   (b) To the Railroad, in increased efficiency of such permanent employees.

   (c) To avoid loss of wages and consequent hardships

1. (c) cont'd.

to employees and th[illegible] families because of [illegible]ing deprived of their regular income.

(d) To promote good conduct and encourage careful and efficient service.

2. No discipline by record will be made for less than five (5) or more than sixty (60) demerits.

3. Where demerits are given for unsatisfactory service, cancellations upon record will be given as follows:

(a) A clear record for six (6) months will cancel five (5) demerits.

(b) A clear record for one (1) year will cancel thirty (30) demerits.

(c) A clear record for eighteen (18) months

3. (c) cont'd.
will cancel sixty (60) demerits.

4. When an employee's demerits have accumulated to the number of ninety (90), he will be dismissed from the service.

5. An accumulation of demerits showing that an employee is not desirable for the service will first be given special consideration, but when the service of an employee is so generally unsatisfactory as to unfit him for further service, dismissal will follow.

6. Any permanent employee, who is not serving a probationary period and has completed one year of continuous employment, subject to discipline resulting from hearings and accumulation of demerits involving removal, suspension for more than thirty (30) days, furlough without pay or reduction in pay shall be afforded the provisions of Civil Service Commission regulations relative to adverse

actions. These regulations shall be quoted to the employee, including, but not limited to a Notice of Proposed Action, Receipted Delivery Notice, Thirty day Pay status, time for employees response and evaluation of same and Notice of Decision.

ARTICLE XXVI

ADVISORY ARBITRATION

Section 1. If Management and the Union fail to settle any grievance arising under Article XXV titled Grievance Procedure with respect to the interpretation, application, or alleged violation of this Agreement or of any policy or decision of Management, such dispute shall, upon written notice by the party requesting arbitration to the other party, be referred to Advisory Arbitration. Such written notice must be served not later than thirty (30) days following the conclusion of the last step of the grievance procedure.

Section 2. Within seven (7) days from the date of receipt of the arbitration request, the parties shall

meet for the purpose of endeavoring to agree on the selection of an arbitrator, and the wording of the question to be resolved. If agreement cannot be reached, then either party may request the Federal Mediation and Conciliation Service to submit a list of five (5) impartial persons qualified to act as arbitrators. The parties shall meet within three (3) days after the receipt of such list. If they cannot mutually agree upon one of the listed arbitrators, then Management and the Union will each strike one arbitrator's name from the list of five (5) and shall repeat this procedure. The remaining name shall be the duly selected arbitrator.

Section 3. The fee and expenses of the arbitrator shall be borne equally by Management and the Union provided that the cost to Management for arbitrator's fee shall not exceed that amount authorized by rules and regulations. The arbitration hearing shall be held during the regular day shift work hours of the basic work week of Monday through Friday, and all employee representatives, not to exceed two (2), employee appellants and employee witnesses shall be in a pay status without charge to annual leave while participating in the arbitration proceedings.

Section 4. The arbitrator is requested by the parties to render his decision as quickly as possible but in any event no later than thirty (30) days after the conclusion of the hearings unless the parties otherwise agree.

Section 5. It is agreed and recognized that arbitration as provided herein is advisory in nature.

Section 6. The arbiter shall have jurisdiction and authority to interpret this Agreement and to apply it to the particular case under consideration, but shall, however, have no authority to add to, subtract from, or modify the terms of this Agreement and shall confine his findings to the question submitted.

Section 7. In those cases where either party deems it necessary, it may arrange that a transcript of the hearing be made by a qualified court reporter. The party making such arrangement shall bear the full cost thereof. If both parties request a copy the cost will be shared equally. If the arbiter requests that he be furnished with a copy, the expense of the original copy and the reporter's attendance charge shall be borne equally by Management and the Union.

Section 8. The Head of the activity shall render his decision on the advisory arbitration within twenty (20) calendar days from receipt of the arbitrator's decision.

ARTICLE XXVII

SENIORITY

Section 1. Mechanics, helpers or apprentices permanently transferred from one point to another will, after thirty (30) days, lose their seniority at the point they left, and their seniority at the point to which transferred will be established as of the date service is first performed at point to which transferred. Junior employees will be compelled to accept a permanent transfer to another point.*

*Senior employees temporarily transferred will not be compelled to accept a permanent transfer to another point.

Section 2. Employees temporarily transferred to fill vacancies of less than thirty (30) days at the direction of the Management under a forced rule will be allowed expenses in accordance with Standard Government Travel Regulations

for not to exceed thirty (30) days.

Section 3. Employees now filling or promoted to official positions beyond the scope of this agreement shall retain and continue to accumulate seniority in the class from which promoted.

Section 4. An employee taken from any craft for assignment to special service will retain his seniority and be considered on leave of absence from his department while performing such special service.

Section 5. Employees on extended leave of absence for vacation, sickness or other authorized leave, upon returning to service will be permitted to return to their former positions or may exercise displacement rights on new jobs or vacancies created during his absence. If such employee returns to his regular position, the employee who was relieving him will return to regular position. If a returning employee displaces another employee assigned during his absence, the displaced employee may exercise seniority in like manner to other positions for which he is qualified.

Such actions are to be accomplished upon return or within three (3) days thereafter.

Section 6. Seniority of Mechanics, helpers and apprentices covered by this agreement in each craft shall be confined to the point at which employed.

Section 7. The indiscriminate exercise of seniority to displace junior employees, which practice is usually called "rolling" or "bumping", will not be permitted. However, an employee whose assignment is discontinued, or who may be displaced from his position by other causes, will be permitted to exercise seniority on any job occupied by a junior employee on his seniority list.

Section 8. When the force is reduced, seniority will not govern. Civil Service Commission Regulations shall apply for Reduction in Force.

Section 9. Separate seniority rosters, at their respective points will be maintained for Machinists, Heavy Equipment Mechanics, Electricians, Sheet

Metal Workers, Pipe and Steamfitters, and Mechanics' Helpers.

ARTICLE XXVIII
BULLETINING POSITIONS
WITHIN MULTIPLE APPOINTMENTS

Section 1. Vacancies of thirty (30) days or more shall be bulletined for five (5) days before being permanently filled. The oldest employee in point of service in the respective craft, if qualified by experience to efficiently handle the work, will be assigned. Employees desiring to avail themselves of this rule will make bid, in writing, to the official in charge, duplicate copy to local chairman, the Management to make assignment.

Section 2. An employee exercising his seniority rights under this rule will do so without expense to the Carrier; he will not lose his right to the job he left, and if after a fair trial not to exceed thirty (30) days he fails to qualify for the new position, he will return to his former position. The next senior qualified man bidding will be assigned. In the event there are no bids, the youngest employee will be assigned.

Section 3. Official Bulletin Boards shall be used at all shops, repair points, and roundhouses where proper notices of interest to employees and job bulletins may be posted. Access to such board will be made available to accredited Union representatives for posting such notices as are necessary.

Section 4. Employees covered by this Agreement, who have been assigned in a multiple appointment, performs work for four (4) hours or more in a position authorized with a multiple appointment shall be paid for the rate of the work performed consistent with the grade assignments authorized in multiple appointment.

Section 5. Advertised vacancies may be filled in acting status pending an assignment.

ARTICLE XXIX

DURATION AND CHANGES

Section 1. This agreement when approved by the parties for the Union and the Management shall become effective on January 16, 1970. After such approval renewal of this Agreement will be automatic from year to year, provided that this Agreement shall terminate

automatically effective with any date on which it is determined that the Union is no longer entitled to exclusive recognition in accordance with Executive Order 11491.

Section 2. By mutual consent of the parties, this Agreement may be opened at any time for amendment. Any request for amendment shall be in writing to the General Manager and must be accompanied by a summary of the amendment or amendments proposed. Within sixty (60) days after receipt of such request, representatives of Management and the Union will meet to negotiate the matter, and no changes other than those covered by the summary shall be considered. A written notice of desire to alter and amend by renegotiation shall not have the effect of terminating this Agreement.

Section 3. This Agreement supersedes all previous Agreements for employees covered by this Agreement.

Section 4. The Articles of this Agreement have been negotiated in good faith and are presumed to be consistent with existing laws enacted by the U. S. Congress, applicable Department of

Transportation and Civil Service Commission regulations and Executive Orders. The provision of any existing or future contrary decree with respect to and which affect this agreement shall become a part thereof.

Section 5. It is agreed that this Agreement shall take precedent and no other Agreement shall be the basis for grievances.

Dated at Anchorage, Alaska Jan. 16, 1970.

Memorandum of Understanding No. 1
to the
Schedule of pay, rules and regulations
Governing Machinists, Heavy Equipment
Mechanics, Electricians, Sheetmetal
Workers, Pipe and Steamfitters,
Mechanical Helpers and Apprentices

Article I, Recognition and Unit Designation, Section 2, is understood to mean: Management recognizes that the Union is the exclusive representative of all non-supervisory blue collar employees in the bargaining unit consisting of the following journeymen, helpers and apprentices of the Motive Power and Equipment Branch: Machinists, Heavy Equipment Mechanics, Pipe and Steamfitters, Electricians and Sheet-metal Workers. The Union recognizes the responsibility of representing the interests of all such employees by the provisions of this agreement.

Article II, Responsibilities and Rights of Management, Section 1, is understood to mean: The right to make reasonable rules and regulations shall be considered acknowledged functions of Management. In making rules and regulations relating to personnel policies, and practices and procedures, and matters of working conditions, Management

due regard and consideration to
s of the Union and the employees
e obligations imposed by this
and the provisions of Executive
91 as amended, and is subject to
wing requirements:

in the administration of all
overed by the agreement, officials
yees are governed by existing or
ws and the regulations of approp-
thorities, including policies set
the Federal Personnel Manual; by
agency policies and regulations
ence at the time the agreement was
; and by subsequently published
licies and regulations required
r by the regulations of approp-
thorities, or authorized by the
a controlling agreement at a
gency level;

management officials of the agency
he right, in accordance with appli-
ws and regulations --

(1) to direct employees of the agency;
(2) to hire, promote, transfer,
and retain employees in positions
the agency, and to suspend, demote,
e, or take other disciplinary action
employees;
(3) to relieve employees from duties
of lack of work or for other legit-
easons;

(4) to maintain the efficiency of the Government operations entrusted to them;

(5) to determine the methods, means, and personnel by which such operations are to be conducted; and

(6) to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

Article XI, Sick Leave, Section 3: The word "periodically" is understood to mean six (6) months.

Article XXI, Safety, Section 6, is understood to mean: When it becomes known that an accident has resulted in a disabling injury, the Master Mechanic will notify the Union promptly of the circumstances.

Article XXV, Grievance Procedure: All references to the term "hearing" within the grievance procedure are understood to mean "formal investigations".

Section 3 is understood to mean: At formal investigations an employee may be assisted by one or more duly accredited employee representatives. Disputes growing out of personal grievances and/or out of the interpretation or application of agreements or practices concerning wages, rules or working conditions between the parties hereto may be handled by one or more duly

ged representatives, verbally
the General Foreman and the
echanic. If not satisfactorily
, they may be appealed by the
tative in writing to the Chief
al Officer, then to the Operations
, and then to the General Manager.
written step Management will
a decision within ten (10) days.

Section 13. Effective Date and Duration

Preamble. This Basic Agreement is agreed to in the interest of developing sound relations between the employees and management of The Alaska Railroad. The public interest requires high standards of employee performance and modern work practices to improve employee performance and efficiency. Observance of its terms by management and employees, as well as by their representatives, should result in the joint determination of fair and reasonable hours regulations and working rules; in the prevention of grievances and in the prompt and orderly settlement of all differences between labor and management; in stabilizing employment, and in developing systematic labor-management cooperation for safety, mutual benefit and good service to the patrons of the Railroad and the State of Alaska.

The Alaska Railroad as an agency of the Government of the United States is dedicated to the accomplishment of certain public purposes as provided in the Act of March 12, 1914, which directed the President of the United States to construct and operate a railroad in the Territory of Alaska (now the State of Alaska). Among these

public purposes are the furtherance of the development of Alaska and the support of national defense. The duties and responsibilities necessary to accomplish these public purposes have been vested by Executive Order of the President No. 11107, dated April 25, 1963, and by the Transportation Act of 1967, in the Secretary of Transportation; and the Secretary, by appropriate orders and regulations, has delegated certain responsibility for operating the Railroad to its General Manager.

Section 1. Definitions

Labor Organizations: the term "labor organization" means any organization, union, or employee representation committee in which employees participate and which exists for the purpose, in whole or in part, of providing representation for members employed on the Railroad in dealing with the management officials on hours, conditions of employment, grievances, disputes and other matters pertinent to their employment. This term does not apply to employee welfare organizations, recreational associations, credit unions, or similar associations.

Representatives of Labor Organizations: This term includes those individuals, either employees or non-employees of the Department, who are accredited by the employees to represent their interests in relationships or dealings with management officials on matters relating to their employment.

Management Officials: This term includes those employees at all levels of the Railroad's organization, in both line and staff capacities, who have significant responsibilities in supervising, directing and managing program activities and administrative matters which involve decisions or actions affecting employee groups.

Basic Labor Agreement: This term refers to the written document negotiated by management officials and representatives of employees, which concerns itself primarily with matters of broad principle, policy, and procedure which will govern the relations of the parties thereto in the negotiation of working conditions, the settlement of disputes and grievances, and related matters.

Supplementary Labor Agreement: This term refers to the written agreement or series

of agreements which are negotiated and made effective betweeen management officials and representatives of employees within the purpose and in the implementation of the general policies and guidelines of a basic labor agreement.

They may not delete, modify or otherwise nullify any of the policies and procedures which have been incorporated in the Basic Labor Agreement.

Labor-Management Negotiations: This term is used interchangeably with the term "Collective bargaining".

Section 2. Compliance

2.1. It is recognized that in labor-management negotiations, and in the administering of all matters covered by this agreement, both the Railroad and the employees are governed by the provision of applicable federal laws and regulations.

2.2. If laws or regulations become effective, binding on the Railroad and inconsistent with the provisions of this agreement, the Railroad shall notify the representatives of the respective labor organizations. The labor organizations and the Railroad shall issue a joint statement of the change and its effect upon this agreement.

Section 3. Scope

This agreement is applicable to those employees of the Railroad represented by the International Association of Machinists and Aerospace Workers, blue collar category as enumerated in the Handbook of Blue Collar Occupational Families and Series.

Section 4. Employee Rights to Labor Representation

4.1. Employees of the Railroad have the right to form or join organizations and designate representatives of their own choosing, provided they do not form or join organizations which assert that employees in the service of the United States Government may strike or assist in such strike, or which advocate the overthrow of the United States Government by force or violence.

4.2. In the exercise of the right to form or join organizations and esignate representatives, employees shall be free from any and all restraint, interference or coercion on the part of management, and the supervisory staff is prohibited from exercising any such restraint, interference or coercion. By the same token the designation of

individuals and officers to represent the management of the Railroad for the purpose of this policy is entirely the responsibility of the General Manager.

4.3. The labor organization may be required to submit a copy of its bylaws, and the names of its officers and representatives, and to make known by whom it is chartered. The identity of individual members or the number of members is not required, except in the determination of representation rights.

4.4. This section does not authorize participation in the management of a labor organization or acting as a representative of such an organization, by a supervisor, or by an employee when the participation or activity would result in a conflict or apparent conflict of interest or otherwise be incompatible with law or with the official duties of the employee, nor shall a unit be established if it includes any management official or supervisor.

Section 5. Discrimination Prohibited

Appointments to the service of the Railroad are to be made strictly on the basis of merit and efficiency. No test of race, color, religious belief, or political affiliation, except as

prescribed by law, will be required of any employee, or considered in his appointment, promotion, demotion, transfer, retention in or termination of service with the Railroad, nor shall any employee of the Railroad nor anyone seeking employment be required to join or refrain from joining any duly accredited organization as a condition of appointment, promotion, demotion, transfer, retention in or termination of service.

Section 6. Determination of Bargaining Rights

6.1. The majority of the employees of any class or craft of the Railroad has the right to determine the organization which will represent the employees of such class or craft for the purposes indicated in the preamble.

6.2. In the initial determination of representation rights and in resolving disputes as to these rights, both employees and management are governed by the appropriate section of the Federal Personnel Manual as implemented by the Department of Transportation.

Section 7. Duty to Confer

7.1. If a craft or group of employees has properly designated an organization to represent them in accordance with the provisions of Section 6 above, the representatives of such craft or group shall so notify the General Manager, and the General Manager, the officers and supervisors of the Railroad will thereafter treat with such organizations and its officers for the purposes described in the preamble to this agreement.

7.2. Representatives of labor organizations or employees desiring to confer with management officials shall deal in the first instance with those Railroad officials who have primary responsibility over the case or subject matter which is the subject of conference.

7.3. Differences or disputes between an employee or group of employees and the Railroad, growing out of grievances or out of the interpretation or application of the terms of jointly promulgated schedules, having been handled by the employees or their representatives through established supervisory channels up to

and including the Branch Head concerned and the Personnel Officer, the General Manager will then call a conference. Conferences for the adjustment of such differences or disputes will be held whenever possible during the regular working hours, and when so held, labor organization representatives actually working will not lose pay, provided that the number of such representatives of the labor organizations concerned does not exceed two.

7.4. Conferences may be requested by the labor organization or the Railroad announcing their desire to revise the jointly promulgated agreements, and having given proper notice, the time and place for the beginning of such conferences will be announced. The time required by labor organization representatives in the employ of the Railroad when attending such conferences shall not be on official times when negotiating an agreement with agency management.

7.5. Leave as accrued may be granted to any other employee for attendance or observance of the above meetings, contingent on the availability of replacement personnel. In the interest of cooperation, in labor matters, the

Railroad will follow a liberal policy in allowing time off for such purposes, with reasonable limits and consistent with work requirements.

Section 8. Written Agreements

8.1. Working rules, in the determination of which employees, through accredited organizations, have participated - will be reduced to writing and will be promulgated as schedules over the joint signature of the General Manager and the officers of the organization or organizations representing the employees concerned. Such agreements shall be regarded as Supplmentary Agreements as defined in Section 1 of this agreement.

8.2. The Railroad and the labor organizations further agree that, pending the determination or adjustment of any issue arising between them by means of the conference machinery and procedures hereinafter provided, there will be no change in the conditions in any schedules or recorded understanding applicable to such issue.

8.3. The Railroad will not make unilateral changes in the terms of any labor agreement pending settlement of

outstanding differences through mutually agreeable procedures, except those that are dictated by over-riding Federal Law or Regulation.

Section 9. Scope of Negotiations

9.1. Management officials retain the right to direct employees in accomplishing the work of the agency; to hire, promote, transfer, assign, and retain employees in positions within the agency; to suspend, demote, discharge, or take other disciplinary action against employees; to relieve employees from duties because of lack of work or other legitimate reasons; to maintain the efficiency of the Government operations entrusted to them; to determine the methods, means, and personnel by which such operations are to be conducted; and to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

9.2. Negotiable Items. The Alaska Railroad management shall negotiate with the unions, for the employees represented by the unions signatory hereto, for:

a. The establishment of craft working rules.
b. The establishment of grievance procedures and discussion of personnel policies and practices, or other matters affecting general working conditions.
c. NOTE: The wage fixing system applicable to the employees subject to this Basic Agreement will be set forth in Section 9.4.

9.3. All requests for negotiation conferences shall be in writing and specify the subjects for discussion and the times proposed for consideration. Conferences between the parties shall begin as promptly as practicable. Every effort will be made by the negotiators to agree.

9.4. Wage Fixing System. The wage fixing system applicable to Alaska Railroad blue collar employees represented by the International Association of Machinists and Aerospace Workers shall be the system currently followed for their wage board employees by Army-Air Force installations in the State of Alaska. As soon as a coordinated wage fixing policy is promulgated by the Civil Service Commission for the wage

board employees in Alaska, such Federal coordinated system shall be substituted for the Army-Air Force wage fixing system referred to above. Details as to the application of this system will be set forth in a supplementary agreement.

Section 10. Disputes and Grievance Procedures

10.1 The parties to this agreement recognize that the prompt and orderly settlement of disputes in a fair and reasonable manner is essential to good labor relations and to the efficient accomplishment of the purpose for which the Railroad exists. To this end officials of the Railroad and employees and their representatives will make every effort to resolve their disputes at the first level of management where the dispute originates.

10.2. Detailed procedures for the handling of grievances shall be included in supplementary labor agreements between the parties signatory hereto.

Section 11. Bulletin Boards and Distribution of Literature

Distribution of literature of a labor organization shall be permitted, provided the distribution is made by employees outside their regular working hours and does not interfere with the work assignments of other employees who may be on duty at the time. Notices posted by labor organizations on Government bulletin boards and literature distributed on Government property shall contain the name of the organization issuing or sponsoring it, and shall contain nothing that would imply official sponsorship or endorsement by the Railroad. The material must pertain specifically to the business of the labor organization and shall not contain statements which reflect on or attack the integrity or motives of individuals, other labor organizations, the Department of Transportation, the Railroad, or other governmental agencies, Federal or otherwise. Objective statements of opinion, favorable or unfavorable, about issues or subjects related to the employees' work and employment conditions are permitted. Canvassing or soliciting membership and collecting membership dues for a labor organization shall also be conducted outside regular working hours

of the employees canvassed and of the employees performing these activities. Non-employee canvassers may be required to give notice of their presence to the responsible management officer. There shall be no interference with the performance of official duty of employees during working hours.

Section 12. Labor-Management Cooperation

12.1. The parties to this agreement recognize that there are many areas of common interest to the management of the Railroad and to its employees which are important to the effective operation of the Railroad and to the welfare of employees which are not ordinarily included within the scope of collective bargaining agreements. Such areas of common interest include, but are not limited to:

a. Elimination of waste in operation and maintenance.
b. Conservation of materials, supplies, time, power and energy.
c. Improvements in quality of workmanship and services.

d. Correction of conditions making for grievances.
e. Health, safety, and morale standards.

12.2. In order to increase the area and effectiveness of labor-management cooperation, Joint Committees have been established prior to the making of this agreement, as follows:

Joint Union-Management Safety Committee
Alaska Railroad Medical Association and Excess Benefits Plan
Joint Labor-Management Committee

12.3. Employees serving on the welfare committees mentioned above and similar committees that may be established will be paid not to exceed a minimum day for their attendance if any time is lost. It shall be the duty of the parties to this agreement to further the work and effectiveness of these joint committees.

Section 13. Effective Date and Duration

13.1. This agreement shall remain in

full force and effect for one year from the date executed, and thereafter until the expiration of sixty (60) calendar days following the giving of written notice by either party to the other of its desire to terminate this agreement in its entirety or to effect changes herein by agreement.

13.2. By mutual consent of the parties, this agreement may be opened at any time for amendment. Also, modification or amendment of this agreement may be required because of changes in applicable laws, rules, regulations or policies issued after the date of this agreement.

13.3. The Basic Labor Agreement between the International Association of Machinists and Aerospace Workers and The Alaska Railroad dated March 29, 1968, and which was negotiated under authority of Executive Order 10988, is hereby supplemented for compatability with the new Executive Order 11491, relative to Labor Management relations effective January 1, 1970.

APPENDIX WC-A and WC-B Wage Schedules

LABOR-MANAGEMENT AGREEMENT

between

THE ALASKA RAILROAD

and

Clerical, Technical, and Administrative Employees
represented by

THE AMERICAN FEDERATION OF GOVERNMENT EMPLOYEES
LOCAL #183

PREAMBLE

This Agreement is entered into by The Alaska Railroad, hereinafter referred to as the Employer, and the American Federation of Government Employees, Local No. 183, hereinafter referred to as the Union, and has as its purpose the promotion of harmonious relations between the Employer and the Union, the establishment of an equitable and peaceful procedure for the resolution of differences, and the establishment of rates of pay, a job classification system, hours of work, and other conditions of employment.

The Employer and the Union mutually agree that the public interest requires high standards of employee performance and the continual development and implementation of modern and progressive work practices to facilitate employee performance and efficiency.

The parties recognize that the participation of employees in the formulation and implementation of personnel policies and procedures which affect them will contribute substantially to the improvement and efficient administration of the public service.

ARTICLE 1
RECOGNITION AND COVERAGE

SECTION 1 RECOGNITION

The Employer recognizes that the Union is the exclusive representative of all employees in the bargaining unit defined in Section 2, and the Union recognizes the responsibility of representing the interests of all such employees.

SECTION 2 COVERAGE

The bargaining unit consists of clerical, technical, and administrativ employees, both permanent and temporary, whose positions are covered i a WC pay plan as of the effective date of this Agreement.

SECTION 3 EXCLUSIONS

The bargaining unit does not include:

a) any management official or supervisor,
b) any professional employee,
c) any employee engaged in Federal personnel work in other than clerical capacity,
d) any confidential employee.

The term "confidential employee" refers to an employee assigned to the position of Secretary to the General Manager, or Secretary to the Personnel Officer.

ARTICLE 2
RIGHTS OF THE EMPLOYER

SECTION 1 BASIC PROVISIONS

In the administration of all matters covered by this Agreement, officials and employees are governed by existing or future laws and the regulations of appropriate authorities, including appropriate policies set forth in the Federal Personnel Manual, by published agency policies and regulations in existence at the time the Agreement was approved; and by subsequently published agency policies and regulations required by law or by the regulations of appropriate authorities, or authorized by the terms of a controlling agreement at a higher agency level.

SECTION 2 EMPLOYER'S RETAINED RIGHTS

The Employer retains the right, in accordance with applicable laws and regulations to:

a) direct employees of the agency;
b) hire, promote, transfer, assign, and retain employees in positions within the agency;
c) suspend, demote, discharge, or take other disciplinary action;
d) relieve employees from duties because of lack of work or for other legitimate reasons;
e) maintain the efficiency government operations entrusted to them;
f) determine the methods, means, and personnel by which such operations are to be conducted; and
g) take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

SECTION 3 PERMISSIVE MATTERS

In prescribing regulations relating to personnel policies and practices and working conditions, the Employer shall have due regard for the obligation imposed by Section 11, paragraph (a) of Executive Order 11491, as amended. However, the obligation to meet and confer does not include matters with respect to the mission of the agency; its budget; its organization; the number of employees; and the numbers, types, and grades of positions or employees assigned to an organizational unit.

work project, or tour of duty; the technology of performing its work; or its internal security practices. This does not preclude the parties from negotiating agreements providing appropriate arrangements for employees adversely affected by the impact of realignment of work forces or technological change.

SECTION 4 PRIMACY OF AGREEMENT

To the extent that provisions of the Employer's Administrative Manual conflict with this Agreement, the provisions of this Agreement shall govern.

SECTION 5 UNION CONTACT WITH THIRD PARTIES

The Union agrees that before registering a complaint or charge against the Employer with anyone outside the bargaining unit, the Union agrees to provide the Employer with an opportunity to resolve the conditions which generated the complaint or charge. In administering this Section, the Union will notify the Personnel Officer in writing, in all cases, of its intention to register such complaints or charges. The Union further agrees to withhold registration of such complaints or charges for a period of five workdays from the date the Personnel Officer is notified of the Union's intent. This Section does not apply to notification of an AFGE National Officer or Representative.

ARTICLE 3
RIGHTS OF EMPLOYEES

SECTION 1 FREEDOM TO JOIN AND ASSIST

Employees in the unit shall have, and shall be protected in the exercise of, the right, freely and without fear of penalty or reprisal, to form, join, and assist the Union or any other labor organization or to refrain from any such activity. Except as provided in Executive Order 11491, as amended, the freedom of such employees to assist any labor organization shall be recognized as extending to participation in the management of the Union, including presentation of its views to officials of the Executive Branch, the Congress, or other appropriate authority.

SECTION 2 OPEN SHOP

Nothing in this Agreement shall require an employee to become or to remain a member of a labor organization or to pay money to the Union except pursuant to a voluntary, written authorization by a member for payment of dues through payroll deduction.

SECTION 3 UNION REPRESENTATION

If an employee elects, the Union has the obligation to represent him/her in the course of adverse actions, grievances, and other appeal proceedings within the unit. The Employer will provide the Union with all necessary information for the Union to fulfill this obligation.

The Employer will advise an employee of his/her right to a Union representative (who is readily available) for the following situations:

a) an adverse action is initiated against an employee;
b) prior to taking a written or sworn statement from an employee;
c) when the Employer conducts a nonformal, investigatory interview, the employee being interviewed is entitled upon his/her request, to the presence of a Union representative, if he/she has reasonable grounds to believe that the interview may result in disciplinary action against him/her. This provision does not apply to investigatory interviews concerning accidents conducted by the Employer's safety inspectors, or interviews concerning criminal cases conducted by the Employer's security police.

ARTICLE 4
RIGHTS OF THE UNION

SECTION 1 AUTHORIZATION OF STEWARDS

The Employer agrees to recognize a reasonable number of Union stewards and alternates, who have been duly authorized by the Union, to represent employees on appropriate work-related matters. The Union will provide to the Employer (Personnel Officer) before February 1 of each year, an official master list of all Union officials and alternates. The Employer reserves the right to restrict use of official time to stewards and alternates whose names appear on this list. Changes to this official listing may be made only by notification to the Personnel Officer.

SECTION 2 USE OF OFFICIAL TIME

Union stewards will be allowed a reasonable amount of official time during duty hours to perform matters which directly relate to the work situation and/or presentation of grievances and appeals. No internal Union business will be conducted during working hours.

SECTION 3 RESPONSIBILITIES OF STEWARDS

When any Union Official or steward is required to leave his/her worksite

on appropriate matters related to his/her representational duties, he/she will request permission from his/her immediate supervisor, advise where he/she is going, how long he/she expects to be away from his/her work station, and state the general nature of his/her business. Permission shall also be obtained from the immediate supervisor of any employee being contacted. Permission in these instances will be granted unless the individual's work situation precludes such action. In any event, permission will be granted at the earliest opportunity. The Union steward will report his/her return to work to his/her supervisor.

Union officers, stewards, representatives, and employees shall be allowed to leave their assigned area to go to other departments, shops, or offices when it is necessary to do so in order to accomplish the purposes outlined in this section, and in order to bring about prompt and expeditious disposition of a complaint or grievance. Such activity shall be allowed without any loss in pay or benefits to the employees authorized to act in behalf of the Union under the terms of this Agreement or to the employees contacted.

SECTION 4 UNION OFFICIAL - RIGHT OF ACCESS

The Employer agrees that representatives of the American Federation of Government Employees, AFL/CIO, shall be allowed onto the Employer's premises at reasonable times on official business. The representative shall first make his/her presence known to the supervisor of the section he/she is visiting. Union officials who are not employees are recognized as employee representatives.

SECTION 5 NOTIFICATION - MEETINGS AND GRIEVANCES

The Union shall be notified by the Employer of grievances or disciplinary actions against employee(s) in the unit in accordance with limitations set forth by provisions of the Privacy Act (Public Law 93-579).

The Union shall be notified by the Employer and shall be given the opportunity to be represented at formal meetings held by officials of the Employer with representatives of other labor organizations when the subject to be discussed involves personnel policies or practices which would affect employees of the unit.

SECTION 6 LISTING OF EMPLOYEES

The Employer will furnish to the Union a current listing of all employees in the unit semi-annually. The listing will include the name, location, grade, and rate of pay.

SECTION 7 ADMINISTRATIVE ORDERS

The Employer agrees to furnish the Union with one copy of all ARR Orders. Supplements and changes thereto will also be furnished promptly.

SECTION 8 OFFICIAL TIME FOR TRAINING

An employee who is an official or authorized representative of the Union will normally be excused without charge to leave in conjunction with attendance at a training session sponsored by the Union, provided that the subject matter of such training is of mutual concern to the Employer and the employee in his/her capacity as a Union representative.

ARTICLE 5
APPROPRIATE MATTERS

SECTION 1 NOTIFICATION

The Employer will notify the Union on appropriate matters (personnel policies, practices, and matters affecting working conditions, including classification and pay systems) and will meet and confer with the Union upon its request.

SECTION 2 FAIR APPLICATION OF BENEFITS

All privileges and benefits provided in accordance with law, regulation or provisions of this Agreement will be applied fairly and equitably to all employees in the unit, except for those rights and benefits which are not applicable to temporary employees.

ARTICLE 6
POSITION CLASSIFICATION

SECTION 1 PROCEDURE

Positions will be classified by management according to the Factor Evaluation System using U. S. Civil Service Commission Booklet TS-27 dated May 1977 and supplements thereto.

SECTION 2 JOB DESCRIPTIONS

The Employer has the right to establish positions and to assign, reassign, or remove duties and responsibilities from positions. Position descriptions shall accurately reflect the major duties and responsibilities of the position and the skills and knowledges required in the

position, clearly stating the highest level required of the employee in all nine factors. Disputes between an employee and his/her supervisor over the accuracy of the position description shall be resolved through the provisions of Article 23, Grievance Procedure.

SECTION 3 CLASSIFICATION APPEAL

When an employee is dissatisfied with the classification of his/her position, he/she may appeal his/her position classification in accordance with the following procedure:

a) Step 1: The employee, or his/her representative, shall write to the Personnel Officer stating what he/she believes the classification of the position should be and the basis for that belief. The Personnel Officer shall give a written decision within seven working days of his receipt of the letter of appeal.
b) Step 2: If the employee is dissatisfied with the decision of the Personnel Officer, within seven working days of his/her receipt of the Personnel Officer's decision, he/she may file a written appeal to the General Manager. The General Manager shall give a written decision within fifteen working days from his receipt of the appeal of the Personnel Officer's decision.
c) Step 3: If the decision of the General Manager is not satisfactory to the Union, the decision may be referred to arbitration for resolution in accordance with the provisions of Article 24, Arbitration.

SECTION 4 SAVED PAY

When an employee is downgraded through no fault of his/her own due to reorganization or correction of a classification error, if the employee's existing rate of pay is exactly the same as the rate of pay for one of the steps of the new grade, that shall be the pay rate assigned. If the employee's existing rate of pay falls between two steps of the pay scale for the new grade, the employee shall be assigned the rate of the higher step. If the employee's existing rate of pay is higher than the pay for the highest step of the new grade, the employee shall be entitled to pay retention for as long as the employee remains in that position. However the employee whose pay is retained under this Section shall receive only one-half of future pay increases until the rate of pay for the highest step of the grade equals or exceeds the retained rate.

ARTICLE 7
WAGES AND BENEFITS

SECTION 1 WAGE SCHEDULES

There shall be two wage schedules. Wage schedule WC-A shall apply to

employees who were on the rolls of the Employer prior to the effective date of this Agreement. Wage schedule WC-B shall apply to employees entering on the rolls of the Employer on or after the effective date of this Agreement.

Wage schedules shall be issued by the Employer according to the format shown in Section 2. The wage schedules shall be approved by the Union prior to issuance, and upon issuance, shall be considered as appendices to this Agreement.

SECTION 2 PERIODIC ADJUSTMENTS

Periodic wage adjustments shall become effective as of the first day of the first full pay period in February, June, and October of each year. The adjustment shall be equal to the percentage change in the Anchorage, Alaska, Consumer Price Index for Urban Wage Earners and Clerical Workers, all items, (CPI-W), measured over a four-month period preceding the effective date of the adjustment. The February adjustment shall be based upon the percentage change in the CPI-W between July and November of the previous year. The June adjustment shall be based upon the percentage change in the CPI-W between November of the previous year and March of the current year. The October adjustment shall be based upon the percentage change in the CPI-W between March and July of the current year.

SECTION 3 SHIFT DIFFERENTIAL

Employees covered under this Agreement shall be paid shift differential as follows:

a) If the majority of shift hours (five or more) fall between the hours of 3:00 p.m. and 12:00 midnight, the differential is 7.5% of the basic wage for all hours in the shift.
b) If the majority of shift hours (five or more) fall between the hours of 11:00 p.m. and 6:00 a.m., the differential is 10% of the basic wage for all hours in the shift.

SECTION 4 NORTH END DIFFERENTIAL

Employees permanently located north of Healy shall receive an additional 6% of the basic rate in addition to all other pay and allowances.

SECTION 5 SUNDAY PREMIUM

Sunday premium pay of 25% will be paid for all regularly scheduled Sunday work in addition to all other pay to which an employee is entitled.

SECTION 6 STEP INCREASE ON PROMOTION

When promoted, an employee shall receive a wage increase at least

equivalent to a one-step increase in the grade from which promoted.

SECTION 7 MEDICAL AND DENTAL INSURANCE

The Employer shall continue to pay both the Employer's and the employee's contribution to the Federal Employee's Health Benefits Program.

The Employer shall pay the premiums for an employee Dental Insurance Program. The benefits of the program selected may be no less than the benefits provided under the Railroad Employees' National Dental Plan.

SECTION 8 TIME-IN-GRADE

Waiting periods for step increases are:

Between Steps:	WC-A Wage Schedule:	WC-B Wage Schedule:
1 and 2	104 weeks	13 weeks
2 and 3	104 weeks	26 weeks
3 and 4	104 weeks	65 weeks
4 and 5	104 weeks	104 weeks

SECTION 9 HOLIDAYS

Employees shall be excused for all days now prescribed by law as holidays and any that may later be added by law and all holidays designated by Executive Order of the President.

Pay for holiday work shall be computed in accordance with applicable regulations.

SECTION 10 DURATION OF THIS ARTICLE

Provisions of this Article shall remain in effect until a new Agreement is signed.

This Article is subject to change or negotiation only on the third anniversary date of the effective date, or sooner only by mutual consent.

SECTION 11 MEMORANDUM OF UNDERSTANDING

The parties shall execute a Memorandum of Understanding clarifying the computations, applications, and details of the understandings which have been arrived at during the negotiation of this Article.

ARTICLE 8
HOURS OF WORK

SECTION 1 BASIC WORK WEEK

The basic work week for full time employees is forty hours. The basic work week will be scheduled on five 8-hour days, and the two days outside the basic work week will be consecutive.

SECTION 2 ASSIGNMENTS TO TOURS OF DUTY

Assignments to tours of duty will be scheduled not less than one week advance. An employee whose days off are to be changed shall be notifi in writing no less than five workdays before the change becomes effect An employee whose days off will remain the same but whose tour of duty (hours of work) is to be changed more than one hour shall be notified writing no less than 48 hours before the change becomes effective.

ARTICLE 9
OVERTIME

SECTION 1 DIRECTION OF SUPERVISOR

No overtime shall be worked except by direction of proper authority.

SECTION 2 RATE

Time worked in excess of eight hours in any one day or forty hours in any administrative work week will be paid at the overtime rate of time and one-half on an actual minute basis.

SECTION 3 ASSIGNMENT

In the assignment of overtime work, preference shall be given to the senior employee regularly assigned to the position for which overtime is to be worked. (See Article 14.)

SECTION 4 REQUIREMENT

When necessary, employees will be required to work overtime unless the employee provides sufficient justification to the supervisor that overtime work would cause undue hardship. Employees may request not to work overtime when there are sufficient qualified volunteers available to accomplish the overtime work required.

SECTION 5 OUTSIDE REGULAR TOUR

Employees required to report for duty in advance of their assigned starting time, or required to remain on duty beyond their scheduled assigned duty hours on an assigned work day within the administrative work week will be paid at the overtime rate for such duty.

When an employee is directed to report for duty outside his/her assigned tour of duty, on rest days or holidays, he/she shall receive not less than four hours' pay at straight-time rates for two hours and forty minutes of work or less. If held on duty in excess of two hours and forty minutes, the overtime rate will be allowed.

SECTION 6 BREAK

When an employee's regular workday is extended for more than two hours, a paid twenty-minute break will be permitted.

ARTICLE 10
ABSENCE AND LEAVE

SECTION 1 ADMINISTRATION AUTHORITY

Absences and leave shall be administered in accordance with ARR Order 3600.1A dated January 16, 1978.

SECTION 2 APPLICATION FOR LEAVE

Application for annual leave for vacation purposes will be granted on a seniority basis. Enforced leave will be administered on a reverse seniority basis. (See Article 14.)

SECTION 3 DENIAL OF REQUEST

When a request for annual leave has been denied, the Form SF-71 will be returned to the employee with the reasons for denial noted thereon.

ARTICLE 11
TRAINING

SECTION 1 COMMITTEE

A Joint Training Committee shall be established, with one representative

appointed by the Employer and one representative appointed by the Un In addition, the Training Officer will be present at the meeting.

The Committee shall meet by mutual agreement not later than seven da after the request of either member.

The purpose of the Committee will be to review training programs and suggest improvements or additional programs for the general developm of employees within the bargaining unit.

SECTION 2 ACTION BY EMPLOYER

Consistent with the needs and requirements of the Employer, the Train Section will take necessary action to develop, integrate, and implem the programs or suggestions recommended by the Committee.

ARTICLE 12
MERIT PROMOTION

SECTION 1 POLICY

It is the policy of The Alaska Railroad to utilize employees' skills abilities to the fullest extent practicable. Employees will be promo on the basis of merit without regard to race, religion, color, sex, a marital status, political affiliation, national origin, non-disqualif physical handicap, membership or non-membership in an employee organi tion, or any other non-job related factor. The overall objective of merit promotion process is to assure that positions are filled with highly qualified persons and to assure that all employees have an equ opportunity to apply for advancement.

SECTION 2 PROCEDURES

How it works.

The manager or supervisor determines that a position is needed. He or she describes what tasks and duties need to be accomplished and writes them down. This listing of duties becomes the "job description." Aft this is done, and he/she has decided upon the skills the employee will need, a request is made to the Personnel Officer to begin procedures t fill the position.

The Personnel Office compares the duties of the position to standards which have been previously established. This comparison determines th grade or level of the position, and consequently, its pay level. Then

a vacancy announcement bulletin is published which describes the duties of the position, the qualifications which are required, and tells how, when, and where a person can apply.

Interested, eligible employees apply for consideration for the vacancy to the Personnel Office. Only employees with permanent status are eligible for consideration. Employees serving in a temporary status may not be considered unless they have established eligibility for the position applied for on a U. S. Civil Service Commission register and have provided proof of such eligibility to the Personnel Office.

If an applicant does not meet these requirements, he or she is informed of this and receives no further consideration.

A panel, composed of Railroad employees, reviews the applications of the persons who do meet the basic requirements and divides them into groups of "Qualified," "Highly Qualified," and "Best Qualified." The list of qualified candidates is sent to the supervisor for consideration for the vacancy. The supervisor may select anyone on this list from the "Best Qualified" group, or may decide not to select any of these applicants and to fill the vacancy by another method.

SECTION 3 OTHER METHODS OF FILLING POSITIONS

The Union recognizes that merit promotion is but one means of filling vacancies and other methods of staffing vacancies may properly be utilized by management to the exclusion of the merit promotion process. The Employer recognizes that promotion from within is a valuable and appropriate policy; accordingly, other methods of staffing will be used sparingly and only when the needs of the Railroad require. No loan, detail, or reassignment will be made for the purpose of evading the objectives of the Merit Promotion Program.

SECTION 4 APPLICATION OF PROCEDURES

Application.

(1) Competitive procedures apply to all promotions and to the following actions:

a) reassignment or demotion to a position with known promotion potential higher than the position currently held (except as required by reduction-in-force regulations);

b) selections for details of more than 30 days to a higher grade position or to a position with known promotion potential;

c) transfers to a higher grade position or position with known promotion potential;

d) reinstatement to a position at a higher grade than the person last held, or to one having potential for advancement to a higher grade;

e) appointment of a present or former nontemporary Federal employee from a Civil Service register to a position at a higher grade than the person holds or last held or to a position with known promotion potential;

f) selections for training required for promotion;

g) acquisition of, or addition to, a multiple appointment; and

h) reassignment of a nonsupervisor to a supervisory position.

(2) Procedures of this Merit Promotion Plan do not apply to:

a) career promotions which are --

1 promotions without current competition when at an earlier stage an employee was selected under competitive promotion procedures for an assignment intended to prepare him/her for the positions being filled if this intention was made a matter of record; or

2 promotions resulting from an employee's position being reconstituted at a higher grade because of unplanned accretion of additional duties and responsibilities.

b) Reassignment to a position with no greater promotion potential than that of the employee's current position. Management agrees that a reassignment which is made to a position outside the employee's commuting area will be only with the agreement of the employee.

c) A temporary promotion of 120 days or less.

d) An action taken as a remedy for failure to receive proper consideration in a competitive promotion action.

e) A promotion resulting from the upgrading of a position without significant change in duties and responsibilities due to issuance of a new classification standard or the correction of a classification error.

f) A position change required by reduction-in-force regulations.

g) Repromotion to a grade or position from which an employee was

demoted within the Railroad without personal cause and not at his/her request. An employee demoted without personal cause will be advised in writing of his/her entitlement to special consideration for repromotion. An employee will be considered for promotion before other means are used to fill a position.

h) An assignment made within the Multiple Assignment System which provides for the movement of employees from one set of duties to another within a specific job-group or craft.

(3) Entry Level Positions. Employees who desire to change jobs within the Railroad or who wish to be considered for reassignment or transfer to entry level positions may make their wishes known to the Personnel Office. Their names will be placed in a "Skills File" for consideration when such vacancies arise. Entry level positions are those at grade WC-5 and below.

SECTION 5 AREA OF CONSIDERATION

Area of Consideration. The Alaska Railroad is the minimum area of consideration for locating candidates for promotional opportuniti[illegible] other areas of consideration may be used depending upon types of positions involved, qualification requirements, and availability of highly qualified candidates. When it is clearly evident that a sufficient number of highly qualified candidates will not be available from within the Railroad, the Employer may concurrently consider candidates from other sources. Outside candidates must meet the same qualification requirements as applicants for promotion. The Union will be notified in advance of expansion of the area of consideration.

Competition for temporary promotion will be restricted to the commuting area in which the vacancy exists.

The area of consideration may be extended when an announcement does not produce a desirable number of highly qualified candidates. The decision to expand the area of consideration will be documented in the merit promotion file.

SECTION 6 LOCATING CANDIDATES

Method of Locating Candidates.

(1) When a vacant position is to be filled through this promotion plan, the Personnel Office will first refer to the selecting official information on any employee entitled to special consideration because of demotion through no fault of his/her own, or oversight in a previous promotion action. If there is none, or none is selected, merit promotion procedures will be initiated.

(2) All employees within the unit have the right to submit applica in response to vacancy announcements and all completed applica submitted on a timely basis will be considered. Employees app for announced va[illegible]cies must submit a Request for Consideratio Vacant Position [illegible] Form 20[illegible]) to the Personnel Office. Appl tions must be received on or before the closing date specified the announcement and will not be accepted after the closing da cept in unusual circumstances. Employees are encouraged to su Standard Form 171, "Personal Qualifications Statement," to ass that their records are correct and complete, unless they have rent application in their Official Personnel Folder.

(3) Employees who are on leave of absence will receive automatic c eratio[illegible] if they file a current application with the Personnel before departing. The Personnel Office will file these applic on behalf of the employee, for appropriate vacancy consideratio

(4) A letter of acknowledgment of receipt of application will be s the employee on the same day as the application is received in Personnel Office.

SECTION 7 ANNOUNCEMENTS

Issuance of Announcements. All vacancies to which this plan applie cept seasonal positions, will be advertised through issuance of ann ments within the area of consideration. Announcements will be post official bulletin boards. Announcements will be open for at least working days.

As a minimum, all vacancy announcements will contain the foll wing formation:

a) Title, series, salary, and grade of the position.
b) Career promotion potential of the position.
c) Organizational and geographic location of the position.
d) Minimum area of consideration.
e) Brief description of duties.
f) If the position is an upward mobility or trainee position.
g) Minimum qualification requirements.
h) Number of vacancies.
i) What the applicant must do to be considered.
j) Where additional information can be obtained.

SECTION 8 QUALIFICATION STANDARDS

(1) Qualification standards used by The Alaska Railroad will confor the qualification standards established by the U. S. Civil Serv Commission.

(2) A qualification standard may not be changed or modified after the vacancy announcement has been posted unless an error has been made or an inappropriate standard has been used.

(3) Selective placement factors may be used when such a knowledge, skill, or ability is essential for successful performance in the position to be filled. If used, a selective placement factor becomes a part of the basic qualification standard.

A selective placement factor is a knowledge, skill, or ability essential for satisfactory performance on a particular job and one which can be objectively determined in the evaluation and performance of candidates. As such, it represents an addition to the basic qualification standard for the position being filled. Selective placement factors must be stated on the vacancy announcement for the position being filled.

When supervisory positions are to be filled, basic eligibility for consideration also depends upon possession of the abilities and personal attributes required in the supervisory standards in Handbook X-118 or X-118C.

(4) Candidates' qualifications will be evaluated on the basis of all pertinent information available, such as:

a) experience and training, including self-development efforts;
b) outside volunteer activities that supply experience relevant to the job;
c) awards showing relevant abilities; and
d) abilities demonstrated on the job.

The candidates' application forms and supervisors' evaluations are the usual sources of information.

When a supervisory position is being filled, the panel will carefully consider information denoting the possession of supervisory abilities and potential for supervisory duties.

The names of the candidates rated as best qualified will be listed alphabetically on a promotion certificate in one grouping. The candidates' promotion files will accompany the certificate.

SECTION 9 EVALUATION METHODS

The Personnel Office will review all applications filed in response to vacancy announcements to determine if the applicant meets the basic qualification requirements of the position, plus selective placement factors, if appropriate.

If there are fewer than three applicants meeting the qualification standards, the Personnel Office will refer all qualified candidates to the selecting official for consideration.

If there are three or more applicants meeting the qualification requirements, the Personnel Office will convene a Rating and Ranking Panel to make distinctions as to "Qualified," "Highly Qualified," and "Best Qualified" among the candidates.

The Personnel Office will utilize FPM Supplement 335-1 to prepare a Ranking Guide to be used by the panel in making distinctions among candidates. Only candidates who meet the guidelines supplied by the Ranking Guide will be identified as "Highly Qualified."

In addition to, or instead of, the normal method of evaluating candidates when filling trainee positions (especially those in a special training program) for which special qualification standards have been approved, it may be necessary to use special rating and ranking instruments such as supervisory appraisals, and structured interview to determine which employees have the required aptitudes to be considered for competitive assignment and training. Promotion will follow if performance on the after training warrants. When these special evaluation procedures are to be used, the vacancy announcement will explain all requirements and indicate the potential for promotion after successful completion of the program.

SECTION 10 RATING AND RANKING PANEL

The Rating and Ranking Panel will consist of three employees. Not more than one member of the panel may be from the same organizational unit in which the vacancy exists (normally the Branch). All panel members will be in a grade at or above the grade level of the vacant position. At least one panel member must be working in a related field, and none of the panel members may be candidates for the vacancy. Panel members will utilize the "Instructions for Promotion Panel Members" as a guide in rating and ranking candidates. The Personnel Office will provide technical advice and assistance.

At least two of the panel members will be from the bargaining unit. Selection must conform to the requirements in the preceding paragraph.

SECTION 11 MAKEUP OF CERTIFICATE

The certificate issued to the selecting official will contain:

a) If there are fewer than three qualified candidates, all names
b) If there are three or more qualified candidates, all names of those ranked "Best Qualified."

SECTION 12 SELECTION

The selecting official will make his/her decision in a prompt and expeditious manner and will complete Form ARR 2235 and return it to the Personnel Office. Each candidate will be notified of his or her selection or non-selection.

a) If an adequate number of highly qualified candidates (normally three or more), are certified to the selecting official, and he or she does not select any of these candidates, the position may not be filled from a Civil Service register unless:

1 The vacancy was initially advertised under the "grade-banding" concept (such as WC-5/7/9), or as an upward mobility opportunity.

2 The vacancy is readvertised under the grade-banding concept or as an upward mobility opportunity; the selecting official will provide his or her reasons in writing for selecting or non-selecting any candidate on the certificate.

3 The position is an entry-level position.

SECTION 13 PROMOTION RECORDS

(1) Standard Form 50. The notification of personnel action, documenting a promotion will show in the "Remarks" section the certificate number and a statement that the promotion was a competitive promotion or a statement showing the kind of career promotion or exception to the merit promotion plan that it was. The notification of personnel action for competitive reassignments will show the certificate number, and if applicable, the training agreement covering the placement. When a position was filled by appointment, transfer, or reinstatement in a competitive situation, the number of the promotion will be shown, even though the selection was not made from the promotion certificate, unless no promotion certificate was issued.

(2) Promotion File. When the promotion certificate is filed, it will have as attachments:

a) Notification of any selective placement factors applied;
b) evaluation factors used to determine the best qualified;
c) names of all the candidates considered and the categories to which they were placed;
d) the names of the promotion panel members; and
e) a record if the area of consideration was extended.

These records will be retained for two years.

SECTION 14 INFORMATION TO EMPLOYEES

Information about the Merit Promotion Plan will be given to employees when they enter on duty. The following information will be made available to an employee upon request:

a) Any record of production or any supervisory evaluation of current or past performance used in considering the employee.

b) Concerning a specific action:

1 Whether the employee was considered, and if so, whether the employee was found eligible on the basis of minimum qualification requirements for the position.

2 Whether the employee was one of those in the group from which selection was made.

3 Who was selected and why.

4 In what areas the employee should improve to increase chance of future promotion.

5 The evaluation criteria applied.

6 The names of the members of the Merit Promotion Panel.

SECTION 15 QUESTIONS AND COMPLAINTS

Employees who have questions or complaints about the operation of the Merit Promotion Plan should discuss them with the Personnel Officer. Every reasonable effort will be made to respond to the question or complaint and provide the employee with appropriate information or explanation.

If the matter cannot be resolved on an informal basis, the employee may file a grievance on the matter under Article 23. Mere failure to be selected for promotion when proper promotion procedures are used (non-selection from among a group of properly ranked and certified candidates) is not a basis for a grievance.

ARTICLE 13
REDUCTION IN FORCE

SECTION 1 NOTIFICATION TO UNION

The Employer will notify the Union of the necessity for a reduction in

force and of the reasons therefore as soon as it becomes definite that a reduction in force will occur. The Employer will inform the Union of the affected competitive levels and the number of employees affected, when this information is available.

SECTION 2 EFFORT TO REASSIGN

The Employer, to the extent consistent with its manpower requirements, will make a reasonable effort to reassign employees whose positions are eliminated. All reasonable action will be taken to avoid or minimize the impact of the reduction in force prior to separating employees.

SECTION 3 COMPETITIVE AREA

The competitive area for reduction-in-force purposes of employees in this unit shall be the commuting area regarded as fifty miles one-way driving distance.

SECTION 4 REEMPLOYMENT PRIORITY LIST

Any career or career-conditional employee who is separated as a result of reduction in force shall be placed on the Reemployment Priority List, unless the employee states in writing that such consideration is not desired. Employees on this list shall be given preference for reemployment in accordance with applicable regulations. Acceptance of a temporary position by an employee on this list will not affect his/her status on the list or his/her eligibility for reemployment in a permanent position.

SECTION 5 LAST INCUMBENT RETURNED

When a position is abolished by reduction in force and reestablished within one year, the last regularly assigned incumbent, if still in the service of the Employer and applies for the position, will be returned to the position.

SECTION 6 RETURN TO WC-A SCHEDULE

If an employee who was on the rolls of the Employer in a WC classification on the effective date of this Agreement is subsequently RIFed from employment and is later rehired from the Reemployment Priority List, he or she shall re-enter the WC-A wage schedule and shall not be subject to the WC-B wage schedule.

ARTICLE 14
SENIORITY

SECTION 1 APPLICATION

Seniority (based upon an employee's continuous service with the Employer)

will apply in the assignment of preferred vacation times, overtime, of duty, and selection of shift assignment between similar or like positions within the same work unit.

SECTION 2 ROSTER

A seniority roster of bargaining unit employees will be prepared and posted in January of each year.

Where two or more employees start work at the same time, their stand on the seniority roster will be determined by the Alaska Railroad ID ber; the employee with the lowest ID number being senior.

ARTICLE 15
EMPLOYEE SERVICES

SECTION 1 LUNCHROOM

A lunchroom will be provided for employees in the General Office Bui ing. The lunchroom will contain refrigerator, microwave oven, stove sink with running water, adequate lighting and ventilation, and suff cient tables and chairs. Employees using the lunchroom must clean u after themselves. The Employer will provide janitorial service. Ve ing machines may be permitted.

SECTION 2 PERFORMANCE IMPROVEMENT

When an employee requests in writing a method to improve his/her per ance, the supervisor and the employee shall together discuss and out specific areas of improvement needed to accomplish a higher level of performance rating. At 90-day intervals, the supervisor will, in wr advise the employee of his/her progress towards his/her goal of impr his/her performance rating.

SECTION 3 HANDICAPPED PARKING

Unit employees handicapped to the extent that walking to and from a parking lot would create an undue hardship shall be assigned a reser parking space as close to their working areas as possible. Periodic evaluation of handicapped employees who are afforded this special pa ing consideration may be required where there is reason to believe t the employee's condition may have improved to the extent that specia parking consideration is no longer valid.

SECTION 4 TESTS AND INTERVIEWS

Tests and interviews required of employees to meet the needs of the Employer will be conducted during normal working hours.

SECTION 5 RAIL PASSES

Employees covered by this Agreement and those dependent upon them for support will be given free transportation consistent with pass regulations of The Alaska Railroad and "outside" railroads.

ARTICLE 16
SAFETY AND HEALTH

SECTION 1 OSHA GUIDANCE

The Employer will provide and maintain safe working conditions using Public Law 91-596, Occupational Safety and Health, as a guide. The Union will cooperate to that end and will encourage all employees to work in a safe manner.

SECTION 2 OSHA COMMITTEE

The Union will appoint one representative and one substitute representative from the bargaining unit to attend the monthly OSHA Safety Committee meeting.

SECTION 3 OBSERVATION OF RULES

Each employee will observe all safety rules and regulations prescribed by the Employer.

SECTION 4 INFORMATION TO UNION

The Union will be supplied with a copy of the monthly injury-illness statistical report.

SECTION 5 ON-THE-JOB INJURY

If an employee is injured on the job, prime consideration will be given to the employee's welfare. Proper medical attention will be given at the earliest possible time.

SECTION 6 FIRST AID

The names of employees qualified to administer first aid and their locations shall be posted on all bulletin boards.

SECTION 7 NO DISCIPLINE FOR INJURY

No employee shall be disciplined or dismissed because of being injured unless the employee caused the injury through carelessness or negligence

SECTION 8 PROTECTIVE EQUIPMENT

No employee shall be required to work in areas where conditions detrimental to health and safety exist without proper personal protective equipment or other safety devices. Management shall determine when such equipment and devices are necessary and will provide them without cost to the employee. When such a device or equipment is issued to an employee, he/she will be required to use it in the proper manner.

SECTION 9 LIGHT DUTY

When an employee is injured on the job or is on sick leave as a result of personal injury or illness and is released for light duty by proper medical authority, the Employer will make an effort to provide light-duty assignments when such work is available.

ARTICLE 17
TECHNOLOGICAL CHANGE

SECTION 1 INFORMATION TO UNION

The Employer will advise the Union in advance of any proposed technological change. Technological change is defined as a change in equipment, materials, and/or methods which result in a reduction in the number of bargaining unit employees. Upon request, the Employer will promptly meet with the Union to discuss the effects of the proposed technological change upon the work force. It shall be the Employer's responsibility to provide the Union with full information regarding the effects of the proposed technological change in order to determine the effect upon the bargaining unit.

SECTION 2 RETRAINING

The Employer agrees that when technological changes take place that require additional knowledge and/or skills on the part of employees, the employees will be given the opportunity to acquire the knowledge and skill necessary to retrain. Employees affected by technological change shall be given first preference for retraining in accordance with the retention standing, provided they have the basic knowledge for retraining.

ARTICLE 18
PUBLICITY AND BULLETIN BOARDS

SECTION 1 NEW EMPLOYEE ORIENTATION

As a part of their orientation, new employees hired into a position included within the bargaining unit will be informed of the contractual relationship between the Employer and the Union, and will be introduced to the Union steward of the area to which they are assigned.

SECTION 2 BULLETIN BOARDS

The Employer will make a reasonable amount of space available on bulletin boards for use by the Union. The Union will assure that materials which are posted are removed in a timely manner and that bulletin boards do not become cluttered, crowded or unsightly. The Union will also assure, to the satisfaction of the Employer, that it will post no material which violates the security of the Employer, or relates to any partisan political matter, or which is derogatory to the management or supervision of The Alaska Railroad.

SECTION 3 PRINTING THE AGREEMENT

The Employer shall bear the cost of printing this Agreement, reducing it to a book form approximately 3½" x 5" with an appropriate soft cover with the Union seal affixed.

SECTION 4 ARR TELEPHONE DIRECTORY

The Employer agrees to list the name and telephone numbers of officers and stewards of the Union in The Alaska Railroad telephone directory.

ARTICLE 19
DISCREPANCIES IN PAY

SECTION 1 SHORTAGE - PAYMENT

When there is a shortage equal to one day's pay or more in the pay of an employee, payment covering the shortage will be made promptly if requested.

SECTION 2 CLAIM PROCEDURE

Claims for money payments alleged to be due, arising from any cause may

be made only by the employee or a representative on his/her behalf and must be presented in writing to the employee's immediate supervisor within 30 calendar days from the date giving rise to the alleged basis for claim. When such claim is made in writing and is not allowed, the employee will be notified in writing of the non-allowance within 30 days and the reason therefor. If claims are not made within the time limit specified in this Section, they will be neither entertained nor allowed.

If the Employer fails to meet the time limits of this Section, the employee shall win the claim by default.

SECTION 3 WAIVER OF OVERPAYMENT

Claims arising from an erroneous overpayment of pay or allowances may be waived in whole or part in accordance with applicable regulations.

When it is determined that an employee must repay an overpayment, the payment may be spread over a period of time to minimize financial hardship to the employee.

ARTICLE 20
LETTERS OF CAUTION OR WARNING

SECTION 1 PURPOSE

Letters of caution or warning may be issued to improve an employee's performance or conduct. The receipt of such a letter is not a grievable matter. The privacy of such letters must be protected to insure against misuse.

SECTION 2 MAINTENANCE

When a letter of caution or warning is issued, it shall be signed by the employee acknowledging receipt, and noting intent to respond. An employee who disagrees with the contents of such a letter may write a letter stating his/her views on the matter. The letter of response will be maintained together with the letter of caution or warning.

SECTION 3 RETENTION

Letters of caution or warning may be retained only until the employee's next annual performance evaluation. If the letter has failed to bring about improvement in the employee's performance or conduct, this fact will be noted on the performance evaluation form.

ARTICLE 21
DISCIPLINARY ACTIONS

SECTION 1 DEFINITION

Disciplinary actions are letters of reprimand and suspensions for thirty days or less.

SECTION 2 JUST CAUSE

Disciplinary actions will be taken only for just cause. All things being equal, there shall be like penalties assessed for like offenses. If the employee alleges, after such disciplinary action is proposed, that charges are untrue, facts misrepresented, or the penalty too severe, he or she may grieve the decision under the procedures of Article 23.

Prior to making a determination as to whether disciplinary action is warranted, the Employer may undertake preliminary investigations or discussions with the employee concerned, or others who may have knowledge of the situation.

SECTION 3 EFFECTIVE DATE

Disciplinary action will not become effective until the grievance procedure, if used, has been exhausted.

SECTION 4 TEMPORARY EMPLOYEES

Discharge of an employee in a temporary employment status is not a grievable matter.

SECTION 5 TARDINESS

An employee who is tardy by twenty minutes or less may be excused at the discretion of his/her supervisor if his/her reasons for tardiness are sufficient. Habitual tardiness is cause for disciplinary action.

ARTICLE 22
MAJOR ADVERSE ACTIONS

SECTION 1 DEFINITION

Major adverse actions are: removal or discharge, suspension for more than thirty days, furlough without pay, and reduction in rank or pay.

SECTION 2 PRIOR DISCUSSION

The Employer agrees to informally discuss with the employee and his/h Union representative, if any, the basis for a proposed adverse actio prior to its issuance. The Employer will carefully consider the employee's views and inform the employee and his/her representative, i any, of its intent before instituting formal action.

SECTION 3 UNION REPRESENTATION

When the Union is named in writing as the employee's representative, Employer will immediately furnish the Union with copies of the propo adverse action, and the decision on adverse action. Copies of corre pondence addressed to the employee on this subject will be furnished the Union.

SECTION 4 UNION PRESENCE AT HEARING

If the employee elects not to have Union representation, the Union m have an observer present at the adverse action hearing without charg leave. The parties recognize that the presence of an observer is a m ter within the discretion of the FEAA Appeals Officer in charge of th hearing.

SECTION 5 APPEALS

Appeals of adverse actions may be made directly to the Seattle Field Office, Federal Employee Appeals Authority. To be properly considere the appeal must:

a) be in writing;
b) indicate the reasons for contesting the adverse action, with fer of proof and pertinent documents;
c) indicate the relief sought;
d) be submitted no later than fifteen calendar days after the ef fective date of the adverse action; and
e) be addressed to: Seattle Field Office, Federal Employee App Authority, U. S. Civil Service Commission, Federal Building, Second Avenue, Seattle, Washington 98174.

A hearing must be requested if one is desired. The decision rendere the Federal Employee Appeals Authority is final.

ARTICLE 23
GRIEVANCE PROCEDURE

SECTION 1 EXCLUSIVE PROCEDURE

The purpose of this Article is to provide the exclusive procedure for Employer, Union, and employees in the unit for the settlement of grievances involving the interpretation or application of this Agreement, or disciplinary actions, and will be used for the resolution of the same types of grievances or disputes which would be processed through the agency grievance procedure. A grievance under this Article is defined as a dispute or complaint between the parties or the employees covered by this Agreement.

When a question arises concerning grievability, the parties shall stipulate to the facts and submit them to arbitration as a threshold issue to the merits of the grievance.

SECTION 2 SETTLEMENT AT LOWEST LEVEL

The parties agree that most grievances arise from misunderstandings or disputes which can be settled promptly and satisfactorily at the first level of supervision. Every effort will be made to resolve grievances at the lowest level without fear of retaliation. The initiation of a grievance in good faith should not cast any reflection on an employee's standing with his/her supervisor or his/her loyalty or desirability to the Employer, nor should the grievance be considered as a reflection on the employee's supervisor.

SECTION 3 REPRESENTATION

An employee may represent himself/herself or be represented by the Union when presenting a grievance under this Article. Any employee or group of employees in the unit may present grievances to the Employer and have them adjusted without the intervention of the Union, as long as the adjustment is not inconsistent with the terms of this Agreement and a Union representative has been offered the opportunity to be present at the adjustment.

Employee participants in grievance meetings shall be administratively excused from their duties if they would otherwise be in a duty status; however, no overtime will be authorized for participation in grievance meetings.

SECTION 4 TIME LIMIT

To be processed, a grievance must be initiated within twenty working days

from:

a) the occurrence of the matter which gave rise to the grievance; or
b) the time the employee became aware of being aggrieved.

SECTION 5 PROCEDURE

a) INFORMAL STEP -- An employee shall first take up his/her problem with his/her immediate supervisor. If the problem is not resolved, the supervisor will meet with the grievant and his/her Union representative, if one is desired by the grievant, to attempt resolution. Within five working days from this meeting, the supervisor will give his/her decision and will assure that it is understood by the grievant. The parties expect that most grievances will be settled at this step.

b) FIRST FORMAL STEP -- If the employee elects to pursue his/her grievance, the grievance shall be reduced to writing and shall contain, at a minimum, the nature, time, and date of the action or incident giving rise to the grievance (when applicable), the Agreement provision alleged violated, the date of the discussion required at the informal step, the corrective action desired, and the signature of the grievant. Unsigned or anonymous grievances will not be acknowledged or entertained. If the employee desires a meeting on the matter, this statement must also appear on the written grievance. Grievances deficient in required details will be returned to the grievant for inclusion of additional necessary information.

The written grievance must be submitted to the Chief of the branch within seven working days following the supervisor's decision in the previous step. If a meeting is requested, the Branch Chief shall schedule a meeting within seven working days from receipt of the written grievance to attempt resolution. The employee may be accompanied by a Union representative. The written decision of the Branch Chief will be given to the employee within seven working days following receipt of the grievance, or of the meeting if one is held.

c) SECOND FORMAL STEP -- If the employee elects to pursue his/her grievance, he/she must submit the grievance to the Division Chief within seven working days from receipt of the first formal step decision. If a meeting is requested, the Division Chief shall schedule a meeting within seven working days from receipt of the written grievance to attempt resolution. The employee may be accompanied by a Union representative who may be assisted by an additional Union official, if necessary. The written decision of

the Division Chief will be given to the employee within seven working days following receipt of the grievance, or of the meeting if one is held.

d) THIRD FORMAL STEP -- If satisfactory settlement has not been reached, the Union or the Employer may request a meeting on the matter to be held in the presence of the General Manager. Request for such a meeting must be made within fifteen days of receipt of second formal step decision. The General Manager will schedule a meeting to include the principles in the grievance, a Union representative if desired by the employee, and other employees whose presence is deemed necessary. The General Manager will give his decision in writing to the employee within fifteen working days from the date of the meeting.

If the grievance is not satisfactorily settled by the decision of the General Manager, the Union may refer the matter to arbitration.

SECTION 6 EXTENSION OF TIME

If the Employer fails to reply to a grievance in a timely manner as prescribed in Section 5, the employee may process the grievance to the next step. If the grievant fails to process the grievance in a timely manner, the grievance shall be closed by the decision tendered at the previous step.

All time limits in this Article may be extended by mutual consent.

SECTION 7 UNION GRIEVANCE

The Employer recognizes the right of the Union to file grievances in its own name, directly to the General Manager or his designee. The following procedure will apply:

a) The grieving party will initiate informal discussion within ten working days of the occurrence giving rise to the grievance or from the date the grieving party became aware of the incident.

b) If the matter remains unresolved, a written grievance may be filed with the other party within ten working days of the informal discussion. The requirements of Section 5(b) are applicable.

c) The party to whom the grievance was submitted will give a written decision within ten working days from receipt of the grievance.

d) If the written decision is not satisfactory to the grieving party, the parties will meet within ten working days to discuss the matter.

e) If the grievance remains unresolved, it may be submitted to arbitration in accordance with provisions of Article 24.

SECTION 8 STATUTORY APPEALS

Matters for which statutory appeals procedures exist shall not be considered under this Article nor under Article 24. When such matters arise, the employee shall be notified of his/her appeal rights.

ARTICLE 24
ARBITRATION

SECTION 1 PRE-ARBITRATION CONFERENCE

The parties agree that prior to considering arbitration every effort will be made to resolve grievances inhouse, and will direct their resources towards achieving that goal. In addition, the parties will jointly explore settlement of the grievance at a pre-arbitration conference.

SECTION 2 ARBITRAL MATTERS

If the Employer and the Union fail to settle any grievance arising under Article 23, with respect to the interpretation, application, or alleged violation of this Agreement, or implementation of agency regulations, such dispute shall, upon written notice by the party requesting arbitration to the other party, be referred to arbitration. Such written request must be submitted not later than twenty working days following the conclusion of the final step of the grievance procedure. Arbitration on an employee's grievance may be invoked only by the Union. Arbitration concerning an Employer or Union grievance may be invoked by the party initiating the grievance.

SECTION 3 SELECTION OF ARBITRATOR

Within ten working days from the date of receipt of the arbitration request, the parties shall meet for the purpose of selecting an arbitrator. The parties shall use the services of local arbitrators if available and mutually acceptable. If agreement cannot be reached, either party may request the Federal Mediation and Conciliation Service to submit a list of five impartial persons qualified to act as arbitrators. The parties shall meet within ten working days after the receipt of such list. If they cannot agree upon one of the listed arbitrators, the Employer and the Union will each strike one name from the list of the five and shall then repeat this procedure. The party to strike first will be determined by the flip of a coin. The name remaining shall become the duly selected arbitrator.

SECTION 4 PRESENTATION OF ISSUE

Following selection of the arbitrator and indication of his availability, the parties will prepare a joint letter submitting the issue in dispute. The letter shall present, in question form, the matter on which arbitration is sought and shall outline the agreement provisions governing the arbitration. It may contain mutually agreed upon stipulations of fact and it may be accompanied by any documents the parties mutually agree should be submitted to the arbitrator in advance of the hearing which may not necessarily be stipulations of fact. If the parties mutually agree, the entire matter may be submitted to arbitration for review and decision without a hearing.

SECTION 5 HEARING

The arbitration hearing will be held during the regular dayshift hours of the basic work week. Upon the request of either party, or the arbitrator, the arbitration proceedings will be recorded. The party requesting the recording shall bear the cost. Employee participants in the hearing shall be administratively excused from their duties if they would otherwise be in a duty status; however, no overtime will be authorized for participation in the arbitration hearing. The arbitrator will be requested to render a bench decision on the case with a written award within two weeks, but not later than thirty days following the conclusion of the hearing.

SECTION 6 JURISDICTION OF ARBITRATION

The arbitrator shall have jurisdiction and authority to interpret this Agreement and to apply it to the particular case under consideration, but shall have no authority to add to, subtract from, or modify the terms of this Agreement, and shall confine his findings to the question submitted.

In no event shall arbitration extend to the interpretation of any directive or regulation of higher authority, including but not limited to, the regulations or directives of the Federal Railroad Administration, the Department of Transportation, or the United States Civil Service Commission.

SECTION 7 BINDING AWARD

The award of the arbitrator shall be binding on the parties. However, each party reserves the right to file an appeal of the arbitrator's award with the Federal Labor Relations Council under its rules.

SECTION 8 FEE OF ARBITRATOR

The fee and expenses of the arbitrator shall be paid for by the loser of the arbitrator's award.

ARTICLE 25
NO STRIKE

SECTION 1 PRINCIPLE

The Union and the Employer recognize that strikes and other forms of work stoppages by employees are contrary to law and public policy. The Union and the Employer subscribe to the principle that differences shall be resolved by peaceful and appropriate means without interruption of scheduled work. The Union therefore agrees that there shall be no strikes, work stoppages, or other concerted refusal to perform work by the employees covered by this Agreement, or any instigation thereof.

ARTICLE 26
VOLUNTARY DUES DEDUCTION

SECTION 1 CONDITIONS

Union dues (the regular, periodic amount required to maintain an employee in good standing in the Union) shall be deducted by the Employer from the employee's pay each payroll period when the following conditions have been met:

a) The employee is a member in good standing of the Union or has signed up for membership subject to the payment of his/her dues through voluntary allotment as provided herein.

b) The employee's earnings, after all other deductions, are sufficient to cover the amount of allotment.

c) The employee has voluntarily authorized such a deduction on Standard Form 1187, Voluntary Authorization for Allotment of Compensation for Payment of Employee Organization.

d) The appropriate official of the Union has completed and signed Section A of the form.

e) The completed form has been turned over to the Employer by the Union.

Deduction of dues shall begin with the first pay period which occurs after receipt of the Standard Form 1187 by the Employer.

SECTION 2 AMOUNT

The amount of union dues to be deducted each bi-weekly pay period shall

remain as originally certified on such allotment forms until a change in the amount of such dues is certified to by the authorized Union official, showing the new amount, is transmitted to the Employer by the Union. Such change will begin with the first pay period after receipt of the notice of change by the Employer, or a later date if the forms so designate. Such changes shall not be made more frequently than once each six months.

Multiple levels of dues withholding are permissible; however, the amount of dues to be withheld shall remain unchanged until the Union certifies that the amount of dues has changed for a particular member or members and showing the specific amount of the new deduction.

SECTION 3 TERMINATION

An employee's voluntary allotment for payment of union dues shall be terminated with the start of the first pay period following the pay period in which any of the following occur:

a) Loss of exclusive recognition by the Union.
b) Separation of the employee from the Alaska Railroad.
c) Receipt by the Employer of notice from the Union that the employee has been expelled or has ceased to be a member in good standing.
d) Termination of this Article of this Agreement.
e) The employee is promoted or otherwise removed from the bargaining unit.

An allotment for the deduction of an employee's union dues may be terminated by the employee through submission to the Employer of Standard Form 1188 (or individual substitute), properly executed in duplicate by the employee. Such duplicate shall be promptly forwarded by the Employer to the Union upon receipt from the employee. A termination of allotment under this Section shall be effective with the first full pay period following March 1 or September 1, whichever is the earlier, provided that the revocation is received by the Employer sufficiently in advance of such date.

SECTION 4 RESPONSIBILITIES OF UNION

The Union is responsible for purchasing the standard allotment form prescribed by the Comptroller General, distributing it to its members, certifying as to the amount of its dues, delivering completed forms to the Employer, and educating its members on the program for allotments for payment of dues, its voluntary nature, and the use and availability of the required forms.

SECTION 5 COST OF SERVICE

The Employer shall transmit to the Union Secretary-Treasurer or other allottee or financial organization as designated, after each regularly scheduled pay day, a payment to the Union in the amount equal to the grand total of all such monetary allotment deductions made, less $.02 per deduction, which shall be the Employer's fee for performing such service, together with a duplicate listing of members for whom deductions were made, and a copy of all revocation notices received in the payroll office during the preceding payroll period. The Employer shall also transmit an alphabetical remittance listing containing the following information:

a) Employee name and ID number.
b) Dues withholding amount.
c) The gross amount deducted, and the amount remitted.

ARTICLE 27
EFFECTIVE DATE AND DURATION

SECTION 1 DURATION AND REOPENING

This Agreement becomes effective as of the date shown on the last page and will remain in effect for a period of three years.

Either party may give notice to the other, not more than 90 nor less than 60 days prior to any anniversary date, of its intention to amend or modify this Agreement. Proper notice being given, the parties shall meet within a reasonable time to negotiate regarding such proposed amendments or modifications. This paragraph does not apply to Article 7, which may be reopened only upon mutual consent or three years from the effective date.

This Agreement may at any time be reopened, supplemented, or amended by mutual consent of the parties. The present agreement will remain in effect during any such renegotiation and until a new agreement is approved.

If neither party serves notice to renegotiate this Agreement, it shall be automatically renewed for two-year periods, and remains subject to the other provisions of this Article.

SECTION 2 PERIODIC REVIEW

A periodic review of this contract will be made by the parties at three-month intervals to ascertain that no problems in the interpretation of this Agreement arise.

SECTION 3 CONFLICT WITH HIGHER AUTHORITY

If any portion of this Agreement is determined to be in violation of any law, regulation, Executive Order, or published directive of higher authority, only that portion shall be affected, and all other provisions shall remain in full force and effect.

SECTION 4 CHANGES IN LAW AND REGULATION

During the duration of this Agreement, changes in applicable law and regulations from higher authority which affect this Agreement, including court decisions, decisions of the Federal Labor Relations Council, and the Assistant Secretary of Labor for Labor/Management Relations will subject the affected Article to negotiations within thirty days after proper notice has been given by either party.

Signed and effective this twenty-first day of July, 1978.

Section 14. Effective Date and Duration

Preamble. This Basic Agreement is agreed to in the interest of developing sound relations between the employees and management of The Alaska Railroad. Observance of its terms by management and employees, as well as by their representatives, should result in the joint determination of fair and reasonable rates of pay, hours regulations, and working rules; in the prevention of grievances and in the prompt and orderly settlement of all differences between labor and management; in stabilizing employment, and in developing systematic labor-management cooperation for safety, mutual benefit and good service to the patrons of the Railroad and the State of Alaska.

The Alaska Railroad as an agency of the Government of the United States is dedicated to the accomplishment of certain public purposes as provided in the Act of March 12, 1914, which directed the President of the United States to construct and operate a railroad in the Territory of Alaska (now the State of Alaska). Among these public purposes are the furtherance of the development of Alaska and the support of national defense. The duties and responsibilities necessary to accomplish these public purposes have been vested by Executive Order of the President No. 11107, dated April 25, 1963, and supplements thereto, in the Secretary of the Interior; and the Secretary, by appropriate orders and regulations, has delegated certain responsibility for operating the Railroad to its General Manager.

Section 1. Definitions

Labor Organizations: The term "labor organization" means any organization, union, or employee representation committee in which employees participate and which exists for the purpose, in whole or in part, of providing representation for members employed on the Railroad in dealing with the management officials on wages, hours, conditions of employment, grievances, disputes and other matters pertinent to their employment. This term does not apply to employee welfare organizations, recreational associations, credit unions, or similar associations.

Representatives of Labor Organizations: This term includes those individuals, either employees or non-employees of the Department, who are accredited by the employees to represent their interests in relationships or dealings with management officials on matters relating to their employment.

Management Officials: This term includes those employees at all levels of the Railroad's organization, in both line and staff capacities, who have significant responsibilities in supervising, directing and managing program activities and administrative matters which involve decisions or actions affecting employee groups.

Basic Labor Agreement: This term refers to the written document negotiated by management officials and representatives of employees, which concerns itself primarily with matters of broad principle, policy, and procedure which will govern the relations of the parties thereto in the negotiation of wages and working conditions, the settlement of disputes and grievances, and related matters.

Supplementary Labor Agreement: This term refers to the written agreement or series of agreements which are negotiated and made effective between management officials and representatives of employees within the purpose and in the implementation of the general policies and guidelines of a basic labor agreement. The periodic negotiation and adjustment of wages and related pay matters and detailed working rules and standards are characteristic of the subject matter of supplementary labor agreements. They may not delete, modify or otherwise nullify any of the policies and procedures which have been incorporated in the Basic Labor Agreement.

Labor-Management Negotiations: This term is used interchangeably with the term "collective bargaining".

Section 2. Compliance

2.1. It is recognized that in labor-management negotiations, and in the administering of all matters covered by this agreement, both the Railroad and the employees are governed by the provision of applicable federal laws and regulations, including the labor relations policies and regulations prescribed in Part 376 of the Department of the Interior Manual, all of which are regarded as paramount. This agreement shall at all times be applied subject to all such federal laws, Executive Orders, Secretarial instructions, or directives, related policies and regulations, and the public interest involved in the orderly, efficient and continuous progress of Department of the Interior operations.

2.2. If laws or regulations become effective, binding on the Railroad and inconsistent with the provisions of this agreement, the Railroad shall notify the representatives of the respective labor organizations. The labor organizations and the Railroad shall issue a joint statement of the change and its effect upon this agreement.

Section 3. Scope

This agreement is applicable to those employees of the Railroad not subject to the Classification Act of 1949, as amended, a majority of whom in any particular trade or craft has designated as their representative a labor organization signatory to this agreement.

Section 4. Employee Rights to Labor Representation

4.1. Employees of the Railroad have the right to form or join organizations and designate representatives of their own choosing, provided they do not form or join organizations which assert that employees in the service of the United States Government may strike or which advocate the overthrow of the United States Government by force or violence.

4.2. In the exercise of the right to form or join organizations and designate representatives, employees shall be free from any and all restraint,

interference or coercion on the part of management, and the supervisory staff is prohibited from exercising any such restraint, interference or coercion. By the same token the designation of individuals and officers to represent the management of the Railroad for the purpose of this policy is entirely the responsibility of the General Manager.

4.3. The labor organization may be required to submit a copy of its bylaws, and the names of its officers and representatives, and to make known by whom it is chartered. The identity of individual members or the number of members is not required, except in the determination of representation rights.

Section 5. Discrimination Prohibited

Appointments to the service of the Railroad are to be made strictly on the basis of merit and efficiency. No test of race, color, religious belief, or political affiliation, except as prescribed by law, will be required of any employee, or considered in his appointment, promotion, demotion, transfer, retention in or termination of service with the Railroad, nor shall any employee of the Railroad nor anyone seeking employment be required to join or refrain from joining any duly accredited organization as a condition of appointment, promotion, demotion, transfer, retention in or termination of service.

Section 6. Determination of Bargaining Rights

6.1. The majority of the employees of any class or craft of the Railroad has the right to determine the organization which will represent the employees of such class or craft for the purposes indicated in the preamble.

6.2. In the initial determination of representation rights and in resolving disputes as to these rights, both employees and management are governed by the appropriate section of the Departmental Manual, Department of the Interior, specifically Part 376, D.M. 2.

Section 7. Duty to Confer

7.1. If a craft or group of employees has properly designated an organization to represent them in accordance with the provisions of Section 5 above, the representatives of such craft or group shall so notify the General Manager, and the General Manager, the officers and supervisors of the Railroad will thereafter treat with such organization and its officers for the purposes described in the preamble to this agreement.

7.2. Representatives of labor organizations or employees desiring to confer with management officials shall deal in the first instance with those Railroad officials who have primary responsibility over the case or subject matter which is the subject of conference.

7.3. Differences or disputes between an employee or group of employees and the Railroad, growing out of grievances or out of the interpretation or application of the terms of jointly promulgated schedules, having been handled by the employees or their representatives through established supervisory channels up to and including the Branch Head concerned and the Personnel Officer, the General Manager will then call a conference. Conferences for the adjustment of such differences or disputes will be held whenever possible during the regular working hours, and when so held, labor organization representatives actually working will not lose pay, provided that the number of such representatives of the labor organizations concerned does not exceed two.

7.4. Conferences may be requested by the labor organizations or the Railroad announcing their desire to revise rates of pay or the jointly promulgated agreements, and having given proper notice, the time and place for the beginning of such conferences will be announced. The time required by labor organization representatives in the employ of the Railroad when attending such conferences will not be paid for by the Railroad. Labor organization representatives attending conferences for revision of pay rates or jointly promulgated agreements shall be granted leave as accrued, or leave without pay, to attend such meetings.

7.5. Leave as accrued may be granted to any other employee for attendance or observance of the above meetings, contingent on the availability of replacement personnel. In the interest of cooperation, in labor matters, the Railroad will follow a liberal policy in allowing time off for such purposes, with reasonable limits and consistent with work requirements.

Section 8. Written Agreements

8.1. Rates of pay, hours regulations and working rules in the determination of which employees, through accredited organizations, have participated will be reduced to writing and will be promulgated as schedules over the joint signature of the General Manager and the officers of the organization or organizations representing the employees concerned. Such agreements shall be regarded as Supplementary Agreements as defined in Section 1 of this agreement, and, in accordance with the applicable regulations of the Department of the Interior, need not be submitted to the Secretary for approval.

8.2. The Railroad and the labor organizations further agree that, pending the determination or adjustment of any issue arising between them by means of the conference machinery and procedures hereinafter provided, there will be no change in the conditions in any schedules or recorded understanding applicable to such issue.

8.3. The Railroad will not make unilateral changes in the terms of any labor agreement pending settlement of outstanding differences through mutually agreeable procedures, except those that are dictated by the Department of the Interior for the public purpose.

Section 9. Wage Policy

9.1. The making of agreements in regard to rates of pay or modifications in rates of pay, including rules related thereto, shall be governed by the following wage policy.

a. To establish a means of understanding in reaching fair and equitable wage settlements on The Alaska Railroad, now and in the future, the following principles and procedures will govern the wage negotiations and become effective with the effective date of this agreement.

1. That the wage rates payable to the employees of the Northern Pacific Railway constitute a fair and equitable pattern to be used as the basis for determining wage rates for employees of The Alaska Railroad.

2. That the Alaska Railroad employees should receive, over and above the basic rate for comparable occupations on the Northern Pacific Railway, a percentage differential equal to the differential by which the weighted average of Anchorage-Fairbanks consumer prices exceeds average consumer prices in all cities in the lower forty-eight states for which place-to-place consumer price differentials are computed by the Bureau of Labor Statistics of the Department of Labor. It is agreed that the weighted average index of Anchorage and Fairbanks will be determined by the proportion of Alaska Railroad employees at Fairbanks and Healy and points between Fairbanks and Healy, as compared to employees south of Healy. Proportion of Alaska Railroad employees at Fairbanks and Healy and points between Fairbanks and Healy, as compared to employees south of Healy, will be computed as of effective date of the first wage adjustment subsequent to the date of this basic labor agreement and as of the effective date of each wage adjustment thereafter.

3. That basic wage increases on the Northern Pacific Railway shall be added to all Alaska Railroad employees' wage rates in accordance with the provisions of this agreement. The effective date of such increases shall be as of the effective date of such wage changes occurring on the Northern Pacific Railway, or the earliest effective date thereafter permissible under applicable Comptroller General rulings.

4. At the time of such increases referred to in paragraph 3 above, a cost-of-living differential will be added to the increase to the extent necessary to maintain a differential, by occupation, as outlined in paragraph 2 above; provided, that no differential will be added to the increase when the new Alaska Railroad wage rate already equals or exceeds the differential requirements as set forth in paragraph 2 above.

5. Changes in the Bureau of Labor Statistics cost-of-living differential index will not affect Alaska Railroad cost-of-living differential until the next following wage adjustment on the

Northern Pacific Railway and will be effective coincident with such Northern Pacific wage adjustment.

6. If the increases granted on the Northern Pacific Railway are in the form of percentage increases, such increases will be computed on a cents per hour basis for the purpose of this agreement.

7. It is agreed that wage increases as specified in this agreement will not be applied retroactively to any employee not employed by The Alaska Railroad as of the date final settlement is reached as a result of negotiations on the Northern Pacific Railway. Exceptions to this rule will be (a) employees who entered into military service, voluntarily or otherwise, after the effective date established, (b) employees who were separated for reasons of retirement under the Civil Service Retirement Act after the established effective date of the wage increase, (c) heirs of deceased employees.

8. In the event the Northern Pacific Railway merges with another carrier, the Alaska Railroad wage rates will be based on that portion of the merged carrier which consists of the trackage now operated by the Northern Pacific Railway.

9.2. Accredited labor organizations or the General Manager will give at least thirty days' notice of desire for conference to revise rates of pay. The time and place for the beginning of such conferences will be agreed upon within ten days of receipt of such notice.

Section 10. Disputes, Board of Adjustment, Board of Arbitration

10.1. The parties to this agreement recognize that the prompt and orderly settlement of disputes in a fair and reasonable manner is essential to good labor relations and to the efficient accomplishment of the purpose for which the Railroad exists. To this end officials of the Railroad and employees and their representatives will make every effort to resolve their disputes at the first level of management where the dispute originates. In the event that disputes are not so resolved, they shall be handled in accordance with the procedures outlined below.

a. Grievances brought by employees or their representatives shall be handled in the first instance with the Railroad officials having primary responsibility for the subject matter of the grievance.

b. Appeals from the decision of the Railroad official with primary responsibility shall be to the next highest official in line, except that the last appeal prior to submission of the case to the General Manager shall be to the Personnel Officer. There shall be no exception to the carrying of appeals through channels, as described above, except by agreement or mutual assent.

c. Any grievance must be filed, in writing, within thirty days after the first occurrence which gives rise to said grievance. Grievances not filed within this time limit will not be entertained or allowed. A decision on said grievance must be made within thirty days from the date the grievance is received by the official having responsibility in each instance. An appeal to the next higher authority must be made within thirty days and a decision thereon must be made within thirty days. If a decision is not made by the responsible official within the time limit prescribed for him to make a decision, the decision will automatically be in favor of the employee or claimant.

10.2. Detailed procedures for the handling of such grievances shall be included in supplementary labor agreements between the parties signatory hereto.

10.3. Disputes over grievances arising from the interpretation of the provisions of Supplementary Agreements and which are not resolved to the satisfaction of the parties on appeal to the General Manager, in accordance with the provisions governing grievances in the Supplementary Agreements, shall be submitted to a Board of Adjustment. Such Board of Adjustment shall be established in accordance with the following terms and conditions.

a. The procedures for the settlement of grievances arising out of the interpretation of the agreement covering the rates of pay, (but not wage-setting policy), rules and working conditions, and operating and safety rules for the employees of The Alaska Railroad, as represented by the employee organization signatory hereto, will be as follows:

1. There shall be established on The Alaska Railroad as the occasion requires a Board of Adjustment to be composed of three members; one member to be designated by the carrier; one member by the labor organization involved; and the third member, not affiliated with either the carrier or the labor organization, and who need not be a resident of Alaska, to be selected by the agreement of both parties.

2. If selection of the third party from local sources cannot be agreed upon, the third party will be selected from a list of available neutrals submitted by the National Mediation Board, furnished by joint request of management and the union involved.

3. It shall be the duty of this Board to begin hearings on grievances submitted to it prior to the expiration of a period of ten days from the date on which the last member necessary to complete the Board is appointed. Unless both parties to this agreement agree upon some other location, all the hearings conducted by this Board shall be held in the city of Anchorage, Alaska. The Board shall make its award prior to the expiration of a period of thirty days from the date on which the Board concludes its hearings. The parties hereto may agree at any time prior to the making of such award by the Board to an extension of time.

4. The award of the Board shall be final and conclusive upon the parties hereto as to the facts determined by the Board and as to the merits of the controversy decided, unless disapproved by the Secretary of the Interior within thirty days from the receipt of the award in the Office of the Secretary. Should either party object to the findings of the Board and enter into correspondence or communications with the Secretary, other parties of the Board shall receive copies in advance of such correspondence or communications.

5. In the event a dispute arises involving an interpretation of the Board award, upon request of either party, the Board shall interpret the award in light of the dispute.

6. A majority of all members of the Adjustment Board shall be competent to make an award or interpret an award with respect to any dispute submitted to it.

7. The members of the Board representing the carrier and the labor organization shall be compensated by the party they represent. Each neutral party shall receive from The Alaska Railroad such compensation as the Railroad may fix, together with the necessary traveling expenses and expenses actually incurred for sustenance, or shall receive a per diem allowance in lieu thereof, subject to the provisions of law applicable thereto while serving as such third or neutral party.

8. The Board so constituted under the provisions of this agreement shall serve only for the case or cases submitted to it at the time of its organization and until such cases have been heard and award rendered. The above provisions shall not prohibit any member of a Board from serving in a similar capacity on a subsequent Board.

9. Nothing in this agreement will be construed to give the Adjustment Board any jurisdiction over the Operating Rules of the Railroad.

10.4. Disputes over wage rates or related wage rules shall be resolved in accordance with the provisions of arbitration contained in the following procedures.

a. If efforts to bring about agreement in disputes over general changes in wage rates or in related wage rules are unsuccessful, the Railroad and the labor organization involved agree to the submission of the facts to a Board of Arbitration established in accordance with the terms and conditions contained herein.

b. The Board shall consist of one neutral person and one member representative of the labor organization or organizations and one member representing the Railroad. The neutral member shall be selected from the lists of available neutrals maintained by the National Mediation Board.

c. The parties to a given dispute, referrable to an Arbitration Board, shall prepare jointly an Arbitration Agreement applicable to such dispute which shall contain at least the following:

1. A provision that the Arbitration Board and the representatives of management and labor, parties to the dispute being arbitrated, will adhere to the rules for arbitration contained in these procedures.

2. The effective date of the Arbitration Agreement and identification of the parties thereto.

3. A provision that the arbitration proceedings will be guided by the principles of the Railway Labor Act of 1926, as amended.

4. A clear and specific statement of the question to be submitted to the Arbitration Board, and a provision that the arbitration question or parts thereof may be withdrawn from arbitration by mutual agreement.

5. A provision that, within a reasonable time, hearings will commence at Anchorage, Alaska or Washington, D. C., as mutually agreed upon by the parties.

6. A time requirement as to the appointment of members of the Arbitration Board.

7. A time requirement for the decision of the Arbitration Board with provision for extension of time by mutual consent.

8. A provision that the award, a transcript record of the arbitration proceedings, and minutes of meetings of the Board of Arbitration shall constitute the full and complete record of the arbitration.

d. The award of the Board shall be final and conclusive upon the parties hereto as to the facts determined by the Board, and as to the merits of the controversy decided, unless disapproved by the Secretary of the Interior within thirty days from receipt in the Office of the Secretary, Department of the Interior, of the complete record and minutes of the findings and award of the Board. Should either party object to the findings of the Board and enter into correspondence or communications with the Secretary of the Interior, other parties of the Board shall receive copies of such correspondence and communications.

e. In the event a dispute arises involving an interpretation of the Board award, upon request of either party, the Board shall interpret the award in light of the dispute.

f. A majority of all members of the Board shall be competent to make an award or interpret an award with respect to any dispute submitted to it.

g. The members of the Board representing the carrier and the labor organization shall be compensated by the party they represent. The neutral arbitrator shall receive such compensation as the Department of the Interior may fix, including traveling expenses and expenses actually incurred for sustenance, or shall receive a per diem allowance in lieu thereof, subject to the provisions of the law applicable thereto, while serving as neutral party. Such expense shall be shared equally between the union involved and the Railroad.

h. The Board shall serve only for the case submitted to it specified in the Arbitration Agreement and until such case has been heard and award rendered. The above provisions shall not prohibit any member of a Board from serving in a similar capacity on a subsequent Board.

Section 11. Bulletin Boards and Distribution of Literature

Distribution of literature of a labor organization shall be permitted, provided the distribution is made by employees outside their regular working hours and does not interfere with the work assignments of other employees who may be on duty at the time. Notices posted by labor organizations on Government bulletin boards and literature distributed on Government property shall contain the name of the organization issuing or sponsoring it, and shall contain nothing that would imply official sponsorship or endorsement by the Railroad. The material must pertain specifically to the business of the labor organization and shall not contain statements which reflect on or attack the integrity or motives of individuals, other labor organizations, the Department of the Interior, the Railroad, or other governmental agencies, Federal or otherwise. Objective statements of opinion, favorable or unfavorable, about issues or subjects related to the employees' work and employment conditions are permitted. Canvassing or soliciting membership and collecting membership dues for a labor organization shall also be conducted outside regular working hours of the employees canvassed and of the employees performing these activities. Non-employee canvassers may be required to give notice of their presence to the responsible management officer. There shall be no interference with the performance of official duty of employees during working hours.

Section 12. Labor-Management Cooperation

12.1. The parties to this agreement recognize that there are many areas of common interest to the management of the Railroad and to its employees which are important to the effective operation of the Railroad and to the welfare of employees which are not ordinarily included within the scope of collective bargaining agreements. Such areas of common interest include, but are not limited to:

a. Elimination of waste in operation and maintenance.
b. Conservation of materials, supplies, time, power and energy.
c. Improvements in quality of workmanship and services.
d. Correction of conditions making for grievances.
e. Health, safety, and morale standards.

12.2. In order to increase the area and effectiveness of labor-management cooperation, Joint Committees have been established prior to the making of this agreement, as follows:

Joint Union-Management Safety Committee
Alaska Railroad Medical Association and Excess Benefits Plan
Joint Labor-Management Committee

12.3. Employees serving on the welfare committees mentioned above and similar committees that may be established will be paid not to exceed a minimum day for their attendance if any time is lost. It shall be the duty of the parties to this agreement to further the work and effectiveness of these joint committees.

Section 13. Interpretation of Departmental Labor Policy

It is understood and agreed that the intent of this Basic Agreement is to comply with the Labor Relations Policies of the United States Department of the Interior issued July 1, 1962 by the Administrative Assistant Secretary. Signatories to this agreement may request interpretation from the Department as may be required.

Section 14. Effective Date and Duration

This agreement shall become effective on the date on which it is approved by the Secretary of the Interior. After such approval renewal of this Basic Labor Agreement will be automatic from year to year and shall remain in full force and effect until cancelled by either party thirty days prior to its anniversary date.

Any modification or amendment may be presented for discussion and negotiation upon thirty days written notice by the authorized representatives of the labor organization and/or the General Manager. Within ten days after receipt of modification notice, the General Manager will notify when and where the negotiations will take place. Agreed to changes will not be effective until approved by the Secretary of the Interior.

SUPPLEMENT #1
1974

THE ALASKA RAILROAD

Supplement No. 1

to the

Basic Labor Agreement

AMERICAN TRAIN DISPATCHERS ASSOCIATION

Section 2. Compliance

Responsibilities and Rights of Management: The right to make reasonable rules and regulations shall be considered acknowledged functions of Management In making rules and regulations relating to personnel policies, and practices and procedures, and matters of working conditions, Management will give due regard and consideration to the rights of the Union and the employees and to the obligations imposed by this Agreement and the provisions of Executive Order 11491 as amended, and is subject to the following requirements:

(a) in the administration of all matters covered by the agreement, officials and employees are governed by existing or future laws and the regulations of appropriate authorities, including policies set forth in the Federal Personnel Manual; by published agency policies and regulations in existence at the time the agreement was approved; and by subsequently published agency policies and regulations required by law or by the regulations of appropriate authorities, or authorized by the terms of a controlling agreement at a higher agency level;

(b) management officials of the agency retain the right, in accordance with applicable laws and regulations --

(1) to direct employees of the agency;
(2) to hire, promote, transfer, assign, and retain employees in positions within the agency, and to suspend, demote, discharge, or take other disciplinary action against employees;
(3) to relieve employees from duties because of lack of work or for other legitimate reasons;
(4) to maintain the efficiency of the Government operations entrusted to them;
(5) to determine the methods, means, and personnel by which such operations are to be conducted; and
(6) to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

Section 3. Scope

3.1 This agreement is applicable to those employees of the Railroad not subject to the Classification Act of 1949, as amended, a majority of whom in any particular trade or craft has designated as their representative a labor organization signatory to this agreement.

3.2 Management recognizes that the Union is the exclusive representative of these Alaska Railroad officers, in the bargaining unit consisting of the Trick Train Dispatchers and Assistant Chief Train Dispatchers. The Union recognizes the responsibility of representing the interests of all such employees by the provisions of this agreement.

Section 8.4

Alaska Railroad Train Dispatchers and Assistant Chief Train Dispatchers are not subject to the Railroad Retirement Act or the Railroad Retirement Tax Act, except as covered under the acts by other than Alaska Railroad employment.

Section 8.5

Employees of this agreement are subject to the holiday benefits applicable to other Federal employees.

Section 11.

Basic Labor Agreement, Section 11:

a. "Distribution of literature of a labor organization shall be permitted,...."

b. Union Dues Witholding:

Subject to the terms and conditions of this agreement, the Railroad shall deduct from the wages of the employees subject to this Agreement, who acquire and maintain membership in the Organization, amounts equal to the dues uniformly required as a condition of retaining membership in the Organization, and shall pay the amounts so deducted to the designated Treasurer of the Organization: Provided, however, that this requirement shall not be effective with respect to any employee until he shall have furnished the Railroad with a prescribed written wage assignment authorization to the Organization of such membership dues, which wage assignment authorization shall be revocable in writing, as prescribed, or cancelled upon employee separation; termination of this agreement; of loss of employee organization recognition between the Railroad and the Organization signatory hereto.

The wage assignment authorization shall be on the Request and Authorization for Voluntary Allotment of Compensation for Payment of Employee Organization Dues, Standard Form No. 1187, as revised, attached hereto and identified as Attachment A, which by reference is made a part hereof.

The revocation of the wage assignment authorization shall be on the Revocation of Voluntary Allotment of Compensation for Payment of Employee Organization Dues, Standard Form No. 1188, attached hereto and identified as Attachment B, which by reference is made a part hereof.

The Organization shall assume full responsibility for procurement of the form and execution of the wage assignment authorizations and for delivery of such forms to the Chief, Budget and Accounting Branch, Accounting Section, Anchorage.

2.a.1 The employee members of the Organization may furnish voluntarily to the Railroad's Chief, Budget and Accounting Branch, Accounting Section, Anchorage, through their organization, the wage assignment authorization, indicating thereon the payroll deduction authorized. The Organization Treasurer or Financial Secretary shall certify the name of the employee, his membership in good standing in the Organization, and the amount to be deducted from the wages of the employee who has signed the wage assignment form. The annual dues shall be prorated over twenty-six (26) pay periods.

2.a.2. The payroll deduction authorized herein shall become effective the first full pay period following its receipt in the Accounting Section.

2.b. Deductions will be made from the wages earned beginning the first complete pay period following receipt of the allotment form in the Accounting Section for which the wage assignment authorization, specified in Sections 2.a.1 and 2.a.2, is furnished. The following deductions will have priority over deductions in favor of the Organization, as provided herein:

1. Retirement or FICA.
2. Federal income taxes
3. Health benefits
4. Group life insurance
5. Indebtedness due U.S. Government
6. State income taxes
7. Alaska Railroad Medical Association & Excess Benefits Plan
8. U.S. Savings Bonds

2.c. If the earnings of an employee are insufficient to remit the full amount of the pay period deduction for such employee, no deduction shall be made, and the same will not be accumulated on the following pay period.

2.d. No deductions will be made from other than regular payrolls.

2.e. Deduction shall cease when

1. The employee separates from the Railroad effective at the end of the pay period during which separation occurs.

2. The Organization loses recognition: effective beginning of first pay period after such loss.

3. The employee is permanently reassigned to a Railroad segment whose employees have representation by another employee organization: effective at the end of the pay period during which movement occurred provided revocation order is initiated by employee.

4. The employee is expelled or ceases to be a member of good standing in the Organization: effective with first complete pay period after receipt of written notice.

5. Revocation order is initiated by the employee: effective the beginning of the pay period following its receipt in the Accounting Section by March 1 or September 1. Revocation applies only on March 1 or September 1.

3. No charge shall be made against the Organization for dues withholding.

4. The Railroad will remit to the Treasurer of the Organization the amount deducted from the wages of the members who completed the wage authorization allotment. Remittance checks shall be forwarded to the Organization Treasurer consistent with established pay practices and shall be accompanied by a positive listing of employees' names who have authorized deductions, amounts withheld (or explanation why no money withheld), with proper identification of the employee organization.

5. The amount of dues certified on the original allotment form will remain unchanged until an appropriate official of the Organization certifies to the Accounting Section that the amount of regular dues has changed. Changes in the amount of allotments by reason of changes in the organization dues may not be made more frequently than once each twelve months, measured from the date of the first dues change made by the employee organization. Changes in deductions for employees shall be effective as of the first complete pay period after receipt of the certified change by the Railroad Accounting Section, or a later payroll period if requested by the Organization.

6. No part of this agreement or any other agreement between the Railroad and the Organization shall be used directly or indirectly as a basis for any grievance or claim by or in behalf of an employee, predicated upon any violation of, or misapplication, or non-compliance with, any part of this agreement.

7. The Organization shall indemnify, defend, and save harmless the Railroad from the execution of, or compliance with, the provisions of this agreement.

