licensing.

1979 - Certification by examination as a Family Nurse Practitioner through the American Nurses Association.

1977 - Certification as a continuing education instructor by the California Board of Registered Nurses.

1974 - Coronary Care Certification

IV. Professional Involvement

1982 to Present - Advisory Committee for the nurse practitioner component of UAA School of Nursing Master's Program.

1978 to Present - California Coalition of Nurse Practitioners.

1978 to Present - "PEER" Group - statewide association of nurse practitioners in Alaska.

1976 to Present - American Nurses Association:
A. Council of Primary Health Care Nurse Practitioners

1978 to Present - Alaska Nurses Association:
A. State Convention Committee - 1982-3
B. District Nominations Committee - 1982-3
C. District Program Committee - 1981-82
D. State Continuing Education Committee - 1978-1980

V. Community Involvement

1978 to 1982 - Member KAKM, public TV.

1982 - Member KSKA, public radio.

1982 - Member, Unitarian Universalist Fellowship.

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying: Board of Dental Examiners

Please list any other Board or Commission on which you serve:

Name	Previous Name applied under
Paul Stuart Buxton	NA
Mailing Address	**Residence Address**
Bx 1376	Tischer Ave.
City, State and Zip Code	
Soldotna, Ak. 99669	
Home Telephone	**Business or Message Telephone**
907-262-4685	907-262-5454

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election.

Are you a registered voter? ☑ YES ☐ NO

Voter Registration Number (Optional)

Social Security Number (Optional) 515 44 8136

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☑ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☑ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating? No

CONFLICTS OF INTEREST: Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☑ YES ☐ NO

Could you or any member of your family be affected financially by decisions to be made by the Board or Commission for which you have applied? ☐ YES ☑ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-012(2/81)

TRAINING & EXPERIENCE: (If resumé attached, it is not necessary to complete items A-D)

Personal history,

Born in Anchorage, Alaska 1946
College; Univ. of Alaska, Fairbanks
Univ. of Georgia, Athens

MICHAEL T. COOK, CPA

Mr. Cook was born in Fairbanks, Alaska in 1938 and attended Fairbanks elementary and secondary schools. He attended Lehigh University in Bethlemen, Pennsylvania and graduated with honors in accounting. While at Lehigh University, he was president of his social fraternity and was elected as a member and president of Beta Alpha Psi, the accounting honorary, and a member of Beta Gamma Sigma, the business honorary.

In conjunction with receiving his degree from Lehigh University, Mr. Cook was commissioned an officer in the U. S. Air Force. He served as a medical administrator at Paine AFB, Washington and in Pakistan until August, 1965, and attained the rank of captain.

He began his professional career in 1960 with Price Waterhouse & Co. prior to his service in the U. S. Air Force. In September, 1965, he returned to Fairbanks to resume his accounting career with the predecessor firm of Main Hurdman & Cranstoun, and was made a partner in that firm in 1968. He became partner in Main Hurdman & Cranstoun in 1969 and is in charge of the Fairbanks office's audit practice.

He served six years as a member of the Board of Directors of the Alaska Society of Certified Public Accountants, is a past president and has been chairman of the Society's Legislative Committee. He was General Chairman of the 1977 Pacific Northwest Conference of Certified Public Accountants held in Fairbanks. He has been a member of the Council of the American Institute of Certified Public Accountants.

Among other activities, he is a past president of the Greater Fairbanks Chamber of Commerce, the president-elect of the Executive Committee of the Midnight Sun Boy Scout Council, is in the Rotary Club of Faibanks, is a member of the Board of Directors of Alaska Crippled Children & Adults, a past president of the Fairbanks Estate Planning Council, is currently the president of the Midnight Sun Chapter of the Air Force Association and is in the Pioneers of Alaska. He has taught accounting courses for the University of Alaska. He and his wife, Sharon, and their children, Lance, Amy and Sarah, live in Fairbanks, where they are members of Fairbanks Lutheran Church.

PAST AND PRESENT PROFESSIONAL ACTIVITIES:

From July 1976 to July 1978, I was employed at College Village Animal Clinic, Anchorage, Alaska. From July 1978 to July 1980, I was partner and co-director of College Village Animal Clinic. College Village Animal Clinic is an AAHA certified, 3 veterian hospital, with practice limited strictly to small animals. I had full surgical, medical and management responsibilities.

In March 1981, I established Twin Cities Veterinary Clinic, a small animal hospital serving the Kenai-Soldotna, Alaska area. The hospital has full surgical, medical, and dental capabilities.

Carol Derfner
Special Staff Assistant to the
Governor on Boards & Commissions
Office of the Governor
Pouch A
Juneau, AK 99811

Dear Ms. Derfner:

I am interested in applying for the vacancy that recently occurred in the Board of Medical Examiners. My qualifications are as follows:

1. I have practiced medicine in Southeast Alaska for 10 years.

2. I have mainly practiced in Juneau but I did serve as itinerant physician to Skagway for nearly two years.

3. I have worked in a broad variety of practice in the past 10 years. I have been in private practice and have done contract work for Federal, State, and City government as well as for private business.

4. My training is in Family Practice but I have, also, done work in pediatrics, gynecology, geriatrics and in the drug abuse and alcoholism field.

5. I have served on the Board of Directors of Hospice, Juneau and NCA, Juneau.

6. My schedule will permit me to interview physicians on short notice and to attend Board meetings as necessary, as well as testify in front of the legislature if needed.

Thank you for your consideration.

Sincerely,

D Hughes

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

April 15, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the provisions of Titles 24 and 44 of the Alaska Statutes (sunset), the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE
BOARD OF REGISTRATION FOR
ARCHITECTS, ENGINEERS,
AND LAND SURVEYORS

July 1, 1980 - April 15, 1983

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Registration for Architects, Engineers, and Land Surveyors for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Registration for Architects, Engineers, and Land Surveyors should be reestablished. The law now specifies that this Board will terminate on June 30, 1984, and have one year from that date to conclude its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.

2. Interviews with Board members.

3. Tests of files and documents of licensees.

4. Interviews with license examiners.

5. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman's Office.

6. Minutes of Board meetings and Division correspondence files.

7. Attorney General's opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Architects, Engineers, and Land Surveyors is a regulatory board with nine members consisting of two civil engineers, one land surveyor, one mining engineer, two engineers from other branches of the engineering profession, and three architects.

The Board sets the minimum standards to practice in Alaska by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing, amending, or eliminating regulations controlling architect, engineer, and land surveyor practices.

3. Revoking, annulling, or suspending licenses in accordance with the Administrative Procedures Act when a person has violated architect, engineer, and land surveyor statutes or regulations.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committees should take into consideration the findings and recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Board of Registration for Architects, Engineers, and Land Surveyors should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

However, the following findings describe areas where weaknesses or conflicts exist. We have made recommendations which, if implemented, will improve the efficiency and effectiveness of the Board.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

Legislation should be introduced requiring continuing education for architects, engineers, and land surveyors.

Architects, engineers, and land surveyors must demonstrate a high degree of educational and practical competence before they can become registered in Alaska. However, renewal of certificates is not dependent upon evidence of a professional's continued competence.

In our questionnaire to registered professionals, 93% of the architects, 78% of the engineers, and 64% of the land surveyors responding reported that they had attended courses and/or seminars in the last two years. Most were concerned, however, that continuing education requirements would be too narrowly defined or too difficult to satisfy. To address these concerns, there must be active involvement by individuals and professional societies in the development of continuing education standards.

Architects, engineers, and land surveyors are acutely aware of the public's trust that they maintain their professional competency. Required continuing education is one means of fulfilling that trust. In addition, a program of continuing education will assist in avoiding professional obsolescence and keep practitioners aware of changes taking place in the profession.

Recommendation No. 2

The Board should repeal its anticompetitive and restrictive regulations prohibiting competitive bidding (12 AAC 36.230(b)).

We reviewed the Board's regulations to determine if they are anticompetitive and restrictive. Regulation 12 AAC 36.230(b) provides that an architect, engineer, or land surveyor may not knowingly solicit or submit proposals for professional services on the basis of competitive bidding. We find this regulation restrictive, anticompetitive, and absent of clear and statutory policy to restrain competition.

This point of view is supported by memorandum A66-191-79A from the Attorney General's Office dated October 29, 1980. That memo states in part:

> There must exist clear statutory policy to restrain competition before a state regulatory agency may promulgate regulations to restrain competition if federal antitrust immunity is to occur. No direct

authorization for such an anticompetitive provision [12 AAC 36.230(b)] appears in the statutes. In such a situation, federal courts have specifically held such regulations to be violative of antitrust law.

This regulation is now being challenged by the United States' Department of Justice in the Anchorage Federal District Court (U.S. v. AK Board of Registration for Architects, Engineers, and Land Surveyors).

Recommendation No. 3

The Board should approve for examination only those applicants eligible to take the examination.

The Board has approved applicants for the fundamentals of engineering examination when they do not meet the eligibility requirements for the examination. 12 AAC 36.062 requires successful completion of at least 85% of an accredited engineering curriculum, or, if curriculum is unaccredited, a number of years in experience. At a November, 1982, Board meeting and a February, 1983, Board meeting, applicants were approved for examination who were in an unaccredited curriculum and did not have the requisite experience.

While we do not question the quality of the applicants approved for examination, we do believe that if the Board no longer believes that these requirements are necessary, they should propose regulation changes that would ensure that all applicants would be treated in a consistent and fair manner.

Recommendation No. 4

In order to ensure that the Board adequately represents the general public, the qualifications and conditions of Board membership should be reviewed and amended.

AS 08.48.011-.031 creates the State Board of Registration for Architects, Engineers, and Land Surveyors, specifies the qualifications and professions of the nine Board members, and establishes the members' terms of office. In order that the Board better represent the general public, these statutory provisions should be reevaluated. Some specific areas that should be reevaluated are:

A. The Board is the only licensing board that has no lay representation. In general, lay members with no direct financial interest in the regulated professions can and should contribute to policy formulation and enforcement decisions. It should be recognized that the public is the ultimate interest group and we recommend, as we did in the 1979 audit, that at least two lay members be included on the Board.

B. The term of Board members is currently set at 6 years with no limitation on the number of terms that can be served by one individual. This Board is the only licensing board that has a six year term for its members and only two other State licensing boards have an unlimited number of terms that can be served by their members. Such conditions might hamper the flow of new ideas since individuals could serve for an extended period of time. We recommend that a statutory change be considered to limit the number of terms a Board member can serve as well as reducing the years in a Board member's term.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our examination.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board holds at least four regular meetings each year.

B. The Board holds written exams at least twice each year, except for certain national examinations that are held only once a year.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board approved engineer in training (EIT) applicants for the fundamentals of engineering examination when the applicants did not meet the eligibility requirements of 12 AAC 36.062 (see Recommendation No. 5).

III. The extent to which the board, commission, or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board adopted regulations that clarified various vague statutory and regulatory requirements.

IV. The extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. The Board has advertised certain proposed regulations changes in only one city. The Board does not actively solicit comments on its effectiveness.

V. The extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

A. Certain examinations and meetings have not been advertised in an adequate and timely manner.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the Office of the Ombudsman have been processed and resolved.

A. The Attorney General's Office has record of a case filed against the Board by the United States' Department of Justice concerning the Board's regulation banning competitive bidding. (12 AAC 36.230(b)). This case is pending in U.S. District Court (see Recommendation No. 4).

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. We found no instances where the Board had licensed unqualified practitioners.

B. Architects, engineers, and land surveyors are not required to demonstrate their continued competence through a continuing education program (see Recommendation No. 1).

VIII. The extent to which State personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

A. Applications for licensure require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendations.

APPENDIX

(Intentionally left blank)

APPENDIX A

BOARD OF REGISTRATION FOR ARCHITECTS
ENGINEERS, AND LAND SURVEYORS
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ending June 30, 1982
(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$108,052
Less: Expenditures (Note 3)	99,967
Excess Revenues Over Expenditures	$ 8,085

Schedule 1
Type of Revenues (See Note 2)

Revenues	Amount	Collection Time
Application for Examination Fee		
(A) NCARB Examination		
(i) Qualifying Exam	$50	With application
(ii) Section A	$50	With application
(iii) Section B	$75	With application
(B) NCEE Examination	$50/exam	With application
Reexamination Fee	$50/exam	Upon reexam
Comity Application Fee	$50	With application
Corporate Authorization Application Fee	$100	With Application
Individual Registration Fee	$15/year	Renewals paid biennially; new registrants pay $15/year for balance of biennial period.
Corporate Authorization Registration Fee	$50/year	Renewals paid biennially; new registrants pay $50/year for balance of biennial period.
Amendment to Corporate Authorization	$20	With amendment
Delinquent Renewal Fee	$30	With reinstatement
Postponement of Examination Fee	$20	With request for postponement
Late Fee Fine	$10	With late payment
Improper Payment Fine	$10	When payment is found to be improper

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and, accordingly, we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenue in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of collected revenues.

Note 3

Expenditures include those made by Board members, such as travel and per diem and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments, such as the Department of Law, assisting the boards and the Division.

OFFICE OF THE COMMISSIONER

August 11, 1983

Mr. Gerald Wilkerson
Legislative Auditor
Legislative Audit Division
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Thank you for the opportunity to comment on the preliminary findings of your audit of the Board of Registration for Architects, Engineers and Land Surveyors. The following comments address each recommendation individually:

Recommendation No. 1: Legislation should be introduced requiring continuing education for architects, engineers and land surveyors.

The department is in substantial agreement with the intent of this recommendation. However, we feel that the emphasis of legislation should be put on continuing competency rather than on continuing education per se. It is appropriate for the State as a licensing agency to be concerned with continuing competency and with continuing education only to the extent that it is a vehicle for assuring competency and necessary public protection.

By focusing on continuing education exclusively, we are equating education and competency. The effectiveness in continuing education as a vehicle for assuring continuing competency is still open to debate. It would be premature to end that debate through legislation.

Additionally, both administrative costs and increased costs to the consumer must be considered.

Any additional costs that a professional incurs gets passed on to the consumer in the form of higher fees. The costs of services will increase to the extent that professionals are not presently taking continuing education courses. Yet, it is not known whether there will actually be an increase in public protection.

08-r. 'LH

Similarly, continuing education programs can be very expensive to administer and would probably require that an additional staff person be hired. There are presently 4,000 active licensees under the Board of Registration for Architects, Engineers and Land Surveyors. Assuming that the continuing education regulations are straightforward enough to be completely administered by the licensing examiner, this means that at a minimum, the Division of Occupational Licensing will have to manage an additional 4,000 pieces of paper every two years.

In this connection, it should also be borne in mind that approximately 95% of the active files are presently stored in Archives. Continuing competency requirements would most likely generate a need for the files to be kept in the office to be managed properly. There would also be a significant increase in both telephone calls and written correspondence, especially during the phasing in of the new regulations.

If the board review were required as part of the new continuing education requirements, the workload would increase that much more dramatically. Between FY '80 and FY '82, the State has experienced an increase of over 100% in the number of new applications for licensure received. At the present, this board is understaffed.

Since it is not known whether continuing education leads to a greater public benefit through continuing competency, serious consideration should also be given to funding research to determine whether present and proposed regulation in this area is actually effective.

Recommendation No. 2: The board should repeal its anticompetitive and restrictive regulations prohibiting competitive bidding (12 AAC 36.230(b).

The department concurs with this recommendation.

Recommendation No. 3: The board should approve for examination only those applicants eligible to take the examination.

The department concurs with this recommendation.

Recommendation No. 4: In order to ensure that the board adequately represents the general public, the qualifications and conditions of board membership should be reviewed and amended.

The department concurs with the recommendation and specifically with the suggestions contained therein for the addition of at least two public members and limitations on the terms of board members.

Sincerely,

Richard A. Lyon
Commissioner

(1) at all times recognize his primary obligation to protect the safety, health, property, and welfare of the public in the performance of his professional duties; if his professional judgment is overruled under circumstances where the safety, health, and welfare of the public are endangered, he shall inform his employer or client of the possible consequence and notify such other proper authority of the situation as may be appropriate; and

(2) undertake to perform assignments only when he or his associates, consultants, or employees are qualified by education, training, experience, and licensing in the specific technical branches or fields involved;

(3) be completely objective and truthful in all professional reports, statements, or testimony and shall include all relevant and pertinent information in such reports, statements, or testimony when the result of an omission would, or reasonably could, lead to a fallacious conclusion; and

(4) not affix his signature or seal to any plan or document dealing with professional services in which he is not qualified by virtue of education, experience, and licensing; and

(5) issue no statements, criticisms, or arguments on architectural, engineering, or land surveying matters connected with public interests which are inspired or paid for by his interested party or parties unless he has prefaced his comment by explicitly identifying himself by disclosing the identities of the party or parties on whose behalf he is speaking, and by revealing the existence of any pecuniary interest. (Eff. 5/23/74, Reg. 50; am 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)
AS 08.48.111

12 AAC 36.220. CONFLICT OF INTEREST. (a) Each architect, engineer, or land surveyor shall avoid conflicts of interest with his employer or client but, when unavoidable, the architect, engineer, or land surveyor shall promptly inform his employer or client of any business association, interests, or circumstances and identify any circumstances which could influence his judgment or the quality of his service to his employer or client.

(b) An architect, engineer, or land surveyor may not accept compensation, financial or otherwise, from more than one party for services on the same project or for services pertaining to the same project unless the circumstances are fully disclosed to and agreed to by all interested parties or their authorized agents.

(c) An architect, engineer, or land surveyor may not solicit or accept financial or other valuable consideration from suppliers for specifying their products.

(d) An architect, engineer, or land surveyor may not solicit or accept gratuities from other parties dealing with his client or employer in connection with the work for which he is responsible. (Eff. 5/23/74, Reg. 50; am 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)(5)

12 AAC 36.225. PUBLIC SERVICE. When in public service as a member, advisor, or employee of a government body, an architect, engineer, or land surveyor may not participate in considerations or actions with respect to services provided by him or his organization. An architect, engineer, or land surveyor, in his capacity as an elected, retained, or employed public official, may not review or approve work that he has performed, whether it was under his direction or on behalf of another employer or client. (Eff. 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)(5)

12 AAC 36.230. SOLICITATION OF EMPLOYMENT. (a) An architect, engineer or land surveyor may not pay, solicit nor offer, directly or indirectly, any bribe or commission for professional employment with the exception of his payment of the usual commission for securing salaried positions through licensed employment agencies.

(b) Deleted 11/18/83.

(c) An architect, engineer or land surveyor may not falsify or permit misrepresentation of his or her associates' academic or professional qualifications. He may not misrepresent or exaggerate his degree of responsibility in or for the subject matter of prior assignments.

RE: Board of Registration for Architects,
Engineers and Land Surveyors

Representative Cowdry, Chairman
Labor and Commerce Committee
Room 209 Behrends Building
Juneau, Alaska

Dear Representative Cowdry:

Thank you for the opportunity to comment on the Committee bill regarding the continuation of the Board of Registration for Architects, Engineers and Land Surveyors. I understand that your committee proposes to continue the board for another four years, to reduce the length of terms to four years, to leave the composition of the board unchanged, and to delete the requirements in CS SB 438 for registrants providing evidence of "continued competence" for renewal of registration.

As President of the board I concur with these positions and feel that the board will also concur. If I can be of further assistance please contact me or any other board member.

Sincerely,

Wayne Jensen

WJ:mec24(3)

p.o. box 310, juneau, alaska 99802 (907) 586-1070

MARCH 14, 1984

THE BOARD OF ARCHITECTS, ENGINEERS AND LAND SURVEYORS IS COMPRISED OF NINE MEMBERS: TWO CIVIL ENGINEERS, ONE LAND SURVEYOR, ONE MINING ENGINEER, TWO ENGINEERS FROM OTHER BRANCHES OF THE PROFESSION, AND THREE ARCHITECTS. THE BOARD IS RESPONSIBLE FOR SETTING MINIMUM STANDARDS FOR PRACTICE IN ALASKA.

QUESTIONS:

1. HOW DOES BOARD MAINTAIN A BALANCE OF AUTHORITY WITH FIVE ENGINEERS, THREE ARCHITECTS, AND ONE LAND SURVEYOR ?

2. DO YOU SUPPORT THE FINDINGS AND RECOMMENDATIONS MADE BY THE LEGISLATIVE AUDIT DIVISION FOR THE BOARD ?

3. HOW OFTEN DO YOU THINK THIS BOARD SHOULD BE REVIEWED BY THE LEGISLATURE ?

4. WHAT SUGGESTIONS DO YOU HAVE FOR IMPROVEMENT OF THE BOARD ?

5. HAS THE BOARD OF ARCHITECTS, ENGINEERS, AND LAND SURVEYORS FILED AN ANNUAL REPORT TO THE LEGISLATURE IN RECENT MONTHS

to an architect's, engineer's or land surveyor's solicitation of employment may not misrepresent pertinent facts concerning employers, employees, associates, joint ventures, or his or their past accomplishments with the intent and purpose of enhancing his qualifications and his work. (Eff. 5/23/74, Reg. 50)

Authority: AS 08.48.101
AS 08.48.111

Editor's Note: As of Register 83, Jan. 1984, 12 AAC 36.230(b) was deleted by the regulations attorney under AS 44.62.125 (b)(6) and in accordance with a Stipulation and proposed Final Judgment filed on November 10, 1983 by the Board of Architects, Engineers and Land Surveyors and the United States Department of Justice in the United States District Court for the District of Alaska in **United States v. Alaska Board of Registration for Architects, Engineers and Land Surveyors**, Civil Action No. A82-423 CIV. This Stipulation and proposed Judgment were filed because 12 AAC 36.230(b) was in violation of section 1 of the Sherman Antitrust Act [15 U.S.C. § 1 (1977)]. The proposed Final Judgment which may become final on or soon after January 16, 1984 will, also prohibit further enforcement of any ban or board policy against competitive bidding.

12 AAC 36.235. ADVERTISING. An architect, engineer, or land surveyor may not advertise his or her services in a deceptive or untruthful manner. (Eff. 9/30/78, Reg. 67; am 5/30/82, Reg. 82)

Authority: AS 08.48.101(a)(5)

12 AAC 36.240. IMPROPER CONDUCT. (a) An architect, engineer, or land surveyor may not knowingly associate with or permit the use of his name or firm name in a business venture by any person or firm which he knows or has reason to believe is engaging in business or professional practices in a fraudulent or dishonest manner.

(b) If an architect, engineer, or land surveyor has knowledge or reason to believe that another person or firm may be in violation of the provisions of AS 08.48, or any of these rules of professional conduct, he or she shall present that information to the board in writing and shall cooperate with the board in furnishing such further information or assistance as may be required. (Eff. 5/23/74, Reg. 50; am 9/30/78, Reg. 67)

Authority: AS 08.48.101(a)

ARTICLE 3.
GENERAL PROVISIONS

Section
250. Definitions

12 AAC 36.250. DEFINITIONS. For the purposes of this chapter and AS 08.48, unless the context requires otherwise

(1) at all times recognize his primary obligation to protect the safety, health, property, and welfare of the public in the performance of his professional duties; if his professional judgment is overruled under circumstances where the safety, health, and welfare of the public are endangered, he shall inform his employer or client of the possible consequence and notify such other proper authority of the situation as may be appropriate; and

(2) undertake to perform assignments only when he or his associates, consultants, or employees are qualified by education, training, experience, and licensing in the specific technical branches or fields involved;

(3) be completely objective and truthful in all professional reports, statements, or testimony and shall include all relevant and pertinent information in such reports, statements, or testimony when the result of an omission would, or reasonably could, lead to a fallacious conclusion; and

(4) not affix his signature or seal to any plan or document dealing with professional services in which he is not qualified by virtue of education, experience, and licensing; and

(5) issue no statements, criticisms, or arguments on architectural, engineering, or land surveying matters connected with public interests which are inspired or paid for by his interested party or parties unless he has prefaced his comment by explicitly identifying himself by disclosing the identities of the party or parties on whose behalf he is speaking, and by revealing the existence of any pecuniary interest. RE: HB 714 "Relating to Barbers and Hairdressers"

Sectional Analysis

Section 1: Extends the Board of Barbers and Hairdressers until June 30, 1986.

Section 2: Under this section, two additional members would be added to the Board of Barbers and Hairdressers. There are currently five members on the board. That number would be increased to seven. Requirements of practice for those serving on the board also are addressed in this section.

Section 3: In this section the board is given the responsibility of setting educational requirements for applicants seeking a license as a barber or hairdresser.

Under current statutes both the Department of Education and the Board of Barbers and Hairdressers authorize the issuance of licenses for schools of barbering, hairdressing, and cosmetology. Section 3 repeals the boards authority to issue this license.

Section 4: The board is given the power to inspect barbering and hairdressing shops or schools.

Section 5: A new section is added to statute which pertains to the boards powers of inspection.

Section 6: In section 3 the authority of the board to issue a licenses for schools of barbering and hairdressing was repealed. In this section paragraph two pertaining to licenses of schools is repealed.

Section 7: This section states that an applicant for license must meet the educational requirements established by the board.

Section 8: Under this section, the period of apprenticeship for a license to practice hairdressing is set at 1,850 hours.

Section 9: Under this section, the period of apprenticeship for a license to practice cosmetology is set at 2,000 hours.

Section 10: This section states the board may appoint a committee to examine applicants for licensing. It also requires a person examining applicants be licensed to practice in the field for which the examination is being given.

Section 11: This section further details the structure of the committee's that will conduct applicant examinations.

Section 12: The board is given the power to regulate the practice of manicuring and pedicuring.

Section 13: Under current statutes a person licensed in another state or country is entitled to a license to practice in Alaska. This section repeals that privilege from persons of other countries.

Section 14: This section repeals the boards power to adopt regulations to license shops. This function is already being performed by the Department of Commerce and Economic Development.

Section 15: This section establishes that a student permit to practice hairdressing and cosmetology is valid for a period of two years.

Section 16: This section repeals the boards power to set fees for the licensing of schools, school owners, instructors, and shop owners. These licenses and fees are established and collected by branches of the administration.

A PERFORMANCE REPORT
ON THE
BOARD OF BARBERS AND HAIRDRESSERS

July 1, 1980 to April 29, 1983

Audit Control Number
08-1114-53-83-R

Commissioner, Department of Commerce and Economic Development	Richard A. Lyon
Deputy Commissioners, Department of Commerce and Economic Development	Vincent O'Reilly Terry Elder

Members of the Board
of Barbers and Hairdressers

President	Maurice Smith
Member	Wilma Raduege
Member	Irene Roberts-Erickson
Member	Marse Kueber
Member	Vacant

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

April 29, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the provisions of Titles 24 and 44 of the Alaska Statutes (sunset), the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE
BOARD OF BARBERS AND HAIRDRESSERS

July 1, 1980 to April 29, 1983

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Barbers and Hairdressers for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Barbers and Hairdressers should be reestablished. The law now specifies that the Board will terminate June 30, 1984, and have one year from that date to conclude its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.

2. Interviews with the licensing examiners.

3. Tests of files and documents of licensees.

4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Office of the Ombudsman.

5. Discussions with Board members.

6. Minutes of Board meetings and Division correspondence files.

7. Attorney General Opinions applicable to professional boards.

8. Discussions with the United States Food and Drug Administration.

ORGANIZATION AND FUNCTION

The Board of Barbers and Hairdressers was created in 1980. This Board is the result of the Legislature combining the Board of Barbers and the Board of Hairdressing and Beauty Culture Examiners. The membership of the Board consists of two licensed barbers, two licensed hairdressers, and one public member. Each member is appointed by the Governor for a three year term, but can serve no more than two consecutive full terms.

The Board regulates the vocations of barbering, hairdressing, and cosmetology. The Board has been given the authority to examine applicants, issue licenses and permits, suspend or revoke licenses and permits, and investigate complaints. The Board issues the following licenses: beauty or barber schools, school owners, shop owners, instructors, barbers, hairdressers, and cosmetologist practitioners. They also issue temporary and student permits.

The Board is organized under the Department of Commerce and Economic Development, Division of Occupational Licensing (OL). OL provides the Board with licensing and investigative support. The licensing section processes applications, maintains license files, answers inquiries and provides other administrative help to the Board.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committee should take into consideration the Findings and Recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

The primary purpose of a regulatory board with a licensing function is to protect the public. The questions that have to be evaluated to determine if licensing is needed are:

1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well-being?

2. Can the potential users be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services?

3. Do the benefits to the public clearly outweigh any potential harmful effects, such as a decrease in the availability of practitioners, higher costs of services, and restriction on optimum utilization of personnel?

During our review to determine if the Board's licensing function is required and meets the previously mentioned criteria, we examined existing complimentary statutes, complaints, and various Board functions. As a result of our examination we found:

1. The Department of Environmental Conservation (DEC) is required by Alaska Statute 44.46.020 to adopt regulations for a standard of cleanliness and sanitation in connection with the construction, operation, and maintenance of barber shops, hairdressing, or cosmetology establishments. DEC has codified regulations to fulfill their statutory responsibility in 18 AAC 30.700-760. These statutes and regulations provide adequate protection for public sanitation.

2. Postsecondary Education, under the Department of Education, issues Certificates of Registration to postsecondary institutions (of which barber and beauty schools are) that meet minimum standards concerning quality of education, ethical and business practices, health and safety, and fiscal responsibility as required by AS- 14.48.010. These statutes provide protection to those students who wish to attend beauty college or barber school.

3. The Department of Revenue, as required by AS 43.70.020, issues business licenses to individuals engaging in business in this State.

4. Included in OL investigation/complaint files were complaints against Board members for their conduct during the State examination. They included asking improper questions, such as where the student went to school, not adequately examining the work performed by the student, changing final grades, including the grade of a Board member's apprentice, and holding the examination only in Fairbanks and Anchorage (see Recommendation No. 1).

As a result of our examination, we conclude that there is not sufficient reason to support the licensing of schools, school owners, shop owners, and instructors. The licensing of practitioners can be done by the Division of Occupational Licensing by licensing those individuals who have met predetermined educational or experience qualifications.

An alternative to licensing of practitioners would be certification. Certification is a form of State regulation that recognizes individuals who have met predetermined qualifications established by a state agency. Only those who meet the qualifications may legally use the designated title. Non-certified individuals may offer similar services to the public as long as they do not describe themselves as being "certified."

Therefore, we recommend that the Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

The primary purpose of a regulatory board with a licensing function is to protect the public. The questions that have to be evaluated to determine if licensing is needed are:

1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well-being?

2. Can the potential users be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services?

3. Do the benefits to the public clearly outweigh the potential harmful effects, such as a decrease in the availability of practitioners, higher costs of services, and restriction on optimum utilization of personnel?

During our review to determine if the Board's licensing function is required and meets the previously mentioned criteria, we examined existing complimentary statutes, complaints, and various Board functions. As a result of our examination we found:

A. In two instances after the practical examination was given and grades were calculated, Board members and examination proctors reviewed the grades and changed six individuals' failing grades to passing grades (see Recommendation No. 4).

B. For the past two and a half years, State examinations have been held exclusively in Anchorage and Fairbanks. Of the last 12 exams, 9 have been in Anchorage and 3 have been in Fairbanks. This presents an economic hardship to those students who wish to take the examination from other parts of the State, because they must pay travel and living expenses for themselves and their model for up to three days.

C. There have been numerous complaints made to the Division of Occupational Licensing concerning the Board's conduct during the State examination.

D. The Board issues duplicative and unnecessary licenses which only provide another layer of licensing without providing any additional public protection (see Recommendation No. 2).

The licensing of practitioners could be done by the Division of Occupational Licensing by licensing those individuals who have met predetermined education and experience qualifica-

tions. These qualifications could be obtained from either schooling or apprenticeship at the hourly requirement already established in the regulations.

An alternative to the licensing of practitioners would be certification. Certification grants recognition to individuals who have met predetermined qualifications. Only those who have met these qualifications may legally use the designated title, however, noncertified individuals may offer similar services to the public as long as they do not describe themselves as being certified. This would assist the public in identifying competent practitioners.

Because the public can be adequately protected through either licensing or certifying practitioners, we recommend that the Board of Barbers and Hairdressers be allowed to terminate on June 30, 1984.

However, in the event that the Board is reestablished we recommend the following changes be made in their operations.

Recommendation No. 2

The Board should seek legislation that would reduce and restrict its various licensing functions.

The Board, in addition to testing individual practitioners to determine their minimum qualifications for licensure, also issues four other categories of licenses. These other categories are schools, school owners, shop owners, and instructors. Each of these additional categories represent an extra unnecessary layer of licensing, specifically:

A. Schools - AS 08.13.185 establishes the fee and 12 AAC-09.125 establishes the requirements for school licenses and in summary they are:

   1. An initial fee of $700 and biennial renewal fee of $400.

   2. A Certificate of Registration issued by the Department of Education.

   3. The name of the school owner.

   4. The location of the school with an exact description of the floor plan that meets the Board's specifications.

In addition to the license issued by the Board, a school has to obtain a business license issued by the Department of Revenue which also requires the owner's name, school location, and a $25.00 fee. In order to obtain a Certificate of Registration from the Department of Education, the school has to meet the minimum standards set out in AS 14.48.060. Among these are, the school can operate so that "the quality and content of each course or program of instruction, train-

ing or study are such as may reasonably and adequately achieve the stated objective for which the course or program is offered," and, that "the institution has, or has access to adequate space, equipment, instructional materials, and personnel where applicable to achieve the stated objective of the course or program of study." There is an initial $100 fee with additional renewal fees for the Certificate of Registration.

B. School Owner - AS 08.135 establishes the fee and 12-AAC 09.120 establishes the requirements for a school owner's license and in summary they are:

1. An initial fee of $70 with a biennial renewal fee of $60.

2. The names of all parties having financial interest in the school.

3. A copy of the valid bond filed with the Department of Education.

Again, a business license requires the names of the owners, and the bond is already required to be filed with the Department of Education.

C. Shop Owner - AS 08.13.185 establishes the fee and 12 AAC 09.110 establishes the requirements for a shop owner's license and in summary they are:

1. An initial fee of $45 with a biennial renewal fee of $40.

2. The business name, physical location, and addresses of all shops owned.

3. A report of a sanitary health inspection by the Department of Environmental Conservation.

4. The license number of the practitioner employed as a manager of the shop if the owner is not a licensed practitioner.

The Department of Environmental Conservation has independent statutory authority in AS 44.46.020 to adopt regulations for "standard of cleanliness and sanitation in connection with the construction, operation, and maintenance of . . . barbershops, hairdressing or cosmetology establishments." Again, a business license requires the name and location information. The fourth requirement is unnecessary; there is no additional protection gained from having a licensed practitioner as owner or manager when all the employees have to be licensed practitioners.

D. Instructors - The statutory authority for licensing instructors is construed from AS 08.13.185, which

establishes an instructor's license fee of $70 and a $60 biennial renewal fee. Using that as authority, the Board adopted regulations for licensing of instructors. The licensing requirements established in the regulation are summarized as follows:

1. A current practitioner's license.

2. Three years of practice or one year of practice and six-hundred hours of student instructor training.

3. Passing the written and practical portions of the instructor's examination given by the Board.

The licensing of these instructors is not necessary since the third minimum standard required by the Department of Education for their Certificate of Registration in AS 14.48-.060 is that "the education or experience qualifications of directors, administrators, supervisors, and instructors are such as may reasonably insure that the students will receive education consistent with the objectives of the course or program of study."

As we have seen, each of the four categories represent an unnecessary and duplicative licensing function.

The Board tests each individual to determine if they have the minimum qualifications to practice all phases of their profession. Therefore, the additional categories of licensing provide no additional public protection.

Recommendation No. 3

The Board should review existing statutes and regulations and seek appropriate revision where necessary.

During our examination, we reviewed the Board's statutes and regulations to determine if any were obsolete, vague, or unduly restrictive. Examples of what we found are as follows:

A. The Board has promulgated considerable regulations for the licensing of instructors when the only statutory authority to issue instructors' licenses is implied by AS 08.13.185 which defines license fees.

B. AS 08.13.120 authorizes and 12 AAC 09.110(b) provides the criteria for the licensing of shops, however, the Board does not license shops.

C. AS 08.13.120 also requires that either the shop owner be a licensed practitioner, or employ a licensed practitioner as the manager. Since all practitioners in the shop must be licensed, that requirement is not necessary.

AS 08.13.030 provides that the Board shall exercise general control over the vocations of barbering, hairdressing, and cosmetology. This cannot be done effectively without clear and concise statutes and regulations. Therefore, the Board should review their statutes and regulations for obsolescence, vagueness, and restrictiveness, and propose appropriate changes where necessary.

Recommendation No. 4 -

The Board should improve their procedures for the administration of the State examination.

We reviewed the examination function of the Board and noted problems and complaints concerning the Board's administration of the examination, specifically:

A. The State examination is currently given only in Anchorage and Fairbanks. While we recognize that these locations represent the residence of a large majority of students taking the examination, there remains a high economic cost to students from other parts of the State who have to pay travel and living expenses for themselves and their model for the duration of the examination. We suggest that the Board administer the examination periodically statewide with the possible use of examination proctors.

B. After two separate examinations, the Board members and proctors met after the practical examination had been completed. They reviewed the score sheets and in six cases, changed failing grades to passing grades. The Division of Occupational Licensing has notified the Board that grades cannot be changed at a post-examination review session.

C. The Division of Occupational Licensing has received numerous complaints from students concerning Board members' behavior during the practical examination. The complaints included Board members asking students questions such as where they went to school, and not adequately checking the work done by the students. Again, Occupational Licensing sent a letter to the Board addressing these and other problems and offered suggestions for their possible resolution.

According to AS 08.13.030, it is the Board's duty to examine applicants and approve the issuance of licenses and permits to practice. We, therefore, recommend the Board improve their procedures for administering the State examination.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board issues licenses to schools, school owners, shop owners, and instructors that are unnecessary (see Recommendation No. 2).

B. The Board has only held the State examinations in Fairbanks and Anchorage. Of the last 12 examinations, 9 have been in Anchorage and 3 in Fairbanks. This can cause an economic hardship to individuals from other parts of the State who have to travel to take the examination (see Recommendation No. 4).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board is not issuing shop licenses as required by Alaska Statute 08.13.120 (see Recommendation No. 3).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board proposed various statutory changes to definitions of a cosmetician, an instructor, and other statutory areas. None of these changes have been submitted to the Legislature from the Executive Branch.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. Board meetings are announced to the public. Comments on regulation changes are solicited by announcement in public newspapers. The Board does not actively solicit comments on its effectiveness.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board has published notices of its meetings in Anchorage, Fairbanks, and Juneau. However, such notices have not always been published in a consistent and timely manner as required by statute.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board, or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

A. During our review, we found the average case length for complaints and investigations filed with the Office of the Ombudsman to be approximately 1 month; with the Division of Occupational Licensing, approximately 7 months, and; with the Attorney General's Office, Consumer Protection Agency was approximately 1 month.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. In two instances after the practical examination was completed and the final grades were calculated, the Board members and examination proctors reviewed the grades and changed six individuals' grades in various sections of the examination from failing to passing (see Recommendation Nos. 1 and 4).

B. According to the Division of Occupational Licensing's records for the Fiscal Year 1982, there were a total of 464 new licenses issued. Of these new licenses, 181 were issued by credentials.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. Applications for licensure as a practitioner require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the recommendations section of this report.

(Intentionally left blank)

APPENDIX A

BOARD OF BARBERS AND HAIRDRESSERS
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended June 30, 1982

(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$75,697
Less: Expenditures (Note 3)	70,713
Excess of Expenditures Over Revenues	$ 4,984

Revenue Type	Amount	Collection Time
School	$ 700	With license issuance
School Renewal	400	Biennially
School Owner	70	With license issuance
School Owner Renewal	60	Biennially
Instructor	70	With license issuance
Instructor Renewal	60	Biennially
Shop Owner	45	With license issuance
Shop Owner Renewal	40	Biennially
Barber Practitioner	55	With license renewal
Barber Practitioner Renewal	40	Biennially
Hairdresser Practitioner	55	With license issuance
Hairdresser Practitioner Renewal	40	Biennially
Cosmetology Practitioner	45	With license issuance
Cosmetology Practitioner Renewal	30	Biennially
Temporary Permit	30	With permit issuance
Student Permit	20	With permit issuance
Examination	25	With application
Investigation	25	With application
Delinquent Fee for Late Renewal	20	With application

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and accordingly we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of revenues collected.

Note 3

Expenditures include those made by board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments (such as the Department of Law) assisting the boards and the Division.

(Intentionally left blank)

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

OFFICE OF THE COMMISSIONER

August 12, 1983

Mr. Gerald Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Legislative Affairs Agency
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: Preliminary Audit Report
Board of Barbers and Hairdressers

Thank you for the opportunity to comment on the Preliminary Audit Report of the Board of Barbers and Hairdressers. We have reviewed your recommendations and, based on information you supplied and information in our files, at this time we concur that the Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

Opposition to this position will come from licensed professionals. The consuming public has indicated neither support for continuing nor dissolving the board. Complaints have been made that the board was not acting in the best interests of hairdresser students.

RECOMMENDATION #1

The Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

We would concur. However, we will respond to those individual items your report has listed as A, B, C, and D.

Item A. We concur. This problem did occur. The division has attempted to correct this type of action by requiring the Licensing Examiner to place the score sheets in a sealed envelope.

Item B. Your assessment is correct. However, Anchorage and Fairbanks are the only locations where there are schools with sufficient facilities that can accommodate the number of applicants who must be tested.

Item C. This statement is correct. Complaints have been discussed with the board.

Item D. Response follows (see Recommendation #2).

08-H2LH

RECOMMENDATION #2

The board should seek legislation that would reduce and restrict its various licensing functions.

We disagree with the general assumption that the additional categories of licensure represent an unnecessary layer of licensing. Each category evaluates and identifies separate functions. We would agree to eliminate the school owner license, but would strongly support continued licensing of the facility. Students are able to obtain State student loans to attend beauty and/or barbering schools. The school should be responsible for an accurate and legitimate course of training or instructions. We would not be opposed to having all fees paid to one State agency, be it Department of Education or the Department of Commerce and Economic Development.

We support some registration or recording of the shop owner, for public protection. It would be necessary to identify a responsible party for redress of damages in the event of public harm.

Because instructor fees are addressed in statutory language, it is assumed the legislative intent was another level of competency. It also substantiates a licensee just out of beauty school could not begin teaching others. We would support a position of graduation from a licensed school and a specified number of years in practical experience to qualify for an instructor's license.

The additional licensing does offer additional public protection by insuring competent practitioners.

RECOMMENDATION #3

The board should review existing statutes and regulations and seek appropriate revision where necessary.

We would concur with this recommendation in substance. The board has continually worked on regulations. Efforts were made for statutory change.

RECOMMENDATION #4

The board should improve their procedures for the administration of the State examination.

We agree. Responses to the items listed as A, B, and C were provided on previous pages of this response.

Division records will reflect that efforts were made to address these problems and assist the board. They recently began training licensed professionals to serve as proctors. With the division's assistance, extra examinations were conducted to reduce the expense to a number of applicants from the Kenai area.

The division is currently polling the licensed professionals as to the attitude toward the existing State examination process. The survey asks if there is a need for State examinations.

We would encourage schools to assume responsibility of graduating competent, qualified professionals and to set graduation standards to ensure only those meeting professional criteria would receive diplomas or certificates.

Should the survey indicate a desire to eliminate State exams, we would look toward higher requirements in courses and for graduation.

Persons entering the profession by apprenticeship could be required to pass a school examination before licensure.

Again, thank you for the opportunity to respond to your Preliminary Audit Report.

Sincerely,

Richard A. Lyon
Commissioner

RAL/mc5/3
812a

March 1, 1984
P. O. Box 47[illegible]
Juneau, Alaska 99802-473

The Honorable Senator Eliason
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Eliason:

My letter is to address the Board of Barbers and Hairdressers that are up for Sunset Review by your committee on March 6, 1984 at 1:30 p.m.

I would like to address two issues. One, would be to have statute changes regarding AS .08.13.010, AS .08.13.030 and AS .08.13.040 all of which I have highlighted on page 7 of the attached Statute booklet.

Secondly, I would like to address things I feel would greatly improve the function of the Board. Things that are necessary if the public is to remain unharmed or damaged by anything that could go wrong in a shop or school.

These are my suggestions in regard to Statute changes I feel need to be made: When a person applies for application to serve on this Board that he/she must be licensed in the State of Alaska at least 3 years before even being considered for the appointment. That they may not have a conflict of interest such as being instructors in beauty culture schools or school owners. That they may not test anyone who has been or is currently under their instruction whether it be in a school or in an apprentice program. That a public member may not aid in any form of examinations, practical or written. Senator, I strongly feel that if these changes were made that the Board would not only have more experience but that there would be much less problem in getting an effective job done for the people of this State.

Currently, there is a conflict on our existing Board and that relates directly to this section I have just referred to. After studying the above Statute, I then turned to page 31 in the Statute booklet, which I have also highlighted for your information, and found a regulation made by the Board, that sets duties and functions for proctors at a level far exceeding the current Statute rules and regulations set forth by the Legislators for the Board. This is an area where I see that to be a Board member you need nothing but to be licensed as a Barber or a Hairdresser or be a member of the public. Other than that nothing is required and since our Board was combined in 1980, no Statute change has been introduced to even change the wording so that the two professions are combined to form a complete Board. By this I mean that merely combining the Boards into one unit, that does not complete the job. The entire structure of licenses needs to be broken down and changed. If this is not done then you have conflicts at exams when Barbers are grading Hairdressers and vise-versa. All you get is arguments and that is not the professional approach to anything. These need to be combined, above and beyond any other minor problem currently facing the Board. Another reason I believe problems have arisen stem back to lack of rules and regulations regarding selection of Board members. We have had a rather large turn-over in members of the last four years and I feel that this can be changed with higher standards set.

I would like to mention that when a public member is on the Board that they should be exempt from taking part in any examinations. This is totally unprofessional. I feel that they shcould observe the other Board members in this function, but in no way should they be allowed to actually grade a student in their performance. Afterall, they are not licensed in this profession and it stands to reason that this makes no sense at all.

A public member is very important to have on a Board but not for grading purposes. A public member can do so many other things relating to the Board afterall, licensing is important but it is not the main function of the Board. The Board is there to protect the public.

Senator, at this time I need to also suggest that the Board be given authority to perform shop and school inspections. I believe this would require statute change as well. Currently the Department of Enviromental Conservation and Health and Social Services do inspections. However, I have been a shop owner in Juneau since January 1981 and I was inspected before I could open. I was inspected again in January 1983 and again last month. This inspection was a joke. I felt more like the person inspecting was a building inspector instead of a sanitation inspector. They were so busy picking apart the fact that my shampoo sink did not have a back stop regulator and that I did not have the trim work in my shop complete yet that they totally ignored the fact that I have sun tan beds and how do I clean them or where my refuse goes or how I care for my equipment I use on my customers. My inspection was not on sanitation and I felt they had no right four years down the road to pick my sink apart. The Board knows what to look for in inspections and I feel more inspections will be done by them than is currently being done now. This is the most important area to protect the public. As I understand, the Board only has the authority to see that proper licenses are displayed. They can come in and look around for general cleanliness but not thoroughly inspect. They can make recommendations to the proper Departments but because those Departments are understaffed, the inspections of our businesses are low priority. They will even tell you they are too busy.

Areas I feel would improve Board functions are:

1. Combine licensing

2. Create seperate licenses compatable with other States so people moving to Alaska can work here too.

3. Provide Grandfather and Comody licensing for Barbers, who just want to be Barbers and do no chemical work. That is there livihood, why should they have to change.

4. Seperate personal feelings from professional ones. Don't get on the Board to show everyone who you are, but what you can do to help them.

5. Keep the public safe at all times. Keep the public in mind when considering all Board business.

Concerning the Legislative Audit, I see some very legitamite concerns about the Board, however, I know that these areas will be taken care of if some Statute changes are made.

I do want to address the Audits concluding remarks found on page 5 of that audit.

Question 1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well being?

The answer is clearly, yes. Without licensing or regulation of any kind the public will be the ones to suffer. God only knows what kind of confusion and chaos will develcpe from it. I personally went thorough 2000 + hours to receive my license in the State of Alaska. I feel that by combining licenses and creating additional licenses for skin care, nails and electrical work (electrolosis) that the hours for Hairdressing or Barber Styling can be reduced to perhaps 1300-1600 hours. But without any form of licensing I feel that the State would be responsible for any legal action a customer harmed would cause and also by de-regulating licenses at all of how that would cause loss of livihood for those of us currently licensed. Our profession would suffer too. How could we work next to someone who didn't know what they were doing and let them do harm to someone. That would set us up for potential lawsuits as well. Sounds like a can of worms I do not want to be a part of.

Please go over the information I have given you and please vote to retain the Board of Barbers and Hairdressers considering the changes I have outlined for you.

Thank you again for your time and consideration.

Respectfully yours,

Julie Huber-Ward

Rep.

March 1st, 1984

State of Alaska

This letter is regarding the proposed sunset of the Barbers and Hairdressers Board.

As a salon owner and professional hairdresser, licensed and with over 15 years experience, I believe the Barbers and Hairdressers Board should not be allowed to terminate.

Reviewing the legislative audit, I do agree with some important points made by the auditor; especially the recommendations for improvements to said board.

The audit states "Dept of Environmental Conservation provides adequate protection for public sanitation. Postsecondary Education issues Certificates of Registration to barber and beauty schools that meet minimum requirements and provides protection to students, and the Dept of Revenue issues business licenses." Therefore they say there is no need for a board. The legislature saw a need to form a board in 1980, and the audit does not prove that the need is no longer there. We do need professionals from our industry to represent us in the State system.

The board is not a paid position and the above three Depts would surely have to hire additional staff (professional) to perform their duties, in the best interest of the public. You would be abolishing an inexpensive public agency and increasing budget requirements in several others.

The audit mentions certification: who will be qualified to certify the students? We need professionals licensing or certifing students as indicated by the original intent of the board. This cannot be performed by a lay person working for the Division of Occupational Licensing.

Please keep in mind that most professional hairdressers want a state board (based in the tremendous response to the proposed sunset legislation) however said professionals do not necessarily support the members of the board in the past four years, due to their poor performance. There should be better guidelines for qualifing board members. There should also be 7 members not 5 on the board because two seperate and distinct boards were combined (Barbers and Hairdressers). The 7 members to include; 3 barbers, 3 hairdressers all with at least 3 years experince and one voting public member who does not give examinations. The combining of seperate boards four years ago was done with no regard as to combining requirements; how effective could this be? The requirements should be combined to lessen confusion.

As a shop owner I am concerned with the insurance aspect of deregulation. I have a letter from my insurance agent (attached) stating concerns his company would have if present laws were changed. Remember that increased insurance costs would be passed on to the consumer.

I personally would not hire hairdressers who were not properly licensed, certified and properly trained: would I face litigation for not hiring this person? Would this practice be discriminatory?

I do not believe professional hairdressers who have passed the State board exam would work beside someone who had not passed said exam. We would lose the overall professionalism in our salons. Remember the intent is to protect the public; let us keep the standards high as the public demands this.

Thank you for your careful consideration regarding this matter.

Sincerely

D. Cheryl Winton

Juneau, Alaska 99801

Dear Cher:

This letter will act to confirm our numerous talks regarding the possibility of the elimination of the barber/beauty shop licensing requirements.

Our major concern is the liability aspect of the barber/beauty shop policy. As you know, our policies can provide professional liability. The possibility exists of untrained operators or owners creating problems (claimwise) due to lack of training or proper supervision and claims in turn being paid. This would in time have a direct effect on the overall rates.

Our underwriting procedures now require all operators and supervisors to be licensed and we highly recommend the shop owner or manager be a member of the National Hair Dressers Association. We feel that one of the major reasons that the rates are low for this specific profession is because of the training and current license requirements.

We are, once again, concerned mainly with the liability area--especially with the application of hair tints or dyes, hair straightening and permanent hair waving and bleaching. Our underwriting requirements would remain the same on the property insurance aspects.

We would hope the licensing requirements would remain the same for the overall protection of the public.

Sincerely,

Clif Beadle
Agent

SALONS, SCHOOLS AND OPERATORS, THEREBY ENSURING ALL HAVE THE NECESSARY UNDERSTANDING OF THE HUMAN BODY, SKIN AND HAIR STRUCTURES, DISEASES AND DISORDERS, AS WELL AS KNOWLEDGE OF MIXING AND APPLYING CHEMICALS, AND SANITATION, BEFORE PERMISSION TO PRACTICE IS GRANTED. TO REQUIRE LESS, THE STATE OF ALASKA WOULD BE REMISS IN ITS' DUTY TO THE GENERAL PUBLIC.

Dear Sirs:

The reason I am contacting you is to present expert testimony in order to prove to you beyond a doubt that the Board of Hairstylists and Barbers should be kept in Alaska as it is in almost all of the other States of the Union I am currently a licensed hairstylist in Alaska as well as a licensed instructor, a former owner of three beauty salons, and currently an owner of a beauty salon of fifteen hairstylists. I have had the opportunity to manage and teach in a Beauty School, I'm working on my seventh year in this profession. And feel as many other hairstylists and barbers in this field with the years of training and practical work I have dedicated to this profession I can speak as a professional and an expert on my work.

I am not writing this to try and convince you that Boards of Review are necessary this goes without saying. Doctors, Lawyers, Dentists, and C.P.A.'s, all go before Boards of Review by thier peers. Because being judged by an impartial group of your peers to evaluate your competency is the most effective and legally binding way to verify your ability. A student can go through Medical School with an "A" average and yet the President of the school will freely admit that the most effective way of judging this student is to evaluate him by his peers who are actually out in the medical field working in both public and private practice. Because these doctors are saving lives and losing lives by their own hand and are taking direct responsiblility for their professional decisions. This experience gives them keen insight into the practical demands that must be met and maintained in order to give the best possible service to the public. These are the only qualified professionals that can be expected to shoulder this important responsibility of quality control.

The reason I am writing you is to deal with the major question here before us, that is whether Hairstyling and Barbering is worth the effort necessary to maintain a Board of Examiners who are a group of impartial peers? After all, from the average "male" point of view Hairstyling and Barbering consists of coming in every six weeks, getting your hair clipped and leaving, should a Barber or Hairstylist do enough bad cuts free enterprise will eliminate him/her from the market place. It is my intention to elaborate on what this profession is all about.

Hairstyling has and always will be first cousin to the medical profession and until 80 years ago when we stopped pulling teeth, we used to be in the dental profession as well. We are the only occupation other than medicine and dentistry where we are allowed by law to apply caustic chemicals to the human body, chemicals capable of permanently dissabling human life through no other reason than incompetency. Chemicals such as Sodium Hydroxide, 130 Volume Peroxide, Ammonia, and Thioglycolate Acid are available only to Hairstylists and Barbers who have been evaluated and approved by a State Board of impartial peers in the field. These chemicals are not available to the public in the same way harmful drugs are not available to the public unless prescribed by a Physician. Chemicals such as Sodium Hydroxide are capable of eating through the skin in a matter of minutes and causing permanent paralysis. But unless you are a customer who is black or have incredibly curly hair there is no need of you ever needing or using this chemical. Chemicals such as Thioglycolate Acid used in permanent waving can also penetrate the skin causing second and third degree burns, as well as permanent hair loss and be the direct cause to mass infection. However, unless you are a person who wishes to have wavey or curly hair there is no

need to ever hear of this chemical. These statements I am making will be backed up by medical documentation attached to this letter. It is my point to impress upon you the

complexity of the Hairstyling and Barbering Profession. Even as you read this dozens of these chemicals are being used by qualified Barbers and Hairstylists safely and efficiently and will continue doing so as long as these stylists are given adequate

screening and training in the field of chemistry by qualified instructors. Instructors in turn being overviewed by qualified members of a Board of Examiners.

It has been suggested that Beauty Schools not be licensed by the State Board of Examiners, because the Dept. of Post Secondary Education already overlooks Beauty Schools and can maintain quality control. It is not the function of the Dept. of Post Secondary Education for instance to tell a "Dr. John Doe" how to teach his students to do a heart operation. The Post Secondary Eduction knows nothing of heart operations much less the first thing about medicine, they admit they are not qualified to scrutinize professional technique of an instructor or a student. Their job is to protect the students from fraud of incompetent managing of a school. The only people who can legitimately evaluate the instructors competency is a qualified group of peers who are currently working in the field.

At this point let me establish some other facts. Hairstyling and Barbering have State Boards in almost every State in America. Every State recognizes the necessity of keeping this potentially harmful occupation in close review by State Board members. These State Boards are welcomed by Hairstylists and Barbers, this self-imposed evaluation is recognized by the Hairstylists and Barbers as well as the government as a necessity. Furthermore the underwriters of insurance companies for malpractice view hairstyling and barbering as if it were in exactly the same field as dentistry or medicine in view of its potential hazard to health. Attached is a document verifying this point. That it is inconceivable to imagine trying to underwrite a malpractice insurance for Hairstylists and Barbers that are not evaluated by an impartial board of peers. It is their view that a State Board is the very least that can be done to insure quality control in this field. In conclusion to this it is obvious that hairstylists and barbers would have no way of getting malpractice insurance to protect the stylists or the public in case of an accident.

The medical profession have always backed Barbers and Hairstylists Boards of Review for reasons of public safety. Attached is testimony of three Doctors and a Registered Nurse. I urge you to contact them if there is any doubt to their sincerity or reasoning.

I will be looking forward to giving a more detailed presentation at your meeting March 6, 1984.

Respectfully Yours,

John Beaton
Hairstylist

Enclosures

As a member of the medical profession in Alaska it's in my professional opinion that it's an obvious necessity to maintain a board of review for hairstylists and barbers in Alaska. This I feel is the only practical way of maintaining quality control in a field where caustic chemicals such as sodium hydroxide, Thioglycolate Acid, ammonia, 130 volume peroxide, to name but a few, are directly applied to the human body. In the hands of the unskilled, permanent injury to the body could occur. Also in any profession where cutting instruments are being used that are as sharp as any surgeons scalpel or dentists instrument the possible damage to the individual receiving the treatment is obvious. I strongly recommend that licensing of this type of profession which directly threatens the health, well-being and safety of the public should not be taken lightly.

Re: Professional Licensing;
Hairdressers

Dear John:

Confirming our conversation this morning regarding the possibility of our State Legislature rescinding the hairdressers' licensing requirements; I have discussed this situation with the underwriters at Firemans Fund Insurance Co. in Seattle.

They indicate that to their knowledge, all the states in which they write Hairdressers' Professional Liability have a professional licensing requirement. They state that removal of this requirement would cause them considerable concern and could substantially restrict the availabity of this type of insurance.

As you know, Firemans Fund is one of the leading writers of this coverage in Alaska and we feel certain that other insurance carriers would have the same problem with this situation.

Sincerely,

R. W. Osgood
Vice President

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

February 28, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes, the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE
BOARD OF CHIROPRACTIC EXAMINERS

July 1, 1980 to February 28, 1983

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have examined the activities of the Board of Chiropractic Examiners for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an effective and efficient manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Chiropractic Examiners should be reestablished. The law now specifies that the Board will terminate June 30, 1984 and have one year from that date to conclude its affairs.

SCOPE

The major areas reviewed were the Board's operations and its licensing, examination, administration, complaint and affirmative action functions. Our review consisted of analyzing and evaluating the following:

1. Applicable statutes and Board regulations.

2. Interviews with Board members.

3. Discussions with the Division of Occupational Licensing personnel.

4. Tests of the records and documents of the Board and the Division of Occupational Licensing.

5. Complaints filed with the Division of Occupational Licensing, Ombudsman's Office, Consumer Protection Agency, Equal Employment Opportunity Office, and the Human Rights Commission.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

Created in 1939, the Alaska Board of Chiropractic Examiners is a regulatory board comprised of five members appointed by the Governor. Four are licensed chiropractors and one is a public individual.

The underlying reasons for this Board are fourfold. First, the Board is responsible for reviewing the applications of individuals desiring to enter the chiropractic profession in Alaska. Secondly, the Board has the responsibility of administering an examination to test the applicant's ability. Third, the Board is responsible for the adoption of regulations regarding the standards of professional practice in Alaska and fourth, to investigate and act upon complaints filed against members of the regulated profession.

To assist the Board, it has the staff support of the Division of Occupational Licensing (OL), Department of Commerce and Economic Development which is comprised of two sections. The licensing section processes applications, maintains license files, collects statistics, answers inquiries, and provides administrative help to the Board. The investigation section provides investigative services to the Board in the event of consumer or other professional complaints.

The Board of Chiropractic Examiners issues licenses to applicants that have met all licensing requirement and have taken and passed the State examination. The Board may also issue a license without examination if the applicant holds a current license in another state whose licensing requirements are essentially equivalent to those of Alaska. In addition, the Board may issue a temporary permit to individuals apparently qualified until the next regular meeting of the Board.

(Intentionally left blank)

REPORT CONCLUSION

POLICY ISSUES

This report contains policy issues raised as a result of our evaluation of Board practices. The final policy decisions affecting these practices are not within the scope of this report, but require legislative consideration. In debating these issues, the legislative oversight committee should take into consideration the Findings and Recommendations presented in this report so that the potential impact of policy changes can be evaluated.

REPORT CONCLUSION

In our opinion, the Board of Chiropractic Examiners should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

However, the following findings describe areas where weaknesses or conflicts exist. We have made recommendations which, if implemented, will improve the effectiveness and efficiency of the Board.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Prior Audit Recommendation No. 1

The Board of Chiropractic Examiners should eliminate Part I (written) of the State examination.

The Alaska State Board of Chiropractic Examiners has recognized the National Board examination by adopting through proposed regulation "persons applying for a chiropractic license by examination in the State of Alaska, graduating after January 1, 1978, are required to submit a Diplomate Certificate from the National Board of Chiropractic Examiners." The Diplomate Certificate is certification that the applicant has taken Parts I and II of the National Board and indicates the areas tested and examination results. The following areas of chiropractic are tested at the National level: General and Spinal Anatomy, Physiology, Chemistry, Pathology, Micro-Public Health, General and Neuro-Muscular Diagnosis, X-ray, Principles of Chiropractic, Chiropractic Practice, Associate Clinical Science, and Physiotherapy. The examination questions are objective in nature.

In addition to the requirement that the applicant provide the Board with the Diplomate Certificate, the State Board administers a State examination which basically consists of three parts. Part I is a written examination consisting mostly of subjective type questions. Part II involves X-ray identification and interpretation, and Part III consists of practical application of chiropractic technique. While Parts II and III of the State examination involve physical application of the applicant's knowledge through oral testing and actual adjustive techniques in case situations, the merits of the written examination (Part I) are questionable.

Part I of the State examination tests the applicant on topics, previously examined at the National Board level, such as anatomy, physiology, physiotherapy, chiropractic, diagnosis and X-ray. Also, in a 1971 opinion, the Attorney General stated that "the Board of Chiropractic Examiners has the authority to require an applicant to demonstrate competence only in those subjects not covered by the National Board."

Therefore, considering the redundancy of the State written examination over the National Board, the Attorney General's opinion on the topic and the State requirement of the applicant to take the National Board, we recommend the discontinuance of the State written examination.

Legislative Audit's Current Position

During 1980, the State Board sent a copy of the written State examination to the National Board of Chiropractic Examiners so they could review the State examination for redundancy.

The National Board's response was that any State examination is going to be redundant to the National Board examination since it covers such a large scope of material and that Alaska's written examination was 100% redundant. Therefore, we reiterate our prior audit recommendations that the Board eliminate Part I (written) of the State examination.

Prior Audit Recommendation No. 2

Legislation should be introduced requiring continuing education for chiropractors as a provision for license renewal.

The underlying purpose of continuing education is to permit professional education on a post-graduate level and allow for the maintenance and upgrading of professional competency.

According to the most recent figures provided by the Federation of Chiropractic Licensing Board's, thirty-nine states require some form of continuing education for license renewal. In December of 1977, the Alaska Chiropractic Society notified the Board of Chiropractic Examiners of its unanimous endorsement of a requirement of continuing education for license renewal. Of more significance, 94% of the respondents to the questionnaire were in favor of such a requirement and 78% knew of workshops or seminars that may qualify as continuing education that were in the respondents' locality.

From information available, it appears the Board expressed interest in a continuing education requirement in early 1977. We recommend that this worthwhile interest be regenerated towards implementing a sound post-graduate education requirement tied to the biennial license renewal. Accordingly, regulations should be promulgated for the administration of such a program by the Board.

Legislative Audit's Current Position

Alaska Statute 08.20.170(d) requires the Board to adopt "regulations which insure that renewal of license is contingent on proof of continued competency by a practitioner." Continuing education is one way of promoting continued competency. In October of 1981, the Board drafted continuing education regulations, but has not yet adopted them. Therefore, to fulfill the Alaska Statute requirement we recommend that the Board should adopt continuing education regulations for chiropractors as a provision for license renewal.

Recommendation No. 3

The Board of Chiropractic Examiners should improve examination guidelines.

During our review, we noted two examples of an employer/employee relationship existing between a Board member and the individual taking the examination. Examination guidelines should be established to prevent situations where a Board member/employer is administering and grading the State examination for an employee. These guidelines would prevent any appearance of a conflict of interest for the Board member and the examinee.

Recommendation No. 4

The Board of Chiropractic Examiners should revise regulation 12 AAC 16.200 regarding the issuance of temporary permits.

Currently, AS 08.20.160 allows for the issuance of temporary permits "to persons apparently qualified until the next regular meeting of the Board." The Board also adopted 12 AAC 16.200 as additional regulations for issuing temporary permits. The regulations stipulate that a temporary permit holder must "practice in association with a licensed chiropractor in the State." Currently there is no definition of "association." The term "association with" does not limit the scope of services that can be performed nor requires direct or indirect supervision by the licensed chiropractor. Therefore, a temporary permit holder is allowed to practice unsupervised, for up to 6 months prior to taking the State examination.

If the Board feels that the State examination, both written and practical is necessary for public protection then the issuance of temporary permits to individuals who can practice chiropractic unsupervised is not in the best interests of public health.

Therefore, the Board should revise the regulations on the issuance of temporary permits to include either a supervisory requirement or a limitation on the services that can be performed.

Recommendation No. 5

The Board of Chiropractic Examiners should issue, and the Division of Occupational Licensing should maintain the yearly reports as required by statute.

Alaska Statute 37.07 requires the Board to prepare and issue a performance report which should include the Board's goals, objectives, licensing, and financial information. For Fiscal Years 1981 and 1982, we could not locate the required report for the Board of Chiropractic Examiners. Without the report, neither the Legislature nor the Governor have an adequate basis for evaluating and analyzing the Board's performance for the year.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive but to address those areas we were able to cover during our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The written examination requirement is redundant of the required National Board examination, except for certain areas covering Alaska law, resulting in duplicate testing of Alaskan applicants (see Recommendation No. 1).

B. The Board has not established a formal passing grade for the State examination.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource and personnel matters.

A. The Division of Occupational Licensing (OL) has not provided licensing and examination statistics for the Board to use in their annual report.

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board has initiated the repeal of the regulation on advertising that was in violation of antitrust laws.

B. The Board has drafted, but not yet adopted, a regulation requiring continuing education for license renewal.

C. The statutes providing for licensure of Associate Chiropractors has been repealed.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. The Board publishes public notices of all examinations, meetings, and regulation changes.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board announces proposed regulation changes or additions in the newspaper, according to the Administrative Procedures Act.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

A. According to the Division of Occupational Licensing's files, there have been approximately fifteen investigation cases in the past four years with an average case length of eleven months. No complaints have been filed with the Office of the Ombudsman or the Attorney General's office.

VII. The extent to which a board or commission which regulated entry into an occupation or profession has presented qualified applicants to serve the public.

A. The Board issues temporary licenses to individuals so they may practice unsupervised, until the next scheduled examination (see Recommendation No. 4).

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. Application for licensure as a chiropractor require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the recommendations section of this report.

APPENDIX

(Intentionally left blank)

APPENDIX A

BOARD OF CHIROPRACTIC EXAMINERS
REVENUES COMPARED WITH EXPENDITURES

For the Fiscal Year Ended June 30,1982

(UNAUDITED)
(Note 1)

Average Revenue (Note 2)	$ 8,680
Less: Expenditures (Note 3)	42,240
Excess of Expenditures Over Revenues	$33,560

Revenue Type	Amount	Collection Time
Examination Fee	$ 50	With application
Re-examination Fee	20	With application
Temporary Permit	50	With application
Initial License	200	With license issuance
Renewal License	200	Every four years

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and accordingly we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of revenues collected.

Note 3

Expenditures include those made by board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments (such as the Department of Law) assisting the boards and the Division.

(Intentionally left blank)

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE &
ECONOMIC DEVELOPMENT

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

OFFICE OF THE COMMISSIONER

July 5, 1983

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Thank you for the opportunity to comment on your February 28, 1983 audit findings entitled A Performance Report on the Board of Chiropractic Examiners, July 1, 1980 to February 28, 1983. The Department of Commerce and Economic Development feels that the licensing of chiropractors and the continuation of the Board of Chiropractic Examiners is in the public interest. The following are our comments with regard to the specific recommendations outlined in your findings.

Prior Audit Recommendation No. 1: The Board of Chiropractic Examiners should eliminate Part I (written) of the State Examination.

The department does not object to this recommendation. The audit findings present substantial evidence that part one of the State examination duplicates the national examination by testing the same knowledge base. It is the policy of the department to oppose unnecessary obstacles to licensure since they may delay or discourage competent practitioners from offering their services to the public. However, the board contends that there are several key differences in the two examinations which merit retention of both.

First, the national examination is normally taken by students immediately out of school and is, therefore, a weaker indicator of the individual's ability to retain basic knowledge over time.

Second, the national examination has straight multiple choice questions while the State written examination tests the knowledge base through questions which emphasize practical applications.

For these two reasons, primarily, the board feels that the State's written portion provides a reasonable and more desirable level of public protection. In view of the board's concerns, consideration might be given to requiring a State written examination only for those candidates who have not passed the national examination within a reasonable period of time (e.g., two years) prior to application for licensure.

Prior Audit Recommendation No. 2: Legislation should be introduced requiring continuing education for chiropractors as a provision of license renewal. The department concurs with the audit finding that "to fulfill the Alaska Statutes...the board should adopt continuing education regulations for chiropractors as a provision for license renewal." However, the department questions the assumption that continuing education assures continuing competence and that it is the State's responsibility to require such education. Continuing education regulations entail additional costs of doing business which are passed on to the consumer.

Recommendation No. 3: The Board of Chiropractic Examiners should improve examination guidelines. The department concurs with this recommendation. Written examination guidelines should be established and followed to prevent situations where board member/employer is administering and grading the State examination for his/her employee.

Recommendation No. 4: The board should revise regulation 12 AAC 16.200 regarding the issuance of temporary permits. The department concurs with this recommendation. More appropriate controls over practice under temporary permits should be established to assure public protection.

Recommendation No. 5: The board should fulfill its statutory reporting requirements. The department concurs with this recommendation.

Thank you again for this opportunity to comment on your findings.

Sincerely,

Richard A. Lyon
Commissioner

** Personal services or 1/3 of one licensing examiner's position.

(1) meets the requirements of 12 AAC 16.030;

(2) furnishes the board with the name of the licensed chiropractor in the state with whom he or she will associate while practicing under authority of the temporary permit;

(3) has not previously taken and failed the examination; and

(4) has not previously held a temporary permit.

(b) A temporary permit holder must

(1) provide the board with a statement sworn by a licensed chiropractor in the state with whom the temporary permit holder will practice, that the licensed chiropractor assumes all legal liability for the practice of the temporary permit holder.

(2) display his or her temporary permit in a conspicuous place in the office where the holder practices chiropractic; and

(3) inform the board of a change in his or her mailing and practicing address.

(c) A temporary permit is valid until the results of the next scheduled examination are received by the applicant. If an applicant is unable to appear for the first scheduled examination, the board will, in its discretion, extend the temporary permit until the results of the next scheduled examination are received. The board will not extend a temporary permit more than once.

(d) Temporary permits are subject to termination by the board at any time if, in the board's determination, the holder of the permit is violating ethical behavior or law after being warned by the board that this action in regard to him or her was being contemplated. THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

March 31, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the provisions of Titles 24 and 44 of the Alaska Statutes (sunset legislation), the attached report is submitted for your review.

A PERFORMANCE REPORT
ON THE BOARD OF
EXAMINERS IN OPTOMETRY

July 1, 1980 - March 31, 1983

Gerald L. Wilkerson

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

TABLE OF CONTENTS

PURPOSE AND SCOPE OF THE REPORT

Purpose

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have examined the activities of the Board of Examiners in Optometry for the past three fiscal years to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Examiners in Optometry should be reestablished. The law now specifies that the Board will terminate June 30, 1984, and have one year from that date to conclude its affairs.

Scope

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.

2. Tests of files and documents of licensees.

3. Interviews with the license examiners.

4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman's Office.

5. Discussions with Board members.

6. Minutes of Board meetings and Division correspondence files.

7. Attorney General's Opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Examiners in Optometry is a regulatory board consisting of five persons; four optometrists and one public member, appointed by the Governor. Board members serve staggered terms of four years.

The Board regulates the practice of optometry. The Board sets the minimum standards to practice in Alaska by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing, amending, or eliminating regulations controlling optometry practices.

3. Revoking, annulling, or suspending licenses in accordance with the Administrative Procedures Act when a person has violated optometry statutes or regulations.

(Intentionally left blank)

REPORT CONCLUSION

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting the practices are not within the scope of this report, but requires legislative consideration. In debating these issues, the oversight committees should take into consideration the findings and recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Board of Examiners in Optometry should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

However, the following findings describe areas where weaknesses or conflicts exist. We have made recommendations which, if implemented, will improve the efficiency and effectiveness of the Board.

(Intentionally left blank)

FINDINGS AND RECOMMENDATION

Recommendation No. 1

The Board of Examiners in Optometry should repeal its anti-competitive and restrictive regulations [12 AAC 48.070(a)-(e)].

We reviewed the Board's regulations to determine if they are anticompetitive and restrictive. Legislative Audit's 1978 report on the Board recommended repeal of 12 AAC 48.070 subsections (b) and (c) because of their restrictive and anti-competitive nature.

Regulation 12 AAC 48.063 requires certain information to be contained in advertising in the same type size as the main body of the advertisement. Regulation 12 AAC 48.070(a)(1), (2), (3), (6), and (8) limit advertising. Advertising is not allowable except as delineated by 12 AAC 48. This includes limitations on type size in ads, display of merchandise, shape and size of signs, and house-to-house solicitation.

Regulation 12 AAC 48.070(b), working for a corporation, states in part:

> An optometrist may not practice the profession for a commercial establishment or business primarily engaged in trade or commerce for profit.

Similarly, regulation 12 AAC 48.070(c), prohibiting the practice of optometry and the advertising of same as an employee, lessee, sublessee of, or in connection with, a commercial or mercantile establishment, states in part:

> It is unlawful for an optometrist to practice optometry as an employee, lessee, or sublessee of a commercial or mercantile establishment or to practice optometry in connection with one, or to advertise either in person or through a commercial or mercantile establishment.

Regulation 12 AAC 48.070(d), which prohibits the practice of optometry on premises where any other materials are dispensed, states in part:

> No optometrist may practice in or on premises where any materials other than those necessary to render his professional services are dispensed to the public.

Finally, regulation 12 AAC 48.070(e), which limits the nature of signs, states in part:

No optometrist may display a sign containing other then his name, profession, recognized specialty, and office hours. It may be used only on office windows or at an entrance to his office.

The point of view that these regulations are restrictive, anticompetitive, and absent of clear statutory policy to restrain competition is supported by memorandum A66-191-79A from the Attorney General's Office dated October 29, 1980. That memo states in part that:

> There must exist clear statutory policy to restrain competition before a state regulatory agency may promulgate regulations to restrain competition if federal antitrust immunity is to occur, 12 AAC 48.063 may be construed to limit advertising to print media, and is anticompetitive and violative of antitrust law since no such restriction is found in the statute prohibiting false or misleading advertising. 12 AAC 48.070 subsections (a)(1), (2), (3), and (6) impede competition and go beyond what is necessary to limit false and misleading advertising, the only specific statutory prohibition, they are violative of antitrust law. Subsection (a)(8) is likewise anticompetitive. Subsection (b) restrains competitive opportunity among optometrists and there is an absence of specific statutory policy to support the regulation. Therefore, it is unlawful. Subsection (c) is violative of antitrust law on the same basis as subsection (b). Subsection (d) clearly limits competitive opportunity and has no basis in specific statutory authority. It is, therefore, violative of antitrust law. Subsection (e) is anticompetitive, without statutory authorization, and, consequently, violative of antitrust law.

In a memorandum dated October 6, 1978 addressing 12 AAC 48.070 (b) and (c), the attorney for the Legislative Affairs Agency states that those subsections may be unauthorized and restrictive.

In addition, if no action is taken by the Board, we recommend that the State Legislature consider the repeal of the regulations.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our examination.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board has expanded regulations governing continuing education requirements for license renewal.

B. The Board has adopted regulations concerning working for a corporation and leasing of commercial property which unduly restricts the practice of optometry by licensed, qualified optometrists which may be in violation of antitrust laws (see Recommendation No. 1).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Governor has not appointed the public member to the Board. It has been operating for almost a year with only four members.

III. The extent to which the board, commission, or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board recommended CSSB 551 to help clarify the optometry law by requiring the written portion of the exam to be the National Board of Examiners in Optometry examination.

IV. The extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. The Board placed advertisements requesting input on proposed regulation changes.

V. The extent to which the board, commission, or agency has encouraged public participation in the making or its regulations and decisions.

A. The Board's meetings and examinations are advertised in newspapers by OL to encourage public participation.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the Office or the Ombudsman have been processed and resolved.

A. The Office of the Ombudsman and the Attorney General's Office has no consumer complaints regarding the Optometry Board.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. A low number of complaints were filed with OL against optometrists in the last three years.

B. We found no instances where the Board had licensed unqualified practitioners.

VIII. The extent to which State personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

A. Applications for licensure require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendation.

APPENDIX

(Intentionally left blank)

APPENDIX A

BOARD OF EXAMINERS IN OPTOMETRY
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended 1982
(UNAUDITED)
(Note 1)

Average Revenue (Note 2)	$ 6,515
Expenditures (Note 3)	34,514
Excess of Expenditures Over Revenues	$(27,999)

Schedule 1
Types of Revenues

Revenues	Amount	Collection Time
Examination Fee	$ 50	With application
Reexamination Fee For Written Portion	$ 50	With application for reexamination
Waiver of Examination Fee	$ 50	With application
Certificate Fee	$100	With issuance of license
Renewal Fee	$200	Every four years
Branch Office Registration Fee	$100	Every four years
Late Fee Fine	$ 10	With late payment

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and, accordingly, we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average for the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of collected revenues.

Note 3

Expenditures include those made by board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments such as the Department of Law, assisting the boards and the Division.

The Honorable Richard Eliason
Alaska State Senate
Pouch V
Juneau, Ak. 99811

Dear Senator Eliason,

Per our conversation during the hearing of last week concerning SB 437, Continuation of the Board of Examiners in Optometry, I have discussed the issue of the application photograph with the other members of the board.

Both board members expressed a desire to retain the applicants photograph for proof of identification. The photograph is our only method to ensure that the individual sitting for the exam is indeed the applicant who filed the required documents by mail. The only other alternative that we can think of is to have fingerprints.

If you have an alternative that is more agreeable with the EEO, we would appreciate your recommendations. Thank you for your time in this matter.

Sincerely,

John Demske, OD

AS 08.72.060

12 AAC 48.070. UNPROFESSIONAL CONDUCT. (a) An optometrist may not engage in unprofessional conduct within the meaning of AS 08.72.240(3). Without limiting the general application of the foregoing, the following conduct is a violation of this section:

(1) except as provided by sec. 63 of this chapter, soliciting patients by advertising of any nature or description regardless of means or media employed; however, upon the opening, reopening or removal of any office for the practice of optometry, an optometrist may publish, in local newspapers, an announcement, which announcement is limited to a statement of his name, title, profession, degrees, specialty, address, telephone number and office hours; the announcement may not be published for more than 90 days after the opening, reopening, or removal of the office; the announcement may not exceed eight square inches in area;

(2) displaying any spectacle, eyeglasses or eyeglass or spectacle frames or mountings, goggles, lenses, prisms, spectacle or eyeglass cases, ophthalmic material of any kind, optometric instruments or optical tools or machinery, or any merchandise, material or displays of a commercial nature in office windows or reception rooms or display cases outside the office, where the display of the merchandise, material or display would make it visible from outside the office;

(3) using display or boldface type or type that is in any way dissimilar in size, shape or color to that used for others of the healing arts in the same directory;

(4) using any false, deceptive, or misleading representation in connection with any advertising concerning ophthalmic prosthetic products or optometric services;

(5) using "bait" advertising;

(6) using signs whether painted, neon, decalcomania, colored or otherwise, and whether constructed in the form of eyes or structures resembling them, or frames or mountings for any type of lenses or other ophthalmic prosthetic products displayed in any manner or place connected with the practice of optometry;

(7) using publicly, a sign, card, stationery, or other publicity medium which fails to clearly identify the individual optometrist or optometrists engaged in practice in an office or practice location, or using a name other than the name under which the optometrist is licensed including such designations as "optical company," "optical laboratory," or words or phrases of like import which are out of keeping with the use of the title "Doctor of Optometry" and the practice of optometry as a profession;

(8) soliciting, personally or through agents, from house to house for the rendering of optometric services or sale of ophthalmic prosthetic products;

(9) advertising self-styled superiority or the performance of services in a manner presumed to be superior, or the making of untruthful, improbable or impossible claims regarding treatments, cures, or values;

(10) lending, leasing, renting, or in any other manner placing a certificate of registration at the disposal of or in the service of any person not licensed to practice optometry in this state.

(b) An optometrist may not practice the profession on a salary or commission basis for a commercial establishment or business primarily engaged in trade or commerce for profit, or associate with such an establishment or business for the practice of optometry. However, this subsection does not prohibit professional incorporation under the Professional Corporation Act, AS 10.45. The fact that an officer, trustee, director, agent, or employee of a commercial establishment or business is an optometrist does not permit the establishment or business to do the acts prohibited in this subsection, nor is that fact a defense to board action against any of the persons mentioned in this subsection for a violation of this subsection. However, this subsection does not apply to a partnership of two or more registered and licensed optometrists who practice under their own names.

(c) It is unlawful for an optometrist to practice optometry as an employee, lessee, or sublessee of a commercial or mercantile establishment or to practice optometry in connection with one, or to advertise either in person or through a commercial or mercantile establishment that he is a registered practitioner and is practicing or will practice optometry as an employee, lessee, or sublessee of a commercial or mercantile establishment or in connection with one. Nothing in this subsection prohibits the rendering of professional services to the officers and employees of a person, firm, or corporation by an optometrist, whether or not the compensation for the services is paid by the officers and employees or by the employer or jointly by all or any of them.

(d) No optometrist may practice in or on premises where any materials other than those necessary to render his professional services are dispensed to the public.

(e) No optometrist may display a sign containing other than his name, profession, recognized specialty, and office hours, which sign may be used only on office windows or at an entrance to his office. Letters may not be luminous or illuminated.

(f) No optometrist may represent himself or herself as a specialist in an optometric field unless he or she is certified, as a diplomate of the American Academy of Optometry or as a fellow of the College of Vision Development, in a recognized specialty. The board recognizes American Academy certification in contact lenses, binocular vision, geriatric care, and low vision, and College of Vision Development fellowships in vision training and developmental vision. (In effect before 7/28/59; am 9/10/65, Reg. 21; am 4/24/71, Reg. 37; am 2/14/78, Reg. 65; am 7/6/78, Reg. 67; am 6/14/80, Reg. 74)

SUNSET REVIEW

BOARD OF PUBLIC ACCOUNTANCY

#5

STATE OF ALASKA

AUDIT DIVISION
POUCH W
JUNEAU, ALASKA 99811

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

February 10, 1984

FEB 1 [illegible]

The Honorable Joe Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Enclosed are six of the seven sunset audit reports of regulatory boards that will terminate June 30, 1984. I am forwarding these reports to you so that they may be distributed to the appropriate standing committees you will designate to perform the legislative oversight function.

The boards are:

1. Board of Chiropractic Examiners (AS 08.20.010)
2. Board of Examiners in Optometry (AS 08.72.010)
3. Board of Pharmacy (AS 08.80.010)
4. Board of Barbers and Hairdressers (AS 08.13.010)
5. State Board of Registration for Architects, Engineers, and Land Surveyors (08.48.011)
6. Board of Public Accountancy (AS 08.04.010)

The audit on the Alcoholic Beverage Control Board (AS 04.06-.010) is in process and will be available once released by the Legislative Budget and Audit Committee.

Please note that AS 08.03.020(a) provides that upon termination, each board continues in existence until June 30th of the next succeeding year for the purpose of concluding its affairs.

Sincerely,

Robert Bettisworth

Rep. Robert Bettisworth,
Chairman
Legislative Budget and Audit
Committee

STATE OF ALASKA

AUDIT DIVISION
POUCH W
JUNEAU, ALASKA 99811

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

November 7, 1983

Members of the
Legislative Budget and Audit Committee:

In accordance with the intent of Title 24 and 44 of the Alaska Statutes, the Division of Legislative Audit was mandated to perform a "Sunset" review of the Alaska State Board of Public Accountancy.

As many staff members of the Division hold Certified Public Accountant certificates, and are subjected to regulation by that Board, the Division lacked the apparent independence necessary to perform the review.

The Division contracted with R.W. Pavitt and Associates, Inc. to perform this review. This firm is a reputable management consultant business that has been in operation for several years. In addition, it conducted the review for us in 1979.

We feel this report discharges our responsibility, mandated under Title 24 and 44. The report is submitted for your review.

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

Attention Merle R. Jenson, Deputy Legislative Auditor

Dear Mr. Jenson:

In accordance with the Contract for Services between the Legislative Audit Division and our firm, we have completed a performance review of the Board of Public Accountancy using guidelines and standards established in Alaska Statutes for such "sunset" audits.

The report, entitled A PERFORMANCE REVIEW OF THE BOARD OF PUBLIC ACCOUNTANCY, is hereby submitted.

Respectfully,

R. W. Pavitt, AICP
President

A PERFORMANCE REVIEW OF THE BOARD OF PUBLIC ACCOUNTANCY

Table of Contents

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of Alaska Statutes 24.20.271(1) and 44.66.050 (Sunset legislation), a review of the Board of Public Accountancy was conducted to examine Board activities, operations, policies and accomplishments. The purpose of the review is to determine if the Board has operated in a fair, effective, efficient and economical manner in the performance of its statutory functions, duties and responsibilities.

As required by AS 44.66.050, this report shall be considered during the legislative oversight procedure in determining whether the Board of Public Accountancy should be continued or reestablished. The law currently specifies that this Board will terminate on June 30, 1984, but will continue until June 30, 1985 for the purpose of concluding its affairs.

Scope

The major areas studied were the Board's operations, policies, procedures and its examination, licensing, administration, complaint and affirmative action responsibilities. Our review consisted of research, analysis and evaluation of the following:

(1) Applicable Alaska Statutes and Alaska Administrative Code regulations;

(2) Records, minutes and documents of the Board and the Division of Occupational Licensing;

(3) Licensing and certification requirements of other jurisdictions;

(4) Interviews with Board members

(5) Interviews conducted with personnel of:
Division of Occupational Licensing
Office of the Ombudsman
Human Rights Commission

(6) Compaints filed with:
Human Rights Commission
Office of the Ombudsman

ORGANIZATION AND FUNCTION

Although regulation of the profession of public accountancy in Alaska dates back to 1949, the Alaska State Board of Public Accountancy was established by the First Alaska Legislature when it adopted the Accountancy Act of 1960 (AS 08.04). An amendment to the Act in 1976 added two public members to the Board, bringing its total membership to seven. (Chapter 258 SLA 1976).

The Act was further amended in 1980 (Chapter 82 SLA 1980) to provide that of the seven board members, five shall be certified public accountants and two members shall be public members. Other changes, both technical and substantive, were made in the 1980 amendments, but the Accountancy Act as amended continues to assign to the board the following major responsibilities:

1. the promulgation and amendment of rules to "establish and maintain a high standard of integrity and dignity in the profession of public accountancy" (AS 08.04.080)
2. granting of certificates of "Certified Public Accountant" to persons meeting the specified requirements (AS 08.04.100)
3. administering the Uniform CPA Examination prepared and graded by the Board of Examiners of the American Institute of Certified Public Accountants (AS 08.04.130)
4. registration of partnerships and corporations engaged in the practice of public accountancy (AS 08.04.240)
5. prescribing requirements for continuing education as a prerequisite to renewal of permits to practice (AS 08.04.425)
6. consideration of revocation or suspension of a certificate or license for a cause specified in the Act (AS 08.04.450)
7. consideration of reinstatement of a revoked or suspended certificate or license (AS 08.04.490)
8. consideration of application to the appropriate court for an order enjoining certain unlawful acts (AS 08.04.630)

Except for the exemptions specified in AS 08.04.570, the Accountancy Act of 1960 prohibits the practice of public accountancy by any individual, firm, partnership or corporation not holding a currently valid certificate, license and/or permit to practice in Alaska (AS 08.04.500 et seq.).

REPORT CONCLUSION

In our opinion, the Board of Public Accountancy should be continued. Protection of the public interest is a basic tenet of Alaska's Constitution, and a continuing responsibility of state government. We believe that state regulation and licensing of the profession of public accountancy is necessary and desirable for the continued protection of the citizens of Alaska.

That conclusion is supported by the following rationale:

- Financial statements, audited and attested by certified public accountants, are relied on by many persons required to make judgements on important financial and business transactions. Users of such financial statements cannot reasonably be expected to investigate the individual qualifications and competency of every accountant who performs the attest function.
- State licensing and regulation protects the public from incompetent and fraudulent practitioners.
- State licensing and regulation assures the public that only individuals who have proven themselves skilled and knowledgeable of technical accounting principles and procedures may perform the attest function.
- The public interest is advanced when individuals, financial institutions, businesses and government agencies are able to identify and rely on public accountants who have demonstrated professional skill and competence.

All fifty states of these United States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands require that a person must pass the Uniform CPA Examination in order to qualify for a CPA license. Every jurisdiction has found it in the public interest to pass laws regulating public accountancy, and each has established a board of accountancy to administer and enforce the laws. Although the requirements of those laws with respect to experience, education, age, citizenship and residency vary somewhat from one jurisdiction to another, the requirements of the Alaska Accountancy Act of 1960, as amended, appear reasonable and prudent when reviewed along with the accountancy laws of other jurisdictions.

The Alaska Statute governing public accountancy is clearly designed to set apart those who have met certain qualifications for a license, and

to restrict the use of the titles "Certified Public Accountant" and "Public Accountant" to those who have so qualified. The policies and practices of the Board of Public Accountancy observed in the conduct of this review appear to be consistent with that objective.

FINDINGS AND RECOMMENDATIONS

FINDINGS

An exhaustive performance audit of the Board of Public Accountancy was conducted in the fall of 1979. Eight specific recommendations were made in that review. The recommendations made, and actions taken pursuant to the legislative oversight hearings of 1980 follow:

Recommendation No. 1

The qualifications and conditions of Board membership (AS 08.04.020) should be amended to specify five certified public accountants or public accountants, and two public members.

Action

Recommendation accomplished in Chapter 82, SLA 1980)

Recommendation No. 2

The Board of Public Accountancy should be brought to its full complement of seven members, and maintained at that strength by means of timely appointments of qualified professional and public members.

Action

None. Over 6 months have passed since the terms of 3 members of the board have expired. The board has submitted a list of names to the Governor's Office, but as of November 7, 1983, no appointments have been made. (see Recommendation No. 1; this review)

Recommendation No. 3

Without affecting the rights and privileges of presently-licensed Public Accountants, the Accountancy Law should be amended to discontinue the licensing of new applicants as Public Accountants.

Action

Recommendation accomplished in Chapter 82, SLA 1980

Recommendation No. 4

Electronic recordings should be made of all Board meetings, and the tapes retained by DOL for two years.

Action

Recommendation accomplished in Chapter 82, SLA 1980

Recommendation No. 5

The Board should adopt a formal statement of goals, objectives and policies; and should prepare an annual report of its activities.

Action

Recommendation accomplished in Chapter 82, SLA 1980

Recommendation No. 6

AS 08.01.025 should be amended to state more clearly legislative intent with respect to the qualifications of public members of boards.

Action

Recommendation accomplished in Chapter 82, SLA 1980

Recommendation No. 7

DOL should develop improved statistical record-keeping methods and procedures.

Action

DOL's record-keeping methods and procedures have shown substantial improvement. Much of the essential data is now maintained on DOL's computer system, and appears to be easily accessible and retrievable.

Recommendation No. 8

DOL should handle investigations in a more comprehensive, efficient and timely manner.

Action

Board minutes, and interviews with board members and DOL personnel indicate that great improvement has been made regarding the investigatory function of DOL as related to public accountancy. Reports on cases in progress are now made at nearly every board meeting, and much of the backlog of public accountancy cases has been cleared up and the cases closed. (see Recommendation No. 2; this review)

In summary, it is the finding of this review that nearly all of the recommendations made in the 1979 sunset review of the Board of Public Accountancy have been implemented. The Board currently appears to be operating smoothly and efficiently in accomplishing its statutory responsibilities.

RECOMMENDATIONS

Following are the recommendations of this review:

Recommendation No. 1

The Board of Public Accountancy should be brought to its full complement of seven members, and maintained at that strength by means of timely appointments of qualified professional and public members.

Slow appointment procedures make it difficult for the Board to operate at peak efficiency. While it is true that "a member continues to serve until a successor is appointed . . . ." (AS 08.04.040), it is unreasonable to expect those members who terms have expired to invest the many hours of time required of board members over an extended period of time.

Board meetings typically extend over a full two day period, and require many hours of diligent preparation, and substantial travel of the members. The charge to "establish and maintain a high standard of integrity and dignity in the profession of public accountancy" is taken seriously by the Board. The State as well as the people of Alaska benefit from the many hours of unpaid and dedicated service contributed by members of the Board.

It is recommended that the Office of the Governor expeditiously appoint qualified new members to the three expired Board seats, and continue to make appointments or reappointments to this Board in a timely manner.

Recommendation No. 2

The records of the investigations unit of DOL should be systematized and automated.

Although much of the work done by the investigatory personnel of DOL is confidential in nature, the same is true of the Ombudsman's Office, the Human Rights Commission and numerous other State agencies. They have

invariably found, however, that statistical information regarding investigations is made immeasurably faster and simpler to store and retrieve using modern computer technology.

Considering the many boards, commissions and functions served by the investigations unit, automation of these records and statistics would be of substantial assistance to the overall effectiveness and efficiency of the Division of Occupational Licensing.

*

ANALYSIS OF PUBLIC NEED

The following analysis of Board activities relates to the public need factors defined in AS 44.66.050(c). This analysis addresses those areas able to be covered within the scope of this review.

I. The extent to which the board, commission or agency has operated in the public interest.

1. The Board of Public Accountancy has established criteria and authored regulations setting forth the standards which an individual must satisfy in order to practice public accountancy in Alaska.
2. The Board has established regulations requiring evidence of continuing professional education (CPE) as a condition of license renewal.
3. The Board has held an average of three meetings per year and conducts examinations twice a year in Anchorage, Fairbanks and Juneau.

II. The extent to which the operation of the board, commission or agency program has been impeded or enhanced by existing statutes, procedures and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

1. Operation of the Board has been enhanced by improvements in DOL's administration, record-keeping and statistical capabilities.
2. Operation of the Board has been enhanced by improvements in DOL's investigations of public accountancy matters, and by the development of better rapport between the Board and its investigatory arm.

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

1. The Board has recommended several amendments to the Accountancy Act of 1960 which appear to be consistent with other jurisdictions and generally in the public interest.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

1. Individuals who contact Board members or the Licensing Examiner who wish to present information, ask questions or register complaints are invited and encouraged to attend Board meetings.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

1. Board meetings are held at least three times annually, are open to the public, and are advertised in a timely manner by DOL in Anchorage, Fairbanks and Juneau newspapers.
2. In accordance with the Administrative Procedures Act, the Board has invited interested persons and groups to offer testimony in regard to proposed changes in regulations, and has held advertised public hearings to receive testimony.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which the board or commission is adminstratively assigned, or with the office of the ombudsman have been processed and resolved.

1. In the past four years, two complaints concerning the Board's activities were filed with the Ombudsman's Office. A complaint in 1980 charging the board with unfair handling of an application

was found by the mbudsman to be unsupported, and a 1982 complaint dealing with an anticipated reapplication problem proved to be a misunderstanding that was rapidly resolved to the complainant's satisfaction.

2. No complaints regarding the Board's practices or activities have been recorded in the past four years by the Human Rights Commission or the Equal Opportunity Office.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

1. The Board has proposed and adopted regulations and standards with respect to acceptable experience necessary for certification.
2. The Board has proposed and adopted regulations for continuing professional education (CPE) as a requisite for license renewal.
3. The Board exercises diligence to assure that only those individuals who fully comply with the requirements of the statute and regulations are certificated to practice public accountancy.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency in its own activities and the area of activity or interest.

1. The application forms for examination and certification do not inquire as to race or sex, nor do they require photos.
2. No evidence has been presented that the Board has discrimminated against applicants on the basis of age, race or sex.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please see RECOMMENDATIONS subsection of this review.

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

January 26, 1984

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Thank you for the opportunity to comment on the November 7, 1983 audit findings entitled A Performance Report of the Board of Public Accountancy. The Department of Commerce and Economic Development feels that the licensing of certified public accountants and the continuation of the Board of Public Accountancy is in the public interest. The following are our comments with regard to the specific recommendations outlined in your findings.

Recommendation No. 1: The Board of Public Accountancy should be brought to its full complement of seven members and maintained at that strength by means of timely appointments of qualified professional and public members.

The department does not object to this recommendation.

Recommendation No. 2: The records of the investigations unit of DOL should be systematized and automated.

The department concurs with this recommendation. The investigations section is in the planning stages for computerizing files for tracking and statistical use. Actual entry into the computer system will occur following completion of the entries of all licensing data and design of security measures. Investigation entries could occur within a year.

Thank you again for this opportunity to comment on the findings.

Sincerely,

Richard A. Lyon
Commissioner

E.O. # 58

VETERANS AFFAIRS

(PREPARED BY OMB)

BACKGROUND

- 13 statutory references to veterans

- Major veterans programs in the State anticipate FY 85 funding of $58.68 million (State) and $656,100 (Federal). These programs include:

  - Department of Commerce. Handles on a "pass through" basis funding for veterans services provided by VFW and American Legion ($219,000) and Burial Allowances ($222,700). These two programs are being transferred to Department of Military Affairs.

  - Alaska Housing Finance Corporation. Handles Veterans Mortgage Program. Loan subsidy and operating budget projected to be about $50 million.

  - Department of Health and Social Services. Funds mental health diagnosis and treatment services for Vietnam veterans in Juneau. Funding is projected to be $109,000.

  - Department of Community and Regional Affairs. Provides funding for Nonconforming and Rural Housing Loan programs. The veterans portion of loan subsidy and operating costs for these programs is expected to be about $8.1 million.

  - Department of Labor. Handles four programs designed to assist veterans in obtaining employment. The programs are federally funded at $547,000.

  - Alaska Commission on Post-Secondary Education. Acts as the State Approval Agency for veterans educational programs. The program is federally funded at $109,100.

  - Department of Military Affairs. Has responsibility for veterans memorial. $30,000 currently projected for FY 85.

  - The Alaska Region of Federal Veterans' Administration has a projected budget of about $38 million. This provides medical, compensation, pension and home loan assistance to qualified veterans.

PROBLEMS

- The Alaska veterans are concerned about lack of representation within state government.

- No central point of contact within the state to:

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M

January 23, 1984

SUBJECT: Sectional analysis of executive order no. 58 (Work Order No. 13 - 1819)

TO: Representative John Cowdery
Chairman House Labor and Commerce Committee

FROM: Edward H. Hein EHH
Legislative Counsel

Section 1 states the governor's intention to transfer the veterans' service and the veterans' burial allowance programs from the Department of Commerce and Economic Development to the Department of Military Affairs, and to rename the latter the Department of Military and Veterans' Affairs.

Sections 2 - 7, 14 - 20 and 22 - 24 are simply clean-up sections that change references to the Department of Military Affairs to read Department of Military and Veterans' Affairs.

Sections 8 - 11 change references to the Department of Commerce to read the Department of Military and Veterans' Affairs. This effectively transfers from one department to the other the responsibilities under four sections relating to regulations and reports; acceptance of gifts, donations, and grants; training in rehabilitation and service work; and approval of payment. Section 8 also deletes the superfluous reference to "rules" at page 3, line 4. Section 10 corrects the word "those" to "that" at page 3, line 23.

Section 12 transfers the veteran's burial allowance program from the Department of Commerce, division of veterans' affairs, to the Department of Military and Veterans' Affairs.

Section 13 amends the powers and duties of the Department of Commerce relating to cooperation with the federal government in matters concerning Alaska veterans. The Department of Commerce retains its responsibility for veterans' loans.

Section 21 transfers to the Department of Military and Veterans' Affairs the responsibility for cooperating with the federal government in (1) matters concerning Alaska veterans, other than veterans' loans; and (2) establishing, extending or strengthening services for Alaska veterans.

Section 24 repeals the Department of Commerce's responsibility for cooperating with the federal government in establishing, extending or strengthening services for veterans in Alaska.

Section 26 provides that the transfer of functions from the Department of Commerce to the Department of Military and Veterans' Affairs does not affect pending legal proceedings related to the functions being transferred, regulations adopted under authority of a section being amended or repealed, or contracts, rights, liabilities and obligations created under a law being amended or repealed by the executive order. This section also provides for the transfer of state property from one department to the other.

Section 27 directs the revisor of statutes in the Legislative Affairs Agency and the regulations attorney in the Department of Law to correct statutory and regulatory references required by the changes made by the executive order.

Section 28 states the effective date of the executive order as March 9, 1984.

JUSTIFICATION

This position will be responsible for the administration of the State Division of Veterans Affairs within the Department of Military and Veterans' Affairs. The position will be tasked with the coordination of all Veterans' programs within the State of Alaska. It will also be tasked with the coordination between the State and Federal Veterans' Administration as well as Veterans' Organizations. The position will cooperate with the federal government in matters of mutual concern pertaining to the welfare of Alaskan veterans, including establishing, extending, or strengthening services for veterans, in Alaska.

ANALYSIS

This fiscal note is tempered with the assumption that funding to operate the Veterans' programs at their present level of service will be transferred to the Department of Military & Veterans' Affairs along with the responsibilities.

Therefore this fiscal note only addresses funding needed to provide an increased level of service.

5. What are the main advantages for veterans to having this transfer approved ?

6. What is the initial cost of the transfer to the state ?

7. Will the State re-coup this cost over a period years due to more efficiency in the veterans programs ?

8. WIll some people lose their jobs as a result of the transfer ?

BILL SHEFFIELD
GOVERNOR

E 0 58

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 9, 1984

The Honorable Joe Hayes
Speaker of the House
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 23, of the Alaska Constitution, I am transmitting an executive order that transfers two veterans' programs from the Department of Commerce and Economic Development to the Department of Military Affairs and renames that department as the Department of Military and Veterans' Affairs.

The veterans' services program (AS 26.10.010 -- 26.10.050) and the veterans' burial allowance program (AS 26.10.080) are both currently assigned to the division of investments within the Department of Commerce and Economic Development. This executive order would transfer these two programs to the renamed Department of Military and Veterans' Affairs.

The transfer places these programs where they logically belong and the departmental name change corresponds more nearly with the name of Title 26 of the Alaska Statutes, "Military Affairs and Veterans." Most of that title already relates to the Department of Military Affairs. After transfer of these two programs, AS 26.15, concerning the veterans' loan program in the Department of Commerce and Economic Development, will be the only part of AS 26 that relates to another agency. The amendment of AS 26.15.030(c)(1) in sec. 13 recognizes that change by slightly modifying one of the duties of the Department of Commerce and Economic Development. The language being added to AS 44.35.020 in sec. 21 of the order, listing duties of the Department of Military and Veterans' Affairs, is a consolidation of current AS 26.15.030(c)(1) and (3) (the latter of which is being repealed in sec. 25 of the order).

I believe that this transfer will improve the efficiency and effectiveness of these two programs and will improve the quality of services delivered to veterans and their survivors. It is anticipated that a division of veteran's affairs will eventually be established to provide the services.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 9, 1984

The Honorable Joe Hayes
Speaker of the House
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 23, of the Alaska Constitution, I am transmitting an executive order that transfers two veterans' programs from the Department of Commerce and Economic Development to the Department of Military Affairs and renames that department as the Department of Military and Veterans' Affairs.

The veterans' services program (AS 26.10.010 -- 26.10.050) and the veterans' burial allowance program (AS 26.10.080) are both currently assigned to the division of investments within the Department of Commerce and Economic Development. This executive order would transfer these two programs to the renamed Department of Military and Veterans' Affairs.

The transfer places these programs where they logically belong and the departmental name change corresponds more nearly with the name of Title 26 of the Alaska Statutes, "Military Affairs and Veterans." Most of that title already relates to the Department of Military Affairs. After transfer of these two programs, AS 26.15, concerning the veterans' loan program in the Department of Commerce and Economic Development, will be the only part of AS 26 that relates to another agency. The amendment of AS 26.15.030(c)(1) in sec. 13 recognizes that change by slightly modifying one of the duties of the Department of Commerce and Economic Development. The language being added to AS 44.35.020 in sec. 21 of the order, listing duties of the Department of Military and Veterans' Affairs, is a consolidation of current AS 26.15.030(c)(1) and (3) (the latter of which is being repealed in sec. 25 of the order).

I believe that this transfer will improve the efficiency and effectiveness of these two programs and will improve the quality of services delivered to veterans and their survivors. It is anticipated that a division of veteran's affairs will eventually be established to provide the services.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

EO 57, (cont'd)

In his message transmitting EO 57 to the Legislature, Governor Sheffield stated:

> Under the authority of art. III, sec. 23, of the Alaska Constitution, and in accordance with AS 24.30.130(b), I am transmitting an executive order that transfers the Alaska State Office from the Governor's Office to the Department of Commerce and Economic Development and renames it the Alaska Foreign Office.
>
> Under current statutes (AS 44.19.074 -- 44.19.082), the Alaska State Office is in the Office of the Governor. Because the functions of the Alaska State Office are in the area of economic development, resource, and trade information, and contact between government and private industry, the appropriate administrative location for the office is the Department of Commerce and Economic Development. With a very slight re-wording, this Order just relocates the current statutes to that department's chapter from the Governor's Office chapter. No substantive changes are being made. State employees in the Tokyo office remain in the exempt service by virtue of AS 39.25.110(17).
>
> Renaming the office as the Alaska Foreign Office gives it an obviously more appropriate name.
>
> I believe that this transfer will improve the efficiency of state government.

Dept. of Military & Vets' Affairs

EXECUTIVE ORDER NO. 58, by the Governor. Would transfer two veterans' programs--the vets' services program and the vets' burial allowance program--from the Dept. of Commerce & Economic Development to the Dept. of Military Affairs. Renames the latter the "Department of Military and Veterans' Affairs." Effective March 9, 1984.

Introduced January 9 and referred to Judiciary and Finance in the Senate and Labor & Commerce, State Affairs and Finance in the House.

In his message transmitting EO 58 to the Legislature, Governor Sheffield stated:

> Under the authority of art. III, sec. 23, of the Alaska Constitution, I am transmitting an executive order that transfers two veterans' programs from the Department of Commerce and Economic Development to the Department of Military Affairs and renames that department as the Department of Military and Veterans' Affairs.
>
> The veterans' services program (AS 26.10.010 -- 26.10.050) and the veterans' burial allowance program (AS 26.10.080) are both currently assigned to the division of investments within the Department of Commerce and Economic Development. This executive order would transfer these two programs to the renamed Department of Military and Veterans' Affairs.
>
> The transfer places these programs where they logically belong and the departmental name change corresponds more nearly with the name of Title 26 of the Alaska Statutes, "Military Affairs and Veterans." Letter of Intent

~~In declaring~~

The Legislature recognizes that an increase in rent by the landlord, ~~in effect~~, may constitute a form of termination, ~~in that~~ in that it terminates the rental agreement then in existance and offers a new rental agreement at different terms. The tenant, however, should be given ample time to locate a new dwelling and to move. Upon receipt of a notice of rent increase a tenant ~~could~~ should have the full 45 days to vacate provided under this bill if ~~they choose~~ he chooses not to accept the higher rent. The tenant would be under the obligation to inform the landlord of his intention to ~~terminate~~ vacate within the 45 day-period if the tenant does not intend to pay the higher rent.

An Overview of
Sponsor Substitute for HOUSE BILL NO. 1
"An Act relating to landlords and tenants"

The Alaska Statutes governing Landlords/Tenants, (Title 34- Property), has not been clear in defining certain areas of concern to both the landlord and the tenant. Whether oral or written, both the landlord and tenant hold certain unalienable rights in the property they own as a landlord or rent as a tenant. With the 0% to 4% vacancy rate in most of Alaska, and because over 35% of the poulation in Alaska rent their dwellings, it is necessary to update the laws to answer the needs of the landlord and tenant. The following is a summary of HB 1, and how it answers some of these needs.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 09.45.090 is amended by adding a new paragraph to read:

(4) when, after a notice to terminate the tenancy as provided in AS 34.03.290 with reference to termination of a periodic tenancy, a person continues in possession of a dwelling unit after expiration of the time for determining the tenancy.

This new paragraph is being added to stipulate a "periodic tenancy" termination. AS 09.45.090 (3) cites termination of an "estate at will" tenancy, which can be defined as a tenancy that transpires on a dav to day basis on an indefinite term at the will of the lessor. In this case, the tenant has no say in the matter of how long the tenancy will last, and the landlord may, at any time, terminate the tenancy and the tenant has no right to a notice. (This type of tenancy was developed in a few hundred years ago in England, and rarely applies "modern day" tenancy.) For this reason, it is necessary to add Paragraph 4, as periodic tenancy, (month to month, or a predetermined period of time), is not referenced in the present context.

Section 2. AS 34.03.290 (b) is amended to read:

(b) The landlord or the tenant may terminate a month to month tenancy by a written notice given to the other at least 45 [30] days before the termination [RENTAL DUE] date specified in the notice.

This amendment provides a more equitable time frame to tenants. The vacancy rate for apartments at the present time in the Anchorage, Fairbanks, Ketchikan and Juneau markets ranges from 0% to 4%. Because of this tight rental market, it is sometimes quite difficult for low income families, minorities, pet owners, families with children, and the elderly, (to name a few), to find adequate and habitable housing. General termination, (30 days), on the part of the landlord, in a time of a severe housing crunch does not always give the tenant sufficient notice to find other adequate housing.

"Rental due" date refers to Sec. 34.03.020 (c) which is the date on the same day each month that rent is to be paid. The landlord may wish to give notice of termination to the tenant before the "rental due" date, and replacing "rental due" with "termination" date provides for either time frame.

Section 3. AS 34.03.290 (c) is amended to read:

(c) If the tenant remains in possession without the landlord's consent after expiration of the term of the rental agreement or after its termination, the landlord may bring an action for possession and recovery of actual damages. If [IF] the tenant's holdover is wilful and not in good faith the landlord, in addition, may recover an amount not to exceed one and one-half times the actual damages. If the landlord consents to the tenant's continued occupancy, AS 34.20.020 applies.

An improper hold-over by a tenant has caused landlords financial hardships. If a tenant continues to occupy the dwelling after his tenancy expires, he has caused the owner loss of income needed to make mortgage payments, as well as loss of time to make necessary repairs, alterations, etc., before renting the unit to the next party. Alaska law allows landlords to sue for damages, but the time, effort and money involved is not always feasible to pursue.

The new clause noted above provides for recovery of actual damages, (i.e. lost rent income, lost time needed to make necessary repairs, etc.), as well as one and one-half times the actual damages as compensation to the landlord. This deters the tenant from staying on past termination or the expiration of the rental agreement and in effect is incentive to the individual(s) to vacate the premises.

Section 4. AS 34.03.310 is amended by adding a new subsection to read:

(f) A landlord is presumed to have violated (a) of this section if the landlord increases rent, decreases service, or brings or threatens to bring an action for possession within 60 days after a tenant has engaged in an action listed under (a)(1) - (4).

This new subsection protects the tenant from landlords who abuse the right to access or evict the tenant for retaliatory reasons. The tenant has a right to his/her privacy, and the landlord must give "reasonable" notice to the tenant before entering the premises, (See AS 34.03.010). This new subsection also provides that the tenant may not be evicted because they have made a complaint using the proper procedures, (See AS 34.03.140), i.e. complained to a government agency regarding unfair rent hikes, or requesting that certain necessary repairs be made to the premises or common area. Sixty days is a sufficient amount of time to correct a problem or answer a complaint. After the 60 day period has expired, the tenant should refer to AS 34.03.160 and the landlord should refer to AS 34.03.220 for remedies to their problem(s).

fined by AS 09.45.090, and that only is constructive force which that section declares to be such. Miners' & Merchants' Bank v. Brice, 5 Alaska 418 (1915).

Actual possession must be shown.— Since forcible entry and detainer is an action purely for possession, and not to try title (AS 22.15.050), such an action cannot be maintained without showing actual possession. Wills v. Peterson, 5 Alas. L.J. No. 12, p. 266 (Dec., 1967).

Possession of tenant does not make such tenant an agent or employee of his landlord. Wills v. Peterson, 5 Alas. L.J. No. 12, p. 266 (Dec., 1967).

entry and detainer, 45 ALR 323.

Forcible entry and detainer as remedy for interference with right of way, 47 ALR 556.

Criminal offense of forcible detainer where entry was peaceable, 49 ALR 957.

Forcible entry and detainer as a remedy of tenant against stranger wrongfully interfering with his possession, 12 ALR2d 1100.

Right of landowner who has conveyed property to third person to maintain forcible detainer or similar summary possessory action, 47 ALR2d 1170.

Sec. 09.45.080. Undertaking on appeal. If judgment is rendered against the defendant for the restitution of the real property described in the complaint or any part of it, no appeal may be taken by the defendant from the judgment until he gives, in addition to an undertaking required upon appeal, an undertaking to the adverse party with two sureties. The sureties shall justify, in the manner as bail upon arrest, for the payment to the plaintiff of twice the rental value of the real property of which restitution shall be adjudged from the rendition of the judgment until final judgment in the action, if the judgment is affirmed upon appeal. (§ 17.03 ch 101 SLA 1962)

Sec. 09.45.090. Unlawful holding by force. The following are cases of unlawful holding by force within the meaning of §§ 60—160 of this chapter:

(1) when the tenant or person in possession of a premises fails or refuses to pay the rent due on the lease or agreement under which he holds, or deliver up the possession of the premises for 10 days after demand made in writing for the possession;

(2) when, after a notice to quit as provided in §§ 60—160 of this chapter, a person continues in the possession of the premises at the expiration of the time limited in the lease or agreement under which that person holds, or contrary to a condition or covenant in the lease or agreement, or without a written lease or agreement;

(3) when, after a notice to terminate the tenancy as provided in this title with reference to termination of estate at will or by sufferance, a person continues in possession of the premises after expiration of the time for determining the tenancy. (§ 17.0 ch 101 SLA 1962)

Section defines detainer article is designed to prevent.—This section of the forcible entry and detainer act suggests the character of the detainer which the statute was intended to prevent. Stell v. Dessmore, 3 Alaska 302 (1907).

ute; but constructive force is defined by this section, and that only is constructive force which this section declares to be such. Miners' & Merchants' Bank v. Brice, 5 Alaska 418 (1915).

Where entry was without force and under claim of title, article is inapplicable. — Where defendant entryman, and entered under adverse claim of title, and without the title or possessio plaintiff, under such facts h be summarily removed by t ble entry and detainer act, b titled to have his title ...led Stell v. Dessmore, 3 Ala (1907).

Sec. 09.45.100. Requisites of notice to quit. A notice to qu be in writing and shall be served upon the tenant or person session by being delivered to him or left at the premises of his absence from the premises, or the notice may be s registered or certified mail, in which case an additional thre shall be added to the 10 days. (§ 17.05 ch 101 SLA 1962)

C.J.S. reference. — 36 C.J.S. Forcible Entry and Detainer §§ 23 to 25.

Sec. 09.45.110. Period between service of notice and brought. An action for the recovery of the possession of the ises may be maintained in the cases specified in § 90 (2) chapter when the notice to quit has been served upon the or person in possession for the period of 10 days before th mencement of the action unless the leasing or occupation is purpose of farming or agriculture, in which case the notice s served 90 days before commencement of the action. (§ 17.06 SLA 1962)

Sec. 09.45.120. Summons and continuance. Summons in for forcible entry and detainer shall be served not less tha nor more than four days before the date of trial. No conti shall be granted for a longer period than two days unless t fendant applying for the continuance gives an undertaking adverse party, with sureties approved by the court cond to the payment of the rent that may accrue if judgment ered against the defendant. (§ 17.07 ch 101 SLA 1962)

Sec. 09.45.130. Action against persons paying rent in ad The service of a notice to quit upon a tenant or person in sion does not authorize an action to be maintained against h the possession of the premises until the expiration of the for which that tenant or person may have paid rent for the ises in advance. To authorize an action against a tenant or in possession who has paid rent in advance, a notice must be at least 10 days before the date the rent is due again in ca month-to-month tenancy or at least three days before in t of a week-to-week tenancy. (§ 17.08 ch 101 SLA 1962)

Sec. 09.45.140. Agricultural tenant. When the leasing or

Official Business

THE FOLLOWING ARE OFFERED AS AMENDMENTS TO SSHB 7:

AMENDMENT 1. This is to correct a technical ommission from the bill.

page 5 line 19

insert the words "property damage or" after because of. The line would then read..."of uninsured motor vehicles because of property damage or bodily injury or death...."

This is to make this section identical to the definition of motor vehicle policy proposed is 28.22.010.

AMENDMENT 2. This amendment will change the insurance code to mandate that companies authorized to do business in the state offer uninsured and underinsured insurance for property damage and personal injury liability in at least the amounts purchased voluntarily under the policy. However, this coverage may be waived as is the current procedure. Currently only uninsured coverage is mandated and then...only for personal injury..not property damage.

AS 21.89.020 is amended to read:

(a) An automobile liability policy which insures an owner or operator of a motor vehicle against loss resulting from his liability for bodily injury or death, or for property damage or destruction, or both, which is sold in the state [AFTER JANUARY 1, 1969, BY AN INSURANCE CARRIER AUTHORIZED TO TRANSACT BUSINESS IN THE STATE], shall contain limits in at least the amount prescribed for a motor vehicle policy in AS 28.20.440 (b)(2) and AS 28.22.010 (b)(2) [AND MEET THE REQUIREMENTS OF AS. 28.20.440(b)(3) UNLESS WAIVED AS PROVIDED IN THAT PARAGRAPH.]

(b) In addition to the coverages and limits required in (a) of this section, an insurance company offering automobile liability insurance in this state shall offer coverage, with limits equal to at least the limit purchased voluntarily to cover the insured persons liability, for the protection of the persons insured under the policy who are legally entitled to recover damages from owners or operators of uninsured or underinsured motor vehicles. The coverage shall be offered in four parts, one or more of which may be waived pursuant to AS 28.20.440 (b)(3) or AS 28.22.010 (b)(3). The parts are:

(1) uninsured motorists,bodily injury;

(2) uninsured motorists, property damage;

(3) under insured motorists, bodily injury; and,

(4) under insured motorists, property damage.

(c) [(b)] This section may not be construed to apply only to automobile liability policies obtained to satisfy a requirment in AS 28.20 or AS 28.22.

AS 28.20.440 (b)(3) is amended to read:

(3) contain coverage in the amounts set out in (2) of this subsection for the protection of the persons insured under the policy who are legally entitled to recover damages from owners and operators of uninsured or under insured motor vehicles because of bodily injury or death, or damage to or destruction of property arising out of the ownership, maintenance or use of the uninsured or under insured motor vehicle, except that this coverage or part of it may be waived in writing by the insured on or before the effective date of the policy.

AMENDMENT #3...

I also proposed that this language in AS. 28.20.440 (b)(3) be used in lieu of the langauge proposed in AS 28.22.010(b)(3) of SSHB 7.

This amendment conflicts with the language change proposed in amendment #1 but is preferable. The adoption of amendment two would eliminate the need for amendment #1.

SECTION ANALYSIS -- MANDATORY AUTO LIABILITY INSURANCE
SSHB 7

Section 1 Declaration of Purpose. Expresses goal of legislation that motorists be financially responsible for their actions due to rising toll of accidents. The legislature declares that the public interest can best be served by the requirement to show proof of liability insurance pririot to registration.

Section 2 adds mobile homes as defined by statute to vehicles exempt from registration.

Section 3 Amends 28.10.011 by adding a new section under REGISTRATION which specifies an owner may not register or renew registration of a vehicle without providing proof of liability insurance as required in statute.

Section 4 Amends APPLICATION FOR REGISTRATION statute by specifying that certificate of registration may not be issued until the criteria set out in Section 3 above is met.

Section 5 Amends 28.10.111 (RENEWAL OF REGISTRATION) by adding a new section specifying that current registration may not be renewed until adequate proof of financial responsibility is shown as required in statute.

Section 6 Allows DMV to issue title to certain vehicles exempt from registration.

a) vehicles exempt under Soldier and Sailor's Civil Relief Act (current exemption)
b) special mobile equipment (new)
c) vehicles driven or parked on private property (new)
d) vehicles driven or moved on highway or vehicular way which is not connected to state highway system (new)
e) mobile homes as defined by statute (new)

Section 7 Requires proof of sufficient liability insurance on vehicles OWNED by driver before driver's license can be issued or renewed for both residents and non-residents. If driver did not OWN vehicles at time of license renewal, no proof would have to be shown. A person who owns a vehicle that is registered out of state must show proof of insurance prior to obtaining an Alaska license.

Section 8 Mandates suspension of license when advised that insurance has been cancelled and there is no response by license holder within 30 days of notice to suspend sent by department.

Section 9 Amends law to require knowledge of the effects of alcohol and drugs on driving and knowledge of laws relating to financial responsibility when taking test for driver's license.

Sections 10-13 Amends current financial responsibility law to increase liability limits to current rates as established for insurance polices under AS. 28.22.010 These are increasing limits from 25/50/10 to 100/300/50 thousand.

Section 14 adds requirement of offering underinsured motorist coverage for insurance policies written in state.

Section 15 adds new sections (l) and (m) to current definition of insurance policy. These are the same items as contained in the proposed definition under AS 28.22.010 (sec.17)

Section 16 Amends current law to increase amount of money or securities required as proof of insurance to a rate in line with policy requirements ... $100,000

Section 17 ADDS NEW CHAPTER 22 TO TITLE 28..Motor Vehicle Liability Insurance

This is virtually identical language to that now in statute 28.20.440.

CHANGES TO CURRENT LAW OR ADDITIONS:

28.22.010

(b) 2 A/B- increases minimum limits for insurance to be contained in policy. (These are the same limits that were amended in the previous 5 sections)

Bodily injury to or death of one person in any one accident
CURRENTLY $25,000 PROPOSED $100,000

Bodily injury to or death of two or more persons in any 1 accident
CURRENTLY $50,000 PROPOSED $300,000

Injury to or destruction of property of others in any one accident
CURRENTLY $10,000 PROPOSED $50,000

These are limits contained in most standard policies currently issued. These are also limits generally imposed by banks for insurance requirements to buy a car.

(3) Requires offering of underinsured motorist coverage in addition to uninsured coverage. Coverage will also relate to property damage. Current law on requires offering of uninsured coverage for bodily injury or death. But this may be waived in writing.

(l) Requires insurance carrier to notify DMV when a policy is cancelled within the first 180 days that a policy is in effect and within 10 days of knowledge of termination or intent to terminate. If a person whose coverage terminates fails to provide DMV with satisfactory evidence of insurance, DMV will suspend the driver's license and all registration certificates and plates issued to owner of vehivle until proof of insurance is given.

(m) Requires insurance carriers to provide the insured with a card indicating existance of satisfactory policy. This card must be carried in vehicle at all times.

28.22.020

To be considered effective, policies must be issued by insurance companies authorized to do business in state and meet financial limits imposed by statute. Allows for exception if power of attorney is executed.

28.22.500 PENALTIES

Penalties are imposed for driving or knowingly permitting to be driven a vehicle required to be insured unless the vehicle and driver are are covered by an adequate insurance policy. This section describes penalties for violation of that law. See attached sheet.
SEC. 28.20.510 sets out provisions relating to impoundment.

Allows for impoundment or release to person with right to possess a vehicle if a peace officer has cause to believe vehicle was driven without proper insurance. If released, the owner or person with right to possess must pay costs of impounding and storing.

Impoundment is until proof of insurance is shown if driver has not been previously convicted of similar offense or for 30-90 days if person has been previously convicted of similar violation within 10 years.

Upon impoundment, a hearing will be provided at the time of impoundment to the person with the right to possess the vehicle, the driver, other persons with an ownership interest. Following a hearing, the vehicle will be released to owner or person with right to possess if it is determined impoundment was improper or that at the time of impoundment the vehicle was being driven

by a person other than the owner or person with right to possess the vehicle AND

without the consent of the owner or person with right to possess the vehicle.

Vehicle will also be released if

the driver is not charged within 10 days of impoundment of an offense related to the impoundment OR any related charges are dropped or dismissed OR the driver is acquitted of any related offenses.

If the vehicle is not released after impoundment hearing, a lienholder may reposses the vehicle for sale and impoundment costs are to be paid by sale proceeds.

28.22.520/28.22.530 FORFEITURES

These provisions apply when forfeiture is called which happens following 3rd conviction within 10 years of driving without proper insurance.

Court will require surrender of registration and title. If not released, the department may dispose of the vehicle as governed by statutes.

Upon order to forfeit, the court will provide notification of intent to require forfeiture to all who have an ownership interest in vehicle. This will allow for any interested party to ask for remission of interest in the vehicle. Court will hold hearing if request for remission of interest is made and such interest will be remitted if

the petitioner has an interest in the vehicle acquired in good faith AND

a person other than the petitioner was convicted of the offense which resulted in forfeiture AND

before parting with the motor vehicle, the petitioner didn't know or have reasonable cause to believe it would be used in the commission of an offense.

This protects the vehicle dealer or, for example, the owner of a a car taken without permission or stolen.

If remission of interest is granted it may be either in the form of reimbursement for interest or repossession of the vehicle and title.

28.22.540 UNUSED MOTOR VEHICLES

This provision allows a person to terminate or suspend insurance policy without penalty by removing plates from vehicle and delivering them to DMV. When vehicle is to be used, driver must present proof of insurance to DMV and plates will be returned.

28.22.550 ANNUAL REPORT

Requires annual report beginning in February 1986 which is to assess impact of law with regard to effect on number of uninsured motorists, insurance rates and cost to administer law.

SECTION 16 Requires that insurance policies issued after June 30, 1983 meet requirements of liability policy described in this chapter. Since the bill would not become law until July 1, 1984, this would allow insurance companies to prepare to meet this requirement.

SECTION 17 Delays one provision of not issuing or renewing drivers license unless insurance is proven until 1/1/85. This allows DMV time to upgrade computer to provide for cross referencing licenses and owned cars.

SECTION 18 Effective date of act is 7/1/84.

PENALTIES UNDER AS 28.22.5000

A person may not drive or move nor may an owner knowingly permit to be driven or moved on a highway or vehicular way or area a vehicle required to be insured under a motor vehicle liability policy that complies with AS 28.22.010 unless a motor vehicle liability policy is in effect for the motor vehicle.

If stopped and a peace officer has reason to believe a person is driving without insurance, a citation for $250 will be given. The driver will then have 5 days to show the court that insurance was in effect at the time of the citation. If proof is shown, charges and fine will be dropped. OTHERWISE....

Violation of the law is a Class B misdemeanor.

Court will impose a minimum fine of $250 and maximum of $1000. Minimum fine may not be suspended. Court may also impose jail term of up to 90 days which may be suspended if fine is paid.

ADDITIONALLY THE COURT WILL IMPOSE THE FOLLOWING SANCTIONS:

1st Offense	SUSPENSION OF LICENSE FOR UP TO 30 DAYS
	SUSPENSION OF REGISTRATION UNTIL PROOF OF INSURANCE SHOWN
2nd Offense within 10 years	SUSPENSION OF LICENSE WITHOUT LIMITED DRIVING PRIVILEGES FOR MINIMUM OF 30 DAYS/MAXIMUM OF 90 DAYS
	SUSPENSION OF REGISTRATION AND IMPOUNDMENT OF VEHICLE FOR 90 DAYS OR LONGER UNTIL PROOF OF INSURANCE IS SHOWN. ALLOWS FOR JUDICIAL HEARING BEFORE ANY IMPOUNDMENT TAKES PLACE. SUCH A HEARING INCLUDES ANY PERSON NAMED ON TITLE OR WHO MAY HAVE A LIEN INTEREST.
3rd Offense 10 years	SUSPENSION OF LICENSE WITHOUT LIMITED DRIVING PRIVILEGES FOR within MINIMUM OF 90 DAYS TO MAXIMUM OF ONE YEAR.
	FORFEITURE OF VEHICLE UNDER AS 28.22.520

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

POSITION PAPER

SSHB 7: An act relating to motor vehicles; and providing for an effective date.

The Administration is not in favor of a mandatory automobile liability insurance system such as proposed in SSHB 7. The principal reasons for this position are:

1. Administration of the program is expensive and would necessitate a substantial bureaucracy to administer and enforce.

2. The cost of insurance is higher in a mandatory system. This is due to elimination of exclusions in the policy, elimination of defenses available to an insurer, and increased insurer administrative expense.

3. Mandatory systems do slightly increase the insured population but do not produce a commensurate reduction in loss caused by the uninsured operator.

4. The economically disadvantaged have less real personal need for liability insurance from a protection of assets viewpoint and this acts as a disincentive for compliance with a mandatory system.

The North Carolina/Virginia experience suggests that comparable, if not superior, inroads can be made on the uninsured population through a strong financial responsibility law and a mandatory offering of uninsured motorists coverage. Last year, a number of impediments to the smooth working of our law were corrected, but it is too soon to say how effective those changes will be in this State.

What is more to the point is not how many drivers are insured, but how many people are experiencing uncompensated loss caused by an uninsured motorist. Accordingly, we recommend as an alternative to the proposed legislation, a substitute that would mandate an offer by every insurer writing automobile liability insurance in this State, uninsured and underinsured motorists coverage, bodily injury and property damage in an amount at least as great as that purchased voluntarily for bodily injury and property damage liability. The offer currently exists only for basic limits; uninsured motorists coverage and bodily injury coverage. This would allow the insured motorist to protect himself from losses caused by uninsured or underinsured drivers.

The Honorable Walter Furnace
Chairman, Committee on Labor and Commerce
Alaska State House
Pouch V
Juneau, Alaska 99811

Re: SSHB 7

Dear Representative Furnace:

This letter is written on behalf of the American Insurance Association. That Association is a trade group of approximately 150 casualty - property insurance companies, several of which write a substantial amount of automobile insurance in this state. While they understand and share the concerns which led to the introducton of SSHB 7, they know from experience in other states that attempting to solve the problems caused by uninsured motorists by means of a compulsory insurance law will be expensive, largely ineffective and, in some ways, counterproductive. Thus, while insurance companies are normally happy to sell their product, the Association strongly opposes compulsory automobile insurance as a way to protect the more conscientious driver and his passengers.

The following sections set out some of the reasons we think that this bill would cause more problems than it solves.

Enforceability

Although reliable data as to the number of uninsured motorists in this State is hard to come by, it is believed that the great majority of responsible drivers, persons who tend to have assets to protect, are presently covered. Those who do not have insurance tend to be either less responsible, much less affluent, or both. Those who have little property or income have nothing to lose in a lawsuit, and have no incentive to buy insurance. As Dr. John W. Hall, Chairman of the Insurance

Department at Georgia State University reported to the South Carolina Joint Legislative Auto Liablity Insurance Study Committee in 1979, "They see the liability insurance policy as taking care of other people. The compulsory liability insurance system forces these people to pay high premiums relative to their own income for benefits for others when they cannot afford adequate benefits to cover their own losses."

Accordingly, there is typically very strong resistance to compulsory insurance by those who have not obtained insurance voluntarily. The history in three states that have had compulsory laws the longest, and have made the strongest efforts to enforce them, demonstrate the point:

- Massachusetts passed a compulsory law in 1927, more than 30 years earlier than any other state. In 1968, Governor John Volpe told the Massachusetts Legislature that "the people of the common wealth have lost confidence in our compulsory automobile insurance system." Uninsured motorists in that state are still a serious problem.

- New York passed a law in 1956; a study by the University of Michigan in 1963 found twice as many uninsured motorists as before the law. A study by the New York Daily News reported that the law had "failed miserably to achieve its aims."

- In North Carolina, 23 years of well financed and sophisticated enforcement has still left many vehicles uninsured.

Perhaps the most telling fact is that all compulsory states require insurers to offer uninsured motorist coverage, and most drivers buy it. They therefore carry a double burden in addition to their own coverage - the cost of the uninsured motorist coverage and the cost of trying to enforce the law.

The law has proven to be easy to avoid. A motorist typically buys the insurance and then cancels after the license and registration are issued. The notice of cancellation to the state by the insurer sits in a large pile of similar notices; police, who must give higher priority to more serious crimes, cannot afford to send officers out to confiscate tags, but usually enforce only in the event of arrests or other offenses. The net change in the number of insured motorists is usually low.

The Cost of Enforcement

As noted, enforcement has proven to be ineffective in other states. Nevertheless, it is expensive. We invite the Commiteee to question Public Safety officials closely on what will be done, and not assume that a million dollars will mean

effective enforcement. Full and active enforcement, with citations for insurance lapses in the absence of other offenses, and with actions to find and take uninsured vehicles off the road, will cost, we are sure, a multiple of the fiscal note now accompanying the bill.

The Cost of Insurance

The Committee will be given figures by the Division of Insurance indicating estimates of 20-30% increases in premiums for minimum coverage changes in this bill, and perhaps 10% for the compulsory aspect and its effects. Attached to this letter is a chart showing rate increases historically noted in compulsory states as compared with otherwise similar states for similar coverages. These figures tend to corroborate the Dvision of Insurance estimates, athough there is variation from state to state.

There are several factors which will tend to increase premiums. They include

- The fact that presently uninsured motorists include a high percentage of high-risk motorists, which will be put in the assigned risk pool and will drive claim frequency up.

- The facts that plaintiffs' counsel will be working with higher limits, and juries will presume that any award will be against an insurer rather than personal assets (a presumption, as we have seen, that may not be warranted).

In the first 11 years, Massachusetts saw compulsory insurance claim frequency increase 33 percent, at a time when nationwide frequency was declining 21 percent. In 1968, Governor Volpe said:

> The personal injury claims frequency in the commonwealth is 1.8 times that of the next highest state (which also happens to be a compulsory state), and twice the national average. This claims frequency may be directly related to our high insurance costs and also supports the conclusion that under our compulsory system, Massachusetts motorists have become more claims conscious than those in other states.

Alternatives

Experience shows in compulsory states that responsible drivers continue to purchase uninsured motorist coverage. Coverage can also be purchased for so-called "underinsured" motorists. A law requiring insurers to offer both uninsured and

underinsured motorist coverage is not unreasonable, and allows an informed choice by each insured as to what he or she will protect against.

In addition, it is suspected that enforcement of the Financial Responsibilty law could be improved, but no study of its enforcement or possible improvements is to be our knowledge available. Study of this possibility should be authorized.

Conclusion

It is certainly appropriate for the legislature to identify uninsured motorists as a matter of concern, and to attempt to lessen the impact of irresponsible drivers. We encourage careful consideration of available alternatives to choose an effective measure. A promise to responsible drivers that everyone will be insured, probably cannot be kept, and the attempt will be expensive to the state and the motorist alike.

We are continuing to gather information pertinent to this problem, and will provide any specific information we can in response to your request.

I have not attempted a section-by-section comment on the bill in this letter, pending some indication of the Committee's early intentions with regard to the bill. There are some problems with individual sections not alluded to here.

Thank you for the chance to comment.

Sincerely,

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

M. T. Thomas

RATE LEVELS IN COMPARABLE STATES WITHOUT COMPULSORY SYSTEMS

Compulsory States (a)	Comparable States (b)	Overall Pure Premium Percent Change (c)	Average Annual Pure Premium Percent Change (c)
LOUISIANA (7/1/78)		14.2%	11.2%
	Alabama	0.1	0.9
	Mississippi	-1.2	1.4
	Tennessee	1.6	-1.3
MARYLAND (7/1/73)		43.3%	7.9%
	Indiana	21.3	5.0
	Virginia	32.0	6.2
	D.C.	23.9	4.4
OKLAHOMA (12/11/76)		11.6%	3.7%
	Arkansas	10.9	3.5
	Iowa	7.0	2.8
	Missouri	3.7	1.0
OREGON (1/1/76)		35.0%	8.4%
	Maine	19.6	3.9
	West Virginia	18.8	6.8
	Wisconsin	12.8	3.7
SOUTH CAROLINA (10/1/74)		27.0%	5.6%
	Alabama	22.5	5.5
	Arkansas	21.1	4.1
	Tennessee	14.9	2.9

(a) - The figures in the parentheses by the compulsory states are the effective dates of their compulsory laws.

(b) - The comparison states were chosen for their similarity to a compulsory state in demographic characteristics, geographic characteristics and the number of insured vehicles.

(c) - The liability pure premium ratio was used as a basis for comparison because it represents the average amount of loss per insured vehicle. An increase in pure premium suggests that the average claim per insured vehicle has risen as a sresult of the inclusion of those motorists who did not carry auto liability insurance prior to the adoption of the compulsory law.

SOURCE OF DATA: Fast Track Monitoring System, comprising loss experience of companies reporting to the National Association of Independent Insurers and the Insurance Services Office. The Fast Track Monitoring System loss experience begins with data for the year ending fourth quarter 1976.

TIME PERIOD: The time period selected for comparison purposes is that period after which each compulsory law has become effective (and limited to when the Fast Track Monitoring System loss experience begins) through the year ending second quarter 1981.

MAR 1 4 1983

March 9, 1983

Representative Joe L. Hayes
Pouch V
Juneau, Alaska 99811

Dear Representative Hayes:

I am writing this letter in pain, outrage and total disgust. I have painfully become aware of the completely inadequate and antiguated driving laws of this state as a result of my son Sean's death at the hands of an irresponsible, uninsured driver who was drinking, speeding, ran a red light and God only knows what else. This driver can afford alcohol and drugs (they were found in his car) but he cannot afford insurance!

The law concerning the requirement to have auto insurance, better known as "the State gives you a free one" is at best a farce. Having lived here 44 years and watching the traffic increase to the point beyond the capacity of our road system, coupled with the irresponsible attitude of the outsiders coming in and the young people growing up, dictates that the law be tightened.

It is imperative that mandatory auto insurance be required of those wishing to drive in the State of Alaska. When auto licenses are renewed or bought, or with registration and/or titles, proof of insurance at that time should be shown. Upon cancellation of insurance, then licenses revoked. In short No Insurance - No License!

Sean was not allowed to own a car or drive without insurance which he bought and paid for himself and he took that responsibility with him into his young adulthood and was subsequently killed by a person who apparently did not care or have any regard about others.

The time is long past due for all Alaskans new or old to accept the responsibilties attached to owning and driving an automobile and the necessary steps to accomplish this rests squarely on your shoulders.

Sincerely,

Robert J. Sinnett

In Memoriam

* SEAN SINNETT *

The members of the Legislature are deeply saddened at the tragic and untimely death of a young third generation Alaskan, Sean Sinnett of Anchorage.

Sean was a bright and enthusiastic young man, filled with vitality. Born in Anchorage, he was a 1980 graduate of East Anchorage High School. He was goalie for the hockey team in 1980 when it won the State Championship. In more recent years he was an employed member of the Teamsters and an avid hot-air balloonist.

It distresses us greatly to learn of this fine young man's death and the tragic circumstances surrounding it. Accidents involving pedestrians seem so needless and preventable. It should sadden every Alaskan to know of the loss of this promising young citizen and renew in each of us a dedication to do whatever we can to make certain that our highways and streets are made safe not only for drivers, but for pedestrians as well.

We wish to extend to Mr. and Mrs. Robert Sinnett, and to Christopher and Teresa our deepest and most heartfelt condolences. We share your loss. Our thoughts are with you at this most difficult time.

SPEAKER OF THE HOUSE

PRESIDENT OF THE SENATE

Date:

Requested by: Senator Ke[illegible]y, Hefford, Stu[illegible]

MOTOR VEHICLE SAFETY RESPONSIBILITY ACT

HEADINGS TITLE 28.
Motor Vehicles.
CHAPTER 20.
Motor Vehicle Safety Responsibility Act.

DECLARATION OF PURPOSE.

The legislature is concerned over the rising toll of motor vehicles accidents and the suffering and loss inflicted by them. The legislature determines that it is a matter of grave concern that motorists be financially responsible for their negligent acts so that innocent victims of motor vehicle accidents may be recompensed for the injury and financial loss inflicted upon them. The legislature finds and declares that the public interest can best be served by the requirements that the operator of a motor vehicle involved in an accident respond for damages and show proof of financial ability to respond for damages in future accidents as a prerequisite to his exercise of the privilege of operating a motor vehicle in the state.

HISTORY (Sec. 2 ch 163 SLA 1959)

Sec. 28.20.020.
ADMINISTRATION.

(a) The department shall administer and enforce this chapter and may adopt rules and regulations necessary for its administration.

(b) The department shall receive and consider any pertinent information upon request of persons aggrieved by its orders or acts under this chapter.

(c) The department shall prescribe and provide suitable forms requisite or considered necessary to carry out this chapter.

HISTORY (Sec. 4 ch 163 SLA 1959)

Sec. 28.20.030.
COURT REVIEW.
Repealed by sec. 4 ch 140 SLA 1977.

Sec. 28.20.040.
DEPARTMENT TO FURNISH OPERATING RECORD.
Repealed by sec. 20 ch 241 SLA 1976.

Sec. 28.20.050.
APPLICATION OF CHAPTER.

(a) The provisions of this chapter requiring deposit of security and suspension for failure to deposit security apply to the driver and owner of a vehicle subject to registration under the laws of this state which is involved in any manner in an accident in this state resulting in bodily injury to or death of a person or damage to the property of any one person exceeding $500.

(b) Not less that 20 days after receipt of a report of such accident, the department shall determine the amount of security which it considers sufficient to satisfy any judgments for damages resulting from the accident which may be recovered against each driver or owner. The determination shall not be made with respect to a driver or owner who is exempt from the requirements as to security and suspension.

(c) The department shall determine the amount of security deposit required upon the basis of the reports or other information submitted. If a person involved in an accident as described in this chapter fails to make a report or submit information indicating the extent of his injuries or the damage to his property within 30 days after the accident, and the department does not have sufficient information on which to base an evaluation of injuries or damage, then the department after reasonable notice to the person, if it is possible to give notice, otherwise without notice, shall not require a deposit of security for the benefit or protection of the person.

(d) Within 30 days after receipt of report of an accident and upon determining the amount of security to be required of any person involved in the accident or to be required of the owner of any vehicle involved in the accident, the department shall give to every person written notice of the amount of security required to be deposited by him and stating that an order of suspension will be made upon the expiration of 10 days after the notice is sent unless within that time security is deposited as required. No license may be suspended unless the licensee is afforded a hearing by the department at which it is determined that there is a reasonable possibility of a judgment being rendered holding him liable.

(e) A peace officer investigating an accident that results in bodily injury to or the death of a person or damage to the property of a person exceeding $500 shall inform persons involved in the accident in writing of the requirements of this chapter as they apply to suspension of an operator's license or driving privileges.

HISTORY (Sec. 7 ch 163 SLA 1959; am sec. 1 ch 127 SLA 1972; am sec. 11 ch 144 SLA 1977; am sec. 3 ch 78 SLA 1982)

Sec. 28.20.060.
EXCEPTIONS TO REQUIREMENT OF SECURITY.
The requirements as to security and suspension in this chapter do not apply to

(1) the driver or owner if the owner had in effect at the time of the accident an automobile liability policy or bond with respect to the vehicle involved in the accident, except that a driver is not exempt if at the time of the accident the vehicle was operated without the owner's express or implied permission;

(2) the driver who is not the owner if there was in effect at the time of the accident an automobile liability policy or bond with respect to his driving of vehicles not owned by him;

(3) a driver or owner whose liability for damages resulting from the accident is, in the judgment of the department, covered by another form of liability insurance policy or bond;

(4) a person qualifying as a self-insurer under sec. 400 of this chapter or to a person operating a vehicle for a self-insurer;

(5) the driver or owner of a vehicle involved in an accident in which no injury or damage was caused to the person or property of anyone other than the driver or owner;

(6) the driver or owner of a vehicle which at the time of the accident was parked, unless the vehicle was parked at a place where parking was at the time of the accident prohibited by a law or ordinance;

(7) the owner of a vehicle if at the time of the accident the vehicle was operated without his express or implied permission or was parked by a person operating the vehicle without the permission;

(8) the owner of a vehicle or the driver of a vehicle operating it with permission if at the time of the accident the vehicle was owned or leased to the United States, this state or a political subdivision of this state or a municipality of the state; or

(9) the driver or the owner of a vehicle if at the time of the accident the vehicle was operated by or under the direction of a police officer who, in the performance of his duties, assumed custody of the vehicle.

Sec. 28.20.070.
REQUIREMENTS AS TO POLICY OR BOND.

