HB 228, by Shultz.

Would organize the Department of Transportation & Public Facilities into five regions within the state (currently organized in regions--no specific number). Sets out specific location of each region. Provides each regional director shall have at least six years experience in transportation construction and engineering, and is responsible for planning, design, construction, administration, and maintenance within the region. Provides that the director of region two is responsible for planning, design, and construction within regions two, five and a portion of region four. The director of region one is responsible for planning, design and construction within region one and a portion of region four.