This agreement shall become effective pay period beginning August 4 1974 following mutual acceptance by the parties and shall remain in effect until modified or changed in accordance with established negotiation procedures for amending the Basic Agreement between the member parties of the Agreement. This Agreement is subordinate to and superseded by any conflicting Federal law, Executive Order, or directives that are now, or may be later, imposed pertinent to this service to the Organization.

General Manager

SUPPLEMENT #2
1974

THE ALASKA RAILROAD

Supplement No. 2

to the

Basic Labor Agreement

AMERICAN TRAIN DISPATCHERS ASSOCIATION

Section 9, Wage Policy, is amended as follows:

The Federal Wage System's regular wage shcedule for blue collar employees shall be used for determining pay rates of Assistant Chief Train Dispatchers and Trick Train Dispatchers of The Alaska Railroad.

Procedures of the Federal Wage System (WS) shall apply for conversion from the existing pay system or other pay systems to the WS system, except that initially the Assistant Chief Train Dispatcher's pay shall be established at WS 13, Step 2 and the Trick Train Dispatcher's at WS 11, Step 2. Conversion begins the waiting period for the next step increase.

Procedures of the Federal Wage System (WS) shall apply for any saved pay provisions of current employees.

Increases awarded the Federal Wage System (WS) resulting from lead agency surveys shall be applied to these employees on the same effective dates as for other employees in the system and in same money amounts.

Step increases within the grades of the Federal Wage System shall apply as well as the waiting and time periods between the steps. Employees with multiple appointments, as Assistant Chief Train Dispatcher or Trick Train Dispatcher, will be placed in the same step of the different grades. Service as relief for the Chief Train Dispatcher position does not qualify for step increases when the employee returns to the dispatching position.

A change of positions within the same grade does not warrant a change of step, the employee would continue in the same grade and step. New employees or those re-hired begin service in step one of the applicable grade.

Wage increases will not be applied retroactively to any employee not employed by The Alaska Railroad as of the date the Department of Transportation issues the wage schedule. Exceptions to this rule will be (a) employees who entered into military service; (b) employees who were retired under the Civil Service Retirement Act, and; (c) heirs of deceased employees.

The labor organization representative or the General Manager of the Railroad will give at least thirty (30) days' notice of desire for conference to revise this Wage Policy.

This Agreement is effective August 4 1974 and supercedes other rules relative to pay fixing methods with which it may conflict.

THE ALASKA RAILROAD AND TRAIN DISPATCHERS

Represented by the American Train Dispatchers Association

Governing Hours of Service and Working Conditions

Effective April 18, 1950

ARTICLE I

Scope

(a) This agreement shall govern the hours of service and working conditions of Train Dispatchers, and the term, "Train Dispatcher", as hereinafter used shall include chief, assistant chief, trick, relief, and extra train dispatchers. It is agreed that one (1) chief dispatcher shall be appointive and not subject to the provisions of Article IV (a) to (i), inclusive and Article V (a).

Definitions

(b) 1. Chief, Assistant Chief Dispatcher. These classes shall include positions in which the duties of incumbents are to be responsible for the movement of trains on a division or other assigned territory, involving the supervision of train dispatchers and other similar employees; to supervise the handling of trains and the distribution of power and equipment incident thereto; and to perform related work. In filling the position of Chief Dispatcher consideration shall be given employees on the seniority roster before hiring new employees.

2. Trick and Relief. This class includes positions in which the duties of incumbents are to be primarily responsible for the movement of trains by train orders or otherwise; to supervise forces employed in handling train orders; to keep necessary records incident thereto; and to perform related work.

3. Assigned Train Dispatcher. An assigned train dispatcher is one who is assigned by bulletin, notice, or displacement to a permanent or temporary position.

4. Extra Train Dispatcher. An extra train dispatcher is one who is unassigned as train dispatcher.

Classification

(c). Section (b), i.e. items 1 and 2 thereof, shall not operate to restrict the performance of work as between the respective classes herein defined, but the duties of these classes may not be performed by other officers or employees for the purpose of avoiding employment of additional train-dispatchers.

ARTICLE II

Hours of Service

(a) Eight (8) consecutive hours shall constitute a day's work.

Overtime

(b) Time worked in excess of eight (8) hours on any day or in excess of forty (40) hours in any work week, exclusive of the time required to make transfer, will be considered overtime and shall be paid for at the rate of time and one-half on the minute basis.

Transfer Time

(c) The term "time required to make transfer" as used in section (b) above, includes the time it is necessary for the train dispatcher who is being relieved to turn over to the relieving train dispatcher the information necessary to permit the relieving train dispatcher to fully and completely begin dispatching service on the trick to which he is assigned. A train dispatcher who is required to remain in charge during the time transfer is being made will not be considered as having accrued overtime, except to extent provided herein with respect to transfer time. A train dispatcher required to remain on duty after the expiration of his tour of duty will be paid for such time as overtime.

Starting Time of Positions

(d) No shift shall be started between the hours of 12:01 a.m. and 4:00 a.m. except in an emergency.

Service Other Than Regular Assignment

(e) A train dispatcher who is required to perform service other than that comprehended by his regular assignment will be paid therefor at the rate of time and one-half on the minute basis. For example, a trick dispatcher regularly assigned by bulletin to a regular assignment and who has his assignment changed at the direction of the Management will be paid therefor at the rate of time and one-half on the minute basis while performing such service.

Service in Advance of Regular Starting Time

(f) A train dispatcher who is required to perform service in advance of the regular starting time but continuous with his regular assignment will be paid a minimum of three (3) hours for two (2) or less hours of such service.

Service by Extra Dispatchers

(g) ~~Extra train dispatchers called for train dispatchers service shall be compensated not less than a day's pay for such service.~~

ARTICLE III

Rest Days

(a) Each regularly assigned train dispatcher, including chief train dispatchers, will be entitled and required to take two regularly assigned days off per week as rest days, except when unavoidable emergency prevents furnishing relief. Such rest days shall be consecutive to the fullest extent possible. Non-consecutive rest days may be assigned only in instances where consecutive rest days would necessitate working any train dispatcher in excess of five days per week.

Work on rest day

(b) A regularly assigned train dispatcher who is required to perform service on the rest days assigned to his position will be paid at rate of time and one-half for service performed on either or both of such rest days. An extra train dispatcher who is required to work as train dispatcher in excess of five consecutive days shall be paid one and one-half the basic straight time rate for work performed on either or both the sixth or seventh days but shall not have the right to claim work on such sixth or seventh day.

Rest day Duration

(c) The term "rest days" as used in above sections (a) and (b) means that for a regularly assigned train dispatcher seventy-two (72) hours, and for a regularly assigned relief train dispatcher (who performs five (5) consecutive days' train dispatcher service) fifty-six (56) hours, shall elapse between the time required to report on the day preceding the "rest days" and the time required to report on the day following the "rest day". These definitions of the term "rest days" will not apply in case of transfer account of train dispatcher exercising seniority.

Change in Rest Day

~~(d) When necessity arises to change the rest days of a position, reasonable notice shall be given to all concerned and the senior men on a trick will have choice of rest days assigned to their trick.~~

Relief Service

~~(e) Where relief requirements regularly necessitate four (4) days or more of relief service per week, relief dispatchers will be employed, assigned and compensated at the rate applicable to positions worked.~~

When not engaged in dispatching service they shall be paid therefor at minimum rate applicable to trick train dispatchers in the office where relief service is performed. service regularly less than four (4) days per week shall be considered extra work and shall be performed by extra train dispatchers at the daily rate applicable to each position worked. Relief requirements not covered by regular relief dispatchers will be met by using extra dispatchers.

Combining Territory for Relief

(f) The combining of territory for relief purposes will not be permitted.

Sunday and Holiday Work

(g) Work performed on rest days and the following legal holidays: New Year's Day, Washington's Birthday, Decoration Day, Fourth of July, Labor Day, Armistice Day, Thanksgiving Day and Christmas, will be paid for at the rate of time and one-half, in lieu of their regular pay for that day. When the legal holiday falls on Sunday, the day observed by the Territory, nation, or by proclamation shall be considered the legal holiday.

ARTICLE IV

Seniority Datum

(A) After being properly qualified according to practices in effect, seniority as train dispatcher shall date from the time compensated service as such is first performed following last entrance into service in that capacity. Provided that, if two or more employees are qualified on the same date and the man senior in service of the railroad is prevented from being used as train dispatcher, he shall establish seniority ahead of and with the same dating as the man who is so used.

Rosters

(b) A seniority roster showing the names and seniority standing of all those entitled to hold seniority as train dispatcher under these rules shall be issued by the management and revised and reissued as of January 1st of each year. A copy of said roster shall be furnished each dispatcher holding seniority thereon, and be subject to correction upon proof of error or omission if protest in writing is made within thirty (30)days from date of issue upon which such entry appeared. Excepting that a dispatcher on leave of absence or sick leave during the whole or part of the thirty (30) days mentioned above shall have the right to submit, in writing, proof of error or omission for fifteen (15) days after date of return to duty from leave of absence.

Seniority Limits

(c) Seniority rights shall extend to all train dispatchers positions on The Alaska Railroad.

Filling Positions

(d) When filling positions covered by this Agreement, ability being sufficient, seniority as train dispatcher shall govern.

Displacement Rights

(e) A train dispatcher may exercise displacement rights to any position covered by these rules in the following instances:

1. When he is displaced by a senior train dispatcher or his position is abolished.

2. When there is a material change in the working conditions or more than one (1) hour in the starting time of any position.

A train dispatcher desiring to exercise his rights under item (1) or (2) above shall do so within ten (10) days, in writing, unless prevented by sickness or proper leave of absence, in which event he must do so within ten (10) days of his return. Failure to comply with the time limit herein prescribed shall cause him to revert to the extra list and he may thereafter exercise seniority in accordance with these rules. A train dispatcher whose position has been claimed by a senior train dispatcher, in accordance with these rules may hold the position until the displacing dispatcher actually takes it.

Waiving of rights

(f) Train dispatchers holding regular positions as such shall not lose seniority rights when they elect not to bid for a bulletined position.

Forfeiture of Seniority

(g) Failure to perform service as train dispatcher during a period of six (6) consecutive months shall cause forfeiture of seniority, except when such non-performance is due to lack of work, sickness, or otherwise provided in these rules. A train dispatcher who voluntarily relinquishes his position and enters other service, except as provided in section (i) hereof, shall forfeit his seniority as train dispatcher.

Extra Work

(h) The senior extra dispatcher who is qualified will be called for extra dispatching work whenever he is available, without regard for loss of time in changing shifts. The senior man will be considered available if he can fill the vacancy without violating the Hours of Service Law, and is so situated that he can get to the point where the dispatchers' office is located in time to commence work at the starting time of the vacant shift.

Official Positions

(i) Train dispatchers now filling, or who may hereafter accept, the position of Chief Dispatcher or official positions with the railroad shall retain and accumulate seniority.

If they return to positions covered by this agreement, they may

1. Return to the position held at time they accepted the official position,

2. If such position no longer exists, they may displace the junior regularly assigned train dispatcher on the seniority roster from which promoted, or

3. Bid on vacancies then or thereafter bulletined.

ARTICLE V

Bulletining Positions

(a) Permanent vacancies, new positions, or temporary positions of more than thirty (30) days' duration, shall be bulletined within five (5) days to all train dispatchers on the seniority roster, who shall have five (5) days from date bulletin is posted within which to file application. The application must be in writing. the successful applicant shall be awarded the position within seven (7) days from close of bids. If a train dispatcher is temporarily absent during the entire period applications are to be filed, Section (b) of Article VI shall apply.

Temporary Vacancy

(b) When filling a temporary vacancy resulting from sickness, vacation or leave of absence, known to be more than fifteen (15) days and less than thirty (30) days duration, it will not be bulletined but be given to the senior qualified applicant holding a regular position who will return thereto upon termination of such temporary service. Time lost in making changes under the provisions of this section will not be paid for. In the event no qualified regular train dispatcher applies, Article IV (b) will govern.

Assignment Requirements

(c) A train dispatcher who is awarded a position in accordance with the rules of this Agreement shall be placed thereon within seven (7) days. If not so placed he shall be compensated at overtime rate for each day he is held off such position after the seventh day at the rate of the position awarded.

Notice of change in force

(d) As much advance notice as possible but not less than six (6) days will be given of:

1. Reduction in regular positions, or

2. Consolidation of dispatching districts at same location. Before such change is made effective, conference upon request duly made shall be held to consider the adequacy of the force.

Relocation of Offices

(e) When changes are made in the location of any dispatching office requiring train dispatchers to move from one point to another, not less than fifteen (15) days' advance notice shall be given to the dispatchers affected. In such cases, time necessarily lost by regularly assigned train dispatchers will be allowed for traveling to the new point of employment at the rate of the last dispatcher's schedule position filled and they will be granted free transportation of household effects. Regularly assigned train dispatchers who are required to learn new territory will be allowed reasonable time within which to qualify without loss of pay, the superintendent to be the judge of time required. Upon request, the representatives of the train dispatchers will be afforded an opportunity to discuss with the management the contemplated changes herein provided.

Changes in Starting Time of Positions

(f) Forty-eight (48) hours' notice shall be given to the train dispatchers in the office affected of intended change in starting time of a permanent position.

ARTICLE VI

Leave of Absence

(a) A train dispatcher may be granted a leave of absence limited to six (6) months in any twelve (12) consecutive months period without loss of seniority. Leave of absence in excess of six (6) months may be granted only by agreement between the Superintendent and the Chairman of the Train Dispatchers. Leave of absence shall not be required in cases of known physical disability. Letter granting leave of absence shall be furnished the man on leave in each instance.

Return from Leave of Absence

(b) A train dispatcher returning from leave of absence shall return to his regular position, except that if changes were made during his absence he may, within five (5) days, exercise seniority to the same extent as he would have been entitled to if he had been in active service when such changes occurred.

Committeemen

(c) Committeemen of the organization party hereto will, upon request and if possible, be relieved from duty to handle organization matters on this railroad.

Sick and Annual Leave

(d) The sick and annual leave practices now in effect together with existing Federal law shall apply and continue in effect until changed by legislation or Federal regulations.

ARTICLE VII

Basis of Employment Rates of Pay

(a) Train dispatchers' basic rates of pay shall be as shown in the currently effective wage schedule and any supplements thereunto.

Determining Hourly Rates

(b) If the basic rate of compensation of the employee is fixed on a monthly basis, multiply such basic rate of compensation by twelve (12) to derive a basic annual rate of compensation, divide such basic annual rate of compensation by 260 to determine the daily rate and divide the annual rate of compensation by two thousand eighty (2080) to determine the basic hourly rate.

Time Lost Account Hours of Service

(c) Loss of time on account of the Hours of Service Rule, or in changing positions, by direction of proper authority, shall be paid for at the rate of the position for which service was performed immediately prior to such change. This does not apply in case of transfers account employees exercising seniority nor when dispatcher used off assignment as per Article II, section (e).

Rates of New Positions

(d) Rates of pay for additional dispatching positions which may be created or restored will be the same as for other train dispatchers' positions.

Attending Court or Inquest

(d) Train Dispatcher, who at request of the railroad, attends Court or appears as witness for the railroad will be furnished transportation and will be compensated at the daily rate of their assignment, or if an extra train dispatcher, at trick train dispatchers' daily rate for each day so engaged with a maximum of eight (8) hours for each calendar day, and if so used on rest days assigned to his position, Article III (b) shall apply; where meals and lodging are not furnished by the railroad, travel expenses will be allowed in accordance with current Government Travel Regulations. Employees attending Court and Jury Duty will be covered by the Act of June 29, 1940, and all rules pertaining thereto.

ARTICLE VIII

Discipline

~~(a) A train dispatcher shall not be disciplined without a proper hearing as provided in Section (b) of this Article.~~

Hearings

(b) A train dispatcher who is charged with an irregularity which might result in his being disciplined shall be notified in writing of the precise charge against him and given a fair and impartial hearing by the Superintendent or his designated representative within ten (10) days from date of such notice.

He shall have the right to be represented by a train dispatcher and/or an official of the American Train Dispatchers Association. He shall be given reasonable opportunity to secure the presence of necessary witnesses. The decision shall be rendered within ten (10) days from close of hearing.

Appeals

(c) If the decision is not satisfactory to the train dispatcher, the case may be appealed through the Committee to the next higher official within fifteen (15) days from the date decision is received by the train dispatcher. Hearing on appeal shall be granted within ten (10) days from date of appeal and decision rendered within fifteen (15) days from close of hearing.

Reinstatement

(d) If decision decrees that the charges against the train dispatcher were not sustained, his record will be cleared of such charge; if suspended or dismissed, he will be reinstated and will be compensated for net wage loss, if any, suffered by him. When appeals are made to the highest officer of the railroad designated to handle such matters, receipt thereof shall be acknowledged on the date of receipt. If hearing on appeal is deemed necessary it shall be held without unnecessary delay. A decision on appeal shall be rendered within fifteen (15) days from receipt of appeal, or within fifteen (15) days from close of hearing unless an extension of time is agreed to by the designated representative of the Train Dispatchers. If decision is not rendered within the time limit specified herein or extended hereby, the charges against the train dispatcher shall be considered as not having been sustained.

Transcripts

(e) If stenographic record of hearing is taken, copy will be furnished the employee or his representative on request.

Unjust treatment

(f) A train dispatcher who considers himself unjustly treated in any respect where no discipline is involved shall have the right of hearing and appeal as provided in this Article if written request is made to his superintendent within thirty (30) days from the date of cause of complaints.

ARTICLE IX

Privacy of Office

(a) Dispatching offices will be maintained as private as possible.

Transportation

(b) Train dispatchers and their dependents will be granted as liberal transportation privileges as are accorded other subordinate officials.

ARTICLE X

Representation

(a) The American Train Dispatchers Association is hereby recognized as the duly authorized and delegated representative of the train dispatchers in the service of The Alaska Railroad and for the Management to so consider and accordingly deal with the representatives of said association shall be construed as being one of the requirements of this Agreement. The System Committee of the American Train Dispatchers Association on the railroad will represent all train dispatchers thereon in the making of all Agreements, rules, wage rates, and working conditions, and formal interpretations thereof. The committee may be assisted by any duly authorized officer of the American Train Dispatchers Association.

ARTICLE XI

Effective Date

(a) This agreement shall be effective April 18, 1950 and continue in effect until it is changed in accordance with section (b) of this Article.

Changes

(b) Should either of the parties to this Agreement desire to revise or modify these rules, thirty (30) days' written notice containing the proposed changes shall be given, and conference thereon held within thirty (30) days from date of such notice unless other date is mutually agreed upon.

It is understood and agreed that this Agreement is superseded by and subordinate to any Federal legislation.

SUPPLEMENT #1

UNITED STATES
DEPARTMENT OF THE INTERIOR
THE ALASKA RAILROAD

Anchorage, Alaska
February 1, 1953

Supplement No. 1
to
Agreement by and between The Alaska Railroad and Train Dispatchers represented by the American Train Dispatchers Association governing hours of service and working conditions effective April 17, 1950.

The following revision of rules in the Agreement between The Alaska Railroad and the American Train Dispatchers Association effective April 17, 1950 is hereby agreed upon and made effective as of February 1, 1953.

ARTICLE I

(a) Revised.

This agreement shall govern the hours of service and working conditions of Train Dispatchers, and the term "Train Dispatcher" as herein used shall include chief, assistant chief, trick, relief and extra train dispatchers. It is agreed that one (1) chief train dispatcher shall be appointive and not subject to the provisions of Article IV, Section (3), 1, 2 and 3 thereof; Article V, Section (a) 1 and Section (b) 2 and 3. (All as revised.)

(b) 3. Revised.

Assigned Train Dispatcher: An assigned train dispatcher is one who is assigned by bulletin, notice, or displacement to a permanent or temporary position. The terms "bulletin", notice, or displacement" mean any method by which an assignment is made, but such assignment must be made in writing.

(c) Revised.

1. Section (b), i.e., items 1 and 2 thereof, shall not operate to restrict the performance of work as between the classes therein defined, but the duties of these classes may not be performed by other officers or employees.

2. Combining the duties of the classes defined in items 1 and 2 of Section (b), Article I, into one position, or when such combination position is abolished or otherwise discontinued, shall constitute a new position or positions, including the relief assignments affected, and shall be bulletined as such.

ARTICLE II

(g) Revised.

Extra and assigned train dispatchers called for extra dispatching service shall be compensated not less than a day's pay for such service.

ARTICLE III

(b) Revised by addition of paragraph 1.

1. Work required to be done on either or both of the rest days of a regular position will be performed first, by the assigned relief dispatcher when available; second, by an extra dispatcher, if available, and subject to Section (h) of Article IV; third, by the regular incumbent of the position, if available; fourth, by the senior regular dispatcher who would be rested to assume his regular assignment after having performed such extra work.

(d) Revised.

When necessity arises to change the rest days of a position, reasonable notice shall be given to all concerned.

(e) Revised.

1. Where relief requirements regularly necessitate four (4) days or more of relief service per week, relief dispatchers shall be employed, assigned and compensated at the rate applicable to the positions worked.

2. When not engaged in dispatching service such assigned relief dispatchers shall be paid therefor at minimum rate applicable to trick train dispatchers in the office where relief service is performed.

3. Relief requirements regularly less than four (4) days per week shall be considered extra work, and when performed by extra train dispatchers, they shall be compensated at the daily rate applicable to each position worked.

ARTICLE IV

(e) Revised.

1. A train dispatcher may exercise displacement rights to a position covered by this agreement in the following instances:

2. When he is displaced by a senior train dispatcher, or his position is abolished or discontinued.

3. When there is a change in the starting time of his position of more than one (1) hour.

4. A train dispatcher desiring to exercise seniority rights under items 2 or 3 above shall do so within five (5) days, in writing, unless prevented by sickness or proper leave of absence, in which event he must do so within five (5) days after his return. Failure to comply with the time limit herein prescribed shall cause him to revert to the extra list and he may thereafter exercise seniority in accordance with this agreement. A train dispatcher whose position has been claimed by a senior train dispatcher in accordance with these rules may hold the position until the displacing dispatcher actually takes it.

(f, Revised.

1. Train dispatchers holding regular positions as such shall not forfeit seniority rights when they elect not to bid for a bulletined position.

2. Train dispatchers not holding a regular position as such shall forfeit their seniority when they elect not to bid for a bulletined position.

(h) Revised.

1. The senior extra dispatcher who is qualified will be called for extra dispatching work whenever he is available, up to forty (40) hours per week, without regard for loss of time in changing shifts. The senior extra dispatcher will be considered available if he can fill the vacancy without violating the hours of service law, if so situated that he can get to the point where the dispatchers office is located in time to commence work at the starting time of the vacant shift, and is not then engaged in dispatching duties.

2. In the event no extra dispatcher is available, such extra work, except as provided for in Article III, Section (b), para. 1 (as added), will be performed by the senior regular dispatcher in turn who is available and who would be rested to assume his assigned position after having performed such extra work; and shall be compensated therefor at the rate of the position worked. (The Chief Train Dispatcher is excepted from the provisions of this rule.)

(i) Revised.

1. Train dispatchers now filling, or who may hereafter accept the position of Chief Train Dispatcher, or other official position with the Railroad, shall retain and accumulate seniority.

2. Train dispatchers so promoted may return to a position covered by this agreement by the exercise of displacement rights.

ARTICLE V

(a) Revised.

1. Permanent vacancies, new positions, and temporary positions of thirty (30) days or more duration, shall be bulletined within twenty-four (24) hours. Dispatchers shall have five (5) days to bid. Bids must be in writing. The successful applicant shall be awarded the position within twenty-four (24) hours from the close of bids. If a train dispatcher is temporarily absent on authorized leave during the entire period applications are to be filed, Section (b) of Article VI shall apply.

2. If no bids are received on a vacancy so bulletined, the senior extra dispatcher shall be assigned thereto. If there be more than one extra dispatcher, and all have forfeited seniority under the provisions of Article IV, Section (f) 2, the senior extra dispatcher will be considered as the one who first established seniority date.

Bulletins issued under the provisions of this agreement shall state the hours of service, rest days, rate of pay, and extent of dispatching territory defined by subdivisions, provided that the above details need not be given except when they differ from the previous bulletin.

4. Any change in existing positions as defined in para. 3 above, except as provided in Article III, Section (d) and Article IV, Section (e), para. 3, shall constitute a new position or positions and shall be bulletined as such. The old position or positions thus affected shall be abolished.

(b) Revised.

1. Temporary vacancies of not more than fifteen (15) days shall be considered as extra work.

2. Except as provided in para. 5 below, temporary vacancies of more than fifteen (15) days and less than thirty (30) days duration will not be bulletined, but will be given to the senior qualified applicant holding a regular position, who will return thereto upon the termination of such temporary service. Time lost in making changes under this rule will not be paid for. In the event no qualified regular train dispatcher applies, Article IV (h) will govern.

3. Notice of temporary positions under para. 2 above shall be posted in the Dispatchers office for a period of three (3) days. The successful applicant shall be awarded the temporary position immediately following the close of the three (3) day period, and he shall be placed on the position so awarded as soon thereafter as practicable, but not in violation of Article III (a). if it can be avoided. Applications must be made in writing.

4. Except when the Chief Train Dispatcher is absent for weekly rest day purposes, whenever the Chief Train Dispatcher's position is temporarily vacated by the regular incumbent, announcement, by issuance of appointment notice, will be made of who has been appointed as acting chief train dispatcher.

5. If the acting chief train dispatcher so appointed holds a regular assignment as train dispatcher, the provisions of Article II (e) will not apply to such individual, but in lieu thereof, and in such instances, the senior qualified applicant may apply for, and be given, such temporary vacancy as results therefrom without regard to the time limitations of Article V (b), para. 2.

6. The General Chairman of the American Train Dispatchers Association shall be furnished a copy of all bulletins, notices, award notices and assignment notices.

7. Notices or bulletins of positions available under Section (a), para. 1 and 3 of Article V shall, whenever possible, be posted sufficiently in advance to enable the successful applicants to transfer to such positions on the day they become vacant.

8. If a train dispatcher holding a temporary postion is the successful applicant for a different temporary position, he relinquishes his former temporary assignment and it becomes a vacancy. He shall not be eligible to bid for that vacancy unless he loses his new temporary assignment through abolishment or the operation of these rules.

(c) Revised.

A train dispatcher who is awarded a position in accordance with the rules of this agreement shall be placed thereon within five (5) days. If not so placed he shall be compensated at overtime rate for each day he is held off such position after the fifth day at the rate of the position worked.

RECEIVED
NOV 10 1954

UNITED STATES
DEPARTMENT OF THE INTERIOR
THE ALASKA RAILROAD

Anchorage, Alaska
July 1, 1954

Supplement No. 2
to
Agreement by and between The Alaska Railroad and Train Dispatchers represented by the American Train Dispatchers Association governing hours of service and working conditions effective April 17, 1950

The following revision of rules in the Agreement between The Alaska Railroad and the American Train Dispatchers Association effective April 17, 1950 and Supplement No. 1 dated February 1, 1953 is hereby agreed upon and made effective as of July 1, 1954.

ARTICLE V

Notice of change in force

(d) As much advance notice as possible but not less than five (5) days will be given of:

ARTICLE VI

Leave of Absence

(a) A train dispatcher may be granted a leave of absence limited to ninety (90) days in any twelve (12) consecutive months period without loss of seniority. Leave of absence in excess of ninety (90) days may be granted only by agreement between the Superintendent and the Chairman of the Train Dispatchers. Leave of absence shall not be required in cases of known physical disability. Letter granting leave of absence shall be furnished the man on leave in each instance.

Article V of Supplement No. 1, dated February 1, 1953, is amended as follows:

To Article V (a) add: "A dispatcher, having been assigned to a temporary position, after a period of ninety (90) days or more may, upon written request, relinquish his temporary position and go on his permanent assignment."

Section 4 of the same Article is changed by eliminating the words "Article III, Section (d) and".

Section 4 (b)(3) of the same Article is changed as follows:

"Notice of temporary positions under paragraph 2 above shall be posted in the Dispatchers office for a period of three (3) days. The successful applicant shall be awarded the temporary position immediately following the close of the three-day period and he shall be placed on the position so awarded within five (5) days, but not in violation of Article III (a) if it can be avoided. Applications must be in writing."

Section 4 (b)(6) of the same Article is revised by adding the following:

"If a train dispatcher, while working a temporary position, is the successful applicant for a permanent position, he may upon written request relinquish his temporary position and go to his permanent assignment."

March 21, 1955

Supplement No. 23
to
Agreement by and between The Alaska Railroad and Train Dispatchers represented by the American Train Dispatchers Association governing hours of service and working conditions effective April 17, 1950.

The following revision of Article IV (h) of the agreement between The Alaska Railroad and the American Train Dispatchers Association is agreed to and made effective as of March 21, 1955:

ARTICLE IV

(h) The senior extra dispatcher who is qualified will be called for extra dispatching work whenever he is available, up to forty (40) hours per week, without regard for loss of time in changing shifts; the senior extra dispatcher will be considered available if he can fill the vacancy without violating the hours of service law, and is not then fulfilling the rest days requirement of his regular assignment in another craft, and is so situated that he can get to the point where the dispatchers office is located in time to commence work at the starting time of the vacant shift, and is not then engaged in dispatcher duties, and provided further, if then fulfilling his regular assignment in another craft, that an employee is available to relieve him without penalty payment of wages unless the dispatcher vacancy is to be more than three (3) days' duration.

The Alaska Railroad

Anchorage, Alaska
April 10, 1956

SUPPLEMENT NO. #3
to
Agreement by and between The Alaska Railroad and Train Dispatchers represented by the American Train Dispatchers Association governing hours of service and working conditions effective April 17, 1950.

The following revision of rules in the Agreement between the Alaska Railroad and the American Train Dispatchers Association effective April 17, 1950 is hereby agreed upon and made effective as of April 10, 1956.

ARTICLE I

.(a) Revised.

This agreement shall govern the hours of service and working conditions of train dispatchers. The term "train dispatcher", as herein used, shall include all train dispatchers except one chief train dispatcher in each dispatching office who is not regularly assigned to a shift performing train dispatcher's work.

NOTE: Two rest days per week shall be assigned to each excepted chief train dispatcher position as a part of the weekly schedule of work for any train dispatcher assignment.

Relief of excepted chief train dispatchers for their annual vacation, and other temporary periods of absence from their positions, shall be made by qualified train dispatchers from the seniority district involved.

The Alaska Railroad

Supplement No. 5

Supplement No. 3 to the Agreement by and between The Alaska Railroad and Train Dispatchers, represented by the American Train Dispatchers Association, governing hours of service and working conditions, and which was made effective March 21, 1955, is revised, effective April 19, 1962, as follows:

ARTICLE IV

(h) When a vacancy occurs for extra dispatching work, the extra board incumbent will be used for vacancies known to be five (5) days or less. When a vacancy occurs for in excess of five (5) days, the senior extra dispatcher who is qualified will be called for dispatching work when he is available up to forty (40) hours per week, without regard for loss of time in changing shifts. When the extra board incumbent is not available for extra work in the dispatchers' office, the senior extra dispatcher will be called if he can fill the vacancy without violating the hours of service rule, and is not then fulfilling the rest day requirements of his regular assignment in another craft, and is so situated that he can get to the point where the dispatchers' office is located in time to commence work at the starting time of the vacant shift, and is not then engaged in dispatcher duties, and provided further, if then fulfilling his regular assignment in another craft, that an employee is available to relieve him without penalty payment of wages unless the dispatcher vacancy is to be more than three (3) days' duration.

Dated at Anchorage, Alaska, April 19, 1962.

MEMORANDUM OF UNDERSTANDING
between
THE ALASKA RAILROAD
and
THE AMERICAN TRAIN DISPATCHERS ASSOCIATION

We agree as follows:

I. PAY SYSTEM AND GRADE

Employees currently classified as Assistant Chief Dispatcher and employees currently classified as Train Dispatcher, shall henceforth be classified and paid as Assistant Chief Dispatcher and will perform the same work defined in the agreement as duties of Assistant Chief Dispatcher, and as performed prior to the effective date of this agreement with the exception of Crew Calling (Reference Article VI). The pay system and grade for Assistant Chief Dispatcher shall be WSE (Wage Supervisor Equivalent) Grade 10.

II. SHIFT DIFFERENTIAL

Rules for payment of shift differential under the WS pay system shall be applicable under the WSE pay system.

III. RELIEF OF CHIEF DISPATCHER

Mr. K. Greene, the present incumbent of the combined position of First Trick Train Dispatcher/Relief Chief Dispatcher shall continue to be paid at the rate of Chief Dispatcher (on the Chief Dispatcher's assigned days of rest) until Mr. Greene is displaced from this assignment, permanently vacates this assignment, or bids a permanent change of assignment as defined by the agreement.

Thereafter, the employee who performs the duties of Acting Chief Dispatcher for periods of three days or less shall be compensated for such periods of duty at an hourly rate which is equal to: the rate of that employee plus one-half of the cents per hour difference between the employee's rate and the rate of the Chief Dispatcher, at the same step. Chief Dispatcher's rate to be expressed in terms of RR pay system for this computation (currently RR-18).

Employees assigned to perform the duties of Acting Chief Dispatcher for continuous periods of more than three days shall be paid at the rate of grade RR-18, at the employee's corresponding step, for all time performing such higher level duties.

IV. AGREEMENT TO RENEGOTIATE

Within 90 days from the date of this Memorandum of Understanding the parties will meet to negotiate ground rules preparatory to revising and renegotiating all agreements, supplements, memorandums, letters, and understanding between them. EXCEPT that the terms and agreements specified in this document shall not be subject to renegotiation except by mutual consent of the parties.

V. SETTLEMENT OF CLAIMS

All claims and grievances now pending between the parties (except the issue of transfer time) will be withdrawn by the organization.

The organization agrees that it has no claim to payment for night shift differential prior to the effective date of this document.

VI. CREW CALLING

The Employer agrees that within 90 days from the effective date of this Agreement, that incidental duties of calling crews will not be required of Assistant Chief Dispatchers.

VII. PRIMACY OF THIS MEMORANDUM

This Memorandum of Understanding represents a full and final settlement with respect to wages, pay level, night shift differential, grievances regarding these and other matters, and supersedes any and all prior agreements and understandings with which it conflicts.

UNITED STATES
DEPARTMENT OF TRANSPORTATION
FEDERAL RAILROAD ADMINISTRATION
THE ALASKA RAILROAD

Schedule of pay, rules and regulations governing Blacksmiths, Boilermakers, Iron Shipbuilders, Helpers, and Apprentices

This Agreement is made between The Alaska Railroad, Anchorage, Alaska, hereafter referred to as "Management" and the International Brotherhood of Blacksmiths, Boilermakers, Iron Shipbuilders and Helpers, Lodge No. 708, AFL-CIO, hereafter referred to as the "Union.

The participants agree as follows:

It is the intent and purpose of the participants to promote and improve the efficient administration of the Federal Service, to promote the well being of employees within the framework of Executive Order 11491, to establish a basic understanding relative to personnel policies, practices and other matters affecting conditions of employment, and to provide a means for amicable discussion and adjustment of matters of mutual interest.

ARTICLE I

RECOGNITION AND UNIT DESIGNATION

Section 1. This Agreement is subject to the limitation on the discretionary powers of the Management Official of The Alaska Railroad over the area negotiated and it is applicable to the units for which the Union has been granted exclusive recognition.

Section 2. Management recognizes that the Union is the exclusive representative of all non-supervisory blue collar employees in the bargaining unit or units. The Union recognizes the responsibility of representing the interests of all such employees by the provisions of this agreement.

Section 3. Other units which are granted exclusive recognition may be covered by this agreement when mutually agreed upon by Management and the Union and placed in written form.

ARTICLE II

RESPONSIBILITIES AND RIGHTS OF MANAGEMENT

Section 1. The right to make reasonable rules and regulations shall be considered acknowledged functions of Management. In making rules and regulations

relating to personnel policies, and practices and procedures, and matters of working conditions, Management shall give due regard and consideration to the rights of the Union and the employees and to the obligations imposed by this Agreement and the provisions of Executive Order 11491; however, such obligation and regard shall not be construed to extend to such areas of discretion and policy as the functions or mission, the budget, organization, assignment of personnel, the technology of performing work, or matters pertaining to the National Security.

Section 2. Management shall maintain a continuing program for the placement of handicapped employees, or those employees temporarily limited to light duty and who cannot be utilized in their primary assignment. It is recognized that in some instances a brief period of indoctrination may be required. Special consideration will also be given to the assignment of reserved parking spaces for use by handicapped employees depending upon the degree and nature of the handicap, availability, and nature of assignment.

ARTICLE III

RIGHTS OF THE EMPLOYEES

Section 1. Management and the Union

agree that employees shall have, and shall be protected in the exercise of the right, freely and without fear of penalty or reprisal, to form, join and assist any employee organization or to refrain from any such activity. Except as expressly provided here and in Executive Order 11491, the freedom of such employees to assist any Union organization shall be recognized as extending to participation in the Union and acting for the Union in the capacity of a Union Representative, including presentation of Union views to officials of the Executive Branch, Congress, or other appropriate authority. Management shall take such action, consistent with law or with directives from higher authority, as may be required in order to assure that employees are apprised of the rights described in this Article, and that no interference, restraint, coercion or discrimination is practiced to discourage membership in Union organization.

Section 2. Any employee covered by the provisions of this Agreement and during the period he is on the payroll of Management, shall not forfeit any benefits of this Agreement while on detail or assignment to another Activity or Division including off-site or satellite facilities for which Management has been delegated responsibility. Excludes assignment or

promotion to Supervisory positions.

Section 3. Employees shall have access to their respective personnel file and the personnel file shall contain a job description stating the work performed by the employee.

Section 4. Employees covered by this Agreement and those dependent upon them for support will be given the same consideration in granting free transportation as is granted other non-operating employees in service.

ARTICLE IV

PROVISIONS OF LAW AND REGULATION

Section 1. It is agreed by Management and the Union that nothing in this Agreement shall be so interpreted as to conflict with provisions of any existing or future law or regulation of the Federal Government. This includes, but is not restricted to, those rules and regulations issued by the Civil Service Commission and the Department of Transportation.

Section 2. Management agrees to furnish the Union with two copies of any directives from higher Headquarters which affect employees or which alter Management's discretionary authority with regard to any item dealt with in this Agreement

before implementing same. When such directives are not readily available Management agrees to requisition the two copies for the Union.

ARTICLE V

APPROPRIATE MATTERS

Section 1. It is agreed and understood that matters appropriate for negotiation in this Agreement, or for consultation between the parties are policies, programs and procedures related to working conditions which are within the discretion of Management, including but not limited to such matters as safety, training, labor-management cooperation, employee services, methods of adjusting grievances, appeals, leave, promotion plans, demotion practices, pay practices, reduction in force practices, and hours of work.

Section 2. Management agrees that the Union will be notified before changes are made to existing benefits, practices, and understandings which have been authorized by Management but which are not specifically covered by this Agreement.

Section 3. Management agrees that all privileges and benefits extended within the limits of its discretionary power will be applied fairly and equitably

to all employees in the unit. Management agrees to consult with the Union concerning alleged inequities in this connection.

Section 4. It is further recognized that this Agreement does not alleviate the responsibility of either party to meet with the other to discuss and consult on matters not covered by this Agreement, which come within the scope of consultation and negotiation. It is further agreed and understood that the Management will consult with the Union before issuing any official directives which adversely affect the general working conditions covering the employees within the bargaining unit but which are not specifically covered by this Agreement.

ARTICLE VI

UNION REPRESENTATION

Section 1. Management recognizes the Union as the exclusive collective bargaining agent for all employees covered by this Agreement. Management further recognizes the right of the Union to designate Shop Stewards and Union Representatives from among the employees of the unit. Management agrees to recognize the Shop Stewards and Representatives designated by the Union.

Section 2. The number of Stewards and Representatives shall be only that number required to assure each employee of the unit ready access to a Steward in his work location. The designated number of stewards shall also be sufficient to assure that the Union can properly carry out its responsibilities under the terms of this Agreement. For the purposes outlined in Sections 1 and 2 of this Article, the Union agrees to supply Management in writing, and shall maintain with Management on a current basis, a complete list of all Union authorized Representatives, Stewards and any alternates.

Section 3. Management agrees to recognize the officers and duly designated representatives of the Union and shall be advised in writing by the Union of the names of its officers and representatives.

Section 4. An employee who alleges and feels that he has a grievance or complaint shall be, upon request to his supervisor, allowed time to report his grievance or complaint to the Shop Steward, and when a pending grievance is reported to the Shop Steward or Representative, that Steward or Representative shall be allowed the time necessary to investigate the reported grievance. This investigative procedure may require discussions with employee(s) within the bargaining unit or outside and representatives of Management (supervision) responsibilities or in some cases all three, in order to evaluate the facts and carry out the Union's responsibility under the terms of this Agreement.

Section 5. Management agrees that Stewards, Union officers, representatives and employees shall be allowed to leave their assigned areas to go to other departments, shops or offices when it is necessary to do so in order to accomplish the purposes outlined in Section 4 above, and in order to bring about a prompt and expedious disposition of a complaint or grievance. It is further agreed that such activity shall be engaged in without any loss in pay or benefits to the employees authorized to act in behalf of the bargaining agent under the terms of this Agreement or to the employees contacted. Permission, in these instances, will be granted unless the individuals work situation precludes such action. In any event, approval will be granted at the earliest opportunity.

Section 6. Management agrees that any representative of the International Brotherhood of Blacksmiths, Boilermakers, Iron Shipbuilders & Helpers, AFL-CIO, or Local Lodge, upon request to Management shall be allowed into the activity at reasonable times on official Union business.

Section 7. Administrative leave may be granted to an employee Union

epresentative to receive training, informa-
ion, briefing and orientation on matters
ithin the scope of Executive Order 11491--
ncluding statutory or regulatory provisions
elating to pay, working conditions, work
chedules, employee grievance procedures,
erformance rating, adverse action appeals
nd agency policy.

ARTICLE VII

HOURS OF WORK AND BASIC WORK WEEK

Section 1. Eight (8) hours shall
onstitute a normal work day. The normal
asic work week shall be Monday through
riday. When one shift is employed, the
tarting time shall not be earlier than
:00 a.m., or later than 8:00 a.m.,
xcept at outlying points. When two (2)
hifts are employed, the starting time of
he first shift shall not be earlier than
:00 a.m. or later than 8:00 a.m., and
he second shift shall start immediately
ollowing the close of the first shift.
hen three (3) shifts are employed, the
tarting time of the first shift shall not
e earlier than 7:00 a.m. or later than
:00 a.m., and the starting time of the
ther shifts shall be regulated accordingly.

Section 2. Assignments may be made
for eight (8) hours excluding an assigned
eal period which shall not be less than

thirty (30)minutes or more than one (1)
hour; except such assignments may be made
to consist of eight (8) consecutive hours
including an allowance for lunch on the
job s

Section 3. Where three (3) assign-
ments performing the same service are
coupled in continuous service covering the
twenty-four hour period, each such contin-
uous service assignment shall consist of
eight (8) consecutive hours including the
allowance for lunch on the job site and
lunch time shall be twenty (20) minutes
between the fourth and fifth hour.

Section 4. Management agrees not to
change the normal basic work week of
Monday through Friday of any employee
except in those cases where a regular tour
of duty would seriously handicap the
performance of function or would result
in substantially increased cost. It is
recognized that functions of The Alaska
Railroad operate on a seven-day work
basis and that certain five-day work
weeks will involve work on Saturday and
Sunday. In those cases when a change in
the normal work week is necessary, Manage-
ment shall consult with the Union in
determining which specific jobs fall with-
in the category for which a re-arranged

basic work week of other than Monday through Friday is appropriate. In no case shall an employee be required to work in excess of five (5) eight (8) hour consecutive days without payment of overtime.

Section 5. Where it is necessary to close the installation or an activity therein and administrative excused leave is granted because of inclement weather, breakdown of equipment, or other emergency "Act of God" situations, employees who report for work shall be given administrative excused leave for the period of the emergency situation.

Section 6. Management will permit adequate wash-up time before each lunch period, and adequate clean-up time at the end of each shift for the purpose of returning tools, cleaning the work area and machinery as necessary, and in each instance, wash-up time will not exceed five minutes on a straight time basis. No employee shall be required to remain after the end of his shift, without compensation, for the purpose of cleaning his designated area.

Section 7. Eight (8) hours of service will constitute a days work. All employees coming under the provisions of this agreement, except as otherwise provided in this schedule of rules, or as may hereafter be

legally established between the Railroad and employees, shall be paid in accordance with the present wage schedule and supplements thereto.

Section 8. At terminals where one shift only is worked, working hours may be established to meet local conditions providing, however, that the eight (8) hours of said shift may be worked within a spread of not more more than twelve (12 hours with but one interval of release of not less than two (2) hours.

Section 9. An employee required to work any part of the meal period will be allowed time therefor on the minute basis at rate of time and one-half. In the even there is not sufficient time remaining within the limits of the meal period in which to procure lunch (not less than twenty (20) minutes), employee will be alllowed not to exceed twenty (20) minutes including any time remaining within the meal period in which to eat, without deduction therefor.

This does not apply to employees who are assigned to eight (8) consecutive hours without meal period and who are allowed twenty (20) minutes in which to eat without deduction of pay.

Section 10. At small outlying points where the service is intermittent, not requiring continuous application, assignment may be made for employees to work eight (8) hours within a spread of twelve (12) consecutive hours with but one interval of not less than two (2) hours of release. Time actually worked in excess of eight (8) hours will be paid for at the rate of time and one-half.

Section 11. Not less than five (5) working days (exclusive of Sunday and holidays) notice will be given before hours or forces are reduced.

ARTICLE VIII

EMERGENCY ROAD AND WRECKING SERVICE

Section 1. An employee regularly assigned to work at a shop, engine house, repair track, or inspection point, when called for emergency work or road work away from such shop, engine house, repair track, or inspection point, will be paid from the time called to leave home station, until his return for all time worked, and will be paid straight time rates for traveling or waiting, except assigned rest days and holidays, which

will be paid for at the rate of time and one-half, whether waiting, working or traveling. If, during the time on the road, a man is relieved from duty and permitted to go to bed for five (5) hours or more, such relief time will not be paid for, provided that in no case shall he be paid for a total of less than eight (8) hours each calendar day, when such irregular service prevents the employee from making his regular daily hours at home station. Where meals and lodging are not provided by the Railroad, travel expenses in accordance with the current Standard Government Travel Regulations will be allowed. Employees will be called as nearly as possible one (1) hour before leaving time, and on their return will deliver tools at point designated. A wrecking service employee will be paid under this rule, except that all time working, waiting or traveling on week days after the recognized straight time hours at home station and all time working, waiting or traveling on assigned rest days and holidays will be paid for at the rate of time and one-half.

ARTICLE IX

OVERTIME

Section 1. An employee shall receive

at least two (2) hours and forty (40) minutes pay at the applicable overtime rate if required to work overtime on a regular work day after he has completed his daily tour and has left his place of employment or on one of his scheduled non-workdays, even if his services cannot be utilized for two (2) hours and forty (40) minutes and shall exclude dead work. Management will endeavor to notify all employees who are to work overtime one day prior to the overtime period. Each employee is expected to work a reasonable amount of overtime when operating requirements necessitate. When it becomes necessary for employees to work overtime they shall not be laid off during regular working hours solely for the purpose of equalizing the time. An employee may be excused from overtime for valid reasons or excused from overtime if an equally qualified employee is willing to work.

Section 2. All overtime shall be compensated for at time and one-half (1-1/2) the employee's regular hourly rate, including all shift premiums and other payments regarded by the employee as part of his regular hourly compensation. Such overtime rates shall be paid

for all hours worked over forty (40) hours per week and for all hours worked over eight (8) hours per day.

Section 3. In the event of a situation requiring the extension of a regular work shift into more than a two (2) hour over-time period, time for lunch will be permitted on the work site. Management will make the necessary arrangements that food will be made available for the employees involved.

Section 4. Overtime assignments will be made from a rotary board on a "first-in-first out" basis. Such a board will be set up to cover each seniority list in each shop. Employees will be accorded right of refusal to an overtime call unless his skill is specially needed for that call. An exception may be made to select an employee out of rotation if his special skill is required to perform a special assignment.

Section 5. Except in the case of an emergency, Management agrees not to work an employee in an overtime status beyond two (2) consecutive days or days of rest against his wishes.

Section 6. An employee regularly assigned to work at a shop, engine house,

repair track or inspection point and who reports out and in of said point within twenty-four (24) hours shall receive time and one-half hours in excess of eight in any twenty-four hour period involved.

ARTICLE X

HOLIDAY WORK

Section 1. Federal regulations applicable to Federal Holidays shall apply. Employees shall be excused for all holidays now prescribed by law and any that may be later added by law and all holidays designated by Executive Order shall be observed as regular holidays. If a holiday falls on the employee's first rest day within the normal work week, the preceding day shall be treated as the holiday for leave and pay purposes and if the holiday falls on the employee's second rest day, the following day shall be treated as the holiday for leave purposes. All hours worked within the hours of the assignment, shall be paid at the regular basic compensation rate plus premium pay. Eligible employees excused from duty on a holiday shall receive pay at the basic rate of compensation for the day. When possible, Management will

notify all employees who are to work on a holiday five (5) days prior to the holiday to be worked; a list of employees expected to work on a holiday shall be posted in their work area at least five (5) work days in advance of such holiday.

Section 2. Management agrees that employees will not be scheduled to work on a holiday; prescribed by Federal Law or Executive Order, solely to avoid overtime work that otherwise would be performed on a day outside the basic work week.

ARTICLE XI

SICK LEAVE

Section 1. Sick leave shall be granted employees when they are incapacitated for the performance of their duties by sickness, injury, or for medical, dental, or optical examination or treatment, or when a member of the immediate family or the employee is afflicted with a contagious disease.

Section 2. An employee who is absent on account of sickness shall notify his superiors or other appropriate person prior to the start of the shift on the

first workday of his absence, or as soon thereafter as possible. Second and third shift employees shall notify their department or shop prior to the start of their shift or as soon thereafter as possible. Requests for sick leave for medical, dental, or optical examination or treatment shall be submitted for approval prior to the beginning of the leave, except in the case of emergencies.

Section 3. A medical certificate for absence of three (3) workdays or less will not be required, except where there is reason to believe the employee is abusing sick leave privileges. In such cases the employee will be verbally advised that the sick leave privilege is being abused. When there is no improvement the employee will be advised, in writing, that he will be required to submit a medical certificate for each subsequent absence for illness. Medical certificates will not be required for holidays or days outside the employee's workweek. It is further agreed that Management and the employee will review the sick leave record of each employee required to furnish a medical certificate periodically, and where such review reveals no substantial evidence that the employee has abused sick leave

privileges during the review period, the employee will be notified in writing that a medical certificate will no longer be required for each absence which is claimed as due to illness for periods of three (3) workdays or less unless an abuse recurrs.

Section 4. An employee sent home by the Chief Medical Officer will be provided transportation by Management in those cases where the Medical Officer determines such transportation is necessary.

Section 5. When an employee is assigned a temporary restricted work classification, as determined by the Medical Officer, Management will make every effort to place the employee on a job, if available within the prescribed restrictions.

Section 6. Management agrees to advance sick leave in accordance with applicable regulations to permanent employees, not to exceed thirty days when there is reason to believe the advanced sick leave will be earned after return to work.

ARTICLE XII

ANNUAL LEAVE

Section 1. Annual leave is afforded by law. Employees shall accrue leave in accordance with regulations. Approval of an employee's request for annual leave will be granted when his request is submitted with reasonable advance notice. Approval of requests for annual leave for unforeseen reasons will be considered as the circumstances warrant.

Section 2. Every attempt consistent with the workload will be made to satisfy the desires of the employees with respect to the approving of extended annual leave for vacations. When Management finds it necessary to cancel previously approved leave, the reasons for such action will be explained to the affected employee(s).

Section 3. Applications for specific days of annual leave for vacation purposes will be granted on a seniority basis and in the event of a coinciding request date, the senior employee of the affected area of the Alaska Railroad shall receive preference. Filing date for vacation leave shall be February 1 of each year.

ARTICLE XIII

LEAVE OF ABSENCE

Section 1. A reasonable number of employees may be granted annual leave, leave without pay, to accept temporary Union positions or to attend conventions or meetings of the Union as defined in Executive Order 11491. Employees may be granted leave of absence with or without pay for other purposes.

Section 2. Management agrees to grant upon request of the Union, leave without pay for employees to act as full-time representatives for the Union.

Section 3. Management recognizes the obligation to provide employment at the end of the extended leave without pay granted for employees as full time Union representatives within the rating the employee held upon his request for leave and in the current pay status of such rating at the time the employee returns to work, also recognizing the bumping and retreating rights of an employee on approved leave of absence without pay in situations where the employee's status has been affected by reduction in force action during the period of leave of absence.

Section 4. All employees in approved leave of absence without pay status shall accrue all rights and privileges in respect to retirement status and coverage under the Group Life Insurance and Federal Employees Health Benefits Program in accordance with current law and regulations.

Section 5. Each Reservist of the Armed Forces or member of the National Guard who is a permanent employee is entitled to leave of absence from his duties without loss of pay or seniority for not exceeding fifteen (15) calendar days in any calendar year in which he has been called to active duty.

Section 6. Employees shall not be granted leave of absence without pay for the purpose of accepting outside employment unless given written permission prior to leave jointly by the Management and the Union. Employees giving false reasons for the purpose of obtaining leave will be subject to discipline.

Section 7. An employee on leave or temporarily absent from his assignment for any cause, must notify his foreman of his return thereto at least one (1) hour prior to the quitting time of his assignment on the working day next preceding his return, except in the case of sick leave.

Section 8. Duly accredited representatives of the employees and other employees employed exclusively by the organization shall be considered as in the service of the Carrier and may return to their former position or exercise seniority within thirty (30) calendar days after release from such emloyment.

Section 9. An employee unavoidably detained from work will not be discriminated against. Unless prior notice of expected absence has been given, notice to foreman must be given as quickly as possible, and failure to do so, or habitual absence from work without a good cause will be considered cause for discipline.

ARTICLE XIV

MERIT PROMOTION

Section 1. The Employer will utilize employees' skills and potentials to the fullest extent practicable. Employees will be promoted on the basis of merit without regard to race, color, religion, sex, age, or membership or nonmembership in employee organizations. The over-all objective of the merit promotion program

is to assure that positions are filled with the best qualified persons available and to assure that all employees have an equal opportunity to apply for advancement.

Section 2. The Union recognizes that the Employer has the option of filling positions by repromotion, or by methods other than promotion such as appointment, reinstatement, reassignment, or transfer provided the person selected is in the best qualified group using the same qualification standards as for evaluating applicants for promotion. Management agrees that whenever possible to utilize existing employees from within the activity to fill vacant positions when qualified employees are available.

Section 3. All Alaska Railroad merit promotion program opportunities will be advertised through issuance of announcements within the area of consideration on all Official Bulletin Boards. Announcements will be open for at least ten working days when advertising is confined to the Alaska Railroad.

Section 4. The Alaska Railroad will normally be the minimum area of consideration. If an announcement fails to provide a sufficient number of highly

qualified candidates the area will be expanded. The Union will be notified in advance of expansions of areas of consideration and upon request the Employer will consider the Unions views concerning the necessity for such expansions.

Section 5. Upon request, each applicant will be told whether he was eligible for promotion on the basis of minimum qualification requirements, whether he was in the group from which selection was made, who was selected for promotion, and in what areas he should improve himself to increase his chances for promotion.

Section 6. In accordance with Civil Service Commission directives qualification standards for promotion are those prescribed in Commission Handbook X-118-C for ungraded positions as supplemented by Department of Transportation directives. These standards prescribe elements for each occupational area and level of the occupation. In accordance with the Federal Personnel Manual the following consideration may be used in evaluating these job elements.

a. Written Tests. Appropriate validated written tests which are either required or approved by the Civil Service Commission may be used. Written tests may not be used as the sole means of evaluating candidates; they may be used as only one part of the evaluation process with due weight given to the appropriate factors.

b. Appraisals of Performance. Appraisals of performance must be considered as one factor in evaluation of basically eligible candidates. When an employee hs worked for a particular supervisor for less than six (6) months, a second, foreman (leadingman) supervisory appraisal will be obtained. An employee is entitled to see, upon his request, any production record or any supervisory appraisal of past performance used in considering him for promotion. An employee, however, is not entitled to see a supervisory report on potential which is a recorded judgement of the supervisor's estimate or prediction of how well the employee is likely to perform at a level or in a kind of work different from one in which he has already performed.

c. Experience. In evaluating experience the type and quality of experience is considered in relation to

[illegible] of highly

the requirements of the position to be filled. Length of service or length of experience is evaluated when there is a clear and positive relationship with quality of performance and for breadth of ties.

d. Awards. Due weight will be given awards received by employees in terms of qualifications indicated such as initiativ resourcefulness and planning ability and their bearing on the requirements of the positi n to be filled.

e. Training and Self-Development. Training and self-development which would increase the employee's potential for effective performance in the position to be filled must be considered.

Section 7. Employees selected for promotion will be notified promptly of their selection and released from their former positions as soon as practicable, normally with two weeks notice. An employee will be paid at the pay level of the position for which selected, starting with the effective date of promotion, in accordance with applicable regulations.

Section 8. Questions or complaints about the promotion program should be resolved informally if possible with immediate supervisors and the Personnel Officer. The formal means for resolving complaints is then through the grievance procedure.

Section 9. When practicable, the duties of a supervisor who is absent for a time less than thirty (30) days will be assumed by another supervisor. When this is not practicable, a qualified employee will be assigned as acting supervisor. When an employee is so assigned for a period of thirty (30) days or more, a temporary promotion will be made under applicable rules and regulations.

Section 10. When a vacancy occurs, a Certificate of Eligibles will be forwarded to the Selecting Official containing the names of the best qualified applicants and shall be grouped alphabetically and the certificate shall state that the names are not listed relative to qualifications. The Selecting Official may interview candidates on the Certificate of Eligibles. If one (1) candidate is interviewed, all candidates will be interviewed if available.

Section 11. Merit Promotion announcements will show the job requirements for which an applicant's qualifications are evaluated in terms of the skills, knowledge, abilities, and potential needed to perform the job for which the applicant is being considered. Merit promotion announcements shall not contain key or restrictive clauses that tend to favor one employee or a group of employees for a particular position.

Section 12. A merit promotion opportunities announcement may not be modified after the promotion process is under way unless an inappropriate announcement has been released. Modified announcements will be in accordance with Section 3 of this Article and all employees eligible under the modified announcement shall be considered for promotion.

Section 13. The Employer agrees to consult with the Union on any revisions or amendments to the Merit Promotion Plan.

ARTICLE XV

REPROMOTION

Section 1. Any employee demoted without cause will be advised in writing of his entitlement to special consideration for repromotion.

Section 2. An employee demoted without cause must be considered for repromotion before other means are used to fill a position. Although he is not guaranteed repromotion he should be repromoted as an exception to competitive procedures if he is well qualified for the position unless there are persuasive reasons for not doing so.

ARTICLE XVI

DEADHEADING

Section 1. Regularly assigned employees ordered by the Management to deadhead outside of assigned hours to or from a point to perform service shall be paid actual travel time at straight time rates not less than eight (8) hours per day. Travel in excess of eight (8) hours per day will be paid as travel time at straight time rates, and will not be counted against the basic work week of forty (40) hours. Where meals and lodging are not furnished by the Carrier, travel expenses will be allowed in accordance with Standard Government Travel Regulations.

Positions requiring travel as a regular part of their assigned duties will not be paid travel time in excess of their assigned hours.

ARTICLE XVII

PERSONNEL MOVEMENTS IN RIF SITUATIONS AND REHIRING

Section 1. It is agreed that all possible action will be taken to avoid or minimize the impact of a reduction-in-force prior to separating employees. Such action will include restricting recruitment, meeting ceiling limitations through attrition, reassigning employees in surplus positions and terminating limited appointments.

Section 2. Management agrees to notify the Union of the necessity for reduction-in-force as far in advance as practicable and of the reasons therefor. Management also agrees to inform the Union of the affected competitive levels and the number of employees affected, when this information is available.

Section 3. It is agreed that Management, to the extent consistent with the installation's manpower requirements, will make an effort to reasssign employees whose positions are eliminated because of automation or adoption of labor saving devices. It is agreed that management will make practical effort to train employees, when necessary for reassignment, whose positions are eliminated because automation or adoption of labor saving devices.

ARTICLE XVIII
REVIEWS OR JOB DESCRIPTIONS AND REQUIREMENTS

Section 1. The activity program for determining the ratings of positions of employees in the unit is conducted in accordance with the applicable Department of Transportation regulations. To assure that ratings are appropriate to the work currently being performed by the employees in the bargaining unit, Management agrees to and shall conduct a continuing Review of such ratings throughout the activity. In any case where a modification of a job description of any position in the unit is proposed to the extent that either the rating, title, pay level, or qualification requirements for the rating

would be affected, the proposed change will be discussed verbally or in writing by Management with the Employee prior to the effective date of any such change.

Section 2. Any employee in the unit who alleges that his position is improperly described or rated may discuss the matter with his supervisor, who will, upon request, arrange for review of the employee's rating by personnel of the Personnel Office. The review shall include discussion with the employee and with his supervisor to determine the employee's actual regular work assignment over a representative current period and comparison of such assignments to the related job descriptions and/or rating definitions. Management agrees to consider fully all pertinent facts including those presented by the employee. If the employee's complaint is not resolved to the satisfaction of the employee, Management shall notify the employee in writing of the findings, the basis of the findings, and shall outline the employee's appeal rights. In requesting a review of his position rating and in the discussions described above, the employee may have and shall be entitled to representation by his Union.

Section 3. Upon request by the employee and/or his representative, Management agrees to produce all pertinent and current data on the grade and job standards of the employee's particular job. The information will include how the grades, job standards, and titles were established and the type of work actually required under these standards.

Section 4. It is agreed that Management will advise the Employee when a job rating is to be changed due to reclassification actions to a lower grade, and at least thirty (30) days prior to effecting personnel action.

Section 5. The Union may present supporting evidence to Management regarding the local application of position classification standards and the equity of classification results.

ARTICLE XIX

DISPOSITION OF UNIT WORK

Section 1. Nothing in this agreement shall be construed to prevent operators of equipment and machines from

making minor repairs to equipment they operate incidental to the continuous operation of their equipment and machinery, outside the shop.

Section 2. None but mechanics or apprentices regularly employed as such shall do mechanic's work of each craft. This rule does not prohibit foremen in the exercise of their duties, or foremen at points where no mechanics are employed, to perform work.

Section 3. At points where there is not sufficient work to justify employing a mechanic of each craft, the mechanic or mechanics employed at such points will, so far as capable, perform the work of any craft (including welding) that may be necessary.

Section 4. An employee notified to work a full shift on his day of rest, Sundays or holidays, will be allowed to complete the shift unless relieved at his own request.

Section 5. Management agrees that as a matter of practice, supervisors at Anchorage shall not be assigned to perform the duties as outlined in job descriptions of Unit employees except

when instructing or training employees.

ARTICLE XX

APPRENTICE TRAINING PROGRAMS AND RE-TRAINING

Section 1. It is mutually agreed that the Apprentice Training Program is of vital interest to Management and the Union. The objective of the Program is to provide organized on-the-job and academic training and instruction to qualified employees to develop skilled journeymen and potential leaders in the trades areas necessary to the mission of this unit.

In this regard, cognizant Shop Heads will coordinate the on-the-job training in order to insure that apprentices receive broad and well-rounded experience in their respective trades. All apprentice training assignments shall be scheduled and recorded to insure that all apprentices are afforded the opportunity to qualify in each phase of training, as defined in the Apprentice Training schedule developed by Management and the Union for each trade.

Section 2. Management agrees to recognize a Union apprentice training committee within the Boilermakers/

Blacksmith bargaining Unit of not more than three (3) members appointed by the Union and three members appointed by Management to serve on such committee. This committee shall have the right to a reasonable review of apprentice training programs affecting employees in the bargaining unit for the purpose of assisting Management in insuring a continuing effort to strengthen and improve the apprentice training program. It is further agreed that the Union apprentice and training committee shall meet once every two (2) months or upon the request of either party for the purpose of discussing the overall effectiveness of the apprentice training program.

Section 3. Management agrees that apprentices will be assigned to either an apprentice instructor or a skilled journeyman who will be under the personal supervision of a supervisor, who shall be responsible for their training while so assigned. Assignments will be made, to the extent permitted by work requirements, primarily to expose the apprentice to a variety of jobs with increasing complexity and responsibility during the programmed apprentice term.

Section 4. The time a journeyman is engaged in instructing apprentices, when

assigned, will not be considered by the immediate supervisor in judging productivity of that particular journeyman.

Section 5. Whenever technological changes require the use of a composite job rating which will utilize the skills of more than one (1) craft or trade, Management agrees to make every reasonable effort to train employees from trades affected by the new rating and to secure employees for such training from within the activity. In securing employees for such on-the-job training, Management agrees to the use and principles of a merit promotion system with respect to their selection and appointment to such training programs.

Section 6. In recognition of the mutual advantages to Management and to the employees, Management agrees to utilize existing employees from within the activity when training for any new job ratings which may be determined necessary for establishment within the activity to carry out the mission.

ARTICLE XXI

SAFETY

Section 1. Management will exert every effort to provide and maintain safe working conditions and industrial health protection for the employees. The Union will cooperate to that end and will encourage all employees to work in a safe manner.

Section 2. It is recognized that each employee has a primary responsibility for his own safety and an obligation to know and observe safety rules and practices as a measure of protection for himself and others. Management will welcome from any individual employee or from the Union, suggestions which offer ways of improving safety conditions.

Section 3. It is agreed that the Union will appoint an appropriate number of qualified employees to serve as the Union's representatives on Management's Safety Committees.

Section 4. In the course of performing their normally assigned work, Union representatives will be alert to observe unsafe practices, equipment, and conditions as well as environmental conditions in their immediate area which represent industrial health hazards. When unsafe or unhealthy conditions

are observed by the Union representatives they should report them to the immediate supervisor. When such safety and industrial health matters are of general interest, the Union may present the problem to Management's safety committees or bring the matter to the attention of appropriate supervision for mutual consideration by Management and the Union.

Section 5. The Union and Management will make every effort to prevent accidents of any nature. Should such accidents occur, however, a prime consideration will be the welfare and comfort of injured personnel.

Section 6. When it becomes known that an accident has resulted in a disabling injury, management agrees to notify the Union promptly of the circumstances.

Section 7. Employees injured while at work will not be required to make accident reports before they are given medical attention, but will make them as soon as practicable thereafter. Proper medical attention will be given at the earliest possible moment, and, when able, employees shall be permitted to return to work without signing a release pending

final settlement of the case. Settlements will be made in accordance with Employee's Compensation benefits.

Section 8. When employees covered by this agreement are required to transfer from hot work to cold work, they will be allowed sufficient time to cool off before such transfer is made.

Section 9. Pits and floors, lockers, toilets, washrooms and lunchroom will be kept in good repair and in a clean, dry and sanitary condition.

Section 10. Operators of sandblast or paint sprayers will be required to use utmost care not to disturb other employees working in immediate vicinity.

Section 11. All acetylene or electric welding or cutting will be protected by a suitable screen when its use is required.

Section 12. Shop employees will not be required to work on engines or cars outside of shops during inclement weather, if shop room and pits are available. This does not apply to emergency work required to trains or in train yards.

Section 13. No employee will make repairs to engines or cars standing on main

track or side track in yards without being protected by a blue signal in place provided thereto on engine and car at both ends of the train to prevent cars from being coupled to or moved while he is making repairs. If signals are placed by the employee, he alone must remove them.

Section 14. When circumstances permit every effort will be made to clean locomotives prior to truck changes or other major work.

ARTICLE XXII

COMMITTEE ASSIGNMENTS

Section 1. The Union agrees to cooperate with Management in the development of policies and procedures for programs which involve charitable solicitations to include qualified Union representation on Management committees for such purposes.

Section 2. The Union will appoint qualified representatives to assist Management in evaluating suggestions and incentive awards.

ARTICLE XXIII

CIVIC RESPONSIBILITIES

Section 1. When an employee is absent from duty and in attendance in court as witness in behalf of the United States, or for jury duty in any State court or court of the United States, the absence from duty shall not be charged against annual leave but shall be recorded as "court leave" for the employee's regular tour or tours of duty.

Section 2. On receipt of a summons to appear for jury duty, the employee shall advise his supervisor. While the duty to serve as a juror is one of the precious privileges and responsibilities of American citizenship, with which the Railroad management concurs, there are instances when the absence of the employee from duty would work an undue hardship. The Personnel Officer shall investigate these hardship cases when brought to his attention by the branch head.

Section 3. An employee answering summons for jury duty shall require written certification of attendance from the clerk of the court. This form shall be attached to Standard Form 71 and presented by the employee to timekeeper as authority for allowance of court leave.

Section 4.

a. Since court does not ordinarily convene until 10:00 a.m., an employee called for jury duty shall be required to report on his Railroad assignment at the starting hour and continue work until such time as it is necessary to leave for court. The only exception to this requirement shall be in those instances where the foreman or other supervisor finds it would be an undue hardship to comply therewith and so informs the appropriate timekeeper in writing.

b. When an employee is excused from duty by the court for as much as one and one-half (1-1/2) hours prior to time for stopping work at noon or evening, he shall return to duty unless advance authority for non-return, due to definite hardship being involved, is obtained from foreman or other supervisor.

Section 5.

a. An employee serving as a juror in State or municipal courts shall be instructed to collect all fees and allowances payable on account of the jury service. The employee must forward the

fees so collected to the Treasury Section, Accounting Branch, The Alaska Railroad, endorsed with "Pay to The Alaska Railroad"; otherwise, payroll deduction shall be made from compensation due him. The employee may keep allowances for mileage and subsistence to cover his actual expenses incident to the jury service; however, payment of per diem is prohibited since it is a form of compensation for services rendered.

b. An employee who performs jury service on rest or layover days is entitled to retain the fees received for such service.

Section 6. An employee who desires to vote or register in an election or in a referendum on a civic matter in his community may be granted time off without charge to annual leave. When the polls are not open at least three hours either before or after an employee's regular hours of work, he may be granted an amount of excused leave which will permit him to report for work three (3) hours after the polls open or leave work three hours before the polls close, whichever requires lesser amount of time off.

- 47 -

ARTICLE XXIV

SPECIAL TOOLS - CLOTHING - SERVICES

Section 1. Management agrees to bear the full expense of all special tools, protective clothing and equipment that employees use in the performance of their duties.

Section 2. Management agrees to bear the expense of paying the difference between work shoes and safety shoes.

Section 3. Management agrees to provide space on official bulletin boards and offices for the posting of union notices and similar information material.

ARTICLE XXV

GRIEVANCE PROCEDURE

Section 1. An employee who has passed his probationary period satisfactorily or whose application has been formally approved shall not be disciplined or dismissed without a fair hearing by the designated officer of the Railroad. He may, however, be held out of service pending hearing. At a reasonable time prior to the hearing and not less than forty-eight (48) hours, such employee shall be apprised, in writing, of the precise charge against him within thirty

(30) calendar days of knowledge by the Management of the alleged offense. The hearing shall be held within ten (10) calendar days of the date when charged with the offense. A decision will be rendered within ten (10) days after completion of hearing. The time limits in this rule may be extended by mutual agreement.

Section 2. The right of appeal by employees or their duly accredited representatives in the regular order of succession up to and including the highest officer designated by the Management to whom appeals may be made is hereby established. When appeal is taken, further hearing shall be granted, if requested of the official to whom appeal is made. Appeals will be registered within a reasonable time after decision is given and a copy furnished official whose decision is appealed. Hearings and decisions on appeals will be given within ten (10) calendar days from date appeal notice is received by the officer to whom appeal is taken. The time limits in this rule may be extended by mutual agreement.

Note: No appeal will be handled except in accordance with the above procedure.

Section 3. At hearings an employee

may be assisted by one or more duly accredited employee representatives. Disputes growing out of personal grievances and/or out of the interpretation or application of agreements or practices concerning wages, rules or working conditions between the parties hereto may be handled by one or more duly accredited representatives, first with the immediate supervisory officer and, if not satisfactorily settled, may be appealed by the representative in the order of succession up to and including the highest official designated by the Management to whom appeals may be made. At each step Management will render a decision within ten (10) days.

Section 4. Investigations and hearings shall be held whenever possible at home terminals of employees involved and at such time as to not cause employees to lose rest or time. Employees shall have reasonable opportunity to secure the presence of duly accredited representatives and/or necessary witnesses. Upon request of the employee or his representative all necessary existing records of Management pertinent to the case at hand shall be made available for their use. In the process of the hearing,

the Union will be permitted a court recorder or a tape recorder.

Section 5. A copy of all statements made a matter of record at investigations or hearings shall be furnished to the employee and to his duly accredited representative.

Section 6. If an employee is suspended the suspension shall date from the time he was taken out of service.

Section 7. If the final decision decrees that charges against the employee were not sustained, the record shall be cleared of the charge. If suspended or dismissed, the employee shall be reinstated and paid for all time lost.

Section 8. An employee who considers himself unjustly treated, or that any of the provisions of this agreement have been violated, shall have the right of investigation, hearing, appeal and representation as provided in Rules (Sections) (1), (2), (3), (4) and (5), if written request, which sets forth the employee's grievance is made to his superior within thirty(30) calendar days of knowledge by the employee of the alleged unjust treatment.

Definition of Investigation: An inquiry conducted by the Management to determine cause and responsibility and to make search or inquiry for truth, or facts prior to conducting a hearing. Employees are not disciplined as a result of an investigation except new employees who have not passed their probationary period of employment.

Definition of Hearing: A hearing (a trial) conducted after an investigation has developed cause and responsibility. At such hearings an employee or employees must be given proper notice under these rules and apprised in writing of the precise charge or charges against him. Employees may be disciplined or discharged as a result of a hearing. Appeals are based on hearings, not on investigations.

The enforcement of discipline by demerit record will apply to employees of the unit.

The advantages of this system are:

1. (a) To the employee, enabling him by good conduct to insure permanency of employment.

1. (b) To the Railroad, in increased efficiency of such permanent employees.

(c) To avoid loss of wages and consequent hardships to employees and their families because of being deprived of their regular income.

(d) To promote good conduct and encourage careful and efficient service.

2. No discipline by record will be made for less than five (5) or more than sixty (60) demerits.

3. Where demerits are given for unsatisfactory service, cancellations upon record will be given as follows:

(a) A clear record for six months will cancel five (5) demerits.

(b) A clear record for one (1) year will cancel thirty (30) demerits.

(c) A clear record for eighteen (18) months will cancel sixty (60) demerits.

4. When an employee's demerits have accumulated to the number of ninety (90), he will be dismissed from the service.

5. An accumulation of demerits showing that an employee is not desirable for the service will first be given special consideration, but when the service of an employee is so generally unsatisfactory as to unfit him for further service, dismissal will follow.

6. Any permanent employee, who is not serving a probationary period and has completed one year of continuous employment, subject to discipline resulting from hearings or hearings and accumulation of demerits involving removal, suspension for more than thirty (30) days, furlough without pay or reduction in pay shall be afforded the provisions of Civil Service Commission regulations relative to adverse actions. These regulations shall be quoted to the employee, including but not limited to a Notice of Proposed Action,

Receipted Delivery Notice, Thirty Day Pay status, time for employees response and evaluation of same and Notice of Decision.

ARTICLE XXVI

ADVISORY ARBITRATION

Section 1. If Management and the Union fail to settle any grievance arising under Article XXV titled Grievance Procedure with respect to the interpretation, application, or alleged violation of this Agreement or of any policy or decision of Management, such dispute shall, upon written notice by the party requesting arbitration to the other party, be referred to Advisory Arbitration. Such written notice must be served not later than thirty (30) days following the conclusion of the last step of the grievance procedure.

Section 2. Within seven (7) days from the date of receipt of the arbitration request, the parties shall meet for the purpose of endeavoring to agree on the selection of an arbitrator, and the wording of the question to be resolved. If agreement cannot be reached, then either party may request the Federal Mediation and

Conciliation Service to submit a list of five (5) impartial persons qualified to act as arbitrators. The parties shall meet within three (3) days after the receipt of such list. If they cannot mutually agree upon one of the listed arbitrators, then Management and the Union will each strike one arbitrator's name from the list of five (5) and shall repeat this procedure. The remaining name shall be the duly selected arbitrator.

Section 3. The fee and expenses of the arbitrator shall be borne equally by Management and the Union provided that the cost to Management for arbitrater's fee shall not exceed that amount authorized by rules and regulations. The arbitration hearing shall be held during the regular day shift work hours of the basic work week of Monday through Friday, and all employee representatives, not to exceed two (2), employee appellants and employee witnesses shall be in a pay status without charge to annual leave while participating in the arbitration proceedings.

Section 4. The arbitrator is requested by the parties to render his decision as quickly as possible but in any event no later than thirty (30) days after the conclusion of the hearings unless the parties otherwise agree.

Section 5. It is agreed and recognized that arbitration as provided herein is advisory in nature.

Section 6. The arbiter shall have jurisdiction and athority to interpret this Agreement and to apply it to the particular case under consideration, but shall, however, have no authority to add to, subtract from, or modify the terms of this Agreement and shall confine his findings to the question submitted.

Section 7. In those cases where either party deems it necessary, it may arrange that a transcript of the hearing be made by a qualified court reporter. The party making such arrangement shall bear the full cost thereof. If both parties request a copy the cost will be shared equally. If the arbiter requests that he be furnished with a copy, the expense of the original copy and the reporter's attendance charge shall be borne equally by Management and the Union.

Section 8. The Head of the activity shall render his decision on the advisory arbitration within twenty (20) calendar days from receipt of the arbitrator's decision.

ARTICLE XXVII

SENIORITY

Section 1. Mechanics, helpers or apprentices permanently transferred from one point to another will, after thirty (30) days, lose their seniority at the point they left, and their seniority at the point to which transferred will be established as of the date service is first performed at point to which transferred. Junior employees will be compelled to accept a permanent transfer to another point.*

*Senior employees temporarily transferred will not be compelled to accept a permanent transfer to another point.

Section 2. Employees temporarily transferred to fill vacanacies of less than thirty (3) days at the direction of the Management under a forced rule will be allowed expenses in accordance with Standard Government Travel Regulations for not to exceed thirty (30) days.

Section 3. Employees now filling or promoted to official positions beyond the scope of this agreement shall retain and continue to accumulate seniority in the class from which promoted.

Section 4. An employee taken from any craft for assignment to special service will retain his seniority and be considered on leave of absence from his department while performing such special service.

Section 5. Employees on extended leave of absence for vacation, sickness, or other authorized leave, upon returning to service will be permitted to return to their former positions or may exercise displacement rights on new jobs or vacancies created during his absence. If such employee returns to his regular position, the employee who was relieving him will return to regular position. If a returning employee displaces another employee assigned during his absence, the displaced employee may exercise seniority in like manner to other positions for which he is qualified. Such actions are to be accomplished upon return or within three (3) days thereafter.

Section 6. Seniority of Mechanics, helpers and apprentices covered by this agreement in each craft shall be confined to the point at which employed.

Section 7. The indiscriminate exercise of seniority to displace junior employees, which practice is usually called

"rolling" or "bumping", will not be permitted. However, an employee whose assignment is discontinued, or who may be displaced from his position by other causes, will be permitted to exercise seniority on any job occuppied by a junior employee on his seniority list.

Section 8. When the force is reduced, seniority will not govern. Civil Service Commission Regulations shall apply for Reduction in Force.

Section 9. Separate seniority rosters, at their respective points will be maintained for Blacksmiths, Boilermakers, and Mechanic's Helpers.

ARTICLE XXVIII

BULLETINING POSITIONS WITHIN MULTIPLE APPOINTMENTS

Section 1. Vacancies of thirty (30) days or more shall be bulletined for five (5) days before being permanently filled. The oldest employee in point of service in the respective craft, if qualified by

experience to efficiently handle the work, will be assigned. Employees desiring to avail themselves of this rule will make bid, in writing, to the official in charge, duplicate copy to local chairman, the management to make assignment.

Section 2. An employee exercising his seniority rights under this rule will do so without expense to the Carrier; he will not lose his right to the job he left, and if after a fair trial not to exceed thirty (30) days he fails to qualify for the new position, he will return to his former position. The next senior qualified man bidding will be assigned. In the event there are no bids, the youngest employee will be assigned. (INTERPRETATION: For Blacksmith and Boilermakers not in multiple assignments, the assignment of the youngest man to other points than his existing home station, shall be restricted to situations where the youngest man would otherwise be displaced by cancellation of his assignement.)

Section 3. Official Bulletin Boards shall be used at all shops, repair points, and roundhouses where proper notices of interest to employees and job bulletins, may be posted. Access to such board will be made

available to accredited union representatives for posting such notices as are necessary.

Section 4. Employees covered by this agreement, who have been assigned in a multiple appointment, performs work for four (4) hours or more in a position authorized with a multiple appointment shall be paid for the rate of the work performed consistent with the grade assignments authorized in multiple appointment.

Section 5. Advertised vacancies may be filled in acting status pending an assignment.

ARTICLE XXIX

DURATION AND CHANGES

Section 1. This agreement when approved by the parties for the Union and the Management shall become effective on February 5, 1970. After such approval renewal of this agreement will be automatic from year to year, provided that this agreement shall terminate automatically effective with any date on which it is determined that the Union is no longer entitled to exclusive recognition in accordance with Executive Order 11491.

Section 2. By mutual consent of the parties, this Agreement may be opened at any time for amendment. Any request for amendment shall be in writing to the General Manager and must be accompanied by a summary of the amendment or amendments proposed. Within sixty (60) days after receipt of such request, representatives of Management and the Union will meet to negotiate the matter and no changes other than those covered by the summary shall be considered. A written notice of desire to alter and amend by renegotiation shall not have the effect of terminating this Agreement.

Section 3. This agreement supersedes all previous agreements for employees covered by this Agreement.

Section 4. The Articles of this agreement have been negotiated in good faith and are presumed to be consistent with existing laws enacted by the U. S. Congress, applicable Department of Transportation and Civil Service Commission regulations and Executive Orders. The provision of any existing or future contrary decree with respect to and which affect this agreement shall become a part thereof.

Section 5. It is agreed that this agreement shall take precedent and no other agreement shall be the basis for grievances.

Dated at Anchorage, Alaska February 5, 1970.

Section 13. Effective Date and Duration

Preamble. This Basic Agreement is agreed to in the interest of developing sound relations between the employees and management of The Alaska Railroad. The public interest requires high standards of employee performance and modern work practices to improve employee performance and efficiency Observance of its terms by management and employees, as well as by their representatives, should result in the joint determination of fair and reasonable hours regulations and working rules; in the prevention of grievances and in the prompt and orderly settlement of all differences between labor and management; in stabilizing employment, and in developing systematic labor-management cooperation for safety, mutual benefit and good service to the patrons of the Railroad and the State of Alaska.

The Alaska Railroad as an agency of the Government of the United States is dedicated to the accomplishment of certain public purposes as provided in the Act of March 12, 1914, which directed the President of the United States to construct and operate a railroad in the Territory of Alaska (now the State of Alaska). Among these

public purposes are the furtherance of the development of Alaska and the support of national defense. The duties and responsibilities necessary to accomplish these public purposes have been vested by Executive Order of the President No. 11107, dated April 25, 1963, and by the Transportation Act of 1967, in the Secretary of Transportation; and the Secretary, by appropriate orders and regulations, has delegated certain responsibility for operating the Railroad to its General Manager.

Section 1. Definitions

Labor Organizations: the term "labor organization" means any organization, union, or employee representation committee in which employees participate and which exists for the purpose, in whole or in part, of providing representation for members employed on the Railroad in dealing with the management officials on hours, conditions of employment, grievances, disputes and other matters pertinent to their employment. This term does not apply to employee welfare organizations, recreational associations, credit unions, or similar associations.

Representatives of Labor Organizations: This term includes those individuals, either employees or non-employees of the Department, who are accredited by the employees to represent their interests in relationships or dealings with management officials on matters relating to their employment.

Management Officials: This term includes those employees at all levels of the Railroad's organization, in both line and staff capacities, who have significant responsibilities in supervising, directing and managing program activities and administrative matters which involve decisions or actions affecting employee groups.

Basic Labor Agreement: This term refers to the written document negotiated by management officials and representatives of employees, which concerns itself primarily with matters of broad principle, policy, and procedure which will govern the relations of the parties thereto in the negotiation of working conditions, the settlement of disputes and grievances, and related matters.

Supplementary Labor Agreement: This term refers to the written agreement or series

of agreements which are negotiated and made effective betweeen management officials and representatives of employees within the purpose and in the implementation of the general policies and guidelines of a basic labor agreement.

They may not delete, modify or otherwise nullify any of the policies and procedures which have been incorporated in the Basic Labor Agreement.

Labor-Management Negotiations: This term is used interchangeably with the term "Collective bargaining".

Section 2. Compliance

2.1. It is recognized that in labor-management negotiations, and in the administering of all matters covered by this agreement, both the Railroad and the employees are governed by the provision of applicable federal laws and regulations.

2.2. If laws or regulations become effective, binding on the Railroad and inconsistent with the provisions of this agreement, the Railroad shall notify the representatives of the respective labor organizations. The labor organizations and the Railroad shall issue a joint statement of the change and its effect upon this agreement.

ection 3. Scope

his agreement is applicable to those mployees of the Railroad represented y the International Brotherhood of Blacksmiths, Boilermakers, Iron Shipbuilders nd Helpers, blue collar category as enumerated in the Handbook of Blue Collar Occuational Families and Series.

ection 4. Employee Rights to Labor Representation

1. Employees of the Railroad have the ght to form or join organizations and signate representatives of their own oosing, provided they do not form or in organizations which assert that ployees in the service of the United ates Government may strike or assist such strike, or which advocate the erthrow of the United States Governit by force or violence.

2. In the exercise of the right to m or join organizations and designate resentatives, employees shall be e from any and all restraint, interence or coercion on the part of agement, and the supervisory staff prohibited from exercising any such traint, interference or coercion. che same token the designation of

individuals and officers to represent the management of the Railroad for the purpose of this policy is entirely the responsibility of the General Manager.

4.3. The labor organization may be required to submit a copy of its bylaws, and the names of its officers and representatives, and to make known by whom it is chartered. The identity of individual members or the number of members is not required, except in the determination of representation rights.

4.4. This section does not authorize participation in the management of a labor organization or acting as a representative of such an organization, by a supervisor, or by an employee when the participation or activity would result in a conflict or apparent conflict of interest or otherwise be incompatible with law or with the official duties of the employee, nor shall a unit be established if it includes any management official or supervisor.

Section 5. Discrimination Prohibited

Appointments to the service of the Railroad are to be made strictly on the basis of merit and efficiency. No test of race, color, religious belief, or political affiliation, except as

prescribed by law, will be required of any employee, or considered in his appointment, promotion, demotion, transfer, retention in or termination of service with the Railroad, nor shall any employee of the Railroad nor anyone seeking employment be required to join or refrain from joining any duly accredited organization as a condition of appointment, promotion, demotion, transfer, retention in or termination of service.

Section 6. Determination of Bargaining Rights

6.1. The majority of the employees of any class or craft of the Railroad has the right to determine the organization which will represent the employees of such class or craft for the purposes indicated in the preamble.

6.2. In the initial determination of representation rights and in resolving disputes as to these rights, both employees and management are governed by the appropriate section of the Federal Personnel Manual as implemented by the Department of Transportation.

Section 7. Duty to Confer

7.1. If a craft or group of employees has properly designated an organization to represent them in accordance with the provisions of Section 6 above, the representatives of such craft or group shall so notify the General Manager, and the General Manager, the officers and supervisors of the Railroad will thereafter treat with such organizations and its officers for the purposes described in the preamble to this agreement.

7.2. Representatives of labor organizations or employees desiring to confer with management officials shall deal in the first instance with those Railroad officials who have primary responsibility over the case or subject matter which is the subject of conference.

7.3. Differences or disputes between an employee or group of employees and the Railroad, growing out of grievances or out of the interpretation or application of the terms of jointly promulgated schedules, having been handled by the employees or their representatives through established supervisory channels up to

and including the Branch Head concerned and the Personnel Officer, the General Manager will then call a conference. Conferences for the adjustment of such differences or disputes will be held whenever possible during the regular working hours, and when so held, labor organization representatives actually working will not lose pay, provided that the number of such representatives of the labor organizations concerned does not exceed two.

7.4. Conferences may be requested by the labor organization or the Railroad announcing their desire to revise the jointly promulgated agreements, and having given proper notice, the time and place for the beginning of such conferences will be announced. The time required by labor organization representatives in the employ of the Railroad when attending such conferences shall not be on official times when negotiating an agreement with agency management.

7.5. Leave as accrued may be granted to any other employee for attendance or observance of the above meetings, contingent on the availability of replacement personnel. In the interest of cooperation, in labor matters, the

Railroad will follow a liberal policy in allowing time off for such purposes, with reasonable limits and consistent with work requirements.

Section 8. Written Agreements

8.1. Working rules, in the determination of which employees, through accredited organizations, have participated - will be reduced to writing and will be promulgated as schedules over the joint signature of the General Manager and the officers of the organization or organizations representing the employees concerned. Such agreements shall be regarded as Supplmentary Agreements as defined in Section 1 of this agreement.

8.2. The Railroad and the labor organizations further agree that, pending the determination or adjustment of any issue arising between them by means of the conference machinery and procedures hereinafter provided, there will be no change in the conditions in any schedules or recorded understanding applicable to such issue.

8.3. The Railroad will not make unilateral changes in the terms of any labor agreement pending settlement of

outstanding differences through mutually agreeable procedures, except those that are dictated by over-riding Federal Law or Regulation.

Section 9. Scope of Negotiations

9.1. Management officials retain the right to direct employees in accomplishing the work of the agency; to hire, promote, transfer, assign, and retain employees in positions within the agency; to suspend, demote, discharge, or take other disciplinary action against employees; to relieve employees from duties because of lack of work or other legitimate reasons; to maintain the efficiency of the Government operations entrusted to them; to determine the methods, means, and personnel by which such operations are to be conducted; and to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

9.2. Negotiable Items. The Alaska Railroad management shall negotiate with the unions for the employees represented by the unions signatory hereto, for:

a. The establishment of craft working rules.
b. The establishment of grievance procedures and discussion of personnel policies and practices, or other matters affecting general working conditions.
c. NOTE: The wage fixing system applicable to the employees subject to this Basic Agreement will be set forth in Section 9.4.

9.3. All requests for negotiation conferences shall be in writing and specify the subjects for discussion and the times proposed for consideration. Conferences between the parties shall begin as promptly as practicable. Every effort will be made by the negotiators to agree.

9.4. Wage Fixing System. The wage fixing system applicable to Alaska Railroad blue collar employees represented by the International Brotherhood of Blacksmiths, Boilermakers, Iron Shipbuilders & Helpers, shall be the system currently followed for their wage board employees by Army-Air Force installations in the State of Alaska. As soon as a coordinated wage fixing policy is promulgated by the Civil Service Commission for the wage

board employees in Alaska, such Federal coordinated system shall be substituted for the Army-Air Force wage fixing system referred to above. Details as to the application of this system will be set forth in a supplementary agreement.

Section 10. Disputes and Grievance Procedures

10.1 The parties to this agreement recognize that the prompt and orderly settlement of disputes in a fair and reasonable manner is essential to good labor relations and to the efficient accomplishment of the purpose for which the Railroad exists. To this end officials of the Railroad and employees and their representatives will make every effort to resolve their disputes at the first level of management where the dispute originates.

10.2. Detailed procedures for the handling of grievances shall be included in supplementary labor agreements between the parties signatory hereto.

Section 11. Bulletin Boards and Distribution of Literature

Distribution of literature of a labor organization shall be permitted, provided the distribution is made by employees outside their regular working hours and does not interfere with the work assignments of other employees who may be on duty at the time. Notices posted by labor organizations on Government bulletin boards and literature distributed on Government property shall contain the name of the organization issuing or sponsoring it, and shall contain nothing that would imply official sponsorship or endorsement by the Railroad. The material must pertain specifically to the business of the labor organization and shall not contain statements which reflect on or attack the integrity or motives of individuals, other labor organizations, the Department of Transportation, the Railroad, or other governmental agencies, Federal or otherwise. Objective statements of opinion, favorable or unfavorable, about issues or subjects related to the employees' work and employment conditions are permitted. Canvassing or soliciting membership and collecting membership dues for a labor organization shall also be conducted outside regular working hours

of the employees canvassed and of the employees performing these activities. Non-employee canvassers may be required to give notice of their presence to the responsible management officer. There shall be no interference with the performance of official duty of employees during working hours.

Section 12. Labor-Management Cooperation

12.1. The parties to this agreement recognize that there are many areas of common interest to the management of the Railroad and to its employees which are important to the effective operation of the Railroad and to the welfare of employees which are not ordinarily included within the scope of collective bargaining agreements. Such areas of common interest include, but are not limited to:

a. Elimination of waste in operation and maintenance.
b. Conservation of materials, supplies, time, power and energy.
c. Improvements in quality of workmanship and services.

d. Correction of conditions making for grievances.
e. Health, safety, and morale standards.

12.2. In order to increase the area and effectiveness of labor-management cooperation, Joint Committees have been established prior to the making of this agreement, as follows:

Joint Union-Management Safety Committee
Alaska Railroad Medical Association and Excess Benefits Plan
Joint Labor-Management Committee

12.3. Employees serving on the welfare committees mentioned above and similar committees that may be established will be paid not to exceed a minimum day for their attendance if any time is lost. It shall be the duty of the parties to this agreement to further the work and effectiveness of these joint committees.

Section 13. Effective Date and Duration

13.1. This agreement shall remain in

full force and effect for one year from the date executed, and thereafter until the expiration of sixty (60) calendar days following the giving of written notice by either party to the other of its desire to terminate this agreement in its entirety or to effect changes herein by agreement.

13.2. By mutual consent of the parties, this agreement may be opened at any time for amendment. Also, modification or amendment of this agreement may be required because of changes in applicable laws, rules, regulations or policies issued after the date of this agreement.

13.3. The Basic Labor Agreement between the International Brotherhood of Blacksmiths, Boilermakers, Iron Shipbuilders & Helpers and The Alaska Railroad dated April 15, 1968, and which was negotiated under authority of Executive Order 10988, is hereby supplemented for compatibility with the new Executive Order 11491, relative to Labor Management relations effective January 1, 1970.

U. S. Dept. of Labor
Washington, D. C.

Assisted by the

BUREAU OF APPRENTICESHIP AND TRAINING
U. S. Dept. of Labor
Room 46, Federal Bldg.
Anchorage, Alaska

OBJECTIVE

The purpose of apprentice training is to encourage a more careful selection of men coming into the trade; to train apprentices now in the trade; to assist in providing training that will equip them for profitable employment and citizenship; and to further the assurance to the employer of the most proficient workmen to the end that the public may receive the best possible workmanship.

1. DEFINITIONS:

a) The term "Committee" shall mean the Joint Apprenticeship and Training Committee, as set up in these apprenticeship standards.

b) The term "Employer" shall mean The Alaska Railroad, Department of Transportation, Federal Railroad Administration.

c) The term "Union" shall mean the local union signatory to these apprenticeship standards.

d) The term "Registration Agency" shall mean the Bureau of Apprenticeship and Training, U. S. Department of Labor.

e) The term "Apprenticeship Agreement" shall mean a written agreement between the Committee and a person employed as an apprentice, which agreement shall be registered by the Registration Agency.

f) The term "Apprentice" shall mean a person who has signed an Apprenticeship Agreement with the Committee to learn a trade, as outlined in these apprenticeship standards.

g) The term "General Supervisor of Apprenticeship" shall mean a person appointed by the Committee to carry out the program under its direction.

h) The term "Supervisor of Apprentices" shall mean a person appointed by the individual employer to direct apprenticeship training in or on a specific establishment or job. He shall be subject to approval of the Committee.

i) The term "Apprenticeship Standards" shall mean this entire document, including these definitions.

II. JOINT APPRENTICESHIP AND TRAINING COMMITTEE:

The Committee shall be composed of three members representing employers, and three members representing Labor. Labor and Management shall be equal in all cases.

Members of the Committee shall be selected by the groups they represent. The term of office shall be for three years or less -- the term of one employer and one journeyman to expire each year. The first appointments by each group will be designated for one, two, or three years.

III. SELECTION PROCEDURES:

Selection of apprentices under the program shall be made from qualified applicants on the basis of qualifications alone and without regard to race, creed, color, national origin, sex, or occupationally irrelevant physical requirements in accordance with objective standards which permit review, after full and fair opportunity for application, and this program shall be operated on a completely nondiscriminatory basis. Apprentices will be carefully selected from applicants between 18 and 28

years of age whose background, education, personality, and physical conditions indicate that they are suitable candidates.

Information regarding apprenticeship openings and requirements shall be furnished to the local state employment service and to the local schools.

Such information will also be posted at the program sponsor's normal place of application for apprenticeship. Applications of responding candidates will be recorded. Those meeting the basic qualifications such as age, residence, education, and physical condition will be referred to the apprenticeship committee.

The recruitment, selection, employment, and training of apprentices during their apprenticeship, shall be without discrimination because of race, color, religion, national origin, equal opportunity in apprenticeship and will operate the apprenticeship program as required under Title 29 of the Code of Federal Regulations, Part 30.

The local state employment service will supply the aptitude testing and grading. Such test measures general intelligence, manual dexterity, hand/eye coordination, perception, finger dexterity, and numerical and verbal comprehension.

Applicants who qualify in the aptitude tests will be interviewed by the program sponsor or his designated representative. The interview shall cover such factors as educational record, attitude towards work and apprenticeship, sense of responsibility, previous work experience, whether related or unrelated to the trade, reasons for interest in the trade, hobbies, and physical factors.

Qualified applicants will be rated numerically on the basis of the following factors:

		Maximum
1.	Aptitude test results (If actual scores are used, rank in relation to minimum qualifying score.)	25
2.	Educational background (High school diploma or certificate of equivalency) (Subjects studied pertinent to the trade or grades attained.)	15
3.	Reference and conduct record	10

4. Interview (personal impression of interest, sincerity, and adaptability to the trade.) 25

5. Previous working experience (related and unrelated.) 25

Selection of qualified applicants shall be in descending order of ranking. Records of the selection process shall be retained for a period of two (2) years.

IV. TERM OF APPRENTICESHIP:

Apprentices will serve a minimum term of four consecutive years (approximately 8,000 hours) of reasonably continuous employment during such term, and include the probationary period and the required hours of supplemental school instruction. (Exception: Helpers with two (2) years helper experience shall be eligible for indenturing as helper apprentice of a respective craft, ability to govern in all cases, for a period of three (3) years.)

V. RELATED INSTRUCTION:

International Correspondence School and Railway Education Bureau Courses will be substituted for related classroom instruction.

No apprentice will be allowed to work overtime when such work will interfere with the related instruction course. In case of failure of any apprentice to fulfill his obligations as to school attendance and conduct, without due cause, the local Joint Apprenticeship and Training Committee shall take necessary disciplinary action.

VI. SUPERVISION OF APPRENTICES:

The Alaska Railroad shall designate a particular person, who may be the Superintendent, Foreman, or Journeyman, to be responsible for the training of apprentices. He shall, with the advice and assistance of the local joint apprenticeship and training committee, be responsible for the apprentices' work experience on the job, for their attendance at related classes, and the recording of same on record forms provided for this purpose.

VII. RATIO OF APPRENTICES TO JOURNEYMEN:

The ratio shall be 1 apprentice to each 5 journeymen.

VIII. ACCIDENT PREVENTION:

Each apprentice shall be provided with initial indoctrination and instruction in

order to enable him to perform his work in a safe manner. Such instruction shall be coordinated with the actual work being performed on the job and the tools and equipment being used.

Initial indoctrination shall include instructions relative to pertinent company safety regulations, reporting of accidents, and availability of first aid and medical facilities.

The employer shall at all times exercise reasonable precautions for the health and safety of the apprentices engaged in the performance of the work hereinafter described as "Work Processes" . . .so far as possible. He shall comply with all applicable provisions of Federal, state and municipal safety, health, and sanitation statutes and codes.

In addition, as an integral part of this training program, the apprentice supervisor and/or instructor shall provide such training and instruction pertaining to safe work habits to insure that the apprentice will be protected against avoidable accidents. Also, that they understand the methods necessary to properly perform all phases of the work in a safe manner.

IX. PROBATIONARY PERIOD

Apprentices will be subject to the probationary period applicable to Federal employment. During this probationary period, annulment of the Apprenticeship Agreement will be made by the Committee upon request of any of the parties concerned. After the probationary period the Committee may cancel the Apprenticeship Agreement for just cause, but due notice shall be given the Registration Agency of such action. The Apprenticeship Agreement may also be canceled if the apprentice fails to fulfill his obligations as to the related instruction courses.

X. ADJUSTING DIFFERENCES:

In accordance with the present working agreement, the railroad and the apprentice shall have the right and privilege of appeal to the local joint apprenticeship and training committee in the event of disputes and controversies arising over any provision of the local apprenticeship standards which cannot be satisfactorily settled between them. The local committee shall hear all the parties and make such adjustments as it may consider necessary.

XI. WORK EXPERIENCE:

During his apprenticeship, the apprentice shall be taught the use, care, and effective and safe handling of all tools and equipment commonly used in the trade. He shall be given work experience and training in all branches of his trade considered necessary to develop a skilled and productive worker.

Rip track, air cleaning, installation and repairs . .	6 Months
Carpenter shop, machine and bench work	6 Months
Electric and acetylene welding	6 Months
TOTAL	4 Years

XII. WAGE SCHEDULE:

The wage rate paid apprentices and journeymen shall be that which is negotiated by The Alaska Railroad officials and the local unions involved. This wage schedule shall be kept current by a supplement attached to the standards.

XIII. PERIODIC EXAMINATION:

An examination of apprentices as to their progress in learning the trade may be given at such times as determined by the committee. In these examinations, consideration shall be given to the related instruction, as well as to the daily employment records of the apprentices.

XIV. EMPLOYMENT RECORDS OF APPRENTICES:

Records of the progress of all apprentices in the trade processes enumerated in the work processes will be maintained by The Alaska Railroad, and shall be made available to the Bureau of Apprenticeship and Training upon request.

XV. JOINT MANAGEMENT-LABOR APPRENTICESHIP COMMITTEE:

The Alaska Railroad agrees that a joint management-labor apprenticeship

committee will be established as recommended by the Bureau of Apprenticeship and Training.

XVI. CERTIFICATE OF COMPLETION OF APPRENTICESHIP:

Apprentices who complete their apprenticeship, and make passing grades on the ICS and REB courses shall be awarded a certificate by The Alaska Railroad. Certificates of Completion are also available from the registration agency for all apprentices completing their apprenticeship under registered standards.

XVII. MODIFICATION OF STANDARDS:

These standards shall automatically be amended to conform with any changes in subsequent bargaining agreements, and none of these provisions shall be construed contrary to the present, or subsequent, bargaining agreements. These standards may be modified subject to the approval of management and labor participants in the program and the Bureau of Apprenticeship and Training, U. S. Department of Labor.

All changes and modifications made as provided shall automatically become a part of apprenticeship agreements in effect at the time of the change.

XVIII. OFFICIAL APPROVAL:

These standards of apprenticeship and all modifications shall be approved officially by formal action of the respective employer-employee organizations and the registration agency. Original Standards of Apprenticeship approved and accepted July 20, 1965, and amendments thereto incorporated October 14, 1971.

UNITED STATES
DEPARTMENT OF TRANSPORTATION
FEDERAL RAILROAD ADMINISTRATION
The Alaska Railroad

Schedule of pay, rules and regulations governing Carmen, Carmen Helpers, Apprentices and Coach Cleaners

This AGREEMENT is made between THE ALASKA RAILROAD, Anchorage, Alaska, hereafter referred to as "Management" and the Brotherhood Railway Carmen of the United States and Canada, hereafter referred to as the "Union".

The participants agree as follows:

It is the intent and purpose of the participants to promote and improve the efficient administration of the Federal Service, to promote the well being of employees within the framework of Executive Order 11491, to establish a basic understanding relative to personnel policies, practices, and other matters affecting conditions of employment, and to provide a means for amicable discussion and adjustment of matters of mutual interest.

ARTICLE I

RECOGNITION AND UNIT DESIGNATION

Section 1. This Agreement is subject to the limitation on the discretionary powers of the Management Official of The Alaska Railroad over the area negotiated and it is applicable to the units for which the Union has been granted exclusive recognition.

Section 2. Management recognizes that the Union is the exclusive representative of all non-supervisory blue collar employees in the bargaining unit or units. The Union recognizes the responsibility of representing the interests of all such employees by the provisions of this agreement.

Section 3. Other units which are granted exclusive recognition may be covered by this agreement when mutually agreed upon by Management and the Union and placed in written form.

ARTICLE II

RESPONSIBILITIES AND RIGHTS OF MANAGEMENT

Section 1. The right to make

reasonable rules and regulations are considered acknowledged functions of Management. In making rules and regulations relating to personnel policies, and practices and procedures, and matters of working conditions, Management shall give due regard and consideration to the rights of the Union and the employees and to the obligations imposed by this Agreement and the provisions of Executive Order 11491; however, such obligation and regard shall not be construed to extend to such areas of discretion and policy as the functions or mission, the budget, organization, assignment of personnel, the technology of performing work, or matters pertaining to the National Security.

Section 2. Management shall maintain a continuing program for the placement of handicapped employees, or those employees temporarily limited to light duty and who cannot be utilized in their primary assignment. It is recognized that in some instances a brief period of indoctrination may be required. Special consideration will also be given to the assignment of reserved parking spaces for use by handicapped employees depending upon the degree and nature of the handicap, availability, and nature of assignment.