(a) No policy or bond is effective under sec. 60 of this chapter unless it is issued by an insurance company or surety company authorized to do business in this state, except as provided in (b) of this section, and if the accident resulted in bodily injury or death, unless the policy or bond is subject to a limit, exclusive of interest and costs, of not less than $25,000 because of bodily injury to or death of one person in any one accident and, subject to the same limit for one person, to a limit of not less than $50,000 because of bodily injury to or death of two or more persons in any one accident, and if the accident has resulted in injury to, or destruction of, property to a limit of not less than $10,000 because of injury to or destruction of property of others in any one accident.

(b) No policy or bond is effective under sec. 60 of this chapter with respect to a vehicle not registered in this state or a vehicle which was registered in another jurisdiction at the effective date of the policy or bond or the most recent renewal of it, unless the insurance or surety company issuing the policy or bond is authorized to do business in this state, or if the company is not authorized to do business in this state, unless it executes a power of attorney authorizing the director of the division of insurance to accept service on its behalf of notice or process in an action upon the policy or bond arising out of the accident.

(c) The department may rely upon the information in an accident report as to the existence of insurance or a bond unless the department has reason to believe that the information is erroneous.

HISTORY (Sec. 9 ch 163 SLA 1959; am sec. 1 ch 146 SLA 1966; am sec. 1 ch 202 SLA 1975; am sec. 12 ch 144 SLA 1977)

Sec. 28.20.080.
FORM AND AMOUNT OF SECURITY.

(a) The security required by this chapter shall be in the form and amount the department requires, but in no case in excess of the limits specified in sec. 70 of this chapter for the acceptable limits of a policy or bond.

(b) Every depositor of security shall designate in writing the person in whose name the deposit is made and may at any time change the designation, but a single deposit of security applies only on behalf of a person required to furnish security because of the same accident.

HISTORY (Sec. 10 ch 163 SLA 1959)

Sec. 28.20.090.
SUSPENSION FOR FAILURE TO DEPOSIT SECURITY.
(a) If a person required to deposit security under this chapter fails to deposit security within 10 days after the department sends notice, the department shall suspend
(1) the license of each driver involved in the accident;
(2) the privilege of operating a vehicle subject to registration if the driver is a nonresident;
(3) the privilege of the owner to operate or permit the operation within this state of a vehicle subject to registration if the owner is a nonresident.
(b) Suspensions shall be made in respect to persons required by the department to deposit security who fail to deposit such security, except as otherwise provided under succeeding sections of this chapter.
HISTORY (Sec. 11 ch 163 SLA 1959) CITATION

Sec. 28.20.100.
RELEASE FROM LIABILITY.
(a) A person is relieved from the requirement for deposit of security for the benefit or protection of another person injured or damaged in the accident if he is released from liability by the other person.
(b) A covenant not to sue relieves the parties to it as to each other from the security requirements of this chapter.
(c) If the department evaluates the injuries or damage to a minor in an amount not more than $500, the department may accept, for the purposes of this chapter only, evidence of a release from liability executed by a natural or legal guardian on behalf of the minor without court approval.
HISTORY (Sec. 12 ch 163 SLA 1959; am sec. 13 ch 144 SLA 1977)

Sec. 28.20.110.
ADJUDICATION OF NONLIABILITY.
A person is relieved from the requirement for deposit of security for a claim for injury or damage arising out of the accident if the person is finally adjudicated not to be liable for the claim. HISTORY (Sec. 13 ch 163 SLA 1959)

HISTORY (Sec. 14 ch 163 SLA 1959; am sec. 4 ch 78 SLA 1982)

Sec. 28.20.120.
AGREEMENTS FOR PAYMENT OF DAMAGES
(a) Two or more persons involved in or affected by an accident as described in AS 28.20.050 may at any time enter into a written agreement for the payment of an agreed amount with respect to their claims because of bodily injury, death, or property damage arising from the accident. The agreement may provide for payment in installments. The parties may file a signed copy of the agreement with the department.
(b) If proof of financial responsibility is provided and to the extent provided by the written agreement filed with it, the department shall not require the deposit of security and shall terminate a previous order of suspension, or if security was deposited, the department shall immediately return the security to the depositor or his personal representative.

(c) If there is a default in a payment under the agreement upon notice of default the department shall take action suspending the license of the person in default as is appropriate in case of failure of the person to deposit security when required under this chapter. (d) The suspension remains in effect and the license may not be restored until

(1) security is deposited as required under this chapter in the amount the department determines; or

(2) when, following default and suspension, the person in default pays the balance of the agreed amount; or

(3) one year elapses following the effective date of the suspension and evidence satisfactory to the department is filed with it that during the period no action at law upon the agreement is pending.

Sec. 28.20.130.
PAYMENT UPON JUDGMENT.
The payment of a judgment arising out of an accident, or the payment upon judgment of an amount equal to the maximum amount which could be required for deposit under this chapter, for the purposes of this chapter, releases the judgment debtor from the liability evidenced by the judgment. HISTORY (Sec. 15 ch 163 SLA 1959; am sec. 12 ch 2 SLA 1964)

Sec. 28.20.140.
TERMINATION OF SECURITY AGREEMENT
If satisfied as to the existence of a fact which under secs. 100 - 130 of this chapter entitles a person to be relieved from the security requirements, the department shall not require the deposit of security and shall terminate a previous order of suspension in respect to the person, and shall immediately return the deposit to the person or his personal representative. HISTORY (Sec. 16 ch 163 SLA 1959)

Sec. 28.20.150.
DURATION OF SUSPENSION.
(a) Unless a suspension is terminated under other provisions of this chapter, an order of suspension by the department remains in effect until terminated and no license may be renewed or issued to a person whose license is suspended until proof of financial responsibility for the future is provided and

(1) the person deposits or there is deposited on his behalf the security required under this chapter; or

(2) three years elapse following the date of suspension.

(b) Repealed by sec. 9 ch 78 SLA 1982.
HISTORY (Sec. 17 ch 163 SLA 1959; am secs. 5, 9 ch 78 SLA 1982)

Sec. 28.20.160.
APPLICATION TO NONRESIDENTS, UNLICENSED DRIVERS, UNREGISTERED VEHICLES AND ACCIDENTS IN OTHER STATES.
(a) If a driver or owner of a vehicle subject to registration under the laws of this state involved in an accident in this state does not have a license or registration in this state, then the driver may not be licensed, nor may the owner register a vehicle in this state until he complies with the requirements of this chapter to the extent necessary if, at the time of the accident, he had held a license or been the owner of a vehicle registered in this state.

(b) When a nonresident's operating privilege is suspended under sec. 90 of this chapter the department shall send a certified copy of the record of the action to the official in charge of the issuance of licenses and registration certificates in the state in which the nonresident resides, if the law of the other state provides for action similar to that provided for in (c) of this section.

(c) Upon receiving certification that the operating privilege of a resident of this state has been suspended or revoked in another state under a law providing for its suspension or revocation for failure to deposit security for the payment of judgments arising out of an accident under circumstances which would require the department to suspend a nonresident's operating privilege if the accident had occurred in this state, the department shall suspend the license of the resident. The suspension continues until the resident furnishes evidence of his compliance with the law of the other state relating to the deposit of security.

HISTORY (Sec. 18 ch 163 SLA 1959)

Sec. 28.20.170.
AUTHORITY OF DEPARTMENT TO DECREASE AMOUNT OF SECURITY. The department may reduce the amount of security ordered within six months after the date of the accident if in its judgment the amount is excessive. If the security originally ordered is on deposit, the excess deposit over the reduced amount ordered shall be returned immediately to the depositor or his personal representative. HISTORY (Sec. 19 ch 163 SLA 1959)

Sec. 28.20.180.
CORRECTION OF ACTION OF DEPARTMENT. If the department takes action or fails to take action under this chapter due to erroneous information or no information, upon receiving correct information within one year after the date of an accident the department shall take appropriate action to carry out the purposes and effect of this chapter. However, this section does not require the department to re-evaluate the amount of a deposit required. HISTORY (Sec. 20 ch 163 SLA 1959)

Sec. 28.20.190.
CUSTODY OF SECURITY. The department shall place security deposited with it in the custody of the Department of Revenue. HISTORY (Sec. 21 ch 163 SLA 1959)

Sec. 28.20.200.
DISPOSITION OF SECURITY.

(a) The security deposited is available only for

(1) the payment of a settlement agreement covering a claim arising out of the accident upon instruction of the person who made the deposit, or

(2) the payment of a judgment given against the person required to make the deposit for damages arising out of the accident in an action at law begun not later than one year after the deposit of security, or within one year after the date of deposit of security following failure to make payments under an agreement to pay.

(b) Every distribution of funds from a security deposit is subject to the limits of the department's evaluation on behalf of a claimant. HISTORY (Sec. 22 ch 163 SLA 1959)

Sec. 28.20.210.
RETURN OF DEPOSIT.

(a) Upon the expiration of two years from the date of deposit of security, the security remaining on deposit shall be returned to the person who made the deposit or his personal representative if an affidavit or other evidence satisfactory to the department is filed with it showing that

(1) no action for damages arising out of the accident for which deposit was made is pending against the person on whose behalf the deposit was made, and

(2) there does not exist any unpaid judgment against the person in an action.

(b) This section does not limit the return of a deposit of security under any other provision of this chapter authorizing return. HISTORY (Sec. 23 ch 163 SLA 1959; am sec. 6 ch 78 SLA 1982)

Sec. 28.20.220.
MATTERS NOT TO BE EVIDENCE IN CIVIL SUITS. The report required after an accident, the action taken by the department under this chapter, the findings, if any, of the department upon which its action is based, and the security filed shall not be referred to, and shall not be evidence of the negligence or due care of either party, at the trial of an action to recover damages. HISTORY (Sec. 24 ch 163 SLA 1959)

Sec. 28.20.230
PROOF OF FINANCIAL RESPONSIBILITY FOR THE FUTURE.

(a) The provisions of this chapter requiring the deposit of proof of financial responsibility for the future apply to persons who are convicted of or forfeit bail for certain offenses under motor vehicle laws or who, by ownership or operation of a vehicle of a type subject to registration under ch. 10 of this title, are involved in an accident in this state which results in bodily injury or death of a person or damage to the property of any one person exceeding $500.

(b) The term "proof of financial responsibility for the future" as used in this chapter means proof of ability to respond in damages for liability, on account of an accident occurring after the effective date of proof, which arises out of the ownership, maintenance or use of a vehicle subject to registration under the laws of this state, in the amount of $25,000 because of bodily injury to or death of one person in any one accident, and, subject to the same limit for one person, in the amount of $50,000 because of bodily injury to or death of two or more persons in any one accident, and in the amount of $10,000 because of injury to or destruction of property of others in any one accident. As used in this chapter the terms "proof of financial responsibility" or "proof" mean proof of financial responsibility for the future.

HISTORY (Sec. 25 ch 163 SLA 1959; am sec. 59 ch 69 SLA 1970; am sec. 2 ch 202 SLA 1975; am sec. 14 ch 144 SLA 1977)

Sec. 28.20.240.
PROOF REQUIRED WHEN USE OF LICENSE IS RESTRICTED.

Whenever under a law of this state the license of a person is suspended, revoked, limited under AS 28.15.201, or canceled for any reason, the department may not issue to that person a new or renewal of license in his name until permitted to do so under the motor vehicle laws of this state. A period of suspension, revocation, limitation, or cancellation under this section continues until proof of financial responsibility for the future is provided.

HISTORY (Sec. 26 ch 163 SLA 1959; am sec. 7 ch 78 SLA 1982)

Sec. 28.20.250.
ACTION IN RESPECT TO UNLICENSED PERSON.

(a) If a person does not have a license, but by final order or judgment is convicted of, or forfeits bail or collateral deposited to secure an appearance for trial for an offense requiring the suspension or revocation of license, or for driving a motor vehicle upon the highways without being licensed to do so, or for driving an unregistered vehicle upon the highways, no license shall be issued to the person unless he gives and thereafter maintains proof of financial responsibility for the future.

(b) Whenever the department suspends or revokes a nonresident's operating privilege for conviction or forfeiture of bail, the privilege remains suspended or revoked unless the person has previously given or immediately gives proof of financial responsibility for the future.

HISTORY (Sec. 27 ch 163 SLA 1959)

Sec. 28.20.260.
WHEN PROOF REQUIRED AFTER ACCIDENTS.

(a) Upon receipt by the department of the report of an accident resulting in bodily injury or death, or property damage to any one person exceeding $500, the department shall suspend the license of the driver of a motor vehicle involved in the accident unless the driver or owner

(1) has previously furnished or immediately furnishes security required by this chapter, or is excepted from furnishing security under sec. 60 of this chapter, and

(2) maintains proof of financial responsibility for three years following the accident.

(b) This section does not apply to an owner or operator with respect to an accident in which a judgment in his favor is given on a cause of action arising out of the accident which establishes his freedom from fault.

HISTORY (Sec. 28 ch 163 SLA 1959; am sec. 15 ch 144 SLA 1977)

Sec. 28.20.270.
SUSPENSION FOR NONPAYMENT OF JUDGMENTS. Upon receipt of a certified copy of a judgment and a certificate of facts relative to the judgment, the department shall immediately suspend the license or nonresident's operating privilege of a person against whom the judgment is given except as otherwise provided in this chapter. HISTORY (Sec. 29 ch 163 SLA 1959)

Sec. 28.20.280.
WHEN COURTS TO REPORT NONPAYMENT OF JUDGMENTS. If a person fails within 30 days to satisfy a judgment arising out of a motor vehicle accident, the clerk of the court, or the judge if there is no clerk, in which the judgment is given, shall forward to the department a certified copy of the judgment and a certificate of facts relative to the judgment. HISTORY (Sec. 30 ch 163 SLA 1959)

Sec. 28.20.290.
FURTHER ACTION WITH RESPECT TO NONRESIDENTS. If the defendant named in a certified copy of a judgment reported to the department is a nonresident, the department shall send a certified copy of the judgment to the official in charge of the issuance of licenses and registrations of the state of which the defendant is a resident. HISTORY (Sec. 31 ch 163 SLA 1959)

Sec. 28.20.300.
EXCEPTION FOR GOVERNMENT VEHICLES. Sections 260 and 270 of this chapter do not apply to an accident caused by the ownership or operation, with permission, of a vehicle owned or leased to the United States, this state, or a political subdivision or municipality of this state. HISTORY (Sec. 32 ch 163 SLA 1959)

Sec. 28.20.310.
EXCEPTION WHEN CONSENT GRANTED BY JUDGMENT CREDITOR. If the judgment creditor consents in writing in a form prescribed by the department to the issuance of a license or nonresident's operating privilege to the judgment debtor, the department may allow it for six months from the date of such consent and thereafter until the consent is revoked in writing, if the judgment debtor furnishes proof of financial responsibility notwithstanding default in the payment of judgment, or of an installment of the judgment prescribed in sec. 270 of this chapter. HISTORY (Sec. 33 ch 163 SLA 1959) -

Sec. 28.20.320.
EXCEPTIONS WHEN INSURER LIABLE. No license or nonresident's operating privilege shall be suspended under this chapter if the department finds that an insurer is obligated to pay the judgment upon which suspension is based at least to the extent and for the amounts required in this chapter, but has not paid the judgment for any reason. A finding by the department that an insurer is obligated to pay a judgment is not binding upon the insurer and has no legal effect except for the purpose of administering this section. If in a judicial proceeding it is determined by a final judgment, decree or order that an insurer is not obligated to pay a judgment, the department, notwithstanding any contrary finding made by it, shall immediately suspend the license or nonresident's operating privilege of a person against whom the judgment is given, as provided in sec. 270 of this chapter. HISTORY (Sec. 34 ch 163 SLA 1959)

Sec. 28.20.325.
EXCEPTION FOR BUSINESS RELATIONSHIP. If the driver at the time of an accident was driving, in the course and scope of his employment, a vehicle owned, operated or leased by his employer, the security deposit, proof of future responsibility and suspension provisions of this chapter apply to the employer and to the vehicles owned by him or registered under his name and do not apply to the driver. HISTORY (Sec. 1 ch 25 SLA 1966)

Sec. 28.20.330.
SUSPENSION TO CONTINUE UNTIL JUDGMENTS PAID AND PROOF GIVEN.
(a) If a person has an unsatisfied judgment against him requiring suspension under sec. 270 of this chapter, his license or nonresident's operating privilege shall remain suspended and shall not be renewed, nor shall a license or registration be issued in the name of the person, including a person not previously licensed, until the judgment is stayed or satisfied and until the person gives proof of financial responsibility subject to the exceptions in secs. 310 - 320, and 370 of this chapter.
(b) The proof required by (a) of this section shall be maintained during the period the person has a license or nonresident's operating privilege.

HISTORY (Sec. 35 ch 163 SLA 1959)

Sec.28.20.340
LICENSE CANCELLED, SUSPENDED OR REVOKED.
Upon receiving a record of the conviction of a person for driving a vehicle while his license was suspended, the department shall immediately suspend the registration of every vehicle registered in his name until he gives proof of financial responsibility for the future for each vehicle registered in his name. HISTORY (Sec. 36 ch 163 SLA 1959)

Sec. 28.20.360.
PAYMENTS SUFFICIENT TO SATISFY REQUIREMENTS.
(a) For the purpose of this chapter, a judgment is satisfied when
(1) $25,000 is credited upon a judgment given in excess of that amount because of bodily injury to or death of one person as the result of any one accident; or
(2) subject to the limit of $25,000 because of bodily injury to or death of one person, the sum of $50,000 is credited upon a judgment given in excess of that amount because of bodily injury to or death of two or more persons as the result of any one accident; or
(3) $10,000 is credited upon a judgment given in excess of that amount because of injury to or destruction of property of others as a result of any one accident.
(b) However, payments made in settlement of a claim because of bodily injury, death or property damage arising from the accident shall be credited in reduction of the amounts provided for in this section. HISTORY (Sec. 38 ch 163 SLA 1959; am secs. 60, 61 ch 69 SLA 1970; am sec. 3 ch 202 SLA 1975)

Sec. 28.20.370.
INSTALLMENT PAYMENT OF JUDGMENTS; DEFAULT.

(a) A judgment debtor upon due notice to the judgment creditor may apply to the court in which such judgment was rendered for the privilege of paying the judgment in installments and the court, without prejudice at any other legal remedy, may order and fix the amount and time of payment of the installments.

(b) The department shall not suspend a license or nonresident's operating privilege, and shall restore a license or nonresident's operating privilege suspended following nonpayment of a judgment, when the judgment debtor gives proof of financial responsibility and obtains an order permitting the payment of the judgment in installments. (c) If the judgment debtor fails to pay an installment specified by the court order, upon notice of default, the department shall immediately suspend the license or nonresident's operating privilege of the judgment debtor until the judgment is satisfied as provided in this chapter.
HISTORY (Sec. 39 ch 163 SLA 1959) -

Sec. 28.20.380.
REGISTRATION AND OPERATOR'S RIGHTS LIMITED BY EXTENT OF PROOF.

(a) When a certificate is filed showing that a policy is issued covering a motor vehicle owned by the insured, but not insuring the person when operating a motor vehicle not owned by him, the restriction may be removed upon the filing of a certificate showing an operator's policy issued to the person.
(b) If the department receives evidence of the violation of the restriction on the license, it may suspend the license until a certificate is filed showing an operator's policy issued to the holder of the license. HISTORY (Sec. 40 ch 163 SLA 1959)

Sec. 28.20.390.
ALTERNATE METHODS OF GIVING PROOF.
Proof of financial responsibility for a person who is not the owner of a vehicle may be given by filing

(1) a certificate of insurance as provided in secs. 410 or 420 of this chapter;

(2) a bond as provided in sec. 470 of this chapter;

(3) a certificate of deposit of money or securities as provided in sec. 490 of this chapter; or

(4) a certificate of self-insurance as provided in sec. 400 of this chapter, supplemented by an agreement by the self-insurer that, for accidents occurring while the certificate is in force, he will pay the same amount that an insurer would be obligated to pay under an owner's motor vehicle liability policy if it had issued a policy to the self-insurer.
HISTORY (Sec. 41 ch 163 SLA 1959)

Sec. 28.20.400.
SELF-INSURERS.

(a) A person in whose name more than 25 vehicles are registered in this state may qualify as a self-insurer by obtaining a certificate of self-insurance issued by the department as provided in (b) of this section.

(b) The department may issue a certificate of self-insurance when it is satisfied that the person has and will continue to have ability to pay judgments obtained against him. The certificate may be issued authorizing a person to act as a self-insurer for either property damage or bodily injury, or both, or within the limits the department prescribes.

(c) Upon not less than 10 days' notice and a hearing pursuant to the notice, the department may upon reasonable grounds cancel a certificate of self-insurance. Failure to pay a judgment within 30 days after judgment becomes final is a reasonable ground for the cancellation of a certificate of self-insurance. HISTORY (Sec. 42 ch 163 SLA 1959)

Sec. 28.20.410.
CERTIFICATE OF INSURANCE AS PROOF.

Proof of financial responsibility for the future may be furnished by filing with the department the written certificate of an insurance carrier authorized to do business in this state certifying that there is in effect a motor vehicle liability policy for the benefit of the person required to furnish proof of financial responsibility. The certificate shall give the effective date of the motor vehicle liability policy, which shall be the same as the effective date of the certificate, and shall designate by description or appropriate reference all vehicles covered by it, unless the policy is issued to a person who is not the owner of a motor vehicle.
HISTORY (Sec. 43 ch 163 SLA 1959)

Sec. 28.20.420.
CERTIFICATE FURNISHED BY NONRESIDENT AS PROOF.

(a) A nonresident may give proof of financial responsibility by filing with the department a written certificate of an insurance carrier authorized to transact business in the state in which the vehicle described in the certificate is registered, or if the nonresident does not own a vehicle, then in the state in which the nonresident resides, if the certificate otherwise conforms with this chapter; the department shall accept it upon condition that the insurance carrier complies with (b) and (c) of this section.

(b) The insurance carrier shall execute a power of attorney authorizing the department of accept service on its behalf of notice or process in an action arising out of a motor vehicle accident in this state.

(c) The insurance carrier shall agree in writing that the policy shall conform with the laws of this state relating to the terms of motor vehicle liability policies issued in this state.
HISTORY (Sec. 44 ch 163 SLA 1959; am sec. 44 ch 32 SLA 1971) -

Sec. 28.20.430.
DEFAULT BY NONRESIDENT INSURER.
If an insurance carrier not authorized to transact business in this state, but qualified to furnish proof of financial responsibility in this state, defaults in an undertaking or agreement, the department shall not accept as proof a certificate of the carrier whether previously filed or thereafter tendered as proof, so long as the default continues.
HISTORY (Sec. 45 ch 163 SLA 1959)

Sec. 28.20.440.
MOTOR VEHICLE LIABILITY POLICY.
(a) In this AS 28.20.010 - 28.20.640, "motor vehicle liability policy" means an "owner policy" or an "operator's policy" containing an agreement or endorsement as provided in this section, or certified as provided in AS 28.20.410 or 28.20.420 as proof of financial responsibility for the future, and issued, except as otherwise provided in AS 28.20.420, by an insurance carrier authorized to transact business in this state, to or for the benefit of the person named as insured.
(b) The owner's policy of liability insurance shall
(1) designate by description or appropriate reference all vehicles which it covers;
(2) insure the person named and every other person using the vehicle with the express or implied permission of the named insured, against loss from the liability imposed by law for damages arising out of the ownership, maintenance or use of the vehicle within the United States of America or the Dominion of Canada, subject to limits exclusive of interests and costs, with respect to each vehicle, as follows: $25,000 because of bodily injury to or death of one person in any one accident, and, subject to the same limit for one person, $50,000 because of bodily injury to or death of two or more persons in any one accident, and $10,000 because of injury to or destruction of property of others in any one accident;
(3) contain coverage in the amounts set out in (2) of this subsection for the protection of the persons insured under the policy who are legally entitled to recover damages from owners or operators of uninsured motor vehicles because of bodily injury or death arising out of the ownership, maintenance or use of the uninsured motor vehicle, except that this coverage may be waived in writing by the insured on or before the effective date of the policy.
(c) The operator's policy of liability insurance shall insure the person named as insured against loss from the liability imposed upon him by law for damages arising out of the use by him of any motor vehicle not owned by him, within the same territorial limits and subject to the same limits of liability as are required for an owner's policy of liability insurance.
(d) The motor vehicle liability policy shall state the name and address of the named insured, the coverage, the premium charges, the policy period and the limits of liability, and shall contain an agreement or an endorsement that insurance is provided in accordance with the coverage defined in AS 28.20.010 - 28.20.640 for bodily injury and death or property damage, or both, and is subject to all the provisions of AS 28.20.010 - 28.20.640.

(e) The motor vehicle liability policy need not insure liability under a workers' compensation law nor liability for damage to property owned by, rented to, in charge of or transported by the insured. (f) Every motor vehicle liability policy is subject to the following provisions but these provisions need not be contained in the policy.

(1) The liability of the insurance carrier becomes absolute whenever injury or damage covered by the policy occurs; the policy may not be cancelled or annulled as to this liability after the occurrence of the injury or damage; no statement made by the insured or on his behalf and no violation of the policy defeats or voids the policy.

(2) The satisfaction by the insured of a judgment for injury or damages is not a condition precedent to the right or duty of the insurance carrier to make payment on account of injury or damage.

(3) The insurance carrier may settle a claim covered by the policy, and if settlement is made in good faith, the amount of settlement is deductible from the limits of liability specified in (b) of this section.

(4) The policy, the written application for the policy, if any, and every rider or endorsement which does not conflict with the provisions of AS 28.20.010 - 28.20.640 constitute the entire contract between the parties.

(g) A policy which grants the coverage required for a motor vehicle liability policy may also grant lawful coverage in excess of or in addition to the coverage specified for a policy and the excess or additional coverage is not subject to the provisions of AS 28.20.010 - 28.20.640. With respect to a policy which grants excess or additional coverage the term "motor vehicle liability policy" applies only to that part of the coverage which is required by this section.

(h) A motor vehicle liability policy may provide that the insured shall reimburse the insurance carrier for any payment the insurance carrier would not have been obligated to make under the terms of the policy except for the provisions of AS 28.20.010 - 28.20.640.

(i) A motor vehicle liability policy may provide for proration of the insurance with other valid and collectible insurance.

(j) The requirements for a motor vehicle liability policy may be fulfilled by the policies of one or more insurance carriers which together meet the requirements.

(k) A binder issued pending the issuance of a motor vehicle liability policy fulfills the requirements for a policy.

HISTORY (Sec. 46 ch 163 SLA 1959; am sec. 2 ch 146 SLA 1966; am sec. 4 ch 202 SLA 1975; am sec. 60 ch 94 SLA 1980)

Sec. 28.20.450.

NOTICE OF CANCELLATION OR TERMINATION OF CERTIFIED POLICY. When an insurance carrier certifies a motor vehicle liability policy under sec. 410 or sec. 420 of this chapter the insurance certified may not be cancelled or terminated until at least 10 days after a notice of cancellation or termination of the insurance is filed with the department, except that a policy subsequently procured and certified shall, on the effective date of its certification, terminate for the purpose of this chapter the insurance previously certified for a vehicle designated in both certificates. HISTORY (Sec. 47 ch 163 SLA 1959)

Sec. 28.20.460.
CHAPTER NOT TO AFFECT OTHER POLICIES.
(a) This chapter does not apply to or affect a policy of automobile insurance against liability which may now or hereafter be required by any other law of this state, except that the policy, if it contains an agreement or is endorsed to conform with the requirements of this chapter, may be certified as proof of financial responsibility under this chapter.
(b) This chapter does not apply to or affect a policy insuring solely the insured named in the policy against liability resulting from the maintenance or use by persons in the insured's employ or on his behalf of vehicles not owned by the insured.
HISTORY (Sec. 48 ch 63 SLA 1959)

Sec. 28.20.470.
BOND AS PROOF.
Proof of financial responsibility may be evidenced by the bond of a surety company authorized to transact business in this state. The bond shall be conditioned for payment of the amounts specified in sec. 230 of this chapter. The bond shall be filed with the department and shall not be cancellable except after 10 days' written notice to the department.
HISTORY (Sec. 49 ch 163 SLA 1959)

Sec. 28.20.480.
ACTION ON BOND. If a judgment given against the principal on a bond is not satisfied within 30 days after it becomes final, the judgment creditor may, for his own use and benefit and at his sole expense, bring an action in the name of the state against the company executing the bond. HISTORY (Sec. 50 ch 163 SLA 1959)

Sec. 28.20.490.
MONEY OR SECURITIES AS PROOF.
Proof of financial responsibility may be evidenced by the deposit of $25,000 in cash, or securities which are legal investments for saving banks or trust funds having a market value of $25,000. The department shall not accept a deposit unless accompanied by evidence that there are no unsatisfied judgments of any character against the depositor in the recording district where the depositor resides. HISTORY (Sec. 51 ch 163 SLA 1959; am sec. 15 ch 214 SLA 1975)

Sec. 28.20.500.
OWNER MAY GIVE PROOF FOR OTHERS.
(a) The owner of a motor vehicle may give proof of financial responsibility on behalf of his employee or a member of his immediate family or household. The furnishing of proof in this manner permits the person for whom it is given to operate a motor vehicle covered by the proof. The department shall endorse appropriate restrictions on the face of the license held by a person for whom proof is given by another, or may issue a new license containing these restrictions.
(b) The department, upon receiving satisfactory evidence of the violation of a restriction, may suspend the license until a certificate is filed showing a policy issued to the driver which covers the driver as operator or owner of the vehicle operated in violation of the restriction. -

Sec. 28.20.510.
SUBSTITUTION OF PROOF.
The department shall consent to the cancellation of a bond or certificate of insurance, or the department shall return money or securities to the person entitled to it, upon the substitution and acceptance of other adequate proof of financial responsibility under this chapter.
HISTORY (Sec. 54 ch 163 SLA 1959; am sec. 16 ch 214 SLA 1975)

Sec. 28.20.520.
OTHER PROOF MAY BE REQUIRED.
Whenever proof of financial responsibility filed under this chapter no longer fulfills the purpose for which it is required, the department shall required other proof as required by this chapter and shall suspend the license pending the filing of other proof.
HISTORY (Sec. 55 ch 163 SLA 1959)

Sec. 28.20.530.
APPLICATION OF DEPOSIT. The department shall hold the deposit to satisfy, in accordance with this chapter, any execution on a judgment issued against the person making the deposit for damages, including damages for care and loss of services because of bodily injury to or death of any person, or for damages because of injury to or destruction of property, including the loss of use of it, resulting from the ownership, maintenance, use or operation of a vehicle subject to registration under the laws of this state after the deposit is made. Money or securities deposited are not subject to attachment or execution unless the attachment or execution arises out of a suit for damages specified in this section. HISTORY (Sec. 52 ch 163 SLA 1959; am sec. 17 ch 214 SLA 1975)

Sec. 28.20.540.
DURATION, CANCELLATION AND RETURN OF PROOF.
(a) The department shall, upon request, consent to the immediate cancellation of a bond or certificate of insurance, or shall return to the person entitled to it money or securities deposited as proof of financial responsibility, or shall waive the requirement of filing proof, in any of the following events:

(1) at any time after three years from the date proof is required when, during the three year period preceding the request, the department has not received record of a conviction or a forfeiture of bail which would require or permit the suspension or revocation of the license or registration of the person by or for whom the proof was furnished; or

(2) upon the death of the person on whose behalf the proof was filed or the permanent incapacity of the person to operate a motor vehicle; or

(3) if the person who has given proof surrenders his license to the department.

(b) The department shall not consent to the cancellation of a bond or the return of money or securities if an action for damages upon a liability covered by the proof is pending or a judgment upon the liability is unsatisfied, or if the person who filed the bond or deposited money or securities has within one year immediately preceding the request been involved as a driver or owner in a motor vehicle accident resulting in injury or damage to the person or property of others. An affidavit of the applicant as to the nonexistence of these facts, or that he is released from all of this liability, or has been finally adjudicated not to be liable for the injury or damage is sufficient evidence in the absence of evidence to the contrary in the records of the department.

(c) Whenever a person, whose proof has been cancelled or returned under (a)(3) of this section applies for a license within a period of three years from the date proof was originally required, the application shall be refused unless the applicant reestablishes the proof for the remainder of the three-year period.

HISTORY (Sec. 56 ch 163 SLA 1959; am sec. 18 ch 214 SLA 1975)

Sec. 28.20.550.

TRANSFER OF REGISTRATION TO DEFEAT PURPOSE OF CHAPTER PROHIBITED.

(a) If an owner's registration is suspended under this chapter, the registration shall not be transferred nor the vehicle registered in any other name until the department is satisfied that the transfer of registration is proposed in good faith and not for the purpose or with the effect of defeating the purposes of this chapter.

(b) This section does not affect the rights of a conditional vendor, chattel mortgagee or lessor of the vehicle registered in the name of another as owner who becomes subject to this chapter.

(c) The department shall suspend the registration of a vehicle transferred in violation of this section. HISTORY (Sec. 57 ch 163 SLA 1959)

Sec. 28.20.560.

SURRENDER OF LICENSE AND REGISTRATION, AND FALSE AFFIDAVITS.

(a) A person whose license or registration is suspended under any provision of this chapter, or whose policy of insurance or bond, when required under this chapter, is cancelled or terminated, shall immediately return his license or registration to the department. If a person fails to return the license or registration to the department, the department shall immediately direct a peace officer to obtain possession of it and to return it to the department.

(b) A person who wilfully fails to return a license or registration as required in (a) of this section or who knowingly gives an affidavit required by this chapter which is false is punishable by a fine of not more than $500, or by imprisonment for not more than 30 days, or by both. HISTORY (Sec. 58 ch 163 SLA 1959)

Sec. 28.20.570.
FORGED PROOF.
A person who forges or, without authority, signs any evidence of proof of financial responsibility for the future, or who files or offers for filing evidence of proof of financial responsibility for the future, knowing or having reason to believe that it is forged or signed without authority, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both.
HISTORY (Sec. 59 ch 163 SLA 1959)

Sec. 28.20.580.
ASSIGNED RISK PLANS. After consultation with the insurance companies authorized to issue motor vehicle liability policies in this state, the director of the division of insurance shall approve a reasonable plan, fair to the insurers and equitable to their policyholders, for the apportionment among these companies of applicants for motor vehicles policies and other vehicle coverages who are in good faith entitled to but are unable to procure policies through ordinary methods. When a plan is approved, all the insurance companies shall subscribe to it and participate in it. An applicant for an assigned risk policy, a person insured under an assigned risk plan, and an insurance company affected may appeal to the commissioner of commerce and economic development from a ruling or decision of the authority designated to operate the plan. Failure to adopt an assigned risk plan does not relieve any person from responsibility under this chapter. HISTORY (Sec. 60 ch 163 SLA 1959; am sec. 16 ch 144 SLA 1977)

Sec. 28.20.585.
REINSTATEMENT FEE. If an operator's license is suspended under the provisions of this chapter, the department shall charge a person who applies for reinstatement of the operator's license a reinstatement fee of $50. HISTORY (Sec. 8 ch 78 SLA 1982)

Sec. 28.20.590.
PAST APPLICATION OF CHAPTER. This chapter does not apply to any accident or judgment arising from an accident or violation of the motor vehicle laws of this state, occurring before September 1, 1959. HISTORY (Sec. 61 ch 163 SLA 1959)

Sec. 28.20.600.
CHAPTER DOES NOT PREVENT OTHER PROCESS. This chapter does not prevent the plaintiff in an action from relying for relief upon other processes provided by law. HISTORY (Sec. 62 ch 163 SLA 1959)

Sec.28.20.610
PROVISIONS OF CHAPTER APPLY THROUGHOUT STATE.
The provisions of this chapter apply upon highways and elsewhere throughout the state. HISTORY (Sec. 63 ch 163 SLA 1959)

Sec. 28.20.620.
APPLICATION OF ADMINISTRATIVE PROCEDURE ACT.
Repealed by sec. 4 ch 140 SLA 1977.

Sec. 28.20.630.
DEFINITIONS
In this chapter unless the context otherwise requires:

(1) Repealed by sec. 20 ch 214 SLA 1976.

(2) Repealed by sec. 2 ch 135 SLA 1977.

(3) "judgment" means a judgment which is final by expiration without appeal of the time within which an appeal may be taken, or final by affirmation on appeal, given by a court of any state or of the United States, upon a cause of action arising out of the ownership, maintenance, or use of a vehicle of a type subject to registration under the laws of this state, for damages, including damages for care and loss of services, because of bodily injury to or death of a person, or for damages because of injury to or destruction of property, including the loss of use of property, or upon a cause of action on an agreement of settlement for such damages;

(4) Repealed by sec. 2 ch 135 SLA 1977.

(5) Repealed by sec. 20 ch 241 SLA 1976; sec. 2 ch 135 SLA 1977.

(6) Repealed by sec. 2 ch 135 SLA 1977.

(7) Repealed by sec. 2 ch 135 SLA 1977.

(8) Repealed by sec. 2 ch 135 SLA 1977.

(9) Repealed by sec. 2 ch 135 SLA 1977.

SHORT TITLE.

This chapter may be cited as the Motor Vehicle Safety Responsibility Act.

HISTORY (Sec. 1 ch 163 SLA 1959)

END OF DOCUMENT

AGENCY: DEPARTMENT OF PUBLIC SAFETY

CATEGORY: PUBLIC PROTECTION

PROGRAM: LIFE AND PROPERTY PROTECTION

BRU(S): DRIVER/VEHICLE SERVICES

The Driver/Vehicle Services BRU is organized into four components: Vehicle Services, Driver Services, Field Services, and Administration. The basic purpose of the Vehicle Services unit is protection of ownership of vehicles by the maintenance of an official single source record of vehicle titles. License plate records also facilitate vehicle recovery when stolen. The purpose of the Driver Services unit is to restrict vehicle operation to those persons who are capable of safe operation by utilizing a system of driver testing, records maintenance, and a "driver improvement" function to identify and help improve or suspend drivers who violate safe driving laws. This unit also provides protection for innocent victims of accidents by suspending those drivers who do not meet their financial responsibilities resulting from an accident. The Field Services Unit operates the system of field offices where the public may obtain their vehicle titles, registrations, and driver licenses.

Driver and vehicle identification information collected is computerized for rapid retrieval by law enforcement agencies during investigation of criminal activities. This information is highly useful in identifying offenders. For instance, FBI statistics show that nationwide, a motor vehicle is involved in 50% of all crimes committed.

The Administration component includes the director's office, central support staff, and the municipal tax unit. The municipal tax unit is funded by charges assessed to municipalities which elect to levy a municipal motor vehicle tax; this tax is collected by the State.

Car insurance is a necess

By KENT LEE WOODMAN

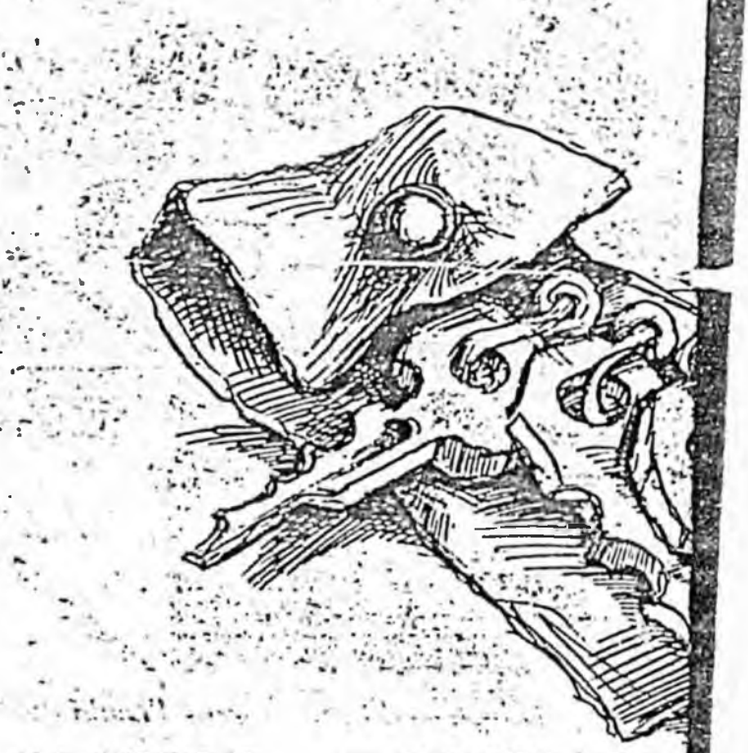
Last year in Juneau I stopped to pay my respects at Rep. Anderson's office. Previously I had correspondance with him on the subject of mandatory auto liability insurance. Rep. Anderson had draft copies of bills to require a minimum level of public liability for all auto operators and for state vehicle inspections and stickers. Neither bill was going anywhere.

Now I recognize that many folks come up here to escape the bureaucracy they had to live with in the South 48, but coming up here and abandoning all responsibility is not finding freedom, it is running from it. I once had freedom defined to me, as the freedom to take on the responsibilities you choose. We should be responsible enough to be certain that our affairs are in order to the point where we can pay for injury and damage to others for our actions. This is normally done by insurance on home and auto. We should be responsible enough to only take motor vehicles on the road which comply with the law and give everyone else a "fighting chance" to live . . . we should do these things, but many of us do not.

As an individual and as a business owner, both with adequate insurance, I am sick to my stomach time after time one of my vehicles is hit and the other driver has no insurance, no regular job, no cash reserves and often no license or registration.

We had one of our brand new Datsun diesel pickups smashed out from under my partner by a driver who had no insurance, no license, was drunk as a skunk, and who now lives in the Matanuska Valley where he gold mines and refuses to come to the phone or accept a certified letter. Our insurance paid the major portions, and we paid the $500 deductable. Our insurance carrier is "attempting to recover" both the funds they advanced and the deductable, but who knows when and if that will ever happen?

Recently our new Mazda service diesel was ripped open from end to end by a guy in a Chevy pickup with no insurance, no license, no registration. Same deal again, and another $2,800-plus.



Daily we all see the death-on-wheels that some folks push on to the public highways; no bumpers, broken windshields, missing lights, lights aimed up in your face, no defrosters, ice covered windows and drivers peering out through a postage-stamp sized hole, no brake lights, no turn indicators, bald tires in winter and summer and the whole works.

Estimates have been made that over 60 percent of the driving public in Alaska is not insured. That means that all the premiums required to cover all the accidents and injuries are paid by fewer than half of us who do have the responsiblity to have coverage. What's fair about that? Maybe we should cancel as well and let the rest of the world try to pry money out of us if we cause an accident.

I know that there will be some who will cry, "but what about the folks who cannot *afford* the insurance, cannot *afford* to keep

forum

sary responsibility for all

points of view from our community

compass

"If folks cannot, or will not, develop that sort of old-fashioned responsibility, then I am afraid we must legislate it."

their vehicles up to a safe standard?"

My answer may appear a tad cold on the surface, but think about it: perhaps they should not drive! There is the People Mover Bus system now, the third such system since I've been here and this one is working! There are special concessions made to car-poolers. Remember, the courts have long held that driving an automobile on the public highways is a *privilege, not a right.* When you take your ton of steel out there and aim it at folks, you are supposed to have your act together. If you do not, keep off the track.

You're not supposed to fly airplanes without licenses and medical. You're not supposed to conduct brain surgery or practice law without certain certificates. Why, then, should folks be allowed to go out there and cause more property damage and death each year than all the wars we've ever been in, on the public highway with no such responsiblity? If folks cannot, or will not, develop that sort of old-fashioned responsibility, then I am afraid we must legislate it.

It's a manageable program. It's a bill that already has been written once, and there are comment sheets to get it on track. We have seen recently an ordinance that lets the police pick up vehicles driven by drunks; why not the same for those who drive when their licenses have been revoked, those who drive with no public liability and those who drive vehicles with 20 or 30 write-ups?

I recognize that the mandatory vehicle inspection system offers opportunity either for heavier bureaucracy or graft, but it can be made to work . . . Hawaii and Texas do it with ease. Sure we have difficulties in the Bush, and making the same rules apply there and here in town, but they can be worked out certainly.

FISCAL NOTE ANALYSIS
SSEB-7 (SB-223)

The basic assumption of this fiscal note is that for this bill to be effective there must be an adequate system of enforcement and compliance. Other states with mandatory insurance laws estimate that 5%-15% of their vehicles are operating without insurance as owners find ways to circumvent the law. We find that our present Financial Responsibility Law, AS 28.20, is practically as effective and far less costly both to the state bureaucracy and to the citizens directly.

This fiscal note assumes an effective date of July 1, 1983. A 6% inflation factor has been applied to FY 85 and beyond.

Fiscal Note Detail - Alaska State Troopers

SS House Bill No. 7

Motor Vehicle Liability Insurance

Passage of this bill will require a statewide enforcement effort to ensure compliance. If a vehicle is stopped and proves not to have current insurance it will need to be impounded. This will require numerous Troopers all over the State to spend patrol time enforcing provisions of this particular law. The bulk of the activity will take place in the Anchorage area, Fairbanks and Juneau. One additional Trooper is requested for each of these locations to absorb the increased work load.

FY '84

	Three Troopers	Academy (2)	Totals
Per. Ser.	190,268		190,268
Travel	6,000		6,000
Contractual	52,704	9,000	61,704
Commodities	9,900	600	10,500
Equip. (1)	60,900		60,900
	319,772	9,600	329,372

(1) Equipment costs are incurred during the first year only.

(2) The Public Safety Academy is budgeted only for costs of training replacement Troopers based on normal turnover of personnel. Any new Troopers required due to new legislation need additional funding.

Note: Inflation after FY '84 is estimated at 6% per year. A Form 13 for each position is attached.

FY 84

FISCAL NOTE DETAIL Driver/Vehicle Services Page 1
SS HB7

EXPENDITURES

	FY 84	FY 85	FY 86
100 Personal Services	308.2	326.7	346.3
200 Travel	25.0	26.5	28.1
300 Contractual	398.5	422.4	447.7
400 Commodities	25.0	26.5	28.1
500 Equipment	87.0	-0-	-0-
TOTAL	843.7	802.1	850.2

For this bill to be effective the Division of Motor Vehicles must create a compliance unit of 9 employees. The compliance unit must be located with Division headquarters since there must be ready reference to the existing ownership and registration record. The present headquarters location will not accomodate any expansion, therefore, the fiscal note provides for relocation and lease of new space for the Division of Motor Vehicles headquarters in FY-84.

A further breakdown by object code is attached. The reason for such a large figure in the 310 catagory is because of statutory requirement that all suspension notices must be sent by registered or certified mail, return receipt requested. If action is taken on 30,000 uninsured vehicles, at $1.55 postage per notice, that cost alone is $46,500.

ANALYSIS (continued):

The FY-84 costs for the compliance unit are as follows:

100 Personal Services

1 - Insurance Compliance Unit Supervisor (Range 18, new classification)	49.5
2 - Hearing Officers (Range 16, new classification)	85.0
1 - Clerk V	31.3
4 - Clerk IV	112.8
1 - Microfilm Equipment Operator	29.6
TOTAL	308.2

200 Travel

Hearing Officers to travel to various cities to conduct suspension hearings	25.0

300 Contractual

310 - phones, tolls, postage	51.5
320 - forms, advertising, public notice	15.0
330 - headquarter's space lease (6,000 sq. ft.)	162.0
360 - equipment rental (4 AJIS terminals)	30.0
382a - DP Chargeback programming and maintenance	80.0
TOTAL	398.5

ANALYSIS (continued):

400 Commodities

Normal office supplies		25.0

500 Equipment

Office Equipment (9 employees)		27.0
Word Processing Station (Wang)		20.0
Microfilm Camera and Printer		40.0
	TOTAL	87.0

Inflation for subsequent years if figured at the 6% level.

JUSTIFICATION

The state is required to suspend vehicle registrations and operator's licenses of those found to be operating a motor vehicle without liability insurance. The clerical functions associated with this are highly specialized in that the Clerk IV must be able to do detailed research in both motor vehicle and drivers records, must be familiar with different types of insurance policies, and must have a working knowledge of all motor vehicle laws.

Accuracy is essential in this work since the consequences of the unit's actions on individual citizens is great. The loss of vehicle and driving privileges is a harsh step and the possibility of error must be eliminated to avoid working hardships on innocent parties. To assist in record tracking and handling similar form correspondence, a Wang word processing unit will be used by the section.

Based on other states' experience, approximately 10% or 30,000 vehicle owners will try to circumvent or violate this law. The volume of records and correspondence with 30,000 cases annually will require a unit of 4 Clerk IVs.

JUSTIFICATION

The mandatory insurance bill requires the state to suspend vehicle registrations, plates, and operator's licenses for those people who operate a vehicle without the required liability insurance. Prior to taking any action of this type, the department must provide the person an opportunity for an administrative hearing (AS 28.05.131).

Using estimates based on other states' experience with mandatory insurance, there will only be a 90% compliance level. This means action will be taken on the remaining 10% or 30,000 uninsured vehicles. The hearing officer must travel to all areas of the state to administer the hearings. With this volume there will be two hearing officers required.

Due to the limited scope of the hearing items, it is not necessary to have an attorney in this position.

JUSTIFICATION

As a result of this bill, each vehicle operator must present some form of proof of insurance at the time of registration. This form is kept with the vehicle records which are microfilmed. Also the records of registration, suspensions, and all associated documents are microfilmed and kept with vehicle records. These forms and documents will represent a 20% increase in the documents presently maintained by the Vehicle Services Unit.

To accomodate this increased workload, a Microfilm Equipment Operator I is necessary to augment the present staff. Equipment associated with this position includes a microfilm camera and a reader-printer work station.

The microfilm retrieval system currently being used has proved cost effective in terms of labor savings and rapid response to filing needs. The high initial cost of equipment is soon offset by savings in labor and file storage costs.

JUSTIFICATION

The mandatory insurance laws require that the state take action against those who do not have liability insurance or those who cancel policies after registration. Administration of this program is the responsibility of the Insurance Compliance Unit. The Supervisor of this unit will act under the general direction of the Chief of Vehicle Services and will be responsible for the supervision of seven employees.

This position carries considerable authority in that this unit has the responsibility of suspending both vehicle registration and operator's licenses of violators. This will require close coordination with the insurance industry, the court system, and law enforcement agencies to ensure that appropriate and timely action is taken and that complete due process is given to the citizen.

The intent of the law is to have 100% compliance, however based on other states' experience, usually only 90% compliance is achieved. This will require some action be taken on 30,000 uninsured vehicles and their owners.

JUSTIFICATION

Under the general supervision of the Insurance Compliance Unit Supervisor, this position will supervise the clerical section of this unit. The unit will perform checks on those suspected of being in violation of the insurance laws. The consequences of the actions of this section in suspending vehicle registrations and operator's licenses and complexity of the due process system require a high level of supervision and expertise.

The section supervisor must have a thorough knowledge of motor vehicle laws and forms and vehicle insurance practices and policies. This section will also schedule administrative hearings and the supervisor must coordinate these with the hearing officer's travel plans.

This position will be responsible for the final actions of the unit, and accuracy and good judgement are essential to ensure correct compliance with the insuracne laws and to avoid hardships for innocent vehicle operators.

Re: Fiscal Note for Department of Public Safety on SSHB 7

There are several misconceptions made in the fiscal note provided for SSHB 7 that this office wishes to respond to. Additionally it is felt, the fiscal note is not an accurate reflection the result of the legislation but, rather, is intended to discourage passage of the bill.

1. This is virtually the same fiscal note that was produced for the original HB 7 despite the fact that numerous changes and revisions were made in the sponsor substitute with a desire of lowering the proposed fiscal impact. It is felt that the changes in SSHB 7 were not taken into consideration in preparation of this fiscal note.

2. The fiscal note assumes an effective date of July 1, 1983. In fact the bill proposes an effective date of July 1, 1984 in order to give the Department sufficient time to prepare to implement this legislation. The fiscal impact in FY 84 should be minimal. This note does not reflect that fact.

3. The fiscal note states that every car stopped in which the driver could not provide proof of insurance would have to be impounded. That is not the case. The legislation gives discretion to a peace officer to impound a car on the spot. It does not mandate impoundment at that time. In fact a provision has been provided to issue a citation which is believed will be the usual course of action in such cases. Impoundment on the spot would only be likely if a peace officer knows he is dealing with a repeat offender or some similar case.
The fiscal note reflects the desire for three state troopers to enforce the impoundment procedures which it feels are mandated. Since the bill does not mandate impoundment, it is felt these troopers are not needed for this activity. This cost should be eliminated from the fiscal note.

It must also be noted that the request for the three troopers includes 25 hours overtime in their proposed salaries without justification from the Department.

The fiscal note assumes a compliance unit of 9 persons will be required all based in Anchorage. If all are based in Anchorage, it is stipulated there must be more space made available. Why must all nine employees be based in Anchorage?

In the justification sections for the Clerk positions there are some misleading statements. The simple check for license and registration with regard to liability insurance should not be a "highly specialized" function as the fiscal note assumes. Micro film and computer technology should make this a relatively simple task along with the resulting form paper work. It is agreed that accuracy will be essential, but the qualifications and justification for this level of clerk service are overstated.

The fiscal note assumes that 10% will try to circumvent the law. While the ten per cent figure may be legitimate, it must be pointed out that some states have stated that only 5% try to circumvent the law. In any case, the legislation does not direct DMV to search all their records and find those who are trying to slip through the cracks. It only directs DMV to take action on those that come to its attention through notification by insurance companies. The assumption must also be made that this law will provide an incentive for many uninsured drivers to get insurance, provide proof to DMV at the time of registration or license renewal or the registration simply will not be renewed. There is no intent for DMV to initiate investiagtions into non insured motorists unless there is a clear action in which a motorist cancels a policy.

The justification for a clerk V position is questionable. These duties could be carried out by the unit supervisor or by one of the other four clerk positions.

In summary, the fiscal note reflects a cost that is similar to programs enacted in other states but which deal with many more vehicles than the number registered in Alaska. There are several wrong or misleading assumptions that have created what is felt to be an inflated fiscal note. These areas should be re-examined and the department should be urged to read the sponsor substitute and understand it to a better degree for preparation of a revised fiscal note.

Re: SSHB 7/ Reply to letter by Michael Thomas

Dear Representative Furnace:

You have received a letter from Michael Thomas who represents the American Insurance Association. He list a number of reasons why this legislation should not be enacted. I wish to offer the following arguments for enactment of the legislation.

First, the insurance industry in general has opposed compulsory insurance, yet it has been enacted in about 2 dozen states. While it has been repealed in a couple and amended in some states, the fact remains...THE MAJORITY OF THOSE STATES WHICH HAVE TRIED THIS APPROACH HAVE KEPT IT. If such laws are so inneffective as the industry would want you to believe, why have most of the states retained these laws?

The arguments say that no law has proved completely effective in accomplishing a 100% insured motoring population. We do not expect 100% compliance. We do expect two accomplishments. It is believed that more people will buy insurance. If we can achieve even 90% compliance, that is a significant improvement over current estimates. Some states have achieved an even higher insured percentage. Two, the bill provides strong disincentives to drive while not insured. It is believed that the possibility of severe penalties will keep a significant portion of uninsured drivers off the road rather than risking loss of driving priveleges or a motor vehicle. The bill is not aimed solely at mandating compliance. It also seeks to provide an incentive for to find alternate transportation for the uninsured.

The letter says that North Carolina has had problems achieving successful results with its law and " has still left many vehicles uninsured." However, in statistics obtained in 1981 it was learned that the prediction was that only 5% evaded the system and were uninsured. And of the accidents occuring in state involving in state drivers, less than one half of one per cent were found to be uninsured. In Alaska, a survey of accidents showed in 1980 and 1981 that about 20% of those people involved in accidents were uninsured. This points out that the North Carolina law has worked and I believe, if we could achieve their success rate, the legislation would have to be considered a success.

Two points need to be made. The letter from the insurance industry is misleading and vague. If there are inaccuracies in this one section, I submit that same vagueness likely persists throughout the letter. Insurance industry publications on this subject argue very effectively but in a very vague manner.

The letter also infers that compulsory insurance doesn't work because states still mandate the offering of uninsured insurance. First, you must realized uninsured or underinsured insurance is not required by any driver. It can be waived by the insured. But it's offering allows a person to take ALL precautions to protect himself.

The letter infers that this law would be easy to avoid and that a motorist will cancel insurance the day after he buys it to comply with the law. While it is recognized a small hard core percentage might do this, once again there are disincentives in the bill that will make people really think about taking the chance of getting caught without insurance. I don't believe there is another states which has proposed as severe penalties as this legislation seeks to do for non compliance. There has not been serious objection to the notification requirments placed on insurance companies by this legislation at this point. North Carolina has reported reduced cost and administrative burden by requiring notification by insurance companies of cancellation only within the first six months of policy issuance. This is what our bill proposes to require.

Nobod is assuming the law will cost nothing to enforce. It will take efficient enforcement and a substantial amount of money. It is not believed it will require what Dept. of Public safety is asking for in a fiscal note.

The bill also infers that premiums will rise dramatically if this program is adopted. First it is obvious premiums will rise if higher minimum liability limits are adopted. The desire to raise the limits may be a bargaining item even though it is not believed rates will increase as substantially as proposed. Whether there may be an increase in premiums simply as a result of mandatory insurance is subject to debate. The removal of the higher minimum limits negates much of the letter's argument, however.

The letter says that study of alternatives has not been undertaken on how to improve current law. A substantial directive has been received from the public for mandatory insurance. The public wants action now..not a study.

Conclusion

No one has ever assumed enactment of this legislation will result in a 100% insured motoring public. But results from other states have shown similar laws do increase the number of insured drivers. A combination of mandatory liability insurance and the offering of uninsured and underinsured insurance coupled with retention of the current financial responsibility law is the most effective way to close loopholes and protect the public.

Other states have encountered probems with the law, but most states that have enacted the law HAVE KEPT IT. Obviously, something beneficial is happening. It is realized there will likely be amendments to this law in the future if adopted. But it is a good starting point. Efforts have been taken to choose the better parts of legislation from many states so that it is effective and cost efficient.

The insurance industry has a very well financed lobbying effort to ward off these laws when the crop up around the nation. I caution the committee not tp be misled by vague facts or misrepresentations in statement. I believe the public has expressed an interest in this legislation and it is the responsibility of the legislature to represent the public..not the insurance industry.

This office remains open to work with others seriously concerned with addressing this public concern.

Sincerely,

Jeff Day

auto identification card

WHITE PLAINS, NY — Robert E. Merriman, executive vice president of the recently merged IIR/ACORD Corporation, has announced the availability of a uniform automobile insurance identification card effective February 15. Six of the 18 states that require proof of insurance as part of their mandatory automobile insurance laws have approved the ACORD form. Three other states appear to be nearing approving it, and several others have indicated that they are looking favorably upon it.

Those states where the card has been approved include Colorado, Connecticut, Delaware, Montana and Texas. Kansas also has given its approval, but has limited its use to private passenger automobiles.

Companies also are required to print and distribute ID cards of some type in Florida, Georgia, Hawaii, Idaho, Kentucky, Michigan, Nevada, New Jersey, New York, Oklahoma, Pennsylvania, and West Virginia. Some companies also issue ID's on a voluntary basis in states where they are not required. Although the majority of these forms are similar in appearance, each jurisdiction has some unique content or size requirement, necessitating separate forms which will comply with the state's regulation.

Reinsurance arbitration program offered by IAF

NEW YORK — A new arbitration program to help insurers and reinsurers speedily resolve their disputes has been developed by Insurance Arbitration Forums, Inc.

The "Excess/Primary Reinsurance Arbitration" program provides an effective vehicle for the settlement of inter-insurer disputes, according to Bernard L. Hines Jr., executive director of IAF, a non-profit industry organization.

"This program will enable insurers and reinsurers to resolve their disputes more quickly and efficiently," he said.

Prior to the establishment of the IAF program, there were no formal rules to guarantee an objective and prompt settlement of a reinsurance dispute, said Hines.

Now, through IAF's national network, cases involving all types of reinsurance disputes are being handled according to specific arbitration rules, he said. In addition, the entire arbitration process takes only 60 to 90 days.

Under the reinsurance program, disputing parties choose the hearing site and participate in the selection of arbitrators from IAF's group of experienced reinsurance executives.

Filing cost for the program is $250 for each disputing party. The program is voluntary and handled on a per case basis.

HOUSE RESEARCH AGENCY
Pouch Y - State Capitol
Juneau, Alaska 99811
465-3991

MEMORANDUM March 6, 1980

TO: Representative Sally Smith

FROM: Peter B. Froehlich

RE: Uninsured Motorists and the Motor Vehicle Safety Responsibility Act (AS 28.20) (Research Request No. 69)

You recently asked this agency to explore possible methods to "tighten up" the Motor Vehicle Safety Responsibility Act (AS 28.20). In the course of our research on the Act, we learned that the Senate Commerce Committee has been studying the same issue. That committee has received a report from Richard Block, former director of the Division of Insurance, addressing amendments to the Act, as well as other approaches to the problem of uninsured motorists in Alaska. Senator Bradley has recently introduced one bill as a result of Mr. Block's report (SB 460 authorizing municipalities to impose mandatory insurance). Another, which will amend and tighten up the Motor Vehicle Safety Responsibility Act is currently being drafted by the Legal Services Division of the Legislative Affairs Agency for the committee.

In light of the existence of Mr. Block's report and the legislation which Senate Commerce Committee intends to introduce amending the Act, you have instructed us that completion of our research pursuant to your request was not necessary. Nonetheless, we offer this memorandum as a brief summary of our work thus far.

* * * * * * * * * * * *

The problem at hand is that over 50% of the registered private vehicles in Alaska are completely uninsured. In 1978, according to Division of Insurance statistics, the figure was 49.1%. Although that year is the most recent for which complete data is available, the trend has been an increase in the figure each year.

The answer to the problem is not at all simple, and many possibilities have been suggested. Mandatory insurance appears to be the least popular for several reasons. In the states which have tried it, enforcement and administration has been an expensive burden and insurance rates have often climbed faster than in states without mandatory insurance.

"No fault" insurance is perhaps a more workable solution, but has not been popular with insurance carriers, attorneys and others in Alaska when it has been considered by the legislature in the past.

Amendment of the existing Motor Vehicle Safety Responsibility Act may be the most feasible answer. This approach would take advantage of the main body of an existing chapter of the Alaska Statutes. It would therefore result in less disruption, adjustment and staff increase in the existing bureaucracy which implements the Act. It would be simpler both to legislate and to administer. Because fewer people would be forced by law to buy insurance, individual freedom of choice would be preserved to a greater degree. While all possible problems with uninsured drivers would not be solved, significant improvement could result from amending the Act.

The Motor Vehicle Safety Responsibility Act was enacted in 1959 during the first legislative session after Statehood. The Act deals with two separate subjects: 1) the requirement of deposit of security by uninsured motorists involved in an accident (AS 28.20.050-220); and 2) the requirement of proof of financial responsibility for the future by motorists convicted of certain offenses or involved in an accident (AS 28.20.230-600). The Act has been amended 13 times from 1964 through 1977. However, none of these amendments were really substantive. They merely made minor changes such as raising dollar amounts (e.g., ch 202 SLA 1976 and ch 144 SLA 1977), repealing some sections and subsections (e.g., 53 SLA 1973 and ch 135 SLA 1977), and substituting the Department of Public Safety for the Department of Revenue in the administration of the Act (e.g., ch 214 SLA 1976). Although the Alaska Supreme Court made several specific suggestions for substantive amendments to the Act in Paulson vs. National Indemnity Co. 498 P2 d731 (AK 1972), no remedial action was taken by the legislature. The Act has been significantly interpreted in one other Alaska Supreme Court case, Hart vs. National Indemnity Co. 422 P2 d1015 (AK 1967). It has been cited or applied in at least 9 other cases, including three Alaska Supreme Court cases, two Federal District Court cases, and four Alaska Superior Court cases.

Several amendments to the Act have been suggested either by others contacted during our research or by the research itself. First, of course, are the suggestions of the Alaska Supreme Court in the Paulson decision 498 P2 d731 at 737. These suggestions are directed at tightening the requirements of the second part of the Act for proof of financial responsibility for the future by motorists involved in accidents. The court suggested the repeal of language in AS 28.20.410 and 440 which allows a motorist to satisfy the act by insuring only one of several vehicles he owns.

Two amendments were suggested by Ken Moore, director of the Division of Insurance in a January 24, 1980 letter to Senator Hackney. These amendments would 1) prevent registration of a vehicle or renewal thereof by anyone required under the Act to file proof of responsibility for the future who did not do so; and 2) make any falsification of such proof punishable by a fine or jail sentence. The latter suggested amendment appears to be covered by existing AS 28.20.570. The first suggestion, essentially tightening the relationship between the Act and AS 28.10 (Vehicle Registration) appears to be necessary and desirable; however, it would be susceptible to devious compliance by an individual who obtains an insurance policy, registers his car, and then cancels his policy.

Another possible amendment to tighten the Act would be repealing AS 28.20.260(b) which exempts anyone involved in an accident who establishes his freedom from fault in court from the proof of financial responsibility in the future requirement. The Department of Public Safety in 13 AAC 08.110 has implemented this section by providing that only those who "in the department's opinion" stand a "reasonable possibility" of being held liable in court need provide the required proof. Eliminating the exemption of AS 28.20.250(b) would force more people to prove financial responsibility and save the department from making its finding as to reasonable possibility of liability. However, it would also force innocent parties to accidents to buy what would probably be high risk, high cost "SR 22" insurance.

One last amendment which has been suggested may be the most effective measure. It is a suggestion which apparently arose from Mr. Block's report to the Senate Commerce Committee and will be included in that committee's bill. This approach would follow the example of New Mexico and enact a fairly stiff penalty (fine and/or jail) for any uninsured motorist who is involved in an accident in which he has any fault.

In conclusion, we should note that the whole area of automobile insurance and solutions to the problem of uninsured motorists is very complex, and no perfect solutions seem to be available. If you have any futher questions or desire any additional background information on this matter, please contact us.

A Study of Uninsured Motorists Involved in Reported Automobile Accidents

Overview

A study of the characteristics of uninsured motorists and of the vehicles they drive has been done by the Personal Lines Committee of the All-Industry Research Advisory Council (AIRAC). This study was based on data obtained from official accident report forms filed with motor vehicle departments in seven states--California, Florida, Louisiana, North Carolina, Oregon, Virginia, and West Virginia. It was assumed that a vehicle was uninsured if the accident report did not show the vehicle was insured, or if the driver at the time of the accident was other than the owner and no insurance was shown.

Major findings from this study of uninsured drivers involved in reported accidents were as follows:

1. About 70% of the uninsured motorists in the study were males. In all accidents (including both insured and uninsured), almost 70% of the drivers were males, also. Thus, there does not appear to be any significant difference by sex in the insured population and the uninsured population. It is interesting to note that males, who make up 53% of all licensed drivers, were involved in a disproportionate share of accidents.

2. Uninsured motorists tended to be younger drivers. Some 46% of the uninsured motorists in the study were under age 25 compared with 38% of all drivers involved in accidents and 22% of all licensed drivers in the seven survey states.

3. About 30% of the uninsured motorists were not owners of the vehicles driven in the reported accidents. Younger drivers were less likely than older drivers to be owners (possibly a reflection of young people driving parents' cars).

4. A large proportion of the uninsured vehicles were older models. Some 46% of the uninsured vehicles in the study were 1971 models or older compared with 36% of all cars in operation.

5. A special analysis of the areas of residence of the uninsured motorists examined levels of income and of mobility. This analysis suggested that failure to have auto insurance was not restricted to a limited segment of the population (i.e., the uninsured motorists were not concentrated in any particular types of areas.)

Introduction

Although the magnitude of the problem presented by the uninsured driver to the insured public and to the auto insurance industry is difficult to measure, it has been alleged that the number of uninsured drivers is increasing and that a major reason for car owners driving without insurance is the high cost of such auto insurance. In 1978, the Personal Lines Committee of the All-Industry Research Advisory Council (AIRAC) charged a subcommittee with exploring changes in consumer behavior resulting from increases in auto insurance premium. One project initiated by this subcommittee was a study of the characteristics of uninsured motorists and of the vehicles they drive. This report summarizes the results of that study.

Methodology

Recognizing the limitations of examining aggregate statistics comparing car registrations with insured cars and of surveying consumer attitudes and behavior (possible self-reporting bias), the approach taken in this study was to examine information provided on official accident report forms that described accidents involving private passenger vehicles. Information about uninsured drivers and vehicles was provided by motor vehicle departments in seven states from the reports of accidents that occurred during a one-month period or from reports processed during a one-month period. For the purpose of this study, it was assumed a vehicle was uninsured if the accident report did not show that the vehicle was insured. Also, if the driver was other than the owner and no insurance was shown, it was assumed that there was no insurance applicable. It should be noted that data in this study describing uninsured drivers were based solely on accident reports filed in the seven survey states, and no effort was made in the course of this study to verify the accuracy or completeness of these reports.

Information was obtained from the states of California, Florida, Louisiana, North Carolina, Oregon, Virginia, and West Virginia using survey forms similar to that shown in Appendix A. The following items were collected for each uninsured driver: accident date, accident location (county), residence ZIP code, birthdate, sex, vehicle ownership, vehicle model year, vehicle make, and types of damage. States were selected to take part in this study on the basis of their ability to provide the desired information and their willingness to participate. A list of survey periods is shown in Appendix B for each participating state.

It should be noted that this method did not provide information about uninsured motorists in general, but about uninsured motorists who were involved in accidents reported to their respective state motor vehicle departments. Consequently, comparisons in this report of uninsured motorists with distributions of all drivers involved in accidents are more meaningful than comparisons with all licensed drivers (which are also provided). Because distributions of all drivers involved in accidents were not available for the seven survey states individually, data for 24 states combined were used for comparison purposes. Unfortunately, appropriate distributions of all vehicles involved in accidents by make and by model year were not available.

Summary of Results

Descriptive information was collected for a total of 6,159 uninsured motorists involved in reported accidents in the seven survey states. The number of uninsured motorists and the number of accident reports reviewed during the survey period are shown for each state in Table 1. The largest absolute numbers of uninsured motorists were found in the states of Florida (2,169) and California (1,035). The particularly small number of uninsured motorists in North Carolina (51) was probably a result of the selection criterion used by that state: information was provided only for those cases where action was being taken by the state. It is not recommended that state-to-state comparisons be made of the number of

Table 1

Number of Uninsured Motorists and Number of Accident Reports Reviewed by State

State	Number of Uninsured Motorists Involved In Reported Accidents	Number of Accident Reports Reviewed
California	1,035	47,494
Florida	2,169	6,539
Louisiana	778	24,762
North Carolina	51	Not Available
Oregon	446	10,535
Virginia	773	38,297
West Virginia	907	4,950

uninsured drivers as a percentage of accident reports reviewed because of suspected differences in data collection methods among the participating states. This report focuses on descriptions of uninsured motorists and vehicles rather than on such comparisons of incidence for this reason.

It should be noted that the number of uninsured motorists per state may differ in subsequent tables due to varying amounts of missing data for individual survey items. Tables presented in the remainder of this report are based on valid data only.

Sex and age of uninsured motorists are examined individually in Tables 2 and 3, and Table 4 contains distributions of uninsured motorists by age and sex combined. Similar proportions of uninsureds involved in accidents and of all drivers involved in accidents were males. A disproportionately large number of the uninsured drivers and of all drivers in accidents were found to be males when comparisons were made with the distribution of all licensed drivers in the seven survey states. Almost 70% of all uninsured drivers in the study and of all drivers involved in accidents were males compared with 53% of all licensed drivers in the seven survey states (see Table 2 and Figure 1).

Uninsured motorists tended to be younger drivers as shown in Table 3 and Figure 2. Drivers under age 20 accounted for 20% of the uninsured motorists in the study compared with 18% of all drivers involved in accidents and 8% of all licensed drivers. About 46% of the uninsured motorists were 24 years old or younger compared with 38% of all drivers involved in accidents and 22% of all licensed drivers.

The distributions of uninsured motorists and of all licensed drivers categorized by age and sex are shown in Table 4. A similar distribution for all drivers involved in accidents was not available. Consequently, comparisons with all drivers involved in accidents by age and by sex that are shown in Tables 2 and 3 should be a consideration when interpreting information shown in this table. Young males under age 25 accounted for about one-third of the uninsured motorists for the seven states combined, but only 12% of all licensed drivers were males in this age group. Some 18% of the uninsured motorists and 37% of all licensed drivers in the

seven survey states were females aged 25 or older. Similar observations regarding the age and sex of uninsured motorists could be made for each of the seven participating states individually.

A substantial number of uninsured motorists were not owners of the vehicles involved in the reported accidents. As shown in Table 5, about 30% of all uninsured motorists in the study did not own the vehicles driven, and the percentages of nonownership ranged from a low of 20% in California to a high of 44% in Louisiana. The strong relationship between vehicle ownership and driver age (possibly a reflection of young people driving parents' cars) is apparent in Table 6. Half of the uninsured motorists under age 20 did not own the vehicles which they drove at the time of their accidents compared to 30% of those between the ages of 20 and 24. The percentage of uninsured motorists who were nonowners continued to decrease with increasing age for the other age groups shown in this table.

Distributions of uninsured vehicles by model year and by make are shown in Tables 7 and 8. Uninsured vehicles tended to be somewhat older when comparisons were made with all vehicles in operation (see Table 7 and Figure 3). About 46% of the uninsured vehicles in the study and 36% of all cars in operation were 1971 models or older. This general observation regarding uninsured vehicle age applied to all states in the study except Louisiana where 28% of the uninsured vehicles were reported to be 1971 models or older. Strikingly higher percentages of uninsured vehicles were in this age group in North Carolina (68%--but the sample size was very small) and in Oregon (64%).

There was no apparent relationship between vehicle make and involvement in a reported accident while uninsured. As shown in Table 8, the distribution of uninsured vehicles in the study by make was similar to the distribution of all cars in operation.

Residence areas of the uninsured motorists and of all people in four of the survey states were compared in an effort to determine the extent to which the failure to have auto insurance (and involvement in a reported accident) was restricted to a limited segment of the population.

Tables 9 and 10 contain distributions of income levels and of mobility (i.e., percentages of households with length of residence two years or less) for residence ZIP code areas of the uninsured motorists and comparison distributions for the state populations. This analysis was restricted to the states which supplied ZIP codes for at least 85% of the uninsured motorists and for which there were adequate numbers of uninsureds. There was no consistent pattern appearing in either the income distributions or in the mobility distributions that was present for each of the four states. This suggested that uninsured motorists were not concentrated in any particular types of areas.

Further analyses of accident locations and areas of residence were done in order to discover whether there was a relationship between driving in urban areas and having auto insurance. As shown in Table 11, 32% of the accidents in Florida involving uninsured motorists occurred in Dade County (Miami) while 15% of all vehicles in Florida were registered in that county. Similarly, 39% of the accidents reported in California occurred in Los Angeles County compared to 31% of all registered vehicles (see Table 12). A substantially higher percentage of the uninsured motorists than of the total population in California resided in the city of Los Angeles--13% compared to 8%--as shown in Table 13. These comparisons seem to support a hypothesis that uninsured motorists were more likely to drive or to reside in urban areas. However, accident frequencies are higher in urban areas than in nonurban areas. Thus, since this study was based on uninsured motorists who were involved in reported accidents, these comparisons may reflect, in part, a higher accident frequency in urban areas rather than a characterization of uninsured motorists.

INSURANCE MARKET ANALYST III

PART ONE

AUTOMOBILE

1982 - STATISTICAL ANALYSIS
PRIVATE PASSENGER AUTOMOBILE INSURANCE

- SUMMARY -

In 1981, the majority of companies writing private passenger automobile liability and physical damage insurance in Alaska garnered a profit. The overall loss ratio for all admitted companies writing private passenger automobile insurance was 56.8%, 4.6% higher than the 52.2% ratio enjoyed in 1980.

According to the July 19, 1982 edition of "Best's Insurance Management Report" Alaska had, for the fourth consecutive year, the lowest loss ratio of any state for all automobile insurance, 56.1%. This includes commercial automobile and private passenger automobile insurance. The loss ratio nationally was 70.7%, 14.6 percentage points higher. A consistently profitable automobile insurance market is something few states have been able to maintain in recent years. We are quite happy with the state of the market in Alaska. Over the past three years, we have seen an increase in the number of companies pursuing a share of the market. We now have a very active non-standard market helping to make insurance available at competitive prices to those drivers with numerous or serious violations on their driving records. Good drivers have many different companies and a wide variation of prices from which to choose. On the negative side, we still find ourselves striving to overcome misconceptions and trepidatious underwriting by many companies. Being the largest of the United States, yet having a population of only just over 400,000 people does cause problems from a statistical credibility standpoint. Too often the negative results from other states have an influence on our market conditions. When profit conditions indicate a need for a company to tighten their underwriting, Alaska has in the past felt first the tightening rope of reduced availability. We sincerely hope that the consistent profitability of the Alaska automobile insurance market will cause the industry to consider us a desirable market in which to do business.

We have again divided this portion of the "Personal Lines Statistical Analysis" into two sections. First, is a review of the private passenger automobile insurance market in Alaska. The second section is a display of the rates charged for five different risks by numerous companies writing private passenger automobile insurance in Alaska.

Exhibit I ranks the 1981 market shares of the 30 leading writers in Alaska by line of automobile insurance and compares those shares to the 1980, 1979 and 1978 figures for those 30 companies.

The first chart of Exhibit I shows us that State Farm Mutual Automobile Insurance Company is the leading writer of private passenger auto liability insurance in this State. During 1981, State Farm Mutual Auto increased its written premium for this line by 7.8% despite dropping its market share by .15% to 22.15%, nearly a full percentage below its 23.1% share in 1979. Ranked number two, Allstate gained an additional .3% of the market and now holds a 20.5% market share, an increase of 2.6% over 1979's 17.9% share. Allstate's premium volume went up 10.1% in 1981. Third place Criterions market share remained about the same, 7.04%, up from 7% in 1980, premium volume was up 9.2%. United Services Automobile Association lost .3% of its share down to 4.19% from 4.5% in 1980, but they increased their premium volume 1.2%. Number five, State Farm Fire and Casualty gained a full percentage point of the market from 2.9% in 1980 to 3.92% in 1981 and had 49.4% more premium than 1980. Elsewhere in the top ten, four companies increased their market share and premium volume. Number seven, Leader National, lost 1.43% of its share down to 3.47% from 4.9%, while writing 22.5% less premium than 1980. The cumulative market share for the top ten is 74.8%, this compares to 74.7% in 1980. The top 30 companies accounted for 98.62% of the market, while the 30 top companies in 1980 had 98.9% of the market. Of the 30 companies, 13 increased their market share, 17 lost share. Written premiums were up for 17 companies and down for 13 companies. For all companies writing private passenger automobile liability in Alaska, written premiums were up 8.4% to $32,408,000 from $29,900,000 in 1980.

Exhibit I, Chart 2 shows that State Farm Mutual Auto has 22.5% of the private passenger auto physical damage market, an increase of .4% from 1980 and 3% from 1979. Written premiums for State Farm Mutual were up 23.1%. Allstate lost about .1% of its share down to 17.73% from 17.8% in 1980, but still up 1% over the 1979 share. Premiums for Allstate increased 10.1% from 1980. Criterion retains third place with a 1% increase in market share, 7.1% compared to 6.1% in 1980, premiums were up 29.6% since 1980. United Services Automobile Association moved into fourth place with a 5.42% share; 1.42% over 1980, premiums were up 50.9%. Foremost dropped to fifth, losing over 1.1% of its share and 15.2% in written premiums. The remainder of the top ten are led by State Farm Fire and Casualty in sixth place which now hold 3.22% of the market; up from 2.0% or 14th place in 1980, premium jumped 9.1% during the year. Nationwide Mutual joined the top ten in 1981 with a .5% increase in share, to 3.0%. The ten top writers account for 3.5% more of the market of 1981, 71.44% opposed to 67.9% in 1980. 95.95% of the private passenger auto physical damage business was written by the 30 companies, up 1.35% over 1980. Fourteen companies gained market share while 16 lost, but 19 increased premium volume and only 11 wrote less premium. Written premium volume for all companies was up 11.6% to $26,896,000.

Chart 3 of the first exhibit displays the market shares of the top 30 companies based on their combined written premiums for liability and physical damage. Again, State Farm Mutual Auto leads with 22.31%, Allstate remains second with a 19.24% share of the market a slight drop from 1980. Of more significance is the fact that Allstate has fallen 3% behind State Farm. In 1978 and 1979, Allstate trailed State Farm by about 4%, closing the gap to 2.2% in 1980 and now falling back to 3%. Criterion has 7.1% of the market up .4% from 1980. United Services Automobile Association is up .45% over 1980 to 4.75%. In 1981, State Farm Fire and Casualty increased it share 1.1% to 3.6%. All of the top ten this year increased their premium volume and only one company from last year dropped out of the top ten, Leader National falling from 5th in 1980, a 3.3% share, to 11th in 1981 with a 2.41% share. Of these 30 writers, 13 companies increased their market share, 15 declined and two remained about the same. Nineteen companies wrote more premium in 1981 and 11 wrote less. Cumulatively, the 30 companies accounted for 96.39% of all private passenger auto premiums, whereas the 30 top writers in 1980 represented 96.6% of the market. Premium volume for all admitted companies writing private passenger automobile insurance in 1981 was $59,304,000 up 10.5% over the 1980 figure of $53,666,000

Exhibit 2, Chart 1 shows us that liability business was not as profitable in 1981 as in years past. The loss ratio for the top 30 writers and the overall market was the same in 1981, 62.8%. This is a substantial increase from the 51.5% loss ratio experienced by the total private passenger auto liability market in 1980. Of the top 30 companies, 10 had better experience, 18 worse and two were new markets in 1981. Eleven of the 18 companies with loss ratios worse than last year had loss ratios in excess of 60%, eight had in excess of 70%, three companies experienced a loss ratio greater than 80%. Eleven of the 30 companies had loss ratios below 50%, seven of these were below 40%.

The second chart of Exhibit 2 shows that the private passenger automobile physical damage market had a good year in 1981. The loss ratio for all companies was 49.5% compared to 53% in 1980. Fifteen of the top 30 companies improved their loss ratios in 1981. Only five of the 30 companies had loss ratios in excess of 60%, eight of the 30 had loss ratios less than 40%.

Chart 3 has the loss ratios for the top 30 writers of both liability and physical damage coverages and again we see generally profitable results. Of the 30 companies, four had loss ratios in excess of 70%, 14 had loss ratios less than 50% and the overall loss ratios for all companies was 56.8%, 4.6% higher than 1980 but still low enough for profit.

The two charts of Exhibit III further illustrate the profitability of the private passenger auto market in Alaska. Here we have the top 30 writers of liability and physical damage auto coverages and their expense exhibits. We have calculated the loss ratios, which should indicate a company's break-even point--permissibe loss ratio (PLR)--(the ratios do not provide for investment income, reserves or the traditional 5% profit percentages). In the liability arena 14 companies had actual

loss ratios that exceeded their PLR, up from seven in 1980. Four of these companies had expense ratios in excess of that normally allowed by this division. An expense factor (including profit) greater than 45% is in most cases considered excessive. Thirteen companies had actual loss ratios 15% below their PLR in 1981 compared to 17 in 1980. The average PLR for the 30 companies was 61.2%. The expense exhibits for physical damage evidenced five companies whose loss ratios exceeded their PLR. Four of these companies had expense ratios in excess of the normally allowed 45%. Twelve companies had actual loss ratios 20% or more below their permissible loss ratios. The average PLR for the 30 companies was 61.9%, compared to actual loss ratios for the 30 companies of 49.5%, leaving 12.4% for incurred but not reported claims and profit requirements.

Writers of private passenger automobile insurance in Alaska have experienced five consecutive years of profitability a condition that's rare in today's automobile market. In many markets in the "Lower 48" states, combined ratios of 100% or more are common. Over the next 12 months we will be urging some companies to lower their rates and/or bring their expenses into line with accepted standards.

Exhibit IV is an illustration of the total private passenger automobiles registered in the State versus the insured car years, a comparison which provides a means of approximating the percent of uninsured motorists in this State. We have reevaluated the data base used in previous reports and find that statistics for the total number of autos were misstated. We have corrected the deficiencies and now have what we believe to be the most accurate possible estimation of the number of uninsured motorists. It is impossible to determine precisely the percentage uninsured. Even with the inherent inadequacies of this system, we can see that the number of insured drivers increased somewhat in 1980, we estimate 59.5% were insured up 1.8% over 1979 and 6.3% over 1978. While this increase is welcome, the thought that approximately 40% of Alaskans on the highways are uninsured is unsettling at best. Reasons for the large numbers of uninsured drivers are illusive. There does not appear to be a lack of available markets, and rates, in general, are not excessive.

Exhibit V concerns the Automobile Insurance Plan (assigned risk plan). Part A shows that in 1980, 2.6% of all insureds in the State were written through the Plan. This is 1% less than in 1979, 3.1% less than in 1978 and 5.2% less than 1977. 6.5% of the insureds countrywide were written through a plan of some sort in 1980, this is compared to 3.9% in 1979, an increase of 67%. In part B we see that the population of the plan continues to decline. At the end of 1980 there were 3,564 insureds in the plan, 24.1% less than in December 1979. 2,627 were in the plan at the end of 1981, a 26.3% drop from 1980 and 70.2% less than the 9,447 at the end of 1977. The depopulation of the plan is continuing in 1982 as shown in part C. Through September of 1982 only 1,009 policies had been assigned, 37.8% less than September 1981. The number of policies assigned each month has declined for 57 straight months. Part D charts the percentage of private passenger automobile liability premiums attributable to the Automobile Insurance Plan. The percentage in 1980 was 4.3%, down 2% from the 6.3% in 1979.

This division remains concerned about the population of the plan. While the population continues to decrease, the division feels that many insureds being placed in the plan could be written by companies on a voluntary basis. In conversations with agents around the State who utilize the plan extensively, we have heard that one of the main reasons for their use of the plan is price. We agree that for some types of risks the plan rates are low in comparison to voluntary market, but these rates are low because the experience of the plan has been favorable. The preponderance of clean risks or certainly risks that would be acceptable to companies on a voluntary basis are, to some degree, responsible for this good experience. The Alaska Automobile Insurance Plan Advisory Committee has been exploring various methods of depopulating the plan. One method receiving consideration is the requirement that agents give insureds a brochure explaining the plan and advising that by shopping, they may find companies willing to write voluntarily at lower rates or with improved coverage and better service.

For several years we have closed this narrative summary with a statement to the effect that the private passenger automobile insurance market in Alaska is profitable; this year is no exception. We are of the opinion that this profitability will continue. While this division continues to push for reduced insurance rates, we are not going to hinder the right of a company to make a reasonable profit. We will continue our efforts to assure that auto insurance rates in Alaska are neither excessive, inadequate nor unfairly discriminatory.

PRIVATE PASSENGER AUTOMOBILE RATING EXAMPLES

The rating examples on the following pages have been compiled by the division based on data supplied by the companies listed. Our thanks to them for their cooperation. The rating examples are all based on the same coverage levels and rating information, excepting the differences noted.

The fact that a company has a rate for a particular risk does not mean to imply that they will write the risk. As much as possible, we have tried to identify what companies will not write what risk. Underwriting and marketing considerations will determine whether a particular risk is acceptable to a particular company.

The division urges prospective insureds to shop for their insurance coverages as they would for any other large purchase. A review of the rates shown for each example demonstrates the great variance in price available for the same coverage.

The product should not be judged based solely on price. Service, in all its numerous aspects, is an equally important factor.

All rates are current as of October 1, 1982.

Coverages: (Rates as of 10-1-82)

$25,000/50,000	Bodily Injury Liability
$10,000	Property Damage Liability
$ 5,000	Medical Payments
$ 100	Deductible Comprehensive
$ 200	Deductible Collision
$25,000/50,000	Uninsured Motorists
Alaska Suits	(Civil Rule 82)

The vehicle in all examples is a 1981 Ford Escort (4 door).

Coverage Exceptions:

Globe American Casualty - Medical Payments are $2,000.

Leader National - $250 deductible collision.

State Farm Mutual Automobile - $50 deductible comprehensive.

Dairyland - $250 deductible for collision, medical payments are $2,000.

National Indemnity - $50 deductible comprehensive, $250 deductible collision.

Rating Data Exceptions:

Firemans Fund
Associated Indemnity
National Surety: Rates for Anchorage and Fairbanks are for vehicles garaged in the city; rates for the suburban areas of the two cities are approximately 20% lower in Anchorage and 43% lower in Fairbanks.

Government Employees Insurance Co.: 10% bumper discount applies to collision premiums. Five year "Good Driver Discount" applied to Example A.

Dairyland: Liability rates include $10 new business policy fee that applies during first year. 5% premium credit each quarter the insured remains accident free during first year, 5% each 6 months thereafter to maximum of 40%. This company writes policies on a monthly basis.

EXAMPLE A: Adult driver (married, over 25)
No accidents or citations
Pleasure use of vehicle(less than 7,500miles annually)

PART TWO

HOMEOWNERS

1982 - STATISTICAL ANALYSIS
HOMEOWNERS INSURANCE

- SUMMARY -

This portion of the 1982 Personal Lines Statistical Analyses is devoted to the Alaska homeowners insurance market. Following the statistical exhibits is a comparison of the rates charged by many writers of homeowners insurance in Alaska. The comments that led off the Private Passenger Automobile summary apply likewise to the profitable homeowners market.

Exhibit I illustrates the percentage of the overall market garnered by each of the top 25 writers of homeowners insurance in Alaska (rank, based on written premium). State Farm Fire and Casualty leads the pack in 1981, as they have for many years. State Farm Fire and Casualty had 41.9% of the market in 1981, the same percentage they had in 1980. They did increase their premium volume by 18.8% during 1981. Allstate, the second largest writer, lost about .3% of their share, down to 20.38% from 20.7% in 1980. Their premium volume was up 16.7%. Third place Alaska Pacific Assurance lost both market share and premium volume in 1981. They had 5.28% of the market in 1981 compared to 6.8% in 1980, a drop of about 1.5% while premium volume dropped 7.3%. Continental held onto fourth place by increasing their market share by about .6% to 4.18% up from 3.6% in 1980. Premium volume for them was up 39.4%. The largest gain in market share was by Dependable Insurance Company now in fifth place with a 2.74% share compared with 1% in 1980. Premium volume for Dependable was up 224.5%. Of the top ten companies, four increased their market share, four lost share and two stayed the same. Out of the ten companies, eight increased their premium volume in 1981. Of the 25 companies, 11 increased their share while nine lost and five stayed the same. Overall, the 25 companies in 1981 represent 98.6% of the market compared to 1980 when the 25 top companies accounted for 99.9% of the market. Premium volume for 20 of the companies was up, only five had less written premium in 1981 than 1980. For all companies writing homeowners insurance in Alaska premium volume was $24,160,000, up 18.8% from $20,357,000 written in 1980.

While we are pleased that the market has spread somewhat, we are still concerned that nearly 75% of the homeowners market is shared by five companies. Even more disturbing is the fact that two companies hold over 62% of the market. The division is rather powerless to change this concentration and, therefore, must rely on the other companies writing in Alaska to aggressively pursue a larger share of the market. Companies writing this coverage have been able to show a profit in 11 of the past 12 years and we are at a loss as to why more companies are not actively seeking more new business.

Exhibit II adds credence to the above point. Here we have the same 25 companies and their loss ratios for 1978-1981. As the chart shows, 1981 was a return to the profitable experience experienced in every year since 1969, a record marred only by 1980's wind storm losses. The loss ratio for all companies was 49.9%, an improvement of 74 percentage points over the 123.9% loss ratio of 1980 and .4% better than 1979. Of the 25 companies, 15 had loss ratios of 50% or less, 14 had 40% or less and seven had a loss ratio of 20% or less.

Exhibit III further illustrates how profitable homeowners insurance has been in Alaska. This chart lists the top 25 companies along with their expenses in 1981. In 1980, 16 companies had combined loss ratios greater than 100%; in 1981, 16 companies had less than a 100% combined loss ratio. Of the eight companies with combined ratios over 100%, six had expenses that exceeded the 45% that this division considers acceptable. Total expenses averaged 42.4% which when combined with the actual loss ratio for the 25 companies of 50.7%, indicates a combined of 93.1%, this leaves 6.9% for profit and the ever popular IBNR (incurred but not reported) claimed.

HOMEOWNERS INSURANCE RATE EXAMPLES

The rating examples on the following pages are all based on the same coverage levels and rating information. The product should not be judged solely on the basis of price. Service, in all its numerous aspects, is also an important consideration.

Rates are current as of 8/1/82.

Rating and Coverage Data:

Policy	- HO-3
Construction	- Frame
Premium	- Annual ($100 deductible)
Locations	- Anchorage
	- Fairbanks
	- Juneau
Protection Classes	- 4, 6, 8, 9, 10
Insured Amount Each Location & Protection Class	- $ 50,000
	- 80,000
	- 110,000

Sec. 21.36.400 LIMITATION ON SURCHARGES FOR AUTOMOBILE INSURANCE FOR ACCIDENTS OR VIOLATIONS.

(a) An insurer may not charge increased premium or surcharge a rate for automobile insurance based upon an automobile violation unless the insured or other operator residing in the same household has been convicted of that violation.

(b) An insurer may not charge increased premium or surcharge a rate for automobile insurance if;

(1) The automobile was lawfully parked except that an automobile rolling from a parked position may be considered as the operation of the last operator;

(2) Reimbursement by or on behalf of a person reponsible for the accident has been made or a judgement against such persons exist;

(3) The insured or other operator residing in the same household was struck in the rear and has not been convicted of a moving traffic violation in connection with the accident;

(4) The other party was convicted of a moving traffic violation in connection with the accident;

(5) The insured or other person residing in the same household was hit by a hit and run driver and the accident was reported to the appropriate authorities within 24 hours;

(6) Damage is the result of contact with animals or fowl;

(7) Damage is limited to and caused by flying gravel, missiles or falling objects; or

(8) Loss is subject to coverage under comprehensive coverage.

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF COMMERCE

DIVISION OF INSURANCE / POUCH D — JUNEAU 99801

February 26, 1973

BULLETIN 73-5

TO: ALL INSURERS WRITING AUTOMOBILE INSURANCE FOR DELIVERY IN THE STATE OF ALASKA

RE: USE OF ACCIDENT INFORMATION APPEARING ON MOTOR VEHICLE RECORD ABSTRACTS ISSUED BY THE ALASKA DEPARTMENT OF PUBLIC SAFETY

An increasing number of complaints reveal that a substantial degree of abuse is occurring in connection with accident information appearing on individual motor vehicle record (MVR) "Abstracts issued by the Alaska Department of Public Safety." We have found that insurers are applying "Safe Driver Points" or rate surcharges for accidents shown on the abstract without first determining that such accidents are "At Fault" accidents.

Since the MVR abstract displays accidents without regard to fault, it is improper for an insurer to rely solely upon such an indication as justification for an additional charge. No insurer may blindly charge points or surcharge a risk for an accident appearing on the MVR abstract. In the same light, cancellations or non-renewals based on accident information appearing on the abstract will not be condoned unless supporting determination is made concerning the fault of the accident.

"Safe Driver Points" or rate surcharges may be charged for "At Fault" accidents involving injury to person or damage to property in excess of $100 in which the insured or person covered under the policy is involved except accidents where:

1. The automobile was lawfully parked (An automobile rolling from a parked position need not be considered as lawfully parked, but may be considered as the operation of the last operator); or

2. Reimbursement by or on behalf of a person responsible for the accident has been made or a judgement against such persons exist; or

3. The insured or other operator residing in the same household was struck in the rear and has not been convicted of a moving traffic violation in connection with the accident; or

4. The other party was convicted of a moving traffic violation in connection with the accident and the insured was not; or

5. The insured or other operator residing in the same household was hit by a "Hit and Run" driver and same was reported to authorities within 24 hours; or

6. Damage is the result of contact with animals or fowl; or

7. Damage is limited to and caused by flying gravel, missiles or falling objects.

THIS BULLETIN IS EFFECTIVE IMMEDIATELY.

(7) Damage is limited to and caused by flying gravel, missiles or falling objects; or

(8) Loss is subject to coverage under comprehensive coverage.

~~fire, theft, vandalism, etc.~~

Sec. 21.39.090. Information to be furnished insureds: Hearings and appeals of insureds. Each rating organization and each insurer which makes its own rate shall, within a reasonable time after receiving written request and upon payment of the reasonable charge as it may make, furnish to an insured affected by a rate made by it, or to the authorized representative of the insured, all pertinent information concerning the rate. Each rating organization and each insurer which makes its own rates shall provide within this state reasonable means for a person aggrieved by the application of its rating system to be heard, in person or by his authorized representative, on his written request to review the manner in which the rating system has been applied in connection with the insurance afforded him. If the rating organization or insurer fails to grant or reject the request within 30 days after it is made, the applicant may proceed in the same manner as if his application had been rejected. A party affected by the action of the rating organization or the insurer on the request may, within 30 days after written notice of the action, appeal to the director, who, after a hearing held upon not less than 10 days' written notice to the appellant and to the rating organization or insurer, may affirm or reverse the action. LEGISLATIVE POSITION PAPER

HOUSE BILL NO. 16 (Fritz)

PURPOSE

An Act relating to premium increases for automobile insurance policies.

BACKGROUND

This measure appears to address the problem of an insurance company increasing the rates for an individual insured. Perhaps it attempts to address the problem of a person who has been found to have too many violations, or traffic accidents, by an underwriter who then re-rates the policy in light of these new underwriting criteria.

The procedure established in the proposed Statute is very elaborate and unrealistic.

The sponsors of the legislation need to be aware of the following:

1. In personal lines automobile insurance all rates are approved by the Division of Insurance, and the rating plan together with all underwriting criteria are all on file with and approved by the Division. For example, if an insurance company has a policy of increasing premium for an insured who has three moving violations, that provision will be on file with the Division and will have been approved.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

If an insured is found to have three moving violations, then it is appropriate for the underwriter to re-rate the policy in accordance with terms of the approved filing.

So long as any change in premium is made in accordance with the rate filings on file with and approved by the Division, there is little for the insurance company and the insured to discuss other than the facts which give rise to the underwriting judgment, in other words, did in fact the person receive three moving violations?

2. There already exists a procedure in the Division of Insurance for a person who believes that the underwriting criteria, or re-rating, is not in accordance with the facts or the filing. The Division has a consumer complaints section located in Anchorage that investigates complaints filed with it by any policyholder who believes that they have been improperly charged a premium on their policy.

   The Division has the capacity to investigate the consumer complaint to determine the propriety of the charges and to determine that the charges are in accordance with approved filings.

3. The procedure proposed calls for a meeting with a representative of the insurer to discuss the reasons for the increase.

   The fact is that the two largest automobile insurance writers in the State, State Farm and Allstate, market insurance policies which are computer issued by facilities located in the Lower 48. I suspect there is no one who represents either of those insurers in the State of Alaska who could explain the rate, or change the rate, other than perhaps an informal explanation by one of their representative agents.

   This is even more so with respect to the stock insurance companies which market their automobile insurance in the State but have no representatives in the State.

COMMENT

Since this measure is limited to private passenger automobile insurance, it does not directly affect this Companys book of business, but we do not wish to be precluded from entering the private passenger automobile insurance business in Alaska because of unnecessary burdens placed on underwriters by ill conceived Statutes.

MILO FRITZ

HOUSE BILL 16, AUTOMOBILE INSURANCE PREMIUM INCREASES

I INTRODUCED HB 16, AN ACT RELATING TO PREMIUM INCREASES FOR AUTOMOBILE INSURANCE POLICIES DUE TO A LARGE NUMBER OF COMPLAINTS BY MY CONSTITUENTS. THESE PEOPLE HAVE FELT THAT THEIR INSURANCE PREMIUMS WERE UNJUSTLY RAISED AND THAT THEY HAD NO PROCEDURE AVAILABLE TO APPEAL THE INSURER'S DECISION. THIS BILL SETS FORTH A PROCEDURE FOR AN APPEAL PROCESS BY WHICH THE GENERAL PUBLIC CAN HAVE JUSTICE SERVED. IT WILL NOT ALLOW INSURANCE COMPANIES TO RAISE THE INSURED'S PREMIUM UNLESS THEY ARE UNIFORM IN THEIR POLICY AND HAVE GIVEN THE INSURED AN OPPORTUNITY TO REFUTE THE INSURER'S CLAIM.

BULLETIN 73-5 FROM THE DEPARTMENT OF COMMERCE, DIVISION OF INSURANCE IS ADDITIONAL PROOF THAT THERE HAS BEEN A PROBLEM FOR SOME TIME. THE FACT IS THAT THIS BULLETIN AND THE PRESENT STATUTE, TITLE 21, WHICH GOVERNS INSURANCE, HAVE NOT TAKEN CARE OF THIS PROBLEM.

THERE HAS BEEN SOME CONCERN FROM THE INSURANCE INDUSTRY THAT HB 16 WOULD BE BURDENSOME ON THEM. I HOPE THAT THEY WILL PROPOSE ALTERNATIVES WHICH THE COMMITTEE CAN ACT UPON.

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 22

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing a state residence requirement for loans purchased by the Alaska Industrial Development Authority."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 44.88.105(d) is amended by adding a new paragraph to read:

(9) may not be made unless the project applicant is a

(A) resident of the state;

(B) business enterprise in which the majority interest is owned by residents of the state; or

(C) business enterprise that maintains its headquarters, executive offices, and administrative offices in the state, that maintains its principal place of business in the state, and that derives more than half of its business revenue from business done in the state; in this paragraph "business enterprise" includes the parent company of a business enterprise.

House of Representatives

January 21, 1983

TO: House Labor and Commerce Committee

FROM: Representative John Lindauer John Lindauer

SUBJECT: House Bill #22: "An Act establishing a state residence requirement for loans purchased by the Alaska Industrial Development Authority."

The purpose of this bill is to limit AIDA loans to residents of Alaska and businesses operating in Alaska.

"Many state loan programs and programs using state money already have restrictions that prohibit them from making loans to anyone but state residents. This is the case with agricultural loans (AS 03.10), commercial fishing loans (AS 16.10.300. et seq.), mining loans (AS 27.09), student loans (AS 14.40.741, et seq.), and loans made by the Commercial Fishing and Agricultural Bank (AS 44.81.210 (a) (1)). Other loan programs tend to be limited to state residents by their internal structure. AHFC loans, for example, are generally limited to owner-occupied residencies and thus are made only to persons actually residing in the state. Other examples of self-limiting loan programs are the Municipal Bond Bank Authority (AS 44.85), assisting Alaskan municipalites only, and the Bulk Fuel Revolving Loan Fund (AS 45.87) which assists Alaskan communities and individuals. These programs do not have specific residency requirements, but such requirements are probably not necessary due to the nature of the loan programs."[1]

AIDA has no residency provisions and it is the intent of this bill that only Alaskans participate in this loan program.

The intent is to only qualify business entities who (a) do business within the state of Alaska; (b) have a majority of their employees employed within the geographic bounds of Alaska; and (c) have their corporate headquarters within Alaska.

Re: Sponsor Substitute for House Bill 22

Introductory Analysis

SSHB22 is an act which establishes a state residence requirement for loans purchased by the Alaska Industrial Development Authority. The purpose, as stated by the sponsor, is "to only qualify business entities who (a) do business within the state of Alaska; (b) have a majority of their employees employed within the geographic bounds of Alaska; and (c) have their corporate headquarters within Alaska." In dealing with any program which requires residency immediate questions of constitutionality need to be addressed. The attached memorandum from Legislative Counsel Linn Asper touch on the surface of these concerns but skirt the main questions. Even with a narrow scope of review, Mr. Asper could only conclude, "that a case can be made that the residence requirement it contains is constitutional."

Zobel, Hicklin, Lynden, Shelev, and other cases which have been filed over residency requirements have pointed out the necessity for the legislation to clearly enunciate a state benefit, public purpose, not intrude into commerce (private), and be based on a rational basis for establishing the residency requirement. Since SSHB22 establishes a residency requirement for AIDA, it is necessary to examine the purpose, policy, and rational which created AIDA and see where SSHB22 fits into the general statutes.

The legislative findings, determinations and declarations about AIDA are found in AS 44.88.010(a)(1)-(7). These seven findings relate to unemployment and the need to stimulate economic activity in the state. AS 44.88.010(b) states; "It is declared to be the policy of the state, in the interests of promoting the health, security and general welfare of all the people of the state, and a public purpose, to increase job opportunities and otherwise to encourage the economic growth of the state, including the development of its natural resources, through the establishment and expansion of manufacturing, industrial, and business enterprises and the other facilities referred to in (a)(5) of this section by creating the public corporation with power, duties and functions as provided in AS 44.88.010-44.88.220." The purpose of SSHB22 would be to create a benefit for "Alaska" businesses and may create a climate detrimental to the stated purposes of AS 44.88.010(a) and (b).

Since the purpose of AIDA is to encourage the development of the economy, not to see who may get the profit of a particular enterprise, SSHB22 may have a chilling effect on the ability of otherwise eligible business to invest in the Alaskan marketplace and create the jobs, etc. if they are disqualified on the basis of residency. This also raises the question of how to treat franchises of national corporations.

The questions of interstate commerce certainly need to be addressed. If the purpose of AIDA is to develop the economy, it would seem contradictory to prevent qualified firms from participating based on the location of home office or where they were incorporated. The idea of giving an Alaska based firm a competitive advantage in industry engaged in interstate commerce has not found favor in the courts. The fundamental policy question that needs to be answered is for whose benefit is AIDA established? Is it to meet the goals set forth in AS 44.88.010 or to ensure that only Alaska businessmen receive the profits of business conducted in or based out of Alaska? Should the state be concerned and use the resources of the state for the establishment and development of the economy or should the state underwrite the profit(s) of "Alaska business."

SUBJECT: Residence requirement for applicants for AIDA loans (CSSSHB 22)

TO: Representative John Lindauer

FROM: Linn H. Asper
Legislative Counsel

I have prepared a proposed committee substitute for SSHB 22, that would impose a residence requirement for applicants for AIDA loans. Your concern in making this request, as I understand it, was to eliminate constitutional problems raised by the bill. The only significant change I have made is to delete the inclusion of parent companies in the concept of "business enterprise". The effect of that clause was to bar all out-of-state enterprises from consideration for an AIDA loan unless they relocated in Alaska. As rewritten an outside enterprise could get a loan if an Alaskan subsidiary were formed, controlled by state residents.

The primary purpose of this memorandum is to advise that it may be impossible to write a bill that will accomplish your purpose and still escape constitutional scrutiny. This is so largely because the state of the law is that residence requirements are in full retreat in this state and elsewhere. You are well aware of the Zobel cases, involving durational residency requirements for individuals, but in addition a 1974 case, Lynden Transport v. State, 532 P.2d 700 (Alaska), held that an advantage given resident trucking enterprises over nonresidents was an unconstitutional violation of the equal protection clauses of the federal and state constitutions. Since Lynden Transport involved a permit to do business in the state and your bill concerns access to state subsidized loans, a distinction might be drawn that would favor your proposed legislation, but the potential for a court challenge remains. Lynden Transport has since been cited with favor in Hicklin v. Orbeck, 565 P.2d 167, and Sheley v. Alaska Bar Association, 620 P.2d

642, both of which struck down state durational residence requirements. Nevertheless, because your bill relates to access to a state benefit rather than the ability to do business in the state and because it does not impose a durational residence requirement, it may be easier to establish a rational basis for the residence requirement to justify the distinction between residents and nonresidents. Therefore, although I am not able to guarantee that your bill, as rewritten, satisfies all constitutional requirements, I do believe that a case can be made that the residence requirement it contains is constitutional.

January 25, 1983

Honorable Walt Furnace, Chairman
House Labor and Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Furnace:

On January 25th, at your committee hearing for SS HB22 there were certain questions which Commissioner Lyon indicated would be answered by letter.

Question #1: Does the Authority finance any projects located outside Alaska?

Answer: No. Any project financed by the Authority must be located within the State of Alaska.

Question #2: Please supply the committee with information on the six loans made to possible non-residents.

NAME	$ AMOUNT	PROJECT DESCRIPTION LOCATION/JOBS	HEADQUARTERS LOCATION
ADA Investment	$ 455,000	Construct Warehouse Anchorage/10	Seattle
Lynden Transport	$ 610,000	Purchase Freight Terminal Deadhorse/15	Seattle
Mueller, Robert	$ 560,000	Purchase Warehouse — Anchorage/05	Honolulu
Holiday-Parks	$ 525,000	Construct Manufacturing Bldg Fairbanks/10	Seattle
Forward Alaska, Inc.	$1,000,000	Purchase/Renovate Camp Deadhorse/10	Texas
Petess Pete	$ 130,000	Remodel Building Anchorage/15	Seattle

If we can provide any further information please let us know.

Sincerely,

Bertram L. Wagnon

Sec. 44.88.010. LEGISLATIVE FINDING AND POLICY.

(a) The legislature finds, determines and declares that

(1) there exist areas of the state in which seasonal and nonseasonal unemployment exist;

(2) this unemployment is a serious menace to the health, safety and general welfare, not only to the people in those areas, but also to the people of the entire state;

(3) the state lacks the basic manufacturing, industrial, and business enterprises and the other facilities referred to in (5) of this subsection necessary to permit adequate development of its natural resources and the balanced growth of its economy;

(4) the establishment and expansion of industrial, manufacturing, and business enterprises in Alaska and the other facilities referred to in (5) of this subsection are essential to the development of the natural resources and the long-term economic growth of the state, and will directly and indirectly alleviate unemployment in the state;

(5) the achievement of the goal of full employment, and of establishment and continuing operation and development of industrial, manufacturing, and business enterprises in the state, including facilities for air and water transportation, facilities for pollution control and waste disposal, facilities for the local furnishing of gas, facilities for water, and facilities for industrial parks, will be accelearated and facilitated by the creation of an instrumentality of the state with powers to incur debt and to make and insure loans to finance, and to assist private lenders to make loans to finance, the establishment, operation, and development of industrial, manufacturing, and business enterprises, including facilities for air and water transportation, facilities for pollution control and waste disposal, facilities for the local furnishing of gas, facilities for water, and facilities for industrial parks;

(6) it is in the public interest to promote the prosperity and general welfare of all citizens of the state by stimulating commercial and industrial growth and expansion by encouraging an increase of private investment by banks, investment houses, insurance companies, and other financial institutions, including pension and retirement funds, to help satisfy the need for economic expansion;

(7) it is in the state's interest to import private capital to create new economic activity which would not otherwise take place in the state.

(b) It is declared to be the policy of the state, in the interests of promoting the health, security and general welfare of all the people of the state, and a public purpose, to increase job opportunities and otherwise to encourage the economic growth of the state, including the development of its natural resources, through the establishment and expansion of manufacturing, industrial, and business enterprises and the other facilities referred to in (a)(5) of this section by creating the public corporation with power, duties and functions as provided in AS 44.88.010 44.88.220.

HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 1 ch 64 SLA 1977; am secs. 44 48 ch 106 SLA 1980; am sec. 28 ch 115 SLA 1981)

Sec. 44.88.020. CREATION OF AUTHORITY.

There is created the Alaska Industrial Development Authority. The authority is a public corporation of the state and a body corporate and politic constituting a political subdivision within the Department of Commerce and Economic Development, but with separate and independent legal existence.
HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 104 ch 218 SLA 1976)

Sec. 44.88.030. MEMBERSHIP OF AUTHORITY.

(a) The membership of the authority consists of

(1) the commissioner of revenue and the commissioner of commerce and economic development;

(2) one other person appointed by the governor who serves as the head of a principal department of the executive branch; and

(3) two public members appointed by the governor.

(b) If a member described in (a)(1) or (a)(2) of this section is unable to attend a meeting of the authority, he may by an instrument in writing filed with the authority, designate his deputy or assistant to act in his place as a member at the meeting. For all purposes of this chapter, the designee is a member of the authority at the meeting.

(c) Members of the authority described in (a)(2) and (a)(3) of this section serve two-year terms. However, the initial appointment of one member described in (a)(3) of this section shall be for a one-year term.

(d) If a vacancy occurs in the membership of the authority, the governor shall immediately appoint a member for the unexpired portion of the term POSTPONED EFFECTIVE DATE

(e) Effective on the effective date of the amendment to the Constitution proposed in 1980 Legislative Resolve No. 43 The appointment or reappointment of a member of the authority under (a)(2) or (a)(3) of this section is subject to confirmation by a majority vote of the members of the legislature in joint session. If the legislature fails to confirm the appointment of the head of a principal department of the executive branch as a member, the governor shall appoint the head of another principal department of the executive branch to serve as a member subject to confirmation under this subsection. A member appointed to fill a vacancy under (d) of this section is subject to confirmation under this subsection.
HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 7 ch 207 SLA 1975; am sec. 2 ch 64 SLA 1977; am secs. 49, 50 ch 106 SLA 1980)

Sec. 44.88.040. CHAIRMAN AND VICE-CHAIRMAN.
The members of the authority shall elect a chairman from among themselves. A vice-chairman may be elected by the authority from among its other members. The vice-chairman presides over all meetings in the absence of the chairman and has other duties which the authority may direct.
HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 105 ch 218 SLA 1976; am sec. 51 ch 106 SLA 1980)

Sec. 44.88.050. MEETINGS, COMPENSATION, OFFICERS AND EMPLOYEES.

(a) A majority of the members of the authority constitutes a quorum for the transaction of business or the exercise of a power or

function at a meeting of the authority. In case of a tie vote on a motion or resolution pending before the authority the motion or resolution shall be presented to the governor and if approved by him, is considered adopted by the authority. The authority may meet and transact business by electronic media if

(1) public notice of the time and locations where the meeting will be held by electronic media has been given in the same manner as if the meeting were held in a single location;

(2) participants and members of the public in attendance can hear and have the same right to participate in the meeting as if the meeting were conducted in person; and

(3) copies of pertinent reference materials, statutes, regulations, and audio-visual materials are reasonably available to participants and to the public. A meeting by electronic media as provided in this subsection has the same legal effect as a meeting in person.

(b) The public members of the authority receive $100 compensation for each day spent on official business of the authority and may be reimbursed by the authority for actual and necessary expenses at the same rate paid to members of state boards under AS 39.20.180.

(c) The authority may appoint persons as officers it considers advisable, including an executive director, and may employ professional advisors, counsel, technical experts, agents, and other employees it considers advisable. The executive director and employees of the authority are in the exempt service under AS 39.25.010 - 39.25.220.

(d) The authority shall keep minutes of each meeting and send a certified copy to the governor and to the Legislative Budget and Audit Committee.

HISTORY (Sec. 1 ch 64 SLA 1967; am secs. 52, 53 ch 106 SLA 1980; am secs. 29, 30 ch 115 SLA 1981)

Sec. 44.88.070. PURPOSE OF THE AUTHORITY.

The purpose of the authority is to promote, develop and advance the general prosperity and economic welfare of the people of Alaska, to relieve problems of unemployment, and to create additional employment by providing various means of financing and means of facilitating the financing of industrial, manufacturing, and business enterprises and the other facilities referred to in AS 44.88.010(a)(5) within the state.

HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 54 ch 106 SLA 1980; am sec. 31 ch 115 SLA 1981)

Sec. 44.88.080. POWERS OF THE AUTHORITY.

In furtherance of its corporate purposes, the authority has the following powers in addition to its other powers:

(1) to sue and be sued;

(2) to have a seal and alter it at pleasure;

(3) to make and alter bylaws for its orgnization and internal management;

(4) to adopt regulations governing the exercise of its corporate powers;

(5) to acquire an interest in a project as necessary or appropriate to provide financing for the project, whether by purchase, gift or lease;

(6) to lease to others a project acquired by it for the rentals and upon the terms and conditions the authority may consider advisable, including, without limitation, provisions for options to purchase or renew;

(7) to issue bonds, in accordance with AS 44.88.090, to pay the cost of a project and to secure payment of the bonds as provided in AS 44.88.010 44.88.220;

(8) to sell, by installment sale or otherwise, exchange, donate, convey or encumber in any manner by mortgage or by creation of any other security interest, real or personal property owned by it, or in which it has an interest, including a project, when, in the judgment of the authority, the action is in furtherance of its corporate purposes;

(9) to accept gifts, grants or loans from, and enter into contracts or other transactions regarding them, with a federal agency or an agency or instrumentality of the state, a municipality private organization or other source;

(10) to deposit or invest its funds, subject to agreements with bondholders;

(11) to enter into contracts or agreements with respect to the exercise of any of its powers, and do all things necessary or covenient to carry out its corporate purposes and exercise the powers granted in AS 44.88.010 - 44.88.220;

(12) to purchase or insure loans to finance the costs of manufacturing, industrial, and business enterprise projects;

(13) to enter into loan agreements with respect to one or more projects upon the terms and conditions the authority considers advisable;

(14) to acquire, manage, and operate a project when it becomes necessary or desirable to do so to safeguard the authority from losses;

(15) to assist private lenders to make loans to finance the costs of projects through loan commitments, short-term financing, or otherwise;

(16) to accept gifts, grants, or loans from a federal agency, from an agency or instrumentality of the state or of a municipality, or from any other source;

(17) to enter into contracts or other transactions with a federal agency, with an agency or instrumentality of the state or of a municipality, or with a private organization or other entity consistent with the exercise of any power under AS 44.88.010 44.88.220;

(18) to facilitate the expansion of a secondary market for the resale of federally or commercially insured loans made to finance the costs of projects in Alaska held by federal and state chartered financial institutions or by the Alaska Commercial Fishing and Agriculture Bank.

HISTORY (Sec. 1 ch 64 SLA 1967; am secs. 55 - 59 ch 106 SLA 1980; am secs. 32, 33 ch 115 SLA 1981)

Sec. 44.88.090. BONDS OF THE AUTHORITY.

(a) Subject to (g) of this section, the authority may borrow money and may issue bonds, including but not limited to bonds on which the principal and interest are payable,

(1) exclusively from the income and receipts or other money derived from the project financed with the proceeds of the bonds,

(2) exclusively from the income and receipts or other money derived from designated projects whether or not they are financed in whole or in part with the proceeds of the bonds, or

(3) from its income and receipts or other assets generally, or a designated part or parts of them.

(b) Bonds shall be authorized by resolution of the authority, and be dated and shall mature as the resolution may provide, except that no bond may mature more than 40 years from the date of its issue. Bonds shall bear interest at the rate or rates, be in the denominations, be in the form, either coupon or registered, carry the registration privileges, be executed in the manner, be payable in the medium of payment, at the place or places, and be subject to the terms of redemption which the resolution or a subsequent resolution may provide.

(c) All bonds, regardless of form or character, shall be negotiable instruments for all the purposes of the Uniform Commercial Code.

(d) All bonds may be sold at public or private sale in the manner, for the price or prices, and at the time or times which the authority may determine.

(e) Before the issuance of any bonds, the authority shall make provision by lease or other agreement regarding the project or projects being financed by the issue of the bonds for rentals or other considerations at least sufficient, in the judgment of the authority, to pay the principal of and interest on the bonds as they become due and to create and maintain the reserves therefor as the authority considers necessary or desirable and to meet all obligations in connection with the lease or other agreement and all costs necessary to service the bonds unless the lease or agreement provides that the obligations are to be met or costs are to be paid by a party other than the authority.

(f) The superior court shall have jurisdiction to hear and determine suits, actions or proceedings relating to the authority, including suits, actions or proceedings brought to foreclose or otherwise enforce a mortgage, pledge, assignment or security interest or brought by or for the benefit or security of a holder of its bonds or by a trustee for or other representative of the holders.

(g) The authority may not

(1) issue bonds, other than refunding bonds, in any 12-month period beginning after June 30, 1982, in an amount that exceeds the amount of bonds authorized to be issued during the preceding 12-month period, unless a different amount is authorized by the legislature; or

(2) issue revenue bonds other than refunding bonds for a project under this chapter in an amount greater than $50,000,000 during any 12-month period beginning after June 30, 1981, unless the issuance is included separately in the estimates required in the report of the authority under AS 44.88.210(b) and unless the legislature, by law, approves the issuance.

(h) The authority may combine, for the purposes of a single offering, bonds financing more than one project under AS 44.88.010 - 44.88.220.

HISTORY (Sec. 1 ch 64 SLA 1967; am secs. 60, 61 ch 106 SLA 1980; am sec. 35 ch 115 SLA 1981)

Sec. 44.88.100. TRUST INDENTURES AND TRUST AGREEMENTS. In the discretion of the authority, an issue of bonds may be secured by a trust indenture or trust agreement between the authority and a corporate trustee (which may be a trust company, bank, or national banking association, with corporate trust powers, located inside or outside the state) or by a secured loan agreement or other instrument or under a resolution giving powers to a corporate trustee (hereinafter in this section referred to as "trust agreement") by means of which the authority may:

(1) make and enter into any and all the covenants and agreements with the trustee or the holders of the bonds which the authority may determine to be necessary or desirable, including, without limitation, covenants, provisions, limitations and agreements as to

(A) the application, investment, deposit, use and disposition of the proceeds of bonds of the authority or of money or other property of the authority or in which it has an interest;

(B) the fixing and collection of rents or other consideration for, and the other terms to be incorporated in a lease or contract of sale of a project;

(C) the assignment by the authority of its rights in the lease or contract of sale of a project or in a mortgage or other security interest created with respect to a project to a trustee for the benefit of bondholders;

(D) the terms and conditions upon which additional bonds of the authority may be issued;

(E) the vesting in a trustee of rights, powers, duties, funds or property in trust for the benefit of bondholders, including, without limitation, the right to enforce payment, performance and all other rights of the authority or of the bondholders, under a lease, contract of sale, mortgage, security agreement, or trust agreement with respect to a project by mandamus or other proceeding or by taking possession of by agent or otherwise and operating a project and collecting rents or other consideration and applying the same in accordance with the trust agreement;

(2) pledge, mortgage or assign money, leases, agreements, property or other assets of the authority either presently in hand or to be received in the future, or both; and

(3) provide for any other matters of like or different character which in any way affect the security or protection of the bonds.

HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.105. CAPITAL RESERVE FUNDS AND CAPITAL RESERVE FUND REQUIREMENT.

(a) For the purpose of securing one or more issues of its bonds, the authority may establish one or more special funds, called "capital reserve funds", and shall pay into those capital reserve funds the proceeds of the sale of its bonds and other money which may be made available to the authority from other sources for the purposes of the

capital reserve funds. A capital reserve fund may be established only if the authority determines that the establishment of the fund would enhance the marketability of the bonds, and if those costs of a project, as defined in AS 44.88.220, which are to be financed with the proceeds of the bonds, do not exceed $10,000,000. Money in a capital reserve fund, except as provided in this section, may be used as required only for

(1) the payment of the principal of, and interest on, bonds or of the sinking fund payments with respect to those bonds;

(2) the purchase or redemption of the bonds; or

(3) the payment of a redemption premium required to be paid when the bonds are redeemed before maturity. However, money in a capital reserve fund may not be withdrawn if the withdrawal would reduce the amount in the capital reserve fund to less than the capital reserve requirement, except for the purpose of making payment, when due, of principal, interest, redemption premiums on the bonds, and sinking fund payments when other money of the authority is not available for the payments. Income or interest earned by, or increment to, a capital reserve fund, from the investment of all or part of the fund, may be transferred by the authority to other funds or accounts of the authority if the transfer does not reduce the amount of the capital reserve fund below the capital reserve fund requirement.

(b) If the authority decides to issue bonds secured by a capital reserve fund, the bonds may not be issued if the amount in the capital reserve fund is less than the capital reserve fund requirement, unless the authority, at the time of issuance of the bonds, deposits in the capital reserve fund from the proceeds of the bonds to be issued or from other sources, an amount which, together with the amount then in the fund, is not less than the capital reserve fund requirement.

(c) In computing the amount of a capital reserve fund for the purpose of this section, securities in which all or a portion of the fund is invested shall be valued by a reasonable method established by the authority by resolution. Valuation shall include the amount of interest earned or accrued as of the date of the valuation.

(d) The chairman of the authority shall annually, no later than January 2, certify in writing to the governor and the legislature the amount, if any, required to restore a capital reserve fund to the capital reserve fund requirement. The legislature may appropriate to the authority the amount certified by the chairman of the authority. The authority shall deposit the amounts appropriated under this subsection during a fiscal year in the proper capital reserve fund. Nothing in this section creates a debt or liability of the state.

(e) In this section, "capital reserve fund requirement" means the amount required to be on deposit in the capital reserve fund as of the date of computation as determined by resolution of the authority.

(f) The authority may not establish a capital reserve fund to secure an issue of bonds in an amount in excess of $1,000,000 unless at least 20 percent of the principal amount of the loan for the project is retained by a federal or state chartered financial institution or the Alaska Commercial Fishing and Agriculture Bank.

(g) The authority may establish reserve funds, other than capital reserve funds, to secure one or more issues of its bonds. The authority may deposit in a reserve fund established under this subsection the proceeds of sale of its bonds and other money which may be made

available from any other source. A reserve fund established under this subsection must comply with (a) - (c) of this section. The authority may allow a reserve fund established under this subsection to be depleted without complying with (d) of this section.
HISTORY (Sec. 62 ch 106 SLA 1980; am secs. 36, 37 ch 115 SLA 1981)

Sec. 44.88.110. VALIDITY OF PLEDGE.
It is the intention of the legislature that a pledge made in respect of bonds shall be valid and binding from the time the pledge is made; that the money or property so pledged and thereafter received by the authority shall immediately be subject to the lien of the pledge without physical delivery or further act; and that the lien of the pledge shall be valid and binding as against all parties having claims of any kind in tort, contract or otherwise against the authority irrespective of whether the parties have notice. Neither the resolution, trust agreement nor any other instrument by which a pledge is created need be recorded or filed under the provisions of the Uniform Commercial Code to be valid, binding or effective against the parties.
HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.120. NONLIABILITY ON BONDS.
(a) Neither the members of the authority nor a person executing the bonds are liable personally on the bonds or are subject to personal liability or accountability by reason of the issuance of the bonds.
(b) The bonds issued by the authority do not constitute an indebtedness or other liability of the state or of a political subdivision of the state, except the authority, but shall be payable solely from the income and receipts or other funds or property of the authority. The authority may not pledge the faith or credit of the state or of a political subdivision of the state (except the authority) to the payment of a bond and the issuance of a bond by the authority does not directly or indirectly or contingently obligate the state or a political subdivision of the state to apply money from, or levy or pledge any form of taxation whatever to the payment of the bond.
HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.130. PLEDGE OF THE STATE.
The state pledges to and agrees with the holders of bonds issued under this chapter and with the federal agency which loans or contributes funds in respect to a project, that the state will not limit or alter the rights and powers vested in the authority by this chapter to fulfill the terms of a contract made by the authority with the holders or federal agency, or in any way impair the rights and remedies of the holders until the bonds, together with the interest on them with interest on unpaid installments of interest, and all costs and expenses in connection with an action or proceeding by or on behalf of the holders, are fully met and discharged. The authority is authorized to include this pledge and agreement of the state, insofar as it refers to holders of bonds of the authority, in a contract with the holders, and insofar as it relates to a federal agency, in a contract with the federal agency.

HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.140. EXEMPTION FROM TAXATION.

(a) The real and personal property of the authority and its assets, income and receipts are declared to be the property of a political subdivision of the state and, together with any project financed under this chapter and a leasehold interest created in a project applicant or other person under this chapter, devoted to an essential public and governmental function and purpose, and the property, assets, income, receipts, project and leasehold interests shall be exempt from all taxes and special assessments of the state or a political subdivision of the state, including, without limitation, all boroughs, cities, municipalities, school districts, public utility districts and other taxing units. All bonds of the authority are declared to be issued by a political subdivision of the state and for an essential public and governmental purpose and to be a public instrumentality and the bonds, and the interest on them, the income from them and the transfer of the bonds, and all assets, income and receipts pledged to pay or secure the payment of the bonds, or interest on them, shall at all times be exempt from taxation by or under the authority of the state, except for inheritance and estate taxes and taxes on transfers by or in contemplation of death. Nothing in this section affects or limits an exemption from license fees, property taxes, or excise, income or any other taxes, provided under any other law, nor does it create a tax exemption with respect to the interest of any business enterprise or other person, other than the authority, in any property, assets, income, receipts, project or lease whether or not financed under this chapter.

(b) The authority may enter into agreements with a proposed project applicant or project applicant providing for payments, computed on a formula basis or otherwise, in lieu of taxes, which the authority may consider appropriate. The agreement may provide that the payments be made to the political subdivision of the state in which a project is or is to be located or to any other taxing unit of the state including, without limitation, a borough, city, municipality, school district or public utility district, the area of which is coterminous in whole or in part with that of the political subdivision.

(c) For the purposes of AS 14.17 relating to the computation of the required local effort by a district as defined in AS 14.17.250(3), all property exempted from taxation by this chapter shall be considered taxable real and personal property.

HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 3 ch 64 SLA 1977; am secs. 63, 64 ch 106 SLA 1980)

Sec. 44.88.150. BONDS LEGAL INVESTMENTS FOR FIDUCIARIES.

The bonds of the authority are securities in which all public officers and bodies of the state and all municipalities and municipal subdivisions, all insurance companies and associations and other persons carrying on an insurance business, all banks, bankers, trust companies, savings banks, savings associations, including savings and loan associations and building and loan associations, investment companies and other persons carrying on a banking business, all administrators,

guardians, executors, trustees and other fiduciaries, and all other persons whatsoever who are now or may hereafter be authorized to invest in bonds or other obligations of the state, may properly and legally invest funds including capital in their control or belonging to them. Notwithstanding any other provisions of law, the bonds of the authority are also securities which may be deposited with and may be received by all public officers and bodies of this state and all municipalities and municipal subdivisions for any purpose for which the deposit of bonds or other obligations of the state is now or may hereafter be authorized.
HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.155. ENTERPRISE DEVELOPMENT FUND.

(a) The enterprise development fund is established in the authority. The enterprise development fund is a trust fund for the uses and purposes of AS 44.88.010 44.88.220. The enterprise development fund consists of money or assets appropriated or transferred to the authority and other money or assets deposited in it by the authority.

(b) The authority may establish in the enterprise development fund a small enterprise loan account, a loan insurance account, and other accounts it considers appropriate.

(c) Money and other assets of the enterprise development fund may be used to secure bonds of the authority, and shall be held and invested by the authority in the types of investments described in AS 37.10.070(a) and AS 39.35.110(a)(9) and (14) or shall be used to purchase loans for projects as defined in AS 44.88.220.

(d) A loan purchased in whole or in part by the authority, other than a loan which is financed with the proceeds of bonds of the authority and secured only by a project applicant or a project,

(1) may not exceed

(A) $10,000,000; or

(B) $500,000 if the loan is purchased under AS 44.88.158;

(2) may not exceed the cost of the project or 75 percent of the appraised value of the project, whichever is less, unless the amount of the loan in excess of this limit is federally insured or guaranteeed or is insured by a qualified mortgage insurance company;

(3) may not be for a term longer than three-quarters of the authority's estimate of the life of the project or 25 years from the date the loan is made, whichever is earlier;

(4) shall contain complete amortization provisions satisfactory to the authority requiring periodic payments by the borrower;

(5) shall be in the form and contain the terms and provisions with respect to insurance, repairs, alterations, payment of taxes and assessments, default reserves, delinquency charges, default remedies, acceleration of maturity, secondary liens and other matters the authority prescribes;

(6) shall be secured as to repayment by a mortgage or other security instrument in the manner the authority determines is feasible to assure timely repayment under a loan agreement entered into with the borrower;

(7) may not be made unless

(A) at least 10 percent of the principal amount of the loan is retained by the originator of the loan; or

(B) 100 percent of the principal amount of the loan is guaranteed by the United States or an agency or instrumentality of the United States;

(8) must be

(A) at least partially guaranteed by the United States or an agency or instrumentality of the United States, subject to the provisions of AS 44.88.158; or

(B) financed from the proceeds of bonds; or

(C) expected by the authority to be financed from the proceeds of bonds.

(e) The authority may adopt regulations for the administration of the enterprise development fund which may include, without limitation, provisions for fees and agreements relating to application, loan commitment, servicing, and origination of loans by other lenders.

(f) The authority may enter into agreements as to the use of the money in the enterprise development fund, including without limitation, trust or custody arrangements with banks or trust companies. It may also pledge, assign, or grant the agreement, interests under an agreement, or interests in the enterprise development fund as may be necessary or appropriate to provide for payment and security for bonds of the authority.

HISTORY (Sec. 65 ch 106 SLA 1980; am sec. 38 ch 115 SLA 1981)

Sec. 44.88.157. LOAN INSURANCE AND LOAN INSURANCE ACCOUNT.

(a) The purpose of the loan insurance account is to provide insurance of mortgage loans and other loans made or purchased by the authority, or made by others and approved for insurance by the authority, for a project. The authority may enter into agreements as to the use of money in the loan insurance account and may pledge, assign, or grant interests in the loan insurance account as provided in this section. The authority may adopt regulations and enter into agreements with respect to the exercise of any power or approval relating to the loan insurance account under this section, including, without limitation, agreements as to the use of money in the loan insurance account, agreements with respect to the terms and conditions upon which payments from the loan insurance account will be made with respect to a loan insured under this section, agreements as to separate subaccounts in the loan insurance account for different categories of loans or as to loans made by the authority or any other person, and agreements regarding the payment of and security for bonds issued by the authority. An agreement, the rights of the authority under an agreement, or payments received or to be received under an agreement may be pledged or assigned by the authority for the benefit of the holders of bonds issued by the authority.

(b) The authority may, upon application of a borrower or proposed borrower, insure and make advance commitments to insure loan repayments required under the terms of a loan made by it or by another lender with respect to a project, upon the terms and conditions the authority prescribes. To be eligible for insurance under AS 44.88.010 - 44.88.220, a loan for a project

(1) shall be held by the authority or by a lender approved by the authority as responsible and able to service the loan;

(2) may not exceed $10,000,000 for a project, or 90 percent of the cost of the project or 90 percent of the appraised value of the project, whichever is less;

(3) may not be made for a term longer than three-quarters of the authority's estimate of the life of the project or 25 years from the date of issuance of the insurance, whichever is earlier;

(4) shall contain complete amortization provisions satisfactory to the authority requiring periodic payments by the borrower; and

(5) shall be in the form and contain the terms with respect to insurance, repairs, alterations, payment of taxes and assessments, default reserves, delinquency charges, default remedies, acceleration of maturity, additional and secondary liens, and other matters that the authority prescribes.

(c) In addition to other fees which the authority may charge on loans, the authority may collect or cause to be collected on loans insured under this section, either a loan insurance commitment fee or a loan insurance premium or both. Loan insurance fees and loan insurance premiums are not required to be uniform among the various loans insured. Loan insurance commitment fees and loan insurance premiums shall be deposited in the insurance account by the loan servicer, trustee, or agent designated by the authority to receive them.

(d) If, at any time after receipt by the authority of a payment from the loan insurance account with respect to a loan, the authority recovers an amount on the loan or portion of it from a source other than the loan insurance account, the authority shall apply the amount recovered in the following order: first, to repay the general fund of the state for appropriations made under (g) of this section, and second, to repay the loan insurance account.

(e) Loans may be insured only when the amount either in the loan insurance account insuring the loans or a subaccount in the loan insurance account insuring the loans, as a percentage of the sum of the loans to be insured and all unpaid principal on loans insured by the loan insurance account or the subaccount, equals or exceeds the fund requirement. The fund requirement is calculated as a percentage which the authority determines is actuarially sound for operation of the loan account or a subaccount.

(f) When the authority determines what is actuarially sound with respect to the operation of the loan insurance account or a subaccount in the loan insurance account, it shall consider means of providing sufficient revenue for the operation of the account or subaccount, without regard to amounts which may have been or may, after the date of determination of actuarial soundness, be appropriated under (g) of this section. The authority shall also consider factors including, without limitation, estimates of future defaults and losses of loans insured under this section based on actual default and loss experience on those loans or on similar loans in the state or elsewhere, estimates of recoveries on defaulted or foreclosed loans based on actual default and foreclosure experience on those loans or similar loans in the state or elsewhere, the terms and conditions of the loans insured under this section, estimates of earnings and income of amounts on deposit in the loan insurance account, and other appropriate factors.

(g) On December 1 of each year the authority shall determine the amount on deposit in the loan insurance account and in each subaccount in the loan insurance account. If the amount in the loan insurance account or the amount in a subaccount in the loan insurance account is less than the fund requirement for the account or for the subaccount, the authority shall transfer the amount necessary to restore the loan insurance account or the subaccount to the fund requirement. The transfer shall be made from available money which is not encumbered or restricted for other use under the terms of contracts with bondholders or others. If sufficient money is not available for transfer, the chairman of the authority shall, no later than January 2 of the following year, certify in writing to the governor and to the legislature the amount, if any, required to restore the account or a subaccount to the fund requirement. The legislature may appropriate the

Sec. 44.88.158. SMALL ENTERPRISE LOAN ACCOUNT.

(a) A small enterprise loan account is established in the enterprise development fund. The account may be composed of money or assets appropriated or transferred to the authority, interest on investments and loans of the small enterprise loan account, the unpledged income of the enterprise development fund, and other money or assets deposited in it by the authority.

(b) The authority may use money in the small enterprise loan account to purchase the guaranteed portion of a loan made by a private financial institution after June 30, 1981, to a small enterprise to pay the cost of a project, as defined in AS 44.88.220, if the loan is guaranteed by the United States or an agency or instrumentality of the United States, including, but not limited to, the Small Business Administration, the National Marine Fisheries Service, and the Farmers Home Administration.

(c) The authority may purchase loans originated by the Alaska Rural Rehabilitation Corporation which are made to agricultural enterprises. Loans purchased under this subsection may be secured by substitute collateral if the amount of the loan does not exceed 75 percent of the value of the total collateral for the loan. Loans may be purchased under this subsection only from money appropriated to the small enterprise loan account for that purpose.

HISTORY (Sec. 65 ch 106 SLA 1980; am sec. 40 ch 115 SLA 1981)

Sec. 44.88.159. INTEREST RATES.

(a) The interest rate on a loan financed from the proceeds of tax-exempt bonds or excepted by the authority to be financed from the proceeds of tax-exempt bonds is equal to the cost of funds to the authority. In this subsection "cost of funds" means the true interest cost expressed as a rate on tax-exempt bonds of the authority plus an additional percentage as determined by the authority to represent the allocable expenses of operation, costs of issuance, and loan servicing.

(b) The interest rate on a loan financed from the proceeds of taxable bonds or expected by the authority to be financed from the proceeds of taxable bonds is equal to the cost of funds to the authority. In this subsection "cost of funds" means the true interest cost expressed as a rate on taxable bonds, plus an additional percentage

as determined by the authority to represent the allocable expenses of operation, costs of issuance, and loan servicing costs.

(c) The interest rate on a loan purchased by the authority with money in the small enterprise loan account that is not from the proceeds of the sale of a series of bonds is equal to the most recent index of Aa corporate bond yield averages as published by Moody's Investors Service.
HISTORY (Sec. 41 ch 115 SLA 1981)

Sec. 44.88.160. FINDINGS OF THE AUTHORITY.
Before entering into a lease or other agreement as provided in AS 44.88.090(e) regarding a project for which bonds are agreed to be issued by the authority in an amount in excess of $6,000,000, or before approving insurance or a commitment to insure a loan as provided in AS 44.88.157(b) with a principal amount in excess of $6,000,000, there must have been filed with the authority a certified copy of a resolution of the governing body of the political subdivision of the state, if any, in which the project is to be located, consenting to the location (which consent need only refer to the general nature of the project ultimately to be acquired as set out in a request of the proposed project applicant). Before entering into a lease or other agreement as provided in AS 44.88.090(e) regarding a project, the authority must find, on the basis of all information reasonably available to it, that

(1) the project and its development under this chapter will be economically advantageous to the state and the general public welfare and will contribute to the economic growth of the state;

(2) the project applicant is financially responsible;

(3) provision to meet increased demand upon public facilities that might result from the project is reasonably assured;

(4) the project will provide or retain employment reasonably related to the amount of the financing by the authority considering the amount of investment per employee for comparable facilities and other relevant factors; and

(5) the scope of the project is sufficient to provide a reasonable expectation of a benefit to the economy of the state.
HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 66 ch 106 SLA 1980)

Sec. 44.88.165. DELINQUENT LOANS.
If more than two percent of the total outstanding balance of loans purchased from a financial institution under AS 44.88.010 - 44.88.220 becomes delinquent for 90 days or more, the authority shall discontinue purchasing loans from that financial institution until the delinquency is reduced to less than two percent.
HISTORY (Sec. 42 ch 115 SLA 1981)

Sec. 44.88.170. PURCHASE OF PROJECT AND LEASES.
(a) No provision of this chapter may prevent the inclusion in a lease or other agreement relating to a project of a provision granting the right to purchase the project, or to renew or extend the lease or agreement, upon the terms and conditions which may be provided for in the lease or agreement.

(b) A lease with respect to a project may provide for two or more lessees with the legal relationship between themselves and the authority which the authority may approve, including without limitation, provisions to the effect that the obligations of the lessees under the lease for payment of rental or otherwise between themselves and the authority are several, joint, or joint and several and that the lessees lease the project as tenants-in-common, or otherwise.
HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.180. CONFLICTS OF INTEREST.
(a) No member of the authority may vote on a resolution of the authority relating to a lease or contract to be entered into by the authority under this chapter if he is a party to the lease or contract or has a direct ownership or equity interest in a firm, partnership, corporation or association which may be a party to the contract or lease. If a person may not vote because of this prohibition, for all purposes regarding action of the authority relating to adoption of the resolution, the position of the persons as a member shall be transferred to the first one of the following state officers who is not then acting as a member and would not be prohibited from voting on the resolution because of the same prohibition: commissioner of administration, attorney general, commissioner of revenue, commissioner of health and welfare, commissioner of labor, commissioner of public works, commissioner of public safety.
(b) The state officer serves as a member from time to time and for all purposes of this chapter is a member for the purpose of voting on the resolution but after each vote the authority shall again consist of members referred to in AS 44.88.030 only, until one or more members may not again vote on a resolution because of the prohibition.
HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.190. OPERATION OF CERTAIN STATUTES EXCEPTED.
(a) The authority shall not be considered or constitute
(1) a political subdivision of the state as the term is used in AS 37.10.085,
(2) a municipal corporation or political subdivision of the state as the terms are used in AS 29, or
(3) except as provided in AS 44.88.205, a state agency as the term is used in AS 37, but for all other purposes the authority constitutes a political subdivision and an instrumentality of the state as provided in this chapter.
(b) The funds, income or receipts of the authority shall not be considered or constitute money of the state, nor shall real property in which the authority has an interest be considered land owned in fee by the state or to which the state may become entitled or in any way lands belonging to the state, or state lands referred to in Art. VIII of the Alaska Constitution.
HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 67 ch 106 SLA 1980)

Sec. 44.88.200. ANNUAL AUDIT.

The authority shall have its financial records audited annually by the legislative auditor or by a certified public accountant approved by the legislative auditor. The legislative auditor may prescribe the form and content of the financial records of the authority and shall have access to these records at any time.
HISTORY (Sec. 1 ch 64 SLA 1967)

Sec. 44.88.205. OPERATING BUDGET.
For fiscal years beginning after June 30, 1981, the operating budget of the authority is subject to the Executive Budget Act (AS 37.07).
HISTORY (Sec. 68 ch 106 SLA 1980)

Sec. 44.88.210. REPORTS AND PUBLICATIONS.
(a) By January 10 of each year, the authority shall publish a report for distribution to the governor, legislature, and the public. The report shall be written in easily understandable language. The report shall include a financial statement audited by an independent outside auditor, a statement of the authority's investments under this chapter including an appraisal of the investments at market value, a comparison of the authority's performance with the goals of the authority and the levels of bonding and investment activities anticipated in the previous year's report under (b) of this section, and any other information the members of the authority believe would be of interest to the governor, the legislature, and the public. The annual income statement and balance sheet of the authority shall be published in at least one newspaper in each judicial district. The authority may also publish other reports it considers desirable to carry out its purpose.
(b) The authority shall include in its annual report under (a) of this section
(1) an estimate of the investment activity of the authority under this chapter for the following 12-month period; and
(2) an estimate of the amount of bonds to be issued during the following 12-month period.
HISTORY (Sec. 1 ch 64 SLA 1967; am sec. 69 ch 106 SLA 1980)

Sec. 44.88.212. FEES CHARGED BY AUTHORITY.
(a) An application fee may not be charged for an application for authority participation in a loan under AS 44.88.158.
(b) The commitment fee for a loan commitment by the authority may not exceed two percent of the principal amount of the loan.
HISTORY (AS 44.88.085; sec. 34 ch 115 SLA 1981)

Sec. 44.88.220. DEFINITIONS. In AS 44.88.010 - 44.88.220
(1) "authority" means the Alaska Industrial Development Authority created by AS 44.88.010 44.88.220;
(2) "business enterprise" means a single proprietorship, corporation, firm, partnership, or other association of persons organized in any manner, for any business purpose, other than on a nonprofit basis;

(3) "federal agency" means the United States and any officer, department, agency or instrumentality of the United States;

(4) "governing body of a political subdivision" means, when used with respect to the location of a project, the council of a city if the project is to be located in a city in the unorganized borough, or the assembly if the project is to be located in an organized borough or a unified municipality;

(5) "project" means

(A) a plant or facility used or intended for use in connection with making, processing, preparing, or producing in any manner, goods, products or substances of any kind or nature or in connection with developing or utilizing a natural resource, or extracting, smelting, transporting, converting, assembling or producing in any manner, minerals, raw materials, chemicals, compounds, alloys, fibers, commodities and materials, products or substances of any kind or nature, any plant or facility used or intended for use as an industrial park or in connection with air and water transportation, or any plant or facility for the prevention, limitation or control of air or water pollution, for the disposal of sewage or solid waste, for the local furnishing of gas, or for the furnishing of water;

(B) a plant or facility used or intended for use in connection with a business enterprise;

(C) commercial activity by a small enterprise;

(6) "plant" or "facility" means real property, whether above or below mean high water, or an interest in it, and the buildings, improvements and structures constructed or to be constructed on or in it, and may include fixtures, machinery, and equipment on it or in it, and tangible personal property, regardless of whether the tangible personal property is attached to or connected with real property, if the owner has agreed not to remove the tangible personal property permanently from the state for the period the authority sets; "plant" or "facility" does not include work in process or stock in trade;

(7) Repealed by sec. 70 ch 106 SLA 1980;

(8) "project cost" or "cost of a project" means all or any part of the aggregate costs determined by the authority to be necessary to finance the construction, expansion, or acquisition of a project, including without limitation the cost of acquiring real or tangible personal property, and, in connection with real property, the cost of constructing buildings and improvements, the cost of constructing means of access to and from the project, the cost of constructing extensions of utility systems to the site of the project; the cost of a project includes, without limitation, the cost of financing the project, interest charges before, during or after construction, expansion, or acquisition of the project, costs related to the determination of the feasibility, planning, design or engineering of the project and, to the extent determined necessary by the authority, administrative expenses, the cost of machinery or equipment to be used in the operation of the project and expenses of installation, replacement or rehabilitation, and all other costs, charges, fees and expenses which may be determined by the authority to be necessary to finance the construction, expansion, or acquisition;

(9) "project applicant" means a business enterprise or enterprises proposing to

(A) use or occupy a project; or

(B) agree to permit others to use or occupy a project;

(10) "real property" means land and rights and interests in land, including, without limitation, interests less than full title such as easements, uses, leases, and licenses;

(11) "lease" includes, when used as a noun, an interest in, or when used as a verb, the transfer of an interest in, property less than fee simple title, including, without limitation, when used as a noun, agreements to use or occupy property;

(12) "small enterprise" means a business enterprise which is a project applicant with gross income of $10,000,000 or less for its annual reporting period ending immediately before the application to the authority for a loan;

(13) Repealed by sec. 51 ch 115 SLA 1981.