ARTICLE III

RIGHTS OF THE EMPLOYEES

Section 1. Management and the Union agree that employees shall have, and shall be protected in the exercise of the right, freely and without fear of penalty or reprisal, to form, join and assist any employee organization or to refrain from any such activity. Except as expressly provided here and in Executive Order 11491, the freedom of such employees to assist any Union organization shall be recognized as extending to participation in the Union and acting for the Union in the capacity of a Union Representative, including presentation of Union views to officials of the Executive Branch, Congress, or other appropriate authority. Management shall take such action, consistent with law or with directives from higher authority, as may be required in order to assure that employees are apprised of the rights described in this Article, and that no interference, restraint, coercion or discrimination is practiced to discourage membership in Union organization.

Section 2. Any employee covered by the provisions of this Agreement and during the period he is on the payroll of Management, shall not forfeit any benefits of this Agreement while on detail or assignment to another Activity or Division including off-site or satellite facilities for which Management has been delegated responsibility. Excludes assignment or promotion to Supervisory positions.

Section 3. Employees shall have access to their respective personnel file and the personnel file shall contain a job description stating the work performed by the employee.

Section 4. Employees covered by this Agreement and those dependent upon them for support will be given the same consideration in granting free transportation as is granted other non-operating employees in service.

ARTICLE IV

PROVISIONS OF LAW AND REGULATION

Section 1. It is agreed by Management and the Union that nothing in this Agreement shall be so interpreted as

to conflict with provisions of any existing or future law or regulation of the Federal Government. This includes, but is not restricted to, those rules and regulations issued by the Civil Service Commission and the Department of Transportation.

Section 2. Management agrees to furnish the Union with two copies of any directives from higher Headquarters which affect employees or which alter Management's discretionary authority with regard to any item dealt with in this Agreement before implementing same. When such directives are not readily available Management agrees to requisition the two copies for the Union.

ARTICLE V

APPROPRIATE MATTERS

Section 1. It is agreed and understood that matters appropriate for negotiation in this Agreement, or for consultation between the parties are policies, programs and procedures related to working conditions which are within the discretion of Management, including but not limited to such matters as safety, training, labor-

management cooperation, employee services, methods of adjusting grievances, appeals, leave, promotion plans, demotion practices, pay practices, reduction in force practices, and hours of work.

Section 2. Management agrees that the Union will be notified before changes are made to existing benefits, practices, and understandings which have been authorized by Management but which are not specifically covered by this Agreement.

Section 3. Management agrees that all privileges and benefits extended within the limits of its discretionary power will be applied fairly and equitably to all employees in the unit. Management agrees to consult with the Union concerning alleged inequities in this connection.

Section 4. It is further recognized that this Agreement does not alleviate the responsibility of either party to meet with the other to discuss and consult on matters not covered by this Agreement, which come within the scope

of consultation and negotiation. It is further agreed and understood that the Management will consult with the Union before issuing any official directives which adversely affect the general working conditions covering the employees within the bargaining unit but which are not specifically covered by this Agreement.

ARTICLE VI

UNION REPRESENTATION

Section 1. Management recognizes the Union as the exclusive collective bargaining agent for all employees covered by this Agreement. Management further recognizes the right of the Union to designate Shop Stewards and Union Representatives from among the employees of the unit. Management agrees to recognize the Shop Stewards and Representatives designated by the Union.

Section 2. The number of Stewards and Representatives shall be only that

number required to assure each employee of the unit ready access to a Steward in his work location. The designated number of stewards shall also be sufficient to assure that the Union can properly carry out its responsibilities under the terms of this Agreement. For the purposes outlined in Sections 1 and 2 of this Article, the Union agrees to supply Management in writing, and shall maintain with Management on a current basis, a complete list of all Union authorized Representatives, Stewards and any alternates.

Section 3. Management agrees to recognize the officers and duly designated representatives of the Union and shall be advised in writing by the Union of the names of its officers and representatives.

Section 4. An employee who alleges and feels that he has a grievance or complaint shall be, upon request to his supervisor, allowed time to report his grievance or complaint to the Shop Steward, and when a pending grievance is reported to the Shop Steward or Representative, that Steward or Representative shall be allowed the time necessary to investigate the reported grievance. This investigative procedure

may require discussions with employee(s) within the bargaining unit or outside and representatives of Management (supervision) responsibilities or in some cases all three, in order to evaluate the facts and carry out the Union's responsibility under the terms of this Agreement.

Section 5. Management agrees that Stewards, Union officers, representatives and employees shall be allowed to leave their assigned areas to go to other departments, shops or offices when it is necessary to do so in order to accomplish the purposes outlined in Section 4 above, and in order to bring about a prompt and expedious disposition of a complaint or grievance. It is further agreed that such activity shall be engaged in without any loss in pay or benefits to the employees authorized to act in behalf of the bargaining agent under the terms of this Agreement or to the employees contacted. Permission, in these instances, will be granted unless the individuals work situation precludes such action. In any event, approval will be granted at the earliest opportunity.

Section 6. Management agrees that any representative of the Brotherhood Railway Carmen of the United States and Canada, or Local Lodge, upon request to Management shall be allowed into the activity at reasonable times on official Union business.

Section 7. Administrative leave may be granted to an employee Union representative to receive training, information, briefing and orientation on matters within the scope of Executive Order 11491--including statutory or regulatory provisions relating to pay, working conditions, work schedules, employee grievance procedures, performance rating, adverse action appeals and agency policy.

ARTICLE VII

HOURS OF WORK AND BASIC WORK WEEK

Section 1. Eight (8) hours shall constitute a normal work day. The normal basic work week shall be Monday

through Friday. When one shift is employed, the starting time shall not be earlier than 7:00 a.m., or later than 8:00 a.m., except at outlying points. When two (2) shifts are employed, the starting time of the first shift shall not be earlier than 7:00 a.m., or later than 8:00 a.m., and the second shift shall start immediately following the close of the first shift. When three (3) shifts are employed, the starting time of the first shift shall not be earlier than 7:00 a.m. or later than 8:00 a.m., and the starting time of the other shifts shall be regulated accordingly.

Section 2. Assignments may be made for eight (8) hours excluding an assigned meal period which shall not be less than thirty (30) minutes or more than one (1) hour; except such assignments may be made to consist of eight (8) consecutive hours including an allowance for lunch on the job site.

Section 3. Where three (3) assignments performing the same service are coupled in continuous service covering the twenty-four hour period, each such

continuous service assignment shall consist of eight (8) consecutive hours including the allowance for lunch on the job site and lunch time shall be twenty (20) minutes between the fourth and fifth hour.

Section 4. Management agrees not to change the normal basic work week of Monday through Friday of any employee except in those cases where a regular tour of duty would seriously handicap the performance of a function or would result in substantially increased cost. It is recognized that functions of The Alaska Railroad operate on a seven-day work basis and that certain five-day work weeks will involve work on Saturday and Sunday. In those cases when a change in the normal work week is necessary, Management shall consult with the Union in determining which specific jobs fall within the category for which a re-arranged basic work week of other than Monday through Friday is appropriate. In no case shall an employee be required to work in excess of five (5) eight (8) hour consecutive days without payment of overtime.

Section 5. Where it is necessary to close the installation or an activity therein and administrative excused leave is granted because of inclement weather, breakdown of equipment, or other emergency "Act of God" situations, employees who report for work shall be given administrative excused leave for the period of the emergency situation.

Section 6. Management will permit adequate wash-up time before each lunch period, and adequate clean-up time at the end of each shift for the purpose of returning tools, cleaning the work area and machinery as necessary, and in each instance, wash-up time will not exceed five minutes on a straight time basis. No employee shall be required to remain after the end of his shift, without compensation, for the purpose of cleaning his designated area.

Section 7. Eight (8) hours of service will constitute a day's work. All employees coming under the provisions of this agreement, except as otherwise provided in this schedule of rules,

or as may hereafter be legally established between the Railroad and employees, shall be paid in accordance with the present wage schedule and supplements thereto.

Section 8. At terminals where one shift only is worked, working conditions may be established to meet local conditions, providing however, that the eight (8) hours of said shift may be worked within a spread of not more than ten (10) hours with but one interval of release of not less than two (2) hours.

Section 9. An employee required to work any part of the meal period will be allowed time therefor on the minute basis at rate of time and one-half. In the event there is not sufficient time remaining within the limits of the meal period in which to procure lunch (not less than twenty (20) minutes), employee will be allowed not to exceed twenty (20) minutes including any time remaining within the meal period in which to eat, without deduction therefor.

This does not apply to employees who are assigned to eight (8) consecutive hours without meal period and who are allowed twenty (20) minutes in which to eat without deduction of pay.

Section 10. At small outlying points where the service is intermittent, not requiring continuous application, assignment may be made for employees to work eight (8) hours within a spread of ten (10) consecutive hours with but one interval of not less than two (2) hours of release. Time actually worked in excess of eight (8) hours will be paid for at the rate of time and one-half.

Section 11. Not less than five (5) working days (exclusive of Sunday and holidays) notice will be given before hours or forces are reduced.

ARTICLE VIII

EMERGENCY ROAD AND WRECKING SERVICE

Section 1. An employee regularly assigned to work at a shop, engine house, repair track, or inspection point, when called for emergency work or road work away from such shop, engine house, repair track, or inspection point, will be paid from the time called to leave home station, until his return for all time worked in accordance with practice at home station and will be paid straight time rates for traveling or waiting, except assigned rest days and holidays,

which will be paid for at the rate of time and one-half, whether waiting, working or traveling. If, during the time on the road, a man is relieved from duty and permitted to go to bed for five (5) hours or more, such relief time will not be paid for, provided that in no case shall he be paid for a total of less than eight (8) hours each calendar day, when such irregular service prevents the employee from making his regular daily hours at home station. Where meals and lodging are not provided by the Railroad, travel expenses in accordance with the current Standard Government Travel Regulations will be allowed. Employees will be called as nearly as possible one (1) hour before leaving time, and on their return will deliver tools at point designated. A wrecking service employee will be paid under this rule, except that all time working, waiting or traveling on week days after the recognized straight time hours at home station and all time working, waiting or traveling on assigned rest days and holidays will be paid for at the rate of time and one-half.*

*Payments under this Article subject to Article XXIX, Section 4.

Section 2. Wrecking crews will be composed of regularly assigned carmen, crane engineers, cooks, and helpers, and will be paid for such service in accordance with provisions of this Article.

Section 3. When called for wrecks or derailments outside of yard limits the regularly assigned crew will accompany the outfit; for wrecks or derailments within yard limits, sufficient number of carmen will be furnished to perform the work.

Section 4. For derailments within yards, where carmen are employed, when rerailing can be done by the use of frogs, wedges, and/or blocking, and it is necesssary to call men to assist the trainmen and such call would result in overtime payment to the men called, carmen will be called. If carmen are not called, they will be paid an overtime call of two (2) hours and forty (40) minutes on a man-to-man basis.

Section 5. Where needed, men of any class may be taken to assist members of the wrecking crew.

ARTICLE IX

OVERTIME

Section 1. An employee shall receive at least two (2) hours and forty (40) minutes pay at the applicable overtime rate if required to work overtime on a regular work day after he has completed his daily tour and has left his place of employment or on one of his scheduled non-workdays, even if his services cannot be utilized for two (2) hours and forty (40) minutes and shall exclude dead work. Management will endeavor to notify all employees who are to work overtime one day prior to the overtime period. Each employee is expected to work a reasonable amount of overtime when operating requirements necessitate. When it becomes necessary for employees to work overtime they shall not be laid off during regular working hours solely for the purpose of equalizing the time. An employee may be excused from overtime for valid reasons or excused from overtime if an equally qualified employee is willing to work.

Section 2. All overtime shall be compensated for at time and one-half (1-1/2) the employee's regular hourly rate, including all shift premiums and other payments regarded by the employee as part of his regular hourly compensation. Such overtime rates shall be paid for all hours worked over forty (40) hours per week and for all hours worked over eight (8) hours per day.

Section 3. In the event of a situation requiring the extension of a regular work shift into more than a two (2) hour overtime period, time for lunch will be permitted on the work site. Management will make the necessary arrangements that food will be made available for the employees involved.

Section 4. Overtime assignments will be made from a rotary board on a "first in-first out" basis. Such a board will be set up to cover each seniority list in each shop. Employees will be accorded right of refusal to an overtime call unless his skill is specially needed for that call. An exception may be made to select an employee out of rotation if his special skill is required to perform a spectal assignment.

Section 5. Except in the case of an emergency, Management agrees not to work an employee in an overtime status beyond two (2) consecutive days or days of rest against his wishes.

Section 6. An employee regularly assigned to work at a shop, engine house, repair track or inspection point, and who reports out and in of said point within twenty-four (24) hours shall receive time and one-half hours in excess of eight in any twenty-four hour period involved.

Section 7. An employee required to come on duty in advance of his regular starting time will be allowed time and one-half on the minute basis with a minimum time allowance of forty (40) minutes at the overtime rate for such service, the advance period to be not more than one (1) hour. If called more than one (1) hour in advance of regular starting time, paragraph (c) will apply.*

*Payments under this Article subject to Article XXIX, Section 4.

ARTICLE X

HOLIDAY WORK

Section 1. Federal regulations applicable to Federal Holidays shall apply. Employees shall be excused for all holidays now prescribed by law and any that may be later added by law and all holidays designated by Executive Order shall be observed as regular holidays. If a holiday falls on the employee's first rest day within the normal work week, the preceding day shall be treated as the holiday for leave and pay purposes and if the holiday falls on the employee's second rest day, the following day shall be treated as the holiday for leave and pay purposes. All hours worked within the hours of the assignment, shall be paid at the regular basic rate of compensation for the day. When possible, Management will notify all employees who are to work on a holiday five (5) days prior to the holiday to be worked; a list of employees expected to work on a holiday shall be posted in their work area at least five (5) work days in advance of such holiday.

Section 2. Management agrees that employees will not be scheduled to work on a holiday; prescribed by Federal Law or Executive Order, solely to avoid overtime work that otherwise would be performed on a day outside the basic work week.

ARTICLE XI

SICK LEAVE

Section 1. Sick leave shall be granted employees when they are incapacitated for the performance of their duties by sickness, injury, or for medical, dental, or optical examination or treatment, or when a member of the immediate family of the employee is afflicted with a contagious disease.

Section 2. An employee who is absent on account of sickness shall notify his superiors or other appropriate person prior to the start of their shift on the first workday of his absence, or as soon thereafter as possible. Second and third shift employees shall notify their department or shop prior to the start of their shift or as soon thereafter as

possible. Requests for sick leave for medical, dental, or optical examination or treatment shall be submitted for approval prior to the beginning of the leave, except in the case of emergencies.

Section 3. A medical certificate for absence of three (3) workdays or less will not be required, except where there is reason to believe the employee is abusing sick leave privileges. In such cases the employee will be verbally advised that the sick leave privilege is being abused. When there is no improvement the employee will be advised, in writing, that he will be required to submit a medical certificate for each subsequent absence for illness. Medical certificates will not be required for holidays or days outside the employee's workweek. It is further agreed that Management and the employee will review the sick leave record of each employee required to furnish a medical certificate periodically, and where such review reveals no substantial evidence that the employee has abused sick leave privileges during the review period, the employee will be notified in writing that a medical certificate will no longer be required for each absence which is claimed as

due to illness for periods of three (3) workdays or less unless an abuse recurs.

Section 4. An employee sent home by the Chief Medical Officer will be provided transportation by Management in those cases where the Medical Officer determines such transportation is necessary.

Section 5. When an employee is assigned a temporary restricted work classificati[illegible], as determined by the Medical Offi[illegible], Management will make every effort to place the employee on a job, if available, within the prescribed restrictions.

Section 6. Management agrees to advance sick leave in accordance with applicable regulations to permanent employees, not to exceed thirty days when there is reason to believe the advanced sick leave will be earned after return to work.

ARTICLE XII

ANNUAL LEAVE

Section 1. Annual leave is

afforded by law. Employees shall accrue leave in accordance with regulations. Approval of an employee's request for annual leave will be granted when his request is submitted with reasonable advance notice. Approval of requests for annual leave for unforeseen reasons will be considered as the circumstances warrant.

Section 2. Every attempt consistent with the workload will be made to satisfy the desires of the employees with respect to the approving of extended annual leave for vacations. When Management finds it necessary to cancel previously approved leave, the reasons for such action will be explained to the affected employee(s).

Section 3. Applications for specific days of annual leave for vacation purposes will be granted on a seniority basis and in the event of a coinciding request date the senior employee of the affected area of The Alaska Railroad shall receive preference. Filing date for vacation leave shall be February 1 of each year.

ARTICLE XIII

LEAVE OF ABSENCE

Section 1. A reasonable number of employees may be granted annual leave, leave without pay, to accept temporary Union positions or to attend conventions or meetings of the Union as defined in Executive Order 11491. Employees may be granted leave of absence with or without pay for other purposes.

Section 2. Management agrees to grant upon request of the Union, leave without pay for employees to act as full-time representatives for the Union.

Section 3. Management recognizes the obligation to provide employment at the end of the extended leave without pay granted for employees as full time Union representatives within the rating the employee held upon his request for leave and in the current pay status of such rating at the time the employee returns to work, also recognizing the bumping and retreating rights of an employee on approved leave of absence without pay in situations where the employee's status has been affected by reduction in force action during the period of leave of absence.

Section 4. All employees in approved leave of absence without pay status shall accrue all rights and privileges in respect to retirement status and coverage under the Group Life Insurance and Federal Employees Health Benefits Program in accordance with current law and regulations.

Section 5. Each Reservist of the Armed Forces or member of the National Guard who is a permanent employee is entitled to leave of absence from his duties without loss of pay or seniority for not exceeding fifteen (15) calendar days in any calendar year in which he has been called to active duty.

Section 6. Employees shall not be granted leave of absence without pay for the purpose of accepting outside employment unless given written permission prior to leave jointly by the Management and the Union. Employees giving false reasons for the purpose of obtaining leave will be subject to discipline.

Section 7. An employee on leave or temporarily absent from his assignment for any cause, must notify his

foreman of his return thereto, at least one hour prior to the quitting time of his assignment on the working day next preceding his return, except in the case of sick leave.

Section 8. Duly accredited representatives of the employees and other employees employed exclusively by the organization shall be considered as in the service of the Carrier and may return to their former position or exercise seniority within thirty (30) calendar days after release from such employment.

Section 9. An employee unavoidably detained from work will not be discriminated against. Unless prior notice of expected absence has been given, notice to foreman must be given as quickly as possible, and failure to do so, or habitual absence from work without a good cause will be considered cause for discipline.

ARTICLE XIV

MERIT PROMOTION

Section 1. The Employer will

utilize employees' skills and potentials to the fullest extent practicable. Employees will be promoted on the basis of merit without regard to race, color, religion, sex, age, or membership or nonmembership in employee organizations. The over-all objective of the merit promotion program is to assure that positions are filled with the best qualified persons available and to assure that all employees have an equal opportunity to apply for advancement.

Section 2. The Union recognizes that the Employer has the option of filling positions by repromotion, or by methods other than promotion such as appointment, reinstatement, reassignment, or transfer provided the person selected is in the best qualified group using the same qualification standards as for evaluating applicants for promotion. Management agrees that whenever possible to utilize existing employees from within the activity to fill vacant positions when qualified employees are available.

Section 3. All Alaska Railroad merit promotion program opportunities will be advertised through issuance of

announcements within the area of consideration on all Official Bulletin Boards. Announcements will be open for at least ten working days when advertising is confined to the Alaska Railroad.

Section 4. The Alaska Railroad will normally be the minimum area of consideration. If an announcement fails to provide a sufficient number of highly qualified candidates the area will be expanded. The Union will be notified in advance of expansions of areas of consideration and upon request the Employer will consider the Unions views concerning the necessity for such expansions.

Section 5. Upon request, each applicant will be told whether he was eligible for promotion on the basis of minimum qualification requirements, whether he was in the group from which selection was made, who was selected for promotion, and in what areas he should improve himself to increase his chances for promotion.

Section 6. In accordance with Civil Service Commission directives, qualification standards for promotion

are those prescribed in Commission Handbook X-118C for ungraded positions as supplemented by Department of Transportation directives. These standards prescribe elements for each occupational area and level of the occupation. In accordance with the Federal Personnel Manual the following consideration may be used in evaluating these job elements.

a. Written Tests. Appropriate validated written tests which are either required or approved by the Civil Service Commission may be used. Written tests may not be used as the sole means of evaluating candidates; they may be used as only one part of the evaluation process with due weight given to the appropriate factors.

b. Appraisals of Performance. Appraisals of performance must be considered as one factor in evaluation of basically eligible candidates. When an employee has worked for a particular supervisor for less than six (6) months, a second, foreman (leadingman) supervisory appraisal will be obtained. An employee is entitled to see, upon his request, any production record or any supervisory appraisal of past performance used in considering him for

promotion. An employee, however, is not entitled to see a supervisory report on potential which is a recorded judgment of the supervisor's estimate or prediction of how well the employee is likely to perform at a level or in a kind of work different from one in which he has alread performed.

c. Experience. In evaluating experience the type and quality of experience is considered in relation to the requirements of the position to be filled Length of service or length of experience is evaluated when there is a clear and positive relationship with quality of performance and for breaking ties.

d. Awards. Due weight will be given awards received by employees in terms of qualifications indicated such as initiative, resourcefulness and planning ability and their bearing on the requirements of the position to be filled.

e. Training and Self-Development. Training and self-development which would increase the employee's potential for

effective performance in the position to be filled must be considered.

Section 7. Employees selected for promotion will be notified promptly of their selection and released from their former positions as soon as practicable, normally with two weeks' notice. An employee will be paid at the pay level of the position for which selected, starting with the effective date of promotion, in accordance with applicable regulations.

Section 8. Questions or complaints about the promotion program should be resolved informally if possible with immediate supervisors and the Personnel Officer. The formal means for resolving complaints is then through the grievance procedure.

Section 9. When practicable the duties of a supervisor who is absent for a time less than thirty (30) days will be assumed by another supervisor. When this is not practicable, a qualified employee will be assigned as acting supervisor. When an employee is so assigned for a period of thirty (30) days or more, a temporary promotion will be made under applicable rules and regulations.

Section 10. When a vacancy occurs, a Certificate of Eligibles will be forwarded to the Selecting Official containing the names of the best qualified applicants and shall be grouped alphabetically and the certificate shall state that the names are not listed relative to qualifications. The Selecting Official may interview candidates on the Certificate of Eligibles. If one (1) candidate is interviewed all candidates will be interviewed if available.

Section 11. Merit promotion announcements will show the job requirements for which an applicant's qualifications are evaluated in terms of the skills, knowledge, abilities, and potential needed to perform the job for which the applicant is being considered. Merit promotion announcements shall not contain any or restrictive clauses that tend to favor one employee or a group of employees for a particular position.

Section 12. A merit promotion opportunities announcement may not be modified after the promotion process is under way unless an inappropriate

announcement has been released. Modified announcements will be in accordance with Section 3 of this Article and all employees eligible under the modified announcement shall be considered for promotion.

Section 13. The Employer agrees to consult with the Union on any revisions or amendments to the Merit Promotion Plan.

ARTICLE XV

REPROMOTION

Section 1. Any employee demoted without cause will be advised in writing of his entitlement to special consideration for repromotion.

Section 2. Any employee demoted without cause must be considered for repromotion before other means are used to fill a position. Although he is not guaranteed repromotion he should be repromoted as an exception to competitive procedures if he is well qualified for the position unless there are persuasive reasons for not doing so.

ARTICLE XVI

DEADHEADING

Section 1. Regularly assigned employees ordered by the Management to deadhead outside of assigned hours to or from a point to perform service shall be paid actual travel time at straight time rates not less than eight (8) hours per day. Travel in excess of eight (8) hours per day will be paid as travel time at straight time rates, and will not be counted against the basic work week of forty (40) hours. Where meals and lodging are not furnished by the Carrier, travel expenses will be allowed in accordance with Standard Government Travel Regulations. Positions requiring travel as a regular part of their assigned duties will not be paid travel time in excess of their assigned hours.

ARTICLE XVII

PERSONNEL MOVEMENTS IN
RIF SITUATIONS AND REHIRING

Section 1. It is agreed that all

possible action will be taken to avoid or minimize the impact of a reduction-in-force prior to separating employees. Such action will include restricting recruitment, meeting ceiling limitations through attrition, reassigning employees in surplus positions and terminating limited appointments.

Section 2. Management agrees to notify the Union of the necessity for reduction-in-force as far in advance as practicable and of the reasons therefor. Management also agrees to inform the Union of the affected competitive levels and the number of employees affected, when this information is available.

Section 3. It is agreed that Management, to the extent consistent with the installation's manpower requirements, will make an effort to reassign employees whose positions are eliminated because of automation or adoption of labor saving devices. It is agreed that management will make practical effort to train employees, when necessary for reassignment, whose positions are eliminated because automation or adoption of labor saving devices.

ARTICLE XVIII

REVIEWS OR JOB DESCRIPTIONS AND REQUIREMENTS

Section 1. The activity program for determining the ratings of positions of employees in tha unit is conducted in accordance with the applicable Department of Transportation regulations. To assure that ratings are appropriate to the work currently being performed by the employees in the bargaining unit, Management agrees to and shall conduct a continuing Review of such ratings throughout the activity. In any case where a modification of a job description of any position in the unit is proposed to the extent that either the rating, title, pay level, or qualification requirements for the rating would be affected, the proposed change will be discussed verbally or in writing by Management with the Employee prior to the effective date of any such change.

Section 2. Any employee in the unit who alleges that his position is improperly described or rated may discuss

the matter with his supervisor, who will, upon request, arrange for review of the employee's rating by personnel of the Personnel Office. The review shall include discussion with the employee and with his supervisor to determine the employee's actual regular work assignment over a representative current period and comparison of such assignments to the related job descriptions and/or rating definitions. Management agrees to consider fully all pertinent facts including those presented by the employee. If the employee's complaint is not resolved to the satisfaction of the employee, Management shall notify the employee in writing of the findings, the basis of the findings, and shall outline the employee's appeal rights. In requesting a review of his position rating and in the discussions described above, the employee may have and shall be entitled to representation by his Union.

Section 3. Upon request by the employee and/or his representative, Management agrees to produce all pertinent and current data on the grade and job standards of the employee's

particular job. The information will include how the grades, job standards, and titles were established and the type of work actually required under these standards.

Section 4. It is agreed that Management will advise the Employee when a job rating is to be changed due to reclassification actions to a lower grade, and at least thirty (30) days prior to effecting personnel action.

Section 5. The Union may present supporting evidence to Management regarding the local application of position classification standards and the equity of classification results.

ARTICLE XIX

DISPOSITION OF UNIT WORK

Section 1. Nothing in this agreement shall be construed to prevent operators of equipment and machines from making minor repairs to equipment they operate incidental to the continuous operation of their equipment and machinery, outside the shop.

Section 2. None but mechanics or apprentices regularly employed as such shall do mechanics work of each craft. This rule does not prohibit foremen in the exercise of their duties, or foremen at points where no mechanics are employed, to perform work.

Section 3. At points where there is not sufficient work to justify employing a mechanic of each craft, the mechanic or mechanics employed at such points will, so far as capable, perform the work of any craft (including welding) that may be necessary. The selection of mechanics shall be based upon the preponderance of work to be performed within the crafts.

Section 4. An employee notified to work a full shift on his day of rest, Sundays or holidays, will be allowed to complete the shift unless relieved at his own request.

Section 5. Management agrees that as a matter of practice, supervisors at Anchorage shall not be assigned to perform the duties as outlined in job descriptions of Unit employees except when instructing or training employees.

ARTICLE XX

APPRENTICE TRAINING PROGRAMS AND RE-TRAINING

Section 1. It is mutually agreed that the Apprentice Training Program is of vital interest to Management and the Union. The objective of the Program is to provide organized on-the-job and academic training and instruction to qualified employees to develop skilled journeymen and potential leaders in the trades areas necessary to the mission of this unit.

In this regard, cognizant Shop Heads will coordinate the on-the-job training in order to insure that apprentices receive broad and well-rounded experience in their respective trades. All apprentice training assignments shall be scheduled and recorded to insure that all apprentices are afforded the opportunity to qualify in each phase of training, as defined in the Apprentice Training schedule developed by Management and the Union for each trade.

Section 2. Management agrees to recognize a Union apprentice training committee within the Carmen bargaining Unit of not more than three (3) members appointed by the Union and three members appointed by Management, to serve on such committee. This committee shall have the right to a reasonable review of apprentice training programs affecting employees in the bargaining unit for the purpose of assisting Management in insuring a continuing effort to strengthen and improve the apprentice training program. It is further agreed that the Union apprentice and training committee shall meet once every two (2) months or upon the request of either party for the purpose of discussing the overall effectiveness of the apprentice training program.

Section 3. Management agrees that apprentices will be assigned to either an apprentice instructor or a skilled journeyman who will be under the personal supervision of a supervisor, who shall be responsible for their training while so assigned. Assignments will be made, to the extent permitted by

work requirements, primarily to expose the apprentice to a variety of jobs with increasing complexity and responsibility during the programmed apprentice term.

Section 4. The time a journeyman is engaged in instructing apprentices, when assigned, will not be considered by the immediate supervisor in judging productivity of that particular journeyman.

Section 5. Whenever technological changes require the use of a composite job rating which will utilize the skills of more than one (1) craft or trade, Management agrees to make every reasonable effort to train employees from trades affected by the new rating and to secure employees for such training from within the activity. In securing employees for such on-the-job training, Management agrees to the use and principles of a merit promotion system with respect to their selection and appointment to such training programs.

Section 6. In recognition of the mutual advantages to Management and to the employees, Management agrees to utilize existing employees from within the activity when training for any new

job ratings which may be determined necessary for establishment within the activity to carry out the mission.

ARTICLE XXI

SAFETY

Section 1. Management will exert every effort to provide and maintain safe working conditions and industrial health protection for the employees. The Union will cooperate to that end and will encourage all employees to work in a safe manner.

Section 2. It is recognized that each employee has a primary responsibility for his own safety and an obligation to know and observe safety rules and practices as a measure of protection for himself and others. Management will welcome from any individual employee or from the Union, suggestions which offer ways of improving safety conditions.

Section 3. It is agreed that the Union will appoint an appropriate number of qualified employees to serve as the Union's representatives on Management's Safety Committees.

Section 4. In the c[illegible] of performing their normally assigned work, Union representatives will be alert to observe unsafe practices, equipment, and conditions as well as environmental conditions in their immediate area which represent industrial health hazards. When unsafe or unhealthy conditions are observed by the Union representatives they should report them to the immediate supervisor. When such safety and industrial health matters are of general interest, the Union may present the problem to Management's safety committees or bring the matter to the attention of appropriate supervision for mutual consideration by Management and the Union.

Section 5. The Union and Management will make every effort to prevent accidents of any nature. Should such accident occur, however, a prime consideration will be the welfare and comfort of injured personnel.

Section 6. When it becomes known that an accident has resulted in a disabling injury, management agrees to notify the Union promptly of the circumstances.

Section 7. Employees injured while at work will not be required to make accident reports before they are given

medical attention, but will make them as soon as practicable thereafter. Proper medical attention will be given at the earliest possible moment, and, when able, employees shall be permitted to return to work without signing a release pending final settlement of the case. Settlements will be made in accordance with Employee's Compensation benefits.

Section 8. When employees covered by this agreement are required to transfer from hot work to cold work, they will be allowed sufficient time to cool off before such transfer is made.

Section 9. Pits and floors, lockers, toilets, washrooms and lunchroom will be kept in good repair and in a clean, dry and sanitary condition.

Section 10. Operators of sandblast or paint sprayers will be required to use utmost care not to disturb other employees working in immediate vicinity.

Section 11. All acetylene or electric welding or cutting will be protected by a suitable screen when its use is required.

Section 12. Shop employees will not be required to work on engines or cars outside of shops during inclement weather, if shop room and pits are available. This does not apply to emergency work required to trains or in train yards.

Section 13. No employee will make repairs to engines or cars standing on main track or side track in yards without being protected by a blue signal in place provided thereto on engine and car at both ends of the train to prevent cars from being coupled to or moved while he is making repairs. If signals are placed by the employee, he alone must remove them.

Section 14. When circumstances permit every effort will be made to clean locomotives prior to truck changes or other major work.

ARTICLE XXII

COMMITTEE ASSIGNMENTS

Section 1. The Union agrees to cooperate with Management in the development of policies and procedures for programs which involve charitable

solicitations to include qualified Union representation on Management committees for such purposes.

Section 2. The Union will appoint qualified representatives to assist Management in evaluating suggestions and incentive awards.

ARTICLE XXIII

CIVIC RESPONSIBILITIES

Section 1. When an employee is absent from duty and in attendance in court as witness in behalf of the United States, or for jury duty in any State court or court of the United States, the absence from duty shall not be charged against annual leave but shall be recorded as "court leave" for the employee's regular tour or tours of duty.

Section 2. On receipt of a summons to appear for jury duty, the employee shall advise his supervisor. While the duty to serve as a juror is one of the precious privileges and responsibilities of American citizenship, with which the Railroad management concurs, there are instances when the absence of the employee from duty would work an undue hardship. The Personnel Officer shall investigate these hardship cases when brought to his attention by the Branch head.

Section 3. An employee answering summons for jury duty shall require written certification of attendance from the clerk of the court. This form shall be attached to Standard Form 71 and presented by the employee to timekeeper as authority for allowance of court leave.

Section 4.

a. Since court does not ordinarily convene until 10:00 a.m., an employee called for jury duty shall be required to report on his Railroad assignment at the starting hour and continue work until such time as it is necessary to leave for court. The only exception to this requirement shall be in those instances where the foreman or other supervisor finds it would be an undue hardship to comply therewith and so informs the appropriate timekeeper in writing.

b. When an employee is excused from duty by the court for as much as one and one-half (1-1/2) hours prior to time for stopping work at noon or evening, he shall return to duty unless advance authority for nonreturn, due to definite hardship being involved, is obtained from foreman or other supervisor.

Section 5.

a. An employee serving as a juror in State or municipal courts shall be instructed to collect all fees and allowances payable on account of the jury service. The employee must forward the fees so collected to the Treasury section, Accounting Branch, The Alaska Railroad, endorsed with "Pay to The Alaska Railroad"; otherwise, payroll deduction shall be made from compensation due him. The employee may keep allowances for mileage and subsistence to cover his actual expenses incident to the jury service; however, payment of per diem is prohibited since it is a form of compensation for services rendered.

b. An employee who performs jury service on rest or layover days is entitled to retain the fees received for such service.

Section 6. An employee who desires to vote or register in an election or in a referendum on a civic matter in his community may be granted time off without charge to annual leave. When the polls are not open at least three hours

either before or after an employee's regular hours of work, he may be granted an amount of excused leave which will permit him to report for work three (3) hours after the polls open or leave work three hours before the polls close, whichever requires lesser amount of time off.

ARTICLE XXIV

SPECIAL TOOLS - CLOTHING - SERVICES

Section 1. Management agrees to bear the full expense of all special tools, protective clothing and equipment that employees use in the performance of their duties.

Section 2. Management agrees to bear the expense of paying the difference between work shoes and safety shoes.

Section 3. Management agrees to provide space on official bulletin boards and offices for the posting of union notices and similar information material.

ARTICLE XXV

GRIEVANCE PROCEDURE

Section 1. An employee who has passed his probationary period satisfactorily or whose application has been formally approved shall not be disciplined or dismissed without a fair hearing by the designated officer of the Railroad. He may, however, be held out of service pending hearing. At a reasonable time prior to the hearing and not less than forty-eight (48) hours, such employee shall be apprised, in writing, of the precise charge against him within thirty (30) calendar days of knowledge by the Management of the alleged offense. The hearing shall be held within ten (10) calendar days of the date when charged with the offense. A decision will be rendered within ten (10) days after completion of hearing. The time limits in this rule may be extended by mutual agreement.

Section 2. The right of appeal by employees or their duly accredited representatives in the regular order of succession up to and including the highest officer designated by the Management to whom appeals may be made

is hereby established. When appeal is taken, further hearing shall be granted, if requested of the official to whom appeal is made. Appeals will be registered within a reasonable time after decision is given and a copy furnished official whose decision is appealed. Hearings and decisions on appeals will be given within ten (10) calendar days from date appeal notice is received by the officer to whom appeal is taken. The time limits in this rule may be extended by mutual agreement.

Note: No appeal will be handled except in accordance with the above procedure.

Section 3. At hearings an employee may be assisted by one or more duly accredited employee representatives. Disputes growing out of personal grievances and/or out of the interpretation or application of agreements or practices concerning wages, rules or working conditions between the parties hereto may be handled by one or more duly accredited representatives, first with the immediate supervisory officer and, if not satisfactorily settled, may be appealed by the representative in the order of succession up to and including the highest offical designated

by the Management to whom appeals may be made. At each step Management will render a decision within ten (10) days.

Section 4. Investigations and hearings shall be held whenever possible at home terminals of employees involved and at such time as to not cause employees to lose rest or time. Employees shall have reasonable opportunity to secure the presence of duly accredited representatives and/or necessary witnesses. Upon request of the employee or his representative all necessary existing records of Management pertinent to the case at hand shall be made available for their use. In the process of the hearing, the Union will be permitted a court recorder or a tape recorder.

Section 5. A copy of all statements made a matter of record at investigations or hearings shall be furnished to the employee and to his duly accredited representative.

Section 6. If an employee is suspended, the suspension shall date from the time he was taken out of service.

Section 7. If the final decision decrees that charges against the employee were not sustained, the record shall be cleared of the charge. If suspended or dismissed, the employee shall be reinstated and paid for all time lost.

Section 8. An employee who considers himself unjustly treated, or that any of the provisions of this agreement have been violated, shall have the right of investigation, hearing, appeal and representation as provided in Sections (1), (2), (3), (4) and (5), if written request, which sets forth the employee's grievance is made to his superior within thirty (30) calendar days of knowledge by the employee of the alleged unjust treatment.

Definition of Investigation:
An inquiry conducted by the Management to determine cause and responsibility and to make search or inquiry for truth or facts prior to conducting a hearing. Employees are not disciplined as a result of an investigation except new employees who have not passed their probationary period of employment.

Definition of Hearing: A hearing (a trial) conducted after an investigation has developed cause and responsibility. At such hearings an employee or employees must be given proper notice under these rules and apprised in writing of the precise charge or charges against him. Employees may be disciplined or discharged as a result of a hearing. Appeals are based on hearings, not on investigations.

The enforcement of discipline by demerit record will apply to employees of the unit.

The advantages of this system are:

1. (a) To the employee, enabling him by good conduct to insure permanency of employment.

   (b) To the Railroad, in increased efficiency of such permanent employees.

   (c) To avoid loss of wages and consequent hardships

1. (c) cont'd.

to employees and their families because of being deprived of their regular income.

(d) To promote good conduct and encourage careful and efficient service.

2. No discipline by record will be made for less than five (5) or more than sixty (60) demerits.

3. Where demerits are given for unsatisfactory service, cancellations upon record will be given as follows:

(a) A clear record for six (6) months will cancel five (5) demerits.

(b) A clear record for one (1) year will cancel thirty (30) demerits.

(c) A clear record for eighteen (18) months

3. (c) cont'd.
will cancel sixty (60) demerits.

4. When an employee's demerits have accumulated to the number of ninety (90), he will be dismissed from the service.

5. An accumulation of demerits showing that an employee is not desirable for the service will first be given special consideration, but when the service of an employee is so generally unsatisfactory as to unfit him for further service, dismissal will follow.

6. Any permanent employee, who is not serving a probationary period and has completed one year of continuous employment, subject to discipline resulting from hearings and accumulation of demerits involving removal, suspension for more than thirty (30) days, furlough without pay or reduction in pay shall be afforded the provisions of Civil Service Commission regulations relative to adverse

actions. These regulations shall be quoted to the employee, including, but not limited to a Notice of Proposed Action, Receipted Delivery Notice, Thirty day Pay status, time for employees response and evaluation of same and Notice of Decision.

ARTICLE XXVI

ADVISORY ARBITRATION

Section 1. If Management and the Union fail to settle any grievance arising under Article XXV titled Grievance Procedure with respect to the interpretation, application, or alleged violation of this Agreement or of any policy or decision of Management, such dispute shall, upon written notice by the party requesting arbitration to the other party, be referred to Advisory Arbitration. Such written notice must be served not later than thirty (30) days following the conclusion of the last step of the grievance procedure.

Section 2. Within seven (7) days from the date of receipt of the arbitration request, the parties shall

meet for the purpose of endeavoring to agree on the selection of an arbitrator, and the wording of the question to be resolved. If agreement cannot be reached, then either party may request the National Mediation Board to submit a list of five (5) impartial persons qualified to act as arbitrators. The parties shall meet within three (3) days after the receipt of such list. If they cannot mutually agree upon one of the listed arbitrators, then Management and the Union will each strike one arbitrator's name from the list of five (5) and shall repeat this procedure. The remaining name shall be the duly selected arbitrator.

Section 3. The fee and expenses of the arbitrator shall be borne by the Management or the Union, whoever loses such case before the Board, provided that the cost to Management for arbitrator's fees shall not exceed that amount authorized by rules and regulations. The arbitration hearing shall be held during the regular day shift work hours of the basic work week of Monday through Friday, and all employee representatives, not to exceed two (2), employee appellants and employee witnesses shall be in a pay status without charge to annual leave while participating in the arbitration proceedings.

Section 4. The arbitrator is requested by the parties to render his decision as quickly as possible but in any event no later than thirty (30) days after the conclusion of the hearings unless the parties otherwise agree.

Section 5. It is agreed and recognized that arbitration as provided herein is advisory in nature.

Section 6. The arbiter shall have jurisdiction and authority to interpret this Agreement and to apply it to the particular case under consideration, but shall, however, have no authority to add to, subtract from, or modify the terms of this Agreement and shall confine his findings to the question submitted.

Section 7. In those cases where either party deems it necessary, it may arrange that a transcript of the hearing be made by a qualified court reporter. The party making such arrangement shall bear the full cost thereof. If both parties request a copy the cost will be shared equally. If the arbiter requests that he be furnished with a copy, the expense of the original copy and the reporter's attendance charge shall be borne equally by Management and the Union.

Section 8. The Head of the activity shall render his decision on the advisory arbitration within twenty (20) calendar days from receipt of the arbitrator's decision.

ARTICLE XXVII

SENIORITY

Section 1. Seniority of employees covered by this agreement shall be system-wide and will be established as of the date service is performed. Junior employees will be compelled to accept a permanent transfer to another point. Senior employees temporarily transferred will not be compelled to accept a permanent transfer to another point.

Seniority rosters shall be posted as of January of each year for Carmen, Mechanics' Helpers, Coach Cleaners, and Apprentices, copies of which are to be furnished the General Chairman and posted where Carmen are employed.

Section 2. Employees temporarily transferred to fill vacancies of less than thirty (30) days at the direction

of the Management under a forced rule will be allowed expenses in accordance with Standard Government Travel Regulations for not to exceed thirty (30) days.

Section 3. Employees now filling or promoted to official positions beyond the scope of this agreement shall retain and continue to accumulate seniority in the class from which promoted.

Section 4. An employee taken from any craft for assignment to special service will retain his seniority and be considered on leave of absence from his department while performing such special service.

Section 5. Employees on extended leave of absence for vacation, sickness or other authorized leave, upon returning to service will be permitted to return to their former positions or may exercise displacement rights on new jobs or vacancies created during his absence. If such employee returns to his regular position, the employee who was relieving him will return to regular position. If a returning employee displaces another employee assigned

during his absence, the displaced employee may exercise seniority in like manner to other positions for which he is qualified. Such actions are to be accomplished upon return or within three (3) days thereafter.

Section 6. The indiscriminate exercise of seniority to displace junior employees, which practice is usually called "rolling" or "bumping", will not be permitted. However, an employee whose assignment is discontinued, or who may be displaced from his position by other causes, will be permitted to exercise seniority on any job occupied by a junior employee on his seniority list.

Section 7. When the force is reduced, seniority will not govern; Civil Service Commission Regulations shall apply for Reduction in Force. For reduction in force purposes, the competitive area for employees of this unit shall be The Alaska Railroad.

ARTICLE XXVIII
BULLETINING POSITIONS
WITHIN MULTIPLE APPOINTMENTS

Section 1. Vacancies of thirty (30) days or more shall be bulletined for five (5) days before being permanently filled. The oldest employee in point of service in the respective craft, if qualified by experience to efficiently handle the work, will be assigned. Employees desiring to avail themselves of this rule will make bid, in writing, to the official in charge, duplicate copy to local chairman, the Management to make assignment.

Section 2. An employee exercising his seniority rights under this rule will do so without expense to the carrier; he will not lose his right to the job he left, and if after a fair trial, not to exceed thirty (30) days he fails to qualify for the new position, he will return to his former position. The next senior qualified man bidding will be assigned. In the event there are no bids, the youngest employee will be assigned.

Section 3. Official Bulletin Boards shall be used at all shops, repair points, and roundhouses where proper notices of interest to employees and job bulletins may be posted. Access to such board will be made available to accredited Union representatives for posting such notices as are necessary.

Section 4. Employees covered by this Agreement, who have been assigned in a multiple appointment, performs work for four (4) hours or more in a position authorized with a multiple appointment shall be paid for the rate of the work performed consistent with the grade assignments authorized in multiple appointment.

Section 5. Advertised vacancies may be filled in acting status pending an assignment.

ARTICLE XXIX

DURATION AND CHANGES

Section 1. This agreement when approved by the parties for the Union and the Management shall become effective on September 20, 1970. After such approval renewal of this Agreement will be automatic from year to year, provided that this Agreement shall terminate

automatically affective with any date on which it is determined that the Union is no longer entitled to exclusive recognition in accordance with Executive Order 11491.

Section 2. By mutual consent of the parties, this Agreement may be opened at any time for amendment. Any request for amendment shall be in writing to the General Manager and must be accompanied by a summary of the amendment or amendments proposed. Within sixty (60) days after receipt of such request, representatives of Management and the Union will meet to negotiate the matter, and no changes other than those covered by the summary shall be considered. A written notice of desire to alter and amend by renegotiation shall not have the effect of terminating this Agreement.

Section 3. This Agreement supersedes all previous Agreements for employees covered by this Agreement.

Section 4. The Articles of this Agreement have been negotiated in good faith and are presumed to be consistent with existing laws enacted by the U. S. Congress, applicable Department of

Transportation and Civil Service Commission regulations and Executive Orders. The provision of any existing or future contrary decree with respect to and which affect this agreement shall become a part thereof.

Section 5. It is agreed that this Agreement shall take precedent and no other Agreement shall be the basis for grievances.

Section 13. Effective Date and Duration

Preamble. This Basic Agreement is agreed to in the interest of developing sound relations between the employees and management of The Alaska Railroad. The public interest requires high standards of employee performance and modern work practices to improve employee performance and efficiency. Observance of its terms by management and employees, as well as by their representatives, should result in the joint determination of fair and reasonable hours regulations and working rules; in the prevention of grievances and in the prompt and orderly settlement of all differences between labor and management; in stabilizing employment, and in developing systematic labor-management cooperation for safety, mutual benefit and good service to the patrons of the Railroad and the State of Alaska.

The Alaska Railroad as an agency of the Government of the United States is dedicated to the accomplishment of certain public purposes as provided in the Act of March 12, 1914, which directed the President of the United States to construct and operate a railroad in the Territory of Alaska (now the State of Alaska). Among these

public purposes are the furtherance of the development of Alaska and the support of national defense. The duties and responsibilities necessary to accomplish these public purposes have been vested by Executive Order of the President No. 11107, dated April 25, 1963, and by the Transportation Act of 1967, in the Secretary of Transportation; and the Secretary, by appropriate orders and regulations, has delegated certain responsibility for operating the Railroad to its General Manager.

Section 1. Definitions

Labor Organizations: the term "labor organization" means any organization, union, or employee representation committee in which employees participate and which exists for the purpose, in whole or in part, of providing representation for members employed on the Railroad in dealing with the management officials on hours, conditions of employment, grievances, disputes and other matters pertinent to their employment. This term does not apply to employee welfare organizations, recreational associations, credit unions, or similar associations.

Representatives of Labor Organizations: This term includes those individuals, either employees or non-employees of the Department, who are accredited by the employees to represent their interests in relationships or dealings with management officials on matters relating to their employment.

Management Officials: This term includes those employees at all levels of the Railroad's organization, in both line and staff capacities, who have significant responsibilities in supervising, directing and managing program activities and administrative matters which involve decisions or actions affecting employee groups.

Basic Labor Agreement: This term refers to the written document negotiated by management officials and representatives of employees, which concerns itself primarily with matters of broad principle, policy, and procedure which will govern the relations of the parties thereto in the negotiation of working conditions, the settlement of disputes and grievances, and related matters.

Supplementary Labor Agreement: This term refers to the written agreement or series

of agreements which are negotiated and made effective between management officials and representatives of employees within the purpose and in the implementation of the general policies and guidelines of a basic labor agreement.

They may not delete, modify or otherwise nullify any of the policies and procedures which have been incorporated in the Basic Labor Agreement.

Labor-Management Negotiations: This term is used interchangeably with the term "Collective bargaining".

Section 2. Compliance

2.1. It is recognized that in labor-management negotiations, and in the administering of all matters covered by this agreement, both the Railroad and the employees are governed by the provision of applicable federal laws and regulations.

2.2. If laws or regulations become effective, binding on the Railroad and inconsistent with the provisions of this agreement, the Railroad shall notify the representatives of the respective labor organizations. The labor organizations and the Railroad shall issue a joint statement of the change and its effect upon this agreement.

Section 3. Scope

This agreement is applicable to those employees of the Railroad represented by the Brotherhood Railway Carmen of the United States and Canada,

Section 4. Employee Rights to Labor Representation

4.1. Employees of the Railroad have the right to form or join organizations and designate representatives of their own choosing, provided they do not form or join organizations which assert that employees in the service of the United States Government may strike or assist in such strike, or which advocate the overthrow of the United States Government by force or violence.

4.2. In the exercise of the right to form or join organizations and designate representatives, employees shall be free from any and all restraint, interference or coercion on the part of Management, and the supervisory staff is prohibited from exercising any such restraint, interference or coercion. By the same token the designation of

individuals and officers to represent the management of the Railroad for the purpose of this policy is entirely the responsibility of the General Manager.

4.3. The labor organization may be required to submit a copy of its bylaws, and the names of its officers and representatives, and to make known by whom it is chartered. The identity of individual members or the number of members is not required, except in the determination of representation rights.

4.4. This section does not authorize participation in the management of a labor organization or acting as a representative of such an organization, by a supervisor, or by an employee when the participation or activity would result in a conflict or apparent conflict of interest or otherwise be incompatible with law or with the official duties of the employee, nor shall a unit be established if it includes any management official or supervisor.

Section 5. Discrimination Prohibited

Appointments to the service of the Railroad are to be made strictly on the basis of merit and efficiency. No test of race, color, religious belief, or political affiliation, except as

prescribed by law, will be required of any employee, or considered in his appointment, promotion, demotion, transfer, retention in or termination of service with the Railroad, nor shall any employee of the Railroad nor anyone seeking employment be required to join or refrain from joining any duly accredited organization as a condition of appointment, promotion, demotion, transfer, retention in or termination of service.

Section 6. Determination of Bargaining Rights

6.1. The majority of the employees of any class or craft of the Railroad has the right to determine the organization which will represent the employees of such class or craft for the purposes indicated in the preamble.

6.2. In the initial determination of representation rights and in resolving disputes as to these rights, both employees and management are governed by the appropriate section of the Federal Personnel Manual as implemented by the Department of Transportation.

Section 7. Duty to Confer

7.1. If a craft or group of employees h properly designated an organization to represent them in accordance with the provisions of Section 6 above, the representatives of such craft or group shall so notify the General Manager, and the General Manager, the officers and supervisors of the Railroad will thereafter treat with such organizations and its officers for the purposes described in the preamble to this agreement.

7.2. Representatives of labor organizations or employees desiring to confer with management officials shall deal in the first instance with those Railroad officials who have primary responsibility over the case or subject matter which is the subject of conference.

7.3. Differences or disputes between an employee or group of employees and the Railroad, growing out of grievances or out of the interpretation or application of the terms of jointly promulgated schedules, having been handled by the employees or their representatives through established supervisory channels up to

and including the Branch Head concerned and the Personnel Officer, the General Manager will then call a conference. Conferences for the adjustment of such differences or disputes will be held whenever possible during the regular working hours, and when so held, labor organization representatives actually working will not lose pay, provided that the number of such representatives of the labor organizations concerned does not exceed two.

7.4. Conferences may be requested by the labor organization or the Railroad announcing their desire to revise the jointly promulgated agreements, and having given proper notice, the time and place for the beginning of such conferences will be announced. The time required by labor organization representatives in the employ of the Railroad when attending such conferences shall not be on official times when negotiating an agreement with agency management.

7.5. Leave as accrued may be granted to any other employee for attendance or observance of the above meetings, contingent on the availability of replacement personnel. In the interest of cooperation, in labor matters, the

Railroad will follow a liberal policy in allowing time off for such purposes, with reasonable limits and consistent with work requirements.

Section 8. Written Agreements

8.1. Working rules, in the determinacion of which employees, through accredited organizations, have participated - will be reduced to writing and will be promulgated as schedules over the joint signature of the General Manager and the officers of the organization or organizations representing the employees concerned. Such agreements shall be regarded as Supplmentary Agreements as defined in Section 1 of this agreement.

8.2. The Railroad and the labor organizations further agree that, pending the determination or adjustment of any issue arising between them by means of the conference machinery and procedures herainafter provided, there will be no change in the conditions in any schedules or recorded understanding applicable to such issue.

8.3. The Railroad will not make unilateral changes in the terms of any labor agreement pending settlement of

outstanding differences through mutually agreeable procedures, except those that are dictated by over-riding Federal Law or Regulation.

Section 9. Scope of Negotiations

9.1. Management officials retain the right to direct employees in accomplishing the work of the agency; to hire, promote, transfer, assign, and retain employees in positions within the agency; to suspend, demote, discharge, or take other disciplinary action against employees; to relieve employees from duties because of lack of work or other legitimate reasons; to maintain the efficiency of the Government operations entrusted to them; to determine the methods, means, and personnel by which such operations are to be conducted; and to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

9.2. Negotiable Items. The Alaska Railroad management shall negotiate with the unions, for the employees represented by the unions signatory hereto, for:

a. The establishment of craft working rules.
b. The establishment of grievance procedures and discussion of personnel policies and practices, or other matters affecting general working conditions.
c. NOTE: The wage fixing system applicable to the employees subject to this Basic Agreement will be set forth in Section 9.4

9.3. All requests for negotiation conferences shall be in writing and specify the subjects for discussion and the times proposed for consideration. Conferences between the parties shall begin as promptly as practicable. Every effort will be made by the negotiators to agree

9.4 Wage Fixing System. The wage fixing system applicable to Alaska Railroad blue collar employees represented by the Brotherhood Railway Carmen of the United States and Canada, shall be the system currently followed for their wage board employees by Army-Air Force installations in the State of Alaska. As soon as a coordinated wage fixing policy is promulgated by the Civil Service Commission for the wage

board employees in Alaska, such Federal coordinated system shall be substituted for the Army-Air Force wage fixing system referred to above. Details as to the application of this system will be set forth in a supplementary agreement.

Section 10. Disputes and Grievance Procedures

10.1 The parties to this agreement recognize that the prompt and orderly settlement of disputes in a fair and reasonable manner is essential to good labor relations and to the efficient accomplishment of the purpose for which the Railroad exists. To this end officials of the Railroad and employees and their representatives will make every effort to resolve their disputes at the first level of management where the dispute originates.

10.2. Detailed procedures for the handling of grievances shall be included in supplementary labor agreements between the parties signatory hereto.

'BLA'

Section 11. Bulletin Boards and Distribution of Literature

Distribution of literature of a labor organization shall be permitted, provided the distribution is made by employees outside their regular working hours and does not interfere with the work assignments of other employees who may be on duty at the time. Notices posted by labor organizations on Government bulletin boards and literature distributed on Government property shall contain the name of the organization issuing or sponsoring it, and shall contain nothing that would imply official sponsorship or endorsement by the Railroad. The material must pertain specifically to the business of the labor organization and shall not contain statements which reflect on or attack the integrity or motives of individuals, other labor organizations, the Department of Transportation, the Railroad, or other governmental agencies, Federal or otherwise. Objective statements of opinion, favorable or unfavorable, about issues or subjects related to the employees' work and employment conditions are permitted. Canvassing or soliciting membership and collecting membership dues for a labor organization shall also be conducted outside regular working hours

of the employees canvassed and of the employees performing these activities. Non-employee canvassers may be required to give notice of their presence to the responsible management officer. There shall be no interference with the performance of official duty of employees during working hours.

Section 12. Labor-Management Cooperation

12.1. The parties to this agreement recognize that there are many areas of common interest to the management of the Railroad and to its employees which are important to the effective operation of the Railroad and to the welfare of employees which are not ordinarily included within the scope of collective bargaining agreements. Such areas of common interest include, but are not limited to:

a. Elimination of waste in operation and maintenance.
b. Conservation of materials, supplies, time, power and energy.
c. Improvements in quality of workmanship and services.

d. Correction of conditions making for grievances.
e. Health, safety, and morale standard

12.2. In order to increase the area and effectiveness of labor-management cooperation, Joint Committees have been established prior to the making of this agreement, as follows:

Joint Union-Management Safety Committee
Alaska Railroad Medical Association and Excess Benefits Plan
Joint Labor-Management Committee

12.3. Employees serving on the welfare committees mentioned above and similar committees that may be established will be paid not to exceed a minimum day for their attendance if any time is lost. It shall be the duty of the parties to this agreement to further the work and effectiveness of these joint committees.

Section 13. Effective Date and Duration

13.1. This agreement shall remain in

full force and effect for one year from the date executed, and thereafter until the expiration of sixty (60) calendar days following the giving of written notice by either party to the other of its desire to terminate this agreement in its entirety or to effect changes herein by agreement.

13.2. By mutual consent of the parties, this agreement may be opened at any time for amendment. Also, modification or amendment of this agreement may be required because of changes in applicable laws, rules, regulations or policies issued after the date of this agreement.

13.3. The Basic Labor Agreement between the Brotherhood Railway Carmen of the United States and Canada, and The Alaska Railroad, dated April 11, 1968, and which was negotiated under authority of Executive Order 10988, is hereby supplemented for compatibility with the new Executive Order 11491, relative to Labor-Management relations effective January 1, 1970.

STANDARDS OF APPRENTICESHIP

for

THE ALASKA RAILROAD
APPRENTICEABLE TRADES

Developed by the Local
Joint Apprenticeship Committee

Representing
THE ALASKA RAILROAD
DEPARTMENT OF TRANSPORTATION
FEDERAL RAILROAD ADMINISTRATION
ANCHORAGE, ALASKA

and

INTERNATIONAL ASSOCIATION OF MACHINISTS
AND AEROSPACE WORKERS

BROTHERHOOD RAILWAY CARMEN OF
UNITED STATES AND CANADA

INTERNATIONAL BROTHERHOOD OF BLACKSMITHS,
BOILERMAKERS, IRON SHIPBUILDERS AND HELPERS

Registered & approved by the

BUREAU OF APPRENTICESHIP AND TRAINING
U. S. Dept. of Labor
Washington, D. C.

Assisted by the

BUREAU OF APPRENTICESHIP AND TRAINING
U. S. Dept. of Labor
Room 46, Federal Bldg.
Anchorage, Alaska

OBJECTIVE

The purpose of apprentice training is to encourage a more careful selection of men coming into the trade; to train apprentices now in the trade; to assist in providing training that will equip them for profitable employment and citizenship; and to further the assurance to the employer of the most proficient workmen to the end that the public may receive the best possible workmanship.

I. DEFINITIONS:

a) The term "Committee" shall mean the Joint Apprenticeship and Training Committee, as set up in these apprenticeship standards.

b) The term "Employer" shall mean The Alaska Railroad, Department of Transportation, Federal Railroad Administration.

c) The term "Union" shall mean the local union signatory to these apprenticeship standards.

d) The term "Registration Agency" shall mean the Bureau of Apprenticeship and Training, U. S. Department of Labor.

e) The term "Apprenticeship Agreement" shall mean a written agreement between the Committee and a person employed as an apprentice, which agreement shall be registered by the Registration Agency.

f) The term "Apprentice" shall mean a person who has signed an Apprenticeship Agreement with the Committee to learn a trade, as outlined in these apprenticeship standards.

g) The term "General Supervisor of Apprenticeship" shall mean a person appointed by the Committee to carry out the program under its direction.

h) The term "Supervisor of Apprentices" shall mean a person appointed by the individual employer to direct apprenticeship training in or on a specific establishment or job. He shall be subject to approval of the Committee.

i) The term "Apprenticeship Standards" shall mean this entire document, including these definitions.

II. JOINT APPRENTICESHIP AND TRAINING COMMITTEE:

The Committee shall be composed of three members representing employers, and three members representing Labor. Labor and Management shall be equal in all cases.

Members of the Committee shall be selected by the groups they represent. The term of office shall be for three years or less -- the term of one employer and one journeyman to expire each year. The first appointments by each group will be designated for one, two, or three years.

III. SELECTION PROCEDURES:

Selection of apprentices under the program shall be made from qualified applicants on the basis of qualifications alone and without regard to race, creed, color, national origin, sex, or occupationally irrelevant physical requirements in accordance with objective standards which permit review, after full and fair opportunity for application, and this program shall be operated on a completely nondiscriminatory basis. Apprentices will be carefully selected from applicants between 18 and 28

years of age whose background, education, personality, and physical conditions indicate that they are suitable candidates.

Information regarding apprenticeship openings and requirements shall be furnished to the local state employment service and to the local schools.

Such information will also be posted at the program sponsor's normal place of application for apprenticeship. Applications of responding candidates will be recorded. Those meeting the basic qualifications such as age, residence, education, and physical condition will be referred to the apprenticeship committee.

The recruitment, selection, employment, and training of apprentices during their apprenticeship, shall be without discrimination because of race, color, religion, national origin, equal opportunity in apprenticeship and will operate the apprenticeship program as required under Title 29 of the Code of Federal Regulations, Part 30.

The local state employment service will supply the aptitude testing and grading. Such test measures general intelligence, manual dexterity, hand/eye coordination, perception, finger dexterity, and numerical and verbal comprehension.

Applicants who qualify in the aptitude tests will be interviewed by the program sponsor or his designated representative. The interview shall cover such factors as educational record, attitude towards work and apprenticeship, sense of responsibility, previous work experience, whether related or unrelated to the trade, reasons for interest in the trade, hobbies, and physical factors.

Qualified applicants will be rated numerically on the basis of the following factors:

		Maximum
1.	Aptitude test results (If actual scores are used, rank in relation to minimum qualifying score.)	25
2.	Educational background (High school diploma or certificate of equivalency) (Subjects studied pertinent to the trade or grades attained.)	15
3.	Reference and conduct record	10

4. Interview (personal impression of interest, sincerity, and adaptability to the trade.) 25

5. Previous working experience (related and unrelated.) 25

Selection of qualified applicants shall be in descending order of ranking. Records of the selection process shall be retained for a period of two (2) years.

IV. TERM OF APPRENTICESHIP:

Apprentices will serve a minimum term of four consecutive years (approximately 8,000 hours) of reasonably continuous employment during such term, and include the probationary period and the required hours of supplemental school instruction. (Exception: Helpers with two (2) years helper experience shall be eligible for indenturing as helper apprentice of a respective craft, ability to govern in all cases, for a period of three (3) years.)

V. RELATED INSTRUCTION:

International Correspondence School and Railway Education Bureau Courses will be substituted for related classroom instruction.

No apprentice will be allowed to work overtime when such work will interfere with the related instruction course. In case of failure of any apprentice to fulfill his obligations as to school attendance and conduct, without due cause, the local Joint Apprenticeship and Training Committee shall take necessary disciplinary action.

VI. SUPERVISION OF APPRENTICES:

The Alaska Railroad shall designate a particular person, who may be the Superintendent, Foreman, or Journeyman, to be responsible for the training of apprentices. He shall, with the advice and assistance of the local joint apprenticeship and training committee, be responsible for the apprentices' work experience on the job, for their attendance at related classes, and the recording of same on record forms provided for this purpose.

VII. RATIO OF APPRENTICES TO JOURNEYMEN:

The ratio shall be 1 apprentice to each 5 journeymen.

VIII. ACCIDENT PREVENTION:

Each apprentice shall be provided with initial indoctrination and instruction in

order to enable him to perform his work in a safe manner. Such instruction shall be coordinated with the actual work being performed on the job and the tools and equipment being used.

Initial indoctrination shall include instructions relative to pertinent company safety regulations, reporting of accidents, and availability of first aid and medical facilities.

The employer shall at all times exercise reasonable precautions for the health and safety of the apprentices engaged in the performance of the work hereinafter described as "Work Processes" . . .so far as possible. He shall comply with all applicable provisions of Federal, state and municipal safety, health, and sanitation statutes and codes.

In addition, as an integral part of this training program, the apprentice supervisor and/or instructor shall provide such training and instruction pertaining to safe work habits to insure that the apprentice will be protected against avoidable accidents. Also, that they understand the methods necessary to properly perform all phases of the work in a safe manner.

IX. PROBATIONARY PERIOD:

Apprentices will be subject to the probationary period applicable to Federal employment. During this probationary period, annulment of the Apprenticeship Agreement will be made by the Committee upon request of any of the parties concerned. After the probationary period the Committee may cancel the Apprenticeship Agreement for just cause, but due notice shall be given the Registration Agency of such action. The Apprenticeship Agreement may also be canceled if the apprentice fails to fulfill his obligations as to the related instruction courses.

X. ADJUSTING DIFFERENCES:

In accordance with the present working agreement, the railroad and the apprentice shall have the right and privilege of appeal to the local joint apprenticeship and training committee in the event of disputes and controversies arising over any provision of the local apprenticeship standards which cannot be satisfactorily settled between them. The local committee shall hear all the parties and make such adjustments as it may consider necessary.

XI. WORK EXPERIENCE:

During his apprenticeship, the apprentice shall be taught the use, care, and effective and safe handling of all tools and equipment commonly used in the trade. He shall be given work experience and training in all branches of his trade considered necessary to develop a skilled and productive worker.

WORK SCHEDULE FOR
AUTOMOTIVE MACHINIST
APPRENTICE

	Years of Service
Engine rebuild room, gas and diesel	1 Year
General repair, automotive test and electrical work	1 Year
Heavy equipment repairs . .	1 Year
Gas car repairs and trouble shooting	6 Months
Welding, electric and acetylene	6 Months
TOTAL	4 Years

	Years of Service
Machine shop practice	1 Year
Engine rebuild and parts repairs	1 Year
General repair, truck and roller bearing repairs, locomotive and cars	6 Months
Welding, electric and acetylene	6 Months
Air room	6 Months
Running repairs, trouble shooting, diesel shop . . .	6 Months
TOTAL	4 Years

WORK SCHEDULE FOR
SHEETMETAL
APPRENTICE

	Years of Service
Shop and bench sheetmetal work, including layout and design, brazing, soldering, tinning, leading, and babbitting . . .	2-1/2 years
Locomotive Department - Pipefitting and Sheetmetal	6 Months
Car Department - Pipe and sheetmetal work on passenger cars and sheetmetal in freight department	1 Year
TOTAL	4 Years

WORK SCHEDULE FOR
CARMAN
APPRENTICE

	Years of Service
General freight car rebuilding and repairs, wood and metal	1 Year
General passenger car repairs and rebuilding	1 Year
Air room, cleaning and testing, and repairs	6 Months
Rip track, air cleaning, installation and repairs . .	6 Months
Carpenter shop, machine and bench work	6 Months
Electric and acetylene welding	6 Months
TOTAL	4 Years

XII. WAGE SCHEDULE:

The wage rate paid apprentices and journeymen shall be that which is negotiated by The Alaska Railroad officials and the local unions involved. This wage schedule shall be kept current by a supplement attached to the standards.

XIII. PERIODIC EXAMINATION:

An examination of apprentices as to their progress in learning the trade may be given at such times as determined by the committee. In these examinations, consideration shall be given to the related instruction, as well as to the daily employment records of the apprentices.

XIV. EMPLOYMENT RECORDS OF APPRENTICES:

Records of the progress of all apprentices in the trade processes enumerated in the work processes will be maintained by The Alaska Railroad, and shall be made available to the Bureau of Apprenticeship and Training upon request.

XV. JOINT MANAGEMENT-LABOR APPRENTICESHIP COMMITTEE:

The Alaska Railroad agrees that a joint management-labor apprenticeship

committee will be established as recommended by the Bureau of Apprenticeship and Training.

XVI. CERTIFICATE OF COMPLETION OF APPRENTICESHIP:

Apprentices who complete their apprenticeship, and make passing grades on the ICS and REB courses shall be awarded a certificate by The Alaska Railroad. Certificates of Completion are also available from the registration agency for all apprentices completing their apprenticeship under registered standards.

XVII. MODIFICATION OF STANDARDS:

These standards shall automatically be amended to conform with any changes in subsequent bargaining agreements, and none of these provisions shall be construed contrary to the present, or subsequent, bargaining agreements. These standards may be modified subject to the approval of management and labor participants in the program and the Bureau of Apprenticeship and Training, U. S. Department of Labor.

All changes and modifications made as provided shall automatically become a part of apprenticeship agreements in effect at the time of the change.

XVIII. OFFICIAL APPROVAL:

These standards of apprenticeship and all modifications shall be approved officially by formal action of the respective employer-employee organizations and the registration agency. Original Standards of Apprenticeship approved and accepted July 20, 1965, and amendments thereto incorporated October 14, 1971.

UNITED STATES
DEPARTMENT OF TRANSPORTATION
The Alaska Railroad

Schedule of pay, rules and regulations governing Locomotive Engineers, Locomotive Firemen, Conductors, Brakemen, Baggagemen, and Hostlers.

Work Hours Act of 1962 (Public Law 87-581)

By virtue of Public Law 87-581, "Work Hours Act of 1962," effective October 12, 1962, The Alaska Railroad is covered by Section 201 of this law. It is the intent of this rule that wage payments shall not be less than the straight time and overtime requirements of the above said law. Compensation for a given day or week of work shall be computed, therefore, first, under the rules in this agreement relating to the dual system, including arbitraries, and again, under the requirement of paragraphs (a), (b), (c), and (d) of this rule. The compensation paid shall be the higher of these two amounts.

(a) For employees on duty during a given week of work, compensation shall be computed on the basis that overtime work in excess of 8 hours per day or in excess of 40 hours per week shall be compensated for at not less than time and one-half the basic rate of compensation, except that employees subject to this section who are regularly required to remain at or within the confines of their post of duty in excess of 8 hours per day in a standby or on-call status shall be paid overtime rates only for hours of duty, exclusive of eating and sleeping time, in excess of 40 hours per week.

(b) Hours of work, for purposes of this rule, are defined as actual time spent in the performance of work and shall exclude all hours

paid for under other rules contained in this agreement which do not represent actual hours of work.

(c) Payment for overtime work as provided for under this rule will be at the rate for the class of service performed on the basis of time in excess of 8 hours in a day or 40 hours in a work week, whichever is greater.

(d) No wage payments under any of the rules in this agreement relating to arbitraries shall be made to any train and engine service employees for any day or week of work with respect to which compensation is due and payable under this rule. Under this paragraph, arbitraries shall mean:

1. The amount by which payments under any guarantee rule exceeds the pay due, except for such guarantee, for all time worked. Such guarantee rules are calendar day, minimum day, and weekly guarantee.
2. Called and not used.
3. Runaround.
4. Tie up between terminals.
5. Deadheading.
6. Used off assignments.
7. More than one class of service.
8. Running through a terminal.
9. Initial delay.
10. Initial work.
11. Terminal delay.
12. Terminal work.
13. Copying a train order.
14. Coupling and uncoupling air hose.
15. Any other compensation earned under the rules of this agreement to the extent that such compensa-

tion would result in an amount computed on a daily or weekly basis exceeding the sum of straight time pay plus overtime at time and one-half for all hours worked in excess of 8 hours per day or 40 hours per week.

Uniforms

(a) The management of The Alaska Railroad may designate a passenger uniform to be worn by such employees as may be specified at all times while such employees are on duty, and such uniform may be subject to change from time to time as required by the Carrier, but for the present, at least consists of the following:

1. A uniform consists of cap, with appropriate insignia, coat, and trousers.

2. A white shirt with black four-in-hand tie.

3. Black shoes.

(b) The employees will assume and pay the entire cost of shirts, neckties, and shoes as specified by the Carrier to be worn with such uniform.

(c) The Carrier will supply free of charge such insignia as may be required of the employees for wear upon such uniforms.

(d) When it is considered necessary by the office of the Carrier charged with such responsibility for an employee subject to this agree-

ment to procure a new uniform, an order therefor will be furnished by the Carrier upon a clothier designated by the Carrier. The Carrier will assume and pay a sum equal to fifty (50) per cent of the cost of each such uniform consisting of cap, coat, and trousers (two pairs if desired) and the employee will assume and pay the balance of the cost of each suit where obtained through the designated clothier. In the event an employee desires to obtain his uniform through sources other than the clothier designated by the Carrier, it will be permissible for him to do so provided that such uniform meets the specifications prescribed by the Carrier, and in such instances the Carrier will likewise assume fifty (50) per cent of the cost, but not to exceed fifty (50) per cent of what the cost would be if secured through the designated clothier, upon presentation of receipted bill.

(e) The employees agree to keep their uniforms properly cleaned and neatly pressed at all times at their own expense, except the Carrier will pay for the cleaning of the head brakeman's uniform when assigned to mixed service and uniform is soiled on account of being required to perform such brakeman duties as reorassing, chaining crawbars, taking down brake rigging, etc. Paid receipt for the cleaning of the uniform to be submitted to the Transportation Branch, showing date and train number.

(f) It is agreed that in cases where a uniform or any portion thereof is lost, stolen, damaged, or destroyed as a result of carelessness on the part of the employee, the employee will repair such damage or replace such uniform at his own expense.

(g) It is agreed that an employee whose uniform is secured under the terms of this

agreement, and subsequently voluntarily disqualifies himself or declines to accept passenger service within a period of one (1) year from days such uniform as received, will thereupon refund to the Railroad the amount it paid toward the cost of such uniform. This may be done by payroll deduction.

(h) Employees securing uniforms under this rule and who leave the service for any reason in less than twelve (12) months from date of purchase will be required to refund to the Railroad one-twelfth (1/12) of the Railroad's portion for each month or fraction thereof, of service less than one (1) year.

Holidays

Trainmen and Enginemen, except extra board men, shall receive one basic day's pay (holiday premium pay) at the rate of the class and craft of service assigned for each of the following enumerated holidays, in addition to the earnings for the work performed:

New Year's Day, January 1
Washington's Birthday, Third Monday in February
Memorial Day, Last Monday in May
Independence Day, July 4
Labor Day, First Monday in September
Columbus Day, Second Monday in October
Veteran's Day, November 11
Thanksgiving Day, Fourth Thursday in November
Christmas Day, December 25

Men called from the extra board to protect a regular assigned vacancy will be entitled to holiday premium pay in accordance with the assignment of the regular crew, or, when called for and perform work on the calendar day of the holiday.

Only one basic day's pay shall be paid for each holiday irrespective of the number of shifts worked.

Men subject to holiday premium pay will be notified prior to end of shift of last work day before the holiday if they are not to work. If not notified, they will report for work and will be paid according to this rule. When necessary to work yard crews' on holidays at yards where crews' tours of duty lap over, crew starting work at 8:00 a.m., 4:00 p.m., and midnight will first be required to work.

Dual Pay System
Rule 1(a) Rates of Pay

Rates of pay for all service will be as shown in wage schedule. Effective July 1, 1969, the minimum daily earnings from all sources, for each calendar day, to which service payments are credited to employees serving all classes of service, shall be as follows:

On any day an employee works, or is called for service with entitlement to a day's pay, payment for the calendar day shall not be less than the Daily Earnings Minima as shown in wage schedule. The combined earnings of the calendar day including all arbitraries, miles and/or time earned for service during the calendar day are to apply against the Daily Earnings Minima.

Rule 1(b)

For road service employees in assigned service, who do not lay off, the weekly pay shall not be less than 48 times the applicable straight time rate per hour (mileage rate times 12-1/2). Weekly pay shall be computed for weeks beginning 12:00 a.m. Sunday and ending Saturday

at midnight, except that in the starting week of the assignment the guarantee will be the remaining assigned days in that week times 100 miles.

Rule 1(c) Multiple Unit Pay (Revision)

It is agreed that for pay purposes all units presently in service on The Alaska Railroad weigh between 250,000 and 300,000 lbs.

Enginemen will be paid according to the number of locomotive units operated in their train. Authorized rates establish one unit operation, which shall be extended $1.38 for each additional unit in road service or yard service when used for motive power. The basic rate of pay will be for the maximum number of units operated during the day or trip. Passenger head and power cars when used in passenger trains will be considered additional units.

Engines handled dead in tow (not used as motive power of train) will be the responsibility of the Engineer. He will be paid an additional one dollar thirty-eight cents ($1.38) per unit for each such unit per one hundred (100) miles.

Rule 1(d) (deleted)

Rule 1(e) Train Length Pay

Road freight conductors and trainmen will be paid according to the maximum number of cars (including caboose) handled in road movement at any one time on road trip anywhere between in-

itial starting point and point of final release. The basic daily rate of pay for cars hauled will be as shown in The Alaska Railroad wage schedule covering trainmen and enginemen and will become part of this agreement.

Rule 1(f) Local Freight Service

Rate of pay for local freight service will be established at the freight service rate plus 7.5 %.

Rule 2(a) Basic Day

In all classes of service one hundred (100) miles or less, eight (8) hours or less, (straightaway or turn-around), shall constitute a day's work. Miles in excess of one hundred miles will be paid for at the mileage rates provided.

Rule 2(b) Overtime

Computation of dual service overtime will be on a weekly basis, as follows:

When all work performed during work week is in yard service, hostling service or engine watching, overtime at the rate of [illegible] of the daily rate will be paid for those hours worked in excess of 40 hours.

When a work week results in both road and yard service, or in road service which results in miles on some days of the week and hours on others, the work week will be recorded and computed as follows:

1. The actual hours worked each day will be credited toward the week's total hours. This includes deadhead when combined with work.

2. The actual miles run each day will be credited toward the week's total miles. On each day that actual miles run total less than one hundred (100) miles, or that service performed is all in yard service, or that annual or sick leave is taken, one hundred (100) miles will be credited toward week's total mileage.

Overtime at the rate of 3/16 of the daily rate will be paid for each hour worked, except passenger service which will be at 1/8 of the daily rate, in excess of the quotient of the weekly mileage total divided by 12-1/2, provided forty (40) hours or more have been worked during the week. On any day of the week worked, payment shall not be less than the straight time hourly rate times the number of hours worked, with a minimum of eight (8) hours.

Payment for overtime work as provided for under this rule will be at the rate for the class of service performed during the period of the week which overtime payments are due.

Computation of dual service overtime will not necessarily be computed on the basis of Section 23 of the Act of March, 28, 1934, but may be computed as an arbitrary on a daily basis if such arbitrary produces the greater payment, in which case dual service overtime will be computed as follows:

On runs of one hundred (100) miles or less, overtime will begin at the expiration of eight (8) hours; on runs of over one hundred miles, overtime will begin when the

time on duty exceeds the miles run divided by twelve and one-half (12-1/2), all time to be computed daily. Overtime shall be paid for on the minute basis at an hourly rate of one-eighth (1/8) of the daily rate for passenger service and at an hourly rate of three-sixteenths (3/16) of the daily rate for all other classes of service.

Rule 3(a) Guarantee All Classes

Regularly assigned train and enginemen who do not lay off will be guaranteed not less than forty-eight (48) hours pay at straight time rates per calendar week, except trainmen and enginemen in yard service will be guaranteed not less than five (5) days per calendar week. On any of assignment day when employee is not used, except day or days of rest, he will be credited with not less than one hundred (100) miles or one (1) minimum day, and will be paid not less than the weekly minimum as provided in Rule 1, in addition to any compensation received under Rule 3(d). No assignment in road service will be for less than five (5) consecutive days or more than six (6) days. Yard asignments will be for five days.

Regularly assigned trainmen and enginemen in passenger and through freight service between Seward and Fairbanks will not be subject to the assignment portion of this rule. Regularly assigned trainmen and enginemen in mixed service between Anchorage and Fairbanks also will not be subject to the assignment portion of this rule. Such mixed trains will not handle more than twenty-five (25) freight cars, exclusive of cabooses, power cars, passenger and baggage cars. Power cars are limited to those furnishing power to cars in the train, otherwise the power car(s) shall be considered as one of the twenty-five

(25) freight cars. Such assignments may be assigned to tie up at Healy. Such trainmen and enginemen, assigned less than five (5) days, who do not lay off, will be guaranteed not less than six hundred (600) miles per calendar week and will be paid not less than one hundred (100) miles or one minimum day for each day not used as assigned.

Service in the Anchorage Yard, and/or branch line service (Jonesville, Whittier) may be combined with assignments under this rule, provided the general chairmen concur, and the total mileage does not exceed the trainmen's mileage limitation of nine hundred fifty (950) miles per week.

The following rules apply only to trainmen and enginemen in passenger and through freight service between Seward and Fairbanks, assigned less than five (5) days per week.

1. In the event the regularly assigned crew is assigned to make a turnaround and both the going and return trips are assigned to begin on the same calendar day, no additional payment will be made if circumstances require the return trip to be made on the day following the going trip. When the return trip is so delayed to the extent that it cannot begin on the day following the going trip, one hundred (100) miles will be paid the crew for each day not worked following the day the going trip was initiated until the return trip is made.

2. Miles in excess of one hundred (100) per subdivision or portion thereof will not be used to make up the weekly minimum guarantee on job in the category of passenger

and through freight service between Seward and Fairbanks; except, that in instances where mileage of subdivision exceeds two hundred (200) miles, or two (200) miles turnaround on turnaround runs on such subdivisions, miles in excess of two hundred (200) miles per subdivision or portion thereof will not be used to make up the weekly minimum guarantee of jobs in the category of passenger and through freight service between Seward and Fairbanks. Off days on these assignments will be given at the home terminal unless otherwise mutually agreed.

3. Men assigned to jobs in this category will not be used on days off when other men are available. When no other men are available and it is necessary to use men assigned to these jobs on their off days, it will first be determined that he can be returned to his job prior to the next assigned run. Extra men and/or yard men will be doubled over to protect yard work in preference to using men assigned to jobs in this category off their assignment.

4. Men assigned to positions in this category who are used on their days off, will be paid in accordance with Rule 15(c), and in any event not less than they would have earned during the period used off their assignment until their return to their regular assignment, except when used in extra passenger service originating in Anchorage involving the handling of military personnel and/or their dependents. When men are so used and are unable to fulfill their assignment, they will be compensated not less than they would have earned if they had remained on their assignment.

All earnings in such service off their assignment will be used to equal or offset the earnings they would have earned had they fulfilled their assignment. Such assignment in payment will be computed from the time so used off their assignment. Men so used will be called in order of reverse seniority, unless senior men have indicated they desire to work on off days. The ability to return to assignment without missing a trip shall govern, other factors being equal.

5. Rule 4(a) will apply when men are so used off their assignment in extra service.

6. Through freight crews assigned to run out of Healy to connect with another train and not called on day assigned due to late arrival of connection will be considered on duty for pay purpose at 11:59 p.m., and will be called later for connections and will be paid for all time from 11:59 p.m. to the time of call in addition to road trip, but not to exceed eight (8) hours. If called after the expiration of eight (8) hours, one hundred (100) miles under Rule 15 (c) will be paid in addition to miles run.

Example: Crew at Healy assigned to depart for Fairbanks on same day as arrival of connection from Anchorage. Train from Anchorage does not arrive at Healy until 2:00 a.m. following day. Crew at Healy would be placed on pay status at 11:59 p.m. on day of assigned departure but would be called for 2:00 a.m. the following day, with the time from 11:59 p.m. to the fol-

lowing 2:00 a.m. to be paid for in addition to road trip on an actual time basis.

Rule 3(b) Calendar Days and Minimum Days

Calendar days and minimum days paid for under Rule 3(a) will count as time on duty for purposes of computing overtime under Rule 2(b).

Rule 3(c) Extra Men Protecting Vacancies

When a regularly assigned man lays off of his own accord, or is held out of service, the extra man will be subject to the same pay rules as the regular man had he remained on his assignment.

Rule 3(d) Used on Rest Day

Assigned road crews will not be required to work in excess of six (6) days per week and assigned yard crews five (5) days per week, except in the case of necessity. When used on rest day or days in any class of service they will be paid one hundred (100) miles in addition to miles run on rest day or days.

Rule 3(e) Home on Rest Day

Trainmen and enginemen in assigned service given their day of rest at intermediate points away from home will be permitted to go home, provided transportation is available in both directions. If instructed to remain at intermediate point, or outlying point, they will be paid a minimum of one (1) day for each day so held.

It is agreed under this rule that trainmen and enginemen will make request by wire prior to 12:00 noon for permission to come home for day or days of rest. Request will be granted or

cenied not less than one (1) hour before departure time of last available train as shown in timetable schedule. Failure to reply shall be construed as being instructed to remain.

Instruction will be given by wire for crew's record. This will apply only to assigned work train service.

Rule 3(f) Firemen

1. All firemen listed on the January 1, 1964, seniority list, remaining in service without a break in service, will be designated as "protected employees."

2. No "protected employee" shall be furloughed or laid off because of any change in manning requirements of crew consist.

3. Management will submit a list of assignments on which firemen will be used and will be manned and designated as two-man assignments regardless of penalty or deadhead payments involved. This list may be reviewed on request by management or the organization for the purpose of adding or subtracting positions and revision, provided ten (10) days notice by either party is presented. All passenger assignments will be two-man jobs.

4. All assignments not designated as two-man assignments will be considered as one-man assignments and management will have the prerogative of operating them as either one-man or two man assignments, dependent entirely or the the following factors:

a. The necessity of operating as a two-man assignment to provide employment for a "protected emoloyee."

b. Temporary conditions justify the use of two men in the eyes of management.

Note: It is understood that a one-man job may have a fireman assigned to it because of either (a) or (b) above, but at any time it may be operated as a one-man job if the assigned fireman lays off for any reason.

5. No change will be made in the presently existing extra board rules.

6. All assignments will be made as per present rules and will designate the jobs as one-man or two-man jobs. The listing of two-man assignments is as follows:

a. All through mixed service job assignments as authorized in Rule 3(a).

b. Assigned through freight service between Anchorage and Healy.

Rule 4(a) Held Away from Home Terminal

Trainmen and enginemen in all classes of unassigned and irregular service held at other than home terminal will be allowed continuous time for all time so held after the expiration of sixteen (16) hours from the time relieved from previous duty. If held sixteen (16) hours after expiration of the first twenty-four (24) hour period, they will be allowed continuous time for the next succeeding eight (8) hours or until the end of the twenty-four (24) hour period, and similarly for each twenty-four (24) hour period thereafter. Should a trainman or engineman be called for duty after pay begins, time will be computed continuously. It is the intention of this section to allow each member

of the crew eight (8) hours out of each twenty-four (24) hours so held. No double payments will be made under this rule. Time paid under this rule will not be counted as time on duty for the purpose of computing dual system overtime under Rule 2(b), except when time paid under this rule is the only compensation for that day. Such time will be treated as a calendar day.

Rule 4(b) Assigned Work Train Crews

Rule 4(a) will apply to all assigned work train crews on the regular working days of their assignment. This does not apply to assigned snow crews.

Rule 4(c) Home Terminal Assigned Work and Snow Crews

Anchorage shall be the home terminal for all assigned work trains and assigned snow crews.

Rule 4(d) Payment of Held Away from Home Terminal

Held-away-from-home-terminal time accruing in accordance with Section (a) of this rule cannot thereafter be reduced or run off. Payment of initial terminal switching will not be used to absorb held-away-from-home-terminal time under this rule.

Rule 5 Beginning and Ending of Day

In all classes of service trainmen and enginemen's time will commence at the time they are required to report for duty and will continue until the time the engine is placed on the designated track, or when they are relieved at terminal. It is agreed that this rule not be

applied to deny rest under the hours of service rule.

Rule 6(a) Passenger Service Terminal Switching Delays

Trainmen and enginemen in passenger service required to make up their own train or handle their train to depots will be paid for all time consumed.

Rule 6(b) Initial Delay

Passenger crews delayed for any cause in excess of thirty (30) minutes after time called to leave or after work is completed under Section (a) of this rule will be paid for all time held in excess of thirty (30) minutes.

Rule 6(c) Final Work

Trainmen and enginemen in passenger service required to do switching after arrival at final terminal will be paid for all time consumed. It is agreed that the following work only is permissible under this rule:

> Putting heater cars to depot, freight house or roundhouse. Putting cars containing perishable freight or mail to freight house or depot. Turning or putting passenger equipment away.

Rule 6(d) Terminal Delay

Extra trainmen and enginemen in passenger service delayed for any cause in excess of fifteen (15) minutes after arrival of train at final terminal station will be paid for all such time delayed in excess of fifteen (15) minutes.

Extra passenger crews arriving at Curry or Healy on through passenger movements will be tied up on arrival and will be automatically on duty as of the tie-up time, except as otherwise instructed.

Trainmen and enginemen in assigned passenger service delayed for any cause in excess of fifteen (15) minutes after arrival of train at final terminal station will be paid for all such time delayed in excess of fifteen (15) minutes. This will only apply at final terminal as bulletined and assigned under Rule 11.

Assigned passenger crews arriving at Curry or Healy on through passenger movement will not be tied up on arrival and will not automatically be on duty as of tie-up time. This portion of Rule 6(d) does not apply to assigned crews unless Healy or Curry is designated as terminal under Rule 11(c).

Rule 6(e) How Paid

Initial and final terminal switching and delay will be paid for on the minute basis at an hourly rate of one-eighth (1/8) of the daily rate.

In computing road time, time on road will be computed from the time required to report for duty less time allowed for switching or delay.

Rule 6(f) Freight Service Initial Work or Delay

Trainmen and enginemen in freight and mixed service required to do switching, load livestock, etc., or when delayed for any cause before leaving initial terminal station will be

paid in addition to miles or hours made on road trips.

Rule 6(c) Initial Delay

When switching is not required and trains are delayed more than thirty (30) minutes from the time called to report until departure of train, all time in excess of thirty (30) minutes will be paid for in addition to miles or hours made on road trip.

Rule 6(h) Initial Switching and Delay

When initial switching is required, it is understood that crews will be paid in addition to miles or hours made on road trip from the time work is begun until completed and engine is coupled to train. When crews are further delayed, all time held in excess of thirty (30) minutes after engine is coupled to train will be paid for on the minute basis in addition to miles or hours made on road trip.

Rule 6(i) Initial Switching Freight and Mixed Crews

Freight and mixed crews, when required to perform initial switching, will be allowed actual time on a minute basis; if more than four (4) hours' service is performed, actual time will be allowed with a minimum of eight (8) hours. Actual time only will be used for computation of overtime under Rule 2(b).

Rule 6(j) Payment Initial Terminal Switching or Delay

In initial terminal switching or delay, time on the road will be computed from the time required to report for duty less time allowed for

switching or delay and will be paid on a minute basis at an hourly rate of one-eighth (1/8) of the daily rate. When overtime accrues, the allowance for switching or delay, or the overtime, whichever is the greater, will be paid in accordance with Rule 2(b).

Rule 6(k) Final Work and Delay

Trainmen and enginemen in freight or mixed service required to do switching, or delayed for any cause, after arrival at final terminal will be paid for all such time in addition to miles or hours made on the road trip. Final terminal service, except as provided for in paragraph (n) of this rule, shall be computed from the time the engine reaches the designated main track switch connecting with the yard track and paid for the full time at the end of the trip on a minute basis of one-eighth (1/8) of the daily rate per hour when no overtime accrues until the time of release.

Rule 6(l) How Paid

Initial delay, initial switching, terminal delay and terminal switching will be paid to crews on miles on a weekly basis but not to crews paid overtime on a weekly basis under Rule 2(b).

Rule 6(m) Final Work

In the final terminal switching for freight and mixed crews, the following work only is contemplated under above rules:

Putting heater cars to depot, freight house, or roundhouse.
Putting cars containing perishable freight or mail to freight house or depot.
Putting passenger equipment away.

Setting out coal destined to Elmendorf Air Force Base and/or Fort Richardson at Whitney.

Rule 6(n) Terminal Switching Freight and Mixed Crews

Freight and mixed crews, when required to perform switching service other than specified above upon arrival at final terminal will be paid in accordance with paragraph (k) or (l) of this rule, with a minimum of two (2) hours at an hourly rate of one-eighth (1/8) of the daily rate in addition to the miles or hours on their road trip.

If more than two (2) hours and less than four (4) hours service is performed, actual time will be allowed. If more t four (4) hours service is performed, actual ! will be allowed, with a minimum of eight (8) hours, at an hourly rate of one-eighth (1/8) of the daily rate.

Where terminal switching is required under this paragraph, time will be computed from the time the engine reaches the designated track switch connection to the yard track and will continue until the engine is placed on the designated track or crews are relieved. Actual time only will be used in computation of overtime under Rule 2(b).

Rule 6(o) Preparatory Engine Time

Enginemen in all classes of service who are called in advance of the time trainmen are called for the purpose of preparing engines, or are required to work after the train crews are tied up, will be paid for all such time on a minute basis in addition to miles or hours made on the road trip.

When engine crew is called at the same time train crew is called and receive engine co-

livered on train, no allowance for preparatory time will be made.

Rule 6(b) Passenger Service Ticketing

Passenger conductors required to report at their initial terminal station for the handling of rail and/or sleeping car tickets one hour prior to the schedule leaving time will be paid for such time at the regular passenger conductor rates.

Head brakeman on passenger trains or mixed trains when required to assist the baggageman in handling mail, baggage, express or company green tags in section houses, depots, baggage rooms, etc., shall be paid passenger brakeman rate in passenger service and freight brakeman rate in mixed service, plus one and one-quarter (1-1/4) cents per mile in addition to miles or hours earned in service performed.

In order to provide a clear understanding of the intent and purpose of green tag shipments (company material tendered for movement on passenger or mixed service trains loaded to the baggage car) the following establishes the rights and restrictions of management within the scope of negotiated agreement.

The Transportation Officer or his designee will be responsible for control of green tag shipments. Green tagged company material will be recorded on baggage waybill.

1. Through movements of company material between Anchorage and Fairbanks may be handled without regard to conditions of Paragraph 2 of this agreement when contained in boxes provided, caged or placed in confined area of the baggage car specifically identified for this purpose. Such company material shall be placed

aboard and removed by other than trainmen and enginemen.

2. Company material tendered for green tag movements between initial and final terminal will be restricted to items of an urgent or emergency nature deemed necessary to sustain functional operating elements of the Railroad. Items of normal resupply will not be tendered for green tag shipment. Company material tendered for movement not authorized by the Transportation Officer or his designee will not be accepted nor handled without clearance from proper authority. Acceptance by train baggageman of company material when tendered for movement which has not been authorized by the Transportation Officer or his designee will not subject the carrier to penalty claims submitted under Rule 7(a).

Rule 6(c) Computation Delay or Switching Time

Delayed time or switching time will be computed from the end of prepatory time.

Rule 6(r) Rules Applicable

Final tie-up time of trainmen and enginemen in passenger service will be as per paragraph (c) or (d); for freight or mixed service as per paragraph (k) and (l), or (n); for work, yard and snow service, final tie-up time when engine reaches the designated track and crews are relieved from duty.

Rule 6(s) Preparatory or Final Time Limitation

On runs of less than one hundred (100) miles or service less than eight (8) hours, no preparatory time or final tie-up time will be allowed.

Rule 6(t) Initial and Terminal Work

If necessary to couble over or to back down and head out, such movement will not be considered switching. Putting caboose on train, or taking caboose off train, or putting on and taking off engine will not be considered switching.

Rule 6(u) Intermediate Work at Whittier

Road crews required to perform switching at Whittier will be paid actual time consumed, with a minimum of four (4) hours for such service, in addition to their road trip allowance and with no deduction therefrom. Actual time on duty will be used for computation of overtime under Rule 2(b).

Wying of engines and/or passenger equipment (including mixed train equipment) and the shoving of such equipment to dock or depot for the handling of passengers and the placing of mixed train equipment on train will not be considered switching under the above rule. Reversing of equipment will be considered switching under this rule. Switching exceptions outlined in the first paragraph of Rule 6(x) are also excepted under this rule.

Rule 6(v) Assigned Work and Snow Service Crews

Initial and final terminal delay and/or work rules do not apply to assigned work and snow crews. See Rules 22(a) and 23(a). Exception: Assigned work or snow crews used in road service will be paid at road rules. Also, see Rule 6(r).

Rule 6(w) Switching Performed by Assigned Through Freight Crews

Assigned through freight crews when required to perform switching at the following points: Fairbanks, Healy, Anchorage and Seward, when such point constitutes a turning or intermediate point, will be allowed actual time on a minute basis; if more than four (4) hours service, actual time will be allowed with a minimum of eight (8) hours in addition to their earnings for the day or trip. Actual time only will be used for computation of overtime under Rule 2(b).

Rule 6(x) Revised - Road-Yard Movements

If necessary to double over or to back down and head out, such movement will not be considered switching. Putting caboose on train or taking caboose off train, or putting on or taking off engine, handling engine to and from train to ready track and engine house, including all units coupled and connected in multiple; and exchanging engine of its own train, will not be considered switching.

Road freight crews may be required at any point where yard crews are employed to do any of the following as part of the road trip, paid for as such without any additional compensation and without penalty payments to yard crews, hostlers, etc: one straight pickup at another location in the initial terminal (in addition to picking up train) and one straight setout at another location in the final terminal (in addition to yarding the train); one straight pickup and/or setout at each intermediate point between terminals; switch out defective cars from their own trains regardless of when discovered; handle engines to and from train to ready track and engine house including all units coupled to the

operating unit (units); pick up and set out cars of their trains from or to the minimum number of tracks which could hold the cars provided, however, that where it is necessary to use two or more tracks to hold the train, it is not required that any track be filled to capacity; and exchange engine of its own train.

NOTE: Rules or regulations not affected include, but are not limited to, initial and final terminal delay rules and conversion rules.

Rule 6(v) Coupling and Uncoupling Diesel Locomotive Units

Trainmen and Enginemen when required to setout or pickup an additional unit or units, when no mechanic is on duty to perform this service, will perform all service necessary to such setout or pickup. Trainmen and enginemen will be paid one (1) hour at the pro rata rate of the trip for performing this service at up to and including three separate points. If setouts or pickups are made at more than three points, an additional hour will be paid. Setting out or picking up multiple units is considered as one setout or pickup.

This payment is in addition to all other compensation for the trip. When the crew is paid under Rule 6(u) at Whittier, the actual time performing this service will be deducted from the switching time paid under Rule 6(u) in excess of the four (4) hour minimum when such switching time exceeds the four (4) hour minimum.

Rule 7(a) More Than One Class of Service in One Day

Assigned or extra crews or men being used in

more than one class of service (road, yard or work) will be paid not less than one minimum day in each class of service. The use of yard crews in road service will be restricted to bringing road crew into the terminal where the yard crew is employed provided there is no extra board available to make up a crew and no unassigned crew available, and the distance straightaway to the point where the road crew is located does not exceed twenty-five (25) miles and the trip is occasioned by engine failure on the train to be helped. Yard crews so used will be paid actual time from time they leave the yard until they return to the yard, with a minimum of four (4) hours in addition to the regular yard pay, and without deduction therefrom for the time consumed in said service.

Should an off-duty yard crew be used, they will be paid not less than a basic day under yard conditions.

Rule 7(b) Limitation

The above will not apply to men or crews used in more than one class of road service, such as freight, passenger, mixed.

Crews in work service may be used in snow service and vice versa without payment of additional pay, but work crews so used will be paid snow service rates for the day or trip.

Assigned or extra crews in passenger service will not be required to handle freight equipment, and if so used, will be paid for two classes of service under Rule 7(a). Except assigned crews in passenger service between Anchorage and Fairbanks may handle three (3) tour buses when such buses are used in connection with revenue passengers carried aboard such

trains and may be handled on the number of flat cars required to handle three buses without payment of two classes of service. Crew will be paid at the freight rate of pay for such handling.

Rule 7(c) Classes of Service--Exception

Crews called for road service and performing initial terminal switching prior to the departure from initial terminal, or final terminal switching after arrival at final terminal, will not be considered as having performed two classes of service, and will be compensated in accordance with road rules and Rule 6, Terminal Switching.

Freight crews (road or mixed) switching or delayed at Portage for any reason will be paid, exclusive of eating time and coal and water time on steam power, for all time in excess of thirty (30) minutes in addition to and without deduction therefrom of their road trip allowance.

Rule 7(d) Work Train Service--Exception

Road crews required to distribute ties, rails, angle iron, spikes, or required to dump gravel, rock or cinders between terminals, will be paid for actual time engaged in such work, with a minimum of one (1) hour in addition to all other allowances for the trip or day's work. Provided, however, that company material billed to and unloaded or set out at stations enroute will not be regarded as distributed.

Road crews when required to re-rail cars or engines will be paid for actual time engaged in such work, with a minimum of two (2) hours, in addition to all other allowances for the trip or day's work. Yard crews or crews being paid un-

der Rule 6 (u) will not be paid additional payment for the derailment of cars or engines.

Yard crews required to dump cinders, gravel or rock for commercial purposes will be paid for actual time engaged in such work with a minimum of one (1) hour in addition to all other allowances, and without deduction therefrom, for that day. Gravel so dumped, if used in track construction, maintenance or repair, will be considered work train service and Rule 7(a) will apply. This rule also applies at terminals where yard crews are not employed.

Crews assigned or called in designated Commercial Work Train Service for the purpose of handling revenue producing loads of rock, sand, gravel, cinders, aggregate of any kind or refuse may be operated under existing work train rules with regard to picking up and/or setting out at one or more locations within the limits of the assignment. Crews in this service may be operated into and through terminals without regard to automatic release provisions of the Agreement and may handle train in any direction during each trip or succession of trips as may be necessary to perform the loading, unloading, spotting and movement of equipment used in this service within the limits of the assignment. Crews assigned or called in Commercial Work Train Service will be guaranteed not less than eleven (11) hours per day of assignment or call, regardless of whether or not actual service is performed, time to be computed on a miles or hours basis. It is not intended nor contemplated that crews assigned or called in this service will be required to perform other services; however, should other services be performed, all rules with regard to two classes of service and payment thereof will apply.

Yard crews required to dump cars handled in consist of designated commercial work train will be allowed a maximum of three (3) hours pay, regardless of total time required to perform such work, this payment to be in addition to other earnings for that day.

Rule 7(e) Highest Rate Paid

Trainmen or enginemen performing service in more than one occupation in a day or trip will be paid for the entire service at the highest rate applicable. Assigned yard men used in road service when extra men are not available will be paid mileage and overtime at yard rates, and in any event will be paid not less than they would have earned on their assignment.

This rule will not apply when assigned yard brakemen holding conductor's seniority are used under Rule 9(c)-14. Such men used under Rule 9(c)-14 will be paid the rate applying to the class of service in which used.

Rule 7(f) Payment Local Freight Rate, Through or Irregular Freight Crews

Crew on through or irregular freight service required to load or unload freight at more than two points enroute or pick up or set out or do station switching or rebrass hot boxes at three or more points enroute (between initial and final terminal), or when the time actually consumed in picking up and/or setting off and/or station switching and/or rebrassing hot boxes exceeds one hour and thirty minutes in the aggregate for the entire trip during any one trip or tour of duty will be paid local freight rates for the entire service performed. If payment is claimed under other rules, such as Rule 6(u), etc., for work or time, such station

work or time will not be considered under this rule. Repressing a hot box shall constitute one "unit" if performed in train. If performed on set out car, subsequent pick up will constitute an additional unit of work.

The following shall not be considered picking up and/or setting off cars for the purpose of this rule:

(1) Setting out or picking up of train according to Rule 6(x), handling caboose or wying engines at turning point.

(2) Picking up cars at first point or setting off cars at last point at which cars are picked up or set off, respectively, within the initial or final terminal.

(3) Setting out defective car except setting out of cars with hot boxes.

(4) Doubling hills.

(5) Setting out or picking up cars (but not setting out or picking up at the same point) for the purpose of adjusting tonnage for established engine ratings.

This rule will not be used to abolish presently assigned local crews. Union committee will have the right to request consideration be given to assignment of other local crews when excessive payments are made under this rule for the loading and unloading of freight. Payment under this conversion rule will not be considered as used off assignment or performing two classes of service for payment under Rule 15(c). Payment under this rule will not be considered for leave purposes.

Rule 7(c) Switching Between Spur and Siding

Road crews when required to set out or pick up cars which cannot be set out or picked up in the usual manner, due to one of the tracks being a spur or a track which cannot for some reason be switched from both ends, shall be paid, for each movement, miles or hours, whichever is the greater for all time consumed, with a minimum of one (1) hour, in addition to miles or hours earned on road trip.

Exceptions:

(a) Movement conducted entirely within Yard limits.

(b) When the distance from the near siding switch and the spur or other track switch is less than one-half (1/2) mile.

Rule 8 Book Rest

Trainmen and enginemen who have been working long hours for a succession of trips and on arrival at terminal register request longer periods of rest than eight hours will be granted such request except in emergency cases. Men will not be required to go out when they need rest. Rest in excess of twelve (12) hours will not be granted. When rest in excess of legal period is requested and such request results in the call time falling after midnight, no claim may be made for the lost calendar day.

A succession of trips under this rule is interpreted to mean two or more trips of twelve (12) hours or more, providing crews are called on rest on succeeding trips. In such event, they will be granted ten (10) hours if requested.

Rule 9(a)-1 Handling Extra Boards and Extra Men

Separate extra boards for engineers, firemen, conductors, and brakemen will be maintained at Anchorage.

Rule 9(a)-2 Conductors' Extra Board - Anchorage

There will be established at Anchorage, a Rotary Conductors' extra board of five men who will be paid not less than 700 miles per week at freight service rate (all miles earned to apply against guarantee including arbitraries, straight time and overtime, hours to be converted to equivalent miles of pay), time to be computed on a weekly basis, provided they do not lay off or otherwise miss time. The difference in miles earned and 700 miles will be paid at freight service rate. Time so lost will be deducted at the rate of one hundred (100) miles for each day laid off except that, when such man has performed service entirely within the calendar day in question and such lay off is because of sickness or is not later than 3:30 p.m., no deduction will be made for such layoff. Deductions will be made for missing a call or laying off on call for any reason. In the event guarantee payments exceed 700 miles per week, one conductor for each 700 miles paid may be reduced from the board. Conductors' rotating extra board will be considered a regular assignment and will be governed by seniority rules covering regular assigned jobs. In the event a vacancy occurs on this board and no bids are received, the youngest conductor working as brakeman or baggageman on brakeman's extra board will be assigned. These jobs will be 7-day assignments with no rest day. Men bidding on these jobs must be qualified baggagemen and have passenger

uniforms. Rule 3(d) will not apply to jobs established under this rule.

Rule 9(a)-3 Conductors' Extra Board - Fairbanks

There will be established at Fairbanks an extra board consisting of three qualified conductors for relief purposes for trainmen whose home terminal is designated as Fairbanks or Healy. Conductors assigned under this rule may be used as brakemen or baggagemen if conditions require. This board will be regulated in accordance with Rule 9(a)-2. This conductors' extra board at Fairbanks will be considered a regular assignment covering regular assigned jobs. Men bidding on these jobs must be qualified baggagemen and have passenger uniforms.

Rule 9(a)-4 Conductors' Extra Board - Seward

One qualified conductor will be maintained at Seward for relief purposes for trainmen whose home terminal is designated as Seward. Conductor assigned under this rule may be used as brakeman or baggageman if conditions require. This board will be regulated in accordance with Rule 9(a)-2. This conductors' extra board will be considered a regular assignment and men bidding on this job must be qualified baggagemen and may be required to have passenger uniforms. This rule will only apply when there are more than two crews assigned with home terminal Seward.

Rule 9(a)-5 Engineers' Extra Board - Anchorage

There will be established at Anchorage an Engineers' Rotary extra board of five men who will be paid not less than 700 miles per week at

freight service rate (all miles earned to apply against guarantee including arbitraries, straight time and overtime, hours to be converted to equivalent miles of pay, except weight on drivers), time to be computed on a weekly basis, provided they do not lay off or otherwise miss time. The difference in miles earned and 700 miles will be paid at freight service rate. Time so lost will be deducted at the rate of one hundred miles (100) miles for each day laid off except that, when such lay off is because of sickness or is not later than 3:30 p.m., no deduction will be made for such layoff. Deductions will be made for missing a call or laying off on call for any reasons. In the event guarantee payments exceed 700 miles per week, one engineer for each 700 miles paid may be reduced. Engineers' board will be considered a regular assignment and will be governed by seniority rules covering regular assignments. In the event a vacancy occurs on the Engineers' board and no bids are received, the youngest engineer working as fireman will be assigned. These jobs will be 7-day assignments with no rest day. Men bidding on these jobs must be qualified firemen. Rule 3(d) will not apply to jobs established under this rule. (Engineers on engineers' extra board who are not qualified for passenger service, rotary service and branch service on the Jonesville branch will be runaround and will retain their position on the board. Rule 9(d) "Runarounds" will not apply.)

Engineers will be required to qualify themselves for all classes of motive power covered by these rules and there will be no expense to the railroad by reason therefor.

Hired engineers with six (6) months' experience in road or road work service on this railroad

MEMORANDUM OF UNDERSTANDING
Between
THE ALASKA RAILROAD
And
UNITED TRANSPORTATION UNION

The parties signatory hereto mutually agree in a joint cooperative effo to provide an opportunity for those Engineers not yet qualified between Portage and Seward.

This Agreement is predicated on future increases in volume of traffic between Anchorage and Seward and our infrequent service to Seward curre providing restricted opportunity to qualify Engineers between Portage a Seward.

1. On Assignments of which an Engineer is called to make qualifying trips between Anchorage and Seward, the Engineer of that crew will be entitled to the W/D Fireman rate of pay and the calling of the second Engineer to qualify will not affect the regular assigned or qualified Engineer's rate of pay.

2. As available, Engineers (not qualified) will be called from the board or used off their regular assigned positions to qualify as Engineers between Anchorage and Seward. Engineers called from the board will be called in respect to seniority to qualify without respect to positions on the board. Rule 9(d), Runaround, will not be applicable.

3. Engineers used off regular assigned positions to qualify will not be called or used on days of rest or layover day unless the individual employee requests or concurs in making a qualifying trip on his day or days of rest. Employees used on off days or off regular assigned position, Rule 3(d) and 15(c), will not be applicable.

4. Engineers making qualifying trips will be paid the rate of Engineer operating with Fireman.

5. For regularly assigned Engineers making qualifying trips, compensation for said trip will not be less than miles run or an amount equal to the individual's regular assignment, had he worked his regular assignment, whichever is greater.

6. Differences or disputes regarding the application or interpretation of this document will be resolved through joint discussion and consultation between the parties. It is further understood that this Memorandum of Understanding may be cancelled upon thirty (30) calendar days written notice by either party.

FOR THE ORGANIZATION:

Michael W. Olson
United Transportation Union

FOR THE ALASKA RAILROAD:

J. A. Hepworth
Acting Supt. of Transportation

Date

are eligible for passenger service. Engineers having 300 calendar days firing or running in road service from the date of promotion will be eligible to qualify with the Road Foreman of Engines for passenger or Jonesville branch service.

Rule 9(a)-6 Firemen's and Brakemen's Extra board - Anchorage

There will be established at Anchorage separate rotating extra boards for firemen and brakemen. Men on these boards will be guaranteed 700 miles at freight service rates per week, (all miles earned to apply against guarantee including arbitraries, straight time and overtime hours to be converted to equivalent miles of pay, except weight on drivers) provided they do not lay off or otherwise miss time. (The difference in miles earned and 700 miles will be paid at freight service rates.) Time so lost will be deducted at the rate of one hundred (100) miles for each day laid off except that, when such man has performed service entirely within the calendar day in question and such layoff is because of sickness or is not later than 3:30 p.m., no deduction will be made for such layoff. Deductions will be made for missing a call or laying off on call for any reason. Men on these boards will be considered as regularly assigned; but will not prevent youngest man on the board from being force assigned.

Men on this board will be subject to call seven (7) days per week with no rest day. Rule 3(d) will not apply to jobs established under this rule. The management will control sole right to regulate these boards and the regulation will be made as soon as possible following the close of the calendar week.

No protected fireman will be separated from the service provided one-man crews are operating with one man except protected fireman may be separated from the service, even though one-man crews are operating with one man, if the protected man refuses to exercise seniority rights over a non-protected employee holding an assignment at the time force reductions are made.

All other extra boards are revised accordingly.

All extra boards will be regulated only at weekly intervals except firemen and brakemen may be added before the end of the week and will be guaranteed pro rata the balance of the pay period and will be retained on the board the succeeding pay period.

Rule 9(a)-7 Computation Calls

In the event promoted men on firemen's or brakemen's extra boards are used a total of five (5) or more calls a week, in promoted status, one conductor or engineer will be added to conductors' and engineers' board respectively. It is understood that if a promoted man from non-promoted board is called and either worked or deadheaded to an outlying point, calls will be computed as follows:

Turnaround service - where time is computed continuously, one call will be credited.

Straightaway trip - to distant terminal - credit one call and from distant terminal - credit one call.

Snow - Work and Yard - if tied up away from extra board, each day so used - credit one call.

In the event management desires to increase conductors' or engineers' extra board, as per Rule 9(a)-9, they may take the oldest promoted available man from the firemen's or brakemen's extra board and use him temporarily, for the life of the bulletin, on the conductors' or engineers' board. When assignment is made and man assigned to conductors' or engineers' board is available to protect assignment, the brakeman or fireman so used will be returned to his respective board.

Rule 9(a)-8 Engineers' Extra Board - Seward and Fairbanks

At management's prerogative, an extra board may be established at Seward and Fairbanks of one (1) engineer at each point for relief purposes, who will be paid in accordance with Rule 9(a)-5. When conditions require a reduction in force, the positions will be abolished in preference to the assigned engineer-hostler or assigned terminal hostler. These boards will be considered regular assignments and will be governed by seniority rules governing regular assignments. Men assigned to these jobs will be fully qualified in all services.

Rule 9(a)-9 Board Regulation

All extra boards shall be regulated by management by 12:01 a.m. Monday following the close of the prior week.

Rule 9(a)-10 Extra Board Assigned Conductors and Engineers

Men assigned to conductors' or engineers' extra boards will be paid conductors' or engineers' rate if used at a lower rate of pay.

Rule 9(b)-1 Rotary Board Rules

All extra train and enginemen are required to register their mileage and hours on duty at the completion of each trip in a book provided for that purpose in the Anchorage Yard Office, Fairbanks Yard Office, and Seward Yard Office. Extra men working or deadheading into terminal where book of registration is maintained are required to register mileage and hours on duty within one (1) hour after tie-up. Men failing to comply will be held off from respective board for a period of 24 hours from the time actual registration is made, time so held off to be deducted from the weekly guarantee. Each trainman and engineman will be responsible for registering at the completion of his trip.

Rule 9(b)-2

Extra train and enginemen at outlying points, where no book of registration is maintained, must wire or telephone Anchorage Crew Dispatcher total mileage and hours on duty for the week after the completion of last service rendered each Saturday. Failure to do so will subject employee to disciplinary action, and will void guarantee provisions for that pay period.

Rule 9(c)-1

Trainmen and enginemen bumping on conductors' or engineers' extra board will displace the youngest man and will stand last out on the extra board.

Rule 9(c)-2

When it is necessary to run a work train or

snow fleet on their day or days of rest, preference will be given to the regular crew, except at Anchorage where extra boards are maintained.

Regular crew will be used out of Anchorage on rest day or days if the call is to an outlying point where crew is to be tied up to continue assignment the following week.

Rule 9(c)-3

Engineer-hostler at outlying terminals, where no extra board is maintained, will be called for extra work originating at their home terminal unless a regular assigned crew has been called as a unit to perform service.

Rule 9(c)-4

When two or more jobs are called at the same time, calls will be determined on the following basis: (1) Deadhead; (2) Freight; (3) Passenger; (4) Work or Snow Service; (5) Yard; (6) Hostling.

Rule 9(c)-5

When a live diesel unit, not coupled in tandem, is passengered, a fireman or an engineer will be called.

Rule 9(c)-6

Trainmen and enginemen assigned or working off an extra board roster will be called in such order as to protect their respective board first. When it becomes necessary to call an engineer or conductor from the board for a firing or braking job, the man first out on his respective board will be called. When necessary to call a promoted engineer or conductor from

fireman's or brakeman's extra board, the promoted man first out will be called.

Extra Crew Called in Road or Yard Service

Example #1 Order of Call: Conductors' and Engineers' extra board are both exhausted.

Brakeman's Extra Board
First out called as brakeman #1
Second out called as Brakeman #2
Promoted man first out on the remaining roster will be called as conductor.

Fireman's Extra Board
First out called as fireman (if called - for illustration of example)
Promoted man first out on the remaining roster will be called as engineer.

Example #4 Order of Call: Brakeman's and Fireman's extra board are both exhausted.

Conductor's Extra Board

Conductor first out called as conductor.
Conductor second out called as Brakeman #1
Conductor third out called as brakeman #2.

Engineer's Extra Board
Engineer first out called as engineer.
Engineer second out called as fireman (if called - for illustration of example)

Rule 9(c)-7

Rule 26 will apply when hostlers are used in road service.

Rule 9(c)-9

Trainmen and enginemen who have been laying off and mark up for duty on the extra board will not be used ahead of men who are on rest or whose rest is up prior to a call being placed. This also applies to extra men deadheading into Anchorage, or any other point where an extra board is maintained, and marking up on the extra board, provided they have received a basic day's pay for the calendar day involved.

Example: A man deadheads to Anchorage from Healy, departing Healy at 1:00 a.m. and arriving Anchorage at 8:00 a.m. In this case, he will have received eight (8) hours' pay for the deadhead for the calendar day and upon working up will not be used except in turn. Men displaced who lose pay as a result, will be paid for the workweek which includes the day or days of time lost under Rule 11(j).

Rule 9(c)-10

New assignments not already protected by regularly assigned men will be protected by men off the respective extra boards and no regularly assigned men will be protecting such assignment. Assignments made to avert separation of protected employees need not be covered by men off the firemen's extra board.

Rule 9(c)-11

All brakemen now in service and who subject themselves to extra board service must be qualified baggagemen. All newly hired brakemen must qualify themselves as baggagemen prior to marking up on extra board. Brakemen must obtain a passenger uniform within sixty (60) days from date of hire.

All brakemen must obtain the required passenger uniform before bids will be accepted on assignments which require such uniform, and in the event brakemen with less than sixty (60) days' service are force assigned to passenger assignments, such assignment shall be made in seniority order and an appropriate passenger uniform must be obtained immediately.

Rule 9(c)-12 Conductors' or Engineers' Extra board exhausted

When the conductors' or engineers' extra board is exhausted, the brakeman or fireman on the brakemen's or firemen's extra board holding conductor's or engineer's seniority who is first out and rested at the time of the call will be used.

Rule 9(c)-13 Hoo Book

When all extra boards are exhausted of qualified men, assigned men who have indicated their desire for extra work will be used. These men will register with the Chief Crew Dispatcher or with the Yardmaster, at outlying points. The senior man will be used according to their seniority which they are exercising on their regular assignment, provided the senior man who can be returned to his assignment without undue penalty payment will be called. Men so registered will be considered permanently registered until withdrawn in writing. If such men wish to be temporarily laid off, they must give Crew Dispatcher or Yardmaster forty-eight (48) hours notice prior to rest days. Men who lay off on call will be removed from register and not allowed to register again for ninety (90) days. Example: When a conductor is needed, the oldest registered man, holding conductor's seniority,

who is exercising his conductor seniority on a regular assignment will be called.

At Anchorage, enginemen called under this rule will be called from Enginemen's Rotary Hog Book.

Men will be called in turn and when so used will advance to the bottom of the rotary hog book. Men not called and bypassed by qualifications, ability to return to regular assignment, rest or other restrictive requirements shall retain their positions until used.

a. Assigned hostlers and enginemen assigned on assignments involving only yard work who have indicated their desire for such work will be considered for all enginemen or fireman vacancies under this rule in preference to incumbents registered and assigned other classes of service or mixed yard-road assignments.

b. Yard engineers assigned only yard work will have preference for engineer vacancies only.

Where the word "hostler" is used in this rule, it includes engineer hostlers, terminal hostlers, and hostler helpers.

Rule 9(c)-14 Use of Promoted Men off a Firing or Braking Assignment

In the event all extra boards are exhausted of qualified men and no qualified men are available in Hog Book, and an engineer or conductor is needed, the youngest qualified man holding a brakeman or fireman's assignment which ties up in Anchorage each night will be called except that such man will not be called on his day of

rest if other qualified men in the same category are available, and when not called, Rule 9(d) "Runaround" will not apply. When used on their day of rest, Rule 3(d) will apply. Men used off assignment under this rule will be compensated for 8 hours at brakeman's or fireman's rate for each calendar day held waiting for his regular assignment.

Rule 9(c)-15 Use of Men Within Same Grade

If all extra boards are exhausted and no qualified men are available in Hog Book and it is necessary to use a man off his assignment in same grade (i.e. engineer used as engineer), the senior man who can be returned to his assignment without undue penalty payment will be called. This rule includes hostlers and hostler helpers.

Rule 9(c)-16 Use of Men Assigned Jobs Under Rule 3(a)

The use of men assigned to jobs in category of Rule 3(a) will be as outlined in Rule 3(a) of agreement.

Rule 9(d) Runarounds

Extra men not called in turn will be credited with four (4) hours if used within twelve (12) hours from time of runaround. If not used within twelve (12) hours from time of runaround, they will be credited with eight (8) hours, provided, however, that on any crew, regular or extra, not more than one brakeman with less than ninety (90) days' experience as a brakeman or switchman on this or any other railroad operated under standard rules will be called, if other qualified extra men are available and no runaround payment shall accrue to such extra men. In the event there is one vacancy on a regular assignment and extra man first out is not qualified under this rule, extra man will be called in turn and regular man called as flagman. No firemen with less than six (6) months' experience on this or any other railroad operating under standard rules will be called for passenger service. No runaround shall accrue but man runaround will retain position on board. Firemen with six (6) months or more experience must qualify with the proper official before becoming eligible for passenger service.

Regularly assigned men not called in proper turn under Rule 9(c) will be paid four (4) hours only as a runaround.

Rule 9(e) Missing Calls - Layoffs

Extra men, either train or enginemen, laying off of their own accord, or extra men missing a proper call will be held off extra board for twenty-four (24) hours from time call is missed, or time of lay-off and will not be used for twenty-four (24) hours if other extra men are available. Extra men who lay off of their own accord, or miss call at time of call for any

reason, will be held off board for twenty-four (24) hours and will, upon returning to board, be required to go to point of previous call and return on their own time, if the call was to deadhead to an outlying point and extra man is still fufilling this position. Time laid off under this rule will be deducted from weekly guarantee.

Engineers and firemen who miss a call from the board at Anchorage will be held off their respective boards until both engineers' and firemen's boards are exhausted of qualified men. The only exception will be if there are no qualified men available on either board. Firemen used as engineers, as outlined here, will not be computed as calls under Rule 9(a)-7.

Rule 9(f) Outside Points - Limitation

Extra men sent to points outside Anchorage to fill a job or vacancy may be held to fill not more than one (1) additional job or vacancy Curry south to and including Seward; for jobs or vacancies originating north of Curry to and including Fairbanks, such extra men may be held to fill not more than two (2) additional vacancies. The held-away-from-home-terminal rule will apply between times tied up and time brought on duty when going from one job or vacancy to another. Additional reliefs as provided for herein are limited to the number permissible at the point where first used, and if deadheaded into Curry from the north to make a relief, the same is permissible provided it is the second since sent from the extra board.

This rule will be interpreted to apply so that the extra man first out on the extra board at the time another extra man is used in excess of the relief permissible, such extra man will be

paid the difference in earnings, if any, that he would have received had he been deadheaded in his proper turn, including deadhead earnings, until such time the other extra man returns to the Anchorage extra board.

Rule 9(e) Day Ends at Anchorage

Extra trainmen and enginemen will not be run through Anchorage terminal when other extra qualified men are available. This will not apply to extra men filling an assigned position. Assigned hostlers at outside points permitted to perform extra service as enginemen out of their terminal, when handling an assigned position into Anchorage terminal, will be relieved by an extra man, except when run is known to be vacant for one round trip. When handling extra run into Anchorage terminal, they will return to their terminal on the same run brought in.

Rule 9(h) Management and Committee Regulate Boards

Except where otherwise provided herein, extra boards will be handled in accordance with agreed upon understanding between the superintendent and the committee of the organization having jurisdiction.

Rule 10(a) Made Up Crews, Irregular Service

Extra crews for use in all classes of irregular or unassigned service will be made up from the extra boards at Anchorage, and Anchorage will be the home terminal for such crews. Fairbanks, Healy, Curry, and Seward will be the distant or away-from-home terminals for irregular or unassigned crews, except that crews may be made up for yard, freight, mixed and passenger service, and initial call in wrecker service

from extra and regularly assigned men at Healy and Fairbanks. Made up extra crews called at Healy or Fairbanks will be returned to point of call without penalty accruing to extra or regularly assigned men at Healy or Fairbanks. Such crews may be used between Fairbanks and Broad Pass without men from Anchorage boards accruing penalty; however, if such crews are used south of Broad Pass, an entire crew from Anchorage extra boards will be paid 100 miles. Men fulfilling vacancies on regular assignments may be used as far as the assignment requires. Rules 2(d) and 15(c) will apply to regular men used on such made up crews.

When service is required in Yard service on rest days at Seward, Whittier, and Healy, extra board men available at these points will be used. If additional men are required, men registered in the Hog Book will be used in accordance with Rule 9(c)-13 with no penalty from the Anchorage extra board.

All passenger enginemen assignments will be two-man jobs and the use of firemen on extra crews will not be required, except on passenger crews.

Rule 10(b) First In - First Out

Train crews in irregular or unassigned road service will be run first in-first out in the same class of service (freight, work train, snow service, helper or pilot service, and passenger service), tie-up time from last service and on-duty time of next service to govern.

Example: Helper Service-Pilot. Assigned pilot is rested and available at Curry. Two extra conductors are also rested and available at Curry.

MEMORANDUM OF UNDERSTANDING
Between
THE ALSAKA RAILROAD
And
UNITED TRANSPORTATION UNION

The parties signatory hereto have met and mutually agreed on the follow
a joint cooperative effort to improve and enhance the efficiency of the
Service in respect to bulletining of assignments.

Changes on Rule 11(a) are hereby agreed as follows:

All passenger, freight, mixed, work, snow, rotary, yard, helper,
and pilot service jobs using the main line for three (3) consecuti
days or called for service three (3) consecutive days will be
bulletined. All job assignments and vacancies in assigned service
be bulletined for three (3) days. Claims for runs or jobs will be
addressed to the Chief Crew Dispatcher in writing or wire and must
such office by 3:00 a.m. on the fourth (4th) day. Assignments will
made on the fourth (4th) day effective at 7:00 a.m. Successful
applicants, if available, will be notified as soon as possible on t
day assignment is made If successful applicant is held for new
assignment more than five (5) calendar days following date of assig
through no fault of his own, he will be allowed diffence in earning
any, after the fifth (5th) day.

Differences or disputes regarding the application or interpretation of
document will be resolved through joint discussion and consultation betw
the parties. It is further understood that this Memorandum of Understand
may be cancelled upon thirty (30) calendar days written notice by either
party.

FOR THE ORGANIZATION:

Michael F. Olson
United Transportation Union

FOR THE ALASKA RAILROAD:

J. A. Depuoton
Supt. of Transportation

5/18/82
Date

Question: Should assigned pilot be called in preference to extra man?

Answer: Yes. He is assigned to Pilot-Helper Service and not to any specific train or schedule.

Question: If extra man were used first under the above example, would assigned pilot have runaround due him?

Answer: Yes.

Rule 10(c) Runarounds Irregular or Unassigned Road Crews

Road crews in irregular or unassigned service not called in turn will be credited with four hours and stand first out for twelve (12) hours. If not used within twelve (12) hours from time runaround, they will be credited with eight (8) hours and stand last out.

Rule 11(a) Assigned Service - Bulletin of Runs

All passenger, freight, mixed, work, snow, rotary, yard, helper and pilot service using main line for five (5) consecutive days or its equivalent, not including Sundays or holidays where service not operated, will be bulletined for five (5) days. Existing vacancies in assigned service will be bulletined for three (3) days, except fireman vacancies on one-man jobs may be excluded from this portion of the rule. Claims to runs or jobs will be addressed to the proper designated department officials in writing or wire and must be in writing or wire and must be in such office by 7:00 a.m. on the fifth (5th) day. Assignments will be made on the

fifth (5th) day, except where such day is a Sunday or a holiday, in which case assignment will be made on the following day. Successful applicants, if available, will be notified on day assignment is made. If successful applicant is held off new assignment more than five (5) calendar days following date of assignment through no fault of his own, he will be allowed difference in earnings, if any, after the fifth (5th) day.

Examples: Difference in earnings if held more than five (5) days after date of assignments are made.

Question: When does the first day of difference in earnings start?

Answer: The sixth (6th) day after the assignment is made.

Question: Is the difference in earnings, if any, to be computed daily, or total time spread?

Answer: Total earnings over the time held as between two assignments.

Question: If a man is held for five (5) days after date assignment is made and released to go on his new assignment on the sixth (6th) day, will the time or days consumed in going to his new assignment be paid as time held off of his new assignment?

Answer: No, such time is the same as coaches ending in the exercise of his seniority, the same as if he had not been held more than five (5) days.

In this rule and in other rules in this schedule, the terms noted below shall be interpreted as follows:

1. "Assigned service" shall be construed to mean service, whether road, yard, work, etc., to which crews are assigned by bulletin under the first paragraph of this rule, whether such service operates on a time table schedule or is operated as an extra train.

2. "Unassigned or irregular service" shall be construed to mean service, whether road, yard, work, etc., for which crews are made up off the extra board, whether such service operates on a time table schedule or is operated as an extra train.

3. "Regularly assigned man" or "assigned crews" shall be construed to mean a man or men assigned to jobs or runs other than the extra board.

4. ""Extra man" or "extra board man" shall be construed to mean a man assigned to one of the extra boards.

Except at Fairbanks, if successful applicant is held off new assignment through no fault of his own, when extra board man is rested and available, he will be allowed the difference in earnings, if any, on the day assignment is made and each succeeding day so held until relieved to protect new assignment.

Rule 11(b) Revised - Consist of Bulletins

Bulletins for passenger, freight, mixed, yard, or combination of such runs will specify each day of service. When job on which a fireman is required (two-man job) is combined with a one-man job, the fireman of the two-man job will be retained with the assigned crew of the two-man job, except by mutual consent firemen may be assigned a combination of two-man jobs as agreed

upon by the General Chairman and representatives of the carrier.

Bulletins specifying road service, or changing existing service will show points between which assigned, whether straightaway or turnaround, number of trips and turning points, home and far terminals, days of the week assigned to work, and if assigned to operate carded trains, bulletin will specify the train numbers. All vacancies on existing assignments will be bulletined as soon as the vacancy is known to exist, and will be posted at all points where train or yard crews tie up. No assignment in any class of service except conductors and engineers' extra boards, and through freight and passenger as per Rule 3(a), will be for less than five (5) days nor more than six (6) days per week.

Rule 11(c) Assignment Limitation

No assignment for trainmen and enginemen will be made in excess of nine hundred and seventy-six (976) miles per week except that assignments made under exception to Rule 3(a) may be made to operate mileage generated by not more than five days per week or its equivalent on a biweekly basis.

Example: Rotating assignments four (4) days one week and six (6) days one week during a biweekly period.

Assignments made under this exception to the mileage limitation will be subject to review after 30 days and each subsequent 30-day period thereafter upon written request of the General Chairman.

It is mutually agreed, all other assignments will, to the extent possible, be scheduled to achieve the maximum mileage permissible under

this rule, consistent with sound management practices, efficient utilization of personnel and operational requirements of the Carrier.

Baggageman assignments in excess of mileage mentioned above may be made by mutual agreement between the committee and the carrier.

Rule 11(d) Rebulletin - Limitation

Any passenger, freight, mixed (yard) or regular runs except work service having been bulletined, the schedule of which is changed to an increase or decrease of twenty-five (25) miles or more, change of home terminals, or a change in the leaving or starting time of two (2) hours and thirty (30) minutes or more, or the changing of one class of service to another, will be classed as a new run and bulletined as per Rule 11(a).

When an existing assignment is abolished or rebulletined as a change in assignment per Rule 11(d), men will be paid deadhead to the home terminal of the assignment upon which they next exercise their seniority, or to Anchorage, whichever is the lesser, amount of deadhead payment to be determined under Rule 19(a).

Rule 11(e) Layoff Vacates Assignment

When an assigned man lays off for any cause whatsoever for fourteen (14) days or more, his assignment will be immediately bulletined for seniority choice as a permanent vacancy. Trainmen and enginemen when returning to service under this rule will be privileged to exercise their seniority. Assignments vacant for less than fourteen (14) days will be fulfilled by trainmen or enginemen from their respective extra boards.

Rule 11(f) Protect During Life of Bulletin

When an assignment or run is changed, the assigned man then on the new run would continue on the run during the life of the bulletin covering the new run. Assigned men may be displaced by a senior man with a legal bump. The man bumping on the job then becomes the assigned man.

Rule 11(c) Give Up Job

A regularly assigned man, train or engineman, may relinquish his regular assignment or run to go on the firemans' or brakemans' extra board thirty (30) days after date of assignment, provided there is a man junior to him on the extra board. This application must be in writing to the proper designated official, after which the run or job will be bulletined for seniority per Rule 11(a) and such man will remain thereon until properly relieved. Men giving up assignment under this rule cannot displace another regularly assigned man and will be placed on the extra board as of the date relieved from assignment.

Brakemen and firemen who have been force assigned under provisions of Rule 11(k) and upon making request for relief through proper authority prior to thirty (30) days after date of assignment, may do so, however, no deadhead allowance will be paid to the senior man if relieved within thirty (30) days after date of assignment. Junior brakemen or firemen marking up on the extra board will be immediately force assigned to relieve the senior man. Deadhead allowance is payable to the most junior man who protects the assignment in excess of thirty (30) days.

Conductors and engineers who have been force assigned under provisions of Rule 11(k) may request relief by notice to proper authority

Anchorage, Alaska
February 18, 1981

MEMORANDUM OF AGREEMENT
between
THE ALASKA RAILROAD
THE UNITED TRANSPORTATION UNION REPRESENTING TRAINMEN AND ENGINEMEN

It has been mutually agreed between the Alaska Railroad and the United Transportation Union that a regularly assigned trainman or engineman making request for relief prior to thirty (30) days after date of assignment as provided for in Rule 11 (g) paragraph 2, 3 and 4, the following interpretat and application will apply:

1. Trainmen and Enginemen who have been force assigned under provisions of Rule 11 (k) may request relief by notice to proper authority prior to thirty (30) days after date of assignment, when a junior employee marks up or a junior employee returns to duty status.

2. The position for which relief is requested will be bulletined in accordance with Rule 11 (a).

3. If no bids are received, the junior employee will be force assigned.

4. Trainmen or Enginemen requesting relief will protect assignment during life of bulletin and until properly relieved.

5. Deadhead allowance will be paid to the most junior employee who protects the assignment in excess of thirty (30) days.

Conductors or Engineers Extra Board Exhausted	9(c) -12
Continuous Trip (Hours of Service)	29(d)

time on duty exceeds the miles run divided by twelve and one-half (12-1/2), all time to be computed daily. Overtime shall be paid for on the minute basis at an hourly rate of one-eighth (1/8) of the daily rate for passenger service and at an hourly rate of three-sixteenths (3/16) of the daily rate for all other classes of service.

Rule 3(a) Guarantee All Classes

Regularly assigned train and enginemen who do not lay off will be guaranteed not less than forty-eight (48) hours pay at straight time rates per calendar week, except trainmen and enginemen in yard service will be guaranteed not less than five (5) days per calendar week. On any of assignment day when employee is not used, except any or days of rest, he will be credited with not less than one hundred (100) miles or one (1) minimum day, and will be paid not less than the weekly minimum as provided in Rule 1, in addition to any compensation received under Rule 3(d). No assignment in road service will be for less than five (5) consecutive days or more than six (6) days. Yard asignments will be for five days.

Regularly assigned trainmen and enginemen in passenger and through freight service between Seward and Fairbanks will not be subject to the assignment portion of this rule. Regularly assigned trainmen and enginemen in mixed service between Anchorage and Fairbanks also will not be subject to the assignment portion of this rule. Such mixed trains will not handle more than twenty-five (25) freight cars, exclusive of cabooses, power cars, passenger and baggage cars. Power cars are limited to those furnishing power to cars in the train, otherwise the power car(s) shall be considered as one of the twenty-five

prior to thirty (30) days after date of assignment and if so relieved no deadhead allowance will be paid.

Junior conductors or engineers marking up or returning to duty status or exercising seniority in a brakeman's or fireman's capacity will be immediately assigned to relieve the senior conductor or engineer forces assigned. Deadhead allowance is payable to the most junior man who protects the assignment in excess of thirty (30) days.

The purpose of this portion of the rule is to allow a senior man to hold the extra board, yet allow deadhead payment to the man who actually fulfills the requirements of the first paragraph of this rule.

Rule 11(h) Passenger Assignment Limitation

Brakemen or firemen on Fairbanks-Anchorage passenger assignments, holding conductor's and engineer's seniority, respectively, and residing at Fairbanks, will not be used out of Anchorage in extra or other assigned service.

Rule 11(i) No Bidding While Off

Men laying off are not entitled to bid on any vacancy for the exercise of seniority until such time as they have actually reported for immediate service.

Rule 11 (j) Exercise Seniority When Displaced

When exercising seniority according to this rule as a result of being displaced or assignment discontinued, a calendar day will be paid for each day on which pay is lost, providing such day is not covered with leave, and providing the payment for such time lost shall equal

but not exceed the amount by which payment to the employee for the current work week is less than the equivalent of forty-eight (48) hours at straight time rates in road freight service for the position to which assigned. When leave without pay is taken, eight (8) hours for each day of leave without pay will be deducted from current workweek of forty-eight (48) hours. The current workweek for the purpose of this rule shall be the administrative workweek beginning 12:01 a.m. Sunday and ending Saturday at midnight. The amount paid to the employee for the current workweek shall include all earnings for that week and all other wage payments, arbitraries as well as straight time and overtime to be converted to equivalent hourly pay in determining whether forty-eight (48) hours straight time has been earned. This rule shall not apply to employees exercising their seniority after return from leave of thirty (30) days or more. Unless leave is granted after being displaced or assignment is abolished, men must exercise their seniority within twelve (12) hours after end of last tour of duty. If notified while off duty, seniority must be exercised within twelve (12) hours after being notified. When necessary to go to a terminal before exercising seniority, the twelve (12) hour period will begin on arrival at terminal. First transportation must be taken going to terminal. After seniority is exercised, man will be considered available for next call of assignment except when it is necessary for him to deadhead to the assignment, in which case the first transportation must be used. Men displaced at line points where extra boards are not maintained may be held to protect assignment until properly relieved. Used off assignment would not apply until after arrival of first available rail transportation which would enable the senior man exercising seniority to protect the next call of assignment. Men failing to exercise seniority according to this rule will not receive the calendar day payments

provided for by this rule. Man laying off and men failing to properly lay off under this rule will be force assigned in their proper seniority unless such layoff is for scheduled vacation or of emergency nature that has been approved by the Transportation Officer. Men force assigned under this rule will be recalled to work for force assignment. If necessary to deadhead relief for force assignment, no deadhead allowance will be paid the man force assigned.

Man laying off for scheduled vacation or emergency reasons for periods of less than fourteen (14) days, who are junior to conductor or engineer who has been force assigned, must upon return to work exercise their conductor's or engineer's seniority and displace a senior or junior conductor or engineer who has been force assigned under this rule during period of layoff, provided it is agreeable to the senior conductor or engineer. No deadhead allowance will be paid junior conductor or engineer in the event deadhead has been paid to senior conductor or engineer under this rule.

Rule 11(k)-1 Optional Seniority for Conductors

Conductors will be privileged to exercise their seniority as either conductor, brakeman, or baggageman, on any assignment or run at any time by properly bidding or bumping. When no bids are received for conductor assignments on runs bulletined for seniority choice, the youngest conductor working as brakeman or baggageman will be assigned. When no bids are received for brakeman or bagagageman assignments on runs bulletined for seniority choice, the youngest qualified brakeman assigned the brakeman's extra board will be assigned (except that no more than one brakeman with less than ninety (90) days' experience as a brakeman or switchman on this or any other railroad operated under standard rules

will be assigned to the same crew if other men so qualified are available). Men assigned under this rule will be paid deadhead allowance per Rule 19(a) going to the run. Conductors, brakemen, or baggagemen assigned under this rule will be required to fulfill such assignment for a period of thirty (30) calendar days before being privileged to relinquish assignment under Rule 11(g). This rule can be repetitious. Nothing under this rule will prevent men from properly bidding off such assignments, except a man assigned as a conductor, that is the youngest conductor, will be restricted from being reassigned back as a brakeman more than one time when there is not a junior conductor working as a brakeman. If, after reassignment back the one time, he is again assigned to the same conductor position, he will not be paid deadhead payment for any deadheading necessary to again place him in the assignment, and will be required to fulfill the assignment for thirty (30) calendar days. (Applies to bidding and forced assignments). In the event of the assignment of the youngest conductor, brakeman, or baggageman, senior conductors holding brakeman or baggageman assignments will not be forced to the conductor's extra board.

Conductors, when force assigned as a conductor, must protect their assignment but they shall have the right to properly bid on any other assignment. In the event no one senior to the man force assigned bids his vacancy, the man initially assigned must return to point of forced assignment on his own time, with no deadhead payment being allowed. It is understood that, if a man is forced to a new or different position, he will be paid the initial deadhead to point of assignment. This rule is to allow a promoted man force assigned to bid on a brakeman position; however, the rebidding of the non-promoted vacancy created by the force assignment, by the man force assigned, is limited to

one bid and in the event he is force assigned back to the position originally force assigned to, he will deadhead on his own time, and protect the forced assignment for thirty (30) days before bidding to his non-promoted vacancy.

Rule 11(k)-2 -- Optional Seniority for engineers

Engineers will be privileged to exercise their seniority as either engineer, fireman, hostler, hostler helper, or engine watchman on any assignment or run at any time by properly bidding or bumping. When no bids are received for engineer assignments on runs bulletined for seniority choice, the youngest qualified engineer working as a fireman will be assigned. When no bids are received for fireman assignments or runs bulletined for seniority choice the youngest qualified fireman assigned to the fireman's extra board will be assigned. Men assigned under this rule will be paid deadhead allowance per Rule 19(a) going to the run. Engineer, fireman, hostler, hostler-helper, or engine watchman assigned under this rule will be required to fulfill such assignment for a period of thirty (30) calendar days before being privileged to relinquish assignment under Rule 11(g). This rule can be repetitious. Nothing under this rule will prevent men from properly bidding off such runs or assignments. In the event of assignment of the youngest engineer or fireman, senior engineers holding fireman assignments will not be forced to the engineer's extra board.

When no bids are received for the second man on one-man assignments, the youngest qualified unassigned fireman may be assigned. Men who are force assigned under this rule will remain on the assignment until properly bidding off or displaced.

Engineers, when force assigned as an engineer, must protect their assignment, but they shall have the right to properly bid on any other assignment. In the event no one senior to the man force assigned bids his vacancy, the man initially assigned must return to point of forced assignment on his own time, with no deadhead payment being allowed. It is understood that, if a man is forced to a new or different position, he will be paid the initial deadhead to point of assignment. This rule is to allow a promoted man force assigned to bid on a fireman position, but in the event he is force assigned back to the position originally force assigned to, he will deadhead on his own time.

Rule 11(k)-3 Bidding and Bumping Vacancy

Trainmen and enginemen with legal bump may bid and bump any existing vacancy, except new assignments. This bid and bump will be limited to one (1), and if job is assigned to senior man, person bidding and bumping must exercise seniority upon release of bulletin.

Trainmen and enginemen bidding and/or bumping vacancy will not be considered assigned to that position until bulletin closes and by virtue of seniority declared successful bidder, and are subject to force assignment under Rule 11(k).

Rule 11(l) Multiple Appointments and Reduction in Force

In accordance with the optional seniority principle established in Rule 11(k) and in accordance with regulations set forth by the U. S. Civil Service Commission governing competitive service, train and engine service employees will work under the terms and conditions of multiple appointments covering duties and services, respectively, for which they are qualified. They shall be required as a condition of

employment or continued employment to perform the duties of the various assignments in the various services listed in their multiple appointments, at the pay rates provided for such services and assignments in the applicable wage schedule, and in accordance with wage rules contained in this agreement.

Train-and-engine-service-employee multiple appointments shall be established in the following competitive levels:

a. Brakeman, baggageman - All classes of service

b. Conductor, conductor pilot, brakeman baggageman - All classes of service

c. Fireman, hostler, hostler-helper, engine watchman - All classes of service

d. Engineer, fireman, engineer-hostler, hostler, hostler-helper, engine watchman - All classes of service

All classes of service, as referred to above, shall include road passenger service, road freight service, mixed train service, work train service, helper service, snow service and yard service.

Reduction in force of and engine service employees will be made ding to retention rights, first, in the com tive levels of (a) brakeman, baggageman - all classes of service (for trainmen) and (c) fireman, hostler, hostler-helper, engine watchman - all classes of service (for enginemen); second, in the competitive level of (b) conductor, conductor pilot, brakeman, baggageman - all classes of service (for trainmen) and (d) engineer, fireman, engineer hostler, hostler, hostler-helper, engine

watchman - all classes of service (for enginemen). The reduction in force will be accomplished in the first step when possible. If the reduction in force results in a vacancy in an assigned position, this position will be filled by the appointment of the youngest train or engineman, as the case may be, on the Anchorage extra board. He may, after reporting on the assignment, relinquish the assignment in less than thirty (30) days; however, if no bids are received, he will be assigned by bulletin. Trainmen and enginemen separated from the service will be given a service letter upon request.

Rule 12 Use of Regular Men Extra

Regularly assigned trainmen and enginemen may be held or used in preference to extra men on special passenger trains handling government or railroad officials, fraternal or convention trains, and regularly assigned qualified engineers may be used in passenger service in lieu of extra engineers who have had less than one year's experience as a locomotive engineer. Men so called will be credited with one (1) calendar day for each day so held or used, but will not receive an amount less than they would have received on their regular assignment.

Examples: Use of Regular Men

Question: A regularly assigned man enroute from Fairbanks to take his assignment is used in an emergency to relieve and fulfill another regular man's assignment out of Curry. Will such man be paid deadhead Fairbanks to Curry or Curry to Anchorage?

Answer: He will be paid deadhead Curry to Anchorage.

Question: Would a regularly assigned man at Seward who had bid off his assignment and properly relieved and is held and used to fulfill another regular assignment be entitled to deadhead Seward to Anchorage when relieved?

Answer: Yes.

Question: Will such regularly assigned men be used in lieu of extra men?

Answer: No, except in actual emergencies, sickness or injury, or lack of available extra men.

Question: If regularly assigned men are used under the above conditions and extra men are available, will the extra men be entitled to what they would have earned?

Answer: Yes, extra men must be deadheaded at the first available opportunity and the regular men relieved.

Rule 13 Day of Rest Road Crews

Road crews will not be given their day or days of rest at points other than specified in their assignment and will not be given their day or days of rest away from home terminal.

Question: If, due to interruption to traffic, it is necessary to hold crew away from their home terminal on their day of rest, will they be compensated whether used or not?

Answer: Yes, if held and not used, 100 miles held for service.

Rule 14(a) Crew Consist

Regularly assigned local freight crews doing local freight work consisting of loading and unloading freight and station switching will be

provided with three (3) brakemen. Assigned mixed crews will be provided with two (2) brakemen and one (1) train baggageman. No man with less than 90 days' experience as a brakeman on this or any other railroad operated under standard rules shall be used as a flagman if other men so qualified are available.

NOTE: Where 90 days' experience is mentioned in Rule 9(d), 11(k), and 14(a), this will be interpreted that, in the case of students, this will mean 90 days' seniority on this railroad.

Rule 14(b)

Crews in other freight, yard work, or snow service will consist of not less than one (1) conductor and two (2) brakemen, when available.

Rule 14(c)

Passenger crews on local trains handling local baggage, mail and express will consist of not less than one (1) conductor, two (2) brakemen, and one (1) baggageman, except that official trains, steam or other motive power handling not to exceed two (2) cars will be manned by one (1) conductor; passenger crews on trains handling through baggage, mail or express will consist of not less than one (1) conductor and two (2) brakemen.

Crews in charter or special passenger service not required to work mail, baggage, and express between terminals may be manned by one conductor and one brakeman when train consist is not more than five (5) passenger cars plus baggage equipment.

Rule 14(d)

Motor cars (bus car type) not to exceed fif-

teen (15) passengers may be manned by one engineer.

Engineers used in motor car service (bus, gas car type) under this rule on short turnaround passenger runs, no single trip of which exceeds twenty-five (25) miles, shall be paid at the Yard Engineer's rate for all time actually on duty or held for duty, with a minimum of eight (8) hours. Time will be computed continuously from the time first required to report to final release at end of last run.

Rule 14(e)

Motor cars of the 200 type will be provided with one (1) conductor, and when handling a trailer will be provided with one (1) brakeman or one (1) baggageman.

The management will designate the position to be filled, as traffic may justify. Train baggagemen will be provided, with or without trailer, when mail, baggage or express is handled enroute and reports are required to be made. Conductors will not be required to perform the duties of train baggagemen.

Rule 14(f)

Crews will not be divided to move trains from one point to another on the main line, except when necessary to double hills, or in cases of emergency.

Question: In the use of regularly assigned crews, local and through freights, should such crews be called on a first in, first out basis, or in accordance with their scheduled assignment; that is, local or through freight?

Answer: In accordance with their scheduled assignment. However, local freights will be

given preference if way car is available and local crew is rested, if both are fulfilling same schedule, such as 29 and 30, except in instances where such practice would impede traffic.

Question: Would either crew have a runaround against the other?

Answer: No.

Question: If two or more through freight crews are fulfilling the same schedule out of a terminal, should they then be called on a first in, first out basis?

Answer: Yes.

Question: Would such crews have runaround cue them?

Answer: Yes, if fulfilling the same schedule and on the same district.

Rule 14(a)

The bulletin and engine consist of crew shall designate two-man assignments as:

1. All through mixed service job assignments authorized in Rule 3(a).

2. Assigned through freight service between Anchorage and Healy.

Fireman vacancies in assigned two-man assignments under this rule will be filled.

This list may be reviewed on request by management or the organization for purpose of adding or subtracting positions and revision, provided that it shall not be mandatory upon management to create two-man jobs to an extent greater than

ten percent (10%) of the jobs in each category of service, and provided further that it will not be mandatory upon management to change one-man jobs to two-man jobs if such action requires the hiring of new men.

Rule 14(i) Shuttle Service

In order to establish shuttle service between Portage and Whittier, mixed service crews for this service will originate and tie up at Anchorage and may be used on turnarounds between Portage and Whittier with time (hours or miles) to be computed continuously from the time required to report for duty to final release at the end of run. Crew will be paid local freight service rates of pay and will be manned by a two-man engine crew, one (1) conductor, two (2) brakemen, and will not be required to handle checked baggage, mail, or express except when train baggageman is provided. Trainmen will handle jump boards and ramp aprons when necessary in the loading and unloading of vehicles. Rule 6(u) will not apply, except when crew switches other than the equipment of their train at Whittier. Crews required to handle equipment to and from Whittier and points in between, in addition to shuttle equipment, will be paid 50 miles in addition to their road trip allowance.

Crews used to handle cars other than shuttle equipment to or from Whittier without payment of 6(u) are restricted as follows: to double over to the minimum number of tracks which could hold cars within the main yard, and in addition place shuttle equipment to shuttle track or to double from the minimum number of tracks which could hold cars within the main yard and in addition pick up shuttle equipment from shuttle track.

Placement of cars within the main yard track structure will be at the direction of the carrier. Crews required to set out or pick up

on industry tracks, i.e. Army track, tail of wye, dock track (outside main yard track structure) will be compensated in accordance with Rule 6(u).

Rule 15(a) Used Off Assignment

An assigned crew used in an emergency in other temporary service will be compensated in accordance with the rules applying to their assignment, and when so used, will be returned to their regular assignment at the earliest possible opportunity. Crews or men used under this paragraph will be compensated not less than they would have earned on their regular assignment.

Rule 15(b)

When an assigned crew is used in work service, "Automatic Release" will not apply. If tied up between terminals, "Tied Up Between Terminals and Hours of Service" will apply.

Rule 15(c)

When a regularly assigned man is used off his assignment, he will be compensated for such service in addition to his assignment, with a minimum of one (1) day. This rule will not apply on rest days, except as provided in Rule 3(d). Men returned to the point of assignment and are again used off their regular assignment will be paid as stated above. On men used under Rule 9(c)-14, this rule will not apply.

Rule 15(d)

Men used under section (c) of this rule will be paid a minimum day in addition to their assignment for the first day so used and for each succeeding day used will be paid an amount not less than they would have earned on their regular assignment.

Rule 15(e)

In the event of track construction, assigned road crews may be used off their assigned districts out of terminals where extra lists are not maintained to make connections in the same class of service.

Rule 15(f)

When assignments are made for crews to run to an intermediate point and there exchange train with a crew from the opposite terminal (both crews turning back at meeting point to the originating terminal), such crews may be run to a point over or short of the assigned meeting point for the purpose of exchanging trains to prevent delays to trains and the mileage on such runs will be paid for on a continuous basis. Crews run short of the bulletined turning point will be paid the miles to the bulletined turning point and return to the point of exchange in addition to the actual miles or hours made on the road trip.

Assigned road freight crews whose initial station and/or intermediate final terminal station of their assigned scheduled run is Portage will not be run into Whittier unless necessary to do so. When so run into Whittier and/or return, they will be considered as having been used off of their assignment and will be compensated not less than eight (8) hours, or one hundred (100) miles, for such service. All time consumed on such trip to be deducted from the time of their road assignments for purposes of computing overtime of their road trip, unless total hours on duty computed in accordance with Rule 2(b) produces the greater amount, in which case the greater amount will be paid.

Rule 15(i)

Diesel locomotives, when operated in multiple, may be operated as either a two-man job or as a one-man job. When passenger power and heat cars are utilized in passenger trains, such passenger power and heat cars will be considered as an additional unit and payment made therefor as per Rule 1(c).

Rule 16(a) Automatic Release

Automatic release will not apply to assigned freight and passenger crews between Anchorage and Fairbanks assigned to run to meeting points between Healy and Curry. This rule also will not apply to assigned crews as to terminals except such terminals as are specified when regular assignments are bulletined and made under Rule 11(c) above.

Extra road crews arriving at terminals or end of run are automatically released. Road crews required to run through a terminal will begin a new day.

Rule 16(b)

Road crews required to perform switching or other terminal service upon arrival at terminal, including passenger or troop trains delivered to Elmendorf, Fort Richardson, Ft. Wainwright, or Eielson by road crews, will be compensated in accordance with Rule 6 (Terminal Service).

Rule 16(c)

Northbound road crews arriving at Anchorage or Fairbanks, or departing from Anchorage or Fairbanks, southbound, required to move cars to or from military bases will be paid a new day independent of the road trip, except that this will

not apply to passenger crews arriving or departing Anchorage or Fairbanks.

Rule 16(d)

Yard crews required to perform switching service or other services at military bases at Anchorage, Ft. Wainwright, and/or Elelson, will be paid yard rates for all services performed. Upon entering on Army track, no arbitraries or penalties provided under this contract will be allowed or paid except as provided in Rule 43 (Coupling and Uncoupling Air Hose) and Rule 1 (Weight on Drivers) and Rule 2(b) (Overtime). Crews so used will perform all service as directed by the Army Yardmaster.

Upon release and return to Alaska Railroad yards, arbitraries or penalties as provided in this agreement, as applied to other yard crews, will be paid.

Yard service in Alaska Railroad yards and at military bases in Fairbanks may be combined. Assigned Anchorage yard crews required to go beyond designated interchange track at Fort Richardson and Elmendorf will be paid actual time from designated interchange track until return to interchange with a minimum of one (1) hour in addition to all other earnings for that day or trip.

Fairbanks yard crews servicing Ladd and/or Elelson will not be worked in the Fairbanks' yard after working at Ft. Wainwright and/or Elelson if they have spent more than eight (8) hours on duty, if a Fairbanks yard crew or crews are on duty.

Crews servicing Ft. Wainwright and/or Elelson will be allowed the use of cabooses.

Army crews will not be given permission to switch in Fairbanks or Anchorage yards; it is understood, however, in such instances where Army crews do move beyond designated interchanged tracks for emergencies or maneuvers beyond the control of the Railroad, no penalties will be allowed. When Army crews perform work in Anchorage or Fairbanks yards normally belonging to railroad employees, a minimum of one hundred (100) miles or eight (8) hours will be allowed to the men available at Anchorage or Fairbanks for such work.

Rule 17(a) Called and Not Used

When a train for which trainmen and enginemen have been called to report for service at a specified time is annulled, they will, when reporting for duty, be credited with time held until relieved from duty. If no service is performed, they will be allowed a minimum of two (2) hours and stand first out. If service is performed, they will be allowed eight (8) hours or one hundred (100) miles and stand last out. No duplicate payments will be made under this rule. If they are called and released before leaving home or place where called, no allowance will be made, provided the call and release was between the hours of 6:00 a.m. and 10:00 p.m.

On crews having regularly assigned call time, such call will stand if set back less than two hours. If set back more than two hours, they will be paid two hours called and not used. If notified prior to tie-up time, no penalties will accrue.

Rule 19 Calling of Crews

Train and enginemen living within one and one-half (1-1/2) miles of passenger depot, Anchorage, Fairbanks, and Seward, will be called when

practical one and one-half (1-1/2) hours before time required to report for duty.

Rule 19(a) Deadheading

Trainmen and enginemen when deadheading on Railroad business will be compensated on the basis of miles or hours (whichever is greater) at the rate of class of service assigned with a minimum of eight (8) hours or one hundred (100) miles. When deadheading on Railroad business, when other than rail transportation is available, the carrier may elect to utilize other modes of surface transportation or commercial air services. Deadheading and service may be combined in any manner that traffic conditions require and when so combined will be allowed actual miles (between stations as established in timetable) or hours on a continuous time basis with not less than a minimum of eight (8) hours or one hundred (100) miles for the combined service and deadheading.

EXCEPTION: Trainmen and enginemen deadheading via air will be allowed actual time with a minimum of eight (8) hours for deadheading when actual mileage between stations exceeds 100 miles.

Rule 2(b) (overtime) will apply to men when deadheading on Railroad business. Deadheading time will be computed continuously and Rule 16(a) will not apply.

Rule 19(b)

Trainmen and enginemen going to take a run at their request, to which they are entitled through seniority, will not be paid for deadheading to take run. Trainmen and enginemen going to runs under a forced rule will be considered deadheading on Railroad business.

Rule 19(c)

Crews will go with their cabooses and when cabooses are deadheading, crews first out will deadhead, second crew run train, deadhead crew to be first out at end of run.

EXAMPLES

1. Deadheading Only

Payment when called to deadhead by other than air transportation:

Between:

Anchorage & Seward	114 miles
Anchorage & Whittier	100 miles
Anchorage & Healy	244 miles
Anchorage & Fairbanks	356 miles
Fairbanks & Healy	112 miles

When called to deadhead and air transportation is provided, actual time with a minimum of eight (8) hours will be paid.

Question: When assignment involves deadheading to Fairbanks and the carrier elects to provice air transportation, what payment for deadheading shall be made should the employees elect to drive their own private venicle with concurrence of proper authority?

Answer: 100 miles, the same as if air transportation had been utilized.

1. Deadheading and Work Combined

Payment for deadhead when called to combine deadhead and work by other than air transportation:

Between:

Anchorage & Seward	114 miles
Anchorage & Whittier	63 miles
Anchorage & Wasilla	46 miles
Fairbanks & Healy	112 miles

Payment for deadhead when called to combine deadhead and work when air transportation is provided:

Between:

Anchorage & Seward	100 miles
Anchorage & Whittier	63 miles
Anchorage & Portage	50 miles
Fairbanks & Healy	100 miles

Examples provided are for the purpose of illustration under normal operating conditions representing the intended application and payment of negotiated revision of Rule 19(a).

Rule 20(a) Hours of Service

Under the rules limiting hours on duty, crew in road service will not be tied up unless it is apparent that the trip cannot be completed within the lawful time, and then not until after the expiration of twelve (12) hours on duty under the rule, or within two (2) hours of the time limit provided by law.

Rule 20(b)

If road crews are tied up in a number of hours less than provided in the preceding paragraph, they will not be regarded as having tied up under the rule, and their services will be paid for under this schedule.

Rule 20(c)

When road crews are tied up between terminals under the rule, they will be considered on-duty and under pay immediately upon the expiration of the minimum legal rest period required by the crew, and the longest period of rest required by any member of the crew, either eight (8) or ten (10) hours, will be the period of rest for the entire crew.

Rule 20(d)

A continuous trip will cover movement, straightaway or turnaround, from initial point to destination train is making when ordered to tie up. If any change is made in the destination after the crew is released for rest, a new trip will commence when the crew resumes duty.

Rule 20(e)

Road crews tied up under the rule will be paid time or mileage of their schedule from initial point to tie-up point. When such crews resume duty on a continuous trip, they will be paid from the tie-up point to the terminal on the following basis: For fifty (50) miles or less, or four (4) hours or less, one-half day; for more than fifty (50) miles or more than four (4) hours, actual miles or hours, whichever is the greater, with a minimum of one (1) day. It is understood that this paragraph does not permit crews to be run through terminals.

Rule 20(f)

Road crews tied up for rest under the law and then towed or deadheaded into terminals, with or without engine or caboose, will be paid therefore the same as if they had run train to such terminal.

Road crews tied up under the law except in case of delays due to wrecks, washouts, snow blockades or other track constructions held awaiting arrival of relief crew will be paid for all such time on a minute basis in addition to miles or hours made on the road trip.

Rule 20(c)

When regularly assigned crews are tied up between terminals account hours of service and resume service, the completion of the trip from the tie-up point to the next terminal will be considered as the completion of the trip from the originating terminal, and crew will be paid for existing calendar day in accordance with their assignment, whether service is performed or not.

Rule 21(a) Tie Up Between Terminals - Account Wrecks, Washouts, or Snow Blockades

Road crews will not be tied up between terminals except in case of delays due to wrecks, washouts, snow blockades, or other track obstruction, in which case they will be credited with the first eight (8) hours so held in addition to time or miles made that day, with a minimum of one hundred (100) miles for the service rendered, and for each succeeding calendar day will be allowed not less than eight (8) hours or one hundred (100) miles. No duplicate payments will be made under this rule.

A yard crew out of Whittier that is tied up at Portage for any reason whatsoever will be paid in accordance with this rule.

Rule 21(b)

Except in cases of wrecks, washouts, snow blockades, or other track constructions, work and snow crews will not be tied up between terminals

other than the assigned working points, including Portage, Whittier, and Nenana. Snow crews may be tied up at Broad Pass, however, when weather conditions require it. Work and snow crews will not be tied up at points where eating and sleeping accommodations are not available for the entire crew. Snow crews may also be tied up at Tunnel, except on their assigned rest day or days.

Rule 21(c)

Crews tied up between terminals will begin a new day when called, except as provided in Rule 20(g).

Rule 22(a) Work, Wreck and Snow Plow Trains May be Tied Up Between Terminals

Except as provided in section (b) of Rule 21, work, wreck and snow plow service trains may be tied up between terminals and time tied up deducted, providing eating and sleeping accommodations are available. Upon resuming duty will begin a new day.. Initial and final terminals allowances and automatic release at terminals will not apply on this service.

Rule 22(b) Bulletined

Assigned work trains moving from one subdivision to another will be classed as new runs and may be bulletined as per Rule 11(a).

Rule 22(c) Seniority Choice

When two (2) or more work trains are working in or out of a terminal or intermediate tie-up point in the same class of work, the senior man will have the preference of crews. When crews are pulled off, the senior men may, if they so elect, exercise their seniority on the remaining crew or crews.

At work train points when two or more crews are assigned and only one crew is to be used on a day of rest, the senior crew should be given preference. Seniority of the crew to be governed by seniority of the conductor. However, if a crew is assigned to the pit as a loading crew and the work to be performed is loading only, then the assigned pit crew should be used. If the crew to be used on day of rest does both loading, hauling and dumping, then seniority of crews will govern.

Rule 23(a) Work and Snow Service

Initial and final terminal allowances, tie-up between terminals restrictions, automatic release at terminals and hours of service restrictions as to tie-ups are applicable to extra road crews used to move work train, bridge and building equipment, snow service equipment, or wrecking equipment from terminal with pick-ups or set out of the same between terminals; but if actual work train, snow, or wrecking service is performed enroute, they may be tied up between terminals when sleeping and eating accommodations are available at point of tie-up for all of the crew. The above will not apply to regularly assigned work train crews.

Rule 23(b)

Regularly assigned snow crews may be given their day of rest at Seward, Portage, Anchorage, Whittier, Curry, Healy, and Fairbanks.

Rule 23(d)

When extra snow fleets are called, the management will be permitted to select the rotary crew.

Rule 23(e)

In work or snow service at outlying points, when a hostler or engine watchman is employed, when enginemen are required to service engines such as adding lube oil, water, fuel oil, sand, they will be paid an arbitrary payment of thirty (30) minutes in addition to all other allowances for trip or day work. When required to start engines, the engineer only will be paid under this rule.

Rule 24(a) Piloting

Conductors and engineers, acting as pilots, will be paid their respective rates in their respective classes.

Rule 24(b)

Conductors will be furnished to pilot light engines running over district or portion of district, and on assigned helper engines working in helper districts.

It is hereby agreed that a helper district be established between Portage and Seward and that home terminal be designated as Portage or Seward. It is also agreed that a helper district be established between Curry and Windy with home terminal at Curry.

Trainmen and enginemen assigned exclusively to helper service will be paid in accordance with Rule 2(a), Rule 2(b), and Rule 3, and such other rules as are applicable to road service. Rates of pay will be at freight rates unless used in snow service, in which case snow service rates will apply.

Time will be paid on a continuous basis and no payment will be made for inside turns or for

second or succeeding starts out of helper terminal.

Rule 24(c)

Qualified conductor-pilots will be called when Russel plows and Jordan spreader are used, handling nose flangers and wings, or other snow plow appurtenances. It will not be the duty of the train crews to do this except in emergencies. Before either conductors or engineers may be assigned as pilots in snow removal equipment they must be qualifeid for such service by having previously performed similar service or made the necessary student trips.

Rule 24(d)

Conductor-pilots on snow plows will be paid rates in accordance with Rule 1.

Rule 24(e)

Light engines may be run to flange out and remove snow. Freight crews will not be required to plow snow at stations for the purpose of clearing sidings except for the purpose of setting out or picking up cars.

Rule 24(f)

In snow service, when two pieces of snow equipment, such as a rotary, Russel plow, or spreader, are used jointly by two engines, one handling the plow and the other a spreader or rotary, the regular pilot will be used to pilot the plow and the other piece of equipment will be manned by a shop man or a maintenance-of-way employee when available. If two pieces of equipment are used intermittently, that is, one piece of equipment used and set out, then the other piece of equipment picked up and used, the pilot will be required to man each one of the

pieces of equipment at the time used. When the rotary is used by itself, a conductor-pilot is not required.

Rule 24(a)-1

Pile drivers, ditchers, cranes, or other self-propelled locomotive type rail equipment, operating with not more than nine (9) rail cars (including caboose and idler) when used in maintenance, repair, construction, or inspection work need not be manned with a conductor-pilot. The Railroad will not be subject to penalty when such equipment is utilized in the maintenance, repair, or construction exclusively for the Railroad's purpose.

It is concurred the usage of Y orders will be restricted to their present application.

Rule 24(a)-2

A conductor-pilot will be called or assigned when pile drivers, ditchers, cranes, or other self-propelled locomotive type rail equipment operating with not more than seven (7) rail cars (including caboose and idler) are used to move contractor's equipment or supplies who, acting as an agent for the Railroad, is engaged in maintenance, repair or construction. The Railroad will not be subject to penalty by other rules contained in this agreement when contractor's equipment and supplies are moved in accordance with provisions contained herein, and Rule 7(a) does not apply.

Rule 24(h)

Regularly assigned snow plow pilots will not be used in extra conductor's positions.

Rule 25(a) Yard Service Yard Crews

Rates of pay for yard service will be as shown in current wage schedule.

Rule 25(b) Eight (8) Hours or Less Will Constitute a Day's Work

Effective March 25, 1956, there will be established, for all classes or crafts of yard service employees covered by this agreement, a workweek of forty hours, consisting of five consecutive days of eight (8) hours each, with two days off in seven, except as hereinafter provided.

The parties hereto, having in mind conditions which exist or may arise in the application of a five-day workweek, agree that the General Chairman or his designated representative and the Railroad may enter into any additional understandings to implement the purpose of this article.

The term "workweek" for regularly assigned or extra employees shall mean a period of seven consecutive days starting with Sunday.

Unassigned or extra board men used on a second tour of duty in a twenty-four (24) hour period shall be paid time and one-half for the second tour of duty.

It is agreed that the twenty-four (24) hour period shall be governed by the time first called. Twenty-four (24) hour periods shall not run in continuity so as to provide repetitious penalty payments. In other words, the twenty-four (24) hour period shall commence with the call time of the tour of duty immediately prior to the penalty tour of duty.

Rule 25(d) Tour of Duty

Regularly assigned yard crews will each have a fixed starting time, and the starting time of the crew will not be changed without at least forty-eight (48) hours' notice.

In cases where there is a combination of road and yard assignments, such crews will be paid in accordance with Rule 25(d) and if worked beyond their assigned tour of duty such time will be paid at overtime rates.

Rule 25(e)

Yard crew will have a designated point for going on and off duty. Pay of yard men will continue until they reach point at which they start work.

Rule 25(f)

Yard crews will be allowed twenty (20) minutes for lunch between four and one-half (4-1/2) to six (6) hours after starting work without deduction in pay.

Rule 25(g)

Yard crews will consist of a conductor and two (2) brakemen, and will not be required to work with less than a full crew as specified in this section if other trainmen are available. It is understood that this rule will not be abused and yard crews required to work shorthanded beyond reason. Provided, however, that yard crews at Whittier started within the hours of their assignment in snow service inside switching limits will be paid for four (4) hours or less, and if used more than four (4) hours will be paid not less than a basic day, in addition to the regular yard pay and without deduction therefrom for the time consumed in said service.

MEMORANDUM OF UNDERSTANDING
Between
THE ALASKA RAILROAD
And
UNITED TRANSPORTATION UNION

The parties signatory hereto have met and mutually agreed on the followi
in a joint cooperative effort to improve and enhance the efficiency of t
Service in respect to unassigned yard crews used at Whittier.

It is hereby agreed as follows:

(Add as paragraph two to 25(h) addressing use of unassigned yard crews
Whittier.)

> Unassigned yard crews (Extra Board crew) at Whittier may be used between Whittier and Portage for taking loads and/or empties, or any other equipment, and for the purpose of switching Portage. Unassigned yard crews, when so used, will be paid actual time on a minute basis with a minimum of two (2) hours in addition to miles or hours earned. This allowance shall be in addition to the regular yard pay and without any deduction therefrom. Actual time on duty will be used for computation of overtime under Rule 2(b).

Differences or disputes regarding the application or interpretation of t
document will be resolved through joint discussion and consultation betw
the parties.

FOR THE ORGANIZATION:

Michael W. Olson
United Transportation Union

FOR THE ALASKA RAILROAD:

J. A. Hepworth
Acting Supt. of Transportation

Feb 1, 1982
Date

Should an off duty yard crew be used after tie-up from its assignment, they will be paid not less than a basic day under yard rules and conditions.

Trainmen and enginemen reporting for duty late, especially consistent violators, will be disciplined.

Rule 25(h)

Where crews are called to perform yard service within switching limits they will not be used in road service when road crews are available, and when so used will be paid not less than the minimum day in each class of service, except that assigned yard crews at Whittier when started within the assigned hours of their tour of duty, may be used between Whittier and Portage for taking loads and/or empties, or any other equipment, and for the purpose of switching Portage, except due to blockade conditions. This rule will not apply to handling special troop movements outside of Whittier yard limits.

Rule 25(i)

All engines assigned to switching service will be so equipped as to be in compliance with Federal Railroad Administration safety standards. Engines equipped with plows will not be used in yard service when other motive power is available.

Rule 25(j) Combination Road-Yard Service Zones

Yard crews may be used outside yard limits without payment of two classes of service between:

Anchorage and 105
Anchorage and Birchwood
Healy and McKinley Park
Healy and Ferry
Fairbanks and Saulich until such time as north switch installed at Happy. (No penalty will be paid to road crews required to set out or pick up at Saulich during this interim period.)

for switching, and can perform the same work as allowed within yard limits, except rerailing equipment derailed on main track by road crews. Yard crews working under this rule instructed to couple air hose will be allowed one (1) hour in addition to their regular earnings. Road crews, when required to set out and pick up within these limits (except setting out of bad order cars) will be paid actual time on a minute basis with a minimum of two (2) hours in addition to miles or hours on their road trip.

Road crews called in local service and crews called for Anchorage-Palmer turn would not be subject to the penalty provision of Rule 25(j) when required to set out or pick up within these limits.

It is further understood for example, crews switching within these limits may run beyond the far switch without penalty for the purpose of executing switching movements.

Yard crews will not be required to work in excess of eight (8) hours when other crews are available except in case of necessity, in which case the time may be extended and paid for on a continuous basis. The difficulty in scheduling an exact eight hours' work for a yard crew is acknowledged in this rule, and overtime not more than thirty (30) minutes in excess of the normal eight (8) hour tour of duty shall not be construed as a violation of this rule nor the spirit thereof. Except when, for more than

three (3) consecutive days, one designated Anchorage Yard crew performing service primarily between Anchorage Yard and Milepost 105 are required to work in excess of eleven (11) hours per day, additional crews will be called if available.

Rule 23(1)-2

At points where yard crews are employed, combination road-yard service zones may be established within which yard crews may be used to perform specified service outside of yard limits under the following conditions:

(a) Road-Yard Service Zones for purposes of this rule are defined as between:

Seward - Primrose
Anchorage - Potter
Anchorage - Birchwood
Healy - Outfit Siding 342.7
Healy - Browne
Fairbanks - Saulich

for the purpose of handling disabled trains tied up under the Hours of Service Act.

(b) Within Road-Yard Service Zones, yard crews may be used to handle disabled road trains or those tied up under the Hours of Service Act outside their final terminal without penalty to road crews. For such service yard crews shall be paid miles or hours, whichever is greater, with a minimum of one (1) hour for the class of service performed for all time consumed outside of yard limits. This allowance shall be in addition to the regular yard pay and without any deduction therefrom for the time consumed outside of yard limits.

(c) Nothing in this rule is intended to impose restrictions with respect to handling disabled road trains or those tied up under the Hours of

Service Act beyond defined road-yard service zones, established under this rule. The carrier will not be penalized under provision of Rule 25(j)-1 (overtime) when crews are used to handle road train to terminal and encounter mechanical difficulties or circumstances beyond the control of the carrier which results in crew exceeding eight (8) hours. Accordingly, crews will not be used to handle road trains to terminal unless it is known work can be accomplished within assigned eight (8) hour tour of duty.

Rule 25(k)

When road crews are required to perform more than four (4) hours initial switching at Anchorage terminal within any ten hour spread or less that yard crews are not on duty, an entire yard crew from the extra board will be paid a minimum day.

Rule 25(l)

Assigned yard men at Seward and Whittier may be permitted to lay off not to exceed three (3) days. When so permitted to lay off, their positions may be filled by other regular assigned yard men, provided no extra men are available in Seward or Whittier. The oldest conductor or brakeman will be given preference in fulfilling such relief.

Rule 26(a) Revised

Terminal hostlers, hostler helpers, and engine watchman rates will be shown in current wage schedules.

Rule 26(b) Revised

Terminal hostlers and hostler helpers will be regularly employed at the following points:

Anchorage - Four (4) terminal hostlers
Four (4) hostler helpers
Fairbanks - One (1) terminal hostler

Rule 26(c) Revised

Terminal hostler and hostler helper assignments shall be forty (40) hours a week, consisting of five (5) consecutive days of eight (8) hours each, with two (2) days off in seven (7).

Rule 26(d) Revised

Regularly assigned terminal hostler and hostler helper will each have a fixed starting time and starting time will not be changed without forty-eight hours' notice.

Rule 26(e) Revised

As conditions may justify, the management will bulletin other permanent or temporary positions of terminal hostler and hostler helper in addition to the positions listed above.

Rule 26(f) Revised

1. At Fairbanks the terminal hostlers (if promoted qualified engineers) may be used to fill an engineer's vacancy when no extra men are available.

2. Terminal hostlers will be used to protect engineers' and firemen's vacancies before the use of hog book men, which includes the use of terminal hostlers on their layover days.

3. When a vacancy exists, the senior terminal hostler will be called. He may be aggregated in any manner necessary to exhaust him of hours of service. If the senior terminal hostler cannot

be used for any reason, then the junior terminal hostler must be called.

4. Vacancies created in the roundhouse by using terminal hostlers in road or yard service must be protected whenever a hostler's regular time of duty is vacant for any reason. Vacancies will be filled first by extra board engineer if available, second by the assigned hostler, and if not available or cannot be used account hours of service exhausted, vacancy will be filled by employee registered in hog book in accordance with Rule 9(c)-13.

5. Hours of service apply to a hostler who is working any job or protecting a vacancy, including yard or road service.

6. Men who are not used in their rightful turn as outlined in the foregoing will be paid in accordance with Rule 9(d) "Run-rounds."

Rule 26(a) Revised

Assigned terminal hostler and hostler helper used in road service when extra men are not available will be paid mileage and overtime at their respective rates, and in any event will be paid not less than they would have earned on their assignment. Hostlers used on rest days in yard or road service will be paid in accordance with Rule 3(d).

Rule 26(h)

Eight (8) hours or less will constitute a day's work.

Rule 26(i) Revised

Regularly assigned terminal hostlers, hostler helpers and engine watchmen who are ready for service the entire week and do not lay off of

their own accord will be paid not less than the weekly minimum as provided in sections (a) and (c) of this rule.

Rule 26(j) Revised

Terminal hostlers and hostler helpers must be qualified by Road Foreman of Engines/Trainmaster.

Rule 26(k) Revised

Terminal hostlers and hostler helpers will be bulletined as required by this agreement, and will be assigned from the fireman's seniority list and will be regarded as fireman positions for the purpose of force assignments under Rule 11(k).

Rule 26(l) Revised

Terminal hostlers, hostler helpers and engine watchmen will be allowed twenty (20) minutes for lunch as near the middle of the shift as possible without deducting therefor.

Rule 26(m) Revised

Hostlers will do roundhouse and shop switching only. Hostlers will switch powerhouse coal if there is no yard engine on duty.

Rule 26(n) Revised

Where the word "hostler" is used in this rule, it will also apply to terminal hostlers.

Rule 26(o) Revised

Officials or employees other than terminal hostlers or hostler helpers will not be used in assigned terminal hostler or hostler helper jobs when extra men are available.

Rule 26(p)

Engine watchman assignments will be for six (6) days and will be guaranteed forty-eight (48) times the applicable straight time rate each week. Time so lost will be deducted at the rate of eight (8) times the applicable rate for each day so lost.

Rule 26(q) Revised

Engine watchmen will be employed or assigned only on connection with work, snow, or wrecker service, and will be paid the firemen's rate applicable for the service so assigned. Engine watchmen used at line points in connection with work other than work, snow, or wrecker service will be paid hostler's rate for the day or days such work is performed in lieu of engine watchman's rate.

Rule 26(r) Revised

Engine watchmen will be furnished from the fireman's seniority lists, and will not be required to handle locomotives or other self-propelled equipment.

Rule 26(s) Revised

Unassigned or extra men used as hostler, or combination of yard and hostling service, shall be paid time and one-half for the second call in twenty-four hours as the 24-hour period is defined in Rule 25(b).

Rule 26(t)

Firemen forced on hostler or hostler helper jobs subsequent to the time they have worked six (6) months or more as a hostler or hostler helper will not have such excess time deducted

from the nine hundred (900) days required for promotion.

Rule 27 Doubling Hills

When trainmen and enginemen are required to double hills or run for fuel or water, actual miles run, including doubling mileage, will be the mileage of the trip. Example: Crew called at "S" for 10:00 a.m. Depart at 10:20 a.m. Runs "S" to "A" doubling Woodrow to Divide and Hunter to Grandview, doubling mileage twenty (20) miles. Arrive "A" 7:45 p.m. Tie-up 8:00 p.m. Allowance - 114 miles and 20 miles doubling, 15 minutes final terminal delay. Total allowance - 137 miles.

Rule 28(a) Seniority and Promotion

Brakemen and firemen will rank on the seniority lists as of the date they pass the required physical examination given by local railroad doctors and are placed on the respective working lists, or start their student trips, as the situation may require. Brakemen and firemen hired on a temporary appointment will not retain this date unless certified later by the Civil Service Commission while they are still in service. Conductors and engineers will pass the required examination for promotion to such positions. Trainmen and enginemen, except as otherwise provided, will have choice of runs or jobs in the respective classes or grades of service to which their seniority in service entitles them.

Temporary uses of brakemen as conductors or firemen as engineers does not constitute a promotion. In case two (2) or more men are examined for promotion on the same day, seniority in service as brakeman or fireman, as the case may be, will govern relative standing. If, on account of sickness or other causes beyond his

control, a man is unable to present himself for examination in regular turn, it will not affect the record date of his promotion. In cases where it becomes necessary to use unpromoted men for conductors, men who have been in the service of The Alaska Railroad for a period of one (1) year will be used, and such men used in their proper turn at the time of call on the respective extra boards. Men will have thirty (30) days to complete examinations from date of notification.

Men who may have retreat rights from other crafts or seniority list will, in exercising these rights, be required to pass the prescribed physical examination and the written examination on the operating rules of the Transportation Branch and will be given a seniority date as of the day they mark up for work exercising such retreat rights.

Rule 28(b) Revised - Baggagemen

Baggageman's assignment between Anchorage and Fairbanks will be filled by trainmen qualified as train baggagemen who have three (3) or more years of service as trainmen on The Alaska Railroad.

Vacancies on baggagemen positions between Anchorage and Fairbanks will be protected from Conductors' Extra Board. Should no extra board conductors be available or rested, the oldest rested brakeman on brakemen's extra board will be called regardless of his position on the board at time of call.

Baggagemen called for the Anchorage-Portage-Whittier shuttle will be called from the brakemen's extra board and bids for Anchorage-Whittier baggagemen will be accepted from any trainman qualified for baggageman service, and assignments made accordingly.

Rule 28(c) Students - Limitation

Student brakemen and firemen who have not had previous experience will be required to submit themselves to the Railroad's training program for a sufficient number of days or trips as will qualify them to meet the minimum requirements of the class of service for which they have been employed.

Rule 28(d) Protected Employees - Firemen

Firemen remaining in continuous employment on seniority listing dated January 1, 1964, shall be protected employees and shall not be separated because of any change in manning requirements of crew consist.

Rule 28(e) Ninety Day Limitation on Students

Inexperienced men who are hired as brakemen or firemen will not acquire permanent seniority until they have been in the service ninety (90) actual days of work, and if at that time their services are satisfactory and they have been recommended by three (3) conductors or engineers, as the case may be, with whom they have worked for the major portion of that period, they will be given seniority from the date of their appointment as brakeman or fireman. Inexperienced men may be removed from service within the ninety (90) actual days worked without investigation.

Rule 28(f)-1 Promoting and Hiring of Engineers

Promotion to engineer will be offered firemen who have been in the service of The Alaska Railroad as such for a period of four (4) consecutive years in the order of their seniority. When there are no firemen in the service of The

Rule 28(f)-2 Promoting and Hiring of Conductors

Promotion to conductor will be offered brakemen who have been in the service of The Alaska Railroad as such for a period of three (3) consecutive years, in the order of their seniority. When there are no brakemen in the service of The Alaska Railroad with the required service, service on other railroads may be combined with service on The Alaska Railroad to meet the three-year requirement of this rule; but men qualified by the combination of service will not be promoted unless there is an actual shortage of qualified men. When there are no brakemen in the service of this Railroad with the required experience for promotion, conductors with not less than two (2) years experience as such on a common carrier railroad operated under standard train rules may be hired and when so hired will be given date as brakeman, as per sections (a) or (i) of this rule, and as conductor as of the day they qualify as such. It is understood and agreed that men qualifying und the combination of services on this Railroad and other common carrier railroads, as outlined above, will not be promoted unless there is an actual shortage of qualified men.

Alaska Railroad with the required service, service on other railroads may be combined with service on The Alaska Railroad to meet the four-year requirement of this rule; but men qualified by the combination of service will not be promoted unless there is an actual shortage of qualified men. When there are no firemen in the service of this Railroad with the required experience for promotion, engineers with not less than two (2) years' experience as such on a common carrier railroad operated under standard train rules may be hired and when so hired will be given date as fireman, as per sections (a) or (i) of this rule, and as conductor as of the day they qualify as such. It is understood and agreed that men qualifying under the combination of services on this Railroad and other common carrier railroads, as outlined above, will not be promoted unless there is an actual shortage of qualified men.

Rule 29(c) Declining or Failing to Take Examination - Penalty

Brakemen and firemen must take promotion in accordance with Rule 29(f). Brakemen and firemen will be given thirty (30) days advanced written notice to complete a satisfactory examination(s) for promotion. Brakemen and firemen who decline, do not appear to take examination(s) or fail the examination(s) for promotion prior to the expiration date of the 30-day notice period will relinquish seniority and shall follow and be junior to the youngest brakeman or fireman on their appropriate roster as of 12:01 a.m. following the expiration date of the 30-day notice period.

Such brakemen or firemen who declined, did not appear to take examination(s), or failed examination(s) will be given a second opportunity to take and pass the examination within sixty (60) days following the expiration date of the origi-

nal thirty (30) day notice period. Brakemen and firemen completing and passing examination(s) within the sixty (60) day period designated, their seniority will be reinstated to the position previously held on the brakemen's or firemen's seniority roster. They will be given seniority date as conductor or engineer relative to their position on the brakemen's or firemen's seniority roster.

Should the individual again decline, fail to appear or fail to pass the examination(s), position on respective seniority roster will be that date established on the expiration of the original 30-day notice period.

Such brakeman or fireman will be given the opportunity to complete a satisfactory examination for promotion within ninety (90) days following the expiration date of the second examination, and each succeeding ninety (90) day interval thereafter. Brakemen and firemen completing and passing examination(s) will be given conductor's or engineer's seniority as of the date he passes examination(s) and will rank junior to the junior conductor or engineer as of that date.

Brakemen and firemen who decline, do not appear to take examination(s) or fail the examination(s) for promotion prior to the expiration date of notice period will again relinquish seniority and shall follow and be junior to the youngest brakeman or fireman on their appropriate seniority roster as of 12:01 a.m. following the expiration date of notice period.

Rule 28(h) Appointment - Conductors and Engineers

Men promoted to conductor or engineer will be given an appointment date as of the day they pass the examination, which will be their date

as conductor or engineer on the seniority list, subject to section (g) of this rule. Men promoted to conductor must be qualified baggagemen. Men hired as conductor-brakemen or engineer-fireman will be given dual seniority dates as conductor or brakeman and engineer or fireman respectively at time of appointment.

Rule 29(i) Notice in Writing

As soon as a brakeman or fireman is promoted, he will be notified in writing by a proper official of the Railroad of the date of his promotion and unless he files a written protest within sixty (60) days against such date, he cannot thereafter have it changed. When a date of promotion has been established in accordance with regulation, such dates will be posted within ten (10) days and no protest will be considered after sixty (60) days.

Rule 29(j) Schooling Prior to Examination

When a fireman is employed and placed in service as such, he will be given a first progressive examination book containing questions upon which he will be examined after one (1) year's service. After completing his first year's examination, he will be given the second progressive examination book containing questions upon which he will be examined after two (2) years in the service. After completing his second examination, he will be given a third and final examination, and upon completion of the third examination he will be given a certificate of promotion and thereafter rank on engineers' seniority list as per section 29(h).

Rule 29(k) Students

Inexperienced men hired as student brakemen or student firemen who submit themselves to the Railroad's training program as students will be

paid $10.00 for all service performed for each calendar day of training, learning the road or yard functions of the craft.

In addition, the allowance provided in Rule 53(a)-1, -2, and -3 will be paid to students when working with other train crew members who are tied up and are paid the allowances provided in Rule 53(a).

Rule 28(i) System Rights

System rights on The Alaska Railroad will prevail.

Rule 29(a) Discipline and Investigation

Trainmen and enginemen charged with offenses involving suspension or discharge will be promptly advised in writing of the nature of such offense, and no trainman or engineman will be discharged, suspended, or given record suspension without a full hearing by the Superintendent of Transportation, Trainmaster, Superintendent of Motive Power, Road Foreman of Engines, or an officer superior if desired by the Railroad, at which hearing all parties interested and employee witnesses will be notified to be present, and at which any trainman or engineman under investigation may be represented by an employee of his choice and both will be permitted to be present and offer evidence and to hear all evidence submitted at hearing and to interrogate witnesses if desired. Decision to be rendered in writing within fifteen (15) days.

If the trainman or engineman is not satisfied with the decision, he or his representative will have the right to appeal to the next higher officer designated by the General Manager. If found blameless, he will be immediately reinstated and will be allowed the time lost, with

minimum of eight (8) hours or one hundred (100) miles for each calendar day. If, on appeal, a decision is not made within thirty (30) days from date of appeal, the employee concerned, or his representative, may appeal to the next higher officer designated by the Railroad to handle such matters. Trainmen and enginemen who are entitled to rest will not be disturbed by call for purpose of attending a hearing until the expiration of time specified for rest, except in case of necessity. A transcript of the evidence will be taken at the hearing and a true copy will be furnished the accused or his representative.

Rule 29(b)-1 Revised - Investigations, reexaminations of Operating Rules and Physical Examinations

Trainmen and enginemen required to qualify, requalify, attend investigations, classes of instructions, examinations, or report for physical examination in order to meet the requirements of the carrier, will be paid on the following basis: actual time lost, but in no case less than time lost had employee followed his turn, and in addition, any deadheading and legitimate expense as provided for by Government Travel Regulations, except that in all cases a fireman or brakeman qualifying or taking examinations for promotion to engineer or conductor will do such qualifying and take such examinations at his own time and at no expense to the management. This will include any deadheading necessary for promotion. If by mutual agreement between employee and designated representative of the carrier, employee (when required to requalify on Operating Rules and Special Instructions or report for physical examination in order to meet the requirements of the carrier) reports on layover or off day to complete required examinations, will be compensated with a basic day (100 miles) or eight (8) hours at

the rate of class of service assigned, Rule 3(d) will not apply. Examinations for promotions will be conducted at employee's home terminal.

EXCEPTION: Brakemen and firemen participating in a formalized accelerated training program for promotion to conductor and engineer will be paid under the provisions of the accelerated training program which supersede provisions of Rule 29(b)-1.

Rule 29(b)-2 Revised (Reference Supplement No. 55)

In compliance with Code of Federal Regulations Title 49, Part 217.9, trainmen and enginemen must be conversant with Operating Rules and Special Instructions in order to meet the requirements of the Railroad, and will be required to pass a biennial written and oral reexamination to remain in train or engine service. Employees furloughed on LWOP or extended absences during which changes in Operating Rules and/or Special Instructions were initiated, the employee, prior to returning to duty, will be subject to an oral reexamination. Impromptu oral examinations may be given at any time to insure the employee has knowledge of, and is conversant with current Operating Rules and Special Instructions as prescribed by General Rule A. Failure to pass oral examination will result in effecting notice of biennial and oral reexamination of Operating Rules and Special Instructions consistent with the provision applicable to routine biennial reexamination.

Employees will be afforded thirty (30) days' advanced written notice of the date of biennial reexamination. Employees failing to pass the required examination on the first attempt will be given a second opportunity to demonstrate their ability to pass reexamination. The examination will be taken not less than sixty

(60) days after notice of failure to pass the first examination. Failure to pass the first examination shall result in restricting the exercise of employee's seniority during this 60-day interim period as follows:

Promoted conductors and/or engineers will be permitted to exercise seniority as conductor and/or engineer in yard and/or hostling service only. Conductors and engineers so restricted must exercise seniority as conductor or engineer on yard and/or hostling positions when vacancies for these positions are bulletined. Conductors and engineers so restricted will be permitted to exercise seniority as brakeman/baggageman or fireman/hostler/hostler-helper only when cutbid or displaced as conductor or engineer and when further exercise of conductor's or engineer's seniority is not possible account no vacancy for such positions bulletined nor no junior man assigned as yard conductor, yard engineer, or engineer hostler.

In the event promoted trainman or engineman is occupying a brakeman/baggageman or fireman/hostler/hostler-helper position when restriction of conductor's or engineer's seniority is effective, the exercise of conductor's or engineer's seniority by bid, or bump if displayed, must be effected at the first opportunity. If notice of such exercise of conductor's or engineer's seniority is not received by Crew Dispatcher prior to bulletin closing time or when exercising seniority after having been displaced, conductor and engineer so restricted will be force assigned to respective positions if no bids are received from senior conductor or engineer, and/or will be required to displace junior man occupying yard conductor, or yard engineer positions.

Brakemen and firemen will be restricted to yard and hostling assignments.

The employee's failure to pass a satisfactory written and oral examination on the second attempt shall constitute failing to meet the requirements of the Railroad and adverse action proceedings will be inititated promptly to effect reassignment to more suitable employment for which the employee qualifies, or removal.

Rule 29(c) Appeal of Adverse Action

It is understood that discharge, suspension for more than thirty (30) days, furlough for thirty (30) days or more, or reduction in rank or compensation, all defined as adverse actions in applicable regulations of the Civil Service Commission, must be processed in accordance with regulations of the United States Civil Service Commission applicable thereto. Such actions are of a disciplinary nature and may also be processed, at the option of the employee concerned, by appealing directly to the General Manager prior to appealing to the Civil Service Commission. However, if an appeal is made to the Civil Service Commission prior to appealing to the General Manager, the right to appeal to the General Manager is lost.

If the first appeal is to the General Manager, an appeal cannot be made to the Civil Service Commission until after a decision is made by the General Manager, unless no decision is made by the General Manager within sixty (60) days from date of appeal, after which time the appeal to the General Manager may be terminated by appealing to the Civil Service Commission. An appeal to the General Manager should be directed to him at The Alaska Railroad, Room 306, General Office Building, P. O. Box 7-2111, Anchorage, Alaska, 99510. It must (a) be in writing, (b) give the basis for appeal, (c) state whether a hearing is desired in connection with the appeal, and (d) be submitted no later than ten (10) days after the effective date of removal.

Any employee grievance which does not result from an adverse action under regulations of the Civil Service Commission shall be handled under the rules of this agreement.

Rule 30(a) Grievances

No grievance will be considered unless presented in accordance with Section 10 of the Basic Labor Agreement between The Alaska Railroad and Brotherhood of Railroad Trainmen and Brotherhood of Locomotive Firemen and Enginemen of February 20, 1961, and/or in accordance with Civil Service regulations.

Rule 30(b) Discharge and Return to Duty

Trainmen and enginemen who are discharged may be reemployed as new hires, or may be reinstated with former rights, at any time, except as prohibited by Civil Service regulations.

Rule 30(c) Reemployment - Voluntary Resignation

A man who voluntarily leaves the service of the Railroad and is reemployed will rank as a new man, except as prohibited by Civil Service regulations, including regulations governing retention roster requirements.

Rule 31 Attending Court

Attending court and jury duty will be governed by the "Act of June 1940" and all rules pertaining thereto.

Rule 32(a) Pass Transportation

Trainmen and enginemen whose seniority in service is two (2) years or greater will be granted annual transportation for themselves and fami-

lies over entire system. Those of less seniority will be given trip passes for themselves and families upon request.

Rule 32(b) Pass Privileges

Trainmen and enginemen who have been in the service of the Railroad two (2) consecutive years will be granted an annual pass over the entire system, and after five (5) years' consecutive service will be allowed the privilege of securing through their superintendent such free transportation or reduced rates for themselves and dependent members of their families over steamship lines and over any other railroad in the United States that the management is able to secure, or is permitted to obtain by law.

Rule 33(a) Leave of Absence

Except in case of sickness or disability, leave of absence exceeding six (6) months will not be granted, except that, by mutual consent of the management and authorized representative of the man, a longer leave of absence may be granted.

Rule 33(b) Leave of Absence - Committeemen

Leave of absence will be granted local and general committeemen when on business in connection with their organizations, and such leave will not be charged against personal record of employees. Employees representing the organization as committeemen will be provided with annual transportation over the system for themselves and dependent members of their families.

Rule 34 Assigned to Other Service

In case a trainmen or engineman is assigned to a position other than in train or engine service, or is employed by his respective organiza-

tion, his seniority rights as trainman or enginemen will not be impaired by reason of such assignment or employment, and his rank on the seniority list will be such as he would have gained had he been continuously employed in train or engine service.

Rule 35(a) Time Slips and Time Allowances

Conductors and engineers will report time of their brakeman and firemen with their own and when time is not allowed as per time slips, each member of the crew will be notified promptly reasons for disallowances and whatever allowances, if any, has been made. If no notice of disallowance is given, time as reported on time slips will be allowed.

Rejected time slips should show date rejected and rule number under which rejected. Time slips submitted by trainmen and enginemen not specifying rule under which time is claimed will be returned for proper submission. Rejected time slips must be returned within thirty (30) days of date received.

Rule 35(b) Mileage Allowance

Mileage allowance will be computed on Time Table distances. Fractions of miles less than .5 will be dropped and .5 or over added.

Rule 35(c) Notification of Deduction

When deductions are made from trainmen and enginemen's pay, they will be given a statement in writing. A slip clipped from a copy of the payroll will meet the requirements of this rule.

Rule 35(d) Claims

For all established shortages, or on claims

adjusted by the committee that amount to ten dollars ($10.00) or over, time vouchers will be issued upon request. Sums of less than ten dollars ($10.00) will be carried on the next succeeding payroll.

When time claims are settled between superintendent and committee, the superintendent will notify man or men to whom payments are to be made stating amounts and reasons for allowances and whether it is paid by voucher or being carried on next regular payroll, sending copy of each notification to the General Chairman.

Rule 36 Trainmen and Enginemen Leaving Service

Trainmen and enginemen leaving the service will be paid at the earliest practical time in full, less the authorized deductions which may be found against their pay.

Rule 37 Bond Premiums

Trainmen and enginemen will not be required to pay the premium on bonds except as may be required by law.

Rule 38 Electric or Motor Service

Where steam power is supplanted by electric or motor service, the rules and rates contained herein will apply.

Rule 39 Meals on Duty

Time of trainmen and enginemen will not be discounted for time required to get meals on duty.

Work or road crews will be permitted to eat within four and one-half (4-1/2) to six (6) hours from time on duty or from last meal, pro-

viced they are within reasonable proximity of regular eating places, except that crews in turnaround service may eat once while on duty. Management may designate whether the crew will eat on the northbound or southbound trip.

Rule 40(a) Layoff and Reporting for Duty

Trainmen and enginemen desiring to lay off must give ample notice in advance of call.

Rule 40(b) Outside Points

Men laying off and who are located at points on the Railroad will not be recalled for service except in emergency and then only after all available men have been used. Men who are laying off on account of sickness will not be recalled until released by doctor.

Rule 41 Loss or Damage to Equipment

Trainmen and enginemen will not be obliged to pay fines for loss or damage to equipment.

Rule 43(a) Coupling and Uncoupling Air Hose

It will not be the duty of trainmen and enginemen to couple air hose, steam hose, or test air at terminals where carmen are employed and on duty.

Yardmen required to couple air hose in yards where carmen are employed and on duty will be allowed one (1) hour in addition to their regular earnings without deduction for the day or shift. Coupling of air between engine and first cars, coupling over and coupling crossings will not constitute penalty payments under this rule.

Yard crews assigned for service at Whittier for service between Whittier and Portage in accord

with Rule 25(h) will be allowed payment for coupling air hose at Portage, when required, as provided in Rule 43.

Yard crews assigned for service at Healy will be allowed payment for coupling air hose at Healy Yard, when required, as provided in Rule 43.

Rule 43(b) Power Vans

Train crews, when instructed by message, will be required to plug and unplug electric cables, servicing power vans, at fixed locations. When crews are so required, they will receive one hour, at the prevailing rate, in addition to all other earnings and allowances for the day or trip. This rule is applicable to road crews only, and the crew must be instructed by message to perform this service. No discipline will result from any mistake made by crew member, in the plugging or unplugging of these cables, which might result in loss of lading due to spoilage.

Rule 44(a) Handling of Caboose

The following will be observed to its fullest possible extent; there will be a caboose track at all terminals. Caboose will be taken off trains and put on caboose tracks immediately on arrival. Switching with cabooses is prohibited. Where yard crews are on duty, cabooses will not be taken from caboose track and put in the train until two (2) hours before leaving time of train. In work train service, where work trains are double-shifted and cabooses are not available, the management may, if it deems it necessary, provide outfit cars for crews that are off duty in order that one caboose may suffice for both the day and night crews of a work train.

Carmen will be required to clean and service all pool cabooses.

Rule 44(b) Seats on Engines

Comfortable seats will be provided on all freight engines for firemen and head brakemen.

Rule 44(c) Double Loads and Draw Bars

It will not be the duty of trainmen and enginemen to chain double loads or to load draw-bars.

Rule 45 Schedules

All trainmen and enginemen will be furnished with a copy of the schedule and supplements thereto.

Rule 46 Train Boxes and Supplies

At terminals where supplies are available, trainmen will not be required to place supplies, except stationery, on cabooses, but are not relieved from knowing that proper equipment and supplies are on cabooses before departing from terminals. The carrier agrees to furnish a warm caboose during the period of October 1 through April 1.

Rule 47 Handling Side Doors, Aprons, etc.

It will not be the duty of trainmen and enginemen to handle cables, side boards, side doors, or aprons, spreaders, or to operate dump cars, weed burners, or rail loaders.

Rule 48 Officers Will Not Do Trainmen's Work

General or local officials will not perform the duties of conductors and brakemen in switching or moving trains over main line. When such service is required, a train crew will be called.

Rule 49 Arbitrary - Copy Train Orders

At station or telephone booth or by radio where operators are not assigned, or operators are not available, a member of a crew required to copy train orders will be allowed two dollars ($2.00) in addition to all other earnings on the day or trip, regardless of the number of orders or places where same are copied. Engineers will copy train orders when it is not convenient for the conductor to deliver order to engineer. When engineer and conductor are both required to copy train orders, they will both receive payment.

Rule 50 Watching Engines

When so instructed, enginemen will be allowed time for watching engines when tied up at points where no watchman or hostler is employed. Both the engineer and fireman will not be paid for the same time.

Rule 51 Application Approval

The applications of trainmen and enginemen entering the service will be approved or rejected within ninety (90) days. When applicant is not notified to the contrary within the time stated, it will be understood that application is approved; but this article will not operate to prevent the removal from such service of applicant if subsequent to the expiration of ninety (90) days, it is found that the information given by him in his application was false.

Rule 52 Emergency Defined

The word "emergency" as referred to in this agreement is held to mean wrecks, slides, washouts, or other unforeseen occurrences that could not have been prevented or avoided. The word

"emergency" will not be construed as a convenience to work crews or men beyond twelve (12) hours in order to avoid using other available men or crews.

Rule 53(a) Meal and Lodging Allowance

Road crews (all classes of service) tied up at other than designated home terminal for four (4) hours or more (when meals and lodging are not provided by the Railroad) each member of the crew so tied up shall be furnished or reimbursed for meals and lodging as follows:

1. At terminals (Seward, Anchorage, Healy, Fairbanks), single room will be provided, reimbursement will be made upon presentation of a receipted bill from designated hostelry.

2. At intermediate tie-up points, the Railroad will provide sanitary and comfortable sleeping quarters, single rooms, when commercial facilities are not available.

3. Road crews so tied up (or on release four (4) hours or more) shall receive a meal allowance comparable to charge made by the Railroad for a meal at Railroad operated mess. An additional meal allowance will be provided after being held an additional eight (8) hours.

4. Men called from the Extra Board or used in the capacity of an extra man to fill vacancies at outlying points (30 miles or more from the terminal limits of the location where the extra list from which called is maintained) when held at the outlying point for more than one tour of duty will be entitled to meal and lodging allowances.

5. The payment of meal and lodging shall be a recurring allowance applicable to each twenty-four hour period.

MEMORANDUM OF UNDERSTANDING
Between
THE ALASKA RAILROAD
And
UNITED TRANSPORTATION UNION

The parties signatory hereto have met and mutually agreed on the following in a joint cooperative effort to improve and enhance the efficiency of the Service in respect to snow service crews.

It is hereby agreed as follows:

In the absence of Curry, snow service crews may be tied up at Talkeetna and, when commercial facilities are utilized, the Carrier will provide for lodging. Single rooms will be provided in accordance with Rule 53(e).

Preference will be given to acquiring accommodations at the Talkeetna Inn, if available.

Differences or disputes regarding the application or interpretation of this document will be resolved through joint discussion and consultation between the parties. It is further understood that this Memorandum of Understanding may be cancelled upon thirty (30) calendar days written notice by either party.

FOR THE ORGANIZATION:

Michael W. Olson
United Transportation Union

FOR THE ALASKA RAILROAD:

J. A. Hepworth
Acting Supt. of Transportation

Feb 23, 1982
Date

6. Train and enginemen force assigned to Fairbanks or Anchorage (away from the terminals Seward, Anchorage, Fairbanks, and Healy, where he maintains his residence) shall be provided a $10.00 daily lodging allowance limited to fifteen (15) days of such assignment.

Rule 53(b) Switch Shanties

Sanitary and comfortable switch shanties will be provided and maintained at the terminals of Seward, Anchorage, and Fairbanks. Lockers, toilets, and washing facilities will be provided, this to apply at the terminal of Whittier. Living accommodations are to be constructed as soon as construction material is available at Curry, Broad Pass and Healy.

Rule 53(c) Transportation of Household Goods

When trainmen and enginemen are obliged to transfer from one point to another on account of change of division or on account of change in runs, free transportation will be furnished their household goods.

Rule 54 Meeting - General Officers

If a meeting with the general officers is desired, a written notice stating subject to be considered must be forwarded to the General Manager fifteen (15) days before date on which conference is desired and date and time will be fixed as soon as practicable.

Rule 55(a) Reduction in Force and Retention Standing

When forces are reduced so that one or more employees must be removed from a given competitive level, the employee or employees to be reduced will be separated according to retention standing established according to Civil Service

regulations pertaining thereto within the given competitive level. Employees with identical multiple appointments will be regarded as in the same competitive level. Employees cut off under this rule will be separated or furloughed from the service, except that men who have retreat rights may exercise such rights according to Civil Service regulations.

Retention standing for use in reduction-in-force action will be established according to the Civil Service Commission regulations governing tenure of competitive service employees, as follows:

Group I includes employees under career appointments who are not serving probation. A career employee in an obligated position is in Group I only when he competes for other positions at or below the grade of his last non-obligated positions, if any.

Group II includes employees serving probation, career-conditional employees, and career employees in obligated positions.

Group III includes indefinite employees, employees under temporary appointments pending establishment of registers, employees serving under term appointment, employees in status quo, and employees under any other non-status, non-temporary appointments.

An employee not meeting the requirements of the above groups will be classed as Below Group III, non-competing employees, which will include employees with unsatisfactory performance ratings and employees with appointments limited to one (1) year or less.

Civil Service regulations require that employees be listed in Groups I, II, and III as (a) preference and (b) nonpreference, and that, within such subgroups, employees are listed in accordance with a service date which takes into account all creditable service with the Federal Government, creditable military service, and performance ratings. For purposes of reduction in force, no employee in the list below Group III has preference over any other, irrespective of whether he does or does not have military service.

Employees in Group III or above rank in order of service date with preference employees having tenure over nonpreference employees within a single group or below. Preference employees in a lower group rank below nonpreference employees in a higher group.

Employees separated in reduction in force will be given preference in reemployment when in accordance with Civil Service regulations.

Rule 55(b) Performance Ratings

It is understood that efficiency ratings will be made annually for all employees covered by this agreement in accordance with the provisions of the Performance Ratings Act of 1950 and Civil Service Commission regulations applicable thereto. In accordance with standards prescribed by the Commission, employees will be rated as "Outstanding," "Satisfactory," or "Unsatisfactory." Such efficiency ratings shall be used in the manner prescribed by the Commission to add to or subtract from length of service preference in reduction-in-force actions. It is understood that a rating of "Unsatisfactory" under the rules of the Commission automatically requires the employees so rated to be placed in the "Below Group III" category. Employees rated "Unsatisfactory" for two (2) successive rating

periods will be automatically terminated from the service of The Alaska Railroad.

All train and engine service employees will be given an interim rating of "Satisfactory" until the procedures establishing performance ratings on The Alaska Railroad have been approved by the Civil Service Commission and placed into effect.

Rule 56 Retirement Computation - Rotating Assignments

This agreement between the United Transportation Union (Trainmen and Enginemen) and The Alaska Railroad is concluded to provide equality of retirement credits and deductions mutually advantageous to the operating needs of the Railroad and the employees represented by the United Transportation Union.

In the rotating assignment, employees are assigned to perform irregular service on alternate weeks of the biweekly pay period, resulting in differing earnings of the weeks within the pay period that it adversely affects retirement credits and contributions made to the fund by the employees and the Railroad.

Employees are required to perform services within the calendar weeks of the pay period of more or less than forty hours per week and service of more or less than 80 hours in the biweekly pay period.

The rotating assignment earnings shall be computed for retirement purposes, and as subject pay on that portion of earnings in the biweekly period that occurs within the first eighty (80) hours of the pay period. The biweekly computation of eighty (80) hours shall be the workweek as within a pay period. Any deviation due to change of work assignments, interruption of ser-

vice by leave, or similar deviation within the pay period from the rotating assignment, computation automatically reverts to the forty-hour weekly computation. Employees shall be assigned to an administrative work pay period.

This agreement shall not contradict the fundamental requirements of the retirement regulations or laws affecting Federal employees covered under the United States Civil Service Retirement Act.

Section 12. Labor-Management Cooperation

Section 13. Interpretation of Departmental Labor Policy

Section 14. Effective Date and Duration

Preamble. This Basic Agreement is agreed to in the interest of developing sound relations between the employees and management of The Alaska Railroad. Observance of its terms by management and employees, as well as by their representatives, should result in the joint determination of fair and reasonable rates of pay, hours regulations, and working rules; in the prevention of grievances, and in the prompt and orderly settlement of all differences between labor and management, in stabilizing employment and in developing systematic labor-management cooperation for safety, mutual benefit, and good service to the patrons of the Railroad and the State of Alaska.