(14) Repealed by sec. 51 ch 115 SLA 1981.

(15) Repealed by sec. 51 ch 115 SLA 1981.

(16) "commercial activity" includes work in process or activity involving stock in trade, accounts receivable, or the refinancing of existing indebtedness, subject to the provisions of AS 44.88.158.

RE: House Bill 25

Kay Brown, Director of the Division of Minerals and Energy Management, had h ped to testify today on HB 25. However, due to change in the Committee Calendar and prior committment, Miss Brown could not be present today. She has asked the committee be briefed on the Divisions position on HB 25.

As Director of the Division of Minerals and Energy Management, Kay Brown stated she was in opposition to HB 25 on the following points:

1. Technical difficulties in the bills drafting.

   A. Definition of State Crude
   B. Definition of State Coal

2. Existing priorities have served the state well. She asks "Why should coal purchasers be given preference over in-state refiners"?

3. Will the bill be effective in promoting coal development? Because of the export ban, oil cannot be sold to Pacific Rim nations, so there is no incentive for such countries to purchase coal.

4. Such package deals could be made now without passing legislation.

5. If companies were forced to enter into an interuptable sales contracts, refering to Section G, the result could be devalued resources.

Re: House Bill 25

Introductory Analysis

HB25 purports to provide a preference and reservation in the sale or purchase of state royalty oil to companies purchasing state coal. Without knowing the intended definition of the term "purchasing state coal" as used in this bill, it is difficult to analyze the effect of the legislation. Nonetheless, under any definition, the bill raises some questions. First, HB25 would appear to mix two separate categories of natural resources into one for the purpose of state action.

The provisions relating to the lease of coal are found under AS 38.05.150. Unlike oil, coal is not required to be competitively bid and there is no statement that the state will take coal "in kind" unless it is determined to be in the best interest of the state to sell it. The lessee of coal "shall pay to the state the royalties".[AS 38.05.150(c)] No mention is made for the extraction of any

royalty coal for the use of, processing within, or ownership by the state.

On the other hand, AS 38.05.183 provides for competitively bidding on the sale of state royalty oil. Sections (a) - (e) provide for the terms and conditions of the sale and usage of state royalty oil. Section 1 of HB25 would supercede these sections and give an absolute right to the use, marketing, and distribution of state royalty to "companies purchasing state coal". HB25 would not require the price to be competitively bid, that the use of the oil be in state for the benefit of Alaska, or any of the other express purposes set forth by the constitution or established law.

Under Section 1, paragraph (g) of HB25, there is a reservation of a state right to purchase refined productis "for offer to companies purchasing state coal." Since there is no restriction on thecompanies which would receive the refined product on resale, it is conceivable that the products would be funneled through them (as a middleman before reaching the market. There is no requirement that the refined product even be made available to the people and communities of Alaska or even that it be consumed by the beneficiary in its Alaskan operations.

Implementation of Section (g) would probably negatively impact the ability of the state to receive top dollar for the sale of royalty oil. If a purchaser and/or refiner could not be free to establish long term relationships with consuming groups, i.e. guaranteed delivery for guaranteed acceptance, then their bids on the use of royalty oil would become one of a risk venture rather than normal business. Also, there would be less incentive to bid if the state were to take their price and then offer the oil to a "purchaser" of state coal.

Finally, HB25 raises the policy question of deciding for whose benefit state royalty oil should be given. The legislature has previously interpreted the constitutional

requirements regarding natural resources to mean that ways of acheiving maximum benefit to all of the people and communities of Alaska be found and implemented. HB25 would require that the benefits of royalty oil accrue to "companies purchasing state coal." Such a finding of need and attendant statement of public policy by the legislature would be appropriate if HB25 is adopted.

RE: House Bill #25: "An Act providing for preferences and reservations in sale or purchase of state royalty oil to companies purchasing state coal."

The buyers of coal, typically major industrial companies and public utilities, tend to also be the major users of other energy sources such as oil and oil products.

The purpose of House Bill 25 is to encourage the development of coal production within the state of Alaska without losing one cent of oil revenues.

HOUSE BILL NO. 26

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing the business refinancing and expansion loan program in the Alaska Industrial Development Authority; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 37.13.120 is amended by adding a new subsection to read:

(n) Notwithstanding the other provisions of this section, the board shall invest up to 25 percent of the assets of the corporation to purchase, on the date offered, Alaska Industrial Development Authority Bonds, bearing interest of 10 percent, guaranteed by the Alaska Industrial Development Authority, and secured by loans made under the Alaska Industrial Development Authority business refinancing and expansion loan program (AS 44.88.300 - 44.88.390).

* Sec. 2. AS 44.88 is amended by adding new sections to read:

ARTICLE 5. BUSINESS REFINANCING AND EXPANSION LOAN PROGRAM.

Sec. 44.88.300. PROGRAM ESTABLISHED; PURPOSE AND INTENT. The Alaska Industrial Development Authority business refinancing and expansion loan program is established in the authority. The purpose of the business loan program is to enable state residents to refinance existing business debt and finance business expansion. It is the intention of the legislature that business loans be made through state banks and other financial institutions without unnecessary involvement of the authority.

Sec. 44.88.310. POWERS AND DUTIES OF THE AUTHORITY. The authority shall sell its bonds to the Alaska permanent fund under AS 37.13.120(n) and shall use the bond sale proceeds to purchase business loans under the terms and conditions set out in AS 44.88.300 - 44.88.390.

Sec. 44.88.320. LOAN PURCHASE REQUIRED. Subject only to the availability of funds from the sale of bonds to the Alaska permanent fund under AS 37.13.120(n) and the priorities set out in AS 44.88.330, the authority shall purchase a business loan when offered by a bank or other financial institution if the business loan meets the conditions set out in AS 44.88.340 and is made to an eligible borrower under AS 44.88.350. The authority shall accept a sworn statement from the bank or financial institution that the loan conforms to the requirements of AS 44.88.300 - 44.88.390 in purchasing a business loan under this section.

Sec. 44.88.330. PRIORITIES. If insufficient money is available from the sale of bonds to the Alaska permanent fund under AS 37.13.120(n) to purchase all qualifying business loans offered to the authority, the following priorities shall be followed by the authority in purchasing business loans:

(1) loans for expansion of business in communities having a population under 10,000 have priority over all other qualifying business loans; and

EXPANSION - POLICE -

(2) loans that use at least 25 percent of the loan proceeds for expansion of a business have priority over loans that use less than 25 percent of the loan proceeds for business expansion.

Sec. 44.88.340. LOAN CONDITIONS. (a) To qualify for purchase by the authority under the business loan program a business loan

(1) may not exceed $2,000,000 or 75 percent of the net market value of the borrower's business, whichever is less;

loans

(2) may not bear interest in excess of 10.9 percent or one percent above the prime lending rate, whichever is less;

(3) shall have a fixed interest rate and fixed monthly payments;

(4) shall have a term of 15 years but may not impose a penalty for acceleration of payments;

(5) may be assumed;

(6) shall be made to refinance the business debt or expand the business of an eligible sole proprietorship, partnership, corporation, or other business entity doing business primarily in the state;

(7) may not be made to a business that is engaged in the construction or rental of single or multiple housing units;

(8) shall be personally guaranteed by the sole proprietor, partners, corporate shareholders, or other owners of the business; and

(9) shall be secured by documents establishing a first priority on assets of the business, including assets to be acquired with the proceeds of the loan, valued at an amount equal to the amount of the loan.

(b) In order to qualify a business loan for purchase by the authority under the business loan program the bank or financial institution that originates the loan must retain at least 10 percent of the financing of the loan, or the maximum amount that the bank or financial institution is allowed, as a matter of law, to invest in a single loan, whichever amount is less.

Sec. 44.88.350. BORROWER ELIGIBILITY. To be eligible for a business loan that qualifies for purchase by the authority under the business loan program the borrower must do business in the state for at least one year before applying for the loan and shall be

(1) a sole proprietorship owned by a state resident;

(2) a partnership in which all of the partners are state residents;

(3) a corporation in which the controlling interest is owned by state residents; or

(4) a business entity that is not a sole proprietorship, partnership, or corporation, in which a controlling interest is owned by state residents.

Sec. 44.88.360. LIMIT ON THE NUMBER OF LOANS. A business may receive only one loan under the business loan program except that a corporation that is eligible to receive a business loan is not disqualified from receiving a loan by the fact that a prior business loan was made to a shareholder of the corporation.

Sec. 44.88.370. FEES. (a) The bank or other financial institution that originates a business loan purchased by the authority may charge the borrower an amount not to exceed three percent of the total loan amount as an application or origination fee.

(b) The bank or other financial institution that originates a business loan purchased by the authority shall act as the collection agent for the authority and shall receive six-tenths of one percent of all amounts collected as a collection fee. C/10 #1644

(c) The authority may not charge a fee for authority participation in a business loan.

Sec. 44.88.380. REGULATIONS. The authority may make and enforce reasonable regulations to carry out the purposes of the business loan program.

Sec. 44.88.390. DEFINITIONS. In AS 44.88.300 - 44.88.390

(1) "business loan" or "business loan program" refers to the Alaska Industrial Development Authority business refinancing and expansion loan program;

(2) "net market value" means the total assets of a business less the total liabilities of the business and less an amount equal to the total amount of interest due on business debts that are not to be retired by using the proceeds of a business loan, plus the increased value of the business that will result from use of the business loan proceeds, as valued by an appraiser acceptable to the originating bank or other financial institution.

* Sec. 3. AS 44.88.320 enacted in sec. 2 of this Act applies to the first $2,000,000 of loans made by a bank or other financial institution after June 1, 1983.

* Sec. 4. This Act takes effect July 1, 1983.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 26 Date on Bill: 1/17/83
Title: Act establishing the business refinancing and expansion loan program...
Sponsor: Lindauer, Furnace and Bettisworth
Requestor:

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86
Capital				
Operating	-0-	200.0	100.0	-0-
Total	-0-	200.0	100.0	-0-

b. Revenues: Program Receipts

Revenue	-0-	200.0	100.0	-0-

2. Source of funds to offset fiscal impact of bill:

3. Assumptions: It is anticipated that 18 months will be the maximum duration of the program. Additional personnel may be necessary to handle volume. Program will be short lived due to exhaustion of funds and large default rate. Please note that although program receipts is shown as a funding source (since A.I.D.A. is funded 100% with program receipts) the actual source of funds will have to come from other A.I.D.A. activities, since thi bill essentially precludes A.I.D.A. from charging any fees for this program This means users of other A.I.D.A. programs will have to pay for the operation of this program.
These figures represent only increased operational costs. No estimate is included as to the amount of loss on A.I.D.A. investment funds, or the costs of potential interest rate subsidies.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

JUNEAU, ALASKA

BLUE RIBBON COMMISSION ON THE
STATE PERSONNEL ACT

Senator Bill Ray, Chairman

Pouch YG
Mail Stop 3123
Juneau, Alaska 99811
(907) 465-4442

MEMORANDUM

January 25, 1983

TO: House Labor and Commerce Committee

FROM: Teresa B. Cramer
Administrative Assistant

SUBJECT: House Bill 51 - Limiting the Adjustment of Retirement Benefits

On several occasions the Blue Ribbon Commission has heard testimony about problems created by overpayments of retirement benefits. Retired state employees may have substantial difficulties if they are required to repay retirement benefits improperly received because of errors made by the Division of Retirement and Benefits or because of a change in law. The commission is proposing legislation to limit the authority of the division to collect amounts paid improperly through no fault of the beneficiary or retired person if the error is not corrected within two years.

One woman testified to the commission that before she retired she asked the division to verify her years of credited service. Several years later a court-ordered change in retirement regulations reduced the number of years for which she received credit. Her employment with the University of Alaska could no longer be counted as credited service in PERS. As a result she had received more than $5000 in benefits to which she was not entitled. The division reduced her benefit to the correct amount and began withholding an additional $100 per month to be applied to the overpayment. She appealed to the Public Employees Retirement Board asking that collection of the overpayment be waived.

Both the Public Employees' Retirement Board and the Teachers' Retirement Board have authority to waive collection of overpayments, but the uncertainty of an appeal can cause considerable stress to people on fixed incomes. Both boards are required to determine whether there would be undue hardship imposed by requiring repayment. AS 14.25.175 and AS 39.35.522. In establishing whether there is financial hardship, the entire family financial situation is considered, not just the resources of the petitioner.

The commission recommends that a two-year statute of limitations be placed on the collection of overpayments which resulted from errors which were not caused by the retired state employee. Two years provides ample opportunity for the division to audit its records and correct any errors. After that [illegible] a retired person should not be required to repay benefits erroneously received if he or she did not cause the error. The division will still correct the amount of future benefits paid to the retired person.

Bill Analysis

Page 1 Line 9	The first section of the proposed legislation adds the two-year statute of limitations to the Teachers' Retirement System.
Line 18	The second section adds the same provision to the Public Employees' Retirement System. The amendment to PERS is applied only to state employees because the Blue Ribbon Commission considered that requiring other participating employers to pay for errors made by the state was inappropriate.
Line 29	The third section makes the bill effective retroactively to July 1, 1979, in order to apply to those individuals whose situations came to the commission's attention.
Page 2 Line 2	The fourth section of the bill contains an immediate effective date clause.

RE: House Bill 66: "An Act relating to fiscal notes on bills that affect state retirement systems; and providing for an effective date."

The intent of this bill is to close a loophole within the current statute. While fiscal notes are currently required on bills affecting the state retirement systems, the entity who is to prepare these fiscal notes is no longer in existence.

The bill amends AS 24.30.036 by replacing the Legislative Board of Reitrement Benefits, which no longer exists, with the Division of Retirement Benefits in the Department of Administration.

In addition, this section has been changed to conform with AS 24.30.035 requiring the fiscal note to be prepared before the bill is reported from the committee of first reference.

Alaska MUNICIPAL League

TELEPHONES

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

February 3, 1983
to: House Labor and Commerce Committee
from: Ginny Chitwood, AML Executive Director
re: HB 66

Because many municipalities participate in the state retirement system and are also affected financially by changes to the system, the League asks that the proposed analysis be extended to them. A possible amendment to accomplish that intent would be to add "and participating municipalities" on line 25 after the word, "state".

HB

93

John:

Basically, what HB 93 does is not allow departments to hire additional employees unless the department follows proper porcedure. Proper procedure is to: submit in the department's budget the total amount of employees, and how much the employee force will cost. Currently, what is happening is that certain departments are adding n additional employees if they have extra money in thier budget, instead of returning thier unused portion of thier budget back into the general fund.

Question: How about making this bill even more tough, by requiring departments to fire all employees assosiated with a certain program when that program is finished Example: all the revenue workers who worked with the ineme tax program. When it was repealed, the workers still stayed.

HB

99

Additional Information: HB 99, Appropriation for Susitna Hydropower

According to Milt Barker of Legislative Finance Agency, the following appropriations have been made to Alaska Power Authority from 1979-1982:

Chapter 101 SLA 1982	$25,600,000
Chapter 7 SLA 1981	2,540,000
Chapter 90 SLA 1981	18,100,000
Chapter 120 SLA 1980	3,095,800
Chapter 54 SLA 1980	1,365,000
Chapter 50 SLA 1980	7,000,000
Chapter 76 SLA 1979	8.178,000

According to Ray Bennish of Alaska Power Authority, the appropriations have been spent in the following manner, through 12/31/82:

APA personal services (staff)	$ 749,372
Travel	100,298
Contractual:	
Feasibility studies--Akers American	36,682,000
Big Games studies--Ak Dept Fish & Game	1,991,000
Fisheries studies--Ak Dept Fish & Game	3,355,000

HOUSE LABOR AND COMMERCE COMMITTEE

February 22,1983

Representative Joe Hayes, Speaker of House
Alaska House of Representatives
Pouch V,
Juneau, Alaska 99811

Re: Board of Nursing

Dear Mr. Speaker:

Pursuant to AS 44.66.050(a) the House Labor and Commerce Committee has held hearings regarding the above referred Board. Under AS 44.66.050(e) the Committee recommends adoption of the attached Committee Bill continuing the Board of Nursing.

Specifically, the findings of the Committee of the public need for the Board as required under AS 44.66.050(c) are as follows:

AS 44.66.050(c) " A determination as to whether a board or commission or agency program has demonstrated a public need for its continued existence shall take into consideration the following factors:"

"(1) the extent to which the board, commission or program has operated in the public interest;"

The Committee finds that the Board of Nursing has operated in the public interest by holding public hearings to discuss statute and regulation revisions concerning continuing competency requirements, Board membership, foreign nurse graduate requirements, and the definition of license violations. The Board of Nursing accredits and periodically surveys Alaska nursing education programs to ensure that educational standards are being maintained.

"(2) the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters;"

The usage of the teleconference network by the Board of Nursing has allowed them to communicate throughout the State during subcommittee meetings and public hearings.

"(3) the extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest;"

The Board of Nursing is currently developing regulations that will maintain a level of competence for practitioners. The Board is in the process of developing formal regulations which define and list examples of license violations.

"(4) the extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided;"

Applicants who have repeatedly failed the examination are helped through counseling or referred to useful textbooks.

"(5) the extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions;"

In addition to teleconferencing, the Board of Nursing advertises meeting and examinations in newspapers in Anchorage, Fairbanks and Juneau.

"(6) the efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved;"

The Committee finds that the Board of Nursing is handling complaints in a timely manner. During the fiscal years 1979 through 1981 two complaints were filed with the Ombudsman. Both were subsequently resolved.

"(7) the extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public;"

During the fiscal years 1979 through 1981, the Board of Nursing issued approximately 1800 licenses and 1235 temporary permits to practice nursing in Alaska.

"(8) the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest; and"

The Committee determined that the Board of Nursing is in compliance.

"(9) the extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection."

The Board of Nursing needs to adopt formal regulations which define and list examples of license violations. In addition, it would be helpful if the Board of Nursing would continue its efforts towards developing relevant and effective regulations that will maintain a level of competence for practitioners.

Pursuant to AS 44.66.050(d) the Committee recommends the following:

"(d) As to each board, commission, or agency program assigned to it for purposes of review, the committee of reference shall, not later than the 60th day of the legislative session, submit a report to the presiding officer of the house. The report shall contain a summary of the findings of the committee as to the compliance of the board, commission or program with the factors enumerated in (c) of this section, together with a summary or recommendations of the committee as to each of the following:"

"(1) an identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address;"

The Board of Nursing was created in 1941 with the primary purpose to protect the public's health, safety, and welfare through the regulation of the nursing practice.

"(2) a statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments;"

The Board of Nursing determines the minimum allowable quality of nursing care in the State by establishing or amending rules and regulations necessary to ensure compliance with State statutes. They also approve curricula, adopt standards and accredit nursing education programs. The Board of Nursing examines and issues licenses to qualified applicants and the Board of Nursing hold hearings which may revoke, suspend, or take other appropriate action on the license of a person violating the nursing statutes and regulations.

The Board of Nursing has staff support from the Division of Occupational Licensing which employs an Executive Officer of the Board who is statutorily responsible for performing administrative duties and assisting the Board in conducting examinations and educational programs.

"(3) an identification of any other programs having similar, conflicting or duplicate objectives;"

The Committee did not find other programs which had conflicting or duplicate objectives.

"(4) an assessment of alternative methods of achieving the purposes of the program;"

The Committee found no viable alternative method of achieving the purposes administered by the Board of Nursing.

"(5) an assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level;"

The Committee finds that to eliminate the Board of Nursing or consolidating its activities would denigrate the level to protection to the public's health, safety, and welfare.

"(6) a justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts; and"

The Board of Nursing has recommended changes to statute and regulation in the public interest, helped develop cirriculum to enhance the professionalism of nursing, conducted necessary examination of applicants for licensure to protect the health, safety, and welfare of the public.

"(7) any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest."

The Committee commends the dedication, time, and effort on the part of each Board member for their service in a complex and difficult job.

Respectfully submitted:

Subject: HB 99--Appropriation for Susitna Hydroelectric Project

Alaska Power Authority has requested $47 million for FY 84 in order to continue design and studies of the Susitna Hydroelectric project. I have attached a letter from Eric Yould, executive director of APA, which breaks out how the appropriation will be used.

The Susitna Hydroelectric Project Draft Summary Report, prepared by APA, forecasts that railbelt energy demands could double by the year 2000--just seventeen years from now. APA also predicts that the costs of electricity will nearly triple between 1994 and 2010, if thermal energy, which is produced by coal or gas fired plants, is selected as an alternative to hydroelectricity. This is illustrated in the attached charts and graphs, taken from APA's draft Susitna Hydroelectric Summary Report.

On the other hand, Susitna could eventually produce cost advantages as high as $5.5 billion.

In order to continue the work necessary to receive licensing from the Federal Energy Regulatory Commission, Alaska Power Authority must complete studies of the environment, of the impact of the dams on fisheries and wildlife, and meet other licensing requirements. APA will also continue with engineering and design work.

In light of the great benefits Susitna Hydropower will bring to so many Alaskans, I strongly urge your support for House Bill 99.

Dear Representative Lacher:

Through your assistant you have asked for information relating to the Alaska Power Authority's $47 million FY84 request for the Susitna project.

The basis of the estimate follows:

Item	Amount ($ Million)
Harza-Ebasco Contract	35.5
Site explorations, logistical support, licensing support, environmental analysis, detailed engineering and design.	
Alaska Department of Fish & Game	4.0
Fish and wildlife data collection program.	
Land Analysis and Acquisition	0.3
USGS Sediment Studies	0.2
External Review	0.2
Legal Support of FERC Licensing	0.2
USF&WS Support of Environmental Program	0.1
Design Review	1.0
Construction Manager Support	2.0
Transmission Facilities Design	2.0
Power Authority Personnel and Related Costs	1.5
Total	47.0

ADAMS

Over the next month, the basis of this estimate will be reviewed in light of the design contract presently under negotiation with Harza-Ebasco and the current outlook for project licensing.

Sincerely,

Eric P. Yould

SUBJECT: SUSITNA HYDROELECTRIC PROJECT ENDORSEMENT
REFERENCE: ANNUAL MEMBERSHIP MEETING, 4/21/82

WHEREAS, energy costs directly affect the economic stability of individual households, businesses and the community as a whole; and

WHEREAS, energy costs are dependent on energy availability; and

WHEREAS, hydro power is by far the most viable energy source, and is economically and environmentally desirable; and

WHEREAS, the Susitna Hydroelectric Project has been sufficiently planned, studied and reviewed;

NOW THEREFORE BE IT RESOLVED that the Members of Matanuska Electric Association, Inc., assembled at this 1982 Annual Membership Meeting, go on record as being in support of the Susitna Hydroelectric Project; and

BE IT FURTHER RESOLVED that the General Manager and Board of Directors are hereby instructed to forward this resolution to the Governor of Alaska, the Alaska State Legislature, and the Alaska Power Authority immediately.

CERTIFICATION

I, Phil O'Neill, do hereby certify that I am Secretary-Treasurer of Matanuska Electric Association, Inc., an electric nonprofit cooperative membership corporation organized and existing under the laws of the State of Alaska; that the foregoing is a complete and correct copy of the resolution adopted at the Annual Meeting of the Members of this corporation duly and properly called and held on the 21st day of April, 1982; that a quorum was present at the meeting; that the resolution is set forth in the minutes of the meeting and has not been rescinded or modified.

IN WITNESS WHEREOF, I have hereunto subscribed my name and affixed the seal of this corporation this 21st day of April, 1982.

Dittman poll reports Alaskan support for Susitna dam project

by Ed Bennett
Times Business Writer

Seventy-two percent of Alaskans contacted in a recent poll say they support construction of the Susitna hydroelectric dam project.

"We're ecstatic," said Bob Penney, who as head of the Anchorage Chamber of Commerce Energy Subcommmittee helped sponsor the poll.

But Eric Myers, a consultant to the Northern Alaska Environmental Center who has long opposed the project, said the poll was "about as relevant as asking people if they want a free lunch or a free car."

The poll was conducted Jan. 14-31 by Dittman Research Corporation. A total of 585 persons in 51 Alaskan communities were contacted on a random basis by telephone. The poll was conducted for a group of organizations which included electrical cooperatives, chambers of commerce and labor organizations.

According to Penney, the poll cost $5,000 and was paid for by a combination of funds from private donors, the International Brotherhood of Electrical Workers and the Alaska State Chamber of Commerce.

The poll results indicate support for the Susitna project in all areas of the state, even though the electricity it would produce would serve only the railbelt. Fifty-four percent of persons contacted in rural areas supported the project, 18 percent opposed it, and 28 percent were undecided. In Southeastern Alaska, 60 percent of the respondents support Susitna, the poll said, while 19 percent oppose it and 21 percent are undecided.

The highest support for Susitna came from the areas the dam would serve. Central Alaska indicated 70 percent support, Southcentral 81 percent, and Anchorage 79 percent.

But many people polled were unclear on the actual details of the project. Only about half the persons polled knew which areas the dam would serve; 36 percent said correctly that current plans call for a ten-year construction period; and a mere nine percent knew construction of the project would employ 1000-2000 persons.

Penney said these results were "one of the main purposes for conducting the poll. It tells us what our next stage of education or public awareness will be." Myers refers to those public awareness efforts as a "propaganda campaign."

Over half the persons polled had no idea what the project would cost. Penney uses a $5.4 billion figure which does not include inflation; Myers estimates the real dollars spent over the ten-year construction phase at $12-15 billion, depending on inflation.

Myers said that cost was the real stumbling block to the project. "The real question to ask is whether people would support Susitna if it meant bringing back the personal income tax, or going without new roads or schools," he said. "It's that kind of choice."

The poll showed that of those persons who support the Susitna project, the biggest reason for building it was that "it's the cheapest power source." Of those that oppose the dam, environmental concerns outweighed other considerations, followed by cost.

Re: House Bill 111

Introductory Analysis

HB111 provides that investments and deposits of public money managed by the Department of Revenue be placed with Alaska state banks if the banks will offer the same terms and conditions as a foreign bank. Testimony by the Department of Revenue, verfied by the banking industry, indicates that this is the current practice by the Department of Revenue. No financial institution which feels that they have been left out has been identified, nor has anyone come forward with testimony which would show that this is not the current practice. There has been no indication nor testimony that the Department of Revenue has any plans to change their practice.

While the focus of this legislation is consistent with public policy, it would appear that there is not a demonstrated need for it at this time. HB111 also carries a $72,000 fiscal note for FY84and would increase the bureauacracy by adding people to maintain records and be able to show compliance with the provisions of HB 111. The fiscal requirements are $71,000 for FY85, and $78,000 for FY86.

HOUSE BILL NO. 111

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to investments and deposits of public money with foreign banks."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 37.10.078 is amended by adding new subsections to read:

(b) The commissioner of revenue may not make an investment or deposit with a foreign bank unless there is no state bank that will accept all or a portion of the investment or deposit under the same terms or conditions. The commissioner shall promulgate regulations which provide for equal participation by all state banks which desire to participate in the investment or deposit of funds under this subsection.

(c) In this section

(1) "foreign bank" means a bank, trust company, savings bank, industrial bank, building and loan association, savings and loan association, credit union or other similar lending organization the principal office of which is in another state;

(2) "state bank" means a bank chartered to conduct the business of banking in this state but does not include a state bank which is controlled by an out-of-state bank holding company.

House of Representatives

March 1, 1983

TO: House Labor and Commerce Committee

FROM: Representative John Lindauer

RE: House Bill #111: "An Act relating to investments and deposits of public money with foreign banks."

The intent of HB #111 is to require that Alaska's money be deposited, invested, and administered by Alaskan financial institutions to the greatest extent possible without loss of income or service.

Currently, 97.2% of Alaska's public funds are invested outside. 90.9% ($3,469,366,022 as of 12/31/82) of those funds are invested through Bank of America in federal securities. The remaining 6.3% ($240,259,245 [illegible] of 12/31/82) is invested, primarily through the Bank of America, [illegible]ficates of Deposit, Corporate Bonds, Bankers Acceptances, [illegible]ial paper and gold (held in Hanover Trust).

The 2.7% (105,[illegible]16 as of 12/31/82) of Alaska's money that is actually held in Alaska is deposited with twenty-three federal credit unions, Alaska National Bank, Alaska Pacific Bank, B.M. Behrends Bank, Alaska Mutual Bank and Mt. McKinley Mutual Savings Bank.

While federal banking laws may limit how much of the money could actually be placed in any one Alaskan bank, keeping as much as possible in Alaska would strengthen the state's economy.

The Bank of America, which is currently the primary beneficiary of the state's investments, is a fine California bank. All Californians, will be sorry about the termination of our efforts to provide their bank with loanable funds and higher earnings. Our own bureaucrats will regretfully be deprived of excuses to visit San Francisco. Our responsibility, however, is to Alaskans and the prosperity of Alaska.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 111 Date on Bill: 1/24/83
Title: An act relating to investments and deposits of public money with foreign banks.
Sponsor: Lindauer
Requestor: Labor & Commerce

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86
Capital				
Operating		72	71	78
Total	-0-	72	71	78

b. Revenues:

Revenue	

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:

The operating costs are for an Investment Officer I and an Accounting Technician I. A 10% increase is added each year thereafter, with a $5,000 equipment cost in FY 84.

The Investment Officer is needed because investing in Alaska requires a greater amount of time than in the national market. Due to the lack of a secondary market for state bank securities each bank must be contacted on a daily basis for their current offerings.

The Accounting Technician I is needed to account for the increased number of collateral requirements. Investments in smaller state banks have higher collateral requirements by law than deposits in larger foreign banks.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

House Labor and Commerce Committee

From: Jefferson B. Barry
Professional Aide

Re: House Bill 246

Introductory Analysis

HB246 is titled "An Acc relating to the deregulation of interest rates...". HB246 does much more than the title implies. As written, it would affect all of the protections that individuals, businesses, and the public have regarding service fees, service charges, late charges and any civil or criminal penalties for violation of the protections that people now have. There would seem to be a fundemental difference to deregulating interest rates and allowing any fee, service, or penalty charge to be imposed at the discretion of financial institutions.

The very reason that laws were passed to protect the public from "loan sharking" was the inability of any one individual or small business to deal with the financial institutions when setting "service fees". If HB246 is enacted in its present form, it is conceivable that an

individual could pay for the rest of their life on a $100 loan. A business could pay the principal and interest 100 times on a $2,500 note.

None of the testimony indicates that this was the intent in the proposal of this legislation, and it would be appropriate to consider the deregulation of interest rates separately from the service charges, fees, and penalties. The repealers in Section 7 should be studied carefully as they also affect AS 06.20.250, AS 06.20.260, AS 06.20.270, AS 06.20.285, AS 06.20.320, AS 18.80.250, AS 06.40.160, AS 45.45.050 and possibly others as well.

HB

131

March 16, 1983

Representative Walt Furnace
Chairman
House Labor and Commerce
Committee,
Juneau, Alaska

Dear Representative Furnace:

Here is my testimony supporting HB 81 in which I was not heard due to hearing Anchorage landlords first and I had an appointment to see my attorney at 9:00 am, on March 15th

I am currently living at the AWARE (Aiding Women in Abuse and Rape Emergencies) Shelter due to domestic violence in my living situation and have been looking for housing since January. It is a frustrating and almost impossible feat to find housing in Juneau, when you have children. In addition to finding housing

when you have children trying to find a reasonably priced apartment or house that is affordable with three children would be a miracle. Being on A.F.D.C. (Aid to Families with dependent Children) is an added burden and attempting to attend school is a challenge.

I had to leave my trailer because I did not feel safe; on March 8th, 1983 I went to court on a Contempt of Court charge against my ex-husband to see who would be allowed to live in the trailer. Judge Segues allowed my ex-husband to stay at the trailer until the following week because he did have a place to live and my ex-husband's court appointed attorney said I had a temporary place to live at A.W.A.R.E.

Needless to say, my frustration and helplessness in finding housing that accepts children is a major undertaking for me. I am currently on the waiting list at Coho Housing (who have 12 - suitable number of bedrooms for myself & 3 children.) and at Sleepy Hollow by the hospital (who have 103 people on their waiting lists).

Thank you for your consideration of my thoughts.

Sincerely,

Dorothy Jorgensen

IN THE HOUSE BY HURLBERT

HOUSE BILL NO. 131

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to unlawful practices in the sale or rental of real property."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.80.240 is amended to read:

Sec. 18.80.240. UNLAWFUL PRACTICES IN THE SALE OR RENTAL OF REAL PROPERTY. It is unlawful for the owner, lessee, manager or other person having the right to sell, lease or rent real property

(1) to refuse to sell, lease or rent the real property to a person because of sex, marital status, changes in marital status, pregnancy, parenthood, race, religion, color or national origin [; HOWEVER, NOTHING IN THIS PARAGRAPH PROHIBITS THE SALE, LEASE OR RENTAL OF CLASSES OF REAL PROPERTY COMMONLY KNOWN AS HOUSING FOR "SINGLES" OR "MARRIED COUPLES" ONLY];

(2) to discriminate against a person because of sex, marital status, changes in marital status, pregnancy, parenthood, race, religion, color or national origin in a term, condition or privilege relating to the use, sale, lease or rental of real property [; HOWEVER, NOTHING IN THIS PARAGRAPH PROHIBITS THE SALE, LEASE OR RENTAL OF CLASSES OF REAL PROPERTY COMMONLY KNOWN AS HOUSING FOR "SINGLES" OR "MARRIED COUPLES" ONLY];

(3) to make a written or oral inquiry or record of the sex, marital status, changes in marital status, race, religion, color or national origin of a person seeking to buy, lease or rent real property;

IT

(4) to offer, solicit, accept, use or retain a listing of real property with the understanding that a person may be discriminated against in a real estate transaction or in the furnishing of facilities or sources in connection therewith because of a person's sex, marital status, changes in marital status, pregnancy, parenthood, race, religion, color, national origin or age;

(5) to represent to a person that real property is not available for inspection, sale. rental, or lease when in fact it is so available, or to refuse a person to inspect real property because of the race, religion, color, national origin, age, sex, marital status, change in marital status, parenthood, or pregnancy of that person or of any person associated with that person;

(6) to engage in blockbusting;

(7) to make, print or publish, or cause to be made, printed or published, any notice, statement or advertisement, with respect to the sale or rental of real property that indicates any preference, limitation, or discrimination based on race, color, religion, sex, parenthood, or national origin, or an intention to make the preference, limitation or discrimination.

(8) ADD

(8) As to (1) and (2) above, however, nothing prohibits the owner, lessee, manager or other person having the right to sell, lease or rent real property from promulgating reasonable rules and regulations and requiring a reasonable damage deposit; and,

The following classes of real property are exempt from the provisions relating to parenthood;

(A) A private residence offered for short term occupancy;

(B) Housing established primarily for the handicapped, developmentally disabled, or elderly;

(C) Housing established as a dormitory; and,

(D) Housing, OR established solely for occupancy by singles.

March 11, 1983

Testimony before: House Labor & Commerce
Re: HB131
Prepared by: Carla Timpone, Chair
Legislative Committee

Since June of 1979 the city of Seattle has had in effect an ordinance prohibiting discrimination in housing based on parenthood. Many of the concerns expressed here regarding the possible effects of the passage of HB131 were addressed in Seattle during hearings on the ordinance:

- landlords were concerned that they would be required to allow any number of occupants; however, landlords are now and will continue to be permitted to set reasonable and lawful occupancy rates

- what about the right of other tenants to peace and quiet? landlords can now and will continue to be permitted to establish and enforce reasonable rules regarding noise

- what about increased damage to rental property? landlords are well aware that any tenant, regardless of age, is potentially capable of causing property damage

A study of five cities in California, concluded in December of 1979, reached the same conclusions: the presence of children in a dwelling has no impact on property valuation, insurance rates, or maintenance costs.

There is, however, an impact on those being discriminated against. The majority of families in the rental market are female headed households. Consequently, refusing to rent

to families with children constitutes de facto discrimination against a large percentage of women.

It should be noted that the statute currently in effect prohibits discrimination in housing based on pregnancy. Since pregnancy frequently results in parenthood, it seems logical that either both or neither of those conditions should be protected.

The Alaska Commission on the Status of Women strongly urges the passage of HB131.

Rick

This is not a major change.

The main effect is to lower housing costs for families with children. Even in cases where people operate "singles only" or "married couples only" rentals, the actual construction is quite suitable for people of all ages (altho the furnishings and appointments may not be). The risks can be controlled to a large degree by the security deposits, etc.

Testimony to House Committee on Labor and Commerce:

March 11, 1983

My name is Lillian Ruedrich, and I am testifying on behalf of the Juneau chapter of the National Organization for Women. We support HB 131 which proposes the addition of the word "parenthood" as an acceptable condition for renters; one which could not be used as a basis for discrimination. The housing situation is desperate enough for a vast majority of the people of this state due to the general shortage of rental units and the prohibitive cost of buying a home. It makes no social or economic sense to doubly burden people in search of housing simply because they have children. Maintenance and insurance costs in fact do not differ significantly between buildings allowing families with children and those prohibiting children, according to a study done in the state of California. We sincerely hope this committee and the Legislature will work to provide renters with this gararantee of equitable treatment in the same sense that the state seeks to aid homeowners with that loan program. This bill would go a long way toward alleviating the burdens of overcrowding and overpaying which face many families seeking affordable housing. Thank you.

Lillian Ruedrich

HB 131

Although the bill prohibits discrimination in the sale, lease, or rental of real property because of my status as a parent, I wish to point out that the bill does not proscribe any other existing management tools that a landlord may have with regard to rental regulations concerning a tenant's use and occupancy of the premises in order to promote safety, health, or welfare of the tenants.

A landlord may also regulate the tenant's use of the property to avoid abusive use, or to make a fair distribution of services and facilities for tenants generally. This bill also does not prohibit a landlord from taking action against a tenant who fails to; quietly enjoy the premises, or fails to occupy and use the premises in a clean and safe condition. Also, it is clear that a landlord can provide resonable provisions in a lease limiting the number of persons occupying a unit, without regard issues of parentage.

In conclusion, I believe this legislation should prohibit discrimination against individuals due to their parenthood status, while still allowing a landlord the existing legal controls over the use and occupancy of his rental units.

Re: CS HB 356 (Judiciary)

A.A.U.W. supports the bill for we have a national position supporting the the reinforcement of families through legislation and improved accessibility to housing not only for the elderly, the economically disadvantaged, and minorities, but also for middle-income families.

We are in the midst of a housing shortage, both nationally and in Alaska, and during such periods landlords can afford to be more selective because full occupancy is almost assured. On the other hand, such situations present the greatest problem to a family with children because only a portion of the already small number of vacant units will be open to them, forcing the family, in many cases, into unsuitable, overpriced or poorly located apartments. That portion of units available to families can even reach zero in areas where the housing shortage is most acute, as was pointed out on C.B.S. program "60 Minutes": "No Kids Allowed."

Love of children in general is no longer the common denominator of public opinion it was just twenty years ago. The "baby boom" has gone bust. Today the availability of family planning, the unwillingness to make economic and social sacrifices for children, the decision to have later or no children have all helped to bring about a sharp increase in housing discrimination against children. The 1960 census showed for the first time that a majority of American homes contained less than three members, and the 1970 census indicated that over 60% of all rental households had no children. Yet as private homes continue to be priced beyond the reach of more and more Americans, apartment complexes and condominiums will provide a major portion of our housing needs. The failure to rent to families with children - whether by private landowners or by direction of government units which may create special zoning classifications for the elderly or prevent large increases in the number of school children in a certain area to maintain educational quality and low taxes - is a form of action resulting from economic self=interest rather than any intent to injure families with children. But injury is in fact the result.

We are rapidly becoming a nation which segregates its citizens on the basis of age as more and more people separate themselves from those with different needs. As our population begins to accomodate a higher percentage of people of retirement age who draw off to themselves into segregated communities, a growing percentage of singles and couples without children who

do not identify closely with families raising children, such families begin to collect in concentrations where they, too, are not exposed to the multi-generational neighborhoods that can provide richness and understanding between peoples. In a highly mobile society where adult children have left their parents in far distant states, youngsters are raised without experiencing or understanding anyone older than they by more than a score of years. As contact and understanding goes, we become pockets of self-interest - socially, economically, politically and even racially - too often losing the vision of the common good.

Housing that segrates by age can have the unfortunate side effect of racial segration as well. A court in Missouri found that prohibiting children would constitute a prima facie case of racial discrimination, because recent national statistics indicate that 48% of black familial renters have children while less than 37% of white families living in rental units have children. These statistics may show an even further discrepancy when considering Native or Hispanic families. Thus, the refusal to rent to families with children has a disproportionate effect on non-whites. In addition, indigenous families are more likely to have an elderly person or multi-generations living in the same home, a fact that could result in discrimination against both ends of the age spectrum in terms of housing if children are prohibited. Again, this would also be felt more strongly by non-white families.

There are six states which have legislation prohibiting housing discrimination against families with children, legislation which has been in effect for over fifty years (Ariz., Ill., N.J., N.Y., Mass., and Del.). In fact, while Alaska does not now prohibit discrimination against children in rental property, the Alaska civil rights statutes include a provision that the "opportunity to obtain...housing accommodations and other property without discrimination because of ... pregnancy or parenthood... is a civil right." It would seem only just to follow our own good lead, and truely mean what we have written. Even Congress, which has generally held that the problem could best be handled at local or state levels, did provide in 1976 housing program mortgage insurance benefits to landlords who could certify that they did not discriminate against families with children.

Discrimination based on age, as on race, sex, creed, etc..., is discrimination not founded on actual basis, because individual differences between humans result in some children being disruptive, but so are some adults, some Blacks, some whites, some men, some women, some Protestants, some atheists. Others of these same samplings make excellent tenants. A landlord offering housing to the public should make a decision directly related to issues of merit - past rental history, ability to pay, references - not on the basis of one's age, race, gender, etc....

One of the recommendations from the White House Conference of Families where there was agreement at all three national conferences, was the need to "improve fair housing laws and enforcement - [with] no discrimination against families with children...." A.A.U.W. strongly supports this recommendation and the bill now before you.

JOHN
THIS HAS NOTHING TO DO WITH THE BILL?

(8) As to (1) and (2) above, however, nothing prohibits the owner, lessee, manager or other person having the right to sell, lease or rent real property from promulgating reasonable rules and regulations and requiring a reasonable damage deposit; and,

The following classes of real property are exempt from the provisions relating to parenthood;

(A) A private residence offered for short term occupancy;

(B) Housing established primarily for the handicapped, developmentally disabled, or elderly;

(C) Housing established as a dormitory; and,

(D) Housing established solely for occupancy by singles.

SUBJECT: Discrimination in rental housing accommodations (Work Order No. 12-2776)

TO: Representative Hugh Malone

FROM: Tamara Brandt Cook
Legislative Counsel TBC

You have asked whether a recent California case, Marina Point, Ltd. v. Wolfson, 180 Cal. Rep. 496 (California 1982), has any application under Alaska law. The case deals with the question of whether an owner of an apartment complex may refuse to rent an apartment to a family solely because the family includes a minor child. The California Supreme Court concluded that the owner could not, but two justices dissented.

Although the exclusionary policy was challenged on the basis of an impermissible infringement on state and federal constitutional rights of familial privacy and equal protection of the law as well as on the basis of statutory rights, the case was decided under the Unruh Civil Rights Act of California. The court specifically declined to reach either state or federal constitutional contentions. Marina Point, supra, page 497, page 501. The dissent noted that equal protection and due process principles place no restrictions on purely private actions, but affect only state action. Marina Point, supra, page 512.

In general, a case decided by another state court has no precedential value in Alaska. Nevertheless, had the case been decided on federal constitutional grounds the reasoning in the case could have been directly applied. The Alaska court could also have rejected the reasoning of the California court in interpreting the federal constitution. Although each state court interprets its own constitution and its own statutes, the Alaska court relies on case law from other jurisdictions to support similar conclusions.

The court could rely on the reasoning in this case, especially if the court were interpreting a statute similar to the Unruh Civil Rights Act of California. However, AS 18.80.230 and AS 18.80.240 differ considerably from the Unruh Act, so I suspect that Marina Point, supra, would be deemed to be of little value in interpreting Alaska law.

The pertinent part of the Unruh Act, Civil Code section 51 provides:

> All persons within the jurisdiction of this state are free and equal, and no matter what their sex, race, color, religion, ancestry or national origin are entitled to the full and equal accommodations, advantages, facilities, privileges or services in all business establishments of every kind whatsoever.

The phrase "all business establishments" has been held to apply to the business of renting housing accommodations. Marina Point, supra, page 501. In addition, the California court has interpreted the statute to prohibit all arbitrary discrimination by business establishments, with the particular bases of discrimination listed (sex, race, color, etc.) being illustrative rather than restrictive. In re Cox, 474 P.2d 992 (California 1970). This judicial interpretation has not been disturbed by the legislature. The court notes that the legislature is presumed to be aware of and to have acquiesced in the judicial construction when it amends a statute without altering the portions that have been construed as was done with the Unruh Act in 1974. Marina Point, supra, page 504. The court bases its holding that an owner may not refuse to rent an apartment to a family solely because the family includes a minor child on the fact that this amounts to arbitrary discrimination within the terms of the Unruh Act as judicially construed.

The pertinent Alaska statutes have not been judicially construed to forbid any arbitrary discrimination as was done in California nor have they been construed to forbid discrimination on any basis other than those specifically listed in the statute. AS 18.80.230 forbids discrimination in public accommodations on the basis of "sex, marital status, changes in marital status, pregnancy, parenthood, race, religion, color or national origin". (Emphasis added). AS 18.80.240 deals with the discrimination in the sale or rental of real

property separately from the section that deals with discrimination in public accommodations. Discrimination is forbidden on the basis of "sex, marital status, changes in marital status, pregnancy, race, religion, color or national origin". Discrimination in public accommodations and discrimination in rental of property are treated the same under the Unruh Act, while discrimination in these two areas are treated differently in Alaska. In fact, AS 18.80.250(1) and (2) specifically authorizes discrimination in the rental of housing as between married and single people. It would be difficult for the court in Alaska to conclude, as the court in California concluded, that the legislature intended to forbid all arbitrary discrimination with respect to the rental of housing. The fact that "parenthood" is included in the list of protected classes for purposes of public accommodations and excluded from the list for purposes of rental housing suggests the opposite, that the legislature intended to forbid discrimination in the rental of housing only on the basis of specifically listed factors.

In conclusion, since the decision in Marina Point, supra, is based on a statutory scheme that differs markedly from the statutory scheme in Alaka, it will have no direct affect on Alaska law.

M E M O R A N D U M March 2, 1983

SUBJECT: Methods of payment of overtime (HB 223)

TO: Representative Walt Furnace

FROM: Thomas A. Sofo AS
Legislative Counsel

You have asked this office for an opinion regarding the constitutionality of HB 223. That bill prohibits certain methods for the payment of overtime and excuses employers from the payment of liquidated damages for good faith violations of AS 23.10 (Employment Practices and Working Conditions). Section 3 of the bill extinguishes any criminal or civil liability of employers who may have used one of the prohibited methods since December 9, 1978, while sec. 4 of the bill makes the relevant statutory provisions retroactive to that date.

The retroactivity aspect of this bill opens it for challenge on several constitutional grounds. One basis for a challenge would be the prohibition against the impairment of contracts, found in both the United States and the Alaska Constitutions (U.S. Constitution, Article I, section 10; Alaska Constitution, Article I, section 15). Another basis for attack would be the due process guarantees of the Fifth and Fourteenth Amendments of the U.S. Constitution and Article I, section 7 of the Alaska Constitution.

More recently, it has come to my attention that litigation is currently underway concerning the very issues covered by this bill. An attempt to address the subject matter in this manner may be considered special legislation when viewed in that larger context.

Another point to be made concerning litigation in this area is raised by Dresser Industries, Inc. v. Alaska Department of Labor, 633 P.2d 998 (Alaska 1981). In that case, the Alaska Supreme Court upheld the regulatory prohibition of

the very same conduct which is the subject of the present bill. Since there has already been enforcement of these provisions on certain employers, there may be equal protection problems in trying to retroactively excuse other employers from having to comply with those same provisions.

Although authority does exist which holds that the legislature may abolish purely statutory rights and even remedies in a retroactive manner, this office is not prepared to conclude that those general statements regarding legislative authority have application to this specific case. In the case of a person who worked during the time elapsed since December 9, 1978, and was paid overtime under a prohibited method with the result of denying that person compensation to which otherwise entitled, I am not convinced that the Alaska Supreme Court would be persuaded by the argument that rights to minimum wages and overtime pay are purely statutory and are not vested.

2 br. unfurnished and 1 br. furnished, in West Juneau. Carpeting, dishwasher, garbage disposal, off street parking. No pets or children. Mature adult preferred. 586

Q: AREN'T MAINTAINENCE COSTS HIGHER WHEN YOU RENT TO FAMILIES WITH CHILDREN?

A: ACCORDING TO A NEW YORK COMPANCY WHICH SUPPLIES THE INSURANCE INDUSTRY WITH NATIONWIDE STATISTICS ON DAMAGES, THERE IS NO EMPIRICAL DATA TO PROVE THAT THE PRESCENCE OF FAMILIES RESULTS IN GREATER DESTRUCTION TO PROPERTY.

Q: WOULDN'T A FAIR HOUSING LAW FORCE LANDLORDS TO OVERCROWD THEIR APARTMENTS?

A: NO. FAIR HOUSING LAWS ARE REASONABLE AND ARE NOT WRITTEN IN AN ARBITRARY MANNER. A LANDLORD WOULD NOT HAVE TO RENT A ONE BEDROOM APARTMENT TO A PARENT OR PARENTS WHO HAD THREE CHILDREN. OR, A PROJECT DESIGNED FOR THE ELDERLY OR HANDICAPPED WOULD NOT BE FORCED TO ACCEPT TENANTS WHO HAD CHILDREN. A FAIR HOUSING LAW WOULD BE REASONABLE AND GIVE EQUAL OPPORTUNITIES TO PARENTS AND INSURE THAT AN ADEQUATE SIZED APARTMENT WOULD NOT BE DENIED TO THEM BECAUSE OF PARENTHOOD.

Q: ISN'T THE SOLUTION TO BUILD MORE HOUSING?

A: THIS SOLUTION IGNORES THE FACT THAT OFTEN NEW BUILDINGS WILL NOT RENT TO FAMILIES WITH CHILDREN. ALSO, THERE IS NOTHING TO PREVENT EXISTING BUILDINGS TO ADOPT NEW RULES BANNING CHILDREN. IN THE LAST TWO MONTHS TWO APARTMENT BUILDINGS IN JUNEAU HAVE CHANGED THE RULES AND NOW EXCLUDE CHILDREN.

Q: DON'T INSURANCE COMPANIES CHARGE HIGHER RATES FOR BUILDINGS THAT ALLOW CHILDREN?

A: NO. PRUDENTIAL, SAFECO, AETNA, REPUBLIC, NORTHWESTERN, AND CONTINENTAL INSURANCE COMPANIES SAY THAT IT IS THE CONDITION OF THE BUILDING THAT DETERMINES THE RATES, NOT THE AGE OF THE TENANTS. (IT IS IMPORTANT TO NOTE THAT IF TENANT AGE WERE A FACTOR IN SETTING ACCIDENT LIABILITY RATES, THE HEAVIEST BURDEN MIGHT FALL ON THE ELDERLY).

Q: WOULDN'T FAIR HOUSING LAWS FORCE LANDLORDS TO ACCEPT CHILDREN IN BUILDINGS THAT ARE UNSAFE FOR THEM?

A: THIS ISSUE IS MISLEADING. ACCORDING TO OUR STATE AND LOCAL BUILDING CODES, ANY BUILDING WHICH IS UNSAFE FOR A CHILD IS ALSO UNSAFE FOR ADULTS. THE REAL SAFETY ISSUE IS THAT ANTI-CHILD RENTAL POLICIES FORCE MANY FAMILIES TO LIVE IN THE MOST DILAPIDATED, UNSAFE, AND OVERCROWDED HOUSING.

Q: ARE THERE FAIR HOUSING LAWS IN OTHER AREAS OF THE COUNTRY?

A: YES. LAWS TO PROTECT RENTERS WITH CHILDREN HAVE BEEN PASSED IN MANY AREAS THROUGHOUT THE UNITED STATES. ARIZONA, MICHIGAN, ILLINOIS, NEW JERSEY, NEW YORK, DELAWARE, CONNECTICUT, MINNESOTA, AND THE DISTRICT OF COLUMBIA HAVE PASSED FAIR HOUSING LAWS. NUMEROUS CITIES HAVE ENACTED LAWS THAT PROTECT FAMILIES AND CHILDREN, THEY INCLUDE SAN FRANCISCO, SPOKANE, LOS ANGELES, OAKLAND, AND SEATTLE.

TONY KNOWLES
MAYOR

EQUAL RIGHTS COMMISSION
670 East 10th Avenue

February 23, 1983

Hugh Malone, Representative
State of Alaska
Pouch V
Juneau 99811

Dear Mr. Malone:

The following information is provided in response to an inquiry from your office.

The Anchorage Equal Rights Commission is an administrative agency which is charged with enforcement of the municipal discrimination ordinance. This ordinance is found in the Anchorage Municipal Code, Section 5, a copy of which is enclosed.

In 1982, the Equal Rights Commission opened 97 investigations of alleged discriminatory practices. Of this total, 20 cases or 21%, were filed in the category of housing. Of these housing cases, 9 were filed on the basis of parenthood, which by definition is included under sex discrimination (see Section 5.20.010). This represents 9% of the total cases filed with the agency.

Additionally, the Equal Rights Commission received numerous inquiry calls regarding housing discrimination against parents with children. These callers generally sought clarification of our jurisdiction and were from both property seekers and property owners.

It is significant that prior to 1982, no cases had been filed with the Commission on the basis of parenthood. These 1982 filings are attributed to the severe shortage of rental units in the Anchorage area. With a vacancy rate that at times stood at 1%, parents found it extremely difficult to obtain rental units.

As the problem continued to accelerate throughout the year, the Equal Rights Commission took steps to alert the community to the requirements of the local ordinance. Advertisements were placed in the local papers which spelled out the Commission's jurisdiction. A public forum on Housing Discrimination and meetings were held with property owners and interested public, to discuss the situation and the method in which the Equal Rights Commission would handle complaints. These actions were of particular importance in raising the awareness level of property seekers and in reassuring property owners that each allegation resulting in a complaint, would be reviewed on a case-by-case basis.

In 1983, we will continue in our efforts to prevent and eliminate alleged discrimination and aggressively enforce Title 5 of the Anchorage Municipal Code.

If I can be of further assistance, please do not hesitate to call me.

Sincerely,

PAUL L. CONNERTY,
Executive Director
Anchorage Equal Rights Commission

Opening apartment doors closed to kids

By Randy Shipp

Boston

Anyone trying to find an apartment that accepts children will not be surprised by the conclusions of a recent US Housing and Urban Development survey. It shows that, nationwide, 26 percent of all rental units have "no children" policies, and many that do accept children have restrictions on the number, sex, or age of the youngsters.

These restrictions affect roughly 2 million families, says Elizabeth Roistacher, HUD's deputy assistant secretary for policy development and research.

The report adds that restrictive rental policies also may mean that families may be split up, with children being sent to live with other relatives, until parents can find some place for them to live, or doubling up with another family, leading to increased family tension.

"There is also a real feeling among people who are hit by this that society thinks there's something wrong in having children," Dr. Roistacher says. "Children react to this. They are hurt, they're parents are hurt. They're all really disturbed by the fact that children don't seem to be wanted."

The problem is growing worse. The number of rental units unavailable to families with children is rising. And with more apartment buildings switching to "no children" policies, and more one-bedroom rather than multi-bedroom units being built, it is likely to continue to rise.

In Massachusetts, state law prohibits such discrimination in dwellings with three or more units. Violations carry a fine of up to $1,000. Even so, discrimination against families with children is "the biggest problem right now for housing," according to a spokesman for the Massachusetts Commission Against Discrimination. Because of exemptions under the law, he says, very few rental units actually are affected.

The California-based Fair Housing for Children Coalition (FHCC) conducted a survey of apartment ads in newspapers. In Los

Focus

Angeles, 71 percent allowed no children of any age, and Fresno, San Diego, and San Jose showed 53 percent, 65 percent, and 70 percent respectively.

"We've dealt with people who are living with six kids in a station wagon on the Santa Monica pier, and a woman living with two kids in a tent on the beach," says FHCC executive director Dora Ashford.

FHCC also gets calls from pregnant women worried that they will lose their apartment when they have their baby.

"We had a recent case of a couple in Santa Monica who had a baby a few months ago. They got a letter from [the apartment management company] saying, 'Congratulations on your new baby – and we would like you to find another place to live in 60 days.'"

But when FHCC lawyers took the case and pointed out that the family would not be violating any occupancy codes, and that a local ordinance forbade age discrimination, the family was allowed to stay.

The generally tight housing market is a major cause of the problem, Ms. Ashford says.

"As long as the housing crisis worsens [the discrimination problem] will, too. Families with children are in a worse position to buy their way out, as are the elderly, when housing crunches hit, so they're hurt a lot worse than other people."

Helen Blank of the Children's Defense Fund (CDF) says positive steps are being taken. The HUD study, for instance, is an example of interest in the issue on the part of the federal government.

Moreover, anti-discrimination statutes have been passed in Arizona, Connecticut, Delaware, Illinois, Massachusetts, Minnesota, New Jersey, New York, and the District of Columbia. The California Legislature is considering similar legislation.

The CDF has set up a national network of organizations concerned with discrimination against families with children. Its purpose, Ms. Blank says, is ". . . to communicate with each other about local ordinances they are working on, share strategy, and give each other mutual support."

Dr. Roistacher says increasing the number of available homes and apartments would help solve the problem. She says HUD is looking into possible roles that it can take, and also would like state and local governments to get involved with the issue.

HH 356

The following letter of intent on COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 356 (relating to unlawful practices in the sale or rental of real property) dated April 30, 1981 was received (the Judiciary committee report appears on page 894 of the journal) and appears as follows:

LETTER OF INTENT

CSHB 356

April 30, 1981

The Honorable Jim Duncan
Speaker of the House

Dear Mr. Speaker:

The Committee on Judiciary has had under consideration House Bill 356, "An Act relating to unlawful practices in the sale or rental of real property", and has provided you with a committee report recommending that it be replaced with our committee substitute for that bill, and that committee substitute for House Bill 356 do pass.

Although the bill prohibits discrimination in the sale, lease, or rental of real property because of a person's status as a parent, the committee wishes to point out that the bill does not proscribe any other existing management tools that a landlord may have with regard to rental units. For example, a landlord may still adopt rules and regulations concerning a tenant's use and occupancy of the premises in order to promote safety, health, or welfare of the tenants.

A landlord may also regulate the tenant's use of the property to avoid abusive use, or to make a fair distribution of services and facilities for tenants generally. This bill also does not prohibit a landlord from taking action against a tenant who fails to quietly enjoy the premises, or fails to occupy and use the premises in a clean and safe condition. Also, it is clear that a landlord can provide reasonable provisions in a lease limiting the number of persons occupying a unit, without regard to issues of parentage.

In conclusion, we believe this legislation should prohibit discrimination against individuals due to their parenthood status, while still allowing a landlord the existing legal controls over the use and occupancy of his rental units.

Very truly yours,

Rep. Fred Brown, Chairman
Committee on Judiciary

Re: Review of Alaska Power Authority

In recent weeks, there has been much discussion concerning Alaska Power Authority, the Tyee Hydro Project, Susitna, etc. in legislative committees and in the news. The Alaska Power Authority (APA) and hydro power in themselves are viable concepts. However, the questions surrounding APA leave considerable doubts in the mind of the public. I believe that we, in the House Labor and Commerce Committee, should begin a review of the Alaska Power Authority in order to outline what the problems are and to make recommendations to resolve those problems.

Because Tyee is only nine months from completion and has been very nearly an APA project from inception, I feel that it would be an extremely good example for review.

It is my suggestion that the Labor and Commerce Committee appoint a sub-committee of one-month duration to look into Alaska Power Authority and the Tyee Project with a final report and recommendations due on April 15, 1983. Because of the vast amounts of material and the workload already placed on most staff people, I would also suggest that an aide or researcher be hired to serve as staff to the sub-committee during that one-month.

The Sub-committee should do an overview of Tyee that would consist of the following points:

1) Were the proper feasibility studies done, in particular, were they rechecked when the original cost estimates of the project were shown to be too low?

2) Did APA look carefully at alternate sites, smaller projects, or even alternative power sources?

3) Has APA followed legislative mandate in all annual reports and project status reports?

   a) On the basis of what information did the Legislature approve the funding of Tyee?

   b) Have the statements made to the Legislature been consistent with development of information on Tyee as the project progressed?

4) Was management thorough in using correct contracting procedures?

   a) The problem of wrap-up has been discussed and legislation has been recommended. However, further study should be done on wrap-up as one element of the total project and what impact wrap-up had on cost over-runs and contracting procedures.

   b) What were the trade-offs in the decision to not relieve the engineer of responsibility for the project?

4) What procedures are used in developing cost estimates and how thorough is management in checking those estimates?

   a) What is the explanation for significant differences in the various estimates on the project costs?

   b) Do we know with certainty at this time what the final costs of the project will be?

5) Did the project costs get out of control and, if so, at what time did the project costs get out of control?

   a) What steps were taken to control the escalating costs of the project?

   b) There are excessive numbers of change orders in the Tyee project. Were all of these necessary and what could have been done to prevent this problem?

6) Has the Legislature been at fault by constantly changing the ground rules by which APA operates or allowing too much latitude in the operation of APA?

7) What has been the specific impact of each legislative change

as the Tyee project progressed (i.e., "Blackmail Clause, SB 25 and 26, HB 9, etc.)?

8) What steps are necessary to resolve the crisis we face with the Tyee project?

a) Do the problems with Tyee apply to other APA projects?

b) Who should bear the burden for the cost over-runs -- the utilities, municipalities (customers) or the State of Alaska?

And finally and most importantly,

9) What recommendations or legislation should be adopted by the Labor and Commerce Committee to prevent these problems from arising again?

Increased energy usage throughout the State, declining oil revenues and an eventual end to fossil fuels demand a workable energy plan for Alaska. Some corrections have been made within APA by changes in legislation, by the APA board and by the APA management. This review should not be a surgical procedure, but rather, an examination, diagnosis and cure.

FROM: KEN

RE: HB 141 "MAKING AN APPROPRIATION TO THE IDITAROD TRAIL COMMITTEE"

HB 141 WOULD AUTHORIZE AN APPROPRIATION TO THE IDITAROD TRAIL COMMITTEE TO BUILD A HEADQUARTERS BUILDING IN THE WASILLA AREA. THE BILL WOULD PROVIDE 422 THOUSAND DOLLARS FOR CONSTRUCTION OF THE BUILDING. SINCE ITS INTRODUCTION THE AMOUNT NEEDED FOR THE FACILITY HAS BEEN REVISED TO 388 THOUSAND DOLLARS.

1. THE DEPARTMENT HAS STATED IT DOES NOT HAVE THE AUTHORITY TO GRANT THE IDITAROD TRAIL COMMITTEE THIS FUNDING. WHY IS THAT ?

2. HOW DID THE IDITAROD TRAIL COMMITTEE ARRIVE AT ITS FIGURES FOR CONSTRUCTION OF THE HEADQUARTERS FACILITY ?

3. IF FUNDING FOR THE THE HEADQUARTERS IS APPROVED, WILL THE TRAIL COMMITTEE BE ABLE TO GENERATE ENOUGH REVENUE SO IT WILL NOT NEED TO ASK FOR GRANTS FROM THE STATE EACH YEAR TO PUT ON THE RACE ?

IDITAROD TRAIL COMMITTEE, INC.

POUCH X

WASILLA, AK. 99687

GRANT PROPOSAL

IDITAROD TRAIL COMMITTEE, INC

January 19, 1983

Ronald L. Larson
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Ak. 99811

Dear Mr. Larson:

Iditarod '83 will start our second decade of the longest sled dog race in the world. And, quite frankly, we are proud of our contribution to promoting Alaska and long distance sled dog racing. Our emphasis has always been on strict rules regarding treatment of dogs on the trail and sportsmanship among the mushers. ITC has always wanted to reflect the most positive image possible on both the Iditarod and the State of Alaska.

This race we are expecting a record breaking number of mushers to sign up. In addition to the teams, we have hundreds of volunteers working hundreds of hours seeing to the details of the race from Anchorage to Nome. Our volunteers give of their time and many put expensive equipment, such as HAM radios and airplanes, on the line for us. People from every walk of life, lawyers, vetranarians, pilots, trappers, engineers clerks, subsistence dwellers, all join together in a special comaraderie.

Pouch X, Wasilla, Alaska 99687 – (907) 376-5155

Our news media coverage is international. The race has been filmed and reported by the British, Spaniards, Canadians, Germans, and we are working with STV in Japan on the possibility of filming Iditarod '83. CBS and ABC have covered the race. The thirty minute ABC 20/20 show last spring on the race and Susan Butcher has prompted inquiries from all over the lower 48.

The January issue of GEO Magazine has an article on Iditarod. National Geographic will follow with a story in their March issue. And once again, CBS has international rights to live coverage of Iditarod '83.

Iditarod Sled Dog Race has become a year 'round business. Although we have tremendous sponsors for the race, we must turn to the State again and hope you merit our contributions to tourism and State exposure worthy of support of our two proposals.

The first proposal deals with the race itself. These requests are ones we feel will enhance the quality, safety, and organization of the Iditarod.

Our second proposal is for a much needed permanent headquarters. This building would include our offices, a sales outlet, and a museum.

old for draft

IDITAROD '84

MEDICIAL CARE AND DRUG TESTING PROGRAM FOR DOGS

Our vetranarians try to be at every checkpoint to check and administer any needed care to the dogs. The vets have the final say on a dog continuing in the Race. They also have medical supplies available to treat minor irritations and injuries. And, as our rules state, any dog that expires on the trail must have an autopsy.

Because of the rich purse and intense competition among mushers, ITC makes it a priority to keep drugs from being used on a dog. The vets have a right to randomly check dogs during the race for drugs. Then all dogs are checked at the end of the race. These samples are sent to Cornell University in New York for analysis.

For medical supplies, autopsies, drug testing supplies, sample shipping cost, and analysis.

Cost.....$9,850.00

IDITAROD AIR FORCE

Our trail Air Force is composed of volunteers who are willing to fly their planes along the trail to move dog food, vets, hams, dropped dogs, race officials, and any other person or object needing to go from checkpoint to checkpoint. Because of the financial restrictions on the Iditarod, we have never been able to provide the full protection the private pilot needs. Airplanes and parts have become so expensive, we can no longer recruit pilots and expect them to "outofpocket" any damage to their plane while flying for the Iditarod.

Full coverage aviation insurance for Iditarod Air Force during March.....$5,050.00

AIRCRAFT

Each year our trail manager must start earlier flying up the trail. Checkpoints and checkers must be secured. Trail breaking, marking, and maintenance must be coordinated. All of this is done before the race.

During the race, it is becoming essential ITC have a plane at our disposal. Each year brings different emergencies. We must get our Race Marshal to a checkpoint, or a doctor in to treat an injured musher, or a vet to an injured dog. To ensure the safety of our mushers and their teams, the enforcements of our rules, and a organized operation, we are requesting funding for a Maule M-6 airplane.

Cost.....$48,000.00

RADIOS

For better communications so we are able to respond to problems and emergencies, we need high frequency portable radios. These radios may be used by our pilots or ground crews.

Four (4) HF Radios.....$4,750.00

SNOWMACHINES

Of course there are times when all air support is grounded by weather. But our race continues. To enable our officials and trail breaking crews to operate we need double track machines. If we have an emergency somewhere a plane cannot land, we need the machines to get to the location. And, just to have the ability to maintain surveillance between checkpoints, the machines would be invaluable.

Two Alpine double track snowmachines.....$10,400.00

Each year we offer a $100,000.00 purse to the top twenty mushers. This distinguished the Iditarod as not only the longest sled dog race in the world, but also the richest. This purse also ensures the Iditarod a place in the major athletic events in the world. The purse gives mushers the incentive to train for the race. Consequently we have mushers and teams that are physically and mentally prepared to challenge the Iditarod Trail.

Money for purse.....$35,000.00

TOTAL OF PROPOSAL #1 $113,050.00

plus (48.0 >

65,050

PERMANENT IDITAROD HEADQUARTERS

Each year interest in the Iditarod Sled Dog Race grows. According to surveys done with our out of state visitors, the Iditarod fulfills the image and fantasy of Alaska. News media from the world over come to report the "Last Great Race." Because of the coverage, more and more tourists want to visit Iditarod Headquarters and see first hand the operation of the race.

After ten years we have collected invaluable paraphernalia connected with each race. These items are a part of our history, but are perilously close to being lost because we have no place to store them. The impression each visitor or reporter leaves our headquarters with reflects on the Iditarod and our great state.

At present we are located above Teeland's Country Store in Wasilla. As our volumn of traffic increases, not only is it disruptive to Teelands, but our own space is grossly strained. We have no place to store our race records or paraphernalia. Nor do we have the space to accommodate volunteers working on the race and visitors at the same time.

Because of the problems listed above, the Iditarod Sled Dog Race is requesting funding for a permanent headquartes in Wasilla. We want our building to be in the true spirit of Alaskan history and dog mushing, so our decor would be styled on a log cabin -- Roadhouse theme. To complement our building, we need an acre of land that can be landscaped to encourage visitors to stop and enjoy.

In our headquarters we need office space, storage area, conference room, retail sales outlet and a museum. Maximum exposure for our building is a must to ensure us the tourist and drop in trade we

will count on to cover operation and maintence.

Our request is for: a 3350 sq. ft. building at $100 per foot building .

Cost.....$335,000.00

One acre land located on Parks Highway in or about Wasilla.

Cost .....$ 26,000.00 <26.0>

Office equipment, furnishings, display cases, cash register, shelves, hangers, and protective equipment for museum.

Cost.....$ ~~75,000.00~~ 44

Landscaping, artwork, outside tables and benches and plaques.

Cost.....$ ~~18,000.00~~ 17,800 <7.8>

TOTAL REQUEST.....$422,800.00 389.00

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM January 30, 1984

SUBJECT: Iditarod Appropriation
(HB 142)

TO: Representative Ron Larson

FROM: Linn H. Asper
Legislative Counsel

It has come to my attention that the Department of Commerce and Economic Development (DC & ED) has taken the position that it is not the appropriate department to administer the grant to the Iditarod Trail Committee contained in HB 142. My information is that DC & ED feels that it cannot receive the appropriation because it does not have the power to make grants. However, in its present format HB 142 does not establish a grant program to be operated by the department. Instead it is a grant from the legislature to a named non-municipal grant recipient. Under AS 37.05.316 such grants must be administered by a department. Thus, DC & ED is not being required to make the grant, only to administer it. This administration function is a common one, exercised by DC & ED and other departments all the time.

Another related question is whether this grant might be more appropriately administered by another department, in terms of the subject matter of the grant. I considered this question when I prepared the bill for you and decided that the Iditarod Race was a promotional event more akin to the tourism function of the DC & ED than the resources responsibilities of the Department of Natural Resources, the only other likely candidate for the administration job. Since an amendment to change the administering department would require the bill to go back to the House of Representatives for a title change, and since the DC & ED has the power to administer the grant and seems to be the logical choice to do so, I believe the bill should remain in its present form.

Juneau, Alaska 99811

Dear State Representative Larson:

The Greater Wasilla Chamber of Commerce would like to extend our support in establishing a permanent headquarters for the Iditarod Association in the Wasilla area.

This annual event has always created great enthusiasm and involvement not only for the entire State of Alaska, but the many tourists that come each year.

The establishment of a permanent headquarters facility would provide an attractive, functional addition to our community for the benefit of the growing tourism that provides financial support in our valley.

Your help and support of this proposal would also be greatly appreciated.

Sincerely,

Rob Robinson
President

IDITAROD REVISED BUDGET

HB 141 - An Act making a special appropriation to the Department of Commerce & Economic Development for payment as a grant for the Iditarod Trail Committee, Inc., for construction of a permanent Iditarod sled dog race headquarters; and providing for an effective date. - $422,800

Land (26,000)

The Iditarod Trail Commission are optimistic that the land will be donated

Tables, benches, landscaping, artwork, etc. (7,800)

It is expected that many of these will be either donated or worked on by volunteers

Revised appropriation - $389,000

HB 142 - An Act making a special appropriation to the Department of Commerce & Economic Development for payments as a grant for the Iditarod Trail Committee, Inc., for expenses of conducting the 1984 Iditarod sled dog race; and providing for an effective date. - $113,050

Eliminiate need of Maule M-6 (48,000)

Revised appropriation $ 65,050

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 1, 1983

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill repealing the existing law requiring train crews of certain minimum sizes. The existing law requires that passenger and freight trains have crews of no less than five persons, that a light engine without cars have a crew of at least three persons, and that a switch engine have a crew of at least three persons.

The repeal may allow railroads within the state to determine crew size based on economic and operational concerns. However, this repeal does not relieve a railroad of its existing obligation to operate with customary due care and high regard for the safety of its passengers, freight, and employees. The repeal is not intended to make any pronouncement on what is or is not an appropriate subject for collective bargaining.

I urge you to approve this bill.

Sincerely,

Bill Sheffield
Governor

This letter should provide you with some information on Senate Bill Number 849, "an act relating to train crews", a bill to which our membership is definitely opposed. I have put this brief together to explain how this bill affects us here in Skagway.

This is a critical issue to us in Skagway, and we would certainly appreciate any assistance which you could give us in the matter. We are at your disposal for further information and dialogue at any time.

Thank you very much.

U.T.U. Brief on Senate Bill Number AS 23.10.420(a)

Background Information

The White Pass & Yukon Route Railroad, a Canadian-owned corporation with home offices in White Horse, Yukon Territory, is the last operating common carrier three-foot wide narrow gauge railroad in North America. Built at the height of the Klondike Gold Rush in 1898, it runs 110 miles from tidewater at Skagway, Alaska, to Whitehorse in the Yukon Territory. Since 1970, American crews (who used to operate all trains on the railroad) run the 41 miles to Lake Bennett, B.C., the division point, and Canadian crews take the trains the balance of the distance to Whitehorse.

Though "modern" in some respects, such as diesel locomotives and a containerized freight handling system, the WP&YR contends with some of the worst terrain and climate conditions in the world. The Canadian side from Bennett to Whitehorse is flat with only a few grades; the U.S. division is the "trickiest part of the road".

Alaskan crews must drag their trains up 21 miles of 3.9% grade to reach the summit, and then contend with another pass and two short (but equally steep) grades before reaching Bennett. The return to Skagway presents the problem of controlling 60-car trains of lead-zinc ore concentrates on the steepest railroad grade in America.

The railroad is interspaced with high wooden trestles and cliff-like retaining walls which perch the track a thousand feet above the canyon floor for miles. Blizzards have dumped over four hundred inches on the summit of White Pass, and though there are "good" years, the railroad has been blockaded sometimes for weeks on end. The worst storm shut down the road for 21 days.

The geography and weather create more than just management problems; they compound the dangers of railroading to the highest extent. Even on a well-maintained railroad, pursing safe operational standards is critical. Here it is very literally a matter of life and death. Avalanches and rock slides periodically wipe cars over the side, and derailments (which occur very frequently) could mean disaster at many locations. Such a disaster would even be environmental in its scope, since the prospect of tons of lead and zinc dumped into the Skagway River would certainly affect life in the water, and down to the sea.

Train crews have learned to take safety as more than just the title page in the rule book. After all, we're the ones out there in the middle of it. Five-man crews on the WP&YR exist primarily for safety, in spite of management's stand on this bill. Here are a few examples:

1. Ice building up between the wheels and the brake shoes can cause winter brake failures. The Company has refused to upgrade their equipment, and this leaves the crew to deal with problems out on the road.

2. Bridges and trestles on the road are not equipped with walkways. A train which is stretched across a bridge leaves no walking (or climbing) room at the edge. Therefore, a brakeman cannot walk from one end of the train to the other, and a second brakeman is needed to walk the other end in emergencies. This can be critical.

3. In winter months it often takes the combined strength of two men to set a good safe handbrake on a car, and the same force of two men to "knock-down" or remove the brake. On older cars with faulty handbrakes this applies all year, even with brake clubs.

4. The "sophisticated communications systems" (two-way radios) in use are continually in for repair and are prone to failure. The crews do not rely on them because of this safety hazard, and hand signals are regularly used in switching moves.

5. The primary job of the crew while underway is to watch for any hint of trouble on or around the train. The railroad is twisted like a piece of spaghetti with 16 to 24° curves, and there are documented cases of the fireman, riding on the left-hand side of the locomotive, spotting danger which was out of the engineer's line of sight and stopping the train. Similarly, brakemen ride at both ends and watch over the train for hotboxes, loads shifting or breaking loose, broken axles or wheels, downed brake rigging, derailed cars, broken rails, fires, washouts, etc. Thus, the manning positions at the head-end with the engineer and fireman watching the track from the lead unit, a brakeman riding the "rear" or trailing unit watching over the train behind, and a conductor and rear-brakeman overseeing the train ahead of the caboose (and the track behind for signs of dragging brake rigging or derailed equipment) have been established for the safe opera-

tion of the train while underway. Dozens of documented cases exist of crew men at their positions spotting trouble which would have gone unseen by other crew members, and thus saving the Company thousands of dollars in repairs and wreck clean-up operations.

6. Most important to the crew members in the light of safety on the road is the grim fact that besides dealing with faulty locomotives, antiquated equipment, and track and bridge maintenance which barely meets the job at hand, employees have to deal with snowslides and cliffs over which a train's plunge would mean certain injury or death. The spector of a passenger train loaded with 400 tourists going through a rotten trestle, or derailing high above "Dead Horse Gulch", or being hit by a rock slide (on top of the 1900-era wood-roofed parlor cars with their old oil stoves) brings shudders to the men who actually are on board as well as to management. Crew members to deal with such accidents are essential. Even more frightening in the winter season are the snowslides. There has been an increase in winter passenger traffic over the last few years, and thus the crew is faced with the added burden of protecting travelers as well as themselves.

1. White Pass and Yukon Ltd. of Vancouver is owned by Federal Industries, Ltd. of Winnepeg. The Canadian management is on an over-all cost-cutting spree at this time, and are trying to tighten up their operation. Part of this has included the postponement of track repairs--a major rail replacement program was knocked out to save money--and an attitude of "beat it 'til it dies" toward their locomotives, some of which are now 28 years old and in critical need of replacement or complete long-term overhaul. Because traffic is so heavy at this time, the Company can't take their engines out of service much more than stop-gap, repairs on the worst problems. Engine failures or malfunctions are a common occurance on the railroad. It is also worth noting that the average train length in 1969 was 30 cars, operated by five men. Today the same five men have to run trains that can be 100 cars long out of White Pass. This is actually more work for each man involved, with more weight to contend with, more cars to watch (and to walk when checking the train, or in emergencies), and definitely more hazardous.

2. Remarkable but t ue in light of the terrain and operational hazards on the WP&YR is the fact that White Pass does not legally have to comply with Federal laws concerning safety and operation. The reason: White Pass is "narrow gauge" instead of "standard gauge" (4' 8½" wide track), and as such the Company can usually sneak by under requirements and regulations which would close down a standard gauge road "outside". This appears to be an oversight by the Federal Railroad Administration, but is understandable since the little known and obscure White Pass is the last narrow gauge common carrier left in the U.S. Also, it is generally viewed as a Canadian company. The 21 miles within Alaska under jurisdiction of American law, usually slide by unnoticed.

3. Much of the freight equipment, passenger equipment and airbrake equipment is antiquated and of museum vintage. Crews must deal with this as well as other problems, adding to operational hazards.

4. Because of all the previous factors, it is little wonder that the White Pass accident and safety record is attrocious. Summer travel has increased each year, and with it the number of accident reports. Employees must be extra alert at all times to prevent injury or death from faulty equipment, dangerous operational procedures, or management decisions affecting train movement. White Pass enjoys saying that they have "never lost a passenger's life" in their 80-year history. The men who ride the trains can only count the number of dead employees over the years, and knock on wood. The Company is playing Russian Roulette with human lives, and their own odds get worse by reducing the number of men on board a train who are available to deal with the expected--and unexpected--hazards of mountain railroading under the most extreme conditions.

Statement of Position by the United Transportation Union

We of the United Transportation Union, Local 1787 in Skagway, are adamently opposed to Senate Bill 849, a bill which will aid a non-resident Canadian corporation by eliminating Alaskan jobs on U.S. soil. This is by itself a dangerous international precedent, worthy of close attention--particularly in light of the proposed Alcan gasoline project.

Few people even know that there is a railroad in Southeast Alaska. Instead of repealing the present law, we propose a rider should be added that would exempt state owned Railroads.

Lastly, very few individuals are aware of the delicate balance that exists in Skagway between labor and management. We feel that the introduction of this bill is an attempt by the Company to further drain our union treasury attending a battery of hearings in Juneau. The last time we had to testify it involved long hours and much expense--something which the Company can easily afford.

Given this situation, our membership has nothing except the present State law to protect us from the whims of a foreign corporation. Our only defense at present lies in "An Act relating to train crews" as set forth in State law. It would thus seem beyond comprehension for our own lawmakers--our own elected representatives--to vote to repeal the only security which we in Skagway have in these difficult days.

PROPOSED REGULATIONS
BOARD OF PSYCHOLOGIST AND PSYCHOLOGICAL ASSOCIATE EXAMINERS

12 AAC 60.090(a) and (b) are repealed.

12 AAC 60 is amended by adding a new article to read:

ARTICLE 6. GENERAL PROVISIONS

Section
950. Definitions

12 AAC 60.950. DEFINITIONS. In this chapter and AS 08.86:

(1) "accreditation" means:

(A) an accreditated school is one which is accreditated by any regional accrediting agency recognized by the American Association of Collegiate Registrars and Admissions Offices.

(B) an accreditated doctoral program is one which has been approved by the American Psychological Association or which is clearly equivalent to the standard used by the American Psychological Association. The burden of establishing equivalent standards rests with the applicant.

(2) "reasonable cause or excusable neglect" means:

(A) chronic illness;

(B) retirement;

(C) military service; and

(D) hardships as individually determined by the board.

(3) "technical meeting" means a professional meeting incorporating formal written or oral presentations of psychology related research, theory or applied topics.

(4) "appropriate supervision" as used in AS 08.86.180(b)(1) means supervision by a licensed psychologist consistent with accepted professional priorities in psychology and with the supervising licensed being responsible for insuring the extent, kind, and quality of the psychological services performed are consistent with the training and experience of the supervised person.

(5) "professional incompetence" as used in AS 08.86.204(7)(A) means lacking sufficient knowledge,

skills, or professional judgement in that field of practice in which the psychologist or psychological associate concerned engages, to a degree likely to endanger the mental health or well-being of his or her patients. (Eff. / / , Reg.)

Authority: AS 08.86.080

12 AAC 60 is amended by adding a new section to read:

12 AAC 60.185. ETHICS AND STANDARDS. (a) The ethics to be adhered to by licensed psychologists and licensed psychological associates shall be the "Ethical Principles of Psychologists," (1981 revision), of the American Psychological Association.

(b) The standards to be adhered to by licensed psychologists and licensed psychological associates rendering psychological services in the state shall be the "Standards for Providers of Psychological Services," (January 1977 edition), of the American Psychological Association. (Eff. / / , Reg.)

Authority: AS 08.86.080

12 AAC 60 is amended by adding a new article to read:

ARTICLE 6. CONTINUING EDUCATION

Section
250. Statement of purpose of continuing education
260. Hours of continuing education required
270. Computation of continuing education
280. Computation of academic continuing education hours
290. Accepted subjects
300. Approved nonacademic continuing education programs
310. Individual study
320. Instructor or discussion leader
330. Publications and presentations
340. Reinstatement
350. Report of continuing education

12 AAC 60.250. STATEMENT OF PURPOSE OF CONTINUING EDUCATION. The purpose of continuing psychology education is to insure that the renewal of licenses is contingent upon proof of continued competency and assure the consumer of an optimum quality of psychological health care by requiring licensed psychologists and psychological associates to pursue education designed to enhance and advance their professional skills and knowledge. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.260. HOURS OF CONTINUING EDUCATION REQUIRED. (a) An applicant for renewal of a license as a psychologist, or a psychological associate, originally issued before July 1, 1981, shall obtain 40 credit hours of documented continuing education before the June 30, 1985 application for renewal.

(b) Each psychologist or psychological associate seeking renewal of his or her license on or after July 1, 1985, must obtain an average of 20 credit hours per year of

documented continuing education during the previous licensing period. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.270. COMPUTATION OF CONTINUING EDUCATION HOURS. (a) For the purposes of 12 AAC 60.250--12 AAC 60.310, 50 minutes of instruction constitutes one hour.

(b) Credit is given only for full hours of instruction received and not for a fraction of an hour.

(c) Credit is given only for class attendance hours and not for hours devoted to class preparation. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.280. COMPUTATION OF ACADEMIC CONTINUING EDUCATION HOURS. (a) One quarter hour academic credit from a college or university constitutes 10 hours of continuing education.

(b) One semester hour academic credit from a college or university constitutes 15 hours of continuing education. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.290. ACCEPTED SUBJECTS. (a) In order to be accepted by the board, the subject of a continuing education program must contribute directly to the professional competency of a person licensed to practice as a psychologist or a psychological associate and be directly related to the concepts of psychological principles, ethics or practices as defined in AS 08.86.230(2). (Eff / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.300. ACCEPTED NONACADEMIC CONTINUING EDUCATION PROGRAMS. (a) The following programs are accepted by the board if they meet the requirements of 12 AAC 60.290:

(1) professional development programs of the American Psychological Association and its state societies including workshops, seminars, symposia, or a presentation of a technical paper;

(2) college or university short courses not carrying academic credit; and

(3) other professional continuing education programs if information is supplied to the board as follows:

(A) name and address of person or organization sponsoring the course;

(B) instructor's name;

(C) title of course; and

(D) the number of full fifty minute hours of actual instruction; and

(E) the location and dates the course was ~~be~~ conducted. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.310. INDIVIDUAL STUDY. (a) The number of hours of continuing education credit awarded for completion of a formal correspondence program, videotape program, audio-cassette program, or other individual study program which requires registration and provides evidence of satisfactory completion will be determined by the board on an individual basis.

(b) Continuing education credit awarded under this section may not exceed one half of the total continuing education hours required in any licensing renewal period. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.320. INSTRUCTOR OR DISCUSSION LEADER. (a) One hour of continuing education credit is awarded for each hour completed as an instructor or discussion leader of educational programs meeting the requirements of 12 AAC 60.250-.310. Credit is awarded only for the initial course of instruction of the subject matter unless there have been substantially new developments in the subject since the prior presentation.

(b) Credit awarded under (a) of this section may not exceed one-third of the hours in any licensing period. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.330. PUBLICATIONS AND PRESENTATIONS. (a) Twenty (20) credit hours of continuing education will be awarded for each

(1) authorship of a publication in a professional psychology journal, providing the publication relates directly to the concepts of psychological principles, ethics or practices, and is published or accepted for publication during the four year reporting period immediately preceding the license renewal; and

(2) written or oral presentation at a meeting of the American Psychological Association, a technical meeting of a State psychology society, or meeting of a professional psychology-oriented organization, providing the presentation relates directly to the concepts of psychological principles, ethics or practices, and the presentation occurred during the four-year reporting period immediately preceding the license renewal; or

(3) authorship of a professional psychology book or monograph published or accepted for publication during the four year reporting period immediately preceding the license renewal. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.340. REINSTATEMENT. (a) The license of any licensee which is not renewed by reason of failure to comply with the continuing education requirements of 12 AAC 60.250-.380, will be reinstated or restored to full status by submission to the board of proof of the completion of all continuing education credit hours required.

(b) A licensee unable to obtain the required continuing education hours for renewal of his or her license, due to reasonable cause or excusable neglect, must request exemption status in writing to the board accompanied by a statement explaining reasonable cause or excusable neglect. The board will prescribe an alternative method of compliance to the continuing education requirements as deemed appropriate to the individual situation. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.350. REPORT OF CONTINUING EDUCATION. (a) An applicant for renewal of a license to practice psychology shall submit, on a form provided by the department, a sworn statement of the continuing education in which he or she participated or pursued. The statement must indicate:

(1) the sponsoring organization;

(2) the location of the course or correspondent;

(3) the title or description of course or both;

(4) the principal instructor;

(5) the dates of attendance or period of correspondence;

(6) the titles, issues and dates of publications or presentations; and

(7) the number of continuing education hours claimed.

(b) Falsification of any written evidence submitted to the board pursuant to this section shall be deemed to be unprofessional conduct and constitute grounds for licensure reprimand, revocation or suspension. (Eff / / , Reg.)

Authority: AS 08.86.070(a)(6)

STATE OF ALASKA

Mr. Harry D. Treager, Director
Division of Occupational Licensing
Department of Commerce and
Economic Development
Pouch D
Juneau, Alaska 99811

Dear Mr. Treager:

In compliance with AS 37 and AS 08 and on behalf of the Board of Psychologist and Psychological Associate Examiner , I am submitting the enclosed Annual Report concerning the board's activities and accomplishments for Fiscal Year 1982.

Should there be any questions concerning this report, please feel free to contact me. Thank you.

Sincerely,

Paul E Turner

Paul E. Turner, Ph.D., Secretary
Board of Psychologist and Psychological
Associate Examiners

DRR/wfs 4/1

Enclosure

NARRATIVE STATEMENT

The board undertook several major projects during FY '82 including (1) Sunset Audit, (2) Continued Education Regulations, (3) Examination Revision, and (4) Enforcement of the Practice Act.

Summary of the activity of the Board of Psychologist and Psychological Associate Examiners for FY '82: The level of board activity during FY '82 has been maintained at a relatively high level of productivity commensurate with the work completed during FY '81.

A substantive portion of the board's time has been spent dealing with issues related to the Sunset review. This process began in the summer of 1981 and continued through the end of May, 1982. The board responded to an audit by the Budget and Audit Committee of the Legislature in writing. The board has testified at legislative hearings regarding the Sunset of the board. Further, the board has written several responses to the Sunset hearings subsequent to the division's opposition to the board and the Governor's veto. Throughout this legislative process, the board has attempted to introduce several statutory changes, although these have been unsupported by the Division of Occupational Licensing.

A great deal of effort has been devoted to drafting continuing education regulations which has been the subject of over a year's effort toward establishing criteria that are equitable, effective, and relevant to Alaskans across the wide range of community settings in which Psychologists and Associates often find themselves. The continuing education regulations have been through one public teleconference hearing and are in a draft that is presently acceptable for a final period of written comment and testimony from the public.

Investigative activities of the board seem to have declined during this past year. Unfortunately, an investigator was present at only one meeting during the past fiscal year. At its March meeting, the chief investigator met with the board to review the current status of cases pending.

Licensing activities seem to have increased during this past year in that nine Psychologists and five Psychological Associates have sat for the two examinations held in October and April during the past fiscal year. As a consequence, eight new Psychologists and three associates have been licensed to practice. The trend toward an increased number of Associates is seen as evidence that master level individuals are being encouraged to enter the field, and secondly, the public is benefiting by a wider spectrum of individuals who are licensed to practice. At the present time, there are 81 active Psychology licenses and 10 Psychological Associate licenses.

The State portion of the examination has been significantly revised. For the April examination, the board eliminated a large portion of the exam which now focuses on law and ethics alone. This has allowed the board to devote a great deal of time to establishing a item pool for this area and to establish criteria on scoring sheets for this examination. Further, this has resulted in a more efficient and accurate means of quickly reporting scores back to individuals who are taking the examination.

The Attorney General's opinion on the conduct and record of board meetings, to assure compliance with AS 44.62.310 and AS 44.62.312, has maintained improved conduct of board meetings and increased documentation of board activity. Further, the division has markedly improved its recordkeeping in the transcription of minutes of board meetings. All aspects of board meetings are presently taped.

Public activity and information has been a major target area for the board during FY '82. Public hearings have been held relative to propagation of continuing education regulations. The board has made continual progress in the provision of information to a variety of groups and individual private parties relative to psychology licensing. Members of the board have provided information to the Alaska Social Workers Association, the Alaska Psychological Association, Alaska School Psychologists Association, Alaska Mental Health Association, Alaska Mental Health Director's Association, and Governor's Advisory Council for Mental Health. All board meetings have been advertised across the State.

Dr. Jim Greenough was appointed to the board during this last fiscal year.

The Licensing Examiner I for the Board of Psychologist and Psychological Associate Examiners was Evelyn Boone. The License Examiner II (supervisor) for the Division of Occupational Licensing was Mrs. Jane English. The Director for the Division of Occupational Licensing for the past fiscal year has been Mr. Harry Treager.

EXAMINATIONS

The board held two examinations during the period of October 8-9, 1981 and April 8-9, 1982. The Licensing Examiner administered the first examination, and the Division of Occupational Licensing arranged for Anchorage personnel to administer the second examination. Three candidates took the exam in October, and three individuals successfully passed the examination. There were ten candidates who took the exam in April and six individuals completed the exam.

The Board of Psychologist and Psychological Associate Examiners had a goal of four meetings, but was only able to meet three times, due to budget constraints.

Date	Location
August, 1981	Sitka
November, 1981	Fairbanks
March, 1982	Juneau

Associated with the volume of work that comes up in the interim between meetings, conference calls are utilized as a means to expedite important board business. Conference calls were held on the following dates:

October 9, 1981
April 1, 1982

REVIEW OF PRIOR YEAR OBJECTIVES

Objective 1. The board has revised the scoring sheets and scoring system for the examination, reducing the response time for scoring the examinations, improving objectivity of scoring, and improving the accuracy of the compilation of test scores. In April, 1982, the board developed an items pool for the State examination. This State examination consists of an essay in law and ethics relative to the practices of psychology within the State of Alaska. An expanded item pool has been developed for this examination.

Objective 2: A third draft of continuing education regulations has been completed. A teleconference was held on these regulations in Sitka. No hearings have been scheduld since the last meeting in March as the division has reported that a teleconference network cannot be obtained until the end of the legislative session.

Objective 3: The board has been actively involved in the Sunset audit. The chairperson, Dr. Delys-Baglien, responded to the Office of Budget and Audit's report during the summer of 1981. The Division of Budget and Audit's report was not completed until December of 1981. Hearings were held on March 9 by a joint House and Senate subcommittee. SB 823 was introduced to both the House and Senate and successfully passed despite the division's opposition to the continuation of the board. Three members of the board testified at the March 9 hearing and a written response to the division's opposition to the board was made.

Objective 4: No member of the board was able to attend the regional AASBP meeting at the Western Psychological Association, nor was any member of the board able to attend the National AASBP meeting at the American Psychological Association. Board members received the AASBP newsletter to keep them up to date as to relevant issues for licensing. Board members also received a journal, Professional Practice of Psychology. The Secretary and Chairperson of the board have been actively involved with the division via telephone and correspondence to deal with intermittent board business.

Objective 5: An extensive effort to keep the public informed of board activities and to increase the public's knowledge of the practice of psychology has been made. Board members have responded to individual questions, complaints, and concerns related to the practice of psychology in the State. The board has held a public hearing on continuing education regulations. Individual members of the board have provided information to the public and have attended meetings of the Alaska Social Workers Association, Alaska Mental Health Association, Alaska Mental Health Director's Association, Governor's Advisory Council for Mental Health, Alaska Association for Mental Health, the Alaska Psychological Association, and Alaska School Psychologists Association.

Objective 6: The board had recommended several changes in the licensing statutes during the past year, however, the division and the Governor would not introduce any new legislation for the board. Legislation was introduced in SB 823 to delete specialty licensing, to delete the psychotherapy labels, and to redefine approved program. The Governor vetoed this legislation.

Objective 7: Two examinations were completed during FY '82 with the use of the professional Examination Service and a State developed examination. Seven individuals passed the psychology aspect of this examination and two individuals passed the psychological associate aspect of this examination.

Objective 8: There were 14 psychologist applications reviewed during FY '82 and 4 psychological associate applications reviewed. There has been an increase in the number of applicants for the psychologist and the associate levels.

Objective 9: Because of budget restraints, the board was able to meet only three times during this last fiscal year; meetings were held in Sitka, Fairbanks, and Juneau.

Objective 10: The board has attempted to increase public related input in board activities by meeting across the State in diverse sites. Public input has been solicited through related activities described in Objective 5.

Objective 11: The board has experienced a decrease in investigatory activity as no investigator was present at board meetings until March of 1982. At that time, investigations for the past fiscal year were reviewed. Also at that time, the board passed a resolution requesting an investigator at every meeting in order to maintain a high degree of activity associated with enforcing the practice act.

FY '83 GOALS AND OBJECTIVES

Goals

It is the purpose of the board to ensure the public of quality, psychological care; to admit only qualified individuals in independent and associate psychological practice; to actively enforce a psychology practice act; to promote high standards of professional psychological practice; and to ensure the public of continuing competency of licensed psychologists and associates.

Objective 1. In order to ensure the continuing quality of psychological care to the public, it is in the public interest to support legislation to continue the board.

Objective 2. Complete public comment for the continuing competency regulations and to adopt continuing competency regulations by the end of FY '83.

Objective 3. To increase board knowledge of pertinent issues related to psychology licensing by (a) ensuring that all members receive the journal, Professional Practice of Psychology; (b) all members receive the AASBP Newsletter; and (c) send a representative to the national or regional AASBP meeting. A budget allocation of $1,000 is required for this last objective (c).

Objective 4. To increase the public's awareness of board activities ensure the public's knowledge of the purpose of the board, and to educate the public regarding the practice of psychology. This objective will also include advertising in local and State media as well as having a public input period on each agenda.

Objective 5. Consideration of changes to be introduced to this Legislature including deletion of specialty, licensing deletion of the psychotherapy labels, and redefinition of an improved program.

Objective 6. Conduct two examinations during FY '83, with travel costs for the examination of $300.00, per diem cost for examination of $160.00 for a budget total of approximately $920.00.

Objective 7. Review applications for licensure for psychology and psychological associate practice in an attempt to increase the number of practitioners at the psychologist and associate levels.

Objective 8. Meet four times during FY '82 throughout the State with the estimated travel cost per meeting of $2,040.00 and the estimated per diem per meeting of $960.00. This makes a total cost of $12,000.00 during this next fiscal year for meetings.

Objective 9. Increase board activity in investigatory matters regarding the practice act of psychology.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 181

"An Act relating to regulation of the practice of psychology and continuing the existence of the Board of Psychologist and Psychological Associate Examiners; and providing for an effective date."

Discussion:

The Division of Mental Health and Developmental Disabilities supports the continuation of the Board of Psychologist and Psychological Associate Examiners. We believe a board composed of licensed psychologists is important to insure that persons applying for licenses have the proper qualifications and experience necessary to provide a high quality of service. Also, the board plays an important role in developing standards of service for licensed psychologists and psychological associates.

The utilization of boards such as this is common practice in the area of licensing and overseeing service delivery, especially in the area of health care. For example, the nursing profession, medical doctors, and other fields of health providers have similar boards composed of their peers.

The continuation of this board will help to insure that Alaska's growing public and private mental health system will provide a high quality of service by competent and qualified mental health professionals. The development and enforcement of standards is considered extremely important in an area such as this and should continue in order to insure the safety of the consumers of mental health care.

Recommendation:

The Department of Health and Social Services supports the passage of this bill.

COMMENTS ON THE NEED FOR PSYCHOLOGIST LICENSURE

I have prepared the following comments to accompany oral testimony to Committees of both the Alaska State House of Representatives and Senate, on the subject of the need for legislation continuing licensure of psychologists and psychological associates in Alaska. I have been in Alaska since 1964, except for time in the south 48 for graduate school. I have been a practicing psychologist in Alaska for the past nine years. Currently I am Chairman of the Board of Psychologist and Psychological Associate Examiners. I have been a member of the board for the past 18 months.

As a member of the licensing board I am very well acquainted with the fact that licensing must be justified in terms of providing protection to the service consuming public of Alaska. I believe you will agree the following points address that issue very directly.

1. Distinguishing a "Psychologist": A doctoral level psychologist is clearly distinguishable, though the field of counseling contains a wide variety of people offering services. This is true in terms of training, supervised practice, and experience. A licensed Psychologist will have had between four and seven years of postgraduate training, generally including a minimun of 3000 hours of supervised practice, in a training setting. Counselors trained even at the masters degree level generally average between one and two years of training and a few hundred hours of supervision in a training setting. This is major difference. Public protection demands that the distinction be recognized in a manner which will allow prospective clients to choose an adequately trained practitioner

2. Breadth of Training: Doctoral level psychologists have a very broad background of training enabling them to deal with a variety of client presented problems. Because of the years of training described above psychologists generally have time to be trained in many different therapeutic approaches, each of which enhances their ability to help people. Most practicing counselors have time only to learn one or two speciality areas, which they may do very well. The public needs to be able to identify practitioners with a broad training background.

As an example, the training of a doctoral level psychologist will often include supervised training in working with psychotic patients in mental hospitals, working in a mental health center, crisis intervention work, consultation with drug and alcohol treatment programs, schools, and other agencies. A doctoral level psychologist is a well trained generalist first, though s/he may choose to specialize later. This means s/he is equipped to handle almost anyone who may walk through the door, and to know enough to refer appropriately when necessary.

3. Training vs. Work Experience: The argument is sometimes heard that additional years of experience could qualify a less well trained person at the psychologist level. This is not so for several reasons. Training missed initially will never be made up by the addition of years of experience. Only more training is likely to make up for such a deficit, in which case the person will probably earn a doctorate.

There is also a distinct difference between supervised experience in the working world and that obtained in a training setting. Supervision in the working world is often in name only, or little more than that. It is sufficient to ensure that a person works safely. Caseload pressures often prevent sufficient face to face supervision. In addition the supervisors in the work setting may well not be trained supervisors. Supervised experience in a graduate school sponsored training program is geared to provide training rather than to producing work, and the supervisors are generally well trained and enjoy the training setting.

It is difficult to equate supervised experience in a training program vs. in a work setting. The training setting, however, is clearly worth much more.

4. Commonly accepted Definition: Licensure of psychologists at the doctoral level is appropriate because it corresponds most closely to the generally held popular view of what a psychologist is. Though there is some disagreement about the definition, people generally expect that if they go to a licensed psychologist they will find someone trained and experienced as described above. For the state to license people as psychologists at a lesser level would mislead the public. For the state not to license at all would allow proliferation of charlatans and inadequately trained people claiming the title of psychologists, an even more dangerous situation.

5. Non-Restrictive of Other Professionals: Licensing does not prevent unlicensed counselors and o[illegible]rom continuing to provide services to the public. It simply [illegible]ts the use of certain meaningful words, such as "psycho[illegible]", "psychological counseling", "psychological testing", and [illegible] to those who can appropriately use them.

By this restriction the public is allowed to recognize those practioners who meet a commonly accepted definition of what a psychologist is. They are then able to pick practitioners who will be minimally competent to handle a broad range of problems in a professional and safe manner.

Those who are members of a legitimate profession, or who choose to describe what they do in other terms, such as "counseling", will not be prevented from continuing by an appropriate licensing law.

6. Influx of the Poorly Qualified: Without a reasonable licensing law it seems likely that fewer rather than more competent psychologists would come to Alaska. There might well an influx of marginally qualified people who cannot be licensed elsewhere, but this is hardly

advantageous to Alaskan consumers.

7. Loss of Third-Party-Payments: With no licensing, or meaningless low level licensing, insurance and other third party payments for psychological services would be much reduced in this state. Psychologists have fought hard for third party payments which enable consumers to afford psychotherapy services. Loss of this resource would hurt the consumer and the provider.

8. Other States: States which have sunsetted psychologist licensing have quickly reinstated it when faced with the facts described above.

9. In Support of Ethical Behavior: By generally confining licensure to a well trained and fairly easily defined group of providers there is one additional advantage to the state's consumers. A very important part of training of doctoral level psychologists involves the nature and importance of ethical behavior for the protection of the client. Not only do training programs teach ethics, they also screen for unethical behavior and support a set of standards which enforce ethical behavior. While licensing laws can further require ethical behavior it can only be advantageous to be licensing largely from a group already screened and trained to behave ethically in relation to their clients, peers and payors.

Thank you for this opportunity to comment. I would like to emphasize that I am available for further comment or conversation on this issue. I am in Juneau one day of every week, though I live in Sitka, and so would be able to discuss this matter in person, should you desire.

James W. Greenough, Ph.D.

Sectional Analysis of SB109/HB184

Sec 1. Provides for an extension of the Board of Psychologists & Associated Psychological Examiners for 4 years.

Sec 2. Clarifies the powers of the Board. Present statute is written in vague language. Board does not have powers equal with those of other health regulatory boards.
Proposed wording is taken from the Council on State Governments publication on occupational licensing / model practice act and is consistent with language adopted by the legislature for other licensing boards under Title VIII

Sec. 3 Assures that a person seeking licensure by examination or by acceptance of credentials has graduated from an accredited school with a psychology program meeting the requirements set out by the American Psychology Association's Committee on Education & Credentialing.
The applicant would not be required to be a graduate of an APA approved & accredited program but rather simply be a graduate of one which is identical in content & quality to an approved program. This wording allows the Board to accept

as eligible for licensure many more candidates

Some other professional licensing statutes in Alaska do not allow such discretion but require that applicants be graduates from a school that is approved and accredited by that profession's national association's credentialing & education committee.

The Board of Psychologist & Psychological Associate Examiners have chosen this wording because there are only approximately 10 APA approved & accredited programs in psychology in the country & accepting that requirement for eligibility for licensure would seriously restrict the numbers of applicants in Alaska where there is a proven need for qualified mental health practitioners both in Rural & Urban areas.

Please note: Colleges & universities are accredited by the government but specific professional programs (ie medicine dentistry, etc) are accredited/approved by the profession's own education or credentialing committee in order that the minimum competence required to graduate is met or is available to be learned by the students.

In this section the board is being allowed to measure programs against the national

associations standards for acceptance.

Sec. 4 Attempts to alleviate a conflict between professions who practice psychotherapy & to prevent ~~conflicts~~ & prosecution of those in other professions who would otherwise be accused of practicing psychology without a license, namely Social Workers.

Sec. 5. Exclusionary clause exempting members of other professions from the provisions of this Statute; jurisdiction of this Board provided that they do not appropriate the titles & practices restricted by Statute ~~to persons of doctor of~~ to those who are psychologists or psychological associates.

PROPOSED REGULATIONS
BOARD OF PSYCHOLOGIST AND PSYCHOLOGICAL ASSOCIATE EXAMINERS

12 AAC 60.090(a) and (b) are repealed.

12 AAC 60 is amended by adding a new article to read:

ARTICLE 6. GENERAL PROVISIONS

Section
950. Definitions

12 AAC 60.950. DEFINITIONS. In this chapter and AS 08.86:

(1) "accreditation" means:

(A) an accreditated school is one which is accreditated by any regional accrediting agency recognized by the American Association of Collegiate Registrars and Admissions Offices.

(B) an accreditated doctoral program is one which has been approved by the American Psychological Association or which is clearly equivalent to the standard used by the American Psychological Association. The burden of establishing equivalent standards rests with the applicant.

(2) "reasonable cause or excusable neglect" means:

(A) chronic illness;

(B) retirement;

(C) military service; and

(D) hardships as individually determined by the board.

(3) "technical meeting" means a professional meeting incorporating formal written or oral presentations of psychology related research, theory or applied topics.

(4) "appropriate supervision" as used in AS 08.86.180(b)(1) means supervision by a licensed psychologist consistent with accepted professional principles in psychology and with the supervising licensed being responsible for insuring the extent, kind, and quality of the psychological services performed are consistent with the training and experience of the supervised person.

(5) "professional incompetence" as used in AS 08.86.204(7)(A) means lacking sufficient knowledge,

skills, or professional judgement in that field of practice in which the psychologist or psychological associate concerned engages, to a degree likely to endanger the mental health or well-being of his or her patients. (Eff. / / , Reg.)

Authority: AS 08.86.080

12 AAC 60 is amended by adding a new section to read:

12 AAC 60.185. ETHICS AND STANDARDS. (a) The ethics to be adhered to by licensed psychologists and licensed psychological associates shall be the "Ethical Principles of Psychologists," (1981 revision), of the American Psychological Association.

(b) The standards to be adhered to by licensed psychologists and licensed psychological associates rendering psychological services in the state shall be the "Standards for Providers of Psychological Services," (January 1977 edition), of the American Psychological Association. (Eff. / / , Reg.)

Authority: AS 08.86.080

12 AAC 60 is amended by adding a new article to read:

ARTICLE 6. CONTINUING EDUCATION

Section
250. Statement of purpose of continuing education
260. Hours of continuing education required
270. Computation of continuing education
280. Computation of academic continuing education hours
290. Accepted subjects
300. Approved nonacademic continuing education programs
310. Individual study
320. Instructor or discussion leader
330. Publications and presentations
340. Reinstatement
350. Report of continuing education

12 AAC 60.250. STATEMENT OF PURPOSE OF CONTINUING EDUCATION. The purpose of continuing psychology education is to insure that the renewal of licenses is contingent upon proof of continued competency and assure the consumer of an optimum quality of psychological health care by requiring licensed psychologists and psychological associates to pursue education designed to enhance and advance their professional skills and knowledge. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.260. HOURS OF CONTINUING EDUCATION REQUIRED. (a) An applicant for renewal of a license as a psychologist, or a psychological associate, originally issued before July 1, 1981, shall obtain 40 credit hours of documented continuing education before the June 30, 1985 application for renewal.

(b) Each psychologist or psychological associate seeking renewal of his or her license on or after July 1, 1985, must obtain an average of 20 credit hours per year of

documented continuing education during the previous licensing period. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.270. COMPUTATION OF CONTINUING EDUCATION HOURS. (a) For the purposes of 12 AAC 60.250--12 AAC 60.310, 50 minutes of instruction constitutes one hour.

(b) Credit is given only for full hours of instruction received and not for a fraction of an hour.

(c) Credit is given only for class attendance hours and not for hours devoted to class preparation. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.280. COMPUTATION OF ACADEMIC CONTINUING EDUCATION HOURS. (a) One quarter hour academic credit from a college or university constitutes 10 hours of continuing education.

(b) One semester hour academic credit from a college or university constitutes 15 hours of continuing education. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.290. ACCEPTED SUBJECTS. (a) In order to be accepted by the board, the subject of a continuing education program must contribute directly to the professional competency of a person licensed to practice as a psychologist or a psychological associate and be directly related to the concepts of psychological principles, ethics or practices as defined in AS 08.86.230(2). (Eff / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.300. ACCEPTED NONACADEMIC CONTINUING EDUCATION PROGRAMS. (a) The following programs are accepted by the board if they meet the requirements of 12 AAC 60.290:

(1) professional development programs of the American Psychological Association and its state societies including workshops, seminars, symposia, or a presentation of a technical paper;

(2) college or university short courses not carrying academic credit; and

(3) other professional continuing education programs if information is supplied to the board as follows:

(A) name and address of person or organization sponsoring the course;

(B) instructor's name;

(C) title of course; and

(D) the number of full fifty minute hours of actual instruction; and

(E) the location and dates the course was ~~be~~ conducted. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.310. INDIVIDUAL STUDY. (a) The number of hours of continuing education credit awarded for completion of a formal correspondence program, videotape program, audio-cassette program, or other individual study program which requires registration and provides evidence of satisfactory completion will be determined by the board on an individual basis.

(b) Continuing education credit awarded under this section may not exceed one half of the total continuing education hours required in any licensing renewal period. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.320. INSTRUCTOR OR DISCUSSION LEADER. (a) One hour of continuing education credit is awarded for each hour completed as an instructor or discussion leader of educational programs meeting the requirements of 12 AAC 60.250-.310. Credit is awarded only for the initial course of instruction of the subject matter unless there have been substantially new developments in the subject since the prior presentation.

(b) Credit awarded under (a) of this section may not exceed one-third of the hours in any licensing period. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.330. PUBLICATIONS AND PRESENTATIONS. (a) Twenty (20) credit hours of continuing education will be awarded for each

(1) authorship of a publication in a professional psychology journal, providing the publication relates directly to the concepts of psychological principles, ethics or practices, and is published or accepted for publication during the four year reporting period immediately preceding the license renewal; and

(2) written or oral presentation at a meeting of the American Psychological Association, a technical meeting of a State psychology society, or meeting of a professional psychology-oriented organization, providing the presentation relates directly to the concepts of psychological principles, ethics or practices, and the presentation occurred during the four-year reporting period immediately preceding the license renewal; or

(3) authorship of a professional psychology book or monograph published or accepted for publication during the four year reporting period immediately preceding the license renewal. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.340. REINSTATEMENT. (a) The license of any licensee which is not renewed by reason of failure to comply with the continuing education requirements of 12 AAC 60.250-.380, will be reinstated or restored to full status by submission to the board of proof of the completion of all continuing education credit hours required.

(b) A licensee unable to obtain the required continuing education hours for renewal of his or her license, due to reasonable cause or excusable neglect, must request exemption status in writing to the board accompanied by a statement explaining reasonable cause or excusable neglect. The board will prescribe an alternative method of compliance to the continuing education requirements as deemed appropriate to the individual situation. (Eff. / / , Reg.)

Authority: AS 08.86.070(a)(6)

12 AAC 60.350. REPORT OF CONTINUING EDUCATION. (a) An applicant for renewal of a license to practice psychology shall submit, on a form provided by the department, a sworn statement of the continuing education in which he or she participated or pursued. The statement must indicate:

(1) the sponsoring organization;

(2) the location of the course or correspondent;

(3) the title or description of course or both;

(4) the principal instructor;

(5) the dates of attendance or period of correspondence;

(6) the titles, issues and dates of publications or presentations; and

(7) the number of continuing education hours claimed.

(b) Falsification of any written evidence submitted to the board pursuant to this section shall be deemed to be unprofessional conduct and constitute grounds for licensure reprimand, revocation or suspension. (Eff / / , Reg.)

Authority: AS 08.86.070(a)(6)

*Sec. 6. AS 08.86.230(12) is amended to read:

(12) "approved program" means a program which meets the requirements established by the American Psychological Association Education and Credentialing Committee in Psychology for an approved program [.] , or its equivelant as determined by the Board.

*Sec. 7. This Act takes effect immediately in accordance with AS 01.10.070(c).

Special Assistant to the Commissioner
Department of Labor
State of Alaska
P.O. Box 1149
Juneau, Alaska 99811

Re: CSHB 182

Dear Ms. Knight:

As you know, I currently represent Alaska Alcoholism Rehabilitation Services, the non-profit corporation which owns and operates a long-term residential alcoholism treatment center in Wasilla, Alaska known as Nugen's Ranch. I testified in favor of CSHB 182 before the House Committee on Health, Education and Social Services because Nugen's Ranch, as one of the treatment programs in the state which hopes to implement a work therapy program, will benefit from the legislation. With this letter I hope to clear up a few misconceptions that may have developed as a result of certain comments I made during my testimony.

The residents at Nugen's Ranch are most likely to be individuals who have a life-long history of alcoholism. A good number of these individuals will be skid-row alcoholics and public inebriates who have spent many years on the street drifting from one detoxification facility to another. They have few life management skills and, practically speaking, are unemployable. Their treatment will require institutionalization for as long as two years.

The Ranch hopes to engage these individuals in "work therapy" as part of their treatment. Work therapy is activity of a constructive nature which may be supervised or unsupervised, and which will require the resident to assume certain responsibilities. The work will involve housekeeping chores, agricultural work, and unskilled labor associated with minor renovation and maintenance at the facility.

You indicated a concern on the part of the Department based on the fact that during my testimony before the HESS Committee I referred to residents at the facility performing certain maintenance tasks that might involve electrical or mechanical skills. My comments were only for the purpose of explaining to committee members that residents would regulary perform work that was non-agricultural in nature. I certainly did not intend to give the impression that Nugen's Ranch planned to displace existing employee positions through work therapy, or that the Ranch planned to have residents engage in work such as might be done by an electrician or mechanic and which would require specialized skills and training. I am sure you realize that it would be foolish for the corporation to do so, and I would never recommend such a course of action. The potential liability of the corporation as a result of any negligent work performed by a resident working beyond his skill level is itself a sufficient deterrent that the Ranch would never consider engaging residents in such activity.

To be more specific, the following tasks are those likely to be performed by residents involved in work therapy. I have listed the activities without regard to whether 29 CFR 529 requires the payment of wages for the activity.

1. Personal housekeeping chores (making beds, cleaning rooms);
2. General housekeeping chores (sweeping floors, trash removal, etc.);
3. Kitchen detail (setting and clearing tables, etc.);
4. Feeding livestock (poultry and swine);
5. Cleaning animal pens and sheds;
6. Planting and cultivating vegetable crops;
7. Planting and tending to bedding plants grown in the greenhouse;
8. Assisting in the slaughtering of livestock and the harvesting of crops;
9. Minor maintenance (e.g., painting);
10. Care of the grounds;
11. Snow removal during winter;
12. General labor, such as erecting fences, tearing down sheds, hauling trash, stacking lumber, cutting firewood, etc.

In some cases I anticipate that residents will watch qualified personnel perform regular maintenance tasks which require specific training and skills. In all cases, the "work" performed by the resident would not involve activity requiring a special skill, but nonetheless will allow the resident patient to learn some basic aspects of the skill.

For example, the Ranch might have the need to build a small tool shed adjacent to one of the existing buildings. This is work for which the Ranch would use the services of one of its regular maintenance personnel, or contract with someone to do the construction. This work, however, also would present an excellent opportunity to prepare a work therapy program which involves training in some carpentry skills. Residents could be asked to stack and haul lumber while observing how framing is done and receiving instruction in the proper use of power tools. Similarly, the residents could watch how electrical conduit is laid, learn how to lay shingle on a roof, learn how windows and doors are hung, and how steps and railings are made, etc. Throughout all of this "work therapy" the residents may do nothing more than stack lumber and paint the building. Nonetheless, the experience will have taught them some basic lessons of carpentry and electrical work.

I want to make it clear that the work therapy program designed for the Ranch will not displace any employment positions that are filled from the private sector and which are paid at a rate considerably higher than the prevailing minimum wage. If you examine the grant-in-aid documents for Nugen's Ranch available at the State Office of Alcoholism and Drug Abuse, you will see that the Ranch has, and intends to keep, fully paid and qualified maintenance, kitchen, and night attendant positions. Work therapy is designed for the benefit of the patient; it is not a concept which will result in the displacement of regular employees at the Ranch.

I do not believe it is unreasonable for the Ranch to expect that the quality of "work" they will receive from an individual during the initial stages of treatment is work for which something less than the minimum wage is still fair compensation. I am sure you can appreciate that someone who has been unable to work in five or six years because of

daily intoxication has a productive capacity that is, at best, minimal, even with constant supervision. Although I understand that the Department is concerned because even the most basic entry level positions in the private sector pay at least the minimum wage, I hope that the Department appreciates the fact that residents who will be referred to Nugen's Ranch are individuals who are presently not even counted among the labor force because of their inability to work.

It is the intention of the Ranch to base the wage scale on the disability of the patient worker, as is required by federal regulation. It seems clear to me that the federal regulations concerning patient workers at 29 CFR part 529 contemplate wage scales between 50 percent of the minimum wage and the full minimum wage, or higher, depending on the disabilities of the various clients. I have anticipated that in the process of applying for a certificate under 29 CFR 529 the Ranch would seek approval for a number of classes of wage scales between the minimum permitted under the regulations (50 percent of the minimum wage) and the minimum wage itself. This would enable the Ranch to automatically move a patient worker into a higher paying classification as his treatment progressed. It also seems to me that it is entirely possible in the future for the Ranch to budget itself for certain positions (such as dishwasher or kitchen helper) which would be paid at a prevailing wage rate and which would be filled by patient workers who are no longer under a disability.

The Ranch is not intending, nor does it expect, to pay patient workers less than is required under federal regulations or law. Both the federal regulations and the leading federal court cases in the field make it clear that if a patient worker is not suffering from any disability, he must be paid a wage comparable to the wage paid in the private sector for the equivalent work. I have advised my clients of this fact and they recognize that for any non-disabled patient worker they may be required to pay the patient a wage comparable to that in the private sector. At this time, however, the Ranch does not anticipate treating patients who are not already suffering from a considerable disability.

I hope this letter answers some of your concerns. I hope to be able to work with you and other representatives of the Department in order to ensure that you clearly understand what the Ranch intends to do through the work therapy program, and what is hoped to be accomplished by CSHB 182.

Please call me if you have any questions.

Sincerely,

REESE, RICE AND VOLLAND, P.C.

Committee on Resources

May 11, 1983

Memo

To: Senate Resources Committee Members

From: Senate Resources Committee Staff

Subject: Hearing on SB 79, "Right to Know" legislation concerning hazardous and toxic substances in the workplace, May 11, 3:00pm , Beltz Room

Following hearings on the bill in Juneau and Fairbanks the Chairman asked staff to meet with concerned interest groups to try to work out problems which were widely acknowledged in the bill as originally drafted. Among these problems identified included:

---coverage of as many as 40,000 substances to be dealt with by employers.

---inclusion of "household" type substances salt, sand, bug spray and others.

---coverage of transportation industry where many break-in-transit handlings but no substance use were involved.

---Requirement of labeling of substance containers, piping systems.

---Reporting requirements to the State Department of Labor potentially involving extensive paperwork for employers and the state.

---Possible duplication and conflicts with federal OSHA regulations to be promulgated in the near future.

However, most agreed that the basic intent of the legislation to communicate the identity, health hazards and proper handling methods for hazardous and toxic substances to employees by employers was desireable.

Beginning in April a staff redraft of the bill was circulated to an ad hoc group of concerned individuals and interest groups. Following comments on this draft a meeting was held in Juneau May 2 and 3 with representatives from the following groups to try to arrive at consensus legislation:

Committee staff, Sen. Josephson's office, Alaska Environmental Lobby, Alaska Employer's Committee, Alaska General Contractors, Sohio, Arco, Alaska Health Project, Alaska District Council of Laborers, Alaska Department of Labor, Alaska Trucking Association.

The group proceeded under the following assumptions and objectives:

---that it was desireable to pu[illegible] legislation this session.

---that federal OSHA regulations would probably be published around July 1 of this year.

---that while federal OSHA regulations would cover several aspects of this legislation most employers in Alaska would not be covered.

---that it was desireable and possible to cover most Alaskan employers in a manner which would not duplicate or conflict with federal OSHA regulations.

---that any legislation pursued this session should represent a basic, simplified employer-to-employee communication system involving a minimum of paperwork or expense.

Provisions of the CS

The group agreed to a draft CS containing the following general provisions:

---The CS tracks the proposed OSHA regulations for the substances covered. Two basic lists of chemicals for which study and exposure limits have been set would be covered plus additional substances which would be covered by OSHA regulation following performance-based testing. The combined lists (large overlap) would cover approximately 600-700 chemical substances to be considered "hazardous" or "toxic" under the bill.

---Employers would be required to post a notice of hazardous and toxic substances in their workplaces with information on health hazards, handling procedures, and other information. Employers would also be required to provide safety training on these substances to new employees and reassignment of employees for substances they would be exposed to.

---The information required to be supplied by employers would be in the same form as required under OSHA regulation. This information would not have to be produced by employers but would come from manufacturers as required by the OSHA regs, would be required on all substances imported into Alaska (to cover middleman wholesalers not covered by federal regs), and would be on file with the state Department of Labor. In fact, information on most, if not all, the substances covered by the bill is currently available.

---No labeling or reporting requirements are included in the CS. Labeling will be required of all manufacturers under OSHA regulations and the reporting requirements were determined not to be critical to the basic communication to employees of substance information.

---Substances while in transit are exempt from the provisions of the bill. Current federal transportation of hazardous substances regulations were determined to be sufficient.

---Household items such as food, drugs, goods used for personal use are exempted as are substances in small quantities not representing a health hazard. Thus, no substances like salt or bug spray off the shelf are included. However, some items like sand (silicates) are on the list when used in concentrations (like sandblasting) which have been shown to represent real health hazards, but not for most common situations.

---Although the technical assistance activities and pre-implementation tasks of the Department of Labor would take effect immediately, employers would not be required to comply before July 1, 1984, to ensure that information is available

Senate Resources Committee
May 11, 1983

DRAFT LETTER OF INTENT, SB 79

The purpose of this legislation is to inform employees of the identity of and the health hazards and proper handling procedures for hazardous and toxic substances in their workplace through a communication and safety education program adopted by employers. While this legislation is designed to cover most employers in the state utilizing substances defined in the bill, it is not the intent to require employers to be responsible for the generation or creation of the information required to be posted or communicated to employees. Rather, the bill is designed under the assumption that federal regulations will be promulgated in the near future by the Occupational Safety and Health Administration (OSHA) which will require manufacturers to develop and distribute information for all the substances covered by the bill. The provision requiring that such information accompany substances imported into the state and the provision requiring the State Department of Labor to keep information on file for all substances covered by the bill are designed to aid employers in readily obtaining the required information.

It is the intent of the Committee that the Department of Labor play an active role in informing employers of the requirements of this bill and aiding them in meeting the requirements. Among the tasks required of and intended that the Department undertake are: the development of a poster outlining the provisions and employee rights under the bill and the printing of sufficient copies for all applicable employers; the compilation of all relevant information on the various substances covered by the bill and formulation of an information retrieval system capable of answering telephone inquiries by employers and employees on various substances and products; the compilation and printing of a list of the various substances identified in the bill as hazardous and toxic for use by employers; the provision of assistance to employers upon request in developing safety education programs; and the surveying of various employers or industries to identify the types of substances used and problems being encountered. In this last task it is intended that such surveys be made in cooperation with business and industry groups or associations.

It is the intent of the Committee that the Department complete the specific tasks identified in section 1 of the bill at least several months in advance of the July 1, 1984 effective date for section 2 of the bill requiring posting and training by employers.

The bill authorizes the Department to identify substances to be covered by the bill. It is the intent of the Committee that this authority be used only on a case-by-case basis pursuant to the Administrative Procedure Act to cover a very few substances which might be of specific concern in the state but for some reason, such as bureaucratic delay, have not yet been identified on the federal level pursuant to OSHA regulation. It is not the intent of the Committee to direct the Department to engage in a major identification, testing or research program which would result in large numbers of additional substances or additional lists of substances beyond those identified in the bill.

Sec. 18.60.072. REPORTS TO BE FILED WITH DEPARTMENT. (a) A manufacturer or wholesaler who is subject to the requirements of AS 18.60.051 and 18.60.052, respectively, shall file with the department a report that includes

(1) the information required to be provided to purchasers under AS 18.-60.051 or 18.60.052 for each hazardous or toxic substance specified by the department under (d) of this section;

(2) the quantities of hazardous or toxic substances being handled stored, used or produced; and

(3) other information considered appropriate by the department.

(b) An employer who is subject to the requirements of AS 18.60.071 shall file with the department a report that includes

(1) the chemical names and the CAS numbers of hazardous or toxic substances used in the workplace; and

(2) the safety procedures and equipment actually used in the work-place; and

(3) the information required under (a)(2) and (3) of this section.

(c) A manufacturer, wholesaler, or employer shall promptly report to the department any substantive changes in the information to be provided under (a) or (b) of this section.

(d) The department shall adopt regulations specifying the hazardous or toxic substances to be reported under this section.

Clarifying amendments for consideration.

*Section 1

(12) adopt regulations listing "hasardous substance" (AS 18.60.105(11) and "toxic substance" (AS 18.60.105(12) and excluding from that list

*Sec. 3 page 4 - 18.60.072 (c)

(c) The department shall adopt regulations specifying the specific hazardous or toxic substances to be reported on a substance by substance basis under this section.

*Sec. 3 page 6 - 18.60.105

(11) "hazardous substance" means a chemical that is

(A) listed in the United States Department of Transportation Hazardous Materials Table, 49 C.F.R. 172.101; or

(B) any of the following: ...

(vi) an oxidizer; and

(C) is specifically listed in regualtion adopted by the department under AS 18.60.030(12);

(12) "toxic substance" means a chemical which, upon exposure, may result in the occurance of acute or chronic health effects in employees and is listed in regulation adopted by the department under AS 18.60.030(12);

4/12/83

POSITION PAPER/TESTIMONY/ALASKA EMPLOYERS' COMMITTEE

Bill No.: House Bill 197

Title: "An Act relating to hazardous and toxic substances and providing for an effective date."

Contact: Bill Schneider
276-5354

T. J. Thrasher
276-1149

My name is Bill Schneider and with me today is T. J. Thrasher. We presently serve as Co-Chairmen of the Alaska Employers' Committee (AEC). The Alaska Employers' Committee represents over 5,000 employers, including:

Associated General Contractors, Alaska Trucking Association, Alaska Retail Association, Alaska Seafood Processors, Alaska Loggers Association, Alaska Miners Association, Alaska Support Industry Alliance, Anchorage Laundry and Dry Cleaners Association, Resource Development Council, SOHIO and many individual Alaskan employers.

AEC has directed Ms. Thrasher and myself to be here today and present our Committee views on HB 197. We fully support the goal of this bill, that is, a safe and healthful Alaska workplace.

Unfortunately, this Bill creates many costly hurdles and pitfalls on the path towards worker safety.

More importantly, however, there is a key ingredient missing from this Bill - - common sense.

As someone who has spent over 12 years in the safety profession, I can tell you that the most important tool available in the prevention of accidents, on or off the job, is common sense. Allow me to briefly illustrate the absence of common sense from HB 197.

Most of the goods utilized in Alaska are shipped up from manufacturers in the Lower 48. Several thousand tons of different materials arrive annually by ship, plane and truck.

Under HB 197, over 40,000 of these substances will potentially be classified as toxic or hazardous.

Detailed scientific information must be provided on each of these substances: CAS numbers, chemical names, potential risks, etc.

Our Committee agrees that this information should be provided by the manufacturers as they are the experts on the substances they produce.

But, as we stated before, the manufacturers of almost all of the goods utilized in this state are not here but, rather they are located outside of Alaska and are consequently are not covered by this Bill.

There is an alternative course to follow on this path towards workplace safety. It makes sense and I encourage the Committee to give it serious consideration.

The Federal hazard communication regulations covering toxic and hazardous substances will go into effect this summer, according to Thorne Auchter, Undersecretary of Labor for OSHA.

These regulations will apply to all states and will require manufacturers to provide toxic information on their products.

According to the March 24, 1983 Bureau of National Affairs, Regulatory and Legal Developments, Newsletter the final draft of the federal regulations not only cover the manufacturers but, also the distributors of chemicals.

> "All aspects of the supply chain" must be covered to make the rule effective, the agency (OSHA) said in defense of the new scope, which would apply the same duties to importers as it would to chemical manufacturers, and would require distributors to ship labeled containers and "provide downstream purchasers with access to an appropriate material safety data sheet."

Under HB 197, the Alaska employers would shoulder the burden of providing this information. And in most instances, the employer, lacking the expertise and

staff, would have to go back to the manufacturer to acquire this information. In other words, a costly, duplicative route could easily be avoided by adopting the federal regulations into our State codes.

With this in mind the Alaska Employer's Committee urges you to closely scrutinize the proposed federal regulations and if you believe that adjustments are necessary they can be dealt with after the federal regulations have been adopted. The Alaska Employer's Committee stands ready to assist the Committee in any manner appropriate.

Thank you for your time and I am available for any questions that the Committee might have.

ENVIRONMENTAL LOBBYIST

We strongly support HB 197, an act relating to hazardous and toxic substances in the workplace. Passage of HB 197 is an important first step in managing hazardous materials and protecting workers in Alaska. We urge House L & Commerce to take action on this important subject.

I have some specific comments pertaining to yesterdays testimony as well as some general comments on the Bill.

1. Amendments for consideration: Sec 3 page 4 18.60.072(c). I see a problem with this amendment because the situation could arise where we would have a RTK Bill regulating no substances at all. There must be some assurance that the adoption of the NIOSH, DOT , and ICRA lists of hazardous materials be performed without having to go through all the chemicals on those lists. We would, of cousre exclude those substances excluded under section 1 of HB 197. In addition, there should be some time limit put on the department to adopt the regulations.

2. With regard to Mr. Ames' comments on industry already providing enough health and safety information to workers. I congratulate the pulp industry for their work to protect their employees. Many other industries are also making great strides in this area primarily motivated by profit or humanitarian reasons. Many industries have argued that providing health and safety information to workers has saved them money in workmans compensation costs, and reduced the number absentee workers. This reduces the amount of on the job retraining and rehiring, againing saving time and money. What Mr. Ames failed to say was that HB 197 is designed for industries who do not provid workers with information about the toxic materials in the workplace. ~~Indusries~~ providing this information already would ~~not be burdened by this legislation.~~ There are 84 printdhops and 2 newspapers in Anchorage which all require chemistry to function. The solvents and fixatives used by the workers are ~~not labeled properly~~ only labeled with the statement Do Not Dispose of In Municipal Sewer Systems. If the ~~manufacturer says~~ the materials present problems to sewer systems what do they do to workers?

3. With regard to Mr. Schneiders comments : I think that the Alaska emplyees Ass. needs a work session to discuss this Bill.

His arguement that the fact that manufacturers are outside of the state of Alaska would have some bearing on ~~HB 197 is irrelevant.~~ on the employers ability to obtain MSDS information is irrelevant. The only relevance to his comment is that yes indeed the manufacturers have MSDS.

He further argued that the employer would have to provide MSDS sheet information and implied that the employer would have to perform the research and analysis on the materials they use. No where in HB 197 does it require employers to analyze the chemicals they use. As Mr. Schneider stated manufacturers already compile this information. All the legislation requires is that the employer provide the information that is., obtain MSDS . This proceedure is relatively easy to do, by simply writing or calling the manaufacturer. General Electric will gladly send all their MSDS forms to anyone who requests such information. The NY Dept of Health will also do this a no cost. Our Poison Control Centers located through out the State of Alaska already have much of this information compiled and ready to send out to anyone who requests the information.

4. Both Mr. Schneider and Mr. Ames testified that HB 197 would require to much paper work. The only paper work as I see it is writing a simple form letter requesting MSDS , ~~xeroxing~~ zeroxing it a few times, and sending it to those parties who have MSDS. Once the employer obtains the information , the only other requirement would be to zerox the MSDS sheets again, and post them in a conspicous area in the workplace. One MSDS sheet with all the information about the chemicals is probably a whole lot more cost effective than the many pamphlets Mr, Ames hands out to pulp workers, and it might even reduce the amount of paper he finds in the parking lots.

5. Regarding the New OSHA regulations: I too agree that these regulations should be looked at very carefully. I have had a chance to review munch of the new legislation, and still these regulations are targeted at the manufactureing workplaces disregarding the millions of workers employed in agriculture, construction, transportation, and other service and non-manaufacturing occupations. Read QUOte:

And still the New osha standards are weak in the area of MSDS, the language allows for voluntary compliance on the part of both the manufacturer and the worker employer to obtain these safety sheets. Read quote

Furthermore, decision-makers in Alaska have been stressing the need for reducing federal control over Alaskan activities. ~~Why do we~~ We can have our own RTK law which is better than OSHA and more easily managed. It seems strange that industry is now supporting the Federal RTK legislation when they lobbied heavily against it in the past. As many of us know there was once a Federal RTK law under Ula Bingham and the Carter Administration. Yet this law was one of the first to go under the new Administration . How can we be assurdéd that the FED RTK law will be put into effect? And how can we be certain that future administrations retain it?

6. The HB 197 will should have some requirements for labeling of substances in the woekplace . A color code could be used , or maybe just the most widely used chemicals should be labeled to protect workers

For the past two years, I have been involved professionally with the issue of hazardous and toxic substances. I am presently a member of the State of Alaska Hazardous Waste Advisory Work Group and am Chairman of the Sub-committee on Hazardous Waste to the Environmental Health Advisory Committee of the Anchorage Municipal Health Commission. It has become painfully clear to me that Alaskan work areas are without the proper safety equipment and information to protect workers from exposures to hazardous and toxic substances.

The use of hazardous materials is central to our daily lives if not our existence. Not a day goes by when one does not use a hazardous material or come into contact with items that have been manufactured with one or more of these dangerous substances. Use of hazardous materials can cause severe injury through misuse, lack of proper safety training, and inadequate personal protective equipment. Each year approximately 3000 new chemicals are introduced into the workplace, many of which are used in Alaska.

In examining the current situation of the handling of hazardous and toxic materials in Alaska, several questions emerge. For example, chemicals such as chromic acid, sulphuric acid, and hydrogen peroxide are used in Alaska. Their liquids and vapors are corrosive to human tissue.. What personal protective equipment and safety measures should be taken when using these substances?

Toxic materials, such as 2,4-D, amitrole, bromacil, and picloram are herbicides used by the Alaska Railroad, Matanuska and Chugach Electric, the Military, and even homeowners. The misuse of these substances can cause physiological and biological damage. What is the safe exposure level for workers applying these and other dangerous materials?

Acetone, trichloroethylene, perchloroethane and other solvents and degreasers are utilized by industrial and service facilities such as print shops, dry cleaners, and paint manufacturers that are a necessity to all communities. These substances are highly flammable. What method of fire suppression should be used if one or more of these substances ignites in the workplace?

Answers to these questions would be provided by ~~SB 79~~ HB197 and should be made available to all Alaskan workers. ~~This information should be posted in the workplace, and made known to prospective employees before they are hired.~~ [illegible] not

~~and other service occupations.~~

As Alaska grows and develops its Coal, NG, Asbestos, Timber, Gold, Zinc, Oil Shale, and other resources, I can only wonder how many more hazardous materials will be brought into the state. Perhaps, if the economy is advantageous, we will develop of large scale petrochemical industry and manufacture our own chemicals. I do not have to repeat the well-documented hazards associated with such an industry.

In Alaska, we have the unique challenge and opportunity to avoid the mistakes with which other communities have encountered themselves in the area of hazardous and toxic materials. While most of the nine states which have just recently adopted their own right-to-know laws have done so out of a reaction to increased cancers and deaths in the workplace, Alaska, relatively speaking, does not have these problems yet, and has the chance to grow and prosper and still provide safe work environments.

The challenge, as I see it, is whether we all can admit that ignorance is no longer an adequate excuse for unhealthy workplaces. We all know of the hazards associated with working with hazardous materials. In knowledge lies the power to make the right decisions. In short, we can no longer drive automobiles, paint houses, manufacture clothing, build roads and dams, and grow crops with out using dangerous substances. So long as we continue to use hazardous materials, we must all vigorously insist that workplaces are safe and that the health of the worker is protected.

Mr. Chairman/ We urge House Labor & Commerce to take action on this important subject.

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE
TITLE: "An Act relating to hazardous and toxic substances."
AGENCY AFFECTED: Department of Labor

Under this bill the Department of Labor will be responsible for collecting and disseminating information regarding hazardous chemicals and/or substances at work or storage sites in Alaska.

An Industrial Hygienist position in Anchorage will be required to review and respond to requests about the effects of hazardous chemicals or substances, recommend remedical action if required, and communicate this information to the requestor. In addition, one clerical position will be required to provide support for the hygienist.

In addition to the Personal Services costs associated with the Industrial Hygienist and the clerical position, there will be a need to increase the Department's current contract for laboratory services ($5,000), as well as it's management services and rent allocation ($7,479 and $6,800 respectively). All other costs in Contractual Services are normal operating costs. Additionally, the Industrial Hygienist position will require various scientific measuring and sampling equipment ($7,600), as well as basic office equipment. The Travel budget for FY 1984 includes $7,500 for recruiting and relocation expenses for the hygienist position and $5,000 needed for extensive in-state travel to visit Alaskan work sites.

Assumptions:

1) The Department will collect and disseminate information regarding hazardous chemicals and/or substances to the general public, and as a result will also be making increased work-site inspections.

2) Inflation rate of 6 percent per annum.

3) The equipment costs of $12,700 and $7,500 for travel and moving expenses are one-time items.

4) Effective date of July 1, 1983.

FOR B&M USE ONLY
4A KEY NUMBER __ __ - __ __ - __ __ - __ __ - __ __

JUSTIFICATION

The hygienist will ascertain the effects a chemical/substance will produce, recommend remedical action if required and communicate this information to requestor in understandable terminology. As the populace becomes better informed, there will undoubtably be more requests for this agency to visit work/storage sites to monitor them for potentially hazardous conditions.

Personal services calculations are based on the salary schedule that is currently awaiting approval for FY '84.

Travel funds include $7,500 in relocation and recruiting expense and $5,000 for in-state travel because this position is located in Anchorage and significant routine travel expense is anticipated.

Contractual services costs consist of telephone charges, equipment rent, management services support, space rent, and increased laboratory service charges.

The equipment costs are comprised of various scientific equipment ($7,700), office equipment ($1,500), and protective equipment ($1,000).

Juneau, Alaska 99811

Re: HB 197

Reff: Your letter dated 3/9/83

Dear Mr. Furnace:

A sincere thankyou for your objective reply. I am chagrined over my failure to note 18.60.072(c) which would require that hearings be held prior to inclusion of specific substances. While it still would allow for "bureaucratic" abuse it never the less is a reasonable control that unfortunately is absent from SB 79.

After rereading HB 197, SB 79 and your letter I would concede that your bill is not particularly unreasonable. SB 79 is definitely unreasonable.

I am however still concerned as to the effective implementation of your bill as it would regulate manufacturers located in other States and with the potential for conflicting regulations from other States and given the small size of our market, We as end users might not be able to comply. If I may quote the Federal Register[Vol. 47, No.54, 3/19/82, proposed rules, page 12095]:

> "The potential for conflicting or cumulatively burdensome state and local laws has been acknowledged by a number of industry representatives, particularly those involved in chemical manufacturing. Since most manufactures transport their products across state lines, the proliferation of state and local standards may create a burden on intersate commerce. Furthermore, the differences among these standards result in varying levels of of protection for employees exposed to the same hazards. A single, comprehensive Federal Standard for hazard communication would eliminate this conflict, decrease the cumulative burden of compliance, and ensure basic protection for all employees."

Walt Furnace

Walt, I am also concerned that you might be misinformed somewhat on the Federal Regulations as you state we would not receive any information regarding hazardous substances under the Federal Regulations. If I may quote from the Federal Register [same numbers as before but page 12101 (Department of Labor, 29 CFR Part 19100)] again:

> "Scope of application. The proposed standard applies to employers who have facilities classified in the manufacturing SIC codes 20 through 39, Division D, in the most recent edition of the Standard Industrial Classification Manual; Executive Office of the President-Office of Management and Budget. Employers within these codes who produce chemicals are required to assess their hazards, and TRANSMIT THE INFORMATION to their own employees and TO PURCHASERS OF THEIR PRODUCTS. ALL COVERED EMPLOYERS BOTH MANUFACTURES AND USERS OF CHEMICALS ALIKE, MUST ESTABLISH HAZARD COMMUNICATION PROGRAMS FOR THEIR EMPLOYEES."

From the same page:

> "Although non-manufacturing employers are not covered by the proposal, it is expected that their employees will also benefit from it to a great extent sinces EMPLOYEES IN THE MANUFACTURING SECTORS WILL BE REQUIRED TO SEND THE HAZARD-RELATED INFORMATION DOWNSTREAM TO THEIR CUSTOMERS."

I have included a copy of a letter from the U.S. Deaprtment of Labor to AGC which indicates that they intend to publish the Final Rule about July 1, 1983 (about time also, I would agree).

Again, I thank you for taking some of your valuable time to review my comments.