The Alaska Railroad as an agency of the Government of the United States is dedicated to the accomplishment of certain public purposes as provided in the Act of March 12, 1914, which directed the President of the United States to construct and operate a railroad in the Territory of Alaska (now the State of Alaska). Among these public purposes are the furtherance of the development of Alaska and the support of national defense. The duties and responsibilities necessary to accomplish these public purposes have been vested by Executive Order of the President, No. 3861, dated June 8, 1923, and supplements thereto, in the Secretary of Transportation; and the Secretary, by appropriate orders and regulations, has delegated certain responsibility for operating the Railroad to its General Manager.

Section 1. Definitions

Labor Organizations: The term "labor organization" means any organization, union, or employee representation committee in which employees participate and which exists for the purpose, in whole or in part, of providing representation for members employed on the

Railroad in dealing with the management officials on wages, hours, conditions of employment, grievances, disputes, and other matters pertinent to their employment. This term does not apply to employee welfare organizations, recreational associations, credit unions, or similar associations.

Representative of Labor Organizations: This term includes those individuals, either employees or non-employees of the Department, who are accredited by the employees to represent their interests in relationships or dealings with management officials on matters relating to their employment.

Management Officials: This term includes those employees at all levels of the Railroad's organization in both line and staff capacities, who have significant responsibilities in supervising, directing, and managing program activities and administrative matters which involve decisions or actions affecting employee groups.

Basic Labor Agreements: This terms refers to the written document negotiated by management officials and representatives of employees, which concerns itself primarily with matters of broad principle, policy, and procedure which will govern the relations of the parties thereto in the negotiation of wages and working conditions, the settlement of disputes and grievances, and related matters.

Supplementary Labor Agreement: This term refers to the written agreement or series of agreements which are negotiated and made effective between management officials and representatives of employees within the purpose and in the implementation of the general policies and guidelines of a basic labor agreement. The periodic negotiation and adjustment of wages and related pay matters and detailed working rules and standards

are characteristic of the subject matter of supplementary labor agreements. They may not delete, modify, or otherwise nullify any of the policies and procedures which have been incorporated in the Basic Labor Agreement.

Labor-Management Negotiations: This term is used interchangeably with the term "collective bargaining."

Section 2. Compliance

2.1 It is recognized that in labor-management negotiations, and in the administering of all matters covered by this agreement, both the Railroad and the employees are governed by the provision of applicable Federal laws and regulations, including the labor relations policies and regulations prescribed in Part 376 of the Department of Transportation Manual, all of which are regarded as paramount. This agreement shall at all times be applied subject to all such Federal laws, Executive Orders, Secretarial instructions or directives, related policies and regulations, and the public interest involved in the orderly, efficient and continuous progress of Department of Transportation operations.

2.2 If laws or regulations become effective, binding on the Railroad and inconsistent with the provisions of this agreement, the Railroad shall notify the representatives of the respective labor organizations. The labor organizations and the Railroad shall issue a joint statement of the change and its effect upon this agreement.

Section 3. Scope

This agreement is applicable to those employees of the Railroad not subject to the Classification Act of 1949, as amended, a majority of whom in any particular trade or craft has

designated as their representative a labor organization signatory to this agreement.

Section 4. Employee Rights to Labor Representation

4.1 Employees of the Railroad have the right to form or join organizations and designate representative of their own choosing, provided they do not form or join organizations which assert that employees in the service of the United States Government may strike or which advocate the overthrow of the United States Government by force or violence.

4.2 In the exercise of the right to form or join organizations and designate representatives, employees shall be free from any and all restraint, interference or coercion on the part of management, and the supervisory staff is prohibited from exercising any such restraint, interference or coercion. By the same token, the designation of individuals and officers to represent the management of the Railroad for the purpose of this policy is entirely the responsibility of the General Manager.

4.3 The labor organization may be required to submit a copy of its bylaws, and the names of its officers and representatives, and to make known by whom it is chartered. The identity of individual members or the number of members is not required, except in the determination of representation rights.

Section 5. Discrimination Prohibited

Appointments to the service of the Railroad are to be made strictly on the basis of merit and efficiency. No test of race, color, religious belief, or political affiliation, except as prescribed by law, will be required of any employee, or considered in his appointment,

promotion, demotion, transfer, retention in or termination of service with the Railroad, nor shall any employee of the Railroad nor anyone seeking employment be required to join or refrain from joining any duly accredited organization as a condition of appointment, promotion, demotion, transfer, retention in or termination of service.

Section 6. Determination of Bargaining Rights

6.1 The majority of the employees of any class or craft of the Railroad has the right to determine the organization which will represent the employees of such class or craft for the purposes indicated in the preamble.

6.2 In the initial determination of representation rights and in resolving disputes as to these rights, both employees and management are governed by the appropriate Section of the Department Manual, Department of Transportation, specifically Part 376, D.M.2.

Section 7. Duty to Confer

7.1 If a craft or group of employees has properly designated an organization to represent them in accordance with the provisions of Section 5 above, the representative of such craft or group shall so notify the General Manager, and the General Manager, the officers and supervisors of the Railroad will thereafter meet with such organization and its officers for the purposes described in the preamble to this agreement.

7.2 Representatives of labor organizations or employees desiring to confer with the management officials shall deal in the first instance with those Railroad officials who have primary responsibility over the case or subject matter

which is the subject of conference.

7.3 Differences or disputes between an employee or group of employees and the Railroad, growing out of grievances or out of the interpretation or application of the terms of jointly promulgated schedules, having been handled by the employees or their representatives through established supervisory channels up to and including the Branch Head concerned and the Personnel Officer, the General Manager will then call a conference. Conferences for the adjustment of such differences or disputes will be held whenever possible during the regular working hours, and when so held, labor organization representatives actually working will not lose pay, provided that the number of such representatives of the labor organizations concerned does not exceed two.

7.4 Conferences may be requested by the labor organizations or the Railroad announcing their desire to revise rates of pay or the jointly promulgated agreements, and having given proper notice, the time and place for the beginning of such conferences will be announced. The time required by labor organization representatives in the employ of the Railroad when attending such conferences will not be paid for by the Railroad. Labor organization representatatives attending conferences for revision of pay rates or jointly promulgated agreements shall be granted leave as accrued, or leave without pay, to attend such meetings.

7.5 Leave as accrued may be granted to any other employee for attendance or observance of the above meetings, contingent on the availability of replacement personnel. In the interest of cooperation in labor matters, the Railroad will follow a liberal policy in allowing time off for such purposes, with reasonable limits and consistent with work requirements.

Section 8. Written Agreements

8.1 Rates of pay, hours regulations, and working rules in the determination of which employees, through accredited organizations, have participated will be reduced to writing and will be promulgated as schedules over the joint signatures of the General Manager and the officers of the organization or organizations representing the employees concerned. Such agreements shall be regarded as Supplementary Agreements as defined in Section 1 of this agreement and, in accordance with the applicable regulations of the Department of Transportation, need not be submitted to the Secretary for approval.

8.2 The Railroad and the labor organizations further agree that, pending the determination or adjustment of any issue arising between them by means of the conference machinery and procedures hereinafter provided, there will be no change in the conditions in any schedules or recorded understanding applicable to such issue.

8.3 The Railroad will not make unilateral changes in the terms of any labor agreement pending settlement of outstanding differences through mutually agreeable procedures, except those that are dictated by the Department of Transportation for the public purpose.

Section 9. Wage Policy

9.1 The making of agreements in regard to rates of pay, including rules related thereto, shall be governed by the following wage policy:

a. To establish a means of understanding in reaching fair and equitable wage settlements on The Alaska Railroad, now and in the future, the following principles and procedures will govern the wage negotiations:

1. That the wage rates payable to the employees of the Northern Pacific Railway constitute a fair and equitable pattern to be used as the basis for determining wage rates for operating employees of The Alaska Railroad.

2. That the Alaska Railroad employes should receive, over and above the basic rate for comparable occupations on the Northern Pacific Railway, a percentage differential equal to the differential by which the consumer price index of the Anchorage area exceeds the average consumer prices in all cities of the contiguous 48 states for which place-to-place differentials are computed by the Bureau of Labor Statistics, Department of Labor.

3. That the Bureau of Labor Statistics cost-of-living indexes shall be the basis for determining such an equitable differential between the other 48 states and the Railbelt areas of Alaska.

4. That basic wage increases on the Northern Pacific Railway shall be added to all Alaska Railroad operating employees' wage rates in accordance with the provisions of this agreement. The effective date of such increases shall be as of the effective date of such wage changes occurring on the Northern Pacific Railway, or the earliest effective date thereafter permissible under applicable Comptroller General rulings.

5. At the time of such increases referred to in paragraph 4 above, a cost-of-living differential equal to the Bureau of Labor Statistics cost-of-living differential indexes for Anchorage shall be added; provided that no differential shall be

added when the new Alaska Railroad wage rate is already higher than the corresponding wage rate, by occupation, on the Northern Pacific Railway by a percentage higher than the most recent Bureau of Labor Statistics cost-of-living differential indexes for Anchorage; and provided, further, that cost-of-living differentials shall be added in the amount required to maintain the Alaska Railroad wage rates, by occupation, at a percentage level above the Northern Pacific Railway rates equal to the Bureau of Labor Statistics Anchorage cost-of-living differential indexes.

6. Changes in the index will not affect Alaska Railroad cost-of-living differentials until the next following wage adjustment on the Northern Pacific Railway and will be effective coincident with such Northern Pacific wage adjustments.

7. It is agreed that:

a. The dollars and cents difference between Anchorage and Fairbanks coverating employees' pay rates in effect as of January 1, 1974, shall be maintained for positions at Healy, Alaska, and north in lieu of a consumer price index for Fairbanks and shall provide a cost-of-living allowance for assigned positions with home terminal on the existing subdivision from and including Healy, Alaska, and north.

b. The computation of the consumer price index for Anchorage, and the average consumer price indexes for the other 48 states, shall provide a cost-of-living allowance for assigned positions with home terminal south of Healy, Alaska.

8. If the increases granted on the Northern Pacific Railway are in the form of percentage increases, such increases will be computed on a cents-per-hour basis for the purpose of this agreement.

9. Because of the differences between The Alaska Railroad and the Northern Pacific Railway in methods of computation of passenger conductors' and brakemen's rates on The Alaska Railroad, it is agreed that the passenger conductor's daily rate will be computed at a level $1.37 per hundred miles less than the rate for a freight conductor. It is also agreed that the basic rate for passenger brakemen will be computed at $0.84 per one hundred miles less than freight brakemen.

10. Because of the lack of similarity in the occupation of hostler on The Alaska Railroad and the Northern Pacific Railway, the rate of yard engineer on the Northern Pacific Railway will be used as the basis for terminal hostler on The Alaska Railroad. The rate for engineer hostler on The Alaska Railroad will be computed at $0.88 per day more than the rate of terminal hostler on The Alaska Railroad. The rate for hostler helper will be the rate of yard fireman on The Alaska Railroad.

11. It is agreed that wage increases as specified in this agreement will not be applied retroactively to any operating employee not employed by The Alaska Railroad as of the date final settlement is reached as a result of negotiations on the Northern Pacific Railway. Exceptions to this rule will be (a) employees who entered into military service, voluntarily or otherwise, after the effective date established, (b) employees who were separated

for reasons of retirement under the Civil Service Retirement Act after the established effective date of the wage increase, (c) heirs of deceased employees.

12. In the event the Northern Pacific Railway merges with another carrier, The Alaska Railroad wage rates will be based on that portion of the merged carrier which consists of the trackage now operated by the Northern Pacific Railway

9.2 Accredited labor organizations or the General Manager will give at least thirty days' notice of desire for conference to revise rates of pay. The time and place for the beginning of such conferences will be agreed upon within ten days of receipt of such notice.

9.7 Dental Insurance Benefit:

a. The Employer will pay the premiums specified so that each employee of the bargaining unit may enjoy dental insurance coverage under the terms of the Railroad Employee's National Dental Plan.

b. The terms and conditions of coverage including method of making claim, and premium amounts payable, shall be established by representatives of the National Railway Labor Conference, the United Transportation Union at the National level, and the insurance carrier selected by them.

(Rule 9.3 Revised Jan. 1978)

Section 10. Disputes. Board of Adjustment, Board of Arbitration

10.1 The parties to this agreement recognize that the prompt and orderly settlement of disputes in a fair and reasonable manner is

essential to good labor relations and to the efficient accomplishment of the purpose for which the Railroad exists. To this end officials of the Railroad and employees and their representatives will make every effort to resolve their disputes at the first level of management where the dispute originates. In the event that disputes are not so resolved, they shall be handled in accordance with the procedures outlined below:

a. Grievances brought by employees or their representatives shall be handled in the first instance with the Railroad official having primary responsibility for the subject matter of the grievance.

b. Appeals from the decision of the Railroad official with primary responsibility shall be to the next highest official in line, except that the last appeal prior to submission of the case to the General Manager shall be to the Personnel Officer. There shall be no exception to the carrying of appeals through channels, as described above, except by agreement or mutual assent.

c. Any grievance must be filed, in writing, within thirty days after the first occurrence which gives rise to said grievance. Grievances not filed within this time limit will not be entertained or allowed. A decision on said grievance must be made within thirty days from the date the grievance is received by the official having responsibility in each instance. An appeal to the next higher authority must be made within thirty days and a decision thereon must be made within thirty days. If a decision is not made by the responsible official within the time limit prescribed for him to make a decision, the

decision will automatically be in favor of the employee or claimant.

10.2 Detailed procedures for the handling of such grievances shall be included in supplementary labor agreements between the parties signatory hereto.

10.3 Disputes over grievances arising from the interpretation of the provisions of Supplementary Agreements and which are not resolved to the satisfaction of the parties on appeal to the General Manager in accordance with the provisions governing grievances in the Supplementary Agreements shall be submitted to a Board of Adjustment. Such Board of Adjustment shall be established in accordance with the following terms and conditions.

a. The procedures for the settlement of grievances arising out of the interpretation of the agreement covering the rates of pay, rules and working conditions, and operating and safety rules for the employees of The Alaska Railroad, as represented by the Brotherhood of Railroad Trainmen and the Brotherhood of Locomotive Firemen and Enginemen, will be as follows:

1. There shall be established on The Alaska Railroad, as the occasion requires, a Board of Adjustment to be composed of three members--one member to be designated by the carrier; one member by the labor organization involved; and the third member, not affiliated with either the carrier or the labor organization, and who need not be a resident of Alaska, to be selected by the agreement of both parties.

2. If selection of the third party

from local sources cannot be agreed upon, the third party will be selected from a list of available neutrals submitted by the National Mediation Board, furnished by joint request of management and the union involved.

3. The Brotherhood General Chairman will not make any request for the submission of any case to the Adjustment Board until thirty days after receiving the General Manager's final decision, but will serve notice in writing on the General Manager of his intention to do so within sixty days after receiving notice of the General Manager's final decision if authorized to do so by the fact-finding board.

(a) During the thirty-day period referred to above, the case or cases will be submitted to a fact-finding board composed of three members of the Brotherhood of Railroad Trainmen and three members of the Brotherhood of Locomotive Firemen and Enginemen, appointed by each organization, who will consider the case or cases. After consideration, a decision will be made by this board as to whether a request will be made for an Adjustment Board hearing. Their decision will be binding on the General Chairman involved, at which time a conference will be arranged between the representative of the employees and the General Manager or Assistant General Manager in a final effort to reach agreement. Failing to agree, the case or cases will revert to the Adjustment Board.

4. It shall be the duty of this Board to

begin hearings on grievances submitted to it prior to the expiration of a period of ten days from the date on which the last member necessary to complete the Board is appointed. Unless both parties to this agreement agree upon some other location, all the hearings conducted by this Board shall be held in the city of Anchorage, Alaska. The board shall make its award prior to the expiration of a period of thirty days from the date on which the Board concludes its hearings. The parties hereto may agree at any time prior to the making of such award by the Board to an extension of time.

5. The award of the Board shall be final and conclusive upon the parties hereto as to the facts determined by the Board and as to the merits of the controversy decided, unless disapproved by the Secretary of Transportation within thirty days from the receipt of the award in the Office of the Secretary. Should either party object to the findings of the Board and enter into correspondence or communications with the Secretary, other parties of the Board shall receive copies in advance of such correspondence or communicatsion.

6. In the event a dispute arises involving an interpretation of the Board award, upon request of either party, the Board shall interpret the award in light of the dispute.

7. A majority of all members of the Adjustment Board shall be competent to make an award or interpret an ward with respect to wy dispute submitted to it.

8. The members of the Board representing the carrier and the labor organization

shall be compensated by the party they represent. Each neutral party shall receive from The Alaska Railroad such compensation as the Railroad may fix, together with the necessary traveling expenses and expenses actually incurred for sustenance, or shall receive a per diem allowance in lieu thereof, subject to the provisions of law applicable thereto while serving as such third or neutral party.

9. The Board so constituted under the provisions of this agreement shall serve only for the case or cases submitted to it at the time of its organization and until such cases have been heard and award rendered. The above provisions shall not prohibit any member of a Board from serving in a similar capacity on a subsequent Board.

10. Memorandum of Understanding: That effective date of this agreement shall constitute the cut-off date prior to which no grievance shall have access to the Board, except that such grievances as are specifically agreed upon in writing at the time of signing of this agreement may be presented to the Board even though they originate prior to this agreement.

11. Nothing in this agreement will be construed to give the Adjustment Board any jurisdiction over the Operating Rules of the Railroad.

10.4 Disputes over wage rates or related wage rules shall be resolved in accordance with the provisions of arbitration contained in the following procedures.

a. If efforts to bring about agreement in disputes over general changes in wage rates

or in railroad wage rules are unsuccessful, the Railroad and the labor organization or labor organizations involved agree to the submission of the facts to a Board of Arbitration established in accordance with the terms and conditions contained herein.

b. The Board shall consist of one neutral person and one member representative of the labor organization or organizations and one member representing the Railroad. The neutral member shall be selected from the lists of available neutrals maintained by the National Mediation Board.

c. The parties to a given dispute, referrable to an Arbitration Board, shall prepare jointly an Arbitration Agreement applicable to such dispute which shall contain at least the following:

1. A provision that the Arbitration Board and the representatives of management and labor, parties to the dispute being arbitrated, will adhere to the rules for arbitration contained in these procedures.

2. The effective date of the Arbitration Agreement and identification of the parties thereto.

3. A provision that the arbitration proceedings will be guided by the principles of the Railway Labor Act of 1926, as amended.

4. A clear and specific statement of the question to be submitted to the Arbitration Board, and a provision that the arbitration question or parts thereof may be withdrawn from arbitration by mutual consent.

5. A provision that, within a reasonable time, hearing will commence at Anchorage, Alaska, or Washington, D. C. as mutually agreed upon by the parties.

6. A time requirement as to the appointment of members of the Arbitration Board.

7. A time requirement for the decision of the Arbitration Board with provision for extension of time by mutual consent.

8. A provision that the award, a transcript record of the arbitration proceedings, and minutes of meeting of the Board of Arbitration shall constitute the full and complete record of the arbitration.

d. The award of the Board shall be final and conclusive upon the parties hereto as to the facts determined by the Board, and as to the merits of the controversy decided, unless disapproved by the Secretary of Transportation within thirty days from receipt in the Office of the Secretary, Department of Transportation, of the complete record and minutes of the findings and award of the Board. Should either party object to the findings of the Board and enter into correspondence or communications with the Secretary of Transportation, other parties of the Board shall receive copies of such correspondence and communications.

e. In the event a dispute arises involving an interpretation of the Board award, upon request of either party, the Board shall interpret the award in light of the dispute.

f. A majority of all members of the Board shall be competent to make an award or interpret an award with respect to any dispute submitted to it.

g. The members of the Board representing the carrier and the labor organization shall be compensated by the party they represent. The neutral arbitrator shall receive such compensation as the Department of Transportation may fix, including traveling expenses and expenses actually incurred for sustenance, or shall receive a per diem allowance in lieu thereof, subject to the provisions of the law applicable thereto while serving as neutral party. Such expense shall be shared equally between the unions involved and the Railroad.

h. The Board shall serve only for the case submitted to it specified in the Arbitration Agreement and until such case has been heard and award rendered. The above provisions shall not prohibit any member of a Board from serving in a similar capacity on a subsequent Board.

Section 11. Bulletin Boards and Distribution of Literature

11.1 Distribution of literature of a labor organization shall be permitted, provided the distribution is made by employees outside their regular working hours and does not interfere with the work assignments of other employees who may be on duty at the time. Notices posted by labor organizations on Government bulletin boards and literature distributed on Government property shall contain the name of the organization issuing or sponsoring it, and shall contain

nothing that would imply official sponsorship or endorsement by the Railroad. The material must pertain specifically to the business of the labor organization and shall not contain statements which reflect on or attack the integrity of motives of individuals, other labor organizations, the Department of Transportation, the Railroad, or other governmental agencies, Federal or otherwise. Objective statements of opinion, favorable or unfavorable, about issues or subjects related to the employees' work and employment conditions are permitted. Canvassing or soliciting membership and collecting membership dues for a labor organization shall also be conducted outside regular working hours of the employees canvassed and of the employees performing these activities. Non-employee canvassers may be required to give notice of their presence to the responsible management officer. There shall be no interference with the performance of official duty of employees during working hours.

11.2 Union dues withholding: Subject to the terms and conditions of this agreement, the Railroad shall deduct from the wages of the employees subject to this agreement, who acquire and maintain membership in the organization, amounts equal to the dues uniformly required as a condition of retaining membership in the organization, and shall pay the amounts so deducted to the designated Treasurer of the organization provided, however, that this requirement shall not be effective with respect to any employee until he shall have furnished the Railroad with a prescribed written wage assignment authorization to the organization of such membership dues, which wage assignment authorization shall be revocable in writing, as prescribed, or cancelled upon employee separation; termination of this agreement; or loss of employee organization recognition between the Railroad and the Organization signatory hereto.

The wage assignment authorization shall be on the Request and Authorization for Voluntary Allotment of Compensation for Payment of Employee Organization Dues, Standard Form No. 1187.

The revocation of the wage assignment authorization shall be on the Revocation of Voluntary Allotment of Compensation for Payment of Employee Organization Dues, Standard Form No. 1188.

The Organization shall assume full responsibility for procurement of the form and execution of the wage assignment authorizations and for delivery of such forms to the Chief, Budget and Accounting Branch, Accounting Section, Anchorage.

a. The employee members of the Organization may furnish voluntarily to the Railroad's Chief, Budget and Accounting Branch, Accounting Section, Anchorage, through their organization, the wage assignment authorization, indicating thereon the payroll deduction authorized. The Organization Treasurer or Financial Secretary shall certify the name of the employee, his membership in good standing in the Organization, and the amount to be deducted from the wages of the employee who has signed the wage assignment form. The annual dues shall be prorated over twenty-six (26) pay periods.

b. The payroll deduction authorized herein shall become effective the first full pay period following its receipt in the Accounting Section.

c. Deductions will be made from the wages earned beginning the first complete pay period following receipt of the allotment

form in the Accounting Section for which the wage assignment authorizations, specified in Sections 11.2a and 11.2b, is furnished. The following deductions will have priority over deductions in favor of the Organization, as provided herein:

1. Retirement or FICA
2. Federal income tax
3. Health benefits
4. Group life insurance
5. Indebtedness due U.S. Government
6. State income taxes
7. Alaska Railroad Medical Association & Excess Benefits Plan
8. U.S. Savings Bonds

c. If the earnings of an employee are insufficient to remit the full amount of the pay period deduction for such employee, no deduction shall be made, and the same will not be accumulated on the following pay period.

e. Deduction shall cease when:

1. The employee separates from the Railroad effective at the end of the pay period during which separation occurs.

2. The Organization loses recognition: effective beginning of first pay period after such loss.

3. The employee is permanently reassigned to a Railroad segment whose employees have representation by another employee organization: effective at the end of the pay period during which movement occurred provided revocation order is initiated by employee.

4. The employee is expelled or ceases to be a member of good standing in the Organization: effective with first complete pay period after receipt of written notice.

5. Revocation order is initiated by the employee: effective the beginning of the pay period following its receipt in the Accounting Section by March 1 or September 1. Revocation applies only on March 1 or September 1.

11.3 No charge shall be made against the Organization for dues withholding.

11.4 The Railroad will remit to the Treasurer of the Organization the amount deducted from the wages of the members who completed the wage authorization allotment. Remittance checks shall be forwarded to the Organization Treasurer consistant with established pay practices and shall be accompanied by a positive listing of employees' names who have authorized deductions, amounts withheld (or explanation why no money withheld), with proper identification of the employee organization.

11.5 The amount of dues certified on the original allotment form will remain unchanged until an appropriate official of the Organization certifies to the Accounting Section that the amount of regular dues has changed. Changes in the amount of allotments by reason of changes in the organization dues may not be made more frequently than once each twelve months, measured from the date of the first dues change made by the employee organization. Changes in deductions for employees shall be effective as of the first complete pay period after receipt of the certified change by the Railroad Accounting Section, or a later payroll period if requested

by the Organization.

11.6 No part of this agreement or any other agreement between the Railroad and the Organization shall be used directly or indirectly as a basis for any grievance or claim by or in behalf of an employee, predicated upon any violation of, or misapplication, or noncompliance with, any part of this agreement.

11.7 The Organization shall indemnify, defend, and save harmless the Railroad from the execution of, or compliance with, the provisions of this agreement.

11.8 This agreement shall become effective pay period beginning December 23, 1973, following mutual acceptance by the parties and shall remain in effect until modified or changed in accordance with established negotiation procedures for amending the basic agreement between the member parties of this agreement. This agreement is subordinate to and superseded by any conflicting Federal law, Executive Order, or directives that are now, or may be later, imposed pertinent to this service to the Organization.

Section 12. Labor-Management Cooperation

12.1 The parties to this agreement recognize that there are many areas of common interest to the management of the Railroad and to its employees which are important to the effective operation of the Railroad and to the welfare of employees which are not ordinarily included within the scope of collective bargaining agreements. Such areas of common interest include, but are not limited to:

a. Elimination of waste in operation and maintenance.

b. Conservation of materials, supplies, time, power, and energy.

c. Improvements in quality of workmanship and services.

d. Correction of conditions making for grievances.

e. Health, safety, and morale standards.

12.2 In order to increase the area and effectiveness of labor-management cooperation, Joint Committees have been established prior to the making of this agreement, as follows:

Joint Union-Management Safety Committee
Alaska Railroad Medical Association and Excess Benefit Plan
Joint Labor-Management Committee

12.3 Employees serving on the welfare committees mentioned above and similar committees that may be established will be paid not to exceed a minimum day for their attendance if any time is lost. It shall be the duty of the parties to this agreement to further the work and effectiveness of these joint committees.

Section 13. Interpretation of Departmental Labor Policy

It is understood and agreed that the intent of this Basic Agreement is to comply with the Labor Relations Policies of the United States Department of Transportation issued January 1959 by the Administrative Assistant Secretary. Signatories to this Agreement may request interpretation from the Department as may be required.

Section 14. Effective Date and Duration

This Agreement shall become effective on the

date on which it is approved by the Secretary of Transportation. After such approval renewal of this Basic Labor Agreement will be automatic from year to year.

Any modification or amendment may be presented for discussion and negotiation upon thirty days' written notice by the authorized representatives of the labor organization and/or the General Manager. Within ten days after receipt of modification notice, the General Manager will notify when and where the negotiations will take place. Agreed to changes will not be effective until approved by the Secretary of Transportation.

The printing of the Agreement, Schedule of Pay, Rules and Regulations governing Locomotive Engineers, Locomotive Firemen, Conductors, Brakemen, Baggagemen and Hostlers, is a consolidation of agreement placed in effect March 10, 1957, and Supplements No. 1 through 57. Also, under cover is consolidation of the Basic Labor Agreement placed into effect February 20, 1961, and Supplements No. 1 through 5. "Department of Transportation" was substituted for "Department of Interior" throughout text of this Agreement. Typing errors or omissions in the revised printing of these Agreements will be corrected, and in no way does this consolidation change rule interpretations.

Dated at Anchorage, Alaska, February 7, 1980.

ACCELERATED TRAINING PROGRAM FOR CONDUCTORS

In order to establish a formal training program combining on-the-job training with accelerated classroom instruction to qualify and promote brakemen to conductors, the following provisions will apply:

I. General

A. The selection and training of brakemen as conductors under this program will be made in accordance with their seniority. Each brakeman shall be given a seniority date as a brakeman in accordance with applicable agreements now in effect. Brakemen shall be required to accept training and promotion according to their relative standing on the brakemen's seniority roster.

B. Exception to Rule 28(f)(2). Brakemen who have been in service of The Alaska Railroad as such for a period of 18 months (consecutive) may be entered into the accelerated training program and will be required to take promotion to conductor in the order of their seniority. Brakemen who decline, do not appear to take examination, or fail the examination for promotion, Rule 28(g) will apply. No employee shall be eligible to be promoted to conductor without first entering the service as brakeman and completing the training program except as permitted in Rule 28(f)(2) of present working agreement.

C. No brakeman shall be deprived of the right to examination for promotion in accordance with seniority because of any failure to take examination because of the requirements of the Railroad's service, by sickness, injury, or by other approved

leave of absence; provided that upon return such brakeman shall be immediately called and required to take examination and accept proper assignment. If a junior brakeman is promoted out of turn to conductor, such junior brakeman will rank below any senior brakeman as a conductor when such senior brakeman completes the training program and passes required examination.

II. Training Program

A. The training program shall consist of classroom instruction and on-the-job training as deemed necessary by The Alaska Railroad. Materials, books, and instruction shall be furnished by The Alaska Railroad.

B. Examination will be prepared and administered by The Alaska Railroad. Equal opportunity will be afforded in administering examinations.

C. The training program will consist of 6 weeks of intensified classroom instruction and on-the-job training. See Attachment #1 Training Schedule.

D. The Alaska Railroad shall establish a training schedule as near as practicable on the basis of 40 hours per week, 8 hours per day. Brakemen participating in the training program will not be permitted to mark up for service on unassigned days if other qualified regular or extra employees are available. If so used in other service during scheduled training program, earnings for that service will be in addition to the weekly rate set forth in this agreement.

E. The General Chairman shall be furnished the name and address of each brakeman entering the training program showing

the date he is placed in training. Further, the General Chairman will be advised by The Alaska Railroad of the names of instructors in charge of administering the training program.

F. Upon completion of the accelerated training program, participants will be required to pass a satisfactory examination. Once qualified, they may exercise their seniority in accordance with existing agreement.

G. Brakemen who decline, do not appear to take examination or fail the examination for promotion, Rule 29(g) will apply. Brakemen who after starting the training program are unable to continue the training due to sickness or approved leave of absence, will not be regarded as having failed. Additional opportunity for training to qualify will be provided as mutually agreed upon by the instructor(s) and UTU General Chairman.

III. Compensation During Training

A. Brakemen participating in the accelerated training program to qualify for promotion to conductor will be paid a daily rate comparable to the averaged daily rate of a yard brakeman and extra board brakeman during classroom orientation and instruction.

Example:

5 X yard brakeman with air
7 X brakeman extra board guaranteed rate.
Total and divide by 10 for daily rate of compensation payable trainee.

The daily earning will be proportionately reduced for any scheduled training day that a brakeman absents himself of his own volition. Existing contract provisions will apply for the payment of approved absences (sick and annual leave).

B. While receiving on-the-job training, conducted under the direct supervision of the conductor regularly assigned, the trainee will receive the brakeman's rate of pay concurrent with applicable provisions of the present working agreement.

C. Brakemen participating in the accelerated training program when assigned at outlying points where permanent residence is maintained, other than location where instruction is conducted, will be allowed meal and lodging allowance consistent with that provided for in Rules 53(a), 53(a)-1, 53(a)-3, and 53(a)-5 (two meals and one lodging allowance in each twenty-four hour period).

IV. Supervision and Responsibility While Receiving On-the-job Training

When brakemen participating in the training program are required to receive on-the-job training, the conductor on the job selected will acquaint the brakeman in training with the responsibilities and functions of conductors under actual working conditions subject to the following:

1. The brakeman in training status will be permitted to direct movement and perform other functions under direction of the conductor.

2. While the conductor cannot be relieved from his responsibility for the safe operation of his train, engine movements coupled with or without cars, he will not be held responsible for

damages to equipment and/or property caused by brakeman trainees' judgment decisions in the performance of work assignments.

V. Effect on Existing Agreements

This agreement will supersede existing agreements relating to the training, qualifying and promotion of brakemen represented by the UTU only to the extent set forth herein.

ACCELERATED PROMOTION PROGRAM FOR ENGINEERS

The Alaska Railroad and the United Transportation Union desire at this time to establish a formal training program which, together with on-the-job training, will accelerate training, qualifying and promotion of firemen to the craft of locomotive engineers. They therefore enter into this Agreement:

ARTICLE I - GENERAL

A. The Alaska Railroad will establish and maintain a training program to accelerate the training, qualifying, and promotion of firemen to the craft of locomotive engineers in accordance with the terms of this Agreement.

B. The recruitment, selection, employment, and training of firemen under this program shall be without discrimination because of race, creed, color, religion, national origin, sex, or union membership.

ARTICLE II - ELIGIBILITY

A.1. Each fireman shall be given a seniority date as a fireman in accordance with applicable agreements now in effect. Firemen shall be required to accept training and promotion according to their relative standing on the Firemen's Seniority Roster.

A.2. No employee shall be eligible to be promoted to the craft of locomotive engineer without first entering the service as fireman and completing the training set forth herein except as permitted in Rule 29(f)-1, of our present working agreement. When this training program is initiated, firemen with a seniority date prior to January 1, 1975, will not be run around by locomotive engineers hired under Rule 29(f)-1. If this training program does not

produce sufficient number of qualified engineers in six months, the Railroad will recruit experienced engineers who will accrue and maintain engineer's seniority per rule 29(f)-1.

B. The Alaska Railroad will expedite the training, qualifying, and promotion of firemen having a seniority date as such on the effective date of this Agreement, and such training, qualifying, and promotion will be completed before the training, qualifying, and promotion of new firemen becomes applicable under the terms of this Agreement. In the application of this paragraph, any existing agreement between the parties requiring a minimum length of service before a fireman is eligible for promotion and qualification to various engineers' services is superseded by this Agreement.

C. No fireman shall be deprived of his rights to examinations, nor to promotion in accordance with his relative standing on the firemen's roster, because of any failure to take his examination by reason of the requirements of the Railroad's service, by sickness or by other approved leave of absence; provided that upon his return he shall be immediately called and required to take examination and accept proper assignment.

D. If a junior fireman is promoted out of turn to engineer, such junior fireman will rank below any senior fireman as an engineer, when such senior fireman completes the program and is given a certificate as an engineer.

E. If there is an immediate need for locomotive engineers, firemen may be required to enter the training program in seniority order irrespective of their length of service as firemen.

ARTICLE III - TRAINING PROGRAM

A. The training program shall consist of classroom instructions and work experience as determined by The Alaska Railroad. As necessary, classrooms, books, materials, and instructions shall be furnished by The Alaska Railroad.

B. Examinations will be prepared and administered by The Alaska Railroad.

C. The training program and any intended substantial changes therein shall be reviewed from time to time by the ARR representative and the UTU.

D. The General Chairman shall be furnished the name and address of each fireman entering the training program, showing the date he is placed in training. Further, the General Chairman will be advised by the ARR of the names and location of the supervisors in charge of administering the training program.

E. The ARR shall establish a training program schedule and if the schedule does not require attendance on a day or days of a calendar week, firemen will be considered assigned to the training program but will be permitted to return to their home point and back to training point at their expense. Under these circumstances, a fireman will not be permitted to mark up for service.

F. When firemen are not assigned to scheduled training programs, they shall be required to exercise their seniority with the understanding that in so doing they will meet requirements in various classes of service.

G. As near as practicable, training days will be scheduled not to exceed eight hours, it

being recognized, however, that single trips for on-the-job training may of necessity exceed such hours.

H. Firemen assigned to a scheduled training program will not be used in other service prior to completion of the training program if any qualified regular or extra engine service employees are available.

On days firemen assigned to a scheduled training program are not scheduled for training, they will not be permitted to exercise their seniority.

I. If a fireman is used in other service during a scheduled training program, his earnings for that service will be in addition to the weekly rate set forth in this Agreement.

J. Firemen who, after starting the training program, are unable to continue the training due to sickness or approved leave of absence will not be regarded as having failed. The decision as to whether they must start the program at the beginning or at another point in the program will be made by the instructor(s) after consulting with the United Transportation Union.

K. Firemen who are assigned to a regular road train crew as part of the training course shall be paid as though they are part of the regular crew and shall receive all benefits now applicable as per present agreement.

L. When the ARR requires work experience on assignments that otherwise would not be available to individual firemen in time to permit compliance with the requirements of the training program, the ARR will designate a sufficient number of such assignments on which firemen may exercise their seniority for the

period necessary to satisfy such requirements. In such cases the fireman will not be subject to displacement until he has accumulated the necessary work experience, except he may be displaced by a senior fireman who would otherwise be placed in a furloughed status.

M. A fireman may be forced from his regular assignment to permit a fireman in training to obtain necessary work experience on such assignment. When a senior fireman is forced from his assignment by a fireman his junior, under such circumstances he will be paid not less than he would have been paid on the assignment from which he was removed.

N. Adequate records of firemen on-the-job and classroom training progress shall be maintained and reviewed with the General Chairman on request.

O. All unprotected firemen who are now on the seniority roster shall be considered locomotive engineer trainees as directed by the Railroad in seniority order.

P. All firemen trainees shall be enrolled in accredited correspondence course for apprentice locomotive engineers. The course shall be for one (1) year and all lessons will be completed promptly and grades maintained satisfactorily. Failure to complete lessons on time and correctly will constitute a failure to qualify, and shall as of the date so notified follow and be junior as fireman to the youngest man on the fireman seniority list until such time as incumbent could be reassigned or employment severed.

Q. Within the first year, the locomotive fireman trainee shall be enrolled in a scheduled training program which shall consist of three (3) months. Exception: by mutual agreement between The Alaska Railroad and UTU representative

trainee may be qualified on basis of experience.

R. He shall be assigned to a regular yard crew for on-the-job training and be permitted to acquire sufficient knowledge and skill to perform the duties of yard locomotive engineer.

S. His scheduled training shall generally consist of being assigned to a regular crew four (4) days per week and one (1) day per week of formal instructions given by the Rules Examiner, Road Foreman of Engines, and shop instructors.

T. Fireman trainees required to present themselves for orientation and classroom instruction, when assigned at outlying points where permanent residence is maintained, other than location where instruction is presented will be allowed meal and lodging allowance comparable to that provided for in Rules 53(a), 53(a)-1,53(a)-5 (two meals and one lodging allowance in each twenty-four hour period).

U. At the end of each month, the fireman trainee shall be given an oral and written exercise or examination. The fireman trainee shall complete the required Transportation Rules and Regulations, and Mechanical and Air Brake Rules satisfactorily at the end of or before the 90-day scheduled training period.

ARTICLE IV - COMPLETION OF PROGRAM SATISFACTORILY

A. Upon successful completion of the training program, the fireman shall be certified as a locomotive engineer and shall be awarded a certificate as to qualifications acquired and maintained engineer's seniority in acordance with these qualifications and all applicable agreements. Upon such certification, the ARR shall supply the UTU General Chairman with the

names of the firemen so certified and the date of the certification.

B. Once qualified as a locomotive engineer, he may exercise seniority in accordance with his service and in accordance with his qualifications and existing agreement.

C. Within twelve (12) months after entering the training program as locomotive engineer, he will be eligible to be qualified in all classes of service without restriction as a locomotive engineer, provided the opportunity has been available to acquire sufficient knowledge and has demonstrated his ability to safely and skillfully perform these duties as approved by the Road Foreman of Engines. If, after twelve (12) months following completion of training, locomotive engineer is not fully qualified due to schedule of assignment or lack of opportunity, ARR will provide additional training to qualify these engineers in all classes of service.

D. Engineers not qualified for all classes of service cannot hold positions on the Engineer's Extra Board until such time as they are qualified by the Road Foreman of Engines.

ARTICLE V - FAILURE TO COMPLETE SATISFACTORILY

A. When, in the opinion of the ARR instructor(s), it becomes apparent that a fireman will not complete the training satisfactorily, he will be required to consult with the ARR instructor(s) and General Chairman of the UTU for the purpose of identifying and possibly overcoming this problem.

B. If a fireman under this training program fails to pass the required final examination on the first attempt, he will be given a second opportunity to pass such examination.

The second examination will be taken not less than sixty (60) days after failure of the first examination. The second examination will be held at the same point as the first if practicable or unless otherwise mutually agreed upon. Failure to complete the training program in accordance with the terms of this Agreement or failure to pass the final examination on the second attempt will constitute a failure to qualify and shall as of the date so notified follow and be junior as fireman to the youngest man on the fireman's seniority list until such time as incumbent could be reassigned to more suitable employment.

During the period while awaiting and taking reexamination, firemen will not be compensated nor allowed any expenses as firemen under this Agreement, but they will be permitted to sit in on any classroom instructions given to other firemen.

During the period while awaiting and taking the second examination, firemen may exercise their seniority.

ARTICLE VI - COMPENSATION DURING TRAINING

A. Existing agreements between the parties which provide for the payment of daily, weekly, or monthly rates of pay in excess of those set forth in this Agreement for training, qualification, and promotion of firemen, or which provide for payment of an allowance for instructor(s) or which provide for preservation of the without-fireman rates of pay, will remain in full force and effect unless otherwise mutually agreed to by the parties on the individual Carrier.

B. Firemen trainees who have a seniority date prior to January 1, 1975, will be paid while in training the pay of the assignment from

which removed to enter the training program. Firemen trainees who enter the training program with a seniority date after January 1, 1975, will be paid a basic weekly rate of $319.10. This rate is subject to future wage increases. Computation of the weekly rate designated above was made as follows:

Example: 5 X yard firemen's rate and
7 X the firemen's extra board rate and added and divided by 2 for the weekly average.

C. The earnings guarantee herein provided will be proportionately reduced for any scheduled training day that a fireman is absent of his own volition, based on a five-day week.

ARTICLE VII - SUPERVISION OF FIREMEN IN THE TRAINING PROGRAM

When firemen participating in the training program are required to receive on-the-job training, the engineer on the job selected will acquaint the fireman in training with the responsibilities and functions of engineers under actual working conditions, subject to the following:

A. The fireman in training will be permitted to operate the engine and perform other functions under direction of the engineer.

B. While the engineer cannot be relieved from his responsibility for the safe operation of his train and engine, he will not be held responsible for broken knuckles, damaged drawbars, or rough handling when the engine is operated by the fireman in training.

C. The presence of a fireman in training will not affect the engineer rate of pay when operating without a fireman.

D. Engineer(s) will be required to complete progress reports as may be directed by the Road Foreman of Engines/Trainmaster.

ARTICLE VIII - MISCELLANEOUS

A. The parties hereto having in mind conditions which exist or may arise on individual carriers in the application of this Agreement, the duly authorized representative of the employees party to this Agreement, and the officer designated by the ARR may mutually enter into additional written understandings to implement this Agreement or to preserve existing training agreements.

ARTICLE IX - EFFECT ON EXISTING AGREEMENTS

This Agreement will supersede existing agreements relating to the training, qualifying, and promotion of firemen represented by the UTU only to the extent set forth herein.

CREW CONSIST AGREEMENT
between
THE ALASKA RAILROAD
and the
UNITED TRANSPORTATION UNION

This Agreement, and attached Implementing Memorandum, by and between The Alaska Railroad and the United Transportation Union, is in full and final settlement of the original notice served by the carrier October 23, 1979 and subsequent notice of March 24, 1980, and subsequent discussions between the parties as they pertain to the consist of crews in train and yard service.

IT IS HEREBY AGREED AS FOLLOWS:

1. The parties will finalize the necessary implementing provisions to become effective concurrent with this Agreement consistent with the following.

2. The consist of the road freight train and yard crews, except as otherwise provided in this Agreement, shall be not less than one conductor two brakemen. Such a crew will hereinafter be referred to as a standard crew.

3. The reduction of road freight service brakemen or yard brakemen positions from any crew shall be made solely on a pure attrition basis, i.e. no brakeman positions available to a protected employee under schedule rules will be blanked, nor will a protected employee be laid off or remain on lay-off as long as a reduced crew is operating on the system, except under certain conditions provided for in this Agreement, or agreements made pursuant to the provisions of this Agreement.

4. Protected employees are all trainmen in train/yard service who are on the rolls of The Alaska Railroad as of January 1, 1981, with a seniority date prior to April 15, 1980. Trainmen in train/yard service with a seniority date after April 15, 1980, are non-protected employees.

5. Effective with the date of the Agreement, trainmen in road or yard service, both protected employees and non-protected employees, working on a reduced crew shall each be paid a Special Allowance of $5.67 for each road trip or yard tour of duty worked on a reduced crew, as compensation for the additional services and responsibilities consistent with the operation of a reduced crew. This special allowance is subject to all future wage and cost-of-living allowance adjustments becoming effective subsequent to the date of this Agreement.

6. A protected employee shall retain the right to exercise seniority to any second brakeman position, except those specified in paragraph 3 hereof provided that their services are not required on a must-fill position as set forth in the Implementing Agreement.

7. For each yard tour of duty or road freight service trip (including n business or new service and service performed on nonrevenue trains) that crew is operated as a reduced crew of one conductor and one brakeman, th Railroad will pay to protected employees working on the reduced crew the following:

a) for yard tours of duty and road freight service trips of 150 miles or less, each protected employee will be paid $32.23. Total payment per reduced crew operated will not exceed $64.46.

b) for road freight service trips in excess of 150 miles, each protected employee will be paid $52.79. Total payment per reduced crew operated will not exceed $105.58.

These payments will be made to protected employees directly on a pay peri basis and will not be subject to future general wage increases or cost-of living adjustments.

8. New business or new service operations, i.e., business not formerly handled by the Carrier for which identifiable service is established to compete with other modes of transportation, may be operated with a train crew of not less than one conductor and one brakeman, provided that such trains do not exceed 121 cars, including caboose(s), or 6,840 feet in length.

8.1 All non-revenue trains, such as Hours of Service relief crews, snow plows, work trains, wreck trains, may be operated with a reduced crew of not less than one conductor and one brakeman.

9. Effective with the date of this Agreement, the following car limits a train length limitations shall be made effective in road service:

Trains of 1 to 71 cars, but not to exceed 4,015 feet in length, inclusive of caboose(s), may be operated with a reduced crew of one conductor and one brakeman, subject to other provisions of this Agreement.

Trains of 71 to 121 cars, but not to exceed 6,840 feet in length, inclusive of caboose(s), may be operated with a reduced crew of one conductor and one brakeman only by agreement between the UTU General Chairman and the Railroad's Superintendent of Transportation.

Trains consisting of more than 121 cars or exceeding 6,840 feet in length, inclusive of caboose(s), may be operated only with a standard crew.

10. The parties of this Agreement shall not serve or progress, prior to the attrition of all protected employees, any notice or proposal for changing the specific provisions of this Agreement governing: (1) pure

attrition, (2) protected employees, (3) car limits and train lengths, (4) special allowances, or (5) productivity savings shares and the administration thereof. This paragraph will not bar the parties from making changes in the provisions of this Agreement by mutual agreement.

Signed at Anchorage, Alaska this 28th day of April, 1981.

MEMORANDUM IMPLEMENTING THE
CREW CONSIST AGREEMENT
between
THE ALASKA RAILROAD
and the
UNITED TRANSPORTATION UNION

PART 1

ARTICLE I - CONDITIONS

1. All road freight crews and all yard crews shall consist of not less tha conductor and two brakeman except as otherwise provided by this agreement.

2. Except as specifically limited by the Crew Consist Agreement dated Febr ary 20, 1982, and by this Implementing Memorandum, all road freight and yar crews may be operated as "reduced crews" consisting of one conductor and on brakeman.

3. The minimum crew size shall consist of not less than one conductor and brakeman and no service shall be required of any crew manned by less than o conductor and one brakeman except by agreement between the parties signat hereto.

4. The Carrier is not restricted from operating any reduced crew with a cr consist in excess of the minimum of one conductor and one brakeman.

5. The Carrier is not restricted by this Agreement from establishing by agreement or continuing assignments by existing agreements which have been single-position assignments such as, but not limited to, pilots.

6. No protected employee will be moved from a standard crew of a conductor two brakemen to a reduced crew of a conductor and one brakeman in order to such crew a standard crew of a conductor and two brakeman.

7. Employees who are not protected employees as defined by the Crew Consist Agreement will not have any claim to be blanked or blankable positions, but shall be used in proper turn on must-fill vacancies.

8. Payment made to employees pursuant to paragraph 7 of the Memorandum of Agreement shall not be computed in computing vacation pay.

ARTICLE II - DEFINITIONS

1. (a) Regular "must-fill" positions in road or yard service for which no has been received will be filled by assigning: (1) junior protected employe from the extra board in accordance with existing Schedule Rules; (2) junior protected employee occupying a blankable position.

(b) In circumstances in which there are two or more must-fill positions be filled, the employees to be assigned shall have preference by seniority in the positions to be filled.

2. (a) The term "must-fill" positions are positions covered by agreements between the Carrier and the UTU, except second brakeman positions in road freight and yard service which may be blanked pursuant to the Crew Consist Agreement or to this Memorandum.

(b) The term "blanked" position refers to the second brakeman position o crew which is not filled and the crew therefore works as a "reduced crew."

(c) The term "blankable" position refers to the second brakeman position a standard crew which is filled by a protected employee and which, under cert specified conditions, can be operated as a "reduced crew" in the absence of t second brakeman.

ARTICLE III - EXTRA BOARDS

Section 1. (a) Yard Vacancies. Subject to applicable Schedule Rules, protected employees on the Extra Board will be called for all blankable yard vacancies unless their services are required for a known must-fill vacancy.

An extra protected employee may be held for a known must-fill vacancy an should such vacancy not materialize, the employee will be paid a basic day's ; and retain first-out position on the extra board. It is further understood t such extra protected employees called for and performing subsequent service w be compensated under existing applicable Schedule Rules.

(b) Road Vacancies. Protected employees on the Extra Board will be call for all second brakeman vacancies unless their services are required for a kno must-fill vacancy.

An extra protected employee may be held for a known must-fill vacancy. The held employee fills the vacancy and the earnings therefrom are less than earnings of the assignment to which entitled, the employee shall be paid the difference in earnings and placed on the extra board after completion of the tour of duty worked in accordance with the existing Schedule Rules without regard to the assignment missed.

Should such vacancy not materialize, the employee will be paid the earnin of the assignment to which entitled had such employee not been held and will b placed on the extra board in the same manner as though the employee had worked such assignment.

Should such employee be used in emergency while being withheld from the extra board in these circumstances, earnings therefrom shall not be less than earnings of the job held for.

Section 2. Force Assignment from Blankable Positions.

(a) Must-Fill Yard Vacancy. When there are no extra men available on th extra board and there is a known must fill yard vacancy, the available protect yard brakeman holding a blankable yard brakeman position will be required to fill the position for one tour of duty, as follows:

Use the junior protected brakeman on a shift:

First:	Same starting point within a terminal with the	(1)	same starting time
		(2)	earlier starting time
		(3)	later starting time
Second:	At another starting point within a terminal with the	(4)	same starting time
		(5)	earlier starting time
		(6)	later starting time
Third:	If the vacancy cannot be filled by any of the above, then procedures of existing Schedule Rules shall apply.		

If the protected yard brakeman is not used on the vacancy for which he such brakeman will be paid loss of earnings. If used at the same startin as their regular assignment, the employee will be paid at pro rata rate fo regular eight (8) hour period and actual overtime worked. If used in advanc of, or later than, the regular starting time, the employee will be paid at t and one-half for the shift.

(b) Must-Fill Road Vacancy at Extra Board Point. When there are no ex brakemen available and there is a known must-fill road vacancy, the most jun available protected yard/road brakeman, holding a blankable bra man positio that location, will be used to fill the position for one trip or one tour of duty without loss of earnings. If the vacancy cannot be filled in this manne existing rules will apply.

(c) Must-Fill Vacancy at Far Terminal. At the away from home terminal where a protecting extra board is not maintained, if there is a known must-fi brakeman's position, the junior protected trainman assigned or protecting a blankable position at the location where the must-fill position exists will b used and will be returned to point of assignment at completion of trip. Compensation shall be paid in accordance with existing Schedule Rules for rat to point of assignment.

Section 3. Extra Board Regulation. (a) Extra lists will be regulat in accordance with existing rules and practices predicated as nearly as possi on "must-fill" positions in keeping with Subsection (b) hereof.

(b) The Carrier shall maintain a sufficient number of employees to perm reasonable lay-off privileges and to protect vacations, annual and sick leave days and other extended vacancies.

ARTICLE IV - BULLETINS

1. Bulletin rules of the existing Basic Schedule Rules and Agreements a hereby modified to provide for the following:

(a) Blankable vacancies shall be designated by bulletins as "blankable" signifying such vacancy or vacancies are open to bid or application only from protected employees.

(b) Where Schedule Rules provide such vacancies must be bulletined and : bid is received for a blankable vacancy from an eligible protected employee during the bulletin period, the vacancy will not be rebulletined and may thereafter be filled only by an eligible protected employee having a displacement right.

ARTICLE V - REPORT FOR WORK, COMPLETION OF SHIFT

1. In the event a standard yard or road freight crew member fails to report for duty at the assigned reporting time, the remaining crew members may be required to work on a reduced crew basis. Should the absent member of a yard crew fail to report within one hour, or if the absent member of a road crew fails to report before departure of the train, the remaining crew members shal finish that tour of duty, receiving the Special Allowance and protected trainm shall be allowed the Productivity Savings Sharing Allowance.

2. If a brakeman on a standard yard crew marks off after being on duty less than 4 hours, he shall be paid for the actual time on duty. The remaining two crew members may be required to complete the trip or tour of duty and receive the Special Allowance and protected trainmen shall be allowed the Productivity Savings Sharing Allowance.

3. If a trainman on a standard train crew marks off after being on duty four (4) hours or more, he shall be paid for the actual time on duty. If the remaining two crew members are required to work more than two (2) hours as a reduced crew, they will be paid the Special Allowance and protected trainmen shall be allowed the Productivity Savings Sharing Allowance.

4. If a trainman on a standard train crew on a straightaway road assignment marks off sick or is not available to cover his return train from his away-from-home terminal, the remaining two crew members may be required to wor back to their home terminal, providing train length does not exceed 121 cars o 6,840 feet, receiving the Special Allowance and protected trainmen shall be allowed the Productivity Savings Allowance.

ARTICLE VI - RADIOS

Portable radios will be furnished for use by all members of reduced crews consisting of one conductor and one brakeman. The Carrier will be responsible for maintenance of radios and sufficient frequency channels will be utilized t provide proper communication.

Portable radios for use and carried by trainmen will not exceed three pounds and will be equipped with a suitable holder which will firmly hold radio close to the body or will be of such size as to permit being placed coat or trouser pocket.

Portable radios hereafter purchased will not exceed the size and weig those presently in use.

ARTICLE VII - JURISDICTION

No Carrier supervisor, official or non-craft employees (including yar masters) shall be used to supplant or substitute in the exclusive work of a train or yard crew.

ARTICLE VIII - TRANSFER TO ENGINE SERVICE

Subject to the Carrier's legal obligations, when selecting new appli for service in the fireman craft represented by the UTU, opportunity sha be given to employees in train and yard service represented by the United Transportation Union on the basis of their relative seniority standings, fi and other qualifications being equal. The Carrier will post notice when ne new applicants.

ARTICLE IX - PASSENGER SERVICE

Nothing in this Agreement changes existing Crew Consist agreements in passenger service, nor precludes negotiation of such matters by the parties hereto.

Application of Crew Consist Agreement and Interpretation

Conductor - Extra Board Fairbanks

Not required to call conductors to protect blankable brakeman positions except encumbered blankable positions vacant by leave.

Protected employees required to fill blankable position from Brakeman's Extra Board. Such protected employees will only be called to fill those blankable positions encumbered and for some reason vacated for leave or vacated by seniority move of employee. On blanked blankable position, the carrier will not be required to fill with protected employees from Brakeman's Board; however, may be filled at Management's discretion.

11/1/01

PART II

INTERPRETATIVE QUESTIONS AND ANSWERS

ARTICLE I - CONDITIONS

Section 5

Q. Does the minimum crew consist in any way affect single assignments, as pilots, etc.?

A. The minimum crew consist does not pertain to single assignments.

CREW CONSIST AGREEMENT

Section 8 - New Business or Service

Q1. A freight/yard assignment regularly services an industry or industri A new industry is later established which generates new business requiring freight/yard service. May this freight/yard assignment b operated with a reduced crew under the new business concept?

A. No, extension of the existing freight/yard assignment to include servicing of the new industry would not constitute new business.

Q2. When could new business and new service qualify for using a reduced crew?

A. When the new business results in having to provide new service to exclusively accommodate the new business.

Q3. May a new road switcher assignment be considered as new business or service?

A. Consistent with Questions 1 and 2 herein, a new road switcher assignment may be operated with a reduced crew when providing new service to exclusively accommodate the new business.

Section 8.1 - Non-Revenue

Q1. May the Carrier call a reduced crew to perform relief service when th train to be relieved has a required standard crew?

A. Yes, provided no other work is performed, such as switching, set out and/or pick up, etc.

Q2. In reference to Question 1, would this restriction apply if the train relieved did not require a standard crew?

A. No.

Q3. In situations where relief service is protected by first-out through freight crews at their away-from-home terminal instead of an extra board, would all members of a one and two crew be used for the relief service?

A. Yes, the Crew Consist of the through freight crew in this instance would not be broken.

ARTICLE III - DEFINITIONS

Section 2 - Blankable Positions

Q1. Do protected employees have the right to fill blankable brakeman positions?

A. Yes, as provided in this Agreement.

Q2. Is it necessary to bulletin a blankable brakeman position?

A. Yes, as provided in Article IV of this Agreement.

Q3. Must blankable brakeman positions under bulletin be filled from the protecting extra boards by protected employees?

A. Yes, subject to the availability of protected brakeman and other provisions of this Agreement.

Q4. May protected employees exercise seniority to blankable positions unde bulletin in accordance with Schedule Rules or Agreement?

A. Yes.

Q5. Do non-protected brakemen have the right to blankable positions?

A. No.

ARTICLE IV - DISPLACEMENT RIGHTS

Q1. How shall a protected employee acquire the right to exercise seniority to a blankable (blanked) position?

A. By seniority right to obtain such position under governing existing Schedule Rules, i.e., bulletin or displacement, and as further provided in this Agreement.

Q2. Does a protected employee retain the right to take a blanked or blankable position even though it was passed up previously?

A. Yes, provided he is entitled to an exercise of seniority under the applicable Schedule Rules.

ARTICLE XII - EXTRA BOARDS - BRAKEMEN

Q1. If a protected extra board brakeman is held for a must-fill vacancy; when must the employee be notified of the must-fill vacancy?

A. The brakeman will be notified as soon as possible but not later than the calling time of the assignment from which withheld.

Q2. Should a protected brakeman be held for a known must-fill vacancy; after notified, an earlier must-fill vacancy becomes known, may the Carrier use the held brakeman for the earlier vacancy?

A. Yes, if available, but the employee shall not be censured or paid if unable to locate.

Q3. May a first-out protected employee standing for a blankable vacancy held for a known must-fill vacancy when there is a non-protected employee available on the extra board to fill such vacancy?

A. No.

Q4. When may a regularly assigned protected brakeman be held for a known must-fill vacancy?

A. Only when there are no men available on the extra board.

Q5. There is a must-fill vacancy and a blankable vacancy on a 1:30 p.m. assignment, and also a must-fill vacancy on a 4:00 p.m. assignment. How would these vacancies be filled from the extra board that is lined up with first-out protected yardman; second-out, a non-protected yardman; and a third-out protected yardman?

A. The first-out protected yardman would be called for the must-fill 1:30 p.m. vacancy and the third-out protected yardman would be called for the 1:30 p.m. blankable vacancy and the second-out non-protected yardman would be called for the 4:00 p.m. must-fill vacancy account non-protected yardman would have no right to a blankable vacancy.

Q6. Under the foregoing example, if the extra board was lined up with the first two as protected yardmen and the third a non-protected yardman, how would such vacancies be filled?

A. The 3:30 p.m. must-fill vacancy and the 3:30 p.m blankable vacancy would be filled by using the first-out protected yardman and the second-out protected yardman; and the 4:00 p.m. must-fill vacancy by the third-out non-protected yardman.

Q7. There are only two protected extra yardmen on the extra board when a blankable vacancy arises and also there is a subsequent known must-fill vacancy. Which protected yardman would be held for the later must-fill vacancy?

A. The first-out protected yardman would be used on the blankable position and the second-out protected yardman would be held for the subsequent must-fill vacancy. However, if there are two subsequent must-fill vacancies, both protected extra yardmen would be held account extra board then exhausted.

Q8. In reference to second brakeman positions, how will extra engines be treated?

A. The terms of this Crew Consist Agreement apply to both regular and extra yard assignments.

Q9. If there are two must-fill and two blankable vacancies with the same on duty time and the standing on the extra board is first-out protected employee; second, non-protected; third, protected; fourth, non-protected; how would these vacancies be filled from the extra board?

A. The must-fill vacancies will be filled first, so that the first-out protected brakeman would have an election; the second non- protected, would fill the second must-fill vacancy; and the third protected, would have an election on one of the two blankable vacancies and the fourth, non-protected, would not be used to fill the remaining blankable vacancy.

Q10. In reference to Q9, the extra board is lined up with first-out employee as non-protected; second, non-protected; third and fourth, protected; how would these vacancies then be filled from the extra board?

A. The first-out and second non-protected would fill the two must-fill vacancies, and the third and fourth protected would fill the blankable, the first having an election in both cases.

Q11. When a protected brakeman is held for a known must-fill vacancy and other extra men subsequently become available on the extra board, wh can protect such vacancy or vacancies, will the held brakeman be released and returned to the extra board?

A. No, the employee will be handled on the basis that the vacancy for which held did not materialize.

Q12. How long may a protected brakeman on the Road Extra board be held fo must-fill vacancy?

A. A protected extra brakeman may be held from the time a known vacancy exists until such vacancy is fulfilled or is released therefrom. A protected extra brakeman will not be held for a must-fill vacancy unless, at the normal calling time of the position from which withhel no protected employees are available on the Extra board. In any even a protected extra brakeman held for a must-fill vacancy shall not los any earnings that such brakeman would have otherwise accrued, had suc brakeman not been held.

Q13. There is a must-fill vacancy in road service and a must-fill vacar yard service with the same on duty time. On which vacancy would a first-out employee on a combination road/yard extra board be used?

A. Vacancy will be filled in accordance with Schedule Rules.

Q14. There is a must-fill vacancy in road service and a blankable vacancy yard service or vice versa, with the same on duty time and the first-out employee on the Combination Extra Board is protected. On which vacancy will the protected employee be used?

A. On the must-fill vacancy.

Q15. There is a blankable vacancy in yard service and a blankable vacancy i road service with the same on-duty time and the first-out employee on the Combination Extra Board is protected. On which vacancy will the protected employee be used?

A. Vacancy will be filled in accordance with Schedule Rules.

Q16. If the most junior employee cannot be contacted, will such employee be penalized or disciplined?

A. No, such employee would not be available in the circumstances.

Section "H"

Example: A protected brakeman stands to be called for a blankable vacancy "A" from the first-out position on the extra board at 6:00 a.m. The employee is withheld from vacancy "A" for a must-fill vacancy "C" for approximately 11:30 a.m. The employee is then used in emergency when an unforeseen must-fill vacancy "B" appears, at 7:30 a.m., account no other extra brakeman available. The employee would be paid the earnings of vacancy "B" on which the employee worked in emergency but not less than the earnings of vacancy "A" for which the employee stood at 6:00 a.m.

ARTICLE I - CONDITIONS

Q1. Is it the intent to reduce a standard crew at the away-from-home terminal when such crew is called for a train only requiring a reduced crew, by deadheading the second brakeman home?

A. No, the second brakeman will remain with the crew, except under conditions stated herein.

Q2. Under what conditions would a reduced crew out of the away-from-home terminal be returned to the home terminal as a standard crew?

A. As required in the Car Limits.

ARTICLE VI - RADIOS

Q1. Will the "engine radio" and/or the "caboose" radio be classed as the portable radio for the brakeman/yardman and the conductor/foreman on a reduced crew?

A. No.

Q2. Is it fully understood that no reduced road/yard crew will be operated on any district unless all members of a reduced crew have operable portable radios?

A. Yes.

Q3. If the portable radio fails enroute, will the crew continue to its terminal?

A. Yes.

CREW CONSIST AGREEMENT

Section 5 - Special Allowance

and

Section 7 - Productivity Fund

Q1. Where a reduced crew performs combination of deadhead-service, or service-deadhead, would such crew qualify for the Special Allowance the Productivity Allowance?

A. Combination deadhead-service, or service-deadhead, will be treated same as service trips in applying the special allowance and the Productivity Fund.

Q2. Do the Special Allowance and the Productivity payment apply to pay such as hold time, runarounds, deadhead, call and release (no work performed), guarantees, holiday pay when service not performed on holiday, personal leave pay, vacation pay, penalty days paid due t violation of Agreement rules, and the like?

A. No. These payments cover road service trips and yard tours of d actually performed (worked) where the additional responsibility working with a reduced crew is involved.

Q3. Does a reduced crew, who is called on duty, performs service (work) is subsequently released, qualify for the Special Allowance?

A. Yes, because service (work) was actually performed as a reduced cr and will be credited as a tour of duty for the Productivity Allowa

Q4. In reference to the preceding question, the crew performs no servic but qualifies for the payment prescribed in the Schedule Rules?

A. The crew would not qualify for the Special Allowance because no ser (work) was performed.

Q5. Will a compensable relief deadhead trip made by an employee (single individual) be taken into account as qualifying for the Productivit Allowance?

A. No.

Q6. Under Article III, Sections 1(a) and (b) of the June 25, 1964 Natio Agreement, Manning Self-Propelled Machines, do the reduced crew conditions apply?

A. No.

PART III

Section I

The parties hereto acknowledge that further or additional understandings may be required in order to fully implement the intent of this Memorandum. Such necessary discussions or interpretations shall be handled in conference to endeavor to arrive at agreed-upon procedures not specified herein. Periodic conferences for the resolution of differences will be arranged in keeping with the intent and purpose of these agreements and the rights of the parties thereunder. Such agreements shall be reduced to writing as consecutively numbered addendums to this Memorandum of Implementation.

Section II

The term "brakeman" as used in this Agreement serves the purpose of identifying a craft or class of employees and is not intended to denote gender.

Section III

The provisions of this Memorandum of Implementation supersede any and all existing agreements, rules, or understandings which are in conflict.

Section IV

This Agreement will be implemented upon ratification of Union membership and approval of the Federal Railroad Administration.

Signed at Anchorage, Alaska this 28th day of April, 1981.

Alaska Railroad - UTU Crew Consist Agreement

Dear Mr. Shake:

This will confirm our discussions and agreement that the baggageman called or assigned on mixed passenger/freight trains operating between Anchorage and Fairbanks will be paid the rate of pay established for baggageman by the Crew Consist Agreement governing passenger service.

Sincerely,

Robert W. Davison
Supt. of Transportation

AGREED:

Robert L. Shake, General Chairman
United Transportation Union

CREW CONSIST AGREEMENT
between
THE ALASKA RAILROAD
and the
UNITED TRANSPORTATION UNION

THIS AGREEMENT, by and between The Alaska Railroad and the United Transportation Union, is in full and final settlement of the consist of crews in passenger service.

IT IS HEREBY AGREED AS FOLLOWS:

1. The parties will finalize the necessary implementing provisions to become effective concurrent with this Agreement consistent with the following.

2. The consist of passenger crews, except as otherwise provided in this Agreement, shall be not less than one conductor and one brakeman.

3. Effective with the date of the Agreement, trainmen in passenger service, both protected employees and non-protected employees, as defined by the road freight and yard service Agreement dated [illegible], working on a one and one crew, shall each be paid in accordance with the rates of pay depicted in Attachment #1. Rates of pay provided in Attachment #1 will be incorporated in the master list of pay rates at its next printing and will subsequently be maintained in the master listing. These rates are subject to all future wage and cost-of-living adjustments becoming effective subsequent to the date of this Agreement.

4. Trains operated under the provisions of the Agreement will be subject to the following car limitations:

   a) Regularly scheduled passenger trains:
      - No more than five (5) passenger cars carrying coaches
      - No more than one (1) diner car
      - No more than one (1) lounge car
      - No more than two (2) baggage cars

   b) Unscheduled special passenger trains:
      - No more than seven (7) passenger-carrying coaches
      - No more than five (5) additional cars, i.e., baggage, recreation, lounge, or combination thereof to be determined by service needs

c). Official or non-revenue trains:
- No more than five (5) passenger cars
- No more than one (1) baggage car

NOTE: Consists of two or less cars may be manned by one Conductor.

5. When trains are operated under provisions of 4(a), the Carrier may add up to two (2) additional coaches, not to exceed a maximum of seven (7) coaches per train. When the train operates within limits specified in this paragraph, the Carrier will pay 100 miles at passenger service rate (one basic day) to the brakeman first available on the Anchorage Extra Board. Such individual will then move to the bottom of the Board and stand last out.

6. One (1) baggageman will be called for or assigned trains that require crews to work mail, baggage, or express between terminals.

7. The Carrier retains the right to exceed the limitations specified in Section Four above at any time and in any manner, but such trains will not be operated with less than one (1) conductor and two (2) brakemen.

8. The parties of this Agreement shall not serve or progress any notice or proposal for changing the specific provisions of this Agreement governing: (1) protected employees; (2) special allowances; or, (3) productivity savings shares and the administration thereof. This paragraph will not bar the parties from making changes in the provisions of this Agreement by mutual agreement.

9. Differences or disputes regarding the application or interpretation of this document will be resolved through joint discussions and consultations between the parties.

Side Letter Number 3

Alaska Railroad-UTU Crew Consist Agreement

Dear Mr. Olson:

This will confirm our discussions and agreement on the interpretation of Section 5 of the Crew Consist Agreement and Article II of the Implementing Agreement. The intent of these Agreement provisions covering the assignment of protected and non protected employees to regular must fill vacancies is defined as follows:

"Regular must-fill positions in road or yard service for which no bid has been received from a protected employee, but bids from non-protected employees have been received, shall be filled by assigning the non-protected employee. If non-protected employees are assigned an equal number of protected employees will, in reverse order of seniority, lose their status in filling blankable positions so long as non-protected employees are holding must fill positions.

The junior protected employee occupying a blankable position will be required to go to the extra board or exercise seniority to a must-fill position occupied by a junior employee.

The vacancy created on blankable positions as a result of exercise of seniority under this rule will not be rebulletined.

Upon notification the affected employee will be required to exercise seniority in accordance with Rule 11-E (3) in the current ARR-UTU Agreement."

Examples of this provision are:

1. Assume a must-fill vacancy exists on an 8:00 am yard assignment for which no bids are recieved from protected employees but bids are received from non-protected employees. The senior non-protected employee bidding will be assigned, and the junior protected employee occupying a blankable position will be removed from the blankable position held and be required to exercise seniority in accordance with this rule.

2. If no bids are received from either protected or non protected employees, the must fill vacancy will be filled by force assigning the junior employee (protected or non-protected) in accordance with Schedule Rules. If non-protected employees are force assigned an equal number of protected employees in reverse order of seniority will lose their status in filling blankable positions so long as non-protected employees are holding must fill positions.

Sincerely,

L. A. Ellsworth
Supt. of Transportation

HOUSE TRANSPORTATION COMMITTEE
INTERIM REPORT NO. 1
SEPTEMBER 15, 1984

The House Transportation Committee interim staff is Rhonda Cargill and Loretta Knightlinger who work under the direction of Representative Bette Cato, Chairman. The following report constitutes the first report of the House Transportation Committee to the Majority Leader and includes the various issues that have been ongoing since the office opened the first of July.

Staff has continued to keep abreast of the Capital Projects Cleanup (CPC) Committee. CPC was formed to identify problems and recommend solutions in the department's program/project management. Several changes have taken place since the CPC group presented their report to the House and Senate Transportation Committees during the Second Session of the Thirteenth Legislature, but staff continues to be able to communicate with the CPC group and the progress, or lack of progress that is being made. We have requested the Department of Transportation, through the CPC group, for a status report on the appropriations made during the 1984 session in HB 636, HB 691, SB 364, SB 94, HB 452, HB 487, and SB 409. It is important to the Chairman of House Transportation to have that information readily available to review, especially during session when additional appropriations are being made for projects.

Representative Bette Cato met with the Deputy Commissioner of the Marine Highway System the first week of August to discuss the possibility of a strike by the ferry workers. Mr. Camp outlined the major points of negotiations that were being discussed at that time. Those included the issues of vacation time; overtime payment and tie-up agreements. Although there is still the possibility of ferry strike in April, at the time of the writing of this report, negotiations are continuing to move forward.

Among the other topics discussed with Mr. Camp included what had happened to the M/V Columbia and the fact that it needs an underpower bowthruster as it is a fairweather ship; he mentioned that he had been looking at the possibility of catamarans as opposed to the jetfoil for Southeast; Mr. Camp mentioned that he is exploring the various steps that could be taked to grant MHS greater autonomy and flexibility while remaining in DOT. Due to the Chairman's strong interest in the MHS and her agreement with this concept, staff continues to follow the progress of MHS as a separate division of DOT; per Rep. Cato's request we received a draft of the ferry winter schedule and are expecting the final

publication the end of September; and the reservation system was discussed as to what is still needed. MHS received the funding for a centralized reservation system and the contract (request for proposal) is out for a contractor to do the design system. Staff will be continuing to communicate with Mr. Camp to be kept abreast of these and other topics regarding the Marine Highway System.

A very concerned item which staff has been following is the proposition of the abolishment of the Alaska Transportation Commission. Several articles have been written as to what could happen if the voters did in fact choose to abolish the commission and what the ramifications could be.

A tremendous amount of time has been spent on this due to the many avenues that could be taken and rather than staff duplicating efforts of numerous agencies, industries, concerned individuals, we have collected various materials to have at our fingertips as a library of ATC information. We have included in this report several pieces of information such as the language that will appear on the ballot for the public to vote on the ATC issue; a neutral summary written by Legal Services of the initiative; Judge Pegues' decision on whether the ATC initiative should appear on the ballot; and a copy of the Functional Responsibilities of the ATC as written by Office of Management and Budget.

The main concern of Chairman Cato is the possible loss of safety regulations, especially when there is such an outcry on the matter of unsafe trucks on Alaska's roads. Chairman Cato has instructed the staff to continue efforts, which were started during the session, which includes proposing legislation to address the need of safety. We are patiently awaiting the outcome of that vote in November and at the same time are watching what is happening on the federal level.

The House Transportation Committee staff has learned that the Motor Carrier Safety Act (S. 2174) is still in the Senate and most likely will not be passed this year. To date, we are awaiting the committee report on what changes this legislation has been through.

To briefly explain the Motor Carrier Safety Act, essentially the bill would increase safety enforcement by the U.S. DOT in several ways. It gives the Secretary of Transportation authority to promulgate comprehensive safety rules and regulations; it expands U.S. DOT's authority to prosecute safety violations and establishes an updated system of civil and criminal penalties; it requires U.S. DOT to establish standards to require annual vehicle inspections (inspection of a vehicle in one state in accordance with federal standards shall be recognized as adequate in every other state); all private and for-hire carriers will be required to meet safety fitness standards; and the bill opts for national uniformity of truck safely laws and regulations. It will allow states to retain laws and regulations only if the DOT has no laws or regulations governing the same subject matters or if a state can prove that it

has need for a special truck safety rule because of locally compelling conditions. This information is from a March report, but until staff receives an update as to the changes, this is basically what was introduced. Of course there are many pros and cons on this legislation, and staff will continue to follow the workings of this and other federal legislation. Especially since there may be federal funds involved.

Alaska Railroad Transfer As has been reported in the newspapers, Governor Sheffield is still in the process filtering through the names submitted for members of the Board. We expect to receive the Transition Team's work plan for this transitional period by late September.

Trucking Regulations We have attached the updated Alaska Administrative Code and the newly adopted regulations concerning the trucking industry which became effective September 1, 1984. The changes dealt with the wheeled vehicles as follows: (1) allowing vehicles with widths up to 102 inches to operate on all state highways; (2) specially designated certain state highways for the operation of described overlength truck-trailer combinations; and provided for reasonable access to and from specially designated highways. We have contacted T.J. Thrasher, Managing Director of the Alaska Trucking Association and asked her about the adopted regulations of which she said the association fully supported.

In regards to the 120-day trial period for the tandem trailers on the Richardson Highway, (see attached news article) that trial period has been extended to December 31, 1984. We understand that the tandems were doing fine with no problems.

Invitation for Bids In addition to following regulations that DOTPF is proposing, the committee staff has begun to track those projects that are put out to bid. Due to the fact that this is a new project (new for this interim) and of course is ongoing, at this time we can report those projects that have been advertised as a public notice of one kind or another.

Invitation for bids:

Conferences/Meetings attended by Representative Cato

Thompson Pass/Valdez Representative Cato met with Commissioner Knapp, in Valdez, concerning employee moral and problems of supervisors. All came to an agreement to promote a more harmonious work atmosphere and to improve relations between employees/employers.

Red Dog Mine Attached are photos taken by Representative Cato while on a tour of the Red Dog Mine on September 4.

Des Moines, Iowa: National Association of Governors' Highway Safety Representatives (NAGHSR) Conference September 9-13 At present time Chairman Cato is attending this conference, but we do know from the information received that the Honorable James J. Howard (D-NJ) is to deliver the keynote address at the conference. Congressman Howard chairs the Public Works and Transportation Committee of the House of Representatives and will focus upon Congressional perspectives regarding highway safety.

Chenega Representative Cato was invited to go to Chenega for ceremonies of their new town after being rebuilt from damages done by the 1964 earthquake. Representative Cato was able to get as far as Anchorage, but due to weather conditions was not able to go on to Chenega. Later she learned that during the ceremonies, Chenega dedicated and named their road after her.

Seward Road Closure While touring the district, Representative Cato found that the Kluane Construction had closed a section of road from Bertha Creek to Ingram Creek on the Seward Highway between the hours of 10 a.m. to 2 p.m. This created a great deal of problems and confusion due to the Seward Salmon Derby. Many participants traveled this road to and from the derby grounds, therefore causing a tremendous traffic problem. Representative Cato summoned the company and asked if a more suitable schedule could be met until the derby was over. They agreed this could be done. Representative Cato learned that the reason for the hours of the road closure was that OHSA prohibits blasting after sunset, unless special lighting is used to render the area bright as day and unless a special permit is used.

Ferry strike vote a possibility

ANCHORAGE (AP)—About 650 state ferry system workers could vote next month on whether to strike if contract negotiations with state officials remain at an impasse.

The employees are represented by the Inland Boatman's Union of the Pacific.

Union leaders have said the state's final proposal includes drastic reductions in vacation, sick leave, overtime pay rates and safety conditions, as well as a smaller pay increase than other state employees have received.

The labor organization, an affiliate of the International Longshoremen's and Warehousemen's Union, represents junior engineers, deckhands, oilers, wipers, pursers, stewards and cooks.

While both sides have been working with a federal mediator, Mike Wilson, spokesman for the Inland Boatman's Union said the efforts have not settled the basic disputes. He said the union has proposed the contract be submitted for binding arbitration.

Bill Gibbons, director of labor relations for the state, said Alaska officials will decide on the binding arbitration question within a few days.

The contract expired March 31, but has been extended to Aug. 7.

Wilson said the union will present the state's final best offer to its members on that date, and a strike vote may be taken.

Ferry strike growing possibility

By CHUCK KLEESCHULTE
The Juneau Empire

While both sides say they do not want a strike, they also warn a walkout of state ferry workers that could shut down the ferry system during the height of this summer's tourism season is a growing possibility.

The president of the International Longshoremen's and Warehousemen's Union Jim Herman of San Francisco Thursday night charged that the state is guilty of "unfair and dishonest" bargaining practices and is attempting to use its "muscle" to force unwarranted concessions from some of the 650 of the 850 state ferry workers represented by the Inlandboatmen's Union of the Pacific, Alaska Region, a union affiliated with the ILWU.

Herman, at a Juneau press conference before a meeting of ferry workers, said the situation between the state and union has "turned very difficult," employees feeling frustrated and fearful they may have to strike to protect contract benefits won in previous negotiations with the state.

"We want to resolve this matter, but workers will react with militancy if they think that 16 to 18 years of negotiating effort is being taken away," said Herman.

Talks over a new three-year contract for the largest group of Marine Highway workers broke off June 27 and have yet to resume. Currently workers are balloting on whether to authorize a strike, the authorization vote scheduled to be tallied by the state Labor Relations Agency Aug. 15.

ALASKA NEWS

Herman and Don Liddle, Pacific president of the IBU, both refused to set a strike deadline, but a walkout of the ferry workers could start anytime after the authorization vote is certified. The workers have been on the job as a result of a six-month extension of their contract since last February.

Talks broke off as both sides are far apart on wage, overtime, vacation, sick leave and staffing requirements. The union says the state is offering ferry workers a wage freeze, a contract that would cut overtime pay and one that would reduce by over a half the amount of vacation workers gain.

Herman said all workers want is to keep their current benefits and gain the same cost-of-living pay increase granted to other state employees this year.

Herman attacked state efforts to reduce the vacation time, saying the current vacation arrangement is fairly standard in the maritime industry. He accused state negotiators — noteably C. Gary Donworth, a Seattle labor consultant — of making "false statements" either by design or "because they don't know any better."

Joe Camp, deputy commissioner of administration in charge of the ferry system, said the state is willing to bargain and accept wage increases, but he said the union should be willing to give up part of its current vacation time.

"When you look at the past ferry contracts it looks like the pacts were negotiated by someone not very familiar with maritime benefits. We want to return to the table and avoid a strike, but we don't intend to knuckle down and just give in to the union," said Camp this morning.

He said a 10-year ferry worker, receiving seven two-week periods of vacation, might work just 19 weeks a year, a vacation benefit package nearly three times more expansive than enjoyed by other state workers.

"We aren't asking employees to take anything less than others in the industry receive. Right now though they have the best contract in the nation," Camp said.

Camp said the state is not expecting the union to ask for talks to resume until the union is armed with a strike authorization vote. Herman said the union doesn't see a need to resume talks until the state signals its intention to bargain in good faith — the sides agreeing there is no date set for talks to resume.

Herman charges the state knows its position is indefensible since the state has refused to submit to binding arbitration to settle the wage dispute. Camp, however, said the state is convinced its position is just and doesn't want to submit to binding arbitration because so often an arbitrator "will just split the difference" between the two sides.

The state's nine-vessel ferry fleet is largely responsible for the movement of freight and vehicle traffic among Southeast towns.

Ferry contract talks resume; strike delayed

By CHUCK KLEESCHULTE
The Juneau Empire

ALASKA NEWS

Negotiators from the state and the Inland Boatmen's Union of the Pacific, Alaska Region, will return to the bargaining table Thursday for the first time in seven weeks in an effort to hammer out agreement on a new three-year contract for the state's ferry workers.

While a strike may become legal anytime after Friday if talks fail, union sources say a strike is now highly unlikely until fall and won't come until at least next April 1, if rank and file workers follow a recommendation made last week by union leaders.

Whether the 650 of the ferry's 850 workers who belong to the IBU-P will accept the recommendation won't be clear until after the final in a series of union meetings with workers Friday in Ketchikan and Juneau.

Whether the state will permit the union to simply extend the old contract until spring, or impose a reduced pact on workers that might prompt a fall or winter strike, also is questionable.

The entire issue is further complicated by the IBU-P's apparent belief that negotiations with the state are being affected by a potential challenge to the union's right to represent the ferry workers by the rival bargaining unit, the Inland Boatmen's Union - Seafarers International Union, an AFL-CIO backed faction that four years ago challenged the IBU-Pacific for the right to bargain for the ferry workers.

What is clear is that the Alaska Labor Relations Agency should rule on Wednesday whether ferry workers have authorized a strike against the system during balloting that opened in late July. Since a twice temporarily extended contract between the state and the union expires at midnight Thursday, workers will be legally free to strike Friday, if they vote to permit a strike during the still-open strike balloting.

Under a letter to the ferry workers sent out last week by IBU-P local "patrolman" Michael Wilson, the union intends to field the state's "final" contract offer Thursday and then poll members whether they find that proposal acceptable. That balloting could take until October, Wilson said Monday.

If it is rejected, as the union expects it will be, the union is considering challenging its rival, the IBU-SIU to file a petition calling for a new representation election among the ferry workers to settle once and for all who will represent the workers in contract talks.

"The (current bargaining) committee is unanimous in the opinion that we will not receive an acceptable proposal from the state until the question of representation is resolved. Why should the state negotiate in good faith with the union when they believe a question of representation exists?" Wilson said in his letter to ferry workers.

Joe Camp, deputy commissioner of administration, in charge of ferry system, this morning said the state is not in a position to comment on the potential for a strike since the state will be offering a modified contract proposal to the union when the two sides meet Thursday.

He said, however, if the union doesn't reject the state's final offer and launch a strike, the state could implement the terms of its final offer and reduce benfits from the current contract.

Contract talks, which started last December, broke off June 27 in a dispute over wages, overtime pay, vacation, sick leave and manning requirements. The most serious issue is the state's demand that ferry workers accept a cut in vacation time that would reduce the vacation of a 10-year employee by over half.

Currently, a 10-year ferry employee receives seven two-week vacation periods yearly, an amount the state says costs more than three times what it gives to other state workers. The union argues the time is only fair given the family disruptions that workers experience.

It also says the provision only makes up for employees working 84-hour work weeks at straight pay, compared to 37½-hour weeks for non-supervisory state employees. The union also says the provision helps state employment by producing 20 percent more jobs.

The union in general is seeking a continuation of current contract terms, plus the same cost of living increase given other state workers.

Meanwhile, Greg O'Claray, an official of the IBU-SIU, said his union already has enough signed representation cards from ferry workers to prompt a representation election, but that his group hasn't decided whether to seek an election.

He denied that his union's presence is hampering IBU-P talks saying that unit made no progress in contract talks for six months prior to workers signing the first of the representation cards.

SEWARD PHOENIX LOG
August 16, 1984

Ferry workers opt for strike

96% of voting ferry workers-406 of 430-chose to strike against the Marine Highway System rather than give up wages and benefits they have had for years.

Only seven voted no and there were seven challenged ballots.

Inland Boatmens Union of the Pacific's regional director Jerry Johansen said this does not mean the ferry will stop running next week.

"We are scheduled to meet with ferry administrators in Juneau today," Johansen said, "hopefully we will reach a tentative agreement."

If accord is reached, the current contract will be extended until members ratify the new one by secret ballot. The new contract would last for three years and the ferry will run as usual.

If no agreement is made, Inland Boatmens Union of the Pacific leadership will not extend the old contract.

This would open the door for a rival union, Inland Boatmens Union of Alaska, to file for a representational election.

The IBU of Alaska claims it has pledge cards from 30 percent of Inland Boatmens Union of the Pacific members in Juneau, Ketchikan and southwestern Alaska, calling for the representational election, Johansen said.

A contract extension would bar the rival group from requesting a representational election.

If a representational election is required, the state Labor Relations Board will conduct it by secret ballot and by December, ferry workers would know which union represented them.

Johansen said members have been advised that in case of a representational battle, there will be no strike until April 1985. By then, not only will the issue be settled, but also the ferry system will have begun it's busy season, and a strike would be more effective.

UNEAU EMPIRE

OPEN LETTER TO IBU OF THE PACIFIC MEMBERS

As you know, the IBU of the Pacific has been bargaining with the State of Alaska for five months, seeking to negotiate a new contract to cover all unlicensed crew members of the Alaska Marine Highway System.

The Seafarer's International Union claims through its representative Greg O'Claray to have 360 pledge cards signed by IBU of the Pacific members.

It is in the best interest of everyone — The citizens of Alaska, the State and you the workers — that the collective bargaining process work properly and conclude in a fair and equitable labor agreement so the Alaska Marine Highway System can operate.

The question of representation has to this point completely frustrated bargaining and will continue to do so until it is resolved.

The IBU of the Pacific is therefore asking the SIU in the name of decency and as a demonstration of respect for you the workers, to file with the Alaska State Labor Relations Agency between August 17 and August 31, 1984 the pledge cards they claim to have in order that an expedited election can be held to determine which Union will represent you in the future.

Once this question of representation is resolved, we are confident that the IBU of the Pacific bargaining Committee will successfully conclude a labor agreement with the State of Alaska on your behalf.

Fraternally,
IBU of the Pacific
Bargaining Committee

Post jetfoil: Catamarans?

By KIRK McALLISTER
The Juneau Empire

In addition to the regular state ferries, there appears to be a need for some form of high-speed ferry service in Southeast. But there are other options besides the expensive Boeing jetfoil, a Department of Transportation official said today.

Joe Camp, deputy commissioner for the Marine Highway System, said that the most attractive alternative so far is a high-speed catamaran that is one-tenth the initial cost of the jetfoil and has 80 percent less operating and maintenance costs.

The Australian-designed catamaran, built by Nichols Brothers Co. of Whidbey Island, Wash., can carry 70 to 80 passengers, six to eight cars and has a top speed of 35 mph.

The catamaran doesn't travel as fast as the 50-mph jetfoil but it only burns about 70 gallons of fuel an hour compared to 480 gallons an hour for the jetfoil, said Camp. Initial cost of the catamaran is about $1.7 million compared to $18 million for the jetfoil.

Camp said he was "very impressed" after riding one of the catamarans recently near Whidbey Island. The boats are currently operated in Puget Sound and the San Juan Islands and were originally built for service between Australia and Tasmania.

One of the boats has been purchased by a private operator in Alaska and will be used on the Yukon River next year, Camp said.

The jetfoil, which is being tested this summer in Southeast, has attracted only about 42 percent of its hoped-for passenger volume, according to DOTPF officials.

Meanwhile, the ferry system is putting out bids to replace the engines in the Matanuska. Camp said the cost of the new engines should be about $4 million and installation should be completed by next spring.

Despite annual overhauls, there has been heavy wear on the original 1967 Matanuska engines and it would have cost more to rebuild them than to replace them completely, said Camp.

Between $4 million and $6 million is spent annually for maintenance on engines in the nine-ship state ferry system plus there is usually at least one major overhaul every five to seven years.

Camp said he is considering several other projects for the next few years including adding 56 cabins to the Columbia and replacing the aging Tustumena, which serves Southwestern Alaska.

By the end of the year, prior to the legislative session, a master plan study of the ferry system will be completed. The plan is designed to guide planning and financial requests for the next five years or so, Camp said.

ALASKA TRANSPORTATION COMMISSION

FUNCTIONAL RESPONSIBILITIES

Transportation market entry, air and motor carrier rate establishment and the safety of these operations are regulatory responsibilities of ATC. They are conducted through ATC's quasi-judicial process. In this report section, we briefly summarize the processes used by ATC to perform these functions.

Appendix A is a glossary of terms commonly used in the transportation industry.

Entry Regulations

Entry regulations control the number of carriers allowed to serve a particular market. The statutory standards used to determine entry into the motor carrier industry differ from those used to determine entry into the air carrier industry. Both motor and air carriers must submit applications for operating authority to the ATC.

Motor carriers seeking authority to offer new services must submit an application and a filing fee for the proposed services. Contract carriers apply for authority to serve specific customers under specified contractual terms. Common carriers apply for an operating authority to offer services to the public. Private and exempt carriers are not subject to entry regulations.

Entry standards in the motor carrier industry serve to protect existing carriers from new competitors by requiring the applicant to prove that there is a need for new service. These standards, referred to as "Public Convenience and Necessity Standards," allow the ATC to establish or deny an authority based on three determinations:

1. Whether the service will serve a useful public purpose.

2. Whether the service could be performed as well by existing carriers.

3. Whether the applicant can perform this service without endangering the operations of existing carriers.

Each applicant must prove there is a need for new service. Entry standards also include financial standards designed to determine the applicant's ability to establish and operate the proposed business.

Air Carriers seeking authority to offer new service are not required to prove public convenience and necessity if their proposed operations will consist of less than 7,500 pounds of operating capacity and/or seating capacity of less than 30

people. Statutory entry regulations for all air carriers require new applicants to prove the following:

1. Adequate operational capabilities.

2. Adequate management capabilities.

3. Adequate equipment and facilities for proposed size of operation.

4. Adequate maintenance provisions.

5. Adequate financial capability and economic feasibility for the proposed operation.

Financial capability is determined by evaluating the applicant's ability to successfully finance operations. Economic feasibility and ATC's final decision to grant or reject the application for operating authority is assessed in terms of the market: Is it large enough to warrant additional entrants without damaging the current competitors' businesses?

Rate Regulations

The ATC reviews all tariffs submitted by carriers to assure that the rates are competitive and to provide a fair rate of return to the shipper while not discriminating between shippers. According to the ATC, tariff regulation is based on the theory that the public should have needed services available at fair and reasonable cost without forcing other segments of the public to pay unreasonable prices for services they need. The Commission answers public complaints about excessive charges, and, if the complaints are found to be accurate, requires that appropriate refunds are made. Rate regulation in the motor carrier industry is far more structured and organized than in the air carrier industry.

Motor carriers' rates are regulated for two types of carriers: contract and common carriers. Private and exempt carriers are not subject to rate regulation. Contract carrier rate regulation is minimal. The rates are negotiated between the shipper and the carrier as part of a negotiated contract and the rates are filed with the ATC. The filings are a matter of public record, but the ATC does little to disseminate the rate information filed by contract carriers.

Common carrier rates, however, must comply with governing standards which restrict the tariffs to be charged for certain commodities. The rates which common carriers may charge are divided into many classes of product commodities. Each class includes commodities which have similar characteristics such as density, volume, value, or ease of handling.

The ATC regulates tariff filings by requiring common motor carriers to submit tariff changes and supporting documentation. This supporting financial data shows how the rate is compensatory and the ATC review shows how the new tariff filings comply to governing standards. The ATC periodically audits selected common carrier records to assure rate compliance. These audits are performed randomly; there is no system which assures that records for all carriers are periodically audited.

Air carriers' rates are regulated less formally. Each new air carrier rate filing is handled on a case-by-case basis, not evaluated against an industry-wide standard, as in the motor carrier industry. Newly proposed rates are compared by the ATC tariff staff to similar, competitive rates in the same geographical or market region.

Safety Regulations

The ATC has statutory responsibility to establish and enforce a commercial vehicle safety program. Safety regulations require commercial motor vehicles to meet specific equipment standards; drivers to meet specific qualifications; and cargo loads to comply with specific safety guidelines designed to protect the road system and the public.

The ATC has been responsible for a commercial vehicle safety program since 1966. For several years, the primary responsibility for safety inspections and load/weight standards enforcement was delegated to the Department of Public Safety as part of highway scale house operations. The operation of the scale house was transferred to the Department of Commerce, Division of Measurement Standards, in 1982. In March, 1983, the inspection responsibilities were reassumed by the ATC.

Although the ATC currently has statutory responsibility for a comprehensive commercial vehicle safety program, the functional responsibilities of the program are shared by three agencies. Statutory safety compliance, affecting vehicles and drivers, is enforced through random vehicle inspections performed by the ATC enforcement staff. The enforcement staff randomly stops commercial vehicles (sometimes at the scale houses and sometimes on the highways) and determines if the vehicle, driver and load comply with safety regulations. If not in compliance, a citation is issued and resolved through ATC quasi-judicial proceedings.

The Department of Public Safety also enforces the commercial vehicle safety regulations on the highways. If a commercial vehicle is out of compliance, State Troopers issue a citation. This citation is processed through the courts, not through the ATC quasi-judicial proceedings.

The Department of Commerce and Economic Development, Division of Measurement Standards, enforces regulations pertaining to weight

and size of cargo loads. They issue citations for overload violations and violations pertaining to non-compliance of load requirements. Division of Measurement Standards personnel operate the highway scale houses. Citations issued by Measurement Standards personnel are processed through the courts, not through the ATC quasi-judicial process.

INITIATIVE PETITION

ENTITLED "REDUCING GOVERNMENT REGULATION OF TRANSPORTATION."

PROPOSITION #83-02

This initiative would repeal statutes which establish the Alaska Transportation Commission and the statutes which empower the commission to regulate activities of air carriers and motor freight operators. The initiative requires that persons who carry passengers or freight for hire provide insurance or other adequate security to assure financial responsibility for their activities. The initiative restricts the power of municipalities to regulate persons who carry passengers or freight. It also directs the governor to seek repeal of federal statutes (the Jones Act) which require the use of United States vessels to ship goods between United States ports.

WARNING

"A PERSON WHO SIGNS A NAME OTHER THAN HIS OWN ON THIS PETITION, OR WHO KNOWINGLY SIGNS HIS NAME MORE THAN ONCE FOR THE SAME PROPOSITION AT ONE ELECTION, OR WHO SIGNS THE PETITION KNOWING HE OR SHE IS NOT A QUALIFIED VOTER, UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000 OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BOTH. (AS 15.45.100)"

(See next page for text of bill.)

AN INITIATIVE

For an Act entitled: "An Act terminating the Alaska Transportation Commission and repealing transportation laws administered by the commission; requiring persons who carry passengers or freight for hire to hold insurance or other security; and requiring the governor to lobby Congress for the repeal of the federal Jones Act."

BE IT ENACTED BY THE PEOPLE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF PURPOSE. The people of Alaska recognize that

(1) because of Alaska's great size and distance from markets, Alaskans must have access to efficient low-cost transportation in order for people and goods to move safely inside and outside the state;

(2) a little-known but powerful state regulatory agency, the Alaska Transportation Commission (ATC), creates motor and air carrier monopolies by legalized price fixing and tariffs, which artificially raises shipping rates and makes consumer goods more expensive for all Alaskans;

(3) the primary purpose of the ATC is to fix rates, not promote safety, and other government agencies can insure safety standards while allowing persons to contract freely for services;

(4) abolishing the ATC and its anti-competitive practices will subject air carriers and trucking companies to free market competition, thereby reducing freight rates, improving service, and saving Alaskan consumers millions of dollars each year;

(5) a federal law, known as the Jones Act, requires that ships bound for Alaska from other American ports must be built and registered in the United States and staffed with American crews, thereby granting such ships an unfair monopoly and protecting them from free market competition, which costs Alaskan consumers millions of dollars each year;

(6) the Jones Act should be repealed, and the governor should use all appropriate means to persuade Congress to do so.

* Sec. 2. AS 29.48 is amended by adding a new section to read:

Sec. 29.48.036. REGULATION OF TRANSPORTATION CARRIERS. Notwithstanding AS 29.48.035(a), a municipality may not regulate an activity regarding transportation of passengers or freight for hire if the regulation conflicts with the regulation of that activity by the Alaska Transportation Commission as the regulation existed on April 1, 1983 under former AS 02.05, AS 42.07, or AS 42.10.

* Sec. 3. AS 42.30 is amended by adding a new section to read:

ARTICLE 5. RESPONSIBILITIES OF MOTOR AND AIR CARRIERS.

Sec. 42.30.200. FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for hire intrastate shall procure and maintain security in an amount determined by the Department of Public Safety as necessary for the reasonable protection of the public against damages or injury caused by the person.

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize enforcement officers to enforce this section.

* Sec. 4. AS 44.19 is amended by adding a new section to article 1 to read:

Sec. 44.19.035. JONES ACT REPEAL. The governor shall use best efforts and all appropriate means to persuade the United States Congress to repeal 46 U.S.C. secs. 861, et seq., known as the Jones Act. Until that Act is repealed, the governor shall publish an annual report documenting the harmful effects of the Act on Alaska commerce, and progress made towards its repeal. The report shall be submitted to the legislature no later than its convening each year.

* Sec. 5. If any provision of this Act is held invalid, the remaining provisions of this Act are severable and remain in effect.

* Sec. 6. AS 02.05.; AS 28.10.411(b); AS 39.25.120(c)(7); AS 39.50.200(b)(30); AS 42.07; AS 42.10; and AS 44.66.010(a)(2) are repealed.

MEMORANDUM State of Alaska

TO: Mary Lou Miners
Division of Elections
Lieutenant Governor's Office

DATE: May 23, 1983

FILE NO: 366-593-83

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: Initiative Petition Applicaton concerning regulation of commerce

By: James L. Baldwin
Assistant Attorney General
Government Affairs-Juneau

We have reviewed the form of the proposed bill contained in a sponsor application to initiate a law to (1) repeal existing law which provides for the regulation of certain common carriers in the state, (2) enact provisions requiring adequate insurance coverage for common carriers, and (3) enact a law directing the governor to lobby Congress for repeal of the Jones Act.

We believe the proposed bill is generally in the proper form for the purposes of AS 15.45.040. We have reached this conclusion after carefully considering whether the proposed bill contains more than one subject. Specifically, the provision directing the governor to lobby for the repeal of the Jones Act is arguably a subject which is incongruous with other provisions of the bill repealing the regulatory powers of the Alaska Transporation Commission.

There are no Alaska decisions construing the meaning of the single subject requirement contained in AS 15.45.040(1). However, the Alaska Supreme Court has construed the single-subject requirement contained in Article II, Section 13, of the Alaska Constitution. That section provides: "[e]very bill shall be confined to one subject unless it is an appropriation bill or one codifying, revising, or rearranging existing laws."

In Gellert v. State, 522 P.2d 1120 (Alaska 1974), the court explained the application of the single-subject requirement contained in Art. II, Section 13 as follows:

> In determining whether a bill is confined to one subject, we agree with the statement: [a]ll that is necessary is that the act should embrace some one general subject; and by this is meant, merely,

> that all matters treated of should fall under some one general idea, be so connected with or related to each other logically or in popular understanding as to be parts of, or germane to, one general subject.

Id. at 1123 (citation omitted). The court has explained the nature and purpose of the single-subject requirement imposed by the Alaska Constitution as follows:

> These requirements are designed to prevent the inclusion of incongruous and unrelated matters in the same bill in order to get support for it which the several subjects might not separately command and to guard against inadvertance, stealth and fraud in legislation.

State v. A.L.I.V.E. Voluntary, 606 P.2d 769, 772 (Alaska 1980); quoting from Suber v. Alaska State Bond Commission, 414 P.2d 546 (Alaska 1966). It is reasonable to view the proposed bill as addressing the general subject relating to government regulation of commerce. There should be no concern with the possibility that the allegedly incongurous subject will slip by the notice of the voters. We have prepared an impartial summary which clearly explains the contents of the proposed bill.

We note that the proposed bill is not in the proper form specified in the 1982 Manual for Legislative Drafting published by the Legislative Affairs Agency. Attached is a revised version of the proposed bill which should be included in the initiative petition. Our revisions do not make substantive changes to the proposed bill. However, it should be noted that we believe there will be major interpretation problems encountered if the bill is enacted. These problems concern the lack of a savings provision which apply to pending proceedings before the ATC and the proper interpretation of the provisions to be added by Section 2.

Set out below is the official ballot title and summary required by AS 15.45.090:

Ballot Title:

Reducing Government Regulation of Transportation

Impartial Summary

This initiative would repeal statutes which establish the Alaska Transportation Commission and the statutes which

empower the commission to regulate the activities of air carriers and motor freight operators in the state. The initiative would establish a requirement that persons who carry passengers or freight within the state provide adequate security to assure financial responsibility for their activities. The initiative restricts the power of municipalities in the state to regulate persons who carry passengers or freight. The initiative directs the governor to seek repeal of federal statutes (the Jones Act) which require the use of United States vessels to ship goods between United States ports.

We hope this memorandum answers your questions and provides you with the material you need to proceed with the initiative process.

MEMORANDUM DECISION

I. Introduction.

The defendants (McAlpine) have decided to place an initiative proposition on the November 1984 general election ballot which will repeal statutes regulating motor and air carriers in Alaska, open the carrier business to any and all financially responsible persons, prohibit municipalities from regulating these activities, and require the governor to seek repeal of the federal statute (the Jones Act) which requires the use of United States vessels for shipping goods between United States ports. The initiative proposition is entitled, "Reducing Government Regulation of Transportation." The initiative is a project of the Alaska Libertarian Party for 1984. [illegible]

No. 1.

The plaintiffs (Yute Air),[1] all of which are regulatees under the state laws to be repealed and apparently not ready for free enterprise in 1984, seek to prevent the proposition from being on the ballot, either permanently on grounds of invalidity or at least until the first statewide election following the next convening and adjourning of a session of the Alaska Legislature. They raise the following issues:

> 1. The initiative violates the single-subject rule.
>
> 2. The constitution implicitly requires that the signatures in support of the initiative be verified before the legislature both convenes and adjourns in order for it to be submitted to the voters.

II. The Single-Subject Rule.[2]

Yute Air's argument here divides into two parts. The first is the traditional one: The initiative acts both on the deregulation of Alaska's intra-state air and motor carriers and also on the federally regulated, interstate sea carriers, that is, on two subjects. After the decision in State v. First Nat'l Bank of Anchorage, 660 P.2d 406 (Alaska 1982), it is difficult to sustain that argument. Suffice to say, that even if the court went too far in that case and were inclined - although there is no sign of it - to step back from that decision, the initiative here does not embrace two, unrelated subjects. Indeed, the

---

[1] Plaintiffs are named in reverse alphabetical order, with Yute Air Alaska, Inc., leading off and Alaska Airlines and the Alaska Trucking Association, Inc., closing.

[2] Article II, Section 13, of the Alaska Constitution requires that "[e]very bill shall be confined to one subject . . . ." The same restriction is enacted at AS 15.45.040 with respect to initiatives. Whether this limitation is within the legislature's power under Article XI is questionable. But Article XII, Section 11, makes the law making power equal, and the Article II restriction, therefore, applies to initiatives.

economic effects of these two sources of regulation over transportation of freight in and to Alaska may well be perceived by deregulators as one of this state's most serious problems. The two sources of regulation are, from that viewpoint, inextricably related, certainly far more integrated and related than boat harbors and flood control projects or than trooper facilities and new and improved prisons.

Nor should it matter that the repeal of the federal law and the repeal of the state laws do not interact or interrelate legally with one another. To the miner at Minto who wants to bring his supplies from Seattle, the interaction and interrelation is more than just self-evident - it is glaringly so. While one could address the existing laws in two or three bills, it is rational to address all of them together.

The second part of Yute Air's single-subject argument is more interesting. It argues that the provisions of the initiative which require the governor to seek the repeal of the Jones Act[3] are not law but rather a plebicite directing administrative activities, and therefore, not a proper subject for an initiative under the Alaska Constitution which limits the use of the initiative to the enactment of laws. Alaska Const., art. XI, § 1. It cites Seattle Building Construction Trades Council v. City of Seattle, 620 P.2d 82 (Wash. 1980), as an example of the case law in support of its point.

Seattle Building is one of a line of cases, all or almost all of which limit the use of municipal initiatives, in

---

[3] Section 4 of the Initiative reads:

Sec. 44.19.035. JONES ACT REPEAL. The governor shall use best efforts and all appropriate means to persuade the United States Congress to repeal 46 U.S.C. secs. 861, et seq., known as the Jones Act. Until that Act is repealed, the governor shall publish an annual report documenting the harmful effects of the Act on Alaska commerce, and progress made towards its repeal. The report shall be submitted to the legislature no later than

which the courts attempt to draw a line between laws and administrative acts. The cases usually involve municipalities because, unlike state governments in which the three great powers are separated, local governing bodies are generally vested with an admixture of both legislative and administrative powers. City councils, county commissioners, and borough assemblies not only enact laws but they also administer them to a very great extent and they also sit as boards of review, exercising quasi-judicial powers at times and making fundamental executive policy at other times. Where the city or county voters seek to exercise these latter kinds of powers through the initiative, so the theory goes, they exceed the law making power vested in them under initiative provisions.

A close reading of the cases finds many of them to be analytically defective. Laws frequently reverse prior administrative decisions and set new policies for administrators to follow. There is nothing legally wrong with that. Indeed, it is precisely policy which law is intended to set, and the executive is bound under the constitution to carry out that policy.. Alaska Const., art. III, § 16.

Nothing in the constitution of this state limits the legislature's power to enact laws establishing as this state's policy a change in existing federal law. Indeed, the Alaska Territorial Legislature, a creature of very limited power under federal law and control, by law established an Alaska Statehood Committee to do just that, that is, to make Alaska a state rather than a territory. Chapter 103, SLA 1949. And it is (was?) common knowledge that one of the most vexing drawbacks of territorial status perceived by statehood promoters was the very Jones Act which the legislation here would have the governor seek to repeal. It would certainly come as a surprise to the framers of the Alaska Constitution that they had somehow prohibited direct

legislation on that subject.

Analytically, laws may be enacted on any subject under the sun: They can command the tides to stand still for King Canute or the mountain to come to Mohammed. That they may or may not be effective is of no moment. It will hardly do to say that a law may not be enacted because it is silly - not at least at this late date. Only if one can point to some prohibition expressed or implied in the state or federal constitutions can it be said that some proposed law would violate the constitution and may not, therefore, be the subject of an initiative. Yute Air argues only that the provisions of the initiative relating to the Jones Act are not "law." That argument is simply not correct. Those provisions establish a public policy and they make it the chief executive's duty to carry that policy out. They are a solemn expression of legislative will, and that is what law is all about. Black's Law Dictionary 1074 (3rd ed. 1933). It is presumed that the chief magistrate will carry out that law, and this court will not entertain any argument to the contrary.

Yute Air also argues, however, that the state's law making power does not include the law maker's directing the executive (or the judiciary) with respect to the relationship between the State of Alaska and the United States. In other words, the legislature or the people may, by law, establish public policy on all subjects which are within their jurisdiction under the constitution. But when they step outside their jurisdiction - here to seek repeal of a federal law on maritime shipping - they have no power to make law on the subject and may not purport to use the law making power to proclaim public policy on the subject. Stated another way, the law makers may, within their jurisdiction, establish public policy which must be followed by the executive and the judiciary. But where, as here, the subject matter is outside their jurisdiction, the law making

power may not be invoked.

It follows under this view that the law makers may themselves lobby the Congress or send it resolutions but that in doing so they are not exercising the law making power. While the legislature's enacting a law on the subject could not be subjected to judicial restraint, the use of the initiative is subject to judicial oversight and restraint if it exceeds the bounds authorized by the constitution. Boucher v. Engstrom, 528 P.2d 456 (1974). Where, as here, so they theory goes, the initiative is used not as an exercise of the law making power but rather as a directive outside the jurisdiction of tne law makers, it should be enjoined.

The problem with this argument is that the legislature frequently enacts laws prescribing the conduct of officials or agencies of state government on matters over which the state has no legal jurisdiction. For example, the State Geographic Board is established by law in the Office of the Governor, AS 44.19.054, to - among other things - serve as state representatives on the United States Geographical Board and cooperate with that board to avoid conflicts in state and federal designations of geographical features in the state. Obviously, the state's law making power does not extend to those federal designations, but state officials can influence them. The Alaska International Development Commission in the Office of the Governor is to prepare a plan for joint development and use of the resources of the Upper Yukon River (in Canada) and cooperate with Canadian and United States agencies for resource development near the Alaska-Canada border. AS 44.19.064. The Alaska State Office in Tokyo promotes trade between Alaska and the Far East. AS 44.19.074. The Yukon-Taiya Commission studies, compiles and publishes information, and promotes development of the international Yukon-Taiya Hydroelectric project. AS 44.19.181.

The most apt example is the Steering Council for Alaska Lands. AS 38.95.100-104. The inter-branch council was established in 1977 to "develop a unified lobbying and informational effort" on Alaska lands legislation then being considered by Congress. Of course, the law assigned the counsel other functions - as does section 4 here - but its principal purpose was to lobby Congress on ANILCA.

Presumably, under section 4 of the proposed initiative, the governor would delegate to the personnel of the Alaska office in Washington, D.C. the additional function of persuading Congress to repeal the Jones Act and compile information and publish an annual report on the Act's effects and their progress (or lack thereof) in getting it repealed. It would not make section 4 any more of an exercise in making law if it provided for a commission or council to promote the repeal of the Jones Act and report annually on its efforts.

It seems to this court that section 4 does not usurp the executive's powers, is not the exercise of an executive or quasi-judicial function, and is not an exercise of power barred to the law makers by the constitution. Accordingly, it is valid.

III. 1984.

Yute Air argues that, even if the initiative survives their single-subject challenge, it may not be placed on the ballot in 1984. It reasons that, under Article XI, section 4, of the Alaska Constitution, the initiative is to be voted on at "the first statewide election held more than one hundred twenty days after adjournment of the legislative session following the filing [of the initiative]." This "filing," it argues, must be read consistently with the requirements of Article XI, section 3, of the constitution that the initiative petition must be signed by a prescribed number of "qualified voters" before "it may be filed

with the lieutenant governor." From this, it argues that the signatures must be verified, that is, the voter's qualifications ascertained, before the petition may be deemed to be "filed" for purposes of calculating the proper election at which the initiative should be submitted to the voters.

Yute Air buttresses its argument with the provisions of the Election Code which provide for verification within a prescribed period (sixty days), AS 15.45.150, provide the basis for determining impropriety with respect to subscribers, AS 15.45.150, provide for supplementary petitions to cure the improprieties, AS 15.45.170, provide for ballot preparation, AS 15.45.180, and provide for the initiative to go on the ballot at the first statewide election held 120 days after the adjournment of the legislature which convened after the petition and any supplementary petition were "filed." AS 15.45.190.

It argues that the meaning of these interlocking provisions cannot be doubted, that the statutory provisions are clearly not in conflict with the constitution but rather contemplated by it, Alaska Const., Art. XI, § 6, and Vol. 4 Minutes Alaska Const. Conv. 2965-2967 (1955), and that they clearly illustrate how for purposes of determining when to place an initiative on the ballot, verification is a prerequisite for a petition's being "properly filed." AS 15.45.180.

McAlpine argues that there is a longstanding contemporaneous construction of these constitutional and statutory provisions which is contrary to the carriers' interpretation. However, the carriers' reply to that argument must prevail. There simply has been no consistent construction of the constitution or the statute on the issue raised here; indeed, the precise issue has never been raised before.

The question here is close. The logic of the decision in Kays v. McCall, 418 P.2d 511, 514 (Ore. 1966), is highly

persuasive and makes excellent sense, and those possessing the power to make law may well wish to consider it. But this court's role is not to amend the constitution or the statute but rather to interpret them, and it seems clear that neither contemplates the result sought by Yute Air.

Under the Election Code, McAlpine was to place the initiative on the ballot "[i]f it is properly filed." AS 15-.45.180. He had sixty days after it was filed in which to make that determination. AS 15.45.150. The question goes on the ballot at the first statewide election held after

> (1) the petition and any supplementary petition have been filed, (2) a legislative session has convened or adjourned, and (3) a period of 120 days has expired since the adjournment of the legislative session.

AS 15.45.190. It seems obvious that the framers contemplated the need to verify signatures. Vol. 4, Minutes Alaska Const. Conv. 2966 (1955). But nothing in the constitution says or implies that the verification process tolls the time in which the initiative is to be considered by the legislature and proceeds onto the ballot (or is voided by legislative enactment of substantially the same measure).

Similarly, the statutory provisions neither express nor imply any tolling of the time. The legislature used the terms "file," "filed," "properly or improperly filed," "properly filed," and "filing" at various places throughout sections 140 through 190 of chapter 45, title 15, relating to the initiative petition. Each of the differing uses denoted a particular meaning appropriate to the use. The unmodified term "filed" is used in section 190 (placing proposition on ballot). Had the legislature contemplated the meaning attributed to the term by Yute Air, it is more likely than not that a more precise term would have been used by it. Indeed, it is most unlikely, given the precision in the legislature's use of these terms, that - had

Yute Air's meaning been intended - the unmodified term would have been used. It is much more likely that the legislature would have added appropriate language to section 190, for example, the underlined words in the following: "(1) the petition and any supplementary petition have been reviewed and determined to have been properly filed."

The Alaska Constitution and the Election Code, prior to the amendments made to some of their provisions, were unusually well drafted, each with its own interlocking parts and with terms carefully chosen and consistently used to denote specific things. Their respective authors generally followed the first rule of statutory drafting: Say what you mean and mean what you say. The constitution and the code do not say (or fairly imply) what Yute Air says they mean, and therein lies the fatal flaw in Yute Air's argument.

Yute Air's argument is, however, more subtle: It may be ready to assume that neither the framers nor the legislature really contemplated the necessary effect of requiring verification. Thus, it is immaterial that the language of article XI and of title 15, chapter 45, neither says nor fairly implies that the subscribing signatures must be verified as those of qualified voters before the initiative can be deemed to have been properly filed. The constitution clearly requires that an initiative petition must be signed by the specified number of qualified voters before it may be filed. It also requires that, before the initiative may be submitted to the voters, it must be filed, then a legislative session must be convened and adjourned, and then one hundred twenty days must pass. Thus, to give full effect to the provision requiring an initiative to lie before the legislature for a complete session after it is filed, its verification must perforce occur before the session convenes.

///

The argument overlooks the obvious. Both logically and as a matter of practical experience, the legislature does not need an initiative petition to be verified before it considers the same subject. It suffices for all practical purposes that a facially valid initiative be filed. (This is not to say that the legislature could not require verification in advance for the sake of greater certainty.)

On January 16, 1974, two related initiative petitions were filed with the lieutenant governor, one on conflict of interest, the other on campaign disclosure. The former was certified on March 1, 1974, and the latter on March 20, 1974. The legislature, which adjourned on April 26, 1974, considered both subjects, did not enact legislation on conflict of interest but enacted legislation, chapter 76, SLA 1974, on campaign disclosures. It was held to be substantially the same, thereby voiding that initiative. Warren v. Boucher, 543 P.2d 731 (Alaska 1975). The conflict of interest initiative was adopted by the voters on August 27, 1974. The 1975 legislature convened on January 20 and passed a bill to amend the latter initiative as one of its first orders of business. Chapter 2, SLA 1975. It became effective on February 8, 1975. Warren v. Thomas, 568 P.2d 400 (Alaska 1977).

The two Warren cases establish the proposition that the provisions of section 6 of article XI on amendment of adopted initiatives and on voiding pending initiatives vest the legislature with broad powers to protect the state against the untoward effects of initiatives. Warren v. Thomas, id., at 402, n. 7. More importantly, they illustrate more convincingly than any a fortiori argument that verification of an initiative petition before the legislature convenes is not a prerequisite for the legislature's invoking those powers.

While the court in no way disagrees with the importance of the safeguard afforded by requiring the initiative to lie

before a complete session of the legislature, it concludes on the basis of the language of the constitution and the election code and on the basis of experience that actual filing of a facially valid initiative suffices to invoke that safeguard. Certainly, the legislature is at least as capable as this or any court of apprehending and appraising the priority which should be assigned to the many matters brought before it. Had it considered this matter to be important enough it could have stayed in session to deal with it. Here, the legislature chose not to act. It would be idle to speculate why. Suffice to say that the legislature may call itself, or be called, into special session to act on the matter, or if the initiative is adopted by the voters, act to amend it at its next regular session.

Accordingly, summary judgment is granted for the defendants.

DATED this 2d day of July, 1984.

BALLOT MEASURE NO. 3

Initiative No. 83-02
REDUCING GOVERNMENT REGULATION OF TRANSPORTATION

SUMMARY
(As it will appear on the November 6, 1984 General Election Ballot)

This initiative would repeal statutes which establish the Alaska Transportation Commission and the statutes which empower the commission to regulate activities of air carriers and motor freight operators. The initiative requires that persons who carry passengers or freight for hire provide insurance or other adequate security to assure financial responsibility for their activities. The initiative restricts the power of municipalities to regulate persons who carry passengers or freight. It also directs the governor to seek repeal of federal statutes (the Jones Act) which require the use of United States vessels to ship goods between United States ports.

BALLOT FORM:

A vote "FOR" adopts the initiative.
A vote "AGAINST" rejects the initiative.

FOR
AGAINST

LEGISLATIVE AFFAIRS AGENCY SUMMARY
(As required by law)

This initiative, if approved, would eliminate the Alaska Transportation Commission and would substantially reduce the amount of state regulation of the transportation industry. This initiative would add a new section to the Alaska Statutes that would limit the power of municipalities to regulate the transportation of passengers and freight for hire. The new statute would require that regulation of such activity by a municipality not conflict with regulations in existence on April 1, 1983, that were adopted by the Alaska Transportation Commission under the Alaska Air Commerce Act of 1960 (AS 02.05), the Alaska Transportation Commission Act (AS 42.07), or the Alaska Motor Freight Carrier Act (AS 42.10). This initiative also would add a new section to the Alaska Statutes that would require a person transporting passengers or freight for hire within the state to obtain insurance, post a bond, or file evidence of other security approved by the Department of Public Safety for the protection of the public against damages or injury caused by the person. This initiative also would add a new section to the Alaska Statutes that would direct the governor to "use best efforts and all appropriate means" to secure the repeal by the Congress of the Merchant Marine Act of 1920 (46 U.S.C. secs. 861-889), which includes the Jones Act (46 U.S.C. sec. 883). The new section also would require the governor, pending the repeal of the Merchant Marine Act, to submit to the legislature an annual report on "the harmful effects of the Act on Alaska commerce, and progress made towards its repeal".

NEUTRAL SUMMARY -- BALLOT MEASURE NO. 3

(Initiative #83-02)

Reducing Government Regulation of Transportation:

This initiative, if approved, would eliminate the Alaska Transportation Commission and would substantially reduce the amount of state regulation of the transportation industry. This initiative would add a new section to the Alaska statutes that would limit the power of municipalities to regulate the transportation of passengers and freight for hire. The new statute would require that regulation of such activity by a municipality not conflict with regulations in existence on April 1, 1983, that were adopted by the Alaska Transportation Commission under the Alaska Air Commerce Act of 1960 (AS 02.05), the Alaska Transportation Commission Act (AS 42.07), or the Alaska Motor Freight Carrier Act (AS 42.10). This initiative also would add a new section to the Alaska Statutes that would require a person transporting passengers or freight for hire within the state to obtain insurance, post a bond, or file evidence of other security approved by the Department of Public Safety for the protection of the public against damages or injury caused by the person. This initiative also would add a new section to the Alaska Statutes that would direct the governor to "use best efforts and all appropriate means" to secure the repeal by the Congress of the Merchant Marine Act of 1920 (46 U.S.C. secs. 861 - 889), which includes the Jones Act (46 U.S.C. sec. 883). The new section also would require the governor, pending the repeal of the Merchant Marine Act, to submit to the legislature an annual report on "the harmful effects of the Act on Alaska commerce, and progress made towards its repeal". This initiative would repeal the following statutes:

AS 02.05, the Alaska Air Commerce Act of 1960;

AS 28.10.411(b), which requires that certain motor carrier and bus transportation fees be paid at the same time the registration fee is paid;

ALASKA RAILROAD TRANSFER

FAIRBANKS NEWS-MINER
July 12, 1984

Feds, state pass papers for railroad

By PAUL JENKINS
Associated Press Writer

ANCHORAGE—Gov. Bill Sheffield and federal rail officials exchanged historic documents in a brief ceremony today, clearing the tracks for final state purchase of the Alaska Railroad for $22.3 million.

"It doesn't look like you're prepared to give us the keys, so you won't find a check in there either," Sheffield said as he exchanged certification documents with Federal Railroad Administrator John Riley.

"We have made history today," Riley said.

Alaska's senators, state lawmakers, federal officials and a crowd of about 200 were on hand to watch the exchange.

The letters signal one of the final steps in the transfer of the 526-mile line, its rolling stock and facilities to the state of Alaska. In the letters, Alaska agreed to purchase the railroad for the $22.3 million price set by the U.S. Railway Association, made commitments to continue rail operations and assumed existing railroad obligations.

Officials have agreed to set a date within the next three months for the transfer of the railroad, which runs from Seward to Fairbanks, and is the only federally owned line in the nation. The switch in ownership is expected sometime in January.

In brief remarks from the makeshift stage in front of an Alaska Railroad car, Sen. Ted Stevens recounted the fight to acquire the line from the federal government, and said, "We need this railroad.

"I believe future Alaskans will recognize this act of agreeing to purchase the railroad from the federal government as one of the most important actions ever taken by our state."

Congress approved construction of the railroad in 1914 to connect the southern coast of Alaska with interior coal fields and agricultural lands. It took eight years and $52 million to build the line that now winds through a spectatular route of glacier-fed rivers, deep valleys and snow-covered mountains.

Sheffield last week penned his name on controversial legislation detailing how the 61-year-old railroad will be managed after its purchase.

Under state control, the line will be under the Department of Commerce and Economic Development. A seven-member, quasi-public Alaska Railraod Corp. board is to manage the operation.

The officials present for Thursday's cermonies were scheduled to ride a train to Portage and return after the ceremony.

Transfer complete, real work begins on railroad

by E.W. Piper
Times Writer

Gov. Bill Sheffield settled into the soft, pastel-colored chair on the upper level of the elegantly refurbished, 1952-vintage rail car and sighed. "It's good to finally clear something off my desk," he said with a smile.

Just minutes before, on a cool and sunny Thursday morning, Alaska's elected leaders and the federal managers of the Alaska Railroad had driven the bureaucratic spike. After 61 years of federal ownership, the Alaska Railroad was being transferred to the State of Alaska, whose development has been dominated by the 470-mile line for more than six decades.

All hailed the transfer as a momentous event.

"One of the most important acts ever taken by this state," said Sen. Ted Stevens, who muscled the bill authorizing the transfer onto the Senate floor at the last minute before Congress adjourned in 1983.

"This removes one of the last vestiges of Alaska's territorial status," said John Riley, head of the Federal Railroad Administration.

"The Alaska Railroad should be in state hands by the first of the year," said Sheffield, anticipating the official end of the transition period.

And then they all boarded the train for a ride to Portage, where they feasted on elegant comestibles and took a break from several years' worth of negotiating and arguing.

But that is not the end of this story. Now that Alaskans own this railroad, what are we going to do with it?

In a state without many roads, there will always be freight to haul from Seward to Fairbanks. In a state with such natural beauty, there will always be tourists to ride north to see Mount McKinley. And in a state with such mineral potential, there will always be an urge to get those minerals to market.

Minerals and the railroad were linked in nearly every conversation with state and federal officials on the train from Anchorage to Portage after Thursday's ceremony.

The legislation pertaining to the trans-

Sheffield plans easy pace for rail rehabilitation

Continued from page A-1

fer gives the state the right to condemn land for rail expansion. It also gives the state preferential and expedited consideration in Washington, D.C., if Alaska needs permits to cross federal land.

"Undoubtedly there's some strong interest in expansion," said Dave Walsh, an Anchorage assemblyman who worked closely with federal officials in Washington during negotiations last year. "But expansion does not come quickly or cheaply."

And these days, the minerals markets are not booming. Expenditures for mineral development in the state have dropped precipitously in the past two years. According to the state Department of Natural Resources, the $27.8 million spent for mineral development this year is a full 50 percent below 1981 levels.

World markets for base metals and many other minerals are stagnant, and the state officials interviewed Thursday said they would not favor expanding the railroad unless the project could pay for itself.

That could mean state involvement in mineral projects that need a transportation system, in the same ways the state may help with the financing of the port needed at Cominco Alaska's proposed Red Dog lead-zinc mine in the northwest Arctic.

Building a rail spur and letting the mine operator pay back the cost of construction is one way to diversify the economy and help keep the railroad profitable. "We'll front-end a project because obviously we want the railroad to haul whatever it can haul," said Richard Lyon, the commissioner of Commerce and Economic Development.

But, he added, the state will participate "only where it makes sense" economically and socially.

Major expansion — expansion that would cost, say, $2 billion — would also make it difficult to make what Lyon said is the ultimate transfer: from the public sector to the private sector. A major expansion may be a major asset, but buying it would require more than major financing.

"If I were going to get into the railroad business, I'd rather get into it early than late," said Lyon.

Private ownership — if it ever happens — is more than a decade away, so major expansion in that time is not likely.

The first order of business is an orderly transition from federal to state control. Next comes the maintenance and upgrading of track and facilities. Estimates run anywhere from $15 million to $60 million over the next few years.

"I want to run the railroad for a while," said Sheffield, settling back in the plush, privately owned observation car on the Portage train. "We'll move rather slowly and try to make it run as best as possible."

Sheffield — or any other governor, for that matter — will not be running the railroad alone. The governor will appoint a seven-member board to oversee the operation (two cabinet members, two professional railroad managers, a labor union representative and two members from outside government); Sheffield pushed hard to keep the railroad administration under the executive branch.

"Ultimately, whatever goes wrong with the railroad will be the governor's fault," said Sheffield. "If it's my responsibility, then I want to have some input."

But Sheffield admitted that it is impossible to protect such a board from political pressures. Changing administrations and changing political climates could jeopardize the long-range goals of a business — which is, after all, what the state's railroad will be.

Dave Walsh thinks some political insulation can be provided by sound planning and sound precedents set by the very first railroad board. If that board makes a set of long-term goals and articulates them well to the public, politicians will be wary of using the railroad as leverage in bargaining with the administration.

If things are done right the first time around, the public will feel it has a stake in achieving the goals set by the first board.

"And anyone who would tamper with that," he added, "would be doing so at great risk to himself."

Sheffield recruits RR board

By DEAN FOSDICK
The Associated Press

The Sheffield administration has begun recruiting people for the seven-member Alaska Railroad board of directors so the panel can help get a new management team aboard when the state takes over the rail line — probably before the end of the year.

Gov. Bill Sheffield told members of his cabinet Tuesday he was hoping to make the appointments within the next 30 to 60 days, so they should contact him quickly if they had any names to submit.

"We hope to take over the railroad by late November or early December," Sheffield said.

The state is spending $22.3 million to buy the 525-mile line from the federal government.

The railroad extends from Fairbanks, in the Interior, to Whittier, on the coast, and has been owned and operated by the federal government since 1924.

Carol Derfner, a member of the governor's staff who helps select people for the state's 130 boards and commissions, said "the word has gone out" about the railroad board.

"We haven't begun the process of selection yet, but we're looking at about 20 to 25 names," Derfner said. "We hope to get it done quickly. One of their first tasks will be to help put together an altogether new corporate team to run the railroad."

Two of Sheffield's cabinet members will sit on the board — the commissioners of the departments of Commerce and Economic Development and Transportation and Public Facilities.

The rest will be public members — but there are some strings attached, Derfner said.

"The Legislature specified that one member should be from one of the seven (labor) bargaining units attached to the railroad," she said. "Another was to be someone with 10 years' experience in railroad management. We may combine that seat with a former chief executive officer of a railroad. And we'll probably look outside the state for that.

"That would leave three unencumbered seats for the governor," she said. "But they must reside in the judicial districts served by the railroad.

Moss wants to investigate operating changes in RR

By DEAN FOSDICK
The Associated Press

The chairman of the Senate Transportation Committee said Thursday he intends to investigate allegations that operating changes are being made to the Alaska Railroad that weren't a part of the state's deal to buy it from the federal government.

Sen. Pappy Moss, R-Delta Junction, made the comments after meeting more than an hour with Dick Knapp, commissioner of the Department of Transportation and Public Facilities.

Moss, defeated in the Aug. 28 primary by Jack Coghill, a Nenana Republican, said he has no political axes to grind in looking into the situation.

"This is not for show," Moss said of his call for a public hearing. "I'm particularly concerned about moves by the railroad's current managers to contract out work on locomotive maintenance in Fairbanks and freight handling in Anchorage.

"I intend to call a meeting of the committee on Oct. 2 in Anchorage to put under a fishbowl what's been done behind closed doors," he said. "This is something we may have to live with after we take over the railroad. I don't think we have enough input on what's being done now."

Rail Arnie Polanchek, assistant general manager of the Alaska Railroad, denied that any major changes were in the works. And he said no moves would be made without first consulting with labor leaders and state officials.

"We're all in this together," Polanchek said, referring to the various groups who have been working to shift the operation from federal to state control. "We're careful in what we do now because we know it's a sensitive time."

Polanchek, who indicated Moss had contacted him about the allegations, said any changes in the way the railroad handles its day-to-day operations would be minor and are merely in the talking stages.

"Nothing has been done yet," Polanchek said. "We're just discussing ways to improve our revenue picture.

"There are several unprofitable things the railroad has been doing and we're thinking about changing," he said. "It's anything any normal business would do — review its operating procedures."

Knapp, meanwhile, said he "has no disagreement" with Moss about a public hearing.

"Apparently, the railroad is in a management improvement mode," Knapp said. But he added he "didn't find a lot of fault" with what its current managers are doing.

"As a result of this ... we'll be in closer touch, not in terms of dictating policy but basically to insure that, to the maximum extent practicable, we end up getting what we bargained for."

The Sheffield administration has begun recruiting people for the seven-member Alaska Railroad board of directors so the panel can help get a new management team aboard when the state takes over the rail line — probably before the end of the year.

The state is spending $22.3 million to buy the 525-mile line from the federal government.

The railroad extends from Fairbanks, in the interior, to Seward, on the coast, and has been owned and operated by the federal government since 1924.

TRUCKING REGULATIONS

ORDER AMENDING REGULATIONS OF THE
DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

The attached 3 pages of regulations, dealing with the operation of wheeled vehicles, are hereby adopted and certified to be correct copies of the regulations which the Department of Transportation and Public Facilities adopts, amends, or repeals under authority vested by AS 19.05.020, 19.05.040, 19.10.060 and after compliance with the Administrative Procedure Act (AS 44.62), specifically including notice under AS 44.62.190 and 44.62.200 and opportunity for public comment under AS 44.62.210.

This order takes effect on the 30th day after it has been filed by the lieutenant governor as provided in AS 44.62.180.

DATE: June 20, 1984
Juneau, Alaska

Richard J. Knapp
Commissioner, Department of
Transportation and Public
Facilities

FILING CERTIFICATION

I, Stephen McAlpine, Lieutenant Governor for the State of Alaska, certify that on August 2, 1984, at 3:15 p.m., I filed the attached regulations according to the provisions of AS 44.62.040 - 44.62.120.

Lieutenant Governor

Effective September 1, 1984.
Register 92, October 1984.

VC

CHAPTER 25

OPERATIONS, WHEELED VEHICLES

Section

10. Prohibited Vehicles and Loads
20. Width of Vehicles and Loads
30. Height and Length of Vehicles and Loads
35. Reasonable Access
40. Confinement of Loads
50. Trailers and Towed Vehicles
60. Allowable Gross Weights
70. (Repealed)
80. (Repealed)
90. (Repealed)
100. Road Closures and Restrictions
105. Specially Designated Highways
110. Definitions

17 AAC 25.010(a) is amended to read:

(a) No person may drive or move a vehicle, or a vehicle with a load, ~~upon any highway~~ on a highway if the vehicle or the vehicle with a load exceeds ~~in excess of~~ the size or weight limitations stated in ~~this chapter on any highway~~ AAC 25. No owner or lessee may cause or permit a vehicle, or vehicle with a load, ~~which~~ exceeds the size or weight limitations stated in ~~this chapter~~ 17 AAC 25 to be driven or moved on any highway. (Eff. 6/25/69, Register 30; am 9/3/72, Register 43; am 3/22/81, Register 77; am 11/16/83, Register 88; am / / , Register)

Authority: AS 19.05.020
AS 19.10.060

17 AAC 25.020(a) is amended to read:

17 AAC 25.020. WIDTH OF VEHICLES. (a) The total outside width of any vehicle or vehicle with a load may not exceed 102 inches. However, safety devices and load binders may extend three inches beyond the 102 inch limit on either side if they are situated more than four feet above the roadway. Load binders must be located on the right-hand side of the vehicle when possible. (Eff. 6/25/69, Register 30; am 9/3/72, Register 43; am 3/22/81, Register 77; am 6/19/81, Register 78; am / /, Register)

Authority: AS 19.05.020
AS 19.10.060

17 AAC 25.030 is amended ~~(a), (b), (c), (d), and (e) are amended and (f), (g), and (h) are added~~ to read:

17 AAC 25.030 HEIGHT AND LENGTH OF VEHICLES AND LOADS. (a) No vehicle, including load, may exceed a height of 13 feet 6 inches.

(b) No single vehicle, including load, may exceed a length of 40 feet including front and rear bumpers, except as provided in (c) and (f) of this section.

(c) Except on the specially designated highways listed in 17 AAC 25.105, no semitrailer may exceed an overall length of 45 feet, and no combination of truck tractor and semitrailer, including load, may exceed a length of 70 feet, including front and rear bumpers.

(d) Except on the specially designated highways listed in 17 AAC 25.105, no combination of truck and trailer or truck tractor and semitrailer and trailer, including load, may have an overall length in excess of 75 feet, including front and rear bumpers.

(e) Subject to the provisions of this section limiting the length of vehicles and loads, the load on any vehicle or combination of vehicles may not extend more than three feet beyond the front bumper or more than four feet beyond the rear of the bed or body of the vehicle or trailer.

(f) On the specially designated highways listed in 17 AAC 25.105, no semitrailer in a truck tractor-semitrailer combination may exceed a length of 48 feet.

(g) On the specially designated highways listed in 17 AAC 25.105, no semitrailer or trailer in a truck tractor-semitrailer-trailer combination may exceed a length of 48 feet. Measurement from the front of the of the first semitrailer to the rear of the second semitrailer or trailer shall not exceed 90 feet. Overall length is not restricted.

(h) Any combination of three or more cargo carrying units is prohibited. For purposes of this subsection, "cargo carrying unit" means truck, semitrailer, or trailer. (Eff. 6/25/69, Register 30; am 9/3/72, Register 43; am 11/16/83, Register 88; am / / , Register)

Authority: AS 19.05.020
AS 19.05.040
AS 19.10.060

17 AAC 25 is amended by adding a new section to read:

17 AAC 25.035. REASONABLE ACCESS. Vehicles operating under the provisions of 17 AAC 25.030(f) and (g) may move to or from the specially designated highways listed in 17 AAC 25.105 to reach or return from terminals and facilities for food, fuel, or rest. When moving to or from the specially designated highways, vehicles shall use the most direct interconnecting truck route whenever possible. Vehicles moving to or from the specially designated highways under this section shall not move further than 25 miles from these highways. All movement within organized municipalities and boroughs is subject to local ordinances. (Eff. / / , Register)

Authority: AS 19.05.020
AS 19.05.040
AS 19.10.060

17 AAC 25 is amended by adding a new section to read:

17 AAC 25.105. SPECIALLY DESIGNATED HIGHWAYS. For purposes of ~~this chapter~~ 17 AAC 25, specially designated highways are

(1) Alaska Route 1 (AK-1) from Anchorage (Potter Weigh Station) to Palmer (Palmer-Wasilla Highway Junction).

(2) Alaska Route 2 (AK-2) from Fairbanks (Gaffney Road Junction) to Delta Junction (MP 1412).

(3) Alaska Route 3 (AK-3) from its junction with AK-1 to Fairbanks (Gaffney Road Junction). (Eff. / / , Register)

Authority: AS 19.05.020
AS 19.10.060

17 AAC 25.110 (5), (11), (16), and (17) are amended and (18) is added to read:

(5) "highway" ~~means and~~ includes a highway, road, street, bridge, tunnel, and right-of-way;

(11) "vehicle" means every wheeled device capable of transporting persons or property on a highway;

(16) "truck tractor" means a self-propelled motor vehicle designed and used primarily for drawing a semitrailer or semitrailer and trailer;

(17) "safety devices" means equipment designed to

(A) enhance a driver's view to the front, rear, and side of a vehicle;

(B) enhance a driver's access to a vehicle and load; or

(C) provide protection to other vehicles,

and includes rear view mirrors, rubber fenders, mud flaps, rock guards, antispray devices, tires (due to expansion), clearance lights, rub rails, binder chains, pin pockets, door handles, turning signal brackets, steps, bumpers, and backup lights, and tire chain hangers mounted on headache racks; and

(18) "terminal" means a recognized trucking place of business where goods are loaded or unloaded, or services are obtained. (Eff. 6/25/69, Register 30; am 9/3/72, Register 43; am 6/19/81, Register 78; am 11/16/83, Register 88; am / / , Register)

CHAPTER 25.
OPERATIONS, WHEELED VEHICLES

Section
10. Prohibited vehicles and loads
20. Width of vehicles
30. Height and length of vehicles and loads
40. Confinement of loads
50. Trailers and towed vehicles
60. Allowable gross weights
70. (Repealed)
80. (Repealed)
90. (Repealed)
100. Road closures and restrictions
110. Definitions

17 AAC 25.010. PROHIBITED VEHICLES AND LOADS. (a) No person may drive or move, nor may an owner or lessee cause or knowingly permit to be driven or moved on a highway, a vehicle or vehicles of a size or weight or having a load exceeding the limitations stated in this chapter.

(b) The provisions of this chapter governing size, weight, and load do not apply to a vehicle or vehicles with a load operated under the terms of a permit issued, under AS 44.33.020(25). (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43; am 3/22/81, Reg. 77; am 11/16/83, Reg. 88)

Authority: AS 19.05.020
AS 19.10.060

17 AAC 25.020. WIDTH OF VEHICLES. (a) The total outside width of any vehicle or load on a vehicle may not exceed 96 inches, except by permit as provided in AS 28.05.011(8). Balloon or duplex tires on trucks may extend three inches beyond the limit on either side. Vehicles used in public transportation may have a total outside width, including load, of 102 inches when operating on roadways with a lane width of 12 feet. Safety devices and load binders may extend three inches beyond the limit on either side if they are situated more than four feet above the roadway. Load binders must be located on the right-hand side of the vehicle if possible.

(b) No passenger vehicle may be operated on a highway with a load which extends beyond the line of the fenders on the left side, nor which extends more than six inches beyond the line of the fenders on the right side. (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43; am 3/22/81, Reg. 77; am 6/19/81, Reg. 78)

Authority: AS 19.05.020
AS 19.10.060

17 AAC 25.030. HEIGHT AND LENGTH OF VEHICLES AND LOADS. (a) No vehicle, including any load thereon, shall exceed a height of 13 feet 6 inches.

(b) No single vehicle, including any load thereon, may exceed a length of 40 feet inclusive of front and rear bumpers, except as provided in (c) of this section.

(c) No semitrailer may exceed an overall length of 45 feet. No combination of truck-tractor and semitrailer, including any load, may exceed a length of 70 feet, including front and rear bumpers.

(d) No combination of truck-tractor and trailer or trailers, or other combination of vehicles, including any load, may have an overall length in excess of 75 feet, including front and rear bumpers.

(e) Subject to the foregoing provisions of this chapter limiting the length of vehicles and loads, the load on any vehicle or combination of vehicles may not extend more than three feet beyond the front bumper or more than four feet beyond the rear of the bed or body of the vehicle or trailer. (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43; am 11/16/83, Reg. 88)

Authority: AS 19.05.020
AS 19.05.040(5),(11)
AS 19.10.060(1)

17 AAC 25.040. CONFINEMENT OF LOADS. (a) No vehicle shall be driven or moved on any highway unless it is so constructed or loaded as to prevent any of the load from dropping, shifting, leaking, or escaping, except that sand may be dropped for the purpose of securing traction, and water or other substance may be sprinkled on a roadway in cleaning or maintaining it.

(b) No person may operate on any highway any vehicle with a load unless the load and any covering on it is securely fastened so as to prevent the covering or load from coming loose, detached or in any manner a hazard to other

users of the highway. (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43)

Authority: AS 19.05.020
AS 19.10.060
AS 28.05.020

17 AAC 25.050. TRAILERS AND TOWED VEHICLES. When one vehicle is towing another, the drawbar or other connections shall be of such strength, design and configuration to control the towed vehicle. (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43)

Authority: AS 19.05.020
AS 19.10.060
AS 28.05.020

17 AAC 25.060. ALLOWABLE GROSS WEIGHTS. The gross weight of any vehicle or combination of vehicles may not exceed any of the limits provided in this section. The most restrictive limitation of the following shall determine the maximum allowable weight of every vehicle or vehicle combination:

(1) The maximum gross vehicle weight may not exceed that weight as determined from the following formula:

$$W = 500 \left[\frac{LN}{N-1} + 12N + 36 \right]$$

where

W = The maximum gross vehicle weight to the nearest 500 pounds

L = The distance in feet between extreme axles, and

N = The number of axles.

(2) The weight on axles may not exceed and the distance between axles may not be less than the following:

	Weight	Distance
Single Axles	20,000 pounds	10' minimum spacing*
2-Axle Tandem	34,000 pounds	3'6" minimum spacing
3-Axle Tandem	42,000 pounds	3'6" minimum spacing
4-Axle Tandem Group	50,000 pounds	3'6" minimum spacing

*Any axle spaced less than 10 feet from any other axle is considered as part of a tandem group.

Any axle which can be elevated from the roadway, thus transferring its portion of the vehicle weight to the other axles, will not be considered as a load-carrying axle unless the vehicle is equipped with an approved tell-tale device. The tell-tale device shall indicate that the lift axle is in full load-carrying position and shall be clearly visible from the left side of the vehicle under normal operating conditions. Vehicles which were on order or manufactured prior to the effective date of this regulation are exempt from the requirements of this subsection until one year following the effective date.

(3) The weight on any tire shall not exceed 500 pounds per inch of tire width, on such axles, based on the tire manufacturer's rating of tire width. (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43; am 9/3/74, Reg. 51)

Authority: AS 19.10.060
AS 28.05.020

Editor's Note: Beginning with Register 51 (October 1974), the formula in paragraph (1) of this section was erroneously printed. It has been corrected as of Register 66 (July 1978).

17 AAC 25.070. ENFORCEMENT. Repealed 11/16/83.

17 AAC 25.080. PERMITS FOR EXCESS SIZE AND WEIGHT. Repealed 3/22/81.

17 AAC 25.090. REQUIREMENTS FOR PERMITS. Repealed 11/16/83.

17 AAC 25.100. ROAD CLOSURES AND RESTRICTIONS. (a) The Department of Transportation and Public Facilities may prohibit the operation of vehicles upon any highway or may impose restrictions on any aspect of vehicle operation on any highway whenever the highway, in the judgment of the commissioner, may be seriously damaged or destroyed by such operation or whenever it is deemed necessary by the commissioner in the interests of safety to the traveling public. The restrictions shall be effective after due notice has been given to the public except in an emergency requiring immediate action.

(b) Whenever weight restrictions imposed by the commissioner or his representative are stated as a percentage of legal allowable weights, the percentage shall be applied to the maximum axle loading of 17 AAC 25.060(2).

(1) Permits may not be issued allowing overweight vehicles to travel on weight-restricted highways during the period when weight restrictions are imposed.

(2) Passenger vehicles are exempt from the provision of (c)(1) of this section and may be issued permits. (Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43; am 9/3/74, Reg. 51)

Authority: AS 19.05.020 AS 19.10.100
AS 19.05.040 AS 28.05.020

Editor's Note: As of Register 77, the reference to the Department of Highways has been corrected to refer to the Department of Transportation and Public Facilities.

17 AAC 25.110. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "axle" means the common axis of rotation of two or more wheels, whether power driven or freely rotating, attached to the vehicle or trailer for the purpose of carrying a portion of the vehicle or trailer weight;

(2) repealed 11/16/83;

(3) "gross weight" means the total weight of a vehicle including the load and any accumulated snow, ice, or mud;

(4) "height" means the total vertical dimension of any vehicle above the roadway surface, including any load and load-holding device thereon;

(5) "highway" includes a highway, road, street, bridge, tunnel, drainage structure and other similar or related structure or facility, and right-of-way;

(6) "semi-trailer" means a vehicle without motive power designed for carrying persons or property and for being drawn by a motor vehicle and so constructed that some part of its weight and the weight of its load rests on or is carried by another vehicle;

(7) "single axle weight" means the total weight transmitted to the roadway by the wheels of a single axle;

(8) "tandem axle" means an assembly of two

or more axles which are attached to the vehicle by a connecting mechanism designed to distribute the vehicle weight evenly to all axles of the tandem group;

(9) "tandem axle weight" means the total weight transmitted to the roadway by a tandem axle;

(10) "trailer" means a towed vehicle with one or more axles, one of which may be a steering axle, configured so that no significant portion of its total weight rests upon the towing vehicle;

(11) "vehicle" means every device capable of being moved upon a public highway and in, upon, or by which a person or property is or may be transported or drawn upon a public highway;

(12) "load" means anything that is carried on or in a vehicle but which is not permanently attached to it;

(13) "emergency" means a condition that is either hazardous to life or property or that prevents a damaged roadway from being used by the public;

(14) "public transportation" means a system of vehicles operated by or for a municipality to carry persons to or from locations within that municipality;

(15) "truck" means a motor vehicle of more than 10,000 pounds unladen gross vehicle weight designed, used, or maintained primarily for the movement of a load;

(16) "truck-tractor" means a self-propelled motor vehicle designed and used primarily for drawing a semitrailer, full trailer, or trailers;

(17) "safety devices" means equipment designed to enhance a driver's view to the front, rear, and side of a vehicle, a driver's access to a vehicle and load, and equipment designed to provide protection to other vehicles such as rear view mirrors, rubber fenders, mud flaps, rock guards, anti-spray devices, tires (due to expansion), clearance lights, rub rails, binder chains, pin pockets, door handles, turning signal brackets, steps, bumpers, and backup lights and tire chain hangers mounted on headache racks.

(Eff. 6/25/69, Reg. 30; am 9/3/72, Reg. 43; am 6/19/81, Reg. 78; am 11/16/83, Reg. 88)

Authority: AS 19.05.020
AS 19.10.060

Editor's Note: As of Register 77, the references to the Department of Commerce and the Department of Highways have been corrected to refer to the Department of Commerce and Economic Development, and the Department of Transportation and Public Facilities.

Many vehicles remain unsafe, truckers say

by Robin Pierson
Times Writer

Alaska's roads are filled with unsafe trucks because the state's vehicle inspection program is inadequate and drivers aren't paid enough to be able to properly maintain their vehicles, a group of Anchorage truckers said recently.

"I've had my truck for 3½ years and it's never been inspected," said Jim Fenton of Anchorage. "Drivers know no one is going to look at their trucks, so they just keep on running them. We're working too cheap to maintain them."

In the last month, Anchorage has been rocked by tragic accidents involving large commercial vehicles. Earlier this week a loaded dump truck careened out of control through the intersection of Minnesota Drive and Raspberry Road. It came to rest atop a passenger vehicle, crushing to death three of the five occupants.

In mid-June, on the Seward Highway near the turnoff to Hope, an Anchorage man collided with an out-of-control tanker filled with asphalt. The man lost his legs after they were severely burned when hot asphalt seeped into his car, where he was trapped.

The driver of the asphalt

See Trucks, page A-12

truck will be charged with negligent driving, said Alaska State Troopers.

Whether or not the dump truck, which overturned on the passenger vehicle, was in safe driving condition before the accident currently is being investigated.

Through the truckers' grapevine, Fenton said he has learned of three other drivers who were in accidents within the last month after their equipment — including steering mechanisms and tires — failed.

Officials at the Alaska Transportation Commission, the agency charged with inspecting commercial vehicles, admit that they do not have the staff to conduct a comprehensive commercial vehicle inspection program.

"Most states have mandatory inspection for trucks registered in the state," said Larry Michou, the ATC's executive director. Alaska does not.

Instead, trucks are randomly inspected at weigh stations and on the road. ATC field agents also occasionally check vehicles at trucking companies whose drivers have received numerous safety violations.

The scale-house checks take an average of 10 to 15 minutes, occur infrequently and are not thorough, truckers say.

"Basically they're a joke," John Carr, an Anchorage trucker, said about the weigh-station checks. "I'm sure I can slip a truck through without brakes."

Though no one officially is assigned to the task, an Alaska State Trooper occasionally shows up at the weigh stations. Truckers complain that troopers are notorious for keeping clean — checking nothing on a truck but instead inspecting drivers' medical cards and log books.

Check" where the most critical part of the truck, including brakes, steering mechanisms and points of connection between the power unit and the trailer, are inspected.

Inspection procedures are not consistent between the two agencies, Michou said.

Of the 759 safety violations given to the more than 10,000 registered truckers in Anchorage last year by the ATC, 158 were for inadequate lights. Next on the list, were unsafe tires, wheels and failure to carry a medical certificate.

Only 23 drivers were cited for bad brakes.

Fenton's and his fellow truckers' motives for lobbying for stricter inspections appear to be two-fold.

If stricter or mandatory inspections were instituted, the truckers contend that their employers would have to pay higher wages so the owner-operators could afford to keep their vehicles in shape.

Truckers who drive to Prudhoe Bay, for example, say they now are paid about half, or about $5,000, for the run compared to nearly $10,000 in the mid-1970s. While wages have decreased, part prices have risen.

A tire for the combination trailers-trucks costs $430 now compared to $220 during the pipeline days, says longtime trucker Roy Goodrow.

"We're not making enough money to maintain our trucks like we should," Goodrow said.

But besides using stricter inspections as a way to lobby for higher pay, the truckers say they fear for their safety.

"It's like a race track out there," Fenton said, since truckers are speeding to make more trips — making up for the pay cuts.

ANCHORAGE TIMES

Surprise trooper inspection sidelines 58 trucks

By LARRY CAMPBELL
Daily News reporter

A surprise inspection of commercial trucks in Anchorage and the Matanuska Valley this week sidelined nearly half the vehicles, a record that shows no improvement since a similar sweep earlier this summer, according to Alaska State Troopers.

A special team of troopers and Anchorage police officers inspected 106 trucks — most of them gravel haulers — between Tuesday and Thursday.

Fifty-eight were taken out of service for equipment repairs, said Lt. Terry McConnaughey. He is deputy commander of the trooper detachment that includes Anchorage, the Valley and east to Valdez.

The inspections were prompted by numerous complaints from residents, he said. The inspection team stopped vehicles at the state truck weigh station on the Glenn Highway north of Muldoon Road and conducted roadside traffic stops in the Sand Lake area and in the Valley.

Citations for 108 separate violations were issued, some being multiple violations given to a single vehicle. One driver was arrested for reckless driving, two for driving with suspended licenses and two on other outstanding warrants not associated with the inspection sweep.

Troopers conducted a similar surprise sweep in May, McConnaughey said. The inspections are conducted by Fairbanks troopers who specialize in truck safety, plus city police officers.

Overloaded trucks were not a problem this week, but equipment violations were at the same high levels as in May, he said. Brakes and loose lug nuts, used to hold tires to the axles, were the most prevalent violations.

"One truck drove up and I could see his lug nuts were loose," he said. "The driver told me he'd just checked them. I reached down and unscrewed one with my fingers and handed it to him.

"Those nuts weigh about 16 ounces. Can you imagine what one of those things would do to a windshield if it popped off the wheel at 55 miles an hour?"

"One truck we stopped out in Sand Lake had brakes so bad the driver couldn't keep the truck on the portable weight scales," McConnaughey said.

Most trucks stopped this week were owner-operated rigs, that is drivers with their own vehicles who hire out to local contractors, McConnaughey said.

That half the trucks inspected needed serious repairs shows that too many operators still are not maintaining their vehicles, he said.

"Because of the nature of the work they do, so many times these guys are working by the load or have to make so many trips a day," McConnaughey said. "I think the numbers show that too many of them are not spending as much time maintaining their trucks as they are driving them."

McConnaughey said he also saw some well-kept vehicles among the moving potential disasters.

"Some were absolutely immaculate," he said. "And the drivers were really conscious of keeping them that way."

The inspections caught no more than 10 percent of the trucks registered in the Anchorage and Mat-Su Valley areas, according to figures from the Department of Motor Vehicles. McConnaughey could not say whether the poor safety showing revealed this week translates to the entire area, however.

There are some truckers who are changing their attitudes about keeping their rigs in shape, McConnaughey said. But the inspection results mean constant enforcement is still necessary to convince every driver, he added.

"Things improved this week, but before long we'll have to come back," he said. "I know a lot of drivers will probably howl and say I'm wrong, but the numbers tell it all.

"Things are not going to change unless we're out there. And unless we're out there, it'll get worse."

VALDEZ VANGUARD
August 29, 1984

Truckers want new image

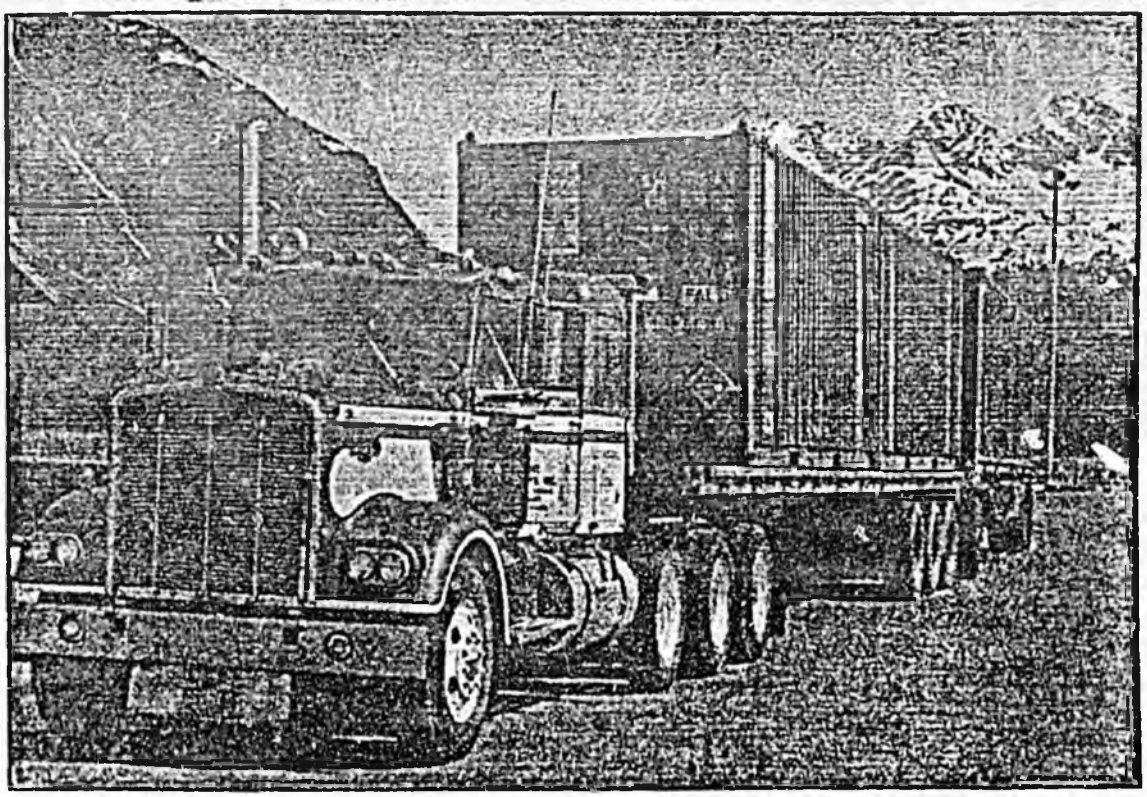
A top priority for the motor carrier industry is to improve the public's perception of trucks, according to the industry's top elected official.

The industry intends to make a strong case for itself to counter efforts to restrict the productive use of trucks, he said.

rnest Cox, chairman of the board of the American Trucking Associations Inc., Washington, D.C., addressed the 25th anniversary banquet of the Alaska Trucking Association in Valdez. He said the current public perception of trucks has led to several punitive proposals within the state.

He cited a movement to limit the speed of trucks to 35 miles per hour within an 80-square mile area surrounding Anchorage, while other traffic would be permitted to travel at the 55-mile-per-hour speed limit.

"This kind of mix is an open invitation to disaster . . . but this proposed action is a governmental response to a fatal accident involving a truck," Cox explained in a news release.



The industry is employing a two-track nationwide approach to create a more positive image, because the issue is bigger than any one state.

"First, we are going to try to set the record straight. We are going to do everything we can to bring the perception of this industry on the part of the officials, news media and everyone else into focus, so that what they say, what they write, what they believe will at least be closer to accurate.

"And secondly, we are going to do whatever we can do to improve our performance and our image," Cox said.

Other trucking issues that would benefit from this kind of unified approach are federal and state taxes, he continued.

Cox also told Alaskan trucking executives that meeting the many challenges facing the motor carrier industry now and in the future will require "a dedication to work, their community to the total transportation system and to safety."

At the Port of Valdez, George Hillar of Alaska Freight Lines prepares to run the first set of 40-foot trailers to the Interior.

Tandems OK on highway

The Alaska Department of Commerce and Economic Development, Division of Measurement Standards, recently granted trucking firms using the Port of Valdez to operate tandem trailer combinations that are up to 105 feet in overall length on the Richardson Highway.

The authority extends the full length of the highway from Valdez to Fairbanks.

Transportation firms serving Valdez have been petitioning the Department of Commerce and Economic Development for some time. They said the permit to haul two 40-foot doubles was necessary in order to offer shippers rates that were competitive with other routes to the Interior.

A pilot program was established for a 120-day period to monitor the safety and security of this new service. The Alaska Department of Transportation and Public Facilities will actively participate in this project to assure that all permit regulations are observed. It is expected that the authorization will be made permanent.

The first carrier to secure the permit was Alaska Freight Lines of Valdez. Commenting on the newly granted authority, George Hillar of A.F.L. said, "We are very pleased to have received this long awaited permit. Now we will be able to perform a much needed inland service at economical tariff levels."

For more information contact the Port of Valdez. In Alaska call 835-4313 or toll free Zenith 4300 from Fairbanks, Delta Junction and Anchorage. In the Lower 48 states call (503) 227-4567 or (206) 624-4414 in Seattle.

Chenega...

President Gail Evanoff put her shoulder to the wheel lobbying endlessly, arguing, enduring years of blank stares and queries of "Where's Chenega? Why do you want to rebuild it?"

Finally home amid the results of her work, Gail Evanoff took the occasion of the dedication ceremony to compliment one of the few politicians who really did back Chenega Bay all along—Bette Cato. The main gravel road in the village is named for her.

While Gail worked for funds, Larry Evanoff served as projects manager seeing that the 21 homes, gravel roads, school, store, utilities and dock were built. Last Saturday, his was the enjoyable task of welcoming Chenegans to their new home.

Other guest speakers included Chugach Alaska Inc. board chairman Edgar Blatchford, North Pacific Rim executive director Derenty Tabios, George Irvin of the Alaska Federation of Natives; Governor Sheffield's chief of staff John Shively and former State Representative Margaret Branson.

Tabios noted "with the rebirth of Chenega our region is once again whole," and Blatchford commented that "the Chenegans have overcome more obstacles in 20 years than most people do in several generations."

Plans for Father Nicholas Kompkoff, Sr. to bless the new homes and church grounds were postponed because Fr. Kompkoff has been ill.

Already living in the new one-story home are nine families: most young people with kids. From Anchorage: Don & Gail Kompkoff and children Dino, Joyce, Stephanie and Alexander John. Gail is the fee agent person and serves on the Native Advisory Committee. Charles Selanoff Jr. & Norma Selanoff plus two kids, Diana and Lynnette. Charles is water/sewer technician for Public Health Services. George and Marlene Selanoff and their son Bill. Larry and Gail Evanoff are also from Anchorage; besides their village council jobs, they are public safety officer and community health aide, respectively.

Michael Vigil from Anchorage will run the community store. He is sharing a house with his sister Sharon from Seattle.

From Cordova are Frank and Susan Gurske and children Sally and Frank Jr.; and Joel Kompkoff Sr. and sons Joes and Lloyd. Ken Selanoff has moved in from Tatitlek.

More people will arrive after fishing season, including Chuck Totemoff, Maggie and John Totomoff; John and Phyllis Pipkin; Paul and Minnie Kompkoff and dis; Mike Eleshansky and his family and Nick Kompkoff Sr. and his wife Mary.

After the dedication and salmon dinner that followed, Gail Evanoff reported on future plans—a teacher is coming next week; a community center with health care and public safety facilities will soon be built; a post office will be established as soon as 25 people and two businesses are in residence; and regular air service is being sought.

"There's lots to do," she said. "Some people are worried about jobs...they should just come home. Then we'll work it out."

Chenega Bay is home at last!

"If not for Larry and Gail Evanoff, this could never have happened," Chenega Village Corporation president Don Kompkoff said at the August 26 dedication of Chenega Bay. "And it sure feels good to be home and have a house so close to the fishing grounds."

Kompkoff was giving recognition to the tremendous effort spent by the Evanoffs for ten years to rebuilt the lost village of Chenega.

Chenega Bay Village Council Chairman Larry Evanoff was one of the children who survived the 1964 earthquake and tidal wave that killed 23 of the original Chenegans and destroyed their home. For years, he kept the dream of rebuilding the village and recreating the life he once enjoyed.

After the quake, state disaster funds rebuilt most Prince William Sound communities. Not Chenega. The government tried to relocate Chenega survivors in Tatitlek.

It didn't work. Chenegans moved on to Cordova, Anchorage and Valdez, returning to the old site in the 1976 for a memorial service, then deciding to relocate from Chenega Island to nearby Evans Island—a more protected spot with fewer memories.

Road closures resume

After a brief Salmon Derby respite, daytime road closures began Monday, 10am—2pm for blasting the Seward Highway rebuild.

Closures will be daily until November snows prevent Kluane Construction from further work.

Intermittent closures of up to half and hour will also be allowed any time of the day; but there will be no closures Saturdays or Sundays.

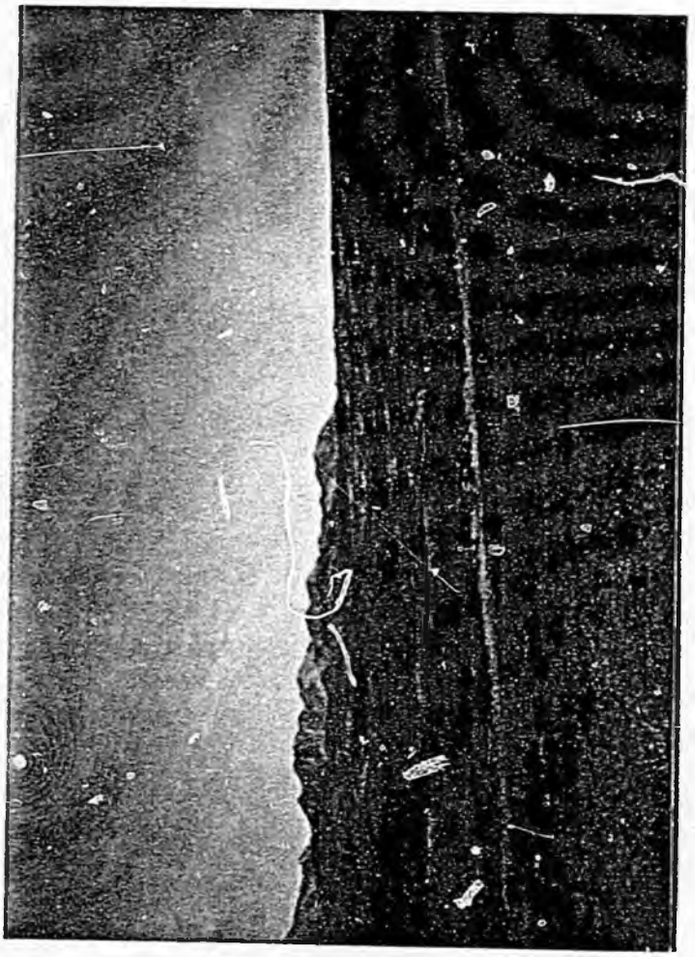
The winter closure schedule was to have begun last week, but was held off at the request of Rep. Bette Cato, due to Salmon Derby.

Mike Fargo, resident engineer for the Department of Transportation/Public Facilities, said OSHA prohibits blasting after sunset, unless special lighting is used to render the area bright as day, and unless a special permit is issued.

"They told us 'Forget it'," Fargo said. "Plus it would have added hundreds of thousands of dollars to the pricetag."

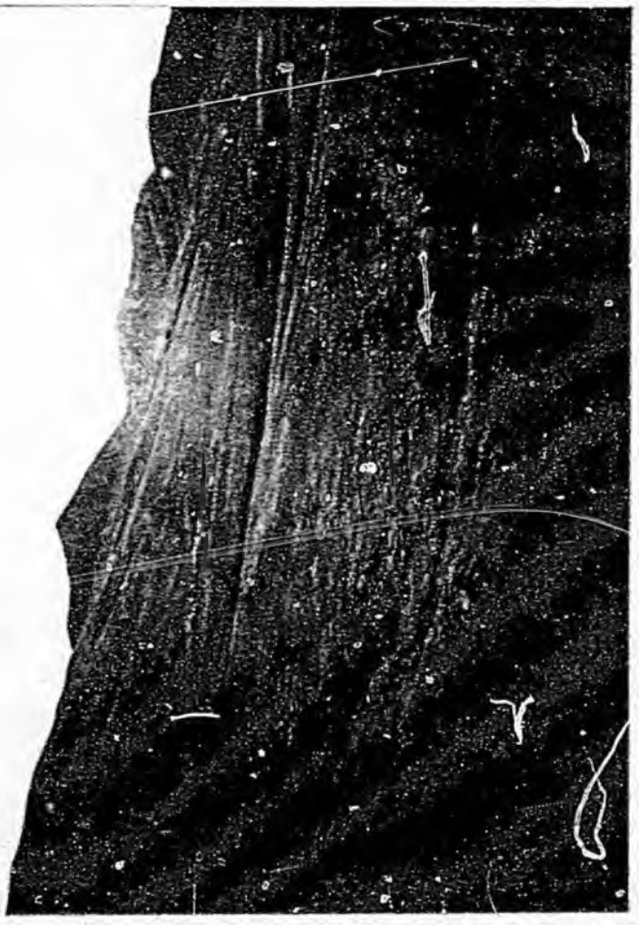
He said the only time OSHA normally gives out blasting permits is when there is no alternative—"like on the North Slope in winter."

Traffic counts and consultation with scheduled haulers and the Post Office revealed the best time for blasting closures is 9pm to 1am. That is when the work was being done this summer. Now days are shorter and the next best time period must be used—the 10am to 1pm slot.



Cato asks halt to road closure

Rep. Bette Cato reported she complained to the Department of Transportation/Public Facilities about 10 a.m.-2 p.m. road closures by Kluane Construction, Bertha Creek-Ingraham Creek on the Seward Highway, beginning today.



"They are sending a team down to keep it open, and it will stay open all weekend," Cato said. "Then a better schedule will be arranged to meet Peninsula traffic needs."

TRIP REPORT
EMULSION ROAD CONSTRUCTION
STATE OF OREGON
AUGUST 21 - 25, 1984

Due to the fact that Alaska's road system is in a deplorable condition, the House Transportation committee continues to learn all they can about the various construction techniques. Both the House and Senate Transportation Committees have pushed for DOT to research such techniques as high float emulsion (HFE) asphalt road construction. We were involved with the resolution which urged DOT to use high float emulsion asphalt, on an experimental basis, as some of the advantages of HFE asphalt is that it stays soft longer, is considerably less expensive and has a long term advantage of being temperature stable. To date, three projects have been laid and we are expecting DOT's first report on those projects either by the end of the year or in January.

The House Transportation Committee along with the Senate Transportation Committee and Associated General Contractors of America, Inc. sponsored a Highway Symposium in February of 1984 where several presentations were given on what is happening in the area of emulsified asphalt road construction. We have also been communicating with the Yukon Territory and their use of high float emulsion surface treatments. (Almost the entire Alaska Highway has HFE asphalt surface treatment)

We are fortunate to have as the Chairman of the House Transportation Committee an individual who is knowledgeable about road construction and what is needed in the state of Alaska. Thus, when the Northwest Division of Chevron U.S.A. Inc. (who has been a leader in emulsion road construction) extended an invitation to Chairman Cato, we were eager to have yet another opportunity to observe this type of construction in progress as well as roads which have been in service for many years in the State of Oregon.

Chairman Cato, accompanied by her professional assistant, Rhonda Cargill, arrived in Portland, OR on August 21 and traveled approximately 1300 miles of Oregon roads within the next 2½ days. The following is a report of not only what they were able to learn from the trip, but also from various reports that were furnished by Chevron U.S.A.

We began our trip on the evening of August 21 with the opportunity to casually meet with Frank Begich and Susan MacFarland, both of Chevron.

On the morning of August 22, Susan MacFarland, Technical Service Representative, Asphalt Division, picked us up to begin our tour of the various construction of roads with emulsions. Susan is the chemist who meets with the people involved with road construction,

such as the county officials, state officials, and private contractors to determine which emulsified asphalt to use. Among the various factors that we learned, the key to successfully using emulsion asphalts is to select the right emulsion for the aggregate and construction system involved.

Our first stop was in Odell, Hood River County, where we met Jim Lyons, County Engineer, who then took us to observe an open-graded CMS-2 project which had been completed three years ago and one which was in progress.

Before going on, to explain a little bit what emulsified asphalts such as CMS-2 are about--

Asphalt emulsions are divided into three categories, one of those being cationic which is what the C stands for in CMS-2. Emulsions are also classified on the basis of how quickly the asphalt will revert to asphalt cement (Coalesce). Thus MS means medium-setting which means that a medium-setting emulsion is expected to mix with coarse, but not fine aggregate. And the 2 is part of the designation that denotes general viscosity (fluid's resistance to flow) for emulsified asphalt.

The first road we looked at in Hood River County is a logging road and CMS-2 was used as a surface treatment, as opposed to a reconstruction project. The medium-setting grades are designed for mixing with coarse aggregate. (which is shown in Photo 1 using the car keys to show the relationship of the size of the aggregate to a set of car keys) Because these grades do not break immediately upon contact with aggregate, mixes using them remain workable for a few minutes (break meaning basically when the asphalt separate from the water phase). The CMS grades have high viscosities to prevent runoff.

Photo #2 is showing what is called "run-off". Run-off has to do with the amount and method in which water is used in making the emulsified asphalt or the amount of water which an aggregate might contain. If too much water is present, pavement life could be reduced.

This particular road was a good project to view as the proper procedures were followed. If proper construction practices are <u>not</u> followed, the mix can prematurely stiffen and a rough surface can be produced during laydown. This road had excellent rock retention and has sufficient drainage to preserve the road surface.

Our next stop in Hood River County was to observe the application of CMS-2 by a county crew. We have no photos of this particular process, but will give and explanation of the application as we have photos of another project we watched in progress.

A factor we picked up from Mr. Lyons was the advantage of the cost effectiveness of emulsified asphalt mixes. Emulsified asphalt

mixes provide an alternative for roads that are in back woods areas yet need durable roads at a less costly method of construction, plus would not effect the environment with dust, smoke, evaporating solvents and fire hazards.

Moving on, we went up to see a pugmill used for cold mixtures. The type of pugmill that we were observing is one that is referred to as a travel plant, as it can be set up near the construction site.

Open graded emulsified asphalt is produced by mixing the emulsified asphalt with the aggregate with no heating required. After mixing is completed, the cold mix is transported and placed in virtually the same manner as hot mix. This method also allows rapid construction with minimal interruption of traffic flow. Photos #3, #4 and #5 show just that. Crushed rock is loaded into the cold feed bin which is attached to a conveyor belt which takes the rock to the pugmill mixer where it is mixed with the emulsified asphalt and then is dumped into the truck hopper. The process we were watching was the loading of 25 ton trucks in 4 minutes.

The mixed emulsified asphalt aggregate mixture which we had observed at the pugmill is basically asphalt coated aggregate particles. They are formed into a layer or blanket and are part of the roadway.

Our next stop, of course, was to the construction site where the asphalt was being laid as a reconstruction job, which is the Morse Brothers' job.

Here we watched the belly dump trucks, dump the CMS-2 asphalt in a berm followed by the spreader/paver and conventional roller. See Photos #6, #7, #8, #9 and #10.

Since the emulsified asphalt tends to be sticky, the steel wheel roller was used for compaction and then traffic would do the rest of the job.

Susan feels that after rolling it is advantageous to dry choke (dust) the surface as it eliminates the sticky surface condition and helps tighten up the surface and will seal the surface to allow a positive seal to be constructed.

That evening we met with Carlos Van Ellisberg, Public Works Director, Pendleton Umatilla County in Pendleton as he was to be show us some seal coating projects in his county. Carlos had previously worked as county engineer in Hood River County so we were able to have further discussions on the roads we had seen earlier in the day.

August 23 Representative Cato, Susan and Rhonda met with Carlos Van Ellisberg who took us to Milton Freewater area (Dry Creek) where we were given a chance to watch seal coating in process. Carlos

pointed out that this seal coating job was to add life to the pavement. We were able to see the "spray on" application of CMS-2 where as the Morse Brothers' job was a "mix in" application.

In chatting with the crew we learned how critical the timing was between spraying of the asphalt and application of the aggregate. Again we learned about the breaking and curing of the asphalt. If the asphalt emulsion is to perform its ultimate function of cementing and waterproofing, the asphalt must separate from the water phase. For seal coating, the emulsions are formulated to break upon contact with a foreign substance such as aggregate or a pavement surface. The asphalt droplets coalesce and produce a continuous film of asphalt on the aggregate or pavement. It is quite critical that the aggregate is laid immediately after the spraying of the emulsified asphalt so that the adhesion of the asphalt to the aggregate takes. This particular project was followed up with a rubber roller. A conventional roller would not be used as it would crush the aggregate and lose the adhesion or have loss of stones from the pavement.

At this project we had the opportunity to speak with the driver of the distributor and learn that the science of application is not an easy task. Each individual sprayer must be angled at a specific angle, there must be a certain number of valves open, of which none must be defective or clogged. Photo #11 is showing the valves and back of the distributor. While driving down the pavement, the driver must watch an indicator which shows the volume/pressure of asphalt being sprayed per foot of road. Photo #12 is showing the spraying application. (He has a guide which tells him what specifications which must be met.)

We also spoke with the crew of the spreader who gave us an explanation of how their piece of equipment functions. They showed us how the grave truck hooks up to the spreader and dump the rock into the spreader. The rock then travels up a conveyor belt to a screen in the front of the spreader which sifts the rock so only a certain size rock falls through the screen to the sprender and onto the road. Again, timing is important. Photos #13 and #14 are showing spreader in progress.

Our next destination was to visit with Dan Ball, Road Master of Morrow County outside Heppner. (Dan is responsible for 1100 miles of road and has a crew of 26) Here we were able to see a pavement project which was a cold mix recycling project.

Cold mix recycling basically involves salvaging the old road, adding new material (asphalt emulsion for an example), and combining it with new aggregate. You can grind up an untreated aggregated base in place, stabilize it with an asphalt emulsion, use it as a base layer then pour. At this particular project the old pavement was ground up and laid back down and then a chip seal was applied.

A point of interest which was relayed is that a lot of credit is to be given to the equipment manufacturers. They have developed improvements that allow road construction contractors to do massive recycling projects at a time when the concept really wasn't well developed. They committed a lot of capital money to the development of equipment that is now available to the user.

We then went to Canyon City and looked at a cold mix recycle job where the seal coat was lost

We overnighted in John Day and on August 24 we headed out for Bend to meet with one of Oregon's regional engineers.

Arriving in Bend we had the opportunity to have lunch with Dale Allen, Regional Engineer of the largest region in Oregon.

On route to Portland we stopped in Zig Zag to look at a stock pile mix of Spec 200. We were able to see how CMS-2 can be stock piled as it retains enough moisture and adhesion (Shown in Photo #15) that all the road crews have to do is bring their trucks in and load it up with Spec 200 for patching projects. Photo #16 is the Spec 200 stock pile.

We have also attached a copy of the map of Oregon outlining our travels to observe open graded emulsion asphalt road construction. Not included in this particular report are areas which are pointed out on the map that we didn't actually get out to observe, but discussed as we were driving on them.

We were most fortunate to be given this opportunity to learn more about emulsified asphalts and how this technique could be an alternative that Alaska should continue to experiment with and research.

HOUSE TRANSPORTATION COMMITTEE
INTERIM REPORT NO. 2
OCTOBER 15, 1984

The following report constitutes the second report of the House Transportation Committee to the Majority Leader. This report highlights staff activities and updates issues covered in Interim Report No. 1 of September 15, 1984.

CAPITAL PROJECTS CLEANUP EFFORT

Staff attended the Senate Transportation Committee meeting of October 2, 1984 which included a work session with the Capital Projects Cleanup group. You may remember reading articles in the newspapers relating to this topic. Copies have been provided in this report should you have missed them.

According to the news articles, the Department of Transportation has failed to begin more that 800 million dollars worth of construction projects approved by the Legislature. To help clarify this statement, we have provided a verbatim transcription of the October 2nd work session, a copy of the Capital Projects Cleanup Interim Report No. 1 (originally distributed to committee members toward the end of the thirteenth session and the Capital Projects Cleanup Status as of September 27, 1984. (See Attachment A.)

During the Senate Transportion Committee meeting, as noted on page six of the minutes, you can see that the 897 million dollars is AUTHORIZATION - be it general fund or federal authorization. The determination the Capital Projects Cleanup group has been attempting to make is to account for these authorizations. The key word used in this entire CPC explanation is authorization and also is where the confusion begins.

At the present time, the Department of Transportation hasn't been able to give us a definite date as to when to expect the final report on the Capital Projects Cleanup, but we definitely know that there will be a report for the Fourteenth Legislature.

ALASKA RAILROAD TRANSFER

October 2, 1984, staff attended the Senate Transportation Committee meeting in Anchorage held to assess the transfer process of the

railroad from a labor, management, and Federal Railroad Administration perspective.

The main topics of discussion included the temporary employee issues; educating the employees of what was happening during the transfer; and policy concerning maintenance and safety.

It was pointed out by Mark Hickey of the transfer team that "this is a difficult time and that lines of authority are confused. The federal government still owns and operates the railroad. The Federal Railroad Administration (FRA) has the type of oversight they've always had. The State, as part of the federal transfer law, has specific authority over three kinds of actions by the railroad: any lease of land or real property in excess of five years, any individual capital expenditure in excess of $300,000.00 and any attempt to sell or dispose of real property. Other than that there are no formal arrangements where the State has any control over the railroad decision making. We (State) do have pretty close cooperation. In any actions of this type, the State will be alerted and briefed prior to implementation. Standard operation procedures should be followed."

During the discussion of the temporary employee issues, there was concern from employees and ex-employees of the railroad that no effort was being made to protect the railroad employees; they have no reemployment rights due to the fact that they were employed as temporary workers with the railroad and the temporary employment status was a result of a federal hiring freeze.

Mr. Hickey of the transfer team admitted that the temporary employee question is a problem and that the State agreed that the temporary employees on board at the date of transfer will be reemployed the next day with full benefits. He pointed out that the Board has to resolve the question of what commitments they want to make to the temporary employees that were previously terminated. In addition, he explained that any personnel action of the railroad today has to be in accordance with collective bargaining agreements and federal rules and procedures.

Mr. Blasigame, of management, explained that the temporaries being discussed were basically hired because of the 7.6 million dollars appropriated for railroad capital improvements when the (Alaska Railroad Transfer Act (ARTA) was passed. Thus, funds for capital improvements created jobs and the people hired were for temporary appointments.

Mr. Blasigame further explained that "one of the problems we face is that the Alaska Railroad is part of the FRA, U.S. Department of Transportation which has a mandate for man hours. When we appoint an individual, they get a career service appointment, that's permanent, versus temporary. If you let that person go, it's an adverse action, you go through a reduction in force procedure, and they have certain rights and benefits under federal regulations. When a temporary comes on, they know it's temporary, but we got a

waiver from the Office of Personnel Management to extend those appointments because of the requirement that was placed on us by federal OMB to stay within a certain guideline. We're still under that mandate."

Also brought before the committee was the problem of employee unrest due to unanswered questions about the transfer.

Mr. Allison conveyed to the Committee "It should be incumbent upon us (feds) to keep employees informed--admittedly we are somewhat late."

Mr. Valinske of the United Transportation Union (UTU) added that although UTU doesn't have the problem some other unions have, he felt that management has given them information that has been available. He also pointed out that although the FRA has been slow in getting information out, the state and the transfer team have been helpful.

Employees brought before the committee questions regarding the change in policy concerning maintenance. Several examples were given to which the railroad management and transfer team could answer various employee concerns.

Mr. Polanchek explained that "The gradual change has been occurring over the last ten years. Anchorage has always been our primary maintenance facility for locomotives and all our rolling stock--repairs, overhaul, any major function would come to Anchorage. Fairbanks is gradually phasing out, it's more of a troubleshooting operation, refuel, inspections, nothing really significant...The need for the type of skills and technicians that we had previously in Fairbanks has changed and it's become more of a service station where all we're doing is normal daily inspections. All of our locomotives are based in Anchorage, they go to Fairbanks and return to Anchorage....Major maintenance and servicing will be done in Anchorage."

Mr. Allison stated that "the FRA in Washington has a strong interest in a successful transfer, and that means that the railroad is a successful post-transfer. There is no economic incentive for the federal government to cut maintenance expenses. That lessened expense is merely going to the revolving fund which is transferred to the state minus federal obligations. We've been working in every way possible with the state to involve them in a current basis in decisions and we look forward to doing the same thing with the board once it's appointed...All money comes from the revolving fund which transfers to the state minus any current obligations to the federal government. If we started cutting expenses in that way, it would just add to the revolving fund. There is no economic incentive for us to do this in any case."

Attachment B includes informational letters of August 1984 and September 1984 to all railroad employees from the FRA and transfer

team, and minutes of the October 2, 1984 Senate Transportation Committee meeting.

ALASKA RAILROAD BOARD
CHAPTER 153, SLA 1984

Chapter 40. ALASKA RAILROAD CORPORATION, ARTICLE 1. Section 42.40 020. BOARD OF DIRECTORS. (a) The powers of the corporation are vested in the board of directors. The board consists of the commissioner of commerce and economic development, the commissioner of transportation and public facilities and five members appointed by the governor. The five appointed members must be registered voters in the state except as provided in (1) and (2) of this subsection. Except for the commissioners and the member appointed under (5) of this section, a member may not be a state officer or employee. Appointed members shall have the following qualifications:

(1) one member of the board shall be a person who has at least 10 years of experience in railroad management; a person who is not a resident of the state may be appointed under this paragraph;

(2) one member of the board shall be or have been an executive official of a United States railroad and shall be selected in accordance with any requirement imposed under 49 U.S.C. (Interstate Commerce Act); a person who is not a resident of the state may be appointed under this paragraph;

(3) at least one member shall be from each judicial district directly served by the Alaska Railroad;

(4) one member shall have at least five years experience as owners or managers of a business in the state;

(5) one member shall be an employee who is a member of a bargaining unit representing employees of the corporation.

(b) Except for the commissioners, the members of the board shall be confirmed by a majority of the members of the legislature in joint session. A member appointed by the governor has the full powers and responsibilities of a confirmed board member until the member is rejected by the legislature or the legislature adjourns without confirming the member. (Attachment C is Chapter 153, SLA 1984)

Governor Sheffield has appointed the following individuals to serve on the Alaska Railroad Corporation Board of Directors:

James Campbell, 52, president of Spenard Builders Supply and a former Anchorage city councilman and borough assemblyman; will serve a five-year term;

Lewis Dickinson, 52, a civil engineer and member of th Anchorage Port Commission; will serve a four-year te

Gerald Valinske, 33, who will fill the seat designated by law for a representative of a labor union affiliated with the railroad; will serve a three-year term;

Frank Chapados, 70, Fairbanks, president of H & S Forwarders Inc. and a former State representative who will serve a five-year term;

Commissioner Richard Knapp, Department of Transportation and Public Facilities; and

Commissioner Richard Lyon, Department of Commerce and Economic Development.

The Alaska Railroad Board has held 3 meetings. To date, the only available minutes are of the October 26th meeting. (Attachment D)

The Alaska Railroad Board selected Frank Turpin, president of the Alyeska Pipeline Service Co. as chief executive officer of the Alaska Railroad.

Other railroad related topics which staff have been following include Seward's protest of the appointment of Lew Dickinson, which the ICC has ruled as having no conflict on interest; Frank Chapados conflict of interest, of which no decision has been made at the time of this report; and in general, the progress of the work plan of the transfer team.

CHAIRMAN CATO'S TRIP TO JUNEAU

Representative Cato made a trip to Juneau the week of October 21st to follow up on her meetings during her trip to Juneau in August. The following is a brief summary of what was accomplished while she was in Juneau.

Chairman Cato met with Joe Camp, Deputy Commissioner of the Marine Highway System to discuss the Marine Highway System (MHS).

To better explain negotiations with the ferry employees, here is some background as to how we perceive what is happening:

Currently the ferry workers are represented by the Inland-boatmen's Union of the Pacific (IBU-P). It is the IBU-P which has been at the bargaining tables with the State since this spring, but no agreement has been reached.

The Inland Boatmen's Union of Alaska (IBU-A) was going to seek an election of union representation, but decided against it until IBU-P had a contract proposal for the workers or bargaining talks terminate again.

The International Longshoremen's and Warehousemen's Union (ILWU) filed a petition with the Labor Relations Agency to force a union representation election.

The State has posted the notice of election of which there is a 3-4 week posting period, then a protest period, which was the status when Chairman Cato was in Juneau. If the protest goes to election, then it could tie things up and it could go to court. Thus the situation has now become the need to establish with whom the State will negotiate.

Representative Cato and Mr. Camp also discussed the profitability of the M/V Bartlett during the summer months in the Prince William Sound, the alternatives available for a high speed ferry system for southeast, the centralized reservation system, and how to resolve the problem MHS is having with the senior citizen resolution and how it is being abused by retired magazines.

Representative Cato also had two meetings with Commissioner Knapp to discuss the progress of the Capital Projects Cleanup group, when FIS will be on-line, the Valdez terminal building, San Juan Dock repairs, appointments to the Alaska Railroad Board, and basic operating/capital budget discussions.

Representative Cato met with Gretchen Keiser and Alexander Hoke of the House Research Agency for a briefing on rural energy programs to prepare for her panel discussion at the Alaska Municipal League.

Representative Cato had a breakfast with Commissioner Endell to discuss the prison in Seward.

AS 23.40.210. Agreement
LABOR AND WORKERS' COMPENSATION

Captain Dick Hofstad has been in contact with Representative Cato and staff regarding the intent of AS 23.40.210 relating to cost-of-living pay differentials between Alaska Marine Highway employees who live in Alaska and those who live outside the state. The purpose, of course, is to encourage employees of the Marine Highway system to live in Alaska.

Captain Hofstad had been disturbed about the implementation of this statute and in his opinion, it was not being followed.

On October 12, staff was invited to attend a meeting involving Captain Hofstad, Deputy Commissioner Joe Camp, Marty Nusbaum with MHS, Karen Clark with Labor Relations and Guy VanDoren, with Senator Ziegler's office.

Staff is still in the process of researching the various opinions by the Attorney General's office relating to collective bargaining agreements negotiated with the unions. In October of 1978, the Inlandboatmen's Union of the Pacific filed suit against the Alaska

State Personnel Board and the Alaska State Labor Relations Agency. That case has been given to the Federal District Court and at the writing of this report, we are awaiting the judge's decision.

CONFERENCES ATTENDED

*First Annual Washington Transportation Safety Conference

Representative Cato attended the first annual Transportation Safety Conference in Seattle during October 1-3. She found this conference to be a full and complete informative meeting and highly recommends that it be attended next year. Attached is a copy of a memorandum from Chairman George Walk, of the Legislative Transportation Committee to the participants of the conference and enclosing the detailed agenda and a list of those attending.

*National Association of Governors' Highway Safety Representatives

Representative Cato attended the highway safety conference in Des Moines, Iowa during September 9-13, 1984. The conference covered all facets of highway safety and was a very informative meeting.

The agenda included:

Highway Safety Progress in Combatting the Drinking Driver Problem

What is Prevention?

408 and license Suspension

National Commission Against Drunk Driving

DWI Decision Making in the Higher Courts

Motorcycle Helmets and Safety in the 80s

Highway Safety Traffic Records: The New Law and Computerized Guidelines

Occupant Protection: Motivate and Mandate

Special Workshop on Child Passenger Safety and the New Law

K-12 Traffic Safety Education

Motor Carrier Safety

Commercial Vehicle Safety

Hazardous Materials Safety, Transportation

The Flagman, Traffic Safety and You

Key Management Issues in Federal/State Interaction
- -child passenger safety/traffic records plans
- -the single audit and attachment "p"

-communications between NHRSA and NAGHSR
-training available to the states

Attachment E, for your future information, is a listing of the Governor's Highway Safety Representatives and Coordinators.

*Multistate Highway Transportation Agreement Committee

Representative Cato was invited to represent Alaska on the Legislative Panel for the Multistate Highway Transportation Agreement Committee November 8, in San Diego, California. The main topic of this panel was the recent amendments to the state size and width regulations to conform to the Surface Transportation Assistance Act (STAA).

GENERAL SUMMARY OF OTHER ACTIVITIES

Other topics which the House Transportation Committee staff has been covering include:

Complaint received from District Manager of Colt Industries regarding bidding process for engines on the M/V Matanuska. After reviewing the various materials which Mr. Decker supplied to the committee, discussions with the Deputy Commissoner of the Marine Highway System and the Commissioner of Department of Transportion, it was surmised that Mr. Decker did not have a valid complaint. Should any member wish further information on this topic, staff would be more than happy to provide further details.

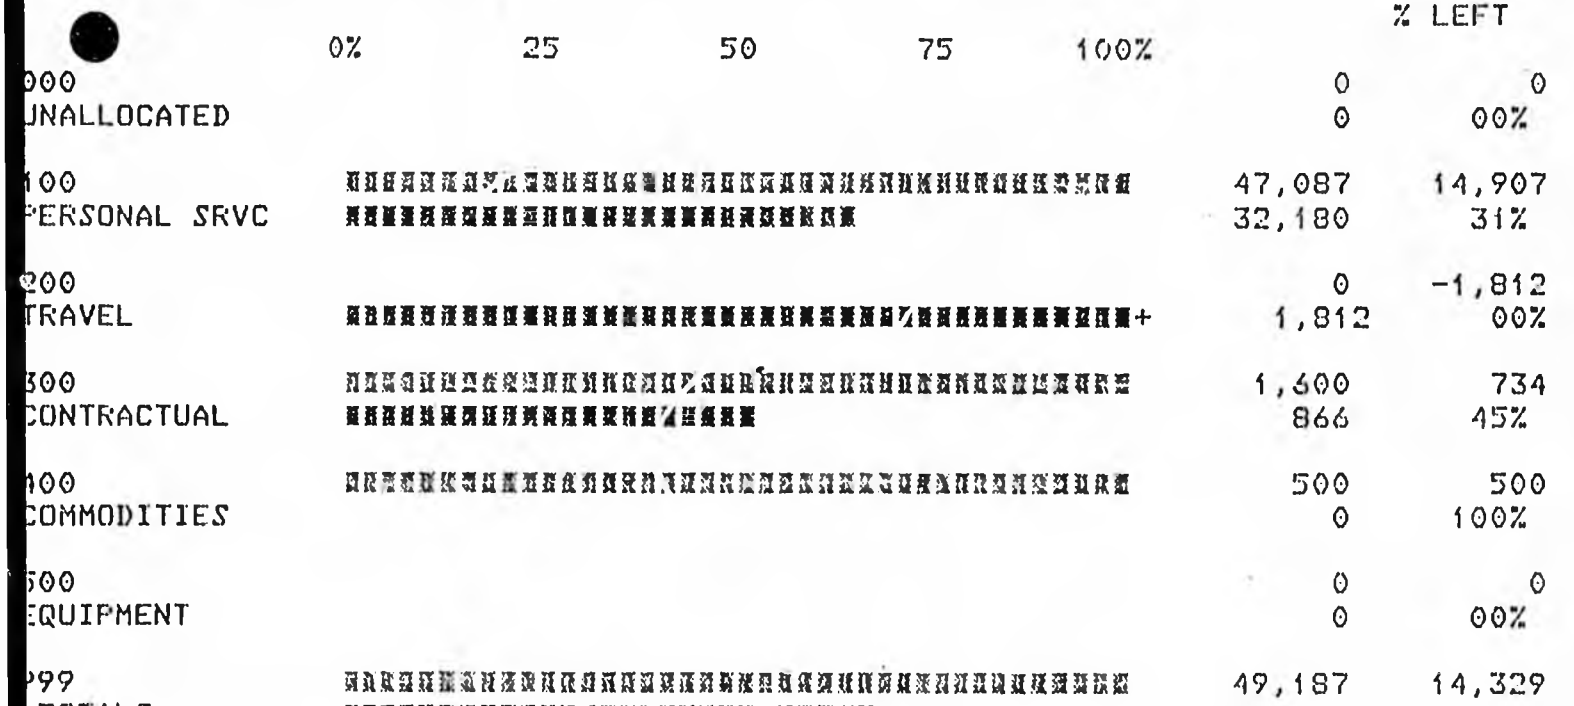
Wien Employees Acquisition Committee's attempt to purchase Wien Airlines by its employees. Staff was asked by Representatative Szymanski to look into this matter to determine if there was anything the Committee could do to assist the Wien employees with their situation. As it turns out, there is nothing the Legislature can do at this time to assist the Wien employees.

Please find enclosed a DRAFT summary of the use of high float emulsion treatment by Billy Conner, Research Engineer of the Research Section of the Department of Transportation. We will be receiving further reports on this treatment as DOT determines the success or failure of the high float emulsion projects. (See Attachment F)

The Department of Transportation and Public Facilities has also provided our committee with a copy of the "Summary of Capital Appropriations FY 85" which present an overview of the capital funds appropriated to and through the Department of Transportation from Chapter 24 (HB 691), Chapter 22 (HB 636), Chapter 18 (SB 364), Chapter 45 (SB 94), Chapter 171 (SB 409). Chapter 136 (HB 452), and Chapter 92 (HB 487) SLA 1984. In addition, an analysis is included of the repeals, reductions,

and scope changes from Chapter 171, SLA 1984 (SB 409). Copies of the Summary are available upon request.

The following is an update on the invitation for bids by the Department of Transportation and Public Facilities, taken from the Administrative Journals:



-Project No. G-27035, Tok Area Road
-Project No. A-86281, Miller House Bridge
-Project No. D-35331, Ruby Airport Runway Expansion
-Fence for Equipment Storage, Peger Road, Fairbanks 85-25-2-30
-Land Lease, Homer Airport
-Land Lease, King Salmon Airport
-Land Lease, Dillinghanm Airport
-Juneau-State Office Building and Alaska Office Building Handicapped Restroom Modifications
-Project No. R-20009, Nulato Scout Armory
-Umiat Airport Maintenance
-Fairbanks International Airport Terminal Gift Shop Concession
-Project NO. BRS-750(4), Maclaren River Bridge and Approaches
-Project NO. X-40124, Nome Office HVAC Retrofit
-Upgrade Barrow Employment Center
-Project No. MT-347, M/V Taku Reballasting
-Project No. A-86131, Old Chena Hot Springs
-Project No. R-20030, Gakona Remodeling and Multipurpose Addition
-Project No. R-60071, Fairbanks Jail Remodeling
-Project No. RS-I-0A2-1(1), Robertson River to Yerrick Creek
-Project NO. MT-349, M/V Aurora Drydocking and Repairs
-Project No. MT-351, M/V Tustumena Drydocking and Repairs
-Project No. MT-350, M/V Columbia Drydocking and Repairs
-Mitkof Highway Ferry Terminal to Scow Bay, Petersburg
-North and South Tongass Raised Pavement Markers, Ketchikan
-Hoonah Harbor Maintenance Dredging
-Hydaburg Creek Bridge
-Mendenhall Spur West, Juneau
-Klawock to Hollis, Stage 1
-Hoonah Airport Clearing
-Project No. HES-071-1(54), Airport Road and Richardson Highway Intersection Beacon
-Carpet and Vinyl Sheet Floor Covering, Fairbanks Pioneer Home
-Vinyl Fabric Wall Covering, DOT/PF Administration Building, Project No. 85-25-2-34, Fairbanks
-Gift Shop Concession, Fairbanks International Airport

Capital Projects Clean-Up Report

Present: Senator Moss, Chairman
Senator Fahrenkamp
Senator Faiks

Absent: Senator Kerttula
Senator Gilman

Other legislators participating: Representative Abood

Witness:

Jim Merrill
Capital Projects Clean-Up Group
Office of the Commissioner
Department of Transportation & Public Facilities
Pouch Z
Juneau, AK 99811

ACTION NARRATIVE -VERBATIM TRANSCRIPT

Interim tape #4, Side A

No tape log numbers are recorded as no tape counter was available.

Moss: We have Jim Merrill here. Jim, if you will give us your name, etcetera, for the record, we'll get started on this.

Merrill: My name is Jim Merrill, and I am the Special Projects Engineer for the Department of Transportation. Specifically have been for one year assigned to the capital projects clean-up effort which was really a result of the question from the senators and this committee previously on problems with managing our capital projects. You have a handout there basically of the status of our project as of the 27th of Septeml ... I have a kind of a flip-chart presentation here. I have two things today, two emphases. One is to bring you up to date where we are, what we have done so far and the second is to once again like we have in the past, come to the committee and ask for some help in the approach that we doing, we are not asking for money to do that, but we are at a crossroads where we need to know if the type of solution is basically the type of thing that the senators,

this committee can at least understand and endorse. And so if there's no other questions I can go right into my presentation.

Moss: I appreciate it very much if you would Jim.

Merrill: I'm not much of an artist but...in honor of the railroad, you see that we have a problem here. We have come here, but the other track is down here, and you might say that this side is where we have the information and now we have to...

Faiks: I wish you wouldn't have used the railroad for this little example of your accounting problems.

Merrill: I really didn't realize it until I sat back there...

Faiks: You see how sensitive we are on this!

Merrill: When I heard about moving money from one account to the other, you need CPC, you need the Capital Projects Clean-Up Committee and I'm not volunteering though, remember that.

Faiks: Listen you guys are going to go department to department, you know Fish & Game has the same problem, doesn't it, Bettye?

Merrill: Health & Social Services

Fahrenkamp: Oh God, don't ever volunteer for HESS, you'll be there the rest of your life.

Merrill: But we do have the problem that you're well aware of, and we do have to thank you from the Department for the help that you've given. You have been a big help and we'd like to bring you up to date on what we're planning now to kind of wind it up. The problem is we're here, we've got to get through there, and that's the problem as we're well aware. We have the information, how do we understand what we have and how do you understand what we have. The approach, you see, and the light is red here (referring to flip chart). The first thing I want to tell you that we have discovered, without a hundred years and a hundred accountants, and I saved the little newspaper article, I wish I had it with me, it came from Argentina, where right now there is a hundred civil servants pawing through six foot stacks of papers trying to figure out how much they owe. They don't know whether they own $20 billion or $48 billion.

Faiks: You're not comparing us to the Argentines, are you?

Merrill: No! But I do want to make the point to the committee that there is no practical way, both timewise and cost-effectiveness-wise, to make a strictly accounting reconciliation.

Fahrenkamp: You couldn't make an accounting reconciliation if you were here for the next hundred years.

Merrill: That's right. And that's, that is the first emphasis that I'd like to have understanding on, that we cannot make, practically, an accounting reconciliation.

Moss: That's all past the bench now.

Faiks: How much money are you short in making that reconciliation, are you going to tell us that or is that three pages down after...?

Merrill: Well I'm going to tell you how we're going to get there. We have the information, it will be coming to you in report form, in maybe less than three months. Okay? But you be aware of that.

Faiks: Now what's the bottom line? How much, what's the gap there in your tracks?

Merrill: One thing I can tell you is that we had when we started $45 million dollars worth of projects overexpended. We have reduced that, without extra money, down to $10 million by requiring them to straighten up their records. We feel we can get a lot closer than that. We do know we have a stack of bills on the table that can't be paid, and those will be _____ to the legislature in form over a couple months.

Faiks: How much is that? Now we're talking hard politics.

Merrill: It's more than a million.

Faiks: Is it more than ten?

Merrill: My guess it's in between

Fahrenkamp: Is it bigger than a breadbasket?

Merrill: The second thing is you can't make an accounting reconciliation, that our reconciliation that we're proposing to the committee and asking for guidance on too, requires some understanding of the problem and informed judgment and the use of summary type data...

Fahrenkamp: Wait a minute. Draw me a picture.

Merrill: Okay. Summary type data is something like this. Take the 1980 bond issue. It has right now 497 active projects yet in it. Each one of them could be considered a line item appropriation. We may not be able to do an accounting reconciliation on each onebut in summary we can say this is how much money was in the bond issue, and this is how much we've spent, we've closed these projects, this is what it

will take to complete the rest. That is summary type data that we've been able to get. We can't in many cases pin it down to the individual project. We are looking into every project to whether we have met the legislative intent of the project, and this is quite revealing to us, and in our statement that we have there we've used something called conformity factors, where we will state that we in fact met legislative intent or we did not meet it in this area. Conformity factors is part of the report that will be coming to you, taken in what you as a legislator intended that project to do.

Abood: Mr. Chairman, if I may. It's very startling to you when you find out what you're talking about in the legislative intent when there have been very few pieces of legislation or very few appropriations that hasn't violated the legislative intent, so how do you know what that legislative intent is if it's been changed so many times...to conform to what they wanted to do regardless of legislative intent.

Merrill: We're going back to the commission to which is commonly called in our language the form 35, 35_____...

Abood: That's where the startling part is coming in.

Merrill: I know that, but it's only in many cases the only intent that was originally put down and we know that legislative intent is sometimes not very clear for us to determine. And the last thing on our approach is to put in place procedures not to do it again, and that I think is important for you to know. One of the questions that you might is why can't we make an accounting solution. As you can see the railroad here, there's only one common rail on this track, and the other two tracks don't meet.

Fahrenkamp: That's due to the differences in the accounting system, the differences in practices and changes down the line in government, right?

Merrill: Right. One of them is that in the state accounting system, in PBA, it's only balanced forward every year. We run from inception to date, and so we're always in a problem of trying to make things match, and we don't match and we didn't match significantly on June 30th and we're now trying to find out why.

Fahrenkamp: Did you find that account that things used to be stuck into when they didn't know where to put them and wanted to hold it over, has that been straightened out?

Merrill: The "M" account, that you are well aware of. They will be addressed what they are and maybe not totally accounted for but they will be addressed the best we can on that. The reason here that the funding side, the state accounting

system, only carries total dollars regardless of what the legislation. The legislation says you have total dollars made up of so many dollars of general fund and so many dollars of other. The state accounting system only takes a total and tracks that, regardless of what kind of money it is. Our own accounting system...

Moss: Does that include the funny money?

Merrill: This is where the funny money comes from. Because our own accounting system then takes this general fund here and breaks it down into whether it's match money to go with the federal money, and that looks really good, and that becomes into what we called non-participating or participating. Now, when we go out to spend it in the operations, we collect cost by project and it has more than one appropriation in it, it loses it's identity of where the money, of what appropriation the money came out of. It goes up to our accounting and we have something called the "ML", the missing link that allow us to track through and say we didn't spend all of the general fund portion here, or we spent more general fund and less of this. That's your funny money. We have a solution for that which is, which will bring materiality, if you're an accountant you know what that term means. It means they can't reconcile exactly, but they can get it close enough to where it's not material anymore. We feel that we can bring it within the limits of materiality by the process that I'll explain to you. Now the solution. Remember...

Moss: Can I ask you a question Jim? If this thing works out it could be applied to not only DOT but to other departments as well, couldn't it?

Merrill: The same types of problems exist because of being with the same accounting problems.

Abood: If I may. Isn't there some, is it the legislator's position or job to set forth regulations or statutes that prevent the different agencies from doing this or is this strictly an in-house, DOT if you will, using that as an example, can they do anything they want to do with these funds? Is there anything legislatively that we could do to prevent that. As an example, appropriations within appropriations, moving those funds around which is against the statute to start with. But they do it. Now what's going to prevent that?

Merrill: The only thing that's going to prevent anything like that is basically a control system that we have, I'll be talking in a minute about that, putting in place and _____. I can tell you this our commissioner is very concerned about this himself, and I'm sure the Administration is. One of the things is you as a legislature have recognized this by line item appropriating so we can't theoretically put more than

one appropriation in a project. The matter of fact is that we have put other appropriations in projects and that's the problem because we lose the identity of which one of the appropriations it went to. As an example, in one of the bond issues there is a project right here in Anchorage that the bills that we paid were $5.2 million dollars, this is just last spring, May, the bills were $5.2 million dollars paid out of the bond issue. When the federal receipt came back, the federal money, the check, it was deposited to the general fund, which means now when you get the general fund, and you get back in session, you say we have a surplus in the general fund this year, you're really reappropriating the money that belongs in the bond issue.

Moss: It's already been appropriated.

Merrill: It's a bond issue appropriated, what it's going to do is, and the thing that we're determining is, what's the effect on the bond balance, the cash balance in the bond. It could mean that some of the projects started in that bond issue will in fact be short of money. So there is something that is not controlled anywhere in the legislation, anywhere in DOT, anywhere in the Dept. of Revenue, anywhere in the Department _____. There is a major flaw that was uncovered in our own system and we're taking action on that. Anyway, our solution.

Fahrenkamp: There was a project in Fairbanks, maybe six years ago, maybe more. Okay. It was funded by the legislature through DOT. DOT in its wisdom decided it shouldn't be done so they did something else with it. It was funded again, DOT in its wisdom decided it shouldn't be done, they did it again. To this date it hasn't been done, at this time if it were done it would cost eight times what it would have, in fact it's prohibitive now. What recourse if any do we have on that, and is that kind of thing still going to be able to go on.

Merrill: One of the things to answer your first part is that we have identified, as of the 31st of August, some $897 million dollars worth of authorization - could be general fund, or federal authorization that you have given us for projects that we have not yet started, or in other words started by putting the project in our own accounting system, or that we're never going to start, we just have never programmed them to start. There's $897 million dollars. What we are doing in the report is that we are right now accounting for that - the projects that haven't been started, the projects that we are never going to start and give a reason why. That will be in the report, and that should interesting in some projects.

Fahrenkamp: It should be in the interest of some legislators who

sweated blood to get some of those projects that are not going to start.

Merrill: Representative Cato, everytime I see her, asks about her Lackinaw Bridge. That is in that category, that it was funded, properly funded again, and the money was moved, in this case to the Juneau-Douglas bridge. So all that money's gone. The authorization's still there, we have just never programmed it into our own accounting system to start work on.

Abood: Where's the money then?

Merrill: It's sitting restricted in the state accounting system. Now whether it, the thing is...

Moss: What you're saying is we've got $800 and something million bucks laying somewhere we ain't spent?

Merrill: Of authorizations, no money. Well that's the thing that we are determining, how much of it is actually general fund, how much of it is federal authorization.

Fahrenkamp: You'll find that there's a hell of a bunch in the general fund and a hell of a bunch of it that was never collected from the federal government, simply because we didn't do our damn paperwork.

Abood: Two years ago, three years ago, there was over a billion dollars in DOT that was unaccounted for, that they had money that was appropriated, and there it sat.

Merrill: That figure is now $897 as of the end of August. Since I surfaced this issue and got people working on it to try to account for that, what projects did the legislature authorize for that authorization. We have programmed an additional 105 million of them so this figures down right now, because we've started to put some emphasis on that. In our report we will be accounting for all of the funding that's been restricted in there and never put to a project...that I can find.

Moss: $897 million.

Faiks: $897 million. You're kidding!

Merrill: Don't panic on that, Senator. Make them give you the facts first. We are identifying, within that is $50 million dollars for a...

Faiks: No wonder you have time to make little colored pictures.