Sincerely,

Tim R Crawford,
General Manager

Reply to the Attention of:

3/4/83 Received

March 1, 1983

Ms. Rena King
Association of General Contractors
134 N. Franklin
Juneau, Alaska 99801

Dear Ms. King:

In response to your current inquiries to my staff about the proposed Federal Hazard Communication Standard; Final Rule, 29 CFR 1910.1200, we have contacted the National Office, OSHA, for guidance. The Final Rule is expected to be published about July 1, 1983, provided there are no unexpected delays or court challenges. None are expected at this time.

The Hazard Communication Standard will require chemical manufacturers and importers to assess the hazards of the chemicals which they produce or import and make this information known. All employers in manufacturing (SIC 20-29) will be required to provide information to their employees about the hazardous chemicals. Distributors will be required to properly label containers of the hazardous chemicals.

The standard is under final review in the National Office. Major changes in text are not expected.

We are pleased to be of assistance.

Sincerely,

John A. Franchi
Assistant Regional Administrator
Office of Technical Support

THE ALLIANCE
P.O. Box 100 / Anchorage, Alaska 99510 / (907) 277-0010

March 15, 1983

Representative Walt Furnace
State Capitol
Pouch V
Juneau, AK 99811

Dear Representative Furnace:

The Alaska Support Industry Alliance offers the following observations on Senate Bill 79, commonly referred to as "right to know" or "toxic and hazardous substances in the workplace" legislation.

- The safety of our employees is a paramount issue with our members.
- Safety standards and procedures are desirable and are good business practices.
- The intent of the bill is laudable.
- The bill is flawed.
- The bill would essentially replicate standards which are to become effective on July 1, 1983, as promulgated by the U.S. Department of Labor, Division of Occupational Safety and Health, entitled "The Federal Hazard Communication Standard."

Members of the Alaska Support Industry Alliance believe that our employees should receive and use systems, procedures and equipment which maximize safety in the workplace and minimize potential risks to life, limb and health. Many of our members instituted such systems and procedures long ago and, more recently, many more have invested substantially in employee safety and health measures. Needless to say, issues attendant to toxic or hazardous substances have been carefully reviewed by industry. Moreover, federal regulations proposed last year will establish national standards requiring chemical manufacturers and importers to assess the hazards of the chemicals which they produce or import and to make such information known to those who might come in contact with such materials. All manufacturers will be required to inform their employees about hazardous chemicals. In addition, distributors will be required to label containers of the materials. We believe that after a full year of review and comment by industry and employee organizations, federal standards will effectively achieve the safety and health objectives which are envisioned within the scope of SB 79.

Should SB 79 be enacted, we would find two levels of government having laws, regulations, procedures and requirements governing hazardous and toxic substances aimed at industry, resulting in duplication, confusion and high costs for both government and industry. The bureaucracy needed by the state to administer the program of the proposed legislation would be very costly to Alaska. If, in the future, these national standards fail to provide significant protection for employees, adjustments can be made to assure such protection. We believe, therefore, that SB 79 should be tabled at this time.

We respectfully submit that enactment of SB 79 at this time is premature and that the bill simply adds confusion to an already complicated condition.

Very cordially yours,

For THE ALASKA SUPPORT INDUSTRY ALLIANCE

FAIRBANKS SOCIETY OF PROFESSIONAL LAND SURVEYORS

P.O. Box 2522
Fairbanks, Alaska 99701

March 24, 1983

Rep. Niilo Koponen
Pouch V
Juneau, AK 99811

MAR 24 1983

Dear Rep. Koponen:

The Fairbanks Chapter of the Alaska Society of Professional Land Surveyors wants to express strong support for HB 211 in its original form. We also wish to express our strong objection and dismay at the Committee Substitute for HB 211 which eliminates Land Surveyors from this bill.

As a profession, we are classified under AS 48 in the same category as Architects and Enginners. We are registered by the same Board of Occupational Licensing and licenced by State of Alaska. Our Professional Certificates are signed by the "Board of Architects, Engineers, and Land Surveyors." Each Professional Land Surveyor receives a Professional License which must renewed annually by the the State of Alaska.

When a Registered Land Surveyor (RLS) signes and places his professional seal on a survey plat, his reputation and that of the entire profession are being offered as surety that the plat is correct and the land survey legal and complete. When a member of the profession is found guilty of unprofessional work, his license and professional status can be stripped by the State Board of Architects, Engineers, and Land Surveyors.

This attempt by the Committee Substitute to remove Professional Land Surveyors from the bill has the effect of removing one-third of the category which the bill addresses. We strongly urge you and others of the Fairbanks delegation, and members of the appropriate legislative committees, to re-instate Land Surveyors as a part of HB 211. It is a good bill, but the Committee Substitute must be rescinded.

Sincerely yours,

Patrick H Kalen, RLS

Patrick H. Kalen, President
Fairbanks Chapter, ASPLS

STUTZMANN ENGINEERING ASSOC., INC.
P. O. BOX 1429
FAIRBANKS, ALASKA 99707
907 452-4094

March 23, 1983

MAR 24 1983

John Ringstad
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Sir:

It has just come to my attention that committee revisions to H.B. 211 have the effect of deleting the profession of land surveying from the context of this bill.

As both a professional engineer and a professional land surveyor, I have supported this bill in its original form as introduced February 17, 1983 and strongly urge your support in passing it as such.

The deletion of land surveying and other amendments proposed in committee do a tremendous disservice to the land surveyor's profession, some two thousand strong in this State; also, its exclusion would have a deleterious effect on the quality of land surveys in the future by aiding in the degradation of this highly skilled profession into sub-professional status.

Sub-standard land survey work has already been a major problem in land title work in our State, one of the newest in the Union, and any regulation of land surveying out of professional status can only contribute to more disastrous results.

H.B. 211, as introduced, is a fine and much needed piece of legislation which brings State government procurement practices in line with professional standards in use in other States and by the Federal government.

Again, I urge you to support this bill in <u>original</u> form and resist any modifications thereto.

Very truly yours,

STUTZMANN ENGINEERING ASSOC., INC.

Paul E. Stutzmann

Paul E. Stutzmann

*Section 1. AS 36.98 is amended by adding a new section to read:

Sec. 36.98.041 ARCHITECTS AND ENGINEERS.

(a) It is the policy of the state to publicly announce all requirements for architectural and engineering services, and to negotiate contracts for architectural and engineering services only on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices notwithstanding the provisions of AS 36.98.040.

(b) This section chapter applies to contracts for architectural and engineering services provided to a state agency unless

FEE

(1) the total amount of the ~~contract~~ does not exceed $25,000;

PROHIBITS ALL FEES

[[[(2) the contract is an employment contract for services to be performed under direct supervision regardless of the existence of an employer-employee relationship and a written justification signed by the person responsible for awarding the contract is filed with the commissioner.]]]

(c) When a state agency proposes to enter into a contract for architectural and engineering services, the agency shall give public

notice soliciting a request for qualifications for the professional services contract by publication at least three times in one or more newspapers in general circulation in the state and, when appropriate, in a newspaper in local circulation where the work is to be performed. The first notice shall be published not less than 30 days before the date on which the agency expects to enter into the contract and each subsequent notice shall be published at intervals of no more than three days thereafter. The notice shall include

(1) a general description of the proposed project for which the agency is seeking professional services; and

(2) the procedure by which a person or firm interested in the professional services contract may submit its response to the agency for consideration for the contract.

(d) In addition to complying with the publication requirements of (c) of this section, when a state agency proposes to enter into a contract for architectural and engineering services it shall

(1) review the register of professional services contractors maintained by the commissioner under AS 36.98.020; and

(2) provide a notice of a request for qualifications for the proposed professional services contract to each prospective contractor who, after review of the register of professional services contractors under (1) of this subsection, the agency finds is qualified for consideration for the contract.

(e) Requests for qualification from at least six persons or firms with the required expertise shall be solicited for contracts equal to or greater than $100,000. Requests for qualification from at least three persons or firms with the required expertise shall be solicited for contracts of less than $100,000 if the expertise required is available. If the expertise required is not available to enable an agency to solicit the number of requests for qualification otherwise required under this subsection, the agency shall solicit requests for qualification

(1) from each person or firm listed on the professional services contractors register maintained under AS 36.98.020 who appears to possess the required expertise;

(2) from each person or firm responding to the public notice given under (a) of this section who appears to possess the required expertise.

(f) The provisions of this section do not apply if

(1) the contracting agency demonstrates that there is a single source of the expertise or knowledge required or that one person or firm can clearly perform the required tasks more satisfactorily because of the person's or firm's prior work; however, this exemption applies only if the head of the state agency has submitted a written request to the commissioner that details the reasons for the exemption and the commissioner or deputy commissioner has authorized in writing the state agency to enter contract negotiations with the single source;

(2) the commissioner makes a written determination that public necessity will not permit delay incident to the procedures otherwise required by this chapter; or

(3) the service is to be provided by another state agency, a federal agency, or a political subdivision of the state.

(g) The agency must provide a description of the work to be performed under the contract and the agency shall conduct discussions regarding anticipated concepts and the relative utility of alternative methods of approach for furnishing the required services. The state agency must provide a description of the factors that will be considered when it evaluates the request for qualifications received.

(h) After the responses are submitted, the state agency shall publically evaluate them. The evaluation shall consist of assigning point values to factors considered by the agency in evaluating each proposal. Points shall be awarded for being a qualified Alaska firm..

(i) The state shall negotiate a contract with the highest qualified firm for architectural and engineering services at compensation which the state determines is fair and reasonable to the state. In making such determination, the state shall take into account the estimated value of the services to be rendered, the scope, complexity, and professional nature of the services. Should the state be unable to negotiate a satisfactory contract with the firm considered to be the most qualified, the state shall undertake negotiations with

the second most qualified firm. Failing accord with the second most qualified firm, the state shall enter negotiations with other contractors, in order of ranking until an agreement is reached. The state may reject all or part of a proposal.

(j) This section does not apply to contracts awarded in an emergency if the person responsible for execution of the contract on behalf of the state certifies in writing that an emergency exists.

(k) In this section "state" includes political subdivisions of the state and agencies of the state and its political subdivisions.

(l) In this section "architectural and engineering services" includes those professional services of an architectural or engineering nature as well as incidental services that members of these professions and those in their employ may logically or justifiably perform.

CONSULTING ENGINEERS
COUNCIL OF ALASKA

2550 Denali Street, 8th Floor
Anchorage, Alaska 99503
907/278-2551

March 16, 1983

Mr. Walt Furnace
Chairman
Labor & Commerce Committee
House of Representatives
State of Alaska
Pouch V
Juneau, AK 99811

Subject: House Bill 211

Mr. Chairman:

I am addressing my comments to you on HB 211 as president of the Consulting Engineers Council of Alaska, representing 32 member firms and approximately 500 employees statewide. Our group is the principal sponsoring body for House Bill 211, referred to by many as the Mini Brooks Bill, along with the support of the state American Institute of Architects, and other professionals. House Bill 211, as introduced, is an act relating to a method of selecting and awarding contracts for Architectural, Engineering and Land Surveying services (i.e., land surveying services related to the design process). The bill was structured utilizing the general procedures outlined in the A.B.A. (American Bar Association) Model Procurement Code.

At this time twenty-one states have adopted laws calling for the selection of Architect/Engineers based on qualifications, and another twenty either prohibit or exempt architect engineers from general bidding requirements. The remaining states, with the exception of Maryland, leave the selection procedure up to methods developed by the various agencies within the state, the predominance of which make selection by qualifications. One state, Maryland, has adopted bidding, which makes price a basis for selection. That procedure has not proved to be overwhelmingly satisfactory. (See article written by R. Charles Avara, Maryland House of Delegates). In Maryland the process actually has proven to result in higher project costs by as much as 30%, with consistent project delays being notable.

Architectual and engineering services should only be obtained through a selection process that ascertains the qualifications and capabilities of interested A/E's to design public works

projects. Fair and reasonable fees should be established by negotiation after selection and discussion of scope of work. It is not in the best interest of the public and in some cases public safety, to obtain these services by price proposals or competitive bidding.

The procurement of professional services providied by members of the learned professions has traditionally been considered apart from technicians and other trades people who are often loosely grouped for other purposes. A learned profession is one requiring specialized knowledge and long academic preparation prior to employment in the particular professional field. To practice as an individual, one must be licensed through written examination reviewed by peers (Board of Registration) and must have a minimum background of experience under the direction of qualified practitioners. Consequently, members of these professions exercise judgements and make decisions only after thorough assessment, analysis, calculation, research and investigation of the problem. Architects and Engineers are learned professionals whose role is that of the problem solver for public works projects.

The public is the loser when price competition becomes the determinant in the selection process. The quality and quantity of services required to satisfy functional needs of a project or agency cannot be precisely defined. A contracting authority, purchasing agent, or even an individual owner cannot, without prior discussions of the intended scope of work with an experienced architect or engineer, establish in detail the effort that the professional must expend to achieve the required results. Competitive bidding for professional services does not provide consumer safeguards. Rather it encourages poor use of public funds, since the importance of "value received" is subjugated to "money spent". For your reference, attached (to the documents from which I am speaking that have been placed in your hands), are copies of the ABA Model Procurement Code, the Federal selection law known as the Brooks Act, and a copy of an article written for American City & County Magazine by R. Charles Avara who represented Baltimore City in the Maryland General Assembly, and other material.

I would like to share with you a few points made by Mr. Avara in his article as they represent a parallel view of the problems of professional selection and highlight the many considerations of why selection of architects and engineers by qualifications is the only rational method to appropriately serve the public interest.

> "What the public agency client is buying are the design ideas of the engineer and architect - and each design team will give the client a different facility. The difference is measureable against the experience and innovation of the individual competitors; in short, their qualifications."
>
> "Inherant in A/E services and not generally for other types of services, is the extent to which quality can affect the ultimate efficiency, effectiveness and economy of the facility or structure. Consider the cost of the design portion of a project compared to the overall project cost; a report by the U.S. General Accounting Office states that 'design costs represent a very small proportion, probably less than 1% of the costs that will be incurred over the life of a building. Decisions made during the expenditure of this, less-than-one-percent, determine and freeze nearly all costs that follow.'... A/E services are unique and we cannot expect them to conform to bidding specifications which serve so well for the procurement of other goods and most services."

The A/E is expected to be a member of the agency's team, to assess alternatives, to design a facility or structure to satisfy the agency's need at the lowest project cost, oversee the construction in many cases and assist the agency in prosecuting claims that may arise out of the construction project. The relationship is different from the ordinary buyer/seller relationship. In many respects, the A/E acts as the agency agent and in many cases he has a great value in the ability to protect the agency's interests.

In order to fairly assess a competitive bid, public agency officials must be certain that all design professional firms are pricing the same project. In the case of A/E services,

this is difficult, if not impossible to assure. The work scope simply cannot be accurately defined to that extent prior to engagement of an engineering firm.

To quote further from Mr. Avara,

> "It is incumbent upon us (and here he uses the term Public Officials, as that is what he is) to understand and recognize the nature of the services we are seeking in design professionals. Engineering is a learned profession. Whether it is practiced by an individual or a team of individuals, creative talents are applied to solving a problem."

In combination with the agency staff, the A/E group assigned to a project analyzes a myriad of alternatives and addresses the problems of safety, permanence, beauty, maintenance, life-cycle costs, energy-saving features and other factors.

Price is most definitely a factor in the competitive negotiation process. By the time the number one ranked firm reaches the negotiation table with the representative agency, that process has now allowed both the agency and the selected firm an opportunity to collectively define (and refine) the scope of the project requirements being requested by the agency. At the end of this process, the selected firm has examined all these requirements and has been able to identify the effort and the compensation necessary to meet those needs. If, however, the fee suggested by the firm is not in line with the agency's budget, the next step is to evaluate the cause and the significance of the differences. Often the A/E firm will suggest alternatives and approaches which will effectively accomodate the agency's budget estimate. By the same token, it gives the A/E firm an opportunity to discuss with the agency and point out why the agency's best interest is <u>not</u> to reduce the design effort. If however, the agency cannot reach satisfaction with the first-ranked firm, then it has the opportunity to discontinue negotiations with the highest-ranked firm if they believe that the fee proposal is not fair and reasonable. Negotiation can then be undertaken with the second-ranked firm, and then of course the third-ranked firm if that is necessary. These methods provide steps that ultimately will provide a fee that is fair and reasonable for the defined services.

Many of the benefits of A/E services must be measured against final construction, maintenance and operating costs of the facility or structure. Costs that are not clearly determined until after the A/E services have been completed. Injecting price in an initial selection may lower the A/E fee and time spent, but it will also most likely lower the quality of the final product, since price competition can inhibit the ability of the A/E to provide full cost saving services due to inadequate compensation for innovative and thorough work. It may even cause more talented A/E firms not to offer their services, thus lowering the overall quality of the services available to the agency. Thus, stated again, the public is not well served.

We believe the process of competitive selection for Architect/ Engineer firms in the State of Alaska makes even more sense than the same considerations in any of the other 49 states. As you are all aware, our state has more unique and diverse needs than any of the other 49. Alaska has many varied climatological zones and sensitive environmental factors that must be considered during the design of any project. The environmental problems are further complicated by the problems of code and regulation compliance, budget constraints, committee hearings, committee review, agency reviews, maintenance considerations, operational costs, maintenance complexities, and in many of the bush areas--a lack of qualified maintenance personnel. In order for these problems to be met effectively, the only rational method from which to make a selection of an A/E firm is by addressing the qualifications of the responding firms and selecting the highest ranked firm on the basis of those qualifications. Only then, based on the quality and experience of the selected A/E firm, can the project design objective be effectively met and the public resources most effectively protected.

We believe House Bill 211 provides for those measures and protection, insuring that the public need, through the use of competitive selection, will be most successfully met. I urge your positive consideration of House Bill 211.

Respectfully Submitted,

Walter E. Steige, P.E.
C.E.C.A. President

SUBSTITUTE HOUSE BILL NO. 176

State of Washington
47th Legislature
1981 Regular Session

by Committee on State Government (originally sponsored by Representatives Nelson (G), King (R), McGinnis, Greengo, Ehlers, Erickson, Walk, Addison, Hine)

Read first time March 10, 1981, and passed to Rules for second reading.
April 16, 1981: Passed as amended by the Senate.

AN ACT Relating to public contracts; adding a new chapter to Title 39 RCW; and providing an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

NEW SECTION. Section 1. The legislature hereby establishes a state policy, to the extent provided in this chapter, that governmental agencies publicly announce requirements for architectural and engineering services, and negotiate contracts for architectural and engineering services on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices.

NEW SECTION. Sec. 2. Unless the context clearly requires otherwise, the definitions in this section shall apply throughout this chapter.

(1) "State agency" means any department, agency, commission, bureau, office, or any other entity or authority of the state government.

(2) "Local agency" means any city and any town, county, special district, municipal corporation, agency, port district or authority, or political subdivision of any type, or any other entity or authority of local government in corporate form or otherwise.

(3) "Special district" means a local unit of government other than a city, town, or county, authorized by law to perform a single function or a limited number of functions, and including but not limited to, water districts, irrigation districts, fire districts, school districts, community college districts, hospital districts, sewer districts, transportation

CERTIFICATION

I, Vun T. Chierhi, Chief Clerk of the House of Representatives of the State of Washington, do hereby certify that the attached is enrolled Substitute House Bill No. 176 as passed by the House of Representatives and the Senate on the dates hereon set forth.

Vun T. Chierhi Chief Clerk

cts, and metropolitan municipal corporations organized chapter 35.58 RCW.

(4) "Agency" means both state and local agencies and l districts as defined in subsection (1), (2), and (3) of ection.

(5) "Architectural and engineering services" or ssional services" means professional services rendered by rson, other than as an employee of the agency, contracting form activities within the scope of the general definition fessional practice in chapters 18.08, 18.43, or 18.96 RCW.

(6) "Person" means any individual, organization, group, ation, partnership, firm, joint venture, corporation, or mbination thereof.

(7) "Consultant" means any person providing professional es who is not an employee of the agency for which the es are provided.

(8) "Application" means a completed statement of fications together with a request to be considered for the of one or more contracts for professional services.

NEW SECTION. Sec. 3. Each agency shall publish in e that agency's requirement for professional services. nnouncement shall state concisely the general scope and of the project or work for which the services are ed and the address of a representative of the agency who provide further details. An agency may comply with this n by: (1) Publishing an announcement on each occasion professional services provided by a consultant are required e agency; or (2) announcing generally to the public its ted requirements for any category or type of professional ces.

NEW SECTION. Sec. 4. In the procurement of tectural and engineering services, the agency shall rage firms engaged in the lawful practice of their ssion to submit annually a statement of qualifications and rmance data. The agency shall evaluate current statements

of qualifications and performance data on file with the agency, together with those that may be submitted by other firms regarding the proposed project, and shall conduct discussions with one or more firms regarding anticipated concepts and the relative utility of alternative methods of approach for furnishing the required services and then shall select therefrom, based upon criteria established by the agency, the firm deemed to be the most highly qualified to provide the services required for the proposed project. Such agency procedures and guidelines shall include a plan to insure that minority and women-owned firms are afforded the maximum practicable opportunity to compete for and obtain public contracts for services. The level of participation by minority and women-owned firms shall be consistent with their general availability within the professional communities involved.

NEW SECTION. Sec. 5. (1) The agency shall negotiate a contract with the most qualified firm for architectural and engineering services at a price which the agency determines is fair and reasonable to the agency. In making its determination, the agency shall take into account the estimated value of the services to be rendered as well as the scope, complexity, and professional nature thereof.

(2) If the agency is unable to negotiate a satisfactory contract with the firm selected at a price the agency determines to be fair and reasonable, negotiations with that firm shall be formally terminated and the agency shall select other firms in accordance with section 4 of this act and continue in accordance with this section until an agreement is reached or the process is terminated.

NEW SECTION. Sec. 6. (1) This chapter need not be complied with by any agency when the contracting authority makes a finding in accordance with this or any other applicable law that an emergency requires the immediate execution of the work involved.

(2) Nothing in this chapter shall relieve the

contracting authority from complying with applicable law limiting emergency expenditures.

NEW SECTION. Sec. 7. Nothing in this chapter shall affect the validity or effect of any contract in existence on the effective date of this 1981 act.

NEW SECTION. Sec. 8. If any provision of this act or its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected.

NEW SECTION. Sec. 9. This act shall take effect on January 1, 1982.

NEW SECTION. Sec. 10. Sections 1 through 8 of this act shall constitute a new chapter in Title 39 RCW.

Passed the House April 16, 1981.

William L. Belk
Speaker of the House.

Passed the Senate April 14, 1981.

John A. Cherberg
President of the Senate.

AELC
ARCHITECTS & ENGINEERS
LEGISLATIVE COUNCIL
P.O. BOX 12248 • SEATTLE, WA 98112
(206) 324-4444

SB 2303 and HB 1214:
ARCHITECTS & ENGINEERS PROFESSIONAL SERVICES PROCUREMENT

Architectural and Engineering Services should only be obtained through a selection process that ascertains the qualification and capability to design public works projects. Fair and reasonable fees should be established by negotiation after selection and discussion of scope of work. It is not in the best interest of the public to obtain these services by priced proposals or competitive bidding.

THE PROCUREMENT OF PROFESSIONAL SERVICES provided by members of the learned professions has traditionally been considered apart from technicians and tradespeople who are often loosely grouped under professions to define a vocation for the purpose of business taxes or licenses.

A LEARNED PROFESSION is one requiring specialized knowledge and long and intensive academic preparation prior to employment in the particular professional field. To practice as an individual one must be licensed through written examination, reviewed by peers and must have a minimum background of experience under the direction of qualified practitioners. Consequently, members of these professions exercise judgments and make decisions only after thorough assessment, analysis, calculation, research and investigation of the problem. Architects and engineers are learned professionals whose role is that of the problem-solver for public works projects.

THE SELECTION OF PROFESSIONALS HISTORICALLY has been conducted through a process based upon qualifications whether they be Doctors, Lawyers, Architects or Engineers; however, an insidious ingredient entered the procurement of A & E's--kick backs, payoffs, finder's fees and so on. This reached the ultimate when exposure of such activities in the State of Maryland implicated Vice President Agnew. The practice was recognized as widespread along the eastern seaboard, into the large metropolitan areas of the midwest and even surfaced in the City of Seattle with eventual indictment and conviction of its City Engineer in 1978. In a sense it was the "buying-a-job technique." Who cannot but remember, oft-quoted remarks not too many years ago, that any problem with the Government could be resolved by paying the Judge. Several well-meaning public entities, particularly the State of Maryland, have attempted to resolve the problem through competitive bidding. This practice has proved ill-advised because it eliminated

an adequate determination of qualifications and has resulted in project delays of several years. Total project costs increased 25 to 30% or nearly four times the total professional fee. Yes, they did save on the professional fee--but who was the loser?

THE PUBLIC IS THE LOSER WHEN PRICE COMPETITION IS THE DETERMINANT IN A SELECTION PROCESS. For one thing, the quality and quantity of services requred to satisfy functional needs of the project or agency cannot be precisely defined. A contracting authority, a corporation purchasing agent or an individual owner cannot, without prior discussions of the scope of work with an experienced architect or engineer, establish in detail the number of man-months of effort that the professional must expend to achieve the required results. A price submitted prior to having such discussions cannot be an adequate measure of value.

COMPETITIVE BIDDING FOR PROFESSIONAL SERVICES DOES NOT PROVIDE CONSUMER SAFEGUARDS; rather it encourages poor use of public funds since the importance of "value received" is subjugated to "money spent." There is still the problem of specifying the quality and intent of services to be rendered.

Many of the principal U.S. Federal Agencies, the World Bank, various Washington State Departments, major Washington Cities and Counties and other agencies have learned to use the professional negotiation approach. In this method, three or more architectural or engineering firms are ranked on the basis of qualifications that have been reviewed in written form and by oral interviews. Negotiations are commenced with the firm receiving the highest ranking and is consummated when complete understanding of the scope of services is achieved and an equitable fee is agreed upon. Should it become impossible to consummate satisfactory negotiations with the first choice, negotiations would commence with the second choice in the same manner and if that proves unsuccessful, the same process is conducted with #3 and so on. This method was enacted into law for all Federal civilian agency projects under the sponsorship of Rep. Brooks of Texas and is known nationally as the "Brooks Act" for the selection of architects and engineers. Considerable credit for passage through the Senate is accorded to both Senators Magnuson and Jackson. The Department of Defense had adopted and used these same procedures prior to the Brooks Act and continue to do so.

THE LEGISLATION INTRODUCED IN THIS SESSION of our State Legislature as SB 2303 and HB 1214 is patterned to a large extent upon the "Brooks Act" except that more latitude is provided to assist smaller political entities. Announcements of design service needs may be made on an annual basis or for each project, the selection method can vary with each agency as long as:

(1) Selection is based upon qualifications to provide the services, and

(2) Fair and reasonable fees are established through negotiation.

It is through this approach that the opportunity for collusion and misuse of public funds is reduced. The legislation presented contains punitive measures for consultants and public officials, should discovery occur, regarding bribery or contingent fees as a means to obtain the commission.

GREATER OPPORTUNITY FOR SELECTION IS PROVIDED TO THE SMALLER PROFESSIONAL FIRMS AND MINORITY FIRMS since all capital expenditure programs and rules for selection will be published. Qualifications and capability to perform the services will be the only basis of selection.

THE PUBLIC DESERVES THE BEST THAT THE PROFESSIONS HAVE TO OFFER AT FAIR AND REASONABLE FEES. SB 2303 and HB 1214 AFFORDS THE GREATEST ASSURANCE FOR THIS POTENTIAL.

The Model Procurement Code for State and Local Governments

Note: Excepts related to A & E consulting services only.

FEBRUARY 1979

The suggested statutory provisions and Code Commentary contained in this draft were approved by the American Bar Association on February 13, 1979. This material should not be considered as legislative history of any statute or regulation which may become law in any jurisdiction.

 ABA

Part E—Architect-Engineer Services

§5-501 Architect-Engineer Services.

(1) *Applicability.* Architect-engineer services shall be procured as provided in this Section except as authorized by Section 3-204 (Small Purchases), Section 3-205 (Sole Source Procurement), and Section 3-206 (Emergency Procurements).

(2) *Policy.* It is the policy of this [State] to publicly announce all requirements for architectural and engineering services and to negotiate contracts for architectural and engineering services on the basis of demonstrated competence and qualification for the type of services required, and at fair and reasonable prices.

(3) *Architect-Engineer Selection Committee.* In the procurement of architectural and engineering services, the Chief Procurement Officer or the head of a Purchasing Agency shall encourage firms engaged in the lawful practice of their profession to submit annually a statement of qualifications and performance data. [The Chief Procurement Officer or the head of a Purchasing Agency, the Procurement Officer, and [the State Architect]] shall comprise the Architect-Engineer Selection Committee for each architect-engineer services contract over [$_____]. The Selection Committee for architect-engineer services contracts under this amount shall be established in accordance with regulations promulgated by the Policy Office. The Selection Committee shall evaluate current statements of qualifications and performance data on file with the [State], together with those that may be submitted by other firms regarding the proposed contract. The Selection Committee shall conduct discussions with no less than three firms regarding the contract and the relative utility of alternative methods of approach for furnishing the required services, and then shall select therefrom, in order of preference, based upon criteria established and published by the Selection Committee, no less than three of the firms deemed to be the most highly qualified to provide the services required.

(4) *Negotiation.* The Procurement Officer shall negotiate a contract with the highest qualified firm for architectural and engineering services at compensation which the Procurement Officer determines in writing to be fair and reasonable to the [State]. In making this decision, the Procurement Officer shall take into account the estimated value, the scope, the complexity, and the professional nature of the services to be rendered. Should the Procurement Officer be unable to negotiate a satisfactory contract with the firm considered to be the most qualified, at a price the Procurement Officer determines to be fair and reasonable to the [State], negotiations with that firm shall be formally terminated. The Procurement Officer shall then undertake negotiations with the second most qualified firm. Failing accord with the second most qualified firm, the Procurement Officer shall formally terminate negotiations. The Procurement Officer shall then undertake negotiations with the third most qualified firm. Should the Procurement Officer be unable to negotiate a contract at a fair and reasonable price with any of the selected firms, the Procurement Officer shall select additional firms in order of their competence and qualifications, and the Procurement Officer shall continue negotiations in accordance with this Section until an agreement is reached.

COMMENTARY:

(1) This Section applies to procurement of all services within the scope of architecture, professional engineering, or registered land surveying as defined by the laws of the State whether or not construction is involved.

(2) The principal r
the lack of a definitive
portance of selecting
sent the [State's] inter
mally existing in a bi
availability of the thr
negotiated later.

(3) It is considered

(2) The principal reasons supporting this selection procedure for architect-engineer services are the lack of a definitive scope of work for such services at the time the selection is made and the importance of selecting the best qualified firm. In general, the architect-engineer is engaged to represent the [State's] interests and is, therefore, in a different relationship with the [State] from that normally existing in a buyer-seller situation. For these reasons, the qualifications, competence, and availability of the three most qualified architect-engineer firms is considered inititally, and price negotiated later.

(3) It is considered more desirable to make the qualification selection first and then to discuss the price because both parties need to review in detail what is involved in the work (for example, estimates of man-hours, personnel costs, and alternatives that the architect-engineer should consider in depth). Once parameters have been fully discussed and understood and the architect-engineer proposes a fee for the work, the recommended procedure requires the [State] to make its own evaluation and judgment as to the reasonableness of the fee.

(4) If the fee is fair and reasonable, award is made without consideration of proposals and fees of other competing firms. If the fee cannot be negotiated to the satisfaction of the [State], negotiations with other qualified firms are initiated. Thus price clearly is an important factor in the award of the architect-engineer contract under this procedure. The principal difference between the recommended procedure for architect-engineer selection and the procedures used in most other competitive source selections is the point at which price is considered.

(5) If an enacting jurisdiction desires to use a different selection process, then it may consider the following language:

> **"The Procurement Officer shall negotiate with the highest qualified firms for a contract for architectural and engineering services at compensation which the Procurement Officer determines in writing to be fair and reasonable to the [State]. In making such determination, the Procurement Officer shall take into account, in the following order of importance, the professional competence of offerors, the technical merits of offers, and the price for which the services are to be rendered."**

FEDERAL SELECTION LAW
(Brooks Act)

PUBLIC LAW 92-582; 92ND CONGRESS, H. R. 12807; OCTOBER 27, 1972

AN ACT

To amend the Federal Property and Administrative Services Act of 1949 in order to establish Federal policy concerning the selection of firms and individuals to perform architectural, engineering, and related services for the Federal Government.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled That the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.) is amended by adding at the end thereof the following new title:[1]

"TITLE IX—SELECTION OF ARCHITECTS AND ENGINEERS

"*Definitions*

"Sec. 901. As used in this title—

"(1) The term 'firm' means any individual, firm, partnership, corporation, association, or other legal entity permitted by law to practice the professions of architecture or engineering.

"(2) The term 'agency head' means the Secretary, Administrator, or head of a department, agency, or bureau of the Federal Government.

"(3) The term 'architectural and engineering services' includes those professional services of an architectural or engineering nature as well as incidental services that members of these professions and those in their employ may logically or justifiably perform.[2]

"*Policy*

"Sec. 902. The Congress hereby declares it to be the policy of the Federal Government to publicly announce all requirements for architectural and engineering services, and to negotiate contracts for architectural and engineering services on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices.

Announcement

"*Requests for data on architectural and engineering services*

"Sec. 903. In the procurement of architectural and engineering services, the agency head shall encourage firms engaged in the lawful practice of their profession to submit annually a statement of qualifications and performance data. The agency head, for each proposed project, shall evaluate current statements of qualifications and performance data on file with the agency, together with those that may be submitted by other firms regarding the proposed project, and shall conduct discussions with no less than three firms regarding anticipated concepts and the relative utility of alternative methods of approach for furnishing the required services and then shall select therefrom, in order of preference, based upon criteria established and published by him, no less than three of the firms deemed to be the most highly qualified to provide the services required.

Evaluation

"*Negotiation of contracts for architectural and engineering services*

"Sec. 904. (a) The agency head shall negotiate a contract with the highest qualified firm for architectural and engineering services at compensation which the agency head determines is fair and reasonable to the Government. In making such determination, the agency head shall take into account the estimated value of the services to be rendered, the scope, complexity, and professional nature thereof.

"(b) Should the agency head be unable to negotiate a satisfactory contract with the firm considered to be the most qualified, at a price he determines to be fair and reasonable to the Government, negotiations with that firm should be formally terminated. The agency head should then undertake negotiations with the second most qualified firm. Failing accord with the second most qualified firm, the agency head should terminate negotiations. The agency head should then undertake negotiations with the third most qualified firm.

"(c) Should the agency head be unable to negotiate a satisfactory contract with any of the selected firms, he shall select additional firms in order of their competence and qualification and continue negotiations in accordance with this section until an agreement is reached."[3]

Approved October 27, 1972.

HOUSE REPORT No. 92-1188 (Comm. on Government Operations).

SENATE REPORT No. 92-1219 (Comm. on Government Operations).

CONGRESSIONAL RECORD, Vol. 118 (1972): July 26, considered and passed House. Oct. 11, considered and passed Senate.

Note: States may appear in more than one category. Prohibition of or exemption from competitive bidding requirements for procurement in general may be provided in general statutes for A/E services. A specific procedure for selection of A/E services may be spelled out in another law.

States which prohibit competitive bidding for A/E services in Law:

Tennessee

Texas

States which exempt A/E services from general bidding requirements:

California
District of Columbia
Hawaii
Illinois
Kentucky
Mississippi-by attorney general's ruling
New Jersey
New York-by state comptroller's opinion
Ohio
Oklahoma
Pennsylvania
Wyoming

States calling for selection based on qualification: (with procedure requiring ranking of firms, negotiation on scope of project and fee with the top firm. If no contract can be reached, negotiations are terminated and taken up with the second ranked firm. Same procedure required for third ranked firm (and lower ranked firms if required by law) if no agreement can be reached with the second.

California	(1973)	Minnesota	(1975)
Connecticut	(1979)	Nebraska	(1978)
Colorado	(1979)	New Hampshire	(1973)
Delaware	(1976)	New York State	(1980)
Florida	(1973)	Oklahoma	(1974)
Kansas As and Es	(1977)	Pennsylvania-building construction offices	(1975)
Kentucky	(1978)	South Carolina	(1981)
Louisiana	(1975)	Texas	(1971)
Maine	(1979)	Utah	(1980)
Massachusetts	(1975)	Virginia	(1980)
		Washington	(1981)

States prohibiting competitive bidding under registration law rules, regulations, standards of conduct: (Source: NCARB study revised June 13, 1975. Whether rules are promulgated for architectural board alone, joint board or occupational board is noted).

Arkansas - A
Connecticut - A
Florida - A
Hawaii - A/PE/S

Mr. John P. O'Connor
Engineering Editor
American City & County Magazine

Dear Mr. O'Connor:

As discussed with a representative of the American Consulting Engineers Council, I am enclosing another view of the Maryland Professional Procurement System. This was prompted by the latest Zemansky article of May 1982, entitled Separate Myth from Fact.

By way of background, I represent Baltimore City in the Maryland General Assembly, assigned to the Capital Projects Committee for sixteen (16) years, twelve (12) years as chairman. I have served for the past six (6) years in dual capacity as Vice Chairman Appropriations Committee.

Sincerely,

R. C. Avara

AMERICAN CITY & COUNTY MAGAZINE

Article on A/E Procurement Procedures

As a public elected official I must be concerned with the wise expenditure of taxpayer money, best use of government personnel, and assurance that we develop the best and most cost effective capital works projects. All of these objectives are realized in the procurement of engineering and architectural services, when that procurement process is one which ensures that firms are selected first on the basis of their qualifications..

Yet, the debate continues over the best means of procuring A/E services. Maryland, which I serve as an elected State representative, is the only state in the country which requires A/Es competing for public jobs to submit priced proposals. Because of that requirement I have been long involved in discussions with public procurement officials, private sector engineers and architects and other legislators on this issue. We have made some progress toward educating other officials and the public that what appears to be the simplest solution may not always be the best.

The State of Maryland adopted a bidding requirement subsequent to the procurement scandals that ultimately resulted in the resignation of Spiro T. Agnew as Vice President of the United States. While reforms were clearly needed

- more -

in the State selection process, many legislators still do not believe that bidding is a defense against corruption. The widespread announcement of public project and openness now associated with the Maryland system could just as easily be a vital part of a negotiated procedure.

Competitive negotiations were adopted by all federal agencies, including the military, with the passage of the P.L. 92-582 in 1972. Twenty-nine states also have statutes which recognize the value of A/E selection based on competence with competitive negotiation for a fair and reasonable fee. Of these, twenty have enacted a law detailing a qualifications selection procedure similar to the federal system and nineteen have exempted or prohibited A/Es from bidding. (Ten states have enacted both.) Maryland stands alone with a bidding procedure.

Competitive negotiation requires that firms first submit their qualifications to perform work on a project, after which three or more are ranked and negotiations take place with the number one ranked firm. At that negotiation stage a fair and reasonable price is established. If the agency and the firm cannot agree on the price, negotiations are ended with the first and undertaken with the second firm. If a design contract price cannot be agreed to by the client and the second ranked design professional, negotiations are ended and undertaken with the third ranked firm.

What the public agency client is buying is the design ideas of the engineer and architect -- and each design team will give the client a <u>different</u> facility. The difference is measurable against the experience and innovation of the individual competitors -- in short, their qualifications.

Maryland's bidding requirement has not served the best interests of the

State. In fact, a recent survey among consulting engineering firms showed that 90 percent of Maryland's engineering firms do not seek work from the State and that more than 80 percent who sought State work before no longer do so.

The slim chances of success do not justify the costly ($2,300 to $15,000) preparation of proposals and two out of three projects result in no profit, or more usually a financial loss according to the study. While this may be of little personal concern to the public, or even to the public agency client, it is of crucial importance to those small private sector firms whose staff is paid and whose doors stay open -- or close -- according to a reasonable income.

Disturbing also were comments by firms responding to the survey, who said they believe that competitive price bidding encourages them to submit proposals that are void of innovation and to cut corners by meeting minimal standards in an effort to keep fees low. The creativity of our small design firms is an important resource to be fostered in an encouraging competitive climate -- not a marketplace which fosters perfunctory and shop worn design approaches.

These findings recently were corroborated in two extensive independent studies of A/E services procurement. The American Bar Association's Public contract Law Section for the Office of Federal Procurement Policy reaffirmed the findings of the three-year study that resulted in the ABA Model Procurement Code for State and local governments.

The National Academy of Sciences Committee on Procurement Policy concluded after a year of study, which included the Maryland system, that "in the Committee's opinion no problems of major importance were found and certainly no problems that would justify a significant modification of the (competitive negotiation) law".

Inherent in A/E services, and not generally for other types of services, is the extent to which quality can affect the ultimate efficiency, effectiveness and economy of a facility or structure.

Consider the cost of the design portion of a project, compared to the overall project cost. A report by the U.S. General Accounting Office states that "design costs represent a very small proportion, probably less than one percent, of the costs that will be incurred over the life of a building. Decisions made during the expenditure of this less-than-one-percent determine and freeze nearly all costs that follow".

A/E services are unique and we cannot expect them to conform to bidding specifications which serve so well for the procurement of other goods and most services. The A/E is expected to be a member of the State's team, to assess alternatives, design a facility or structure to satisfy the State's need at the lowest project cost, oversee the construction and assist the State in prosecuting claims that may arise out of the construction project. The relationship is different from the ordinary buyer/seller relationship. In many respects the A/E acts as the State or city's agent, and they have great value in their ability to protect the State's interest.

In order to fairly assess a competitive bid, public agency officials must be certain that all design professional firms are pricing the same project. In the case of engineering services this is difficult, if not impossible to assure. The work scope simply cannot be accurately defined to that extent prior to engagement of an engineering firm.

The Maryland experience proves this point graphically. Studies have shown

huge variations, some over 400%, between the high and low bidder on the same project. For example, price proposals on 125 A/E projects by the Department of General Services over the past five years resulted in 0-25% variations between the high and low bidder on 15 projects; 26-50% variations on 29 projects; 50-100% variations on 47 projects; 101-200% variations on 30 projects; and 201-400% variations on 4 projects.

It is incumbent upon us as public officials to understand and recognize the nature of the services we are seeking in design professionals. Engineering is a learned profession. Whether it is practiced by an individual or a team of individuals, creative talents are applied to solving a problem. How can we expect bids on the execution of an idea that is still being conceived, such as bridging a river to handle 25,000 cars per day? Should there be a culvert, timber pilings, concrete pilings, no pilings? Should there be two lanes or four lanes, a sidewalk to allow fishing or a bike travelway or both? Public works staffs, working in consultation with various public groups and in concert with private practice engineers, are able to analyze a myraid of alternatives and suggest approaches that address the problems of safety, permanence, beauty, maintenance and a host of other factors.

The traditional selection process permits this essential professional relationship between the client and the engineer or architect. The largest single misconception I hear from colleagues is that price is not a factor when the competitive negotiation process is utilized. It most definitely is. By the time procurement officials or selection boards arrive at the negotiating table with the number one ranked firm both have a grasp of the project scope and the budget which the city, county or state, has determined to be within reason. At the same time, the firm has examined

its approach to meeting the requirements of the job and the compensation necessary to do so effectively. If the fee suggested by the firm is not in line with the agency's budget, the next step is to evaluate the cause and significance of the disparity.

Often the firms will suggest alternatives in approaches which will more effectively accommodate the agency budget estimate. But if the firm feels it is not in the agency's best interest to reduce the design effort, it will explain its rationale leaving the consideration of the alternative up to the public works staff or selection board.

Further, since the procedure also calls for selecting at least three qualified competitors, the firm with whom the agency first negotiates knows the agency can walk away if the fee proposal is not fair and reasonable. Additionally the agency can and should require the selected A/E to submit a cost breakdown of its proposed fee, and audit the fee proposal against the agency's established cost principals. These steps provide a means for negotiating a fee that is fair and reasonable for the defined services. In contracting for A/E services this should be the primary objective -- not the lowest price.

One of the many people who have encouraged a change in the Maryland system of procurement of A/E services is O. S. Hiestand, a Maryland attorney and former general counsel to the federal government commission on federal procurement as well as a member of the American Bar Association Coordinating Committee to develop a Model Procurement Code. That ABA Code did recommend selection procedure based on a qualifications method for design professional services. Mr. Hiestand has made many persuasive arguments in favor of reforming the Maryland system, and one

in particular is important to note.

He says, "A public procurement policy is most effective -- both in quality and cost -- when it utilizes the competitive forces of an existing marketplace. This enables the State to achieve the maximum competition and provides a yardstick to measure its costs. Adopting artificial market conditions reduces competition and the ability to make an objective assessment of reasonable costs. Public procurement of A/E services is probably less than 5 percent of the total A/E services market. If 95 percent of A/E procurement does not utilize price in the initial selection, requiring priced proposals in public A/E procurement is clearly out of step with the normal marketplace for A/E services."

Most of the benefits of A/E services have to be measured against final construction, maintenance, and operating costs of a facility or structure. Costs that are not clearly determined until after the A/E services have been completed. Injecting price in an initial selection may lower the A/E fee sometimes, but it will also most likely lower the quality of the final product. Such price competition can inhibit the ability of the A/E to provide full cost saving services due to inadequate compensation for innovative and thorough work. It may even cause more talented A/E firms not to offer their services -- thus lowering the overall quality of A/E services available to the State or other public sectors.

Price competition has its place in public procurement, and when acquiring goods and commercial services is a fair method for assuring that the state buys what it wants at the lowest costs. However, price competition should not be injected, or relied upon, when it can adversely affect selection in situations where quality should be the controlling consideration initially. In the initial selection of an

A/E project, quality should be the primary consideration for the taxpaying public. When that criterion is met, the state's interests are best served by utilizing the best qualified firm (for the type and complexity of the services needed) if the amount of compensation is fair and reasonable. This is sound public policy and one which I am working to see implemented in Maryland.

###

Sec. 36.98.010. APPLICATION OF CHAPTER.
This chapter applies to contracts for professional services provided to a state agency unless

(1) the total amount of the contract does not exceed $25,000;

(2) the contract is an employment contract for services to be performed under direct supervision regardless of the existence of an employer-employee relationship and a written justification signed by the person responsible for awarding the contract is filed with the commissioner;

(3) the contract is awarded based on competitive bids obtained under the procedure provided in AS 37.05.230. HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.020. PROFESSIONAL SERVICES CONTRACTORS REGISTER.

(a) The commissioner shall establish and maintain a professional services contractors register.

(b) A person or firm that desires to provide professional services to a state agency may submit to the commissioner a statement of qualifications and performance data, and any other information that the commissioner, by regulation, may require.

(c) The commissioner may at any time require the person or firm to revise the statement of qualifications and performance data or any other information submitted by the person or firm if the commissioner believes that the credentials or record of experience of the person have materially changed since the last filing by the person or firm. HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.030. SOLICITATION OF PROPOSALS.

(a) When a state agency proposes to enter into a contract for professional services, the agency shall give public notice soliciting proposals for the professional services contract by publication at least three times in one or more newspapers in general circulation in the state and, when appropriate, in a newspaper in local circulation where the work is to be performed. The first notice shall be published not less than 30 days before the date on which the agency expects to enter into the contract and each subsequent notice shall be published at intervals of no more than three days thereafter. The notice shall include

(1) a general description of the proposed project for which the agency is seeking professional services; and

(2) the procedure by which a person or firm interested in the professional services contract may make its proposal to the agency for consideration for the contract.

(b) In addition to complying with the publication requirements of (a) of this section, when a state agency proposes to enter into a contract for professional services it shall

(1) review the register of professional services contractors maintained by the commissioner under AS 36.98.020; and

(2) provide a request for proposals for the proposed professional services contract to each prospective contractor who, after review of the register of professional services contractors under (1) of this subsection, the agency finds is qualified for consideration for the contract.

(c) A request for proposals must be extended to a sufficient number of prospective providers of the required services to assure that public interest in competition is adequately served. Proposals from at least six persons or firms with the required expertise shall be solicited for contracts equal to or greater than $100,000. Proposals from at least three persons or firms with the required expertise shall be solicited for contracts of less than $100,000 if the expertise required is available. If the expertise required is not available to enable an agency to solicit the number of proposals otherwise required under this subsection, the agency shall solicit proposals

(1) from each person or firm listed on the professional services contractors register maintained under AS 36.98.020 who appears to possess the required expertise;

(2) from each person or firm responding to the public notice given under (a) of this section who appears to possess the required expertise.

(d) The provisions of this section do not apply if

(1) the contracting agency demonstrates that there is a single source of the expertise or knowledge required or that one person or firm can clearly perform the required tasks more satisfactorily because of the person's or firm's prior work; however, this exemption applies only if the head of the state agency has submitted a written request to the commissioner that details the reasons for the exemption and the commissioner or deputy commissioner has authorized in writing the state agency to enter contract negotiations with the single source;

(2) the commissioner makes a written determination that public necessity will not permit delay incident to the procedures otherwise required by this chapter; or

(3) the service is to be provided by another state agency, a federal agency, or a political subdivision of the state.

(e) A request for proposals must contain a description of the work to be performed under the contract and the terms under which the work is to be performed. A request for proposals must contain that information necessary for a prospective contractor to submit a response or contain references to any information that cannot reasonably be included with the request. The request for proposals must provide a description of the factors that will be considered by the state agency when it evaluates the proposals received.

(f) Nothing in this section limits the authority of an agency to use additional means that it may consider appropriate to notify prospective contractors that it proposes to enter into a contract for professional services.

HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.035. STANDARD OVERHEAD RATE.

(a) If a state agency has established a standard overhead rate applicable to contracts for services from the state agency, the standard overhead rate shall be included in a proposal for a contract submitted under AS 36.98.030(a).

(b) As used in this section, "standard overhead rate" means a charge established for services from a state agency that is designed to compensate the state agency for administration and support services incidentally provided with the professional services. (AS 36.98.030(g), (h); sec. 5 ch 144 SLA 1982)

Sec. 36.98.040. EVALUATION OF PROPOSALS AND AWARD OF CONTRACT.

(a) After the responses are submitted, the state agency shall evaluate them. The evaluation shall consist of assigning point values to factors considered by the agency in evaluating each proposal. Each proposal received must be evaluated using the same factors as those set out in the request for proposal.

(b) The contract shall be executed by the contractor and the project director for the contracting agency and be approved by the head of the contracting agency or the designee of the head of the contracting agency. If a contract is made by a board or commission, execution of the contract on behalf of the board or commission shall be authorized by the board or commission.

(c) a contract subject to this chapter shall be submitted to the commissioner for review and approval and, if approved, is effective from the date of the approval. A state agency must clearly provide in the request for proposal that the state is not obligated to perform under the contract until the approval required by this subsection is granted.

(d) A contract award under this chapter shall contain:

(1) the amount of the contract stated on its first page;

(2) the date for the work to begin;

(3) the date by which the work must be completed;

(4) a description of the services to be performed under the contract; and

(5) a certificate by the project director for the contracting agency, the head of the contracting agency, or his designee that sufficient funds are available in an appropriation to be encumbered for the amount of the contract.

HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.045. REVIEW AND APPROVAL BY DEPARTMENT OF LAW.

If a contract contains terms that are not provided in a state standard form contract or if the standard terms are deleted or modified by other terms that are not standard, the contract must be reviewed by the Department of Law and approved as to form. The review and approval required by this section must be completed before approval of the award of the contract by the commissioner under AS 36.98.040(c).

HISTORY (AS 36.98.040(e); sec. 5 ch 144 SLA 1982)

Sec. 36.98.050. CONTRACT ADMINISTRATION.

(a) When a state agency has entered into a professional services contract, that agency is responsible for the diligent administration and monitoring of the performance of the provisions of the contract.

(b) When a professional services contract is completed, the contracting state agency shall evaluate the performance of the contractor under the contract and shall report on and evaluate the use of the final product of the contract. A copy of the report and evaluation prepared under this subsection shall be transmitted to the commissioner and shall be retained by the commissioner for as long as the commissioner is required to maintain copies of completed contracts.

HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.060. FILING OF PROPOSAL AND CONTRACT.

A copy of each contract and the response to the request for proposal upon which the contract was awarded must be filed with both the

commissioner and the contracting state agency and is open for public inspection. The request for proposal and the name and address of each person who submitted a response to it must also accompany the filed copies.
HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.070. REGULATIONS GOVERNING CONTRACT PROCEDURES.
The commissioner shall, by regulation adopted in accordance with the Administrative Procedure Act (AS 44.62), establish the manner and form by which state professional services contracts shall be prepared and processed, including, but not limited to, a review process for persons aggrieved under this chapter.
HISTORY (Sec. 5 ch 144 SLA 1982)

Sec. 36.98.080. DEFINITIONS.
In this chapter
(1) "commissioner" means the commissioner of administration; except that for contracts entered into by the Department of Transportation and Public Facilities, "commissioner" means the commissioner of transportation and public facilities;
(2) "professional services" means professional, technical, or consultant's services that are predominantly intellectual in character and that
(A) include analysis, evaluation, prediction, planning, or recommendation; and
(B) result in the production of a report or the completion of a task;
(3) "public necessity" means an urgent public need that could not have been anticipated or foreseen; the term also includes emergency situations when work is necessary to protect life or property;
(4) "request for proposals" means a written solicitation for contract proposals by prospective contractors that sets out the nature of the services to be performed or product to be secured with sufficient information for a qualified prospective contractor to prepare a contract proposal for consideration and evaluation by the state agency;
(5) "state agency" means a department, institution, board, commission, division, authority, or other administrative unit of the executive branch of state government, and the University of Alaska.

UNITED STATES DISTRICT COURT
DISTRICT OF ALASKA

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, PROFESSIONAL ENGINEERS, AND LAND SURVEYORS, Defendant.	Civil No. A82-423 CIV Filed: 10/12/82 MOTION TO STAY PROCEEDINGS

The defendant Alaska Board of Registration for Architects, Professional Engineers, and Land Surveyors ("the Board") hereby moves that all proceedings in this case be stayed temporarily in order to permit a legislative resolution of the controversy involved herein, making litigation of this case unnecessary. To this end, the Board moves that proceedings be stayed until May 31, 1983, or

until such earlier time as the current session of the Alaska legislature enacts or rejects legislation that would insulate the conduct challenged herein from antitrust attack.

The grounds upon which this Motion is based, as set out in more detail in the attached Memorandum of Points and Authorities, are as follows:

The new Attorney General of the State of Alaska has determined that the most efficient way to resolve this dispute is through enactment of state legislation that would definitively establish a "state action" defense to the complaint herein, pursuant to the principles of Parker v. Brown, 317 U.S. 341 (1943), and subsequent cases. Accordingly, such legislation will be introduced in the state legislature, on behalf of the Board, in the very near future.

Should legislation conclusively establishing a state-action defense be enacted, litigation of this matter will be unnecessary. Thus, the order requested by the Board would avoid potentially unnecessary expenditure of resources by the parties and the Court. Nor would proceedings be unreasonably delayed in the event that the legislature does not enact the proposed legislation, since (a) the stay is for a limited period of time, and (b) the Board is prepared

to litigate the case on an expedited basis should the proposed legislation not be enacted.

Respectfully submitted,

UNITED STATES DISTRICT COURT
DISTRICT OF ALASKA

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND SURVEYORS, Defendant.	Civil No. A82-423 CIV Filed: 10/12/82 ANSWER OF DEFENDANT ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND LAND SURVEYORS

For answer to the complaint filed by the United States, defendant Alaska Board of Registration for Architects, Engineers, and Land Surveyors ("the Board") responds as follows:

I. JURISDICTION AND VENUE

1. Answering paragraph 1 of the complaint, the Board admits that the complaint is filed under 15 U.S.C. § 4.

Except as expressly admitted, the Board denies each and every allegation of that paragraph.

2. Answering paragraph 2 of the complaint, the Board admits the allegations of that paragraph.

II. DEFENDANT

3. Answering paragraph 3 of the complaint, the Board admits the allegations of that paragraph.

III. CO-CONSPIRATORS

4. Answering paragraph 4 of the complaint, the Board denies the allegations of that paragraph.

IV. TRADE AND COMMERCE

5. Answering paragraph 5 of the complaint, the Board admits the allegations of the first three sentences of that paragraph, except that it denies that there are approximately 2100 architects, professional engineers, and land surveyors licensed to practice in Alaska. The Board is informed and believes that there are approximately 3200 architects, professional engineers, and land surveyors licensed to practice in Alaska. The Board lacks knowledge or information sufficient to form a belief as to the

allegations of the last sentence of paragraph 5 of the complaint, and on that basis denies those allegations.

6. Answering paragraph 6 of the complaint, the Board admits the allegations of that paragraph.

7. Answering paragraph 7 of the complaint, the Board admits the allegations of that paragraph.

8. Answering paragraph 8 of the complaint, the Board admits the allegations of that paragraph.

9. Answering paragraph 9 of the complaint, the Board admits the allegations of the first two sentences and denies the remainder of that paragraph.

10. Answering paragraph 10 of the complaint, the Board admits the allegations of that paragraph.

11. Answering paragraph 11 of the complaint, the Board admits the allegations of that paragraph.

12. Answering paragraph 12 of the complaint, the Board admits the allegations of that paragraph.

13. Answering paragraph 13 of the complaint, the Board admits the allegations of that paragraph.

14. Answering paragraph 14 of the complaint, the Board admits the allegations of that paragraph.

15. Answering paragraph 15 of the complaint, the Board admits that the activities of the Board's certificate of registration holders are within the flow of interstate commerce and have a substantial effect on interstate commerce and that the activities of the Board have a substantial effect on interstate commerce. Except as expressly admitted, the Board denies the allegations of that paragraph.

V. VIOLATION ALLEGED

16. Answering paragraph 16 of the complaint, the Board denies the allegations of that paragraph.

17. Answering paragraph 17 of the complaint, the Board denies the allegations of that paragraph.

18. Answering paragraph 18 of the complaint, the Board denies the allegations of that paragraph.

VI. EFFECTS

19. Answering paragraph 19 of the complaint, the Board denies the allegations of that paragraph.

FIRST DEFENSE

The complaint fails to state a claim against the Board upon which relief can be granted.

SECOND DEFENSE

The complaint is barred by the "state action" doctrine of Parker v. Brown, 317 U.S. 341 (1943), and subsequent cases.

THIRD DEFENSE

The complaint is barred because the Board, as a governmental agency of the State of Alaska, may not be sued under the Sherman Act.

FOURTH DEFENSE

The complaint is barred by the Tenth Amendment to the United States Constitution and by the doctrine of National League of Cities v. Usery, 426 U.S. 833 (1976).

DISPOSITION

WHEREFORE, the Board prays for judgment as follows:

1. That the complaint be dismissed;

2. That the relief sought by the complaint be denied; and

3. That the Court grant the Board such relief as the Court shall deem just and proper.

APPEARANCES: PLAINTIFF:

DEFENDANT:

PROCEEDINGS: MINUTE ORDER FROM CHAMBERS:

Oral argument on defendant's motion to stay proceedings is denied in order to expedite the business of the court. See Local Rule 5(c)(1). Defendant's motion to stay proceedings (Docket #10) is granted. All proceedings in this case are stayed until May 31, 1983, or until such earlier time as the current session of the Alaska Legislature enacts or rejects legislation that would insulate the conduct challenged from anti-trust attack.

Plaintiff's motions to compel discovery (Docket #12) and for status conference (Docket #13) are denied without prejudice.

UNITED STATES DISTRICT COURT
DISTRICT OF ALASKA

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND LAND SURVEYORS, Defendant.	Civil No. A82-423 CIV MEMORANDUM IN SUPPORT OF PLAINTIFF'S MOTION FOR AN ORDER COMPELLING DISCOVERY UNDER RULE 37(a) OF THE FEDERAL RULES OF CIVIL PROCEDURE

Defendant, in spite of the fact that it has been given two extentions of time do so, has defaulted on its agreement to respond to the plaintiff's discovery. Consequently, the plaintiff, United States of America, brings this motion.

STATEMENT OF FACTS

Plaintiff United States of America filed its complaint in this matter on October 12, 1982, after extensive discussions with Defendant aimed at resolving the dispute without litigation. The Complaint alleges a per se violation of

Section 1 of the Sherman Act based on the Defendant's adoption of a complete ban against its members or licensees offering competitive bids. The United States alleges that this prohibition on price competition restrains trade.

After service of the Complaint, the United States was contacted by representatives of then Alaska Attorney General William Condon. The Government was informed that the Alaska Attorney General had decided not to defend defendant Alaska Board of Registration for Architects, Engineers, and Land Surveyors (hereinafter cited as "Board"), but would authorize the Board to retain outside counsel. To accommodate this change in representation, the United States consented to a twenty day extension of time to answer the Complaint.

Defendant's Answer was filed on November 22, 1982 after new counsel was retained. On November 24, 1982 counsel for Plaintiff and Defendant met to discuss whether the case could be handled on a stipulated record or an expedited basis and advised the Court they would seek to exchange stipulations for the purpose of limiting the facts in dispute. Each promised to exchange initial proposed stipulations of fact by December 17, 1982. The United States further informed Defendant that it intended to file discovery requests under Rules 33 and 34 of the Federal Rules of Civil Procedure.

The Government served a Document Request and sixteen Interrogatories on Defendant on December 13, 1982. As agreed upon between counsel, the United States filed its proposed Stipulations of Fact on December 17, 1982.

In response, Defendant did not file any proposed stipulations of fact on Plaintiff, nor did the Board offer any comment on the Government's proposed stipulations. On January 6, 1983, however, the Defendant contacted Plaintiff to request an extension of time to answer discovery which was due January 13. The United States agreed to extend the time to answer discovery to January 31, 1983 because of a change in administration in the State of Alaska government.

Despite this extension and several conversations with counsel aimed at securing a response to discovery as required under Local Rule 5 of the District of Alaska, Defendant has failed completely to answer or respond to the government's limited discovery requests. Defendant's position is that its reasons for refusing to answer discovery are set forth in its Memorandum of Points and Authorities In Support of Defendant's Motion To Stay Proceedings (hereinafter cited as "Defendant's Memorandum In Support"). See Attachment A, Affidavit of Mark R. Davis.

ARGUMENT

The United States of America, plaintiff in this action, brings this motion to compel the defendant to respond to plaintiff's interrogatories and request for documents. Plaintiff's discovery was served on December 13, 1982. Defendant was given an extension of time to respond and is now in default on its obligation to respond on January 30, 1983.

Permitting for the delay in making such response would be inequitable and will seriously impair trial preparation in this case. The discovery plaintiff has sought for two months is relevant to the issues in this lawsuit. Plaintiff seeks access to the minutes of the Board and to documents in its possession relating to the Board's competitive bidding ban, its enforcement and its impact. Plaintiff's interrogatories seek Defendant's basic contentions with respect to its competitive bidding ban.

Defendant does not even claim that it would be burdensome for it to respond to these requests which it has had for two months. See Defendant's Memorandum In Support at 5-7. And on the other hand, it will greatly slow trial preparation if plaintiff is denied them. Access to these documents will enable Plaintiff to narrow the issues between the parties and prepare for prompt disposition of the case.

It would, we submit, be particularly inequitable not to force Defendant to respond to discovery where, as here, Plaintiff has made substantial efforts to move the case forward, has already granted Defendant two extensions of time and where Defendant has already failed to meet two commitments - to furnish proposed stipulations on December 17, 1982 and to respond to discovery on January 30, 1983.

Rule 37(a) of the Federal Rules Of Civil Procedure is designed to permit courts to compel answers to discovery when one party has failed to respond, filed incomplete answers, or

been evasive. See Rickles, Inc. v. Frances Denney Corp., 508 F. Supp. 4 (D. Mass. 1980). Use of a Rule 37 motion is particularly appropriate where, as defendant claims is the case in this matter (Defendant's Memorandum In Support at 5), the "litigation is not especially complex as a factual matter." See Bates v. Firestone Tire & Rubber Co., 83 F.R.D. 535 (D.S.C. 1979).

Rule 37, therefore, provides a court with a flexible tool for compelling discovery in order to avoid unjustifiable delays. The Rule becomes applicable once one party has failed to respond to discovery. See Bates supra at 539 citing to 9 C. Wright & A. Miller, Federal Practice and Procedure § 2284 (1971) ("Any failure to disclose, regardless of the reasons for it, brings the sanctions of Rule 37 into play. . . ."). If a defendant simply refuses to answer discovery, a plaintiff is forced to bring a motion to compel discovery. See Marquis v. Chrysler Corp., 577 F.2d 624, 641 (9th Cir. 1978) ("[T]he defendants' conduct regarding discovery in this case has required the plaintiff to bring motions to compel discovery that would otherwise have been unnecessary.") Under Rule 37 an unexplained or unjustified failure to respond to discovery can also be grounds for the imposition of sanctions, even absent a motion to compel. See Barker v. Bledsoe, 85 F.R.D. 545, 548 (W.D. Okla. 1979) ("All sanctions defined in Rule 37(b) are available for total failure to answer interrogatories, even

absent a motion to compel."); and Sigliano v. Mendoza, 642 F.2d 309, 310 (9th Cir. 1981)° ("Dismissal is a proper sanction under Rule 37(d) for a serious or total failure to respond to discovery even without a prior order.")

In this case, the Defendant has totally failed to respond to the Plaintiff's limited discovery requests, despite two extensions of time designed to accomodate Defendant. There are no indications in the record or information known to the United States which would indicate Defendant was was unable to answer discovery within the allotted time. While a defendant's reasons for not complying with discovery can be relevant, see Bates, supra, no explanation has been given which would excuse this Defendant's lack of regard for discovery. Indeed, Defendant has indicated by implication in its Memorandum that it has sought, without permission of this Court or the Government, to delay discovery until its Motion To Stay is considered. The Defendant quite simply does not have this option. Its Motion To Stay Proceedings is independent of and has no bearing on its obligation to respond to discovery.

Defendant has also not made a persuasive case that answering discovery would be burdensome. In Defendant's own words "this litigation is not especially complex as a factual matter." See Defendant's Memorandum In Support at 5. Defendant has indicated that it can answer discovery on 15 days notice. Id. at 6, n.3. Furthermore, the Government has indicated its willingness to relieve some of the burden of

discovery by proposing stipulations designed to narrow issues of factual dispute. Defendant, despite its agreement to do so, (See Letter to Court of January 31, 1983) has failed to respond or to propose its own. If the facts can be simply stated, answering limited discovery should not be a substantial burden and is certainly not the type of debilitating burden that would permit a party to avoid the clear dictates of Rule 37.

The Defendant in its Memorandum in Support pleads that it is in a difficult position since it does not wish to be "in violation of its obligations under the Federal Rules. . . ." See Defendant's Memorandum In Support at 6. The fallacy in Defendant's position is that its filing a Motion to Stay did not relieve of its duty to respond to discovery requests. As discussed in our opposition to Defendant's Motion to Stay, Defendant has not raised any basis to allow it to continue its illegal conduct by further delaying this litigation. In any event, Defendant, having not even requested from the Court an extension of time to respond and having demonstrated no hardship or burden in the government's discovery request it is entirely appropriate to grant the Government's motion to compel.

Nor is this a situation where the Government is not affected by Defendant's failure to answer. Both the Plaintiff and Defendant agree that the case should not be factually complex. If and when Defendant answers the Plaintiff's discovery requests, the United States believes it will be able to promptly file a motion for summary judgment and at the

conference in November 1982 Defendant's counsel indicated that they contemplated making a similar motion. Thus, if the Defendant actually wanted to expedite this matter, it could have answered discovery and then both sides could have filed cross motions for summary judgment. This possibility was discussed between counsel for both sides on November 24, 1982. The Government in this case has attempted to negotiate a stipulated record; the Defendant has failed to keep its commitments. Hence under Rule 37, the Government believes it should be granted a Motion To Compel Discovery since Defendant has offered no cognizable excuse for its total failure to respond.

No change in counsel for Defendant justifies its failure to respond to discovery despite adequate time to do so. Indeed, the Government has been continually sensitive to Defendant's desire at one time to change counsel in this matter by granting two extensions of time. Yet after two delays, Defendant's primary counsel remains the same and that counsel without any basis or consent for its actions decided unilaterally not to

respond to Rule 33 and Rule 34 discovery requests. As a result, the Government respectfully requests this Court enter a Motion To Compel Discovery under Rule 37.

Respectfully submitted,

UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF ALASKA

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND LAND SURVEYORS, Defendant.	)	Civil No. A 82-423-CIV STIPULATION OF FACTS

Come now, the United States of America and the Alaska Board of Registration for Architects, Engineers, and Land Surveyors ("Board"), and for the purpose of this action only and without admitting the relevancy, admissibility, or materiality of any matter contained herein, agree and stipulate, by and through their respective undersigned counsel of record, to the accuracy of the following facts:

A. Jurisdiction and Venue

1. The complaint in this case was filed and these proceedings were instituted under Section 4 of the Sherman Act, as amended (15 U.S.C. § 4), in order to prevent and restrain an alleged continuing violation by the Board of Section 1 of said Act (15 U.S.C. § 1).

2. The Board maintains its principal office in Juneau, Alaska and transacts business and is found within the District of Alaska.

3. The Court has jurisdiction over this action pursuant to 15 U.S.C. § 4.

4. The Court has jurisdiction over the parties to this action and venue is proper.

B. Authenticity of Documents

5. Attached to this Stipulation as Exhibit 1, and by this reference incorporated herein, is a true and authentic copy of a pamphlet issued by the Board which contain the Alaska statutes on architects, engineers, and land surveyors (AS § 08.48.011 et seq.), centralized licensing (AS § 08.01.010 et seq.), and the termination, contunation and reestablishment of regulatory boards (AS § 08.03.010 et seq.). This pamphlet also contains the Professional and Vocational Regulations of the Board (12 AAC 36.010 et seq.), including the Board's Rules of Professional Conduct (12 AAC 36.200 et seq.).

6. Attached to this Stipulation as Exhibit 2, and by this reference incorporated herein, is a true and authentic copy of

the Directory of Architects, Engineers and Land Surveyors of the Board valid for the period ending December 31, 1977.

C. Creation, Composition and Functions of the Board

7. The Board was created and organized and exists under the laws of the State of Alaska AS § 08.48.011 et seq. That statute, AS § 08.48. 011 et seq., is the only act of the Legislature of the State of Alaska which establishes the powers or duties of the Board or from which the Board derives its authority. The Board is the sole professional engineering, architecture, and land surveying licensing authority in the State of Alaska.

8. The Board consists entirely of practitioners. As required by Alaska Statute § 08.48.011(b), five members are practicing professional engineers, three members are architects and one is a land surveyor. Each member of the Board must have been a resident of Alaska for three consecutive years preceeding his or her appointment and must be registered and have a minimum of five years of professional practice in his or here respective field (Alaska Statute § 08.98.031). All Board members may, and do, maintain their private practices while serving on the Board.

9. One function of the Board is the administration of written examinations and supervision of the qualification, certification and registration of professional engineers, architects, and land surveyors located in Alaska and other states of practice within the State of Alaska. Upon payment

of a fee, the Board annually issues certificates of registration to all properly certified or registered professioal engineers, architects and land surveyors. Revenues from this fee may be used only to cover the expenses of the Board. Currently, there are approximately 3200 professional engineers, architects, and land surveyors holding Board certificates of registration to practic professional engineering, architects, and land surveyors holding Board certificates of registration to practice professional engineering, architecture, or land surveying in Alaska. More then one-half of these certificate of registration holders are residents of states other than Alaska.

10. It is unlawful in Alaska for individuals to represent that they are profesional engineers, architects, or land surveyors unless they have been properly certified by and registered with the Board, and hold a Board certificate of registration to practice professional engineering, architecture, or land surveying. The Board will not grant a temporary registration under any circumstances. Nor will the Board recognize or grant professional registration by eminence.

11. Another function of the Board is to regulate certain aspects of the practice of professional engineering, architecture, and land surveying in the State of Alaska relating to, among other things, misconduct by its registrants. In

promulgating in adopting the regulations challenged by the plaintiff herein the Board acted pursuant to its understanding of its duties as set forth in AS § 08.48.101 and 08.48.111.

12. Board rules are distributed to all certificate of registration holders. Board rules are binding on every certificate of registration holder.

D. Trade and Commerce

13. Most Board certificate of registration holders are engaged in the practice of professional engineering architecture or land surveying and render such services to individuals, corporations, governmental entities and other business entities located in Alaska and other states for a fee or salary. The professional engineering, architectural, and land surveying services provided by Board certificate or registration holders involve and affect individuals, corporations, governmental entities and other business entities located in Alaska and other states. Board certificate of registration holders design and supervise the construction of buildings, roads, bridges, dams, industrial plants and other structures located throughtout the United States. Many Board certificate of registration holders located outside the State of Alaska perform professional engineering and architectural services within Alaska.

14. In the course of rendering professional engineering, architectural, and land surveying services, Board certificate of registration holders often travel from the state of their principal place of business to other states and make

substantial use of interstate mail and wire services in the transport of contracts, plans, reports, plats, drawings and other communications throughout the United States.

15. The activities of Board and Board certificate of registration holders affect and are within the flow of interstate commerce.

E. Rule 36.230(b)

16. The Board has adopted and promulgated Rule 36.230(b) of Title 12 of the Alaska Administrative Code ("Rule 36.230(b)").

17. Rule 36.230(b) provides:

> Each architect, engineer or land surveyor shall seek professional employment on the basis of qualifications and competence for proper accomplishement of the work. He may not knowingly solicit or submit proposals for professional services on the basis of competitive bidding.

F. Legislative Authority For Rule 36.230(b)

18. The Board adopted and promulgated Rule 36.230(b) pursuant to Alaska Statutes §§ 08.48.101 and 08.48.111.

19. Alaska Statute § 08.48.101(a)(5), the pertinent portion of the first of these statutes, provides:

> The board may adopt regulations to carry out the purpose of this chapter, including but not limited to publishing a code of ethics or professional conduct for those persons regulated by this chapter, including corporations under sec 241 of this Chapter.

20. Alaska Statute § 08.48.111, the second of these statutes, provides:

> The board may suspend, refuse to renew, or revoke the certificate of or reprimand a registrant or corporation who is found guilty of (1) fraud or deceit in obtaining a certificate; (2) gross negligence, incompetence, or misconduct in the practice of architecture, engineering, or land surveying; or (3) a violation of this chapter, a regulation adopted under it, or the code of ethics or professional conduct as adopted by the board. The code of ethics or professional conduct shall be made known in writing to every registrant and applicant for registration under this chapter, and shall be published with the roster provided for in AS 08.48.081. This publication constitutes due notice to all registrants. The board may revise and amend its code and, upon doing so, shall immediately notify each registrant in writing of the revisions or amendments. The board may, upon petition of the registrant or corporation, reissue a certificate if a majority of the members of the board vote in favor of the reissuance.

21. Alaska Statutes §§ 08.48.101 (a)(5) and 08.48.111 are the sole authority upon which the Board relies to have adopted or promulgated Rule 36.230(b) or a code of ethics or professional conduct.

22. Except for Rule 36.230(b), it would not be a violation of any State of Alaska law, statute, order, legislative or executive resolution, or legislature, executive or administrative rule, regulation or policy for a purchaser of architectural, engineering or land surveying services to seek competitive bid or for an architect, professional engineer or land surveyor to provide such bids.

G. History of the Rule

23. In either 1968 or 1969, the Board first adopted the ban on competitive bidding. At that time, the Board decided to adopt a code of ethics which was derived by combining the then existing codes of ethics of the American Society of Civil Engineers ("ASCE") and the American Institute of Architects ("AIA"), both of which contained competitive bidding bans. This competitive bidding ban, current Rule 36.230(b), was repromulgated without change by the Board on May 23, 1974 and September 30, 1978. Both the ASCE and the AIA eliminated their competitive bidding bans in 1972 pursuant to consent decrees settling antitrust civil actions brought against them by the United States.

24. There was no mention made of or consideration given to the competitive bidding ban at public hearings held in 1978 about the Board's regulations, including the Board's code of ethics.

25. There was no mention made of or consideration given to the competitive bidding ban during the Alaska state legislature sunset review of the Board held in 1980.

26. In 1980, the Office of the Alaska Attorney General recommended to the Board that they repeal Rule 36.230(b). The Board at its December 1980 meeting rejected this recommendation by a 4-3 vote.

27. In May 1982, the Office of the Alaska Attorney General recommended to the Board that they repeal Rule 36.230(b) on an emergency basis. The members of the Board unanimously rejected this recommendation at their May 1-7, 1982 meeting. A true and accurate copy of the May 13, 1982 letter of Assistant Alaska Attorney General Peter B. Froehlich recounting these events is attached as Exhibit 3 and by this reference incorporated herein.

28. The Board conducted a public hearing on June 10, 1982, concerning the repeal of Rule 36.230(b). A true and accurate transcript of that hearing is attached to this Stipulation as Exhibit 4 and by this reference incorporated herein.

29. At the June 10, 1982 hearing, the consensus of the providers was that Rule 36.230 (b) should be retained. The following Board certificate of registration holders spoke against and urged the rejection of the proposed repeal of the competitive bidding ban: (1) Jan Hansen, P.E., (2) Don Dent, P.E., (3) Ron Mitchell, P.L.S., (5) Charles Torkko, P.E., representing the Consulting Engineer Council of Alaska, (7) Roy Peratrovich, P.E., (7) Richard Treoger, R.L.S., (8) Ken Cannon, architect, representing the Alaska Chapter of the American Institute of Architects, (9) Daniel Dougherty, P.E., (10) Herman Kaiser, R.L.S., (11) Gary Bock, P.E., (12) Nelson Franklin, P.E., representing the Anchorage Chapter of the

Alaska Society of Professional Engineers, (14) George Schwadetier, P.E. and P.L.S., (15) Mr. Partch, architect, and (16) Dale Nelson, representing the Anchorage Branch of the American Society of Civil Engineers.

30. On August 5, 1982 the Board held another hearing concerning the repeal of this competitive bidding ban. A true and accurate copy of the transcript of this hearing and written comments received in response to the July 2, 1982 public notice of this hearing is attached to this Stipulation as Exhibit 5 and by this reference incorporated herein.

31. At the August 5, 1982 hearing, the consensus of providers was again that Rule 36.230(b) should be retained. The following Board certificate of registration holders spoke against and urged the rejection of the proposed repeal of the competitive bidding ban: (1) Don Dent, P.E., (2) Charles Torkko, P.E., representing the Consulting Engineers Council of Alaska, (3) Vernon Ackin, P.E., (4) John Burdick, P.E., (5) Rupert Tart, representing the American Society of Civil Engineers, (6) Nelson M. Franklin, representing the Anchorage Chapter of the Alaska Society of Professional Engineers, (7) Doug Ackley, Architect, (8) Robert Minch, Architect, (9) William P. Hamm, representing the Alaska Chapter of Professional Engineers in Private Practice, and (10) Harley Hightower, representing the Alaska Chapter of the American Institute of Architects.

32. On September 9-10, 1982, the Board, contrary to the advice of the Office of the Alaska Attorney General, voted unanimously to retain Rule 36.230(b).

33. In retaining and enforcing this rule, the Board has the support of the various engineering associations and societies in Alaska.

H. Impact and Enforcement of the Rule

34. No person can practice architecture, engineering or land surveying in Alaska unless registered or certified by the Board (Alaska Statute § 08.48.281).

35. The Board can revoke, suspend or refuse to renew the registration of an architect, professional engineer or land surveyor if that person is found guilty of violating the Board's code of ethics, including the competitive bidding ban. (Alaska Statute § 08.48.111)

36. The Board has caused its Rules of Professional Conduct to be made known in writing to every registrant and applicant for registration and has caused them to be published with the roster of registrants, which the Board publishes annually, mails to registrants and state, borough, and city officials, and distributes or sells to the public.

37. The Boards' position is that failure to comply with the terms of the Code of Ethics, including Rule 36.230(b), might subject the professional engineer, architect, or land surveyor to disciplinary action.

38. The Board has continually and actively enforced Rule 36.230(b) and plans to continue enforcement of the Rule.

39. Board certificate of registration holders compete with each other in the offering of architectural, engineering and land surveying services. Present and past Board members

are competitors among themselves in the providing of architectural, professional engineering and land surveying services, and they compete with the other Board certicate of registration holders in providing those services.

40. Most Board certificate of registration holders have abided by Rule 36.230(b)..

41. In February or March, 1982, the City of Sitka put out a request for bids for professional services on an addition to the city library which would be built with state money.

42. About a week and a half after the requests were sent out, the Board, at the behest of several practitioners, contacted Sitka by conference telephone call and informed the City Administrator, Fermin "Rocky" Guitierrez, that Sitka would be making architects and engineers "outlaws" by asking them to bid on the project. Board members participating in the conference call also told Guitierrez that they would notify certificate of registration holders that participation in the library addition project or any other Sitka projects would be in violation of the Board's rule.

43. About the same time as the Board conference telephone call, Charles E. Torkko, president of the Consulting Engineers Council of Alaska ("CECA"), on behalf of that organization wrote Mr. Guitierrez on February 8, 1982 requesting reconsideration of pricing procedures used by Sitka for the procurement of professional enginecring services for a water resource study. A true and accurate copy of Mr. Torkko's February 8, 1982 letter is attached as Exhibit 6 and by this reference incorporated herein.

44. On February 18, 1982, Mr. Guitierrez wrote a reply to Mr. Torkko's February 8, 1982 letter. In his reply, Mr. Guitierrez assured Mr. Torkko that "fee alone is not the determining factor in our procurement of engineering services." A true and accurate copy of Mr. Guitierrez's February 18, 1982 letter is attached as Exhibit 7 and by this reference incorporated herein.

45. In October, 1982, Board member Wallace Wellenstein phoned the Anchorage Public School Board and informed them that a proposal that Board certificate of registration holders submit price bids on designated design projects would violate the Engineering Board's ban on competitive bidding.

46. Shortly thereafter, Harley Hightower, president of the Alaska Chapter of the American Institute of Architects ("AIA"), made an appearance before the School Board on behalf of the AIA and indicated that the proposed regulation of the Board violated the Engineering Board ban on competitive bidding. A copy of the transcript of the appearance and a submission made at that time are attached are Exhibits 8 and 9 respectively and by this reference incorporated herein.

47. Practitioners have on occasion used the existence of Rule 36.230(b) to discourage the solicitation of competitive bids for projects.

48. Certificate of registration holders, practitioners, and architectural, professional engineering and land surveying societies have encouraged and supported the adoption and retention of Rule 36.230(b).

49. Absent an order of Court, the Board will not repeal Rule 36.230(b).

I. Consequences of the Rule

50. There would be a substantial increase in the amount of competitive bidding taking place in Alaska if Rule 36.230(b) were eliminated.

51. This substantial increase in the amount of competitive bidding taking place in Alaska would allow customers to utilize and compare prices, price bids and proposed designs much more readily and effectively when selecting engineering services than is presently the case under Rule 36.230(b).

52. Rule 36.230(b) increases the cost to purchasers of gathering price, quality and design information and dampens price, quality and design competition.

53. Most states no longer have bans on competitive bidding. There is no data indicating that these states have experienced increases in fraud and harm to the public health and safety.

J. Other Activities of the Board

54. The Board has adopted licensing requirements, in part, to insure the professional competence of all licensees.

55. The Board has adopted licensing requirements and examination standards to insure that all licensees have adequate knowledge of what construction, design and other architectual and professional engineering problems can arise from Alaska's cold climate.

56. The Board has adopted ethical and licensing requirements other than Rule 36.230(b) to prevent fraud in the offering of professional services.

57. The Board holds public hearings and solicits input of certificate of registration holders before changing or adopting any rule.

58. The Board continuously monitors and keeps informed of the impact and effectiveness of its rules.

59. Architects, professional engineers and land surveyors regularly contact the Board about conditions in the profession and about the effect of or need for Board rules.

UNITED STATES DISTRICT COURT
DISTRICT OF ALASKA

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, PROFESSIONAL, ENGINEERS, AND LAND SURVEYORS, Defendant.	Civil No. A82-423 CIV Filed: 10/12/82 MEMORANDUM OF POINTS AND AUTHORITIES IN SUPPORT OF DEFENDANT'S MOTION TO STAY PROCEEDINGS

I. INTRODUCTION AND SUMMARY

As the Court has previously been informed by letter, shortly after taking office the new Attorney General of the State of Alaska undertook a review of the status of the present case.[1/] As a result of that review, the

1/ Letter to the Court from Robert H. Loeffler and Alan K. Palmer, January 11, 1983.

Attorney General and the defendant Alaska Board of Registration for Architects, Professional Engineers, and Land Surveyors have determined to seek a legislative resolution of the issues raised by the complaint.

Legislation is being prepared which, on behalf of the defendant Board, will be introduced in the very near future for enactment during the current session of the state legislature. The legislation will be designed specifically to approve and implement the provisions of the "competitive bidding" rule challenged in the complaint herein. Enactment of such legislation would conclusively immunize the Board's actions from antitrust liability by virtue of the "state action" doctrine and the principles established pursuant to that doctrine by California Retail Liquor Dealers Association v. Mid-Cal Aluminum, Inc., 445 U.S. 97 (1980), and would thus resolve the controversy between the parties and make continuation of this case pointless.

Accordingly, in order to conserve the resources of the parties and the Court, the Board asked the Department of Justice to join in a request that the Court stay proceedings so as to permit the current session of the legislature to act upon the proposed legislation. The Department refused this request, however, so that the Board now has filed the present Motion.

The limited stay of proceedings that the Board seeks would not unduly prejudice the interests of the Department and would provide an opportunity to resolve the current dispute without the burdens attending discovery and trial. If the current session of the legislature does not enact the proposed legislation, the Board would be prepared to have the case tried on an expedited basis.

II. BACKGROUND: THE STATE-ACTION DEFENSE

The complaint filed by the Department of Justice in this case challenges as unlawful under Section 1 of the Sherman Act, 15 U.S.C. § 1, a rule enacted by the defendant Board -- Rule 36.230(b) -- which prohibits competitive bidding by architects, engineers, and surveyors. One of the key issues in the case is whether the regulation is immune from antitrust attack by virtue of the "state action" doctrine established by Parker v. Brown, 317 U.S. 341 (1943), and subsequent cases.

In the Mid-Cal Aluminum decision, supra, the Supreme Court set out the basic requirements for a state-action defense to be successfully invoked:

> "[There are] two standards for antitrust immunity under Parker v. Brown. First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy': second, the policy must be 'actively supervised' by the State itself."

445 U.S. at 105, quoting from City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410 (1978) (opinion of Justice Brennan).

The Board's position is that inasmuch as it has authoritatively acted for the State in the fashion specified by the Court in Mid-Cal, the standards quoted above have been satisfied and Rule 36.230(b) is exempt from antitrust scrutiny.[2/] The Department of Justice, by contrast, believes action by the Board is insufficient to satisfy the standards of Mid-Cal; according to the Department, those standards can be met only if the state legislature specifically authorizes or establishes a noncompetitive regime.

III. THE STATE ATTORNEY GENERAL'S PROPOSAL

In reviewing this matter, the new Attorney General of the State of Alaska has concluded that the most straightforward and efficient way of resolving the controversy between the Board and the Department would be for the state legislature to enact legislation specifically meeting the Mid-Cal requirements. Although the Board continues to believe that such legislation is by no means necessary to satisfy Mid-Cal, it agrees that such legislation would conclusively resolve the controversy, since even under the Department's view of Parker and Mid-Cal it would definitively establish a valid state-action defense and thus would eliminate any conceivable basis for the current suit. Accordingly, in the interests of expediting resolution of the controversy and eliminating the need for prolonged

---

2/ The Board also asserts several other defenses to the complaint.

litigation, legislation of the sort described above will be introduced on behalf of the Board in the very near future.

IV. BASIS FOR THE BOARD'S MOTION TO SUSPEND PROCEEDINGS

Compared to most antitrust cases, this litigation is not especially complex as a factual matter. Stipulations of fact could be utilized to provide at least most of the record upon which the legal issues involved would be decided.

Nonetheless, substantial time and effort by both parties, and by the Court, would be required to litigate the matter. Agreeing on a complete set of stipulations of fact would not be a simple matter, and some discovery inevitably would be sought. The Department of Justice has in fact already served on the Board a set of interrogatories and a request for production of documents, pursuant to Rules 26 and 34 of the Federal Rules of Civil Procedure; responses to those discovery requests are currently due on January 31, 1983.

In an effort to avoid potentially unnecessary discovery and other pre-trial preparation that similarly may prove unnecessary, the Board asked the Department of Justice to join in requesting that the Court order proceedings stayed pending the outcome of the legislative effort described above. The Board informed the Department that the outcome

of that effort almost certainly would be known by May or June, since sessions of the state legislature historically have ended no later than that time of year. The Department replied, however, that it would not agree to such a stay and that it intended to move for an order requiring compliance with its currently outstanding discovery requests.

The Board is thus in a difficult position. It does not want to be in violation of its obligations under the Federal Rules, yet it believes that a limited stay of proceedings of the sort outlined above makes great sense and offers the best route to an efficient resolution of the case. Accordingly, the Board has moved for an order directing that proceedings herein be suspended until May 31, 1933, for purposes of pursuing a legislative resolution of this matter. The proposed order submitted by the Board also provides that proceedings may be resumed at an earlier date if the current session of the Alaska legislature enacts or rejects the proposed legislation or ends before May 31.

If its proposed legislative solution is unsuccessful, the Board is fully prepared to pursue this litigation -- and to respond to all discovery requests -- under an expedited schedule. 3/ In this way the interest of the Department

---

3/ Should the Court deny the Board's Motion, the Board will undertake to respond to the Department's outstanding discovery requests by whatever date the Court may direct (the Board suggests fifteen days after the Court's order), and will of course otherwise cooperate in moving the litigation forward.

in avoiding unnecessarily lengthy proceedings can be satisfied. Given this willingness, the Board believes that there is no purpose to be served in engaging in the not insubstantial burden of discovery and pretrial preparation at the very time that efforts are being made to resolve the controversy in a way that would make this case totally unnecessary.

V. CONCLUSION

For these reasons, the defendant Board respectfully requests that the Court grant the Board's Motion to Stay Proceedings.

Respectfully submitted,

Alan K Palmer

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND LAND SURVEYORS, Defendants.	Civil No. A 82-423-CIV MEMORANDUM OF THE UNITED STATES IN OPPOSITION TO DEFENDANT'S MOTION TO STAY

I

INTRODUCTION

This memorandum is filed in opposition to the motion of defendant Alaska Board of Registration for Architects, Engineers, and Land Surveyors ("Board") dated January 28, 1983 to stay all proceedings in this case.

Three months after this case was filed and shortly before its discovery commitments were due, defendant, a state licensing board consisting entirely of practitioners, has made a last minute request to stay all proceedings in this case. According to defendant, the purpose of this stay is to permit the Alaska Legislature to consider legislation not yet even introduced, which defendant alleges would "make continuation of this case pointless." Defendant's Memorandum In Support of Motion at 2). Defendant fails to cite any legal authority or establish any factual predicate for its proposed stay. Defendant has failed to discharge its heavy burden of showing that (1) going forward with the litigation would impose on it clear hardship or inequity, and (2) this hardship or inequity outweighs any damage the stay may cause others. Defendant, who has already received two extensions of time in this case and is in default on its discovery obligations, has failed to demonstrate any cognizable hardship or inequity in complying with the Government's discovery requests or fulfilling its undertaking to seek to shorten discovery by stipulation. The requested stay will harm the public interest by prolonging the defendant's manifestly illegal conduct and depriving consumers of the benefits of competition. Furthermore, a stay should not be granted on the basis of mere speculation that legislation may someday be enacted. This is especially true here in view of the fact that the Alaska Legislature recently rejected considerably narrower legislation than that the defendant apparently will now seek.

The Court should therefore deny defendant's motion and enter the Government's proposed order attached to this memorandum.

II

BACKGROUND

This case was filed on October 12, 1982 to prevent and restrain the continuing violation by defendant Board of Section 1 of the Sherman Act, 15 U.S.C. § 1. In particular, the Complaint seeks to enjoin the Board, which consists entirely of competing, private practitioners, from continuing to engage in a conspiracy, the substantial terms of which "have been and are that the defendant promulgate, adopt, publish and distribute a provision in its Rules of Professional Conduct, Rule 36.230(b), prohibiting certificate of registration holders and other architects, professional engineers and land surveyors practicing in Alaska from knowingly soliciting or submitting proposals for professional services on the basis of competitive bidding." (Complaint ¶ 17). The Complaint also alleges that "various other persons not made defendants herein have participated as co-conspirators with the defendant in the violation hereinafter alleged, and have peformed acts and have made statements in furtherance thereof." (Complaint ¶4).

The defendant Board and its constituent professions in Alaska have long been on notice of the issues raised in this lawsuit. Nearly five years ago, in the landmark case of National Society of Professional Engineers v. United States, 435

U.S. 679 (1978), the United States Supreme Court held that a substantially identical competitive bidding ban applying to the engineering profession was illegal per se under the antitrust laws. The Supreme Court stated that "[N]o elaborate industry analysis is required to demonstrate the anticompetitive character of such an agreement . . . . On its face, this agreement restrains trade within the meaning of §1 of the Sherman Act." 435 U.S. at 692-93.

That state licensing boards as well as trade associations were subject to this rule was made clear one month later in United States v. Texas State Board of Public Accountancy, 464 F. Supp. 400 (W.D. Tex. 1978), modf'd of aff'd, 592 F.2d 919 (5th Cir. 1979), cert. denied, 444 U.S. 925 (1979). In that case, the court held that a Texas general enabling statute (strikingly similar to two relied on here by the Board in issuing its price ban, Rule, A.S. §§08.48.101 and 111) was insufficient legislative authority under the state action doctrine to shield a per se illegal competitive bidding ban from the reach of Sherman Act. The court stated that

> In the instant case Rule 14 [the competitive bidding ban] is not mandated by any state regulation or action. Section 5 of the Accountancy Act is cast in permissive, not mandatory, language and, furthermore, only allows adoption of Rules appropriate for maintenance of high standards of integrity in the Accountancy profession. Nowhere in the Act does the State as sovereign mandate the anticompetitive conduct required by Rule 14, nor is such policy dictated by the

> State. Additionally, it cannot be said that Section 5 of the Act in any way concerns or contemplates "the kind of action complained of" here.

464 F. Supp. at 404.

The clear holding in Professional Engineers that competitive bidding bans are per se illegal under the Sherman Act has been widely discussed and understood throughout the engineering and other professions. Numerous professional organizations and state licensing boards have taken steps to repeal their bans on competitive bidding. 1/ In contrast, the Alaskan Board has on several occasions resisted attempts to bring it into compliance with the mandate of Professional Engineers. In December 1980, for example, defendant Board voted to retain Rule 36.230(b), its ban on competitive bidding, despite the recommendation of the Alaska Attorney General that it be repealed. During this same period, as part of its effort Department of Justice commenced an antitrust investigation which led to this litigation. The Department made extensive efforts to contact professional licensing boards to determine whether they still enforced bans on competitive bidding, to dispose of this matter without recourse to suit. Beginning in April 1982 and continuing thereafter, attorneys from the Department

---

1/ E.g., United States v. American Institute of Architects, 1972 Trade Cas. ¶73,981 (D.D.C. 1972) (consent decree). United States v. American Society of Civil Engineers, 1972 Trade Cas. ¶73,950 (S.D.N.Y. 1972) (consent decree); and United States v. American Institute of Certified Public Accountants, 1972 Trade Cas. ¶74,007 (D.D.C. 1972) (consent decree). In May 1982, the West Virginia Board of Accountancy eliminated, among other things, a ban on competitive bidding after being advised the Government would otherwise sue (See attachment 1).

contacted the Attorney General of Alaska or the Board on numerous occasions to discuss the Rule. The Alaska Attorney General again asked the Board to repeal the Rule, but after hearings in June and August the Board voted to retain it in September 1982.

In late September, the Assistant Attorney General in charge of the Antitrust Division authorized filing this lawsuit. Pursuant to the policy of the Attorney General, the Department on September 23, 1983 telephonically contacted the Governor, Attorney General of Alaska and the Board to put all on notice of the Department's intent to sue and to afford all affected parties a final opportunity to amend the Rule without the need of litigation. Since no response was forthcoming, this suit was filed two weeks later.

Since the suit was filed, the defendant has caused several significant delays in this litigation. Because the then Attorney General of Alaska initially took the position that he would decline to represent the Board, the Government in October agreed to defendant's request for a 20-day extension of time to permit it to seek new counsel. In November, the day after the Answer was filed, counsel for the parties met in Washington, D.C. to discuss how to proceed with this case. In order to expedite the case, the parties agreed, among other things, to exchange proposed stipulations on December 17, 1982 and so advised the court. The plaintiff on December 13 served Interrogatories and a Request for the Production of Documents upon defendant and on December 17 served its agreed-upon first draft of stipulations. Defendant, however,

failed to serve its stipulations on December 17. Plaintiff's counsel was told by defendant's Washington, D.C. counsel that the holiday season and scheduling problems were causing delays in preparing stipulations; later the Government was advised that the new Attorney General of Alaska was considering a change of counsel. To date, defendant has failed to respond to the Governments proposed stipulations or fulfill its agreement to propose its own. On January 6, 1983, the Board requested a 30-day extension on defendant's discovery response due on January 13. The Government agreed to a shorter extension - to January 31.

Consistent with Local Rule 5 of the District of Alaska, Plainiff's counsel continued to discuss with defendant's counsel whether answers to discovery would be forthcoming. As late as January 19, 1983, counsel for the defendant represented that they intended to respond to plaintiff's discovery requests by the January 31 due date. On January 25, however, defense counsel reversed its position and instead requested a continuance of the case and a stay of all discovery for four or five months so that the Alaska Legislature could consider enactment of legislation which, according to defense counsel, might affect the outcome of this case. Other than to say that such legislation could, conceivably, moot this case, defendant has failed to furnish additional information about this legislation, provide the Government with a draft or outline of any proposed legislation or comment on the probability as to whether it will be introduced or enacted. Defendant has moved for a stay notwithstanding the

fact that in the 1981-82 session the Alaska Legislature refused to enact legislation, introduced with practitioner support, which would have precluded state, borough, and municipal procurement officers from using competitive bidding for the purchase of architectural and engineering services. This so-called "Little Brooks Act" provision of House Bill No. 156 was of considerably narrower scope than the legislation for which defendant now apparently hopes because it would prohibit only competitive bidding in the public sector.

On January 28, 1983 defendant filed a Motion to Stay Proceedings which, in effect, stated that answering discovery would be fruitless since this Court might grant the requested stay. As a result, on January 31, defendant failed to produce the documentary discovery or interrogatory answers it was obligated to provide first on January 13 and then by agreement on January 31. Defendant never furnished the draft stipulations due on December 17, 1982.

III

ARGUMENT

Defendant bears the burden of showing that its proposed five month stay of discovery and all other proceedings is justified and will not harm the interests represented by Government. As the United States Supreme Court stated in Landis v. North American, Co., 299 U.S. 248 (1936), "the suppliant for a stay must make out a clear case of hardship or inequity in being required to go forward, if there is even a fair

possibility that the stay for which he prays will work damage to someone else," 299 U.S. at 255. Indeed, in Landis the Supreme Court made clear that "the burden of making out the justice and wisdom of a departure from the beaten track lay heavily on petitioners, suppliants for relief . . ." 299 U.S. at 256 (emphasis supplied).

Given these standards, the courts generally disfavor stays which tend to needlessly depart "from the beaten track" and delay the normal course of justice. Landis, supra, at 254-55; Filtrol Corp. v. Kelleher, 467 F.2d 242, 244-45 (9th Cir. 1972), cert. denied, 409 U.S. 1110 (1973), citing CMAX, Inc. v. Hall, 300 F.2d 265 (9th Cir. 1962). See also, McDonnell v. Tabah, 297 F.2d 731 (2d Cir. 1961); Druckman v. Forsyth Furniture Lines, 22 F.2d 59 (4th Cir. 1927); 9 F. Moore & E. Koeber, Cyclopedia of Federal Procedure §§ 28.01-28.12 (3d ed. 1967). Consequently, a defendant applying for a stay has a heavy burden of showing the stay is justified since, as Judge Flannery held in Ellsberg v. Mitchell, 353 F. Supp. 515, 517 (D.D.C. 1973), a plaintiff has the right to prosecute his cause of action without delay. See also, Dellinger v. Mitchell, 442 F.2d 782 (D.C. Cir. 1971). This principle is particularly true in a case such as this where the Government is suing in the public interest to enforce well-defined and consistently applied federal law.

Defendant has not met this heavy burden. Indeed, defendant has not even shown that a stay of discovery and other proceedings "makes great sense and offers the best route to an efficient resolution of the case." (Defendant's Memorandum In Support at 6). A five month delay in a case dealing with per se illegality where discovery has already started, which, according to defendant (Memorandum In Support at 3) "is not especially complex as a factual matter," and where discovery will be necessary regardless of legislative action is hardly "efficient". Nor does it make "great sense" to permit a state board comprised of practitioners to maintain and enforce a price ban for their own benefit at the expense of the Alaskan economy. Rather, the facts indicate that granting the proposed stay would be inequitable, harmful to the public, and a needless waste of time. The efficient way to handle this case is to get on with it, to answer discovery, and to submit motions for summary judgment.

A. Defendant Has Not Shown Clear Hardship or Inequity In Being Required To Go Forward

Defendant has not met the heavy burden it bears under Landis of showing hardship or inequity in going forward with this case. Indeed, its moving papers are totally devoid of any showing of hardship or inequity in responding to the Government's discovery requests. This failure in and of itself requires denial of defendant's motion, putting aside for the moment the fact that, as discussed below, any colorable claim

of hardship by defendant would be outweighed by the significant harm to the public caused by continuing the competitive bidding ban.

That proceeding with this litigation would not give rise to any cognizable hardship or inequity is evidenced by the fact that, until this motion was filed, the parties were proceeding with a mutually agreed upon discovery schedule which would have brought this case to resolution within the very five month period for which defendant now seeks a stay. The parties had notified the Court of this schedule and plaintiff had undertaken to serve discovery requests and proposed stipulations. That defendant suddenly decided, on the eve of its deadline for complying with discovery requests, that going forward with this case was a "potentially unnecessary expenditure of resources" (Motion at 2) suggests that the proposed stay was not so much needed to prevent "hardship" or "inequity" as to delay some embarrassing discovery.

Weighing the effects of the stay on the government's important law enforcement interests in prosecuting this case, there can be no dispute that the stay would disrupt and protract pretrial proceedings already under way, would put off motions for summary judgment and would preclude any settlement discussions. Plaintiff has already made considerable effort to serve reasonable discovery requests and defendant concedes that it could respond to that discovery on 15 days' notice. (Memorandum In Support at 6, n.3). Given that the main

discovery can be completed in a short time, it cannot impose such burden on defendant to go forward with discovery responses it was originally obligated to provide by mid-January.

On the other hand, if defendant is permitted to withhold its discovery responses and, as happened in the past, it does not obtain the complete legislative relief it hopes for, the progress of this case will have been seriously slowed and plaintiff's efforts to expedite trial preparation inappropriately frustrated. Thus, the only risk of "hardship" or "inequity" attendant to defendant's motion occurs if the stay is granted.

Finally, it is clear that in any weighing of the equities in this matter, defendant has failed to sustain its burden under Landis. Indeed, inconvenience to defendant resulting from going forward with this case is of defendant's own making. Defendant has had over four years to seek the legislation it is now proposing, and yet, despite clear notice, did not do so. Moreover, defendant can hardly claim surprise at the institution of this litigation, having at least three times since the Supreme Court's decision in Professional Engineers disregarded the advice of the Attorney General of Alaska to repeal its competitive bidding ban. Finally, having already caused two lengthy delays in this case and appearing in default on its discovery obligations, 2/ defendant can

---

2/ See Plaintiff's Motion For Order Compelling Discovery, filed February 14, 1983.

hardly be said to suffer "inequity if ordered to proceed in this case." Landis, 299 U.S. at 255-56.

B. The Proposed Stay Would Harm The Public

Even if the Court found some hardship or inequity to defendant in having to go forward with this litigation, defendant clearly has not sustained its heavy burden given the demonstrable harm the public would suffer from the proposed stay.

The Supreme Court in Professional Engineers held that bans like Alaska's are illegal per se under §1 of the Sherman Act because they inevitably cause serious economic harm. 3/ They severely inhibit the way architects, professional engineers, and land surveyors would otherwise compete. They prevent consumers from receiving and practitioners from giving competitive bids. They inevitably raise prices, add to inflation, and misallocate resources.

Such restrictions are illegal per se because they transgress the fundamental national policy of free competition which Professional Engineers reconfirmed is embodied in the Sherman Act:

> The Sherman Act reflects a legislative judgment that ultimately competition will not only produce lower prices, but also better goods and services. "The heart of our national economic policy long has been faith in the value of competition." Standard Oil Co. v. FTC, 340 U.S. 231, 248. The assumption that competition is the best method of allocating resources in a free market recognizes that all elements of a bargain -- quality, service, safety, and durability -- and not just the immediate cost, are favorably affected by the free opportunity to select among alternative offers. Even

---

3/ The Supreme Court confirmed in Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647 (1980), that competitive bidding bans are per se illegal.

assuming occasional exceptions to the presumed consequences of competition, the statutory policy precludes inquiry into the question whether competition is good or bad. 435 U.S. at 695.

As Justice Blackmun cogently stated in his concurring opinion in Professional Engineers:

> As petitioner concedes, § 11 (c) [the competitive bidding ban] forbids any simultaneous consultation between a client and several engineers, even where the client provides complete information to each about the scope and nature of the desired project before requesting price information. To secure a price estimate on a project, the client must purport to engage a single engineer, and so long as that engagement continues no other member of the Society is permitted to discuss the project with the client in order to provide comparative price information. Though § 11 (c) does not fix prices directly, and though the customer retains the option of rejecting a particular engineer's offer and beginning negotiations all over again with another engineer, the forced process of sequential search inevitably increases the cost of gathering price information, and hence will dampen price competition, without any calibrated role to play in preventing uninformed bids. 435 U.S. at 699-700 (emphasis added; citation omitted).

Despite this clear precedent, defendant has continued to actively monitor compliance with its ban on competitive bidding. As recently as October 1982, shortly after the filing of the Complaint, Wallace Wellenstein, a member of defendant board, approached the Anchorage School Board on behalf of defendant and indicated that procurement regulations the School Board was considering enacting would violate defendant's competitive bidding ban. In March 1982, several members of defendant contacted the Administrator of the City of Sitka and

told him that Sitka, by requesting bids on an addition to the city library, was in violation of defendant's rules and was making "outlaws" of defendant's certificate of registration holders. These two incidents indicate that the Board intends to continue to enforce compliance with the Rule. Nothing in defendant's moving papers suggest anything to the contrary.

Furthermore, even if defendant did not actively enforce the Rule during the stay, the continued presence of the Rule alone would effectively deter competitive bidding and hence persist in depriving the people in Alaska of the benefits of competition. For example, practitioners frequently cite defendant's ban to discourage purchasers who ask for competitive bids. Subsequent to the filing of the Complaint, Harley Hightower, representing the Alaska Chapter of the American Institute of Architects, urged the Anchorage School Board not to adopt regulations which would have authorized the use of competitive bidding in the procurement of architectural and engineering service in part because "presently the state law prohibits architects and engineers from bidding so we would be in violation of laws even though this law has been challenged . . . ." (See Attachment 2).

Hence, if the stay is granted the defendant's Rule will continue to harm the public for at least another five months, perhaps longer, despite the Supreme Courts' ruling nearly five years ago that the practice was illegal per se under the Sherman Act. In sum, the Government respectfully submits that with

regard to this proposed stay, as was the case in Landis, "[r]elief so drastic and unusual overpasses the limits of any reasonable need, at least upon the showing made when the motion was submitted." 299 U.S. at 257. A proceeding at equity should not become an instrument for private gain by those practitioners who seek by their motion to extend the life of the price bidding ban.

C. A Stay Based On Such Uncertain Circumstance Is Inappropriate And Would Needlessly Delay The Case

Without discussing the content or likelihood of passage of legislation, defendant forecasts events which will purportedly obviate the need for the Government's requested relief. At a minimum, the following sequence of events would have to occur under defendant's scenario: (1) Someone will sometime in the future introduce legislation in the Alaska Legislature which will require the Board to promulgate a rule identical to its present ban on competitive bidding; (2) that legislation will be enacted promptly and without any significant amendment or revision; (3) the Governor of Alaska will sign such a bill; and (4) on the basis of that legislation this Court, after an appropriate hearing, will then conclude that California Retail Liquor Dealers Assn. v. Mid-Cal Aluminum, Inc., 445 U.S. 97 (1980), is controlling and that this case is moot. 4/

4/ Midcal provides that there are "two standards for antitrust immunity under Parker v. Brown. First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the State itself.'" 445 U.S. at 105 (citation omitted).

This is too uncertain and speculative a basis for staying this litigation.

The fact that the Board has been on notice of the antitrust deficiencies in its competitive bidding ban for over four years and that the Legislature has already refused to enact an even less restrictive statute than the one the Board now seeks makes defendant's hoped for legislative bailout all the more speculature. The argument that such legislation would pass is predicated on the assumption that, contary to the experience of the last legislative session, the legislature will vote to eliminate the possibility for public and private purchasers to reduce the costs they pay for architectural, engineering, and land surveying services through competitive bidding. 5/

5/ The tenuousness of that assumption is also evidenced by the testimony of Charles Torkko, President of the Consulting Engineer Council of Alaska and one of the major proponents of the "Little Brooks Act" provision at the last legislative session, concerning the proposed repeal of the Rule:

> [O]ne of the difficulties that we faced [in getting the Little Brooks Act enacted] was State administrative pressure on the legislature that demanded from the Governor's Office an alternative to the final procedure for sequential negotiations with the topped rank firm. If those failed, they demanded that there would be an option for concurrent negotiations with the three top firms. We felt that this was in violation of the concept and the regulations and the intent of the efforts that we have been working for the State of Alaska and could not support that."

In sum, in these circumstance it is inappropriate to stay litigation on the mere possibility that controversial legislation will someday be enacted; moreover, given the recent experience in the legislature it is clear that there is no substantial likelihood that defendant's hoped for legislation will be passed.

Even if legislation completely forbidding competitive bidding by all engineers, surveyors and architects is enacted, it is not at all clear that this suit will be automatically mooted. At the very least plaintiff would be entitled to ascertain through discovery whether the defendant's conduct is allegedly illegal activity has indeed been "immunized". Thus it seems that the only certain result of granting a stay would be to delay this litigation.

IV.

CONCLUSION

Defendant has not met its burden of showing that the proposed stay is justified. Indeed, there is no good reason to stay proceedings and plaintiff's discovery. Defendant's motion should therefore be denied.

UNITED STATES DISTRICT COURT
DISTRICT OF ALASKA

UNITED STATES DISTRICT COURT
DISTRICT OF ALASKA

By.....

UNITED STATES OF AMERICA, Plaintiff, v. ALASKA BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND LAND SURVEYORS, Defendant.	Civil No. Filed: 15 U.S.C. §1 (Antitrust Violation Alleged) 15 U.S.C. §4 (Equitable Relief Sought)

COMPLAINT

The United States of America, plaintiff, by its attorneys, acting under the direction of the Attorney General of the United States, brings this civil action to obtain equitable relief against the above-named defendant and complains and alleges as follows:

I

JURISDICTION AND VENUE

1. This complaint is filed under Section 4 of the Sherman Act, as amended (15 U.S.C. §4), in order to prevent and restrain the continuing violation by the defendant, as hereinafter alleged, of Section 1 of said Act (15 U.S.C. §1).

2. The defendant, Alaska Board of Registration for Architects, Engineers, and Land Surveyors (hereinafter referred to as the "Board"), maintains its principal office, transacts business and is found within the District of Alaska.

II

DEFENDANT

3. The Board is made the defendant herein. The Board is comprised of practicing architects, professional engineers, and land surveyors and is organized and exists under Section 3 of

Chapter 179 of the 1972 Session Laws of Alaska, as amended (Alaska Statutes § 08.48.011 et seq.). The Board maintains its principal office in Juneau, Alaska.

III

CO-CONSPIRATORS

4. Various other persons not made defendants herein have participated as co-conspirators with the defendant in the violation hereinafter alleged, and have performed acts and have made statements in furtherance thereof.

IV

TRADE AND COMMERCE

3200

5. There are approximately 2100 architects, professional engineers and land surveyors, more than one-half of whom are residents of states other than Alaska, licensed to practice in Alaska. These persons provide architectural, professional engineering or land surveying services to individuals, private businesses and governmental entities in Alaska. These services include the design, study and supervision of the construction of buildings, roads, bridges, dams, industrial plants and other structures. Over $17 million dollars are spent annually by Alaska residents and governmental entities for such services.

6. The Board is the sole licensing authority for the practice of architecture, professional engineering and land surveying in the State of Alaska. The Board administers written examinations and otherwise supervises the qualification, certification and registration for practice within the State of Alaska of resident and nonresident architects, professional engineers, land surveyors and corporations offering architectural, professional engineering or land surveying services. Upon payment of a fee, the

Board annually issues certificates of registration to all properly certified or registered architects, professional engineers, and land surveyors.

7. It is unlawful in Alaska for individuals to practice or offer to practice the profession of architecture, professional engineering or land surveying, or to represent that they are architects, professional engineers or land surveyors unless they have been properly certified or registered by the Board and hold a current Board certificate of registration to practice architecture, professional engineering or land surveying in Alaska.

8. The Board consists of nine members appointed to six-year terms by the Governor of Alaska. Three of the Board members must be architects, one must be a land surveyor, two must be civil engineers, one must be a mining engineer, and two must be engineers from other branches of the engineering profession. Board members must have been residents of Alaska for at least three consecutive years before their appointments. Board members must hold Board certificates of registration and have a minimum of five years of professional practice in their respective fields. While serving their membership terms, Board members may, and do, continue to engage in the practice of architecture, professional engineering or land surveying in Alaska. Board members are compensated on a per diem basis when attending to the work of the Board. In addition, Board members are entitled to receive travel expenses incurred in carrying out their duties.

9. Pursuant to the terms of Section 3 of Chapter 179 of the 1972 Session Laws of Alaska, as amended, the Board may promulgate and amend a code of ethics or professional conduct for architects, professional engineers, and land surveyors.

Under Alaska law, the Board, except in emergencies, must hold a public hearing or proceeding before promulgating or amending its code of ethics or professional conduct. The laws of Alaska are silent as to the form or content of any such code of ethics or professional conduct and neither direct, require, nor mandate restrictions upon, or the regulation of, price competition in the offering of architectural, professional engineering, or land surveying services. Nor has any policy of restricting or regulating price competition in the offering of architectural, professional engineering or land surveying services been established or dictated by the State of Alaska.

10. In 1974, the Board adopted "Rules of Professional Conduct" intended to regulate the practice of architecture, professional engineering and land surveying in Alaska. Among the Board's rules is Rule 36.230(b), which provides that an architect, professional engineer or land surveyor may not knowingly solicit or submit proposals for professional services on the basis of competitive bidding. This rule is still in effect. In December, 1980, the Board rejected a proposal to repeal Rule 36.230(b). In May, 1982, the Board refused to repeal Rule 36.230(b) on an emergency basis. In September, 1982, the Board voted to retain Rule 36.230(b).

11. Section 3 of Chapter 179 of the 1972 Session Laws of Alaska, as amended, provides that the Rules of Professional Conduct of the Board shall be made known in writing to every registrant and applicant for registration and shall be published with the roster of registrants, which the Board must annually publish, mail to registrants and state, borough, and city officials and distribute or sell to the public. Board Rule 36.240(b) provides that an architect, professional engineer or land surveyor having knowledge or reason to believe that another person or corporation may be in violation of any

of the Rules of Professional Conduct shall present that information to the Board in writing and shall cooperate with the Board in furnishing such further information or assistance as may be required.

12. The Board is authorized by Section 3 of Chapter 179 of the 1972 Session Laws of Alaska, as amended, to take disciplinary action against any Board certificate of registration holder who violates any of the Rules of Professional Conduct. Such disciplinary action may include the reprimand of a registrant or corporation or the suspension, refusal to renew, or revocation of the offender's certificate of registration.

13. The architectural, professional engineering and land surveying services provided by the Board certificate of registration holders involve and affect individuals, corporations and other business entities throughout the United States. These services facilitate, direct and shape the conduct of interstate business and contribute directly to the flow of persons, money, goods and services into and out of the State of Alaska.

14. In the course of rendering architectural, professional engineering and land surveying services, Board certificate of registration holders located in Alaska often travel to states other than Alaska and make substantial use of interstate mail and wire services in the transport of funds, documents, plans, reports, plats, drawings and other communications throughout the United States. In addition, many certificate of registration holders located outside Alaska perform architectural, professional engineering and land surveying services within Alaska.

15. The activities of the Board and its certificate of registration holders, as described herein, are within the flow

of interstate commerce and have a substantial effect upon interstate commerce.

V

VIOLATION ALLEGED

16. Beginning at least as early as 1974, and continuing up to and including the date of the filing of this complaint, the defendant and co-conspirators have been engaged in a combination and conspiracy in unreasonable restraint of the aforesaid interstate trade and commerce in violation of Section 1 of the Sherman Act. Said violation is continuing and will continue unless the relief hereinafter prayed for is granted.

17. The substantial terms of said agreement, understanding and concert of action have been and are that the defendant promulgate, adopt, publish and distribute a provision in its Rules of Professional Conduct, Rule 36.230(b), prohibiting certificate of registration holders and other architects, professional engineers and land surveyors practicing in Alaska from knowingly soliciting or submitting proposals for professional services on the basis of competitive bidding.

18. For the purpose of effectuating the aforesaid combination and conspiracy, the defendant and co-conspirators have done those things which, as hereinbefore alleged, they agreed and conspired to do.

VI

EFFECTS

19. The aforesaid combination and conspiracy has had the following effects, among others:

(a) Competition in the sale of architectural, professional engineering and land surveying services has been suppressed and eliminated;

(b) Consumers of architectural, professional engineering, and land surveying services have been deprived of the benefits of free and open competition in the sale of such services; and

(c) Architects, professional engineers, and land surveyors have been restrained in their ability to make their services readily and fully available to customers requiring such services.

PRAYER

WHEREFORE, plaintiff prays:

1. That the Court adjudge and decree that the defendant and co-conspirators have engaged in an unlawful combination and conspiracy in restraint of the aforesaid trade and commerce in violation of Section 1 of the Sherman Act.

2. That the defendant, its members and all other persons acting or claiming to act on its behalf be enjoined and restrained from, in any manner, directly or indirectly, continuing, maintaining or renewing the aforesaid combination and conspiracy or from engaging in any other combination, conspiracy, contract, agreement, understanding or concert of action having similar purposes or effects, and from adopting, ratifying or following any practice, plan, program or device having similar purposes or effects.

3. That the defendant, its members and all persons acting or claiming to act on its behalf be enjoined and restrained from promulgating, publishing, distributing or otherwise

suggesting, and from adhering or agreeing to adhere to, any rule prohibiting competitive bidding by Board certificate of registration holders.

4. That the defendant be required to cancel Rule 36.230(b) of its Rules of Professional Conduct and every other resolution or statement of policy which has as its purpose or effect the suppression or elimination of competitive bidding by Board certificate of registration holders.

5. That the defendant be required to notify all Board certificate of registration holders, the general public, and all Alaska city, borough, and state officials that it has cancelled and rescinded Rule 36.230(b) of its Rules of Professional Conduct and every other resolution or statement of policy which has as its purpose or effect the suppression or elimination of competitive bidding by Board certificate of registration holders.

6. That the plaintiff have such other and further relief as the Court may deem just and proper.

7. That the plaintiff recover the costs of this suit.

RECEIVED 3-22-83

March 17, 1983

Representative Mike Szymanski
Pouch V
Juneau, Alaska 99811

Dear Mike:

John and I have read over House Bill No. 211 concerning architectural and engineering services. The procedures outlined sound pretty much like the way things have been handled lately, at least as far as our recent experience is concerned.

I would think something in the bill giving guildlines as to how "fair and reasonable prices" are determined might be helpful. Most national professional organizations, such as the National Society of Professional Engineers or American Institute of Architects have booklets to help owners determine fee ranges for project types.

On page 2 of the bill, line 23 makes reference to "bids". A bid is usually a monetary figure and would then seem to conflict with other portions of the bill. Possibly "offers of or proposals for" would be more suitable language.

Thanks for allowing me the time to comment on this legislation which affects an area of direct impact on my profession..

Sincerely,

CENTURY ENGINEERING, INC.

STATE OF ALASKA

THE ALASKA PUBLIC UTILITIES COMMISSION

Before Commissioners: Gordon J. Zerbetz, Chairman
Marvin R. Weatherly
Carolyn S. Guess
Susan M. Knowles

In the Matter of the Reasonableness and Propriety of the Interfund Charges Borne by the MUNICIPALITY OF ANCHORAGE Telephone, Electric, Water and Sewer Utilities	U-76-26 ORDER NO. 2

ORDER APPROVING INTERFUND METHODOLOGY

On May 3, 1976, the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT (ML&P), ANCHORAGE TELEPHONE UTILITY (ATU) and the ANCHORAGE WATER UTILITY (AWU) was advised of the information to be provided with the Commission at a public hearing on June 1, 1976, for the purpose of determining the justness and reasonableness of the interfund charges paid to various departments within the Municipality by the above named utilities. The burden of proof that the interfund charges paid by ATU, ML&P and AWU were based on reasonable methodology and accurate allocation factors under the affiliated interest transactions as stated in AS 42.05.511(c) was to be borne by the Municipality.

JURISDICTION

The Municipality asserted, prior to the examination of the interfund charges, its belief that the affiliated interest section of the statute, AS 42.05.511(c), did not specifically affect the Municipality whose departments

provide services to the utilities. It was argued that no profit is to be earned by the Municipality through the interfund charges; there is no majority shareholder as in a private corporation; and the interfund charges must be approved through the budgetary process by the appropriate legislative body. The staff of the Commission contended that the Municipality does fall under the provisions of the statute by providing services to and receiving payment from each of the subject utilities and that the Municipality should bear the burden of proof that these charges are just and reasonable. The Commission concurs with the staff's position.

GENERAL BACKGROUND

The government entity which provided services to the above named utilities in 1974, 1975 and for the first nine months of 1976 is conceptually a different entity than is in existence today and on which the proposed 1976 budget of the Municipality is based. For the purpose of this proceeding the test year under consideration was 1975. The charges to the utilities in that year, by the providing departments of the Municipality, were used to ascertain the reasonableness and accuracy of the allocations of interfund charges. These charges were budgeted in 1974 for 1975 under the existing City of Anchorage government. The test year 1975 was used because of the permanent rate requests by ATU, ML&P and AWU pending before this Commission. For the most part, their request is based on this test year. In addition, the fact that the unified government, known today as the Municipality of Anchorage, has been in existence a relatively

short time, the workload of various departments has changed substantially, and the new government is in effect in a transitory state, make an examination of the budgeted 1976 interfund charges inappropriate at this time.

The testimony of the Municipality strongly recommended that a re-evaluation of the methodology of determining interfund charges and of the appropriateness of the existing allocation factors was of paramount importance for the 1977 fiscal budget of the Municipality. Every department should be analyzed as a result of the unification of the former City of Anchorage and the Greater Anchorage Area Borough now known as the Municipality of Anchorage. Various functions and responsibilities within some departments of the new Municipality have undergone major changes. These changes have affected the kinds of services provided as well as the methods used for allocating costs for services to any or all of the utilities.

The need for a study which would thoroughly review each department within the Municipality and examine the interfund procedure has been addressed by Arthur Young and Company in the course of a data processing study.

In light of unification, examination of services which might better be performed outside the Municipality through the contracting procedure should be made. There appear to be three possible courses of action for the utilities regarding the purchase of services from within the Municipality. One, the interfund charges could continue to be handled in the same manner as previously done by the City. This would require that the methodology and allocation

factors be updated in terms of a unified government. Two, the utilities could provide some or all of the services to themselves that are now being provided by the Municipality. Three, there could be services that should be contracted outside the Municipality. In addition, the subject of the appropriateness of interfund charges for the sewer utility should be addressed. If the refuse service provided by the former City of Anchorage comes under the jurisdiction of this Commission, interfund charges to that utility must also be examined.

For the purpose of this hearing the Municipality defined interfund as a charge by one department within the municipal government (whether the former City of Anchorage or the present Municipality of Anchorage) to another department within the government for services performed. The Municipality submitted Exhibits 1 and 2 which provided the budgeted and actual amount of interfund charges to ATU, ML&P, AWU and the general government unit (which includes those departments receiving monies from the general fund) and the total amount of all budgeted and actual interfund charges for the years 1974 and 1975. Exhibit 3 provided the budgeted interfund charges for the year 1976. The Uniform System of Accounts has been used since 1973 for the preparation of the 1974, 1975 and 1976 budget.

The budgetary process includes input from the supervisory personnel within each department, the review of the City Budget Officer (now the Chief of Management Services for the Municipality in the Office of Budget and Management), any refinement or change to be made by the

Office of the City Manager (now by the Office of the Mayor) and submission to the City Council (now the Municipal Assembly) for its approval. The implementation of methodology and allocation factors regarding interfund charges are based on the approved budget document for the appropriate fiscal year.

It should be noted that the interfund charges were a subject of audit by the external auditor hired by the governmental body. The appropriateness of ATU's interfund charges was also reviewed by RCA Alaska Communications, Inc., in its determination of the separation and distribution of toll revenues. In addition, the State performed auditing functions for particular grant money that the Municipal government receives.

During the hearing there was testimony that in some instances charges are made to each of the utilities by a department not listed on Exhibits 1 through 3. For example, a service provided a utility by the Department of Public Works at the request of the utility is paid for by a transfer of equity in the cash pool. A reimbursable work order form, Exhibit 29, illustates the procedure to be utilized in this regard. Bills for services provided by the utilities to other departments within the government are also paid by a transfer of equity in the cash pool.

In Order No. 1 the Commission required the Municipality to provide a copy of any written instructions to the appropriate person within each department calculating the interfund charges. Exhibit 27, Interfund Criteria Information, was provided as well as Exhibit 28, a copy of the 1975

annual budget which explained the "charges to others" within each department. The individual computing the budgeted and actual interfund charges and the methodology and allocation factors for those charges were provided in Exhibits 4 through 25 as required by Order No. 1. Also included in these exhibits were comparable charges, where available, and time sheets and other recordkeeping data, when used.

The Commission commends the Municipality on the thoroughness of its prefiled testimony and the presentations made by the witnesses during the hearing and will discuss each department providing services to any or all of the subject utilities in 1975. For the purpose of this discussion reference will be made to the titles of individuals and the governmental unit based on the former City of Anchorage. Where appropriate, reference will be made to the existing municipal government. It is the intention of the Commission that this discussion may be beneficial to those individuals who will review and study the interfunded services and charges in the new unified government.

The transfer of interfund charges is done monthly on the basis of the actual costs to the providing department. Any end of the year adjustments either upward or downward are made in accordance with the allocation factors outlined within each department. Reference has been made to final charges in some of the exhibits for the 1975 test year. Generally speaking, these refer to charges incurred by departments as a result of unification and these charges were not interfunded to the utilities.

MAYOR AND CITY COUNCIL

The method for calculating the budgeted interfund charges from the Mayor and City Council to each of the subject utilities was developed by the City Budget Officer in 1972. His judgment based on observation of work sessions and City Council meetings was used to apportion the [illegible] workload of the Mayor and City Council into the following categories:

Agenda relating items	50%
Personnel functions	20%
Maintenance and operations budget	15%
Capital improvement program	15%

Within these categories of workload the City Budget Officer established the allocation factors for each utility on an annual basis.

The City Budget Officer analyzed the final agendas of 8 City Council meetings in different months of 1974 to establish the percentage of agenda items relating to each utility. The charges to each utility for the workload of Mayor and City Council relating to personnel functions were expressed as a percentage of the projected authorized positions for each utility in relation to the total authorized positions for the City. The charges for the maintenance and operations budget and for the capital improvement program were expressed as a percentage of each utility's budget in relation to the entire maintenance and operation budget and capital improvement program for the City. These percentages were weighted and applied to the actual 1975 expense of this department by the Controller Division.

In addition, each utility was charged $600 as its cost for the expenses of its advisory board. These

lay boards met monthly, and their members were paid a small stipend. The determination of these charges was made by taking the total amount of monies expended to the City boards and commissions and dividing it by 20. (There were 20 advisory boards.)

This department has undergone substantial change as a result of unification, and Exhibit 3 illustrates the separation of the Assembly from the Mayor/Manager Department for interfund purposes. The appropriateness of the workload categories and the accompanying allocation factors for each utility should be examined for the 1977 budget year.

CITY MANAGER

The calculation of interfund charges for services provided by this department to the utilities was the responsibility of the City Budget Officer. The allocation of workload was made to the identical categories as those in the Mayor and City Council Department. The percentage of time allocated to those categories varied slightly. The reason for this was that the personnel within this department were asked for their evaluation of time spent on work relating to these categories. The judgment of the City Budget Officer who had spent five months as Assistant City Manager, in addition to his observations of work sessions and City Council meetings, was also a criterion.

Within each category, (agenda related activities, personnel functions, maintenance and operation budget, and capital improvement program) the percentage of workload for each utility was calculated in the same manner as for the Mayor and City Council. The actual expense to each utility was calculated by the Controller Division who applied the

weighted percentage to the actual expense of the City Manager's Office less the dollars attributable for one administrative assistant and secretary whose specialized tasks had provided no service to the utility.

In 1975 the expense of this department included the functions of Labor Relations Specialist, Equal Employment Officer and Public Information Officer. It should be noted in the budgeted interfund charges for fiscal year 1976 that some of these functions have been removed from this department and the City Manager is combined with the Mayor. An evaluation for the 1977 budgeted interfund charges will be necessary for this department.

The City Budget Officer gave testimony that a time study had been attempted for this department but was not successful because the personnel did not accurately or adequately fill out the time sheets. Time cards were also proposed at one time for the Mayor and City Council but this idea was rejected.

INTERNAL AUDIT

The calculation of interfund charges from this department was the responsbility of the Internal Auditor working with the City Budget Officer. The actual interfund charge to the utilities was calculated by multiplying the actual auditor hours spent on each utility by the predetermined cost per hour. The hourly charge was based on the salaries and overhead of the department as outlined in Exhibit 6a. Testimony was received that the hourly rates charged by this department are readjusted as personnel changes and pay increases for Municipal employees take

effect. Exhibits showing that substantially higher costs would be incurred if these services were purchased outside the Municipality were provided. The Internal Auditor, who calculates the actual charges of this department, has an on-going workload and is able to estimate with accuracy his charges to others for budgetary purposes. He also works with staff of various departments to help determine his costs based on their needs.

COMMUNITY PROMOTION

The calculation of interfund charges from this department were performed by the Public Information Officer and the City Budget Officer on the basis of two costs: one, the cost of membership to the City in the Alaska Municipal League and the Alaska Chamber of Commerce and, two, the space distribution in the 1974 annual report.

The determination of each utility's cost for the Municipal League and Chamber memberships was allocated on the ratio of the number of employees per utility to the total number of City employees. The allocation for space in the annual report was expressed as a percentage of each utility's space in relationship to the entire cost of the annual report.

Testimony was given that through an inadvertent error the cost of the membership fees was not interfunded for the 1975 test year. It is the intention, however, of the Municipality to allocate the expense of these memberships in the future. In addition, the Municipality has decided to discontinue the publication of the annual report after 1975.

CITY CLERK ADMINISTRATION

The calculation of these interfund charges was the responsibility of the City Clerk working with the City Budget Officer. The services provided by the City Clerk to the subject utilities in this docket are the costs incurred by the Clerk's Office in providing services to the utility advisory boards and commissions. These services include recording secretaries, transcribing minutes, overhead, mailing, etc. The actual charge, calculated by the Controller Division, was based on 1/20 of the total cost of providing services to all of the City boards and commissions. There was testimony that in the future these charges will not be interfunded but will be services provided internally by each utility.

CITY CLERK - RECORDS RETENTION

The calculation of these interfund charges was the responsibility of the City Clerk working with the City Budget Officer using their previous experiences in providing the service of microfilming records of various departments. The actual charges were for the services received, and the cost was determined on an hourly charge based on salaries and overhead. The form for a participating department to request microfilming was provided as Exhibit 32. Time sheets were kept by the personnel in this department for the calculation of the actual cost. When budgeting for this service, a utility would consult with the City Clerk, Records Retention personnel to determine, based on the requested work, what the projected costs would be. It is noted that for the test year 1975 there were no charges to AWU and very minimal charges to ATU and ML&P.

CITY ATTORNEY

The calculation of these charges was the responsibility of the City Attorney working with the City Budget Officer and the actual charges were calculated by the Office of the City Attorney. A retainer was charged to each utility and the Port as its portion of the maintenance of the City Attorney's files, referer ce library and overhead. It should be noted that there was no retainer allocated to the general government departments. The attorney time was allocated at $60 a billable hour, for the year 1975; each attorney kept a record of his workload attributable to the utilities. Testimony was given that at the present time and for the test year 1975, there was no form for the attorneys to fill out, and in some instances time keeping was noted on desk calendars and in other inappropriate ways. Various expenses associated with litigation were allocated to the appropriate utility. The City Budget Officer stated in the event of a monetary award by the Courts in favor of a utility those monies were directly apportioned to that utility.

If a utility would contract with an attorney outside the City Attorney's staff, the cost associated in this matter would be billed directly to the utility.

PROPERTY MANAGEMENT

The calculation of interfund charges by this department was done by the Property Management Officer working with the City Budget Officer. This division is the Office of Record for all real property including rights-of-way, buildings and any non-movable equipment that is Municipal property.

A retainer was charged to each utility and the general government unit which covered the salary, benefits and space allocated to the Records Clerk. The volume of records kept for each utility and general government unit was a factor taken into consideration in determining the retainer. The retainer was instituted by the City Attorney in 1974, when Property Management came under his supervision. It is now separate and the reasonableness of the retainer should be re-evaluated.

The actual interfund charge was the budgeted retainer plus the actual charge of $17.50 an hour for appraising and right-of-way land acquisition. The hourly cost was based on an analysis by the Internal Auditor of the salary and overhead in this department. The Property Management Officer and the Controller Division calculated the actual charges.

The Municipality provided through Exhibit 11a comparable hourly costs of independent appraisers. The charge by the property management division to each utility was significantly less than the cost charged by an independent appraiser.

ADMINISTRATIVE SERVICES, ADMINISTRATION

The calculation of these charges was the responsibility of the City Budget Officer in consultation with the Assistant City Manager, Administrative Services, the Staff Accountant, and the Financial Management Systems Accountant. The charges to the utilities were expressed as a percentage of the total workload of the above mentioned personnel. Their workload was analyzed by the City Budget Officer

utilizing his best estimate and expertise based on the time these individuals spent on utility matters in four areas: current operating budget; existing capital improvement program; projected bond sales; use of the computerized accounting system. The actual charge, calculated by the Controller Division, was determined by applying the weighted percentages to the actual 1975 expense of this department. The actual charges for 1975 were less than the budgeted amount. The reason given was that vacancy factors were greater than budgeted, so the interfund charges were adjusted backwards on the basis of the calculated weighted percentages. The personnel of this department review their work load annually with the City Budget Officer to determine the percentage of time spent on utility matters.

This department is the Office of Management and Budget for the 1976 budget year.

CONTROLLER

The calculation of the interfund charges of this department, which was the general accounting arm of the City, was the responsibility of the Controller and staff working with the City Budget Officer.

Three categories of costs are analyzed to determine the percentage of time spent on utility matters. The first category, regular charges, (accountants' time in the general accounts payable category), allocated its costs for the 1975 test year based on desk audit time studies performed over a one month period. The Controller selected the time period and both daily and hourly time studies were

performed. Exhibit 13a was provided, which was the desk audit time sheets for November 1974. The employees were responsible for interpretation of workload and filling out time sheets.

The second category was the payroll system. The allocation factors for each utility were arrived at by determining, through desk audit time studies for a month and an analysis of payroll transactions for each utility, the workload for each utility expressed as a percentage of the total workload of this division.

The third category was the financial management system (FMS), and these costs were allocated on the basis of desk audit time studies over the same monthly period along with an analysis of the FMS transactions for each utility. This included computer machine time that the Controller used for each utility in addition to those charges allocated directly by the data processing department through the interfund process. The weighted average of the allocation percentages in each of the three categories, regular charges, payroll systems, and FMS was applied to the actual 1975 controller expense, and calculated by this department.

TREASURY

The calculation of the interfund charges of this department was the responsibility of the Treasurer and staff working with the City Budget Officer.

The Treasury was responsible for the receipt and custody of all funds for the City, including utility monies. The Treasurer, supervisor of this department, was responsible for the investment of all funds including utility bond

funds and handles all street and water assessments. Exhibit 30 was provided to show the monthly reports made by the Treasurer indicating the status of all cash and investments of the Municipality.

There are three sections under the Treasury Department: Receipts and Custody, Parking Violations and Assessments. The Treasurer made the determination that half of the administrative expense of this department be allocated as overhead equally to these three sections. This allocation became a part of the costs of service provided by each section.

Charges to each of the subject utilities for services rendered by the Receipts and Custody Section were based on a one week time study in 1974 in which the individuals working in this section performed a physical count of transactions handled. A sample of the time sheet was not available because of the relocation of this department and the disposal of these records. The actual expense to each utility was expressed as a percentage of the total cost of processing all transactions by this section.

Parking Violations did not affect any of the subject utilities.

The allocation of the Assessment section interfund expense was also based on a one week time study in 1974 of those individuals working in the section based on the number of hours spent on each assessment problem. It should be noted that the only utility requiring these services is AWU. The actual interfund expense of the Assessment Division was

expressed as a percentage of AWU's cost in relation to the entire cost of this section.

The remaining half of all interfund expenses of the Treasury Department was allocated to each utility and the general government unit based on their average equity in the investment accounts during the two months prior to the 1975 budget preparation. This was expressed as a percentage of the total equity investment of the City and applied by the Controller Division to the actual costs of this department.

For the 1977 budget, the sewer utility will have substantial impact on this department. Also, testimony was received that many different funds will be handled by this department as a result of unification. The methodology used to determine interfund charges for this department needs re-evaluation in light of unification.

PRINT SHOP

The calculation of the interfund charges for this department was the responsibility of the utility managers working with the City Budget Officer, and actual charges were computed by the Print Shop Supervisor in accordance with the Print Shop Prices provided as Exhibit 15a. These prices were based on salaries and overhead.

It should be noted that there was over a 400% increase in the budgeted and actual amounts interfunded in this category for ATU and AWU in 1975. Testimony was given that the probable reason for this was that ATU ordered a series of new forms, having used up forms that had been purchased from an outside supplier. As a result the initial cost was con-

siderably greater than a normal year's usage. A price sheet from Ken Wray's Print Shop substantiated the fact that the Print Shop prices are anywhere from one-third to over 100% less than the same service offered by a private business.

COURIER AND MAIL

The calculation of the interfund charges of this department was the responsibility of the City Budget Officer and actual charges were computed by the Mail Room Clerk and the Controller Division.

The allocation factor used to determine the amounts budgeted to each utility was based on an analysis of the current courier schedule (1974). The number of courier stops which served each utility was expressed as a percentage of the total amount of stops. This percentage became each utility's allocation of the actual costs of this department.

It should be noted that for 1975 ATU received no service from this section because the demands of this utility became sufficient to justify hiring its own employee to provide this service. Testimony was given that the minimum amount of times the courier serves ML&P and AWU was four times daily.

The mailroom charges were the result of joint utility mailings (not customer billing) and were minimal. Each utility has its own postage machine so these charges are no longer interfunded.

INSURANCE AND CLAIMS (RISK MANAGEMENT)

The calculation of the interfund charges for this department was the responsibility of the Insurance/Claims

Officer working with the City Budget Officer. The allocation of these charges was based on two categories: claims activity and insurance activity.

The actual cost of processing claims filed against the City was calculated on a cost per claim basis and charged to the appropriate utility. A quarterly report was made indicating the number of claims filed against each utility and the general government unit, the total expense of processing those claims and the calculation of charges to each utility. Exhibit 17a detailed the 1975 claims against each of the subject utilities and provided work sheets used to determine the cost of each claim based on this department's overhead to process these claims. It was emphasized that this charge is only to process claims and does not reflect payment to any third party.

The cost of providing insurance coverage to the various utilities during 1975 was allocated by weighing the type of insurance and coverage for each utility. Testimony was given regarding the diversified needs and numerous kinds of insurance needed by the utilities and the general government unit. It is apparent that this is an extremely complex subject. The judgment and experience of the Insurance/Claims Officer (Risk Manager) was the basis for the percentage of interfund charges allocated to each utility for insurance activity. The actual amount interfunded to ATU in this division doubled for the year 1975. The reason for this substantial increase was the requirements by OSHA to establish a safety program which heretofor was in the Personnel Department. The costs of this Safety Section were interfunded on the basis of the number of authorized positions

within the utility and general government unit and the percentage applied to the actual expense of this Section.

The Municipality has undertaken a self insurance program in some areas which is not reflected in the 1975 test year. There may be a decrease in expense related to insurance coverage but this will be offset by an increase in the expense of the claims activity. It will be necessary to re-examine the interfund charges in this division because of this new undertaking.

PERSONNEL

The calculation of the interfund charges by this department was determined by the Personnel Director and staff working with the City Budget Officer.

The allocation factors established for 1975 budget purposes were determined by a two-step process. The cost for employee/labor relations, records, and safety training was allocated based on each utilities percentage of the total employees in the City at the time the budget was prepared. The Safety Section was transferred to Risk Management thereby reducing the actual cost of this service.

The recruitment and classification costs of this division were allocated on the total number of classified employees in each utility expressed as a percentage of the total number of City classified employees at the time the budget was prepared. The actual expense to each utility, computed by the Controller Department, was determined by applying the weighted average of these two percentages to the actual 1975 expense of this department.

DATA PROCESSING

The calculation of the interfund charges by this department was prepared by the Data Processing Manager and

staff working with the City Budget Officer. The actual charges were computed by the Data Processing Manager and staff.

The Data Processing Department was responsible for computer time and the personnel to analyze, program, key-punch, if necessary, and maintain the computer programs. Testimony was given that there is presently no unused computer time; the machine is running beyond capacity and is working 24 hours a day, seven days a week. The Municipality is also utilizing mini-computers during the current year (1976) and is considering the purchase of a larger computer. No attempt had been made by the City, prior to unification, nor the present Municipality to contract for these services. The 1975 budgeted expenses were calculated by the computer on the basis of man months and projected cost estimates to accomplish the workload each utility requested. The actual expense was based on computer time utilized during 1975 and was calculated by a special built-in program designed for that purpose. The employees of this department kept time sheets (Exhibit 31) tracking their workload and assessing the proper utility. The hourly rates charged by this department for various data processing personnel were provided in Exhibit 19B.

Testimony was given on the plans for merging the computer systems of the former City and Borough and a possible purchase of computers as opposed to present leases. January 1977 is the target date for an integration of the two accounting systems, and this will dictate a re-evaluation of the charges for this department's services.

increase

companies had increased 88% from 1970 to 1974 or nine times the rate of increase of the natural gas industry. Based on the uncontroverted evidence presented by AGAS, the Commission will allow use of a year-end rate base.

Staff testified that AGAS is currently in the process of developing continuing property records (CPRs). At the present time property records are maintained on a ledger card system. AS 42.05.461 requires utilities with annual revenues over $100,000 to utilize CPRs for plant records. It will be incumbent on AGAS to achieve compliance with this statutory obligation within the timetable prescribed by the Commission.

There was general agreement among the parties regarding the reasonableness and propriety of all components of plant in service as proposed, with the exception of property purchased from the affiliate, 3000 Spenard Corporation. At issue was the determination of the appropriate value to be assigned to that property in the rate base. AGAS has included the land in rate base at the sales price paid to 3000 Spenard Corporation, which was based on an independent appraisal performed in May 1974. The staff proposed a valuation equivalent to the original cost to 3000 Spenard Corporation with the possible capitalization of certain costs for not more than two accounting periods at the discretion of the Commission. Staff opposed the inclusion of intercompany profits in the rate base and cited a 1945 Supreme Court case as principal support for its position. The burden of proof in this issue clearly resides with AGAS, pursuant to AS 42.05.511(c) which provides:

> "(c) In a rate proceeding the utility involved has the burden of proving that any written or un-

> written contract or arrangement it may have with any of its affiliated interests for the furnishing of any services or for the purchase, sale, lease or exchange of any property is necessary and consistent with the public interest and that the payment made therefor, or consideration given, is reasonably based, in part, upon the submission of satisfactory proof as to the cost to the affiliated interest of furnishing the service or property and, in part, upon the estimated cost the utility would have incurred if it furnished the service or property with its own personnel and capital."

Additionally, AGAS has directed the Commission to the first part of AS 42.05.411(b) for guidance:

> "(b) In determining the value for rate making purposes of public utility property used and useful in rendering service to the public, the commission shall be guided by acquisition cost or, if lower, the original cost of the property to the person first devoting it to public service,..."

The properties under consideration are situated in Kenai, Eagle River, and Anchorage. The Anchorage property is comprised of three parcels on International Airport Road designated as the Operations Center. Rental payments on the former Operations Center on Spenard Road are also tangentially relevant due to the timing of the transition from the old to the new location. The dates and amounts of the purchases and sales by 3000 Spenard Corporation and the intervening rentals by AGAS are summarized on Appendix 1.

The principal business activity of 3000 Spenard Corporation, the Alaskan subsidiary of Baldwin Properties, Inc., a subsidiary of AKI, is property investment and disposition. The company is represented in Alaska by Vice President Richard Barnes, who is also an officer and employee of AGAS and APC. Mr. Barnes testified that he spends between one to two percent of his time on 3000 Spenard Corporation responsibilities. The company's current portfolio of investments is an office building in New Orleans

and 25 parcels contiguous to AGAS' office building. The only property previously owned by 3000 Spenard Corporation and not sold to AGAS was a 22 acre parcel on Kodiak. This property was sold to a company which was concurrently acquiring the assets of a former subsidiary of AKI, Burgess.

AGAS originally leased all the properties it purchased from 3000 Spenard Corporation with the exception of Parcel C on International Airport Road. A representative lease agreement (Exhibit 47), dated January 1, 1969, between the parties provided for a 15% return on the appraised valuation with re-appraisals at 5 year increments during the 16 year term of the lease. The Chief Appraiser, State of Alaska, Division of Lands, a witness for intervenors AkPIRG and Jager testified that based on his studies of the private market, the market rate for leases on bare ground with appraisals at five year increments was currently 8% and was in the 6-8% range in 1969. There was testimony that in late 1973, the decision was made by AGAS, pursuant to an unwritten option or right of first refusal, to purchase the subject properties from 3000 Spenard Corporation. As a result, there was an informal agreement between the parties for conservative rent escalation without re-appraisals for 1974 and for termination of the leases at December 31, 1974, by mutual consent. In February 1974, 3000 Spenard Corporation purchased Parcel C on International Airport Road. The appraisals on which the sales prices were based were completed in May 1974. Approximately 33% of the Eagle River parcel was sold by 3000 Spenard Corporation to the State of Alaska in October 1974, for $48,000. The sale of the properties to AGAS was consummated in December 1974, timed to

coincide with the availability of financing. Rents paid on acquired properties were eliminated from the test year. The land, site improvements, and transportation building at International Airport Road were included in the rate base. However, since the remaining buildings at that site were completed after the end of the test year and were not incorporated in rate base, AGAS retained the expenses associated with the Spenard Road Operations Center in its operating expenses as a representative substitute for the new Operations Center. AGAS argued that this approach was conservative and thereby fair. The transition was completed in May of 1976. It is the opinion of the Commission that the treatment proposed by the utility is not unreasonable.

Section 511(c) of AS 42.05 establishes certain tests for evaluating the reasonableness and propriety of affiliated interest transactions. Property leases and sales such as those under discussion must be necessary and consistent with the public interest. Payments made therefore must be based, in part, on the cost to the affiliated interest of furnishing the property and, in part, on the cost the utility would have incurred if it had furnished the property with its own capital.

AGAS argued that the cost to 3000 Spenard Corporation of furnishing the properties was equivalent to the price it would have received for the parcels from another party at the time of the transaction, which, in turn, was equivalent to the cost AGAS would have incurred if it had purchased identical or similar properties from a third party at that time. This definition of cost is not in conformance with standard accounting nomenclature and would appear

to circumvent the intent of AS 42.05.511(c) to prohibit excessive intercompany profits. Affiliated interest transactions require the highest scrutiny by this Commission. The interpretation proposed by AGAS would preclude such a review. While the utility may argue that AGAS would have paid as much or more for similar purchases from non-affiliates, the fact remains that the sales between affiliated interests offer to the common parent immediate benefits, including favorable capital gains tax treatment of 3000 Spenard Corporation's profits, which mandate circumspection.

A review of the land activities and portfolio of 3000 Spenard Corporation in Alaska would indicate that the company has functioned historically as a land agent for AGAS. At least one parcel was rented to AGAS at the same time as its purchase, and one parcel was purchased after AGAS had apparently committed itself to re-purchase the land. The Commission is not inclined to substitute its judgment for that of management, but it is appropriate to question whether or not investments were incurred prudently by a utility in exercising its responsibility to serve the public. The timing and amounts of the land purchases certainly raise doubts. The staff has argued that intercompany profits should be prohibited regardless of an assessment of the degree to which an affiliated transaction was conducted at arms length. It has cited Colorado Interstate Gas Co. v. Federal Power Commission, 334 U.S. 581, 65 S. Ct. 829, 89 L. Ed 1206 (1945), to support its position.

It is the determination of the Commission based on the evidence presented on the record that the properties purchased from 3000 Spenard Corporation should be included

in rate base at the original cost to 3000 Spenard Corporation. An allowance will be added to the base amount, where applicable, for capitalization of the return, at the rate established by this Order, which would have been earned on properties purchased in advance of being placed in service for a reasonable period of time not to exceed two accounting periods. The resulting valuations are detailed on Appendix 1.

The original cost of plant in service is reduced by the year-end accumulated depreciation. The staff has proposed an adjustment to the asset life of the headquarters building from 20 to 33 years to conform with the depreciation rate utilized by AGAS for other structures and with Internal Revenue Service (IRS). AGAS has argued that it is inappropriate to make isolated changes in depreciation rates without a complete depreciation study, which is scheduled to be performed in the next year or so. However, if the Commission approved the adjustment proposed by staff, it would be equally appropriate to reduce the life expectancy of communications equipment from 33 to 12 years as proposed by AGAS. The staff concurred with this recommendation. The Commission cannot overlook the obvious inequities in the depreciation schedule as filed in the permanent rate request. The Commission does not agree with AGAS' assertion regarding itemized review and modification of the depreciation schedule and will endorse both depreciation adjustments.

Another component of rate base proposed by AGAS is a gas plant acquisition adjustment, less accumulated reserve for amortization. Prior to 1967, the stock of APC was owned 50.41% by AKI and 49.59% by Union-Marathon (U-M). AKI had Class A voting stock; U-M had Class B non-voting stock,

In the Matter of the Filing of a Tariff Revision, Designated as TA 12-89, by KENAI UTILITY SERVICE CORPORATION for Permanent and Interim Rate Relief and a New Rate Design Schedule

U-79-32

ORDER NO. 4

ORDER ACCEPTING STIPULATION

The Commission will accept the Stipulation dated September 5, 1979 executed by Kenai Utility Service Corporation and the Staff of the Commission, but subjects its acceptance of this Stipulation to the following express conditions:

(1) Kenai Utility Service Corporation shall file on or before October 22, 1979 amended tariff sheets reflecting the rates and rate design approved by acceptance of this Stipulation;

(2) Kenai Utility Service Corporation shall refund or credit the accounts of those customers that have been charged a rate on an interim basis that is in excess of those approved by this Stipulation;

(3) Kenai Service Corporation shall file with its 1979 annual report the time record form to be used by the President of the utility, Mr. J.M. Covington, to accurately reflect the percentage of his time and his expenses attributable to utility business;

(4) Kenai Utility Service Corporation shall file the time

In the Matter of the Filing of Tariff Revisions by PELICAN UTILITY COMPANY for Fuel Cost Rate Adjustments at Sand Point, Alaska	U-81-89 ORDER NO. 10

ORDER GRANTING PERMANENT APPROVAL OF NEW FUEL SURCHARGE AND ESTABLISHING THE CALCULATION FOR FUTURE SURCHARGE FILINGS

BY THE COMMISSION:

On December 2, 1981, in Order No. 1 of this proceeding, the Commission suspended permanent approval of three fuel surcharge filings, designated as TA20-230, TA21-230, and TA23-230, filed by PELICAN UTILITY COMPANY (Pelco) for its Sand Point service area. In that Order the Commission raised questions about Pelco's fuel purchase arrangement with an affiliated interest, Pelican Distributing Company (PDC), and the methods used in the three filings to calculate kilowatt-hour (KWH) sales.

On the former matter, the Commission noted that in AS 42.05.511(c) it is clear that a utility has the burden of proving that a purchase arrangement with an affiliated interest is necessary and consistent with the public interest. On the latter matter, the Commission's concern centered on Pelco's subtracting five percent of its generation as a line loss to arrive at KWH sales. (A reduction in KWH sales causes an increase in the surcharge, and vice versa.) The Commission directed Pelco to reduce the billed surcharges to eliminate the effect of the five percent

Phone 276-6222

reduction to KWH sales and to refund to its customers the excess revenues collected. In addition, the Commission approved, on an interim basis, surcharges recalculated without the five percent reduction to KWH sales.

Subsequently, in Orders Nos. 3, 4, 5, and 8 in this proceeding, the Commission granted interim refundable approval to five other surcharges. In each of the latter, Pelco had calculated the surcharge without making a five percent reduction to its KWH sales. Order No. 6 noted that the Commission Staff (Staff) and Pelco had agreed that the five percent reduction should not be made to KWH sales. Thus, the remaining issue was the reasonableness of Pelco's fuel purchase agreement.

On December 28, 1981, Pelco filed an analysis to justify its fuel purchase arrangement with PDC. The analysis calculated an annual expense to Pelco of $75,520 if the utility were to install and maintain its own tanks and fueling facilities. The utility's analysis was based on annual operating expenses associated with the purchase of fuel tanks, including a 15.7 percent rate of return on the additional rate base, five-year depreciation lives for the tanks, and a $1,200 annual maintenance expense thereon.

The Staff analyzed this filing and noted that the calculations and estimates provided were not supported but appeared reasonable with the exception of the depreciation lives of the tanks. Pelco estimated an annual depreciation expense of $23,400 based on an original cost of the tanks of $117,000. Staff noted that the shortest life to be used for storage tanks would be 20 years, which would mean an approximate $17,000 reduction to the annual depreciation expense. In addition, Staff noted that the rate of return calculation of 15.7 percent was greater than the 14.4 percent return recently approved for Pelco in Docket U-81-54.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

This difference in return amounted to an approximate $2,300 difference in revenue, but Staff believed the difference was immaterial if the revenue requirement for the storage tanks was adjusted for the depreciation expense reduction caused by the change in the service lives of the storage tanks. Staff maintained that the $17,000 depreciation adjustment, based on the longer life, was the only appropriate reduction to the revenue requirement calculated by Pelco.

Staff, therefore, calculated that the revenue requirement on the tank and fueling facility would be approximately $58,250 ($75,520 - $17,000). After review of the present difference between the price PDC pays for its fuel and the price PDC charges Pelco, Staff concluded that the utility had provided *prima facie* evidence that there would be no significant difference between (a) a total revenue requirement for Pelco including costs of fuel purchased from PDC and (b) a total revenue requirement including the utility's costs of installing and maintaining its own tanks and fueling facilities.

However, Staff did believe that a serious potential problem existed concerning the price of fuel to be used in future FCRA filings. In particular, the method by which PDC calculates the dock price and Pelco's revenue requirement on the tank facility cannot be reconciled in determining a reasonable cost justification for future rate proceedings.

Pelco is billed by PDC at a variable rate above the Chevron price billed to PDC. The PDC price to Pelco (the dock price) is 25 percent above the Chevron price to PDC less 15¢ per gallon. However, the gallons consumed vary from period to period. For example in a recent surcharge filing, TA35-230, Pelco showed an annual fuel consumption of 465,454 gallons. In the test year (1980) used to calculate the revenue requirement in U-81-54, the yearly fuel consumption was 516,049 gallons. Thus, the actual

ALASKA PUBLIC UTILITIES COMMISSION
1100 McKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

annual expense to Pelco associated with its purchase of fuel from PDC varies. The expense increases with both increases in consumption and increases in the per-gallon price of fuel.

In effect, what is happening is that there is a fixed cost (Pelco: $75,520; Staff: $58,250) associated with installation of the fuel tanks, but PDC's revenue is based on a variable reimbursement (the product of 25 percent of the Chevron price less 15¢ per gallon multiplied by the gallons sold). The yearly expense associated with Pelco's installation and maintenance of the tanks will not change significantly from year to year, but the revenue received by PDC may change significantly based on the price and amount of fuel purchased by Pelco. The annualized reimbursement to PDC on the basis of the recent surcharge filing, TA35-230, is $52,131. This amount is based on a dock price of 11.2¢ per gallon above the Chevron price (11.2¢ per gallon price differential times annual fuel consumption of 465,454 gallons equals $52,131).

Staff advised the Commission of three alternative solutions for dealing with this problem. The first alternative would be for PDC to charge (interfund) Pelco a flat yearly expense associated with the tanks and charge Pelco the same fuel price per gallon that PDC pays Chevron. This solution would necessitate an adjusted revenue requirement and a change in the base price of fuel for surcharge calculations.

A second alternative would be for Pelco to install the tanks and purchase fuel directly from Chevron. As in the alternative above, an adjusted revenue requirement would have to be calculated.

A third alternative proposed by Staff would be to allow PDC to continue to use the present method of determining its price to Pelco, and Pelco would be required either to install the tank

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

farm or to interfund an annual expense in its next revenue requirement application presented to the Commission. Under the fuel price to Pelco from PDC which is reflected in TA35-230, the utility appears to be paying PDC less than it would cost Pelco to install and maintain its own fuel tanks. Staff recommended that if this alternative were adopted, a ceiling of 12.5¢ per gallon should be placed on the differential between PDC's price to Pelco and the Chevron price to PDC. The 12.5¢ per gallon figure was calculated by dividing the cost of installing and maintaining the fuel tanks by the annual fuel consumption reflected in TA35-230 ($58,250 divided by 465,454 gallons equals 12.5¢ per gallon). This ceiling would protect the consumer if the price of fuel were to increase. Under this alternative, Pelco would not have to recalculate the base price of fuel and would be allowed to continue its present surcharge computation until PDC's price to Pelco exceeded the Chevron price by more than 12.5¢ per gallon. If the price charged Pelco by PDC exceeded the Chevron price by more than 12.5¢ per gallon, Pelco would calculate the current fuel cost as the Chevron price plus 12.5¢ per gallon.

Staff expressed its belief that the third alternative was the most practical solution. Pelican's customers would be protected by the 12.5¢ ceiling discussed above, and in the next permanent rate proceeding the utility would have the option to adopt an interfund or to install and maintain its own fuel tanks.

The Commission concurs with Staff's analysis and believes that Pelco's present method of calculating fuel surcharges should be used unless the price charged Pelco by PDC exceeds the Chevron price by more than 12.5¢ per gallon. In that case, the maximum current price used in the surcharge calculation will be the Chevron price per gallon plus 12.5¢ per gallon. In its next permanent rate relief request Pelco either should file its revenue requirement with the tank farm included in rate base or determine

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

an appropriate yearly interfund between PDC and Pelco to reflect the fuel storage service provided by PDC.

THE COMMISSION FURTHER FINDS AND CONCLUDES:

1. The fuel surcharges previously approved on an interim basis in this proceeding should be allowed on a permanent basis.

2. Pelco should be allowed to continue its present method of calculating the current cost of fuel in surcharge filings unless PDC's price to Pelco (the dock price) exceeds the Chevron price by more than 12.5¢ per gallon. Then Pelco should calculate the current cost as the Chevron price per gallon plus 12.5¢ per gallon.

3. In conjunction with its next rate filing, Pelco either should install the tank farm and include it in Pelco's rate base or should interfund an appropriate annual expense associated with use of the PDC tank farm.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The fuel surcharges previously approved on an interim, refundable basis in this proceeding for the Sand Point Division of Pelican Utility Company are approved on a permanent basis.

2. Pelican Utility Company shall continue to calculate its fuel cost rate adjustment surcharges for its Sand Point Division in the same manner as previously calculated unless the dock price exceeds the Chevron price to Pelican Distributing Company by 12.5¢ per gallon. If the price to Pelican Utility Company exceeds the 12.5¢ per gallon limit, the allowed price shall be the Chevron price plus 12.5¢ per gallon.

3. In its next permanent rate relief request, Pelican Utility Company - Sand Point Division either shall install the tank farm and include it in rate base or charge an appropriate

Alaska Public Utilities Commission

annual interfund expense from Pelican Distributing Company to Pelican Utility Company - Sand Point Division for use of these fuel storage facilities.

DATED AND EFFECTIVE at Anchorage, Alaska this 26th day of October, 1982.

BY DIRECTION OF THE COMMISSION
(Commissioner Susan M. Knowles, not participating)

(S E A L)

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-5222

for permanent rate increase

increased by $83,124 to $9,430,369 to reflect the increase in purchased power costs to $.016705 per KWH. (Exhibit 13).

Staff reviewed the utility's expenses and adjustments and found them reasonable and proper with one exception, deregulation expense. MEA accumulated the total cost of $36,600 for the deregulation election in two subaccounts, labor costs of $15,982 and other expenses of $20,618. Staff maintained that the labor cost component represented a normal recurring expense which should be expensed in the current period. Staff amortized the remaining costs over a two-year period with the net result of increasing MEA's pro forma operating expenses by $17,141 to $9,447,510 including the additional increment of wholesale power costs per Exhibit 13 with which Staff concurred. The utility did not object to Staff's treatment of deregulation expense.

MVCAC suggested three specific adjustments to MEA's operating expenses. First, the intervenor stated that the utility's contributions to Susitna Power Now, which totalled $1,000 during 1980, should be disallowed under AS 42.05.381. This section of the Commission's governing statute provides in pertinent part that:

> No rate may include an allowance for costs of political contributions, or public relations except for reasonable amounts spent for
>
> (1) energy conservation efforts;
>
> (2) public information designed to promote more efficient use of the utility's facilities or services or to protect the physical plant of the utility;
>
> (3) informing shareholders and members of a cooperative of meetings of the utility and encouraging attendance; or
>
> (4) emergency situations to the extent and under the circumstances authorized by the commission for good cause shown.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

Second, MVCAC argued that deregulation expenses should be reduced by $5,305 (Exhibit 3) for advertising expenses which it also believed were in violation of AS 42.05.381. The consumer group further recommended that no future deregulation elections "be funded without a petition of 20% of the membership prior to any future expenditures by MEA." (T-7, p. 2).

Third, MVCAC averred that the savings experienced by MEA for reductions in its premiums for property and liability insurance should be passed on to the ratepayers as a reduction in operating expenses. The cost of property insurance coverage was reduced by $2,745 per Exhibit 2 and of liability insurance coverage by $81 ($75,217 minus $74,980 times 29 percent).

The Commission concurs with Staff's recommendation that the labor component of the deregulation election costs be fully expensed in the test year, since it is an ongoing obligation of the utility.

The Commission also believes that expenses for advertising MEA's position in the deregulation election in 1980 -- both in newspapers and on the radio -- should be disallowed. An examination of the text of advertising placed by MEA Board and management in the newspapers circulating in the MEA service area during the course of the election reveals numerous false statements and errors of both fact and law. (Exhibit 3). For example, one appearing in the Chugiak-Eagle River Star on September 18, 1980, stated that even if economically deregulated, MEA still would "be fully regulated by REA" and that the "REA will regulate rate adjustments." That statement is false and misleading. As MEA's management is aware, the REA does not pass on the reasonableness and propriety of the rates MEA or any other electric cooperatives charge for electric energy. As the utility's "banker", REA's sole interest is whether the revenue MEA earns from its rates is sufficient to pay back the loans

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

made to MEA for construction projects and expansion of its services. Another ad asserted, without listing any examples, that the Commission was "less sensitive to local economic conditions than the MEA Board" and that APUC regulation did not permit MEA "to carry out the stated preference of its members regarding rate adjustments, that of smaller incremental rate changes." That, too, is false. The MEA Board determines when that utility's rate filings are made. Obviously the less frequently rate increases are requested, the larger the percentage increment is apt to be. Moreover, the MEA General Manager admitted under cross-examination that he ordered the MEA drafting department to "reconfigure" the standard artwork of the caricature symbol (an animated electric plug) supplied by the National Rural Electric Cooperative Association (NRECA) to member cooperatives for the deregulation election campaign in the election. Thus, in the display advertisements in question, the caricature appears swinging a baseball bat at alleged "unnecessary regulation" (Valley Sun, Eagle River Sun, Frontiersman, Chugiak-Eagle River Star); using a pair of shears to, presumably, eliminate "red tape" (Valley Sun, September 16, 1980); painfully straining to obtain release from an animal trap (Chugiak-Eagle River Star, September 4, 1980); and removing a ball and chain (Valley Sun, Eagle River Sun, Frontiersman, Chugiak-Eagle River Star, Anchorage Times, Anchorage Daily News). In short, the Commission believes that the misleading text of the so-called "Pro" and "Con" arguments that appeared in the display advertisements, as well as the doctored caricature, unfairly weighted the advertising campaign in favor of the MEA Board's position on deregulation. The entire MEA-sponsored campaign lacked the fairness and balance surely contemplated by the Legislature under AS 42.05.712.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501
Phone 276-6222

For the foregoing reasons the Commission will allow the expenses essential to the mechanics of conducting the election, e.g., ballot printing, mailing and tabulation, but believes the expenses of $5,305 associated with MEA's advertising campaign should be rejected. The balance of $15,312 in other deregulation expenses will be amortized over two years in equal annual installments. The two-year period appears reasonable inasmuch as AS 42.05.712 allows a utility to conduct deregulation elections at two-year intervals.

MVCAC has suggested that a petition of 20 percent of the membership be required prior to the cooperative expending funds on any future deregulation election. The Commission believes this recommendation would posit an unreasonable impediment to operation of the law governing deregulation elections. In particular, the Commission notes that the numerical threshold proposed for spending funds is higher than that established under AS 42.05.712(b) for a quorum or deciding vote in the election. While it cannot adopt MVCAC Recommendation No. 5, the Commission will continue to monitor the amount and scope of deregulation expenses to assure their reasonableness and propriety.

MVCAC's argument to disallow the utility's contributions to Susitna Power Now is rejected without prejudice to its resubmission. There is virtually no evidence on the record with respect to the appropriateness of this expenditure, and it would be improper to base a decision solely on general awareness of the environmental and economic debate surrounding the Susitna hydroelectric project. The Commission also recognizes that this issue affects other utilities and therefore, believes that it should be considered with the benefit of a fully-developed record.

ALASKA PUBLIC UTILITIES COMMISSION

Phone 276-6222

DISSENT OF SUSAN M. KNOWLES, COMMISSIONER

I dissent from the decision of the majority with respect to the disallowance of $5,305 for advertising expenses associated with the deregulation election.

The issue of the reasonableness and propriety of the amount and amortization period for deregulation expense is an issue of first impression before the Commission. It is also a matter of some sensitivity in that the Commission must perform its oversight responsibility without inhibiting, or appearing to inhibit, the deregulation option allowed by the Legislature in AS 42.05.712.

It is apparent that MEA incurred substantial expenses in the course of publicizing and administering its first deregulation election. In addition, legitimate questions have been raised with respect to the objectivity of the copy used for advertising the deregulation issue and the election. Nonetheless, disallowance of all or a portion of this expense involves a subjective assessment which I find difficult to justify considering both the record and possible infringement of rights under AS 42.05.712.

Given the facts and circumstances in the instant case, I would allow the full depreciation expense but extend the amortization period to three years to recognize both the extraordinary costs associated with this initial election and the questionable reasonableness of some expenditures.

Susan M. Knowles
by cog

ALASKA PUBLIC UTILITIES COMMISSION

submit progress reports on a quarterly schedule, or sooner if substantive developments occur with respect to the gas supply contract negotiations. Further, once negotiated, the contracts themselves should be submitted to the Commission for approval.

3. Continuing Property Records System. Upon review of this utility's prior rate proceeding, the Commission finds that ENSTAR has not complied with the directive in U-75-95(7) in which the Commission ordered the utility to institute a continuing property records (CPR) system, as required by AS 42.05.461, on or before September 30, 1976. Despite the failure of ENSTAR to comply with the Commission's prior order, the Commission perceives that the utility now intends to proceed in good faith. Accordingly, the Commission accepts as reasonable the utility's estimate of one year to complete its new CPR system. ENSTAR will be required to institute the CPR system not later than October 31, 1983. Staff will then be required to review the CPR system to assure its compliance with the statute and to report the results of that review to the Commission.

4. Management Fees Paid to Parent Corporation. The Commission finds that ENSTAR has not fully met its burden of proof that the intercompany management fees paid to its parent corporation are just and reasonable. However, the Commission believes that the amount actually paid during the test year is not unreasonable when compared to the figures approved in the last permanent rate case wherein a more exhaustive audit was conducted by Staff to verify this expenditure. For this reason, the $611,000 in intercompany management charges will be accepted for purposes of this proceeding, but the acceptance will be conditional upon the requirement that ENSTAR submit by April 29, 1983, a new, more auditable contract for Commission approval. The Staff should then file a report with the Commission providing its criticisms or suggestions for changes in the contract formula.

5. Advertising Expenses. Upon review of the timony and evidence on the record, the Commission finds that the expenses associated with ENSTAR's sponsorship of public television programming are clearly and appropriately categorized under the Commission's regulations as "good will advertising." While this aspect of ENSTAR's advertising is reflective of a laudable civic commitment, nonetheless it also reflects the utility's desire to enhance its public image. Furthermore, this expenditure does not into one of the allowable public relations expense categories described in AS 42.05.381(a). Accordingly, $30,296 in advertising expenses should be disallowed for ratemaking purposes as expressly provided under AS 42.05.381(a) and 3 AAC 50.500.

6. Lobbying Expenses. Although the Commission recognizes that there may be instances in which a utility perceives that certain congressional or State legislation is not in its best interest, the Commission's interpretation of AS 42.05.381(a), particularly in conjunction with 3 AAC 50.500(a)-(c), its consideration of the weight of regulatory precedent, and its limited intent as expressed in U-78-4(33), collectively dictate that $18,000 in lobbying expenses incurred during test year operations should be disallowed. In addition to any legal restrictions, the Commission observes that when a utility claims direct benefits to its ratepayers as a result of lobbying efforts, the utility is presuming to determine without the prior knowledge or consent of its ratepayers what pending legislation is or is not beneficial to them. Alternatively, even if the Commission were to determine the appropriateness of a given lobbying effort on a case-by-case basis, the Commission, in attempting to rule on the question of "clear showing of demonstrable benefits to ratepayers," would be required to offer judgments on such issues as: Is the Legislature (or Congress) acting wisely in changing existing laws? What type of proposed legislation should be defeated? Should a utility be

reimbursed for meritorious but unsuccessful lobbying efforts? How should legislation beneficial to one utility's ratepayers but detrimental to others be treated?, etc. In sum, even if the Commission were to artfully circumvent the statute (AS 42.05.381(a)) and disregard its own regulations (3 AAC 50.500), the fact that the Commission would be required to render such subjective and judgmental decisions with respect to direct ratepayer benefits effectively relegates political lobbying in this and all future proceedings as the proper expense of a utility's stockholders.

7. Rate Case Expenses. The Commission will allow ENSTAR an upward adjustment in rate case expenses to $61,598, amortized over three years, on the basis of estimates found reasonable during the hearing, subject to the submission of documentation to fully support all actual expenses at the end of both this phase and the rate design phase of the proceeding. Additionally, the Commission will allow the utility the option of requesting a further adjustment if documented rate case expenses for the rate design phase of this proceeding exceed the utility's projections.

8. Treatment of $3.2 Million Line of Credit. Historically, the Commission has not permitted short-term debt to be treated as a component of a utility's debt capital structure. Because ENSTAR has not offered any justification for changing this policy, the Commission believes that the $3,200,000 line of credit should be deleted from the cost of capital computation.

9. Consolidated Federal Income Taxes. The Commission reaffirms the policy previously articulated in U-75-95(16) and U-78-4(33) that the benefits which result from the filing of a consolidated federal income tax return must be shared equitably with the utility and its ratepayers. For the purpose of establishing the federal income tax allowance in cost of service, the

submit progress reports on a quarterly schedule, or sooner if substantive developments occur with respect to the gas supply contract negotiations. Further, once negotiated, the contracts themselves should be submitted to the Commission for approval.

3. Continuing Property Records System. Upon review of this utility's prior rate proceeding, the Commission finds that ENSTAR has not complied with the directive in U-75-95(7) in which the Commission ordered the utility to institute a continuing property records (CPR) system, as required by AS 42.05.461, on or before September 30, 1976. Despite the failure of ENSTAR to comply with the Commission's prior order, the Commission perceives that the utility now intends to proceed in good faith. Accordingly, the Commission accepts as reasonable the utility's estimate of one year to complete its new CPR system. ENSTAR will be required to institute the CPR system not later than October 31, 1983. Staff will then be required to review the CPR system to assure its compliance with the statute and to report the results of that review to the Commission.

4. Management Fees Paid to Parent Corporation. The Commission finds that ENSTAR has not fully met its burden of proof that the intercompany management fees paid to its parent corporation are just and reasonable. However, the Commission believes that the amount actually paid during the test year is not unreasonable when compared to the figures approved in the last permanent rate case wherein a more exhaustive audit was conducted by Staff to verify this expenditure. For this reason, the $611,000 in intercompany management charges will be accepted for purposes of this proceeding, but the acceptance will be conditional upon the requirement that ENSTAR submit by April 29, 1983, a new, more auditable contract for Commission approval. The Staff should then file a report with the Commission providing its criticisms or suggestions for changes in the contract formula.

5. Advertising Expenses. Upon review of the testimony and evidence on the record, the Commission finds that the expenses associated with ENSTAR's sponsorship of public television programming are clearly and appropriately categorized under the Commission's regulations as "good will advertising." While this aspect of ENSTAR's advertising is reflective of a laudable civic commitment, nonetheless it also reflects the utility's desire to enhance its public image. Furthermore, this expenditure does not fit into one of the allowable public relations expense categories prescribed in AS 42.05.381(a). Accordingly, $30,296 in advertising expenses should be disallowed for ratemaking purposes as expressly provided under AS 42.05.381(a) and 3 AAC 50.500.

6. Lobbying Expenses. Although the Commission recognizes that there may be instances in which a utility perceives that certain congressional or State legislation is not in its best interest, the Commission's interpretation of AS 42.05.381(a), particularly in conjunction with 3 AAC 50.500(a)-(c), its consideration of the weight of regulatory precedent, and its limited intent as expressed in U-78-4(33), collectively dictate that $18,000 in lobbying expenses incurred during test year operations should be disallowed. In addition to any legal restrictions, the Commission observes that when a utility claims direct benefits to its ratepayers as a result of lobbying efforts, the utility is presuming to determine without the prior knowledge or consent of its ratepayers what pending legislation is or is not beneficial to them. Alternatively, even if the Commission were to determine the appropriateness of a given lobbying effort on a case-by-case basis, the Commission, in attempting to rule on the question of "a clear showing of demonstrable benefits to ratepayers," would be required to offer judgments on such issues as: Is the Legislature (or Congress) acting wisely in changing existing laws? What types of proposed legislation should be defeated? Should a utility be

reimbursed for meritorious but unsuccessful lobbying efforts? How should legislation beneficial to one utility's ratepayers but detrimental to others be treated?, etc. In sum, even if the Commission were to artfully circumvent the statute (AS 42.05.381(a)) and disregard its own regulations (3 AAC 50.500), the fact that the Commission would be required to render such subjective and judgmental decisions with respect to direct ratepayer benefits effectively relegates political lobbying in this and all future proceedings as the proper expense of a utility's stockholders.

7. Rate Case Expenses. The Commission will allow ENSTAR an upward adjustment in rate case expenses to $61,598, amortized over three years, on the basis of estimates found reasonable during the hearing, subject to the submission of documentation to fully support all actual expenses at the end of both this phase and the rate design phase of the proceeding. Additionally, the Commission will allow the utility the option of requesting a further adjustment if documented rate case expenses for the rate design phase of this proceeding exceed the utility's projections.

8. Treatment of $3.2 Million Line of Credit. Historically, the Commission has not permitted short-term debt to be treated as a component of a utility's debt capital structure. Because ENSTAR has not offered any justification for changing this policy, the Commission believes that the $3,200,000 line of credit should be deleted from the cost of capital computation.

9. Consolidated Federal Income Taxes. The Commission reaffirms the policy previously articulated in U-75-95(16) and U-78-4(33) that the benefits which result from the filing of a consolidated federal income tax return must be shared equitably with the utility and its ratepayers. For the purpose of establishing the federal income tax allowance in cost of service, the

House Labor & Commerce
Committee

Fiscal Note Analysis SSHB 220

Assumptions:

1. This bill could create significant new jurisdiction for the Alaska Public Utilities Commission.

2. The new jurisdiction is in an area of regulation for which the Commission has little or no expertise and will have to develop that expertise through the addition of staff and the training of that staff. It is assumed that the term distributing added to AS 42.05.720(4)(c) does not include retail sales.

3. Legal analysis suggests application of this legislation will create legal challenges.

4. Fiscal counter-effect of the deregulation of refuse utilities will be negligible when compared to the other jurisdictions which will be created as a result of passage of this bill.

Program Summary:

A. Historical background and comparison of SSHB 220 with last session's HB 365.

   1. During the last legislative session HB 365 was introduced by Representative Koponen which specifically addressed the regulation of oil refineries. The Commission fiscal note concerning that bill stated that in order to accept this jurisdiction, the Commission would incur additional expenditures in operating categories 100 - 500. In addition, the Commission contacted the National Association of Regulatory Utility Commissioners and discovered that no other state commission regulates oil refineries as a utility.

   2. The broadness of SSHB 220, expands jurisdiction far beyond the regulation of oil refineries. Based on legal analysis, the Commission anticipates that this bill, if passed and made law, could result in much litigation concerning the scope and constitutionality of the expanded jurisdiction.

B. EXPENDITURE REQUIREMENTS

   As in the fiscal note regarding HB 365, this bill would require that the Commission be provided with additional state expenditures. These requirements, and how they differ from last year's fiscal note related to HB 365 are listed below.

100 - Personal Services

Minimum needs have been addressed. Positions required are:

Technical: 1 Utility Engineer IV
1 Utility Financial Analyst III

Support: 1 Consumer Protection Information Officer II
1 Utility Tariff Analyst II
1 Administrative Support Technician II

(There is no change in requirements above the level in the fiscal note accompanying HB 365.)

200 - Travel

Funds will be required for training travel and regulatory travel. Travel for FY 1985 is higher based on a one-time need for extensive training in order for the Commission to regulate the new jurisdictions.

300 - Contractual

Additional contractual funding will be needed to provide three items:

a. Funding for legal counsel to handle the litigation associated with the new APUC jurisdictions. As stated above, if passed, it is anticipated there will be much litigation concerning the constitutionality and scope of jurisdiction.

b. APUC staff does not have any experience or expertise in regulation of the additional jurisdictions. Therefore, it will be necessary to provide substantial training to the two technical positions created to handle the new jurisdiction. Existing staff and Commission members will also need some training in these areas in order to reach proper conclusions and decisions in the regulatory process.

c. Some computer software must be provided in order to put the additional jurisdictions into the APUC data base.

400 - Commodities

There will be a requirement for additional commodities for the new positions which will be established as a part of the new workload.

500 - Equipment

In addition to the equipment associated with the new employees, the Alaska Public Utilities Commission wishes to go

on record to stress the importance of the passage of its capital budget request for an expanded computer system within the APUC. (Copy is attached).

In last year's fiscal note re HB 365 the Commission had asked for additional funding to enhance its existing computer system. Since that time the situation has changed dramatically. Based on present and projected usage, the Commission and the Department of Administration Division of Data Processing, have recommended that the present system be replaced by a larger one. Those projections did not include the addition of such a broadly based jurisdiction as possible in this bill.

600 - LAND AND STRUCTURES

The Alaska Public Utilities Commission is already short of space in its present location. Additional personnel will require additional space.

JUSTIFICATION

The additional level of public contact which would result from this additional regulatory workload would require the addition of another Information Officer position. This level would provide an interim between the Consumer Protection Officer II lead position and the Consumer Protection entry level.

As with other sections, there is no further room for expansion of duties without an increase in personnel. In addition, there is no existing office space to house additional personnel.

Engineer would be involved in reviewing engineering requirements associated with refinery regulatory activities.

Current engineering staff is not able to absorb any more functions. It is already working at capacity level.

Because regulatory activity concerning refineries, etc. does not exist within this Commission nor any others, it will require much training in order for the Engineer to be able to review engineering requirements associated with these activities.

Office space will be required because existing space is at maximum usage levels already.

JUSTIFICATION

This position would provide audit of refinery records and all other regulatory activity associated with the scope of SSHB 220.

Current financial staff is not able to absorb any more functions and has, in the past, had to absorb a vacancy factor to help alleviate personnel services shortages resulting from budget cutbacks. Even if all positions were filled, workload is such that any additional activities cannot be handled by existing staff.

Because regulatory activity concerning refineries, etc. does not exist within this Commission nor any others, it will require much training in order for the Analyst to be able to provide the auditing background necessary for this activity.

Office space is not available for additional personnel and all new positions require that the Commission acquire more space.

The administrative support level is already at over-capacity level and the operating budget for FY 1985 has requested the addition of administrative support personnel to provide adequate coverage for existing regulatory activity. The addition of any new regulatory activity necessitates the need for administrative support for that new activity.

Because of the shortage of usable office space, any new positions require additional office space.

PROJECT DESCRIPTION AND JUSTIFICATION:

The Alaska Public Utilities Commission has established several objectives which speak to improved case management techniques and provide for sustained Commission participation in specialized, highly technical regulatory issues such as national telecommunications policy development, local and regional power requirements and continuing as a reliable source of utility related information in response to public and governmental inquiries. In all of these instances, the availability of a properly configured information processing system is essential.

The APUC has an urgent need to expand its information processing system. Following implementation of its initial electronic data processing capability, the APUC uses its existing system in practically every aspect of its operations: for engineering and financial analysis, for job scheduling and control, for drafting letters, orders, testimony and reports, and for numerous administrative controls. At this time, the small processor serving twelve terminals is at capacity or is frequently overloaded which greatly impairs the productivity and quality of work product of the agency's employees.

The agency's background in mechanizing its operations and details of its future plans are contained in the APUC's 1983 computer plan dated October 4, 1983. Copies of this plan have already been sent under separate cover to the Deputy Commissioner of Administration for Information Systems and the Office of Management and Budget (a copy is also attached to this capital budget request). The plan proposes to replace the existing Digital Equipment

BUDGET REVIEW

Project Description and Justification Continued:

Corporation PDP 11/24 minicomputer in FY85 with one having far greater capacity and to expand the number of terminals. This will give most employees, including Commissioners, ready access to numerous data bases giving the status of utility operations and those of the agency itself, to specialized computational facilities for utility regulation, and to electronic drafting of documents. In addition, a large capacity computer is essential for the proper auditing of utilities, most of which maintain their financial and operations records in extensive computer files.

The plan also includes addition of graphics capabilities to the basic system in FY86. This should aid in the presentation of complex utility data to the public. Also in FY86, the Commission plans to begin computer integration of a proposed micrographics system. Filming and computer indexing of its documents onto microfiche will greatly reduce the effort needed to maintain over one million documents in order and ready for reference. In later years funds are requested for new or updated software, for a high volume automatic microfiche-to-paper printer and for automatic microfiche storage and retrieval equipment which will integrate hard copy information with the APUC central data base.

REVENUE							

EXPLAIN PREVIOUS APPROPRIATIONS (GIVE SECTION, CHAPTER, SLA) AND ASSUMPTIONS FOR COST, FUNDING SOURCE, POSITION AND REVENUE ESTIMATES:

Operating funds in FY85 through FY89 include an estimate for hardware and software maintenance agreements along with a projection for professional data processing consulting services necessary to allow program conversions, maintenance and new program development. FY85's estimate is scaled down to reflect the initial acquisition and installation timeframe during which these costs will not be incurred. Estimates for FY87 and beyond are reduced to reflect completion of program conversions and a stabilization of expenses related to system maintenance and ongoing new program development.

*O & M expenses projected through FY89 very closely approximate current funding requirements for data processing support costs and do not represent a net increase in general fund obligation.

AS 42.05.711(d)

3 AAC 50.200. INDIVIDUAL ELECTRIC METERS. (a) Except as provided in (b) of this section, an electric utility shall install an individual meter to measure the energy consumption attributable to each residential and commercial unit in a multiple-occupancy building and each mobile home unit in a mobile home park if construction of the building or mobile home park was begun after December 31, 1982.

(b) Individual meters are not required

(1) for transient multiple-occupancy buildings and transient mobile home parks, including, but not limited to, hotels, motels, dormitories, rooming houses, hospitals, nursing homes, and mobile home parks for travel trailers;

(2) for commercial unit space which is subject to alteration with changes in tenants as evidenced by temporary construction or non-load-bearing walls or floors separating the commercial unit spaces;

(3) where alternative renewable energy resources are used in connection with central heating, ventilating, and air conditioning systems; and

(4) in common building areas such as hallways, elevators, reception areas, water pumping facilities, and electric hookups for motor vehicles.

(c) For the purpose of this section, construction begins when the footings are poured. (Eff. 10/15/82. Reg. 84)

3 AAC 50.300. INFORMATION TO ELECTRIC CONSUMERS. (a) An electric utility shall provide to each new electric consumer, coincident with the application for service, a clear and concise explanation of any rate schedule in its currently effective tariff which applies to that consumer.

(b) Not later than 30 days after the filing of a tariff advice letter in which a change in a rate schedule is requested, an electric utility shall transmit to its affected consumers a clear and concise explanation of the proposed change. This provision does not apply to rate adjustments resulting from an automatic fuel-cost rate adjustment clause.

(c) At least once each year, an electric utility shall transmit to each of its electric consumers an informative summary of any rate schedule in its currently effective tariff which applies to those consumers.

(d) On request of an electric consumer, an electric utility shall transmit a clear and concise statement of the consumer's actual energy consumption and, if billed separately, power consumption for any billing period during the previous 12 months unless the information is not reasonably ascertainable by the utility. (Eff. 10/15/82. Reg. 84)

3 AAC 50.400. Reserved

3 AAC 50.500. ADVERTISING. (a) In addition to the restrictions imposed under AS 42.05.381(a), neither an electric utility nor a gas utility may recover through rates any direct or indirect expenditure by the utility for promotional, political, or goodwill advertising.

(b) The commission will determine on a case-by-case basis whether the forms of advertising listed in (c)(3) of this section, as well as advertising not readily categorized as promotional, political, or goodwill, and any other form of advertising not covered by this section will be included in utility operating expenses for rate-making purposes.

(c) In this section

(1) "advertising" means the commercial use by a utility of any media, including newspaper, printed matter, radio, and television, in order to transmit a message to a substantial number of members of the public or to the utility's customers;

(2) "goodwill advertising" means advertising directed toward improving or enhancing the public image of a utility or its employees;

(3) "goodwill advertising," "political advertising," and "promotional advertising" do not include

(A) advertising which informs an electric or gas consumer about methods which conserve electric energy or gas or which reduce peak demand for electric energy or gas;

(B) advertising required by law or regulation, including advertising required under Part I, Title II of the National Energy Conservation Policy Act (42 USC § 8201 et seq.);

(C) advertising regarding service interruptions, safety measures, or emergency conditions;

(D) advertising concerning employment opportunities with a utility;

(E) advertising which promotes the use of energy-efficient appliances, equipment, or services;

(F) an explanation or justification of existing or proposed rate schedules or a notice of hearings concerning these rate schedules; and

(G) communications with members of a utility cooperative about the activities or internal affairs of the cooperative or which encourage or promote the participation of the members in the process of governing the cooperative;

(4) "political advertising" means advertising for the purpose of influencing public opinion with respect to legislative, administrative, or electoral matters, or with respect to a controversial issue of public importance; and

(5) "promotional advertising" means advertising for the purpose of encouraging a person to select or use the service or additional service of a utility, or the selection or installation of an appliance or equipment designed to use the utility's service, except as provided in (3)(E) of this subsection. (Eff. 10/15/82, Reg. 84)

3 AAC 50.600. DEFINITIONS. Unless the context indicates otherwise, in 3 AAC 50.100 – 3 AAC 50.600

(1) "building" means a single erected structure, roofed and enclosed within exterior walls, built for permanent use, framed of component structural parts and unified in its entirety both physically and in operation for residential or commercial occupancy;

(2) "commercial unit" means that portion of a building or premises which is normally used for commercial purposes;

(3) "electric consumer" means a person or a public or private entity to which electric energy is sold, other than for purposes of resale, by a regulated public utility;

(4) "gas consumer" means a person or a public or private entity to which natural gas is sold, other than for purposes of resale by a public utility;

(5) "mobile home park" means a parcel of land which is used for the accommodation of occupied mobile homes;

(6) "multiple-occupancy building" means a building which is designed to house more than one residential or commercial unit;

(7) "rate" means

(A) a price, rate, charge, or classification made, demanded, observed, or received with respect to the sale of utility services to a utility consumer;

(B) a rule, regulation, condition, or practice respecting a rate, charge, or classification; and

(C) a contract pertaining to the sale of utility services to a utility consumer;

(8) "rate schedule" means the designation of the rates which an electric utility charges for electric energy; and

(9) "residential unit" means one or more rooms for use by one or more persons as a housekeeping unit which provides living,

RE: SSHB 220, RELATING TO PUBLIC UTILITIES

WHAT THE BILL DOES.

This bill attempts to do several different deeds all i. one fell swoop. First the bill calls for restriction on rates charged by public utilities. Such utilities can not include in its charge to customers the cost for political contributions, lobbying, public relations, advertising, and consulting fees. some of this is redundant since it' covered under current statute. Section 2 of this bill also deals with rate setting. It seems to me that in this section, a utility that has part or all of its administrative function outside the state, would be heavily penalized by this bill.

In Section 3 of the bill, one particular item that sticks out is the exemption of cable television firms from regulation by the Alaska Public Utilities Commission. It would be like deregulation. The merits of this section are questionable. The heavyweights in the cable t-v business are obviously against it since it would open areas for more competition. The other side of this issue is philosophical if you ask "should cable t-v be considered a utility ?". Perhaps deregulation would not be a bad idea if it were done in a different bill.

The other aim of the bill is to place oil refiners under APUC regulation.

ANCHORAGE, ALASKA 99501
(907) 276-6222

April 6, 1983

Representative Walt Furnace, Chairman
House Labor and Commerce
Pouch V
Juneau, Alaska 99811

Dear Representative Furnace:

In response to your letter of March 28, 1983, concerning House Bill 220 I am enclosing relevant portions of our existing statute, AS 42.05.381(a) and AS 42.05.511(c) and a portion of our regulations 3 AAC 50.500 which is applicable to electric and gas utilities. The latter is the result of federal legislation which mandated specific consideration of the subject of advertising expenses of electric and gas utilities only.

I found it difficult to articulate in writing the deliberation process that the Commission undertakes when the costs enumerated in items 1 through 7, AS 42.05.381(a), are at issue before the Commission. Therefore you will also find portions of Commission orders in eight proceedings over the past six years where the subjects have been discussed. I have underlined the references to the sections of the statute and regs which are enclosed and believe that the Commission's review and assessment speak for themselves and support our initial position that the proposed legislation is redundant and unnecessary in part, and could result in higher rates to consumers through the foreclosure of the evaluation of the reasonableness of a specific component of a rate.

If there is additional information the Commission can provide, please do not hesitate to contact me at 263-2132.

Sincerely,

ALASKA PUBLIC UTILITIES COMMISSION

Carolyn S. Guess

MEMORANDUM State of Alaska

TO: Catherine Wallen
Legislative Liasion
Department of Commerce

DATE: March 15, 1983

FILE NO:

TELEPHONE NO:

FROM: Carolyn S. Guess, Chairman
Alaska Public Utilities Commission

SUBJECT: House Bill 220
Senate Bill 140

Because there apparently are not Bill Analysis Forms available to us in Anchorage I am sending our comments on the proposed legislation in memo form. You may transfer our comments to the appropriate form and sign my name with your initials.

House Bill 220. There is no fiscal impact to the APUC.

Comments: House Bill 220 is redundant in part, unnecessary and could result in higher utility rates.

Section 1(a)(1)-(4) is addressed in 42.05.381(a). The Commission believes the exceptions found in 42.05.381(a)(1)-(4) are reasonable and is not aware of any reason to eliminate them.

Section 1(a)(5), a prohibition of consulting or management fees paid to the owner of a utility could affect a number of small utilities, i.e., Tanana Power Co., and Mukluk Telephone Co. where the owners are the salaried management of the utility.

In regard to Section 1(a)(6), AS 42.05.511(c) provides:

> In a rate proceeding the utility involved has the burden of proving that any written or unwritten contract or arrangement it may have with any of its affiliated interests for the furnishing of any services or for the purchase, sale, lease or exchange of any property is necessary and consistent with the public interest and that the payment made therefor, or consideration given, is reasonably based, in part, upon the submission of satisfactory proof as to the cost of the affiliated interest of furnishing the service or property and, in part, upon the estimated cost the utility would have incurred if it furnished the service or property with its own personnel and capital. (§ 6 ch 113 SLA 1970)

Therefore, the Commission believes this section of the proposed legislation is redundant and unnecessary.

In regard to Section 1(a)(7), the Commission does not understand what purpose this proposed section would serve and further believes it would create problems and possibly higher rates for utilities such as the Anchorage Municipal electric, telephone, water and sewer utilities which receives services from the Municipality of Anchorage i.e., data processing, legal services, etc.; privately owned utilities such as College Utilities (sewer and water) in Fairbanks. Juneau Douglas Telephone Company and Glacier State Telephone Company serving Kenai, Homer, Kodiak and North Pole could also be adversely affected.

In summary, the Commission does not believe that the public interest would be better served by the enactment of this legislation.

Senate Bill 140.

It would appear if the role of the APUC is limited to an oversight review of the regulations to be promulgated, there is no fiscal impact on the APUC.

Comments: The Commission is supportive of legislation that would result in lower utitlity rates for Alaskan utility consumers. The Commission observes that this legislation would only benefit consumers of electric utility cooperatives and regional electrical authorities. There are other kinds of utilities that have as much, if not more, need for the availability of low interest loans, specifically telephone, sewer, and water utilities. The Commission would recommend that consideration be given to broadening the kinds of utilities eligible to borrow long or short term monies from the State.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M January 23, 1984

SUBJECT: Sectional Analysis of SS HB 220

TO: House Labor and Commerce Committee

FROM: Linn H. Asper
Legislative Counsel

You have asked for a sectional analysis of SSHB 220, relating to public utilities, including a comparison of the original bill with the sponsor substitute.

In the sponsor substitute:

* Section 1 adds to the list of public utility costs that may not be included as elements of utility rate-setting. The current list of excluded costs is increased to take in all public relations, lobbying, advertising, certain fees paid, and certain products and services purchased from the owner or affiliate of a public utility.

* Section 2 adds two new subsections to AS 42.05.381, regarding utility rate-setting. The new subsection (e) excludes certain cost items related to return on capital from consideration in rate-setting for public utilities that are operated for profit. The new subsection (f) considers revenues and profits from businesses operated in the state that are owned by a utility or its affiliates, in establishing rates for services provided by the utilities.

* Section 3 limits the on-site inspection jurisdiction of the APUC to areas within the state.

* Section 4 amends the definition of "public utility" or "utility" to exclude cable television operators and waste material collection and disposal businesses from the jurisdiction of the APUC, and to include all refiners and distributors of petroleum in the state.

* Section 5 repeals a reference to waste collection and disposal businesses, because such businesses are removed from APCU jurisdiction by *Sec. 4.

* Section 6 sets a July 1, 1984 effective date.

A comparison to SSHB 220 to HB 220 is as follow:

In section 1 of SSHB 220 several changes have been made to the proposed amendment to AS 42.05.381(a). The subsection is the same in both versions through paragraph (4). Paragraph (5) of the sponsor substitute is less restrictive on fees incurred by utilities than is the original bill, and provides a more complex formula for determining those fees that are and are not allowable for purposes of rate setting by the APUC. Paragraph (6) of the substitute makes a technical change to the original bill. Paragraph (7) of the substitute is less restrictive for purposes of rate-setting, on allowable costs of services incurred by a utility.

Sections 2-6 of the sponsor substitute contain new material not found in the original bill.

MEMORANDUM

TO: House Labor and Commerce Committee

FROM: Representative John Lindauer J.L.

RE: House Bill #220: "An Act restricting cost items that may be allowed in public utility rates."

House bill #220 insures that the rates charged by a public utility will not be excessive in order to cover unnessesary costs or to provide funds to be siphoned off by out-of-state owners in excess of the legal rate of return. Specifically, consumers of public utility services would not be required to pay for the utilities' political contributions, lobbying efforts, advertising campaigns, public relations, consulting or management fees paid to the owner of the utility, or for excessively priced products and services.

This bill will reduce the utility rates of almost every person, business, and government in Alaska.

Juneau, Alaska 99811

ATTN: Ken Johnson

Dear Mr. Cowdery:

At the request of your staff and some members of your committee, I am writing in regards to HB220, "An Act Relating to Public Utilities." ATA opposes this legislation for the reasons outlined in the item by item analysis which follows.

(AS 42.05.381) Section 1. (a) (3) & (4): Current statutes place severe restrictions on advertising and public relations by regulated utilities. The language here is redundant.

(5): If the intent here is to reduce costs and the ultimate effect on the ratepayer, the actual result could be the opposite. At least four companies providing service in Alaska rely heavily on support, management and administrative services through parent companies located Outside. The net effect is that costs are lower due to avoidance of service duplication and lower costs Outside.

Additionally, a number of companies utilize consultants Outside. While we have some very qualified consultants in state, the language here would appear to preclude the companies from calling on the talents of some of the nation's leading talents.

(6) & (7): The apparent purpose of this language is already accomplished in AS42.05.511(c). The statute requires that a company purchasing products or services from an affiliate or subsidiary demonstrate to the APUC that the product or service can't be obtained elsewhere at a lower cost and that the purchase is based on the cost of the item to the affiliate or subsidiary. Current statutes do allow inclusion of a rate of return for the selling entity, a necessity if that entity is to remain in business.

Section 2. (a): The language here appears to exclude debt from the rate of return calculation. Rate of return has always been calculated on the total investment. A company must be allowed to recover interest costs through rate of return in order to finance construction.

(1): This language apparently refers to a double leverage situation in which a stockholder borrows money from the utility to buy more stock. No regulatory body would allow such an arrangement to be included in ratemaking.

(2): This language would appear to penalize a company for establishing affiliates. The federal government is now urging companies to form affiliates to provide new technology (i.e., cable television) and requiring affiliates for some traditional services (i.e., provision of terminal equipment). If this section is enacted, it simply means that an entity which may be the best provider of a service can't provide the service.

(3): This appears to duplicate (2) though specifying unregulated affiliates or subsidiaries. Again, for some services (i.e., terminal equipment) companies are now required by the FCC to establish unregulated subsidiaries, or at the least maintain separate accounts to guarantee no cross subsidy. An investment by a regulated company in a non-regulated subsidiary can not now be included in ratemaking. This is specified by the FCC and in AS42.05.481.

(4): There are clear constitutional questions involved in this requirement favoring Alaska banks. A company has the duty to its stockholders to place its funds in the financial institution offering the best return and treatment.

(5): It is normal business practice for a parent company to pledge its full faith and credit to guarantee loans to a subsidiary. In the case of a regulated company which must pay a loan on which a subsidiary has defaulted, such loss would not be allowed for ratemaking purposes. AS42.05.441 states that, in the case of a parent company operating more than one utility or unregulated subsidiary, a separation of property must be made among the different entities for ratemaking purposes.

(f): Both federal and state law (AS42.05.481) is clear that cross subsidy (i.e., subsidizing a non-regulated subsidiary through regulated rates) is not allowed. This language appears to require a reverse subsidy flowing from an unregulated subsidiary to a regulated parent. We believe there is a constitutional question to this requirement.

The second part of paragraph (f) does not take into account that a subsidiary may be losing money. We suggest that if it is fair to consider the revenues and profits of an unregulated subsidiary for ratemaking purposes, then it should also be fair to consider the costs and losses of the unregulated subsidiary.

I hope this information is helpful to the Committee. I am available to the Committee for questions.

Sincerely,

Gordon Parker

January 24, 1984

Representative John Cowdery, Chairman
Labor and Commerce Committee
State House of Representatives
Juneau, Alaska 99811

Attention: Ken Johnson

Dear Representative Cowdery:

For the reasons stated in the Commission's memorandum of March 15, 1983, regarding HB 220 and the attached analysis of SSHB 220 by Mark Figura, the Alaska Public Utilities Commission opposes the enactment of SSHB 220 because it is redundant, confiscatory, ambiguous, inconsistent, will require an expenditure of dollars that is unnecessary and legislation that is likely to create a multitude of litigation opportunities. The Commission concludes that based upon its initial and subsequent analysis, the proposed modifications to AS 42.05.381 contemplated in SSHB 220 are not in the public interest.

Sincerely,

Carolyn S. Guess

Norman C. Gorsuch
Attorney General

SSHB 220

By:
Mark L. Figura
Assistant Attorney General
Commercial Section-Anchorage

You asked me to comment upon sections 2 - 5 of the sponsor substitute for House Bill No. 220 introduced January 10, 1984, and referred to the Labor & Commerce and Finance committees. Section 1 of the bill is similar to last years version, upon which the Commission has already commented.

Section 2 of the bill is ambiguous, and it is difficult to determine the drafter's intent. This will of course pose serious interpretation problems should the bill be passed and will no doubt lead to extensive litigation concerning the meaning of the legislation. My guess is that the drafter intended the following meaning for his proposed AS 42.05.381(e). The Commission is to determine the equity of the utility in the usual way, but reduce the equity figure if the sum of the utility's paid-in capital and retained earnings less the values of the five numbered paragraphs of proposed section 381(e), is less than the utility equity.

Paragraph 1 includes the purchase price of a utility which has changed ownership in the past. (However, paragraph 1 could well mean only the cash used for such a purpose, or what is commonly known as an "acquisition adjustment," the amount of the purchase price in excess of the seller's net book.) Paragraph 2 includes loans made by the utility to affiliated interests. Paragraph 3 includes equity held in (or perhaps the purchase price of) an unregulated company. Paragraph 4 includes deposits in financial institutions located outside the state of Alaska, and paragraph 5 includes assets used to secure loans to affiliated interests.

The obvious legal problem with the entire proposed section 381(e) is that it would result in confiscatory rates whenever it would have any effect. Rates are generally established by the Commission at the minimal level which will enable the utility to attract capital and continue to provide adequate service. To the extent that those rates would be decreased by proposed section 381(e), the decrease would be confiscatory.

Form 1

There are also a number of lesser problems with the proposed section. Proposed section 381(e)(1) is apparently aimed at limiting the amounts that a utility may earn on plant purchased from another utility. AS 42.05.441(b) already deals with this problem, in a much more satisfactory way. Proposed section 381(e)(3) penalizes a utility for investing money in an unregulated company. The result of enacting such a provision would be to encourage companies to inflate the plant (and therefore the rate base) of the regulated utility.

Section 2 of the bill would also create a new section 381(f). I interpret proposed section 381(f) as requiring the Commission to decrease the revenue requirement of certain utilities by 15% of their gross in-state nonutility revenues. To the extent that any utility allowed proposed section 381(f) to apply, the application of this section would plainly be confiscatory. In addition, the passage of proposed section 381(f) would provide a strong disincentive to certain utilities and their affiliates to invest within the state of Alaska. Given the option of starting a business (such as a telephone equipment business) in Alaska or some other state, very few companies would choose Alaska if they be subject to a 15% tax on gross revenues on any Alaskan sales.

Section 3 of the bill would add a new section AS 42.05.655 providing that the on-site inspection jurisdiction of the Commission is limited to Alaska. The enactment of proposed section 655 would be inconsistent with AS 42.05.491, which specifically states that under certain circumstances utilities may keep records outside the state, if they agree to pay the actual expenses incurred by Commission personnel in making the out-of-state examination. Proposed section 655 would also allow utilities to avoid Commission oversight of affiliated interest transactions, merely by carrying on those transactions outside the boundaries of Alaska.

Section 4 of the bill proposes three changes in the definitions applicable in AS 42.05. The bill would delete both cable television service and waste disposal service from the services subject to public utility regulation. In addition, the bill proposes to delete the language added by ch. 36 SLA 1971 to AS 42.05.720(4)(e). The 1971 legislation limited the jurisdiction of the Commission over small petroleum fuel dealers. The purpose of the 1971 legislation was set out in the act as follows:

> It is the finding of the legislature that it is necessary to avoid unnecessary regulatory procedures over petroleum dealers delivering to

trailer courts and apartment buildings having local pipe distribution systems for heating fuel, and whose owners or residents have a choice of suppliers.

Apparently the intent of the bill is to reestablish Commission jurisdiction over small petroleum dealers serving trailer courts and apartment buildings. Absent complaints from these consumers, the legislation appears unnecessary.

Section 5 of the bill would repeal AS 42.05.711(i), consistent with the elimination of waste disposal from the definition of public utilities. Since the bill also eliminates cable television service, AS 42.05.711(k) should also be repealed.

3 AAC 50.200. INDIVIDUAL ELECTRIC METERS. (a) Except as provided in (b) of this section, an electric utility shall install an individual meter to measure the energy consumption attributable to each residential and commercial unit in a multiple-occupancy building and each mobile home unit in a mobile home park if construction of the building or mobile home park was begun after December 31, 1982.

(b) Individual meters are not required

(1) for transient multiple-occupancy buildings and transient mobile home parks, including, but not limited to, hotels, motels, dormitories, rooming houses, hospitals, nursing homes, and mobile home parks for travel trailers;

(2) for commercial unit space which is subject to alteration with changes in tenants as evidenced by temporary construction or non-load-bearing walls or floors separating the commercial unit spaces;

(3) where alternative renewable energy resources are used in connection with central heating, ventilating, and air conditioning systems; and

(4) in common building areas such as hallways, elevators, reception areas, water pumping facilities, and electric hookups for motor vehicles.

(c) For the purpose of this section, construction begins when the footings are poured. (Eff. 10/15/82, Reg. 84)

3 AAC 50.300. INFORMATION TO ELECTRIC CONSUMERS. (a) An electric utility shall provide to each new electric consumer, coincident with the application for service, a clear and concise explanation of any rate schedule in its currently effective tariff which applies to that consumer.

(b) Not later than 30 days after the filing of a tariff advice letter in which a change in a rate schedule is requested, an electric utility shall transmit to its affected consumers a clear and concise explanation of the proposed change. This provision does not apply to rate adjustments resulting from an automatic fuel-cost rate adjustment clause.

(c) At least once each year, an electric utility shall transmit to each of its electric consumers an informative summary of any rate schedule in its currently effective tariff which applies to those consumers.

(d) On request of an electric consumer, an electric utility shall transmit a clear and concise statement of the consumer's actual energy consumption and, if billed separately, power consumption for any billing period during the previous 12 months unless the information is not reasonably ascertainable by the utility. (Eff. 10/15/82, Reg. 84)

3 AAC 50.400. Reserved

3 AAC 50.500. ADVERTISING. (a) In addition to the restrictions imposed under AS 42.05.381(a), neither an electric utility nor a gas utility may recover through rates any direct or indirect expenditure by the utility for promotional, political, or goodwill advertising.

(b) The commission will determine on a case-by-case basis whether the forms of advertising listed in (c)(3) of this section, as well as advertising not readily categorized as promotional, political, or goodwill, and any other form of advertising not covered by this section will be included in utility operating expenses for rate-making purposes.

(c) In this section

(1) "advertising" means the commercial use by a utility of any media, including newspaper, printed matter, radio, and television, in order to transmit a message to a substantial number of members of the public or to the utility's customers;

(2) "goodwill advertising" means advertising directed toward improving or enhancing the public image of a utility or its employees;

(3) "goodwill advertising," "political advertising," and "promotional advertising" do not include

(A) advertising which informs an electric or gas consumer about methods which conserve electric energy or gas or which reduce peak demand for electric energy or gas;

(B) advertising required by law or regulation, including advertising required under Part I, Title II of the National Energy Conservation Policy Act (42 USC § 8201 et seq.);

(C) advertising regarding service interruptions, safety measures, or emergency conditions;

(D) advertising concerning employment opportunities with a utility;

(E) advertising which promotes the use of energy-efficient appliances, equipment, or services;

(F) an explanation or justification of existing or proposed rate schedules or a notice of hearings concerning these rate schedules; and

(G) communications with members of a utility cooperative about the activities or internal affairs of the cooperative or which encourage or promote the participation of the members in the process of governing the cooperative;

(4) "political advertising" means advertising for the purpose of influencing public opinion with respect to legislative, administrative, or electoral matters, or with respect to a controversial issue of public importance; and

(5) "promotional advertising" means advertising for the purpose of encouraging a person to select or use the service or additional service of a utility, or the selection or installation of an appliance or equipment designed to use the utility's service, except as provided in (3)(E) of this subsection. (Eff. 10/15/82, Reg. 84)

Authority: AS 42.05.141(a)(3)
AS 42.05.151(a)

3 AAC 50.600. DEFINITIONS. Unless the context indicates otherwise, in 3 AAC 50.100 – 3 AAC 50.600

(1) "building" means a single erected structure, roofed and enclosed within exterior walls, built for permanent use, framed of component structural parts and unified in its entirety both physically and in operation for residential or commercial occupancy;

(2) "commercial unit" means that portion of a building or premises which is normally used for commercial purposes;

(3) "electric consumer" means a person or a public or private entity to which electric energy is sold, other than for purposes of resale, by a regulated public utility;

(4) "gas consumer" means a person or a public or private entity to which natural gas is sold, other than for purposes of resale by a public utility;

(5) "mobile home park" means a parcel of land which is used for the accommodation of occupied mobile homes;

(6) "multiple-occupancy building" means a building which is designed to house more than one residential or commercial unit;

(7) "rate" means

(A) a price, rate, charge, or classification made, demanded, observed, or received with respect to the sale of utility services to a utility consumer;

(B) a rule, regulation, condition, or practice respecting a rate, charge, or classification; and

(C) a contract pertaining to the sale of utility services to a utility consumer;

(8) "rate schedule" means the designation of the rates which an electric utility charges for electric energy; and

(9) "residential unit" means one or more rooms for use by one or more persons as a housekeeping unit which provides living,

HB 223

NOTICE OF PROPOSED CHANGES IN THE REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.055, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.050 — AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.
Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.
Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.
Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4
Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.
Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 15, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P.O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 20, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

Date: 8/21/78

/s/ William E. Spear
Deputy Commissioner
Department of Labor

Pub: Aug. 30, 31, Sept. 1, 1978

ENCLOSURE # 1

NOTICE OF PROPOSED CHANGES IN THE
REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.085, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.050 - AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.

Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.

Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.

Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.

Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.

Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 15, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P. O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

Date 8/2/78

Wm. Spear.

William E. Spear
Deputy Commissioner
Department of Labor

To be published August 30, 31 and September 1, 1978.

DATE: April 5, 1983

RE: Constitutionality of Legislation Retroactively Extinguishing Claims for Overtime Compensation and Liquidated Damages

BACKGROUND

Prior to December 8, 1978, flexible work week (FWW) plans for paying employees were recognized as permitted under Alaska's law. Opinion of Attorney General, February 10, 1978. Essentially an FWW plan guarantees to an employee a minimum weekly wage, regardless of the number of hours actually worked, even during periods when an employee is on "R&R". The plans are typically used in resource development and service industries where there is a considerable amount of standby time at remote locations and the number of hours of work available from week to week vary greatly. FWW plans have long been recognized as an acceptable method of payment in compliance with the Federal Wage and Hour Act and are widely used in other states. 29 CFR 778.114.

On December 8, 1978, the Department of Labor adopted 8 AAC 15.100(d)(2) and (3). This regulation prohibited use of FWW plans by Alaska employers. The proposed regulation was not

given widespread publicity among the industries affected, other than by a legally-required publication of a notice in a newspaper which made no mention of the regulation's purpose of prohibiting FWW plans. As a result, there was no reported industry participation at a public hearing. Neither was there widespread dissemination of the regulation by the Department of Labor prior to or immediately after its effective date.

In October of 1979 the first of a number of employers was named as a defendant in a suit filed by a former employee for overtime compensation and liquidated damages. The employer (Dresser Industries) defended on constitutional grounds, and the matter was appealed to the Alaska Supreme Court. In September, 1981, the Alaska Supreme Court upheld the power of the Department of Labor to promulgate the regulation. Dresser Industries v. Alaska Department of Labor, 633 P.2d 998 (Alaska 1981). The defendant petitioned the United States Supreme Court for certiorari, but the Court refused to consider the case.

In December, 1981, a class action was filed by another employee against Dresser seeking back wages and liquidated damages on behalf of all Dresser employees. The complaint alleges damages in an amount exceeding $15 million. At least four other companies have since been sued. The aggregate of

damages alleged in two of the five pending cases total over $35,000,000. All of these cases are in the preliminary stages. No trial dates have been set, and none of these lawsuits have resulted in a judgment against any of the defendant companies.

In addition to potential liability for overtime compensation, Alaska law provides for mandatory liquidated damages which would double any compensation award. The Alaska Supreme Court has held that such damages must be paid by an employer who has failed to pay overtime compensation as provided by the statute, despite any showing of good faith on the part of the employer. AAI, Inc. v. Mussara, 602 P.2d 1240 (Alaska 1979).

HB 223 was introduced on February 23, 1983. Its purposes, as originally drafted, were:

1. To extinguish liability of employers for using FWW plans, which had been prohibited by 8 AAC 15.100(d)(1) and (3), during the period beginning on December 8, 1978, and ending on the effective date of HB 223;

2. To prohibit use of FWW plans in the future;

3. To create a good faith defense against payment of liquidated damages by an employer who inadvertently fails to pay overtime compensation in accord with the statute.

We have been asked to determine whether legislation which extinguishes existing claims against employers, based on use of FWW plans in violation of a Department of Labor regulation, is constitutional. We have concluded that the Legislature can constitutionally extinguish such claims, if it finds that the adverse economic impact on an industry important to the state economy outweighs the interests of employees who may recover damages.

DISCUSSION

A. Possible Bases for Challenging Legislation.

Employees whose claims are extinguished could challenge the constitutionality of the legislation under the Contract Clause (U.S. CONST. art. I, § 10), which provides that "no State shall . . . pass any . . . Law impairing the Obligations of Contracts", the equivalent provision of the Alaska Constitution (AK. CONST. art. I, § 15), or under the Due Process Clause contained in both the Federal and State

Constitutions (U.S. CONST. amends. V, XIV and AK CONST. art. I, § 7).[1/] Since under both the Contract Clause and the Due Process Clause a means-end test of rationality is employed, it has been stated that analysis under both clauses is substantially the same. Allied Structural Steel Company v. Spannaus, 439 U.S. 234, 263 n.9 (1978) (Brennan, J., dissenting); Veix v. Sixth Ward Building and Loan Association, 310 U.S. 32, 41 (1940); Northwestern National Life Insurance Company v. Tahoe Regional Planning Agency, 632 F.2d 104, 106 (9th Cir. 1980).

> Therefore we apply the test of reasonableness to the retroactive aspect of [the legislation]. This test is determinative of all arguments of the plaintiffs, since we perceive no need for separate analysis of

---

1/ In a letter dated March 2, 1983, to Representative Walt Furnace, Mr. Thomas A. Sofo of the Legislative Counsel indicated that the bill might constitute local or special legislation contrary to Article II, § 19 of the Alaska Constitution, as well as possibly violating the equal protection clauses of the United States and Alaska Constitutions. The Alaska Supreme Court has established the standard that legislation which bears a "fair and substantial relationship" to legitimate purposes does not contravene the prohibition on local or special state acts, "despite any incidental local or private advantages." State v. Lewis, 559 P.2d 630, 643, cert. denied, 432 U.S. 901 (1977). The court has also declared the test for an equal protection challenge of a non-suspect class to be substantially the same as for a local law challenge. Id. at 643. Since the test for measuring legislation under the Due Process and Contract Clauses (discussed at length below) is a "reasonableness" test, legislation which passes muster under these two clauses should also pass the local legislation and equal protection tests.

> their various contentions under the impairment-of-contracts clause and under the due process clause of the United States Constitution and cognate State constitutional provisions.

American Manufacturers Mutual Insurance Co. v. Commissioner of Insurance, 372 N.E.2d 520, 525 (Mass. 1978).

Thus, they will not be dealt with separately.

Courts generally disfavor retroactive interpretation of statutes. Jones Enterprises, Inc. v. Atlas Service Corp, 442 F2d 1136, 1138 (9th Cir. 1971). However, the Legislature may enact retroactive legislation if it expressly declares its intention to do so. AS 01.10.090. As the author of a leading and often-cited law review put it:

> Perhaps the most fundamental reason why retroactive legislation is suspect stems from the principal that a person should be able to plan his conduct with reasonable certainty of the legal consequences.

Hochman, The Supreme Court and the Constitutionality of Retroactive Legislation, 73 Harv. L. Rev. 692 (1960). In fact, the objections to retroactive statutes are not absent from prospective legislation, and retroactivity might actually further the goals which normally make retroactive legislation suspect.

> A retroactive statute, by remedying an unexpected judicial decision, may actually effectuate the intentions of the parties. And it is arguable that in

many instances legislation passed with a knowledge of the transactions to which it will apply can be more responsive to the needs of a particular situation. Id. at 693.

Little or no weight is attached to the fact that litigation may be pending at the time of the enactment of retroactive legislation, and it may be applied at any time up to a final and unreviewable judgment. Chase Securities Corp. v. Donaldson, 325 U.S. 304, 316 (1945); Chapman v. Farr, 132 Cal.Rptr. 606, 608 (Cal.App. 1982).2/

B. The Test Against Which the Legislation Would be Measured.

The courts consider and balance a great variety of factors in measuring the constitutionality of retroactive legislation. Legislation which is found to be reasonable after balancing various considerations will be upheld as constitutional. "Indeed from an analysis of the cases it becomes apparent that it is impossible to reduce the potentially infinite variety of situations in which the problem

---

2/ Indeed, in a case where the public interest in preventing evictions was particularly compelling, the Supreme Court held that the Emergency Price Control Act could constitutionally be applied to a right which had been reduced to judgment prior to the enactment of the Legislation. Fleming v. Rhodes, 331 U.S. 100, 107 (1947).

of retroactivity can arise to a single common denominator." Hochman, supra at 727. The following test to determine reasonableness has been drawn from the decisions by the author of the above-cited leading article:

> [I]t is submitted that the constitutionality of such a statute is determined by three major factors, each of which must be weighed in any particular case. These factors are: the nature and strength of the public interest served by the statute, the extent to which the statute modifies or abrogates the asserted pre-enactment right, and the nature of the right which the statute alters. Hochman, supra, at 696.3/

The California Supreme Court, also citing the Hochman article, has outlined the factors it takes into consideration when analyzing retroactive legislation.

> In determining whether a retroactive law contravenes the due process clause, we consider such factors as the significance of the state interest served by the law, the importance of the retroactive application of the law to the effectuation of that interest, the extent of reliance upon the former law, the legitimacy of that reliance, the extent of actions taken on the basis of that reliance, and the extent to which the retroactive application of the new law would disrupt those actions.

In re Marriage of Bouquet 546 P.2d 1371, 1376 (Cal. 1976).

3/ The Supreme Judicial Court of Massachusetts has recently set out and applied the three-pronged approach suggested by the Hochman article. American Manufacturers Mutual Life Insurance v. Commissioner of Insurance, 372 N.E. 2d 520, 526 (Mass. 1978). The court stated that "[t]his articles is a comprehensive treatment of retroactive statutes and the 'reasonableness' analysis, and has been cited with approval." Ibid.

We will group and analyze the factors under the headings of two categories, based on Hochman's distillation of his three-pronged test:

> [T]he two major factors to be weighed in determining the validity of a retroactive statute are the strength of the public interest it serves and the unfairness created by its retroactive operation, . . . Hochman, supra at 727.

By considering the strength of the public interest and the unfairness created by its retroactive application, a framework is created for evaluating the constitutionality of retroactive legislation.[4/]

4/ Some courts have determined the constitutionality of retroactive statutes on the basis of whether a "vested right" is affected. In an early Alaska case, Bidwell v. Scheele, 355 P.2d 584, (Alaska 1960), the court found a defense based on the failure of plaintiff to pay certain sums into court, as required by a statute, not to be a "vested right." It held that the defense could be taken away by the Legislature through repeal of the statute requiring payment into court by a plaintiff. Id. at 587. The court did not attempt a definitive definition of "vested right." As modern cases recognize, "[i]t was customary at one time to use the word "vested" to describe rights that a court had determined could not be impaired retroactively. When the word is so defined, the statement that vested rights are immune to retroactive legislation becomes a tautology, not a proposition." In re Marriage of Bouquet, supra at 1376. Even if a court were to cling to the vested right terminology, "[v]ested rights, of course, may be impaired 'with due process of law' under many circumstances. The state's inherent sovereign power includes the so called 'police power' right to interfere with vested property rights whenever reasonably necessary to the protection of the health, safety, morals, and general well being of the people . . . . Ibid.

1. The Strength of the Public Interest Served by the Legislation.

It initially falls on the legislature to balance competing interests in an effort to broadly promote the interest of the state. Legislation typically "adjusts the rights of private groups in an attempt to achieve a balance which best serves the 'public purpose', and many such statutes have been upheld against claims that their retroactive operation was a denial of due process". Hochman, supra at 698.

Courts traditionally show great deference to a legislature's judgment as to the reasons and need for legislative action, particularly in the economic and social areas.

> . . .the state also continues to possess authority to safeguard the vital interests of its people. It does not matter that legislation appropriate to that end 'has the result of modifying or abrogating contracts already in effect.' [Citations omitted] Not only are existing laws read into contracts in order to fix obligations as between the parties, but the reservation of essential attributes of sovereign power is also read into contracts as a postulate of the legal order. * * * This principle of harmonizing the constitutional prohibition with the necessary residuum of state power has had progressive recognition in the decisions of this Court. Moreover, the 'economic interests of the state may justify the exercise of its continuing and dominant protective power notwithstanding interference with contracts.' [Citation omitted] The State has the "sovereign right * * * to protect the * * * general welfare of the people * * * Once we are in this domain of the

> reserve power of a State we must respect the 'wide discretion on the part of the legislature in determining what is and what is not necessary.'" [Citation omitted]

City of El Paso v. Simmons, 379 U.S. 497, 508 (1965).

In upholding legislation which increased mine operators' duty to provide compensation for illnessess suffered by miners (even if a former miner terminated his employment in the industry before the Act was passed), the Court stated that retroactive laws, like prospective legislation, "adjusting the burdens and benefits of economic life come to the Court with a presumption of constitutionality, and that the burden is on one complaining of a due process violation to establish that the legislature has acted in an arbitrary and irrational way." Usery v. Turner Elkhorn Mining Company, 428 U.S. 1, 15 (1976). To like effect, the U.S. Supreme Court held in United States Trust Company of New York v. New Jersey, 431 U.S. 1, 22 (1977), "the States must possess broad powers to adopt general regulatory measures without being concerned that private contracts will be impaired, or even destroyed as a result."[5/]

5/ The Court, holding that a state's impairment of its own obligations had to be measured by a different standard than impairment of private contracts, struck down New Jersey legislation which impaired contractual obligations in bonds issued by the State. "When a State impairs the obligations of its own contract, the reserved powers doctrine has a different basis . . . . complete deference to a legislative assessment of reasonableness and necessity is not appropriate because the State's self-interest is at stake." U.S. Trust Co. of New York v. New Jersey, supra at 23.

Given the judicial deference to the legislature in economic and social matters, and the presumption of constitutionality, retroactive legislation has been found to serve a legitimate public interest and upheld in a variety of situations.

In City of El Paso v. Simmons, supra, the United States Supreme Court held that a Texas statute limiting defaulting purchasers to a 5-year period for reinstating rights to recover land sold by the State did not unconstitutionally violate the Contract Clause. Prior to the enactment of this legislation a defaulting purchaser could reinstate his right to recover land forfeited to the State at any time upon written request and payment of delinquent interest. Id. at 488. Simmons, who had lost all right to land he could have reclaimed absent the latter legislation, argued that the statute violated the Contract Clause. Id. at 505. The United States Supreme Court upheld the legislation.

The Court looked to the state interest in passing the legislation to justify its application. It found that clouds on titles which arose because of the broader right of reinstatement under prior law made administering the land a more difficult and unstable task. Id. at 513. "The Contract

Clause of the Constitution does not render Texas powerless to take effective and necessary measures to deal with the above." Ibid.

In the leading case of Home Building and Loan Association v. Blaisdell, 290 U.S. 398, 444 (1934), a Minnesota mortgage moritorium law enacted to provide relief to homeowners threatened with foreclosure was upheld against Contract Clause and Due Process clause attack. "The economic interests of the state may justify the exercise of its continuing and dominant protective power notwithstanding interference with contracts." Id. at 437. Veix v. Sixth Ward Building and Loan Association, 310 U.S. 32 (1940) upheld New Jersey legislation limiting the ability of subscribers to withdraw subscriptions from building and loan associations. The Court stated that, "[c]ertainly the protection of building and loan associations against the catastrophe of excessive withdrawal is, today, within legislative power". Id. at 41.6/

6/ These two cases arose during the Depression. However, emergency economic conditions are not a prerequisite for legislative action. City of El Paso v. Simmons, supra at 515. The Seventh Circuit has found that, "[A]llied Structural Steel Co. confirms the prior precedents holding that retroactive liability can properly be imposed to remove problems which fall short of an emergency". Nachman Corp. v. Pension Benefit Guaranty Corp., 592 F.2d 947, 961 (7th Cir. 1979).

In American Manufacturers Mutual Insurance Company v. Commissioner of Insurance, supra at 529, Massachusetts' highest court upheld retroactive legislation requiring the rewriting of insurance contracts, at reduced rates, previously entered into between insurance companies and policyholders. As to the public interest, the court stated:

> The burden is on the plaintiffs to make factual showings that the statute is irrational in its operation, and it has been our frequently stated rule that such a statute will not be set aside as a denial of due process "if any state of facts reasonably may be conceived to justify it." [Citation omitted]

Id. at 526.

These cases indicate the importance courts place on the state interest when evaluating the constitutionality of the legislation. "The immediacy and severity of the conditions which the legislature has attempted to rectify are clearly relevant in determine the reasonableness, and hence the validity of retroactive aspects of a legislative program." Hochman, supra at 697. The clearer the public purpose served and the greater the necessity for the legislation, the more likely a court is to sustain its application. However, the existence of a state interest does not provide the state with unfettered power. Even though a valid interest is found for retroactively affecting contract rights, courts will consider the nature of the right affected to determine if application of

the legislation to the party asserting the particular claim would be so unfair as to make it unconstitutional.

2. The Fairness of Retroactive Application of The Legislation to a Particular Right.

Hochman's second category[7] deals with the equity of retroactive application in any given situation. Since giving effect to the reasonable desires of contracting parties has always been considered a valid legislative goal, the element of reliance is crucial when considering Hochman's second main category.

> . . . the factor most often appearing in these cases is the extent to which the parties have laid reasonable reliance on the law existing at the time of the conduct whose legal consequences the retroactive statute would alter. The importance of this element is apparent when one considers that in very general terms the two major factors to be weighed in determining the validity of the retroactive statute are the strength of the public interest it serves and the unfairness created by its retroactive operation and the reliance of the parties on preexisting law is perhaps the most accurate gauge of the latter. Hochman, supra at 727.

See also, State ex. rel. Cannon v. Moran, 321 N.W. 2d 550, 561 (Wis. Ct. App. 1982).

7/ Hochman has, in effect, distilled his three-pronged test into two categories. See Hochman, supra, at 727.

Some courts have focused almost exclusively on the reliance element.

> The proper test of the constitutionality of retroactive legislation is whether a party has changed position in reliance upon the previous law or whether the retroactive law defeats the reasonable expectations of the parties, not whether the law abrogates a 'vested right,' which is merely a conclusory label. 2 C. Sands, supra at § 41.05; Hochman, supra at 696. Curative laws, such as RCW 26.32.916, which implement the original intentions of affected parties are constitutional because there is no injustice in retroactively depriving a person of a right that was created contrary to his expections at the time which the right arose. [Citation omitted]

Application of Santore, 623 P.2d 702, 706 (Wash. App. 1981).

Where there has been no reliance on the prior existing law there is little risk of injustice.[8/] "For example, an act which has the affect of implementing the original intentions of the parties affected has generally been held constitutional since there is little injustice in

---

8/ In State Workmen's Compensation Board v. Delaney, 615 P.2d 5 (Alaska 1980), our Supreme Court upheld application of an increased rate for disability benefits, which had been put into effect after the claimant's injury but prior to its rating. The Superior Court found that application of the increased rates would unconstitutionally impair the insurance contract between the employer and its insurance carrier. Id. at 7. The Supreme Court reversed, finding no 'unfairness inherent' in its conclusion, because the employer "had no reasonable expectation that the benefit rates in effect at the time of the injury would remain constant." Id. at 8.

retroactively depriving a person of a right, however valuable, which was created contrary to his bona fide expectations at the time he entered the transaction from which the right arose." Hochman, supra at 720. The following cases illustrate the power the Legislature has to validate contracts, which were illegal under prior law, in order to give affect to the bona fide expectations of the parties.

In McNair v. Knott, 302 U.S. 369 (1937), security pledges which were illegal when made were retroactively validated. A bank had given security to protect certain funds deposited in the bank. State law provided that banks could not give security for private deposits. Congress enacted legislation making such pledges legal, thus retroactively making enforceable agreements which originally were illegal. Id. at 370.

The receiver for a bank, attempting to avoid the effect of a pledge made before enactment of the validating law, maintained that illegal contracts could not be validated by changing the law which was in effect when the agreement was made. Id. at 372. The Supreme Court disagreed and upheld the constitutionality of the act, finding nothing inequitable in requiring persons to perform their agreements as originally intended.

> There is nothing novel or extraordinary in the passage of laws by the federal government and the states ratifying, confirming, validating, or curing defective contracts. Such statutes usually designated as "remedial", "curative", or "enabling" merely remove legal obstacles and permit parties to carry out their contracts according to their own desires and intentions. Such statutes have validated transactions that were previously illegal relating to mortgages, deeds, bonds, and other contracts. Placing the stamp of legality on a contract voluntarily and fairly entered into by parties for their mutual advantage takes nothing away from either of them. Id. at 372 (emphasis added).

In the recent case of Chapman v. Farr, supra, the court upheld retroactive application of California law changing the basis for finding a loan usurious. A real estate broker had loaned money at usurious rates. Id. at 607. Three months after a judgment was entered by a trial court against the broker, the applicable law was amended to exclude loans made by real estate brokers. Ibid. The appellate court overturned, finding that retroactive application of the later law was constitutional. Application of the statute resulted in the parties to the loan (illegal at the time it was made) receiving what they had bargained for.

The constitutionality of a Minnesota statute retroactively validating the power of attorney of a woman who under then-existing law was precluded from entering into a real property transaction was upheld in Randall v. Kreiger, 90 U.S. 137 (1875). Enforcing the legislation was deemed equitable in that this gave affect to the parties' attempt, illegal at the time of transfer, to make a valid conveyance.

There are of course cases where it has been determined that retroactive application of a statute would be inequitable under the circumstances. In Allied Structural Steel Co. v. Spannaus, supra, the Court struck down Minnesota legislation which retroactively increased employer liability under company pension plans.

Plaintiff employer had established a pension plan under which employees were entitled to a pension upon meeting certain requirements. In April 1974, in reaction to a single company's pension plan termination, Minnesota enacted the Private Pension Benefits Protection Act. Id. at 248. In the summer of that year plaintiff began closing its Minnesota office. In August the state notified the company that it owed a pension funding charge of $185,000 under the provisions of the Act. The employer brought an action challenging the constitutionality of the Act, claiming that it impaired the employer's contractual obligations to its employees under the pension plan. After a three-judge court upheld the constitutional validity of the statute as applied to the employer, Fleck v. Spannaus, 449 F. Supp. 644 (D. Minn. 1977), an appeal was taken to the United States Supreme Court.

The Court overturned the lower court, finding the Act inadequate under both of Hochman's categories. The Court looked to Minnesota's interest in enacting the legislation.

"[T]here is no showing in the record before us that this severe disruption of contractual expectations was necessary to meet an important general social problem." Id. at 247. In discussing the unfairness of application of the legislation increasing employer liability, the Court stated, "the company thus had no reason to anticipate that its employees pension rights could become vested except in accordance with the terms of the plan. It relied heavily, and reasonably, on the legitimate contractual expectation in calculating its annual contributions to the pension fund". Id. at 245. The Court thus found the Act to be unconstitutional.9/

9/ The decision in Allied Steel has been distinguished by the Court in Nachman Corp. v. Pension Benefit Guaranty Corp., 446 U.S. 359 (1980). The Court in Nachman upheld the Employee Retirement Income Security Act (ERISA) against an employer's constitutional challenge. The Court engaged in an extensive review of the legislative history of the act, including extensive quotations of the remarks made by sponsors of the legislation. Id. at 375 et. seq. As to the public interest, the Court quoted from the Seventh Circuit decision, 592 F.2d 947 at 963:

> The record supporting the enactment of ERISA, wholly unlike that present in Allied Structural Steel, demonstrates that "the presumption favoring 'legislative judgment as to the necessity and reasonableness of a particular measure'" must be allowed to govern here [Citations omitted] 446 U.S. at 367.

The Seventh Circuit had also found that "the nature of the reliance interests in this case can be distinguished in several respects." 592 F.2d at 961. The different outcomes in Allied Steel and Nachman point out the importance which the Court places on the facts in any particular case.

The importance of the reliance element can be seen in the refusal to apply legislation in Allied Steel, which would have resulted in the parties not receiving what they expected when they entered into a transaction. This stands in sharp contrast to the cases, discussed in this section, upholding retroactive legislation which gave the parties exactly what they expected to receive at the time they entered into a transaction.

As the author of a law review article dealing with retroactivity stated:

> The writer believes that a principle, simple in statement though somewhat difficult in application, does exist. If the retroactive statute defeats claims based on the reasonable expectations of the parties at the time the legal transaction occurred, the statute constitutes an unconstitutional deprivation of property without due process. On the other hand, if the statute merely carries out those reasonable expectations it is valid.

Brown, Vested Rights and the Portal-to-Portal Act, 46 Mich. L. Rev. 723, 746 (1948).

The cases discussed in this section support the proposition that a court is more likely to uphold application of retroactive legislation defeating a right where the party claiming that right had not relied upon it at the time he entered into the affected transaction.[10/]

10/ Alternatively, courts have consistently held that a legislature possesses wide power to abrogate rights based on statutes and rights to penalties or forfeitures. See infra discussion at pp. 23-25.

C. Portal-to-Portal and Overtime-on-Overtime Cases.

A series of cases in the late 1940's are particularly relevant in that they arose under similar factual circumstances and indicate how courts balance the factors considered above.

The Portal-to-Portal Act of 1947, 29 U.S.C.A. § 251 et. seq., abrogated employees' rights to compensation and liquidated damages. Literally hundreds of "portal-to-portal" cases arose from congressional destruction of billions of dollars in employee claims. Every federal circuit court of appeals upheld the power of Congress to retroactively abrogate employees' claims to overtime compensation and liquidated damages. See, e.g., Moss v. Hawaiian Dredging Co., 187 F.2d 442, 445 (9th Cir. 1951).

Prior to 1947 workers were generally not paid for activities which were considered incidental to the actual work hours of the employee. These activities included walking to work on employer's premises, changing into work clothes, etc. The United States Supreme Court in Anderson v. Mt. Clemens Pottery Company, 328 U.S. 680 (1947), interpreted the Fair Labor Standards Act as requiring payment, including time and a half for overtime, for these incidental activities, creating a potential liability to employers in the billions of dollars. Seese v. Bethleham Steel Co., 168 F.2d 58, 59 (4th Cir. 1948).

Congress responded with the Portal-to-Portal Act of 1947, 29 U.S.C.A. § 251 et. seq., which provided that no employer would be subject to liability for failure to pay wages for "portal-to-portal" activities, unless there was an express contract provision providing for such payment or it was the custom at the establishment where the employee worked that wages be paid for these activities. Ibid.

Employees attacked as unconstitutional the retroactive application of the act abrogating their claims. Based on a review of the legislative history of the act, courts determined that prevention of a serious adverse impact on industry justified congressional action. Seese v. Bethlehem Steel Co., supra at 60; Annot. 3 ALR 2d. 1097 (1949). Balanced against this was the nature of the employees' rights. Employees' claims did not rest on substantial equity in that payment to them would essentially amount to "windfalls". These windfalls would have consisted of payment for work the employees did not expect to be compensated for when performed. Id. at 65. It was held not to be inequitable to deprive employees of compensation they had not expected to receive at the time they performed the work. Ibid.

An alternative ground for upholding the legislation was the recognition of a legislature power to take away that

which existed because of prior legislation. As stated by the trial court in Seese:

> The plaintiffs' major premise is that they obtained vested rights under the Fair Labor Standards Act. But this requires analysis. The contention is that the plaintiffs when employed by the defendant entered into a contract, the terms of which were governed by the Fair Labor Standards Act. It is of course true in general that contracts when made by individuals are subject to existing valid legislation and the latter is said to be read into the contract. It is, however, important to distinguish between that part of the contract of employment which was the personal and actual agreement of the parties and that part which was superimposed by the statute. In the instant case it is apparent that the purely personal portions of the contract have been performed as there is no averment to the contrary. The alleged unperformed part, that is for the portal-to-portal activities, were not a part of the personal contract but imposed only by the Fair Labor Standards Act as construed by the Supreme Court. It seems necessarily to follow that the extra compensation now claimed is of purely statutory origin.

Seese v. Bethlehem Steel Co., 74 F. Supp. 412, 418 (D. Md. 1947).

In affirming the trial court's decision, the Fourth Circuit stated:

> What was taken away was the right to recover on claims of purely statutory origin, claims given by statute not as compensation for labor performed but as a means of regulating wages and hours in interstate commerce. [Citations omitted] Even where the contract clause is a limitation upon legislative power, it is universally held that such a claim may be taken away by the legislature without violation of constitutional right. Since the legislature may repeal its own act, it may take away that which has no existence save by virtue of that act. [Citations omitted]

Seese v. Bethlehem Steel Co., 168 F.2d at 64.

The Circuit Court distinguished early cases which had not permitted retroactive legislation to affect certain rights, i.e., Steamship Company v Joliffe, 2 Wall 450 (1865); Ettor v. City of Tacoma, 228 U.S. 148 (1912); Coombes v. Getz, 285 U.S. 434 (1932) and Duke Power Company v. South Carolina Tax Commissioner, 81 F.2d 513 (4th Cir. 1936):

> They were concerned with vested property rights based on agreements and not on mere statutory provisions without contract or agreement to support them. It is argued that the provisions of the statute must be read into the contract of employment and that the right to recover compensation in accordance with its terms accrues upon the rendering of services. As stated above, however, the true situation with respect to claims affected by the portal-to-portal act is that the act validates the real contract between the parties and merely takes away a statutory remedy given by the prior act. Even if the provisions of the Fair Labor Standards Act be read into contracts of employment, so also must be read the constitutional power of Congress to change that Act. Id. at 64 (emphasis supplied).

Also extinguished were claims for double damages pursuant to 29 U.S.C.A. § 216(b). Rogers Cartage Co. v. Reynolds, 166 F.2d 317, 321 (6th Cir. 1948). Legislative power to extinguish claims for double damages is indisputable.

> The courts have been particularly uniform in reaching this conclusion where the right of action is in the nature of a claim by an individual for the recovery of a statutory fine, penalty, or forfeiture.

National Carloading Corp. v. Phoenix-El Paso Express, 176 S.W.2d 564, 569 (Texas 1944).

"[T]he other kind of right which the Court has held may be freely altered or removed up to the time it is finally enforced is one arising from a statute which gives to a person or body other than the legislating authority the right to receive a penalty imposed by the statute." Hochman, supra at 725.

In a case arising in the Ninth Circuit the retroactive extinguishment of all rights to overtime pay and liquidated damages was upheld to defeat lawsuits filed against employers prior to the retroactive enactment. Moss v. Hawaiian Dredging Company, supra. This case is particularly instructive as it is factually quite similar to the situation presented to this Legislature.

Workers employed in longshoring and stevadoring in the San Francisco Bay area had a contract which provided for the payment of time and a half for all work performed on Saturdays, Sundays, holidays and those hours on weekdays not between 8 a.m. and 5 p.m. Because of the special nature of compensation for these employees, employers did not pay time and a half for hours worked after the first 40 hours of a week. Id. at 443. This was done despite the opinion of a federal Wage and Hour Administrator that the employees were entitled to such overtime compensation. Id. at 445.

In 1948 a United States Supreme Court decision, Bay Ridge Co. v Aaron, 334 U.S. 446 (1948), confirmed the Administrator's opinion that the employees were entitled to time and a half for hours worked in excess of the first 40 hours. Congress then enacted Public Law 393, popularly known as the Overtime-on-Overtime Act. The Act provided that the previous manner of payment to those employees, which had been illegal, satisfied the applicable federal labor law, thereby validating the employment contracts, and retroactively extinguished employer liability for overtime claims and liquidated damages which were clearly due the employees absent the retroactive legislation. Id. at 444.

In Moss v. Hawaiian Dredging Co., supra, the Ninth Circuit Court of Appeals upheld the constitutionality of the Act in the face of the employees' constitutional challenge. The court, after considering the facts discussed above, found that the employees' right to additional overtime, which had arisen pursuant to the law in effect at the time of the performance of the work, had to yield when the legislature subsequently chose to retroactively extinguish that right. Id. at 447. Although there was no "emergency" justifying retroactive application of the Act, the court deferred to the legislative judgment concerning the economic necessity of enacting the bill. The court believed that the public interest

in avoiding an adverse economic effect upon an important industry outweighed the right of employers to additional statutory compensation.

> . . . the character and quality of such rights are such that they must yield to the sovereign power to regulate commerce by legislation such as that of the Portal-to-Portal Act. Id. at 447.11/

The Overtime-on-Overtime and Portal-to-Portal cases show how courts analyzed application of retroactive congressional legislation to employees' claims to overtime compensation and liquidated damages, balanced the interests discussed above, and concluded that the legislation in each case was constitutional.

11/ The decision of a court should be the same when a state legislature acts pursuant to the state's police power. "And the Portal-to-Portal Act in amending the substantive right created is of the same constitutional nature exercised in the judgment of Congress as the proper policy for the Nation in matters affecting the employer/employee relationship in interstate commerce; and is kindred to the exercise of the police power of the States which, of course, may and often does affect previously existing personal rights." Seese v. Bethlehem Steel Co., 74 F. Supp at 419 (emphasis supplied). See also, Darr v. Mutual Life Insurance Co., 72 F. Supp. 752, 754 (S.D. N.Y. 1947); Hodel v. Virginia Surface Mining and Reclamation Association, 452 U.S. 264, 101 S. Ct. 2352 (1981), quoting United States v. Darby, 312 U.S. 100, 116, "the authority of the federal government over interstate commerce does not differ in extent or character from that retained by the states over intrastate commerce." Id. at 2368.

CONCLUSION

In summary, the constitutionality of retroactive legislation depends upon a balancing of interests. The public interest in enacting the legislation must be weighed against the equity of applying the statute in any given case. Hochman, supra at 727.[12/]

Based upon a review of cases it is our opinion that the Legislature may retroactively extinguish employees' claims for overtime compenseation and liquidated damages, if it makes certain findings based on the facts and existing testimony available to it.

First, the Legislature could determine that payment by employers of pending and potential claims of employees for overtime and damages would pose adverse economic consequences on an industry important to the state's economy, and to the state itself. City of El Paso v. Simmons, supra; Seese v. Bethlehem Steel Co., supra.

12/In undertaking such an analysis a court determines the strength of the public interest by reviewing the legislative record. Usery v. Turner Elkhorn, supra at 4; Home Building and Loan Association v. Blaisdell, supra at 420.

Second, it could find that from December 8, 1978 to the present, employees and employers voluntarily entered into employment contracts by which employees would be compensated under FWW plans, both unaware of the Department of Labor regulation because there was no widespread publicity directed at informing employers and employees of the drastic change in the law; and employees expected to be paid pursuant to the terms of their agreement and not on some other bases. McNair v. Knott, supra; Moss v. Hawaiian Dredging Co., supra.

If the Legislature reasonably makes such findings, the Legislature can act to validate the employment agreements, which arguably were illegal when entered into, in order to carry out the reasonable expectations of the contracting parties. Assuming the existence and validity of the findings recited above, it is our opinion that there is a substantial probability that the legislation would withstand a challenge under the Contract Clause and Due Process Clause of the United Stated and Alaska Constitutions.

regarding cancellation of the contract on two weeks' notice. The argument based on Davis's claim that he was the band's leader can be disposed of summarily: no evidence has been produced from which it can be inferred that this statement induced Johnson to enter into the contract. *See Restatement (Second) of Contracts* § 309 (Tent. Draft No. 11, 1976). The second argument, based on Davis's alleged promise that the band's engagement could be cancelled on two weeks' notice, must fail for the same reason. Even granting that failure to warn a party of his possible misapprehension of a contract term may constitute a misrepresentation,[8] we are unable to conclude that Johnson may have been passively misled in that fashion. She fails to assert any assumption on her part that the written agreement embodied the purported oral promise. No evidence was presented from which it can be inferred either that she failed to read the contract or, having read it, failed to understand its terms. Her affidavit indicates neither that she in any way misapprehended the content of the written agreement nor that she was induced to sign it by any deception, active or passive, on Davis's part. Absent any evidence that Johnson was induced to enter into the contract on the basis of a misrepresentation as to the terms it contained, the district court was correct in granting summary judgment in favor of the band on this ground.

We agree with the district court's conclusion that Johnson's evidence, even interpreted in the light most favorable to her, was insufficient to support her defenses to enforcement of the written contract. That court's entry of summary judgment in favor of the band members must therefore be AFFIRMED.

8. Restatement (Second) of Contracts § 301 (Tent. Draft No. 11, 1976) defines a misrepresentation as "an assertion that is not in accord with existing facts." Section 303 provides that:

> A person's non-disclosure of a fact known to him is equivalent to an assertion that the fact does not exist only if
>
> . . . . .
>
> (b) he knows that disclosures of the fact would correct a mistake of the other party as to a basic assumption on which that party made the contract and if non-disclosure of the fact amounts to a failure to act in good faith and in accordance with reasonable standards of fair dealing, or
>
> (c) he knows that disclosure of the fact would correct a mistake of the other party as to the contents or effect of a writing, evidencing or embodying an agreement in whole or in part . . . .

This section is clarified in Comment e as follows:

> *Known mistake as to a writing.* One party cannot hold the other to a writing if he knew that the other was mistaken as to its contents or as to its legal effect. He is expected to correct such mistakes of the other party and his failure to do so is equivalent to a misrepresentation which may be grounds either for avoidance under § 306 or for reformation under § 308 . . . . The failure of a party to use care in reading the writing so as to discover the mistake may not preclude such relief (§ 314). In the case of standardized agreements, these rules supplement that of § 237(d), which applies, regardless of actual knowledge, if there is reason to believe that the other party would not manifest assent if he knew that the writing contained a particular term. Like the rule stated in Clause (b), that stated in Clause (c) requires actual knowledge and is limited to non-disclosure by a party to the transaction.

DRESSER INDUSTRIES, INC., Appellant,

v.

ALASKA DEPARTMENT OF LABOR, Appellee.

No. 5625.

Supreme Court of Alaska.

Sept. 18, 1981.

Employer appealed from entry of summary judgment by the Superior Court, Third Judicial District, Anchorage, Seaborn J. Buckalew, Jr., J., upholding validity of

regulation promulgated by Department of Labor which prohibited flexible work week. The Supreme Court, Rabinowitz, C. J., held that: (1) Director of Wage and Hour Division of Department of Labor was authorized to promulgate regulation, and (2) regulation did not exceed power delegated by legislature and was reasonable and not arbitrary method of furthering policies of wage and hour statutes requiring increased overtime compensation and promoting spreading of employment.

Affirmed.

1. States ⇐9

Text of Alaska Statehood Act makes it clear that federal legislative enactments were to be carried over unless overruled by State Constitution or state legislature, but Act did not automatically incorporate and maintain federal case law, or administrative law, unless and until changed by legislature. Alaska Statehood Act, § 8(d), 48 U.S.C.A. prec. § 21.

2. Labor Relations ⇐1101

Section of Wage and Hour Act which manifests intent to safeguard existing minimum wage and overtime standards is expression of general public policy and not specific prohibition of change. AS 23.10.050.

3. Labor Relations ⇐1101

Although section of Wage and Hour Act governing definitions directs courts to apply federal regulatory definitions "where applicable," such definitions are "applicable" only when Director of Wage and Hour Division and Commissioner of Labor have refrained from defining terms of state regulations, pursuant to their discretionary authority under sections of statute governing scope of administrative regulations and adoption of federal regulations. AS 23.10.085(b), 23.10.095, 23.10.145.

4. Labor Relations ⇐1101
States ⇐9

Alaska Statehood Act did not automatically incorporate federal case law or administrative law unless and until changed by legislature, provision of Wage and Hour Act which manifests intent to safeguard existing minimum wage and overtime standards is not prohibition of change, and direction to court to apply federal regulatory definitions "where applicable" means that such definitions are applicable only when Director of Wage and Hour Division and Commissioner of Labor have refrained from defining terms of state regulations; thus, Director was authorized to promulgate regulation which prohibited flexible work week. Alaska Statehood Act, § 8(d), 48 U.S.C.A. prec. § 21; AS 23.10.050, 23.10.085(b), 23.10.095, 23.10.145.

5. Stipulations ⇐3

Stipulations as to law are not binding upon court.

6. Labor Relations ⇐1425

Sections of Wage and Hour Act governing scope of administrative regulation and adoption of federal regulations constitute delegation of authority from legislature to agency to formulate policies, leaving to agency discretion issue of whether federal definitions of regular rate of pay and other terms can be applied consistently with Wage and Hour Act; thus, standard of review in determination of validity of regulation prohibiting flexible work week was whether regulation was reasonable and not arbitrary. AS 23.10.085, 23.10.095.

7. Labor Relations ⇐1439

While under standard hourly wage salary, as worker's overtime hours increase, average hourly wage increases, under flexible work week, as worker's overtime hours increase, average hourly wage decreases in contravention of policies requiring increased overtime compensation and promoting spreading of employment; thus, regulation of Department of Labor which defined "regular rate of pay" so as to exclude use of flexible work week was consistent with, and reasonably necessary to carry out purposes of statute governing wages and hours, did not exceed power delegated by legislature, and was reasonable and nonarbitrary method of furthering statute's policy. AS 23.10.050 et seq.

John K. Norman and Wev W. Shea, Hartig, Rhodes, Norman & Mahoney, Anchor-

age, and A. J. Harper II and Jeffrey S. Kuhn, Fulbright & Jaworski, Houston, Tex., for appellant.

Elizabeth Page Kennedy, Asst. Atty. Gen., Anchorage, and Wilson L. Condon, Atty. Gen., Juneau, for appellee.

Before RABINOWITZ, C. J., and CONNOR, BURKE, MATTHEWS and COMPTON, JJ.

OPINION

RABINOWITZ, Chief Justice.

This is an appeal from a summary judgment granted by the superior court. Its sole issue is the validity of 8 AAC 15.100(d)(3),[1] a regulation promulgated by the Department of Labor which prohibits the "flexible work week" (FWW), purportedly under the authority of the Alaska Wage and Hour Act. The superior court concluded

1. This regulation reads:

> (d) The following are not acceptable methods of complying with the payment of overtime provisions of AS 23.10.060:
>
> . . . . .
>
> (3) flex-time or flexitime plans established under 29 C.F.R. 778.114 providing a fixed salary for fluctuating hours up to a predetermined maximum number of hours in a workweek.

The federal regulation referred to, 29 C.F.R. 778.114, reads as follows:

> § 778.114 *Fixed salary for fluctuating hours.*
>
> (a) An employee employed on a salary basis may have hours of work which fluctuate from week to week and the salary may be paid him pursuant to an understanding with his employer that he will receive such fixed amount as straight time pay for whatever hours he is called upon to work in a workweek, whether few or many. Where there is a clear mutual understanding of the parties that the fixed salary is compensation (apart from overtime premiums) for the hours worked each workweek, whatever their number, rather than for working 40 hours or some other fixed weekly work period, such a salary arrangement is permitted by the Act if the amount of the salary is sufficient to provide compensation to the employee at a rate not less than the applicable minimum wage rate for every hour worked in those workweeks in which the number of hours he works is greatest, and if he receives extra compensation, in addition to such salary, for all overtime hours worked at a rate not less than one-half his regular rate of pay. Since the salary in such a situation is intended to compensate the employee at straight time rates for whatever hours are worked in the workweek, the regular rate of the employee will vary from week to week and is determined by dividing the number of hours worked in the workweek into the amount of the salary to obtain the applicable hourly rate for the week. Payment for overtime hours at one-half such rate in addition to the salary satisfies the overtime pay requirement because such hours have already been compensated at the straight time regular rate, under the salary arrangement.
>
> (b) The application of the principles above stated may be illustrated by the case of an employee whose hours of work do not customarily follow a regular schedule but vary from week to week, whose overtime work is never in excess of 50 hours in a workweek, and whose salary of $250 a week is paid with the understanding that it constitutes his compensation, except for overtime premiums, for whatever hours are worked in the workweek. If during the course of 4 weeks this employee works 40, 44, 50, and 48 hours, his regular hourly rate of pay in each of these weeks is approximately $6.25, $5.68, $5, and $5.21, respectively. Since the employee has already received straight-time compensation on a salary basis for all hours worked, only additional half-time pay is due. For the first week the employee is entitled to be paid $250; for the second week $261.36 ($250 plus 4 hours at $2.84, or 40 hours at $5.68 plus 4 hours at $8.52); for the third week $275 ($250 plus 10 hours at $2.50, or 40 hours at $5 plus 10 hours at $7.50); for the fourth week approximately $270.88 ($250 plus 8 hours at $2.61 or 40 hours at $5.21 plus 8 hours at $7.82).
>
> (c) The 'fluctuating workweek' method of overtime payment may not be used unless the salary is sufficiently large to assure that no workweek will be worked in which the employee's average hourly earnings from the salary fall below the minimum hourly wage rate applicable under the Act, and unless the employee clearly understands that the salary covers whatever hours the job may demand in a particular workweek and the employer pays the salary even though the workweek is one in which the full schedule of hours is not worked. Typically, such salaries are paid to employees who do not customarily work a regular schedule of hours and are in amounts agreed on by the parties as adequate straight-time compensation for long workweeks as well as short ones, under the circumstances of the employment as a whole. Where all the legal prerequisites for use of the 'fluctuating workweek' method of overtime payment are present, the Act, in requiring that 'not less than' the prescribed premium of 50 percent for overtime hours worked be paid, does not prohibit paying more. On the other hand, where all the facts indicate that an employee is being paid for his over-

ed the regulation was valid, and Dresser Industries (Dresser) has appealed. We affirm.

The case was presented to the superior court on the basis of the parties' "Stipulations of facts, issues, and procedure," providing in part:

1. Dresser Industries, Inc. is doing business in the State of Alaska and is subject to the jurisdiction of this court.

2. The person on whose behalf the action has been instituted is Clyde Woody (herein claimant), who has assigned his rights to the Department of Labor pursuant to AS 23.05.220.

3. The Department of Labor is the proper party plaintiff to bring this suit under AS 23.05.230 and suit has been timely and properly instituted.

4. The court has jurisdiction of the subject matter and the parties.

5. This action arises under the provisions of the Alaska Wage and Hour law (AS 23.10.050 *et seq.*) and the regulations of the Department of Labor promulgated thereunder (8 AAC 15.100).

6. The interpretative regulation at issue was properly promulgated in accordance with the Alaska Administrative Procedure Act (AS 44.62).

7. Claimant is due the sum of $3,956.76 if the position of plaintiff is sustained and is not due any monies if the position of defendant is sustained.

8. This case is ripe for adjudication on the stipulated facts and issues and the parties agree this stipulation shall constitute cross-motions for summary judgment.

9. The predicates which served as the Administrator's basis in adopting the challenged regulation were:

(A) The 'fluctuating work week' is not applicable under the Alaska Act because,

(1) AS 23.05.160 requires an employee to be told of his 'rate of pay' at the time of hire and of any changes therein before payday; and

(2) AS 23.10.060 requires that employers have to pay overtime for hours worked over eight (8) hours per day, even if less than forty (40) hours per week are worked, and this is to the employer's detriment.

Dresser presented two arguments in support of its contention that 8 AAC 15.100(d)(3) is invalid. It asserted, first, that the definition of "regular rate of pay" in the federal regulations, which countenances use of the FWW, *see* note 1 *supra*, is binding upon the State Wage and Hour Division under two statutory provisions: section 8(d) of the Statehood Act[2] and the Alaska Wage and Hour Act itself, specifically AS 23.10.050[3] and AS 23.10.145.[4] Second, Dresser

time hours at a rate no greater than that which he receives for nonovertime hours, compliance with the Act cannot be rested on any application of the fluctuating workweek overtime formula.

2. The entire text of section 8(d) of the Statehood Act reads:

(d) Upon admission of the State of Alaska into the Union as herein provided, all of the Territorial laws then in force in the Territory of Alaska shall be and continue in full force and effect throughout said State except as modified or changed by this Act, or by the constitution of the State, or as thereafter modified or changed by the legislature of the State. All of the laws of the United States shall have the same force and effect within said State as elsewhere within the United States. As used in this paragraph, the term 'Territorial laws' includes (in addition to laws enacted by the Territorial Legislature of Alaska) all laws or parts thereof enacted by the Congress the validity of which is dependent solely upon the authority of the Congress to provide for the government of Alaska prior to the admission of the State of Alaska into the Union, and the term 'laws of the United States' includes all laws or parts thereof enacted by the Congress that (1) apply to or within Alaska at the time of the admission of the State of Alaska into the Union, (2) are not 'Territorial laws' as defined in this paragraph, and (3) are not in conflict with any other provisions of this Act.

Alaska Statehood Act, P.L. 85-508, § 8(d).

3. AS 23.10.050 reads, in relevant part: "It is the public policy of the state to . . . (2) safeguard existing minimum wage and overtime compensation standards . . ."

4. AS 23.10.145 reads:

Definitions. Terms used in §§ 50-150 of this chapter shall be defined, where applica-

argued that even if the State Wage and Hour Division was authorized to promulgate 28 AAC 15.100(d)(3), the regulation is inconsistent with the state Wage and Hour Act and unreasonable and arbitrary, and thus cannot withstand judicial review.

A. *Carry-over of federal law.*

It is undisputed that the FWW is sanctioned under federal wage and hour law. *See Overnight Motor Transport Co., Inc. v. Missel*, 316 U.S. 572, 62 S.Ct. 1216, 86 L.Ed. 1682 (1942). Early federal regulations specifically endorsed its use, under the provisions defining "regular rate of pay." 29 C.F.R. 778.3 (1950).

Dresser asserts that this federal definition of "regular rate of pay" carried over into state law because no change in that definition was made by the state legislature. Pointing to the section of the Statehood Act which continued in full force and effect all Territorial laws except as modified or changed by the Statehood Act itself, by the state constitution, or by the legislature of the new state, Dresser argues that coverage, meaning, and interpretation of the Alaska Act should parallel that of the Fair Labor Standards Act absent a clear legislative directive to the contrary. Dresser's position seems to be that although the state can choose to diverge from federal law in this area, it should only be able to do so by virtue of legislative enactment, and that in this action the burden is on the state to show that statutory provisions passed by the state legislature mandated issuance of the regulation at issue. Otherwise, Dresser contends, the state agency could not, merely by issuing regulations, overrule the treatment of the FWW under federal/Territorial law, carried over into state law by the Statehood Act.

[1] We do not find this argument persuasive. We think that the text of section 8(d) of the Statehood Act made it clear that federal legislative enactments were to be carried over unless overruled by the state constitution or the state legislature.[5] We do not interpret it as having automatically incorporated and maintained federal case law or, as Dresser argues, administrative law, unless and until changed by the legislature. This court has not held itself bound by federal judicial rulings entered prior to the date of statehood, regardless of whether or not the state legislature has acted in a given area.[6] We think it would be equally awkward to hold state agencies bound by federal regulations extant as of statehood. Such a result would unduly restrict state agencies and inordinately burden the legislature.

[2] Nor are we convinced that the terms of the Alaska Wage and Hour Act evince an intent to bind the State Wage and Hour Division to federal regulatory definitions. It is true that AS 23.10.050 manifests an intent to safeguard "existing" minimum wage and overtime standards, but we cannot give this the strained reading of having petrified wage and hour law as of the time of its enactment. That provision is an ex-

be, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it.

5. The language of section 8(d), *see* note 2 *supra*, indicates that its primary concern was with "laws enacted by Congress."

6. *See, e. g., Howarth v. Pfeifer*, 443 P.2d 39, 44 (Alaska 1968) ("What may be considered a just disposition of a dispute at one stage of history may not be the same at another stage, considering changing social, economic, and other conditions of society.... Thus, we hold under the principles we have discussed in this opinion that one may now maintain an action for negligent misrepresentation, even though that may not have been the case under the common law in years gone by."). *In re Mackay*, 416 P.2d 823, 837 (Alaska 1964) ("We do not agree with the respondent's contention that there should be read into section 8(d) of the Alaska Statehood Act an intent to limit the powers of the Supreme Court of Alaska.... Congress cannot limit this court's power to discipline Alaskan lawyers either directly or by continuing in force the provision of a territorial statute claimed by the respondent to have that effect."). *Cf. Surina v. Buckalew*, 629 P.2d 969 (Alaska 1981) (prosecutor's non-statutorily based promise of immunity in return for testimony is binding under Alaska Constitution regardless of federal rule).

pression of general policy, not a specific prohibition of change.

[3] Dresser's next argument is based upon AS 23.10.145, which indicates that "[t]erms used in [the Alaska Wage and Hour Act] shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it." On its face, this provision presents a strong indication that the federal definition of "regular rate of pay" is binding on the State Wage and Hours Division. However, two other statutory provisions undercut this position. AS 23.10.085(b) provides that the state regulations to be issued by the Wage and Hour Division "may . . . define terms used in [the Alaska Wage and Hour Act]";[7] and AS 23.10.095 provides that the state Commissioner of Labor "may adopt regulations and interpretations which are made by the administrator of the Wage and Hour Division of the federal Department of Labor and which are not inconsistent with [the Alaska Wage and Hour Act]."[8]

We must interpret the statutory scheme as a whole and in such a way that separate provisions do not conflict.[9] Here, we agree with the state's argument that AS 23.10.145 directs the courts to apply federal regulatory definitions "where applicable," and that such definitions are "applicable" only when the state director of the Wage and Hour Division and the Commissioner of Labor have refrained from defining terms in the state regulations, pursuant to their discretionary authority under AS 23.10.085 and 23.10.095.[10] We reject Dresser's contention that AS 23.10.145 is a mandatory directive to both courts and agencies, to be overruled only by the legislature. Such an interpretation would substantially nullify AS 23.10.085 and 23.10.095.

[4] For the above reasons, we conclude that the Director was authorized to promulgate 8 AAC 15.100(d)(3).

7. AS 23.10.085 reads:

Scope of administrative regulations. (a) The director may issue, amend or rescind such administrative regulations not inconsistent with the purposes and provisions of §§ 50-150 of this chapter which are necessary for the administration of §§ 50-150 of this chapter.

(b) The regulations may, without limiting the generality of (a) of this section, define terms used in §§ 50-150 of this chapter, and the restriction or prohibition of industrial homework or of the other acts or practices which the director finds appropriate to carry out the purpose of §§ 50-150 of this chapter, or to prevent the circumvention or evasion of §§ 50-150 of this chapter.

(c) The regulations may permit deductions by an employer from the minimum wage applicable under §§ 50-150 of this chapter to his employees for the reasonable cost, as determined by the director on an occupation basis, of furnishing board or lodging if board or lodging is customarily furnished by the employer and used by the employee.

8. As 23.10.095 reads:

Adoption of federal regulations. The commissioner may adopt regulations and interpretations which are made by the administrator of the Wage and Hour Division of the federal Department of Labor and which are not inconsistent with §§ 50-150 of this chapter.

9. *See In re Estate of Hutchinson*, 577 P.2d 1074, 1075 (Alaska 1978); *State v. City of Anchorage*, 513 P.2d 1104, 1110 (Alaska 1973).

10. This interpretation is consistent with our ruling in *McGinnis v. Stevens*, 543 P.2d 1221, 1238-39 (Alaska 1975), where we held that a prison inmate was not entitled to the minimum wage for institutional jobs. We relied partially on AS 23.10.065:

> AS 23.10.065 is based on the federal Fair Labor Standards Act of 1938 and the terms used in the Alaska statute are defined in the same way as in the federal act. A prisoner is not an 'employee' of the state under the federal act, and therefore is not so by virtue of AS 23.10.065. Moreover, even were we to regard the inmates here as employees, state employees are excluded, by virtue of AS 23.10.055(5), from the operation of the statute. Finally, the legislative history indicates that Congress did not intend the Fair Labor Standards Act to cover prisoners, and we find no indication that the state statute was not meant to have parallel 'non-coverage.' We simply cannot say that the distinction between prisoners in institutions and free citizens on the labor market is suspect.

Id. (footnotes omitted). *McGinnis* did not involve a state regulation explicitly rejecting the FLSA rule on prisoners, however, so our application of the federal definition there was in accordance with our present holding.

B. *Validity of 8 AAC 15.100(d)(3).*

The parties have attempted to stipulate to two matters affecting the scope of this court's review: (1) that 8 AAC 15.100(d)(3) is an interpretative regulation, and thus subject to review under the independent judgment standard; and (2) that the sole statutory provisions which form the basis for the regulation are AS 23.05.160 and AS 23.10.060.

[5] Although the parties' efforts toward simplifying the issues in a case are always appreciated, stipulations as to the law are not binding upon the court. "Counsel ... may agree as to the facts, but they cannot control this court by stipulation as to the sole or any question of law to be determined under them." *San Francisco Lumber Co. v. Bibb*, 139 Cal. 325, 73 P. 864, 865 (1903).[11] This rule regarding stipulations of law is particularly appropriate where, as here, the case involves a matter of public policy. *See generally* Annot., 92 A.L.R. 663, 666 (1934). We think these considerations require us to look beyond the parties' stipulation in our analysis of the applicable law.

[6] We conclude that the regulation here is "quasi-legislative". In *Kelly v. Zamarello*, 486 P.2d 906, 909–11 (Alaska 1971) (footnotes omitted), we distinguished between quasi-legislative and interpretative rule-making:

> Professor Davis characterizes the difference in judicial attitude toward certain administrative rules as a distinction between 'legislative regulations' and 'interpretative regulations.' He has defined 'legislative rule' as 'the product of an exercise of legislative power by an administrative agency, pursuant to a grant of legislative power by the legislative body.' 'Interpretative rules,' he states, 'are rules which do not rest upon a legislative grant of power (whether explicit or inexplicit) to the agency to make law.' The distinction is not always easy to draw, since as Davis points out, 'Interpretative rules sometimes rest upon statutory authority to issue them. • • •'
>
> ....
>
> [T]he distinction between legislative and interpretative rule-making is a helpful one when reviewing regulations adopted by state administrative agencies. We hold, therefore, that when a regulation has been adopted under a delegation of authority from the legislature to the administrative agency to formulate policies and to act in the place of the legislature, we should not examine the content of the regulation to judge its wisdom, but should exercise a scope of review not unlike that exercised with respect to a statute.
>
> ....
>
> Thus, where an administrative regulation has been adopted in accordance with the procedures set forth in the Administrative Procedure Act, and it appears that the legislature has intended to commit to the agency discretion as to the particular matter that forms the subject of the regulation, we will review the regulation in the following manner: First, we will ascertain whether the regulation is consistent with and reasonably necessary to carry out the purposes of the statutory provisions conferring rule-making authority on the agency. This aspect of review insures that the agency has not exceeded the power delegated by the legislature. Second, we will determine whether the regulation is reasonable and not arbitrary. This latter inquiry is proper in the review of any legislative enactment.

We think it clear that AS 23.10.085 and 23.10.095[12] constitute a delegation of authority from the legislature to the agency to formulate policies, leaving to the agency's discretion the issue whether federal definitions of "regular rate of pay" and

11. *See also Anchorage v. Geber*, 592 P.2d 1187, 1191-92 & 1192 n.8 (Alaska 1979), where we overruled as "ill advised" that portion of *Layland v. State*, 535 P.2d 1043 (Alaska 1975) suggesting that parties' concessions regarding interpretations of law are binding upon the courts.

12. *See* notes 7 and 8 *supra*.

other terms can be applied consistently with Alaska's Wage and Hour Act. Thus, we hold that the "reasonable and not arbitrary" test is applicable.

[7] The parties stipulated to the specific statutory provisions upon which the state relies to justify the regulation. These are AS 23.05.160,[13] which requires that an employee be informed of his rate of pay at the time of hiring and of any change in that rate on the payday prior to the change, and AS 23.10.060,[14] which requires the one and one-half overtime rate not only for hours worked over forty per week, but also for hours worked over eight per day.

Dresser argues that 8 AAC 15.100(d)(3) furthers neither of these statutory provisions; and indeed, our assessment of the parties' arguments indicates that the regulation is related only tenuously, if at all, to these provisions. However, the state's brief argues that the regulation is grounded in policy considerations beyond those contained in the two statutes. Although Dresser argues that this disregard of the stipulation is improper, we have concluded for the reasons noted above that the stipulation is not binding upon this court. In another case in which the parties had attempted to stipulate to the purpose of a legislative enactment, the New York Court of Appeals noted:

> We are not bound by stipulations in respect of the purpose of legislation. Laws are not to be declared invalid upon the consent of parties. We must determine their purpose and tendency for ourselves.

E. Fougera & Co., Inc. v. City of New York, 224 N.E. 269, 120 N.E. 642, 643 (1918).

The public policy underlying the Alaska statutory scheme is given as follows in AS 23.10.050:

> *Public Policy.* It is the public policy of the state to
>
> (1) establish minimum wage and overtime compensation standards for workers at levels consistent with their health, efficiency and general well-being, and
>
> (2) safeguard existing minimum wage and overtime compensation standards which are adequate to maintain the health, efficiency and general well-being of workers against the unfair competition of wage and hour standards which do not provide adequate standards of living.

On the basis of these policy pronouncements, the state argues that the basic concern of the legislature was protection of the worker's well-being against unfair wage and hour standards, and that this concern is of particular importance in Alaska, where the cost of living is higher than in other states. The state also argues that prohibiting the FWW would be to the worker's advantage, and cites the present case as an illustration: claimant Woody would be entitled to $3,956.76 if the regulation were upheld.

More specifically, the state argues that as the number of hours worked in a particular week increases, the "regular rate of pay" decreases; as the "regular rate" decreases, the resultant "overtime rate" decreases; and thus the effect of allowing the FWW is counter-productive to the stated purposes of the Act. The state insists, further, that the FWW makes it financially advantageous

13. As 23.05.160 reads:

> *Notice of wage payments.* An employer shall notify his employee in writing at the time of hiring of the day and place of payment, and the rate of pay, and of any change with respect to these items on the pay day before the time of change. An employer may give this notice by posting a statement of the facts, and keeping it posted conspicuously at or near the place of work where the statement can be seen by each employee as he comes or goes to his place of work.

14. The applicable portion of AS 23.10.060 reads:

> *Payment for overtime.* No employer who employs employees engaged in commerce, or other business, or in the production of goods or materials in Alaska may employ an employee not acting in a supervisory capacity, either male or female, for a workweek longer than 40 hours or for more than eight hours a day, except that if the employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid, and this provision is considered included in all contracts of employment.

for an employer to hire an employee to work long overtime hours rather than to hire more workers, contrary to one purpose of the overtime provision, which was to force employers to spread employment by hiring more persons.[15]

We are persuaded that the state's position is correct. Under a standard hourly wage salary, as a worker's overtime hours increase, the average hourly wage increases. Under the FWW, as a worker's overtime hours increase, the average hourly wage decreases. This contravenes the policies of requiring increased overtime compensation and promoting the spreading of employment.

Thus, we must conclude that the regulation's definition of "regular rate of pay" so as to exclude use of the FWW is consistent with, and reasonably necessary to carry out, the purposes of the relevant statutory provisions. The regulation does not exceed the power delegated by the legislature. Further, 8 AAC 15.100(d)(3) is a reasonable and non-arbitrary method of furthering the statute's policies.[16]

Dresser raises several collateral arguments concerning the regulation's prohibition of the "Belo" pay plan, *see Walling v. A.H. Belo Corp.*, 316 U.S. 624, 62 S.Ct. 1223, 86 L.Ed. 1716 (1942); 29 U.S.C.A. § 207(f), and the permissibility of piece-work and commission pay plans. The validity of these provisions is not before us, and we perceive no inconsistency so blatant as to render the prohibition of the FWW unreasonable or arbitrary.

The judgment of the superior court is AFFIRMED.

15. The United States Supreme Court has repeatedly emphasized this point. In *Bay Ridge Operating Co. v. Aaron*, 334 U.S. 446, 460, 68 S.Ct. 1186, 1194, 92 L.Ed. 1502, 1514 (1948), the Court said, "The purpose was to compensate those who labored in excess of the statutory maximum number of hours for the wear and tear of extra work and to spread employment through inducing employers to shorten hours because of the pressure of extra cost."

16. The parties have not addressed, and we express no opinion concerning, the question whether there may be any conflict between 8 AAC 15.100(d)(3) and AS 23.10.060(17) and (18), enacted in ch. 31, § 1, SLA 1980.

David LEUCH, Appellant,

v.

STATE of Alaska, Appellee.

No. 5255.

Supreme Court of Alaska.

Sept. 25, 1981.

Defendant was convicted, pursuant to guilty pleas, before the Superior Court, Fourth Judicial District, Fairbanks, James R. Blair, J., of two counts of grand larceny, and he appealed sentence. The Supreme Court, Rabinowitz, C. J., held that: (1) where an offense is against only property, involving no physical threats or violence, where it is the offender's first felony conviction, and where there is no background of unsuccessful paroles or probations which would indicate that probation is unsuitable to protect the public, to deter the offender, and to further his rehabilitative process, probation, coupled with restitution, is the appropriate sentence unless other factors militate against it, and (2) concurrent sentences of eight years with four suspended was excessive and upon remand defendant should receive concurrent sentences which, including any period of suspension and probation, did not exceed five years in total length.

Sentence reversed and remanded.

Matthews, J., dissented and filed opinion in which Burke, J., joined.

1. Criminal Law ⇐986.2(1)

Absent a conviction, an indictment is absolutely no evidence of guilty conduct.

TESTIMONY

My name is John Martin, I am the Alaska area manager for Dresser Atlas, a division of Dresser Industries. I have previously testified on HB 223. I am therefore furnishing you with my earlier testimony and a copy of Register 68 and will keep my present testimony as short as possible.

Recently several newspaper articles have surfaced concerning HB 223. It appears opponents of the bill strongly suggest that somehow employees have been misled and/or cheated on wage remuneration. Nowhere has there been mention of the substantial additional compensation paid to employees by my company, and others, in addition to basic wages under the FWW plan; for example, Alaska Allowance or C.O.L.A., Isolated Location Allowance, and the fact that employees working under the FWW plan were paid for off-work weeks. This additional compensation made up for any deficits compared to straight time and half overtime. The bottom line concerning wages is that the employees were paid well. For example, in 1981 our average operator made $60,678, and a senior operator averaged $67,829. The new system does not increase total wage compensation.

Most of the companies involved with this problem are oil and gas service companies. Many people perceive these service companies as being on the same level as oil companies. This is a far cry from reality. Our businesses are extremely competitive and totally dependent on oil companies for our livelihoods.

Being successful in the service company business, as the name suggests, means offering high quality, expedient service. You not only need highly refined technical equipment but more importantly, good people in your employment. As most businessmen know, dedicated employees are the primary key to being successful in the supply and demand service market place. I have been with Dresser Atlas for 15 years and during that time I have always observed and practiced this rudimentary business philosophy. The success of this philosophy is indicated by the fact that my firm, in Alaska, has had and remains to have, the lowest turnover of hourly workers in all of our company's North American operations. This was true when the company paid its employees under a FWW plan.

To maintain this position we know we must continue to employ the finest people the industry has to offer. If we felt we had ever misled or not paid our employees fairly we would not be here, because we would have corrected the problem. We are here because D.O.L. adopted a regulation without telling the industry in advance, and because several employees saw this as an opportunity to collect a great deal of money, in addition to their original fair compensation.

There has been a lot of discussion as to why companies did not change pay plans when the wage and hour administration banned the FWW. It is simple! The industry did not know it was banned until Dresser had been sued by the D.O.L. on behalf of Mr. Clyde Woody.

It was determined to test the validity of the regulation. When the Supreme Court finally determined, after several years, that the regulation was valid, the companies changed their long time industry

accepted method of paying hourly workers. It was not until each company changed pay plans that they were issued class action law suits.

As a matter of good business practice it was only prudent to test the validity of the Woody case in proving whether the D.O.L. could actually promulgate such a powerful regulation. A regulation that changed the industry's accepted way of doing business that was used in all of the United States and approved by the Federal Fair Labor and Standards Act. It appeared that such a dramatic change concering something as important as a person's wages, should be the responsibility of the state's legislature.

If this bill fails, it means many past and present employees will receive overtime compensation, which is required to be doubled by law above what was planned and expected by employer and employee.

On the negative side, it will mean catastrophic financial jeopardy for the individual companies and subsequent costs to the state and public consumers. Money paid to several hundred claimants and their law firm will not be available for industry expansion, and this is what produces jobs.

If a study had pointed out why the FWW should be banned and a dialogue had taken place between D.O.L. and industry concerning this regulation, none of us would be troubled with this problem. Mr. Wilson said yesterday that D.O.L. had begun thinking about prohibiting FWW plans long before the regulation was adopted. I would respectfully ask: Why didn't he inform affected employers that this was being considered, and ask for their comments? Mr.

Wilson also said that he had no idea what the impact would be on employers. He could have discoverd this by asking companies with FWW plans. Why didn't he do this?

As an example, I think the current legislative bill dealing with the "Right to Know" of employees concerning hazardous or toxic materials is a sterling example of how proposed changes in the law should be publicized within our state. No matter what the outcome of this legislation, government, business and the public are cognizant of the proposed changes, and therefore will have the chance to come forward and support or oppose them.

Yesterday, after listening to Mr. Wilson's testimony, several items surfaced which I feel need to be addressed. He stated that in 1977 the D.O.L. had a pending claim against Dresser. It was withdrawn due to then-Attorney General Avrum Gross' opinion on the Dowell case. Dresser knew nothing of this claim, and if we had it would have drawn our attention to the Department's plans. But we were never informed by D.O.L. of such a claim. Communication between government and business was definitely lacking.

Second, Mr. Wilson testified that typically the D.O.L. keeps lists of interested parties and sends notices and proposed regulations to them. He said that if the Committee checked Register 68, it would find a list of names of those to whom notice of the proposed regulation would have been sent. Mr. Wilson also said that he did not remember how many people attended the three hearings. Yesterday we visited the Lt. Governor's office where the records are kept for safekeeping, and obtained a copy of the complete record filed in Register 68, involving adoption of this regulation. I would like to have this a part of the record. In addition, I am

providing a copy of a letter from Commissioner Robison to Chairman Bussell with certain attachments. Our review indicates an affidavit by Mr. Wilson indicating that he held one hearing in Anchorage on September 15, 1978. There is no similar affidavit referring to other hearings, and the hearing notice refers to only one hearing in Anchorage. Commissioner Robison, in item No. 4, says that the hearing notes indicate that no one appeared to testify. A copy of the empty roster was found in Register 68. Nobody appeared because nobody was aware that the D.O.L. proposed to ban FWW!

Mr. Wilson also stated that a hearing was held in spring of 1983 on some proposed D.O.L. regulations and no one showed up. He stated that he subsequently read the proposed regulations and did not like them himself, and since there was no testimony from interested parties, he did not promulgate the regulations. This is not consistent with his or the department's action in 1978. Why were the 1978 regulations not tabled and/or the affected companies notified as was done in 1983? A lack of consistency is apparent.

Mr. Wilson also stated that out of courtesy he personally wrote letters to Dowell in Kenai, Dresser Atlas in Kenai and hand delivered a letter to Otis in Anchorage informing them of the promulgated regulations. Dresser Atlas, for one, did not receive any such letter, as Mr. Burdick, the Kenai manager testified at the earlier hearing. Mr. Burdick is well known for his ability to be aware of explicit details concerning his business. I know from 6 years' experience managing Mr. Burdick that if the Kenai district had received a letter from Mr. Wilson, Dresser Atlas would have known about it. It is also curious that Dresser in Anchorage

was not notified, since we have maintained Central Management there for 15 years.

It is interesting too that Dowell and Otis's records do not reflect notification, although they were allegedly notified. Any notice to Dowell and Otis would have been unnecessary anyway, since they had previously changed to a different pay plan. But I question why Schlumberger and others using FWW plans were not notified. It is widely known for example, that Schlumberger was the largest and major user of the FWW system in Alaska, and thus would be substantially affected. Notice of the adoption of the regulation, while it would have been useful, would have been no substitute for giving the industry fair notice of the regulation before it was adopted. That's when we needed to know, not after the fact.

I cannot help but question whether proper communication from start to finish of this regulation actually took place.

I strongly urge this committee to pass this bill on to the House floor for a full body vote. A positive vote will do much to encourage an improved long term working relationship between business and our state agenices. At the same time, no matter how we feel about how it was done, the D.O.L. will have accomplished their objective of having the FWW banned from Alaska.

At a time of declining state revenues the state should be looking for avenues to encourage and work with businesses so that together we may foster long term jobs and subsequent benefits for residents of the State of Alaska. Passage of HB 223 will do much to promote this positive work atmosphere.

I would like to thank the Labor and Commerce Committee for this opportunity to testify. I will do my best to answer your questions.

STATE OF ALASKA

LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

MEMORANDUM May 16, 1983

SUBJECT: Constitutionality of CSHB 223 (Judiciary)

TO: Representative John Cowdery

FROM: Thomas A. Sofo /TAS
Legislative Counsel

You have asked this office for an opinion on the constitutionality of HB 223. That bill in the form in which it was originally introduced prohibited certain methods for payment of overtime while excusing employers from the payment of liquidated damages for good faith violations of overtime payment provisions as well as other employer omissions under AS 23.10. The recent committee substitute, CSHB 223 (Judiciary), differs mainly in its omission of adding the prohibition for certain methods of payment of overtime to the statutes themselves. The committee substitute seems content to refer to the regulations, 8 AAC 15.100(d)(1) and (3), which from December 9, 1978 to the present have prohibited those same methods for the payment of overtime. It is not clear that the committee substitute intends to annul those regulations, a fact which will be discussed later in this memo, but both bills raise a potential constitutional problem in their attempts to retroactively excuse certain employers from liability for their noncompliance with the regulations.

This opinion is based on the assumption that the regulations concerning the payment of overtime were duly adopted. AS 23.10.060, the Alaska statute concerning the payment for overtime states that its provisions are to be considered included in all contracts of employment. The most serious constitutional challenge to either version of HB 223 is that the retroactive application of that bill violates the constitutional prohibition against the impairment of contracts. That prohibition is found in both the United States and the Alaska Constitutions. Article I, section 15 of the Alaska Constitution provides in relevant part:

> No law impairing the obligation of contracts, . . . shall be passed.

While the federal constitutional provision found in Article I, section 10 provides in relevant part:

> No state shall . . . pass any bill of attainder, ex post facto law or law impairing the obligation of contracts, . . .

It is important to note that the constitutional prohibitions against impairing the obligation of contracts apply only to state action. Article I, section 9 of the United States Constitution, the section which deals with the limitations upon the powers of Congress, merely states that:

> No bill of attainder or ex post facto law shall be passed.

That Congress may impair contractual obligations by laws pertinent to the powers conferred on it by the federal constitution is not the point in issue. See C.J.S. Constitutional Law, sec. 275. In that regard, the use of judicial decisions upholding the termination by Congress of certain wage claims under the Portal to Portal Act of 1947, 29 U.S.C. 251, is inapposite. To the extent arguments have been raised concerning the applicability of those cases, it should be pointed out that even the Portal to Portal Act did not attempt to extinguish liability for the payment of overtime where there was an express provision of a written or nonwritten contract in effect.

It is fortunate that the United States Supreme Court has very recently set forth rules to be applied in an impairment of contracts analysis. In Energy Reserves Group, Inc. v. The Kansas Power and Light Co., ___ U.S. ___, 74 L.Ed.2d 569, 103 S.Ct 697 (1983), the U.S. Supreme Court stated:

> "The threshold inquiry is 'whether the state law has, in fact, operated as a substantial impairment of a contractual relationship.' Allied Structural Steel Co., 438 U.S., at 244, 57 L.Ed.2d 727, 90 S.Ct. 2716. See United States Trust Co., 431 U.S., at 17, 52 L Ed.2d 92, 97 S.Ct. 1505. The severity of the impairment is said to increase the level of scrutiny to which the legislation will be subjected. Allied Structural Steel Co., 438 U.S., at 245, 57 L.Ed.2d 727, 98 S.Ct. 2716.

> Total destruction of contractual expectations is not necessary for a finding of substantial impairment. United States Trust Co., 431 U.S., at 26 - 27, 52 L.Ed.2d 92, 97 S.Ct. 1505. On the other hand, state regulation that restricts a party to gains it reasonably expected from the contract does not necessarily constitute a substantial impairment. Id., at 31, 52 L.Ed.2d 92, 97 S.Ct. 1505, citing El Paso v. Simmons, 379 U.S. 497, 515, 13 L.Ed.2d 446, 85 S.Ct. 577 (1965).
>
> * * *
>
> "If the state regulation constitutes a substantial impairment, the State, in justification, must have a significant and legitimate public purpose behind the regulation, United States Trust Co., 431 U.S., at 22, 52 L.Ed.2d 92, 97 S.Ct. 1505, such as the remedying of a broad and general social or economic problem. Allied Structural Steel Co., 438 U.S., at 247, 249, 57 L.Ed.2d 727, 98 S.Ct. 2716. Furthermore, since Blaisdell, the Court has indicated that the public purpose need not be addressed to an emergency or temporary situation. United States Trust Co., 432 U.S., at 22, n. 19, 52 L.Ed.2d 92, 97 S.Ct. 1505; Veix v. Sixth Ward Bldg. & Loan Assn, 310 U.S., at 39 - 40, 84 L.Ed.1061, 60 S.Ct. 792.
>
> * * *
>
> "The requirement of a legitimate public purpose guarantees that the State is exercising its police power, rather than providing a benefit to special interests." [Footnote omitted.]

Although it typically will be a factual determination for a court to decide if a substantial impairment is caused by this legislation, the testimony offered to date by both the proponents and opponents of this legislation seems to be in agreement that the rights at stake in HB 223 are substantial. Under the analysis of the Supreme Court above, the severity of impairment involved in this case will subject the legislation to a high of level of scrutiny. In order to withstand that scrutiny a "significant and legitimate public purpose" must be identified. I am unable to identify such a purpose.

HB 223, as well as the committee substitute, may pose equal protection problems since there already has been enforcement of the regulatory provisions on certain employers. See Dresser Industries Inc. v. Alaska Department of Labor, 633 P.2d 998 (Alaska 1981). Related to that point is the fact that HB 223 as originally worded would have placed in the statutes those prohibitions which the regulations originally introduced. The legislation would then be merely excusing unlawful conduct for a period of time starting from December 9, 1978, to the effective date of the Act. It is more difficult to show a legitimate public purpose if the prohibition, which some have argued is not in the public interest, remains in the bill. The legislation then appears to be an attempt to excuse unlawful conduct without addressing the circumstances under which that conduct had arisen. CSHB 223 (Judiciary) has not included the placement of the regulatory prohibitions in the permanent law. Sec. 3 of the bill attempts to extinguish any penalty, forfeiture, or liability incurred under the regulations without attempting to annul those regulations. Although there is lower court authority in this state that may be read to allow the retroactive annulment of regulations, that issue was not before the court in State v. A.L.I.V.E. Voluntary, 606 P.2d 769 (Alaska 1980), when the Alaska Supreme Court considered the appropriate methodology to be used in annulling regulations. In any event, both HB 223 and CSHB 223 (Judiciary), present a difficult challenge to those who would fashion a legitimate public purpose, since the underlying prohibition which created the liability of those employers is not challenged by either bill.

Section 19 of Article II of the Alaska Constitution states:

> The legislature shall pass no local or special act if a general act can be made applicable.

This window of nonliability created by both versions of HB 223, without any attempt to otherwise change the prohibition on which that liability was based, also subjects the bills to possible criticism as special legislation.

There are no wage cases directly on point concerning the retroactive elimination of employers' liability for wages. The general rules set out by the U.S. Supreme Court seem to give this legislation a very slim chance of withstanding a constitutional challenge in a judicial forum.

STATE OF ALASKA

Bill Sheffield, Governor

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3600

April 7, 1983

The Honorable Charlie Bussell
Representative
Chairman, Committee on Judiciary
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: Materials relating to subject of House Bill 223

Dear Representative Bussell:

This responds to your two letters of March 30, 1983 requesting information from the Department of Law concerning certain regulations of the Department of Labor (8 AAC 15.100) regarding flexible-work-week employment.

Since I was the attorney in the Department of Law who worked with the Department of Labor in adopting those regulations back in 1978, I thought it appropriate that I respond to your inquiry directly. Pursuant to your request of this morning, I will make myself available to the Committee to address the issues raised in HB 223. I will also be asking Assistant Attorney General Gary Amendola, who now works with the Department of Labor, to attend your Committee's hearings on the bill.

In response to your questions:

1. The Department of Law has not issued any opinions regarding the constitutionality of the current regulations regarding flexible-work-week employment (8 AAC 15.100). However, the Alaska Supreme Court did address the validity of those regulations in 1981 in its decision of Dresser Industries, Inc. v. Alaska Department of Labor 633 P 2d 998. A copy of that decision is attached for your information. Also, back in early 1978 I did prepare a formal opinion to the Department of Labor advising them on their authority to adopt regulations dealing with flexible-work-week employment. A copy of that February 10, 1978 opinion is also attached. As you will note, the Alaska Supreme Court agreed with my analysis.