Merrill: Within that money is $50 million dollars that was

appropriated for a replacement for the TUSTUMENA, and it was basically all federal money. It's highly unlikely that the Department is going to put a third of its federal money into one project in one year but those are the kinds of projects...

Fahrenkamp: That kind of depends on whether Bill Ray's finance chairman or not.

Merrill: You can comment on that, I can't.

Faiks: Somebody ought to.

Moss: In other words what you're saying we've been allocated $50 million for the TUSTUMENA already.

Merrill: The authorization is there, if it was set up and the feds approved it now, there's nothing says we couldn't start working on it.

Faiks: And the TUSTUMENA, that's our highway dollars, isn't it, I mean that's part of our interstate highway system, so in the southern region, they don't get $50 million dollars a year, do they?

Merrill: No, about ten.

Faiks: That's right, because we get $50 million right here in River City for all of southcentral Alaska.

Merrill: Let me tell you one of the benefits of surfacing this and trying to account what were the projects that the legislature intended to be done with that. It allows you to come back and reprioritize that and that will...

Moss: In other words, what you're saying Jim, out of that $857 million, the TUSTUMENA is one of them, do we want to keep that up there as a number one, two, three or four priority? That's what we need to tell you all again, right?

Merrill: I'd like to get it out of our books, because you know, every year we have to look at $800 million dollars.

Faiks: I bet those legislators that aren't there anymore that have the projects in are the first one to go.

Merrill: Anyway. But we are accounting that will be in the report, as best as we can identify what the project, legislative intent it, what our status on those projects are.

Fahrenkamp: One question. Now that $800 million that's somewhere, that's at least appropriated, how much is that under what it would take to do all the jobs that have been appropriated and don't have enough money to do.

Merrill: I don't know that figure but I can tell you know that you can't buy a TUSTUMENA for $50 million bucks.

Fahrenkamp: Well, I know that but...

Merrill: And I am not a naval architect but I...

Fahrenkamp: ...it sounds like you've got a whole heap of money, and yet, there might be, we'll pick up a round figure, $11, $12, $15 million, $100 million, $1 billion, oh give or take a 0 or two, that had been authorized, but there's not enough money yet to do. huh?

Merrill: My own person opinion is that the bulk of that is excess federal authorization. We may be looking at maybe $100 million dollars worth of general fund, don't hold me to those figures, but I have a feeling it's about that amount. The rest of it is excess federal authorization that we've asked for, and you've given us.

Faiks: Excuse me for having to run out for a phone call, maybe somebody's already asked this question, are you going to be able to give us the project that was authorized, what year it was authorized, how much it was supposed to be...

Merrill: We are accounting back, I used summary type data, I can't, maybe not be able to get back to the very line item in the appropriation. Some of them are just allocations where it says go build highways, but I will take it back to the legislation, session law, chapter and year.

Faiks: I guess if it says it's a block grant to go build highways, then that would be fairly easy to take care of. What we're having trouble with is go put $5 million dollars into the Steese Highway...

Merrill: Or LaTouche.

Faiks: Right, or LaTouche, okay. So then we'll have to...but that might have been ten years ago, or seven years ago or whatever and maybe the Steese Highway has already had it's upgrade in that spot. We have to have the tools to be able to decide what gets dropped off and what doesn't.

Merrill: We are going to, the best we can, give that, and what the present, current status of it is...we hope to surface some kind of an add/delete bill to you.

Fahrenkamp: I tell you one thing - we know a hell of a lot more than we did when you started this.

Merrill: So do I, and if I knew it, I don't think I'd have done it, accepted the challenge.

Fahrenkamp: Scared you half to death, wouldn't it?

Merrill: Yeah...our approach. you know I said couldn't do an accounting approach, I can account for all the projects, and we're going to try to account for the scope, the legislative intent, the intent of the bill, interchange, I can account for that. Going to the appropriations, and we can account for the dollars spent on appropriations. Then we come over to the funds...here we have the revenue problem, is that we are trying to determine in the factor the revenue shortfall which will point out the funny money. We're going to do that in summary, because I can't, there's nowhere in our records get back to the individual project.

Abood: Will you be able to tell why the shortfall?

Merrill: I will be able to tell you generally what the main reason is for shortfall, that the project was programmed to spend $10 million dollars state money and $100 million dollars federal money and when it all ended up we spend $20 million dollars of state money, $80 million dollars of federal money and we still hadn't overspent the appropriation. We changed the funding mix of the appropriation just from our spending patterns. This is going to be revealing to the Department how widespread that is too and it is reasonably widespread. And that's why going back to our legislation you always have a total appropriation and you have a funding source. Nowhere have we overspent the total out there, but what we don't know is what have we done to the mix.

Faiks: Why do you need a supplemental if you haven't overspent the total?

Merrill: Because it maybe...

Faiks: Because you have unpaid bills sitting on the...

Merrill: And one other reason, that we may never get the federal money, the feds won't ever participate.

Moss: For what reasons?

Merrill: On of the things is that the work that was done was declared non-participating, or it might have been like the right-of-way on a project here that they said wait a minute, you didn't do it right, and that was $9 million dollars. And if they come back and say they're never going to pay you, the state's going to eat the $9 million dollars, and we have found a lot of that, and we're going to...right in the report so you know exactly where that is. The approach is, and this is where I need some feedback within the next three or four weeks if I can get it. Is this approach, I can't hard-wire between the...in the accounting practices, but I can take all the information in the project, the information

of the appropriation, the summary, and the funds and I can do a threshold analysis and give you what I believe has occurred and the ranges of problems, and like I say we may have spent $10 million dollars more general fund here than was in the mix appropriated on top. That we feel we can do it, and do it in time for when you come back to the next session, that you will have that report in your hand so you can look at it. That is what I need to know, if that kind of approach would answer your questions. You probably wouldn't be happy with it, I don't expect you to be happy, but at least you would understand why I feel I have to go that way.

Fahrenkamp: Now you and I both know, or let's say suppose, that there's been a project here DOT's doing, oh well, they just lack $13 million of having enough, or $20 million of having enough, or whatever, and we've got this kiddy over here to do this little jobby, so let's just take $13 million of it and cash it...

Merrill: From what I heard from the railroad this afternoon I would go ask them how they do it. It's about the same. It has happened in the past, traditionally, that you've just gone down to the next fund source. However that is not a practice now.

Fahrenkamp: Hopefully not.

Merrill: One of the reasons is that your line item appropriation, however, mistakes are made, I just saw one the other day where there was on the same page as Chapter 24 which was just last year's session was a totally state funded project and right below it was a federal aid project. Guess where the federal aid expenditure was on the state project. In this case it was $124 thousand dollars. The feds will never get billed for that. Now if that had gone undetected through next June 30th, we could not have corrected it, and that's what's happened in the past, that nobody ever looked, and corrected those. We're putting into place now an effort to make sure that that does not...

Moss: Would the FIS do this?

Merrill: FIS will, FIS is only the computer part of it, but it would help.

Moss: How come they aren't proceeding on with FIS?

Merrill: FIS has had some implementation problems that has delayed it.

Moss: Is it true they spent $4 million dollars?

Merrill: I'm unsure of that.

Moss: I just want to get that on record.

Merrill: I'm unsure of that. We have accomplished some firsts in this effort that I'm proud of, and I think that you as a committee ought to be proud of too because you were involved too. We have closed 8351 projects that were always there open...and involved in doing this has become an increased knowledge and emphasis in the department that the old days are gone, that accountability is now part of the game. As I said before we have reduced the dollars of overexpended project budgets - from $45 million to below $10 right now, and we're going to get that even more. We have developed new report capability to allow us to pinpoint our problems before they get where we can't do anything about them. We call the annunciators. Pappy, you're an old airplane driver like I am. Annunciators always is a little light that says you've got some problems, and hopefully in time that you can correct. One of the annunciators was the three red lights and three white lights that says red over white, airman delight, white over red, airman dead. Anyway, we have done this in depth study, and one of the things that I'm very pleased about is the teamwork and the understanding that we have developed with the legislature and other departments over this, it's no longer a hush-hush subject, we are starting to level with each other and there's becoming solutions to problems, There has been an agreement which has not happened in the department before, the agreement there is a problem and that we can do something about, and I think that's an important one, recognizing that we had the problem, and that we can do something about it. Now, we feel that we've gone over this piece right up here right now because we're in the process of writing a file report right now to the administration of which you will get a copy. We have one more little hole to go across here, and I hope that we don't fall into that, and that is, that we're going to have to be able to maintain our data until we have a new system in place to out it in for caretaking. That system is not there yet. It was originally scheduled for October 1 and it's somewhere down the future yet.

Moss: What do you call that?

Merrill: That's FIS. What we have done at CPC and we are going to be incorporated in the department and it will be an ongoing affair.

Moss: Let me get this straight before you go any further past that little hole there. FIS has got to be online to make sure it's corrected.

Merrill: There is really no pure way to spit out whether the money is general fund or other that you spend without having that capability. We are starting to keep records on mini-computers that allow us to keep track...that's part of our

effort here. You can see up here, the little man here he's looking here and there's been a break in the hitch between the system and integrity and we up here, we didn't do it in the first place, we're not admitting anything but we promise not to do it again. This is what we're going to what we have in place now as control feature. We have our reports that are much more accurate and more timely and point out the problem areas to us quickly. We are now put in what we call alpha-control. For instance if a charge is charged, if a bill is charged to the wrong project, we have a way to catch it, and the reason I caught this other one... is because I was reviewing one of these alpha-control and there it was, it stands out. We have established in each region what we call the project control groups comprised of five to seven people, who watch the projects, their funding, and their expenditure, whether they're in scope or out of scope, and those kind of things. These are all human type controls because we do not have any really computer control available to us at this time. Training, quality assurance we are assigning responsibility now to where we know who has the responsibility, this isn't everybody's job now, it is an assigned responsibility and we have, by using these, we have the ability now to validate the information that flows within our system. Now in closing you see the little train. It is just starting over the hump, and we not only think we can we know we can accomplish it if we can use the approach that we have of being able to take the three areas - the projects, the appropriation and the funds and do a real professional analysis job and then present summary type data too.

Fahrenkamp: This time it's summary type data. Now if we get this...but if after all this work that you've done, which has been very encouraging to me, we have this system in place, will we from now on have to go to analysis type or can we have absolute data that will check project against project, funds against funds, or is that a dream that will never happen?

Merrill: The state has a new accounting system that is scheduled to go on-line the first of July. Within that accounting system is the ability to track other than total practice fund mix that you have in the legislature. That would be the single biggest help that we have, to be able to know whether we've spent the general fund portion of that appropriation. Right now there's nothing controls that, other than humans looking at that. We also feel that these human controls that I have just been over will have to continue on. We still have haven't replaced the human overlooking what the machine does, because the machine will accept anything. So we will continue these human elements in our controls which is new to our department and I feel that you will see a progressively better accuracy where we can do an accounting reconciliation whenever you need it. Hopefully to the point that

the Legislature would then have enough confidence in our project management ability to where we would once again be able to have a little more leeway than we now have with line-item appropriations. This is causing us some problems, but it's very understandable why the Legislature has done that.

Fahrenkamp: If we hadn't done that we'd never get there. Can we tell now from your work, excuse me Mr. Chairman, can we tell now from what's in this report that's coming up, would we be able to say okay, what's done did and gone, I hope it doesn't happen anymore, but there's been $3 million dollars worth of federal funding that should have been applied for that was never applied for by the state and received?

Merrill: Yes. We have that ability now and in fact it's on track. We run anywhere from $25 to $35 million dollars of unbilled federal receipts that's in the process. We're reasonably sure, I've checked back to 1972 which is the last records I could find available, and it looks that we have received all the federal money we've billed them for.

Fahrenkamp: Yeah, but did we bill them for all we were supposed to bill them for.

Merrill: That's the problem that I can't address, only in summary type data, and I have to do it on the revenue side. I have to say okay, in this fund, Fund 474 for instance, we spent money, so many million dollars that should have been federal aid. How much did we receive? And we're not going to get data out of that because of the problem I just told you about where they deposited the money to the wrong fund, but at least we'll have some summary data. One of the other things that we will have as of October 1, a very accurate count of the dollars it's going to take to complete every active project we have, and the type of money, whether it's general fund or federal money. We'll have a very accurate account and we will keep that up, obtaining that every three months, until we have FIS up to where we don't need to do that anymore.

Moss: Now will that carry us back through all of our previous projects that we know of in history?

Merrill: I'm going back as far as there's records. I know now that records in many areas are incomplete, because there has been lapses...

Moss: I know that at times when Casey was over there he was wanting to go back to '82, '83, as far as he'd want to go back to bring this data up to date.

Merrill: What we're doing is dividing them into two spots. We're

going to identify every project that's in the records somewhere as completed and done, and that will be in the appendix, there's going to be pages and pages. Then we're going to identify active projects by project and how much money was set up and what's the status of that project.

Moss: You got some kind of time frame on that?

Merrill: Our report to our executive, to our commissioner in draft form, we are expecting around the 15th of December, and then you can expect the published document maybe about a month later. This is, the reason we can meet this time schedule is because we have not had to do a strictly accounting reconciliation. Summary data is much easier and I...

Fahrenkamp: You do have to do that strictly accounting type stuff which would leave big holes as well, wouldn't it?

Merrill: Yes. What it would do is it wouldn't be any more accurate than the summary because of the holes in the data. And we have a consultant, Arnold Young, from one of the big accounting firms, who also agrees that this approach probably better than a strictly accounting approach.

Fahrenkamp: Well, Mr. Chairman, I've got to say again, even though it's summary data, I'm very encouraged to see this coming on line.

Moss: (inaudible)...I'm kind of proud of it myself.

Merrill: Any successes we've had so far has been because of this committee, has been willing to work with us on this, and I think it speaks well for the cooperation to the department on this project. Both are benefit.

Moss: Anything else.

Fahrenkamp: Let's go home. Unless he needs anything from us. What do you need from us?

Merrill: The only thing that I would need is some feedback is on the approach that I can't do a strictly accounting and that this would be an approach at least you'd be willing to look at.

Fahrenkamp: What you really expect is to hear some yelling about it, right?

Merrill: Yeah.

Fahrenkamp: Well all I can tell you is that... as I know how, because I don't know how you can do anything else unless you've got fifty years to do it in.

Merrill: And that's the conclusion...

Fahrenkamp: If you did do it strictly accounting then somebody's going to do a witch hunt.

Merrill: Oh yeah, there would be jail talk, and that's really not what we've been out to do.

Fahrenkamp: What we set out to do is get this thing straightened up.

Merrill: I do appreciate the interest. This thing could have died if it hadn't been for the commissioner and your interest as the committee. It hasn't been totally an easy road internally.

Fahrenkamp: Have you had any encouragement on the part of any of the other agencies or are they knowledgeable about what you're doing, have you had any encouragement from the agencies wanting this type of approach taken into their accounting?

Merrill: We have not contacted them, other than I know they do have basically the same problem, that could be approached the same way.

Moss: This is one of the biggest problems we had in the department, Bettye, when you look at it. Actually if this system works here, it could be applied to any other department.

Fahrenkamp: We could get them up to snuff and start somewhere clean.

Merrill: The one thing, Senator, that's got me a little concerned, that we have set up these human controls that we're going to try to keep the data clean now, but that has to be always a little pressure, always emphasis maintained, the human has a tendency to relax. There is nothing in the system developed as we have today that will allow it to, set it to motion and forget it. Our commissioner is not willing to do that, he's not willing to set it in motion and forget it, we stress that he is going to keep the pressure on.

Fahrenkamp: I would hope that your commissioner would encourage other commissioners to look at the...and to share with them what he feels about the value of this kind of approach, because I know we've had good people to leave government agencies for the fear that, good Lord, the way some of the accounting processes are, somebody's going to go to jail, and it's not going to be me, I quit.

Merrill: I thought about that myself.

Chairman Moss adjourned the meeting.

CAPITAL PROJECTS CLEANUP

STATUS 9/27/84

The Capital Projects Cleanup (CPC) effort was started in November 1983 as a result of the Arthur Young Inc. Capital Projects Assumptive audit of October 1983. The CPC team is now preparing the Final Report of its year long effort.

Important Accomplishments

The CPC effort has some significant accomplishments, both as a direct result and as indirect spinoff.

1. The universe of projects in the system has been significantly reduced. 8,351 projects or project phases have been closed. Our project computer reports are now 3/4 inch thick instead of 3 1/2 inches. All projects have been assigned to the responsible Region and the Departments' reports are now available by Region. Special exception reports have been developed to highlight problems and errors.

2. Increased knowledge and awareness of good project management techniques and responsibilities. Projects with expenditures in excess of budget have been reduced from $45,509,539 to less than $10,000,000.

3. A detailed look into the idiosyncrocies of FMS and our whole project management and accounting system.

4. Confirmation of the continuing belief that our present "system" is not serving us well. This knowledge has strengthened the development of the Department's new Project accounting system (F.I.S.) and the Project Control Groups in the Region.

5. Development of an integrated approach to reconciliation of the Department's present project accounting system which would be acceptable to most interested parties. This involves a three element program accountability analysis.

6. Better understanding and teamwork between various Departments and the Legislature concerning the whole Capital Projects problem area. These various groups have become part of the solution, not critical onlookers.

CPC OBJECTIVES

The CPC Process and Procedures manual published in January of 1984 listed five objectives of our effort. The Final Report will show that these objectives either can be or have already been met by the Department.

Objectives

1. Restore confidence in Department of Transportation and Public Facilities (DOT&PF) ability to effectively manage Capital projects.

2. Separate the Department's C.I.P. program of work initially into active and inactive categories for analysis and accountability of current and previous C.I.P. activity. Subsequent refinements of status will place all projects in active, complete, closed, and unclassified classifications.

3. Find a suitable way to account for Departmental responsibilities in the past which will allow those old issues to be resolved.

4. Provide a "cross walk" to F.I.S. by idenfitying the projects and information reliability to be included in the new system.

5. Identify criteria, policy, procedures and training needed for effective future project management.

These five objectives will be thoroughly discussed with recommendations in the report.

CPC FINAL REPORT FORMAT

The CPC Final Report will contain five main sections and an extensive, detailed Appendix. The Report will include these sections:

1. CPC Objectives

   This section will show how the CPC effort has met the objectives.

2. CPC Process

   This section will build confidence in the solution and provide a detailed history of the effort which will provide an audit outline for future use by providing a complete outline of the whole CPC effort, the solution that the Department has developed, its strenghts, weaknesses, etc..

3. PBA/FMS Reconciliation

   This section will establish the reliability of FMS in relationship to PBA. Some old problems will be discussed and the conclusions that CPC arrived at will be detailed.

4. Program Accountability

   This section will be a summary type presentation of how well the Department has met its obligations. The detailed data will be cross-referenced from the Appendix. Use of charts and graphs will be extensive.

CPC will provide program accountability using three basic methods:

By Project: This will treat projects as a single entity regardless of funding source. This will show scope accomplishment including conformity factors.

By Appropriation: This method will provide the accountablity (or lack of) based on approriations.

By Fund: This method will provide the accountability by both project and appropriation within the designated fund.

The Program Accountability section will concentrate on the strengths of DOT&PF program/project management while readily admitting the weakness and unreconciliable problems. This section will be strictly "up beat" with concentration on understanding and acceptance. The three basic methods will be brought together in a rational analyses which will show the overall condition and accountability of the C.I.P. program activities.

The Program Accountability Section will also address program irregularities, program status, fund status and revenue questions. Appendices will be correlated to provide information in detail for those who wish the backup.

5. Corrective Action and Time Schedule

This section will detail the actions recommended by CPC using three general groupings.

a) Departmental

This group of recommendations and corrective actions including implementation schedules will cover items such as:
- program accountability recommendations
- system integrity and development
- recommended supplementals, etc.
- training
- policy, procedures
- Quality Assurance and Control
- organizational needs

b) Administration (other Departments of State)

This section will discuss interrelationships and recommendations with units such as OMB, DOA Finance, etc. Items such as:
- State Accounting System
- Revenue accountability
- RSA's etc.

c) Legislative

This section will present and discuss CPC recommendations for Legislative Actions. Items such as:
- Revenue
- C.I.P. implementation problems due to structure of appropirations, etc.
- Capital projects flexibility

The CPC effort will also produce for the Commissioner a Confidential Executive Report which will speak frankly about any strictly in-house items which he should be aware of.

This report can include items such as:
- confidential personnel matters
- inter-intra Departmental relationships and problems
- Legislative Recommednations
- Policy Recommendations

Time Schedule

The CPC Final Report will be ready for detailed Executive review by December 15, 1984. The Report data will reflect the C.I.P. status as of October 1, 1984. It is intended that the Final Report will be made available soon after the final Executive approval.

C P C

CAPITAL PROJECTS CLEANUP

INTERIM REPORT

No. 1

State of Alaska
Department of Transportation
& Public Facilities

CAPITAL PROJECTS CLEANUP COMMITTEE
INTERIM REPORT #1

This report is the first of several planned interim reports which will provide status of the project and outline the next steps needed in the Capital Projects Cleanup (CPC) effort. Included in this report will be problem identification, recommended solutions, and listing of resources needed to successfully keep the project on target and on schedule.

I. CPC PROJECT STATUS: (As of 4/1/84)

The major emphasis of the CPC to date has been focused on three principle areas:

1. a) classification of all projects listed as active and open in FMS and PDS into four categories (element III. See CPC Process and Procedures Manual for definitions).
    1) active
    2) complete
    3) closed
    4) unclassified
   b) proper assignment of Regional or Unit responsibility
   c) freezing "closed" projects in FMS (element IV)
2. determination of fund source status (elements V and VI)
3. verification of PBA/FMS reconciliations (elements I and II)

The effort in classification has been very successful. The areas where significant gains can be made have been highlighted and recommendations for these actions are contained in the recommendations section of this report.

CLASSIFICATION RESULTS

CLASSIFICATION	TOTAL #	% OF TOTAL	NUMBER OF PROJECTS/PHASES IN CLASSIFICAATION BY REGION OR UNIT RESPONSIBILITY							
			CENTRAL	NORTHERN	SE	NOME	VALDEZ	STATEWIDE	MHS	STATEWIDE
			1	2	3	4	5	6	7	8
Active	1360	45%	593	491	195	10	7	20	41	3
Complete	552	19%	388	94	56	3	3	2	6	0
Closed	986	34%	272	395	227	28	36	11	17	0
Unclassified	52	2%	13	18	11	3	1	4	0	2
TOTAL	2950	100%	1266	998	489	44	47	37	64	5

* The CPC had concentrated its efforts on FMS cleanup as the timing, priority, relationship to PBA, and resources available do not allow full operations on both FMS and PDS at this time. This does not mean that the PDS effort is dropped, only delayed until FMS is cleared up. In this interim, on-going activities in PDS should be coordinated with the results of the CPC classification and cleanup effort.

ESTIMATED COSTS TO CLOSE

CLASSIFICATION	TOTAL $(1,000)	REGION OR UNIT RESPONSIBILITY $(1,000)							
		CENTRAL	NORTHERN	SE	NOME	VALDEZ	STATEWIDE	MHS	STATEWIDE
		1	2	3	4	5	6	7	8
Active	453,800	194,458	130,552	60,021	464	128	24,666	42,634	897
Complete	28,409	20,747	2,343	1,643	203	43	2,850	580	-0-
TOTAL	482,209	215,205	132,875	61,664	667	171	27,516	43,214	897

* Does not include liabilities in 52 unclassified projects

ON LINE FMS ACTIVITY

Using the information supplied during the Regional CPC classification effort, 954 of the 986 projects or project phases identified as closed were "frozen" in the on-system FMS. This freezing action was accomplished by placing 00/00/00 as a cutoff date and where fund resources allow, funding the project equal to expenditures. This action will undoubtedly increase the number of transactions on the error register due to "after cutoff date." We plan to let these errors accumulate during April. A "window" will be opened during May for clearance of the error register. During this time period, CPC intends to correct all the "after cutoff date" errors caused by the CPC closure effort. This is a manual process which will impact the Headquarters unit. No regional effort will be required for this action. Other error types must also be cleared. This will be a regional responsibility.

The effect on the error register so far has been negligible, but we expect the April 30, 1984 errors "after cutoff date" will show a substantial increase.

TYPE OF ERROR	# OF ERRORS 2/29/84	# OF ERRORS 3/31/84
After cutoff date	1472	1339

DETERMINATION OF FUND SOURCE STATUS

Determination of fund source status has been one of the most difficult and labor intensive efforts. While some of the information already resided within the FMS data base, considerable effort has been expended to correlate this information to the original legislation and fund type. This effort involved a project-by-project search of the legislation, correlation of fund type (billable versus non-billable) with programmatic records and legislative appropriations. This effort is still in progress. Due to the magnitude of the difficulties encountered, additional resources from other units will be needed to verify and correct the data. This effort is the highest priority within CPC at this time as the data will also be required for FIS implementation and loading.

PBA/FMS RECONCILIATIONS

Elements I and II of the CPC task required verification of PBA/FMS reconciliation. The CPC team has monitored these elements for three months and has concluded that for all practical purposes PBA and FMS are in basic balance. By the term "in balance" it must be understood this represents an accounting balance which reflects the net collocode status in PBA/FMS.

NET ACCOUNTING BALANCE DIFFERENCE BETWEEN PBA AND FMS

DATE	AMOUNT
1/31/84	$ 5,132.00
2/29/84	$ 4,651.27
3/31/84	$ 4,674.02

The matter of "reconciliation" to the project level is another problem. When documents do not pass the edit checks built into FMS, it must be remembered that PBA already paid the bill and charged the collocode. When the document tries to process in FMS and cannot, it goes to errors. The costs already paid by PBA are placed in clearing accounts such as Z99996 and the collocodes in both FMS and PBA are then in an "accounting balance" but have not been reconciled to a specific project. If the error is ultimately identified to a specific project, it is removed from the error clearing accounts and charged to the project by manual adjustment. If it remains uncleared, project level reconciliation has not occurred.

The question of project specific reconciliation then becomes a matter of cost benefit. It makes very little sense to spend $100 to "reconcile" $5 to the specific project. Where federal aid projects are involved, these uncleared costs will never be reimbursed by federal aid. The general fund has already paid the bill. This may contribute to the "funny money" problem.

As of 3/31/84, the scope of these "unreconciled project specific" expenditures amounts to $39,275,057. This amount resides in various M and Z accounts in FMS. $16,001,892 of the total $39,275,057 of "unreconciled" expenditures is in the M90001 pre-FMS Accounting Transactions account. Some of this amount may represent actual unrecorded expenditures to specific projects. However, this condition may not be the case if the original expenditures were actually recorded to a project which has been lapsed improperly from the system. It would be difficult to determine the exact status of these "unreconciled" project specific expenditures.

A policy decision is needed relative to the resouces required to resolve this "unreconciled" project specific expenditure problem.

II. ACCOMPLISHMENTS AND BENEFITS OF THE CPC EFFORT (To 4/1/84)

The CPC effort so far has made several significant contributions to the Department's program/project management effort:

1. For the first time, all active projects have a Regional or Unit responsibility assignment. This has been previously impossible due to the many statewide programs and appropriations. Early in April, the first regionalized ROI-TBR-1615 (suppressed version) will be available to the CPC Regional Coordinator and Project Control Groups. This will allow regions to have a 1615 with just their projects shown.
2. Closing of 983 projects/phases which were previously identified "active" in FMS.
3. In addition to closing projects, the CPC has determined the scope of our "completed" project problem by categorizing those unresolved liabilities which do not allow closing of the project.

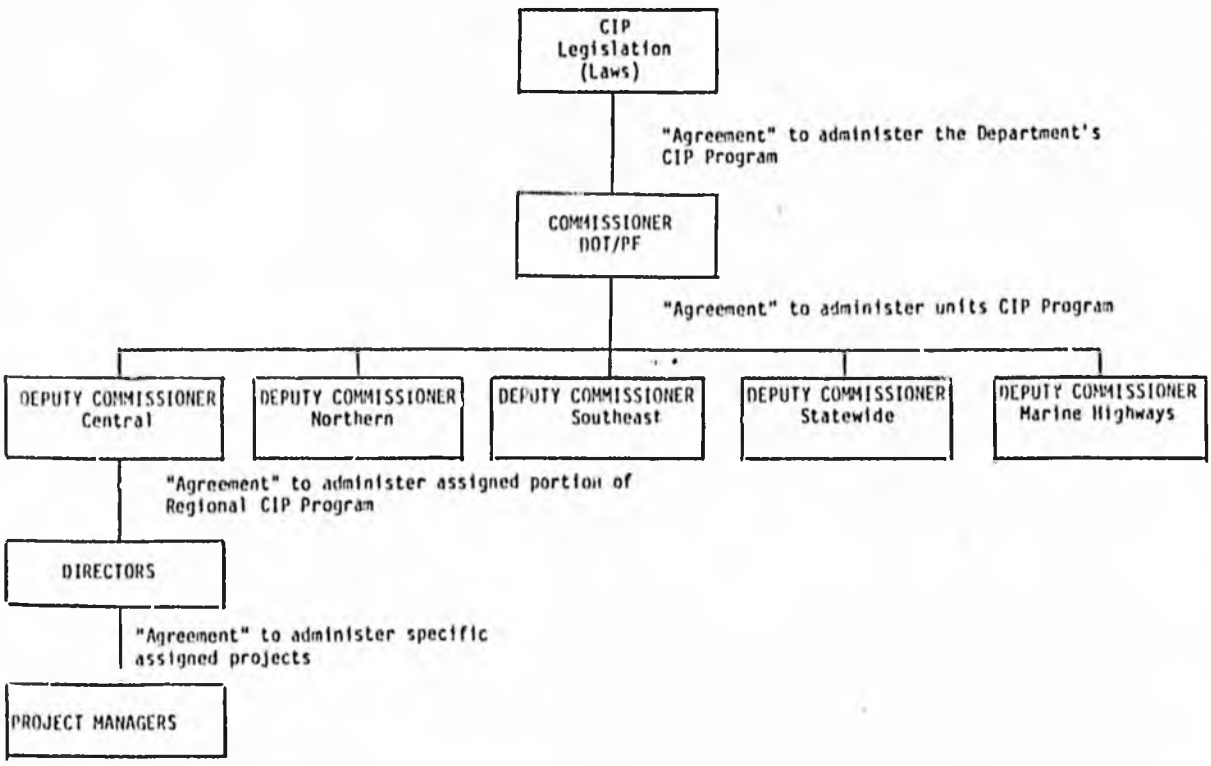
4. The CPC effort has identified the estimated costs-to-close of all active and completed projects. During the classification effort, costs-to-close for the active and completed projects were estimated to be $482,209.000 as of 1/31/84.

5. The CPC effort has identified several short-term objectives which should be accomplished before year-end closing and FIS startup:

    a. determination of fund source status (billable and non-billable),
    b. correction of a serious over-programming situation (see page 8),
    c. identification of training, policy, and procedure needs,
    d. correction of project overexpenditures, both in individual collocodes and projects level.

    These items will be discussed in the recommendations section.

6. Possibly more important than the information gained from the CPC effort is the renewed interest in program/project management. The CPC found a great enthusiasm among all DOT/PF personnel for development of a dynamic and on-going operation to overcome our program/project management problems. This opportunity must not slip away, nor this enthusiasm go unrewarded.



III. RECOMMENDATIONS

The CPC team has several recommendations which we feel must be carried forward. These recommendations will require significant expenditures of resources to accomplish and will impact the Regions and other units. Committment of these resources is essential for continued progress.

The recommendations in this section have been divided into CPC operational recommendations (which are usually short term) and Departmental policy and systems recommendations.

CPC OPERATIONAL

The CPC effort has identified several major problem areas which demand a concentrated effort for correction before full accounting and project reconciliation can be accomplished. The Department has many levels of responsibilities. Some of these responsibilities are internal to the organization and some external. In the program/project management area, these responsibilities can be characterized as a series of "agreements" between certain positions, sections, etc. and higher levels of responsibilities. For Example:

From the simplified diagram given, there are at least four levels of agreements within the Department's CIP program administration. Each of these levels carry basically the same responsibilities: the Commissioner "agrees" to administer the CIP program/projects within scope, budget, and time constraints, if any. This same "agreement" is present between the Directors and their Project Managers only at a more detailed level. The main goal of the CPC effort is to determine if these agreements are still applicable, if the parties are "out-of-agreement", and to correct areas where "out-of-agreements" occur.

CPC has identified projects in each region which are "out-of agreement." "Out-of-agreement" in CPC context is defined as projects or programs which:

1. expenditures have exceeded budgeted or authorized fundings,
2. expenditures exceed individual funding source or type,
3. project scope, etc. is significantly different from the "agreement" with the next level of responsibility.

The CPC effort has identified several major areas where these "out-of-agreement" conditions appear to be present. Other areas of "out-of-agreement" will be covered in later Interim Reports as more detail and corrective action has been identified. These problem areas are:

- A serious, possibly long term, over-programming problem is apparent. On 2/29/84 FMS records indicated a total of $5,845,732 over-programmed in 158 different collocodes. This represents a serious differential between our accounting, programmatic and project budget records. For example, in collocode 24-84-7-001, there is $1,240,180 programmed to specific projects in excess of funding available. There is only one project funded in this collocode...K93511 Fairbanks Flood Control.

The $1,240,180 was placed as a "negative unallocated" in the code to bring it in balance with PBA. The project budget still reflects funding of $9,930,000 with an unencumbered balance of $1,248,581. However, the funding source code as shown in the RO2-TBR-1615 has only $8,401 unencumbered balance. Simply stated, the project thinks it has $1,248,580 when in reality it has only $8,401.

These "negative unallocated" funds must be brought to zero so the project budget accurately reflects the funding available. Of interest on the same chart, the very next code -24-84-7-004 -- also has "negative unallocated" funding of $223,839. This code also reflects similar conditions.

- There are 796 projects/phases with expenditures in excess of budget as indicated by FMS records of 3/31/84. This situation of "negative balances" can be caused by a variety of reasons including data entry errors. In any case, this represents a failure to recognize in the Department's programmatic and budget records the actual funding necessary to offset expenditures which have already occurred.

The 3/31/84 records in FMS show $17,358,221 expenditures in excess budget. This does not mean the appropriation is overexpended. It does indicate, however, a lack of discipline in keeping the project records current. The lack of corrective action indicates an "out-of-agreement" situation. The summary of "out-of-agreements" by regional or unit responsibility are as follows:

REGION #	REGION OR UNIT	# OF PROJECT/PHASE	$EXPENDITURES IN EXCESS OF BUDGETS "AMOUNT OUT OF AGREEMENT"
1	Central	184	$12,988,908
2	Northern	141	813,736
3	Southeast	76	1,213,326
4	Nome	11	44,667
5	Valdez	14	31,829
6	Statewide	9	130,540
7	Marine Highways	8	26,613
8	Statewide Planning	1	5,005
	Headquarters/Financial Management (00/00/00 projects in process of closing)	352	2,103,597
	TOTAL*		$17,358,221

* Included in the $17,358,221 is $1,409,921 expenditures in Departments "16" and "25" and $344,118 in advance Right-of-Way funds (Q Funds) which may or may not be correctable at this time.

Of particular concern in the $17,000,000 total negative balances is the occurrence of expenditures which are not Federal-Aid reimbursable. Within project categories which are usually general-funded (and many times in a single appropriation) there has been $3,200,000 of expenditures in excess of FMS recorded project budgets.

CATEGORIES	$ EXPENDITURES IN EXCESS OF BUDGET
State Funded Highway Projects	$912,377
LSR&T	61,294
Buildings	593,686
Harbors	98,118
RSA and Department Contracts	1,139,845
Special State-Funded Projects	34,743

- There are many active project budgets which have one or more funding codes overexpended in FMS. In many cases, the correction will only involve moving expenditures to another code within the same project.

It is essential that these be corrected before year-end closing. Due to the rolling forward of net balances available in PBA, the Department's ability to correct this problem, in many cases, exists only until about August 15, 1984. After that date, correction will be virtually impossible. The over-expenditures in the project funding collocodes, if not corrected, could have serious consequences on the Department's ability to complete other projects in the same collocodes.

Numerous examples exist which show that collocode over-expenditure can have serious consequences for other projects funded in the same code. For Example:

		COLLOCATION TOTALS:			11,221,506.00	139,950.00	11,075,935.25	5,620.75

The over-expenditure in H00204, Diomede High School, occurred in the same collocode as the St. Michael High School project, project #H00206. The St. Michael High School with a cutoff date of 6/30/85 shows a project balance of $46,109 in collocode 24-88-1-100. The total code has only $5,620 unencumbered balance. Unless the Diomede project expenditures are transferred to 24-88-1-454, an additional funding source for the St. Michael project must be found. The St. Michael project has been put in jeopardy by the over-expenditure in this collocode of the Diomede High School project.

One interesting sidelight brought to light in the CPC cost-to-close effort is an estimate by the region that St. Michael School project #H00206 has cost-to-close of $99,000. If this estimate is correct, the project will also need additional funding to complete.

° To aid in the CPC effort of determining fund source status (elements V and VI), Financial Management has developed a series of reports which will tie each collocode and project to the proper authorization and fund source type (billable and non-billable). Within the Department, there has not been uniformity from one mode to another in how funding sources and expenditures are treated. Expenditures have usually been recorded as billable (participatiing) or non-billable (nonparticipating) but the authorized funding for these expenditures by fund source type has not been correlated in the FMS system with the expenditures. The Department must now validate the data in these reports to determine the true fund status.

This will require considerable effort by the regions and other units but it is essential to the CPC and regular Departmental operations efforts. Benefits of this effort will:

a) provide validated data on fund source status for cross-walking to the new FIS

b) determine if fund type (billable or non-billable) has been over-expended (this information is not available at current time) and the true status of the fund type

c) allow a better look at the revenue questions within the Department's systems.

The determination of fund source status is probably the most difficult part of the CPC. It is in this area that the Commissioner's "agreement" with the CIP legislation is most vulnerable. At this time, we are unable to determine if the Commissioner is "out of agreement" with the CIP Legislation, and if out of agreement, by how much, and what type of funding is involved.

° The CPC effort identified 552 separate projects or phases in which all work has been completed but the project cannot be closed due to claims, right-of-way problems, etc. The cost-to-close of these projects is estimated to be $28,409,000. Some of these "completed" projects have cutoff dates as far back as 1975; others are more recent but could be several years old. A concerted effort must be undertaken to close these projects and liquidate the liabilities.

RECOMMENDATION #1:

Each region or unit designate a minimum of two individuals with at least one from the accounting office, to review the new reports, verify or correct the data and expenditures, and prepare the input documents necessary for their corrections. As a part of this effort, these individuals will:

a) assist the CPC in driving the "negative unallocated" funding to zero by correcting if possible the funding programr to each project within each collocode where this occurs. (discussed on page 8)

b) review all projects/phases where there are expenditures in excess of funding and correct either the collocode over-expenditure or provide funding to bring the project/phase back into budget. (discussed on page 10)

c) clear error register assigned to the region (discussed on page 3)

d) update the programmatic records on active and complete projects to reflect the actions in a), b), and c).

These activities need to be completed before the fiscal year ends to prevent "locking" these conditions into the official State records when PBA rolls over. Since many collocodes contain projects from more than one region, any unilateral action on one specific project may impact other projects in the collocode. It is recommended that the Division of Statewide Planning and Policy be included in this effort and provide staffing and assistance to the CPC to resolve this problem. The committment of resources is needed to assure completion of this activity prior to the fiscal year end.

RECOMMENDATION #2:

For those projects classified as "completed projects" by the regions with anticipated additional expenditures, assign specialists from the Division of

Standards and Technical Services to assist CPC in spearheading a concerted effort to close these projects. Suggested assignments are:

Utilities	Bruce Freitag
Claims	Loren Rasmussen
Right-of-Way	Jack Bodine

Completed projects with "other" types of anticipated expenditure classifications should be handled on the same expedited basis by designating an individual in each region or unit to work full time to determine:

- exact nature of liability
- problem preventing closure
- recommended closure action
- schedule for closing action
- determination of costs and availability of funding to close

Close coordination with CPC is essential.

To prevent further erosion of the project funding required to liquidate the estimated cost-to-close of completed projects, it is recommended that where project funding is available to cover the cost-to-close, the amount be encumbered and the balance released back to unallocated. For those completed projects without sufficient funding to cover the cost-to-close, additional funding will need to be located or a management decision on project termination considered . If additional funding is found, it should also be encumbered.

The following table summarizes the problem based on CPC analysis performed to date:

#	REGION	SURPLUS FUNDING # PROJECTS	SURPLUS FUNDING $ EXCESS	UNDER FUNDED # PROJECTS	UNDER FUNDED $ UNDER
1	Central	157	$5,409,135	231	$14,426,518
2	Northern	48	1,541,724	46	515,014
3	Southeast	30	1,477,995	26	1,652,031
4	Nome	2	61,812	1	43,041
5	Valdez	0	0	3	41,970
6	Statewide	0	0	2	161
7	MHS	4	604,124	2	3,636
8	Statewide Planning	0	0	0	0
	Misc., already closed, etc.				2,631,839
	Total	241	$9,094,790	311	$19,314,210

RECOMMENDATION # 3:

The CPC team believes that there is a great need for basic departmental program/project Financial management training. This training must be tailored to a basic level as there is a wide range of knowledge levels in the project managers and Project Control Groups. The recent decentralization of DOT/PF activities has made it imperative that the Regions and units have a basic and broad understanding of DOT&PF program/project financial management principles. Training should be "targeted" to non-accounting personnel. If the training becomes too accounting-oriented the impact to on-going project management personnel will be lost. The training could establish the ground work for the "agreements" concept of program/project management. The concept, while very simple is a departure from prior Departmental philosophy and will require the support of both top management and project personnel for implementation.

DEPARTMENTAL POLICY AND SYSTEMS RECOMMENDATIONS

The CPC effort has identified several areas where policy decisions and system changes would increase the efficiency of our program/project management and would prevent recurrence of the problems which the CPC is now addressing. These recommendations should be considered as long term committments and not instituted as temporary measures to an ongoing problem. It is recognized that some elements of the recommendations are already underway within the Department. Other elements still need to be addressed.

The major deficiencies in the Department's program/project management efforts can be summarized into the following four categories:

1) fractionalization of the authority/command structure
2) lack of dependable and accurate CIP Regional and Statewide reports
3) lack of coordinated efforts, program goals, and objectives
4) lack of a comprehensive "systems" approach which not only would provide the needed subsystems but would include personnel training, motivation, and development of a reliable quality assurance program.

From CPC experience, the department does not have defined lines of responsiblity within either the headquarters or regional level relative to responsibility for CIP financial and programmatic direction and information. There does not seem to be a clearly defined responsibility assigned to develop, administer and monitor the performance of our programs, budgets and projects.

The CPC team feels that the many and varied efforts and approaches to the same basic problem of program/project management must be brought together into a unified effort. To our knowledge, there are at least 8 groups actively

working on the same effort, some only on a part of the problem. In most cases a single focus of reponsibility (similar to CPC effort) could contribute significantly to efficient, coordinated problem resolution.

The Department needs to be able to tie its operating budget requests to project workloads. (The capability exists within MIS). As the downward pressures on the operating budget increase, detailed analyses and backup tied to the CIP workload must be developed to assure full recognition of program impacts and allow alternatives to be developed and presented. The organization of Project Control Groups is a start but from the understanding the CPC team has of their duties, the PCG as presently staffed cannot provide the management analysis, direction and information needed for effective control. Classification problems may need to be overcome to allow qualified staffing at the appropriate levels of expertise and experience.

The CPC team has not seen clearly defined goals and objectives in Departmental program/project management. This lack of goals and objectives allows divergent development and management which does not contribute to our ability to pull together. For example, Southeast Region Design and Construction saw a vacuum in terminology used in program/project management and has developed a small guide. We applaud this effort but the same vacuum exists elsewhere and without a coordinated effort, the Department will have as many definitions as there are individuals dealing with program/project management.

RECOMMENDATION #1:

The Department should unify its efforts in program/project management by

developing an organizational structure with a single point of focus responsible for program/project management, development, direction and leadership. This recommendation is concerned with the operational procedures, coordination of programmatic and accounting information, evaluation, analysis, and monitoring of program and CIP performance.

RECOMMENDATION #2:

The Department should broaden its "systems" management approach to its operations. The more decentralized and diverse an organization the stronger its systems must be.

One of the first systems which should be installed is the Department Quality Assurance Program (QAP). This umbrella system would provide the Department-wide system for quality control. To be effective it must be highly visible. This visibility can be acheived by requiring each region to develop a quality control system in conjunction with the Department's QAP. The region quality control information base must be compatible with the Department's QAP. A commonly managed MIS would provide this.

RECOMMENDATION #3

Develop within the Department's CIP program/project management the concept of "agreements." This will clearly define the responsibility for corrective action when programs or projects "go out of agreement."

ADDITIONAL POLICY ISSUES NEEDING RESOLUTION

The CPC has identified additional policy issues which will need addressing in the near future. The investigation, analysis, and coordination has not been completed on these issues so recommendations are not given in Interim Report #1.

These issues are listed for identification purposes and to develop understanding for future discussion. This list may not be all inclusive.

Additional policy issues needing resolution are:

- "Reconciliation" of clearing and suspense accounts to the project level
- Audit requirements on TORA's, Grants, Agreements, etc.
- Over expenditure of RSA's
- Disposition of REAA balances
- Lapsing Policy for completed or closed projects
- Resolution of unfunded expenditures

DOT audit: Projects caught in a paper traffic jam

By LARRY CAMPBELL
Daily News reporter

The state Department of Transportation has failed to undertake more than $800 million in construction projects approved by the Alaska Legislature since statehood, according to a preliminary audit of the department released this week.

The whereabouts of some of the money is difficult to determine, the audit said.

In many cases, hard cash intended for those never-to-be projects was shifted to other efforts. The state also may have paid more than necessary for some projects because it failed to apply for available federal funds.

The audit, called the Capital Projects Cleanup preliminary report, was made public in a state Senate Transportation Committee work session Tuesday afternoon. The report is the result of two years of sifting through convoluted DOT accounting procedures used for the last 25 years, said Jim Merrill, DOT special projects engineer.

Auditors still are working to straighten out the confusing DOT accounting system in time to submit a final report to the Legislature on Dec. 15, Merrill said.

Perhaps 75 percent of the $897 million in DOT unfunded projects represents federal matching funds that no one apparently ever bothered to request, Merrill said.

"We're talking about a lot of small projects that just added up over the years," Merrill said. "In some cases, these projects were put back because they just weren't ready to go. In others, the DOT never had any intention of building them."

"This is something we haven't done since statehood," said Sen. Pappy Moss, D-Delta Junction, committee chairman, of the accounting review. "The philosophy has always been build it now and we'll straighten out the records later. Well, it's later now."

The problem grew as each Legislature through the years would approve appropriations for projects, Moss said. Each appropriation would contain formulas designating how much the state would pay and how much would come from the federal government.

While the dollar approval for projects grew, the paper work necessary to obtain federal funds for those projects fell behind in many cases, Moss said. In other instances the DOT never intended to begin the projects, at least within a time frame viewed by the Legislature.

Lax accounting procedures also may have cost the state hundreds of thousands of dollars because some projects would occasionally use state funds where federal dollars should have been used, Merrill said. An estimated accounting of how much the state has overspent also will be included in the Dec. 15 report.

Until recently, the department had kept about 11,000 projects in an open status that should have been closed or were never intended to be built, Merrill said. In the past month, Merrill and his staff have closed out more than 8,000 accounts that should have been closed years ago, he said.

One example was a $50 million plan years ago to build a new ferry to replace the state system's Tustumena ferry that sails between Kodiak and southcentral Alaska.

The project was to be completed with $3 million in state funds and the balance coming from the federal government. But the money was never requested.

Meanwhile, the Tustumena account was kept open, since the project was never completed. Merrill said, however, that building a new ferry is not in any future DOT plans.

Moss said the Capital Projects Cleanup evaluation at least has brought to light the lack of proper accounting procedures within the DOT.

State transportation audit tracks down $800 million

Associated Press

The Alaska Department of Transportation and Public Facilities has failed to begin more than $800 million in construction projects approved by the legislature since statehood, a preliminary audit says.

The audit is the result of two years' work and is titled the Capital Projects Cleanup preliminary report. It was made public in a state Senate Transportation Committee work session last week.

Auditors said it was difficult to track some of the money because in many cases cash for projects was shifted to other efforts.

The state also may have paid more than necessary for some projects because it failed to apply for available federal funds. Lax accounting procedures that allowed use of state money for projects that should have been financed by federal funds also may have cost Alaska, auditors said.

"We're talking about a lot of small projects that just added up over the years," Merrill said. "In some cases, these projects were put back because they just weren't ready to go. In others, the (agency) never had any intention of building them."

"This is something we haven't done since statehood," said Sen. Pappy Moss, D-Delta Junction, committee chairman.

The auditors still are working to straighten out the state agency's confusing accounting system in time to submit a final report to the legislature on Dec. 15, said Jim Merrill, the department's special projects engineer.

Until recently, the department kept about 11,000 projects in an open status. The agency had no intent of building many of them, and others should have been closed, Merrill said.

In the past month, Merrill and his staff have closed out more than 8,000 accounts that should have been closed years ago, he said.

One example was a $50 million plan years ago to build a new ferry to replace the state system's Tustumena ferry that sails between Kodiak and Southcentral Alaska.

The project was to be completed with $3 million in state funds with the balance coming from the federal government. But the federal money never was requested.

ACTION NARRATIVE

No tape log numbers are on record as no tape counter was available.

Interim tape #1, Side A

Chairman Moss called the meeting to order at 10:00 a.m., and gave a brief overview of the railroad transfer issue. He commented that the meeting was called in an attempt to get cooperation back into the process. He stated that he hoped by the end of the meeting they would be able to determine that the federal railroad authorities and the state are proceeding with a single purpose, which may not be occurring. He referred to the letter to Jack Burton from Commissioner Knapp (Attachment #1), and the transition work plan (Attachment #2). Chairman Moss recognized Mr. Arthur Minton.

Minton: Mr. Minton introduced himself as a representative from the International Association of Machinists and Aerospace workers, which some of the railroad employees belong to. He stated they're concerned about the deteriorating conditions of employment that have been occurring - unilateral changes of classifications, the farming out of work, etc. He stated their concern for the temporary employees who have no protection and benefits who have been severed from employment. It's of concern to the railroad and the state of Alaska because their expertise is needed for the maintenance of the railroad. Preferential hiring for the recall of these people for employment to the railroad should be done. They feel that these employees are not getting a fair shake in the transfer. They are going to utilize the restraints under the existing labor agreement, which is not as easy under the federal statute as it would be under a contract that entails all the conditions of employment instead of just part of them. They want to see not only the railroad facilities turned over to the state in good form but also a competent labor force with the expertise to run it well.

Chairman Moss thanked Mr. Minton and recognized Mark Hickey, asking him for an update of the transfer.

Hickey: Mr. Hickey stated that they are about halfway through the

transition period, where the federal government still owns the railroad. Certification was provided after which came the federal government's statement that the state has agreed to meet all the transfer conditions including the employee protection provision of the federal transfer law. Transfer is expected to occur no later than January 5, 1985. He referred to the work plan. The major step which has not been taken is appointment of the board members, which is expected to occur before October 5, 1984. Chairman Moss asked for clarification that the Governor would make his appointment this week. Mr. Hickey answered that to his understanding this would happen, and that the board hopefully would start meeting no later than the 3rd week of October. The board will be able to make some final decisions that are necessary for transfer - adoption of health and life insurance program, and of existing collective bargaining agreements. The major focus right now is on employee issues. Answers are being given to individual employees.

Senator Faiks asked what has occurred since June 1st that has caused employee unrest - what is different this year from last year.

Hickey: Mr. Polanchek could better answer that question. One major change that he is aware of was a RIF (reduction in force) action of four employees in the machine shops in Fairbanks. Senator Faiks asked if this also occurred last year. Mr. Hickey answered it would be more appropriate to turn that question over to the railroad.

Senator Fahrenkamp asked if these people involved in the RIF action were told that they could either move to Anchorage or be dismissed.

Hickey: Jobs would be made available to these four employees in Anchorage. Existing pay was guaranteed for two years under federal procedure, then there would be reduced pay for these people. Senator Fahrenkamp asked if they would close down the maintenance shop in Fairbanks. Mr. Hickey answered that it had been a planned effort for several years to consolidate mechanical maintenance functions in the Anchorage area. It is not an entire closing of the mechanical shop in Fairbanks. Senator Fahrenkamp stated that this was a top concern to her.

Chairman Moss recognized Representative Abood. Representative Abood stated that he'd like to know from rank & file employees what's going on.

Interim tape #1, Side B

Hickey: Referred to letter to Jack Burton from Commissioner Knapp on the question of the Anchorage freighthouse. Given the closeness of the transfer and the size of the issue, in talking about it with the Federal Railroad Administration

people, all involved felt that the best decision would be to postpone the action until the board could review the decision on the merits of the business proposal. My understanding is the railroad has made that decision to postpone closing the freighthouse so the board can assess the proposal. The state's interested in having a self sustaining operation.

Senator Faiks asked what the issue of the freighthouse is, and what's happening.

Hickey: The freighthouse has about 20 permanent employees, and handles the deliveries of rubber tires in the Anchorage area for freight brought in on the railroad. They are also involved with the new Crowley and SeaWay Services in assisting with the trailers that come in. Senator Faiks commented that the Teamsters would like to have a decision made on the freighthouse.

Chairman Moss called a five minute break as Mr. Hickey had to take an emergency phone call.

Interim tape #2, Side A

Chairman Moss called the meeting back to order and asked Mr. Hickey back to testify.

Hickey: This is a difficult time, and the lines of authority are confused. The federal government still owns and operates the railroad. The Federal Railroad Administration (FRA) has the type of oversight they've always had. The state, as part of the federal transfer law, has specific authority over three kinds of actions by the railroad - any lease of land or real property in excess of five years, any individual capital expenditure in excess of $300,000.00 and any attempt to sell or dispose of real property. Other than that there are no formal arrangements where the state has any control over the railroad decision making. We do have pretty close cooperation. In any actions of this type the state will be alerted and briefed prior to implementation. Standard operating procedures should be followed.

Chairman Moss asked what would happen if the board was available before January 5th - if they'd take over operation of the railroad before then or not.

Hickey: They will not. Once the board comes into existence they will begin to be briefed on the railroad situation and be dealing with the responsibilities they will have. The actual legal responsibilities to direct and manage the railroad will not come to the board until that date of transfer.

Chairman Moss asked if they were in a situation where they had no titular head to guide them, and if they were trying to correct that.

Hickey: That's a reasonable question, which is why Commissioner Knapp feels that this is an appropriate forum to sit down and talk about it. The railroad management is there and doing the job that needs to be done, but it's a difficult time. Once the board takes over it will be a matter of time before they're really comfortable with their duties. Any change of this nature will have this time period of uncertainty. We've been able to get out a second question and answer booklet to the employees that was prepared jointly by the state and the FRA. The employees appreciate getting these answers, we've been getting some positive feedback. Chairman Moss asked who'd putting these out. Mr. Hickey answered the Transfer Team and railroad management and the FRA.

Chairman Moss recognized Jay Trumble.

Trumble: An ex-employee of the Alaska Railroad, was employed there from 5/82-9/84. There seems to be no effort being made to protect the railroad employees. As far as employees and employee rights as this time the state seems to disavow any responsibility. The federal government seems to treat the employees as though they're no longer federal employees. The employees who have been recently terminated and their families certainly think this is a difficult time. The employees who were terminated up to 9/14/84 have no commitment from the Alaska Railroad for reemployment. They have no reemployment rights due to the fact that they were employed as temporary workers with the ARR. Many were employed 2 to 3, 3 1/2 years. I was told the temporary employment status was a result of a federal hiring freeze, and I would not have to worry about unemployment. Now I'm unemployed with no commitment of reemployment. As of 9/14/84 there are a minimum of 25 mechanical maintenance employees terminated, I quote, due to a lack of projected revenues. Given my experience with the railroad during the last few years this is considerably out of proportion with the seasonal layoffs that we experience.

Chairman Moss asked Mr. Trumble to clarify what his employment status was. Mr. Trumble answered that when first hired he was considered a term employee. With the expiration of his term his status was changed to temporary.

Representative Abood asked Mr. Trumble what his job with the railroad was. Mr. Trumble answered he was a locomotive mechanic. Chairman Moss asked if that was similar to the activity that's being curtailed in Fairbanks.

Trumble: I worked in Fairbanks for 30 days last summer. It's in the

best interest of the state of Alaska to be able to understand how this action by the railroad affects the people. These personnel actions seem to be restricted to the mechanical department. Referred to Alaska Railroad Transfer Report about an increase in rolling stock. Reducing forces in the mechanical department is creating a hazard to the employee health and safety and to the safety of the public. Without proper maintenance the chances for accidents increase considerably. Customarily in the fall we store locomotives, coaches and boxcars. This year locomotives are being stored without proper maintenance, in an unserviceable condition. During the slack time of the year would be the best time to do the maintenance on these cars.

Chairman Moss asked if maintenance that should be performed during the off-season is not being performed.

Trumble: No question about that.

Chairman Moss recognized Senator Josephson.

Senator Josephson asked if these actions by the railroad prejudice or jeopardize the state's operation, and if experienced employees would not return because of the way they have been treated.

Trumble: Being unemployed I would have to take another job. I have 10 years of experience in the railroad industry, and feel that I was an asset to the Alaska Railroad. If the state is not able to employ qualified railroad personnel it will be a disadvantage to the state.

Senator Fahrenkamp asked if in his opinion they would have locomotives and rail cars that are not properly maintained this winter and therefore will not be ready to go and could be detrimental to the safety of Alaskans. Mr. Trumble answered yes. Sen. Fahrenkamp asked if there would be enough time between the 5th of January and the beginning of the season for correcting this lack of maintenance.

Trumble: The condition of the rolling stock is extremely substandard. I cannot envision such total reversal of management policy that the opportunity would present itself to correct these deficiencies. Those deficiencies could not be corrected, in my opinion, in a six-month period. We have deficiencies of a major proportion which have existed for many years. I think the State of Alaska will find upon purchasing the railroad that the cost of enforcing laws will be surprisingly high. Senator Moss asked if he was speaking to OSHA. Mr. Trumble answered no, but to FRA laws.

Senator Moss asked for clarification that management policy appears to have been changed this year in that normally in the winter a lot of maintenance work is done which is not being done this year.

Trumble: To a certain degree, yes. In the past the work has not been

performed to maintain the equipment at a level at which it should be maintained according to the FRA standards. This year the lack of maintenance is considerably more obvious in that there are less employees to perform the maintenance. If you checked into it I'm sure you'd find that the overall number of mechanics in the repair facilities in Anchorage is reduced to the lowest point that it's been in the last ten years.

Chairman Moss asked if he had anything more to say on this.

Trumble: Yes, I'd like to address the RIF's that occurred in Fairbanks. Since that time we have examples of supervisory personnel who have been sent to Fairbanks from Anchorage expediting maintenance on locomotives with which they are unfamiliar. When the original RIF's occurred management intention was that the mechanical maintenance that had been performed in Fairbanks would be performed in Anchorage. If this is true then why must we send supervisory personnel to Fairbanks? Why have we created three positions in Fairbanks when four positions were RIFed. There have been different titles given to the positions. Perhaps the RIF was an action to circumvent the U.S. code. This work is being performed, but by different people.

Chairman Moss asked if they were under different classifications.

Trumble: Yes. They are at a lesser rate of pay and a lesser level of qualifications. It would be in the best interest of the state to have employees who were the best qualified and most competent.

Senator Josephson brought out the point that as a buyer you would want the seller to run the business as you would want it run. He asked if the state was going into a situation where we are buying something the owners lost interest in and aren't operating it right until the new owners take possession.

Chairman Moss answered that this is what the hearing is all about. He recognized Representative Abood.

Representative Abood asked where is the monitor from the state to make sure the federal government is running the railroad right, and do we have such an agency.

Chairman Moss recognized Mark Hickey.

Hickey: The transfer law does not have a formal mechanism where these kind of actions can be scrutinized and consented to by the state other than leases, capital expenditures, and the sale of real properties. The proper responsibility currently rests with the Commissioners of the Department of Commerce and Economic Development and the Department of Transportation and Public Facilities.

Representative Abood stated that they were remiss in the legislature by not setting forth an investigatory or monitoring organization to monitor these problems. We do not have a mechanism for doing that, is that correct?

Hickey: We do not have a formal mechanism. The temporary employee question is a problem. The layoff may be larger than the normal seasonal layoff. The state's obligation is with permanent employees only. The state agreed that the temporary employees on board at the date of transfer will be reemployed the next day with full benefits. The board has to resolve the question of what commitments they want to make to the temporary employees that were previously terminated.

Senator Faiks referred to the acquisition document - SB 73 in which there is a paragraph that states that everything must be as is, a caveat that states abuse of maintenance could render the agreement null and void.

Hickey: There is a section in there that states that the state is responsible for insuring that the railroad as depicted in the transfer report document as amended is the property that will be transferred. There is concern that we'll get the property that's in there. A deficiency in the railroad is the rolling stock. We are concerned about the safety situation. In the transfer report we had an agreement with the FRA that they would do a full safety assessment which was done this summer, and they are required to correct the deficiencies noted in that assessment.

Representative Abood asked if there was the possibility that the federal government could change classifications of individuals up until transfer. There's got to be something that tells the feds to run the railroad like we've always run it.

Hickey: Any personnel action of the railroad today has to be in accordance with collective bargaining agreements and federal rules and procedures. We have the kind of understanding with the FRA that there will not be these kinds of actions without us being briefed on it. If these are standard operating procedures such as seasonal layoffs which do vary from year to year that's one kind of action, if it's a major attempt at reclassification it's another.

Senator Josephson asked that since the state planned to have a more intensive maintenance program than the feds, and money has been allocated for that purpose, then would they want to hire those temporary employees back.

Hickey: That's correct.

Senator Josephson asked at what point can the state say to these employees that they'll be rehired, and is there any mechanism by which

they can go to the federal government and say that we want these people to stay on even if on a cost reimbursement basis, because in the long run it would benefit the state.

Hickey: To answer the first question, by November when the board has met they could give some kind of an answer. We anticipate people retiring, so we anticipate an even greater need for people. There are no guarantees that someone who gets laid off in September will get reemployed next May.

Senator Josephson commented that the board would make the decision and he would assume the board would follow legislative intent. The railroad industry is a growth industry as far as we get the railroad up to a higher standard.

Hickey: I doubt you'd want to create a situation today where you'd want to tell the board that you have to rehire every single person who is a temporary employee of the railroad that's been laid off. You want to give the board discretion to do the hiring and firing.

Senator Fahrenkamp asked Mr. Hickey if he was able to see the financial statements to see how the railroad is doing revenue-wise.

Hickey: The railroad revenue-wise is doing better than last year due to Sea-Way traffic, but the cost is higher also so the profits aren't any higher.

Senator Fahrenkamp stated that since the RIF's were due to lack of revenue, she'd like to get in perspective what the difference is from last year, in order to know if this is a normal procedure in business, versus that this is a cut by the federal government to bare-bone it until the state takes over.

Hickey: In that context you'll want to look at the relationship of revenue costs versus revenue costs last year because you've got to deal with the net cash available for the two.

Chairman Moss thanked Mr. Hickey and recognized Mr. Allison, Mr. Polanchek and Mr. Blasingame.

Interim Tape #2, Side B

Allison: Introduced himself, Mr. Polanchek and Mr. Blasingame. The railroad administrator asked me to convey to you the degree of cooperation he has felt from the state in this process, which is impressive. It should be incumbent upon us to keep employees informed, admittedly we are somewhat late. The FRA in Washington has a strong interest in a successful, and that means that the railroad is successful post-transfer. There is no economic incentive for the federal government to cut maintenance expenses. That lessened expense is merely going to the revolving fund which is transferred to the state minus federal obligations.

We've been working in every way possible with the state to involve them in a current basis in decisions and we look forward to doing the same thing with the board once it's appointed.

Senator Josephson asked about the claim that maintenance is at a ten year low.

Polanchek: I would say that over the years maintenance has increased. Efforts to improve our roadbed and track structure have been intensified over the last five years. We've been investing more money in our roadbed, tunnels and bridges. One product of this increased maintenance is that the passenger trains now can operate at 59 miles per hour instead of 49. There's quite a difference between interchange and operational safety of rolling stock. Interchange has to do with the age of the equipment.

Senator Faiks commented that they know about the improvements in the track and roadbed, but what we want to hear about is the mechanical area. When the locomotives are being put away, are they being shortchanged of the maintenance they need to start up again at the high volume season?

Polanchek: Our maintenance efforts are system-wide. In addressing the storing of locomotives, maintenance expenses can be deferred until spring. Any locomotive that is brought back will certainly be in compliance with federal standards. There is a process to put it in storage and a process to ready it for spring. What isn't done now will be done in the spring.

Senator Faiks asked why the system had changed - that maintenance that was normally done in the fall has been shortchanged. Mr. Polanchek expressed disagreement. Senator Faiks asked if there was a checklist used in storing the locomotive, where last year there were, say 25 operations performed before storage, and this year only fifteen? Can it be equated to numbers?

Polanchek: No. The same thing is being done this year to store the locomotive as last year.

Faiks: I'm confused then why the gentlemen feel very strongly that the process has been changed this year.

Polanchek: Any repair that doesn't necessarily have to be done in before storage can be deferred. We will make the repair.

Faiks: There has been a policy decision of the Alaska Railroad that the checklist for storage procedures has been changed from last year to this year.

Polanchek: No, actually this is only the second year that we've been able to take advantage of storage at the military base.

Faiks: You could almost say that additional procedures have been instituted in the railroad in storing locomotives over the last ten years, say?

Polanchek: That would be correct. In prior years with the shortage of warm storage, instead of being able to put them inside, we had to keep them outside.

Fahrenkamp: Are you deferring any more of the work this year than you did last year, or the year before?

Polanchek: I would say no.

Fahrenkamp: Can you explain to me the change in policy concerning maintenance in the Fairbanks area, and the thinking behind it?

Polanchek: The gradual change has been occurring over the last ten years. Anchorage has always been our primary maintenance facility for locomotives and all our rolling stock - repairs, overhaul, any major function would come to Anchorage. Fairbanks is gradually phasing out, it's more of a trouble-shooting operation, refuel, inspections, nothing really significant. It's only 700 miles from Anchorage to Fairbanks, which for a diesel locomotive is a short trip. The need for the type of skills and technicians that we had previously in Fairbanks has changed and it's become more of a service station where all we're doing is normal daily inspections. All of our locomotives are based in Anchorage, they go to Fairbanks and return to Anchorage. With the exception of this winter we'll probably have four or five locomotives in Fairbanks to cover the traffic of the coal mines. Major maintenance and servicing will be done in Anchorage.

Fahrenkamp: What's the thinking behind this?

Polanchek: It's more efficient and cost effective. Anchorage will be the major center, Fairbanks will be a service station.

Fahrenkamp: I'm still bothered by the idea of the service station. But if we had four people that had to go and the job descriptions have changed and there's three people there - has the work changed significantly that there's a need for another type of worker, and what happens if a wheel comes off?

Polanchek: We have changed the classification because of the type of work that's being done. Mr. Blasingame could explain this.

Blasingame: The decision to move the major function to the Anchorage area as being a management decision is the sort of thing we do on a regular basis. My job is to insure the

process we go through is done properly according to the federal regulations. It becomes an adverse action to the individuals that these changes affect because these classifications are being changed. They have an opportunity based on seniority and their present job classification that we would offer them a job in another location - that's a requirement by law. In the process that we go through by offering these people jobs in another location we can lower the grade of the individual or skill that's needed, in this case in Fairbanks. Two of the employees have the option to retire.

Fahrenkamp: Are you saying that to be transferred to Anchorage that their rate goes down.

Blasingame: As part of that protection those individual employees have both their grade and their pay protected for a minimum of two years in the federal sections. We do have to offer them a like position, and that's the reason they were offered that position in Anchorage. If there is an opening for which they are qualified which is an equal or lesser position we are required by federal regulations to offer those individuals those positions.

Fahrenkamp: If there are no openings?

Blasingame: They could be out on the street or they could bump another employee with lesser seniority.

Chairman Moss recognized Representative Abood.

Abood: I'm getting the perception that if you wish to play games with the classifications, reduce the number of people in Fairbanks or Anchorage, you'd have the right to do so. If you put all of these pieces of equipment into storage without maintenance now and wait till spring for this maintenance factor, then the state is going to have to pick up the tab. It seems that your operation is changing in this particular area up to the two year period start, otherwise why would we have this confrontation with the employees of the railroad when the state has nothing to do with it? It is strictly a federal government situation. I was in on this railroad transfer and if I'd have known this I'd have gone back to the date we paid the $22 million that this would stay just like it is with oversight of the state until the two year period state. It seems the federal government is not acting in full faith up to this two year period, particularly in the case of the freighthouse. If we eliminate this, private industry might have to take it over.

Allison: Behind all this there seems to be the thinking that if the federal government gets rid of employees, or not properly maintain equipment, it will somehow be to their advantage. All money comes from the revolving fund which transfers to

the state minus any current obligations to the federal government. If we started cutting expenses in that way it would just add to the revolving fund. There is no economic incentive for us to do this in any case. Decisions like the change of classification employment in Fairbanks and the freighthouse which we decided not to give up in order that your board can review that, happen every year. This is a four employee issue of sizing the employee classifications and skills to jobs, otherwise we'd be wasting a more highly skilled individual on a job that doesn't require that.

Abood: Such as a gas station?

Allison: Right. It wasn't our understanding that's what you wanted us to do.

Faiks: Who's paying for the railroad transfer on your side?

Allison: From the revolving fund and the appropriating fund.

Faiks: Is the money coming out of the revolving fund hurting the ongoing operations of the railroad today? How would that money have been spent if the transfer wasn't going on?

Polanchek: We haven't spent very much money compared to you folks.

Faiks: Yes, I know. Hickey's expensive.

Polanchek: The railroad has always funded it's own operating maintenance. We expect maintenance will be funded out of our revolving fund from operating revenue generated. The money that you're addressing for the transfer was put in two years ago by Senator Stevens as a one-time appropriation of $7.6 million to be used by the railroad for maintenance and capital appropriations. Out of that appropriation $1 million was earmarked for transfer related expenses. $6.6 million was for maintenance. Up through this year we have expended all of those funds. The only funds available for the railroad is the money that we are able to generate internally.

Allison: There's another source of money on the federal side which is the other agencies - BLM, all the other agencies that are working on the transfer have funded it themselves.

Faiks: How are you going to pay for today's time?

Polanchek: Out of the operating fund.

Faiks: Is there a large sum of money being spent on this transfer that could have been spent on normal operations, maintenance and capital expenditures if we weren't going through this transfer?

Allison: It's the reverse. The purpose of the $7.6 million special appropriation was in part to deal with one-time transfer costs. If the railroad wasn't sold they wouldn't have that money.

Faiks: The locomotives are being stored in a heated place. There's such a divergence of opinions from the workers and the management as to the locomotive storage. If because they get to be stored in the warmth, has the been a change in the storage procedures based on temperature?

Polanchek: No, because we stored them in the same place they were last year.

Faiks: What about three years ago?

Polanchek: Three years ago we didn't have storage available. The locomotives were kept running.

Faiks: What do you account for this wide margin of difference in opinion on the maintenance of these locomotives?

Polanchek: Some of the concern is because we've expended the $7.6 million. We can't fund certain programs, and other things have to be set aside.

Faiks: That makes sense, if you were given one time only dollars. The state has a maintenance schedule that we want to project in the budget from here on out that would give you a healthy sum of money every year to keep that maintenance up to snuff. It makes sense that some of these programs were instituted under that one block of money.

Polanchek: In the locomotive area we know that the trucks on the locomotive need to be rebuilt. We took a portion of that money and had a truck rebuild program. Now that money is gone, and the program is over.

Faiks: What about safety rules and regulations? Are the citizens of Alaska going to be jeopardized because that program is shutting down, including the workers?

Polanchek: No. Under federal regulations there are specific things you are required to do to locomotives, and they will be maintained in accordance with the federal regulations.

Faiks: Last year we spent hours trying to save the temporary employees. There was no way the state could get into that labor problem without having control over the railroad. I believe we were able to get an extension on the two year federal temporary hire provision but we could not get the FRA to increase the number of permanent employees we were allowed to have. Is that right?

Blasingame: You're right. One of the problems we face is that the Alaska Railroad is part of the FRA, U.S. Dept. of Transportation which has a mandate for man hours. When we appoint an individual, they get a career service appointment, that's permanent, versus temporary. If you let that person go, it's an adverse action, you go through a reduction in force procedure, and they have certain rights and benefits under federal regulations. When a temporary comes on they know it's temporary, but we got a waiver from the Office of Personnel Management to extend those appointments because of the requirement that was placed on us by federal OMB to stay within a certain guideline. We're still under that mandate.

Faiks: We could not get David Stockman to give us a release so we could hire more permanent employees.

Blasingame: We're still in that process. We would bring temporary employees on for what we call a temporary term period. We could extend that term if we needed that employee and if the funds were available. When the funds run out, we have to let the individual go.

Chairman Moss stated recognized Mr. William Jachim, in Fairbanks.

Jachim: I was reduced to a locomotive servicer from a locomotive mechanic. We were told there were going to be 90-day inspections handled in Anchorage. We were told that we wouldn't be working out of our job descriptions. My job is a locomotive servicer and we still do repairs. In the past we had to have an inspector sign off a locomotive saying it was safe to be operated. Now we don't. In the past I couldn't move a locomotive because I was not a foreman. Now they're going to train us to move them. This is just a job I've always done that's been rewritten to a lower pay grade and different job title. We have now a permanent car foreman which is for the car repair section of our shop.

Moss: Any comments?

Polanchek: As far as a federally mandated inspection period, 90 days, 45 days, annual, certainly can be performed in Anchorage, it's simply a matter of rotating the locomotives so they can be inspected and receive the servicing or maintenance they need. As far as signing the daily inspection report no one on the railroad has ever told anyone it does not have to be signed. It's a federal requirement we must sign off on a daily locomotive inspection. What that entails is that a qualified employee make a visual walk-around of the locomotive - checking brakes, lube oil, fuel, etc. It must be done by a qualified person and that can be a locomotive engineer, it doesn't have to be a locomotive or mechanical department employee ..

Moss: Any other comments? Recognized Elmer Matlock in Fairbanks.

Matlock: Expressed agreement with Mr. Jachim.

Chairman Moss recessed the meeting until 1:30.

Interim Tape #3, Side A

Chairman Moss recognized Mr. Blasingame.

Blasingame: One point of clarification so the committee understands how the railroad operated under existing enabling legislation. We are required by law to live within the revenues which we can generate. The funds that the railroad has received from Congress in the past have been appropriations for the major capital improvements, but beyond that, all the decisions we make are based on the bottom line. We do not receive any operating subsidies whatsoever.

Moss: Could this be part of the reason that you're cutting off a few people?

Blasingame: Absolutely. We're required to live within these revenues. Those monies that we have presently have got to take us through the lean winter months. The temporaries that we've been talking about this morning were basically hired because of those funds that we had received a couple of years ago when the ARTA legislation had been passed. The $7.6 million appropriation Sen. Stevens had acquired for the railroad were meant for capital improvements, they were allocated throughout the railroad for capital improvements which creates jobs, so people are hired for these jobs and they understand that it's just a temporary appointment.

Abood: Are we going to curtail services to Fairbanks during the winter months? Is that why the cutback is happening?

Polanchek: The normal wintertime operation is cutting down. The passenger service has been cut from daily trains to Fairbanks to weekly. Gravel operations will go until freezing. There will be a drop-off in service to Fairbanks.

Abood: Didn't we have the same type of curtailment last winter?

Polanchek: That's correct, but the projects funded by the $6.6 million appropriation are coming to a close.

Abood: Now we're going to be living off the revenues we make, and we didn't have to for the past two years. Is there any deferred maintenance being taken care of in there?

Polanchek: You're correct, we're now back to running off what revenues we generate.

Abood: Did those people know that this was coming down?

Polanchek: Yes. They knew when they were hired they'd be on for a limited time as funds are available.

Abood: This was put into memo form?

Blasingame: That is correct. When they were hired we gave them a temporary appointment. It could be for a year or longer. Once the appointment goes beyond a year you're supposed to make it permanent. Unfortunately we were in a hiring freeze so we were unable to do that.

Moss: Does the railroad have less income than it had three years ago? It seems that we are delaying some of this maintenance until the state takes over. Don't we have income that comes in from the freight that would take care of the maintenance?

Polanchek: We use the money we generate for all operating and maintenance costs. Our revenues have increased but I would say our total available dollars for expenditures have probably decreased because of the lack of congressional appropriation for capital expenditures and major maintenance items. Our operating money has increased. When we get an appropriation from Congress those are for capital improvement items or major maintenance items. You have to go back about three years to see the changes that have taken place in our recording system.

Moss: Don't we have money that we've set up for routine maintenance? Don't we have something set aside in a regular fund?

Polanchek: No, it's not set aside in a particular fund. The departments will put together their budgets, projecting their maintenance requirements based upon a revenue forecast done by the marketing department.

Moss: What we're looking at is a difference between state fiscal year, and railroad fiscal year. Is that a problem?

Polanchek: No. From a railroad perspective it will not be difficult for us to project out our operating requirement for whatever fiscal year is adopted for the corporation.

Faiks: I would like to ask the chief maintenance man some questions. I would like you to tell us the status of the maintenance over the last three or four years. There are some strong statements being made that the locomotives are not being as well cared for as they were in past years, and I would like you address that.

Moss: I'd appreciate it if you'd identify yourself for the record.

Sudall: I'm Mike Sudall, Chief Mechanical Officer with the Alaska

Railroad. As far as locomotives going into storage in worse condition than ever before, that's not true. Over the last year we have run better than a 90% availability on the locomotives, which is good for 56 locomotives.

Faiks: 90% of 56 locomotives have always been ready to go?

Sudall: Yes, that takes care of routine maintenance, mechanical problems, and so forth. When I first started the locomotives that were in storage could never have run without many dollars put into them. Since then we've retired many locomotives that couldn't be used. Last year was the first time we got indoor storage. Every locomotive that went in we tried to have ready for service when it came out in the spring. We intend to do that this year. As far as maintenance goes, it's quite adequate. The state of the art locomotives do not require some of the intense maintenance that was needed on older locomotives. We have revised maintenance schedules and practices. Our locomotives are well serviced, they run 60-70,000 miles per year. That is not very much use, and they run in a clean environment. We have initiated a truck program and traction motor overhaul program which again increases efficiency. The major portions of maintenance will be grouped in a more systematic way of maintaining the locomotive.

Abood: I understood these gentlemen say that this equipment will be put in storage in its present condition, and nothing will happen until spring. You stated that it will be worked on and ready for spring.

Sudall: The locomotives we put in storage we hope to have ready for spring at the time they go into storage.

Abood: That isn't what we heard. We heard they were going to go into storage and not fixed up until spring, one of the reason for the cutbacks. If we're going to wait till spring, then that expense will be ours.

Polanchek: The reason we're storing them is because they don't need to be in service. We're not storing them because they need maintenance.

Abood: The question was regarding the RIF's. If we take over January 5th, then we're going to have to do the spring maintenance on those pieces of equipment. I understand they're in storage now with broken windows, etc.

Sudall: That may be true. As far as routine type slow maintenance, that is not cost-effective where anybody's going to absorb anything exorbitant. The intent is the same as last year, to have the locomotives that go into storage ready to come our for service. We do work on some to get them ready for storage.

Abood: That wasn't what we heard here.

Sudell: We did put some locomotives in there that we knew we couldn't get to until such a point in time. When we had other locomotives ready, we pulled those out, and completed the project on those. Our intent is to have those locomotives ready by spring.

Abood: You remember the example of my son who owns trucks. If he didn't do any maintenance on them during the spring or now before he puts them into storage, he'd have a hell of a time trying to get it done during the spring when he had to go to work with them.

Sudell: When they're in storage nothing's going to happen to them. They will be ready to run when they go in, when they come out all we do is put water and oil back in, check them over and fire them up, and do whatever federal inspection to bring them up to date and back in service.

Abood: When you change a classification to something else, and that person goes away and gets another job, then that expertise is gone. We've got to hire some else at a higher wage.

Blasingame: I understand what you're saying. We had those temporaries on in certain positions. I thought we clarified that most of those were working on the major maintenance projects that were funded throughout the appropriation, and they were laid off when that was exhausted.

Faiks: For another point of clarification, Mr. Allison, on the economic incentive. If we did the maintenance today, or if we wait and did the maintenance in March, it's still the same pool of money?

Allison: That's right. Anything that's spent today would come from the revolving fund.

Faiks: Which will go to the state, intact, minus transfer expenses? That pool of money is going to come to us anyway, so you get no benefit at at all for delaying maintenance?

Moss: How much is in that fund now?

Polanchek: Around $7 million.

Faiks: Federal law requires a minimum. Isn't that minimum about $5 million?

Blasingame: There is no federal law. There is an administrative requirement on the part of FRA.

Faiks: What was it?

Blasingame: $4.5 million.

Moss: Thanked the gentlemen for their testimony. Recognized Charles Schmidt.

Schmidt: I'm Charles Schmidt, General Chairman Local 75, Machinists Union. Work is being farmed out to outside organizations and other organizations in town when the railroad is laying off people, i.e. building locomotive power assemblies is done outside, not by Alaska labor. Other functions are performed out of town and by other companies in Anchorage that could be done in the Anchorage shop. Competitive bidding practices should be followed, and there should be preferential hire for Alaskans. If they have money to pay outside firms they should have money to pay present employees. A matter of concern is also whether the work is being charged to the proper account. Time cards are given to the foreman who turns in the proper account number. It would be possible that these accounts are being put into certain areas where work is not being done. This could be an attempt to put certain jobs down to make it look like a certain area's not profitable in order to justify shipping some...

Faiks: What you're suggesting is against the law. You're saying a supervisor or someone who is charged with correcting records is falsifying records. That's a felony.

Schmidt: I'm saying that most of the employees don't necessarily know the particular job account that their work is placed under.

Faiks: Is it necessary to know that?

Schmidt: I guess not.

Faiks: To accuse someone of the potential of falsifying records is a felony, it's very serious.

Schmidt: I didn't mean to accuse anybody. Another area I wanted to talk about is the RIF. This is not a seasonal thing. A RIF has to do with permanent employees. This is not what happens in the fall of the year.

Moss: It's not a seasonal thing?

Schmidt: No. In the past they've had temporary employees and they either terminate them or they were just temporarily laid off so they didn't have to go through the paperwork to hire them back.

Moss: What's the number of permanent-temporaries, or what?

Schmidt: There's a difference between a permanent-seasonal, someone

who comes back every year, like track labor, and the temporary who is hired for a certain length of time and can be terminated any time. As far as the action in Fairbanks - some of the employees are doing the same work as they were before, there's a crossing of craft guidelines there. I have some comments on employee unrest. I feel that it's greater. There's so many questions that employees have about the transfer. We need to have some kind of a meeting where employees could have their questions answered. There's a lot of turmoil. As far as the storing of locomotives there's no checklist that the employees follow. Management might have had one but as employees we were just told there were certain things to do. Fairbanks has not been phasing out over the last few years as stated. This last year there was a buildup in employees to do more maintenance and then there was this action to reduce that because they said it wasn't working out.

Moss: What you're saying is some of the work isn't being done that's supposed to be done?

Schmidt: We do have a layoff every fall, which is a mistake, because most of the work should be done in the wintertime. This year there has been a much greater layoff than what's been done in the past. There hasn't been the time to put these locomotives back in service.

Faiks: Do you have a labor agreement with the railroad?

Schmidt: Yes we do.

Faiks: And you have terms and conditions in that labor agreement?

Schmidt: Yes.

Faiks: Do you feel the railroad has violated any of those labor agreements?

Schmidt: Yes.

Faiks: Have you filed your grievance?

Schmidt: Yes.

Faiks: So you are in a grievance procedure now to adjudicate these kinds of things?

Schmidt: Yes, on certain issues.

Faiks: You are following that procedure?

Schmidt: Yes.

Abood: Would this also necessitate overtime in the spring?

Schmidt: Yes, in fact many of the locomotives will work overtime because we had so many of them working that we couldn't afford to keep them down for any length of time, we needed to put them right back in service so we could get the work done. They'd call for eight hours over time at a time. When a person works sixteen hours a day they're not very efficient. Profit doesn't mean anything, if management doesn't make wise decisions there's not going to be any profit.

Moss: He thanked Mr. Schmidt and recognized Clifford Proetz.

Proetz: I've been an employee of the Alaska Railroad for approximately ten years. I'm a machinist, locomotive mechanic, employed here in Anchorage. In that time I have been in various positions with the local unions such as president and local chairman. There are several things that have been stated in the past, one of which Sen. Faiks referred to there, about a statement that Mr. Schmidt had made about the illegality of controlling funds from one account to another. I realize that this is a dangerous statement but this happened and I know it for a fact. I have been told to leave my time cards empty so that the proper account can be put in. We can look at locomotives 2401 and 2401, scheduled at their purchase for a $100,000.00 each renovation, which probably amounted to $500,000.00 apiece. Excuse me, I'm a bit emotional. This has been a common occurrence, we would run out of funds in one account and other special accounts would be rifled for funds to finish the work in those projects.

Abood: Relax, have a cup of coffee. You're among friends.

Proetz: I would like to point out the discussion about temporaries. In the past the temporaries had been furloughed. At this time they had been terminated, they are no longer employees of the federal employees. The game has changed 100%. We were led to believe that these people could be extended to the point where the state would take them under their jurisdiction, to be allowed to go through the transfer and become state employees.

Faiks: You will never be a state employee.

Proetz: An employee of the corporation. Last year we carried approximately four or five temporaries through the winter, this year it's been pared to one or two, there in labor and support positions. Mr. Hickey referred to planned actions taken by management. These planned actions, though they may be legal to management, have failed in their obligation under federal law to consult and confer with the unions to inform them what's going on. This has been done in the past repeatedly, management pretty much ignores the unions.

Moss: Do you have in your possession a memorandum from Sept. 19, 1984 to Alaska Railroad Employees from Mark Hickey and William P. Loftus?

Proetz The letter you're referring to is about our rights and privileges?

Moss: It's just an informational letter. I wonder if it's part of the data that you need.

Proetz: That was handed out at work. The second piece I haven't seen. To my knowledge none of the employees have.

Abood: What was the date of that one?

Proetz: We received it two weeks ago.

Moss: The employees have two memorandums in their possession...

End of Side A

Interim tape #3, Side B

Proetz: The employees of the railroad have received this particular piece of information. Sen. Fahrenkamp asked about the ability of stored equipment to come on line next spring. I would like to bring up at this time a problem that the railroad experienced with Cunard, a cruise ship line. This year the railroad was informed that their service was substandard, if Cunard wasn't provided with better service, they would discontinue using the railroad to bring their passengers to Anchorage. The railroad replied the equipment would be updated. If you lay off all these employees how can you update these coaches and equipment in a period of four months. The equipment is so substandard the only way would be to buy new equipment to meet the deadline for Cunard. The program in Fairbanks had been on the increase before this action was taken. The program was to give the Fairbanks people the training they'd need to do 15 and 45 day inspections at their location, so the units that remained there over long periods of time would not have to be returned to Anchorage for inspections. This was in effect until the time of the termination of the mechanical department employees there. Last year was the first year we stored locomotives. Several of the locomotives that were stored required extensive maintenance. Last year the units were stored serviceable, but this year they have been stored in unuseable condition - they'd need heavy maintenance before going back into service. I gave you some federal cards on several units in Fairbanks. These are federally required cards which are supposed to be signed on a daily basis. If you note there's a period of almost two months on these cards with which they went without federal inspection, yet they want to reduce the work force in Anchorage. We've

been told there would be no more apprenticeships, which are essential in training Alaskans. Now we understand that all the journeymen being hired would come from outside. It's easier to bring them in from outside as temporaries than to train their own people.

Moss: Is that part of your contract?

Proetz: We have an apprenticeship agreement, but it doesn't guarantee that there will be apprentices. We merely have a guideline as a quota of how many apprentices to mechanics will be an acceptable level.

Chairman Moss thanked Mr. Proetz. Mr. Proetz stated he had more information. Chairman Moss pointed out that time was running short.

Proetz: About what transpired in Fairbanks. Management decided they'd create a new position in Fairbanks, a work leader. They didn't inform the union. Management found that they were in a supervisory vacuum. After laying off people in supervisory positions in Fairbanks they had to send supervisory people from Anchorage. As of January 1st the railroad is required to have bullet proof glass. This is quite an extensive program.

Chairman Moss thanked Mr. Proetz and recognized Jerry Valinske.

Valinske: Gerald Valinske, United Transportation Union. The United Transportation Union doesn't have the problem some of the other unions have. A lot of answers about the transfer were slow in coming. The state and transfer team have been helpful, FRA slower, and management has given us what I feel they've had available. As far as the issues the other organizations have, I don't know much about them. The transfer does have some rough edges. One of the biggest things holding us back is the board, and I'm confident the Governor is going to be making his appointments soon. They'll be able to start dealing with these issues and start giving the employees answers.

Moss: I appreciate your comments. We do have some rough edges, but I feel more comfortable than I did earlier. I hope what comes out of this session is that we'll have both the federal government and the state working together.

Faiks: I appreciate your coming here. Can you and Jack Burton's union take a lead in setting up a communication network with some of the other unions, so that they have as much information as you do?

Valinske: I'd be more than willing to do that. On August 17th when we met with management, FRA and the state transfer team a hotline was discussed so that an individual could get

specific answers. The organization endorsed that, hopefully they're pursuing that and will get it online soon.

Faiks: You're going to have to work together, so that turf battles between unions won't occur. If some of you have information, it's your duty as a railroader to share it.

Valinske: I have a lot of confidence in the other organizations. I'm more than happy to meet with their officers and work with them in the future.

Moss: Thank you Jerry. We have time for one more person in Fairbanks.

Matlock: This is Elmer Matlock. We have a fuel haul starting Sept. 1985. This is a good reason to keep our rolling equipment upgraded.

Moss: Is that fuel transfer out of MapCo.? Is it one of the same deals with the airport or into Anchorage?

Matlock: Yes. This fuel haul will be from Fairbanks to Anchorage.

Chairman Moss thanked all of the people in Fairbanks who participated and recognized Mr. Minton.

Minton: I'm Arthur Minton of the International Association of Machinists and Aerospace Workers. I'm here on behalf of the interest of the employees of the Alaska Railroad. There are some questions that haven't been answered with regard to the temporary employees whose jobs were terminated. Nobody has requested in this room today that those people be given a concrete job. The request was that these people be considered for preferential hiring. There has been no response to my knowledge to this request. I believe it's a moral obligation to the people who have the opportunity to make some policy as to what happens to those employees who were terminated.

Moss: I appreciate your comments, and I hope this will be considered.

Fahrenkamp: Is there a federal law that there has to be bullet-proof windows?

Hickey: There is a federal requirement for the glazing of windows. The state requested a waiver from the FRA because we feel that this is unnecessary. The waiver was denied. Starting in 1985 the railroad is going to have to comply.

Fahrenkamp: Who will prepare the agenda for the first board meeting?

Hickey: That's part of my job.

Fahrenkamp: As a personal favor to me, I would appreciate it if you would put this question of temporary hire to the board on the first agenda?

Hickey: That has been our intent. The board should have this put before them.

Fahrenkamp: I'm more confused than I was before the meeting. I think we set a very dangerous precedent. I for one don't feel qualified to be a labor mediation board. Mark's promise will help me a lot.

Chairman Moss thanked Mr. Hickey and everyone who was present today. He asked Mr. Hickey if there was the possibility of a board announcement by the 5th of October.

Hickey: That's correct.

Chairman Moss brought this portion of the meeting to a close.

The following testimony was submitted to Senator Moss at a later date, from Mr. John McDonell, 505 W. 2nd Ave. #20, Anchorage, AK 99501.

Senator Moss,

A note of appreciation for your considerations and concerns regarding the transfer process of the Alaska Railroad. I only accidently by way of passing by learned of your committee's meeting on October 2nd. I only heard 20 minutes of testimony in the morning session and the afternoon's comments were most revealing.

Not only am I a railroader myself, but I have been involved in such matters before. Formerly off the Milwaukee Railroad (1970-1980), which in 1979 declared bankruptcy and reorganized under the guise of abandoning over 2300 miles of track immediately. I have already seen one railroad inexorably and totally disrupt not only services and transportation corridors but devastate thousands of lives, careers and dignities as well. And through it all, I was struck by its finality. Once the train leaves, who calls it back? The inevitability of its own momentum. As trains go, so goes the responsibility.

Senator Moss, do not let the railroad get out of town without at least being held accountable for their actions. It is not an entity to itself. I'm sure you felt the vast discrepancy between management, worker and transfer peoples versions. It was notable to hear the testimony concerning these conflicting position and sensing the need for more vigorous determinations. Alas, I have learned, it could be four weeks before a transcript is available and as I'm sure you are aware, mountains of paperwork could materilize to

justify any position or performance in the meantime.

My only hesitation in voicing these concerns is that I am a "temporary" and if you get down to the vague and nonspecific descriptions of some 30-40% of the workforce from April to November despite "project and special monies availability." You will find we are "terminable at will" as well as for cause lack of work, or discipline. Therefore, I am reluctant to be heard, as I and many others on the property fear for their livelihoods. I realize there are no guarantees in life but if one stands up to be counted, the only thing to be counted is the fact he or she won't be returning.

But I do recognize your concern and would appreciate any comments you have concerning my thoughts.

I shall be terminated in a few weeks and despite the darkness I remain,

Respectfully yours,

John M. McDonell

OFFICE OF THE COMMISSIONER

September 25, 1984

Mr. Jack Burton, President
American Federation of
Government Employees
Local 183
P. O. Box 3
Anchorage, AK 99510

Dear Mr. Burton:

I am writing in response to your recent letters to Governor Sheffield, Commissioner Lyon and myself regarding the Alaska Railroad (ARR) freight house issue. On behalf of the Governor and Commissioner Lyon, we appreciate you taking the time to write voicing your concerns on this matter.

As you know, the Alaska Railroad remains federally-owned and operated by the Federal Railroad Administration until the actual transfer occurs, which we anticipate will be in late 1984. The State of Alaska has no official standing whereby it can change or alter these kinds of decisions while the Alaska Railroad remains under federal ownership.

There have been some similar issues involving decisions by current management that have been brought to our attention over the last few weeks. In discussing these with the ARR, we have reached an understanding that the State will be informed of all such activities prior to their initiation. In addition, it has been suggested to the ARR that these kinds of decisions should be carefully weighed during this transition period, and that it might be best to postpone such actions until after transfer, or at least until such time as the new Board of Directors for the Alaska Railroad Corporation has been appointed and begun its work.

The Alaska Railroad has recently informed us that because of the pending transfer and the imminent appointment of the Board of Directors, they have decided to postpone initiation of the proposed action on the freight house until early next year. This

will allow the new Board ample opportunity to review the issue, and then make a decision on the relative merits of the proposal.

We appreciate the willingness of the ARR to wait and allow the new Board of Directors a chance to review this matter, once its official work has been initiated. It is worth noting that the Alaska State Legislature placed heavy emphasis on the railroad conducting its operations on a self-sustaining basis under state ownership. Accordingly, a key criteria in this review will be an assessment of the long-term economic implications of such a decision.

Thank you again for taking the time to write on this issue. We look forward to developing a good working relationship with all of the unions representing employees at the Alaska Railroad as we move toward state ownership.

Sincerely,

R. E. Knapp

Section 604 of ARTA contains employee transfer and protection provisions. In Section 604, Congress required that the State-owned Railroad establish arrangements to protect the employment interest of transferred employees. These arrangements require:

- Adoption of all collective bargaining agreements which are in effect on the date of transfer. These agreements are to continue in effect for the two-year period commencing on the date of transfer and are to be renegotiated during this period.

- Retention of all employees, other than officers who are defined in ARTA as five specific positions, who elect to transfer to the State-owned Railroad in their same positions for a two-year period commencing on the date of transfer. During that period, separation can only occur in cases of reassignment, separation for cause, resignation, retirement, or lack of work.

- Payment of wages at or above the base pay levels in effect on the date of transfer for a two-year period unless the parties agree otherwise.

- Priority reemployment based on seniority with the State-owned Railroad for any transferred employee who is separated for lack of work during the two-year period. Federal service is included in the computation of seniority for reemployment.

- During the two-year period, transferred employees will receive credit for annual and sick leave, seniority rights, and relocation and turnaround travel allowances which have been accrued during their period of Federal employment.

- COLA payments to transferred employees of an amount equivalent to the cost of living allowance to which they were entitled as Federal employees on the day before the date of transfer, provided that such payment shall not exceed the percentage of any transferred employee's base salary level provided by the United States as a cost of living allowance on the day before the date of transfer, unless the parties agree to the contrary.

- Health and life insurance programs for transferred employees substantially equivalent to the Federal health and life insurance programs available to employees on the day before the date of transfer.

Section 607 of ARTA contains the following provisions regarding the continuing Federal rights of Alaska Railroad employees and the treatment of their retirement rights and benefits:

- Employees who transfer to the State-owned Railroad and who are subject to the Civil Service retirement law who transfer without a break in service shall continue to be covered in the Federal Civil Service Retirement System unless the State-owned Railroad decides to provide retirement benefits that reflect prior Federal service and are substantially equivalent to that provided State employees.

- Employees of The Alaska Railroad who elect not to transfer to the State-owned Railroad shall be entitled to all of the rights and benefits available to them under Federal law as discontinued Federal employees.

Railroad Lands

The Corporation Act places all Railroad lands transferred to the State under the direct control and ownership of the Corporation. The Corporation may generally lease its lands, but any exchange or sale of the entire interest in lands or lease in excess of 35 years is prohibited unless the Legislature approves action by law. The Corporation may request the Department of Natural Resources to select Federal lands for Railroad use under Alaska's Statehood entitlement and may apply on its own behalf for other Federal land and property. The Corporation may request State lands for Railroad use. It can also exercise the power of eminent domain, but only with the Governor's approval.

Financial Authority

All liabilities incurred by the Corporation must be satisfied from assets owned by the Corporation; but likewise, all revenue generated by the Corporation shall be retained and managed for use by the Railroad. With the Governor's approval, the Corporation may request direct appropriations from the Legislature. The Corporation may issue bonds with legislative approval, but the credit of the State cannot be pledged for their payment.

Oversight and Accountability

As previously noted, both the Governor and Legislature have approval power over certain Railroad actions. Perhaps the most significant oversight mechanism is the provision that all Board members serve at the pleasure of the Governor. The Corporation Act attempts to establish a balance between the principles of managing the Railroad in a business-like manner, while ensuring accountability for the large amount of public funds and interest associated with operation of the new State-owned Railroad.

Employee Protection

The employee provisions of ARTA set the framework by which ARR employee interests are to be protected. The basic premise is that the "status quo" for employee interests will be maintained for two years unless changes are negotiated sooner. Exceptions are allowed for separation for cause, resignation, retirement, or lack of work. Certain officers of the Railroad, as defined in ARTA, carry these protections for only a one-year period.

The Corporation Act is entirely consistent with the ARTA employee protection requirements and requires the Corporation to comply with these requirements. Although many of your questions regarding specific issues, such as personnel rules following transfer and new hire provisions, cannot be answered until the new Corporation begins its work, the Corporation Act does provide that Railroad employees are employees of the Corporation, not of the State, and as such, are exempt from the State Personnel Act and the Public Employment Relations Act.

The Corporation Act also establishes a Railroad Labor Relations Agency consisting of three members appointed by the Governor. This agency is to function as an independent body and will perform normal labor relations oversight duties, such as investigating and settling complaints of unfair labor practices.

Memorandum

To: All Alaska Railroad Employees

From: Mark S. Hickey
State Railroad Coordinator
Department of Transportation
and Public Facilities

William E. Loftus
Executive Director
Federal Railroad Administration

Subject: Alaska Railroad Transfer Information Bulletin

We are pleased to transmit to you the second issue of The Alaska Railroad Transfer Information Bulletin in response to questions you have presented.

This issue of the Information Bulletin contains information based on the best analysis presently available, relating to issues of concern to ARR employees in the areas of transfer procedure and employee protection period, benefits, leave, life and health insurance benefits, pay and positions, and other miscellaneous issues. We have tried to make the answers as clear and complete as possible. However, because the transfer process is complex and unique, some answers may be further explained as more information becomes available.

The Information Bulletin is an effort to explain the transfer process and employees' rights and benefits. The answers to these questions neither add to nor delete from your rights conferred by law. Answers provided in this bulletin represent the best efforts of the staffs of the Office of Personnel Management and Federal Railroad Administration as to Federal matters, and the Alaska Railroad Transfer Team as to issues relating to State action.

The effort to provide information to employees is continuing and more questions will be answered in the future. We appreciate your patience and cooperation as we work through this challenging period for The Alaska Railroad.

QUESTIONS AND ANSWERS

The following questions have been submitted by employees. If your specific question has not been answered here, please feel free to submit it to Mr. James B. Blasingame, Chief of Administration, or to your bargaining unit representative as listed so that we may address it in future editions of this Bulletin as the transfer process permits and the information becomes available.

The answers provided here represent the best analysis available to date. They may be explained further as more information becomes available in the future. These answers neither add to nor delete from employees' rights and benefits which are conferred by law. Rather, they are an effort to explain those rights and benefits. Answers to questions relating to Federal rights and benefits have been provided by the staff of Federal Railroad Administration and the central office of the Office of Personnel Management. Answers to issues relating to State actions have been provided by the staff from Alaska Railroad Transfer Team.

I. Transfer Procedure & Protection Period:

1. Q. What will be the actual transfer date?

   A. While the transfer date has yet to be officially set, FRA and the State are planning on a transfer date no later than January 5, 1985.

2. Q. Will there still be a two-year "transition" period?

   A. ARTA provides for a two-year period beginning on the date of transfer during which numerous employee interests are protected. This does not mean that there will be a period of joint Federal/State ownership and control as suggested by the idea of a "transition period." Before the date of transfer, the ARR is owned and operated by the Federal Railroad Administration. After the date of transfer, the ARR will be owned by the State of Alaska and managed and operated by the Alaska Railroad Corporation.

3. Q. Will present pay and benefits be protected through the transition period?

   A. The State has agreed to retain all transferring permanent employees, adopt all collective bargaining agreements, pay current pay scales, including cost of living adjustments, to continue the Federal Retirement System or provide a system substantially equivalent to that of State employees and to provide health and welfare coverage substantially equivalent to present programs. The basic principle is that these permanent employee interests will be maintained subject to the exceptions identified in ARTA for reassignment, separation for cause, resignation, retirement, or lack of work. These interests will be maintained for two years unless changes are negotiated with collective bargaining agents.

4. Q. Can employees be terminated during this period?

   A. Yes, but only in accordance with the provisions of ARTA, existing collective bargaining agreements, and the personnel policies and rules in place at the time of termination.

5. Q. What mechanism will be used to effect the separation of permanent employees from Federal employment and their reemployment by the Alaska Railroad Corporation for those employees who elect to transfer?

   A. The Office of Personnel Management has determined that the appropriate mechanism is reduction-in-force procedures. The required reduction-in-force notice will be issued with a concurrent offer of employment of the employee's same position from the Alaska Railroad Corporation. The RIF procedure will not require bumping and retreating for this process.

6. Q. Will a permanent employee be entitled to severance pay if he elects to resign?

   A. No. The Office of Personnel Management has determined that job protection provisions provided by ARTA constitute comparable employment with the Alaska Railroad Corporation and, therefore, employees will not be entitled to severance pay.

7. Q. How long will permanent employees have to decide whether to retire, resign, or transfer to the State?

   A. Employees must be given at least 30 calendar days' notice prior to the effective date of a reduction-in-force action. Employees would be required to make a written decision on the offer of employment by a designated date within the notice period.

8. Q. How will temporary employees be treated in the transfer process?

   A. As a result of ARTA, all temporary employees employed as of the date of transfer will be separated from Federal service effective that date. The State has agreed to reemploy such personnel at transfer in accordance with the terms and conditions of their previous Federal appointment and, where appropriate, existing collective bargaining agreements.

9. Q. Will the Federal Government assist employees who wish to remain in Federal service with placement programs, priority hiring, or other special handli

   A. The Department of Transportation's Reemployment Priority Lis Office of Personnel Management's Displaced Employee Program, and other priority placement process normally available through the local office of the Office of Personnel Management will be open to ARR employees separated from Federal service. The details of the available programs will be provided during the reduction-in-force process.

II. Benefits:

10. Q. Which retirement system will be used for current ARR employees?

A. The Civil Service Retirement System will be continued for all participating employees who transfer. Under an option provided by ARTA, the Board of Directors of the new ARR Corporation has a two-year period from date of transfer within which to decide whether or not to create a new system for transferring employees. If this option is exercised, such a system must be substantially equivalent to the retirement program maintained by the State for State employees and must reflect prior Federal service. Transferring employees and the Alaska Railroad Corporation will continue their contributions to the Civil Service Retirement System unless the Alaska Railroad Corporation decides to establish another system.

11. Q. Must an employee eligible for optional retirement decide to retire immediately upon transfer date, or will employees have the two-year protection period in which to decide?

A. Timing of the decision to retire depends upon the desires of the individual employee. Employees may exercise the right for optional retirement at any time they are eligible.

12. Q. If eligible to retire optionally within five years of transfer date, will those employees have the option to work for the Railroad under State ownership for that period and then retire under Federal retirement?

A. Yes. Timing of the decision to retire under the Federal retirement system depends on the eligibility and desires of the individual employee. For those transferring employees who are within five years of being eligible for optional retirement, ARTA provides that these employees may elect to remain in the Civil Service Retirement System even if the Alaska Railroad Corporation elects to create a new retirement system under the option provided by ARTA.

13. Q. Will there be a discontinued service retirement option available to qualified employees who choose not to transfer to the State?