03-C5LH

2. In response to your request for documentation of the process which led to the adoption of the Department of Labor's regulations on this subject, I am attaching copies of the relevant materials contained in the Lt. Governor's files. These include Affidavits of Publication from the Southeast Alaska Empire, the Fairbanks Daily News Miner, and the Anchorage Daily News, an Affidavit of Oral Hearing indicating that a hearing on these proposed regulations was held in Anchorage on September 15, 1978, an Affidavit of Notice of Adoption of Regulation indicating that the requirements of AS 44.62.190 regarding provision of notice of proposed adoption of regulations was complied with by the Department of Labor, and the memorandum by the Department of Law's regulations attorney, Arthur Peterson, approving these regulations for filing with the Lieutenant Governor. The original of all these documents is on file with the Lieutenant Governor and can be reviewed in his offices.

I hope this information will be of assistance to you and the Committee in your deliberations on HB 223.

Sincerely,

NORMAN C. GORSUCH

OPINION NO. 7

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL
POUCH K—STATE CAPITOL
JUNEAU 99911

February 10, 1978

Edmund N. Orbeck
Commissioner
Department of Labor
P.O. Box 1146
Juneau, Alaska 99802

Re: Use of Flex-Time Contracts under State Wage and Hour Act; A.G. File J-66-263-78

Dear Commissioner Orbeck:

You have asked our opinion as to whether certain methods for compensating employees, referred to generally as "flex-time", "flexitime", or "fluctuating workweek" plans, may be used by employers in Alaska consistent with the payment for overtime provision of the state's Wage and Hour Act, AS 23.10.060. We understand these plans are used frequently by employers to provide a steady income level to employees whose hours of work vary considerably from week to week. Your question arises because these "fluctuating workweek" pay plans are specifically recognized as valid under the Fair Labor Standards Act of 1938, as amended (FLSA), 29 U.S.C. § 201 et seq., the federal counterpart to the state's overtime provisions. However, these kinds of plans are not addressed under

relevant state laws or regulations dealing with overtime. At least one employer in the state is presently using flex-time plans to compensate certain of its employees, and the Wage and Hour Division of your department has taken the position that the employer's use of those plans is inconsistent with the state's Wage and Hour Act, AS 23.10.050 - 23.10.150.

The fact that flex-time is permissable under the FLSA does not, in and of itself, require that the State of Alaska also permit its use by employers within the state. The FLSA prescribes only minimum requirements with which all covered employers in the United States must comply, however, it does not prohibit the states from adopting wage and hour requirements more stringent than those established in the FLSA. See, sec. 18(a), FLSA; 29 U.S.C. § 218(a); also 29 C.F.R. § 778.5. The question, then, is whether the state has in fact adopted a more stringent approach to the payment of overtime than that taken under the FLSA. It is our conclusion that the state has not done so. We believe, however, that your department may prohibit the use of flex-time plans in Alaska through proper adoption of appropriate regulations.

The basic payment of overtime provisions of the state and federal law are quite similar. /1 Sec. 7(a)(1) of the FLSA, 29 U.S.C. § 207(a)(1) provides, in pertinent part, as follows:

> [N]o employer shall employ any of his employees . . . for a workweek longer than forty hours unless said employee receives compensation for his employment in excess of the hours above specified at a rate not less than one and one-half times the regular rate at which he is employed. (emphasis added)

AS 23.10.060 provides in pertinent part:

> No employer . . . may employ an employee . . . for a workweek longer than 40 hours . . . except that if the employer finds it necessary to employ an employee in excess of 40 hours a week . . . compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid. (emphasis added)

/1 The state act does require that overtime be paid for hours worked in excess of eight in one day in addition to the requirement of both acts that overtime be paid for work in excess of 40 hours in a week, however that difference is not at issue here.

Under both statutes the employee's "regular rate of pay" must be determined before his overtime entitlement can be computed. By way of regulation, the U.S. Department of Labor has stated that "flex-time" pay plans are an acceptable method of determining the employee's "regular rate". 29 C.F.R. § 778.114. It has been suggested that your department must also recognize flex-time as a valid method of compensating for overtime as the result of AS 23.-10.145 which provides:

> Terms used in §§ 50-150 of this chapter shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it.

For two reasons, we do not read this provision as requiring the adoption of flex-time in Alaska, however. First, 29 C.F.R. § 778.114, the "fluctuating workweek" provision, is not a "definition" of a term. It is merely one of many "interpretations" recognized by the federal government in implementing the FLSA. The federal regulations, themselves, explicitly state that the various provisions of 29 C.F.R. § 778, of which "fluctuating workweek" is a part, are "the official interpretation of the Department of Labor with respect to the meaning and application of

the maximum hours and overtime pay requirements of section 7 of the [FLSA]." (emphasis added). The state Wage and Hour Act specifically recognizes this distinction between "definitions" and "interpretations". AS 23.10.095 authorizes, but does not require, adoption of regulations and "interpretations" made under the federal act, while AS 23.10.145 clearly requires adoption of federal definitions, "where applicable".

But even if 29 C.F.R. § 778.114 could be described as a "definition" for purposes of AS 23.10.145, it would still only be binding on the state if it is "applicable". We take the statute's use of "where applicable" to mean if it fits a given situation; if it is fit, suitable, pertinent, appropriate, or capable of being applied; if it is applicable to the habits and conditions of society. McQueeney v. Catholic Bishop of Chicago, 159 N.E.2d 43, 47 (App.Ct. Ill. 1959); Whitney v. American Fidelity Company, 215 N.E.2d 767, 768 (Mass. 1966); Fuchs v. Goe, 163 P.2d 783, 792 (Wyoming 1945). Therefore, the department could determine upon examination that a given definition contained in the FLSA or the regulations adopted under it does not adequately or appropriately address working conditions or the work situation in Alaska. Once the department has made that determination, it may properly adopt a different definition, appropriate to Alaska. In doing so, however, it must

adopt that definition as a regulation under the procedures described in the State's Administrative Procedure Act (AS 44.62) if it is to have any enforceable effect.

The preceding discussion sets out some of the general parameters of the relationship between the FLSA and the state's Wage and Hour Act. The state act specifically looks to the federal provisions for substance. In adopting this legislative scheme, we think the Legislature evidenced a clear intention to follow the federal approach to wages and hours closely, except in those situations where the Department of Labor determines that the federal provisions are inadequate or inappropriate when applied to working in Alaska. Consequently, if the state determines that certain aspects of its Wage and Hours Act should be applied in a manner more stringent than required under the FLSA and the regulations adopted under it, the areas of difference between the federal and state laws should either be set out clearly in the Act or in the department's regulations adopted under the Act.

Nothing in the state's current statutes or regulations indicates that flex-time is not an acceptable method of compensating for overtime work under the Alaska act. At the same time, the federal regulations clearly permit flex-

time under the FLSA, after which the state act is closely patterned. Under those circumstances, the department may not simply make independent ad hoc determinations of acceptable methods of overtime compensation. Unless the state act is clear on its face, the department must either establish its own standards (regulations) or follow FLSA and those established under the FLSA.

There are at least two independent reasons for the department adopting its own wage and hour standards. First, properly adopted and enforceable regulations implementing the state Wage and Hour Act will assure that employers have adequate notice of the requirements with which they must comply in Alaska. In the absence of state standards, Alaska employers have only the federal law and regulations for determining how to comply with applicable wage and hour laws. Second, established standards also insure that the department's wage and hour enforcement activities will be consistent throughout the state.

Since the only standards for overtime entitlement currently in existence are those adopted under the federal FLSA, we must conclude that the department may not presently

refuse to recognize flex-time plans established under 29 C.F.R. § 778.114. The state act does not, on its face, prohibit flex-time plans. As indicated above, the state and federal overtime provisions are quite similar, and the federal provision has been interpreted to permit flex-time. We have no doubt, therefore, that the state provision can also be so interpreted. We are also of the opinion that the department could, through adoption of an appropriate regulation, interpret the state act as not permitting flex-time plans. However, until the department adopts regulations which either specify exclusive standards for the determination of overtime entitlement or reject specific portions of the federal standards, employers in Alaska are entitled to rely on their compliance with the federal standards as also constituting compliance with the state's Wage and Hour Act.

Sincerely yours,

AVRUM M. GROSS
ATTORNEY GENERAL

NOTICE OF PROPOSED CHANGES IN THE REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.055, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.

Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.

Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.

Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.

Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.

Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (east to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 18, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P.O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

THRU: William E. Spear, Deputy Commissioner

FROM: Dale W. Cheek
Director
Wage and Hour/Mechanical
Engineering Division
Department of Labor

DATE: October 24, 1977

SUBJECT: Request for Opinion
re: AS 23.05.160 and
AS 23.10.060

The Department of Labor respectfully requests of the Department of Law, an interpretation of whether "Flex-time" would or would not be an acceptable condition of employment under AS 23.05.160 and AS 23.05.060. It has always been the Department of Labor's position that flex-time would be contrary to the intent of the Alaska Wage & Hour Act as we read it. This would appear to be supported by the stronger law provision under the FLSA.

We would very much appreciate an early determination of this issue as it bares directly to the outcome of case now pending before the Department of Labor and will have a related effect on other employers, particulary in the oil industry.

We have attached position papers, re: the instant case of Kluting, R. vs. Dowell Division of Dow Chemical Company. In our investigation of this complaint, Investigator Don Wilson of our Wage and Hour Division, Anchorage, has worked closely with Assistant Attorney General, Pat Kennedy of your staff for legal guidance.

Thank you for your attention and the continuing cooperation we enjoy with the Department of Law.

STATE of ALASKA

MEMORANDUM

TO: Dale Cheek, Director
Wage & Hour Division
Department of Labor
P. O. Box 630
Juneau, Alaska

DATE: September 28, 1977

FILE NO:

TELEPHONE NO:

Thru:
Benny Joy, Supervisor

SUBJECT: Kluting, R. vs: Dowell Division of Dow Chemical Co (Fluctuating Workweek)

From: Donald R. Wilson
W/H Supervisor II
Wage & Hour Division
Department of Labor
650 W. Int'l Airport Road
Suite 100 Int'l Bldg. Annex
Anchorage, Alaska 99502

The Anchorage Regional Office is currently processing a wage claim as captioned above.

This is a claim in which the department, as assignee for the claimant, disputes the validity, under Alaska Statutes, of a wage payment plan known as the "Fluctuating Workweek."

On August 19, 1977 we met with legal counsel for the defendant corporation and agreed, as a means to reconcile this matter, to submit our separate position statements to the Attorney General's Office for their interpretation of Alaska Statutes and specifically to the validity of the "Fluctuating Workweek," in Alaska.

Therefore, enclosed are the position statements for your review with our request that these positions be forwarded to the Department of Law for their review and opinion.

There is a pay plan under Federal Wage and Hour Law which provides for an irregular workweek (fluctuating hours) for fixed weekly pay. This plan is more commonly known as the "Fluctuating Workweek, (FWW)," and is addressed in Title 29, Part 778 of the "Code of Federal Regulations," Section 778.114.

While the department concedes that the "FWW," is a valid pay plan under Federal Regulations, the department contends that the plan is not now, nor has it ever been recognized as valid for employers engaged in commerce or business within the state of Alaska. We have no specific "Case," upon which to base this conclusion, but instead use the Alaska Statute, Title 23 and "Common Knowledge" to support our rationale.

Specifically, AS SEC. 23.10.060. Payment of Overtime. states:

> No employer who employs employees engaged in commerce, or other business, or in the production of goods or materials in Alaska may employ an employee not acting in a supervisory capacity, either male or female, for a workweek longer than 40 hours or for more than eight hours a day, except that if an employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for overtime at the rate of one and one-half times the regular rate of pay shall be paid, and this provision is considered included in all contracts of employment.

Additionally, AS SEC. 23.05.160. Notice of Wage Payments. states:

> An employer shall notify his employee in writing at the time of hiring of the day and place of payment, and the rate of pay, and of any change with respect to these items on the payday before the time of change. An employer may give this notice by posting a statement of facts, and keeping it posted conspicuously at or near the place of work where the statement can be seen by each employee as he comes and goes to his place of work.

Since Alaska Statute, for the purpose of overtime, incorporates the eight hour law along with the Federal 40 hour law, overtime payment would have to be made for weeks of less than 40 hours where days in excess of eight hours were worked. It would therefore work to the employer's detriment since if the wage rate slides downward after 40 hours it would have to slide upward for

WAGE & HOUR DIVISION

ANCHORAGE, ALASKA 99502

weeks where less than 40 hours were worked, but days in excess of eight hours were worked.

Additionally, since Alaska Statute contains a provision that requires an employer to make notification of changes of the rate of pay, in writing, on the payday before the date of change, an employer attempting to use the "FWW," could not possibly comply with AS 23.05.160.

Accordingly, the "FWW," since it requires continuous rate changes, (everytime overtime is required, or less than 40 hours are worked) cannot be in compliance with the legal requirements to notify employees as set forth in AS SEC. 23.05.160.

Final reference is made to AS SEC. 23.10.095. Adoption of Federal Regulations. We have made diligent search through our department and can find no instance where any commissioner, including the current administration, has adopted that portion of the Code of Federal Regulations that addresses the FWW. To the contrary, and in support of our rationale of "Public Knowledge," we would invite your attention to the attached letter from the U.S. Department of Labor as Enclosure #1.

Subject: Fluctuating work week pay plans

To: Mr. Don R. Wilson
Alaska State Department of Labor
Wage and Hour Division
Suite 100, International Bldg. Annex
650 W. International Airport Road
Anchorage, Alaska 99502

Dear Mr. Wilson:

I am in receipt of your letter of September 15th regarding my instructions or comments to employers concerning the fluctuating work week pay plan.

The fluctuating work week pay plan is a valid pay plan under the Fair Labor Standards Act and employers or employees who ask about it are so advised. I have also made it a practice to advise them that even though it is a legal system under the federal law it is not a valid plan under the State of Alaska labor law and that they should contact the State Wage and Hour Division.

I trust that this letter will answer your questions regarding my comments to persons or firms regarding the applicability of the federal labor laws.

If I can be of further assistance please contact me.

Very truly yours,

Jack E. Harty

State of Alaska

RE: Alaska Wage and Hour Act
Fluctuating Workweek Question

Dear Sirs:

This position paper is being submitted to the Office of the Attorney General on behalf of the Dowell Division of the Dow Chemical Company ("Company"), pursuant to an agreement between Dowell and the Wage and Hour Division of the Alaska Department of Labor. It is requested by Dowell and the Wage and Hour Division that the Attorney General render a legal opinion regarding the controversy which has arisen between the two parties and which is more fully disclosed below.

INTRODUCTION

On May 19, 1977, the Wage and Hour Division of the Alaska Department of Labor in Anchorage issued a wage claim against the Dowell Division of the Dow Chemical Company. The claim, filed on behalf of Mr. Randy Kluting, asserted that Dowell had failed to provide the claimant with his full overtime pay entitlement while he was in the Company's employ as a service operator from March 3, 1976 until April 28, 1977.

The claim asserted by the Alaska Department of Labor is part of what appears to be a broad challenge to the method by which the Company had paid its employees for several years -- the so-called "fluctuating workweek method". This method of compensation is geared to the special problems confronted by employers and employees in businesses where work schedules vary considerably from day to day and week to week. The uncertain and drastically variable conditions of operations within the oil industry in Alaska have made such

a plan especially suited to the needs of Dowell and many other companies engaged in oil production.

The fluctuating workweek method is essentially a salary plus overtime plan. It provides a guaranteed weekly salary to an employee regardless of the number of hours which he actually works. For example, whether an individual employee works 30 hours or 50 hours in a given week, he is guaranteed to receive his previously specified salary for that week's work.

In addition to that guaranteed salary, however, the employee, under federal and state law, is also entitled to overtime compensation for those hours which he works in excess of 40 per week or 8 per day. The amount of this additional compensation is determined by multiplying the number of overtime hours by one-half of the employee's hourly rate for that week. This is done because the employee, under the fluctuating workweek method, is deemed to have been fully compensated, on a straight time basis, for any overtime hours worked.

The hourly rate of pay for an individual employee under this system is the focal point of the present dispute. Under the fluctuating workweek method the hourly rate, also known as "regular rate of pay", varies from week to week as a function of the number of hours actually worked in that week. In other words, for the purpose of calculating overtime, it is necessary to determine an employee's regular rate of pay during the week in question. This is accomplished by dividing the guaranteed weekly salary by the number of hours actually worked during that week. Once this regular rate of pay has been determined, it is merely divided in half and multiplied by the number of hours of overtime worked by the employee for that week. This result is then added to the weekly salary to arrive at the employee's total compensation for that particular week.

The legitimacy of the fluctuating workweek method has consistently been recognized by the federal courts and in federal regulations adopted pursuant to the Fair Labor Standards Act. For this reason, and because it is so well suited to the particular circumstances of employment in the oil industry in Alaska, many companies throughout the state have implemented the fluctuating workweek method as the standard wage formula for employee compensation.

The fluctuating workweek method of compensation is attractive both to employers, and to employees who work weeks of irregular hours. It enables both parties to make reasonable forecasts with regard to the amount of weekly wages that will be paid. This is especially convenient for employees and their families who otherwise would be uncertain from week to week how much compensation they could expect to receive.

In the present matter, the Alaska Department of Labor is claiming that the fluctuating workweek method is not valid under applicable Alaska wage and hour statutes. Such a determination by the Department of Labor has potentially far reaching ramifications because of the large number of companies currently using the fluctuating workweek method. In this particular action the Department is seeking recovery of the amount of overtime pay which Mr. Kluting would have received under applicable wage and hour statutes if the fluctuating workweek method had not been utilized.

At a meeting on August 19, 1977, in Anchorage, Dowell and the Wage and Hour Division agreed that the Office of the Attorney General would provide an impartial forum for evaluation of the arguments opposing and in support of the fluctuating workweek method of compensation. Since the ultimate resolution of this matter rests upon sophisticated legal analysis and construction of various statutes and other authority, it was agreed that an Attorney General's Opinion should be procured before the Wage and Hour Division expands the application of its internal decision.

II.

ISSUE PRESENTED

Is the fluctuating workweek method of compensation acceptable under the Alaska Wage and Hour Act and/or have companies operating in Alaska, including Dowell, justifiably relied upon the plain language of that statute in utilizing the fluctuating workweek method?

III.

ARGUMENT

A. The Alaska Wage and Hour Act Expressly Recognizes That Its Administration and Construction Are to Be Governed by Prevailing Federal Authority Concerning the Federal Fair Labor Standards Act and the Regulations Adopted Under It

The Alaska Wage and Hour Act is codified in the State statutes in §§23.10.050 - .150. Section 23.10.060 of those statutes sets forth the State's payment for overtime provisions, in pertinent part as follows:

> "No employer who employs employees engaged in commerce, or other business, or in the production of goods or materials in Alaska may employ an employee not acting in a supervisory capacity, either male or female, for a workweek longer than 40 hours or for more than eight hours a day, except that if the employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid, and this provision is considered included in all contracts of employment." [Emphasis added.]

here we say rate is weekly not hourly

Later in the Wage and Hour Act, §23.10.145 provides:

> "Terms used in §§50-150 of this chapter shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it."

Clearly the operative language in the first above-quoted section is the underlined term "regular rate of pay". Under §23.10.060, overtime compensation is absolutely dependent upon the amount of pay deemed included in an employee's "regular rate". The fluctuating workweek question with which we are here concerned is also intimately connected with that term. The fluctuating workweek approach is essentially a method of ascertaining an employee's regular rate of pay. The corresponding "regular rate" term in the

federal Fair Labor Standards Act has always been defined to include the fluctuating workweek method as acceptable under that statute.

The question to be resolved, therefore, is whether the term "regular rate of pay" in Alaska statute §23.10.060 encompasses the fluctuating workweek method. The answer is clearly provided in §23.10.145. That section unambiguously states that the terms utilized in the Wage and Hour Act are to be defined as they are defined in the federal Fair Labor Standards Act or the regulations adopted under it.

The only possible complication connected with §23.10.145 arises from the "where applicable" phrase contained therein. Nevertheless, there is no merit in a contention that the term "where applicable" gives the State Department of Labor the discretion to ignore clear and unambiguous federal pronunciations regarding specific provisions of the Act.

Section 23.10.145 contains language which is clearly mandatory and not discretionary. It states that terms used in the Wage and Hour Act "shall be defined" as they are defined under federal law. It is well recognized in the law that the word "shall" in a legislative enactment demonstrates the legislature's intention that the body charged with administration of that statute is obligated to perform the stated function. The fact that this section of the Wage and Hour Act contains such mandatory language is strong evidence that the legislature of Alaska did not intend to grant any particular discretion to the Department of Labor in regard to the definition of terms.

The inclusion of the term "where applicable" does nothing to require a different conclusion. It should be read as though the legislature were saying that if federal law has defined a particular term which appears in the Wage and Hour Act, that federal definition should be applied by the Department of Labor in administering the Alaska statute. Support for this interpretation is found in the definition of the words used in that statutory section. Webster's Dictionary defines the word "applicable" primarily as "capable of being applied." This definition of "applicable" was approved in Thomas v. City of Huntington, 80 Ind. App. 176, 141 N.E. 358, 359 (1928), and Hodges v. Canal Ins. Co., Miss. 223 So.2d 630, 633 (1969). That definition does not contain a discretionary element. In the present context it

merely indicates that if a federal definition can possibly be applied, it must be applied. Any other interpretation of the words "where applicable" would be without foundation.

It is obvious, therefore, that in accordance with §23.10.145 guidance must be sought from the federal Fair Labor Standards Act regarding the definition of "regular rate of pay".

B. The Fair Labor Standards Act and Its Regulations Explicitly Recognize and Support the Use of the Fluctuating Work Week Method of Compensation

Section 7 of the Fair Labor Standards Act provides that overtime must be paid to an employee for all hours worked in excess of 40 hours in a single workweek at a rate not less than one and one-half times the "regular rate" at which he is employed. Extensive regulations have been promulgated by the Federal Department of Labor to explain and define Section 7's "regular rate" term. Those explanations and definitions are codified in Title 29 of the Code of Federal Regulations, beginning at Section 778. As stated in Section 788.1, those regulations constitute "the official interpretation of the Department of Labor with respect to the meaning and application of the maximum hours and overtime pay requirements contained in Section 7 of the Act."

The actual definitions of the "regular rate" term begin with Regulations Section 788.108. It is there stated:

> "The 'regular rate' of pay under the Act cannot be left to a declaration by the parties as to what is to be treated as the regular rate for an employee; it must be drawn from what happens under the employment contract."

Section 778.109 states:

> "The 'regular rate' under the Act is a rate per hour. . . The regular hourly rate of pay of an employee is determined by dividing his total remuneration for employment (except statutory exclusions) in any workweek by the total number of hours actually worked by him in that

workweek for which such compensation was paid. The following sections give some examples of the proper method of determining the regular rate of pay in particular instances."

Section 778.114 of the Regulations contains the example of the proper method of determining the regular rate of pay in instances where fixed salaries are paid for fluctuating hours of work. That section provides:

"(a) An employee employed on a salary basis may have hours of work which fluctuate from week to week and the salary may be paid him pursuant to an understanding with his employer that he will receive such fixed amount as straight time pay for whatever hours he is called upon to work in a workweek, whether few or many. Where there is a clear mutual understanding of the parties that the fixed salary is compensation (apart from overtime premiums), for the hours worked each workweek, whatever their number, rather than for working 40 hours or some other fixed weekly work period, such a salary arrangement is permitted by the Act if the amount of the salary is sufficient to provide compensation to the employee at a rate not less than the applicable minimum wage rate for every hour worked in those workweeks in which the number of hours he works is greatest, and if he receives extra compensation, in addition to such salary, for all overtime hours worked at a rate not less than one-half his regular rate of pay. Since the salary in such a situation is intended to compensate the employee at straight time rates for whatever hours are worked in the workweek, the regular rate of the employee will vary from week to week and is determined by dividing the number of hours worked in the workweek into the amount of the salary to obtain the applicable hourly rate for the week. Payment for overtime hours at one-half such rate in addition to the salary satisfies the overtime pay requirement because such hours have

already been compensated at the straight-time regular rate, under the salary arrangement.

"(b) The application of the principles above-stated may be illustrated by the case of an employee whose hours of work do not customarily follow a regular schedule but vary from week to week, whose overtime work is never in excess of 50 hours in a workweek, and whose salary of $80.00 a week is paid with the understanding that it constitutes his compensation, except for overtime premiums, for whatever hours are worked in the workweek. If during the course of 4 weeks this employee works 40, 44, 50 and 48 hours, his regular hourly rate of pay in each of these weeks is approximately $2.00, $1.82, $1.60, and $1.67, respectively. Since the employee has already received straight-time compensation on a salary basis for all hours worked, only additional half-time pay is due. For the first week the employee is entitled to be paid $80.00; for the second week, $83.60 ($80.00 plus 4 hours at 91 cents, or 40 hours at $1.82 plus 4 hours at $2.73); for the third week $88.00 ($80.00 plus 10 hours at 80 cents, or 40 hours at $1.60 plus 10 hours at $2.40); for the fourth week approximately $86.72 ($80.00 plus 8 hours at 84 cents or 40 hours at $1.67 plus 8 hours at $2.51).

"(c) The 'fluctuating workweek' method of overtime payment may not be used unless the salary is sufficiently large to assure that no workweek will be worked in which the employee's average hourly earnings from the salary fall below the minimum hourly wage rate applicable under the Act, and unless the employee clearly understands that the salary covers whatever hours the job may demand in a particular workweek and the employer pays the salary even though the

> workweek is one in which a full schedule of hours is not worked. Typically, such salaries are paid to employees who do not customarily work a regular schedule of hours and are in amounts agreed on by the parties as adequate straight-time compensation for long workweeks as well as short ones, under the circumstances of the employment as a whole. Where all the legal prerequisites for use of the 'fluctuating workweek' method of overtime payment are present, the Act, in requiring that 'not less than' the prescribed premium of 50 percent for overtime hours worked be paid, does not prohibit paying more. On the other hand, where all the facts indicate that an employee is being paid for his overtime hours at a rate no greater than that which he receives for non-overtime hours, compliance with the Act cannot be rested on any application of the fluctuating workweek overtime forumla."

It is absolutely clear from the regulation quoted above that the fluctuating workweek method is included within, and is an integral part of, the definition of "regular rate of pay" under the Fair Labor Standards Act. It is equally clear that since the Alaska Wage and Hour Act looks to the federal Fair Labor Standards Act for its definition of that term, the "regular rate of pay" term in the Alaska statute also includes the fluctuating workweek method. The logic of this reasoning is inescapable.

C. The Lawfulness of the Fluctuating Workweek Method has Consistently Been Upheld Under Federal Case Law

The above conclusion has been strongly and consistently supported by the decisions of the federal courts. Almost immediately after the Fair Labor Standards Act of 1938 was enacted, the United States Supreme Court was confronted with a challenge to the fluctuating workweek method of compensation. That challenge was identical to the present case in that the controversy focused on the meaning of the term "regular rate of pay." In Overnight Transportation Company v. Missel, 316 U.S. 572 (1942), the employee worked

as a "rate clerk" for a corporation engaged in interstate motor transportation as a common carrier. An agreement had been entered into between the company and the employee whereby the employee received a fixed weekly wage for irregular hours, and a rate equal to one and one-half times his "regular rate of pay" for all hours in excess of the statutory maximum. In upholding the use of the phrase "regular rate of pay" interpreted as the total weekly compensation divided by the total number of hours worked (the FWW interpretation), the Court stated:

> "No problem is presented in assimilating the computation of overtime for employees under contract hours which are the actual hours worked, to similar computations for employees on hourly rates. Where the employment contract is for a weekly wage with variable or fluctuating hours, the same method of computation produces the regular rate for each week. As that rate is on an hourly basis, it is regular in the statutory sense inasmuch as the rate per hour does not vary for the entire week, though week by week the regular rate varies with the number of hours worked. It is true that the longer the hours the less the rate and the pay per hour. This is not an argument, however, against this method of determining the regular rate of employment for the week in question. Apart from the Act, if there is a fixed weekly wage, regardless of the length of the workweek, the longer the hours the less are the earnings per hour. This method of computation has been approved by each circuit court of appeals which has considered such problems. It is this quotient which is the 'regular rate at which an employee is employed' under contracts of the types described and applied in this paragraph for fixed weekly compensation for hours, certain or variable." 316 U.S. at 580.

Numerous federal cases have been guided by the principle established in Overnight Transportation Company. The interpretation of Section 7 of the Fair Labor Standards

Act made in that case has been repeatedly utilized to sanction fluctuating workweek programs. In the Ninth Circuit, for example, "regular rate of pay" was similarly defined in Robertson v. Alaska Juneau Gold Mining Company, 157 F.2d 876 (9th Cir. 1946). In striking down a particular pay plan which provided a "regular rate" for seven hours of the working day and so-called "overtime" for the additional one hour of the working day, the court described the plan as "artificial." In finding that the scheme was designed to circumvent the application of the Act, the court stated:

> "The Act [FLSA] does not necessarily require an increase of wages, nor does it forbid a decrease, so long as the wages paid are above the statutory minimum. But it does require that all wages or things of value forming part of the normal working income be used to determine the 'regular rate,' and that that regular rate be applied to the first 40 hours worked, and for all hours worked in addition a rate one and one-half times the regular rate must be paid."

In another much cited case, Landreth v. Ford, Bacon & Davis, 147 F.2d 446 (8th Cir. 1945), the Eight Circuit Court of Appeals also held that the fluctuating workweek method, employing the term "regular rate of pay", is immune from attack in federal courts:

> "If his [an employee's] employment is for a fixed weekly compensation for a week of variable or fluctuating hours, the employee's regular rate of pay must be determined by dividing his fixed weekly compensation by the number of hours actually worked in any workweek; and in cases of employment at a fixed weekly compensation for a workweek of fluctuating hours, the regular rate of an employee will necessarily vary from week to week according to the number of hours worked."

Accord, Mumbower v. Callicot, 526 F.2d 1183 (8th Cir. 1975); Masters v. Maryland Management Co., 493 F.2d 1329 (4th Cir. 1974); Usery v. Godwin Hardware, Inc., 426 F.Supp. 1232 (S.D. Mich. 1976). See, Conkland v. Hofgesang, 407 F.Supp. 1090 (W.D. Ky. 1975).

The same interpretation of the "regular rate" phrase as it is used in §7 of the FLSA has also been adopted in regulations promulgated under the Act, 29 C.F.R. §778.114, which are cited above.

In short, it is inescapable that the drafters of the Alaska statute, by using the key phrase "regular rate of pay" and by expressly stating that the federal interpretation of the terms of the statute should govern, envisioned fluctuating workweek plans similar to those consistently upheld under federal law. Since the meaning of the phrase "regular rate of pay" is beyond dispute under federal law, and since no Alaska statutes or regulations suggest a contrary interpretation, the federal definition should prevail and the use of the fluctuating workweek method of compensation should be acceptable under Alaska law.

D. The Fact That Alaska Requires the Payment of Overtime for Hours Worked in Excess of Eight Hours in a Single Workday, Unlike the Federal Fair Labor Standards Act, Has No Impact Whatsoever on the Use of the Fluctuating Workweek Method

As indicated above, the Fair Labor Standards Act requires overtime to be paid for hours worked in excess of 40 hours in a single workweek. Many state laws, Alaska's included, provide for overtime payments for hours worked in excess of 40 hours in a single workweek or eight hours in a single workday. This is a difference without a distinction as far as the fluctuating workweek question is concerned.

Two federal statutes specifically provide for the payment of overtime for all hours worked after 40 hours in a single week or eight hours in a single day. Those statutes are the Walsh-Healey Public Contracts Act, 41 U.S.C. §§327-333 (covering federal government suppliers) and the Contract Work Hours and Safety Standards Act, 40 U.S.C. §§327-333 (covering federal government construction and service contractors). Both of those statutes rely upon the Fair Labor Standards Act, in the same manner as the Alaska Wage and Hour Law does, for a definition of "regular rate of pay" or similar terms, and both of those statutes recognize the applicability of the fluctuating workweek method.

Walsh-Healey Act Regulations codified at 41 C.F.R. §50.201.103 provide:

> "(a) Employees engaged in, or connected with the manufacture, fabrication, assembling, handling, supervision, or shipment of materials, supplies, articles, or equipment used in the performance of the contract may be employed in excess of 8 hours in any one day or in excess of 40 hours in any one week, provided such persons shall be paid for any hours in excess of such limits [at] the overtime rate of pay which has been set therefor by the Secretary of Labor.
>
> "(b) Until otherwise set by the Secretary of Labor, the rate of pay for such overtime shall be one and one-half times the basic hourly rate received by the employee. The 'basic hourly rate' means an hourly rate equivalent to the rate upon which time and one-half overtime compensation may be computed and paid under Section 7 of the Fair Labor Standards Act of 1938, as amended." (CCH WH ¶26,200.010.)

These Walsh-Healey Act regulations, just like the Alaska Wage and Hour Act, adopt the Fair Labor Standards Act definition for "regular rate of pay". They, therefore, also adopt the fluctuating workweek method which is embodied within the FLSA definition of "regular rate of pay".

Case law and administrative rulings under the Walsh-Healey Act have also specifically approved the use of the fluctuating workweek method of determining overtime. In re Noble Street Motors, Inc., 15 W.H.Cases 517 (1962); In re Richland Lime Co., 10 W.H. Cases 365 (1951); In re B.&W. Sportswear, Inc., 6 W.H. Cases 1224 (1947); Kelly Steel Works, Inc., Ruling of the Secretary of Labor, P.C.-228, March 21, 1947; Edwin & Louis Bry, Inc., Ruling of the Secretary of Labor, P.C.-199, August 26, 1946, CCH WH ¶26,104.27.

The United States Labor Department has similarly determined that the "basic rate of pay" under the Contract Work Hours and Safety Standards Act is to be computed in the same manner as the regular rate of pay is computed under the Fair Labor Standards Act and has expressly recognized the applicability of the fluctuating workweek method under that

statute. CCH WH ¶27,056; BNA WHM §99:345; U.S. Department of Labor Compliance Manual.

The two federal Acts discussed above have the same overtime provisions as the Alaska Wage and Hour Act. Also like that Alaska statute, they rely upon the Fair Labor Standards Act for a definition of the term, "regular rate of pay". In this manner they incorporate the fluctuating workweek method which is embodied in the FLSA "regular rate of pay" definition. The mere fact that these statutes have eight-hour overtime provisions, unlike the Fair Labor Standards Act, does not in any way affect this adoption of the fluctuating workweek method.

Arguments that state eight-hour overtime provisions establish a higher standard which must take precedence over Fair Labor Standards Act procedures are similarly unconvincing. There is no question that Fair Labor Standards Act provisions do not excuse noncompliance with higher statutory overtime standards. The Fair Labor Standards Act itself so provides in 29 U.S.C. §218(a), which reads:

> "No provision of this chapter or of any order thereunder shall excuse non-compliance with any federal or state law or municipal ordinance establishing a minimum wage higher than the minimum wage established under this chapter or a maximum workweek lower than the maximum workweek established under this chapter."

See also, Brennan v. State of New Jersey, 364 F.Supp. 156 (D. N.J. 1973); State v. Comfort Cab, Inc., 118 N.J.Super. 162, 286 A.2d 742 (1972).

Applying the fluctuating workweek method to the Alaska statute, however, would not in any way derogate from that state's eight-hour overtime requirement. The fluctuating workweek method is totally consistent with eight-hour overtime provisions as is demonstrated by its use in connection with the Walsh-Healey and Contract Work Hours Acts. The fluctuating workweek is simply a method for determining an employee's regular rate of pay. Once that regular rate of pay is determined, it can be utilized just as readily in connection with a 40-hour, eight-hour overtime provision like the Alaska statute as it can in connection with a mere 40-hour requirement such as the Fair Labor Standards Act.

Under an Alaska-type statute, overtime would be paid for all hours worked in excess of eight hours in a single day even under the fluctuating workweek method. The only difference is that the regular rate of pay would be determined by dividing total remuneration by total hours worked that week instead of by a standard 40 hours, as the Alaska Department of Labor wishes to do. There is no obstacle whatsoever to utilizing a fluctuating workweek method under both daily and weekly overtime requirements.

E. Because the Statutory Language Involved in the State Statute Is Clear and Unambiguous on Its Face, Dowell Was Entitled to Rely Upon the Facts of the Statute Absent Any Contrary Interpretations of the Act by the State of Alaska

As indicated above, the prevailing interpretation of the term "regular rate of pay" is clear and unambiguous. No cases, statutes, or regulations exist in Alaska or elsewhere which suggest in any way that the regular rate of pay definition under the Fair Labor Standards Act is not applicable to the Alaska Wage and Hour law. That being the case, Dowell and other companies operating in Alaska are totally justified in relying upon the face value of the Alaska statute and taking the position that the fluctuating workweek method may be utilized under the State's Wage and Hour law.

The only authority which has even come close to addressing this particular issue in the State of Alaska is the case of Cameron v. Chickagof Min. Co., 82 F.Supp. 665, 12 Alaska Rpts. 103 (N.D. Alaska 1948). There, consistent with prevailing authority, the district court in Alaska held that "rate of pay" under the Fair Labor Standards Act is determined by dividing the fixed weekly compensation by the number of hours actually worked. It stated that:

> "The [U.S.] Supreme Court has repeatedly pointed out that the regular rate must be the quotient of the amount actually paid divided by the number of hours actually worked; that it must be the actual, not fictitious rate agreed upon and paid." (Citations omitted.) 12 Alaska Rpts., at 108.

Of course, while reported in Alaska, this case was determined in federal court under the federal Fair Labor Standards Act. Nevertheless, it is the only authority of any type reported in Alaska from which guidance could be sought by Dowell and other companies currently using the fluctuating workweek concept. In view of this fact, Dowell, and the other similarly situated companies, could reasonably rely upon the facet of the Wage and Hour Act as justifying their use of the fluctuating workweek method.

It would surely place an onerous burden upon Dowell and those other companies if it were held at this time that they were liable for backpay despite their good faith reliance upon the explicit provisions of the Wage and Hour Act and despite the fact that there has never been any previous indication that the Fair Labor Standards Act definition of "rate of pay" would not apply under the Alaska act. Such a holding would also contravene governing Constitutional due process requirements.

F. Since An Employee's Rate of Pay Can Always Be Determined by Utilizing the Appropriate Formula, There Is No Merit in an Argument That the Fluctuating Workweek Method is Rendered Unacceptable by the Terms of Alaska Statute §23.05.160 as a Pay Rate Change Without Prior Notification

Alaska statute §23.05.160 was relied upon by the Wage and Hour Division of the Department of Labor in its initial condemnation of the fluctuating workweek method. That section reads as follows:

> "An employer shall notify his employee in writing at the time of hiring of the day and place of payment, and the rate of pay, and of any change with respect to these items on the payday before the time of change. An employer may give this notice by posting a statement of the facts, and keeping it posted conspicuously at or near the place of work where the statement can be seen by each employee as he comes or goes to his place of work."

It was contended that this section bars the use of the fluctuating workweek method because under that system of

computation, an employee's rate of pay will be subject to change from week to week. There are three reasons why such an argument cannot be supported.

First, §23.05.160 is not a part of the Alaska Wage and Hour Act. The Wage and Hour Act is found in §§23.10.050 to 23.10.150. Because it is not included in the Act, §23.05.160 cannot serve as an independent basis upon which the Wage and Hour Division can rely in precluding the use of the fluctuating workweek method. This conclusion is clear from the terms of §23.10.075 which creates and empowers the Wage and Hour Division of the Department of Labor. There, and in §23.10.085, the scope of the Wage and Hour Division's authority is expressly limited to administering §§50 to 150 of the Wage and Hour chapter. It does not have jurisdiction to implement a section which is outside of the statutory scope of its powers.

Second, even assuming arguendo that §23.05.160 could be a sufficient ground, it is apparent that the express terms of that section do not, in any way, preclude the use of the fluctuating workweek method. All that §23.05.160 requires is that an employee be informed of the rate of pay he will receive at the time of his hiring, and that he be notified of any changes in his rate of pay which might occur subsequent to that time. Section 23.05.160 is, therefore, essentially a notice statute. Its primary focus is to guarantee that an employee is given sufficient prior notice of any change in his wage rate.

Despite Wage and Hour Division assertions to the contrary, under the fluctuating workweek method, the requirements of this section are satisfied. It should be kept in mind that the fluctuating workweek method is basically a salary approach to employee compensation. As indicated previously, employees working under that method receive a guaranteed weekly salary which remains the same even though the amount of hours they work per week may fluctuate. of course, the rate per hour under such a system may differ from week to week depending on the number of hours worked, but this is true of all salary compensation programs. While the hourly rate may fluctuate, the salary remains the same.

Of course, the calculation of overtime compensation may cause differences in the amount of an employee's weekly compensation, but this, once again, is a situation typical of all employees. Overtime compensation of necessity

fluctuates for all employees depending upon whether, and to what extent, overtime is worked.

Third, §23.05.160 cannot be a bar to the fluctuating workweek method since it has been held not to bar Belo plans. The Alaska Department of Labor has on several occasions indicated that it finds no problem in accepting the use of a Belo plan method of compensation. A Belo plan, like the fluctuating workweek method, involves a system whereby an employee's hourly wage rate changes on a weekly basis relative to the number of hours worked that week. But the guaranteed salary remains the same, just as under the fluctuating workweek method. The theory behind the two methods is identical. If the Belo plan is not precluded by §23.05.160 then logically the fluctuating workweek method should not be subject to attack on this ground.

IV

CONCLUSION

The procedural understanding between Dowell and the Wage and Hour Division calls for the simultaneous submission of position papers to the Attorney General's Office. The decision of the Attorney General's Office is to be based upon those position papers and any additional information which the parties may be called upon to submit. Dowell hereby requests that prior to the issuance of any decision adverse to its position set forth above, it be granted an opportunity to submit additional information, either by further documentation or by an oral presentation, to address points contained in the tentative decision of the Attorney General's Office.

If you have any questions regarding this matter, or if we can supply any additional information whatsoever, please do not hesitate to contact me.

Very truly yours,

The Honorable Charlie Bussell
House of Representatives
Chairman, House Judiciary Committee
Alaska State Legislature
Capitol, Room 124
Pouch V
Juneau, Alaska 99811

Dear Sir:

I would like to express my support for H.B. 223 which is now pending in your committee. When the work schedules were set up with the F.W.W. or Belo pay plan, there were no complaints and people were happy to have employment. This is another case of some opportunist lawyer trying to make a case out of something that was approved by the past employee. If the employee did not approve of the plan, then he should have resigned.

Sincerely,

Roger J. Seibert

TESTIMONY ON HB 223

Mr. Chairman, Members of the Committee, my name is Larry Compton, President and Owner of Time Saver Grocery INC., I have lived in Alaska since 1954 and may I add have no connections with the Gas and Oil Industry. I regret that I was unable to stay and testify in person. I have nothing to gain by this passage of HB 223. However, I do feel I have some thing to lose if it fails. I will lose faith in a system that has beenfair and equitable in my eyes for 30 years. A system that is supposed to deal fairly with Employee and Employer alike. I only ask that you continue to apply that same fairness in the future by passing HB 223.

Larry Compton

RECEIVED 2/4/83

MEMORANDUM February 3, 1983

SUBJECT: Retroactivity of overtime pay provisions (Work Order No. 13-0714)

TO: Representative Charlie Bussell

FROM: Thomas A. Sofo TAS
Legislative Counsel

The subject work order includes a request for a retroactive clause to the attached draft bill concerning methods of overtime payment. A retroactive clause may make the bill subject to legal challenge.

I do not know enough about the facts surrounding the proposal contained in the draft bill to advise you in precise terms, but would caution you that the retroactive portion of the bill may be challenged on constitutional grounds. One basis for challenge would be the prohibition against impairment of contracts, found in both the United States and the Alaska Constitutions (U.S. Constitution, Article I, section 10; Alaska Constitution, Article I, section 15). Another basis would be the due process guarantees in the Fifth and Fourteenth Amendments of the U.S. Constitution and Article I, section 7 of the Alaska Constitution.

If challenged on these grounds, the court would likely examine the rights and expectations affected by the bill, whether those rights and expectations were substantial and whether those rights or expectations were unfairly defeated by the bill. Some vested rights are immune from legislative interference, but, as indicated above, we are not able to ascertain whether such rights are involved here since we do not have sufficient factual information.

If you wish to discuss this facet of the bill further, please give me a call at your convenience.

The Honorable John Cowdery
Representative
Capital, Room 409
Juneau, Alaska 99811

Re: HB 223

Dear Representative Cowdery:

We represent the Alaska Wage Security Association, a newly formed association concerned about House Bill 223. Sections 3 and 4 of HB 223 would retroactively eliminate civil and criminal liability of employers who illegally used a fluctuating workweek plan to pay their employees less in overtime than they were entitled to be paid under the Alaska wage and hour law. This legislation would violate the Constitution by denying the employees their existing contract right to payment in accordance with the law.

The Association's members include employees who, if HB 223 passes in its present form, will lose the overtime compensation they have already earned under the law. It also includes individuals who simply believe that it is unjust to take away what Alaskans have earned through their hard labors and to excuse past violations of the law by mainly large, non-Alaskan companies. Among the members are former Senate President Chancy Croft and former Commissioner of Labor Gil Johnson.

Briefly, the law which the companies violated went into effect in January, 1979. The affected companies were given notice before the law became effective, and the Wage and Hour Division of the Department of Labor wrote to three of the largest companies, Otis Engineering, Dresser Industries, and Dowell Division of Dow Chemical, informing them of the new regulation concerning overtime. Nevertheless, the companies chose to ignore the law. Dresser was sued in October, 1979, by the Department of Labor, and lost in both the Superior and Supreme Courts. Incredibly, only in November, 1981, did Dresser finally decide it should comply with the law.

Since the first lawsuit, additional lawsuits have been brought against the companies. The precedent set by the litigation brought by the Department of Labor provides a clear indication that the companies will lose again. Thus, having violated the law, having been sued because of it and having lost, and now facing additional lawsuits which they will lose, the companies seek to evade the law and the judicial process through HB 223.

The precedent that would be set if the current version of HB 223 passes bears close scrutiny. Essentially, the bill asks the Legislature to choose sides in the pending litigation, and to choose the side of large, non-Alaskan companies that have violated the law. The judiciary is the appropriate branch of government to decide the litigation, not the Legislature. If the Legislature involves itself in these lawsuits, it will set a precedent which will be looked to by other parties involved in litigation which they believe they will lose, and by others who have violated the law and seek an easy way out.

We ask only that before you vote, you consider seriously the implications HB 223 has for our systems of law and justice. If you have any questions or need further information, I encourage you to contact me. The members of the Association and others who will unfairly be affected by this legislation are also anxious to discuss this with you.

Very truly yours,

FAULKNER, BANFIELD, DOOGAN
& HOLMES

ALASKA WAGE AND HOUR ACT
BRIEFING PAPER - THE FLUCTUATING WORK WEEK

Several inaccurate and misleading claims are being made in support of the position that the Alaska Wage and Hour Act should be amended to eliminate employee claims which are currently pending in court. The employees' claims are for overtime wages which were never paid because of their employers' use of an unlawful payment formula known as the fluctuating work week (FWW). The questions raised by these arguments are discussed below.

1. Did Employers Have Reason to Know of the FWW Regulations?

Prior to adoption of the regulation, the Department of Labor mailed notices of the proposed rule-making directly to affected businesses. Hearings were then held in Juneau, Fairbanks and Anchorage. Shortly after the regulation was adopted, Donald R. Wilson, the Department's Wage and Hour investigator in Anchorage, wrote letters to three oilfield service companies -- Otis Engineering, the Dowell Division of Dow Chemical, and Dresser Industries -- informing them of its adoption.

In October 1979 the Department of Labor sued Dresser Industries, one of the companies now being subjected to a class action, claiming a violation of the regulation. In October 1980 the Superior Court entered a judgment in favor of the Department. In September of 1981 the Supreme Court affirmed this judgment. Dresser did not bring its payment system into compliance with the law until November 1981.

Evidence discovered in a class action lawsuit filed against Schlumberger Limited seeking unpaid wages arising from that company's use of an FWW scheme indicates that awareness of the regulation and the litigation seeking to enforce it was wide-spread among employers. A memorandum obtained from Schlumberger and dated January 23, 1981, states that Schlumberger was assisting with Dresser's legal fees through the Petroleum Equipment Suppliers Association (PESA), an industry trade organization. Another Schlumberger memorandum, dated June 25, 1980, discusses an in-house study "to determine the impact of discontinuing FWW", though this memo does not specifically mention the Dresser lawsuit. Schlumberger did not modify its FWW system until March 1982, five months after the Supreme Court upheld the validity of the FWW regulation.

2. Are Employers Facing "Open-Ended" Liability?

Assuming that somehow employers could have reasonably remained ignorant of the FWW regulation in spite of the public rule-making proceedings and PESA's financing of Dresser's litigation, any excuse for remaining ignorant ended in September 1981, when the Supreme Court upheld the regulation. Since the Wage and Hour Act contains a two years statute of limitations, employers who brought their systems into compliance with the law in a timely fashion and who have not been sued will soon be insulated from liability entirely.

3. Will Employees Receive a Windfall if the Proposed Bill is not Passed?

If an employer tells a worker he will be paid less than the minimum wage or that he will not receive extra compensation for overtime and is then sued for his unlawful conduct, he cannot defend against the lawsuit by arguing that the employee had no basis for expecting to be paid more. Employees have a right to expect that their employers will obey the law when determining their regular and overtime compensation. It is ridiculous to argue that employees, like those who are seeking to recover overtime wages which remain unpaid because of use of the FWW regulation, are somehow obtaining a windfall. They are, of course, merely seeking to obtain what they had a right to receive in their original paychecks.

ALASKA WAGE AND HOUR ACT
BRIEFING PAPER - LIQUIDATED DAMAGES

It has been argued that the mandatory liquidated damages provision is unfair and that Alaska should adopt the "good faith" standard applied by the federal government since 1947. In 1959, when the Alaska legislature adopted a mandatory double damages provision, it wisely chose not to imitate the federal approach. The consequences of adopting the federal standard now will be that employees with small or moderate sized claims will face economic hurdles which will prevent them from enforcing their rights under a statute which depends, in large part, on private enforcement efforts. Adoption of a "bad faith" requirement for double damages will also eliminate an important deterrent to violations. These factors are discussed in greater detail below.

1. The Economic Hurdles.

Though the Department of Labor can prosecute claims for cases involving $5,000.00 or less in unpaid wages [see, 8AAC $15.175(b)], claims in excess of 5,000.00 must be pursued through private attorneys. A "good faith" standard would be extraordinarily difficult to prove to the satisfaction of the court without conducting complex and expensive pre-trial depositions and document searches. Absent "smoking pistols" obtained during pre-trial discovery, many employers will, no doubt, elect to take their chances at a trial at which the employee will bear the burden of proving bad faith. Few people nominally covered by the protection of the Wage and Hour Act would be able to afford such an expensive and lengthy process. Though at the present time, lawyers frequently take such cases on a contingent fee the Code of Professional Responsibility governing attorney conduct requires the client to be ultimately responsible for litigation and discovery expenses, regardless of the outcome. Furthermore, lawyers would soon learn that the imprecision and elasticity of a "good faith" standard make it uneconomical to handle small or moderate claims. The obvious result of these economic disincentives is that many people will simply be unable to enforce their rights.

2. Private Enforcement of the Wage and Hour Act.

Though the Department of Labor has authority to enforce the Wage and Hour Act, it cannot be expected to monitor all activities of all employers of the State and to prosecute all potential wage claims, at least not without an extensive and costly expansion of its current bureaucracy. The current double damages provision in the Wage and Hour Act makes it more economically realistic for private parties to obtain the legal assistance required to redress violations, and, thus, creates an efficient, privately funded enforcement mechanism.

3. Deterrence.

As noted above, it would be difficult to disprove an employer's claim that it was acting in good faith when it underpaid its employees. The current double damages provision encourages employers to educate themselves as to the law's requirements. It also encourages employers to monitor changes in the regulations and in the Wage and Hour Act and to speedily adapt their compensation systems to these changes. The need for such encouragement is demonstrated by the behavior of employers involved in the fluctuating work week litigation, for some of these employers delayed months beyond the issuance of the Supreme Court's final decision adjudicating the validity of the FWW regulation before actually changing their pay systems.

The proposed elimination of mandatory liquidated damages would create a different incentive by encouraging employers to cultivate ignorance of the Wage and Hour laws enacted for the protection of their employees.

I.

FACTUAL BACKGROUND

The flexible work week (hereafter FWW)[1/] method of computing overtime payment has been recognized as an acceptable method of payment under the Federal Wage and Hour Act since 1968. 29 C.F.R. 778.114 specifically allows the use of the fluctuating work week payment method. This method of payment is particularly suited to resource development and service industries where there is frequently a considerable amount of standby service time at remote locations and a variety in the number of hours of work available from week to week. The plan generally provides employees greater certainty in planning their financial budgets and guarantees them a specific amount in their pay checks each pay period thus easing the ups and downs in income which would result from a straight overtime pay plan method. This continuity of income allows employees to reflect a more stable cash flow to loan institutions when qualifying for home loans and the like and also serves to reduce the likelihood of a potentially devastating interruption of income to the employee. Without the FWW plan an employee may find himself returning to work from a two week R&R at a time when work is unexpectedly slack and then leaving on his next two week R&R when work picks up. Thus six weeks may pass

---

1/ There are accounting differences in the various plans generally referred to as FWW plans or BELO plans which do not affect the questions raised herein. Both FWW and BELO plans will hereafter be referred to as FWW.

while his bills pile up before he can scramble back to catch up if his next two weeks on the job happen to coincide with an increase in work hours.

Prior to 1978 the use of the flexible work week method of payment was legal under Alaska law. See AS 23.10.060; Attorney General Opinion February 10, 1978. On December 8, 1978, the Department of Labor instituted a change by adopting a new regulation, 8 AAC 15.100, which declared that these flexible work week plans were no longer in compliance with the overtime provisions of Alaska's wage and hour laws.

This change in the administrative regulations was poorly publicized, with little if any input from Alaskan employers. The primary industries affected by the new regulation are the oil and gas support industries with additional effect on mining and other industries. It is estimated that, since this regulation was adopted in 1978, possibly as many as 100 Alaska businesses, unaware that the long standing custom and practice in their industry has been changed by administrative regulation, have continued using the same flexible work week plan they had used for years and, in doing so, may have incurred substantial liability.

In October, 1979, almost a year after the regulatory change, Dresser Industries (the first company to be sued) was named as a defendant in a suit filed by a former employee for $4,000 in back wages. The case was opposed on constitutional

1981, the Alaska Supreme Court upheld the power of the Depa[illegible] of Labor to promulgate regulations on this subject. The U.S. Supreme Court later declined to review the case. Dresser paid the judgment and the case was closed. In November 1981, Dresser was sued by another former employee who agreed to stay action on his case awaiting a U.S. Supreme Court decision on whether to review the case. The case for this one individual has since been settled and dismissed.

In December 1981, two years after the regulatory change, Dresser was again sued, this time in a class action filed by a third employee seeking back wages on behalf of all Dresser employees in an amount exceeding $15,000,000. At least three other companies, including FMC and Schlumbeger, have since been sued. All of these cases are in the preliminary stages, no trial dates have been set at this time and none of the lawsuits have as yet resulted in a judgment against any of the defendant companies.

In addition to the financial liability created by the flexible work week prohibition, Alaska law provides for mandatory liquidated damages which doubles any back wage or overtime award regardless of the good faith efforts on the part of the employer to abide by the wage and hour statutes. AS 23.10.110; AAI, Inc. v. Mussara, 602 P.2 1240 (Alaska 1979). Even if an employer relies on the Department of Labor's opinion or otherwise makes an innocent error in computation of pay, the court has no choice but to award double the amount of damages. The accumulated liability

resulting from the 1978 administrative action coupled with Alaska's double damage statute has resulted in a potential economic disaster for many Alaskan employers.

II.

PROPOSED REMEDY

A multitude of companies and organizations proposed during the latter part of the 1982 legislative session that the FWW administrative prohibition be amended to include a good faith exception and provide that any liability arising out of the regulatory prohibition be extinguished retroactively. A bill to accomplish this, SB 886, was introduced in the Senate.

The bill, as proposed, would have the following effects. The proposed regulation will have no effect on the two individuals who have already brought suit and either received a final judgment from which appeal cannot be taken or settled their case. As to those people who have filed suit, either individually or on behalf of a class of employees, and whose suit is still pending awaiting trial or on appeal, their cases would be dismissed subject to the right of employees to recover expenses of litigation. Companies would be given a period of time to convert over from the FWW pay systems and relieved of the massive potential liability raised by the regulation. Past employees would not receive a windfall gain.

III.

QUESTIONS PRESENTED

1. Does the Alaska legislature have the power to repeal the administrative regulation?

2. Does a retroactive repeal of the regulation constitute an unconstitutional impairment of the right to contract by taking away vested contractual rights of employees?

Question 1 above has been directly addressed by the Alaska courts. Under AS 44.62.320 (Legislative Annulment of Regulations and Review), the legislature was granted the authority to annul a regulation of an agency by concurrent resolution. In 1980 the Alaska Supreme Court in State v. A.L.I.V.E., 606 P.2d 769 (Alaska 1980) held that the legislature could not annul a regulation by concurrent resolution but did set out the proper procedure by which the legislature could annul a regulation. In the A.L.I.V.E. case the Alaska Supreme Court indicated that by a vote of both houses and passage of a new Act the legislature does have the power to annul an agency regulation by following normal legislative procedures. AS 01.10.090 requires that in order for the statute annulling the regulation to have retrospective effect, it must expressly declare in the statute that it is intended to be retrospective. In addition, under AS 01.10.100 (Effect of Repeal or Amendments) the legislature has been specifically granted the power to annul a regulation, the only qualification being that if the annulment is to be retroactive and is to affect any penalty or liability incurred, it must expressly state that this is the legislative intent.

As to question #2 above, the argument that a retroactive repeal or annulment of a regulation and the consequent extinguishing of liability on the part of employers for penalties, forfeitures or back wages is an unconstitutional denial of due process because it violates the fifth amendment prohibition against impairment of contracts or Article I, § 10 of the Constitution has been raised numerous times in the past in various cases and has over the years been resoundingly rejected by literally hundreds of court decisions.

In 1947 the United States Congress faced a situation similar to the problem now facing the Alaska legislature. The United States Supreme Court in Anderson v. Mt. Clemens Pottery Co., 328 U.S. 680 interpreted the existing Fair Labor Standards Act as requiring payment for time spent in preliminary and incidental activities on the employer's premises prior to actually beginning work at the employees' work stations. This decision changed the existing custom and practice in industry and between July of 1946 and January of 1947, some 2,000 cases were filed in Federal Court alone seeking back pay in excess of five billion dollars. (House Committee on the Judiciary Report No. 71, Feb. 25, 1947.)

In response to this situation, Congress passed the Portal to Portal Act of 1947 which specifically extinguished any claim arising out of the Fair Labor Standards statutes and relieved employers from liability and punishment from existing claims

whether commenced prior to, or on or after the date of the Act. The Act provided that unless an activity was covered by an express provision of a written or nonwritten contract between the employee and his employer or was a custom or practice in effect at the time of employment, any liability for existing or future claims would be extinguished.

The report of the House Committee on the Judiciary specifically addressed the constitutionality and vested contract right question in passing the Portal to Portal Act and noted that:

> Claims for minimum wages, overtime compensation, liquidated damages and penalties are not vested property rights within the protection of the Fifth Amendment. They are purely statutory rights which may be withdrawn by the Congress at any time before they have ripened into a final judgment from which appeal cannot be taken. (citations omitted).

In the years following passage of the Portal to Portal Act the constitutionality of the retroactive grant of immunity from liability has been challenged many times in many courts. It has been upheld consistently.

In Seese v. Bethlehem Steel Co., 168 F.2d 58 (4th Cir. 1948) the court noted at page 61 that the constitutionality of the Portal to Portal Act was beyond question:

> Its constitutionality has been upheld by the circuit court of appeals of the sixth circuit . . . and by more

than 100 decisions of federal district courts and state courts to which our attention has been called. We list below those available in the federal supplement which we had opportunity to read.

The plaintiffs in Seese argued that the statute violated the constitution because:

> . . . they deprived plaintiffs of vested rights under existing contracts in violation of the due process clause of the fifth amendment.

The court's response to this contention was clear:

> We think that both contentions are entirely without merit.
>
> * * *
>
> The question raised under the fifth amendment is that the statute takes property without due process in that it strikes down vested rights under existing contracts. The answer is that even rights arising out of contract cannot fetter congress in the exercise of a power granted it by the constitution, and that the rights stricken down by the statute are not rights arising out of contract at all, but rights created by statute as an incident of the statutory regulation of commerce.

The court held that the Fair Labor Standards Act does not provide payment for employees engaged in the commerce which Congress sought to regulate but rather provides a means by which wages may be regulated. The Court stated that when it becomes apparent that the instrument of regulation is about to be used in such a way as to

injure the very commerce it is designed to help it is idle to say that the legislature is without power to amend it in such a way as to avoid the evil that is threatened.

The proposed bill before the Alaska legislature will not strike down any right which is based on a contract, a custom or a practice. What is sought to be taken away is purely a statutory right. This is clearly constitutional:

> What was taken away was the right to recover on claims of purely statutory origin, claims given by statute not as compensation for labor performed but as a means of regulating wages and hours of work in interstate commerce. (Seese, supra, at p. 64, citations omitted.)

By both logic and legal reasoning, since the legislature may repeal its own Act, it clearly has the right to take away something which has no existence save by virtue of that Act.

Looked at in another way, the legislature is merely validating contracts and agreements between employers and employees which were only made invalid by reason of the regulation in effect during a period of the employment contract. The legislature's power to validate prior contracts which were invalid by statute has been upheld repeatedly by the U.S. Supreme Court. Westside Belt R Co. v. Pittsburg Construction Co., 219 U.S. 92; McNair v. Knott, 302 U.S. 369.

The argument that the provisions of the Alaska regulation prohibiting FWW must be read into the contract of employment and that the right to recover compensation in accordance with the terms of the regulation becomes a part of the contract and accrues upon the rendering of services provides no basis for rendering a repealing statute unconstitutional.

> . . . that act validates the real contract between the parties and merely takes away a statutory remedy given by the prior act. Even if the provisions of the Fair Labor Standards Act be read into contracts of employment, so also must be read the constitutional power of congress to change that act . . . not only are existing laws read into contracts in order to fix obligations as between the parties, but the reservation of essential attributes of sovereign power is also read into contracts as a postulate of the legal order. (Seese, supra, at 65, citations omitted.)

The Alaska Supreme Court has directly addressed this issue and in Bidwell v. Sheele, 355 P.2d 584 (Alaska 1960) joined the array of State, Federal and Supreme Court decisions upholding the power of the legislature to retroactively extinguish statutory rights. Dealing with the repeal of section 16-1-131, Alaska Compiled Laws Annotated 1949, which abolished the requirement for a bond in title dispute cases, the Court addressed the constitutionality of the repeal in the face of challenges based on both the 14th Amendment of the U.S. Constitution and Section 7, Art. 1 of the Alaska Constitution. The Court noted that:

> In 1871 the Supreme Court of the United States ruled that a party cannot have any

> vested right in a remedy conferred by an act of Congress to prevent Congress from modifying it or adding new conditions to its exercise, or from withdrawing the remedy altogether.

The Portal to Portal Act does not stand alone as an example of the constitutionality of legislative action extinguishing prior liabilities. The question has been argued and has been upheld by a staggering majority of Courts in other areas as well.

In American Can Co. v. Davies, 559 P.2d 898 (Or. 1977), the Supreme Court of Oregon upheld the power of the public utilities commissioner to change rates already set by a private contract with the utility. The company contended that:

> Crown contends that the power of the Commissioner to change rates or other conditions memorialized in a written contract between a public utility and one of its customers constitutes an impairment of the contract rights, and as such is in violation of Aritcle 1, § 10 of the United States Constitution.

The Court answered the argument first with legal authority:

> We disagree. In Midland Co. v. K. C. Power Co., 300 U.S. 109, 57 S.Ct. 345, 81 L.Ed. 540 (1937), the court said:
>
> > . . . [T]he State has power to annul and supersede rates previously established by contract between utilities and their customers. It has power to require service at nondiscriminatory rates, to prohibit service at rates too low to yield the cost rightly attributable to it, and to require utilities to publish their rates and to adhere to them.

and second with common sense reasoning:

> Furthermore, were such an argument upheld, then the whole public interest in utility regulation would become meaningless, since by making separate contracts with all or any of its individual customers, the utility and the customer could effectively bypass all or any relevant part of the public utility regulatory statutes and the regulations governing the public utility.

The same logical conclusion would flow from the argument that the legislature is unable to alter contracts in the wage and hour field. Employer and employee would be free to bypass any regulation by the simple expedient of making a contract about it. For that reason legislative enactments in this area are valid, notwithstanding by their terms, they apply to and affect antecedent contracts for the performance of services. 16A C.J.S. Constitutional Law § 349.

Whether plaintiffs have sought to argue that the legislature is prohibited by the due process clause of the Constitution or by Article 1, § 10 from interferring with vested rights of private employment contracts, the result has always been the same. -- No matter how the obligations or rights are denominated, imposed or insured with respect to wages and overtime compensation they are:

> . . . subject to change or abrogation, and are not subject to any of the juridical principles applicable to contractual rights or statutory rights. May v. General Motors Corp., 73 F. Supp. 878.

In Louisville and N.R. Co. v. Mottley, 219 U.S. 467, the court dealt with an act of Congress which retroactively struck down a contract made in settlement of a personal injury case and upheld Congress' power. In Norman v. Baltimore and O.R. Co., 294 U.S. 240 the U.S. Supreme Court noted that Congress has the power to retroactively strike down gold clauses in private contracts and that such power is not unconstitutional. In National Car Loading Corp. v. Phoenix-El Paso Express, 176 S.W.2d 564, the Supreme Court of Texas dealt with the Interstate Commerce Act, 49 U.S.C.A. § 1001 et seq., which wiped out any punishment or liability imposed upon freight forwarders who may have violated existing ICC tariff regulations and upheld its constitutionality in the face of identical arguments. In McNair v. Knott, 302 U.S. 369 the United States Supreme Court upheld the constitutionality of Congress' grant of retroactive validity to invalid pledges of securities by national banking associations.

In Moss v. Hawaiian Dredging Co., 187 F.2d 442 (9th Cir. 1951) the appellate court considered Public Law 393, popularly known as the Overtime-on-Overtime Act. The Act provided in substance that retroactive amendments would validate prior invalid or illegal contracts which were only invalid or illegal by virtue of wage and hour statutes. The argument was again made that such a retroactive enactment was void as it resulted in a deprivation

of property without due process of law in violation of the fifth amendment. The argument was again defeated. The plaintiffs based their right to recover on the following familiar arguments:

> 1. These, they say, were vested rights, contractual in nature.
>
> * * *
>
> 2. . . . became part and parcel of their employment contracts, and hence immune to retroactive legislation modifying those provisions.
>
> * * *
>
> 3. What is here sought, it is said, is no windfall result of a surprise decision . . .

The court resoundingly dealt with these arguments and again reaffirmed that prior decisions:

> . . , establish that if it may be said that private rights, contractual in nature, arose from the overtime provisions of the Fair Labor Standards Act, yet the character and quality of such rights are such that they must yield to the sovereign power to regulate commerce by legislation . . .

The court finally concluded that:

> There is nothing in law or in reason which forbade congress to give validity to these contracts retroactively, . . .

VI.

CONCLUSION

The constitutionality of a retroactive invalidation of a statutory right appears unassailable in light of the repeated

court opinions over the years. So long as the legislative action does not interfere with a written contract between individuals but deals purely with a statutory granted right, the fact that that right is considered a part of an employment contract will not affect the legislature's power. The legislature has a constitutional right to give and to take away what it has given and that right is not affected even if what it has given has by law become part of a contract. As stated by Chief Justice Hughes of the U.S. Supreme Court in Norman v. Baltimore and O. Ry. Co., 294 U.S. 240:

> Parties cannot remove their transactions from the reach of dominent constitutional power by making contracts about them.

The proposed remedy is constitutional.

MEMO
TO: Rep. Walt Furnace, Chairman, Labor & Commerce Committee; Committee Members
FROM: Joe Brewer, Counsel, Judiciary Com.
TOPIC: Supplementing testimony given today at L&C Com. Hearing
DATE: 5/18/'983

In my brief testimony this morning, I cited a case, "Chapman" and sait it was from Illinois. I was in error. It was in California.

Attached, then, is a copy of the case of Chapman v. Farr, 132 Cal. App. 132 (June, 1982). Case involved an amendment to the state constitution (by referendum) creating a certain exemption that applied retroactively and prevented the appellant from being found liable for usury.

Thus, it was constitutional, not statutory, but in getting to that point, the California court used language which probably is pertinent to the situation re: HB223. I have bracketed or underlined significant language on the appropriate pages. Hopefully, this may answer some questions some committee members had in mind.

132 Cal.App.3d 1021

[1021] Mildred H. CHAPMAN, a Conservatee, by Janette Eileen Chapman, her Conservator, Plaintiff, Cross-Defendant and Respondent,

v.

Colleen M. FARR, et al., Defendants, Cross-Complainants and Respondents,

Dominic Frisone, Larry Frisone and Giovanna Frisone, Defendants, Cross-Defendants and Appellants.

Civ. 48352.

Court of Appeal, First District, Division 1.

June 23, 1982.

Hearing Denied Sept. 15, 1982.

Appeal was taken from a judgment of the Superior Court, Santa Cruz County, Christopher C. Cottle, J., finding that loan was made at usurious rates. The Court of Appeal, Goff, J., assigned, held that: (1) amendment to constitutional section defining usury to exclude from its operation "any loans made or arranged by any person licensed as a real estate broker by the State of California and secured in whole or in part by liens on real property" is retroactive in its effect, and therefore loan made by licensed real estate broker and secured by real property was not usurious, and (2) where loan transaction was structured by licensed real estate broker as agent for his parents, the transaction was "arranged" by him and was therefore exempt from constitutional section defining usury under amendment.

Reversed.

1. Statutes ⇐267(2)

Unconditional repeal of special remedial statute without a savings clause stops all pending actions where repeal finds them; if final relief has not been granted before the repeal goes into effect it cannot be granted afterwards, even if a judgment has been entered and the cause is pending on appeal.

2. Usury ⇐7

Amendment to constitutional section defining usury to exclude from its operation "any loans made or arranged by any person licensed as a real estate broker by the State of California and secured in whole or in part by liens on real property" is retroactive in its effect, and therefore loan made by licensed real estate broker and secured by real property was not usurious. West's Ann.Const.Art. 15, § 1.

3. Statutes ⇐261

Questions of retroactivity only arise when a law "takes effect" after the date that a cause of action arose.

4. Usury ⇐34

Where loan transaction was structured by licensed real estate broker as agent for his parents, the transaction was "arranged" by him and was therefore exempt from constitutional section defining usury under amendment excluding from operation of that section any loans made or arranged by any person licensed as real estate broker and secured in whole or in part by liens on real property. West's Ann.Const.Art. 15, § 1.

LaCroix & Schumb, by Michael J. Matteucci, San Jose, for defendants, cross-defendants and appellants.

Perry E. Olsen, Watsonville, for defendant, cross-complainant and respondent Farr.

Dawson, Manning & Rose by Richard M. Manning, Scotts Valley, for plaintiff, cross-defendant and respondent Chapman.

[1021] GOFF, Associate Justice.* [1022]

The trial court awarded damages, injunctive and declaratory relief to plaintiffs and cross-complainants against the Frisones, defendants and cross-defendants, the appellants herein. It did so on the theory that the Frisones, through appellant Larry Fri-

* Assigned by the Chairperson of the Judicial Council

sone, loaned cross-complainants (the Farrs) $50,000 at usurious rates. Three months after judgment was entered below, the California constitutional section defining usury[1] was amended by referendum to exclude from its operation "any loans made or arranged by any person licensed as a real estate broker by the State of California and secured in whole or in part by liens on real property, ..."

The loan in question was secured by real property, and the court made a finding that Larry was a licensed real estate broker.

The decisive issue on this appeal is whether the constitutional amendment is retroactive in its effect. We conclude that it is and therefore reverse.

Orden v. Crawshaw Mortgage & Investment Co. (1980) 105 Cal.App.3d 141, 167 Cal.Rptr. 62,[2] appears to us to state the rule correctly: "The rule that statutes which repeal or modify usury laws are to be given retrospective effect to determine the scope of liability with respect to transactions entered into prior to such repeal or modification is an application of the well-established principle that no person nor the state has a vested right in an unenforced statutory penalty or forfeiture. (*Department of Social Welfare v. Wingo* (1946) 77 Cal.App.2d 316 [175 P.2d 262].) That rule is equally applicable to the instant case. The remedies previously provided for with respect to an allegedly usurious contract are in the nature of a penalty (*Penziner v. West American Finance Co.*, supra, 10 Cal.2d [160] at pp. 170–171 [74 P.2d 252]), and any recovery pursuant to article XV must be determined according to its present text .... [¶] Any cause of action for usury not reduced to judgment as of November 6, 1979, is governed by the provisions of article XV as it exists today, even if the loan at issue was made before November 6, 1979." (Id., at pp. 145–146, 167 Cal.Rptr. 62.)

[1] Although this language might be read as cutting off retrospective application of the amendment if the plaintiff has obtained judgment in the trial court, the case law has consistently held to the contrary. As the court stated in *Southern Service Co., Ltd. v. Los Angeles* (1940) 15 Cal.2d 1, 12, 97 P.2d 963: "'The unconditional repeal of a special remedial statute without a saving clause stops all pending actions where the repeal finds them. If final relief has not been granted before the repeal goes into effect it cannot be granted afterwards, even if a judgment has been entered and the cause is pending on appeal. The reviewing court must dispose of the case under the law in force when its decision is rendered.'"

[2] Most of the decisions applying this rule deal with criminal laws, but as Justice Tobriner noted in *Governing Board v. Mann* (1977) 18 Cal.3d 819, 830, 135 Cal.Rptr. 526, 558 P.2d 1: "[T]he reach of this common law rule has never been confined solely to criminal or quasi-criminal matters." (Fn. omitted.) One of the cases cited in *Mann* was *Wolf v. Pacific Southwest etc. Corp.*, (1937) 10 Cal.2d 183, 74 P.2d 263, dealing with usury.

Governing Board v. Mann, supra, 18 Cal.3d 819, 135 Cal.Rptr. 526, 558 P.2d 1, held that 1976 legislation barring governmental entities from imposing sanctions on persons convicted of possession of marijuana applied to proceedings to dismiss a tenured school teacher that began in 1971. *Southern Service Co., Ltd. v. Los Angeles*, supra, 15 Cal.2d 1, 97 P.2d 963, held that repeal of a statutory right to a refund of illegally collected taxes cut off all pending causes of action based on the statute. (Id., at p. 12, 97 S.Ct. 963.) Another analogous case is *Younger v. Superior Court* (1978) 21 Cal.3d 102, 110, 145 Cal.Rptr. 674, 577 P.2d 1014, holding that repeal of a statute authorizing persons to petition for destruction of the records of prior marijuana convictions eliminated the remedy where the case was on appeal at the time of repeal. The most recent decision applying this rule is *South*

1. Article XV, section 1.

2. This case appeared after all briefs in the case at bar had been filed and it has not been cited or discussed by the parties.

Coast Regional Com. v. Gordon (1978) 84 Cal.App.3d 612, 148 Cal.Rptr. 775. The court held that the South Coast Regional Commission could not collect attorney fees in an action filed in 1973 since the attorney-fee provision was eliminated in 1977, after the original judgment, but before final appellate review. The court synthesized the case law as follows: "Without a saving clause or statutory continuity, a party's rights and remedies under a statute may be enforced after repeal only where such rights have vested prior to repeal. (*People v. One 1953 Buick* (1962) 57 Cal.2d 358, 365–366 [19 Cal.Rptr. 488, 369 P.2d 16]; *Estate of Taylor* (1973) 33 Cal.App.3d 44, 49–50 [108 Cal.Rptr. 778].) A statutory remedy does not vest until final judgment, since '. . . it has been held in a long line of cases that the repeal of a statute creating a penalty, running to either an individual or the state, at any time before final judgment, extinguishes the right to recover the penalty. The same rule applies to remedial statutes unknown to the common law.' (*Lemon v. Los Angeles T. Ry. Co.* (1940) *supra*, 38 Cal.App.2d 659, 671 [102 P.2d 387].) '"The justification for this rule is that all statutory remedies are pursued with full realization that the Legislature may abolish the right to recover at any time."' (*Governing Board v. Mann* (1977) *supra*, 18 Cal.3d 819, 829 [135 Cal.Rptr. 526, 558 P.2d 1], quoting from *Callet v. Alioto* (1930) 210 Cal. 65, 67–68 [290 P. 438].) Patently, the right to recover attorneys fees is such a statutory right or remedy. (Code Civ.Proc., § 1021.) [2] A judgment does not become final so long as the action in which it is entered remains pending (*Pacific Gas & Elec. Co. v. Nakano* (1939) 12 Cal.2d 711, 714 [87 P.2d 700, 121 A.L.R. 417]; *Rich v. Siegel* (1970) 7 Cal.App.3d 465, 469 [86 Cal. Rptr. 665]), and an action remains pending until final determination on appeal. (*Pacific Gas & Elec. Co. v. Nakano, supra; Estate of Molera* (1972) 23 Cal.App.3d 993, 998 [100 Cal.Rptr. 696]; *In re Pine* (1977) 66 Cal. App.3d 593, 595 [136 Cal.Rptr. 718]; Code Civ.Proc., § 1049.) Even if we assume the Supreme Court decision in *South Coast Regional Com. v. Gordon, supra*, constituted a final judgment—which it did not—the decision was filed 6 January 1977, subsequent to the repeal of section 27428. Any statutory right the commission may have had to apply for attorneys fees under the 1972 Act never matured or vested prior to repeal." (Id., at pp. 618–619, 148 Cal.Rptr. 775.)

These rules appear to insulate appellants from liability in the instant case since the usury law now exempts loans made or arranged by real estate brokers and secured by a lien on real property.

[1] Respondents seek to avoid the retroactive effect of the constitutional amendment with several arguments.

Respondents argue that there is no evidence to support the trial court's finding that Larry Frisone was a licensed real estate broker. However, Larry Frisone testified that he had received a real estate license. The record also reveals that the Farrs' attorney presented Proposed Findings of Fact which included a finding identical to that made by the trial court. This is invited error,[3] if error it was.

[3, 4] Respondents also point out that Article XVIII, section 4 of the state Constitution, which was added on November 3, 1970, provides that: "A proposed amendment or revision shall be submitted to the electors and if approved by a majority of votes thereon takes effect the day after the election unless the measure provides otherwise. If provisions of 2 or more measures approved at the same election conflict, those of the measure receiving the highest affirmative vote shall prevail." However, this provision does not address the retroactivity question. Questions of retroactivity only arise when a law "takes effect" after the date that a cause of action arose. (See, e.g., *Robinson v. Pediatric Affiliates Medical Group, Inc.* (1979) 98 Cal.App.3d 907, 911–912, 159 Cal.Rptr. 791; *Younger v. Su-*

3. The proposed findings and conclusions were inferentially joined in by the Chapmans' counsel.

perior Court, supra, 21 Cal.3d 102, 109, 145 Cal.Rptr. 674, 577 P.2d 1014; *Orden v. Crawshaw Mortgage & Investment Co.*, supra, 109 Cal.App.3d 141, 144, 167 Cal.Rptr. 62.) Respondents also argue that Mr. Frisone was not acting in the capacity of a real estate broker in this case but rather as trustee for his pension plan and trust. However, the trial court found, as respondents strenuously argue elsewhere, that the transaction was structured by Larry Frisone *as agent* for his parents. (See discussion, *supra*.) The transaction was "arranged" by him and it was therefore exempt under the amended constitutional language.

Reversed.

ELKINGTON, P. J., and NEWSOM, J., concur.

133 Cal.App.3d 12

Steven J. GOLDFISHER, Petitioner and Cross-Defendant,

v.

SUPERIOR COURT OF the State of California, For the COUNTY OF LOS ANGELES, Respondent,

SHAPIRO, LAUFER, POSELL & CLOSE, a California Professional Corporation, Mitchell S. Shapiro, an individual, Richard E. Posell, an individual, Richard H. Close, an individual, Real Parties in Interest.

Civ. 63871.

Court of Appeal, Second District, Division 2.

June 23, 1982.

Hearing Denied Aug. 18, 1982.

Present attorney for clients petitioned for writ of mandamus to mandate Superior Court to vacate its order overruling his general demurrer to cross complaint of former attorney for clients filed against present attorney and to enter a judgment against former attorney. The Court of Appeal, Roth, P. J., held that public policy prohibited initiation by former attorney of the action seeking equitable indemnification from present attorney for any liability of former attorney for negligent creation of the situation which had engendered a preliminary injunction action against clients based on allegations that present attorney could have successfully defended the request for preliminary injunction had he been properly prepared, and that by reason of lack of defense to the issuance of the preliminary injunction and in other respects as to management of the action the damages which clients suffered which they claimed were caused by former attorney were generated by the professional negligence of present attorney in his management of the action.

Petition granted.

Indemnity ⇐13.1(2)

Public policy prohibited initiation by former attorney of clients of action seeking equitable indemnification from present attorney for clients for any liability of former attorney for negligent handling of situation which had engendered preliminary injunction action brought against clients based on allegation that present attorney could have successfully defended request for preliminary injunction had he been properly prepared and alleging that by reason of lack of defense to issuance of the preliminary injunction and in other respects as to management of such action damages which clients suffered which they claimed were caused by former attorney were generated by professional negligence of present attorney in his management of the action.

Steven J. Goldfisher, Toluca Lake, for petitioner and cross-defendant in pro per.

No appearance for respondent court.

Honorable Charlie Bussell
Chairman, Committee on Judiciary
House of Representatives
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Bussell:

In response to your letter dated March 30, 1983, enclosed are copies of the following documents pertaining to the December 9, 1978 amendments to the Department's wage and hour regulations in 8 AAC 15.

Enclosure #1: Regulations as proposed on 8/21/78 including the notice of proposed changes.

Enclosure #2: Affidavit of notice of adoption of proposed regulation.

Enclosure #3: Affidavits of Publication from the Anchorage Daily News, Southeast Alaska Empire, and Fairbanks Daily News Miner.

Enclosure #4: Affidavit of oral hearing, and the hearing attendance roster indicating that no one appeared to testify.

Enclosure #5: Proposed regulations as submitted to the Department of Law on 10/9/78 for final review and filing by the Lt. Governor's office.

Enclosure #6: Regulations as filed by the Lt. Governor and the signed order of adoption.

Enclosure #7: Regulations in effect prior to the December 9, 1978 amendments.

GBLH

These enclosures include copies of the correspondence between the Departmentof Labor and Department of Law on these regulations.

If you have further questions concerning the promulgation of these regulations, please let me know.

Sincerely,

Jim Robison
Commissioner

STATE OF ALASKA
LIEUTENANT GOVERNOR
JUNEAU

CERTIFICATE

I, LOWELL THOMAS, JR., LIEUTENANT GOVERNOR OF THE STATE OF ALASKA, as authorized by AS 44.19.050 designate Avrum M. Gross, Attorney General, as temporary custodian of the state seal and as the officer to perform the authenticating functions of the lieutenant governor during such time as I succeed to the office of governor, act as governor, am absent from the state, or am otherwise unavailable at the state capital to perform these functions.

In the absence of Attorney General Gross, I designate Bill Allen, Commissioner of Administration, to perform the functions stated above.

In the absence of Commissioner Allen, I designate Donald Harris, Commissioner of Transportation and Public Facilities, to perform the functions stated above.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed hereto the Great Seal of the State of Alaska, at Juneau, the Capital, this Twentieth day of June, A.D. 19 78.

Donald Harris
LIEUTENANT GOVERNOR

STATE OF ALASKA

OFFICE OF LIEUTENANT GOVERNOR

DELEGATION OF AUTHORITY

IN ACCORDANCE WITH AS 44.17.010, THE AUTHORITY AND RESPONSIBILITY FOR ADOPTING REGULATIONS OF THE DEPARTMENT OF LABOR, UNDER THE ALASKA ADMINISTRATIVE PROCEDURE ACT, IS HEREBY DELEGATED TO WILLIAM E. SPEAR,

(NAME)

DEPUTY COMMISSIONER

(POSITION)

SIGNED: Edward N. Carlisle

COMMISSIONER

DEPARTMENT OF LABOR

SIGNED AND SWORN BEFORE ME THIS 23rd DAY OF March, 1978.

SIGNED: Mary Jean Smith

NOTARY PUBLIC IN AND FOR THE STATE OF ALASKA

COMMISSION EXPIRES: 2/10/80

PLEASE RETURN TO THE OFFICE OF LIEUTENANT GOVERNOR
BY MARCH 31, 1978

TITLE 8. LABOR

PART 1. INDUSTRIAL WELFARE.

CHAPTER 15. ALASKA WAGES AND HOURS.

* Editor's Note: The articles contained in this chapter, secs. 10-70, [illegible] Exemptions, and succeeding [illegible]

Publisher. Please be sure that the chapter listing for Title 8 shows the changes in the Ch. 15 headings, made in 1974.

Section
10-70. Repealed

8 AAC 15.010 SUMMARY: ALASKA WAGE AND HOUR ACT. Repealed (11/ 4/74, Reg. 52)

8 AAC 15.015 EXEMPTIONS FOR SEARCHING FOR PLACER OR HARD ROCK MINERALS. Repealed (12/ 9/78, Reg. 68)

8 AAC 15.020 EXEMPTIONS FOR INDIVIDUALS UNDER 18 WHO ARE PART TIME EMPLOYEES. Repealed (12/ 9/78, Reg. 68)

8 AAC 15.030 DETERMINING THE NUMBER OF EMPLOYEES FOR PURPOSES OF AS 23.10.060(1). Repealed (12/ 9/78, Reg. 68)

8 AAC 15.040 SMALL MINING OPERATIONS. Repealed (12/ 9/78, Reg. 68)

Article

1. Minimum Wages and Overtime (8 AAC 15.100 — 8 AAC 15.105)
2. Exemptions (8 AAC 15.120 — 8 AAC 15.145)
3. Deductions from Wages (8 AAC 15.160)
4. Procedures Relating to Violations, Investigations or Hearings (8 AAC 15.175 — 8 AAC 15.180)
5. General Provisions (8 AAC 15.900 — 8 AAC 15.910)

ARTICLE 1.

MINIMUM WAGES AND OVERTIME.

Section
100. Payment for overtime
105. Minimum wage

8 AAC 15.100 PAYMENT FOR OVERTIME. (a) An employee's regular rate is the basis for computing overtime. The regular rate is an hourly rate figured on a weekly basis. Employees need not actually be hired at an hourly rate; they may be paid by piece-rate, salary, commission or any other basis agreeable to the employer and employee. However, the applicable compensation basis must be converted to an hourly rate when determining the regular rate for computing overtime compensation.

(b) The regular rate referred to in (a) is that fixed hourly amount determined from an employee's hourly wage, salary, commission, piece-rate or other basis of compensation that he is to be paid for all contract hours up to the daily or weekly maximum, established under AS 23.10.060, that he is regularly employed to work during a work week.

(c) When computing an employee's hours for the purpose of determining overtime, the employer shall count all hours the employee worked during that week including periods of "on call" and "standby or waiting time" required for the convenience of the employer which were a necessary part of the employee's performance of his employment. However, if the employee is completely relieved from all duties for a certain period during which he may use the time effectively for his own purposes, then those periods need not be counted.

(d) The following are not acceptable methods of complying with the payment of overtime provisions of AS 23.10.060:

(1) guaranteed weekly pay for variable hours plan ("Belo" contracts) established under sec. 7(f) of the Fair Labor Standards Act of 1938, as amended (29U.S.C. 207(f) as implemented in 29 C.F.R. 778-402-778.414);

(2) compensatory time off in place of payment for overtime; and

(3) flex-time or flexitime plans established under 29 C.F.R. 778.114 providing a fixed salary for fluctuating hours up to a predetermined maximum number of hours in a work-week. (Eff. 12/1/78, Register 68)

Authority: AS 23.10.060
AS 23.10.085

8 AAC 15.105. MINIMUM WAGE. As used in AS 23.10.065, "prevailing Federal Minimum Wage Law" means that rate established in Sec. 6(a)(1) of the Fair Labor Standards Act of 1938, as amended, (29 U.S.C. 206(a)(1)) as the minimum wage generally applicable to employees subject to that Act.
(Eff. 12/9/78, Register 68)

Authority: AS 23.10.065
AS 23.10.085

ARTICLE 3.

EXEMPTIONS.

Section
120. Minimum wage exemption for handicapped persons
125. Minimum wage exemption for student learners
130. Exemption for searching for placer or hard rock minerals
135. Exemption for individuals under 18 who are part time employees
140. Determining the number of employees for purposes of AS 23.10.060(1)
145. Small mining operations

8 AAC 15.120. MINIMUM WAGE EXEMPTION FOR HANDICAPPED PERSONS. (a) An application to employ a person at less than the minimum wage established under AS 23.10.065 must be made either on a form provided by the department or by filing an application for a special certificate to employ a handicapped person (29.C.F.R. Part 525) with the Regional Director of the Wage and Hour Division, U.S. Department of Labor, 909 First Avenue, Seattle, Washington, 98104.

(b) An application filed with the department must set out the facts showing that the person's productive capacity to do the work he is to perform is impaired by physical or mental deficiency, age, or injury. A medical certificate will be required in all cases in which the handicap is not clearly obvious. The information in the application must be complete and must be certified by a responsible person who has knowledge of the facts.

(c) If the commissioner determines, from the information provided in the application, that the person would otherwise be deprived of employment opportunity, he will, in the exercise of his discretion, approve a wage rate lower than that established under AS 23.10.065. With the exception of very extreme cases where the person is so seriously impaired that he is unable to engage in competitive employment, that rate will not be less than 50 percent of the minimum wage established under AS 23.10.065.

(d) If an approval is issued under (c) of this section, it will specify the approved wage rate and the period for which it is effective. An application for renewal of an exemption must be made in the same manner as the original but must also include an evaluation of that person's productivity, comparing the degree of productivity between the initial application and the renewal.

(e) As a general rule, approval for payment of a wage lower than that established under AS 23.10.065 to persons with a temporary handicap will not be granted.

(f) Persons undergoing rehabilitation treatment or therapy relating to narcotics or alcoholism are not considered handicapped for the purposes of AS 23.10.070 and this section. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.070(1)
AS 23.10.085

8 AAC 15.125 MINIMUM WAGE EXEMPTION FOR STUDENT LEARNERS. (a) An exemption for student learners from the minimum wage requirement of AS 23.10.065 is available when the student learner is enrolled in a course of study and training in a cooperative vocational training program under a recognized state or local educational authority or in a substantially similar program conducted by a private school.

(b) An application for an exemption under (a) of this section must be made on a form provided by the department. The information required must be complete and must be signed by the employer and the student learner's school coordinator or principal. To qualify for the exemption, the employment must meet all the requirements set out in AS 23.10.325-23.10.370 and chapter 5 of this title relating to the employment of children.

(c) A wage rate authorized under this section will not be less than 75 percent of the minimum wage established under AS 23.10.065.

(d) The exemption from minimum wages for full-time students established by Sec. 14(b) of the Fair Labor Standards Act of 1938, as amended, (29 U.S.C. 214(b)) as implemented in 29 C.F.R. 519.1 - 519.2 does not apply to employment subject to the provisions of AS 23.10.065. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.070(3)
AS 23.10.085

8 AAC 15.130 EXEMPTION FOR SEARCHING FOR PLACER OR HARD ROCK MINERALS. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(10) applies to those activities commonly referred to as "prospecting" and does not apply once development of and production from a known mineral source has ~~been~~ begun. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.055(10)
AS 23.10.085

8 AAC 15.135 EXEMPTION FOR INDIVIDUALS UNDER 18 WHO ARE PART TIME EMPLOYEES. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(11) does not apply during any work week in which an individual normally within the ambit of AS 23.10.055(11) is employed in excess of 30 hours. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.055(11)
AS 23.10.085

8 AAC 15.140 DETERMINING THE NUMBER OF EMPLOYEES FOR PURPOSES OF AS 23.10.060(1). In determining the number of employees that an employer employs for purposes of AS 23.10.060(1), all officers of a corporation who actively engage in the business and all part time employees will be counted regardless of the number of days or hours worked. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.060(1)
AS 23.10.085

8 AAC 15.145 SMALL MINING OPERATIONS. (a) A mining season, for purposes of AS 23.10.060(5), means the cumulative period of time during which mining operations are carried on during a calendar year, but not exceeding 20 weeks.

(b) The exemption from the payment for overtime requirements of AS 23.10.060 for employers engaged in small mining operations provided by AS 23.10.060(5) is available to the employer for a maximum of 14 consecutive weeks, commencing on the first day the mine begins active operations in a calendar year. In determining the available period of exemption, periods during which the mine is not actively engaged in mining operations for such reasons as, but not limited to, assessment work and repair or construction of buildings or equipment are not part of the exemption period.

(c) During the exemption period described in (b), an employer engaged in small mining operations remains responsible for payment of overtime at the rates established by AS 23.10.060 for work performed by an employee in excess of 12 hours a day or 56 hours a week. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.060(5)
AS 23.10.085

ARTICLE 3.

DEDUCTIONS FROM WAGES.

Section
160. Deductions from an employee's wages.

8 AAC 15.160. DEDUCTIONS FROM AN EMPLOYEE'S WAGES. (a) AS 23.10.085(c) does not limit the right of an employer and employee to enter into a written agreement to provide for deductions of monetary obligations of an employee other than the cost of board and lodging. However, a written agreement for other deductions payable to the employer or person acting in the employer's behalf or interest, other than the cost of board or lodging, is not valid if it would have the effect of reducing an employee's wage rate below the statutory minimum wage or requiring an employee to reimburse the employer for any of the following:

(1) customer checks returned due to insufficient funds or any other reason ;

(2) non-payment for goods or services as a result of customers walking out or defaulting on credit;

(3) cash or cash register shortages for which the employee does not acknowledge responsibility;

(4) lost or stolen property or alleged theft by the employee for which the employee does not acknowledge responsibility;

(5) damage or breakage costs unless they are clearly due to willful conduct on the part of the employee, the responsibility for which has been acknowledged by the employee.

(b) Nothing in (a) of this section prohibits deductions from earnings based on a written agreement whereby the employer has been directed by the employee to pay a sum for the benefit of that employee to a creditor, donee, or other third party and neither the employer nor any person acting in his behalf or interest derives any profit or benefit from the transaction.

(c) Written agreements for deductions from earnings are not required for any lawful deduction otherwise authorized or required by state or federal law or by order of a court of competent jurisdiction.

(d) An employer subject to AS 23.10.050-23.10.150 shall furnish each person employed by him who is not exempted from the coverage of those sections by AS 23.10.055 a statement of earnings and deductions for each pay period. The statement of earnings and deductions ~~shall~~ must contain the following information:

(1) employee's rate of pay;

(2) the beginning and ending dates of the pay period and the weekly hours actually worked during the period;

(3) federal income tax deductions;

(4) federal insurance contribution act deductions;

(5) Alaska income tax deduction;

(6) Alaska school tax deduction;

(7) Alaska employment security act contributions;

(8) board and lodging costs;

(9) advances; and

(10) other authorized deductions. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.085

ARTICLE 5.

PROCEDURES RELATING TO VIOLATIONS, INVESTIGATIONS, OR HEARINGS.

Section
175. Assignment of claims
180. Investigations, conference and persuasion

8 AAC 15.175. ASSIGNMENT OF CLAIMS. (a) A person who believes that he has not been paid wages due him under AS 23.10.050 - 23.10.150 may assign his claim to the department for collection.

(b) The department will not accept an assignment of a claim under AS 23.10.050 - 23.10.150 in excess of $5,000, excluding liquidated damages. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.085
AS 23.10.110(b)

8 AAC 15.180. INVESTIGATIONS, CONFERENCES AND PERSUASION. (a) The wage and hour division will investigate potential violations of AS 23.10.050-23.10.150 on its own motion or on the assignment to it of a claim under sec. 175 of this chapter.

(b) If, after investigation, the division finds that probable cause exists for believing that a violation of AS 23.10.050 - 23.10.150 has occurred, it will attempt to correct the unlawful practice by conference and persuasion as follows:

(1) the division will provide the employer believed to have violated AS 23.10.050 - 23.10.150 with a copy of the assignment or a description of the alleged violation and inform him of the results of its investigation; and

(2) the division will schedule an informal conference with the employer to discuss the matter and attempt to eliminate the alleged violations.

(c) If the informal conference succeeds in correcting the alleged violation, no further action will be taken by the division against the employer.

(d) If an alleged violation is not rectified by the informal conference or if the employer fails to attend the conference without good cause shown, the director may, at his discretion;

(1) conduct a further investigation into the matter;

(2) enforce the claim through initiation of an adjudicative hearing under provisions of the Administrative Procedures Act (AS 44.62);

(3) enforce the claim through filing of an action in a court of competent jurisdiction.

(e) If the director determines under (d)(1) of this section that a further investigation into the matter should be conducted, he may provide that it be carried out by initiation of an investigative proceeding conducted in accordance with secs. 10 through 30 of chapter 25 of this title. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.080
AS 23.10.085
AS 23.10.090
AS 23.10.110

ARTICLE 5.

GENERAL PROVISIONS

Section
900~~195~~. Place of employment for purposes of recordkeeping
910~~200~~. Definitions

8 AAC 15.900~~195~~. PLACE OF EMPLOYMENT FOR PURPOSES OF RECORDKEEPING. For purposes of AS 23.10.100, "the place where an employee is employed" means a central office of the employer located within the state. However, the employer may keep duplicate records at the sites or premises where the work is performed. (Eff. 12/9/78, Register 68)

Authority: AS 23.10.085
AS 23.10.100

8 AAC 15.910. DEFINITIONS. In this chapter and in AS 23.10.050 - 23.10.150, unless the context requires otherwise:

(1) "administrative employee" means an employee;

(A) whose primary duty consists of work directly related to management policies or supervising the general business operations of his employer;

(B) who customarily and regularly exercises discretion and independent judgment;

(C) who performs his work under only general supervision;

(D) who is paid on a salary or fee basis;

(E) who regularly and directly assists a proprietor or an exempt executive employee of the employer; and

(F) who performs work along specialized or technical lines requiring special training, experience or knowledge and does not devote more than 20 percent of his weekly hours to activities which are not described in this paragraph or paragraphs (7) or (11) of this section;

(2) "casual employee," as used in AS 23.10.065(15), means an employee engaged in an activity which occurs without regularity and is not in the usual course of trade, business, occupation or profession of his employer;

(3) "commissioner" means the commissioner of labor;

(4) "department" means the Alaska Department of Labor;

(5) "director" means the director of the wage and hour division of the department, or his designee;

(6) "domestic service in or about a private home" as used in AS 23.10.055(4), means a person employed in or about a private home of a person by whom he is employed and who performs such services or activities as a babysitter, a cook, a butler, a valet, a maid, a housekeeper, a governess, a janitor, a launderess, a caretaker, a handyman, a gardener, a footman, a groom, or a chauffeur of automobiles for family use;

(7) "executive employee" means an employee:

(A) whose primary duty consists of the management of the enterprise in which he is employed or of a customarily recognized department, or subdivision of the enterprise;

(B) who customarily and regularly directs the work of two or more other employees;

(C) who has the authority to hire or fire or effect any other change of status of other employees or whose suggestions or recommendations regarding these kinds of changes are given particular weight;

(D) who customarily and regularly exercises discretionary authority;

(E) who does not devote more than 20 percent of his weekly hours to activities which are not directly and closely related to the work described in this paragraph or paragraphs (1) or (11) of this section; and

(F) who is compensated on a salary basis;

(8) "nonprofit" as used in AS 23.10.055(6), means an organization no part of the income or profit of which is distributable to its members, directors, or officers and whose status has been determined by the U.S. Internal Revenue Service as nonprofit;

(9) "on call" means time that an employee is required to remain on call on the employer's premises or other place of employment or so close to them that he cannot use the time effectively for his own purposes, but does not include the time an employee is not required to remain on or near his employer's premises or other place of employment but is merely required to leave word at his home or with the employer where he may be reached;

(10) "outside salesman" means a person who is employed for the purpose of making sales, contracts for sales, consignments, or shipments for sale or obtaining orders for services or for use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (12) of this section do not exceed 20 percent of the hours worked in the workweek;

(11) "professional" means an employee, except for the classifications of registered nurse and licensed practical nurse,

(A) whose primary duty is:

(i) to perform work requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education or from an apprenticeship or from training in the performance of routine mental, manual, or physical processes; or

(ii) to perform work that is original and creative in character in a recognized field of artistic endeavor (as opposed to work which can be produced by a person with general manual or intellectual ability and training), and the result of which depends primarily on the invention, imagination, or talent of the employee; or

(iii) to teach, tutor, instruct, or lecture in the activity of imparting knowledge, and who is employed and engaged in this activity as a teacher certified or recognized as such in a school or other educational establishment or institution; and

(B) whose work:

(i) requires the consistent exercise of discretion and judgment in its performance;

(ii) is predominately intellectual and varied in character (as opposed to routine mental, manual, mechanical, or physical work) and is of such character that the output produced or the result accomplished cannot be standardized on a time basis; and

(iii) is compensated on a salary or fee basis;

(12) "salesman employed on a straight commission basis" means a person who is regularly employed on the business premise of his employer and is compensated on a straight commission basis for the purpose of making sales, contracts for sales, consignments, or shipments for sale or in obtaining orders for services or the use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (10) of this section do not exceed 20 percent of the hours worked in the workweek;

11

(13) "standby or waiting time" means time that an employee is required to be at or near his post or place of employment and is required to wait for work or an assignment, whether nor not because of shutdown or repair, and during which he cannot use the time effectively for his own purposes;

(14) "supervisory capacity" means those primary duties performed, except for the classifications of registered nurse and licensed practical nurse, by an employee who is employed solely for the purpose of regularly assigning and directing the activities of other employees, and is responsible for results of the work performed, and who does not perform duties regularly performed by the employees supervised, except for brief periods of time not to exceed 20 percent of the hours worked in the workweek; For the purpose of AS 23.10.060, it does not apply to any employee required by the employer to perform ~~such~~ these activities on an intermittent or substitute basis during the course of his employment;

(15) "workweek" means a fixed and regularly recurring period of 168 hours, i.e. seven consecutive 24 hour periods. It may begin on any day of the week and need not coincide with the calendar week; An individual employee's workweek is the statutory or contract number of hours that he is to regularly work during that period; The workweek may not be artificially adjusted for the purpose of avoiding the payment of overtime, however the workweek may be changed for any other purpose in the manner provided in AS 23.05.160. (Eff. 12/9/78, Register 68)

NOTICE OF PROPOSED CHANGES IN THE
REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.085, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.050 - AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.

Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.

Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.

Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.

Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.

Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 15, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P. O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

Date 8/21/78

NOTICE OF PROPOSED CHANGE IN THE REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.085, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.050 — AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.
Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.
Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.
Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.
Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.
Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock, on September 15, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P.O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

Date: 8/21/78

Publish: Aug. 30, 31, Sept. 1, 1978
800-82

Good afternoon Mr. Chairman, Committee members, and guests. My name is John Martin. I am the Area Manager for Dresser Atlas, a division of Dresser Industries. I have resided and have been registered as an Alaska citizen for the past six years.

I am here today, in that I strongly believe that a 1978 Alaska Department of Labor regulation prohibiting the use of the fluctuating work week pay plan has created an enormous managerial and employee compensation problem that is not conducive to a healthy business climate. This regulation has created a potentially disastrous unjust economic impact on my firm and others operating in this state.

Dresser Atlas employs the fluctuating work week plan in all of the United States where we operate. It is proven to be the best pay plan suitable to the oil and gas service business for both the employee and employer. Dresser Atlas' largest Alaskan core of operation is on the North Slope. Our employees work one week on duty and one week off. During the week on, our employees may be dispatched to a remote location where they may remain on standby waiting in a camp, sleeping, eating or relaxing for hours before they are actually called for to perform the well logging or perforating services. Often the direct true productive working time on the job is minimal compared to the unproductive waiting time. The nature of the oil and gas service business makes work hours next to impossible to predict. The

unpredictability of the Arctic weather and normal drilling problems creates actual job timing merely guess work. This inherent industry problem is fully appreciated by all that have knowledge of the business.

The fluctuating work week system lends itself perfectly to this work environment. First of all, it guarantees the employees a base steady income, even when they are off duty at their homes. Our average Senior Operator was guaranteed $530.00 per week in 1981 whether they were off duty or on duty. This enabled them to maintain standard income levels even when they were off work whether it be due to their days off or low activity periods which are inherent to our business. When they were on the job, they received a guaranteed 16 hours per day, C.O.L.A., isolated location allowance and job bonuses. In 1981, our average Operator made $60,678.00 and a Senior Operator made $67,829.00. Please keep in mind this is unskilled labor, most of which is hired in Alaska. They are also making over double what their Lower 48 counterparts make and have much more personal time off. There was also never a complaint about the fluctuating work week system and each employee was well versed on computation of his earnings.

The unpredictable nature of hours and remoteness makes it virtually impossible to hire additional personnel to spread out the total hours over more employees. As a businessman, what would you think about changing out your employees every eight

hours when the shift coming in had been sleeping in a camp for their eight hours of work? And what about the high cost of flying the personnel back and forth every eight hours and the safety implications of flying in Alaska, frankly, it is totally unacceptable; both economically and from a safety standpoint.

Through some infinite wisdom, the Alaska Department of Labor determined it should abolish the fluctuating work week system. Dresser Atlas was not asked, or any other company to my knowledge, our opinion of the use of the fluctuating work week system in determining why it should be banned. It seems incredible to me, how one state agency could make a judgement on the validity of a pay plan that is acceptable in the other forty-nine states and approved by the Federal Government. Such a gross adjustment from the normal accepted and proven way of doing things in the United States would appear to me to be a responsibility of the state legislature.

To make matters worse, the Alaska Department of Labor did not notify our company or any other company, to my knowledge, of the fluctuating work week abolishment. Dresser Atlas management and corporate management has absolutely no record or knowledge of any correspondence either written or oral from the Alaska Department of Labor informing us of such a drastic change in wage administration. Attorneys on several occasions have formally requested that the Alaska Department of Labor furnish correspondence records depicting the

Department's notices before and after the regulation. The only correspondence discovered was a short hearing notice published in the Anchorage Daily News on August 30, 31 and September 1 of 1978. It is also incredible that the words fluctuating work week were not mentioned in the small print common to public hearing notices.

This entire matter did not come to Dresser's attention until the Department of Labor filed a $4,000 suit against Dresser Swaco in 1979 for an employee who was paid under the fluctuating work week plan. Dresser chose to challenge the Department of Labor's suit regarding the validity of the regulation. When losing in the State Supreme Court, Dresser immediately had no choice but to bow down and submit to the Alaska Department of Labor's regulation prohibiting the use of the fluctuating work week pay plan. We changed pay plans seven weeks after the State Supreme Court ruling. Within one month after changing pay plans, we were served a summons in the form of a class action lawsuit. Within a very few months, four other companies were served class action suits for past use of the fluctuating work week plan. These suits are all being handled by one law firm. Two of these suits alone called for judgements in excess of thirty five (35) million dollars!

An Alaska Department of Labor spokesman has estimated that there may be up to 90 companies affected with an excess of 100 million dollars in liability.

H.B. 223 would prohibit retroactive recovery by employees who were paid under the fluctuating work week system during the period the regulatory prohibition was being appealed in the courts.

I encourage you to strongly consider the possible consequences if H.B. 223 does not pass. It would create a definite windfall profit for many past and present employees. Definite windfall, because facts prove these employees were paid fair and equitable wages, which were fully agreed upon and expected by our employees. Who else may profit? One law firm! What is 33.3% of 100 million dollars?

I cannot say I enjoy being here today. I have a business to run as you do a state government. Please keep in mind that my firm and many others have a lot to lose on this issue and the opposition has only to gain. To conclude, I must add that it is totally ironic that in the State of Alaska under the fluctuating work week plan, Dresser had the lowest turnover rate of operators in all of the United States. But yet it is the only state where this fair and just pay plan has been banned and consequently our business stands in financial jeopardy.

I feel your fair and moral judgement will lead you to support H.B. 223.

Thank you for this opportunity to testify.

TO: Representative Walt Furnace

FROM: Representative Barbara Lacher

SUBJECT: HB 236

DATE: March 21, 1983

Unlike many other states, Alaska does not have a legal definition of "trade or commerce" which includes real property. Without the needed definition and clear legislative direction, the Alaska courts have declined to apply the existing Fair Trade and Commerce Statutes to real property transactions, particularly involving sales in subdivisions.

There are clear cases of fraud involving real property transactions in the state that the Department of Law has not prosecuted because of the absence of legislative direction. The materials you have been provided describe in detail the type of situations that this legislation will remedy.

Connie Cipe, Chief of the State Consumer Protection Division, Department of Law, and the Mat-Su Borough attorney, both of whom have been involved in trying to assist people who have been victims of fraud or misrepresentation, drafted the legislation.

I'm sure you will find HB 236 to be needed legislation and that enactment will be of major benefit to purchasers of property in subdivisions.

Matanuska-Susitna Borough

BOX B, PALMER, ALASKA 99645 • PHONE 745-3248

BOROUGH ATTORNEY'S OFFICE

February 8, 1983

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

The recent Supreme Court decision of Brown v.State of Alaska, Opinion No. 2591 (December 3, 1982) effectively limits the Unfair Trade Practices and Consumer Protection Act by excluding real estate development transactions.

The Brown case involved alleged fraudulent misrepresentations to purchasers of lots in Windsong Subdivision in the Matanuska-Susitna Borough, that flooding possibilities were remote and that flood and mortgage insurance was available. Purchasers were given the second page of the Windsong Subdivision plat, but they never received the first page, which had a flood warning notation placed on it by the Platting Board. Although the Army Corps of Engineers concluded that the subdivision was in a high-hazard area, the developer represented that experts, including the Corps, had concluded the possibility of flooding was remote.

The Supreme Court ruled that the scope of the Unfair Trade Practices Act did not include the sale of real property. The decision was based on statutory interpretation. The Court noted that, unlike certain other states, Alaska did not have a definition of "trade or commerce" which includes real property. It noted that none of the list of prohibited acts in A.S. 45.50.471 mentions real property. Without clear legislative direction, the Court declined to apply the Act to real property transaction.

This does not entirely eliminate remedies for a purchaser of a lot based on fraudulent misrepresentations. The Uniform Land Sales Practices Act, A.S. 34.55.004--34.55.046 provides for individual relief. However, in the Brown case, the Court found that the State could not sue the developer directly for fraud, but had to bring suit as representative of defrauded consumers, "in the nature of a class action." This requires costly and time-consuming steps to assure individual notices to all consumers, who then may be treated as parties in the lawsuit.

Common law fraud is also a basis for suit. However, this does not provide for the clear authority of the Attorney General to prosecute fraudulent land developers and obtain injunctive relief in the manner provided by the Unfair Trade Practices Act.

The result of the Brown decision may be to eliminate any easy remedy to a homeowner who purchases a home based on knowing, fraudulent misrepresentations. The Consumer Protection Division of the Department of Law has declined to pursue a recent case in this Borough involving possible fraud in the sale of homes to consumers in this Borough. Although sympathetic, that office indicated that the problems created by the Brown decision would make it inadvisable to use its scarce legal resources on such a problem.

The attached bill has been drafted to rectify this problem. It includes a definition for "trade or commerce" similar to that in the Massachusetts consumer act of similar nature. The bill was prepared after consultation with Connie Sipe at the State Consumer Protection Division, who provided valuable comment. The bill, as proposed, would provide the legislative direction which the Supreme Court has found to be absent.

I would be happy to discuss this matter further at your convenience.

Sincerely,

Steven H. Morrissett
Borough Attorney

er

Sec. 45.50.450. Violations constituting misdemeanor. Every person, in addition to the other penalties provided in AS 45.50.330 — 45.50.460, who violates or who procures, or aids or abets in the violating of AS 45.50.330 — 45.50.460, or who conspires to make ineffectual a valid order or decision of a court in the enforcement of AS 45.50.330 — 45.50.460, or who procures, conspires with, or aids or abets any person in his failure to obey the provisions of AS 45.50.330 — 45.50.460, or to make ineffectual an order of a court in connection with the enforcement of AS 45.50.330 — 45.50.460 is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $500, or by imprisonment in jail for not more than six months, or by both. (§ 35-2-100 ACLA 1949)

Sec. 45.50.460. Definition of sale for single use. The owner, holder, or person having control of a copyrighted work is considered to sell and part with the right to further restrict the use of the copyrighted work if (1) he sells the right to the single use of it; (2) its sole value is in its use for public performance for profit; and (3) he receives consideration for it, either inside or outside the state. (§ 35-2-92 ACLA 1949)

Article 4. Unfair Trade Practices and Consumer Protection.

Repeal of former article. — Section 1, ch. 246, SLA 1970, repealed former Article 4, entitled "False or Misleading Advertising." The former article consisted of §§ 45.50.470 — 45.50.510 and derived from ch. 86, SLA 1961.

Constitutionality. — Absent a history or strong likelihood of uneven application, this article cannot be said to be unconstitutionally vague. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Any defects in the constitutional sufficiency of the warning provided by this article is cured by authoritative administrative interpretations of the Federal Trade Commission which clarify obscurities or resolve ambiguities. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Liberal construction. — The provisions of this article should not be strictly construed, for it is basic that remedial civil statutes are to be accorded a liberal construction. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

This article as applied, is not a penal statute. State v. O'Neill Investigations,

Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

This article embraces independent debt collection practices. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

The exemption clause of AS 45.50.481(1) does not withdraw the activities of independent debt collection agencies from the scope of the Unfair Trade Practices and Consumer Protection Act. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Sec. 45.50.471. Unlawful acts and practices. (a) Unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce are declared to be unlawful.

(b) The terms "unfair methods of competition" and "unfair or deceptive acts or practices" include, but are not limited to, the following acts:

(1) fraudulently conveying or transferring goods or services by representing them to be those of another;

(2) falsely representing or designating the geographic origin of goods or services;

(3) causing a likelihood of confusion or misunderstanding as to the source, sponsorship, or approval, or another person's affiliation, connection, or association with or certification of goods or services;

(4) representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have;

(5) representing that goods are original or new if they are deteriorated, altered, reconditioned, reclaimed, used, secondhand, or seconds;

(6) representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another;

(7) disparaging the goods, services, or business of another by false or misleading representation of fact;

(8) advertising goods or services with intent not to sell them as advertised;

(9) advertising goods or services with intent not to supply reasonable expectable public demand, unless the advertisement prominently discloses a limitation of quantity;

(10) making false or misleading statements of fact concerning the reasons for, existence of, or amounts of price reductions;

(11) engaging in any other conduct creating a likelihood of confusion or of misunderstanding and which misleads, deceives or damages a buyer or a competitor in connection with the sale or advertisement of goods or services;

(12) using or employing deception, fraud, false pretense, false promise, misrepresentation, or knowingly concealing, suppressing, or

omitting a material fact with intent that others rely upon the concealment, suppression or omission in connection with the sale or advertisement of goods or services whether or not a person has in fact been misled, deceived or damaged;

(13) failing to deliver to the customer at the time of an installment sale of goods or services, a written order, contract, or receipt setting out the name and address of the seller and the name and address of the organization which he represents, and all of the terms and conditions of the sale, including a description of the goods or services, which shall be stated in readable, clear, and unambiguous language;

(14) representing that an agreement confers or involves rights, remedies or obligations which it does not confer or involve, or which are prohibited by law;

(15) knowingly making false or misleading statements concerning the need for parts, replacement, or repair service;

(16) misrepresenting the authority of a salesman, representative or agent to negotiate the final terms of a consumer transaction;

(17) basing a charge for repair in whole or in part on a guaranty or warranty rather than on the actual value of the actual repairs made or work to be performed on the item without stating separately the charges for the work and the charge for the guaranty or warranty, if any;

(18) disconnecting, turning back or resetting the odometer of a vehicle to reduce the number of miles indicated;

(19) using a chain referral sales plan by inducing or attempting to induce a consumer to enter into a contract by offering a rebate, discount, commission, or other consideration, contingent upon the happening of a future event, on the condition that the consumer either sells, or gives information or assistance for the purpose of leading to a sale by the seller of the same or related goods;

(20) selling or offering to sell a right of participation in a chain distributor scheme;

(21) selling, falsely representing or advertising meat, fish or poultry which has been frozen as fresh food;

(22) failing to comply with AS 45.02.350;

(23) failing to comply with AS 45.45.130 — 45.45.240;

(24) counseling, consulting or arranging for future services relating to the disposition of a body upon death whereby certain personal property, not including cemetery lots and markers, will be furnished or the professional services of a funeral director or embalmer will be furnished, unless the person receiving money or property deposits the money or property and money or property is received, within five days of its receipt, in a trust in a financial institution whose deposits are insured by an instrumentality of the federal government designating the institution as the trustee as a separate trust in the name only of the person on whose behalf the arrangements are made with a

provision that the money or property may only be applied to the purchase of designated merchandise or services and should the money or property deposited and any accrued interest not be used for the purposes intended on the death of the person on whose behalf the arrangements are made, all money or property in the trust shall become part of his estate; upon demand by the person on whose behalf the arrangements are made, all money or property in the trust including accrued interest, shall be paid to him; this paragraph does not prohibit the charging of a separate fee for consultation, counseling or arrangement services if the fee is disclosed to the person making the arrangement; any arrangement under this paragraph which would constitute a contract of insurance under AS 21 is subject to the provisions of AS 21;

(25) failing to comply with the terms of the Alaska Gasoline Products Leasing Act (AS 45.50.800 — 45.50.850).

(c) The unlawful acts and practices listed in (b) of this section are in addition to and do not limit the types of unlawful acts and practices actionable at common law or under other state statutes.

(d) Repealed by § 21 ch 166 SLA 1978. (§ 2 ch 246 SLA 1970; am § 1 ch 53 SLA 1974; am § 1 ch 138 SLA 1974; am § 1 ch 183 SLA 1975; am § 2 ch 146 SLA 1976; am § 3 ch 197 SLA 1976; am § 3 ch 234 SLA 1976; am § 21 ch 166 SLA 1978)

Effect of amendments. — The first 1976 amendment added paragraph (23) of subsection (b).

The second 1976 amendment added paragraph (24) of subsection (b).

The third 1976 amendment added paragraph (25) of subsection (b).

The 1978 amendment repealed subsection (d), which read "When a person is tried under the criminal provisions of this chapter for engaging in an unlawful act or practice under this chapter, it must be shown that he acted knowingly and with intent."

Editor's note. — The paragraph added to subsection (b) by § 3, ch. 197, SLA 1976, was designated paragraph (23) in the act. The paragraph added to subsection (b) by § 3, ch. 234, SLA 1976, was designated paragraph (22) in the act.

Section 1, ch. 234, SLA 1976 provides: "Findings of the legislature. The legislature finds and declares that since the distribution and sales, through lease agreements, of gasoline in the state vitally affect the economy of the state, the public interest, welfare, and transportation, it is necessary to define the relationships and responsibilities of the parties to certain agreements pertaining to leasing."

Legislative history report. — For report on ch. 246, SLA 1970 (FCCS 2d HCS CSSB 252), see 1970 House Journal, p. 1546; 1970 House Journal Supplement No. 10; 1970 Senate Journal, p. 1295.

This statute did not chill constitutionally protected speech, where the speech in question involved communications regarding alleged debts and thus fell within the rubric of commercial speech, which enjoys a lesser first amendment protection than noncommercial speech. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Subsection (a) not vague. — The words of subsection (a) of this section have a "well-defined" meaning in the area of trade regulation and are therefore not vague. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Two elements must be proved to establish a prima facie case of unfair or deceptive acts or practices under the act: (1) that the defendant is engaged in trade or commerce; and (2) that in the conduct of trade or commerce, an unfair act or practice has occurred. State v. O'Neill Investigations, Inc., Sup. Ct. Op.

No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

When act or practice is deceptive or unfair. — An act or practice is deceptive or unfair if it has the capacity or tendency to deceive. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Actual injury as a result of the deception is not required. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Intent to deceive need not be proved. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Testimony of consumers that they were misled is sufficient to sustain a prima facie case of unfair and deceptive practices. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

An act or practice need not be deceptive to be unfair. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Unfairness will be determined by a variety of factors, including: (1) whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise — whether, in other words, it is within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers or competitors or other businessmen. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Deceptive and unfair acts by collection agencies. — Threats by debt collection agencies of imminent legal action when no such action is actually contemplated is a deceptive act or practice. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Harassment of debtors by telephone calls to them, their relatives or their employers constitutes an unfair act or practice. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

A misrepresentation by a debt collection agency that failure to pay an alleged debt will result in impairment of one's credit rating has been held to be an unfair and deceptive act or practice. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

The use by collection agencies of simulated legal documents or collection forms labelled "Final Demand Before Legal Action" when no legal action is in fact taken constitutes a deceptive act. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Quoted in Swenson Trucking & Excavating, Inc. v. Truckweld Equip. Co., Sup. Ct. Op. No. 2008 (File No. 4268), 604 P.2d 1113 (1980).

Scope and exemptions of state deceptive trade practice and consumer protection acts, 89 ALR3d 399.

Practices forbidden by state deceptive trade practice and consumer protection acts, 89 ALR3d 449.

35 C.J.S. False Pretenses § 14; 37 C.J.S. Fraud § 154; 37 C.J.S. Fraudulent Conveyances § 469.

Sec. 45.50.472. Junk telephone calls. (a) Making a junk telephone call without the prior written consent of the person called is unlawful.

(b) In this section "junk telephone call" means a telephone call made for the purpose of advertising through the use of a recorded advertisement.

(c) The provisions of AS 45.50.481 — 45.50.561 apply to this section. (§ 1 ch 17 SLA 1978)

Sec. 45.50.481. Exemptions. Nothing in AS 45.50.471 — 45.50.561 applies to

(1) an act or transaction regulated under laws administered by the state, by any regulatory board or commission, or officer acting under statutory authority of the state or of the United States, unless the law regulating the act or transaction does not prohibit the practices declared unlawful in AS 45.50.471;

(2) an act done by the publisher, owner, agent, or employee of a newspaper, periodical or radio or television station in the publication or dissemination of an advertisement, when the owner, agent or employee did not have knowledge of the false, misleading or deceptive character of the advertisement or did not have a direct financial interest in the sale or distribution of the advertised product or service;

(3) an act or transaction regulated under AS 21.36 or AS 06.05 or any regulations promulgated under authority of those chapters. (§ 2 ch 246 SLA 1970: am §§ 2, 3 ch 53 SLA 1974)

Mere regulation under a separate and distinct statutory scheme satisfies only one prong of paragraph (1) of this section; unfair acts and practices are exempt from the purview of the act only where the business is both regulated elsewhere and the unfair acts and practices are therein prohibited. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

This article embraces independent debt collection practices. — See note under this catchline following the article analysis.

ALR references. — Scope and exemptions of state deceptive trade practice and consumer protection acts, 89 ALR3d 399.

Sec. 45.50.491. Regulations. The attorney general, in accordance with the Administrative Procedure Act (AS 44.62), may adopt regulations interpreting and forms necessary for administering the provisions of AS 45.50.471 — 45.50.561. (§ 2 ch 246 SLA 1970; am § 4 ch 53 SLA 1974)

Sec. 45.50.495. Investigative power of attorney general. (a) If the attorney general has cause to believe that a person has engaged in, is engaging in or is about to engage in, a deceptive trade practice under AS 45.50.471, he may

(1) request the person to file a statement or report in writing, under oath, on forms prescribed by him, setting out all facts and circumstances concerning the sale or advertisement of property by the person, and other information considered necessary;

(2) examine under oath any person in connection with the sale or advertisement of property;

(3) examine property or sample of the property, record, book, document, account or paper that he considers necessary;

(4) make true copies of records, books, documents, accounts, or papers examined under (3) of this subsection which may be offered in evidence in place of the originals in actions brought under AS 45.50.471 — 45.50.561; and

(5) under an order of the superior court, impound samples of property which are material to his investigation and retain the sample until proceedings undertaken under AS 45.50.471 — 45.50.561 are completed.

(b) The attorney general, in addition to other powers conferred on him by this section, may issue subpoenas to require the attendance of witnesses or the production of documents or other physical evidence, administer oaths, and conduct hearings to aid an investigation or inquiry. Service of an order or subpoena shall be made in the same manner as a summons in a civil action in the superior court. (§ 5 ch 53 SLA 1974)

Sec. 45.50.501. Restraining prohibited acts. (a) When the attorney general has reason to believe that a person has used, is using, or is about to use an act or practice declared unlawful in AS 45.50.471, and that proceedings would be in the public interest, he may bring an action in the name of the state against the person to restrain by injunction the use of the act or practice. The action may be brought in the superior court in the judicial district in which the person resides or is doing business or has his principal place of business in Alaska, or, with the consent of the parties, in any other judicial district in the state.

(b) The court may make additional orders or judgments that are necessary to restore to any person in interest any money or property, real or personal, which may have been acquired by means of an act or practice declared to be unlawful by AS 45.50.471. (§ 2 ch 246 SLA 1970)

ALR reference. — Validity of express statutory grant of power to state to seek, or to court to grant, restitution of fruits of consumer fraud, 59 ALR3d 1222.

Sec. 45.50.511. Assurances of voluntary compliance. In the administration of AS 45.50.471 — 45.50.561, the attorney general may accept an assurance of voluntary compliance with respect to any act or practice considered to be violative of AS 45.50.471 — 45.50.561 from a person who has engaged or was about to engage in such an act or practice. Such an assurance shall be in writing and shall be filed with and is subject to the approval of the superior court in the judicial district in which the alleged violator resides or is doing business or has his principal place of business in Alaska. Such an assurance of voluntary compliance is not considered an admission of violation for any purpose. Matters closed in this way may at any time be reopened by the attorney general for further proceedings in the public interest, under AS 45.50.501. (§ 2 ch 246 SLA 1970)

Sec. 45.50.521. When information and evidence confidential and nonadmissible. (a) Repealed by § 6 ch 53 SLA 1974.

(b) Subject to the provisions of AS 45.50.501(a), the attorney general may not make public the name of a person alleged to have committed an act or practice declared unlawful in AS 45.50.471 during an investigation conducted by him under AS 45.50.471 — 45.50.561, nor are the records of investigation or intelligence information of the attorney general obtained under AS 45.50.471 — 45.50.561 considered public records available for inspection by the general public. However, the attorney general is not prevented from issuing public statements describing or warning of a course of conduct or a conspiracy which constitutes or will constitute an unlawful act or practice, whether on a local, state, regional, or national basis. (§ 2 ch 246 SLA 1970; am § 6 ch 53 SLA 1974)

Sec. 45.50.531. Private and class actions. (a) A person who purchases or leases goods or services and thereby suffers an ascertainable loss of money or property, real or personal, as a result of another person's act or practice declared unlawful by AS 45.50.471, may bring a civil action in the judicial district in which the seller or lessor resides or has his principal place of business or is doing business, to recover actual damages or $200, whichever is greater. The jury or, if the action is tried without a jury, the judge may, in cases of wilful violation, award up to three times the actual damages sustained, and in all cases the court may provide equitable relief it considers necessary or proper.

(b) A person entitled to bring an action under this section may, after investigation by and approval of the attorney general, if the unlawful act or practice has caused similar injury to numerous other persons similarly situated and if he adequately represents the similarly situated persons, bring an action on behalf of himself and other similarly injured and situated persons to recover actual damages. A person planning to bring an action under this subsection shall first submit to the attorney general a copy of his proposed complaint, and he may not file the complaint in court without the attorney general's approval. In an action brought under this subsection, the court may in its discretion order, in addition to damages, injunctive or other equitable relief.

(c) Upon commencement of an action brought under this section the clerk of the court shall mail a copy of the complaint or other initial pleading to the attorney general and, upon entry of an order or judgment in the action, shall mail a copy of the order or judgment to the attorney general.

(d) In an action brought by a person under this section, the court may award, in addition to the relief provided in this section, reasonable attorney fees and costs.

(e) A permanent injunction or final judgment against a person against whom an action was initiated under AS 45.50.501 is prima facie evidence in an action brought under this section that the person

used or employed an act or practice declared unlawful by AS 45.50.471.

(f) No person may commence an action under this section more than two years after he discovers or reasonably should have discovered that his loss resulted from an act or practice declared unlawful by AS 45.50.471.

(g) If the court finds for the defendant in an action brought under this section, it may award the defendant an amount equal to the actual costs and attorney fees he incurred in his defense.

(h) Manufacturers or suppliers of merchandise, the fault of which is the basis for the action under this chapter, are liable for the damages assessed to or suffered by retailers charged under this chapter. (§ 2 ch 246 SLA 1970; am § 1 ch 225 SLA 1976)

Effect of amendment. — The 1976 amendment deleted the former fourth sentence of subsection (b), which read "Also, in an action brought under this subsection, the plaintiff shall post bond of not less than $5,000 and which is sufficient to cover costs and attorney fees which may be awarded under (g) of this section."

Applied in Swenson Trucking & Excavating, Inc. v. Truckweld Equip. Co., Sup. Ct. Op. No. 2008 (File No. 4288), 604 P.2d 1113 (1980).

ALR references. — Consumer class action based on fraud or misrepresentations, 53 ALR3d 534.

Right to private action under state consumer protection act, 62 ALR3d 169.

Reasonableness of offer of settlement under state deceptive trade practice and consumer protection acts, 90 ALR3d 1350.

Sec. 45.50.541. Nonnegotiability of consumer paper. (a) If a contract for sale or lease of consumer goods or services on credit entered into between a retail seller and a retail buyer requires or involves the execution of a promissory note or instrument or other evidence of indebtedness of the buyer, the note, instrument or evidence of indebtedness shall have printed on its face the words "consumer paper," and the note, instrument or evidence of indebtedness with the words "consumer paper" printed on it is not a negotiable instrument within the meaning of Uniform Commercial Code (AS 45.01 — 45.09).

(b) Notwithstanding the absence of such a notice on a note, instrument or evidence of indebtedness arising out of a consumer credit sale or consumer lease as described in this section, an assignee of the rights of the seller or lessor is subject to all claims and defenses of the buyer or lessee against the seller or lessor arising out of the sale or lease. An agreement to the contrary has no effect in limiting the rights of a consumer.

(c) The assignee's liability under this section may not exceed the amount owing to the assignee at the time the claim or defense is asserted against the assignee. (§ 2 ch 246 SLA 1970)

Cross reference. — As to form of negotiable instruments, see AS 45.03.104.

Sec. 45.50.542. Waiver. A waiver by a consumer of the provisions of AS 45.50.471 — 45.50.561 is contrary to public policy and is unenforceable and void. (§ 7 ch 53 SLA 1974)

Sec. 45.50.545. Interpretation. In interpreting AS 45.50.471 due consideration and great weight should be given the interpretations of sec. 5(a)(1) of the Federal Trade Commission Act (15 U.S.C. § 45(a)(1)) made by the Federal Trade Commission and the federal courts. (§ 8 ch 53 SLA 1974)

The Federal Fair Debt Practices Act, 15 U.S.C. § 1692 (Supp. 1977), expands already existing Federal Trade Commission jurisdiction over unfair or deceptive acts and practices of collection agencies; it is not written on a clean slate. The Federal Trade Commission's prior exercise of jurisdiction in this area is entitled to great weight, and leads to the conclusion that the new act merely supplements the old. State v. O'Neill Investigations, Inc., Sup. Ct. Op. No. 2053 (File Nos. 4109, 4165), 609 P.2d 520 (1980).

Sec. 45.50.551. Penalties. (a) A person who violates the terms of an injunction or restraining order issued under AS 45.50.501 shall forfeit and pay to the state a civil penalty of not more than $25,000 per violation. For the purposes of this section, the superior court in a judicial district issuing an injunction retains jurisdiction, and the cause shall be continued, and in these cases the attorney general acting in the name of the state may petition for recovery of the penalties.

(b) In an action brought under AS 45.50.501, if the court finds that a person is using or has used an act or practice declared unlawful by AS 45.50.471, the attorney general, upon petition to the court, may recover, on behalf of the state, a civil penalty of not more than $5,000 per violation.

(c) Repealed by § 21 ch 166 SLA 1978. (§ 2 ch 246 SLA 1970; am § 9 ch 53 SLA 1974; am § 21 ch 166 SLA 1978)

Effect of amendment. — The 1978 amendment repealed subsection (c), which contained a penalty for conduct declared unlawful by AS 45.50.471.

Sec. 45.50.561. Definitions. In AS 45.50.471 — 45.50.561

(1) "advertising" includes the attempt directly or indirectly by publication, dissemination, solicitation, endorsement or circulation, display in any manner, including solicitation or dissemination by mail, telephone or door-to-door contacts, or in any other way, to induce directly or indirectly a person to enter or not enter into an obligation or acquire title or interest in any merchandise or to increase the consumption of it or to make a loan;

(2) "documentary material" means the original or a copy of a book, record, report, memorandum, paper, communication, tabulation, map, chart, photograph, mechanical transcription, or other tangible document or recording, wherever situate;

(3) "examination" of documentary material includes the inspection, study, or copying of the material, and the taking of testimony under oath or acknowledgment in respect of documentary material or copy of it;

(4) "seconds" means manufactured items having flaws or consisting of a standard quantity or quality less than the manufacturer's quality standard;

(5) "chain distributor scheme" means a sales device whereby a person, upon condition that he make an investment, is granted a license or right to solicit or recruit for profit one or more additional persons who are also granted a license or right upon condition of making an investment and may further perpetuate the chain of persons who are granted a license or right upon the condition of investment; a limitation as to the number of persons who may participate, or the presence of additional conditions affecting eligibility for the license or right to solicit or recruit or the receipt of profit from these does not change the identity of the scheme as a chain distributor scheme; as used in this paragraph, "investment" means acquisition, for a consideration other than personal services, of tangible or intangible property, and includes but is not limited to franchises, business opportunities and services; "investment" does not include sales demonstration equipment and materials furnished at cost for use in making sales and not for resale;

(6) "consumer" means a person who seeks or acquires goods or services by lease or purchase;

(7) "knowingly" means actual awareness of the falsity or deception, but actual awareness may be inferred where objective manifestations indicate that a person acted with actual awareness;

(8) "fresh" means a condition of food which has never been frozen. (§ 2 ch 246 SLA 1970; am § 10 ch 53 SLA 1974; am § 2 ch 138 SLA 1974)

Article 5. Monopolies; Restraint of Trade.

THE SUPREME COURT OF THE STATE OF ALASKA

STATE OF ALASKA, Appellant, v. FIRST NATIONAL BANK OF ANCHORAGE, Appellee.	File No. 5006 O P I N I O N
GEORGE H. BROWN, JR., LAWRENCE BROUSE, JOHN LRYER and COMMONWEALTH MORTGAGE CORPORATION, Appellants, Cross-Appellees, v. STATE OF ALASKA, Appellee, Cross-Appellant.	File No. 5107 Cross-Appeal No. 5085 [No. 2591 - Decmeber 3, 1982]

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, James K. Singleton, Judge.

Appearances: Michele D. Brown, Donna Dell'Olio, Connie J. Sipe, Assistant Attorneys General, Anchorage, Avrum M. Gross and Wilson L. Condon, Attorneys General, Juneau, for Appellant, State of Alaska. John R. Beard, Beard & Lawer, Anchorage, for Appellee, First National Bank. Terry C. Aglietti, John W. Sivertsen, Aglietti, Offret & Pennington, Anchorage, for Appellants, George H. Brown, Jr., Lawrence Brouse, John Dryer, and Commonwealth Mortgage Corporation.

Before: Rabinowitz, Chief Justice, Connor, Burke, Matthews and Compton, Justices.

MATTHEWS, Justice.
RABINOWITZ, Chief Justice, dissenting in part.

These appeals arise from an action brought by the Attorney General against George Brown, Jr. and others[1] involved in the development and sale of certain real property in this state. The basic conduct complained of consists of various misleading statements and omissions concerning the suitability of the land for residential construction. The State sought to enjoin such conduct and to obtain restitution on behalf of individual lot purchasers. After obtaining a preliminary injunction, the State joined as an

---

1. The others are: Neil Hausam, Brown's engineer; John Dryer, Brown's primary Windsong lot salesman; Lawrence Brouse, hired by Brown to manage the Windsong development project; Knik River Estates, a limited partnership of which Brown is the general partner; and Commonwealth Mortgage Corporation, formed by Brown after the State instituted this action and to which Brown subsequently transferred the promissory notes and deeds of trust executed by Windsong lot purchasers. For simplicity, these defendants will frequently be referred to collectively as "Brown."

additional defendant First National Bank of Anchorage, which had financed the real estate development, seeking cancellation of purchasers' promissory notes which the Bank was holding as collateral for its loans to Brown. The lower court dismissed the State's action against First National and, after a non-jury trial, entered judgment against Brown. That judgment permanently enjoined Brown from engaging in certain conduct and adjudged him liable to the State, as trustee for individual purchasers, for $1,911,357.60.[2] Brown has appealed that judgment and the State has filed a cross-appeal. The State has also appealed the trial court's dismissal of its claim against First National.

I. BACKGROUND

A. Facts

The following facts were found by the court. They are not challenged on appeal and we therefore take them as true.

George Brown, Jr. is the general partner of Knik River Estates, a limited partnership. In the summer of 1975, he began developing some property which lies adjacent

---

2. Judgment was entered jointly and severally against Brown and Commonwealth Mortgage Corporation for the full amount. Dryer was held liable for only $50,000 and Brouse for $37,500. Hausam was dismissed as a defendant earlier in the case upon prevailing on a summary judgment motion and is not a party to these appeals. Knik River Estates is not mentioned in the trial court's final judgment.

to the Knik River in the Matanuska-Susitna Borough, known as the Windsong Subdivision. He knew at that time that the land had in the past been subject to flooding. The source of that flooding is Lake George, which periodically forms when the Knik River becomes dammed by a glacier. When the ice dam breaks, water is released flooding certain downstream areas, including on occasion the Windsong Subdivision, covering it with as much as fifteen feet of water.[3]

Brown hired Neil Hausam, a civil engineer and land surveyor, to survey and plat the land. Hausam studied the possibility of flooding and concluded that a reoccurrence was unlikely. Prior to approving the plat, the Matanuska-Susitna Borough requested that the Army Corps of Engineers conduct a flood-hazard evaluation of the Windsong Subdivision. The Corps concluded that virtually all of the subdivision was in a high-hazard area. Although Hausam disagreed with that conclusion and informed the Borough of this, the Borough required that the first page of the Windsong plat contain a flood-warning notation.

In 1976, Brown commenced selling lots. To assist him, he hired a salesman, John Dryer, and a property manager, Lawrence Brouse. Although purchasers were given the second

---

3. The most recent occurrence of such flooding appears to have been in 1966.

page of the Windsong plat, they never received the first page containing the flood warning. In addition, Brown represented to purchasers, among other things, that: (1) Lake George had not formed since the Good Friday earthquake of 1964; (2) it would take another earthquake of equal magnitude for the lake to form again; (3) experts, including the Army Corps of Engineers, had concluded that the possibility of flooding was remote; (4) purchasers of Windsong lots would be able to obtain flood and mortgage insurance; and (5) construction financing was readily available. None of these representations were true.

In December 1977, the Consumer Protection Section of the Attorney General's Office began investigating the sale of Windsong lots. Upon learning of that investigation, Brown sent all purchasers a letter telling them that certain unfounded complaints were being directed at the Windsong development. The purpose of that letter was to make purchasers feel secure about their investments and continue making their property payments. In late January of 1978, a meeting was held at which Brown, Brouse, Hausam and various representatives of the Attorney General's Office were present. At that meeting Brown was told that the State had received several consumer complaints regarding the sale of Windsong lots. He was also shown letters that the State had received from various experts indicating the existence of a

flood hazard at the Windsong Subdivision.

Immediately following this meeting, Brown contacted between sixty and seventy lot purchasers and induced them to sign a preprinted form affidavit entitled "Declaration and Memorandum of Understanding." This was drafted by Brown's attorneys for the purpose of lining up favorable witnesses in case of future litigation. At the time the document was presented to purchasers, Brown reassured them that the possibility of flooding was still remote and that property values had increased. Signing purchasers were not given a meaningful opportunity to study the document, and the language contained therein was not comprehensible to the average purchaser. In effect, the affidavits purported to be a vote of confidence by investors in the Windsong development. Those purchasers whom Brown knew to be dissatisfied with their investments were not offered the memorandum.

B. Proceedings Below

In February 1978, the State filed a complaint in superior court against Brown seeking injunctive relief and civil penalties. The State alleged various violations of the Alaska Unfair Trade Practices and Consumer Protection Act, AS 45.50.471-45.50.561. Brown filed his answer and later moved for summary judgment on the ground that the Consumer Protection Act did not apply to real estate transactions, or in the alternative that he was exempt from the

Act under AS 45.50.581.[4] The trial court granted Brown's summary judgment motion, but gave the State leave to amend its complaint.

In June 1978, the State filed its amended complaint, this time alleging that Brown had violated the Uniform Land Sales Practices Act ("ULSPA"), AS 34.55.004-34.55.046. Shortly thereafter, the State moved for a preliminary injunction to enjoin Brown from disposing of Windsong lots in violation of ULSPA and the administrative regulations promulgated thereunder, 3 AAC 20.010-.130.

---

4. That section provides:

> Nothing in AS 45.50.471-45.50.561 applies to
>
> (1) an act or transaction regulated under laws administered by the state, by any regulatory board or commission or officer acting under statutory authority of the state or of the United States, unless the law regulating the act or transaction does not prohibit the practices declared unlawful in AS 45.50.471; . . .

Brown argued that he was exempt under this section because the transactions at issue were regulated under the Interstate Land Sales Full Disclosure Act, 15 U.S.C. §§ 1701-1720, which, Brown claimed, prohibits the practices alleged by the State in this case to violate AS 45.50.471. Although Brown had obtained an exemption from the registration provisions of the federal act, the trial court agreed that Brown was exempt from the Consumer Protection Act and granted summary judgment to Brown on that basis. Later in the case, however, the trial court concluded that the Consumer Protection Act did not apply to real property transactions. See Part II of this opinion, infra.

After a lengthy hearing, the lower court entered a preliminary injunction against Brown ordering him to disclose fully to prospective purchasers the Windsong Subdivision's flooding potential, and enjoining him from disposing of land in violation of ULSPA and its implementing regulations. Brown was also enjoined from taking any adverse action against lot purchasers who, after being notified by the State of the court's preliminary findings, elected to rescind their land purchase contracts. Such purchasers were directed to make all future payments to the court registry. Approximately seventy purchasers indicated that they wished to rescind their contracts and obtain restitution.

In December 1978, the State amended its complaint again to add First National Bank of Anchorage as a defendant. The Bank's involvement in this case stems from loans it made to Brown to finance the Windsong development. In 1977, First National loaned $200,000 to Knik River Estates to purchase materials for constructing a sewer system in the Windsong Subdivision. In accordance with its collateral and loan agreement, Knik River Estates pledged to the Bank the promissory notes and deeds of trust executed by lot purchasers. When, in the early part of 1978, Brown formed Commonwealth Mortgage Corporation to assume ownership of the Windsong Subdivision, Commonwealth continued to pledge to

the Bank the promissory notes and deeds of trust received from the sale of Windsong lots. In August 1978, First National loaned Commonwealth $500,000 to retire the balance of the earlier loan and to install electric and telephone utilities at Windsong.

The 1977 and 1978 loan agreements were substantially identical. Neither involved actual endorsement of the promissory notes that had been pledged as security and delivered to First National. Instead, the loan agreements authorized the Bank to endorse the notes to itself on behalf of the borrower. In late November of 1978, First National endorsed over to itself all of the promissory notes in its possession. It then sent collection letters to all Windsong lot purchasers who were delinquent in their payments. First National informed these purchasers that unless all delinquent payments were paid within fifteen days, the entire balance would become due immediately. The Bank also told these purchasers that their payments to the court registry, pursuant to the preliminary injunction, would not be credited toward the amounts claimed due.

In its complaint against the Bank the State sought a declaratory judgment that First National was not a "holder in due course" as well as an order enjoining the Bank from

taking action against purchasers who were making their note payments to the court registry. The State later moved for summary judgment against First National, requesting that the court order the Bank to deliver to the court the promissory notes of purchasers who had elected to rescind their land purchase contracts. First National responded by moving for dismissal of the State's complaint against it for failure to state a claim. The lower court ultimately granted First National's motion, concluding that the Attorney General lacked standing to maintain an action against the Bank.

Trial of the case commenced on March 16, 1979. On the first day, the lower court orally granted summary judgment against the State in favor of Hausam, Brown's engineer. The basis for the court's ruling was that AS 34.55.006,[5] the

---

5. AS 34.55.006 provides:

> It is unlawful for a person, in connection with the offer, sale or purchase of subdivided land directly or indirectly, to knowingly
>
> (1) employ a device, scheme, or artifice to defraud;
>
> (2) make an untrue statement of a material fact or omit a statement of a material fact necessary in order to make the statements made, in light of the circumstances under which they are made, not misleading; or
>
> (3) engage in an act, practice, or course of business which operates or would operate as a fraud or deceit upon a person.

general antifraud section of ULSPA, could not be applied retroactively and Hausam had done nothing to affect land sales at Windsong after the effective date of that section, September 21, 1977.[6] Immediately following that ruling, in response to a question by Brown's counsel, the trial court stated:

> Well, I guess, implicit in what the court has already ruled with regard to Mr. Hausam is that any claim based upon anyone who relied -- whose actions were motivated by acts that took place prior to the effective date of the amendment must fail.

Counsel for the State interjected stating that it was the State's position that "lulling conduct" by Brown which occurred after the effective date of the ULSPA amendments could supply the basis for granting restitution to purchasers who bought lots before the amendment's effective date. The court reserved ruling on that question and allowed the case to proceed.

On October 25, 1979, the trial court entered its final judgment in the matter. That judgment permanently enjoined Brown from disposing of Windsong lots without first

---

6. As originally enacted, ULSPA applied only to sales of subdivided land located outside the state. See Ch. 179, SLA 1968. In 1977, the legislature amended ULSPA to bring in-state land sales within its scope. See Ch. 138, SLA 1977. As part of the same bill, the legislature added AS 34.55.006. The effective date of these changes was September 21, 1977. Id.

obtaining a purchaser's signature on a document, drafted by the court, fully disclosing the flood risk at Windsong. It also enjoined Brown from making any statements inconsistent with those contained in that document. In addition, Brown was enjoined from engaging in certain acts and practices prohibited by the administrative regulations implementing ULSPA. With respect to the State's claim for restitution, the trial court entered judgment against Brown in favor of the State, as trustee for those purchasers who had elected to rescind, for $1,611,357.60. The basis for this award, however, was not ULSPA, upon which the State had predicated its case and upon which Brown had defended. Instead, the lower court sua sponte ordered restitution on the basis of common law fraud, and specifically declined to rule on the applicability or ULSPA. In all, the court's judgment listed seventy-one purchasers who were eligible for restitution, eighteen of whom had bought lots after and fifty-three of whom had bought lots before September 21, 1977, the effective date of the ULSPA amendments. Finally, the lower court awarded the State attorney's fees and costs of $42,000 and $1,894.24, respectively.

C. Contentions on Appeal

On appeal, Brown contends that the trial court erred in ordering restitution to Windsong lot purchasers on

the basis of common law fraud. Brown asserts that the State is without authority to pursue the common law rights of defrauded land purchasers. In essence, Brown claims that the trial court was bound to apply ULSPA, under which the lower court's restitution order would not have been proper since, Brown asserts, ULSPA cannot be retroactively applied. Brown also contends that application of ULSPA to in-state subdividers is unconstitutional, and that the administrative regulations promulgated under ULSPA are invalid as applied to him. Finally, Brown claims that the lower court erred in refusing his request for a jury trial.

The State, on the other hand, argues that the trial court did not err in granting relief on the basis of common law fraud. The State also contends that the trial court's judgment would have been proper under ULSPA, and under the Consumer Protection Act as well. The State does, however, claim that the trial court erred in dismissing its claim against First National Bank of Anchorage. The State also contends that the trial court erred when, shortly following the issuance of the preliminary injunction, it denied the State's request for prejudgment attachment of certain property belonging to Brown.

II. APPLICATION OF THE CONSUMER PROTECTION ACT TO SALES OF REAL PROPERTY

We begin by addressing the State's contention that the trial court's judgment can be affirmed under the Unfair Trade Practices and Consumer Protection Act, AS 45.50.471-45.50.561. We address this argument first because, as the State points out, AS 45.50.501 specifically authorizes the Attorney General to bring suit to enjoin violations of the Act, and expressly empowers the court in such cases to award restitutory relief.[7] As noted earlier, the State's original complaint alleged that Brown's Windsong activities violated the Consumer Protection Act. The lower court dismissed that complaint on the basis of the exemption contained in AS

---

7. AS 45.50.501 provides in relevant part:

> (a) When the attorney general has reason to believe that a person has used, is using, or is about to use an act or practice declared unlawful in AS 45.50.471, and that proceedings would be in the public interest, he may bring an action in the name of the state against the person to restrain by injunction the use of the act or practice. . . .
>
> (b) The court may make additional orders or judgments that are necessary to restore to any person in interest any money or property, real or personal, which may have been acquired by means of an act or practice declared to be unlawful by AS 45.50.471.

45.50.481(a).[8] Later, however, in rendering its final decision, the court held that the Act does not apply at all to the sale of real property, a conclusion which the State claims is erroneous. For the reasons discussed below, we agree with the lower court's decision.

AS 45.50.471(a) provides:

> Unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce are declared to be unlawful.

Standing alone, this language could be construed as prohibiting misrepresentations made by sellers of real property. Added by way of amendment to the Act in 1974, see Ch. 53, § 1, SLA 1974, subsection (a) was intended "to make the prohibitory language . . . of the present Act more responsive to the needs of the Alaskan consuming public and the business community."[9] And, because the Act is remedial, we are mindful that its provisions are to be liberally construed. State v. O'Neill Investigations, Inc., 609 P.2d 520, 528 (Alaska 1980).

Nevertheless, we are persuaded that the entire thrust of the Consumer Protection Act is directed at regulating practices relating to transactions involving

---

8. See note 4 supra.

9. Governor's Transmittal Letter, 1974 House Journal 122.

consumer goods and services. Immediately following AS 45.50.471(a) is a list of twenty-five specific acts or practices which are expressly prohibited as "unfair methods of competition" and "deceptive acts or practices." AS 45.50.471(b). Of these, thirteen concern practices relating to transactions involving "goods" or "goods and services" generally.[10] The remaining twelve deal with practices involving the sale of particular types of goods[11] or services,[12] or relate to certain types of activities commonly associated with consumer goods and services transactions.[13]

---

10. See AS 45.50.471(b)(1),(2),(3),(4),(5),(6),(7),(8),(9),(11),(13) and (19).

11. AS 45.50.471(b)(10)(resetting vehicle odometers); (21)(selling frozen meat as "fresh"); (25)(failure to comply with AS 45.50.800-45.50.850, the Alaska Gasoline Products Leasing Act).

12. AS 45.50.471(b)(17)(excess charges for warranty repairs); (23)(failure to comply with AS 45.45.130-45.45.240, regulating motor vehicle repairs); (24)(prohibiting certain practices in connection with counseling, consulting or arranging for future services relating to the disposition of a body upon death).

13. AS 45.50.471(b)(10)(misrepresentations regarding price reductions); (14)(misrepresenting legal rights or obligations in an agreement); (15)(misrepresenting the need for parts, replacement or repair service); (16)(misrepresenting the authority of an agent or representative to negotiate the terms of a consumer transaction); (20)(selling or offering to sell a right of participation in a chain distributor scheme); (22)(failure to comply with AS 45.02.350, regulating the sale of goods or services by door-to-door solicitation).

While subsection (b) makes clear that this list is not exclusive, none of the enumerated prohibited acts mentions real property. Nor do any other provisions of the Act suggest that the legislature intended the sale of real property to come within the Act's purview.[14]

It is our judgment that the trial court properly invoked the rule of ejusdem generis to construe the language of AS 45.50.471(a). "[W]hen particular words are followed by general terms, the latter will be regarded as referring to things of a like class with those particularly described." Chugach Electric Ass'n v. Calais Co., 410 P.2d 508, 509-10 (Alaska 1966). The doctrine is equally applicable when, as here, specific words comprehending a class of activity follow a more general description. 2A C. Sands, Sutherland Statutory Construction § 47.17, at 103 (4th ed. 1973). In our view, real property falls outside of the class "particularly described," i.e., "goods and services." The list

---

14. In this respect, Alaska's Act differs from the Acts of several states, cases from which have held that real property transactions are within the Act's scope. See, e.g. Nash v. Hoopes, 332 A.2d 411, 413 (Del. Super. 1975) (Act prohibiting deceptive merchandising practices where "merchandise" statutorily defined to include real property); Commonwealth v. DeCotis, 316 N.E.2d 748, 752 (Mass. 1974) ("trade or commerce" statutorily defined to include the sale of real property); Commonwealth v. Monumental Properties, Inc., 329 A.2d 812, 820 (Pa. 1974)("trade or commerce" statutorily defined to include the sale of real property); Woods v. Littleton, 554 S.W.2d 662, 667 n.9 (Tex. 1977) ("consumers" statutorily defined to include purchasers of real property).

of proscribed activities found in AS 45.50.471(b) suggests that the Act is directed solely at regulating transactions involving "products and services sold to consumers in the popular sense." Neveroski v. Blair, 358 A.2d 473, 480 (N.J. 1976). In Neveroski, the court was called upon to construe the word "merchandise," which was defined in the New Jersey Consumer Fraud Act to include "anything offered, directly or indirectly, to the public for sale." Id. at 479. Because that language was preceded by the words "objects, wares, goods, commodities, [and] services," the court invoked the doctrine of ejusdem generis to hold that misrepresentation by a real estate broker in connection with the sale of real property was not actionable under the New Jersey Act. Id. at 479-81. The broad language of AS 45.50.471(a), like that involved in Neveroski, "can logically be attributed to a legislative desire to incorporate other consumer transactions" which may not be regulated by the specific prohibitions found in subsection (b). Neveroski, 358 A.2d at 480.

This construction of subsection (a) also finds support in other provisions of the Act. AS 45.50.561(6) defines a "consumer" as "a person who seeks or acquires goods or services by lease or purchase." (Emphasis added). Moreover, AS 45.50.531(a) grants a private right of action only to "[a] person who purchases or leases goods or services

and thereby suffers an ascertainable loss . . . as a result of another person's act or practice declared unlawful by AS 45.50.471." (Emphasis added). That the section authorizing the Attorney General to sue to enjoin violations of AS 45.50.471 contains no comparable limitation, see AS 45.50.501, does not, in our opinion, indicate that the scope of the Act enlarges when suit is instituted by the State.

In sum, we hold that the sale of real property is not within the regulatory scope of the Consumer Protection Act. Accordingly, Brown's liability for restitution to Windsong lot purchasers could not properly be predicated on asserted violations of that Act.

III. THE UNIFORM LAND SALES PRACTICES ACT

After the trial court dismissed the Consumer Protection Act claim against Brown, the State amended its complaint to allege violations of the Uniform Land Sales Practices Act (ULSPA), AS 34.55.004-34.55.046. Throughout the remainder of the proceedings, the State consistently asserted and Brown consistently denied liability under this Act. At the conclusion of the case, the lower court declined to rule on the applicability of ULSPA, relying instead on the common law. The State contends that the judgment would have been proper under ULSPA. Brown, on the other hand, maintains that ULSPA cannot constitutionally apply to him since the 1977 amendments, which made the Act

applicable to in-state land sales, were enacted in violation of article II, section 13 of the Alaska Constitution. Brown also claims that a court is without authority to award restitution in a suit brought under ULSPA by the Attorney General. Finally, Brown argues that even if the court could award restitution, it could not do so as to those purchasers who bought their lots prior to the effective date of the ULSPA amendments.

A. The Constitutional Validity of the ULSPA Amendments.

Article II, section 13 of the Alaska Constitution[15] requires that every bill be confined to one subject which must be expressed in its title. The 1977 amendments to ULSPA find their genesis in House Bill 67, entitled "An Act Relating to the Uniform Land Sales Practices Act." 1977 House Journal 63. The bill was introduced at the Governor's request and all of its provisions related directly to ULSPA.

---

15. Alaska Constitution, art. II, § 13 provides:

> Every bill shall be confined to one subject unless it is an appropriation bill or one codifying, revising, or rearranging existing laws. Bills for appropriations shall be confined to appropriations. The subject of each bill shall be expressed in the title. The enacting clause shall be: "Be it enacted by the Legislature of the State of Alaska."

See Governor's Transmittal Letter, id. at 63-66. The primary impact of House Bill 67 was to amend ULSPA to bring in-state sales of subdivided land within the Act's scope and to add a general antifraud section. With only minor changes, the bill received the House's approval and was sent to the Senate for its consideration. At the instance of the Senate Rules Committee, a Senate Committee Substitute was approved. 1977 Senate Journal 1517. This version of the bill was entitled "An Act Relating to Land; And Providing for an Effective Date." Id. at 1489. The sections relating to ULSPA were essentially the same as those approved by the House, but the Senate Committee Substitute also contained various amendments to the Alaska Land Act, AS 38.05.005-38.15.370. These amendments pertain to the leasing of state-owned lands and to the Division of Lands' zoning power. It was this version of the bill that ultimately became law. Ch. 138, SLA 1977.

That every section of Chapter 138, SLA 1977 in some respect concerns land is not disputed. However, it is just as clear that many of its provisions have nothing else in common. Thus, the issue to be resolved is whether the general heading "land" can be considered "one subject" for purposes of article II, section 13. Were we writing on a clean slate, we would be inclined to find this subject impermissibly broad. Permitting such breadth under the one-

subject rule could conceivably be misconstrued as a sanction for legislation embracing "the whole body of the law." Trumble v. Trumble, 55 N.W. 869, 870 (Neb. 1893). Nevertheless, while the issue is indeed close, we are unable to say that the legislature has transgressed the limits of article II, section 13 established by prior decisions of this court.

To determine if a bill is confined to one subject,

> [a]ll that is necessary is that the act should embrace some one general subject; and by this is meant, merely, that all matters treated of should fall under some one general idea, be so connected with or related to each other, either logically or in popular understanding, as to be part of, or germane to, one general subject.[16]

Thus, "what constitutes one subject for purposes of art. II, § 13 is broadly construed."[17] And "[n]o act will be set aside for failing to comply with this provision except where the violation is both substantial and plain."[18]

---

16. Gellert v. State, 552 P.2d 1120, 1123 (Alaska 1974), quoting Johnson v. Harrison, 50 N.W. 923, 924 (Minn. 1891). See Short v State, 600 P.2d 20, 24 (Alaska 1979); North Slope Borough v. Sohio Petroleum Corp., 585 P.2d 534, 545 (Alaska 1978).

17. Short v. State, 600 P.2d 20, 23 (Alaska 1979). See North Slope Borough v. Sohio Petroleum Corp., 585 P.2d 534, 545 (Alaska 1978); Gellert v. State, 522 P 2d 1120, 1122 (Alaska 1974).

18. North Slope Borough v Sohio Petroleum Corp., 585 P.2d 534, 545 (Alaska 1978). See Short v. State, 600 P.2d 20, 23 (Alaska 1979); Suber v. State Bond Comm., 414 P.2d 546, 557 (Alaska 1966).

In Gellert v. State, 522 P.2d 1120 (Alaska 1974), we upheld a bill that provided for the issuance of bonds to finance flood control and small boat harbor projects. These two topics were found to be confined to one subject because they both pertained "to one ongoing plan for the development of water resources." Id. at 523. More recently, in North Slope Borough v. Sohio Petroleum Corp., 585 P.2d 534, 545 (Alaska 1978), we upheld "An Act Relating to Taxation; And Providing for an Effective Date." Because its various provisions, although diverse, all related to "state taxation," we found no violation of the one-subject rule. Id. at 544-46. In light of these decisions, we must likewise conclude that "land" is not an unduly broad subject for purposes of article II, section 13. Consequently, Chapter 138, SLA 1977, the provisions of which all relate to this subject, is constitutionally valid.[19]

---

19. Brown also contends that Chapter 138 is defective under art. III, § 13 because the title, "An Act Relating to Land; And Providing for an Effective Date," does not adequately express its subject matter. Since we have concluded that "land" constitutes one subject, we believe that the requirement that the title express that subject is also satisfied. The purpose of the requirement is to prevent surreptitious introduction of legislation not indicated by the title. See Griffin v. Sheldon, 11 Alaska 607, 615 (1948). Chapter 138 contains no hidden provisions unrelated to its title, and "[a]nyone interested in any of the particulars of the bill would be advised by this title to look to the body of the law. . . ." Wass v. Anderson, 252 N.W.2d 131, 137 (Minn. 1977).

B. Restitution Under ULSPA in a Public Action.

Unlike the Consumer Protection Act, ULSPA does not expressly authorize the court to award restitutory relief in a suit instituted by the State. Although restitution is expressly available in a private action under ULSPA, AS 34.44.040(b), with respect to public enforcement, the Act merely provides that the State "may bring an action in the superior court . . . to enforce compliance with this chapter or a regulation or order under this chapter." AS 34.55.022(c). According to Brown, the absence of a provision authorizing restitution in a public action impliedly circumscribes the court's power to award such relief unless the State proceeds under Civil Rule 23, and the case is properly certified as a class action. While we agree that in a case of this nature the State must proceed in a representative capacity, we conclude that certification as a class action is not a prerequisite to an award of restitutory relief.

In People v. Superior Court, 507 P.2d 1400 (Cal. 1973), the California Supreme Court was confronted with substantially the same issue involved here. In that case, the California Attorney General brought suit under a statute that authorized the Attorney General to sue to enjoin misleading advertising, "but was silent as to the power of the trial court to order restitution in such a proceeding." Id. at 1402. Noting that the statute involved "did not

restrict the court's general equity jurisdiction 'in so many words, or by a necessary and inescapable inference,'" id., quoting Porter v. Warner Holding Co., 328 U.S. 395, 398, 90 L.Ed. 1332, 1337 (1946), the court held that "a trial court has the inherent power to order, as a form of ancillary relief, that the defendants make or offer to make restitution to the consumers found to have been defrauded." 507 P.2d at 1402. In support of its holding the court relied on a number of analogous federal cases that had reached the same conclusion. See Mitchell v. DeMario Jewelry, Inc., 361 U.S. 288, 291-92, 4 L.Ed. 2d 323, 326 (1960); Porter v. Warner Holding Co., 328 U.S. 395, 398-99, 90 L.Ed. 1332, 1336-38 (1946); Securities and Exchange Comm'n v. Texas Gulf Sulphur Co. 446 F.2d 1301, 1307-08 (2d Cir. 1971); McComb v. Frank Scerbo & Sons, 177 F.2d 137, 138-39 (2d Cir. 1949). See also Interstate Commerce Comm'n v. B & T Transportation Co., 513 F.2d 1182, 1184-85 (1st Cir. 1980). But see United States v. Parkinson, 240 F.2d 918 (9th Cir. 1956).

We find the California Supreme Court's reasoning persuasive and therefore hold that the trial court has the inherent power to order restitution in an action brought by the State under ULSPA. Nothing in that Act or in its legislative history suggests that the legislature intended to restrict the court's traditional equity powers when properly

invoked. That the legislature saw fit to provide a private right of action for restitution under ULSPA does not, in our judgment, operate to curtail the court's power to award such relief at the instance of the State. See Pierce v. Superior Court, 37 P. 460, 461 (Cal. 1934).

There remains, however, the question of how the State must proceed in a case of this nature; an issue that has received scant attention from the courts. As we perceive it, the principal difference between this case and one brought as a private class action is that the State is not a member of the class of persons whom it seeks to represent.[20] While the State here denies that it is representing anyone other than itself, asserting that its action is predominantly founded in law enforcement, it is clear that as to the restitution claim the State is attempting to enforce the rights of a class of private individuals. Thus, we believe that the State must be regarded as acting in a representative capacity. This conclusion finds support in the case of Kugler v. Romain, 279 A.2d 640 (N.J. 1971), in which the court sustained the Attorney General's authority to maintain an action for restitution on behalf of defrauded consumers

---

20. By its own terms Rule 23 requires that a representative be a member of the class on behalf of which suit is brought. It states that "[o]ne or more members of a class may sue or be sued as representative parties on behalf of all. . . ." Alaska R. Civ. P. 23(a). Thus, the State could not have brought this suit as a Rule 23 class action.

as a suit "in the nature of a class action." Id. at 649. Although the court did not discuss at length the procedural aspects of such a suit, it did note in passing that "guidance may be found in [New Jersey statutes] which relate generally to class actions." Id.

We likewise conclude that guidance as to the procedural aspects of a case such as this may be found in our own rule governing the maintenance of representative actions, Civil Rule 23. Of particular importance is that part of the Rule relating to notice to members of the class being represented. Subsection (c)(2) of the Rule in relevant part provides:

> [T]he court shall direct to the members of the class the best notice practicable under the circumstances, including notice to all members who can be identified through reasonable effort. The notice shall advise each member that (A) the court will exclude him from the class if he so requests by a specified date; (B) the judgment, whether favorable or not, will include all members who do not request exclusion; and (C) any member who does not request exclusion may, if he desires, enter an appearance through his counsel.

Alaska R. Civ. P. 23(c)(2). Following this procedure will assure that those individuals who elect to be represented by the State will be bound by the judgment, "like any other persons whose claims are prosecuted by an authorized representative." McComb v. Frank Scerbo & Sons, 177 F.2d 137, 140 (2d

Cir. 1949)(Hand, C.J., concurring). And ensuring that the judgment has this res judicata effect will promote judicial economy by lending finality to litigation and protect the defendant from the unfair risk of being subjected to multiple lawsuits arising from the same claim. See Note, New York City's Alternative to The Consumer Class Action: The Government As Robin Hood, 9 Harv. J. Legis. 301, 345-47 (1972); California Corporations Code Section 25530(b): Government Agency Suit Versus The Private Class Action, 27 Hastings L.J. 265, 279-80 (1975).

In the instant case, the trial court instructed the State to notify all Windsong lot purchasers of the State's action against Brown. The purpose of such notice was to determine which purchasers wished to participate in any order of restitution ultimately decreed by the court. This notice, however, did not comport with the requirement discussed above that the notice state that those electing to participate will be bound by the final judgment, whether favorable or not. Consequently, whether the lower court's judgment in this case would be binding on each Windsong lot purchaser remains open to question. However we do not believe that this defect requires that the case be remanded for further proceedings. Before an individual lot purchaser receives money under a judgment ordering restitution, he

should first consent in writing to be bound by that judgment. That will, under the circumstances of this case, in large part accomplish the goals of the notice requirement of Rule 23(c)(2).

C. Brown's Liability Under ULSPA

We must now determine whether the lower court's restitution order can be upheld under ULSPA.

AS 34.55.006 provides:

> It is unlawful for a person, in connection with the offer, sale or purchase of subdivided land directly or indirectly, to knowingly
>
> (1) employ a device, scheme or artifice to defraud;
>
> (2) make an untrue statement of a material fact or omit a statement of material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; or
>
> (3) engage in an act, practice, or course of business which operates or would operate as a fraud or deceit upon a person.

A person who disposes of subdivided land[21] in violation of

---

21. "Subdivided land" is defined in AS 34.55.044(6) as including "land which is divided or is proposed to be divided for the purpose of disposition into two or more lots, parcels, units or interests. . . ." That Brown was selling subdivided land at the time the State instituted this action is not disputed. Since Brown received an exemption from the registration provisions of the federal Interstate Land Sales Full Disclosure Act, see note 4 supra, he is also exempt from the registration provisions of ULSPA. AS 34.55.042(a)(8). This does not, however, immunize Brown from liability under AS 34.55.006. See id.; Governor's Transmittal Letter, 1977 House Journal 65.

this section is civilly liable to a purchaser

> . . . unless in the case of an untruth or omission it is proved that the purchaser knew of the untruth or omission or that the person offering or disposing of subdivided land did not know and in the exercise of reasonable care could not have known of the untruth or omission.

AS 34.55.030(a). See Stepanov v. Gavrilovich, 594 P.2d 30, 33 (Alaska 1979).

With respect to the eighteen individuals who purchased Windsong lots on or after September 21, 1977, the date when ULSPA became applicable to sales of in-state land, Brown does not seriously dispute his liability. The trial court found that Brown knew, prior to developing Windsong, of the facts relating to the flood hazard. Brown does not contest those findings, nor does he contest the trial court's findings that the facts he misrepresented or omitted to mention were material. Since Brown had ample opportunity but failed to show facts which could constitute a defense under AS 34.55.030(a), ordering restitution under ULSPA was proper as to those individuals who purchased their lots on or after September 21, 1977.

The vast majority of purchasers on whose behalf restitution was ordered bought their lots prior to this date, however. Liability as to those purchasers under ULSPA, Brown argues, would require impermissible retro-

spective application of the Act to in-state subdividers. The State contends that because ULSPA is "remedial," it can be given retroactive effect. The State further claims that liability as to the pre-September 21, 1977 purchasers can be predicated on conduct by Brown that occurred after that date, thereby avoiding retrospective application of ULSPA.

AS 10.01.090 provides that "[n]o statute is retrospective unless expressly declared therein." Chapter 138, Sections 1-8, SLA 1977, which added AS 34.55.006 and amended ULSPA to apply to in-state subdividers, contains no such express declaration. Nor does its legislative history indicate that retrospective application was intended.[22]

---

22. AS 01.10.020 provides:

> The provisions of §§ 40-90 of this chapter shall be observed in the construction of the laws of the state unless the construction would be inconsistent with the manifest intent of the legislature.

In City and Borough of Juneau v. Commercial Union Ins. Co., 598 P.2d 957 (Alaska 1979), we adverted to this provision as modifying to some extent the "iron-clad language" of AS 01.10.090. Id. at 958 n.3. Thus, in Zurfluh v. State, 620 P.2d 690 (Alaska 1980), we held that AS 12.55.086, which relates to sentencing in criminal cases, could be retroactively applied for a 153-day period since "[t]he apparent intent of the legislature as [sic] that the benefits of this type of sentencing should be available to trial judges as soon as possible. . . ." Id. at 693.

Recently, we observed:

> We have heretofore closely adhered to the clear mandate expressed in the statutory language. Statutes are not to be applied retroactively unless the language used by the legislature indicates the contrary. City and Borough of Juneau v. Commercial Union Ins. Co., 598 P.2d 957, 958-59 (Alaska 1979); Davenport v. McGinnis, 522 P.2d 1140, 1142 (Alaska 1974); Stephens v. Rogers Constr. Co., 411 P.2d 205, 208 (Alaska 1966).

Matanuska Maid, Inc. v. State, 620 P.2d 182, 187 n.8 (Alaska 1980). In that case we did hold that "mere procedural changes which do not affect substantive rights are not immune from retrospective application." Id. at 187. But the broad prohibitory language of AS 34.55.006 can hardly be characterized as bringing about mere procedural changes. Thus, we hold that ULSPA cannot be retrospectively applied to hold Brown liable for conduct predating its application to in-state land sales.[23] We note that this conclusion is in accord with the construction given to the Interstate Land Sales Full Disclosure Act, ULSPA's federal counterpart. See Davis v. Rio Rancho Estates, Inc., 401 F. Supp. 1045, 1048 (S.D.N.Y. 1975).

---

23. The State's argument that ULSPA is "remedial" and thus deserving of retroactive application on that basis alone is, in our opinion, without merit. Even when a statute is remedial in nature, it will be construed retroactively only if the legislative intent clearly indicates that retroactive operation is intended. See 2 C. Sands, Sutherland Statutory Construction § 41.04, at 253 (4th ed. 1973).

The State alternatively argues that liability for restitution to pre-September 21, 1977 purchasers can be premised on Brown's later "lulling" activities, which, the State urges, constitute "fresh" ULSPA violations. Reference is made to the trial court's findings that Brown's letter to all Windsong lot purchasers, sent in January 1978, contained numerous misrepresentations designed to induce purchasers to continue making their property payments. According to the State, these misrepresentations were made "in connection with the offer, sale or purchase of subdivided land," thereby triggering liability under AS 34.55.006.

The State's argument in large part centers on the Act's definition of "offer."[24] AS 34.55.044(2) defines that

---

24. The State also points to the word "disposition," which AS 34.55.044(1) defines as including the "sale, lease, assignment, award by lottery, or any other transaction concerning a subdivision, if undertaken for gain or profit." (Emphasis added). Noting that AS 34.55.030(a), the civil remedies section, creates liability when a person "disposes" of land in violation of AS 34.55.006, the State argues that Brown's "lulling" activities constituted "other transactions concerning a subdivision," and hence created liability under the Act. In our view, the language relied upon, preceded as it is by specific examples of "transactions," i.e., "sale, lease," etc., should be construed under the doctrine of ejusdem generis as limited to transactions involving the transfer of an interest in land. See Chugach Electric Ass'n v. Calais Co., 410 P.2d 508, 509-10 (Alaska 1966). Because Brown's "lulling" activities were not, under our construction, "transactions concerning land" within the meaning of AS 34.55.044(1), the State's reliance on that section is misplaced.

term as including "every inducement, solicitation or attempt to encourage a person to acquire an interest in land, if undertaken for gain or profit." The State reasons that Brown's "lulling" activities were "inducements" or "attempts" to get purchasers to "acquire" further interests in land.

We think it would be straining the language of the Act to hold that post-sale conduct designed to induce the continuation of payments constitutes an "offer" as that term is defined above. The continuation of payments under the land sales contracts involved here did not result in the acquisition by purchasers of further interests in land. Legal title to the property vested in the purchasers at the time the contracts were signed.[25]

---

25. Under the deed of trust and promissory note arrangement used by Brown in selling Windsong lots, title to the property passed to the purchaser immediately upon signing the purchase agreement. This is not to say, however, that our conclusion would differ if the sales had been made pursuant to a conditional land sales contract in which legal title technically does not pass until the final installment is paid. For under this arrangement equitable title vests immediately in the purchaser upon execution of the contract, and the seller retains legal title only as a security interest for the unpaid portion of the purchase price. Davis v. Rio Rancho Estates, Inc., 401 F. Supp. 1045, 1048 (S.D.N.Y. 1975). In our judgment, the payment of installments by the equitable owner would not constitute further acquisitions of land under AS 34.55.044(2).

The State's reliance on Husted v. Amrep. Corp., 429 F. Supp. 298 (S.D.N.Y. 1977) is misplaced. That case involved the question whether a violation of the antifraud provisions of the federal Interstate Land Sales Full Disclosure Act could occur after the sale of land so that the plaintiff's claim would not be barred by the applicable statute of limitations. The court held that such a violation could occur, but emphasized that unlike S.E.C. Rule 10b-5, upon which the section at issue was in part modelled, the Act did not require that the violation occur "in connection with" the sale. Id. at 307. See also Fogel v. Sellamerica, Ltd., 445 F. Supp. 1269, 1274-75 (S.D.N.Y. 1978). AS 34.55.006, like the S.E.C. Rule, requires that the conduct complained of occur "in connection with" the sale.

This is not to say that fraudulent post-sale conduct could never constitute a violation of AS 34.55.006. If such conduct in fact occurred "in connection with" the offer, sale or purchase of subdivided land, then it would be actionable. Our review of federal decisions construing the scope of the "in connection with" requirement of S.E.C. Rule 10b-5 suggests that activity post-dating the time that the initial contract to purchase is signed is not necessarily immune from liability. For example, in Goodman v. Epstein, 582 F.2d 388 (7th Cir. 1978), cert. denied, 440 U.S. 939, 59

L.Ed. 2d 499 (1979), the court noted that "the crucial fact . . . is whether an investment decision remains to be made by the party from whom disclosure is withheld, and not upon when the agreement to purchase or sell was executed." Id. at 413; see also Issen v. GSC Enterprises, Inc., 508 F. Supp. 1278, 1286-87 (N.D. Ill. 1981). Goodman involved a limited partnership agreement in which the plaintiff limited partners were in an "on-going relationship" with the defendant general partners. 582 F.2d at 412. From time to time, the limited partners were called upon to make additional capital contributions based upon the partnership's performance. Although the conduct complained of occurred after the partnership agreement was signed, the court held that later nondisclosure of material facts by the general partners to induce continued payment of capital contributions by the limited partners was actionable under Rule 10b-5. However, the court was careful to distinguish the situation where

> . . . the investment decision was completed at the time the parties entered into the agreement, the contract being, in effect, a "one-shot deal." No continuing relationship was contemplated. All that was left undone was the ministerial exchange of money for the stock.

Id. at 412. In such an instance, the fraudulent conduct must occur at or before "the time when the parties to the transaction are committed to one another." Id., quoting

Radiation Dynamics, Inc. v. Goldmuntz, 464 F.2d 876, 891 (2d Cir. 1972). See also Clinton Hudson & Sons, v. Lehigh Valley Cooperative Farms, Inc., 73 F.R.D. 420, 425 (E.D. Pa.), aff'd mem., 586 F.2d 834 (3d Cir. 1977).

Applying these principles to the instant case, we conclude that Brown's post-sale "lulling" conduct directed at pre-September 21, 1977 purchasers was not "in connection with" the sales to such purchasers. Brown's relationship with these purchasers was "in effect, a 'one-shot deal,'" Goodman, 582 F.2d at 412, rather than one involving a "series of 'investment decisions.'" Id. at 413. The parties were committed at the time the contracts were executed and the continued payments required thereunder involved nothing more than a means of effectuating "the ministerial exchange of the money" for the land. Id. at 412. Accordingly, Brown's liability, if any, to pre-September 21, 1977 Windsong lot purchasers cannot be predicated on violations of ULSPA.

IV. COMMON LAW FRAUD

We must now decide whether restitution as to the fifty-three purchasers who bought lots before the effective date of the ULSPA amendments can be upheld on the basis of common law fraud. This was in fact the basis for the trial court's restitution order. Brown contends that the State was without authority to enforce the common law rights of

these purchasers. In addition, he argues that the trial court erred in applying the common law since the parties had tried the case under ULSPA.

A. The Attorney General's Common Law Powers

The duties of the Attorney General are statutorily set forth in AS 44.23.020(b). Among other things, that statute states that the Attorney General shall "perform all other duties required by law or which usually pertain to the office of attorney general in a state." AS 44.23.020(b)(7). In Public Defender Agency v. Superior Court, Third Judicial District, 534 P.2d 947, 950 (Alaska 1975), we stated that this language "indicates that the office of the Attorney General is to function with those powers and duties normally ascribed to it at common law." We further noted:

> Under the common law, an attorney general is empowered to bring any action which he thinks necessary to protect the public interest, and he possesses the corollary power to make any disposition of the state's litigation which he thinks best. This discretionary control over the legal business of the state, both civil and criminal, includes the initiation, prosecution and disposition of cases.
>
> When an act is committed to executive discretion, the exercise of that discretion within constitutional bounds is not subject to the control

> or review of the courts. To interfere with that discretion would be a violation of the doctrine of separation of powers.

Id. (Citations omitted).

We believe that the above language forecloses any argument that the State is without authority to bring suit in the absence of express statutory authority. This view finds ample support in the decisions of other jurisdictions where the attorney general's common law powers are recognized. See, e.g., State v. Bristol-Myers Co., 470 F.2d 1276, 1278 (D.C. Cir. 1972) (construing Illinois Law); D'Amico v. Board of Medical Examiners, 520 P.2d 10, 20 (Cal. 1974); State ex rel. Shevin v. Yarborough, 257 So.2d 891, 894-96 (Fla. 1972)(Ervin, J., concurring); Lowell Gas Co. v. Attorney General, 385 N.E. 2d 240, 247-48 (Mass. 1979); Michigan State Chiropractic Ass'n v. Kelly, 262 N.W.2d 676, 677 (Mich. 1977); Gandy v. Reserve Life Insurance Co., 279 So.2d 648, 649 (Miss. 1973); Hyland v. Kirkman, 385 A.2d 284, 289-90 (N.J. Super. 1978); State ex rel. Derryberry v. Kerr-McGee Corp., 516 P.2d 813, 818 (Okla. 1973). This authority has been held to confer standing on the attorney general to seek redress for common law fraud. Lowell Gas Co. v. Attorney General, 385 N.E.2d 240, 247-48 (Mass. 1979); Hyland v. Kirkman, 385 A.2d 284, 289-90 (N.J. Super. 1978).

We therefore hold that the State has the authority to bring suit in the public interest on the basis of common law fraud to obtain restitution for defrauded land purchasers. While it is not the court's function to pass upon the Attorney General's determination of what is or is not in the "public interest," see Public Defender Agency v. Superior Court, Third Judicial District, 534 P.2d 947, 950 (Alaska 1975), we do note that the trial court in this case found:

> The State has an interest in preventing unjust enrichment by land developers based on widespread misrepresentations and nondisclosure. . . . Here the defendants advertised the land sales in local newspapers, reaching about half the population of the state. The State also has an interest in protecting the economy of the State against developers who misrepresent the desirability of the land they sell. . . . The State also has a pecuniary interest in this particular case since its resources may be called upon to aid victims of a potential flood in the Windsong Subdivision.

B. Brown's Liability For Common Law Fraud.

The State did not allege that Brown should be held liable on the basis of common law fraud. The focus of the State's case against Brown was on ULSPA. On the first day of the trial, the lower court granted summary judgment in favor of Brown's engineer, Hausam, on the theory that his involvement in the Windsong development ceased prior to the effective date of the ULSPA amendments, which could not be retroactively applied. In response to a question by Brown's

counsel, the trial court indicated that this ruling would apply to Brown as well, or in other words that Brown too could not be held liable for acts pre-dating September 1, 1977. During the trial, Brown presented evidence relating only to the defense of innocent misrepresentation provided in AS 34.55.030(a), the civil remedies section of ULSPA. Nevertheless, the trial court sua sponte relied on common law fraud to hold Brown liable for restitution to all Windsong lot purchasers who had elected to participate in the State's action, regardless of when they purchased their lots.

We agree with Brown that his right to a fair trial was jeopardized by the trial court's adoption of a new theory of the case. The focus of the pleadings, discovery, preliminary hearings, and earlier motions on ULSPA, coupled with the trial court's dismissal of Hausam from the case and assurance that the basis therefor would apply to Brown, could reasonably have led Brown to believe that his liability, if any, would be predicated on ULSPA, and ULSPA alone. Consequently, in preparing his defense, he had no notice that he was going to have to defend against fifty-three separate restitution claims based on the common law. Under these circumstances, we cannot countenance the trial court's re-engineering of the case to hold Brown liable for common

law fraud. Compare Clary Insurance Agency v. Doyle, 620 P.2d 194, 200-01 (Alaska 1980).

We conclude, therefore, that as to Brown's liability to pre-September 21, 1977 purchasers, the case must be remanded for supplemental evidentiary hearings. On remand the parties and the lower court should devote particular attention to the issue of reliance, a necessary element to a common law claim for rescission of a land sales contract. Cousineau v. Walker, 613 P.2d 608, 612 (Alaska 1980). Although the lower court here found that all Windsong lot purchasers had relied on the false information supplied them by Brown, the present record does not support this finding. In all, only twelve of the purchasers listed in the court's restitution order testified either at the hearing on the preliminary injunction or at the trial. Of these twelve, only ten bought their lots prior to September 21, 1977. Because of this evidentiary void, we believe that it would be unfair, on the present record, to hold Brown liable to the pre-September 21, 1977 purchasers on the basis of common law fraud. See Landex, Inc. v. State ex rel. List, 582 P.2d 786, 790-92 (Nev. 1978). While Brown may have had the burden of going forward to produce evidence of non-reliance in order to avoid

liability,[26] his failure to do so below may have been due to the absence of any notice that he might be held liable for common law fraud. Accordingly, on remand Brown must be afforded the reasonable opportunity to present such evidence, if any, as well as evidence tending to establish any

---

26. According to Williston: "Where representations have been made in regard to a material matter and action has been taken, in the absence of evidence showing the contrary, it will be presumed that the representations were relied on." 12 Williston on Contracts § 1515, at 480 (W. Jaeger 3d ed. 1970); see also Restatement (Second) of Contracts § 167 comment b, illustration 3 (1981). In Vasquez v. Superior Court, 484 P.2d 964, 972-73 (Cal. 1971), the California Supreme Court, relying on the above-stated rule, held that issues of reliance would not preclude certification of an action as a class action because if it was shown that alleged misrepresentations were material, an inference of reliance would arise as to the entire class. See also Occidental Land, Inc. v. Superior Court, 556 P.2d 750, 754 (Cal. 1976). But see Newman v. Tualatin Development Co., 597 P.2d 800, 803-04 (Or. 1979); Johnson v. Travelers Ins. Co., 515 P.2d 68, 72 (Nev. 1974).

While we have no quarrel with the rule suggested by Williston and the Restatement, its application

> cannot be utilized to establish reliance as to the entire class without examining the facts and circumstances of each individual transaction which may establish that the misrepresentation was not the inducing factor. The defendant should be given the opportunity to examine each purchaser individually as to causation.

Hoffman v. Charnita, Inc., 58 F.R.D. 86, 91 (M.D. Pa. 1973). In our view, the absence of any notice to Brown that he was defending against common law fraud claims deprived him of a fair opportunity to rebut any inference of reliance that may have arisen.

other defenses he may have to the common law claims.[27]

We do not agree with our dissenting colleague that the State's case against Brown as to the pre-September 21, 1977 purchasers should simply be dismissed. The trial court had inherent discretionary authority to inject the theory of common law fraud into the case. A trial court's authority to require the presentation of new legal theories is implied in Alaska R. Civ. P. 16(e) authorizing amendment of a pre-trial order without limitation as to time "to prevent manifest injustice," and in the penultimate sentence of Alaska R. Civ. P. 15(b) allowing the amendment of pleadings at any time "when the presentation of the merits of the action will be subserved thereby" and no prejudice will result.

The authority to decide a case on an unplead legal theory should be sparingly exercised. In particular it should only be used when the new theory applies to the transaction in issue, is related to the theories presented by the parties, and is necessary for a proper and just disposition of the case. Here, those standards can be reasonably regarded as having been fulfilled.

---

27. What we have earlier said about requiring a purchaser's written consent to be bound by the court's final judgment as a condition to participating in any restitutory relief is likewise applicable to pre-September 21, 1977 purchasers who elect, on remand, to continue being represented by the State.

Where prejudice will result a court either should not employ a new theory or should take steps to eliminate the prejudice by giving notice that the new theory will be used and affording an opportunity to the parties to present evidence and arguments relevant to it. The error committed by the trial court in this case was not in invoking the theory of common law fraud, but in failing to give the parties notice that it would do so along with an opportunity to adjust their cases accordingly.

In MacCormack v. Robins Construction, 521 P.2d 761 (Wash. App. 1974) the plaintiffs brought suit alleging that the defendants had sold them defective homes in violation of the State's Consumer Protection Act. The lower court concluded that plaintiffs were not entitled to relief under the state act but, on its own initiative, transformed the suit into a claim for damages based on common law breach of warranty. The lower court then granted the defendants' motion to reopen the case to present additional evidence. When the case was later appealed, this action by the trial court was upheld as within its discretion.

> In the case at bench, it is apparent from the record that the trial court allowed the defendants sufficient additional time and opportunity to present additional evidence and to cure any surprise defendants may have experienced as a result of the trial court's disposition of the case. . . .

Id. at 763.

Here, remand will do what the trial court should have done once the decision to invoke common law fraud was made. It will give Brown an opportunity to present evidence relevant to the common law fraud theory and thus eliminate the possibility of prejudice which would otherwise result from the court's reliance on that theory. That trial of the common law fraud issue may result in Brown being liable to pre-September 1977 purchasers, whereas under the statute he is not, is not the type of prejudice which precludes a remand. See Wright v. Vickaryous, 598 P.2d 490, 496-97 (Alaska 1979).

V. JURY TRIAL

The State correctly notes that Brown did not demand a jury trial until more than thirty days after he had answered the State's second amended complaint. Under Civil Rule 38, demand for a jury trial must be made not later than 10 days after the service of the last pleading directed at an issue for which the right to a jury trial is claimed. Alaska R. Civ. P. 38(b). The Rule further provides that the untimely filing of such a demand constitutes a waiver of the right Alaska R. Civ. P. 38(d); Hollembaeck v. Alaska Rural Rehabilitation Corp., 447 P.2d 67 68 (Alaska 1968). But, as Brown points out, the State twice amended its complaint after Brown's jury demand, each time adding additional parties and raising new issues. We need not decide, how-

ever, whether Brown's demand was timely, for, even if it was, it is clear that Brown had no right to a jury trial in this case.

Article I, section 16 of the Alaska Constitution provides in relevant part:

> In civil cases where the amount in controversy exceeds two hundred and fifty dollars, the right of a trial by a jury of twelve is preserved to the same extent as it existed at common law.

At common law, the existence of a right to trial by jury depended upon whether the claim asserted was legal or equitable in nature. Ross v. Bernhard, 396 U.S. 531, 533, 24 L.Ed. 2d 729, 733 (1970). When only equitable relief is sought, there is no right to a jury trial. 5 Moore's Federal Practice ¶ 38.17 (2d ed. 1981); see Loomis Electronic Protection, Inc. v. Schaefer, 549 P.2d 1341, 1344 (Alaska 1976). In this case, the State sought injunctive and restitutory relief only.[28] Such relief being equitable, 5 Moore's Federal Practice ¶ 38.24 (2d ed. 1981), Brown was not entitled to a jury trial and the lower court thus did not err in refusing Brown's jury trial demand.

---

28. In its original complaint, the State sought civil penalties as well, but this claim was dropped prior to Brown's demand for a jury trial. We therefore need not decide whether a right to a trial by jury would exist had the State sought civil penalties under either ULSPA or the Consumer Protection Act. See State v. O'Neill Investigations, Inc., 609 P.2d 526, 538-39 (Alaska 1980) (Matthews, J., dissenting).

VI. VALIDITY OF THE INJUNCTION

As part of its final judgment, the lower court permanently enjoined Brown from engaging in certain practices prohibited by the administrative regulations promulgated under ULSPA, 3 AAC 20.010-20.390.[29] Brown claims that this part of the injunction is invalid because the regulations were not adopted in accord with statutory notice

---

29. Included among the practices enjoined are (1) using contracts which contain provisions that loss of the property can result without notice or a hearing in a court of competent jurisdiction (3 AAC 20.060(a)(7)); (2) using contracts that provide for acceleration of payments upon default (3 AAC 20.060(a)(6)); (3) representing to prospective purchasers that they must act quickly to purchase land at a savings because the price is about to increase, unless a decision has in fact been made to increase the price and the increased price remains in effect for at least 30 days (3 AAC 20.110(1)); (4) representing to purchasers that the seller will buy back or resell the purchased property unless this is true (3 AAC 20.120(1)); (5) failing to inform purchasers that any evidence of indebtedness can be assigned (3 AAC 20.130(3)); (6) advertising "homesites" as for sale when the land has not been approved for utilities (3 AAC 20.080 (3)); and (7) failing to include on the face of any agreement that the purchaser has a right to rescind for any reason within five days (3 AAC 20.270(b)).

requirements.[30] We disagree.

---

30. Brown also claims that these regulations are inconsistent with legislative intent, and that application of them to him would be a denial of procedural due process. The basis for Brown's first argument is that since the regulations were promulgated prior to the effective date of the ULSPA amendments, the legislature could not have intended them to apply to in-state sellers of land. In effect, Brown argues that administrative regulations must be re-promulgated before they may be applied to enforce an amended statute that covers a new class of persons. We think that requiring such a procedure would be unduly burdensome to the administrative agency when, as here, the regulations are consistent with, and not rendered unreasonable or arbitrary by, the statute as amended. See Kenai Peninsula Fisherman's Cooperative Ass'n v. State, 628 P.2d 897, 906 (Alaska 1981)

Brown's due process argument is that since the regulations when promulgated applied only to out-of-state subdividers, he reasonably believed that he had no interest in them. Thus, he argues that application of the regulations to him without re-promulgating them denies him notice of and an opportunity to be heard in the administrative process. The only authority cited by Brown in support of his argument is City of Homer v. State, 566 P.2d 1314, 1319-20 (Alaska 1977). His reliance on that case is misplaced, however, since it involved due process requirements in connection with administrative action that is adjudicatory, rather than legislative, in nature. As Professor Davis notes, numerous regulations are promulgated without notice to or participation by those that might be affected. 1 K. Davis, Administrative Law Treatise § 6.01 (1958). In our judgment, Brown's due process argument is without merit.

AS 34.55.020(a)[31] authorizes the Department of Commerce to prescribe regulations as are necessary to accomplish ULSPA's purpose, and states that such regulations shall be adopted in compliance with the Administrative Procedure Act, AS 44.62.010-44.62.650. AS 44.62.190 requires that notice of proposed agency action be given at least thirty days before regulations are adopted. The content of such notice is governed by AS 44.62.200, which, among other things, requires that the notice contain "an informative summary of the proposed subject of agency action." AS 44.62.200(a)(3). It is this requirement that Brown claims was not complied with here.

The challenged regulations were adopted after publication of the following notice:

---

31. AS 34.55.020(a) provides:

> The department shall prescribe regulations which shall be adopted, amended, or repealed in compliance with the Administrative Procedure Act (AS 44.62). The regulations shall include but not be limited to provisions for advertising standards to assure fair and full disclosure; provisions for escrow or trust agreements or other means reasonably to assure that all improvements referred to in the application for registration and advertising will be completed and that purchasers will receive the interest in land contracted for; provisions for operating procedures; and other provisions as are necessary or proper to accomplish the purpose of this chapter.

> NOTICE IS HEREBY GIVEN that the Department of Commerce . . . proposes to adopt regulations in Title 3 of the Administrative Code to implement AS 34.55 Uniform Land Sales Practices Act as follows:
>
> | | |

Brown contends that this notice was insufficient to convey any meaningful description of the proposed agency action.

AS 44.62.100(a) establishes a rebuttable presumption that the procedural requirements for the promulgation of administrative regulations have been satisfied. When a regulation is challenged for failure to comply with these requirements, the violation must be "substantial" before the regulation will be declared invalid. AS 44.62.300; Kingery v. Chapple, 504 P.2d 831, 834 (Alaska 1972). We think that Brown has failed to show a violation of the informative summary requirement substantial enough to overcome the statutory presumption of validity. The contents of the above summary gave members of the public sufficient information to decide whether their interests could be affected by the agency action and thus whether to make their views known

to the agency.[32] Accordingly, that portion of the trial court's judgment permanently enjoining Brown from violating the administrative regulations implementing ULSPA is affirmed.

VII. FIRST NATIONAL BANK AS A DEFENDANT

The relief sought by the State against First National Bank of Anchorage was a declaratory judgment that the Bank was not a "holder in due course" of the Windsong lot purchasers' promissory notes. The Bank held these notes as security for its loans to Brown used to finance the Windsong Subdivision. Although when delivered the notes were unendorsed, the collateral and loan agreements between Brown and First National authorized the Bank to endorse the notes to itself on Brown's behalf. After a time it did so and

---

32. That this is all that AS 44.62.200(a)(3) requires finds support in its legislative history. The precursor to that section required that the notice of proposed agency action contain "[e]ither the express terms or an informative summary of the proposed agency action." Ch. 143, § 6(3), SLA 1959. In 1970, the legislature changed this language to that presently found in AS 44.62.200(a)(3). See ch. 185, § 1, SLA 1970. A report from the House Judiciary Committee reveals that the change came about because it was felt that under the prior version notice of proposed regulations had to be very detailed and specific; a requirement that the Judiciary Committee believed was too restrictive and hence undesirable. See 1970 House Journal 917-18. Thus, it is clear that the legislature intended that the "informative summary" requirement be liberally construed. Cf. AS 44.62.200(b) (a regulation may vary from the content specified in the summary if "the subject matter remains the same and the original notice was written so as to assure that members of the public are reasonably notified of the proposed subject of agency action in order for them to determine whether their interests could be affected by agency action on that subject").

then notified purchasers that they were obligated to make their payments to the Bank, despite the lower court's directive that those purchasers seeking restitution should make their payments to the court registry. It was at this point that the State amended its complaint to add First National as a defendant.

The lower court dismissed the State's action against the Bank, reasoning that the State was without standing to assert potential claims that individual lot purchasers might have against First National because the Bank had violated no law.[33] In our view, the lower court impermissibly substituted its own judgment for that of the executive official charged with bringing suit when, in his judgment, the public interest requires, and therefore erred in dismissing the State's action against First National.

We have already had occasion to discuss the Attorney General's broad common law powers. What we have said is equally applicable to the question of the State's authority to sue the Bank.

---

33. Subsequent to its decision to dismiss the Bank, the trial court expressed as a tentative opinion the view that the Bank was not a holder in due course and thus would be subject to the same defenses available to a purchaser in an action on the note by Brown. The court correctly pointed out, however, that this view was not an adjudication binding on the Bank.

> Under the common law, an attorney general is empowered to bring any action which he thinks necessary to protect the public interest. . . .

Public Defender Agency v. Superior Court, Third Judicial District, 534 P.2d 947, 950 (Alaska 1975)(emphasis added). And, subject to constitutional bounds, what is or is not in the public interest is a matter committed to the Attorney General's sound discretion. Id. That the State saw fit to try to prevent First National from collecting on notes executed by persons whom it had reason to believe may have been the victims of fraud, is not a decision subject to the control or review of the courts. The trial court's concern that allowing the State to sue First National in the absence of a specific statutory violation by the Bank would create a "horrendous risk of overreaching" by the State as litigant, is answered by the observation that "the fact that the exercise of power may be abused is no sufficient reason for denying its existence." United States v. San Jacinto Tin Co., 125 U.S. 273, 284, 31 L.Ed. 747, 751 (1888).

We conclude, therefore, that the trial court erred in dismissing the State's claim against First National. On remand, the State must be given the opportunity to show,

with respect to the individual purchasers represented,[34] that the Bank does not occupy the status of a "holder in due course" of the various purchasers' promissory notes.

The judgment is AFFIRMED in part and REVERSED in part and the case is REMANDED for further proceedings consistent with this opinion.[35]

---

34. First National's argument that permitting the State to sue will require the Bank to engage in litigation which offers it no prospect of obtaining complete relief is disposed of by our earlier holding that those individuals electing to be represented by the State must first consent to be bound by the court's final judgment.

35. In light of our disposition of the case, the lower court's award to the State of costs and attorney's fees must be vacated. We do not address the State's claim that the lower court erred in denying its request for pre-judgment attachment under AS 09.40.010. Since the State has represented to the court that it has been unable to find significant assets other than Windsong lots on which to execute during the pendency of this appeal, and since the State will have a partial judgment on which to execute following remand, this issue is moot.

RABINOWITZ, Chief Justice, dissenting in part.

My only disagreement with the court's disposition of the various issues in this appeal concerns its holding that determination of Brown's liability to pre-September 21, 1977 purchasers on the basis of common law fraud must be remanded for a second trial. The court reaches its remand conclusion on the following rationale: "The state did not allege that Brown should be held liable on the basis of common law fraud." Agreeing that Brown's right to a fair trial was jeopardized by the trial court's adoption of a new theory of the case, and refusing to countenance the trial court's re-engineering of the case to hold Brown liable for common law fraud, the majority has concluded that the matter should be remanded for trial of the common law fraud question.

I do not believe that a remand to address the issue of common law fraud is appropriate. The case against Brown was tried solely on the theory that Brown was liable under the ULSPA, not on the basis of common law fraud. Further, it cannot be shown that the issue of common law fraud was tried with the express or implied consent of the parties. In short, I think it unfair to require Brown to go through a second trial in circumstances where the state never asserted a claim of common law fraud in the original proceedings.

Even if I was persuaded that the issue of common law fraud had been raised and tried, in my view the appropriate disposition of the case would be to reverse a significant portion of the superior court's judgment ordering restitution to purchasers. As to these fifty-odd pre-September 21, 1977 purchasers, there is no evidence in the record concerning what misrepresentations, if any, were made to them or whether a particular purchaser relied on any such misrepresentation.[1] In short, I fail to comprehend the justifica-

---

1. Although the superior court's order permits numerous purchasers to rescind their purchases and obtain a refund of their money on the ground that they were defrauded by Brown, there is no evidence in the record concerning most of these persons' dealings with Brown. A total of fifteen purchasers testified (several on Brown's behalf), and their testimony establishes that Brown or his agents told different things to different persons and that purchasers had varying amounts of knowledge about the condition of the property that they were purchasing. In other words, it is impossible to infer from the testimony of record that Brown defrauded dozens of purchasers, and thus the superior court's judgment lacks evidentiary support.

For example, on the issue of Brown's alleged failure to inform purchasers that their riverside parcels might flood, several of the state's witnesses testified that they knew the area was prone to flooding. Another two witnesses explained that they were told by Brown's representative of the subdivision's history of flooding. Many purchasers told stories much like that told by Thomas Doggett, who explained that he had bought his lot "more or less on impulse" within two hours of first seeing it and that he "didn't think about it, didn't research it, didn't ask any of the neighbors nothing." In other words, even if the testimony of some purchasers established that those persons were entitled to rescind their transactions, that testimony also establishes that it is impossible to infer that Brown is liable to other purchasers; the testimony of record does not establish that all purchasers were in the same position or that they all were told the same thing.

tion for the court's ordering a remand which will afford the state a second opportunity to attempt to present sufficient evidence to show that a particular purchaser is entitled to rescind his or her transaction with Brown.[2]

---

2. First, this is not a case in which the state is the victim of poor lawyering or inartful pleading. The state was permitted to amend its complaint four times over the course of almost a year. The state had ample opportunity, both before and after conducting extensive investigations, to tailor its pleadings and theories to fit its view of the facts.

Second, this is not a case in which defrauded consumers would be left without a remedy should the state be denied the remand opportunity to litigate the common law fraud issue on their behalf. Each and every landowner is free to maintain an individual suit should he or she wish to rescind the transaction or to recover damages.

Third, this is not a case in which significant judicial resources would be saved by litigating all purchasers' claims in a single class action type lawsuit. The state must prove its allegation of fraud as to each purchaser. On remand, the proceedings could become a confusing series of up to 53 mini-trials.

Fourth, this is not a case in which the state's objectives would be frustrated should individual purchasers be required to bring separate suits to vindicate their rights, if any. The state has repeatedly represented that its objective is not to redress individual purchasers' grievances but rather to vindicate its separate interest in "public law enforcement" by enjoining Brown from violating state law. Indeed, the state has already obtained precisely the relief that it claims to have been seeking, an injunction.

Fifth, this is a case in which Brown will suffer significant prejudice should the case be remanded for a second trial. There is the obvious prejudice of forcing Brown to incur the expense of a second trial which would not have been necessary had the state raised the theory that it now wishes to rely upon, and the prejudice of possible liability to purchasers who would not have been entitled to recover under the state's statutory theory of liability.

In my view, the court's disposition of the common law fraud issue also raises basic considerations of fairness. Brown's engineer, Neil Hausam, moved for summary judgment on the ground that the ULSPA could not be applied to reach his activities. The superior court granted summary judgment on that ground. In response to Brown's inquiry at the outset of the trial, the superior court indicated that "implicit in what the court has already ruled with regard to Mr. Hausam is that any claim based upon anyone who relied - whose actions were motivated by acts that took place prior to the effective date of the amendment must fail." The record indicates that Brown obviously was proceeding under the assumption that, if Hausam was out of the case because the act could not be applied retroactively, so was he unless the state could prove some post-ULSPA misbehavior affecting a pre-ULSPA purchaser. In my view, inconsistent application of the law in this case has resulted in a basically unfair decision against Brown.

(footnote 2 continued)

Further, there is no assurance that Brown will not be faced with separate suits brought by individual purchasers after the state's suit comes to an end. The state's suit has no res judicata effect as to individual landowers, and landowners are not required to elect to participate in any judgment obtained by the state until after the lawsuit has drawn to a close. Thus, if the state loses, individual purchasers are free to ignore the state's suit and to file their own lawsuits; even if the state wins, no landowner is bound by the judgment, although it is plausible to assume that most landowners will elect to participate in the judgment rather than to bring separate suits.

I WOULD LIKE TO TESTIFY IN SUPPORT OF HB236. THIS BILL AMENDS THE 'AIR TRADE PRACTICE AND CONSUMER PROTECTION ACT TO PROVIDE A DEFINITION FOR 'RADE OR COMMERCE.' THE EFFECT OF THIS BILL IS TO ASSURE THAT CONSUMERS ILL HAVE THE SAME PROTECTION AGAINST FRAUDULENT SALES OF HOMES AND REAL ROPERTY AS THEY DO AGAINST FRAUDULENT SALES OF OTHER GOODS AND SERVICES.

A RECENT DECISION OF THE ALASKA SUPREME COURT THREW INTO DOUBT WHETHER PERSON WHO BOUGHT A LOT OR A HOME BASED ON FRAUDULENT MISREPRESENTATIONS OULD BE PROTECTED UNDER ALASKA'S CONSUMER PROTECTION ACT. THE LARGEST NVESTMENT MOST FAMILIES MAKE IS IN THE PURCHASE OF THEIR HOME. THE LEGIS-ATURE SHOULD CLARIFY THAT THE STATE'S POLICY OF PROTECTION FOR CONSUMERS GAINST FRAUD EXTENDS TO THE PURCHASE OF HOMES.

CS FOR HOUSE BILL NO. 241 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the creation of the Alaska ~~Athletic~~ BOXING Commission and the regulation of professional boxing and wrestling."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) Alaska ~~Athletic~~ BOXING Commission (AS 08.15.010).

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 15. BOXING ~~AND WRESTLING~~.

Sec. 08.15.010. CREATION OF ~~ATHLETIC~~ BOXING COMMISSION. (a) There is created in the Department of Commerce and Economic Development the ~~Athletic~~ BOXING Commission.

(b) Members of the commission serve at the pleasure of the governor and shall be selected on the basis of their knowledge of and contribution to ~~athletics~~ PROFESSIONAL BOXING in the state.

Sec. 08.15.020. COMPOSITION AND TERMS OF MEMBERSHIP. (a) The commission consists of five members appointed by the governor for staggered three year terms as follows:

(1) a licensed physician, preferably a specialist in sports medicine;

(2) one member of the public;

(3) three members from the profession, one of whom shall be a contestant licensed under this chapter.

(b) A vacancy shall be filled for the balance of the unexpired term.

Sec. 08.15.030. GENERAL DUTIES AND ANNUAL REPORT. (a) The commission shall report annually to the governor. The report shall include the recommendations of the commission for the advancement and improvement of professional ~~athletic~~ BOXING programs and activities in the state, in addition to including the commission's findings.

(b) The commission shall recommend to the legislature statutory changes that the commission considers desirable or necessary to promote and maintain a ~~high standard of sportsmanship~~ level Boxing in the state.

Sec. 08.15.040. POWER OF COMMISSION. (a) The commission shall supervise all professional BOXING contests conducted in the state.

(b) The commission shall adopt regulations for the safe, organized, sportsmanlike and honest conduct of contests, including regulations relating to

(1) licensing of persons under the personal license provisions of this chapter;

(2) establishing the minimum fees payable to attending physicians, referees, judges, and timekeepers; OR OTHER MEDICAL PERSONNEL / FEES CAN BE WAIVED

(3) qualifications and duties of all persons required to be licensed under this chapter;

(4) conduct of contests, including their format and duration;

(5) approved equipment and facilities for the safety and protection of contestants;

(6) any other provision of this chapter.

(c) The commission may subpoena witnesses, administer oaths, take testimony and require the production or examination of any records concerning matters before the commission or under its investigation.

Sec. 08.15.050. DESIGNATED REPRESENTATIVES. (a) The commission

shall maintain a list of designated representatives.

(b) Whenever possible, a local designated representative shall substitute for a commissioner unable to supervise a contest in the commissioner's area. Commissioners and designated representatives shall minimize travel from one area of the state to another.

Sec. 08.15.060. ATTENDANCE AT CONTESTS. A contest may not be held without the attendance and supervision of a commissioner or a designated representative.

Sec. 08.15.070. PROVISION OF OFFICIALS. If not provided by the promoter, a commissioner supervising a contest shall provide for the attending physician, OR OTHER MEDICAL PERSONNEL timekeepers, referees, and judges at all contests in the state.

Sec. 08.15.080. MEETINGS AND COMPENSATION. (a) The commission shall meet at least once a year at the call of the chairperson, at the request of a majority of the commissioners, or at a regularly scheduled time determined by the commission. Commissioners serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions under AS 39.20.180.

(b) The commissioners shall elect a chairperson and a vice-chairperson from among their membership. The affirmative vote of a majority of the commissioners is required to exercise the powers of the commission.

(c) Meetings may be held by teleconference or other electronic means. Commissioners participating in a meeting from a location out of state may not vote at that meeting.

(d) The commission shall keep full and accurate minutes of its proceedings and records of its transactions.

Sec. 08.15.090. LICENSES REQUIRED. (a) A person may not act as a promoter, contestant, manager, attending physician, trainer,

referee, or judge in or for a contest unless that person has been issued the appropriate personal license by the commission.

(b) Application procedures and qualifications for the licenses required under this section shall be set out in regulations adopted by the commission.

(c) Licenses are biennial and shall expire on December 31.

Sec. 08.15.100. LICENSE FEES. The fees for licenses under this chapter are as follows:

(1) promoters.....$100;

(2) managers.....50;

A. TENDOR → PERMIT

(3) all other licensees except attending physicians. OTHER MEDICAL PERSONNEL ~~10~~.

Sec. 08.15.110. PROMOTER'S BOND. A promoter shall file a bond in the amount of $5,000 with the department upon approval of the application for a license and before the license is issued. The bond shall be conditioned on the faithful performance by the licensee of the provisions of this chapter, the payment of the contestants, and the good faith effort to conduct each contest for which tickets have been sold.

Sec. 08.15.120. CONTESTANT RESTRICTIONS. (a) A person may not participate as a contestant who

(1) was intoxicated or under the influence of a controlled substance at the time the person agreed to participate;

(2) did not agree to participate in writing;

(3) except as provided in (b) of this section, has used alcohol or a controlled substance within eight hours preceding the contest or is under the influence of alcohol or a controlled substance at the time of the contest; and

(4) is not at least 18 years of age or has not obtained a

waiver from the commission. OR DESIGNATED REP.

(b) A contestant may participate in a contest if

(1) the attending physician is aware that the contestant is using a prescription drug; and

(2) in the opinion of the attending physician, the safety of the contestant is not jeopardized and the prescription drug offers the contestant no advantage over the opponent in the contest.

Sec. 08.15.130. EXAMINATION OF CONTESTANTS. (a) Every contestant shall be examined no more than 24 hours, but no less than eight hours, before the contest by a practicing physician. The examining physician may disqualify a contestant considered physically unfit to participate.

(b) A contestant shall obtain a CAT scan of the head, or an equivalent examination, every 150 contest rounds or less and promptly supply the most recent CAT scan, or its equivalent, to the commission. If the contestant has been knocked out since the contestant's last CAT scan, a CAT scan taken after the last knockout shall be supplied to the commission before the contestant's next contest.

Sec. 08.15.140. ATTENDING PHYSICIAN REQUIRED. An attending physician currently licensed to practice medicine and surgery in the state must be on duty throughout a contest. The attending physician has the authority and duty to stop a contest when it is the physician's opinion that it would be dangerous to a contestant to continue.

Sec. 08.15.150. NOTICE OF CANCELLATION. (a) When it has been determined by means other than a physician's examination that a scheduled contestant will be unable to appear, the scheduled contestant's manager and the promoter of the contest shall notify the commissioner or the designated representative supervising the contest of the cancellation of the contest. When the cancellation is the result of an

examining physician's examination, the examining physician shall notify the commissioner supervising the contest in writing, stating the medical reason for, and the duration of, the cancellation.

(b) Upon receipt of notice of the cancellation of a contest for any reason, the commissioner or the designated representative supervising the contest, shall report the cancellation promptly to the chairperson of the commission and immediately to the public. If the commission, rather than the commissioner or the designated representative supervising the contest, is notified of a cancellation, the commission shall notify the public immediately.

Sec. 08.15.160. PAYMENT OF FEES. Failure of a promoter to pay the fees ~~of~~ the referee, attending physician, judges, and timekeeper is grounds for the suspension of the promoter's license.

Sec. 08.15.170. STATEMENT OF CONTEST. (a) Before a contest, a promoter shall file with the commission a statement setting out the name of ~~each~~ contestant, the managers' names and other information the commission may require.

(b) Failure to file the statement required under (a) of this section is grounds for suspension of the promoter's license.

Sec. 08.15.180. PARTICIPATION IN PURSE. (a) A person who acts as a promoter for a contest may not participate directly or indirectly in the purse or fee of a contestant or a contestant's manager.

(b) A person who violates (a) of this section forfeits any license held under this chapter.

(c) An unlicensed person who violates (a) of this section is guilty of a class B misdemeanor.

Sec. 08.15.190. ACTING WITHOUT A LICENSE. A person who violates AS 08.15.090(a) is guilty of a class B misdemeanor.

Sec. 08.15.200. ~~ENJOINING UNLICENSED CONTEST. The attorney~~

general, the commission, a commissioner or a concerned person may seek an injunction to prevent the conduct of a contest for which the necessary license has not been obtained.

Sec. 08.15.210. SHAM CONTEST. (a) A person may not conduct or participate in a sham or false contest.

(b) A licensee who violates (a) of this section shall be penalized by the commission as follows:

(1) for a first offense, a license shall be suspended for a minimum of three months, beginning from the date of the suspension order;

(2) for a second offense, a license shall be revoked permanently.

(c) The commission shall institute action to enforce (a) of this section within 10 days of receipt of notice of a possible violation.

(d) An unlicensed person who violates (a) of this section is guilty of a class B misdemeanor.

Sec. 08.15.220. EFFECT OF LICENSE SUSPENSION. (a) A licensee may not promote or participate in a contest when the licensee's license is suspended.

(b) A licensee who violates (a) of this section forfeits the license.

Sec. 08.15.230. EFFECT OF LICENSE FORFEITURE. A license forfeited under this chapter is cancelled and void. The licensee is forever ineligible for any of the licenses issued by the commission.

Sec. 08.15.240. GENERAL PENALTY. A person violating a provision of this chapter or a regulation of the commission for which no penalty is provided is guilty of a class B misdemeanor.

Sec. 08.15.250. INAPPLICABILITY OF CHAPTER. Nothing in this chapter gives the commission jurisdiction over the athletic programs

of any school, college or university or any other nonprofessional athletic events.

Sec. 08.15.260. APPLICABILITY OF THE ADMINISTRATIVE PROCEDURE ACT. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under this chapter.

Sec. 08.15.900. DEFINITIONS. In this title

(1) "CAT scan" means a rotating three dimensional computer-enhanced X-ray image;

(2) "commission" means the athletic commission created in AS 08.15.010;

(3) "commissioner" means a member of the athletic commission;

(4) "contest" includes a professional boxing or wrestling exhibition, sparring match or contest or fight, match, bout or fight;

(5) "contestant" means a person who competes in a professional contest;

(6) "designated representative" means a person knowledgeable about boxing or wrestling and qualified under the regulations adopted by the commission for designated representatives;

(7) "personal license" means the license issued to a promoter, contestant, manager, attending physician, referee, judge, second, or trainer;

(8) "professional" means a person receiving money or other thing of value other than a trophy, plaque, or medal for participation in a contest, and also means the contest itself;

(9) "promoter" means the person primarily responsible for the sponsorship, organization or furtherance of a contest.

* Sec. 3. AS 44.62.330(a) is amended by adding a new paragraph to read:

(52) Alaska Athletic Commission.

* Sec. 4. AS 44.66.010(a) is amended by adding a new paragraph to read:

(12) Alaska Athletic Commission (AS 08.15) -- June 30, 1986.

* Sec. 5. AS 05.05.010 - 05.05.040 and AS 05.10 are repealed.

* Sec. 6. INITIAL TERMS OF ALASKA ATHLETIC COMMISSION MEMBERS. Initial terms of the Alaska Athletic Commission shall be one year for two members, two years for two members, and three years for one member. The governor shall specify the initial term for each appointee.

* Sec. 7. REGULATIONS. The commission shall compile an initial list of designated representatives and also shall adopt comprehensive regulations under AS 08.15.040 within one year after the effective date of this Act.

CS FOR HOUSE BILL NO. 241 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the creation of the Alaska Athletic Commission and the regulation of professional boxing and wrestling."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) regulation of boxing under AS 08.15.

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 15. BOXING AND WRESTLING.

Sec. 08.15.010. CREATION OF ATHLETIC COMMISSION. (a) There is created in the Department of Commerce and Economic Development the Athletic Commission.

(b) Members of the commission serve at the pleasure of the governor and shall be selected on the basis of their knowledge of and contribution to athletics in the state.

Sec. 08.15.020. COMPOSITION AND TERMS OF MEMBERSHIP. (a) The commission consists of five members appointed by the governor for staggered three year terms as follows:

(1) a licensed physician, preferably a specialist in sports medicine;

(2) one member of the public;

(3) three members from the profession, one of whom shall be a contestant licensed under this chapter.

(b) A vacancy shall be filled for the balance of the unexpired term.

Sec. 08.15.030. GENERAL DUTIES AND ANNUAL REPORT. (a) The commission shall ~~study the amateur and professional athletic programs of the state and~~ shall report annually to the governor. The report shall include the recommendations of the commission for the advancement and improvement of PROFESSIONAL athletic programs and activities in the state, in addition to including the commission's findings.

(b) The commission shall recommend to the legislature statutory changes that the commission considers desirable or necessary to promote and maintain a high standard of sportsmanship in the state.

Sec. 08.15.040. POWER OF COMMISSION. (a) The commission shall supervise all professional contests conducted in the state.

(b) The commission shall adopt regulations for the safe, organized, sportsmanlike and honest conduct of contests, including regulations relating to

(1) licensing of persons under the personal license provisions of this chapter;

(2) establishing the minimum fees payable to attending physicians, referees, judges, and timekeepers;

(3) qualifications and duties of all persons required to be licensed under this chapter;

(4) conduct of contests, including their format and duration;

(5) approved equipment and facilities for the safety and protection of contestants;

(6) any other provision of this chapter.

(c) The commission may subpoena witnesses, administer oaths, take testimony and require the production or examination of any records concerning matters before the commission or under its investigation.

Sec. 08.15.050. DESIGNATED REPRESENTATIVES. (a) The commission shall maintain a list of designated representatives.

(b) Whenever possible, a local designated representative shall substitute for a commissioner unable to supervise a contest in the commissioner's area. Commissioners and designated representatives shall minimize travel from one area of the state to another.

Sec. 08.15.060. ATTENDANCE AT CONTESTS. A contest may not be held without the attendance and supervision of a commissioner or a designated representative.

Sec. 08.15.070. PROVISION OF OFFICIALS. If not provided by the promoter, a commissioner supervising a contest shall provide for the attending physician, timekeepers, referees, judges and ~~umpires~~ at all contests in the state.

Sec. 08.15.080. MEETINGS AND COMPENSATION. (a) The commission shall meet at least once a year at the call of the chairperson, at the request of a majority of the commissioners, or at a regularly scheduled time determined by the commission. Commissioners serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions under AS 39.20.180.

(b) The commissioners shall elect a chairperson and a vice-chairperson from among their membership. The affirmative vote of a majority of the commissioners is required to exercise the powers of the commission.

(c) Meetings may be held by teleconference or other electronic means. Commissioners participating in a meeting from a location out of state may not vote at that meeting.

Sec. 08.15.090. LICENSES REQUIRED. (a) A person may not act as

a promoter, contestant, manager, attending physician, second, trainer, referee, or judge in or for a contest unless that person has been issued the appropriate personal license by the commission.

(b) Application procedures and qualifications for the licenses required under this section shall be set out in regulations adopted by the commission.

(c) Licenses are biennial and shall expire on December 31.

Sec. 08.15.100. LICENSE FEES. The fees for licenses under this chapter are as follows:

(1) promoters.....$100;

(2) managers.....50;

(3) all other licensees.....10.

(4) ATTENDING PHYSICIAN

Sec. 08.15.110. PROMOTER'S BOND. A promoter shall file a bond in the amount of $5,000 with the department upon approval of the application for a license and before the license is issued. The bond shall be conditioned on the faithful performance by the licensee of the provisions of this chapter, the payment of the contestants, and the good faith effort to conduct each contest for which tickets have been sold.

Sec. 08.15.120. CONTESTANT RESTRICTIONS. (a) A person may not participate as a contestant who

(1) was intoxicated or under the influence of a controlled substance at the time the person agreed to participate;

(2) did not agree to participate in writing;

(3) except as provided in (b) of this section, has used alcohol or a controlled substance within eight hours preceding the contest or is under the influence of alcohol or a controlled substance at the time of the contest; and

(4) is not at least 18 years of age or has not obtained a

waiver from the commission.

(b) A contestant may participate in a contest if

(1) the attending physician is aware that the contestant is using a prescription drug; and

(2) in the opinion of the attending physician, the safety of the contestant is not jeopardized and the prescription drug offers the contestant no advantage over the opponent in the contest.

Sec. 08.15.130. EXAMINATION OF CONTESTANTS. (a) Every contestant shall be examined no more than 24 hours, but no less than eight hours, before the contest by a practicing physician. The examining physician may disqualify a contestant considered physically unfit to participate.

(b) A contestant shall obtain a CAT scan of the head, or an equivalent examination, every 150 contest rounds or less and promptly supply the most recent CAT scan, or its equivalent, to the commission. If the contestant has been knocked out since the contestant's last CAT scan, a CAT scan taken after the last knockout shall be supplied to the commission before the contestant's next contest.

Sec. 08.15.140. ATTENDING PHYSICIAN REQUIRED. An attending physician currently licensed to practice medicine and surgery in the state must be on duty throughout a contest. The attending physician has the authority and duty to stop a contest when it is the physician's opinion that it would be ~~life-threatening~~ DANGEROUS to a contestant to continue.

Sec. 08.15.150. NOTICE OF CANCELLATION. (a) When it has been determined by means other than a physician's examination that a scheduled contestant will be unable to appear, the scheduled contestant's manager and the promoter of the contest shall notify the commissioner or the designated representative supervising the contest of the

cancellation of the contest. When the cancellation is the result of an examining physician's examination, the examining physician shall notify the commissioner supervising the contest in writing, stating the medical reason for, and the duration of, the cancellation.

(b) Upon receipt of notice of the cancellation of a contest for any reason, the commissioner or the designated representative supervising the contest, shall report the cancellation promptly to the chairperson of the commission and immediately to the public. If the commission, rather than the commissioner or the designated representative supervising the contest, is notified of a cancellation, the commission shall notify the public immediately.

Sec. 08.15.160. PAYMENT OF FEES. Failure of a promoter to pay the fees of the referee, attending physician, judges, and timekeeper is grounds for the suspension of the promoter's license.

Sec. 08.15.170. STATEMENT OF CONTEST. (a) Before a contest, a promoter shall file with the commission a statement setting out the name of each contestant, the managers' names and other information the commission may require.

(b) Failure to file the statement required under (a) of this section is grounds for suspension of the promoter's license.

Sec. 08.15.180. PARTICIPATION IN PURSE. (a) A person who acts as a promoter for a contest may not participate directly or indirectly in the purse or fee of a contestant or a contestant's manager.

(b) A person who violates (a) of this section forfeits any license held under this chapter.

(c) An unlicensed person who violates (a) of this section is guilty of a class B misdemeanor.

Sec. 08.15.190. ACTING WITHOUT A LICENSE. A person who violates AS 08.15.090(a) is guilty of a class B misdemeanor.

Sec. 08.15.200. ENJOINING UNLICENSED CONTEST. The attorney general, the commission, a commissioner or a concerned person may seek an injunction to prevent the conduct of a contest for which the necessary license has not been obtained.

Sec. 08.15.210. SHAM CONTEST. (a) A person may not conduct or participate in a sham or false contest.

(b) A licensee who violates (a) of this section shall be penalized by the commission as follows:

(1) for a first offense, a license shall be suspended for a minimum of three months, beginning from the date of the suspension order;

(2) for a second offense, a license shall be revoked permanently.

(c) The commission shall institute action to enforce (a) of this section within 10 days of receipt of notice of a possible violation.

(d) An unlicensed person who violates (a) of this section is guilty of a class B misdemeanor.

Sec. 08.15.220. EFFECT OF LICENSE SUSPENSION. (a) A licensee may not promote or participate in a contest when the licensee's license is suspended.

(b) A licensee who violates (a) of this section forfeits the license.

Sec. 08.15.230. EFFECT OF LICENSE FORFEITURE. A license forfeited under this chapter is cancelled and void. The licensee is forever ineligible for any of the licenses issued by the commission.

Sec. 08.15.240. GENERAL PENALTY. A person violating a provision of this chapter or a regulation of the commission for which no penalty is provided is guilty of a class B misdemeanor.

Sec. 08.15.250. INAPPLICABILITY OF CHAPTER. Nothing in this

chapter gives the commission jurisdiction over the athletic programs of any school, college or university or any other nonprofessional athletic events.

Sec. 08.15.260. APPLICABILITY OF THE ADMINISTRATIVE PROCEDURE ACT. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under this chapter.

Sec. 08.15.900. DEFINITIONS. In this title

(1) "CAT scan" means a rotating three dimensional computer-enhanced X-ray image;

(2) "commission" means the athletic commission created in AS 08.15.010;

(3) "commissioner" means a member of the athletic commission;

(4) "contest" includes a professional boxing or wrestling exhibition, sparring match or contest or fight, match, bout or fight;

(5) "contestant" means a person who competes in a professional contest;

(6) "designated representative" means a person knowledgeable about boxing or wrestling and qualified under the regulations adopted by the commission for designated representatives;

(7) "personal license" means the license issued to a promoter, contestant, manager, attending physician, referee, judge, second, or trainer;

(8) "professional" means a person receiving money or other thing of value other than a trophy, plaque, or medal for participation in a contest, and also means the contest itself;

(9) "promoter" means the person primarily responsible for the sponsorship, organization or furtherance of a contest.

* Sec. 3. AS 44.62.330(a) is amended by adding a new paragraph to read:

(52) Alaska Athletic Commission.

* Sec. 4. AS 44.66.010(a) is amended by adding a new paragraph to read:

(12) Alaska Athletic Commission (AS 08.15) -- June 30, 1986.

* Sec. 5. AS 05.05.010 - 05.05.040 and AS 05.10 are repealed.

* Sec. 6. INITIAL TERMS OF ALASKA ATHLETIC COMMISSION MEMBERS. Initial terms of the Alaska Athletic Commission shall be one year for two members, two years for two members, and three years for one member. The governor shall specify the initial term for each appointee.

* Sec. 7. REGULATIONS. The commission shall compile an initial list of designated representatives and also shall adopt comprehensive regulations under AS 08.15.040 within one year after the effective date of this Act.

Concerns on HB241:

page 1 - line 17: seven member commission is toounworkable. Most of the states that I have had the pleasure of dealing with has five or less members. Ideally, for Alaska it should remain as is: four members from the judicial districts and a chairman appointed by the Governor for a five-year term.

page 1 - line 19: The public's interest is served by a sizeable perfomance bond put up by the promoter.

page 1 - line 22: some states, Michigan for instance, has in their statutes: "No person interested in any way, financially or otherwise, in any club, organization or corporation the main object of which is the holding or giving of boxing, sparring or wrestling exhibitions, shall be eligible to appointment on such board."

page 1 - line 23: Since this legislation does not govern amateur boxing, there is no need to mandate a seat on the commission.

page 1 - line 29: semiprofessional does not belong on this legislation. You are a professional if you receive compensation for putting on a performance. The definition of a semiprofessional on page 11, line 13 is too unworkable. In my past experiences with boxing in the state, your preliminary bouts are often times compensated differently. One boxer may receive $150 to $300 and the other $350 to $600. Would this mean that one boxer would be a professional and the other a semi-pro? Would one boxer have to wear protective headgear and a 16 ounce glove and the other can wear a 10 ounce glove?

If this was designed to protect or regulate roughhouse boxing, this should not be the forum for it. Roughhouse boxing is not boxing and if I had some say on the matter I would eliminate the words "professional boxing" in their advertisements.

page 3 - line 14 Are other boards and commissions paying a surety bond? The bond is payable to the state but in essence is being paid by the state with the reimbursement clause on line 20. Why would it be needed?

page 4 - line 27 This section can be strengthened by a higher bond. I would assume that this is no more than a performance bond. While I was the commissioner, legally or not, I was asking and getting cash only bonds and would return the cash 10 days after the event. This took care of any spectator that felt they did not get their money's worth. Needless to say, no problem was ever encountered during any matches which I licensed during my term on the commission.

page 6 - line 10 line 11 while a physician has the duty to voice an opinion that it would be dangerous to a contestant to continue fighting, it is solely the authority and responsibility for a referee to stop a fight. The control of a fight, once the bell rings, rest solely on the third man in the ring.

page 6 - line 20 thru line 27 fees should be based on gross receipts. Fees should be paid to the referees; judges, time keeper, announcer and the ringside physician. No fee should be paid an inspector since he is acting in the absence of a commissioner. The examining physician (line 23) should be paid as if the person being examined went on a doctor's office visit. During my term as a commissioner, all judges, timekeepers, referees and announcers were paid with complimentary tickets. However, there is no reason that they could not be paid by the commission with money collected from the promoters.

Perhaps I missed it but there should be a clause in the bill that requires some form of insurance. The wording could go something like this:

> THE PROMOTER OR PROMOTERS OF ANY PROFESSIONAL BOXING CONTEST OR CONTESTS SHALL INSURE EACH CONTESTANT PARTICIPATING IN SUCH BOXING CONTEST FOR NOT LESS THAN $1,000.00 FOR MEDICAL AND HOSPITAL EXPENSES TO BE PAID TO THE CONTESTANT TO COVER INJURIES SUSTAINED IN SUCH CONTEST, AND FOR NOT LESS THAN $5,000.00 TO BE PAID IN ACCORDANCE WITH THE STATUTES OF DESCENT AND DISTRIBUTION OF PERSONAL PROPERTY IN SUCH CASE MADE AND PROVIDED TO PERSONS THEREUNDER ENTITLED, IN THE EVENT THE CONTESTANT SHOULD DIE AS A RESULT OF INJURIES RECEIVED IN A BOXING CONTEST.

We had a case in Alaska in 1974 where a female boxer was hospitalized and later died in Illinois. Since no insurance was in force at the time of the injury, the hospital ended up writing off her medical bill.

There are undoubtedly other changes in the legislation that I would like to see, however, in the interest of getting this to you, I will sign off right here. I will send a copy of this to Sen Josephson.

Josephson

IN THE SENATE BY THE STATE AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 166 (State Affairs)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the creation of the Alaska Athletic Commission and the regulation of professional boxing and wrestling."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 05.05 is amended by adding new sections to read:

Sec. 05.05.050. CREATION OF ATHLETIC COMMISSION. (a) There is created in the Office of the Governor DEPT. OF COMMERCE the Athletic Commission.

(b) Members of the commission serve at the pleasure of the governor and shall be selected on the basis of their knowledge of and contribution to athletics in the state.

Sec. 05.05.060. COMPOSITION AND TERMS OF MEMBERSHIP. (a) The commission consists of seven members appointed by the governor for staggered three year terms as follows:

(1) a licensed physician, preferably a specialist in sports medicine;

(2) ~~six~~ members-at-large, ~~including one from each judicial district.~~

(b) The ~~six~~ members-at-large ~~shall~~ may include representatives of professional boxing managers and amateur boxing interests.

(c) A vacancy shall be filled for the balance of the unexpired term.

Sec. 05.05.070. GENERAL DUTIES AND ANNUAL REPORT. (a) The commission shall study the amateur and professional athletic programs of the state and shall report annually to the governor. The report

wrestling coming

shall include the recommendations of the commission for the advancement and improvement of athletic programs and activities in the state, in addition to including the commission's findings.

(b) The commission shall recommend to the legislature statutory changes that the commission considers desirable or necessary to promote and maintain a high standard of SAFETY AND sportsmanship in the state.

Sec. 05.05.080. POWER OF COMMISSION. (a) The commission shall supervise all contests conducted in the state.

(b) The commission shall adopt regulations for the safe, organized, sportsmanlike and honest conduct of contests, including regulations relating to

(1) licensing of persons under the telecast and personal license provisions of this chapter;

(2) establishing the fees to be charged for licenses required under this chapter;

(3) establishing the minimum fees payable to examining physicians, attending physicians, inspectors, referees, judges, umpires, scorekeepers, and timekeepers;

(4) qualifications and duties of all persons required to be licensed under this chapter;

(5) conduct of contests, including their format and duration;

(6) approved coaching, managing, training, equipment and facilities for the safety and protection of contestants;

(7) any other provision of this chapter.

~~(c) The commission may contract for professional services and shall employ an executive director. It may employ a staff.~~ A member of the commission may not serve as the executive director or on the staff.

ADMINISTRATIVE PROCEDURE ACT

(d) The commission may subpoena witnesses administer oaths, take testimony and require the production or examination of any records concerning matters before the commission or under its investigation. (E) TAKE THE APPROPRIATE ACTION IN ACCORDANCE W/APA

Sec. 05.05.090. ATTENDANCE AT CONTESTS. (a) ~~Except as provided in (c) of this section, the executive director~~, or in the ~~director's~~ absence a commissioner or inspector, shall ~~attend and supervise~~ all contests.

(b) ~~The executive director or a~~ The commissioner ~~appointed by the executive director~~ shall provide for the attending or examining physician, inspectors, scorekeepers and timekeepers at all contests in the state. If not provided by the promoters, the ~~executive director or~~ the appointed commissioner shall also provide referees, judges and umpires. (A)

(c) A contest may not be held without the attendance and supervision of the ~~executive director~~, a commissioner ~~or an inspector~~. In the event that the executive director is unable to attend and supervise a contest, arrangement shall be made with a local commissioner to attend the contest. In the event that a local commissioner is unable to attend and supervise a contest in that commissioner's area, that commissioner shall appoint an inspector licensed under this chapter to attend and supervise the contest. If no local inspector is available, a commissioner from the area in which the contest is to be held may appoint a commissioner or inspector from another area to attend and supervise the contest as a substitute.

(d) When a commissioner or inspector from one region of the state attends a contest in another area as a substitute under (c) of this section, the substitute is entitled to receive per diem and reasonable travel expense compensation authorized by law.

Sec. 05.05.100. COMMISSIONERS' BONDS. Before entering the duties of office, a commissioner shall enter into a surety bond, executed by a surety company authorized to do business in the state, payable to the state, and approved by the attorney general. The bond shall be in the penal sum of $2,000, conditioned on the faithful and unbiased performance of the commissioner's duties. The bond shall be filed with the governor. A commissioner shall be reimbursed for the cost of the bond.

Necessary?

Sec. 05.05.110. MEETINGS AND COMPENSATION. (a) The commission shall meet at least once a year at the ~~call of the governor~~ or the chairperson, at the request of a majority of the commissioners, or at a regularly scheduled time determined by the commission. Commissioners serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions under 39.20.180.

(b) The commissioners shall elect a chairperson and a vice-chairperson from among their membership. The affirmative vote of a majority of the commissioners is required to exercise the powers of the commission.

(c) Meetings may be held by teleconference or other electronic means. Commissioners participating in a meeting from a location out of state may not vote at that meeting.

(d) The commission shall keep full and accurate minutes of its proceedings and records of its transactions. ~~A copy of each financial report, the minutes of all meetings, and a copy of each report filed~~ with the commission under this chapter shall be sent to the governor's office within 10 days after the record or report is completed or received.

Sec. 05.05.120. LICENSES REQUIRED. (a) A person may not act as

a promoter, contestant, manager, ~~examining or attending physician,~~ Attending physician ~~second, sparring partner~~, trainer, ~~booking agent~~, referee, judge, or ~~umpire~~ in or for a contest unless that person has been issued the appropriate personal license by the commission.

(b) A person may not telecast a contest unless that person has been issued a telecast license by the commission.

(c) Application procedures, and qualifications, ~~and fees~~ for the licenses required under this section shall be set out in regulations adopted by the commission.

(d) Licenses are annual and shall expire on December 31 of each year.

Sec. 05.05.130. CONTEST LICENSEE BOND. Every promoter shall file a bond in the amount of $1,000 with the commission for each contest held in a city of less than 10,000 inhabitants and a bond in the amount of ~~$3,000~~ $10,000 for each contest held in a city of more than 10,000 inhabitants. The bond shall be conditioned on the faithful and unbiased performance by the promoter of the provisions of this chapter, the payment of the taxes under this chapter and the compliance with all regulations of the commission. The bond shall be subject to the approval of the attorney general.

Sec. 05.05.140. CONTESTANT RESTRICTIONS. (a) A person may not participate as a contestant who

(1) was intoxicated or under the influence of a controlled substance at the time the person agreed to participate;

(2) did not agree in writing to participate at least 72 hours before a contest;

(3) except as provided in (b) of this section, has used alcohol or a controlled substance within eight hours preceding the contest or is under the influence of alcohol or a controlled substance

at the time of the contest; and

(4) is not at least 18 years of age, OR HAS RECIEVED A WAIVER.

(b) A contestant may participate in a contest if

(1) the attending physician is aware that the contestant is using a prescription drug; and

(2) in the opinion of the attending physician, the safety of the contestant is not jeopardized and the prescription drug offers the contestant no advantage over the opponent in the contest.

Sec. 05.05.150. EXAMINATION OF CONTESTANTS. (a) Every contestant shall be examined at least 24 hours, but no less than eight hours, before the contest by a practicing physician. The examining physician may disqualify a contestant considered physically unfit to participate.

(b) A contestant shall obtain a CAT scan of the head every ~~75~~ 150 contest rounds or less and supply the most recent CAT scan to the ~~examining physician for review during the pre-contest examination.~~ If the contestant has been knocked out since the contestant's last CAT scan, a CAT scan taken after the last knockout shall be supplied to the examining physician for review.

Sec. 05.05.160. ATTENDING PHYSICIAN REQUIRED. An attending physician currently licensed to practice medicine and surgery in the state must be on duty throughout a contest. The attending physician has the authority and duty to stop a contest when it is the physician's opinion that it would be ~~life-threatening~~ dangerous to a contestant to continue.

Sec. 05.05.170. SMOKING PROHIBITED. Notwithstanding the provisions of AS 18.35.310, ~~smoking~~ is not permitted at a contest held under the provisions of this chapter.

Sec. 05.05.180. NOTICE OF CANCELLATION. (a) When it has been

determined by means other than a physician's examination that a scheduled contestant will be unable to appear, the scheduled contestant's manager and the promoter of the contest shall notify the ~~executive director~~, or the commissioner or inspector supervising the contest, of the cancellation of the contest. When the cancellation is the result of an examining physician's examination, the examining physician shall notify the commissioner supervising the contest, IN WRITING AND STATING THE MEDICAL REASON AND DURATION OF THE CANCELLATION.

(b) Upon receipt of notice of the cancellation of a contest for any reason, the executive director, or the commissioner or inspector supervising the contest, shall report the cancellation promptly to the chairperson of the commission and immediately to the public. If the commission, rather than the executive director or the commissioner or the inspector supervising the contest, is notified of a cancellation, the commission shall notify the public immediately.

Sec. 05.05.190. PAYMENT OF FEES. (a) At least 10 days before a contest, the promoter shall pay to the commission an amount sufficient to pay the fees of the referee, the inspector and the examining physician.

(b) The commission shall pay the fees in (a) of this section to the persons entitled to them and furnish the governor with a record of the receipt of the amount paid under (a) of this section and of the payment of the fees.

(c) Failure of a promoter to pay the amount in (a) of this section is grounds for the suspension of the promoter's license.

Sec. 05.05.200. STATEMENT AND REPORT OF CONTEST. (a) A promoter shall, at least 10 days before a contest, file with the commission a statement setting forth the name of each contestant, the managers' names and other information the commission may require.

(b) Within 72 hours after a contest, the promoter shall file

with the Department of Revenue and the commission a written report showing the number of tickets sold for the contest, the price charged for them, the gross proceeds from the sale, and other information the commission may require.

(c) Failure to file the statement or report required under this section is grounds for suspension of the promoter's license.

Sec. 05.05.210. REPORT OF TELECAST. (a) A telecast licensee shall, within 72 hours after the telecast, file with the commission a written report showing the number of tickets issued or sold and the amount of the gross receipts.

(b) Failure to file the report required by this section is grounds for suspension of a telecast license.

Sec. 05.05.220. FAILURE TO PAY GROSS RECEIPTS TAX. (a) In addition to any other penalty provided by law, a licensee who fails to pay the gross receipts taxes under AS 43.77 shall be penalized by the commission as follows:

(1) for a first offense, a license shall be suspended for a minimum of three months, beginning from the date of the suspension order;

(2) for a second offense, a license shall be revoked permanently.

(b) The commission shall institute action to enforce (a) of this section within 10 days of receipt of notice of a possible violation.

Sec. 05.05.230. PARTICIPATION IN PURSE. (a) A person who acts as a promoter for a contest may not participate directly or indirectly in the purse or fee of a contestant or a contestant's manager.

(b) A person who violates (a) of this section forfeits any license held under this chapter.

(c) An unlicensed person who violates (a) of this section is

guilty of a class B misdemeanor.

Sec. 05.05.240. ACTING WITHOUT A LICENSE. A person who violates AS 05.05.120(a) or (b) is guilty of a class B misdemeanor.

Sec. 05.05.250. ENJOINING UNLICENSED CONTEST. The attorney general, the commission, a commissioner, the executive director or a concerned person may seek an injunction to prevent the conduct of a contest for which the necessary license has not been obtained.

Sec. 05.05.260. SHAM CONTEST. (a) A person may not conduct or participate in a sham or false contest.

(b) A licensee who violates (a) of this section shall be penalized by the commission as follows:

(1) for a first offense, a license shall be suspended for a minimum of three months, beginning from the date of the suspension order;

(2) for a second offense, a license shall be revoked permanently.

(c) An unlicensed person who violates (a) of this section is guilty of a class B misdemeanor.

(d) The commission shall institute action to enforce (a) of this section within 10 days of receipt of notice of a possible violation.

Sec. 05.05.270. EFFECT OF LICENSE SUSPENSION. (a) A licensee may not promote or participate in a contest when the licensee's license is suspended.

(b) A licensee who violates (a) of this section forfeits the license.

Sec. 05.05.280. EFFECT OF LICENSE FORFEITURE. A license forfeited under this chapter is cancelled and void. The licensee is forever ineligible for any of the licenses issued by the commission.

Sec. 05.05.290. GENERAL PENALTY. A person violating a provision

of this chapter or a regulation of the commission for which no penalty is provided is guilty of a class B misdemeanor.

Sec. 05.05.300. INAPPLICABILITY OF CHAPTER. Nothing in this chapter gives the commission jurisdiction over the athletic programs of any school, college or university or any other nonprofessional athletic events.

Sec. 05.05.310. APPLICABILITY OF THE ADMINISTRATIVE PROCEDURE ACT. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under this chapter.

Sec. 05.05.900. DEFINITIONS. In this title

(1) "CAT scan" means a rotating three dimensional computer-enhanced X-ray image;

(2) "commission" means the athletic commission created in AS 05.05.050;

(3) "commissioner" means a member of the athletic commission;

(4) "contest" includes a professional boxing or wrestling exhibition, sparring match or contest or fight, match, bout or fight;

(5) "contestant" means a person who competes in a professional contest;

(6) "executive director" means the executive director of the Athletic Commission created in AS 05.05.050;

(7) "~~inspector~~ designated Representative" means a person knowledgeable about boxing or wrestling and qualified under the regulations adopted by the commission for inspectors;

(8) "personal license" means the license issued to a promoter, contestant, manager, examining physician, attending physician, referee, judge, umpire, booking agent, inspector, sparring partner, second, or trainer;

(9) "professional" means a person receiving money or other thing of value other than a trophy, plaque, or medal for participation in a contest, and also means the contest itself;

(10) "promoter" means the person primarily responsible for the sponsorship, organization or furtherance of a contest;

(11) "telecast" means the television broadcast of a live or current contest on a closed circuit, whether originating in this state or not, for admission fees;

(12) "telecast license" means the license issued under this chapter for a telecast.

* Sec. 2. AS 43 is amended by adding a new chapter to read:

CHAPTER 77. SPORTS TAX.

Sec. 43.77.010. CONTEST AND TELECAST GROSS RECEIPTS TAX. (a) A tax of five percent is imposed upon the gross receipts from a combative sports contest and from the telecast of a contest.

(b) The minimum tax obligation under (a) of this section is $25.00 for each contest or telecast.

Sec. 43.77.020. DEPARTMENT OF REVENUE AUTHORITY. The Department of Revenue shall:

(1) collect the tax in this chapter;

(2) adopt regulations necessary to carry out the purposes of this chapter.

Sec. 43.77.030. PAYMENT OF TAX. (a) Within 72 hours after a combative sports contest or telecast, the licensee under AS 05.05.120 or the person conducting the contest or telecast shall

(1) file with the Department of Revenue the written report required by AS 05.05.200 or AS 05.05.210 showing the number of tickets sold for the contest or telecast, as appropriate, the price charged, the gross proceeds from the sale, and other information the Department

of Revenue may require;

(2) pay to the Department of Revenue the tax under AS 43.77.010.

Sec. 43.77.040. FAILURE TO MAKE REPORT AND TAX PAYMENT. (a) The commissioner of revenue shall examine the books and records of the promoter or the telecast licensee when

(1) a promoter or a telecast licensee fails to make a report under AS 43.77.030;

(2) the report is unsatisfactory to the commission or to the Department of Revenue; or

(3) a promoter or a telecast licensee fails to pay the full amount of the taxes due with the report.

(b) The commissioner of revenue may subpoena and examine under oath a licensee and any other person considered necessary to determine the total gross receipts of a contest or telecast and the amount of tax due.

(c) If, upon the completion of the examination, it is determined that some or all of the tax owed to the state is unpaid, notice shall be served upon the promoter or the telecast licensee stating the amount of the tax owed. The taxes shall be paid within 20 days of receipt of the notice.

Sec. 43.77.050. PENALTY. A person who violates AS 43.77.030 or AS 43.77.040 is guilty of a class B misdemeanor.

Sec. 43.77.060. DEFINITIONS. For purposes of this chapter, the terms "commission", "contest", "promoter", "telecast", and "telecast licensee" have the meanings set out in AS 05.05.900.

* Sec. 3. AS 44.62.330(a) is amended by adding a new paragraph to read:

(52) Alaska Athletic Commission.

* Sec. 4. AS 44.66.010(a) is amended by adding a new paragraph to read:

(12) Alaska Athletic Commission (AS 05.10) -- June 30, 1986.

* Sec. 5. AS 05.05.010 - 05.05.040 and AS 05.10 are repealed.

* Sec. 6. INITIAL TERMS OF ALASKA ATHLETIC COMMISSION MEMBERS. Initial terms of the Alaska Athletic Commission shall be one year for two members, two years for two members, and three years for three members. The governor shall specify the initial term for each appointee.

* Sec. 7. FIRST MEETING. The governor shall call the first meeting of the Alaska Athletic Commission within 15 days after appointment of the members.

* Sec. 8. REGULATIONS. Comprehensive regulations shall be adopted by the commission under AS 05.05.080 within one year after the enactment of this Act. shall be maintained

LEGISLATIVE COUNCIL

Representative Mitch Abood
HOUSE DISTRICT 11

MEMORANDUM

TO: Rep. Joe Hayes, Speaker
House of Representatives

FROM: Rep. Mitch Abood, Chairman MA/rlp
House Committee on State Affairs

DATE: April 13, 1983

SUBJECT: Athletic Commission

In response to your request to me as Chairman of the House Committee on State Affairs concerning the Athletic Commission, would you please find attached a memo dated July 30, 1980 from then Governor Jay Hammond to Commissioner Webber of the Department of Commerce and Economic Development.

I specifically direct your attention to paragraphs 2,3, and 4. After exhaustive investigation, my findings do indeed show there has never been an Executive Order generated by the Governor's Office to change the Athletic Commission from the Governor's Office to the administration of the Department of Commerce and Economic Development; nor have there been any official transfers made by the 12th Legislature.

In addition, no statutory revisions have been prepared on this by the past or current Legislatures.

Finally, it would appear that the transferring of the Athletic Commission from the Governor's Office to the Department of Commerce and Economic Development without legislative approval is an illegal act.

cc: Representative Terry Martin
Joe Montgomery

Enclosure
M'./rlp

Based on follow-up information we obtained from Katie Wallon, this is not ~~true~~, true. They did try to pass a bill, as you know.

MEMORANDUM State of Alaska

TO: Charles R. Webber
Commissioner
Department of Commerce and
Economic Development

DATE: July 30, 1980

FILE NO:

TELEPHONE NO:

FROM: Jay S. Hammond
Governor

SUBJECT: Athletic Commission

Alaska Statutes 05.05.010 - .040 created the Athletic Commission within the Office of the Governor. The statute assigns the commission the authority to promulgate rules and regulations governing athletic programs and contests in Alaska. Further, AS 05.10.010 - .170 provides for licensing by the Athletic Commission of participants in boxing contests, sparring or wrestling matches and for licensing of groups of individuals to conduct boxing contests, sparring or wrestling matches. These statutory provisions originated at Statehood and have remained intact since that time.

The Athletic Commission has not been funded since FY 77. The Commission has never promulgated rules or regulations governing athletic programs or contests. There are no records of previous licenses issued by the Commission. Portions of the statutes are outdated and in need of revision.

The members of the Athletic Commission are anxious to comply with their statutory responsibilities and are interested in evaluating their program to define their role in Alaskan athletics. Temporary licensing forms and procedures have been developed by my staff with the assistance of the Department of Law. These forms should be sufficient for the Commission to use over the next few months.

Adequate staff is necessary to assist the Commission in recommending revisions to the statutes, promulgating regulations, and performing their licensing responsiblities. The Division of Occupational Licensing is the most appropriate location for the Athletic Commission. Although official transfer cannot be made without legislative approval, I am requesting that Occupational Licensing assume the staff responsibility to assist the Commission in evaluating and revising their program and in performing their licensing and regulatory responsibilities. Official transfer will be made during the first session of the Twelfth State Legislature by Executive Order or, if statute revisions are prepared, by legislation.

Appointments to fill the two vacancies on the Commission will be made as soon as possible.

Should you find that additional funds are necessary for the Athletic Commission for travel, per diem, or other expenses, contingency funds may be available for the remainder of FY 81. Occupational Licensing should include the Athletic Commission in preparation of their FY 82 budget request.

Thank you for your assistance and cooperation.

A SPECIAL BOXING REPORT

Too Many Punches, Too Little Concern

With boxing's ills under fresh public scrutiny, new research on brain damage in experienced fighters suggests a road to medical reform

by **Robert H. Boyle and Wilmer Ames**

. . . See, all the brains are in a sort of cup, and after you get hit a few times it shakes them out of that cup. When they give you smelling salts it pulls them back into the cup. It's when the brains get shook up and run together that you get punch-drunk.

—SONNY LISTON

. . . I don't want to be one of them old [retired] fighters with a flat nose saying 'duh-duh-duh' before a fight.

—MUHAMMAD ALI, announcing his withdrawal from boxing on Dec. 12, '81

If a boxer ever went as batty as Nijinsky, all the wowsers in the world would be screaming "punch-drunk." Well, who hit Nijinsky? And why isn't there a campaign against ballet?

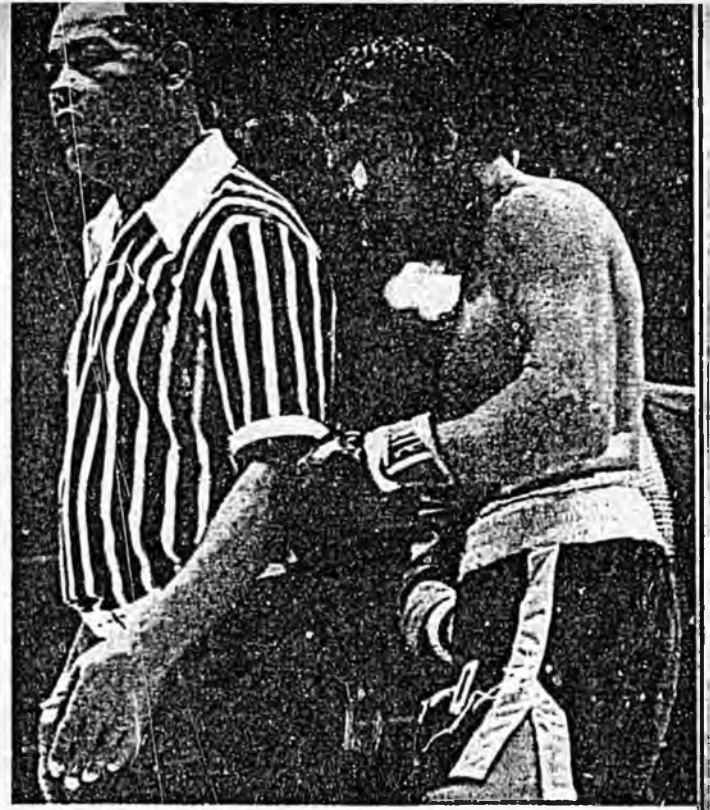
—A.J. LIEBLING, "The Sweet Science"

The death of Korean boxer Duk Koo Kim last fall aroused yet another cry for the reform or abolition of prizefighting in the U.S. Half a dozen times over the past 50 years a fatality has prompted a like reaction—in editorials or in Congressional hearings—but the result has been nil. Certainly reform is needed, but no amount of it will eliminate death in the ring. As long as there's boxing, there will be fatalities. Boxers die from acute brain trauma, caused either by a blow (or blows) to the head or, sometimes, a heavy fall to the canvas. The brain is like so much jelly suspended in a bucket, and when you strike the bucket sharply, the brain inside accelerates, twists and bumps around. In a knockout, which is technically a concussion, the force of a punch, transmitted to the brainstem, causes the fighter to lose consciousness. A KO is considered an acute injury, but it's relatively mild compared to what happens if the jarred brain ruptures the blood vessels that surround it. Then a hematoma (a massive buildup of blood) occurs in the narrow space between the rigid skull and the soft brain. As it expands, the hematoma simply squeezes the brain to death. There has been no dispute about that for 50 years.

But no one can predict when a punch will cause a knockout or a killing hemato-

continued

Mark Pacheco gets a brain scan. Below, he gets belted in a flyweight bout in Las Vegas in '81.



Losses like this, to Frazier in '74, may affect Quarry later.

weight named Mark Pacheco were brought together by SI for neurological examinations at Quarry's rural training camp north of Los Angeles. Quarry, 37, retired in 1977 after 63 professional fights. Beaten by Ali in 1970 and '72, he was the last white heavyweight to make a serious championship bid until Gerry Cooney challenged Larry Holmes last year. But Quarry wants to come out of retirement; he has reportedly agreed to fight again in June. Cobb, 28, has a record of 20–3. Last year he earned a measure of fame when, courageous but incompetent, he lost to Holmes in a WBC title bout. He took such a bad drubbing that a dismayed Howard Cosell, who announced the fight for ABC-TV, declared he'd never broadcast a professional boxing match again. Pacheco, 23, isn't a celebrated fighter. With a record of 11–11–1, he's one of those unsung battlers who hit and get hit on undercards in cities like Portland, Ore. and Sacramento. But Pacheco has become a minor notable because of two defeats. He was TKO'd in Portland in May 1982 and denied a license, on medical grounds, to fight in Oregon again for 45 days. But he had a bout 43 days later in New York, and he was again TKO'd. In the current round of Congressional hearings on boxing, which began after Kim's death and the *JAMA* editorials and reports, the Pacheco case has been cited as evidence of the sport's inadequate medical supervision.

All three men signed releases waiving their rights to medical privacy, and Quarry and Cobb were confident that nothing would be found amiss. The three were examined by Dr. Ira Casson of New York, a board-certified neurologist at Long Island Jewish Medical Center who was acting as a consultant to SPORTS ILLUSTRATED. Admittedly, this trio doesn't constitute a scientific sample. But recent research published by Casson and others indicates that the degree of a boxer's brain impairment can, as a rule, be related to the number of bouts he has fought. This indeed proved to be the case with two of our subjects, as will be shown. But none of the three are at this point in their lives punch-drunk.

In May 1928, Dr. Harrison Martland, a New Jersey pathologist, delivered a landmark paper at the New York Academy of Medicine. Using punch-drunk as a formal term for the first time, Martland said that its early signs were well recognized by the fans and promoters. They also referred to these boxers, he said, as "goofy," "cuckoo," "slug nutty" and "cutting paper dolls."

"Punch drunk most often affects boxers of the slugging type, who are usually poor boxers and who take considerable head punishment, seeking only to land a knockout blow," Martland reported. "It is also common in second-rate fighters used for training purposes, who may be knocked down several times a day." Early symptoms, he said, usually appeared in the extremities, for example, as a slight unsteadiness in gait, and in some cases periods of slight mental confusion occurred. In more advanced cases, there was a general slowing down in muscular movement, "a peculiar mental attitude characterized by hesitancy in speech, tremors of the hands and nodding movements of the head." In severe cases, symptoms included a peculiar tilting of the head, a staggering gait, "the facial characteristics of the Parkinson's syndrome," backward swaying of the body, tremors and "marked mental deterioration" that sometimes required commitment to an asylum. Martland estimated that almost 50% of veteran professional boxers had the condition in either severe or mild forms.

Martland said, "I am of the opinion that in punch drunk there is a very definite brain injury due to a single or repeated blows on the head or jaw which cause multiple concussion hemorrhages in the deeper portions of the cerebrum." About this pathology he was wrong, because he had no scientific data and could only speculate on the basis of his study of people who had died from random head injuries. He admitted that his theory couldn't then be proved, yet he felt compelled to report it because "the condition

continued

Dr. Casson used a rubber hammer to show that Quarry's reflexes—and his chin—are still sound.

Boxing *continued*

can no longer be ignored by the medical profession or the public." Accordingly, he called it "the duty of our profession to establish the existence or nonexistence of punch drunk by preparing accurate statistical data as to its incidence, careful neurologic examinations of fighters thought to be punch drunk and careful histologic examinations of brains of those who have died with symptoms."

Martland ended his paper by quoting Gene Tunney on his retirement after his second heavyweight championship fight with Jack Dempsey the year before. While training for the fight, Tunney had been hit hard by a sparring partner and suffered amnesia. Tunney said later that he didn't know who he was for 48 hours and that it was not until the seventh round of the Dempsey fight that he felt entirely normal. Martland quoted Tunney as concluding, "From that incident was born my desire to quit the ring forever, the first opportunity that presented itself. . . . But most of all I wanted to leave the game that had threatened my sanity before I met with an accident in a real fight with six-ounce gloves that would permanently injure my brain."

Though it made further study of the punch-drunk condition respectable among medical researchers, Martland's technical paper did little to alter the perception of the condition in the public mind, the sport or the press. Most promoters, writers and ringside physicians continued to discount it. Yes, they agreed, there was such a thing as a boxer becoming punchy, and it probably happened to more than a few, but it could not be accurately diagnosed and therefore was not a matter of serious concern.

Besides, it was not unusual for boxers, especially aging former fighters, to drink too much, to take pills, to eat poorly and generally not to take care of themselves. Some were said to have contracted syphilis, which in advanced cases can attack the brain. In any case, most people in the fight business attributed punch-drunk symptoms solely to causes unrelated to boxing. To do otherwise was to launch an attack on the sweet science. As for the boxers themselves, the ones who seemed punch-drunk denied it; the others didn't care to talk about it. One fighter, Slapsie Maxie Rosenbloom, had it both ways: He made a career in show business spoofing the punch-drunk myth (*box, page 56*).

For 50 years after Martland, the best medical research on the punch-drunk syndrome was done in England, which has a rich prizefighting tradition. In the heyday of the sport early in this century, novice boxers and fading pros used to fight in booths at fairs, taking on all comers in unsupervised bouts and receiving all kinds of punishment for little money. There were a great many organized fights as well. Thirty-year careers in the ring were not uncommon.

In 1957 an eminent neurologist named MacDonald Critchley reported in the *British Medical Journal* that he had examined 69 cases of chronic neurological disease in boxers and that "many of these—perhaps the great majority—should be looked upon as examples of punch-drunkenness, either early or well established." Like Martland, he found the symptoms more common among professionals than amateurs, in sluggers than in more stylish boxers and "in the second-rate or third-rate performers than in the intelligent scientific exponent with a championship title." He also concluded that "the sum total of contests is important, as well as the number of occasions upon which the boxers have been rendered unconscious."

Focusing on 21 patients, Critchley found that on the average punch-drunkenness developed 16 years after a boxer began his career. "Of great interest, pathological as well as practical, is the fact that this traumatic encephalopathy is a progressive condition," he wrote. "Once established, it not only does not permit reversibility, but it ordinarily advances steadily. This is the case even though the boxer has retired from the ring and repeated cranial traumas are at an end." Critchley went on to note that a victim usually showed little insight into his deteriorating condition even though his speech and thought became progressively slower and his memory lapsed. "There may be mood-swings, intense irritability, and sometimes truculence leading to uninhibited violent behavior. Simple fatuous cheerfulness is, however, the commonest prevailing mood, though sometimes there is depression with a paranoid colouring."

In 1959 an editorial in the British medical journal *The Lancet* concluded, "The medical case against boxing is now so strong that we have a clear duty to fight

continued

and he was the only man to examine Mohr's brain.

In 1962 the professional boxing world was shocked by the death of Benny (Kid) Paret in a welterweight title bout with Emile Griffith. Paret had been knocked out twice in the previous year—demonstrating, in the view of some observers, a

Cobb would rather forget his shellacking by Holmes last fall, but in this test he showed he could draw geometric shapes from memory.

Boxing *continued*

for its total abolition." But in the U.S. medical opinion was divided, and appeals for the banning of the sport were considered ill-founded and fanatical. A study released by Drs. Harry A. Kaplan and Jefferson Browder in 1954 had taken the steam out of the reform movement. The researchers had given 1,043 boxers electroencephalograms (EEGs), a test that records patterns of electrical activity in the surface aspects of the brain. Kaplan and Browder could find nothing wrong in the EEGs of boxers. Sluggers who were hit often tested no worse than skillful fighters, although those with lower ring ratings tended to have "disorganized" EEGs more frequently. The study noted that derogatory remarks about punch-drunk boxers were prevalent, but that this was only "popular theory." Martland, they said, had no documentary evidence such as theirs. The punch-drunk probably would have suffered the same fate had he never boxed at all. Kaplan said that he had served as a ringside physician for three years and that his slow-motion films showed that most blows in the ring missed their mark. Not surprisingly, defenders of boxing still cite this study, though subsequent research has proved that the EEG doesn't reliably measure the type of brain damage that would result in punch-drunkenness.

The consensus of American medical opinion in the late '50s, at the time of *The Lancet* editorial, could be summed up in the words of Dr. Ira McCown, medical director of the New York Athletic Commission, who wrote in a research paper in 1959 that the notion of punch-drunk was a "medical cliché with which to label any boxer whose performance and behavior in or out of the ring is unsatisfactory or abnormal."

A series of conspicuous fight deaths in the early '60s brought renewed medical attention to boxing. In the spring of 1960 Charlie Mohr, a middleweight from the University of Wisconsin, died of a hematoma he suffered while defending his NCAA championship in Madison, Wis. Mohr was wearing headgear. An overhand right to his padded left temple literally propelled his brain against the other side of his skull, where the fatal damage occurred. His death led to the banning of boxing as an intercollegiate sport, but the controversy over the circumstances continues. The editor of *Ring* magazine claimed earlier this year that Mohr had gone into the ring with an aneurysm, a cerebral blood vessel waiting to burst. But this charge is hotly disputed by the neurosurgeon who operated on Mohr, serious inability to defend himself. That wasn't a big consideration; Paret was known for being able to absorb punishment. Significantly, he had taken a pre-fight EEG and had been found normal.

Davey Moore, a former flyweight champ, was killed in a Los Angeles bout in 1963. Moore, too, had taken and passed an EEG, but he apparently lied to the California authorities about other health problems. It was clear that the medical supervision of boxing was superficial and, thanks to disparate standards among state commissions, gravely inconsistent. Some boxers were fighting in different states under different names; commissions had little knowledge of medical histories. But the very lack of data and the paucity of long-term research dissuaded most doctors from pressing for reform. Boxing, after all, was a popular and powerful industry.

A 1962 *JAMA* report asked for up-

graded safety standards and more thorough medical exams in boxing. It also called for experimentation with "less padding in the gloves so that the threat of damage to the hands will inhibit the power of blows." At the time, eight-ounce gloves were in general use, as they are today. Compared with the six-ounce gloves used early in this century, they reduced hand injuries and facial cuts, but they allowed boxers to punch each other harder in the head.

Meanwhile, in Britain, research on the punch-drunk syndrome continued. A book-length study completed by Dr. A.H. Roberts in 1969 established the condition as a statistical reality. Roberts examined 224 men randomly selected from among 16,781 who had registered as pro fighters. All were retired. Seventeen percent had hard evidence of brain damage, in the form of drooling, slurring, unsteady gait and/or memory loss. An unspecified number of others showed "disturbed neurological function." Roberts' statistics also indicated that the longer a boxer's career had been, the more likely he was to have conspicuous punch-drunk symptoms.

In the same year a psychiatrist named John Johnson reported on the psychological problems of former fighters in the *British Journal of Psychiatry*. Johnson found that 16 of the 17 subjects he examined were suffering from one or more of the following clinical conditions: chronic amnesia, morbid jealousy, undue rage reactions or outright psychosis. Using air encephalography, a technique that produces an X ray after air is injected into the brain, Johnson also found a pattern of cerebral atrophy in 10 of the 17. It had long been known that brain tissue doesn't regenerate, that damaged brain cells are lost forever. More than half the men in the sample, in other words, were missing brain tissue. Johnson was interested in the charge that punch-drunk fighters had drinking problems. Alcoholism, like senility, can cause loss of brain cells and evoke psychological disturbances similar to the ones he studied, but Johnson maintained that the patterns of damage in his air encephalograms of boxers were never seen in alcoholics.

In 1973 came the most important study to date, when the brains of punch-drunk fighters were examined in physical detail. Dr. J.A.N. Corsellis, a neuropathologist, and his colleagues in England

continued

performed autopsies on the brains of 15 former fighters who had died of natural causes. Friends and family members had provided accounts of the boxers' conditions in later life, from which Corsellis had determined that they had been punch-drunk. The autopsies revealed a striking pattern of cerebral atrophy in 14 of the 15. Though the researchers said that medical controls in boxing had probably improved since their fighters were active, they warned: ". . . there is still the danger that, at an unpredictable moment and for an unknown reason, one or more blows will leave their mark. The destruction of cerebral tissue will have then begun and although this will usually be slight enough in the early stage to be undetectable, it may build up, if the boxing continues, until it becomes clinically evident. At this point, however, it could already be too late. . . ."

The abnormalities and atrophy Corsellis found were located deep in the middle of the brain, around the septum pellucidum (*illustrations, pages 62-63*), and also in the cerebellum, the outer section close to the back of the head. The cerebellar structures regulate muscular coordination and balance. A person with damage here may slur his speech or may appear to stagger—"walk on his heels," in ring parlance. The deep midline regions help regulate short-term memory. Forgetfulness may occur if a person has lost tissue here. The conspicuous hallmarks of this damage are abnormally enlarged ventricles, the ventricles being the brain vessels filled with spinal fluid. They expand to fill the space left by the tissue atrophying around them. A more critical finding is a cavum septum pellucidum—literally, a cave in the septum. The jarring from cumulative punches may eventually cause the septum to pull apart, leaving a tunnel-like hole two to eight millimeters wide between the ventricles.

In the 1970s came the introduction of the tool that has revolutionized the medical literature on boxing. This is the CAT scan (computerized axial tomography), a highly advanced form of X ray. With it, abnormalities in the brain can now be observed as they develop and before they result in symptoms. Within the past year three independent studies utilizing CAT scans have come to similar conclusions about chronic brain impairment among boxers.

The first was published in February 1982, in the British *Journal of Neurology, Neurosurgery and Psychiatry*. In this study Casson and other specialists performed detailed neurological examinations, EEGs and CAT scans on nine professional boxers in New York shortly after they'd been knocked out in a bout and on a 10th boxer who had been stopped on a TKO. The 10 boxers, who

continued

Maxie couldn't cuff Olin around in this '34 title fight.

How Punchy Was Slapsie Maxie?

The most frequently cited defense of boxing is that it gives poor kids an opportunity to better themselves, to fight their way out of the ghetto. In the U.S. today that applies primarily to blacks and Hispanics, but in the old days the disadvantaged young fighters tended to be European immigrants' sons—Irish, Italian, Jewish. They were the scrappers reared in the tenements of the turn of the century. Slapsie Maxie Rosenbloom, a light-heavyweight champion in the early 1930s, was one. Born in New York in 1904, Maxie started boxing at the age of 12, not long after being released from the Hawthorne Reform Home for Jewish Boys. He'd been parked there for 13 months for hitting a teacher and knocking out two of her teeth. Soon thereafter his mother enrolled him in ballet school, but that only made him more pugnacious because the other kids on the street called him a ballerina. Maxie later claimed that it was George Raft, the future Hollywood actor but then just another neighborhood pal, who steered him from ballet to a better use of his skills in the ring.

From the beginning Rosenbloom was an eccentric fighter. He never trained very much. He gambled and ran around, and he would get into shape by "dancing" in the gym. But he became an excellent defensive boxer—hard to hit. His offense consisted of open-handed cuffs, delivered in startling flurries, and crazy-legged footwork. He confused his opponents and wore them down. Rosenbloom had several hundred fights as an amateur, winning the New York State light-heavyweight crown in 1930. Damon Runyon, then a sportswriter, dubbed him Slapsie Maxie soon after he turned pro in 1923. On June 25, 1930, the 25-year-old Rosenbloom won the world light-heavyweight title by outpointing Jimmy Slattery in 15 bloody rounds. By then he'd discovered he could make people laugh with his parody of the punch-drunk boxer, the happy-sad staggering figure that fight fans knew so well. That Maxie, they'd say as they watched him prance and joke in the gym, what a card.

Rosenbloom's reign as light-heavyweight champ ended in November 1934 when he lost to Bob Olin, but he continued to fight until 1939. He can't be said to have been a great champion. In 289 professional bouts—a stupendous number—he scored only 18 knockouts. He utterly lacked a killer instinct. Once a referee was about to award him a TKO because his opponent had a badly cut ear, but Rosenbloom told the ref no, don't stop it, I just won't hit the guy in the head anymore. He always liked to go the distance.

The Hollywood film crowd fell in love with Maxie. In 1933, while still champion, he appeared in his first feature, and for the next 25 years he was as active as a character actor as he'd been as a fighter. In more than 60 movies he usually played one of two parts—if he wasn't a boxer, he was invariably the comic tough guy, the B-movie gangster, saying "dese," "dem" and "dose" in his heavy New York accent and getting into trouble with his punchy foolishness.

For a while he had his own nightclub in Los Angeles, Slapsie-Maxie's. When he got up on stage, rocking back on his heels, he'd slur his trademark opening line—"I never liked to hit very hard"—and the audience would break up. He had a gift for the addled malapropism: "Waitress, I'll have a steak sandwich."

"How would you like it?"

"Well-to-do, please."

He used gag writers, but he could ad-lib, too. Countless columnists, knowing Maxie to be a reliable source of funny material, inter-

continued

came from all weight divisions, were from 20 to 31 years old. CAT scans showed that five of the boxers had cerebral atrophy. "We were surprised by [these] findings [in] active boxers," Casson and colleagues reported. Three fighters who had become champions all showed signs of brain damage. A fourth boxer, who was top-ranked, had a normal scan, but he was the only boxer in the series with an organic mental syndrome—memory loss and confusion. Further analysis revealed that the number of bouts was probably of critical importance. Of the five fighters with 20 or more fights, four had cerebral atrophy; of the five fighters with fewer than 12 fights, only one did. The CAT scan of one fighter, whom Casson characterized as a "slugger," showed a cavum septum pellucidum, and he'd had more fights than any of the others. "Since none of the boxers had been knocked out more than two times in their careers," the researchers concluded, "a cumulative effect of multiple subconcussive head blows is the most likely culprit."

Last November in *The Lancet*, Dr. M. Kaste and a team of physicians at the University of Helsinki reported on 14 boxers (six professionals and eight amateurs) who had been Finnish, Scandinavian or European champions. Using EEGs and CAT scans, the physicians found brain injury in four of six professionals and in four of eight amateurs.

Finally, in the controversial *JAMA* issue of last January, Dr. Ronald J. Ross, a Cleveland radiologist, and colleagues published a paper that agreed with the key finding of Casson and Kaste: the more bouts, the worse the CAT scan. Their study involved 40 boxers, only two of them still active. Thirty-eight had CAT scans, and 24 had a complete neurological examination. "The number of bouts fought was significantly related to the presence or absence of ventricular enlargement," wrote the researchers. Moreover, "Patients with abnormal findings on CAT examination did have more frequent neurological symptoms and abnormal neurological findings."

In the same issue with the Ross study was a report by a scientific council formed by the AMA to summarize what was known about brain injuries and deaths in boxing. (Although the report cited the literature on chronic injuries, the council was formed primarily as a reaction to Classen's death. Classen, a middleweight, had been knocked out twice in the eight months before his fatal fight, proving that little had changed in the medical regulation of boxing since Paret's death 17 years before. Kim's death occurred as the council was completing its work.) The council did not recommend a ban on boxing, although two pas-

continued

SLAPSIE MAXIE *continued*

viewed him to find out which sweet thing he wanted to marry next or how much he'd lost at the track.

Maxie was always "on," always in character, whether he was performing or not. A few people began to suspect that it was more than an act. If you didn't know Maxie, you'd have certified him as punch-drunk, because he so looked the part. He had a swollen left ear and a splayed nose. He was jealous of Max Baer, another fighter-actor who did a routine with him, because Baer had bushy eyebrows while Maxie had only adhesions where stitches had been. His slurring and unsteadiness grew more pronounced, though his friends maintained until the end that it was all an exaggeration, as it had been in the beginning.

Though he was out of show business by the late '50s, Maxie was still a minor celebrity at the corner of Hollywood and Vine, not far from the residential hotel where he lived for 25 years, mostly alone. In 1968, while leaving the hotel one night, he was mugged and apparently hit on the head with a pipe. Though he recovered after being hospitalized, within a year he lost his bearings altogether.

In January 1972, with Maxie's relatives nowhere to be seen, a Los Angeles court appointed the executive director of the Motion Picture Fund to be his guardian. Two weeks earlier, the court papers show, "the alleged incompetent," then 67 years old, had been committed to the Braewood Sanitarium in South Pasadena. His friends from show business and sports would come to visit Maxie, at least for the first few years, until he began failing to recognize them. Even so, he was able to get off one more good line: A friend brought in a former boxer to see Maxie—the two had fought exhibitions in the Pacific during the war. Maxie didn't know who the man was. "Maxie," the fighter protested, "you remember New Caledonia, don't you?" Maxie still looked blank but shot back, "I don't even remember *old* Caledonia." According to his death certificate, he expired on March 6, 1976 of heart failure abetted by influenza and Paget's disease, a degenerative bone condition—none of which, presumably, disturbed his twilight of demented contentment.

Although the obituaries reported Rosenbloom's doctor's assertion that Maxie's decline was attributable to the head blows from his numerous fights, sports columnists disputed this. John Hall in *The Los Angeles Times*: "The doctors said he took too many punches and there was 'a good deal of damage to his brain.' That's got to be a lie. Nobody ever hit Maxie. He slapped and slipped and danced. But he looked as if he'd been hit. The twisted nose was smashed all over his magnificent face."

Red Smith in *The New York Times*: "The obituaries said his condition was the result of taking too many punches. Nonsense. Plenty of wives take more punches than Max ever did, and bury several husbands."

To this day most of the people who knew Rosenbloom are vehement on this subject. "Are you crazy?" says Everett Sanders, a former California boxing commissioner, now 88. "I knew Maxie like a son. Maxie Rosenbloom was never punch-drunk. Not at all." Sanders and others maintain that he showed only the effects of premature aging and that the rest was a gag. "He went *senile*, not punchy," says Sammy Lewis, a nightclub partner of Maxie's. "But later in life," Lewis adds, "if you take those punches, something's got to give."

Maxie, sporting square-barreled guns, appeared with Baer in "Skipalong Rosenbloom" in 1951.

Dr. Robert Kerlan, a sports physician who knew Rosenbloom slightly, has perhaps a more balanced opinion. "He had the classic slurring, the cauliflower ears, the scar tissue," Kerlan says. "He was the prototype of the punch-drunk fighter. But the real punch-drunk boxers are a far cry from what Maxie was. Believe me, I've seen them and they're far worse. But Maxie just exaggerated whatever tendencies he had in that direction."

—JEFF WHEELWRIGHT

Boxing M.D. Campbell calls CAT-scan findings "shadows."

sionate editorials in the front of the journal did so. Instead the council called for a national registry of boxers' records and medical histories, more training for ring personnel and standardized safety regulations among state and local commissions. Responding to the *JAMA* initiative, Congress has once more held hearings and proposed legislation to create a federal boxing commission.

Casson, meanwhile, says that he has now seen examples of cavum septum pellucidum on the CAT scans of eight pro boxers. It's disquieting that five of the eight are former world champions and two others were top-ranked. Champion fighters stay on their feet in the ring; they can take a punch. The question is, how much will they have to pay for that durability later in life?

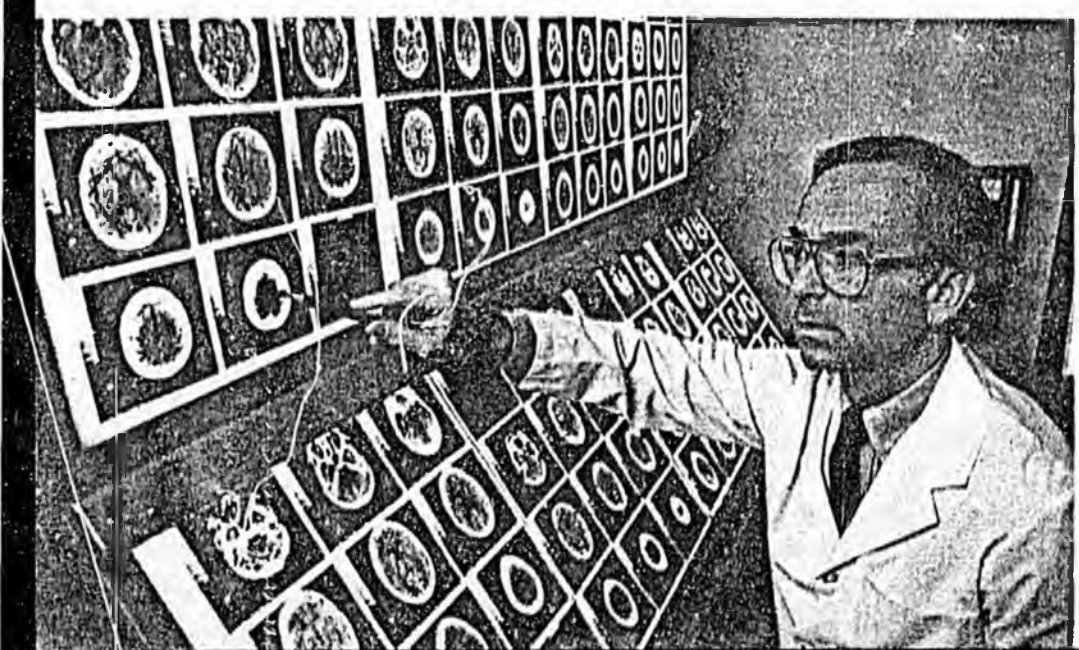
Ali has a cavum septum pellucidum, SPORTS ILLUSTRATED has learned. The abnormality shows up clearly on his CAT scan, along with other indicators of damage or atrophy, such as an enlarged third ventricle. The scan was performed at New York University Medical Center in July 1981, five months before Ali's final fight, with Trevor Berbick. In the radiologist's written report, these two findings are noted, but the conclusion is that the scan is "negative," meaning normal. It's a question of interpretation. In reviewing CAT scans of the general population, neuroradiologists occasionally see a cavum or a widened third ventricle. This atrophy is more often characteristic of older people. But most neuroradiologists aren't familiar with the scans of boxers. They don't know that the atrophy like that found on Ali's scan shows up in 50% of boxers with more than 20 bouts—a percentage far higher than in the general population, and that, by other criteria, these same boxers often show evidence of brain impairment. The cavum abnormality is found four times as frequently in boxers as in non-boxers.

As far back as 1976, Dr. Ferdie Pacheco, a general practitioner who has known Ali since 1962, warned him that he should retire from the ring to avoid brain and kidney damage. In 1977, Pacheco quit working Ali's corner. "If you spent 20 years in boxing and an equal amount of time in medicine, you could see brain injury coming up," Pacheco says. "He took some mammoth beatings. There were the fights with Frazier, Foreman and Norton, to say nothing of all the sparring with Larry Holmes and Michael Dokes. Holmes and Dokes were not ordinary sparring partners. They're now heavyweight champions of the world. A moron could add up the picture of impending brain damage, and I urged him to quit because I didn't think it would be wonderful to have the most joyful, talented guy in the world stumbling around and mumbling to himself. But he was the one who wanted to stay on stage. The only role he knew was being champion. I'd just as soon have been wrong."

At the time of his first warnings, Pacheco was unheeded—understandably, perhaps, because he had no data, no hard proof. But in April of 1980, after Ali announced that he was returning to the ring after a 10-month "retirement" to fight Holmes, his father, Cassius Clay Sr., publicly expressed concern. "I thought he wasn't walking good," he said. "I thought maybe his hip was bothering him. I wasn't sure of his speech, either, but the way I look at it, that boy has been fighting since he was 12 years old. A man can only stand so many licks to the head."

Ali went to the Mayo Clinic in July of that year for a series of tests. The Mayo report, attesting that he was normal, reassured Nevada authorities that he was fit to fight Holmes in October. But after his poor showing—Holmes was awarded a TKO when Ali didn't come out for the 11th round—Ali consulted Dr. Dennis Cope, a specialist in endocrinology at the UCLA Medical Center. Ali revealed that he'd been taking excessive amounts of medication for a thyroid condition while training for the Holmes bout. One of the drug's effects had been to help Ali lose weight, but it also left him drained for the fight. However, Cope's report released in December 1981 declared Ali's thyroid gland normal. Cope also wrote that a neurological examination, which included an EEG and a CAT scan, had found no abnormalities except for a partial or complete loss of smell. The report stated, "The patient tended to talk softly and to almost mumble his speech at times; but when he was questioned about this, he was able to speak appropriately without any evidence of a speech disorder. He was evaluated by a neurosurgeon and neurologist who felt that his speech pat-

continued



Radiologist Ross, who has done 30,000 CAT scans, sees patterns of damage in veteran fighters.

tern was not pathologic." The report concluded, "The patient's health status is excellent and there is no evidence from a health standpoint that he should be limited whatsoever in his activities."

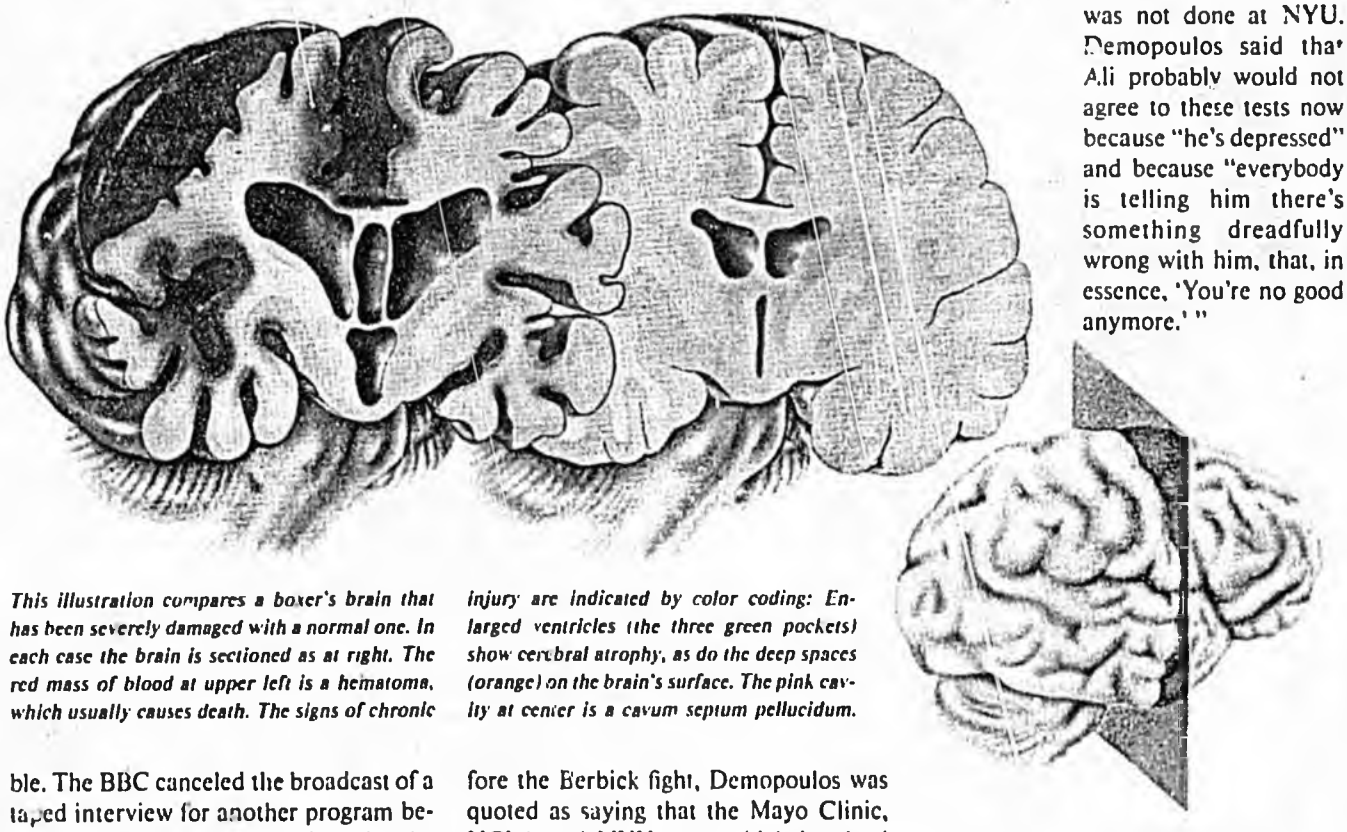
Two weeks later Ali visited England. Interviewed on BBC radio, he slurred his speech, and when he recited a poem on how he would beat Holmes in a rematch, listeners found most of it incomprehensible. The BBC canceled the broadcast of a taped interview for another program because Ali's speech was too slurred to be understood. A BBC spokesman said, "It was very sad that so much of what history's most celebrated fighter said was unintelligible." When a London reporter asked him if he could possibly be punch-drunk, Ali replied, "I have heard about people being punch-drunk, but I do not feel drunk." He added, "When you get as great as me, people always look for some type of downfall."

The series of tests that Ali underwent at the NYU Medical Center in the summer of 1981 was supervised by Dr. Harry Demopoulos, a professor of pathology. Ali had met Demopoulos through Clint Eastwood, the actor, and Demopoulos says, "He [Ali] came here to NYU because he was contemplating going back into the ring, or at least trying to get in shape, to think about it. I don't think any of us encouraged him to go back into the ring. We did encourage him to get back into shape, though. Because he had gotten fat, eating crap, laying around the house. We didn't think that was good for him. So we sort of convinced him that he ought to go through a full battery of tests to see if he could go back into training."

The tests included an EEG, a neurological exam and a CAT scan. Then, before the Berbick fight, Demopoulos was quoted as saying that the Mayo Clinic, UCLA and NYU tests, which involved 30 doctors, all showed "absolutely no evidence that Muhammad had sustained any injury to any vital organ.... His blood tests indicate he has the vessels of a young man." He attributed the slurring to "a psychosocial response" and added, "If the slurring were due to permanent damage, it would be there all the time."

Last February, Casson and SI reporters visited Demopoulos at NYU to review Ali's CAT scan. "They read this as normal?" Casson asked, referring to the NYU neuroradiologists who had approved the report. Demopoulos assented. "I wouldn't have read this as normal," said Casson, looking closely at the sequence of X-rays. "I don't see how you can say in a 39-year-old man that these ventricles aren't too big. His third ventricle's big. His lateral ventricles are big. He has a cavum septum pellucidum." Demopoulos stood by the NYU specialists' negative findings.

In the course of the discussion that followed, Casson made the point that many boxers with enlarged ventricles and a cavum have neurological problems. He said that given what Ali's CAT scan showed, additional testing—particularly exams that identify shortcomings in memory—might have been in order. Such testing was not done at NYU. Demopoulos said that Ali probably would not agree to these tests now because "he's depressed" and because "everybody is telling him there's something dreadfully wrong with him, that, in essence, 'You're no good anymore.' "



This illustration compares a boxer's brain that has been severely damaged with a normal one. In each case the brain is sectioned as at right. The red mass of blood at upper left is a hematoma, which usually causes death. The signs of chronic injury are indicated by color coding: Enlarged ventricles (the three green pockets) show cerebral atrophy, as do the deep spaces (orange) on the brain's surface. The pink cavity at center is a cavum septum pellucidum.

ILLUSTRATIONS BY KIRK MOLDOFF

Casson asked, "What do you base this diagnosis of depression on if a psychiatrist hasn't examined him? Does he have any of the vegetative symptoms of depression? Loss of appetite, changing sleep patterns?"

Demopoulos: "He has changes in sleeping patterns. But I'll tell you what tips you off that it's not an organic problem. The man perks up sometimes under favorable circumstances, and he's just like the Ali of old."

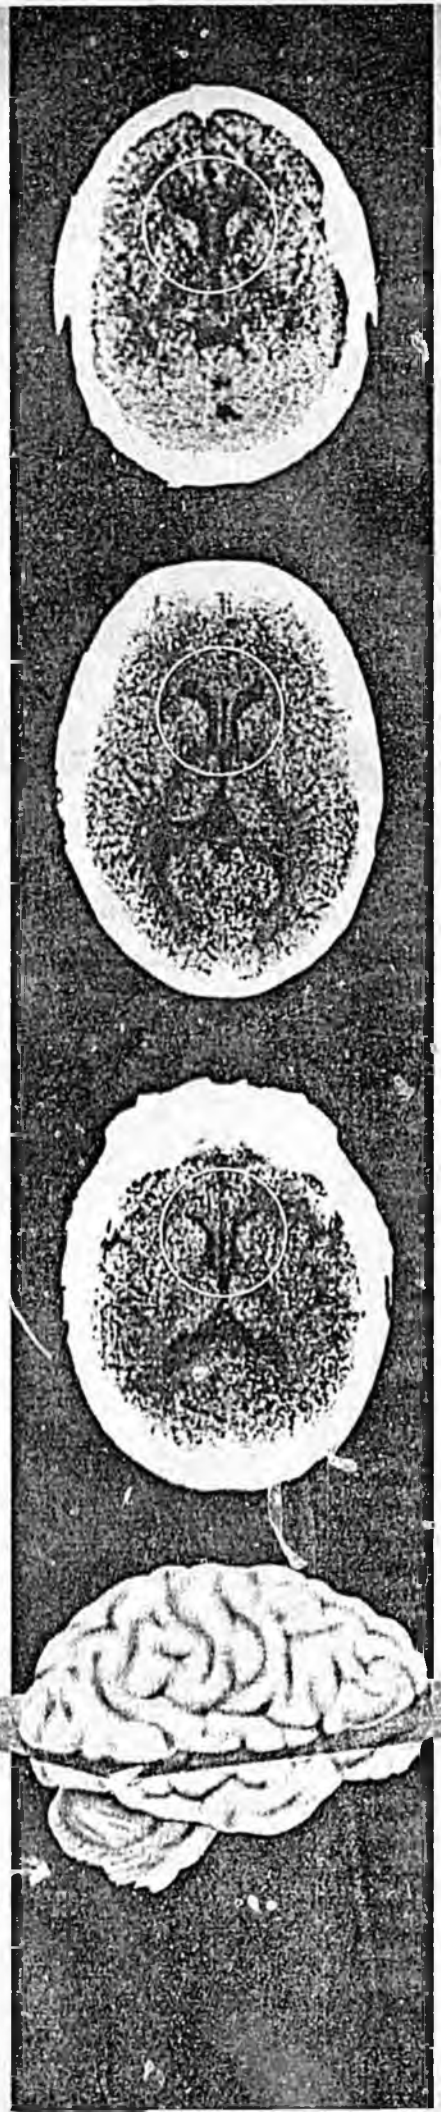
Casson: "Well, that doesn't mean it's not organic. I've seen many patients, especially the early dementias, who one day seem fine, the next day seem terrible, the next day seem fine.... Do you think slurring of speech is from depression?"

Demopoulos: "I think in his case, yes. You have to see the man. You have to meet him, you have to know him, and you have to talk to him."

The testing methods employed by contemporary researchers such as Casson, Ross and Kaste have centered on CAT scans, neurological exams and neuropsychological testing. A formal neurological exam consists of a battery of tests measuring muscle tone and strength, reflexes, coordination and balance (the subject is asked to walk and then hop in a straight line), eye movement, heart and lung function and basic cognitive exercises. In the cognitive tests, the subject is asked to spell some simple words backward or to name the year and day of the week. Casson stresses that in the case of Ali one cannot make a judgment on the basis of the scan alone; one must also test Ali neurologically. Ali's previous neurological results have all been reported as normal, although SPORTS ILLUSTRATED has learned that one of those exams nevertheless revealed a mild organic mental syndrome, *i.e.*, failure to perform normally on the cognitive tests.

In their unpublished, ongoing research, Casson and his colleague, Dr. Ozzie Siegel, chief psychologist at the Queens Hospital Center in New York, have introduced a third test to their study of boxers, the neuropsychological battery. These are standardized probes of perception and short-term memory. The subject is asked to recall the details of a paragraph that is read to him. He also uses a pencil to connect dots and to draw simple geometric designs, once from memory and once with the design in front of him. His performance is timed as well as analyzed. To a layman, how somebody draws a squiggle may not seem like a sophisticated test of brain damage. But Siegel points out that this battery had been used for years to measure damage in victims of head injuries, from such things as car crashes or falls, and it had been found reliable. When neuropsychological tests are given to boxers, say Casson and Siegel, the results tend to correlate with the findings of the CAT scans and, to a lesser extent, the neurological exams.

Which brings us back to SI's tests of Quarry, Cobb and Pacheco, who is not related to Ali's former doctor. All three



From top to bottom are CAT scans of Cobb, Pacheco and Quarry. The illustration beneath them shows where this X-ray "slice" was taken. Yellow circles were added to point out the septum pellucidum, a membrane between the ventricles. Cobb's normal septum is the light vertical line between the dark curving ventricles. But on the scans of Pacheco and Quarry there's a double line with a dark band in between, showing the septum is divided to form a cavum septum pellucidum.

men had CAT scans. At Quarry's camp, all three were given neurological exams by Casson and underwent neuropsychological tests, administered by Casson and evaluated by Siegel, who wasn't present. The CAT scans were reviewed and the results confirmed by specialists other than Casson—Ross and the two radiologists who collaborated on his *JAMA* paper, and Dr. John Bentson of UCLA, where Quarry and Pacheco underwent their scans. Ross and his colleagues did not know the subjects' identities.

First, Cobb. His neurological exam was normal. His CAT scan (*left*) was normal. His neuropsychological results were also normal. In other words, Cobb shows no evidence of brain damage. Is this surprising, considering the beating he took from Holmes and given that he fits the "slugger" mold? The key fact about Cobb is that he has had only 23 professional bouts, most of them victories by knockout, and no amateur fights at all. (He had been trained in karate.) It can be concluded that the cumulative effects of his short career in the ring have not made a mark—not yet, maybe never.

Next, Pacheco. His neurological exam was normal. But his CAT scan showed a cavum septum pellucidum and a mildly enlarged third ventricle. He performed badly on the neuropsychological tests, says Siegel, who guessed—accurately—that his scan would reveal some damage. But Pacheco is only 23, five years younger than Cobb. "I'll bet this guy had a lot of fights," Siegel had predicted to Casson.

Pacheco says he has been boxing since he was four. He estimates that he has had "over a couple hundred" amateur bouts. In his 11 losses as a pro, he has sometimes been hurt, particularly in the back-to-back TKOs in Portland and New York, and since then in a defeat in California in which the ref stopped the fight in the first

continued

round. "The way his record was going," says Dr. Jack Battaglia, who lifted Pacheco's licence after the Portland loss, "he didn't need a CAT scan, he should have just been stopped."

Pacheco himself is disgusted with his career in boxing and won't continue it. "It's not worth it," he says. "The officials are getting worse. I can't give it 100 percent anymore. I'm just tired of it. So I might as well get out before I get hurt." Upon hearing the results of SI's tests, Pacheco reconfirmed his decision to retire.

Finally, Quarry. Like the others', his neurological exam was normal. But his CAT scan was slightly worse than Pacheco's—it showed a cavum, enlarged lateral and third ventricles and a suggestion of cortical atrophy. And his neuropsychological results were poor. Says Casson: "He did poorly on the test of visual motor perception. He did poorly on that test of connecting the dots. The only one he did well on was the digit symbol test. The psychologist and I are not saying that Quarry is punch-drunk where he can't walk straight, that kind of thing. What we're saying is that he has problems with certain cognitive functions—short-term memory and perceptual motor ability."

Quarry had his first formal fight at the age of five, a junior Golden Gloves event. At 16, he had had 105 amateur bouts. His amateur record was 170–13–4, and his pro record 51–8–4. One of his early losses occurred 10 days after he broke an ankle. His trainer, Harold Taber, went to Quarry's father, who was then the boy's co-manager, and told him that Jerry couldn't fight because his ankle was broken. "He's got to fight," Quarry's father said. "We've got to have the money." Before the fight, father and trainer took Quarry to "a Mexican witch doctor," says Taber, "who put fire on his ankle and everything, but they still stuck him in there."

Quarry says, "I fought a lot of fights I shouldn't have fought—one with a broken hand, one with hepatitis and another one with a broken back. I was 22 years old. I was so naive and young I didn't have the intelligence. If I had the intelligence I have now, there's no way in hell I would have gotten in the ring like that. I figured I had some people behind me, especially my father being my co-manager, that they would have pulled me out. But no, they needed the money, so they sent me to the wolves. 'Prostitute him'—that's exactly what they did."

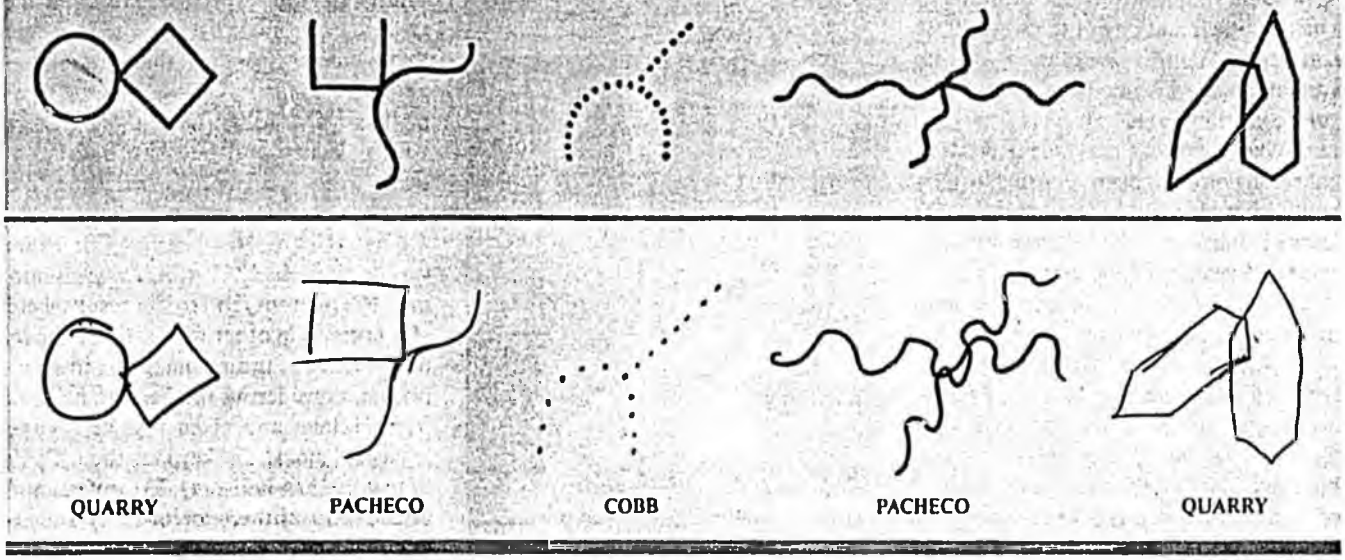
As Quarry says these words, he doesn't sound bitter, and he doesn't sound punchy. A thoughtful, animated man, he is mindful of the need for medical reform in boxing, yet personally philosophical, not bothered by the threat of brain damage. "You step into the ring," he says, "and you know there's a chance of getting knocked out, of getting hurt, but you figure your abilities are good enough that you can handle yourself appropriately." But he hopes that federal legislation will result in uniform medical standards and that these in turn will protect fighters from ruthless managers. "The manager is the one putting a fighter back into the ring one week after he's been knocked out," he says. "But if they have strict enforcement of physicals, then the manager won't have a damn thing to do with it." Quarry's scenario for himself, which apparently wasn't altered by learning the results of the tests, is to get in shape and, if all goes well, mount a challenge for the cruiser-weight title.

Although Casson was troubled by the prospect of Quarry's return to the ring—he urged Quarry against it—he emphasizes that his research has not convinced him that boxing should be banned. Casson describes himself as a sports fan; he will watch a fight on TV. "No matter what anybody says, boxing will continue," he says. But he thinks that young boxers could reduce their chances of in-

continued

Significant Squiggles

In their neuropsychological exam, Quarry, Cobb and Pacheco each took a test of visual motor perception, which measures ability to reproduce simple designs like those in the top row. Cobb's figures were normal. Errors by Pacheco and Quarry, even subtle tilting or overlapping, show brain injury.



jury by passing up unnecessary bouts at the lower levels and fighting only to advance their careers. "Even bums hit you in the head," he observes.

But to become a champion, wouldn't a boxer have to withstand a sufficient number of punches, 20 or 30 fights' worth, to affect his CAT scan, even if those punches didn't result in neurological or punch-drunk symptoms? Just when his work was beginning to pay off, would a doctor tell him he should stop? A real dilemma, Casson concedes. Still, he says, "A boxer ought to know what he's getting into if he wants to go on and be a champion. He should know what he may be sacrificing. A doctor has to tell the boxer if he thinks the fighter should stop, but in the end it's not really a medical decision. Society has to decide what we're going to do about boxing."

Just how bad is the brain damage that shows up on CAT scans and neuropsychological tests? For Quarry and Pacheco and perhaps Ali, it's not bad, not a disability. Minor memory failures aren't crippling. But aging certainly compounds whatever deterioration may exist, as all the research shows.

Physicians who disagree with the implications of Casson's work and that of researchers like Ross point out that there are no *prospective* studies; that is, studies that track a younger boxer with alleged abnormalities over a period of 10 or 20 years.

"I think we're jumping the gun," says Dr. Edwin Campbell, medical director for pro boxing in New York. Campbell helped enlist the fighters for Casson's studies and was a co-author, but says, "We just haven't done enough work yet. And we don't know how boxers compare with athletes in other sports, like football, who get frequent concussions."

Casson and Ross are the first to admit that more detailed, long-term work should be done. "But let's start now," Casson says, "before another generation of fighters comes through." Though Ross's work received considerable publicity, three months later he's frustrated by the lack of follow-up concern. "The big people in boxing haven't commented," he says. "Who's going to pay for these longer studies? What's being done? I'm afraid everything's going to die down."

The new legislation being discussed in Congress would create a commission to institute national standards among state commissions for all pro fights. There would be rigorous physical screenings and a "passport" for each boxer that would certify his medical history from past bouts. But CAT scans and full neurological exams before and after fights aren't practical—nor, at $300 apiece, cost-efficient, given what the average boxer earns. Casson and Siegel suggest that their neuropsychological tests, which are easy and cheap to administer, might serve as a first screen for possible brain damage. They have developed an "impairment index." If a fighter scores abnormally on at least half their tests, they have found, his CAT scan and/or EEG will also show abnormalities. Of course, no legislation is a substitute for vigilance and care within boxing itself. Dr. Battaglia of Oregon points to the ringside physicians. "If you've got problems on a CAT scan, you're too darn late," he says. "You've got to pick up the signs in these kids way before then. If I see a kid taking three licks now to put one in, as far as I'm concerned school's out—*then* you do the scan."

Will there be real reform? Cobb's reaction to the brain injury controversy may give a clue, even though he might be described as a boxing anarchist. "Dammit, I'm a grown man," he says heatedly. "If a man doesn't want to fight, then lay down, sucker. I'm not going to have someone run my life for me. If you get a federal commission involved, all you're going to have is a bunch of political appointees. A lot of flurry, a lot of fluff, all show and no go.

"I'm a whore who sells his blood instead of his ass. But that comes with the sport." END

A Conversation With The Greatest

I'd been trying to reach him for weeks, but I was still surprised—unprepared, in fact—when I picked up the ringing phone one night and there was Muhammad Ali. He was in fine fettle, charged up, and what ensued was not an interview so much as a vintage Ali monologue:

"Why do you want to check my brain? How about white boxers—Jerry Quarry, George Chuvalo, are you going to show their brains? No, it's me, a leader of the black people, they want to say I have a brain injury, that I'm crazy. I won't be no guinea pig, it's an embarrassment, a humiliation. What about my reputation, my family, my children—they're worth more to me than anything. For me to take that gamble, even to show nothing's wrong, I'd have to have $10 million. . . .

"Why don't you do a test on Richard Nixon's brain? Get the top whites and let *them* submit to it. I'll tell you what. You get the wisest of the whites, you get William F. Buckley and some others, the brainiest. I'll pay 'em $25,000 to go on TV with me and let 'em try and trip me up, ask me any questions they like, any subject they want. Then we'll all do the brain show afterwards, for everyone, on TV. I want an hour and a half. . . .

"Do you think, talking to you, that I sound crazy? Do I? Do you have this on tape? You don't? Well there's something wrong with *your* brain. . . . Why are they picking on boxing? It's because the black men are so superior in boxing that they want to stop it. Well, the black man's so hungry, he's got to fight. Yes, I think it's racial, the whole thing. . . ."

Ali talked for half an hour. I got in a few sheepish words edgewise. But as he went on, he began to wind down and repeat himself. He was not interested in my questions. It has always been his pattern, even when he was in his early 20s, to grow tired of declaiming. Now his fatigue was obvious. He began to mumble and speak more and more softly. The angry tape in his head, what he wanted to say, was running out, or going onto a loop. At the end he was talking as if in a trance of self-hypnosis. He didn't hang up, he just dropped the phone. —J.W.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU ALASKA 99811
907-465-3800

MEMORANDUM April 13, 1983

SUBJECT: Boxing regulation
(Work Order No. 13-1161)

TO: Representative Walt Furnace

FROM: Russ Josephson
Legislative Counsel

While drafting your bill concerning the regulation of boxing, Steve Levi and I have discussed several aspects of the approach taken in this bill. He asked me to indicate to you some of the areas of difference between your bill and HB 241, introduced by Representative Martin.

First, a number of provisions relating to the athletic commission have been omitted, as your approach calls for regulation of boxing by the Department of Commerce and Economic Development, without a board.

Another difference between the bills is that your bill will license only promoters, referees, and boxers, while HB 241 licenses several other classes of persons involved in boxing. I have provided regulatory authority to the department to license others should the need arise in the future.

Your bill has none of the restrictions of HB 241 concerning contestants, such as age limitations and restrictions on the use of alcohol or drugs. Your bill contains none of the provisions of HB 241 regarding equipment, although the department has been given regulatory authority to cover this should they desire to do so. Similarly, the details of holding contests, such as the limitation of rounds, have been omitted. Again, the department might address this in regulations if they so desire.

No provision appears in your bill concerning cancellation of contests and the notification of the public of a cancellation. The provision for promoter's bonds deals with the subject by

requiring a good faith effort to put on the contest for which the tickets have been sold.

No provision appears in your bill to handle they payment of fees to the referee, the examining physician, or the attending physician. The bonds provision above is intended to assure that the boxers are paid as contracted.

Your bill contains no provisions concerning telecasts, reports, or the taxation of receipts of contests or telecasts. No provisions prohibit sham contests or the participation in the purse of a boxer or manager by a promoter.

Unlicensed contests are prohibited, but there is no provision to enjoin them.

There is no provision to suspend a license of a person licensed under the chapter the bill creates. Revocation of a license is possible for participation in or for promoting an unsafe contest. No other ground for license revocation has been specified.

In brief, those are the differences between the two bills.

In addition, I would point out a few things in the bill that appear to deviate from your request and explain them. In the section providing for an attending physician, the medic/paramedic option has been omitted. After reviewing the qualifications of those people and talking with the Department of Health and Social Services, I felt that you would be better with a physician in that role. First, the Department of Health and Social Service's answer to the question of what level of emergency medical technician would be qualified was "None". Second, I think that you very well may run into legal problems with the paramedic approach. I doubt that their licenses would cover them if they act as attending physicians. The same thinking applies to the use of paramedics to examine boxers before a bout. I think that in both cases you will find that the paramedics are practicing medicine beyond the limits of their licenses.

Another difference between HB 241 and the request is in the section on licenses. You will note that an "individual" may apply for a boxer's or referee's license and that a "person" may apply for a promoter's license. The word "person" in the statutes, under AS 01.10.060, covers all applicants listed in your request for the promoter's license. So,

where you mean a person in the common sense, "individual" is used.

Finally, you requested a section excluding certain contests. Some of those are not mentioned in the section of this bill that limits the authority under the chapter. This is simply because it is clear that the chapter covers only professional boxing. It was not necessary, therefore, to say that wrestling was not covered, for example.

If I may be of further service, please let me know.

REPRESENTING ACUTE, LONG TERM AND OUTPATIENT FACILITIES

April 1, 1983

The Honorable Jerry Ward
House of Representatives
Pouch V
Juneau, Alaska 99811

Subject: HJR 35.

Dear Representative Ward:

The Alaska State Hospital Association wishes to indicate our support for House Joint Resolution 35.

We believe that the use of health insurance by those who are entitled to services provided by the Alaska Native Health Service would be in the public's best interest. That additional influx of funds would allow the Alaska Native Health Service to continue to provide needed services in the face of federal budget reductions.

The Alaska State Hospital Association believes that the concepts in HJR 35 are necessary if an adequate health care delivery system is to continue in Alaska. We believe it merits legislative support.

Sincerely,

Dennis L. DeWitt
President

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 257 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to certain limitations and exclusions in health insurance policies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. COVERAGE WHEN ALASKA AREA NATIVE HEALTH SERVICE BENEFITS AVAILABLE. An ~~individual or~~ group health insurance policy that provides coverage on an expense incurred basis or ~~an individual or~~ group service or indemnity type contract issued by a nonprofit corporation may not exclude or limit coverage for the reason that the covered person is eligible to receive health care benefits provided by the Alaska Area Native Health Service.

* Sec. 2. This Act applies only to policies and contracts issued or renewed after December 31, 1983.

* Sec. 3. This Act takes effect January 1, 1984.

M E M O R A N D U M

DATE: May 2, 1983

TO: Jeff Barry, Professional Assistant
House Labor & Commerce Committee

FROM: M. E. Tirador, Manager
Alaska Provider & Government Relations
Blue Cross of Washington & Alaska

SUBJECT: Committee Substitute for HB 257

This memo is for information purposes only. There is no intent on behalf of Blue Cross of Washington and Alaska to either endorse or oppose this legislation. In the very near future, the Federal Government will probably initiate changes in the Indian Health Service delivery system that will render this legislation moot.

Blue Cross of Washington and Alaska doesn't believe there is an obligation for Indian Health Service beneficiaries to pay for services received in Indian Health Service hospitals or clinics. Therefore, if there is no obligation to pay, no third-party payor has an obligation to a policyholder or subscriber. In my experience, the Indian Health Service apparently is not in a position to render billings for services. The accounting mechanism is not presently able to provide itemization necessary to properly adjudicate a claim.

As I understand this bill, the Indian Health Service hospitals and clinics would benefit from third-party payment for services provided policyholders who are also Indian Health Service beneficiaries. This may be a fallacy because in instances where only contract hospitals might be directly reimbursed, the patient would receive payment and not the hospital. This could encourage over-utilization of health care services and make medical necessity take second place.

This bill might be considered to be a subsidy to the Federal Government in providing health care services to Alaska Natives and American Indians. A double taxation measure, if you will. This is also a bill requiring the first dollar come from third-party payors rather than an effort to coordinate benefits using the Indian Health Service as any other third-party payor. The result of such legislation could well be an increase in the premiums paid by other subscribers, but would directly benefit the Federal Government.

HB 257

IV Analysis: Premiums are assumed to increase by 8% per year.

The impact of this bill is estimated to be a 1% increase in premiums. These cost figures are based on the assumption that the state's plan will be primary when benefits are available through the Alaska Area Native Health Service.

REPRESENTING ACUTE, LONG TERM AND OUTPATIENT FACILITIES

April 1, 1983

The Honorable Jerry Ward
House of Representatives
Pouch V
Juneau, Alaska 99811

Subject: HB 257.

Dear Representative Ward:

The Alaska State Hospital Association wishes to offer our support to the concepts found in House Bill 257.

We believe that it is imperative that the Alaska Native Hospitals be able to collect third party payments for services they provide. With the impending reductions in federal funds, all potential sources of revenue must be pursued by the ANS facilities if they are to remain viable and up to the standard of quality Alaskans have the right to demand. While some may scoff at HB 257, we suggest that is how most forward looking proposals are treated. Without this gradual movement away from depending on federal funding, health services to Alaskan Natives will soon only be a memory.

The Alaska State Hospital Association commends your willingness to address this critical issue in such a meaningful fashion.

Sincerely,

Dennis L. DeWitt
President

Analysis of SSMB 258

The incorporation of this expanded credit in effect would reduce state taxes as a deductible item at the federal level and thus increase the federal tax take at the expense of Alaska.

The bill is also discriminatory in that it applies only to specified geographical regions within the state.

The impact of this bill is negative to the state in terms of lost revenues. The quantitative impact cannot be assessed due to carry forward and carry backward provisions which vary from one existing operation to another. If the bill is intended for new facilities, the effect cannot be assessed until they are completed and in operation.

SPECIAL INVESTMENT TAX CREDIT LEGISLATION

As projections of declining revenue loom in Alaska's near future, we must begin to diversify our economy so that both state government and local economies are not so heavily dependent on oil derived revenues. I have introduced legislation which would accomplish this goal by establishing a special investment tax credit. Such a credit would apply for investments to develop gas processing facilities South of the Arctic Circle and to investments for exploration, development and mining of minerals other than oil and gas throughout Alaska. A major priority of both myself and the House Majority is diversification of our economy. I believe enactment of this legislation would go a long way towards achieving that goal. MAKING IT EQUAL 100% FEDERAL CREDIT

Currently state law limits the amount of investment tax credit (ITC) which is allowed to corporations in computing their Alaska income taxes to 18% of the amount of investment tax credit which is allowed for federal income tax purposes. So while the Federal ITC is 10%, the Alaska investment tax credit is only 1.8%. Current law also limits the ITC which is allowed in computing Alaska income taxes to the first $20 million of qualified investment put into use in the state for each taxable year. That limitation would be removed by this bill.

The Alaska tax credit would only apply to investments which also qualify for the federal credit. This is primarily personal proprty such as trucks, machinery and manufacturing equipment.

2 1/2 - MILLION (27-M) NO FISCAL NOTE

It would not include roads, buildings, mine sites and such things as feasibility studies. Using the $1 billion Quartz Hill mine project for example, a very limited amount of that development would qualify for the tax credit. But enough of an incentive would be created to attract industry to Alaska that currently is lacking.

The promotion of exploration, development and mining of minerals and other natural deposits in the state will encourage development of Alaska's non oil and gas mineral resources. This legislation would also accelerate the diversification of the state's economy and employment base.

One new addition to this legislation, not included in the version which passed the House last session, 866 is inclusion of gas processing facilities South of the Arctic Circle. There are areas in Alaska where established infrastructure, access to ice free ports and substantial amounts of uncommitted reserves of natural gas combine to provide great potential for gas processing development and export activity. The development of these gas processing facilities will promote full and stable employment and minimize adverse population and environmental impacts.

I expect the impact on state revenues upon enactment of this legislation would be minimal. While initially there would be be a slight loss of revenue, the long range goal to promote investment and development would increase non petroleum related revenue in future years. The investment tax credit is a temporary tax reduction directly tied to profitable investment that will produce increased revenues in the future. Additionally, investments in targeted industries may substantially expand local governments sales and property tax bases. If the Prudhoe bay curve is accurate, and oil revenues begin to decline in the late 1980's, it is our responsibility to plan to offset that decline. I am confident it will have the support of the administration, which has stated a desire to reach this goal as well.

SUBJECT: Special investment tax credit (HB 258)

TO: Representative Joe L. Hayes

FROM: Richard C. Folta
Legislative Counsel

You have requested a sectional analysis of HB 258, relating to special investment tax credits.

Section 1 of the bill modifying the special investment tax credit for state corporate income taxes, sets out the state legislature's purpose, which is identical to the congressional purpose, in providing for an additional allowance for tax credits for certain property. The thrust of the investment credit is to stimulate the economy through encouragement of investment in productive resources, which tend to wear out at quicker rates than those which have been recognized by depreciation previously allowed by the Internal Revenue Service. In the Alaska case, these special properties which the sponsor wishes to give additional credits, are stated to be gas processing facilities and mineral extraction systems established south of the arctic circle in the State of Alaska.

Section 2 of the bill provides that the 18 percent investment credit limit on state corporation income tax will not be applicable for the gas processing facilities and mineral extraction systems established south of arctic circle.

Section 3 of the bill provides for a 100 percent investment credit instead of the previous 18 percent for gas processing facilities and mineral extraction systems. Subsections (j) and (k) also provide that the 20 million dollar investment credit allowed will not be in addition to that under sec. (b). There is also a provision that the credits will not apply on leased property -- they have to be purchased properties.

Sections 4 and 5 provide that the tax years for credit considerations under this bill begin January 1, 1984, and this act will be in effect immediately upon passage.

3. GAS PRODUCTION

IN THE HOUSE BY HAYES AND SZYMANSKI

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 258

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing a special investment tax credit; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE FINDINGS AND INTENT. The legislature finds and declares that

(1) there exist areas of the state south of the Arctic Circle in which the factors of established population centers, established infrastructure, access to ice-free ports, and substantial uncommitted reserves of natural gas combine to provide an optimum basis for gas processing development for an export market;

(2) development of gas processing facilities in the areas will minimize adverse population and environmental impacts on the other areas of the state;

(3) development of gas processing facilities in the areas will promote full and stable employment, promote the creation of export markets for the natural energy resources of the state, and promote the long-term development of other natural resources in the state;

(4) it is in the statewide public interest, and is declared to be a public purpose, to promote the prosperity and general welfare of all citizens of the state by stimulating the development of gas processing facilities in such areas;

(5) it is further in the statewide public interest, and is declared to be a public purpose, to promote the exploration, drilling of wells, development, and mining of minerals and other natural deposits

(other than oil and gas) in the state, to assist the state by diversifying its economy, to make it less dependent on oil and gas, provide increased employment opportunities and provide an incentive for investment in the state; and

(6) the establishment of a special investment tax credit is necessary in order to promote and accomplish the objectives listed in (1) - (5) of this section.

* Sec. 2. AS 43.20.021(d) is amended to read:

(d) Where a credit allowed under the Internal Revenue Code is also allowed in computing Alaska income tax, it is limited to 18 percent for corporations of the amount of credit determined for federal income tax purposes which is attributable to Alaska. This limitation shall not apply to the credits allowed by AS 43.20.036(j) and (k).

* Sec. 3. AS 43.20.036 is amended by adding new subsections to read:

(b) For purposes of calculating income tax payable under this chapter the taxpayer may apply as a credit against a tax liability 100 percent of the investment credit allowed as to federal taxes under Internal Revenue Code Section 38 (26 U.S.C. 38 P.L. 87-834) on the full amount of qualified investment put into use south of the Arctic Circle in the state for each taxable year for gas processing facilities; for the purposes of this paragraph, "gas processing facilities" means plants and facilities for processing any product, other than crude oil, of an oil or gas well, including but not limited to liquefied natural gas, methanol and urea processing plants and facilities, excluding any pipelines from oil and gas wells to any plants and facilities. The amount of credit allowed under this subsection shall not be subject to the limitations imposed by (b) of this section, but any credit which is allowed under this subsection shall not also be

allowed under (b) of this section. No credit shall be allowed under this subsection for any investment credit which is allowed as to federal taxes for leased property by reason of section 168(f)(8) P.L. 97-34 of the Internal Revenue Code (26 U.S.C. 168(f)(8) P.L. 97-34).

(k) For purposes of calculating income tax payable under this chapter the taxpayer may apply as a credit against a tax liability 100 percent of the investment credit allowed as to federal taxes under Internal Revenue Code Section 38 (26 U.S.C. 38 P.L. 87-834) on the full amount of qualified investment put into use south of the Arctic Circle in the state for each taxable year for exploration, drilling of wells, development, or mining of the natural deposits listed in Section 613(b) of the Internal Revenue Code (26 U.S.C. 613(b))(P.L. 89-809 and P.L. 88-571); for the purpose of this subsection, "mining" has the meaning given in Section 613(c)(2) of the Internal Revenue Code (26 U.S.C. 613(c)(2) P.L. 85-866). The amount of credit allowed under this subsection shall not be subject to the limitations imposed by (b) of this section, but any credit which is allowed under this subsection shall not also be allowed under (b) of this section. Credit shall not be allowed under this subsection for any investment credit which is allowed as to federal taxes for leased property by reason of Section 168(f)(8) of the Internal Revenue Code (26 U.S.C. 168(f)(8) P.L. 97-34).

* Sec. 4. This Act applies to tax years beginning after December 31, 1983.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.-10.070(c).

CIRI COOK INLET REGION INC.

Inter - Office Memorandum

TO: Lance Anderson, Vice President, Finance

FROM: Steve Hillard, Vice President and General Counsel

Date: March 28, 1983

Subject: CONSTITUTIONALITY OF GEOGRAPHIC CLASSIFICATION IN INVESTMENT TAX CREDIT BILL

You have asked for a review of the constitutionality of a geographic distinction contained in an bill drafted by CIRI and introduced in the Alaska State Legislature. The legislation will grant certain investment tax credits to those gas processors located south of the Arctic Circle. The question presented is whether this type of classification, based on geography, violates the United States or Alaska Constitutions.

Based upon a review of pertinent federal and state authorities, it is my view that the proposed legislation does not violate the United States or Alaska Constitutions.

I. Federal Constitutional Issues

It is useful to note at the outset that there is one significant constitutional provision which does not appear to apply to the proposed tax credit. The United States Constitution provides that all taxes levied by Congress shall be uniform throughout the United States. U.S. Const. Art. 1, Section 8. The United States Supreme Court has consistently interpreted this requirement to mean geographic uniformity. Knowlton v. Moore, 178 U.S. 41 (1900); Steward v. Davis, 301 U.S. 494 (1938). Under this interpretation, distinctions among the states are impermissible. Thus, the United States District Court for the District of Wyoming has recently held that the Crude Oil Windfall Profits Tax Act of 1980 is unconstitutional because it exempts oil produced from north of the Arctic Circle. Ptasynski v. United States, 82-2 USTC Para. 9654 (D.C. Wyo. 1982). The court noted that although rational justifications for the exemption do exist, the exemption is specifically forbidden by the Constitution. In short, the court appeared to hold that geographic distinctions are per se unconstitutional. The United States Supreme Court recently has determined to review this distinction.

In light of these precedents, it would appear that if Congress were to enact the proposed bill, the bill would run a strong risk of being held unconstitutional. The federal uniformity provision, however, by its terms applies only to acts of Congress, not acts of the states. Generally it has been held, for example, that there is nothing in the United States Constitution which requires state taxation to be uniform. See Carmichael v. Southern Coal Co., 301 U.S. 495 (1937). Thus, the proposed legislation does not violate the uniformity clause of the United States Constitution.

It is also possible to assert that the legislation violates the Equal Protection Clause of the Fourteenth Amendment. It might be contended, in other words, that the proposed legislation impermissibly discriminates against gas processors

located north of the Arctic Circle. The United States Supreme Court, however, has consistently held that where state "taxation is concerned and no special right, apart from equal protection, is imperiled, the States have large leeway in making classifications and drawing lines which in their judgment produce reasonable systems of taxation." Lehnhauser v. Lake Shore Auto Parts, 410 U.S. 356 (1973); State Board of Tax Comm'rs of Indiana v. Jackson, 283 U.S. 527 (1931). The appropriate test to be applied to state taxation schemes is whether the state classification has a "rational basis" or whether it is "palpably arbitrary" or "capricious." Id. If "any state of facts reasonably can be conceived" to justify a classification, the Court will sustain it.

Applying the foregoing principles to the proposed legislation, it appears that the Supreme Court would uphold the classification. Although not in the context of a taxation case, the Supreme Court has specifically stated that the "Equal Protection Clause relates to equality between persons as such rather than between areas . . . . Territorial uniformity is not a constitutional requisite." Salsburg v. Maryland, 346 U.S. 545 (1954). In the tax area, the Court has upheld a state tax which provided for different tax rates based on the "gravity" of certain oil and which arguably discriminated between oil produced in Northern and Southern Louisiana. Ohio Oil Co. v. Conway, 228 U.S. 146 (1930). The Court held that the classification based on "gravity" was not unreasonable. Although not directly on point, since the case did not involve a specific geographic distinction, Conway does confirm that the Court will apply a relaxed standard of review to state taxation schemes and that all areas of a state need not have an equal tax burden.

A number of lower courts have specifically addressed state tax classifications based on geography. These courts have held that "distinctions based on geographical areas are not, in and of themselves, violative of the Fourteenth Amendment." Levy v. Parker, 346 F.Supp. 877 (E.D. La. 1972); McCarthy v. Jones, 449 F.Supp. 480 (S.D. Ala. 1973) (no "rational basis" for different tax rates for different counties); Weissinger v. Boswell, 330 F.Supp. 615 (M.D. Ala. 1979) (same). These courts have explained that a state "must demonstrate, if it wishes to establish different classes of property based on different geographical locations -- e.g., rural areas as opposed to urban areas -- that the classification is neither capricious nor arbitrary but rests upon some reasonable consideration of difference or policy." Id.

The question thus remains whether the justification asserted for the geographic classification in this case -- to encourage the location of a certain industry in a certain region of the State -- is sufficient to sustain the classification. Although I have not found a case directly on point, the Supreme Court has suggested that tax classifications designed to create incentives for business to locate within a state are permissible. In Allied Stores of Ohio v. Bowers, 358 U.S. 522 (1959), the Court stated that a tax statute which "encourages the location within the state of needed and useful industries by exempting them, though not also others, from its taxes is not arbitrary and does not violate the Equal Protection Clause of the Fourteenth Amendment." The same rationale would appear to apply equally well to the proposed legislation here, since it is designed to encourage location of a business in a particular part of the state.

II. Alaska Constitutional Issues

There are at least three potential issues under the Alaska Constitution. First, the legislation might violate an implied requirement of "equality and uniformity" of all state taxes. Second, the legislation might violate the Equal Protection Clause found in the Alaska Constitution, Article I, Section 1, which has been interpreted somewhat differently from the Equal Protection Clause of the Fourteenth Amendment. Third, the legislation might constitute a "local or special act" prohibited by Article II, Section 19 of the Alaska Constitution. Let me address the first two issues together, since they are interrelated.

It is necessary to begin with a bit of background. The vast majority of state constitutions embody some provisions for "uniform or equal" taxes. There is, however, no such provision in the Alaska Constitution. The general rule appears to be that in the absence of express provision in the state constitution, it is not essential that state tax statutes operate equally and uniformly. See generally 84 C.J.S. 2d. Taxation, Section 21 (discussing authorities). However, at least one court has held that the principle of uniformity in taxation applies even in the absence of an explicit constitutional provision. See, e.g., Commissioners of Sinking Fund of City of Louisville v. Ohio Valley Grocery Store Co., 240 S.W. 2d 56 (Ky.). Thus, there is at least some possibility that a court might imply a uniformity requirement in the Alaska Constitution.

This possibility is further complicated in the State of Alaska. Although the Constitution of the State of Alaska nowhere requires state taxes to be uniform, Section 9 of the Organic Act of Alaska, 48 U.S.C. Section 28, provides that "all taxes should be uniform upon the same class of subjects." Under the Organic Act, the courts have interpreted the requirement of uniformity to require geographic uniformity. In Hess v. Mullaney, 91 F.Supp. 139 (D.C. Alaska 1950), reversed on other grounds, 189 F.2d 417 (9th Cir. 1950), the court considered whether Alaska's first property tax violated the uniformity requirement of the Organic Act. The property tax levied a tax on all properties in the state, provided that if the property was located within an incorporated city, town or school district, that entity should assess and collect the tax. Plaintiff claimed that the tax was unlawful, since property would be taxed differently depending on where it was located. The District Court agreed, reasoning that classifications may not be based on geographical lines or mere location of the property.

This view was somewhat modified in a successor case, Hess v. Mullaney, 102 F. Supp. 430 (D.C. Alaska 1952), affirmed, 213 F.2d 635 (9th Cir. 1954). Although the court ultimately upheld the property tax, it acknowledged that "unquestionably, systematic geographical discriminations in the burdens of taxation have been held void." The court found, however, that "we assume that the uniformity clause of the Organic Act requires the same measure of uniformity or equality which is required by the Equal Protection Clause of the Fourteenth Amendment." The court held that under the "rational basis" test, it was reasonable for the legislature to have cities assess and collect taxes for property within their jurisdiction.

In light of the foregoing, a strong argument can be made that a separate and distinct "uniformity" requirement no longer exists in Alaska. First, the Alaska Constitution does not provide for uniformity. The Organic Act is a mere act of Congress, and, whatever its continuing effect in light of Alaska statehood, it

probably adds little to the provision of the Alaska Constitution. Second, even if the uniformity requirement of the Organic Act is still controlling, the Ninth Circuit in Hess v. Mullaney held that the Alaska uniformity requirement is no stricter than the equal protection requirement.

A recent case, State v. Reefer King Co., Inc., 559 P.2d 56 (Alas. 1976), support this view and is particularly relevant to this case. The case involved the constitutionality of a state tax which drew a distinction between "floating" and "shore-based" fish processors. Because the tax placed a higher tax rate on floating processors, the floating processors claimed that the statute created an illegal classification under the State equal protection clause. The Alaska Supreme Court rejected that contention. Although the classification could in one sense be deemed to be a "geographical" classification, the Court did not even mention the Hess v. Mullaney cases. Instead, the Court held that the classification should be tested against the State's equal protection analysis, which provides that a statutory classification must

> "be reasonable, not arbitrary, and must rest upon some ground of difference having fair and substantial relation to the object of the legislation, so that all persons similarly circumstanced, shall be treated alike."

The Court held that the classification reflected a legislative judgment that shore-based processors make a more valuable contribution to the State's local economies than the floating processors. According to the Court, it is not arbitrary for the legislature to conclude that shore-based processors were to be preferred over floating processors, which distributed economic benefits over several locations. And, in important language for the present issue, the Court concluded that

> "The state may legitimately encourage, through tax incentives or exemptions, industries or types of industries which it considers desirable, and this method of encouragement does not deprive other taxpayers, who do not qualify for the benefit, of equal protection of the laws.

Two additional points should be made with respect to Reefer King. First, the case strongly supports the notion that the State of Alaska may make a classification in order to encourage businesses to locate in a particular area. A primary reason for CIRI's proposed legislation, of course, is to encourage gas processors to locate south of the Arctic Circle. Second, the equal protection test adopted by the Alaska Supreme Court is somewhat more demanding than the test used in interpreting the Equal Protection Clause of the Fourteenth Amendment. The Alaska test, for example, requires the classification to bear a "fair and substantial" relation to the purpose of the statute, rather than merely a "reasonable" relationship. More significantly, under the Alaska test, unlike the federal test, the courts will "no longer hypothesize facts which would otherwise sustain questionable litigation." Isakson v. Rickey, 550 P.2d 359 (1975). This means that in order to survive constitutional scrutiny, the proposed legislation must clearly articulate the purpose of the legislation and the rationale for the geographic classification. The rationale for the geographic classification is expressly contained in the investment tax credit bill.

There is one final issue. Article II, Section 19 of the Alaska Constitution provides that the "legislature shall pass no local or special act if a general act can be made applicable." In this case, it could be argued that the proposed legislation is a local or special act in that it favors a particular region of the State.

It is doubtful that the proposed legislation constitutes a local or special act. In Baucher v. Engstrom, 528 P.2d 456 (Alas. 1974), the Alaska Supreme Court stated that "legislation does not become local merely because it operates only on a limited number of geographical areas rather than on a statewide geographical basis. A legislative act may affect only one of a few areas and yet relate to a matter of statewide concern or common interest." Accord, Abrams v. State, 534 P.2d 91 (Alas. 1975); State v. Lewis, 559 P.2d 630, cert denied, 432 U.S. 901 (1977) (upholding the land exchange between CIRI, the United States and Alaska). Thus, to the extent the proposed legislation is a matter of statewide concern, which we believe it is, the proposed legislation is permissible.

More significantly, the Alaska Supreme Court in State v. Lewis held that the test for determining what constitutes "local or special" acts is substantially the same for determining what violates the State equal protection clause. If the equal protection standard is satisfied, "the legislation will not be invalid because of incidental local or private advantages." Id. In terms of our case, then, the crucial issue is whether the proposed legislation violates the State standard of equal protection. If not, Article II, Section 19 will not pose a problem.

Re: Staff Analysis HB 274

BACKGROUND. In the late 1970's the FCC (Federal Communication Commission) started deregulating major portions of the communications industry. There existed the impending break-up of the Bell System, proposed Federal legislation changing the ground rules and policy in communications, and the advent of new technology making commercial cable television and other communication enterprises feasible on a large scale. In addition, a number of lawsuits were filed (nationally) which requested the Courts to clarify the regulatory powers of the State, Municipalities, cities, etc.; and, define the rights of the various regulated businesses. Final determination in a number of these cases is still pending.

Even though a uniform national policy had not been developed, one thing was clear. It was the intent of the Federal government to deregulate. In 1980, on an experimental basis, the State deregulated cable television. The deregulation was not all inclusive, but it was an attempt to conform to the deregulation policy. All indications are that the deregulation in Alaska has worked satisfactory.

EFFECT. HB 274 would make the economic regulation of cable television public utilities exempt from the Alaska Public Utilities Commission and local municipalities. To insure protection of the consumer, there is a provision that if 25 per cent of the subscribers feel their treatment is not satisfactory, they may petition, and will be granted, for regulation by APUC.

If the legislation, or similar legislation, is not passed the APUC will be required to hold hearings and establish rates for all of the cable television companies in the State. The current exemption expires on July 1, 1983 and it takes an affirmative action by the Legislature to continue the deregulation. This legislation would continue the deregulation.

Juneau, Alaska 99811

Dear Governor Sheffield:

We are pleased to transmit for your consideration the attached legislation that would make permanent and clarify the present statutory exemption of cable television (CATV) public utilities from economic regulation by the Alaska Public Utilities Commission.

The existing statutory exemption of CATV systems was enacted by the Legislature in 1980 and extends only through June 30, 1983; it was intended to be a three-year experimental deregulation program. As originally enacted, Ch. 136, SLA 1980, added subsection (i) to AS 42.05.711, but later was revised by the Revisor of Statutes as Sec. 13 of that chapter which reads:

> Cable television systems are exempt from the provisions of AS 42.05, other than the provisions of AS 42.05.221 - 42.05.281, until July 1, 1983. This exemption does not apply in cities or villages which have a population of less than 3,500 people and which are not located on a state road or marine highway. The effects of the exemption of cable television systems from rate regulation by the Alaska Public Utilities Commission provided in this section shall be reviewed by the legislature before July 1, 1983. If the legislature fails to extend the exemption before July 1, 1983, this section is repealed on that date, and cable television systems lose their exempt status on that date and become subject to regulation by the Alaska Public Utilities Commission.

The proposed legislation would permanently deregulate CATV services with respect to rates and charges for those services, the quality of that service, management practices and customer complaints, but would retain the Commission's authority with respect to the issuance of a certificate of public convenience and necessity to a CATV public utility (AS 42.05.221-42.05.281) under which the Commission determines if an applicant CATV company is fit, willing, and able to furnish CATV service and whether the public convenience and necessity requires that CATV service be provided to the proposed service area. (Under existing AS 42.05.321(b), CATV utilities also still are subject to Commission jurisdiction with respect to joint use and interconnection of utility facilities.)

The proposed bill also would delete the language from the existing CATV exemption which includes within the exemption those CATV systems operating in small Alaska communities if these communities are located on a "state road or marine highway". The effect of this provision has been to include within the ambit of the exemption every CATV system operating in the State except that in Barrow. Often it has been difficult to determine what constitutes a "state road," and many hours of Staff and Commission time have been consumed in making that determination. Instead the Commission proposes to simplify the exemption by substituting for that language, a provision which parallels the existing exception to economic deregulation contained in AS 42.05.711(e)(small electric and telephone utilities) and 42.05.711(i)(small garbage and refuse collection and disposal public utilities); namely, that if 25 percent or more of the subscribers to CATV service petition the Commission, CATV service in a given community would once again be subject to economic regulation. The Commission believes that this exception to deregulation responds to the concern of the CATV subscriber who wonders to whom the subscriber complains if he/she is dissatisfied with the service received and if resort to the CATV management does not produce a resolution of the complaint. Moreover, it furnishes a "safety valve" for CATV subscribers and a protection of them against a totally unsupervised monopoly which recent case law development in the application of anti-trust law to local governments suggests is a concern of the courts (e.g., the City of Boulder case) and is consistent with legislatively-established policy with respect to economically deregulated public utilities. Additionally, the Commission believes that this exception to permanent economic deregulation is protective of the public interest in that it recognizes that in the smaller communities in Alaska, CATV well may be the only entertainment option and also may function as an important communications medium for the community, whereas in the larger, urban areas there are indeed other entertainment/communications alternatives. As a practical matter, the 25 percent petition "trigger" would require substantial

In requesting your support for the proposed legislation and its presentation for consideration at the 1983 legislative session, the Commission believes that the absence of subscriber problems or concerns arising from the economic deregulation of CATV service in Alaska over the past two and one-half years, as well as the many entertainment/communications alternatives that now are competing in the market place for most Alaskans, are ample evidence that economic regulation by the Commission is indeed unnecessary. Additionally, continuing the present exempt status of CATV services, subject to the exception proposed above, will allow the Commission to devote its time and resources to those necessary utility services in which economic regulation is essential to protect the public interest.

If we can assist your office in responding to any questions concerning this proposed legislation, please contact me at your convenience.

Very truly yours,
ALASKA PUBLIC UTILITIES COMMISSION

Carolyn S. Guess, Chairman

Enclosure.

Alaska Cable Television Association

TESTIMONY OF CLARK KING

BEFORE THE HOUSE LABOR AND COMMERCE COMMITTEE

REGARDING HOUSE BILL 274.

Mr. Chairman, members of the Committee, my name is Clark King and I am Executive Director of the Alaska Cable Television Association. And I thank you for this opportunity to come before you today to testify on House Bill 274.

House Bill 274 provides the cable operators of the State of Alaska to proceed with economic deregulation that was afforded cable systems in Alaska by Chapter 136 SLA 1980.

I would like to provide the committee with some background regarding the bill. In 1979, Legislative Audit provided a report on the Alaska Public Utilities Commission. At that time the Legislative Auditor suggested that cable television be excluded from regulation by the Alaska Public Utilities Commission. The sunset legislation on the Public Utilities Commission (SB 577) included only a partial deregulation of the cable utility in the state. The Public Utilities Commission is still responsible for certification of any operator doing business in the state. It

is still the arbitrator of any conflicts between a utility and the cable operator wishing to attach its lines to poles. And still has control over who is issued a certificate of public convenience and need.

The 1980 Legislature did confer upon the cable operators of the state, the ability to establish and set their own rates and tariffs. In most cases the rate charged for cable service has not exceeded the inflation rate and, in fact, has resulted in expanded service.

A case in point would be the Juneau cable operation, BC Cable, who, at the time the act was passed, had a cable rate of $39.00 reduced to $36.00 per subscriber. In the same time period, BC Cable has offered additional channels to the public through the use of mid-band converters.

House Bill 274 extends the deregulation of the cable industry for an indefinite period of time. There is also a proviso in the bill that if 25% of the subscribers of a cable system are dissatisfied, they may petition the Public Utilities Commission for re-regulation. This proviso appears in AS 42.05, the Public Utilities Commission, on a number of occasions.

I might note at this time that cable is not just an entertainment medium that most people conceive it to be. The State of Alaska, Department of Revenue, subscribes to the Reuters News Service for

financial information. This gives the department instantaneous update on all major stock exchanges and commodity exchanges in handling the State's vast portfolio. After two years of operation the then deputy commissioner of Revenue stated that the instantaneous availability of information actually increased the State's revenues from their investment portfolio.

Another feature of cable is the ability to be used as fire detection and security alarm systems. Currently, a proposal is being drafted by the Bethel cable operator for a fire prevention network. It is interesting to note that Bethel has the highest per capita death rate due to fires in the United States. It is hoped that this system will drastically reduce that circumstance.

Cable is also used in communities to distribute the State's Learn Alaska Program to both homes and schools. It is also interesting to note that in those communities that are served by cable operators, most public buildings, including schools, libraries, etc., are all wired for cable, thus making it available to all members of the community. Several communities in the state are experimenting with a public access channel. Most notably would be Nome, where the citizens produce their own programming. The cable operator in Nome provides technical assistance and the free channel time, but has nothing to do with the content of the programming. This programming ranges from cultural shows to coverage of the local assembly meetings.

With the completion of the cable system in the Anchorage bowl, the Kenai-Soldotna area, and Mat-Su, over 90% of the homes in the State of Alaska will have cable service available to them.

With expanded programming and advanced technical services, Alaska will have greater access to one of the truly growing telecommunications services.

Again, on behalf of the Alaska Cable Television Association, I would like to stress our support for House Bill 274 and urge the committee to take favorable action.

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 18, 1983

(3 DAYS OF TERMINATION SENT) VERBAL

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the payment of wages. This bill would make discretionary the imposition of the wage claim penalty under AS 23.05.140(d) against an employer who fails to pay wages to an employee within three days of the date of termination. In addition, the bill would strengthen the protection given an employee who has been offered a partial payment of a wage claim on the condition that he release the employer from paying the entire amount of wages claimed. The bill would void such a release which is given contingent on part payment of the wage claim.

The final provision of the bill would limit the application of the definitions in the federal Fair Labor Standards Act, 29 U.S.C. 203, to only those terms used in the Alaska Wage and Hour Act which are not defined by state law or regulation.

Sincerely,

Bill Sheffield
Governor

Humana Hospital Alaska

Dear Mr. Pavellas,

I am writing this letter, along with support of other hospital staff members, to stress the importance of re-establishing an 8/80 workweek at Humana Hospital Alaska. In order to meet the needs of our community, we naturally must be available 7 days a week, 24 hours a day, making a 40-hour workweek difficult to schedule. We are denied an 8/80 workweek because we are not a non-profit hospital.

Following are a list of reasons to support an 8/80 workweek:

(1) It would allow the possibility of 10 days on/4 days off.

(2) Long working stretches allow for 4 days off in a row.

(3) Part-time staff members could work extra days for their peers without the hospital having to pay overtime.

(4) During high census readings, a nurse manager would have a larger list to call from without having to pay overtime.

We feel that such a change would improve employee morale, and we totally support an 8/80 workweek.

Sincerely,

Cheryl Stanton RN

Humana Hospital Alaska

Mr. Ronald A. Pavellas
Executive Director
Humana Hospital Alaska
2801 DeBarr Road
Pouch 8-AH
Anchorage, Alaska 99508

Dear Ron,

I wish to stress the importance of obtaining a change in the legislation which would permit that overtime be calculated on an 8 (hours per day) and 80 (hours per pay period) instead of the 8 and 40 as currently exists.

Humana Hospital Alaska is currently denied the 8 and 80 because we do not have the status of "Non Profit" as the overtime law states.

This law limits us in the following ways:

(1) Requires that we split employees' days off (into some single days) in order to avoid unnecessary overtime.

(2) Hinders our flexibility in creating flexible scheduling which is generally helpful in attracting Registered Nurses.

(3) Creates an inability for us to allow our 11PM to 7AM employees several days off together without incurring substantial costs in overtime.

Any assistance in a change in this legislation would be appreciated, as it would permit more effective utilization of our nursing personnel.

Sincerely,

Patricia K Davis

HB 282

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 18, 1983

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

NOTICE TO EMPLOYER
WHAT IS THE AVERAGE FINE TO EMPLOYER!

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to notices for occupational safety and health violations.

This bill would allow the Department of Labor to issue a notice, rather than a citation, to an employer for an occupational health and safety violation which is not serious, if the employer agrees to remedy the violation within a reasonable time. If the employer fails to remedy the violation, then a citation is issued in accordance with the procedures for serious violations.

The bill would accomplish several things. It would free occupational safety and health compliance officers from cumbersome administrative responsibilities which attend the issuance of citations, and thereby allow them to devote more time to inspections, while also saving clerical time. (Currently, inspectors can only inspect approximately eight percent of the state's work sites a year). The bill would also promote speedier correction of hazards, since much of the paperwork that must flow between employer and agency in the citation-issuance process would be eliminated. The department strongly urges passage of this bill, and it has the support of unions and employer organizations as well.

Sincerely,

Bill Sheffield
Governor

HOUSE LABOR AND COMMERCE COMMITTEE

MEMORANDUM

February 8, 1984

To: John Cowdery, Chairman

From: Ken Johnson, Committee Aide

RE: HB 283 -- An Act relating to the creation of the Alaska Life and Disability Insurance Guaranty Association.

This bill was drafted about two years ago by the National Association of Insurance Commissioners. The NAIC put together a number of so called "model acts" in order to help states bring insurance statutes and regulations up to date. These model acts were presented to all 50 states for fine tuning and legislative introduction. This is one of those bills. To date, 34 states have passed very similar legislation.

The bill of course would create the Alaska Life and Disability Association. Any company licensed to sell insurance in the state would be a member of this association. Each member would pay an assessment, not to exceed $150 per year, to cover the costs of administration and general expenses.

The purpose of the association is to guarantee the policy's of an insurer who has become impaired or insolvent. In the event an insurance company insolvency, the association would assume control of the company's policies and set into motion the action necessary to see policy holders do not lose any investment or benefit. For example, an impaired or insolvent company may get a loan from or its assets be sold by the association. There are limits set for the aggregate liability the association will assume.

The association has the power to borrow and loan money. Most all of the funds necessary for the associations transactions would come from assessments on its members. There is a formula which would be used to make these assessments, however, Ken Moore, Director of the Division of Insurance could better explain this formula. He would serve as director of this association.

A board of governors would be elected, by association members, to carry out the duties of the association. The director must approve the selection of each board member.

This is a general outline of a lengthy and detailed bill. The NAIC has deemed this legislation a "consumer protection bill" because of the insurance policy guarantees. It has passed, as I stated, in 34 states some which have created standing committees in their legislatures to deal with insurance matters.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 18, 1983

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill establishing the Alaska Life and Disability Insurance Guaranty Association (the association). This bill is based on the Life and Health Insurance Guarantee Association Model Act proposed by the National Association of Insurance Commissioners in 1971, as amended in 1976.

The bill would provide a mechanism for paying claims on direct life insurance policies, disability insurance policies, and annuity contracts, which are outstanding against insolvent or impaired insurers. The bill would require that all insurers licensed to do business in Alaska be members of the association, and would provide for periodic assessments of the members of the association.

The Alaska Life and Disability Insurance Guaranty Association will provide protection for life and disability insurance similar to the protection provided under existing law for other kinds of direct insurance by the Alaska Insurance Guaranty Association Act (AS 21.80).

Sincerely,

Bill Sheffield
Governor

BRIEF SUMMARY: This bill provides a mechanism for paying claims on direct life insurance policies, disability insurance policies, and annuity contracts which are outstanding against insolvent or impaired (next page)
(Attach a more detailed explanation if you can.)

BACKGROUND/LEGISLATIVE INTENT

This bill will provide public protection that currently does not exist. Policyholders of life and disability policies issued in Alaska will have their policies guaranteed by all life and disability insurers doing business in this state. It also provides a mechanism to enhance the director's review of life or disability insurer solvency.

ANALYSIS OF BILL/PROGRAM EFFECTS

This proposal is based on the Life and Health Insurance Guarantee Asssociation Model Act of the National Association of Insurance Commissioners developed in 1971 and amended in 1976. The bill would provide a mechanism for paying claims on life, disability and annuity contracts on behalf of an impaired or insolvent insurer. Participation would be a condition to license in this state.

Alaska has previously had a domestic insolvency of a life insurance company. In June 1969, the Alaska Western Life Insurance Company was placed in receivership and was ultimately liquidated. The division managed some control through AS 21.78, but that chapter offers little protection for policyholders.

This bill is similar in concept to AS 21.80 which provides protection for property and casualty kinds of insurance.

AMENDMENTS PROPOSED

On page 7, line 20, change "health" to read "disability."

On page 7, line 27, insert "(a)" following "ASSESSMENTS."

Section by Section Commentary

Section 1. AS 21.21.050(7)

AS 21.21 is the chapter in the insurance code dealing with investments of insurance companies. .050 deals with limitations by kinds of investment to provide for diversity in the investment portfolio of an insurer. This change adds notes and other evidence of indebtedness of the Alaska Life and Disability Insurance Guaranty Association (ALDIGA) to the miscellaneous category of investments which are limited to 10% of assets.

Section 2. AS 21.21.250(c)

AS 21.21.250 defines miscellaneous investments and is changed by adding notes and other evidence of indebtedness of the ALDIGA.

Section 3.

Section 21.79.010. PURPOSE.

The basic purpose of this model act is to protect policyholders, insureds, beneficiaries, annuitants, payees and assignees against losses, both in terms of paying claims and continuing coverage, which might otherwise occur due to an impairment or insolvency of an insurer. Unlike the property and liability situations, life and annuity contracts in particular are long-term arrangements for security. An insured may be of impaired health or an advanced age so as to be unable to obtain new and equivalent coverage from other insurers. The payment of cash values alone does not adequately meet such needs. Thus, it is essential that coverage be continued. In like manner, an insured may be unable to obtain new health insurance or at least he may lose protection for prior illnesses.

Section 21.79.020. SCOPE.

This section outlines what the bill does and does not cover. Basically, it covers those policies of life, disability, and annuities written by insurers which have submitted to regulation in this State. Policies of nonadmitted insurers are not covered. The term "disability" also includes "accident and health," "sickness and accident" and more.

Subsection (b)(1) is directed toward variable policies and contracts. That portion of the contract where the risk is borne by the policyholder is excluded. However, the obligations of the insurer for mortality and expense guarantees are covered.

Subsection (b)(2) excludes deductibles from coverage.

Subsection (b)(3) exempts the reinsurance business of the impaired or insolvent insurer other than reinsurance for which assumption certificates are used.

Subsection (b)(4) excludes Blue Cross. The logic to this is that Blue Cross is a nonprofit health care provider. It markets prepaid health care through participant providers who in effect guarantee the delivery of the contracted service. The financial structure of Blue Cross is such that they cannot be expected to participate in insolvencies of profit making corporations.

Some additional limitations on the scope are found elsewhere in the act. For example, ALDIGA assumes no liability concerning policies of nonresidents issued by a foreign or alien insurer or for policies of residents issued by a foreign or alien insurer, if such insurer is domiciled in a state having a comparable act (See Section .060). These limitations are not found in the scope section, since it provides exclusion from the entire act and not just portions of it.

Section 21.79.030. CONSTRUCTION.

This section calls for liberal construction.

Section 21.79.040. CREATION OF THE ASSOCIATION.

Subsection (a) creates three accounts, for both administration and assessment purposes, the disability insurance account, the life insurance account, and the annuity account. These three categories of coverage are significantly different, so that persons protected by virtue of one account should not be required to pay for the protection afforded persons protected by the other accounts.

Supplementary contracts are covered under the account in which the basic policy is covered for purposes of assessment. For example, settlement options under a life insurance contract would be covered under the life insurance account.

Section 21.79.050. BOARD OF GOVERNORS.

Subsection (a) provides that the number and term of the members of the Board of Governors shall be determined in the plan of operation. To avoid problems in initially selecting the board, this section includes a provision for a start-up meeting, which shall be called by the Director of Insurance. To determine voting rights at the organizational meeting, each member insurer would have one vote. Thereafter the plan of operation will establish the voting procedures, bylaws, etc., governing the conduct of ALDIGA.

Section 21.79.060. POWERS AND DUTIES OF THE ASSOCIATION.

Subsections (a)-(f) constitute the heart of this model act. These subsections detail the duties of the association by distinguishing: (1) between those insurers whose "impaired" status is attributable to a finding by the Director prior to an order of liquidation, and those whose "insolvent" is attributable to such orders; and, (2) between insolvent domestic insurers and insolvent foreign or alien insurers.

Prior to an order of liquidation, rehabilitation or conservation, ALDIGA has no liability. However, upon a finding by the Director that the insurer is impaired under (a), ALDIGA is authorized to guarantee, assume, or reinsure or cause to be guaranteed, assumed, or reinsured, the covered policies of the impaired insurer to assess member insurers the amounts necessary to effectuate this activity. ALDIGA would presumably do so in those situations where early assessments would prevent a more costly insolvency later, such as liquidation. ALDIGA, as a condition of its assistance, may negotiate any requirements or safeguards it deems necessary so long as they are approved by the Director and are accepted by the impaired insurer and do not impair the contractual obligations to the policyholders, insureds, and beneficiaries. In the absence of any court order, before any negotiations become final the impaired insurer's acceptance of the terms of ALDIGA is necessary. Through this approach, a mechanism is provided for early action by ALDIGA before the situation further deteriorates. The policyholder, insured, and beneficiaries are protected, claims are paid and coverages continued, for example, through rehabilitating the impaired insurers, or reinsuring the policies elsewhere. Furthermore, the statutory language is highly flexible as to what techniques the association may employ so as to be able to meet a variety of situations.

Under (b) and (c), if the insurer acquires its insolvency status as a result of a final order of liquidation, rehabilitation or conservation, the association shall, rather than may, guarantee, assume, reinsure or cause to be guaranteed, assumed, or reinsured, the covered policies of the insolvent insurer and to assure payment of contractual obligations.

It should be noted that the duties of ALDIGA vary with the kind of insurer. If it is a domestic insurer then all the covered policies must be continued and the contractual obligations met (See (b)). However, if the insolvent insurer is a foreign or alien insurer, contractual obligations which apply to residents of the State must be paid or continued if they are not covered by a similar law in such insurer's domiciliary jurisdiction. (See (c) and (d))

Subsection (d) avoids duplication of coverage by providing that the association shall have no liability for any covered policy of a foreign or alien insurer domiciled in the State having similar protection by statute or regulation. If every state adopts the model act, each state association would protect only covered policies of domestic insurers.

Subsections (e) and (f) relate to the imposition of policy and contract liens, moratoriums, etc. These are devices which have been used in the past in connection with the continuation of the insolvent insurers' coverage. Since, by definition, the assets of the insolvent insurer were not adequate to support its contractual obligations, liens were used to reduce his obligations to a level where the assets would be adequate. However, in the past there was no means to infuse additional funds where needed to make whole policyowners, insurers and beneficiaries. The purpose of the model act is to provide against losses due to insolvent insurers by prompt fulfillment of the insolvent insurer's contractual obligations. To the extent that liens and moratoriums are sanctioned, the model act retreats from this principle. Of course, in situations prior to a court order there may be some question whether a lien or moratorium could be legally imposed so as to impair the contractual obligations of the insurer even in the absence of the specific provisions of this act.

On the one hand, it can be argued that if liens or moratoriums cannot be used there will be a run on the assets of the impaired company. In the past this seems to have been true. However, unlike the past, the performance of the insurer's contractual obligations would be guaranteed under this act.

Also, the standard nonforfeiture laws provide that an insurer in its policies shall reserve the right to defer the payment of cash values for a period of six months after demand thereof with surrender of the policy. Similarly, it is common to require an insurer to reserve for a period of six months the right to defer the granting of any policy loan (other than to pay premiums). For these various reasons, the model act does not encourage use of these liens and moratoriums in ordinary situations.

On the other hand, in periods of severe liquidity problems and economic stress, perhaps of even catastrophic proportions, such devices may become essential. While the model bill concentrates on the protection of those to whom the impaired insurer has a contractual obligation, the impact of assessments on the policyholders of assessed companies is also an important consideration, such as the significant sales of depressed value assets in a tight money market. Consequently, Subsection (e) authorizes ALDIGA to cause to be imposed liens and moratoriums or other similar means:

1. If the court finds that the amounts assessable are less than what is needed, or that the economic or financial conditions as they affect member insureds are sufficiently adverse to render the use of such tools in the public interest; and,

2. The court approves the use of a specific lien, moratorium, etc.

This provides a highly flexible mechanism while, at the same time, it avoids impairing the contractual obligations of the impaired insurer as a routine manner under ordinary economic and financial conditions. The provision also recognizes that while contractual rights of policyowners may not constitutionally be impaired, when the insolvent insures obligation under the contract as assumed by another insurer, the policyowner has two options. The policyowner may accept the new contract with such liens or moratoriums as permitted by the court, or accepts such pro rata payment as is available from the State of the insolvent insurer.

Furthermore, to provide added flexibility in a temporary situation, such as a run on assets, Subsection (f) provides for temporary moratoriums or liens on payment of cash values and policy loans, but not on the payment of other benefits, with the court's approval.

Subsection (g) permits the Director to assume the duties of ALDIGA if they fail to exercise their authority under the act within a reasonable period of time.

Subsection (h) permits the Director to request ALDIGA member assistance with impaired or insolvent insurer issues.

Subsection (i), to enable ALDIGA to protect its interest and the best interests of the policyholders in the handling of an impairment or insolvency, provides that ALDIGA shall have standing to appear in a court with jurisdiction over an insolvent insurer and such standing will extend to any matters concerning the duties of ALDIGA.

Subsection (j) provides for assignment of rights of a beneficiary of benefits under this act. It also establishes subrogation rights for ALDIGA and provides that ALDIGA's right to assets of the insolvent insurer is the same as any other person entitled to benefits under this act.

Subsection (k) places a limit on the liability of ALDIGA as respects a single life.

Subsection (l) allows ALDIGA to contract, sue or be sued, borrow money, employ persons, negotiate, act as a domestic life or disability insurer and take legal action to avoid payment of improper claims.

Section 21.79.070. ASSESSMENTS.

Subsection (b) outlines different assessment methods for assessments needed to cover foreign or alien insurers and for assessments needed to cover domestic insurers. When a foreign or alien insurer is impaired or insolvent, the member insurers will be assessed on the basis of the premiums they write in the State. This corresponds to the association's liability which is limited to covered policies of residents when the policies are issued by a foreign or alien insurer. When a domestic

insurer is impaired or insolvent, the total amount to be assessed will be allocated to each state in which the impaired or insolvent insurer was authorized at any time to transact insurance in the proportion that the impaired or insolvent insurer premium income in each state for the last calendar year preceding the assessment in which it had premium income bears to its total premium income in such calendar year. The amount allocated to each state will then be assessed to the member insurers in the proportion that the member's premium income from such State for the calendar year preceding the assessment bears to all premium income of member insurers from that State in the calendar year preceding the assessment. Thus, in making the pro ration it is necessary to look to the premium income of the impaired or insolvent insurer in the last year it actually received such income, but in determining each company's assessment, the association would look to the last calendar year preceding the assessment. In any case, assessments would be made separately for each account and the amount assessed from each account will be in the proportion that the total premiums of the impaired or insolvent insurer bear to the premiums of the impaired or insolvent insurer from the kind of insurance in the account.

For example, if a total assessment of $100,000 is needed for the disability insurance account, and the domestic impaired or insolvent insurer received 50% of its premium from state X, then 50% of $100,000 or $50,000 will be allocated to state X. Member insurers receiving premium income from state X will then be assessed in proportion to their share of that state's market, as reflected in premium income. For example, if member insurers receive $30,000,000 in premium from state X and a certain member received $3,000,000 of that amount, then 3/30 of the $50,000 assessment will come from this company, that is, the company will be assessed $5,000 (3/30 = 1/10 and 1/10 of $50,000 is $5,000).

This assessment system should be relatively simple to administer. More importantly, it provides a base broad enough to meet fairly large demands on the association. Equally important, since it reflects the market share of each member in the state considered, it is an equitable method of apportioning the burden of the assessments.

The maximum assessment per year may be varied from State to State depending on the size of the base and the concentration of the business. The two percent maximum should produce an adequate amount, while at the same time, not impose an undue strain in any given year on the assessed companies and their policyholders. In order to prevent further financial difficulties caused by an assessment, Subsection (g) permits abatement of assessments when financial difficulties might result.

Subsection (h) provides some limitation on the amounts which can be assessed in any given year. If these limits are reached, to fulfill its responsibilities, ALDIGA is empowered to borrow funds which later can be repaid out of future assessments.

Subsection (j) provides that a member insurer may consider, in its premium rates and dividends scale, an amount reasonably necessary to meet its assessment obligations. This makes it clear that the cost can be ultimately passed on to the policyowners, that is, to persons who enjoy the protection provided by the act.

Subsection (k) provides that ALDIGA shall issue to assessed insurers certificates of contribution in the amount levied. The certificates may be carried by an insurer in its annual statement as an asset in such form, amount and period as may be approved by the Director. By permitting the company to carry these certificates as an asset, to the extent of their estimated value, the impact on member insurers will be lessened.

Section 21.79.080. PLAN OF OPERATION.

The NAIC has adopted a model plan of operation which is available in our office should you wish to have a copy of same. It is anticipated that ALDIGA, upon passage of this act, would substantially adopt the provisions contained in this model plan of operation.

Section 21.79.090. POWERS AND DUTIES OF THE DIRECTOR.

Subsection (b) requires that the Director give notice of an impairment to the impaired insurer, and hence to its stockholders, and serve a demand that impairment be made good. If the company and stockholders fail to raise the necessary funds, this will be a factor bearing upon the stockholders' ownership rights under Section 110(d).

Subsection (d) provides that the Director shall be appointed liquidator or rehabilitator of a domestic insurer and conservator of a foreign or alien insurer being liquidated or rehabilitated. Requiring the Insurance Director to be the receiver, it is necessary to obtain the benefits of a "reciprocal" state under the Uniform Insurers Liquidation Act, which Alaska adopted in 1966. See AS 21.78.020, .030, .130-.200 and .230(2)-(13).

Proceedings for the liquidation, rehabilitation, or conservation of insurers present several difficulties which the Uniform Insurer's Liquidation Act seeks to solve. Briefly, the difficulties have two sources. First, in some states the liquidator, rehabilitator or ancillary receiver may be a person unfamiliar with insurance regulation. Inefficient administration of the proceedings may result.

Second, the laws of more than one state may be applied to the proceedings particularly regarding ownership of assets and preferences for payment. The result is confusion and inequity in the collection and distribution of the assets. The Uniform Insurers Liquidation Act meets the first source of problems by designating the insurance Director as the receiver of a domestic insurer or the ancillary receiver of a foreign

insurer. To solve the problem of multiple laws and marshalling of assets, the Uniform Act gives the receiver title to the assets. The ancillary receiver is then required to forward all assets to the receiver. The Uniform Act also details laws under which preferences and the distribution of assets will be determined.

In drafting this model guarantee bill, the NAIC made particular effort to the extent possible, to avoid disrupting State liquidation and rehabilitation of laws.

Section 21.79.100. PREVENTION OF INSOLVENCIES.

This section basically establishes a dialogue between the Director and ALDIGA, concerning impairment and insolvency issues. It also enables ALDIGA to cause an examination of a suspect insurer, which is the primary tool in determining financial status.

Section 21.79.110. MISCELLANEOUS PROVISIONS.

Subsection (b) requires that the records be kept of the negotiations and actions by the association. ALDIGA should be held publicly accountable for its actions. On the other hand, effective handling of the rehabilitation or liquidation effort requires minimum publicity. Thus, such records will be made public only after the liquidation, rehabilitation or conservation proceeding is terminated, the impairment or insolvency is terminated or there is a prior order by a court of competent jurisdiction.

Since this act imposes obligation upon the association to continue coverage for policyholders of insolvent insurers, the assets of the insolvent insurer ought to be used, to the extent available, for the purpose of continuing such coverage. Subsection (c) is designed to accomplish this purpose.

Subsection (d), in conjunction with Section .090(b), is intended to prevent the shareholders of an impaired insurer from sitting back and doing nothing and then reaping the benefit of funds put up by the association. These stockholders should not obtain a more advantageous position than they would have occupied in the absence of this act. The court is empowered to modify and distribute the ownership rights of impaired insurers in an order to do equity as between the interested parties.

Subsection (e) is designed to recapture excessive dividend payments to affiliates that exercised control over the insolvent insurer. The NAIC Model Holding Company Regulatory Act which has been adopted in Alaska, in large measure, prevents improper distribution of dividends by an insurer to its holding company, since extraordinary dividends are subject to the prior approval of the Director, and ordinary dividends are required to be reported to the Director. If, however, dividends are

paid under circumstances that the insurer should have recently known that such payment could reasonably be expected to affect its ability to perform its contractual obligation to its policyholders, the holding company and affiliates should be required to repay such dividends subject to certain reasonable limitations.

Section 21.79.120. EXAMINATION OF THE ASSOCIATION, ANNUAL REPORT.

This section enables the Director to examine ALDIGA. ALDIGA must also provide an annual report.

Section 21.79.130. TAX EXEMPTIONS.

ALDIGA is tax exempt except for real property taxes. ALDIGA is not a profit making organization, rather, it is a guarantee mechanism thus its tax exempt status.

Section 21.79.140. IMMUNITY.

ALDIGA will be engaged in some very sensitive issues when performing its duties under this act. The immunity provides protection while performing these duties.

Section 21.79.150. STAY OF PROCEEDINGS.

See Section 5.

Section 21.79.900. DEFINITIONS.

This act covers "insolvent insurers" which are difined to include an insolvent insurer under an order of liquidation issued by a court of competent jurisdiction. An "impaired insurer" is an insurer deemed by the Director to be unable, or potentially unable, to fulfill its contractual obligations.

This model bill enables an association to become involved to the actual court order as noted in Section .060. The finding by the Director that an insurer is impaired, even though not subject to a court proceeding, serves as a triggering mechanism enabling the association to function.

Subsection 10 defines "resident" for the purposes of determining on whose behalf the association may become liable under Section .060, if a foreign or alien insurer becomes insolvent.

Section 4. Section 21.36.035. PROHIBITED ADVERTISEMENT IN INSURANCE SALES.

This section makes it a prohibited unfair trade practice for any person to make use, in any manner, of the protection afforded by this act to aid him in the sale of insurance. This would extend to a person with

an interest in a policy who uses the presence of ALDIGA to support the value of the policy as collateral in a loan transaction, which action would be prohibited. The legitimate function of advertising the existence of the act by the guarantee association and the Director, conduct which would be particularly desirable in notifying policyholders of a company found to be insolvent, or by insurers in public service institutional advertisements, would be permitted. Enforcement and penalties for violation of the section are found in the Unfair Trade Practices Act (AS 21.36).

Section 5. AMENDING CIVIL RULE 62(c).

Section 21.79.150 provides for an automatic stay of 60 days in actions involving the liquidation, rehabilitation or conservation of an insolvent insurer.

A RESOLUTION BY THE 3RD ANNUAL
YUKON-KUSKOKWIM DELTA MAYOR'S CONFERENCE

Bethel, Alaska
November 3, 4, 5, 1982

RESOLUTION NO. 82-13

A RESOLUTION REQUESTING THE 1983 ALASKA STATE LEGISLATURE TO PASS THE NECESSARY LEGISLATION TO ALLOW MUNICIPALITIES TO FORCE ACCOUNT CAPITAL PROJECTS AND NOT BE OBLIGATED TO PAY "LITTLE DAVIS-BACON" WAGES.

WHEREAS, municipalities have the local expertise in their own citizenry to construct and complete most public works projects; and

WHEREAS, municipalities are now receiving funding to construct roads and cities are executing these projects successfully through planning and force accounting; and

WHEREAS, the Little Davis-Bacon Act wages are prohibitive as far as local hire and successful project completion,

BE IT RESOLVED BY THE YUKON-KUSKOKWIM DELTA MAYOR'S CONFERENCE: To support legislation that would allow municipalities to force account local projects using local wage scales as a standard, which allows much needed employment for the local citizenry, rather than using Little Davis-Bacon Act wages which drastically depress local hire.

PASSED and APPROVED by the Third Annual YUKON-KUSKOKWIM DELTA MAYOR'S CONFERENCE THIS 5th day of November, 1982.

SUBJECT: Applicability of AS 36 to Construction Projects Administered the Community of Cantwell, Inc.

You have requested our opinion as to whether the public contract requirements of AS 36 would apply to the proposed construction of a fire station and community water facility in Cantwell, Alaska. Our conclusion is that AS 36 applies to the proposed construction projects.

Cantwell is a rural community having no organized governing or legislative body. In 1981, several persons residing in the Cantwell area incorporated under AS 10.20 as a nonprofit corporation known as the "Community of Cantwell, Inc." One of the apparent purposes of such incorporation was to provide a vehicle for the receipt and administration of state grant monies for the improvement of public services and the construction of public facilities in the area.

Under the authority of AS 37.05.315 (Unincorporated Community Grants) and chapter 101, SLA 1982, the Department of Community and Regional Affairs proposes to grant up to $160,000 to the Community of Cantwell, Inc. for the express purpose of constructing a fire station and purchasing fire protection equipment for the Cantwell community. Under the proposed grant agreement, the Community of Cantwell, Inc. is regarded as "the contractor" for the performance of the project, subject to the specific terms itemized in the contract. One of those terms requires the contractor to perform the project in compliance with all applicable laws and regulations. The grant contract, however, does not contain any express language concerning the applicability of AS 36 or the requirement that employees working on public works projects be paid prevailing wages.

In addition to the fire station project, the Community of Cantwell, Inc. may also receive grant monies from the Department of Environmental Conservation under AS 46.07.010-.080 (Village Safe Water Act) for the purpose of building a public water well and a plumbing and holding tank. Additional grant funds have also been requested for the construction of a solid waste disposal system. It is

our understanding that the nonprofit corporation plans to administer and supervise these various projects, either by directly hiring persons to perform the construction work or by entering into appropriate construction subcontracts.

AS 36.05.010 requires contractors or subcontractors on public construction or public works projects to pay the prevailing rate of wages to employees working on such projects. AS 36.95.010(3) defines "public construction" and "public works" as

> ...the on-site field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, of highways or other improvements to real property under contract for the state, a political subdivision of the state, or a regional school board with respect to an educational facility under AS 14.08.161.

AS 36.05.070 further requires that contracts for public construction specifically include certain provisions concerning the payment of prevailing wages to employees on the project.

In a recent opinion, the Alaska Supreme Court adopted an expansive view of the concept of "public construction" under AS 36. City and Borough of Sitka v. Construction and General Laborers Local 942, 644 P.2d 227 (Alaska 1982). The court declared that the fundamental purpose of Alaska's "Little Davis-Bacon Act" (AS 36.05) is to assure that employees engaged in public construction receive at least the prevailing wage. The focus of the Act is to the benefit of employees, not the contracting principals. 644 P.2d at 232.

In accordance with the broad interpretation of AS 36 adopted by our supreme court in Sitka, we believe that any employee who performs work on the construction or repair of a public facility that is funded with state grant monies is entitled to receive prevailing wages, regardless how the project is structured or what entity actually administers the grant funds. We note that federal regulations under the Davis-Bacon Act (40 U.S.C. § 276a) have adopted a similar broad view of "public work" as consisting of any construction work which is carried on directly by authority of, or with funds of, a federal agency to serve the interest of the general public, regardless of whether title to the project is in the federal agency or some other entity. 29 C.F.R. § 5.2(h) (1981). Accordingly, we conclude that

whenever state grant monies are transferred to a non-governmental entity, i.e., a non-profit corporation, for the express purpose of constructing public facilities within the state, the prevailing wage provisions of AS 36 apply and should be contained in the appropriate grant documents.

Re: Application of Little Davis-Bacon Act (AS 36.05) to designated grants
Our file: 366-267-83

Dear Representative Adams:

You have requested our opinion whether construction contracts made by non-governmental entities which are financed by state-funded grants are subject to the provisions of the Little Davis-Bacon Act (AS 36.05) regarding payment of prevailing wages to employees working on public construction. You cite examples of grants made for a day care center, a "human services complex," and a public works facility. These grants were made by appropriations in which the grantees were specifically designated. In each case the grantee is a private non-profit corporation.

The grants to which you refer are commonly known as designated grants and are governed by the provisions of AS 37.05.316 (Grants to Named Recipients). Another category of designated grant which is used to construct capital improvements in unincorporated communities is an Unincorporated Community Grant under AS 37.05.317. Because an unincorporated community is not a legal entity and therefore lacks the capacity to receive and administer a grant of public funds, AS 37.05.317(2) authorizes the Department of Community and Regional Affairs to make the grant to a private non-profit corporation or federally recognized tribal council which is representative of the unincorporated community. We recently expressed our view that construction contracted out by such an organization for an unincorporated community with grant funds provided by the state under AS 37.05.317 is subject to the provisions of the Little Davis-Bacon Act. 1982 Inf. Op.

Att'y Gen. (October 5) 1/ A third category of grants, Grants to Municipalities under AS 37.05.315, provides state funds for a variety of local projects and activities directly to established political subdivisions of the state. The requirements of Little Davis-Bacon clearly apply to construction projects contracted out under those grants.

You now ask whether construction contracted out by non-governmental entities with grants made under AS 37.05.316 are also subject to that Act. We conclude that the answer to your question will depend upon the nature of the particular project being carried out by the grantee. If the project or improvement involves the undertaking or provision of traditional government facilities, services, or activities it is covered by the Act, despite the non-governmental status of the entity contracting out the work. However, if the work contracted out is not like that traditionally carried out or provided by government, it is not covered by Little Davis-Bacon. In order to define the line between those projects covered by the Act and those which are not, we recommend the adoption by the Department of Labor of regulations setting out the standards applicable to determining whether projects undertaken by affected grantees will be considered as covered or non-covered. By adopting regulations the department will put those entities on notice of their potential obligations under the Act and help assure uniform and consistent determinations of coverage or non-coverage. Our reasoning follows.

The fundamental requirement of the Little Davis-Bacon Act is set out in AS 36.05.010 which provides, in pertinent part, as follows:

> Sec. 36.05.010. WAGE RATES ON PUBLIC CONSTRUCTION. A contractor or subcontractor who performs work on public construction in the state, as defined by AS 36.95.010(3), shall pay not less than the current prevailing wages for work of a similar nature in the region in which the work is done.

1/ We note that our October 5, 1982 opinion incorrectly referred to grants made under AS 37.05.315, which deals with grants to organized municipalities. This was obviously a typographical error as the problem which it addressed involved an Unincorporated Community Grant, which is covered by AS 37.05.317.

"Public construction" is defined in AS 36.95.010(3) as follows:

> (3) "public construction" or "public works" means the on-site field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, highways or other improvements to real property under contract for the state, a political subdivision of the state, or a regional school board with respect to an educational facility under AS 14.08.161;

The answer to your question essentially revolves around whether work carried out with public funds by a designated grantee is "public construction" within the meaning and purpose of the Little Davis-Bacon Act. This is a question which has yet to be addressed by the Alaska courts and, while we believe the courts would follow the analysis which we apply here, we obviously cannot guarantee that our view will ultimately be adopted by them. 2/

In 1982, the Alaska Supreme Court adopted an expansive view of the concept of "public construction" under Little Davis-Bacon. City and Borough of Sitka v. Construction and General Laborers Local 942, 644 P.2d 227 (Alaska 1982). In the Sitka decision, the court expressly stated that "[t]he fundamental purpose of Little Davis-Bacon is to assure that employees engaged in public construction receive at least the prevailing wage." It went on to emphasize that "[t]he focus of the act, quite clearly, is to the benefit of the employees, not the contracting principals." Sitka, 644 P2d at 232.

2/ It is particularly important to keep in mind that our view may or may not be adopted by the courts where, as here, the statutes with which we deal create certain rights and obligations on non-governmental third parties (e.g., contractors and workers) which, unlike state agencies, are not bound to adhere to the advice of the Attorney General. That precise situation arose in City and Borough of Sitka v. Construction and General Laborers Local 942, 644 P.2d 227 (Alaska 1982) where the Alaska Supreme Court expressly rejected an earlier written determination by the Attorney General's Office that the Act did not apply to the facts of that case.

In deciding that the contract at issue in Sitka was subject to Little Davis-Bacon, the Supreme Court expressly rejected the argument that it was not covered because it was not in the form of a traditional construction contract. The City of Sitka had argued that the contract should be viewed in isolation as a timber sale contract, unconnected with the contract for the construction of a dam, even though the timber to be sold and cleared under that contract was to be removed in order to make the site suitable for construction of the dam. The court refused to follow Sitka's argument, however, saying that to do so "unduly exalts form over substance." Sitka, 644 P2d at 232.

Similarly, we believe that the court would reject the application of rigid tests which would only inquire whether a particular project was owned by a governmental entity or whether the project was being carried out under contract with a governmental entity. 3/ Certainly, in most situations it is to be anticipated that a "public work" will be owned by a governmental entity. However, nothing in Little Davis-Bacon expressly requires governmental ownership of the project. While ownership may often be indicative of the "public" nature of a particular project, we do not believe it is necessarily determinative. Similarly, the Act is not limited to projects under contract with the state or a political subdivision. In fact, the statute, at AS 36.95.010(3) expressly defines "public construction" as projects under contract for the state or a political subdivision, indicating that the legislature clearly had in mind application of a broader test for Little Davis-Bacon coverage than a simple mechanical inquiry into the status of the contracting entity.

3/ A rigid application of strict rules for determining whether a project is "public construction" could afford the opportunity to circumvent or evade Little Davis-Bacon simply by funding construction of projects such as roads, fire halls, police stations, or school buildings through designated grants. We do not believe our Supreme Court would permit such a result. "'While the ingenuity of man is apparently limitless, the court has held with unvarying regularity that one may not do by indirection what is forbidden directly.'" Sheldon Jackson College v. State, 599 P.2d 127, 132 (Alaska 1979), quoting Wolman v. Essex, 342 F.Supp. 399, 415 (S.O. Ohio 1972).

As in the Sitka case, the test to be applied in determining whether a particular project is "public construction" subject to the provisions of the Act is a functional one which inquires into the nature of the project under contract and its relationship to the purposes of Little Davis-Bacon. We believe that test is one which looks, among other things, to the nature of the project itself to determine whether it is the kind of project or activity which is traditionally undertaken by government. If it is, and if public monies are utilized, the Act applies, irrespective of questions of "ownership" and contractor status.

We arrive at our conclusion based both on our reading of the Sitka case and because of the similar approach taken by the U.S. Department of Labor in applying the federal Davis-Bacon Act (40 U.S.C. § 276a, et seq.). The definition of "public building" or "public work" for purposes of the federal Act is set out at 29 CFR § 5.2(h) and provides, in pertinent part, as follows:

> (h) The term "public building" or "public work" includes building or work, the construction, prosecution, completion, or repair of which, as defined above, is carried on directly by authority of or with funds of a Federal agency to serve the interest of the general public regardless of whether title thereof is in a Federal agency.

The Alaska Supreme Court expressly stated in Sitka that, because Little Davis-Bacon is modeled after the federal Act and because the federal regulations implementing that Act were adopted before AS 36.95.010(3) defining "public construction" became law in 1972, it "will look to the federal regulations construing Davis-Bacon for assistance in interpreting Little Davis-Bacon." Sitka at 231, n.8.

The test which we have stated, while relatively simple to set out, may prove difficult to apply to some kinds of projects. Obviously, some projects such as roads, airports, sewers, municipal buildings and school buildings are traditionally governmental in nature. Others, such as construction of women's shelters, day care centers, and animal shelters, while serving a "public purpose", 4/ have probably not traditionally been con-

---

4/ Of course, any expenditure of state funds, whether through a governmental entity or a private organization must be made for a "public purpose." Article IX, sec. 6, Alaska Constitution.

structed by government. However, there will undoubtedly remain a "gray area" of projects which cannot be readily characterized as either governmental or non-governmental like health care facilities and power generation and distribution facilities. These kinds of projects are sometimes provided by government, sometimes by private entities, and sometimes by both in the very same community. In order to clarify the gray area and provide a basis for entities who receive designated grants and who may therefore be subject to Little Davis-Bacon to determine whether their project is subject to the requirements of the Act, we recommend to the Department of Labor, by copy of this letter to Commissioner Robison, that it adopt regulations setting out the kinds of tests or factors which it will apply in enforcing the Act. 5/ By doing so, that department will assure that designated grantees have notice of their potential obligations under Little Davis-Bacon and that determinations made by it are uniformly and consistently applied.

If you have any further questions regarding the scope of Little Davis-Bacon, please let us know.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

By: Ronald W. Lorensen
Deputy Attorney General

cc: Jim Robison
Commissioner
Department of Labor

5/ The Alaska Supreme Court expressly acknowledged Labor's authority, under AS 36.05.030, to determine whether a contract is subject to Little Davis-Bacon in Sitka at 229. The kinds of factors which might be applied could include, among others, ultimate ownership of the facility, who the intended operator and/or user will be, and who will bear the costs of operating and maintaining the facility.

BILL ANALYSIS

RE: HB 304

SPONSOR: Representative Herrmann

Program Effects of the Bill

This bill would exempt communities with a population of 5000 or less from the provisions of AS. 36.

Comments

It is the position of this Department that the provisions of AS. 36 currently discourage local hire in rural communities

The requirement that prevailing wages be paid discourages "on the job training" of local labor and encourages importation of outside labor.

If this bill were to pass we feel it would, at least, remove one road block in the path of increasing local employment through state construction grants.

Mark Lewis, Commissioner

MEMORANDUM State of Alaska

TO: Norman Gorsuch
Attorney General
Department of Law

DATE: March 2, 1983

FILE NO:

TELEPHONE NO:

FROM: Richard A. Neve'
Commissioner
Department of Environmental
Conservation

SUBJECT: Title 36

In October 1982, the Attorney General's office wrote an opinion (your file 166-261-83) stating that the provisions of AS 36 (concerning public contract requirements), applied to all public construction projects. On November 8, 1982, this Department requested clarification on the attendant issue of whether a non-profit entity is a political subdivision of the State (see attachment) and subject to the provisions of Title 36.

Most of our Village Safe Water projects are constructed by non-profit entities. These groups use local labor and have used the prevailing pay scale in a particular community. As you can see, if we are required to build facilities using a statewide scale versus a local or area-wide scale, fewer facilities will be constructed. I offer this observation only to point out the importance of receiving your opinion. I have also attached a resolution by the Yukon-Kuskokwim Delta Mayor's Conference on their view of the issue.

Given the importance of this issue to our Department's Village Safe Water Program and its potential impact on rural Alaskan villages, we would appreciate a response to our November 8, 1982, request for clarification of this matter.

TITLE 36, Public Contracts
Laborers' & Mechanics'
Minimum Rates of Pay

Resolution No. 83 - 16

WHEREAS, village governments are employers of village residents in their own respective villages; and

WHEREAS, village governments have their own pay scales which have worked successfully in their own respective villages; and

WHEREAS, village funding is very limited; and

WHEREAS, villages receive State monies for village projects; and

WHEREAS, wages for these projects are mandated by Title 36; and

WHEREAS, this mandate can greatly restrict the successful completion of these village projects; and

WHEREAS, this mandate further interferes with the successful completion of other villages projects; and

WHEREAS, this mandate also upsets the future village economy; and

WHEREAS, Representative Herrmann has introduced HB 304 which will solve this problem with Title 36 if enacted into law by the State Legislature.

NOW THEREFORE BE IT RESOLVED, that the Executive Committee of BBNA fully supports the passage of HB 304 and ureges the Legislature and the Governor to act accordingly on HB 304.

SIGNED: _____
PRESIDENT

CERTIFICATION:

I, the undersiigned secretary of said Association, do hereby certify that the Executive Committee is composed of ten (10) members, of whom 7 were present at a meeting this 19 day of April, 1983, and that the foregoing resolution was adopted by the affirmative vote of 7 members.

NUSHAGAK ELECTRIC CO-OPERATIVE, INC.

P. O. BOX 197 . DILLINGHAM, ALASKA 99576 .. AREA CODE (907) 842-5251

January 19, 1983

Senator Bob Mulcahy
Pouch V
Juneau, Alaska 99811

Dear Senator:

The last session of the legislature included a legislative appropriation to Nushagak Electric Co-operative in the amount of $539,000 to expand the Dillingham waste heat system from the power house to various public entities and to pick up some costs remaining over the first phase of the project.

Funds for the first phase of the project were administered by the Alaska Power Authority. However, the Dept. of Community and Regional Affairs was assigned the responsibility for administering the $539,000.

We have encountered some serious problems however in getting these funds released. The Dept. of Community and Regional Affairs have requested that Nushagak Electric Co-operative sign a "contract" before they will release funds. Normally there would be no problem here except that this department states that we must pay the "prevailing wage rates" as defined by Title 36 (Alaska's little Davis Bacon Act) of the contract. The problem with these wage rates is that they are highly inflationary and are established with the purpose of utilizing union crews. We have no unions in Dillingham; we had, in fact, planned on extending the waste heat system with our own personnel. Unfortunately, the wage and fringe benefit program mandated by the State would completely upset our own wage and salary plan as well as those presently utilized in the community.

With this in mind we asked our attorneys to research this matter which they did in writing to Ms. Sue Perry-Piper at the Dept. of Community & Regional Affairs office in Anchorage. Repeated contacts with her have produced very little in the way of results. She states that her hands are tied and that the decision whether or not to grant NEC an exemption rests with Mr. Patrick Poland who is apparently supposed to get an opinion from the attorney general's office. Our efforts to contact Mr. Poland to date have been fruitless. I have been

Senator Mulcahy
Pouch V
Juneau, AK 99811

January 19, 1983

advised this date that he is in Juneau - I called Juneau and his office there says he is in Anchorage.

Senator, I believe there may be several problems associated with this situation. First of all, Title 26 is probably bad law and was initiated primarily by special interest groups who gave little thought to the effect it may have on small rural communities unless, of course, the intention was to force small communities to employ Anchorage union contractors. Secondly, this provision completely destroys inititive to efficiently perform tasks for the public good - it reduces the ability of this Co-operative to complete the job for which the funds were initially intended. Third, the responsiveness of the Dept. of Community and Regional Affairs has in my opinion been lacking.

I don't know what you can do about my first two complaints above, but would sure appreciate your efforts in getting Mr. Poland to communicate with us.

As a matter of interest, I am enclosing a copy of our attorney's interpretation of the application of Title 36 to Nushagak Electric Co-operative.

Your consideration of this matter would be deeply appreciated.

Yours very truly,

David F Bouker

KOLIGANEK VILLAGE COUNCIL
KOLIGANEK, ALASKA 99576 - VILLAGE TELEPHONE (907) 596-8001

Representative Adelheid Herrmann
Alaska State Legislature
Pouch V
Juneau, Alaska 99633

April 21, 1983

Dear Adelheid;

This letter is in regards to Title #36. Koliganek requested has ~~requested~~ and received legislative appropriations based on our own wage scale. Community & Regional affairs has thrown us a curve, by insisting on adherance to title #36, which we are unable to comply with, and will make it impossible to implement our construction projects. Some of our reasons for being opposed to title #36 include, but are not limited to the following:

1. In the sense of public and state-wide fiscal responsibility we find #36 inflationary.
2. Construction in remote locations such as Koliganek, is by virtue of it's site, much more costly in freight and administration. These costs have to be offset someplace or a project cannot be implemented.
3. Koliganek, as our record will prove us out, can really stretch a dollar, and get the most for our legislative dollar. #36 is a goverment mandate to waste.
4. Isolated small communities like Koliganek, have a much stronger sense of community resonsibility & togetherness than larger urban communities on the road system. Hence we are willing to work together for the good of the community a smaller wages, in order to have a project that the community can benifit from.
5. If the contractors we are forced to seek out, are required to pay title #36, than they will choose to bring in outside union workforces, thereby continuing the unemployment of the local workforce, and in turn, the local work forces dependance on the State's Department of Public Assistance.

6. We in Koliganek would not presume to mandate wage & hour legislation for Anchorage, Fairbanks, or Juneau, therefore we feel threatened by the highhanded way in which Koliganek is told it must structure it's pay scale.
7. LSR&T of the DOT, can pay lower wages in order to have a local project, than so should the local entity also be able to pay lower wages to have a project.
8. Last but not least, just about everyone is crying to control inflation, and reduce goverment spending. Koliganek is more than willing to do just that, should the State legislature than dictate otherwise?

Hopefully you will make copies of this letter and provide them to the committe members, or possibly even non-committee members who may be unsure or opposed to repeal of title #36, or of more flexibility of it.

Keep up the good work, we all appreciate what you are doing.

Sincerely Yours,

C.T. Seidl

THEY WILL GET THESE BILLS PASSED.

POM SENT BY ANNA MAY SORENSEN, DILLINGHAM LIO
OMNI NO. 12365.

STATEMENT OF ALASKA NATIVE BROTHERHOOD, ROBERT WILLARD, EXECUTIVE VICE PRESIDENT, RE: TITLE 36 - ALASKA STATUTES.

The Alaska Legislature has before it Senate Bill No. 172 and House Bill No. 378, "An Act relating to wage rates on public construction," or the so-called "Little Davis-Bacon Act."

The Alaska Native Brotherhood is the recipient of a State appropriation in the amount of one million dollars ($1 Million) to construct a Juneau Pilot Project - Community Building. Upon notification that the Governor would sign the appropriation measure into law, the ANB immediately proceeded with development planning. In this process encounter came to Title 36 of the Alaska Statutes namely the Little Davis-Bacon Act. (hereinafter Davis-Bacon).

If the ANB Project were to fall under the interpolation and application of Davis-Bacon, it goes without question that the costs would increase by 25 - 30%. A value engineering report by qualified consultants have confirmed this reality.

In our opinion, and that of our consultants, if strict application of Davis-Bacon had been applied, this project would not have been feasible, because of the escalated costs.

It should be made clear that the Alaska Native Brotherhood, or its affiliates, is not opposed to unions -- or organized labor. There are some union or contractor practices which we are not in total agreement, but in the overall sense , the ANB is not necessarily averse to unions.

Upon reflection of the ANB project, and that of some projects which have been administered by the Tlingit and Haida Regional Housing Authority over the past ten years, it can be shown that full application of the Little Davis-Bacon Act resulted in increased construction costs

and created artificial costs of labor, thus decreasing the number of housing units that could have been built. Tlingit and Haida administrators estimate that by virtue of full application of the Davis-Bacon Act 23 - 27% more housing units could have been built. That equivalates to approximately one hundred and fifty (150) more families that could have had homes. The imposition of Davis-Bacon interpolated and applied to the rural areas have resulted in the creation of artificial costs of labor.

It is not the intent of the ANB to move towards the minimum wage. It is our concern that the "prevailing wage" as set by the Department of Labor in the populated areas and, as applied to the adjacent rural proximity of that urban center may not be reflective of the fair market value of labor and skilled services in the broad spectrum of enterprise in Alaska.

Moreover, this reality may be influenced by special interest groups such as unions and/or organized general contracto and artificial influences such as labor-related requirements imposed by this legislation.

The Alaska Native Brotherhood, and its affiliates, urge passage of Senate Bill 172 and House Bill 378 thereby repealing Alaska Statutes 36.05.

Dear Representative Herrmann:

I support House Bill 304 exempting communities with a population of less than 5,000 from the Davis-Bacon Act.

Small communities with limited financial resources find it difficult to compete in the labor market, and the wage scales in some cases are much higher than the prevailing scale of the small communities.

Sincerely,

Jim D. Clark
Mayor

April 28,1983

Representative Walt Furnace, Chairman
House Labor and Management Committee
Pouch V
Juneau, Ak 99811

Dear Representative Furnace:

It has come to our attention that the House Labor and Management Committee will be holding a public hearing next Monday on House Bill 304 which deals with wage rates for publicly funded construction projects. We are not on the teleconference network, and so will not be able to testify at that time. However, we are interested in the bill, and wish to indicate support for it.

AS 36.05 as presently written is a problem for us. We usually administer directly, relatively small projects, but they are over the $2,000 now exempted by statute. These projects are not usually of the scope to be attractive to outside bidders, because they are under $100,000 in value. When the cost of the project goes over that amount it goes out to bid and an outside contractor builds the project. The contractor brings his own crew with him so that he can get the job done in the shortest possible time and at the lowest possible cost to him. This takes the local labor force out of the running for the construction jobs. As you well know, unemployment in rural Alaska is very high, and employment on these projects would help to alleviate the problem.

The money that is made on the projects, through the ordering of materials and wages paid, goes out of the community which generated it, except for the money paid locally for crew room and board. Sometimes the contractors bring in trailers for the crew, and the community does not even get that income.

We bring this up because the argument is often made that capital improvement projects in rural areas stimulate the local employment picture.

On projects between $2,000 and $100,000 which we carry out ourselves, AS 36.05 requirements often make it necessary for us to scale back the scope of the project because of the high costs. These projects are construction of relatively small, under 1000 square foot, buildings, or renovation of existing facilities. There is no local lumber yard so freight costs have to be added to all materials costs.

We have a city salary schedule which was adopted by the City Council. This schedule is considerably lower than the little Davis-Bacon wage scale, but reflects what the leaders of the community feel is adequate compensation for work done, and is commensurate with what people can earn working for fish processors, the only other possible employer.

When we have to add freight costs for materials and Davis-Bacon wage provisions to the cost of a project, we find that we have to reduce the number of people we can hire, and cut back in as many other ways as we can think of, to stay within our budget.

Local people are often willing to work for less than Davis-Bacon for several reasons. It beats not working at all, and they are willing to make a contribution to the community welfare in reduced compensation, but they do not feel they can volunteer outright. They also know that the city is able to spread the money available for wages more widely through the community. Helping each other out is still important to the people of Akutan.

We used to think that Davis-Bacon and the little Davis-Bacon Acts would be helpful to us, but as projects have been carried out under these acts, costs of projects have escalated and village people, once again, ahve been left out of the process.

We support passage of HB 304. We appreciate your consideration of these views on the issue.

Sincerely,

Nancy Gross

Juneau, AK 99811

Dear Representative Herrmann:

Bristol Bay Area Health Corporation in the steps of Bristol Bay Native Association supports the passage of HB 304 as it relates to Title 36, Public Contracts, Laborers' and Mechanics' rates of pay.

Thank you

Sincerely,

Robert J. Clark
Executive Director

RJC:ksm

"HISTORICAL OVERVIEW OF THE DAVIS-BACON AND RELATED ACTS"

The Davis-Bacon Act is one of the oldest American labor laws and was the first federal law enacted to regulate the wages of non-government workers. Like most early federal labor laws, the Act was preceded by various state statutes. Kansas, for example, had enacted the first prevailing wage law for state construction projects in 1898. Federal congressional hearings were held as early as 1898 although legislation did not result until 1931. Today, all but 10 states have enacted prevailing wage laws governing state construction projects.

The principal impetus for government regulation of wages for workers employed on public construction projects was the economic and social conditions of the 1930's. During the Depression, the national conscience was aroused by the effect of widespread unemployment on the wages of workers. While the competition for limited markets forced employers to cut labor costs, the scarcity of work created an oversupply of labor that resulted in low wage rates. The absence of job opportunities further increased public reliance upon federal construction as a source of employment at a time when the federal government was required to award its contracts to the lowest bidder. This requirement prevented federal contracting agencies from dictating that successful bidders pay their employees wages comparable to those paid for similar labor in private industry in the same area as the government projects under construction. Some successful bidders took advantage of this situation by "selfishly import[ing] labor from distant localities and...exploit[ing] this labor at wages far below local wage rates." Local workmen were unable to compete with migratory laborers, and qualified local contractors found it impossible to compete with outside contractors who based their estimates for labor costs upon the low wages paid to imported laborers.

The Davis-Bacon Act, enacted on March 3, 1931, was designed to curtail such unscrupulous practices among government contractors during a decade in which public works were on an upswing and economists and politicians were particularly wary of depressed labor markets. The Act was also designed to prohibit wage differentials from becoming a major competitive advantage in bidding on government construction contracts, thereby insuring that the economic power of government as an employer would not contribute to a further depression of local markets. To accomplish these goals, the federal Act required government contractors to pay their "laborers and mechanics" the prevailing private industry wage rates.

The compulsory nature of the Act's prevailing wage rate provision was emphasized throughout the 1931 congressional debates in Davis-Bacon Legislation. Because the Act mandated that under all covered contracts the contractor pay the prevailing wage rate, the only variable was the exact rate to be paid. In the event of a dispute concerning the applicable wage rate, the government contracting officer was to attempt to adjust the rate in accordance with the character of the work performed and the locality in which it was performed. If the contracting officer could not resolve the dispute, the matter was then to be referred to the Secretary of Labor for a conclusive determination.

In the 50 years since the enactment of the federal Davis-Bacon Act, a series of executive orders and congressional amendments have generally broadened its scope and strengthened its impact. Additionally, more than 80 other federal laws relating to prevailing wages have been passed during this period, covering a wide range of federal projects and activities. The amendments to the DavisBacon Act as well as the variety of federal legislation requiring prevailing wages to be paid serve to indicate the continuing concern of Congress to preserve prevailing wage standards for government contract work.

In Alaska, legislation requiring the payment of prevailing wages on public construction work has also been in effect since 1931. The original Alaska prevailing wage laws were passed by the territorial legislature on an emergency basis, presumably in direct response to the passage of the federal Davis-Bacon Act by the U.S. Congress two months earlier. The Alaska version was introduced as Senate Bill 69 by Senator Loden of Nome and was swiftly enacted into law effective April 29, 1931 (SLA 1931, ch. 69). Unfortunately there appears to be no written record or any legislative debate or committee hearings on the proposed Alaska legislation. The prevailing wage provisions were later included in the 1933 and 1949 compilations of Alaska law and, upon statehood, were carried over into state law and are now codified at AS 36.05.010-.110. In the years since the enactment of the original prevailing wage laws in Alaska there have been periodic amendments which further define the scope of the Little Davis-Bacon Act and establish enforcement procedures, largely in response to similar changes in federal law.

In addition to the legislative history, both federal and Alaska courts have had occasion to interpret the basic purposes and policies underlying prevailing wage legislation. In a leading federal case, the U.S. Supreme Court recognized the important wage protection purpose of the Davis-Bacon Act: "The language of the Act and its legislative history plainly show that it was not enacted to benefit contractors, but rather to protect their employees from substandard earnings by fixing a floor under wages on Government projects." U.S. v. Binghamton Construction Co., 347 U.S. 171, 177 (1953). The Alaska Supreme Court has quoted this language in at least two separate cases involving Alaska's Little Davis-Bacon Act, noting that the Alaska statutory scheme is closely patterned after the federal Act. City and Borough of Sitka v. Construction and General Laborers Local 942, 644 P.2d 227, 231-33 (Alaska 1982); Fowler v. City of Anchorage, 583 P.2d 817, 821-22 (Alaska 1978). In reviewing the policies underlying the Little Davis Bacon Act, the Alaska Supreme Court has further stated: "The fundamental purpose of Little Davis-Bacon is to assure that employees engaged in public construction receive at least the prevailing wage. The focus of the Act, quite clearly, is to the benefit of the employees, not the contracting principals." City and Borough of Sitka, supra, at 232. From these judicial statements, it is apparent that both the federal and state prevailing wage laws have as their primary objective the protection of local workers on government projects by establishing a required minimum wage in accordance with that prevailing in the area where the work is done. Both the legislative history and judicial interpretation of prevailing wage legislation strongly suggest that this primary objective is as fundamental and vital today as it was in 1931 when the legislation was first enacted.

BUILDERS SPECIAL REPORT

DAVIS-BACON WORKS— FOR MINORITIES

One of the most calculated and cynical arguments which opponents have leveled against the Davis-Bacon Act is that it hinders minority employment opportunities. The fact is that the Davis-Bacon Act poses no barrier to minorities, either to those who have already achieved journeymen status or to those seeking training in construction skills. *The Davis-Bacon Act has an effect on minority hiring, and it's all good.*

Union-busters who try to convince blacks, hispanics, women and others that wage cutting means more work for them are liars. And their record proves it.

Official government statistics show that minority participation in union programs is almost *double* the participation rate in nonunion programs. In 1978, 21 percent of all apprentices in union programs were minority workers, as compared to only 11.7 percent minority participation in nonunion programs. Union sponsored programs account for more than 90 percent of all minority graduates from registered apprenticeship programs.

The simple fact is that throughout the sixties and seventies minorities have successfully sought entry into the construction industry for one reason—the promise of a fair standard of living and skilled productive work. The major impact of increased minority participation in construction industry training programs will be fully realized in the 1980's.

It's ironic that the Associated Builders and Contractors, the U.S. Chamber of Commerce, and the rest of the far-our right-wing crowd are trying to make minority workers the patsies for a round of vicious wage cutting, at a time when they are just entering the building trades in significant numbers.

See other side

Opponents of prevailing wage laws like to claim that their calls for repeal are partially motivated by a desire to help minorities, but leaders of women's and minority organizations feel very differently about this issue:

". . . For years we have had to contend with the situation in which a Navajo carpenter working side by side with a non-Navajo carpenter received substantially less wages for the same work. **Davis-Bacon** prevents that from happening on federally-funded projects."

The Navajo Nation
(Statement of Tribal
Chairman Peter MacDonald)

"Women are beginning to gain entry into the construction trades in ever increasing numbers. Many of these women are now the principal breadwinners in their families. As women learn the skils which in the past have entitled men to decent wages, it would be inexcusable if legislation such as the **Davis-Bacon Act** was weakened."

Mildred Jeffrey
National Women's Political
Caucus

"Whereas the **Davis-Bacon Act** protects construction workers from exploitation by requiring that prevailing wages be paid to employees working on federally financed construction projects; and

Whereas, through the efforts of the NAACP, the labor movement and other interested parties, blacks are at long last gaining employment in the construction trades; . . .

Be it resolved that the NAACP goes on record against any effort to repeal the Act and deny workers in the construction industry a fair wage."

National Association for the Advancement of Colored People
(Resolution of 70th Annual
Convention)

"We understand that a bill has been introduced to repeal the **Davis-Bacon Act.** As a member of a community that has long suffered the injustices and inequities of low wages . . . we urge you and appeal to you that you may work to defeat this attempt."

Mexican-American Unity Council

THE BUILDERS

BUILDING & CONSTRUCTION TRADES DEPT. AFL-CIO ORGD. FEB. 10, 1908

Room 603-815 16th St. N.W., Washington, D.C. 20006 (202) 347-1461

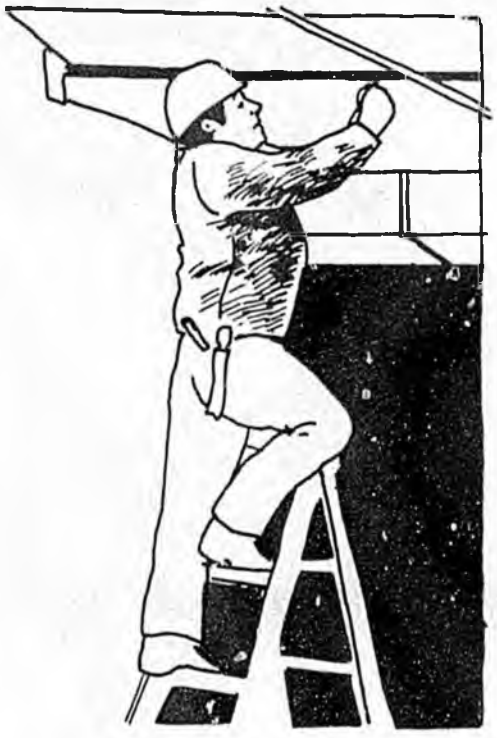
Fiction and Fact STRAIGHT TALK ABOUT DAVIS-BACON

FICTION: Repeal of Davis-Bacon will save taxpayers money.

FACT: A major reason for passage of the Davis-Bacon Act was to save taxpayers from the huge waste of funds caused by contractors who made low bids in the expectation that they could manipulate wages. These contractors were doing such shoddy work, and so many of them were failing to fulfill contract terms, that federal agencies had to go to a great deal of extra expense to finish the jobs.

FICTION: Davis-Bacon forces construction costs up by setting prevailing wages at top union rates.

FACT: About half the time, the U.S. Department of Labor sets prevailing wage rates at non-union levels. Moreover, a 1978 study by the Massachusetts Institute of Technology and the National Association of Homebuilders points out that higher wages result in higher productivity rates.



FICTION: *Application of prevailing wage rates under Davis-Bacon is inflationary.*

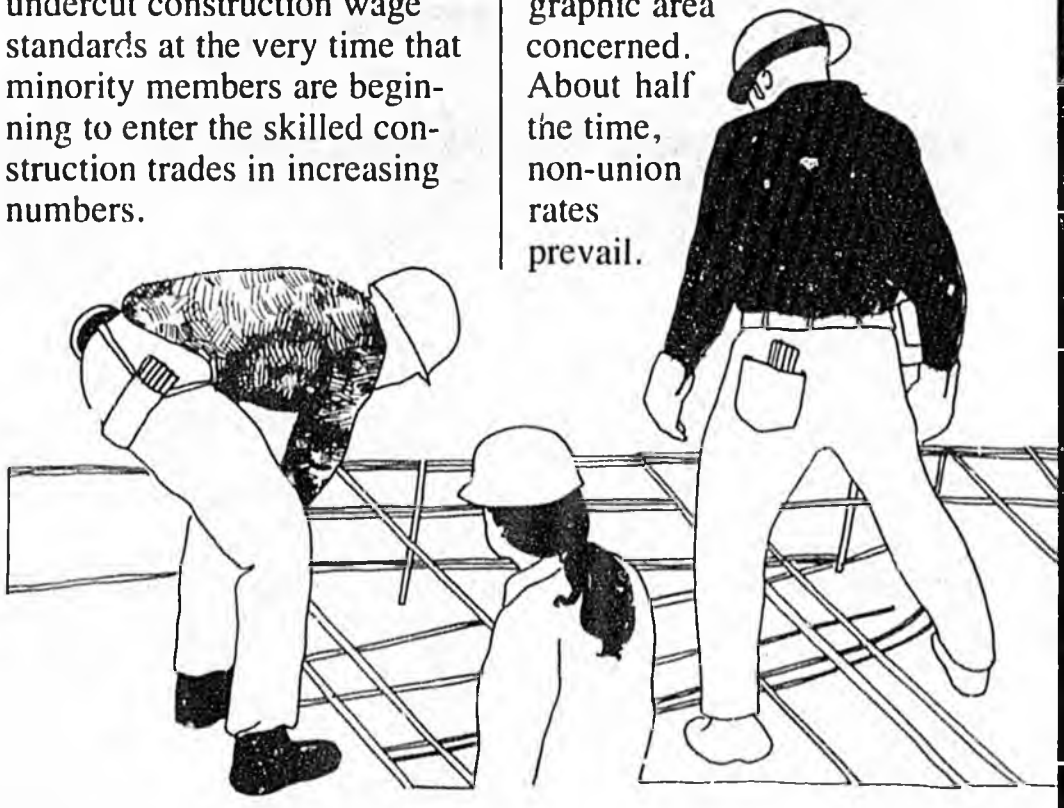
FACT: The President's Council on Wage and Price Stability found, in a recent study, that the Labor Department's wage determinations are usually a little below the collectively bargained wage rates in the area. Government figures show that, for several years, construction industry productivity has been rising faster than all-industry productivity while construction industry wage increases have been lower than all-industry wage increases.

FICTION: *Use of union wage rates under Davis-Bacon retards the entry of minorities into construction trades.*

FACT: Union-sponsored apprentice programs included more than twice as many minority participants as non-union programs. Moreover, the union-busters want to undercut construction wage standards at the very time that minority members are beginning to enter the skilled construction trades in increasing numbers.

FICTION: *The Department of Labor sets artificially high wage rates on Davis-Bacon projects, using high union rates in places where most construction is done by non-union labor.*

FACT: Wage rates are set by reference to those paid on similar projects in the geographic area concerned. About half the time, non-union rates prevail.



FICTION: *Davis-Bacon record-keeping requirements add to the cost of public works.*

FACT: Records required by contractors on Davis-Bacon projects are almost all things that a contractor would do anyway. Keeping payroll records, for instance, is a normal good business practice.

FACTS ON THE

Davis-Bacon Act

BUILDING AND CONSTRUCTION TRADES DEPARTMENT, AFL-CIO

One of the most common arguments used against the Davis-Bacon Act is that this law unnecessarily inflates the costs of federal construction. According to some critics, this happens because the wage rates required under Davis-Bacon tend to be set too high. Other critics claim that *any* sort of prevailing wage requirement will automatically have an inflationary effect. Neither of these arguments have much basis in logic or fact.

Davis-Bacon Wage Rates: Not Automatically the Union Rate

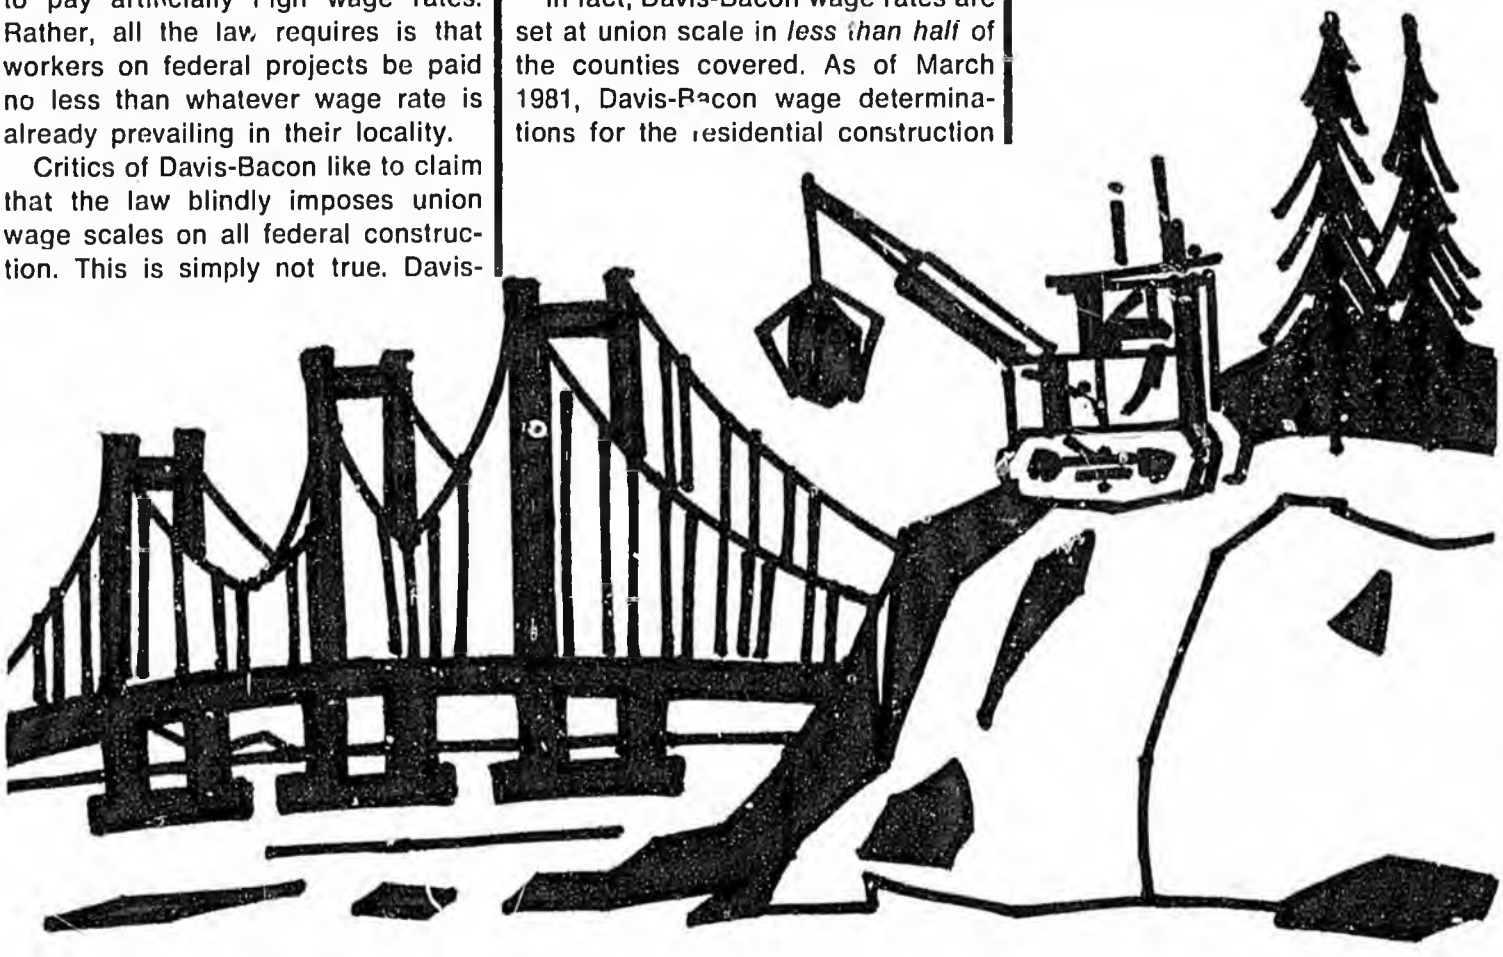
Contrary to the myths spread by its opponents, the Davis-Bacon Act does not compel government contractors to pay artificially high wage rates. Rather, all the law requires is that workers on federal projects be paid no less than whatever wage rate is already prevailing in their locality.

Critics of Davis-Bacon like to claim that the law blindly imposes union wage scales on all federal construction. This is simply not true. Davis-Bacon requires payment of union wage rates only in highly unionized areas, where these are the wages which actually prevail. In areas where open shop construction predominates, the Davis-Bacon rates will be based on the wage rates paid by non-union employers.

"THE DAVIS-BACON ACT IS NOT INFLATIONARY"

In fact, Davis-Bacon wage rates are set at union scale in *less than half* of the counties covered. As of March 1981, Davis-Bacon wage determinations for the residential construction sector were based on union wage rates in *only 14%* of the counties covered. For the more heavily unionized commercial building sector, the Davis-Bacon determinations reflected union rates in 55% of the counties covered. For heavy construction and highway construction, the corresponding figures were 50% and 47%, respectively.[1]

Further evidence that Davis-Bacon wage determinations tend to reflect actual prevailing wages is provided in a study sponsored by the President's Council on Wage and Price Stability. The authors of this study compared the Davis-Bacon rates set by the Labor Department in 19 large cities with the average wage rates found in a special survey of the con-



struction industry conducted by the Bureau of Labor Statistics. The results confirmed that the wage rates set under Davis-Bacon are generally quite close to actual prevailing wages. For commercial building, the Davis-Bacon rates were found to be 2.7% *below* the actual averages, and for residential construction the Davis-Bacon rates were only 3.1% above average.[2]

In short, the Davis-Bacon Act does not impose union wage rates on construction employers in nonunion areas, nor does it force federal contractors to pay excessive wages to their construction workers.

Substandard Wages Are Not a Good Means of Saving Money

A second set of criticisms bypasses the issue of the accuracy of Davis-Bacon wage determinations and contends that prevailing wage laws are by their very nature inflationary. The general idea is that workers can sometimes be found who are willing to take a job for less than the locally prevailing wage. By preventing the use of this cut-rate labor, the Davis-Bacon Act is held to create unnecessarily high costs.

This argument is completely fallacious, in that it ignores important differences in skills and productivity. Well trained and highly skilled construction workers are not often willing to work for substandard wage rates. The workers who can be recruited to work below the prevailing wage are likely to be less skilled and less experienced. In many cases, these will be people with no formal construction training and only a very casual attachment to the industry.

It seems clear that qualified, well trained workers will be able to complete a project much more quickly than workers with little construction experience. There's no advantage in employing someone at a few dollars an hour less if they take twice as long to finish the job.

It's not just a matter of productivity. Skilled, experienced workers are much more likely to do a high quality job. Using poorly trained personnel hired "off the street" can lead to all sorts of quality problems. While there might be some initial savings as a result of paying below the prevailing wage rate, these savings could be quickly wiped out by the need for costly repairs and maintenance.

Department of HUD Study Shows No Link Between High Wages and High Construction Costs

Because of these important differences in skills and productivity, the only valid way of examining the relationship between Davis-Bacon and inflation is by looking not at wage rates alone, but rather at the *total costs* of projects built under the law's requirements.

The only study of this sort presently in existence was conducted by the Department of Housing and Urban Development in an effort to identify the factors leading to high costs on HUD-financed housing built on Indian reservations. One possibility that the authors considered was that Davis-Bacon prevailing wage requirements might be leading to excess costs. However, their research indicated that this was not the case:

> "A comparison of average wage rates with average dwelling construction costs shows no correlation between high wages and high construction costs. Of the five Indian Housing Authorities with the *highest* average wage rates . . . only one had average dwelling construction costs which exceeded the median." [3]

Davis-Bacon Suspension Did Not Lead to Significant Savings

The Davis-Bacon Act was suspended for a brief period in 1971 by executive order of President Nixon. According to the claims made by opponents of this law, removal of prevailing wage requirements should have immediately led to a sharp reduction in costs on federal construction contracts negotiated during the suspension.

In reality, no such reduction occurred. Data are available for 1,263 projects which were bid under prevailing wage requirements and then re-bid during the suspension. On average, the second bid was lower than the first by *only six tenths of one percent.*[4]

Even this negligible amount cannot be assumed to represent savings resulting from removal of prevailing wage requirements. Rather, some price decline should be expected when a project is re-bid. The rebidding process allows each competitor to learn the amount of the bids submitted by other contractors. In cases where a contractor discovers that he lost the job by a relatively small amount, that contractor will have an incentive to lower his bid the next time around. In fact, further studies indicate that the cost reductions under the suspension were concentrated among contracts where the winning bid and the next lowest bid differed by less than 20%.[5]

In summary, all the available evidence indicates that prevailing wage protection does not lead to excess costs on government construction projects. On the contrary, paying the prevailing wage helps ensure that skilled and experienced construction workers will be hired, and thus promotes efficient, top quality work on government jobs.

"THE GAO'S REPORT ON DAVIS-BACON: SO FLAWED AS TO BE MEANINGLESS"

Many of the statistical claims about the allegedly inflationary impact of the Davis-Bacon Act are based on a 1979 report by the General Accounting Office (GAO) entitled "The Davis-Bacon Act Should Be Repealed." This report is so flawed in its facts and methods as to render its conclusions meaningless.

The GAO's basic contention is that the Department of Labor (DOL) sometimes sets the wage rates required under the Davis-Bacon Act at a level higher than the actual prevailing wage rate, thereby leading to excess costs on federal construction projects. The evidence for this allegation comes from a series of GAO wage surveys designed to check the accuracy of the DOL figures. Any difference between the DOL wage determination and the GAO survey results was taken as proof that the Labor Department had made an error in setting Davis-Bacon wage rates.

In fact, the validity of this "check" is very dubious. There are many reasons other than Labor Department error which can explain the differences between the DOL figures and the GAO figures. For example, the survey methodology used by the GAO investigators differed in important respects from that used by the Labor Department; the GAO personnel were inexperienced in conducting wage surveys; and the GAO admitted difficulties in securing the cooperation of construction employers in providing wage data. Further, in some cases, the GAO drew conclusions about prevailing wage rates for particular crafts based on wage data for only one or two workers, hardly an adequate basis for sweeping conclusions about widespread DOL error.

The GAO study used a sample of only 30 wage determinations, representing about two tenths of one percent of the more than 15,000 Davis-

Bacon wage determinations issued by the Labor Department in a typical year. In 18 of the 30 cases, the GAO concluded that the Labor Department wage determinations were too *low* rather than too high. These cases were discarded in drawing the report's conclusions, since the GAO was only interested in cases where the Davis-Bacon Act could be accused of driving up costs. The 12 remaining wage determinations (in which the GAO wage estimates were lower than the Labor Department figures) became the primary basis for the GAO's conclusions that Labor Department errors in setting Davis-Bacon wage rates could be costing the government hundreds of millions of dollars every year.

Such scanty evidence would be very weak support for any sort of conclusion and provides no basis whatsoever for the GAO's sweeping contention that the Davis-Bacon Act should be repealed.

BUILDING AND CONSTRUCTION TRADES DEPARTMENT, AFL-CIO

Robert A. Georgine, President

Joseph F. Maloney, Secretary-Treasurer

815 16th Street, N.W.
Washington, D.C. 20006

FACTS ON THE

Davis-Bacon Act

BUILDING AND CONSTRUCTION TRADES DEPARTMENT, AFL-CIO

What does the Davis-Bacon Act do? It requires that workers on federally funded construction projects be paid no less than the wage rate prevailing in their local community for similar work.

This law was first proposed in Congress in 1927, and was enacted in 1931. It was designed to remedy problems which were occurring on government public works projects. Contracts were being won by fly-by-night construction companies who reaped large profits by paying very low wages to their employees in exchange for long hours of work. Many of these contractors came from outside the communities where the federal projects were being built, and sometimes brought in their own crews. These unscrupulous builders not only undercut the labor standards of the communities they operated in; all too often they also left the taxpayers saddled with a poorly constructed project.

Why a Prevailing Wage Law for Government Construction?

Wage-cutting practices, and the problems which result, are especially likely to occur on construction jobs because of the unique characteristics of the construction industry. Construction requires relatively little fixed capital, and the needed equipment can usually be leased rather than bought. Consequently, it is fairly easy to go into business as a contractor, and construction firms are constantly being formed and dissolved. The turnover in firms is matched by the turnover in employees. Generally, workers are hired only for the duration of a particular job, and move on to a new employer when the work is finished. Construction employment is also very unsteady. Last year, the unemployment rate in construction averaged 14.2%, roughly double that in the economy as a whole. All of this makes it very easy for a fly-by-night operator to go into the construction business, pick up some semi-skilled or unskilled workers at rock bottom wages, and make a quick profit.

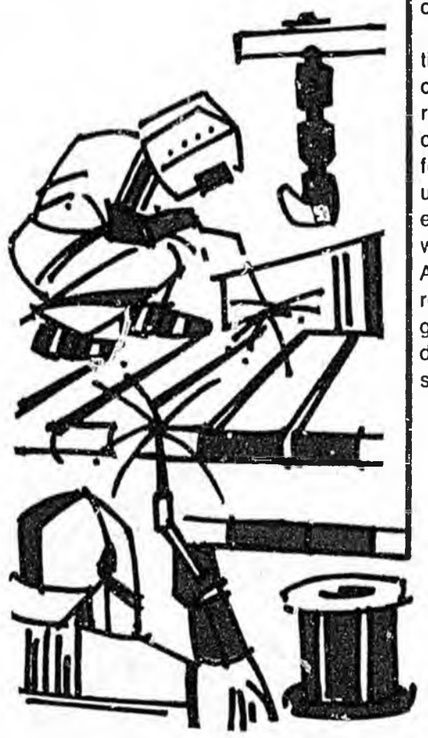
"Fair to workers, contractors & taxpayers"

The government is particularly vulnerable to this kind of operation because of the nature of the government contracting proces. A private firm can control who it deals with, and can avoid these fast buck artists entirely and deal only with reputable businesses. The government, on the other hand, is required by law to award a contract to the lowest bidder (unless there is a compelling case that the firm is unqualified—something which is very hard to establish before the work is started). An unscrupulous contractor can easily cut costs on wages, cut corners on materials, and thereby win itself a government contract. The reputable business, committed to paying wage rates sufficient to attract and hold skilled, experienced construction workers, cannot hope to compete with these tactics.

Prevailing Wages: Fair to Workers, Contractors and Taxpayers

There are several reasons why the government has an interest in preventing these sorts of practices through prevailing wage requirements and other measures. First, this is a matter of basic fairness to the workers involved. The government should set a good example for others, and should avoid being a party to situations where the labor standards of the local community are being eroded.

Further, prevailing wage requirements provide important protections to reputable contractors by providing them with a fair chance to compete for government projects, instead of losing this work to disreputable competitors who underbid them by paying substandard wages. With a floor established under wage rates, contractors are forced to compete for public projects on the basis of their skills and efficiency, not on the basis of the low wages they pay.



Finally, the Davis-Bacon Act protects the government and taxpayers. Skilled and experienced construction workers are not generally willing to work for substandard wages. The contractor who tries to win government work by drastic reductions in wages will hire the lowest paid people he can find, who are almost certain to be those with the least training and experience in the industry. The likely consequences of this will be a generally shoddy construction job, extra costs and waste when faulty work must be done over, and higher expenses for maintenance and repairs over the life of the project. Of course, by the time the government finds all the problems with its new building, the contractor is likely to be long gone—off to another area to try this tactic again, or out of business to reappear later under another name.

These are the basic reasons which led Congress to pass the Davis-Bacon Act fifty years ago. The legislatures of 39 states reached the same conclusions on their own, and responded by enacting "little Davis-Bacon Acts" covering state-funded construction.

Over the past fifty years, conditions have improved greatly in the construction industry, partially as a result of the Davis-Bacon Act and other labor laws. However, the basic forces remain unchanged which allow unscrupulous contractors to win federal contracts by paying substandard wages. As a result, the Davis-Bacon Act continues to play an important role in preventing serious abuses on government construction work, and deserves to be preserved and strengthened.

Davis-Bacon WORKS

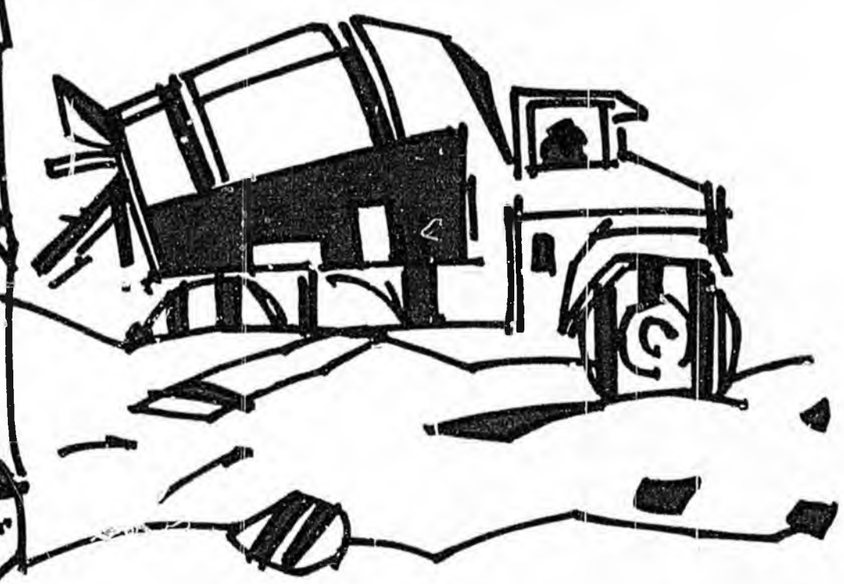
"CONTINUING ABUSES IN CONSTRUCTION SHOW THE CONTINUING NEED FOR DAVIS-BACON"

Numerous violations of the Davis-Bacon Act are detected every year by federal agencies. For example, in a two-year period, one single agency—the U.S. Department of Housing and Urban Development—instituted labor standards enforcement actions which led to more than $5 million in back wages being restored to more than 11,000 workers on federal projects.

These violations cover the whole range of possible wrongdoing—payment of substandard wages, failure to make proper payments for health insurance and other benefits, forcing workers to "kick back" a portion of their wages as a condition for continued employment, phoney use of "trainee" classifications to exploit young workers seeking to learn construction skills, and so on. Often, these labor standards problems are associated with other sorts of problems involving shoddy work and poor contractor performance. If the legal protections provided by the Davis-Bacon Act were to be removed, these types of abuses would be expected to become much more common.

Here are two recent examples which demonstrate the problems which unscrupulous contractors cause when they seek to make a fast buck by slashing wage rates. Both of these accounts come from investigative reports aired on "Arizona Weekly," a public affairs program broadcast by television station KAET in Phoenix, Arizona.

The first of these stories involves a $5 million federal housing project on the San Carlos Indian Reservation in Arizona, a project where the contractor, Mendoza Drywall, relied on low-wage labor supplied by illegal aliens, among others:



REPORTER: ". . . we also found blatant violations of federally mandated wage rates. Who were the victims? The illegal aliens. The ones who couldn't speak up and go to the authorities, who had very few options as they lived and worked each day on the project. They were young men like Pedro.

"How much is he getting?"

ANSWER: "$1.50 an hour."

REPORTER: ". . . he wasn't the only one who was shortchanged. Other illegal aliens were paid just half the amount federal regulations required. The aliens were cheap labor, and that meant high profits for someone else.

"We soon discovered that Pedro didn't live like a citizen. He lived in this unfinished home on the project, where for some time there was no water, no heat, not even basic facilities. There were more than ten workers living in this house at one time. At least eight of them, their job foreman told us, were illegal aliens. The others were Navajo Indians. They slept on the floor on old matresses and they cooked on camp stoves. But mostly they just worked on the project . . ."

A second case involved Copper State Builders, a contractor working on several government projects, who was also found to have violated the Davis-Bacon Act by paying workers well below the prevailing wage. As is often the case with firms using cut-rate labor, there seemed to be serious problems with the company's reliability and the quality of its work. Among other things, Station KAET's investigation disclosed that this firm had obtained its electrical contractor's license through forgery:

REPORTER: "Arizona Weekly has learned that the Registrar of Contractors is investigating all of the company's licenses because of this forgery (shown on camera). It appears on Copper State's electrical license. . . . In effect, the company said it was qualified to do electrical work when in reality no one in the firm was approved by the state to do it.

"Copper State Builders has never been reluctant to seek federal jobs though. The firm bid successfully on a project to improve federal housing on the west side of Phoenix. This contract was worth more than $185,000. The Executive Director of the Maricopa County Housing Authority, John Hollar, the man who administered the federal project, describes it as the worst job he's ever experienced. . . . Hollar says the biggest problem was that the work was never done right the first time. It had to be done over and over again. And each time it was redone, the project's inspectors and architect had to go back out and recheck the work. That cost taxpayer money. How much? Hollar says he doesn't know, but the taxpayers were footing the bill for the company's mistakes."

Continuing violations of the Davis-Bacon Act such as these serve as a reminder of the potential for serious abuse which still exists in construction. If the legal deterrents provided by Davis-Bacon were eliminated, it is safe to assume that these abuses would become more widespread, to the detriment of workers, fair contractors and taxpayers.

BILL ANALYSIS

RE: HB 304

SPONSOR: Representative Herrmann

Program Effects of the Bill

This bill would exempt communities with a population of 5000 or less from the provisions of AS. 36.

Comments

It is the position of this Department that the provisions of AS. 36 currently discourage local hire in rural communities

The requirement that prevailing wages be paid discourages "on the job training" of local labor and encourages importation of outside labor.

If this bill were to pass we feel it would, at least, remove one road block in the path of increasing local employment through state construction grants.

Mark Lewis, Commissioner

21-P1LH

HB

308

Alaska National
INSURANCE COMPANY

A policy of service and protection

April 6, 1983

The Honorable Walt Furness, Representative
Chair House
Labor and Commerce Committee
Alaska State Senate
Pouch Y
Juneau, Alaska 99811

Re: HB #308 An Act relating to insurance.

Dear Mr. Furness:

This measure in its current form is very much opposed by us. On the other hand, the areas of our serious concern can be easily remedied by some amendments, in which case the general thrust of the bill would be acceptable. We, therefore, urge the Committee to adopt the recommended amendments if it intends to proceed with this legislation.

BACKGROUND

For reasons, some of which may be valid, the municipal league, or at least several municipalities, have felt it desirable to have statutory authority to establish a means of exchanging insurance contracts among themselves as an alternative to purchasing insurance from commercial insurance markets. At an early stage in the legislative process when the municipality's interest in establishing their own insurance program first became known to us, we suggested using the reciprocal insurer authority already granted in the Insurance Code. They have accepted this recommendation and House Bill 308 is the result. Unfortunately in the drafting, several specific exceptions from appropriate obligations imposed on insurers were carved out for the municipal reciprocals, and we believe such is wholly inappropriate.

It is the purpose of this letter to indicate these areas and to point out the responsibilities that every other insurer currently has and ought to have in connection with sustaining the workers' compensation system in this State which even a municipal reciprocal should be required to support.

ASSIGNED RISK POOL

[AS21.39.150 (a) - HB 308 Page 1, Line 9 -10]

The proposed amendment would exempt all reciprocals from having to participate in the contributions to the assigned risk pool.

Currently, all commercial insurers writing workers' compensation in the State of Alaska are required to pay an assessment to support the assigned risk pool. The amount of the assessment is a pro-rata charge necessary to cover the extent to which losses and expenses exceed the premium collected in the pool. Assessment based on workers' compensation writings by workers' compensation carriers is a logical way to support the pool since it spreads the cost for supporting the undesirable risks among all other employers in the State. Currently, any employer insured in a commercial insurer, including all municipalities which are insured by commercial insurers, are paying indirectly the assessment to support the assigned risk pool.

To the extent that a group of employers are exempted from having to pay their pro-rata share, the burden falls on a smaller population who must then pay a higher assessment. In effect, by exempting the municipal reciprocal from having to pay the assigned risk pool, all other employers are going to have to pay a slightly higher assessment.

We find it totally inequitable and without justification that the municipalities as employers be relieved of any obligation which any other employer is obligated to pay as part of the cost of hiring employees in this State.

Furthermore, because of the way the provision was drafted, all reciprocals are excluded. As drafted, this means that the Timber Insurance Exchange, which is a private commercial reciprocal insurer owned and operated by the loggers, would also be exempted from supporting the assigned risk pool. I believe this was not intended but is the result of an error in drafting.

RECOMMENDATION

Section 1 of the proposed bill be stricken in its entirety.

ALLOWABLE FUNDING

[Section 2 AS21.75.050 (c) - HB #308 Page 1, Line 15 - 21]

This provision allows only those reciprocals which are formed by two or more muncipalities to post a bond in lieu of otherwise admissible assets to capitalize the reciprocal insurer. Frankly, we believe that places the municipalities in the position of establishing an insurance company with little or none of the capital requirements imposed upon any other commercial insurer and is to that degree inequitable. On the other hand, we recognize that municipalities

have a certain financial capability because of their taxing authority which other commercial employers do not have, and therefore, though we would prefer not to see the statutes drafted with authority to post a bond in lieu of cash, will not object to the bill on that ground alone.

On the other hand, there are two amendments that need to be made to this section in order to limit the authority to the specific concessions intended by the legislature:

A. Arguably, a reciprocal could be formed by two or more municipalities and then insure non-municipalities as part of their business operations. Such ought not to be permitted, thus, I would urge the following recommended amendment; and

B. The bond should be permitted only for the initial capital and not for any of its reserves or surplus.

To meet these points, I would urge the following change in language:

> "A domestic reciprocal insurer formed under this chapter by and insuring only, two or more municipalities shall (1) comply with (a) of this section or post a bond for an amount equal to the capital that would be required of a domestic stock insurer writing the same lines of insurance for which the reciprocal insurer seeks to be authorized, and (2) maintain a surplus in admitted assets of $250,000 or a surplus sufficient to operate the reciprocal insurer for one year, whichever is greater." [Emphasis on language to be added.]

EXEMPTION OF PUBLIC UTILITIES FROM GUARANTEE ASSOCIATION.

[Section 5 AS21.80.180 (5) - Page 2, Line 6 and Section 6 AS21.80.180 (6) - Page 2, Line 14.]