A. Yes, up to and including the date of transfer.

14. Q. Does an employee eligible for discontinued service retirement at transfer have the two-year period in which to exercise the option to retire?

A. No. After the date of transfer, only transferred employees who are eligible and participating in the Civil Service Retirement System and whose employment with the Corporation is terminated (not for cause) shall be entitled to discontinued service retirement as provided by ARTA.

15. Q. If an employee decides not to retire, how will Federal service be transferred and counted toward retirement?

A. As long as the ARR Corporation elects to keep transferring employees who presently contribute to the Civil Service Retirement System in that system after transfer, the rules of that system will apply. However, if the Alaska Railroad Corporation elects to establish a retirement system substantially equivalent to the State employees' system, then credit reflecting prior Federal service as well as service with the ARR Corporation must be given subject to the rules established for the new system. Establishment of such a system is a policy matter to be addressed by the Alaska Railroad Corporation created to operate the ARR for the State.

16. Q. What will happen to the Federal employer's retirement contributions if an employee elects not to retire or not to transfer to the State?

A. In accordance with Federal regulations, those contributions remain in the Civil Service Retirement Fund.

17. Q. Under what circumstances may an employee receive a retirement contribution refund?

A. In accordance with Federal regulations, the employee who elects not to transfer to the Alaska Railroad Corporation and is not eligible to retire (optionally or discontinued service annuity) and does not elect to obtain other Federal employment may withdraw only those funds which the employee contributed to that system.

III. Sick and Annual Leave:

18. Q. What is the interpretation of "credit" for accrued sick and annual leave benefits?

A. For those Alaska Railroad employees transferring to the State-owned railroad under the provisions of ARTA, credit will be transferred for the actual number of hours of sick and annual leave accrued by the employee prior to the date of transfer.

19. Q. In accordance with Federal regulations, if an employee is not eligible for retirement and decides not to transfer to the State, will he be paid for both sick and annual leave accrued?

A. If the employee transfers to another federal activity, both the annual and sick leave are transferred with the employee. Under Federal regulations, there is no provision for payment of accrued sick leave upon separation from service. If the employee elects not to transfer and is not eligible for retirement, that individual will receive a lump-sum payment for accrued annual leave.

20. Q. If an employee does transfer to the State, can he be paid for his accrued leave and then begin State service with a zero balance of leave?

A. No. Section 607(d) of ARTA provides: "(d) Any employee who transfers to the State-owned railroad under this title shall not be entitled to lump-sum payment for unused annual leave under section 5551 of title 5, United States Code, but shall be credited by the State with the unused annual leave balance at the time of transfer."

IV. Life Insurance and Health Benefits:

21. Q. Will the State pick up our current health and life benefits as afforded by the Federal Government during the transition period?

A. One of the requirements of Section 604 of ARTA is that the State has provided..."for health and life insurance programs for transferred employees retained by the State-owned railroad during the two-year period commencing on the date of transfer, substantially equivalent to the Federal health and life insurance programs available to employees on the day before the date of transfer (except officers of The Alaska Railroad, who shall receive such credit for one year following the date of transfer)."

Efforts are nearing completion to finalize a proposal for presentation to the ARR Corporation Board of Directors and the Federal Railroad Administration to comply with the requirements of ARTA on this subject.

22. Q. Will the Railroad, under State ownership, continue to pay health benefit premiums for certain crafts as it now does?

A. To the extent that this issue is addressed by collective bargaining agreements or the ARTA provisions, those agreements and ARTA will apply. Further review on this issue is under way as part of the planning for health benefit requirements.

V. Pay and Positions:

23. Q. Will current pay plans remain? How will pay be set for GS equivalent employees?

A. One of the requirements of Section 604 of ARTA is that the State has agreed to provide for the payment of compensation to transferred employees for two years commencing on the date of transfer at or above the base salary levels in effect for such employees on the date of transfer, unless the parties otherwise agree during the two-year period or unless the employee is separated under the provisions of ARTA.

24. Q. Will there still be an "A" and "B" pay plan as there currently is in the White Collar pay plan?

A. To the extent that the existing collective bargaining agreements adopted by the ARR Corporation address this issue, they will apply.

25. Q. Will COLA for GS equivalent employees be rolled into the base rate? Will COLA be subject to Federal income tax?

A. ARTA provides that the State has agreed to pay..."an amount equivalent to the cost-of-living allowance to which they are entitled as Federal employees on the day before the date of transfer, in accordance with the provisions of subparagraph (D) of this paragraph;..." ARTA further provides that payment of COLA to transferred employees ..."shall not exceed the percentage of any transferred employee's base salary level provided by the United States as a cost-of-living allowance on the day before the date of transfer, unless the parties agree to the contrary." Research is still ongoing as to whether COLA is required to be part of total pay or provided as separate compensation.

Taxation of such COLA payments is subject to Federal tax laws and regulation which currently provide no special treatment for such income.

VI. Miscellaneous Questions:

26. Q. Will turnaround leave still be honored?

A. Yes. One of the requirements of Section 604 of ARTA is that the State has provided "...for credit during the two-year period commencing on the date of transfer for accrued annual and sick leave, seniority rights, and relocation and turnaround travel allowances which have been accrued during their period of Federal employment (except for officers of The Alaska Railroad, who shall receive such credit for one year following the date of transfer);"

27. Q. Will the State be eligible to sell the Railroad to a privately owned corporation after the transition period?

A. Although there is no prohibition contained in ARTA on sale or transfer of the Railroad after acquisition by the State, any such sale or transfer would have to conform with relevant ARTA requirements. Further, there are no current plans for any such transfer of the ARR after acquisition by the State. The State's attention is presently focused on the transfer process and the issues that must be resolved before transfer can take place.

28. Q. Is there still the possibility of an employee corporation buying the Railroad?

A. Such arrangements are not precluded by either ARTA or legislation enacted by the State. However, the transfer process must be completed prior to consideration by the State of any such disposition of the Railroad.

29. Q. Can transfer rights later be extended to a former employee who elected not to accept the offer of State employment?

A. The Office of Personnel Management's interpretation of ARTA is that transfer rights and benefits are contingent upon continuity of employment without an actual break in service between Federal and Alaska Railroad Corporation employment. Therefore, while the Corporation has the discretion to hire a former Railroad employee at a later date, the Corporation is not required to extend ARTA transfer rights.

Memorandum

To: All Alaska Railroad Employees

From: Mark S. Hickey
State Railroad Coordinator
Department of Transportation
and Public Facilities

William E. Loftus
Executive Director
Federal Railroad Administration

Subject: Alaska Railroad Transfer Information Bulletin

We are pleased to transmit to you the second issue of The Alaska Railroad Transfer Information Bulletin in response to questions you have presented.

This issue of the Information Bulletin contains information based on the best analysis presently available, relating to issues of concern to ARR employees in the areas of transfer procedure and employee protection period, benefits, leave, life and health insurance benefits, pay and positions and other miscellaneous issues. We have tried to make the answers as clear and complete as possible. However, because the transfer process is complex and unique, some answers may be further explained as more information becomes available.

The Information Bulletin is an effort to explain the transfer process and employees' rights and benefits. The answers to these questions neither add to nor delete from your rights conferred by law. Answers provided in this bulletin represent the best efforts of the staffs of the Office of Personnel Management and Federal Railroad Administration as to Federal matters, and the Alaska Railroad Transfer Team as to issues relating to State action.

The effort to provide information to employees is continuing and more questions will be answered in the future. We appreciate your patience and cooperation as we work through this challenging period for The Alaska Railroad.

QUESTIONS AND ANSWERS

The following questions have been submitted by employees. If your specific question has not been answered here, please feel free to submit it to Mr. James B. Blasingame, Chief of Administration, or to your bargaining unit representative as listed so that we may address it in future editions of this Bulletin as the transfer process permits and the information becomes available.

The answers provided here represent the best analysis available to date. They may be explained further as more information becomes available in the future. These answers neither add to nor delete from employees' rights and benefits which are conferred by law. Rather, they are an effort to explain those rights and benefits. Answers to questions relating to Federal rights and benefits have been provided by the staff of Federal Railroad Administration and the central office of the Office of Personnel Management. Answers to issues relating to State actions have been provided by the staff from Alaska Railroad Transfer Team.

I. Transfer Procedure & Protection Period:

1. Q. What will be the actual transfer date?

   A. While the transfer date has yet to be officially set, FRA and the State are planning on a transfer date no later than January 5, 1985.

2. Q. Will there still be a two-year "transition" period?

   A. ARTA provides for a two-year period beginning on the date of transfer during which numerous employee interests are protected. This does not mean that there will be a period of joint Federal/State ownership and control as suggested by the idea of a "transition period." Before the date of transfer, the ARR is owned and operated by the Federal Railroad Administration. After the date of transfer, the ARR will be owned by the State of Alaska and managed and operated by the Alaska Railroad Corporation.

3. Q. Will present pay and benefits be protected through the transition period?

   A. The State has agreed to retain all transferring permanent employees, adopt all collective bargaining agreements, pay current pay scales, including cost of living adjustments, to continue the Federal Retirement System or provide a system substantially equivalent to that of State employees and to provide health and welfare coverage substantially equivalent to present programs. The basic principle is that these permanent employee interests will be maintained subject to the exceptions identified in ARTA for reassignment, separation for cause, resignation, retirement, or lack of work. These interests will be maintained for two years unless changes are negotiated with collective bargaining agents.

4. Q. Can employees be terminated during this period?

A. Yes, but only in accordance with the provisions of ARTA, existing collective bargaining agreements, and the personnel policies and rules in place at the time of termination.

5. Q. What mechanism will be used to effect the separation of permanent employees from Federal employment and their reemployment by the Alaska Railroad Corporation for those employees who elect to transfer?

A. The Office of Personnel Management has determined that the appropriate mechanism is reduction-in-force procedures. The required reduction-in-force notice will be issued with a concurrent offer of employment of the employee's same position from the Alaska Railroad Corporation. The RIF procedure will not require bumping and retreating for this process.

6. Q. Will a permanent employee be entitled to severance pay if he elects to resign?

A. No. The Office of Personnel Management has determined that job protection provisions provided by ARTA constitute comparable employment with the Alaska Railroad Corporation and, therefore, employees will not be entitled to severance pay.

7. Q. How long will permanent employees have to decide whether to retire, resign, or transfer to the State?

A. Employees must be given at least 30 calendar days' notice prior to the effective date of a reduction-in-force action. Employees would be required to make a written decision on the offer of employment by a designated date within the notice period.

8. Q. How will temporary employees be treated in the transfer process?

A. As a result of ARTA, all temporary employees employed as of the date of transfer will be separated from Federal service effective that date. The State has agreed to reemploy such personnel at transfer in accordance with the terms and conditions of their previous Federal appointment and, where appropriate, existing collective bargaining agreements.

9. Q. Will the Federal Government assist employees who wish to remain in Federal service with placement programs, priority hiring, or other special handling?

A. Yes. The Department of Transportation's Reemployment Priority List, the Office of Personnel Management's Displaced Employee Program, and any other priority placement process normally available through the local office of the Office of Personnel Management will be open to ARR employees separated from Federal service. The details of the available programs will be provided during the reduction-in-force process.

II. Benefits:

10. Q. Which retirement system will be used for current ARR employees?

A. The Civil Service Retirement System will be continued for all participating employees who transfer. Under an option provided by ARTA, the Board of Directors of the new ARR Corporation has a two-year period from date of transfer within which to decide whether or not to create a new system for transferring employees. If this option is exercised, such a system must be substantially equivalent to the retirement program maintained by the State for State employees and must reflect prior Federal service. Transferring employees and the Alaska Railroad Corporation will continue their contributions to the Civil Service Retirement System unless the Alaska Railroad Corporation decides to establish another system.

11. Q. Must an employee eligible for optional retirement decide to retire immediately upon transfer date, or will employees have the two-year protection period in which to decide?

A. Timing of the decision to retire depends upon the desires of the individual employee. Employees may exercise the right for optional retirement at any time they are eligible.

12. Q. If eligible to retire optionally within five years of transfer date, will those employees have the option to work for the Railroad under State ownership for that period and then retire under Federal retirement?

A. Yes. Timing of the decision to retire under the Federal retirement system depends on the eligibility and desires of the individual employee. For those transferring employees who are within five years of being eligible for optional retirement, ARTA provides that those employees may elect to remain in the Civil Service Retirement System even if the Alaska Railroad Corporation elects to create a new retirement system under the option provided by ARTA.

13. Q. Will there be a discontinued service retirement option available to qualified employees who choose not to transfer to the State?

A. Yes, up to and including the date of transfer.

14. Q. Does an employee eligible for discontinued service retirement at transfer have the two-year period in which to exercise the option to retire?

A. No. After the date of transfer, only transferred employees who are eligible and participating in the Civil Service Retirement System and whose employment with the Corporation is terminated (not for cause) shall be entitled to discontinued service retirement as provided by ARTA.

15. Q. If an employee decides not to retire, how will Federal service be transferred and counted toward retirement?

A. As long as the ARR Corporation elects to keep transferring employees who presently contribute to the Civil Service Retirement System in that system after transfer, the rules of that system will apply. However, if the Alaska Railroad Corporation elects to establish a retirement system substantially equivalent to the State employees' system, then credit reflecting prior Federal service as well as service with the ARR Corporation must be given subject to the rules established for the new system. Establishment of such a system is a policy matter to be addressed by the Alaska Railroad Corporation created to operate the ARR for the State.

16. Q. What will happen to the Federal employer's retirement contributions if an employee elects not to retire or not to transfer to the State?

A. In accordance with Federal regulations, those contributions remain in the Civil Service Retirement Fund.

17. Q. Under what circumstances may an employee receive a retirement contribution refund?

A. In accordance with Federal regulations, the employee who elects not to transfer to the Alaska Railroad Corporation and is not eligible to retire (optionally or discontinued service annuity) and does not elect to obtain other Federal employment may withdraw only those funds which the employee contributed to that system.

III. Sick and Annual Leave:

18. Q. What is the interpretation of "credit" for accrued sick and annual leave benefits?

A. For those Alaska Railroad employees transferring to the State-owned railroad under the provisions of ARTA, credit will be transferred for the actual number of hours of sick and annual leave accrued by the employee prior to the date of transfer.

19. Q. In accordance with Federal regulations, if an employee is not eligible for retirement and decides not to transfer to the State, will he be paid for both sick and annual leave accrued?

A. If the employee transfers to another federal activity, both the annual and sick leave are transferred with the employee. Under Federal regulations, there is no provision for payment of accrued sick leave upon separation from service. If the employee elects not to transfer and is not eligible for retirement, that individual will receive a lump-sum payment for accrued annual leave.

20. Q. If an employee does transfer to the State, can he be paid for his accrued leave and then begin State service with a zero balance of leave?

A. No. Section 607(d) of ARTA provides: "(d) Any employee who transfers to the State-owned railroad under this title shall not be entitled to lump-sum payment for unused annual leave under section 5551 of title 5, United States Code, but shall be credited by the State with the unused annual leave balance at the time of transfer."

IV. Life Insurance and Health Benefits:

21. Q. Will the State pick up our current health and life benefits as afforded by the Federal Government during the transition period?

A. One of the requirements of Section 604 of ARTA is that the State has provided..."for health and life insurance programs for transferred employees retained by the State-owned railroad during the two-year period commencing on the date of transfer, substantially equivalent to the Federal health and life insurance programs available to employees on the day before the date of transfer (except officers of The Alaska Railroad, who shall receive such credit for one year following the date of transfer)."

Efforts are nearing completion to finalize a proposal for presentation to the ARR Corporation Board of Directors and the Federal Railroad Administration to comply with the requirements of ARTA on this subject.

22. Q. Will the Railroad, under State ownership, continue to pay health benefit premiums for certain crafts as it now does?

A. To the extent that this issue is addressed by collective bargaining agreements or the ARTA provisions, those agreements and ARTA will apply. Further review on this issue is under way as part of the planning for health benefit requirements.

V. Pay and Positions:

23. Q. Will current pay plans remain? How will pay be set for GS equivalent employees?

A. One of the requirements of Section 604 of ARTA is that the State has agreed to provide for the payment of compensation to transferred employees for two years commencing on the date of transfer at or above the base salary levels in effect for such employees on the date of transfer, unless the parties otherwise agree during the two-year period or unless the employee is separated under the provisions of ARTA.

24. Q. Will there still be an "A" and "B" pay plan as there currently is in the White Collar pay plan?

A. To the extent that the existing collective bargaining agreements adopted by the ARR Corporation address this issue, they will apply.

25. Q. Will COLA for GS equivalent employees be rolled into the base rate? Will COLA be subject to Federal income tax?

A. ARTA provides that the State has agreed to pay..."an amount equivalent to the cost-of-living allowance to which they are entitled as Federal employees on the day before the date of transfer, in accordance with the provisions of subparagraph (D) of this paragraph;..." ARTA further provides that payment of COLA to transferred employees ..."shall not exceed the percentage of any transferred employee's base salary level provided by the United States as a cost-of-living allowance on the day before the date of transfer, unless the parties agree to the contrary." Research is still ongoing as to whether COLA is required to be part of total pay or provided as separate compensation.

Taxation of such COLA payments is subject to Federal tax laws and regulation which currently provide no special treatment for such income.

VI. Miscellaneous Questions:

26. Q. Will turnaround leave still be honored?

A. Yes. One of the requirements of Section 604 of ARTA is that the State has provided "...for credit during the two-year period commencing on the date of transfer for accrued annual and sick leave, seniority rights, and relocation and turnaround travel allowances which have been accrued during their period of Federal employment (except for officers of The Alaska Railroad, who shall receive such credit for one year following the date of transfer);"

27. Q. Will the State be eligible to sell the Railroad to a privately owned corporation after the transition period?

A. Although there is no prohibition contained in ARTA on sale or transfer of the Railroad after acquisition by the State, any such sale or transfer would have to conform with relevant ARTA requirements. Further, there are no current plans for any such transfer of the ARR after acquisition by the State. The State's attention is presently focused on the transfer process and the issues that must be resolved before transfer can take place.

28. Q. Is there still the possibility of an employee corporation buying the Railroad?

A. Such arrangements are not precluded by either ARTA or legislation enacted by the State. However, the transfer process must be completed prior to consideration by the State of any such disposition of the Railroad.

29. Q. Can transfer rights later be extended to a former employee who elected not to accept the offer of State employment?

A. The Office of Personnel Management's interpretation of ARTA is that transfer rights and benefits are contingent upon continuity of employment without an actual break in service between Federal and Alaska Railroad Corporation employment. Therefore, while the Corporation has the discretion to hire a former Railroad employee at a later date, the Corporation is not required to extend ARTA transfer rights.

SUBJECT: Alaska Railroad Transfer Project - Transition Work Plan

FROM: R. L. Knapp
Commissioner
DOT&PF

Richard Lyon
Commissioner
DC&ED

Attached for your review and information is a final draft of the Transition Work Plan for the Alaska Railroad Transfer Project. This document depicts all of the major work tasks that need to be accomplished in the period before or immediately following actual transfer.

Due to the time constraints of the transfer schedule and the complex nature of many of these work efforts, a considerable amount of this work has already been initiated, or in some cases, actually completed. Attachment A to the Overview depicts the overall organization for management of this project. Attachment B provides a general schedule with indications for major milestones and work deadlines.

As can be seen by a quick perusal of the remaining attachments to the Overview, the dynamic nature of much of this work effort requires a flexible and changing work plan. It should also be noted that many of the major work areas or "components" have already been scoped out with considerable detail reflecting the importance and priority of that particular area. Some of the other components have not yet been addressed with the same level of specificity, either because they are of a lower priority or not as time-sensitive as other tasks.

A quick review of the Work Plan Overview should provide policymakers with a thorough and current understanding of the Alaska Railroad Transfer Project. We would recommend that everyone take the time to review at least that section in order to better understand the schedule and complexity of this new step about to be taken by the State.

If there are any questions regarding this material, or if anyone would like a more detailed briefing on this project, please feel free to call us or Mark Hickey, the State Railroad Coordinator. Thank you for your attention to this matter.

ALASKA RAILROAD TRANSFER PROJECT

TRANSITION WORK PLAN

OVERVIEW

I. Introduction.

On July 5, 1984, Governor Sheffield signed into law an Act establishing the Alaska Railroad Corporation to own and operate the Alaska Railroad (ARR) upon transfer. That event was followed on July 12, 1984, by an exchange of documents between the Governor and John Riley, Administrator of the Federal Railroad Administration (FRA), which provided Secretary Dole's certification that the State of Alaska has agreed to meet all of the conditions of the federal Alaska Railroad Transfer Act of 1982 (ARTA).

The certification ceremony was in direct response to state acquisition legislation enacted and signed into law earlier this year, and is the last major milestone before actual transfer can occur. It represents the culmination of over three years of work by state and federal officials, which formally started on July 17, 1981, when Senate Bill 1500 was introduced in the United States Congress to authorize transfer of the ARR to the State of Alaska.

Under the terms and conditions of ARTA, certification by Secretary Dole means that the State has agreed to meet the following specific conditions:

(1) to continue operations of the ARR as a rail carrier in intrastate and interstate commerce;

(2) to assume all rights, liabilities and obligations of the Alaska Railroad on the date of transfer, except for tort claims and legal liabilities which occurred during federal ownership;

(3) to protect the retirement benefits and other employee interests of all permanent employees for a two-year period following the date of transfer;

(4) to allow representatives of the Secretary of Transportation adequate access to railroad employees' records when needed in relation to the period of federal ownership; and

(5) to compensate the United States for the $22.271 million which has been determined by the United States Railway Association to be the railroad's fair market value.

ARTA requires actual transfer of ownership and responsibility to occur as soon as practical after certification. The State has agreed to set the specific date by October 12, 1984, and if at all possible, to achieve the transfer by the end of this calendar year. Establishment of the transfer date is contingent, in part, on how quickly we can complete the support work necessary to achieve a smooth and orderly transfer of operations; on how long it takes to make proper board appointments; and on how long a period of time is needed for the board to become familiar with their new responsibilities.

The State's Alaska Railroad Corporation Act (Corporation Act) provides for the establishment of the Alaska Railroad Corporation (ARC) as an independent, public corporation within the Department of Commerce and Economic Development (DC&ED) to operate and manage the railroad upon transfer to state ownership. The corporation is to be managed by a seven-person Board of Directors, consisting of the Commissioners of Commerce and Economic Development and Transportation and Public Facilities, plus five public members. The new corporation is charged with carrying out its management responsibilities on a self-sustaining basis according to sound business management practices.

Given these time considerations and the complexity of the overall project, there is a considerable amount of work to be performed within a short period of time. The Alaska Railroad Transfer Team (Transfer Team), which was created by Governor Sheffield in February 1983 to coordinate and direct this project, has been charged with the following mission during the transition period: (1) to ensure a smooth and orderly transfer of operations from federal to state ownership; and (2) to assist with the establishment of the new corporation as it assumes its new duties.

This document has been prepared to provide policy-makers a detailed overview of project activities during this period. There are several additional documents attached to the Overview as Attachment C, which more fully depict the project's organization and schedule, while also providing a more in-depth explanation of individual work tasks.

II. Project Organization.

With passage and enactment of the Corporation Act, the Commissioners of Commerce and Economic Development and Transportation and Public Facilities now share lead responsibility for policy direction of the Alaska Railroad Transfer Project. In order to minimize disruption of project activities, it has been decided to leave the core staff of the Alaska Railroad Transfer Team in the Department of Transportation and Public Facilities (DOT&PF) reporting directly to the DOT&PF Commissioner for performance of their duties. In turn, policy decisions and project direction will be provided on a coordinated basis by the two commissioners.

The Transfer Team, working under the direction of the State Railroad Coordinator, has responsibility for coordination and direction of project activities by all state agencies pertaining to the ARR during the transition period. The Transfer Team also has the responsibility to provide all coordination and interface with federal officials at the ARR and FRA during this period. In addition to the core staff within DOT&PF, the Transfer Team consists of additional resources from the Office of the Attorney General (AG), the Department of Administration (DOA), the Department of Natural Resources (DNR), the Office of Management and Budget (OMB), the Department of Labor (DOL), and the Department of Public Safety (DPS), along with additional outside counsel and consulting expertise as needed.

Attachment A to this document depicts the project's organizational arrangement and highlights each agency's primary responsibilities in the project. It is essential that this organizational arrangement is followed during the transition period in order to ensure timely and responsive performance of work tasks, while also minimizing the potential for conflicting direction to federal officials at the ARR and FRA.

III. Project Schedule.

The project schedule for the transition period extends from the date of certification to a period of time beyond actual transfer. There is no need at this point to specify the end for this period since it will vary depending on the task to be performed. For example, the re-negotiation of all collective bargaining agreements, an effort for which planning needs to begin shortly, will probably not be finished until well after transfer.

The most important milestone at this juncture is the actual date of transfer. Although it has not been officially established as yet, we are working for planning purposes with a date of no later than January 1, 1985. Both the federal and state transfer laws include numerous specific requirements which must be addressed and completed before that date. As a result, all such tasks are identified in the Work Plan as "Immediate/Pre-Transfer," which classifies it as a task with highest priority for staff attention.

There are other tasks, such as budget preparation and capital planning, that need to be initiated pre-transfer because of external scheduling considerations such as the upcoming legislative session, but will continue well beyond transfer as a corporation responsibility. These are identified as "Pre-Transfer/Ongoing," and usually carry secondary priority for attention by the Transfer Team.

Finally, there is another category of tasks which cannot be initiated before the new corporation assumes a legal existence and do

not have to be underway before transfer. These items are designated as "Corporation/Post-Transfer," and carry the lowest priority for staff attention.

Another important milestone during the next month or two is the projected time period for when board appointments for the new corporation will be completed and the new board can begin its work. Although there is some indication that this may be expedited, it is currently anticipated that the first board meeting will not occur prior to October 1, 1984.

Attachment B presents the current schedule for this project, with particular attention focused on the transition period. It is important to reiterate that the specific milestones depicted on this chart are not definitive, but are only Transfer Team estiimates for purposes of project planning.

IV. Work Task Components.

This portion of the Overview provides an explanation of the individual work tasks by major topic or "component" area. For purposes of this part of the project, all work has been divided into the following four broad components: (1) Property Transfer Issues; (2) Employee/Personnel Issues; (3) Financial/Administrative Issues; and (4) Corporate Development Issues. Although there is some duplication and overlap between these major components, particularly in the corporate development area, this structure ensures that all work tasks are identified and addressed in a timely manner consistent with the overall transfer schedule.

Each topic or component area is divided into a brief background section that outlines the basic issue, a specific list of work tasks and assigned priorities, and a final section which discusses relevant schedule and deadline considerations. Attachment C provides a more detailed explanation of the individual components and major work tasks identified below.

A. Property Transfer Issues.

Background: This area includes all of the work necessary to obtain acceptable transfer documents for conveyance of the ARR's real and personal property at transfer; to resolve by negotiation or adjudication the ANSCA "3(e)" Native claims against railroad lands; and to ensure proper title recording in coordination with the DNR throughout the transition period. Additional work needs include monitoring of the ongoing cadastral survey work by the Bureau of Land Management (BLM) and resolution of record transfers and the disposition of railroad archives.

Work Tasks: Specific tasks in this area are as follows:

-- Review and acceptance of BLM/FRA conveyance documents (Immediate/Pre-Transfer).

-- Resolve outstanding real property issues with the BLM, the Departments of Defense and Agriculture, and the National Park Service (Immediate/Pre-Transfer).

-- Prepare and obtain an acceptable bill of sale for transfer of all personal property (Immediate/Pre-Transfer).

-- Continue negotiations with affected Native Village and Regional Corporations (Immediate/Pre-Transfer -- Ongoing).

-- Prepare state filings and participate in the "3(e)" adjudication process (Immediate/Pre-Transfer -- Ongoing).

-- Monitor ongoing BLM cadastral survey of all ARR real property (Pre-Transfer/Ongoing).

-- Locate, catalog and procure railroad records other than personnel records and resolve other ARR archival issues (Pre-Transfer/Ongoing).

-- Resolve miscellaneous personalty matters such as the GSA motor vehicle fleet and ARR Seattle Office (Pre-Transfer/Ongoing).

-- Coordinate work by corporation and DNR to record real property conveyance transfer and establish a land record management system (Pre-Transfer/Ongoing).

-- Coordinate work by corporation and DNR to resolve overlapping title issues. (Corporation/Post-Transfer).

Schedule: As indicated by the priority assignments, almost all of these efforts have to occur or at least begin during the pre-transfer period. A considerable amount of this work is well underway and on schedule. Although there is no statutory deadline for the preparation of the real and personal property conveyance documents, ARTA requires that they must be basically finished in order for actual transfer to occur. Accordingly, the federal government is on schedule to have these documents completed in draft form by early September, which should allow sufficient time for the State to complete its in-depth review process.

In the area of Native claims against railroad lands, the State is required to have its "3(e)" submissions filed with the BLM by October 15, 1984, and ARTA establishes that final administrative adjudication of these claims must occur by January 14, 1985, unless resolved sooner by negotiation.

B. Employee/Personnel Issues.

Background: The Transfer Team must ensure that the employee protection provisions of ARTA are met, and that all personnel/administrative functions are transferred to the new corporation in an orderly manner. To accomplish this mission, employee benefit systems must be designed and implemented for transferring employees. Assistance must also be given to the corporation on the issue of new hires after transfer. Other work areas include ensuring that employee records are available to the new corporation, and providing assistance for transition-related labor relations activities. Finally, the Railroad Labor Relations Agency must be established in order to properly serve its mission after transfer.

Work Tasks: The major tasks in this work area are as follows:

-- Monitor determinations by the U.S. Office of Personnel Management (OPM) of federal personnel questions that arise under ARTA (Immediate/Pre-Transfer).

-- Ensure that non-retirement benefits (i.e., health insurance programs; annual/sick leave requirements; etc.) are provided to transferring employees by appropriate systems established prior to transfer (Immediate/Pre-Transfer).

-- Ensure that retirement benefits are provided to transferring employees in systems selected and/or established prior to transfer (Immediate/Pre-Transfer).

-- Resolve the status of ARR recipients of workers compensation benefits (Immediate/Pre-Transfer).

-- Coordinate establishment of the Railroad Labor Relations Agency as required by the Corporation Act (Immediate/Pre-Transfer).

-- Address personnel questions pertaining to new hires following transfer (Immediate/Pre-Transfer -- Ongoing).

-- Provide ongoing communications with railroad employees during the transition period (Pre-Transfer/Ongoing).

• July 12 - Aug. 1
Resolution of federal questions by OPM

Sept. 1-30
Presentation of Answers to employees

• July 12 - Oct. 15
Address Employee Benefit Issues

• Oct. 15 - Nov. 1
Present Solutions to RRC Board

Nov. 1 - Dec. 15
Implement Solutions

Sept. 1 - Dec. 1
Establishment of Railroad Labor Relations Agency

Oct. 15 - Dec. 15 (approx.)
Monitor Federal Reduction-In-Force Process

Sept 15 - Dec. 15 (approx.)
Assist w/New Hire Issues

Oct. 1 - Dec. 1
Assist w/Adoption of CB Agreements - Personnel Rules by Board

-- Assist with the labor relations function as required (Pre-Transfer/Ongoing).

-- Ensure that appropriate employee personnel records are available to the corporation prior to transfer (Pre-Transfer/Ongoing).

-- Assist corporation management with establishment of personnel rules prior to transfer as required by the Corporation Act (Pre-Transfer/Ongoing).

-- Ensure that the corporation's EEO program is coordinated with the State's overall EEO program (Pre-Transfer/Ongoing).

-- Assist corporation management with other personnel-related corporate development tasks as assigned (Corporation/Post-Transfer).

Schedule: A majority of these tasks have a high priority and require completion before transfer can occur. Many of these work efforts are already underway and are scheduled for completion in the October-to-November time frame. In many cases, implementation of the work products from these tasks will require board endorsement.

C. Financial/Administrative Issues.

Background: The Transfer Team must ensure that ARR financial assets are transferred to the State-owned railroad in accordance with the provisions of ART\, and that the financial operations of the railroad are transferred without disruption. In order to accomplish these goals, the Transfer Team must provide a pre-transfer audit and assist with the development of financial planning and accounting systems for the new corporation. Short-term and long-range program and capital improvement plans also need to be developed, and procurement and contracting functions must be continued without disruption. One final important task involves the monitoring of current Revolving Fund activities and negotiation with the FRA regarding final disposition of this account.

Work Tasks: The major tasks in this work area are as follows:

July 12 - Sept. 30
Design + Contract
Pre-transfer Audit

Oct. 1 - Mar. 1 '85
Perform Audit

July 12 - Nov. 1
Monitor + Negotiate
Disposition of ARR
Revolving Fund

-- Design and manage the pre-transfer audit of the ARR's financial condition and accounting system (Immediate/Pre-Transfer).

-- Monitor Revolving Fund activity and negotiate final disposition of this account with the FRA (Immediate/Pre-Transfer).

- Aug. 15 - Nov. 1 Assist w/ Preparation of FY '86 Budget Submittals
- Sept. 1 - Nov. 1 Address Accounting/ Contracting Transfer Issues
- Nov 1-15 Present Solutions to T&C Board
- Nov. 15 - Dec. 15 (approx) Implement Solution
- Aug 15 - Oct 15 Prepare Risk Mgt. Options Presentation

-- Assist the corporation with the development of railroad program and capital improvement plans, including any relevant FY'86 budget submittals (Immediate/Pre-Transfer -- Ongoing).

-- Assist in development of alternative plans for immediate post-transfer accounting operations (Immediate/Pre-Transfer -- Ongoing).

-- Ensure that contracting and procurement systems are not disrupted by the transfer (Pre-Transfer/Ongoing).

-- Ensure coordination between the corporation and state data processing activities (Pre-Transfer/Ongoing).

-- Ensure that supply and property management activities are transferred without disruption (Pre-Transfer/Ongoing).

-- Prepare risk management plan for corporation's review and action (Pre-Transfer/Ongoing).

-- Assist the corporation with the development of new contracting and procurement systems consistent with the Corporation Act (Corporation/Post-Transfer).

-- Assist the corporation with the development of a new accounting system consistent with the Corporation Act (Corporation/Post-Transfer).

-- Assist with work by the corporation to review and modify personal property inventory and management systems, including re-marking of all personalty (Corporation/Post-Transfer).

-- Monitor Whittier shuttle operations and other possible commuter rail proposals as needed (Corporation/Post-Transfer).

Schedule: A few of these tasks have an immediate priority because of the transfer relationship. Others such as those with respect to budget preparation also carry an immediate priority because of the timing for the State's FY'86 budget cycle. Most of the remaining tasks should be initiated before transfer, but will continue beyond as a corporation responsibility (i.e., accounting and procurement system issues). The current schedule for the pre-transfer audit is to advertise for the work in September, with an award by the end of October.

D. Corporate Development Issues.

Background: Enactment of the Corporation Act is only the first step in the process required to properly establish the new corporation. There are a considerable number of tasks to ensure that a correct and properly functioning entity is in place prior to the date of transfer. Timing in this area is particularly acute considering the abbreviated time frame provided by the federal transfer law. The corporate development work during the pretransfer period can be categorized into the following two areas: (1) activity required by ARTA which the corporation must address in order to satisfy all of the transfer conditions; and (2) legal and organizational work central to the establishment and initial functioning of the new corporation as a legal entity within the State. Although a considerable amount of this work will eventually be taken over by the new Board of Directors and performed by corporation personnel, the Transfer Team has the primary responsibility to oversee and direct performance of this work prior to corporate assumption of these responsibilities.

Work Tasks: The following specific work tasks in this area are as follows:

- Aug. 1 - Sept. 20 Solicitation & Review of Candidates for ARTA Board of Directors
- Sept 30 - Oct. 15 Appointment of Board
- Sept. 1 - Nov. 15 Preparation & Delivery of Briefing Materials
- Sept. 30 - Oct. 31 Orientation of Board Activity
- Oct 15 - Nov 15 (approx.) Board Transitory/ Orientation Period
- Sept 15 - Oct. 15 Negotiation & Establishment of Transfer Date
- Oct. 15 - Dec. 1 Obtain ICC Certificate of Public Convenience & Necessity

-- Assist with the review and selection process for board appointees, including preparation of briefing materials and technical research as assigned to support work by the Office of the Governor (Immediate/Pre-Transfer).

-- Assess legal requirements which must be met to properly establish this entity in a timely fashion (Immediate/Pre-Transfer).

-- Prepare briefing books, articles of incorporation, interim by-laws and other materials as needed for first set of board meetings (Immediate/Pre-Transfer).

-- Prepare an in-depth overview and sectional analysis of the Corporation Act for presentation to the Board of Directors (Immediate/Pre-Transfer).

-- Obtain certificate of public convenience and necessity from the Interstate Commerce Commission as required by ARTA (Immediate/Pre-Transfer).

-- Assist board with executive official searches as required (Pre-Transfer/Ongoing).

July 1 - Summer '85
• Coordinate OSHA/Building Code Compliance Surveys

Dec. 8 - Jan. 5 '85
Actual Date of Transfer

-- Prepare briefing papers on individual railroad issues which summarize current situation and provide recommendations for further action or analysis (Pre-Transfer/Ongoing).

-- Coordinate review and approval of products from other three Work Plan components which require board knowledge and action (Pre-Transfer/Ongoing).

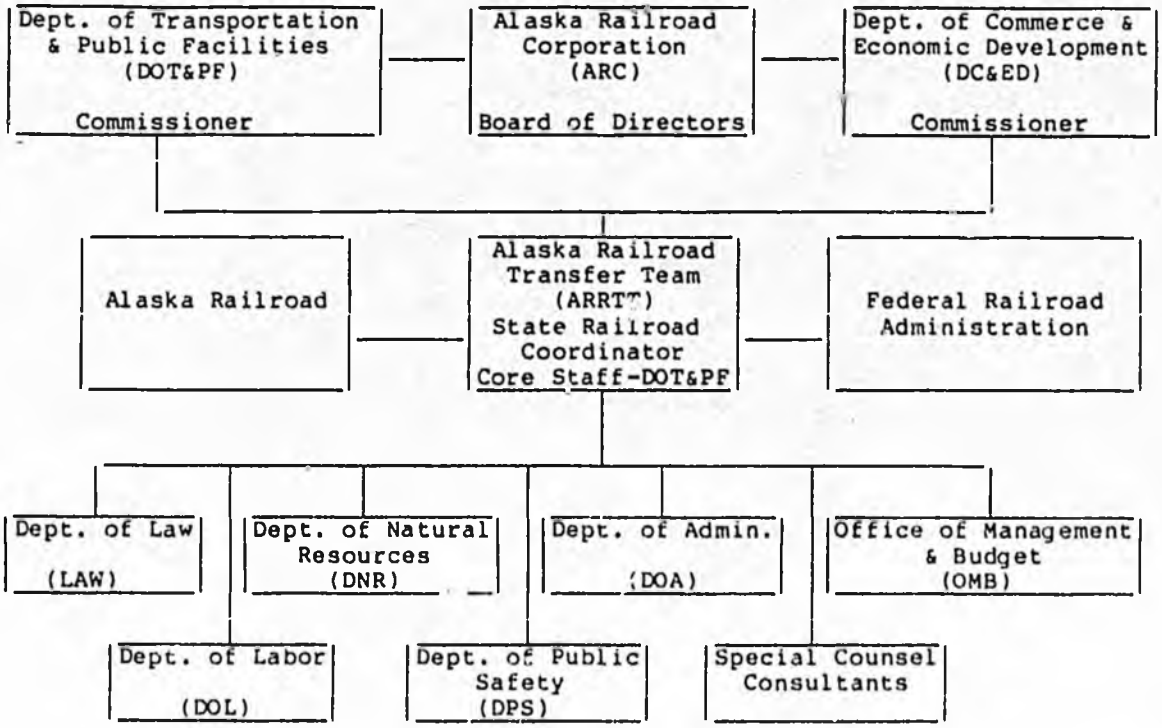
-- Coordinate initiation of OSHA and building code compliance surveys and planning work (Pre-Transfer/Ongoing).

-- Identify functions performed by the railroad security section and coordinate their ongoing roles with state and local law enforcement agencies as required (Pre-Transfer/Ongoing).

-- Coordinate initiation of valuation study work necessary to support Interstate Commerce Commission rate-making filings (Corporation/Post-Transfer).

-- Coordinate interagency liaison for the new corporation with other state agencies and federal groups as needed (Corporation/Post-Transfer).

-- Coordinate initiation of planning efforts to explore privitization options, with particular emphasis on lease arrangements (Corporation/Post-Transfer).



Schedule: Several of the first tasks need to be completed prior to the first official board meeting, which for planning purposes is scheduled for early October. Several of the other tasks must be accomplished prior to the date of transfer, which again for planning purposes is scheduled for no later than January 1, 1985. The remaining tasks will carry over beyond transfer and will eventually become a corporation responsibility, although it is recommended that several of these be initiated before actual transfer.

ALASKA RAILROAD TRANSFER
REAL/PERSONAL PROPERTY ISSUES

DRAFT WORK PLAN

1.0 Task: Review BLM/FRA conveyance documents to assure proper conveyance of all interests granted under ARTA.

Priority: 1

Resource Team: Braden, Kluis, Hickey, McGee, O'Leary, H. Rice, Akres

1.1 Establish procedure for State acceptance of title conveyance documents.

1.1.1 Real Property

1.1.2 Personal Property

1.2 Work with ARC & DNR to establish proper recording of real property conveyance documents.

1.3 Establish procedure for State review of conveyance documents.

1.3.1 Real Property

1.3.2 Personal Property

1.4 Identify and verify Federal interests being conveyed.

1.4.1 Identify lands not identified in Exhibit 1 of Transfer Report that meet criteria for rail property.

2.0 Task: Resolve remaining real property issues with interested Federal agencies.

Priority: 1

Resource Team: Hickey, Rogers, O'Leary, McGee, Braden

2.1 BLM

2.2 Department of Defense

2.3 Department of Agriculture, U.S. Forest Service

2.4 National Park Service

3.0 Task: Prepare and obtain acceptable bill of sale for transfer of all personal property.

Priority: 1

Resource Team: O'Leary, Hickey, McGee

3.1 Draft Document

3.2 Negotiate acceptance with FRA

3.3 Ensure proper delivery to corporation

3.4 Resolve miscellaneous personalty matters

4.0 Task: Continue negotiations with affected Native Village and Regional corporations with respect to ANCSA claims against railroad lands.

Priority: 1

Resource Team: Hickey, Rogers, Walsh, Kavasharov

4.1 Toghetthele Village Corporation

4.2 Eklutna Village Corporation

4.3 Knikatnu Village Corporation

4.4 Deloycheet Village Corporation

4.5 Tanana Village Corporation

4.6 Cook Inlet Regional Corporation

4.7 Ahtna Regional Corporation

4.8 Chugach Natives, Inc.

4.9 Doyon, Ltd. Regional Corporation

5.0 Task: Prepare State filing and participate in the 3(e) process for adjudication of Native claims against railroad lands.

Priority: 1

Resource Team: Kavasharov, Rogers, Hickey

5.1 Prepare filing

5.2 Present oral findings and necessary follow-up work with BLM

5.3 Prepare appeal work if appropriate

6.0 Task: Ensure performance of cadastral survey of all real property interests to be conveyed under ARTA.

Priority: 2

Resource Team: Rice, Duren, Braden, McGee, O'Leary, Hickey

6.1 Monitor coordination of survey activities with review of conveyance documents.

6.2 Monitor coordination of survey activities with resolution of remaining real property issues with interested Federal agencies.

6.3 Monitor coordination of survey activities with activities relating to Native claims against railroad lands.

7.0 Task: Ensure proper disposition of all railroad records in accordance with ARTA. Coordinate archives and records management activities.

Priority: 2

Resource Team: McKinney, McAlister, Braden, Blasingame

7.1 Develop project plan

7.2 Select Steering committee

7.3 Select and obtain staff for project

7.4 Monitor staff work

7.5 Coordinate with steering committee

7.6 Coordinate with land transfer activities

7.7 Coordinate with personnel transfer activities

8.0 Task: Coordinate work by corporation and DNR to record real property conveyance at transfer and establish a land record management system.

Priority:

Resource Team:

(Tasks yet to be identified.)

9.0 Task: Coordinate work by corporation and DNR to resolve overlapping title issues.

Priority:

Resource Team:

(Tasks yet to be identified.)

ARR TRANSFER

Personnel Issues

REVISED WORK PLAN

7-24-84

1.0 Task: Monitor determination of Federal Personnel questions.

Resource Team: Stan, Mark, Jack, Wendy, Al, Jim B.

1.1 Participate with FRA in formulation of questions addressed to OPM.

1.2 Participate with FRA and OPM in process of providing answers to questions addressed to OPM.

1.3 Memorialize agreements on how continuing issues are to be handled.

1.4 Assure that answers are properly implemented.

2.0 Task: Assure that non-retirement benefits (e.g. life and health insurance, etc.) are provided to transferring employees, permanent and temporary as required, by systems established prior to transfer.

Resource Team: Al, Wendy, Don

2.1 Assess present RR non-retirement benefit package.

2.2 Assess availability of equivalent programs.

2.3 ARRC contracts with benefit provider and otherwise implement benefit package.

2.4 Establish necessary administrative procedures within RR personnel office.

2.5 Coordinate these programs for transferring employees with programs for new hires.

2.6 Coordinate with collective bargaining process.

2.7 Coordinate with establishment of Personnel Rules.

3.0 Task: Assure that retirement benefits are provided to transferring employees in systems selected and/or established prior to transfer.

Resource Team: Al, Wendy, Don, Mark

3.1 Complete actuarial work and explain calculations in a narrative report.

3.2 Complete MOU with OPM on retirement.

3.3 Implement MOU according to procedures it establishes.

3.4 Establish necessary administrative procedures through RR personnel office.

3.5 Appeals

3.6 Coordinate with programs for new hires.

3.7 Coordinate with collective bargaining process.

3.8 Prepare analysis package for action by ARRC management.

4.0 Task: Assess the legal independence of RR employees from the State after transfer.

5.0 Task: Provide on-going communications with RR employees during the transition process.

Resource Team: Stan, Jim B., Wendy, Jack

5.1 Establish a positive, affirmative communications process.

5.2 Coordinate with Federal RIF procedure.

5.3 Coordinate with Labor Relations activities.

5.4 Designate person to answer personnel questions after transfer.

6.0 Task: Assist with pre-transfer labor relations functions.

Resource Team: Al, Don, Wendy, Mark

6.1 Review all collective bargaining agreements.

6.2 Prepare procedure for adoption of agreements as required by State law and ARTA.

6.3 Implement procedure to adopt Agreements.

6.4 Review RR Labor Relations Files.

6.5 Establish procedures (ground rules) for contract negotiations as required by ARCA.

6.6 Assist with renegotiation of collective bargaining agreements.

6.7 Assess labor relations needs with respect to nonrepresented employees.

6.8 Assist with establishment of ongoing labor relation functions.

6.9 Coordinate with records management activities.

7.0 Task: Coordinate establishment of the RR Labor Relations Agency prior to transfer as required by Section 42.40.730 of ARRCA.

7.1 Assist Governor's Office as needed in organizing RR Labor Relations Agency.

7.2 Assess legal position of RR Labor Relations Agency.

7.3 Assist RR Labor Relations Agency with establishment tasks and administrative matters as needed.

7.3.1 Assist RRLRA in definition of its mission.

8.0 Task: Assure that appropriate employee personnel records are available to the ARRC prior to transfer.

Resource Team: Don, Al, Wendy

8.1 Railroad updates all files prior to transfer to ARRC in time for record transfer to take place before ownership transfer.

8.2 Make legal determination of what ARRC is entitled to receive.

8.2.1 Legal assessment of Privacy Act liability.

8.2.2 Legal assessment of procedure required to support records transfer.

8.2.3 Other relevant legal considerations.

8.3 Coordinate with agreements with OPM for post transfer needs.

8.3.1 Assure access to Fed records in case of State owned record destruction

8.4 Assure timely delivery of appropriate information to ARRC.

9.0 Task: Assist ARRC management with establishment of personnel rules prior to transfer as required by Section 10(b) of ARCA.

9.1 Draft a package analyzing alternative personnel rules and related systems for presentation to ARRC management.

9.2 Legal review of draft personnel rules.

9.3 ARRC management selects desired alternative.

9.4 Assist with implementation of alternative selection.

9.5 Coordinate selection and implementation of personnel rule system with union leadership.

9.6 Coordinate selection and implementation of personnel rules system with collective bargaining process.

10.0 Task: Address personnel questions pertaining to new hires following transfer.

10.1 Non-retirement benefits.

10.2 Retirement benefits.

10.3 Assist ARRC management in establishment of wages and salary for new hires not covered by collective bargaining agreements.

10.4 Coordinate with establishment of personnel rules.

11.0 Task: Assure that the EEO program of the State-owned RR is coordinated with the State's overall EEO program.

11.1 Review current RR EEO programs and practices.

11.2 Assess requirements to be met by ARRC with respect to EEO.

11.2.1 Legal requirements.

11.2.2 Policy requirements.

11.3 Provide interface for the activities of the Division of EEO in the Department of Administration with ARR preparation of EEO plan.

11.4 Determine action needed, if any, by ARRC management.

11.4.1 Assist ARRC management with Adoption of EEO plan.

11.4.2 Assist ARRC management with Implementation of EEO plan.

12.0 Task: Assess the status of recipients of Worker's Compensation benefits with respect to transfer.

12.1 Assess eligibility for transfer of employees receiving worker's compensation benefits.

12.1.1 Make legal determination as to which employees are to be extended the employment offer required by ARTA.

12.1.2 Assure that any offer required is made and acceptance or rejection completed.

12.2 Coordinate with activities related to determination of liabilities, revolving fund, etc.

13.0 Task: Assist ARRC management with personnel related corporate development tasks as assigned.

14.0 Task: Coordinate the above tasks and others that arise in the personnel aspects of the transfer process.

14.1 Assist Project Coordinator with assignment of resources.

14.2 Assist resource teams as needed in the following:

14.2.1 Ascertaining policy direction.

14.2.2 Interface with activities of other resource teams.

14.2.3 Assessing timelines.

14.2.4 Defining work products needed or desirable to accomplish tasks.

14.2.5 Locating and providing special expertise not available on the resource team.

14.3 Assure that work tasks are completed in a timely manner.

14.4 Coordinate personnel group activities of transfer process with other activities such as financial matters, corporate development matters, lands matters, etc.

September 2, 1984

ARR TRANSFER
Financial Issues
WORK PLAN

1.0 Task: Survey of ARR financial planning

Priority: 1

Resource Team: McAlister, Wiggins, Killoran, Gray, and Carr

1.1 Summarize existing ARR financial planning activities

1.2 Assemble financial data base for budget preperation

-- Analyze ARR debt financing capability

1.3 Identify needed financial planning system improvements

2.0 Task: Prepare draft budget for state FY 1986

Priority: 1

Resource Team: McAlister, Wiggins, Kiloran, Gray, and Carr

2.1 Prepare operating budget

2.2 Prepare capital budget

3.0 Task: Coordinate transfer audit of the ARR.

Priority: 1

Resource Team: O'Meara, McAlister, Carr and Blasingame

3.1 Develop RFP for audit

--coordinate with FRA

3.2 Prepare scope

3.3 Develop cost-reduction plan

3.4 Obtain bids

3.5 Select contractor

3.6 Manage contract

3.7 Coordinate results with accounting and financial planning task

4.0 Task: Assist in development of the accounting policy and system for the ARC.

Priority: 1

Resource Team: McAlister, McKinney, O'Mea[illegible] Blasingame, and Carr

4.1 Survey ARR's existing accounting systems and policies as part of transition audit

4.2 Assist in development of alternative plans for immediate post-transfer accounting operations--for each issue we will review legal requirements, review existing systems, assess available options, develop time frame for neded changes, and make recommendations to the board.

4.2.1 Payroll

4.2.2 Other disbursements

4.2.3 Banking

4.2.4 Receivables

4.2.5 Fiscal Year

4.2.6 Seperation of federal and state money

4.3 Prepare presentation for ARC Board

5.0 Task: Coordinate development of a risk management plan for the ARC.

Priority: 1

Resource Team: McKinney, Blasingame

5.1 Review alternatives

5.2 Present to ARC Board

5.3 Finalize proposed risk management plan

5.4 Assist in implementation of risk management plan

5.5 Identify employees to be bonded

5.6 Coordinate bonding of employees

5.7 Assist in development of draft policy on employee bonding, for presentation to the ARC Board

6.0 Task: Analyze federal withholdings from the ARR revolving fund.

Priority: 2

Resource Team: McKinney, Hickey, and Carr

6.1 Survey of revolving fund

6.2 Estimate federal withholdings

6.3 Estimate fund balance at transfer

6.4 Monitor fund activity

6.5 Assure accuracy of any federal withholdings

6.6 Assure accuracy of final settlement

6.7 Review legal requirements

6.8 Negotiate written agreement with Federal Railroad Administration

6.8.1 Definition of "revolving fund"

6.8.2 Process for handling fund at transfer

7.0 Task: Assure smooth transition of contracting, procurement, supply, and property management activities.

Priority: 2

Resource Team: Blasingame, McKinney, McAlister

7.1 Transition of contracting and procurement activities

7.1.1 Survey of ARR procurement and contracting policy and procedure

7.1.2 Assist in identification of critical procurement items

7.1.3 Coordinate purchases requiring long lead time

7.1.4 Assist in identification of needed revisions in contracting procedures

7.1.5 Prepare presentation for ARC Board

7.2 Transition of supply and property management activities

7.2.1 Survey ARR supply and property management policies, procedures, and activities

7.2.2 Identify post-transfer supply and property management alternatives

7.2.3 Prepare presentation to ARC Board

8.0 Task: Assure coordination, as needed, between ARR and State data processing systems.

Priority: 2

Resource Team: Blasingame, Carr, and McKinney

8.1 Summarize existing ARR data processing systems

8.2 Identify issues and needs

8.3 Identify needed improvements

ALASKA RAILROAD TRANSFER
CORPORATE DEVELOPMENT ISSUES
WORK PLAN

1.0 Task: Assist with the review and selection process for board appointees.

Priority: 1

Resource Team: Hickey, McGee, Wiggins

1.1 Preparation of necessary/preferred qualifications for board appointees.

1.2 Assist with technical research and candidate searches as assigned.

2.0 Task: Assess legal requirements which must be met to properly establish this entity in timely fashion.

Priority: 1

Resource Team: Hickey, McGee, Wiggins, Johnson

2.1 Prepare Articles of Incorporation, interim by-laws, and other materials needed for first set of board meetings.

2.2 Identify and register Corporation Registered Agent and Registered Office.

2.3 Identify requirements for installation of board members.

2.4 Identify and implement procedures necessary for compensation and travel for board members.

3.0 Task: Prepare briefing materials on individual railroad issues for presentation to board.

Priority: 1

Resource Team: Hickey, Wiggins, Rogers, McGee, Johnson

3.1 Prepare an in-depth overview and sectional analysis of the Corporation Act.

3.2 Prepare agenda for presentation to board.

3.3 Summarize current situation during transition period before transfer for all railroad issues, including personnel, financial, administrative/operational issues and real property.

3.4 Provide recommendations for further action or analysis.

4.0 Task: Coordinate review and approval by board for actions required from this and other work plan components.

Priority: 1

Resource Team: Hickey, McAlister, Wiggins, McGee, Rogers

4.1 Prepare analysis of available options and provide a recommendation.

4.2 Assist board with adapting and implementing approved recommendations.

4.3 Assist board with negotiation and adoption of various agreements or memorandums of understanding.

5.0 Task: Obtain certificate of public convenience and necessity from the Interstate Commerce Commission as required by ARTA.

Priority: 1

Resource Team: Hickey, McGee, Wiggins, Johnson

5.1 Assist board with review of requirements

5.2 Prepare and submit filing to ICC

6.0 Task: Coordinate initiation of OSHA and building code compliance surveys and planning work.

Priority: 2

Resource Team: Hickey, Rice, Wiggins

6.1 Coordinate budgetary requirements with the Departments of Public Safety and Labor.

6.2 Coordinate initiation of survey work with the ARR.

6.3 Assist board with implementation of survey and planning work.

7.0 Task: Coordinate the ongoing railroad security function with State and local law enforcement agencies as required.

Priority: 2

Resource Team: Hickey, Wiggins, McGee

7.1 Identify functions performed by railroad security.

7.2 Coordinate resolution of issues with the Department of Public Safety.

8.0 Task: Coordinate initiation of valuation study work necessary to support Interstate Commerce Commission's rate-making filings.

Priority: 2

Resource Team: Hickey, McGee, Wiggins, Johnson

8.1 Prepare analysis of costing and rate-making procedures.

8.2 Coordinate with board.

(Remaining tasks yet to be identified.)

9.0 Task: Assist board with executive official searches as required.

Priority: 2

Resource Team: Hickey, Wiggins

(Tasks yet to be identified.)

10.0 Task: Coordinate initiation of planning efforts to explore privitization options.

Priority: 2

Resource Team: Hickey, Wiggins, Rogers, McGee

10.1 Explore possible lease arrangements.

10.2 Explore possible sale arrangements.

(Remaining tasks yet to be identified.)

11.0 Task: Coordinate inter-agency liaison for the new corporation.

Priority: 2

Resource Team: Hickey, Wiggins, McAlister, Rogers

11.1 Identify all involved agencies and contacts.

(Remaining tasks yet to be identified.)

Workers prepare for rail transfer

by Kenneth R. Allen
Times Writer

State officials and the Federal Railroad Administration are working to allay fears among Alaska Railroad employees who will be transferred from federal payrolls to state rosters on Jan. 5 when the 526-mile line is turned over to the Alaska Railroad Corp. for $22.3 million.

Mark Hickey, state railroad transfer team coordinator, and William Loftus, executive director of the Federal Railroad Administration, have issued bulletins that address some employee concerns. They say the bulletins contain the "best analysis" available on what the future might hold for workers.

Most employees will move from federal to state payrolls under a two-year transition agreement.

The state has agreed to retain all transferring permanent employees, adopt all collective bargaining agreements and pay current pay scales, including cost-of-living adjustments, according to Hickey and Loftus.

They say the state will continue the Federal Retirement System or provide a system substantially equivalent to that of state employees and to provide health and welfare coverage much like current federal programs.

Permanent employee interests will be maintained subject to exceptions for reassignments, firings for cause, resignations, retirements and lack of work, Hickey and Loftus say.

They say employees can be fired during the two-year transition period, subject to existing collective bargaining agreements with the five unions that represent various workers and the personnel policies and rules applicable at the time of termination.

Employees must decide within 30 days before the federal-to-state transfer whether they wish to retire, resign or transfer to employment by the Alaska Railroad Corp.

All temporary workers employed as of the date of transfer will be separated from federal service on Jan. 5. The state has agreed to re-employ those workers at transfer in line with the terms and conditions of their previous federal employment and existing collective bargaining agreements, where they apply.

The five unions, which represent most of the railroad workers, include:

- The United Transportation Union, representing locomotive engineers and firemen, train conductors and breakmen and baggagemen.
- The American Federation of Government Employees represents blue-and white-collar workers. Freight handlers, heavy-equipment operators, on-track section crews, and clerical and administrative staffs are among its membership.
- Locomotive mechanics and maintenance workers are represented by the International Association of Machinists and Aerospace Workers.
- The American Train Dispatchers Association has two locals, one for train dispatchers and another for agent telegraphers.
- Workers on railroad rolling stock, which includes everything but locomotives, are members of the Brotherhood of Railway Carmen of the United States and Canada.

State to take over railroad from Feds Jan. 5.

The Associated Press

Ceremonies signing over the continent's northernmost railroad from the federal government to the state of Alaska will be held Jan. 5, officials said Thursday.

John Shively, Gov. Bill Sheffield's chief of staff, said the transfer date signifies the formal and legal change of ownership for the Alaska Railroad.

Effective Jan. 6, the Alaska Railroad Corporation will be responsible for ownership and operation of the 526-mile line. The changeover follows several years of negotiations between federal and state officials as well as the passage of two major bills by the Legislature.

One measure authorized Sheffield to buy the line, its rolling stock and facilities for $22.3 million, while the other laid out ground rules for how the railroad was to be run.

"I'm pleased that the transfer process, set up under federal and state law, continues to remain on schedule," Shively said in a prepared statement. "We have a lot of hard work ahead of us to ensure that the transition is a smooth one, and that the railroad is run as efficiently as possible."

The railroad, which has about 500 permanent employees, has been operated by the federal government since 1924. The line extends from Fairbanks, in Alaska's interior, to two south central ports — Seward and Whittier.

The railroad passes through one national forest, one national park — Denali — and is the last remaining flag stop line in the United States, officials said.

Ceremonies in the Railbelt area commemorating the transfer are being organized, including a formal exchange of transfer of documents at Nenana on Jan. 5, Shively said.

ARR workers unhappy with operation

ANCHORAGE (AP)—Alaska Railroad employees testifying at a state legisative committee hearing Tuesday said their federal bosses may be undermining the line's safety, cost-effectiveness and worker morale.

The state has purchased the Alaska Railroad for $22.3 million, and is to take control Jan. 5, 1985. The line had been owned by the federal government.

Senate Transportation Committee Chairman Pappy Moss, D-Delta Junction, said he called the special hearing because he has been hearing about the workers' allegations for about a month.

"I began hearing about people losing jobs in Fairbanks, and operations being shut down and the state knew nothing about it," Moss said. "I began to think we were not getting the railroad we thought we were."

The workers warned Moss that the state might be getting stuck with a $3.5 million bill to comply with a year-old federal regulation requiring special safety glass in all railroad equipment. The rail employees said the installations have not been done.

The employees also said temporary workers are being laid off before necessary maintenance is completed on locomotives, certain maintenance operations are being shut down and labor from outside the state is being hired instead of Alaska residents.

The state has purchased the Alaska Railroad for $22.3 million, and is to take control Jan. 5, 1985. The line had been owned by the federal government.

Senate Transportation Committee Chairman Pappy Moss, D-Delta Junction, said he called the special hearing because he has heard the workers' allegations for about a month.

"I began hearing about people losing jobs in Fairbanks, and operations being shut down and the state knew nothing about it," Moss said. "I began to think we were not getting the railroad we thought we were."

The workers warned Moss that the state might be getting stuck with a $3.5 million bill to comply with a year-old federal regulation requiring special safety glass in all railroad equipment. The rail employees said the installations have not been done.

ATTACHMENT "C"

MINUTES OF OCTOBER 26, 1984

ALASKA RAILROAD CORPORATION

REGULAR BOARD MEETING

I. CALL TO ORDER/COMMENCEMENT OF CORPORATE EXISTENCE

Meeting was called to order at 9:00 a.m. by Dick Lyon, Commissioner of the Department of Commerce and Economic Development, who introduced Dick Knapp, Commissioner of the Department of Transportation and Public Facilities; Mr. Jim Campbell, President of Spenard Builders Supply, Inc.; Mr. Frank Chapados, President of H&S Forwarders, Inc.; Mr. Lewis Dickinson, a partner of DOWL Engineers; and Mr. Gerald Valinske, an Alaska Railroad employee. Commissioner Lyon administered the Oath of Office to the four appointed members.

The first item of business on the agenda was the introduction of the Organic Resolution, which was read by Commissioner Lyon and is included in these minutes as Attachment #1. Mr. Dickinson made the motion to accept the resolution, which was seconded by Mr. Campbell. Mr. Chapados expressed concern over what he felt was a potential conflict of interest and suggested that he should not participate in the voting because of an Interstate Commerce Act provision that prohibits the participation of an officer or owner of certain freight forwarding corporations as a director of a railroad corporation. He indicated that his involvement in a freight forwarding corporation might be a conflict and is presently being reviewed by the Interstate Commerce Commission (ICC). It was his position that it would be better if he abstained from voting on the action items until the ICC completed its review.

Mr. Chapados did state, however, that he would like to participate in the discussions. He then requested to abstain from voting. Mr. Campbell indicated that he had no problem as long as Mr. Chapados could have input into the meeting. Mr. Campbell asked Mr. Jack McGee, legal counsel from the Department of Law, when they might get a ruling on this matter. Mr. McGee's response was that the ICC was reviewing it and a determination could be forthcoming within a month and possibly as soon as two weeks. Mr. Chapados said that there were alternatives to avoid this conflict if it existed and he had them under consideration as well. Mr. Campbell moved that the Board permit Mr. Chapados to refrain from voting, which was seconded by Commissioner Knapp. The motion carried without objection.

Commissioner Knapp suggested setting up a temporary Chairman and Board Secretary. He then moved that Commissioner Lyon be appointed as temporary Chairman. Commissioner Lyon suggested that Commissioner Knapp move to table the motion in order to vote on the pending Organic Resolution. Commissioner Knapp moved to table his motion, which was seconded by Mr. Valinske. His motion was tabled without objection. Mr. Campbell then said that it would be proper to vote on the Organic Resolution on the table. The motion carried unanimously with Mr. Chapados abstaining.

Commissioner Knapp then requested that the motion be put back on the table to nominate Commissioner Lyon as temporary Chairman, which was seconded by Mr. Campbell. The motion carried by unanimous decision. Commissioner Knapp then made a motion to nominate Mr. Mark Hickey as temporary Board Secretary. Motion seconded by Mr. Valinske. Commissioner Lyon asked for additional nominations, there being none, the motion carried by unanimous decision with Mr. Chapados abstaining.

Mr. Campbell moved for adoption of the agenda but asked to have discussion of an orientation trip for Board members added to the agenda. The motion was seconded by Commission Knapp. Chairman Campbell asked for objections but receiving none, the motion carried by unanimous decision with Mr. Chapados abstaining.

II. OFFICIAL BUSINESS

Commissioner Knapp introduced and moved the bylaws, which were prepared by the State Attorney General's Office and Special Counsel to the Alaska Railroad Transfer Team with the assistance of counsel from The Alaska Railroad, for discussion and adoption. Motion was seconded by Mr. Campbell. Mr. Campbell asked if the bylaws could be amended at a later date as he had questions on the definition of the executive officer group and the adopting of a corporate fiscal year. Mr. Hickey said the bylaws could be amended later and that the Corporation Act gives the Board the flexibility to adopt the State fiscal year, the federal fiscal year, or whatever other fiscal year they might wish. Commissioner Lyon asked for any proposed changes to the bylaws. Hearing none, he called for a roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Mr. Campbell - yes; Mr. Dickinson - yes; Mr. Chapados - abstain. Bylaws adopted and included as Attachment #2.

Commissioner Lyon stated that the next item on the agenda was the introduction and adoption of Resolution #1, Finding of Necessity for Adoption of Emergency Rules. Commissioner Knapp noted that the election of Board officers was the next item on the agenda.

Commissioner Lyon called for election of Board officers. Mr. Dickinson nominated Mr. Campbell for Chairman. Motion seconded by Mr. Valinske. There were no additional names offered for Chairman. Commissioner Lyon declared the nominations closed. Commissioner Lyon asked Mr. Hickey to conduct a roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Mr. Campbell - abstain; Mr. Dickinson - yes; Mr. Chapados - abstain. Motion carried.

Mr. Campbell nominated Mr. Chapados as Vice Chairman. Mr. Valinske seconded the motion. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Mr. Campbell - yes; Mr. Chapados - abstain; Mr. Dickinson - yes. Motion carried.

Commissioner Knapp nominated Mr. Hickey as interim Board Secretary to serve until the Board's first regular meeting in January after the transfer. Mr. Valinske seconded the nomination. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Mr. Campbell - yes; Mr. Chapados - abstain; Mr. Dickinson - yes. Motion carried. Commissioner Lyon yielded the chair to Chairman Campbell.

Chairman Campbell welcomed everyone to the first Board meeting and said that he considered it a great pleasure to serve. He felt that it was important to give the employees of the Railroad an understanding of what was going to happen and that the Board was there to represent the entire Railbelt as well as the State of Alaska. Commissioner Lyon and Mr. Chapados echoed these comments.

Chairman Campbell introduced Item C, Introduction & Adoption of Resolution #1, on the agenda. He asked Mr. Hickey to comment on the resolution. Mr. Hickey said the resolution was consistent with the Corporation Act and what was in the Corporation's bylaws. Mr. Valinske made a motion to adopt Resolution #1, which was seconded by Mr. Dickinson. Mr. Campbell asked the Board Secretary to read the resolution into the record which was done. That resolution is included in these minutes as Attachment #3. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Chairman Campbell - yes; Mr. Chapados - abstain; Mr. Dickinson - yes. Resolution passed.

Chairman Campbell next introduced Emergency Rule #1 and asked the Board Secretary to comment. Mr. Hickey said it was an emergency rule regarding public notice of regular and special Board meetings. He said it was consistent with state law requiring public notice be given in three newspapers of general circulation. A motion was made by Commissioner Lyon and seconded by Mr. Valinske to adopt Emergency Rule #1. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Chairman Campbell - yes; Mr. Chapados - abstain; Mr. Dickinson - yes. Motion carried.

Introduction of Emergency Rule #2, Meeting by Telecommunications (Attachment #4), was made and the Board Secretary was asked by the Chairman to comment. Mr. Hickey said that it was consistent with the Corporation Act which authorizes the Board to confer by telecommunication methods. He said that any actions taken, however, would be subject to providing proper arrangements for public access to those discussions prior to making decisions. A motion to adopt Emergency Rule #2 was made by Mr. Valinske and seconded by Commissioner Knapp. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Chairman Campbell - yes; Mr. Chapados - abstain, Mr. Dickinson - yes. Motion carried.

Next item on the agenda was Emergency Rule #3 (Attachment #5), Public Participation at Meetings. The Board Secretary told the Board that the rule was designed to govern the process for public participation at regular and special meetings. Thereafter followed a general discussion followed by questions and answers. Commissioner Lyon moved to adopt Resolution #3. The motion was seconded by Mr. Valinske. Mr. Hickey stated that the rule they were adopting did not reflect the first component that they wished. Chairman Campbell asked staff to prepare an amendment during the lunch hour so that they could look at it immediately following lunch. Mr. Valinske made a motion to table the item until that afternoon. Motion seconded by Mr. Dickinson, and Emergency Rule #3 was tabled without objection.

Emergency Rule #4, Public Disclosure of Information (Attachment #6), was introduced. The Board Secretary was asked to comment. Mr. Hickey explained that the Corporation Act provides that information in the possession of the Corporation is public and available to public inspection at reasonable times.

Consistent with the need to operate a railroad corporation, however, is the need to protect information of a private or proprietary nature from public disclosure. He stated the federal transfer law requires that the State protect information of the federal Alaska Railroad which includes its proprietary business data, personnel records, etc. from public disclosure. Mr. Chapados moved for adoption of Emergency Rule #4 and Commissioner Knapp seconded the motion. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Chairman Campbell - yes; Mr. Chapados - abstain; Mr. Dickinson - yes. Motion carried.

III. GENERAL BRIEFINGS

Chairman Campbell moved on to Item #3, General Briefings. Mr. Hickey gave a brief overview listing the major milestones of the transfer process. He also showed a Transition Chart which highlighted remaining pre-transfer work tasks. Commissioner Knapp pointed out that the reduction-in-force (RIF) process is only a procedural matter in transferring from federal ownership and wanted to make all employees aware of that fact.

Chairman Campbell introduced Arnold Polanchek, Assistant General Manager of The Alaska Railroad. Mr. Polanchek presented an overview organizational chart which indicated how the Railroad is structured. He next presented a brief overview of the Railroad's financial condition as of September 30, 1984. Additional charts were presented on Selected Operational Data, ARR Operations Summary, Positive Cash Flow, Passenger Statistics, and Selected Employment History. Mr. Chapados asked him to comment briefly on the declining revenues in 1983-84. Mr. Polanchek introduced Mr. John Gray, Manager of Marketing & Sales, who commented on the ARR Operational Summary Chart.

The meeting adjourned at 10:30 a.m. for a brief recess and reconvened at 10:45 a.m.

Commissioner Knapp noted that the next two items on the agenda were briefings on banking services and leasing activities. He noted the potential for conflicts of interest with certain members and stated that the law says that if you have a conflict of interest, you are precluded from engaging in or even discussing the items. Commissioner Knapp moved that an executive session of appropriate staff be convened during the lunch hour to discuss those specific matters, as well as transfer-related legal matters. Mr. Chapados seconded the motion.

Chairman Campbell pointed out that they would only hold executive sessions for matters of personnel and proprietary matters. He thought the Board needed to fill the Chief Executive Officer slot and wanted to include that as well in a discussion of employee and personnel matters. Commissioner Knapp changed his motion to do so and Mr. Chapados seconded the motion. The motion carried by unanimous consent.

Chairman Campbell stated that since they could not talk about banking services or leasing activities, they should move to Item E, Other Transfer Issues. Mr. Polanchek provided a brief rundown of the fiscal year 1986 budget by means of a Pro Forma Income Statement and showed the Revenue Analysis by Commodity Chart. Mr. Polanchek continued by presenting the Alaska Railroad Corporation Chart, a Summation of Freight Revenue by Freight Category Chart, and a Monthly Summation Statement of Estimated Revenues Chart.

Chairman Campbell asked the Board Secretary to address the Health & Life Insurance Program issue. Mr. Hickey presented a Health & Life Insurance Chart and introduced Mr. Evan McKinney to help explain the key issues. Mr. Hickey explained that part of the complexity of the issue is the short time limit involved and the fact that Railroad employees currently have about 20 separate programs from which to choose. There are 10 programs now in use by employees, although 89% of the employees are enrolled in three main programs. Mr. McKinney continued by saying that it was a complicated issue but the State had agreed to provide a program that was substantially equivalent to what they presently had. Mr. Hickey said they had come up with a recommended program and have informally presented it to the Federal Railroad Administration and the Office of Personnel Management. Their reaction was that it was not only substantially equivalent on the health side, but also about 20% cheaper on a cost basis.

Mr. Hickey also addressed the issue of The Alaska Railroad Medical Association. He said it was the State's recommendation to keep it in place as an adjunct to the health and life insurance program since it was incorporated in existing collective bargaining agreements. Mr. Hickey continued by saying that the Board should make a decision on the recommendations by their November 7th meeting. Mr. Hickey continued on to say that the issue has not been discussed to any degree with the employees. Chairman Campbell stated that the Board should not take any action until the employee groups could react on this issue. Mr. Dickinson asked the status of the Transfer Team's recommendation. Mr. Hickey responded that they recommended a single insurance plan and recommended continuing the ARR Medical Association as it presently exists.

Chairman Campbell asked if the Board had any objections or thoughts about having a committee to sit in on employee briefings. There were no objections. Art Minton, International Representative of the International Association of Machinists & Aerospace Workers, suggested joint sessions. Chairman Campbell suggested proceeding with joint sessions.

Chairman Campbell asked if there was time to go on to the final briefing item of Corporate Employment Offers. Mr. Hickey explained that RIF letters would be going out to all employees along with an offer of a new position with the Corporation. The employees would have a 21-day notice period in which to review these offers. Mr. Hickey said that members of the Railroad staff and State will be touring the property and answering questions and there would be an opportunity for personal counseling for employees once the RIF letters were sent out.

Meeting recessed for lunch and the executive session at 11:45 a.m. and reconvened at 1:45 p.m.

IV. SPECIAL ACTION ITEMS

Chairman Campbell announced that he was appointing a committee of Mr. Chapados, Mr. Valinske, and Commissioner Knapp to sit in on employee briefings. He asked Mr. Chapados to serve as Chairman. Commissioner Knapp inidcated that Commissioner Lyon would serve as an alternate member if he was unable to attend some of the meetings.

Chairman Campbell introduced Item C, Banking Services, and stated that as Director of the National Bank of Alaska, he had a conflict of interest on this issue and thought Mr. Chapados did as well. At this time, he passed the gavel to Commissioner Lyon. Mr. Chapados said that he, too, had a conflict of interest.

Mr. Hickey asked Mr. McKinney and Mr. Bruce Carr, Alaska Railroad, to walk the Board through the banking service issue. Mr. McKinney explained that the object is a process to establish banking services between the Railroad and a private bank. The objective is to assure that the Railroad can go through the transfer without losing the ability to receive and disburse funds and for the Corporation to accrue any interest on the excess revenue. The process they suggested was a modified bid procedure. Based on the proposals, they would evaluate the proposals on the two criteria of the ability to provide services and the cost. He suggested a one-year contract with an option to renew. He stated that it was necessary to move quickly. Their plan was to distribute the request for proposals later in the afternoon to the four banks which currently carry the Railroad's accounts and, hopefully, would have the response back by next Friday. They would then evaluate the responses and bring that evaluation back to the Board at their next meeting on November 7th so the Board could make a decision at that time. Commissioner Knapp asked if the Board would be violating any banking procedures as the plan was limited to the consideration of only four banks. Mr. McKinney said "no" because there was an Emergency Rule on the agenda that authorized limited procurement.

Commissioner Lyon said he thought the Treasurer Team would like authorization to issue the request for proposals. Commissioner Knapp responded that it would come later under the subject of Special Resolution #2. The Board Secretary commented that Item 4, Special Action Items A-B related to banking authorization, but that they could move to that point on the agenda. Commissioner Lyon asked if there were any objections to doing so, and hearing none, moved to that point on the agenda. Commissioner Knapp said if there were no objections, he would move to adopt Special Resolution #2 and Emergency Rule #5 (Attachment #7). Commissioner Knapp moved for adoption of the Resolution and Emergency Rule #5 as one item. Mr. Dickinson seconded the motion. Roll call vote: Commissioner Lyon - yes; Commissioner Knapp - yes; Mr. Valinske - yes; Mr. Dickinson - yes; Chairman Campbell - abstain; Mr. Chapados - abstain.

The next item on the agenda was Item D, Leasing Activities. Mr. Polanchek made a brief overview of the leasing activities on the Railroad. He said that the Railroad owned about 3,000 acres of industrial land and that in 1974 the leasing policy of the Railroad had not been formalized. The major area of concern from the 1974-75 audit pertained to the Railroad's leasing policies. The outcome of the audit was that the Railroad was mandated to revise its leasing policies. One criteria was that all leases had to be brought up to the fair market value and a fair market rental rate applied. A leaseholders' association was formed in 1981 and they subsequently filed several actions in the courts. The initial suit was dismissed; however, there was a motion filed for reconsideration and a secondary suit filed which would probably reopen the original suit.

Commissioner Lyon asked if there were any current unresolved areas between the Railroad and leaseholders. Mr. Polanchek responded that he thought it would just be a question of the method the Railroad uses in determining the fair market value of the land as some of the leaseholders did not believe that lessee below-ground improvements to the property should be included in the appraisal. Mr. Polanchek stated that this was probably the major source of contention. Commissioner Lyon returned to gavel to Chairman Campbell.

Chairman Campbell asked if there were any other questions of the Board at that time under employee issues. The Board Secretary told the Board that they would be hearing later that day during the public comment period on these issues. Chairman Campbell suggested that if there were no objections, they would move into the public comment period since the Board had not yet adopted the procedures for signing up to speak, they would just try to allow as much time as possible but try to stay within the time restraints of five to ten minutes. He asked that all speakers sit at the front of the room and state their name for the record.

V. OPPORTUNITY FOR PUBLIC COMMENT

Mr. James Kirsch, Alaska Railroad employee representing himself, was the first speaker. He said there had been discussions on how the transfer was to transpire but that he had questions as to what was really going to happen after transfer. He stated that at the present time there were numerous rumors. His main concern was for those employees ready for retirement. He felt that they should be allowed to retire from the Railroad and then go back to work for the Corporation in the same job with the same seniority. His second area of concern centered around Railroad trackage that ran through the military area from Whitney Road to Eagle River. He suggested that someone negotiate with the Army to try to get a different right-of-way so the train could move faster and more efficiently with less cost to the Railroad.

Mr. Robert Collopy, Alaska Railroad Section Foreman, was the second speaker. He stated that he had 32 years of Government service--4 with the Army and the rest with The Alaska Railroad. He said that he was in the same position as Mr. Kirsch and would also like to retire from the Railroad and go back to work for the Corporation. He said he was represented by the American Federation of Government Employees and the President, Mr. Jack Burton, felt that the seniority question would be a union issue.

Mr. Jack Burton, President of the American Federation of Government Employees, spoke next. He said that these people wanted to take advantage of retirement and return to the same position, but felt that because of the way the contracts were now written, it was a political issue for the unions. He stated that he was neutral on this particular issue because it did not affect him one way or the other. Mr. Burton asked Mr. Hickey if health insurance premiums may go down for some people. The response from Mr. Hickey was that the overall cost might be as much as 20% less. He then asked if in some instances the premiums could increase and the response was that they might on a case-by-case basis. Mr. Burton stated that he would have a problem with that simply because he didn't think those people should subsidize the portion that the Railroad would otherwise pay for others.

Mr. Art Minton, International Representative of the International Association of Machinists & Aerospace Workers, addressed the issue of temporary employees who had been laid off and were subject to recall on a seasonal or as-needed basis. He suggested that temporary status implied someone who worked 30-90 days to as much as 6 months, but he did not feel that was the true picture. He said that some of these employees held positions for up to two-year periods. He felt that it was necessary to approach the Board to obtain a preferential hiring list for those temporary employees who had been terminated. He mentioned the fact that everything discussed to date spoke only to career or full-time employees. He also raised the question of those people who were within five years of retirement but said there were a lot of questions for those people who were not yet to that point and suggested that the Board also needed to address that issue.

Mr. Ray Sanderford from the United Transportation Union (UTU) was the next speaker. Mr. Sanderford said that the UTU welcomed the new ARR Board of Directors and the new ideas and expertise that they brought with them. He said they envisioned a smooth transition and that the UTU had benefited from an excellent rapport with the Railroad administration in the past. He said they were anxious to go forward with the new administration, always keeping in mind their common goal of service to the public and the State of Alaska.

Mr. Richard Farmer, representing Alaska Day Tours, Ltd., spoke next. He said over the past two years he had received a lot of support from the Railroad on the passenger side. He hoped that the Board would consider expanding the passenger side as there were not enough railroad cars available. He also mentioned that there were no passenger facilities in Whittier and said that he would like to see better facilities for the tourists.

Chairman Campbell asked if anyone else wished to speak. As there were no further comments, he closed the public speaking portion of the meeting and called a short recess at 2:35 p.m.

VI. CLOSING BUSINESS

The meeting reconvened at 2:45 p.m. when Chairman Campbell asked the Board Secretary to read the new draft of Emergency Rule #3 which dealt with Public Participation at Meetings. Mr. Hickey read the substitute rule.

Commissioner Knapp said that he thought Emergency Rule #3 was on the table and it would be appropriate to lift it and amend it accordingly. Chairman Campbell asked for a motion to lift it off the table. Commissioner Lyon moved to remove the motion so the table was clear. Mr. Chapados seconded the motion. Mr. Chapados said he thought it would be appropriate to have a voice vote to clear the motion off the table. The vote was unanimous with Mr. Chapados abstaining. Commissioner Knapp made a motion to adopt the amended rule and Mr. Valinske seconded it. As there were no further objections to Emergency Rule #3 (Attachment #5), the motion carried with Mr. Chapados abstaining.

Chairman Campbell said that Thursday the Board would go to Seward. The next official meeting was set for November 7 at 9:00 a.m. in the same location. He further stated that he would like the agenda to include a discussion of selection of a new Chief Executive Officer for the Corporation.

Commissioner Knapp commented on the fine presentation and preparation of the Transfer Team and appropriate staff.

Chairman Campbell said that concern had been expressed over an audit project. Mr. Hickey explained that the pre-transfer audit which was being done as part of the State's part of the transfer was basically to perform a balance sheet assessment at the date of transfer and to assess the accounting system of the Railroad and recommend changes that might be needed for the Railroad to comply with generally accepted accounting principles. Selection of this auditor dealt only with performing that work. Mr. Hickey stated that there had been confusion that the selection of this firm was the selection of the independent financial auditor for the Corporation. He stated that this selection had nothing to do with that decision which had to be a Board decision.

Commissioner Lyon said there was an element of confusion that needed to be cleared up about the fiscal year '86 budget. The bylaws called for a fiscal year which tracks the State's fiscal year but the Railroad was currently operating under the federal fiscal year. It was his hope that the Railroad would make some modification to the budget process so that the people who worked with the state system could understand it more readily. He felt that with regard to capital items, something needed to be done because of the time frame. He said that he didn't know how much flexibility they had but if the Board needed to ask for state funding in the future, they might like to address the issue.

Mr. Hickey suggested that the Board might like to take this up as an action item for the next meeting and Chairman Campbell requested a briefing on the trip to Seward. He said there would be no action, just a briefing.

Chairman Campbell asked Lee Fischer, who had just joined the meeting, if he had any questions. Mr. Fischer asked if the Board was going to take charge of the selection of the auditors. Mr. Campbell said that they would make the selection as to the final independent financial auditor for the Corporation. Mr. Hickey again explained the situation with respect to the existing audit project.

Chairman Campbell asked if there were any further comments or questions. Mr. Chapados moved to close the meeting, which was seconded by Mr. Dickinson. Hearing no objections, the meeting was adjourned at 3:00 p.m.

Pipeline president named railroad manager

The Associated Press

The man who runs the trans-Alaska oil pipeline was named Saturday to be the new general manager of the Alaska Railroad.

Frank Turpin, president of the Alyeska Pipeline Service Co., will assume his duties Feb. 15 when he retires from Alyeska, according to James Campbell, chairman of the railroad's board of directors.

"In Frank Turpin, we have a chief executive of proven ability," said Gov. Bill Sheffield, who appointed the railroad's directors.

Turpin took over as chief executive of Alyeska in 1978, the first year of operation of the pipeline which carries oil from Prudhoe Bay on the North Slope to the marine terminal at Valdez on the Gulf of Alaska.

Turpin said his retirement has been planned for nearly a year, and the railroad job just happened to coincide.

"My wife and I had been looking forward to our new freedom after my retirement," Turpin said. "We even built our home here in anticipation of our new life of leisure in Alaska.

But he said the challenge of running the railroad was "irresistable."

Turpin has been employed by Exxon for 38 years in various capacities. Alyeska is a consortium of the oil companies which produce the oil in Prudhoe Bay, and Turpin technically remained an Exxon employee.

The railroad is to be transferred from federal to state control on Jan. 5.

Campbell said the board will name an interim management team to oversee the railroad's operation until Turpin takes over.

Frank Jones, the man who ran the railroad for the federal government, has been on leave for most of the year recuperating from a heart ailment. Campbell said earlier he didn't believe Jones' health would allow him to resume his duties.

Initially, the board intended to hire former Anchorage Mayor George Sullivan, but those plans fell through last week when the two sides were unable to agree on a contract.

Frank Turpin

Alyeska's Frank Turpin named to head ARR

Fairbanks Daily News-Miner
November 11, 1984

Frank G. Turpin, who is stepping down as president of Alyeska Pipeline Service Co., will take over as head of the Alaska Railroad, effective Feb. 15.

His selection as the railroad's president and chief executive officer was announced Saturday by James Campbell, chairman of the state's Alaska Railroad Board.

The state assumes control of the railroad Jan. 5, under terms of an agreement with the federal government. In the meantime, the state board is planning for an interim management from Jan. 6 until Turpin assumes the top job.

Turpin has worked for the Exxon Co. USA for 38 years, and has been "on loan" to Alyeska the past six years. Alyeska is the company that operates the trans-Alaska oil pipeline for the North Slope producers.

"My wife and I had been looking forward to our new freedom after my retirement," Turpin was quoted in a news release. "We even built our home here in anticipation of our new life of leisure in Alaska. But the offer from the railroad board provides an opportunity for me to make a contribution to the state, and in an area of particular significance to me."

Speculation on who would be tapped to be the first executive of the railroad under new state ownership had been accelerating. Former Anchorage mayor George Sullivan missed the bid when he and the board failed to agree on terms. At least two other candidates reportedly had engaged in discussions with the seven-member state railroad board.

James O. Campbell, board chairman, issued Saturday's statement, and he said, "Frank Turpin was our choice among several candidates, with whom we have had discussions over the past several weeks. We're very pleased that he has chosen to accept this very important position."

Gov. Bill Sheffield was quoted as expressing pleasure at the choice, saying Turpin has proven ability and he "brings to this new position the complex administrative and executive skills which we think will be required at this state in the railroad's history, which is both transitional and inaugural."

Earlier this year the Alaska Legislature passed the bills required to effect the transfer of the rail ownership from federal to state governments. The actual transfer occurs on Jan. 6.

Since his arrival in Alaska in 1978, Turpin has been active in numerous organizations. He was president of the Anchorage Chamber of Commerce in 1982-83, and served on that group's board and natural resources committee. He chaired the Anchorage 1981 United Way campaign, and has been a board member of the Alaska Repertory Theatre, Providence Hospital, and has been active in the University of Alaska Foundation and the Alaska affiliate of the American Heart Association. He is a member of Rotary.

Frank Chapados, a Fairbanks member of the state railroad board, said Saturday he was pleased with Turpin's selection.

"We're benefiting from the work the transition team has done," Chapados said. The board still has many weighty matters to address, though, including plans for capital projects and employee pay and benefits.

According to Chapados, the federal Alaska Railroad management has prepared a budget for capital projects and improvements, but that's on a federal fiscal year, Oct. 1-Sept. 30, while the state operates on a July 1-June 30 budget cycle.

At the board's last meeting, approval was given for seeking bids on an employee health plan. Chapados said the state board wants one plan, rather than the 14 programs offered under federal management.

On pay, 71 of the 500 ARR employees receive federal cost-of-living adjustments because of longevity. Chapados cites that as an example of issues the board must resolve before the actual transfer. The board meets again Nov. 21.

Rail board tours Seward terminal

by Carole Jaffa

Seward and Whittier were the first stops on an Alaska Railroad board initial tour of railroad holdings November 1. Purpose of the tour was to familiarize new board members with what the railroad now owns, what it needs and how it is being run.

The new board members are Jim Campbell, chairman of the board and owner of Spenard Builder's Supply; Lew Dickenson, chairman of Anchorage Port Commission, director of Anchorage Sand and Gravel and partner in DOWL Engineering; Frank Chapados, owner of H & S Freight Forwarders of Fairbanks; Gerald Valinske, an Alaska Railroad employee of the United Transportation Union; Commissioner of Commerce & Economic Development Dick Lyon, and Commissioner of Transportation Dick Knapp.

Also on the tour were top management people from ARR, and Bill Loftus of the Federal Railroad Administration.

Dickenson, whose appointment drew fire from the City administration and Council on grounds of possible conflict of interest (due to Dickenson's gravel buisness and position as chairman of the Anchorage Port Commission), stressed to the LOG that he sought "good communication" with the City, the "advance invitation" (protest of his appointment) notwithstanding.

The Railroad administration is sympathetic to Seward, he said, that came across clearly in our briefing.

Dickenson said priority capital outlay for the railroad will be for new equipment to handle the coal shipments.

Commissioner Lyon also spoke of capital outlays, commenting new gantry cranes for the Seward dock are a definite part of our proposed five year plan. He noted the railroad has always hauled more freight north than south, so the rails are reinforced for the stress of northbound traffic. This will have to change to handle coal trains.

A major problem the board must face is how to provide passenger service without losing money (last year passenger service cost $6.3 million and brought in only $4.6 million—a $1.75 million loss. That translates to a $300 loss per passenger.)

Mainline tourist trains that run from Anchorage to Fairbanks do compensate somewhat for the costly local trains that run all winter.

Another problem is replacement of rolling stock. No one builds passenger cars in the U.S. anymore; the railroad must either buy refurbished Amtrack cars or new ones from Canada to replace the old cars.

The passenger cars now in service date from the fifties. Some use steam for heat and air conditioning; others use electric. The steam cars cause problems with pipes breaking in cold weather; plus they will not interface with electric cars. All electric stock is required.

The board members met with local business people and City Council administrators aboard their special train on the 1st. Representatives of the ILWU were among those who voiced concerns about the railroad's operation (see related article).

Operations report details rail finances

The Associated Press

When the federal government sells the Alaska Railroad to the state in January, it will be handing over a line that had a net profit of $1.8 million in fiscal year 1984.

A report presented last week at the first meeting of the Alaska Railroad Corp.'s board of directors said the line has $118.2 million in assets and $182.3 million in total liabilities and U.S. government proprietary interests.

Railroad operations were in the red for passenger traffic and in the black for freight hauling during 1984, the report said.

On Jan. 5, the state will pay $22.3 million for the railroad line, and the seven-member board of directors will run it as a state business.

The railroad has 482 miles of main line, running from Fairbanks to Seward. Branch lines to Palmer and Whittier make up an additional 48 miles, and 126 miles of yard and siding tracks are in use.

The line has 46 passenger coaches, 1,439 freight cars, and 57 locomotives. The report said the railroad has 465 full-time employees. There are 18 full-time executives and two part-time executives.

Report gives financial state of rail

by Kenneth R. Allen
Times Writer

The federally owned Alaska Railroad, which will become a state property in January, has total assets of $118.2 million and total liabilities and U.S. government proprietary interests of $182.3 million.

A report given last week at the first meeting of the Alaska Railroad Corp. board of directors also showed that the line had total revenues of $62.2 million in fiscal year 1984 and total expenses of $60.3 million, with a net profit of $1.8 million. Cash flow was reported at $6.7 million.

The federal fiscal year runs from Oct. 1 through Sept. 30. The Alaska Railroad Corp. board has not said whether it will follow the federal fiscal year or change to the state's fiscal calendar, which runs from July 1 through June 30.

At midnight on Jan. 5, the railroad will be turned over to the state in a $22.3 million transaction. The line then will be operated as a state business under direction of the seven-member Alaska Railroad Corp. board of directors, which met Friday.

Only six panelists took the oath of office. The seventh has not been named by Gov. Bill Sheffield, and one already on the board — vice chairman Frank Chapados, who is president of a Fairbanks freight company — might have to step down if the Interstate Commerce Commission rules against his membership on conflict-of-interest grounds.

The ICC is reviewing whether Chapados' interest in the freight company might be too closely related to his position on the railroad board. The board will oversee freight rates for the railroad.

The railroad, commonly called a 526-mile line, which probably is a loose reference to the railroad's linking of Fairbanks and Seward, has 482 miles of main line, according to the report. Another 48 miles of branch lines are in place, and 126 miles of yard and siding tracks are in use. Total track miles was listed at 656.

The railroads' tracks actually run from Eielson Air Force Base southeast of Fairbanks to Seward, with branches linking Palmer and Whittier. Railroad linemen have said the tracks are in various stages of repair.

Forty-six passenger coaches are in the rolling stock inventory, as are 1,439 freight cars. The line, which is correctly called a "road" in the parlace of the railroad community, has a fleet of 57 locomotives.

Some in the Brotherhood of Railway Car Men of the United States and Canada, the union representing those who maintain the rolling stock, have said that quipment is in need of serious attention. Rolling stock means only the freight cars and passenger coaches.

Word from among the membership of the International Association of Machinists and Aerospace Workers holds that the locomotives are newer than the rolling stock and are in better condition. The machinists group is the union that represents those who maintain the locomotives.

The report to the board showed 18 persons were in executive positions as full-time employees for the railroad. Two others were listed as temporaries.

Full-time employees were numbered at 465. Sixty-eight were shown as permanent part-timers, and 126 were shown as temporaries.

Under total employee listings, including full-time, permanent part-time and temporaries, 80 were shown in administration, with another 232 in transportation, 180 in engineering, 131 in locomotive power and equipment, and 16 in marketing and sales.

The report indicates that railroad operations are in the red for passenger traffic and in the black for freight hauling.

A statistical summary for 1984 annual operations showed, in round numbers, the railroad took in $4.6 million in passenger revenues but lost $1.8 million doing it, because passenger expenses totaled $6.3 million. Summer trains carried 75,000 passengers, which cost the railroad $4.79 per rider. Winter trains carried less than 3,000 passengers and cost the railraod $295 per rider.

Rail panel member could lose post

by Kenneth R. Allen
Times Writer

A question over conflicts of interests threatens the Alaska Railroad board of directors post held by Frank Chapados of Fairbanks.

Chapados might be required to step down from the railroad board if the Interstate Commerce Commission rules that his business affiliations and his position on the board are too closely related.

Railroad board members will be in a position to rule on shipment rates set by management when the state takes control of the federally owned line in January.

He is president of H & S Freight Forwarders. Chapados also is a board member of Lynden Inc., which is a holding company for Lynden Transport trucking.

Lynden Transport does business throughout Alaska. The freight-forwarding company deals principally in contracting with trucking companies and the Alaska Railroad for shipment of household goods belonging to military service personnel and families stationed in the state.

Chapados, who was named to the railroad board by Gov. Bill Sheffield on Oct. 3 along with three other men, said that the ICC will rule within two weeks whether it thinks he should step aside. The governor still has to fill a seat on the panel, which is a seven-member body.

"I don't own any trucks or lease any trucks," Chapados said, referring to H & S Freight Forwarders. "I do, however, arrange for the shipment of military service household goods, but I don't do anything directly with the railroad."

Chapados said he plans to relinquish his position on the Lynden board.

Membership on the railroad board would "in no way" benefit his freight-forwarding company, Chapados said.

Rail panel meets for first time

By HAL SPENCER
The Associated Press

ANCHORAGE — Meeting for the first time, the state board formed to run the Alaska Railroad unanimously named James Campbell of Anchorage as chairman and Frank Chapados of Fairbanks as vice chairman Friday.

The Alaska Railroad Corp. board meeting, which drew a small crowd consisting mostly of railroad employees, focused largely on housekeeping chores ranging from swearing in board members to adoption of corporate by-laws.

There was one hint of controversy in the otherwise quiet meeting.

Chapados, with the approval of his colleagues, refrained from voting on grounds it may be a conflict of interest for him to serve on the board.

Chapados, the owner of H&F Forwarders, a shipping concern, said Interstate Commerce Commission regulations may prohibit him from serving.

He said the ICC has been asked to rule on the question, and may make a decision with two weeks.

Jack McGee, an assistant state attorney general, said later he is optimistic that the ICC would not find Chapados has a conflict of interest. He said it was possible, however, that Chapados would have to surrender his seat.

Chapados is one of six members recently appointed by Gov. Bill Sheffield. A seventh is still to be named.

Besides Chapados and Campbell, who is president of Spenard Builders Supply, board members include Lew Dickinson of Anchorage, a partner in DOWL Engineers and chairman of the Anchorage Port Commission, Gerald Valinske of Anchorage, an Alaska Railroad employee, Commerce Commissioner Dick Lyon, and Transportation Commissioner Dick Knapp.

The board tried to allay concerns that its members would take a provincial view in overseeing operation of the railroad, which is to be transferred from federal to state control on Jan. 5 in a formal ceremony at Nenana.

"There's only one way to do things, and that's to work together," said Chapados.

"I consider this one of the most opportunist things I've ever done in my life," said Campbell. "I want to put to rest the idea that any of us on this board represent a (single) community in the Railbelt."

The board was briefed by the Alaska Railroad Transfer Team on current operations and the line's financial condition. The board intends to adopt a budget for fiscal 1986 next month. It also will take up the sensitive issue of job security for railroad employees.

The Alaska Legislature this year authorized the purchase of the railraod for $22.3 million. It also passed a measure to create the board.

Anchorage Times
October 17, 1984

Railroad board selection difficult

The seventh member of the new Alaska Railroad Corp. board of directors will remain a question mark until Gov. Bill Sheffield returns from China at the earliest, according to an administration official.

The 526-mile line, which has been operated by the federal government since the early 1920s, will be transferred to state ownership on Jan. 5 in Nenana in a $22.3 million transaction.

Carol Derfner, Sheffield's assistant for selecting board and commission members, said 37 persons had applied for the seventh board seat and that the field has now been narrowed to a dozen. Sheffield, however, is in China on a two-week Alaska trade mission.

"This has been the hardest board to name," Derfner said. "There are so many requirements that must be satisfied, both those contained in the state legislation creating the board and those of the Interstate Commerce Commission."

State law requires the governor to select a seventh member of the board who has 10 years of railroad management experience and has worked for a U.S. railroad as its chief executive officer. The Interstate Commerce Commission requires that the person cannot be affiliated with another railroad that does business with the Alaska Railroad. The line is not physically linked with others roads, but it does move other railroad's cars that have been sent to Alaska aboard barges.

State law provides that the governor may name five board members and that the commissioners of the Department of Transportation and the Department of Commerce and Economic Development are automatically a part of the board.

Alaska Railroad board member wants to entice private buyers

The Associated Press

FAIRBANKS — A board member of the new Alaska Railroad Corp. said one of his goals is to make the railroad attractive to private buyers and get it off the state's hands.

But, Frank Chapados said, "I don't see that occurring right away."

Private owners "pretty much have to do it at a profit," he said. They probably could not do that, even with the same $22 million price tag the federal government gave the state.

"Even at that, I think they would have a tremendous investment that they'd be faced with," Chapados said.

Chapados, 70, is one of five public members appointed to the board. Born in Juneau, he has served as a U.S. marshal, a federal Fish and Wildlife enforcement agent and a two-term state representative.

Chapados said taking over the railroad will have great challenges, one of which will be dealing with employee rights and problems uncovered as the transfer takes place.

"The employees of the railroad are very important people and a real asset," he said. "I don't know if we really have any choice but to do right by them. I don't have any problem with that."

Chapados also said he's not an advocate of extending the railroad north, or south to the Canadian rail system, until the extensions serve a purpose.

A link south without a big increase in loads would throw a wrench into a fairly sophisicated system now split between water and truck transportation, he said.

No board meetings have been scheduled. One public member has not been named yet.

Two seats on the board will be held by state Commerce Department Commissioner Dick Lyon and Transportation Department Commissioner Dick Knapp.

The three other public members named so far are James Campbell of Anchorage, president of Spenard Builders Supply; Lew Dickenson of Anchorage, and chairman of the Anchorage Port Commission, and Gerald Valinske of Anchorage, an Alaska Railroad employee of the United Transportation Union.

KINY NEWS 10/10/84

Seward officials have suggested there is an appointee to the Alaska Railroad Board of Directors may have a conflict of interest because he also serves on the Anchorage Port Commission. In a letter to the Interstate Commerce Commission, Seward Mayor, Don Cripps, says his city has serious concerns about railroad board member Lew Dickinson's ability to serve impartially on a seven member rail panel. Cripps also asks the ICC to review the credentials of other board members who were appointed to their post on October 3rd by Governor Bill Sheffield. Seward City Manager Ron Garzinni says Dickinson sets tariffs for freight shipped to the Port and then trucked to other destinations. Garzinni says that as a member of the railroad Board Dickinson also will set tariffs for cargo hauled on the Alaska Railroad when it's taken over by the State in January. And Garzinni says no individual should be actively involved in the competing modes of transportation. Cripps and Garzinni also suggest Dickinson may have a conflict because he is a Board member of Anchorage's Sand and Gravel. The official says gravel hauling operations are the largest revenue producers of the railroad. Garzinni also says Seward city officials are miffed that nobody from Seward was named to the Rail Board.

Seward protests businessman's appointment to rail board

By RONNIE CHAPPELL
Daily News reporter

The Seward City Council has protested the appointment of Anchorage businessman Lew Dickenson to the board of the Alaska Railroad Corporation.

Dickenson is one of four non-government people appointed to the board by Gov. Bill Sheffield last week. The board will run the railroad for the state, which bought it from the federal government for $22.5 million and will take over its operation in January.

Monday, the council voted unanimously to ask the Interstate Commerce Commission to examine Dickenson's business and civic affairs for possible conflicts of interest.

He is chairman of the Anchorage Port Commission and a director of Anchorage Sand and Gravel, a company that ships large amounts of bulk freight from Palmer to Anchorage via the railroad.

Although he termed Dickenson a "fine Alaskan" in his letter to the ICC, Seward Mayor Don Cripps said he and other city officials had "serious concerns about (Dickenson's) ability to serve with impartiality."

An agency spokesman said Tuesday that the ICC has "limited authority" to review Dickenson's appointment if questions of conflict of interest have been raised.

Federal laws provide for ICC review when a railroad director controls or owns significant amounts of stock in another carrier, said Martin Zell, deputy director for state and community affairs for the agency. The laws are designed to ensure that railroads treat all shippers fairly.

Zell did not know if the ICC could block Dickenson's appointment.

Dickenson, who is working and duck hunting in the Eureka-Chickaloon area, was unavailable for comment Tuesday.

In his letter, Cripps says, Dickenson is "directly involved in the railroad's gravel haul tonnage, which I believe is the railroad's largest revenue source.

"He, as a railroad board member, would be involved in decisions regarding future competing gravel sources and rates for competing services."

Seward city officials believe the startup of a new coal export facility will make it possible to use empty coal cars to backhaul large amounts of gravel to the Anchorage area.

Dickenson's position as chairman of the Anchorage Port Commission also creates problems, Cripps said.

"In most instances," he wrote, the interests of the railroad and the Port of Anchorage are "in direct conflict. We do not believe that one individual can effectively serve both bodies."

The statement is based on the theory that high railroad freight rates encourage the movement of freight through the Port of Anchorage. That's because most of the major shippers serving the city have union contracts requiring them to truck most of their freight inland.

"Ninety percent of the carrier traffic using the Port of Anchorage is by truck and, therefore, is competing with the Alaska Railroad," Cripps said.

Despite that fact, Cripps continued, Dickenson will be "directly or indirectly setting tariffs and practices for the railroad."

Anchorage Port Director Tyler Jones termed Cripps' analysis a "narrow interpretation of the role of the Port of Anchorage and our partnership with the Alaska Railroad."

Jones said he and other port officials would like to see more extensive use of the railroad.

"That's been a longstanding position," Jones said.

Sheffield knew about "Dickenson's interests" before he appointed him to the railroad board, said Sheffield Press Secretary John Greely.

"The issues were reviewed by the attorney general's office and it was determined that all (of the men appointed to the board) could pass muster," Greely said.

Other businessmen named were Jim Campbell of Anchorage, president of Spenard Builder Supply; and Frank Chapados, owner of H & S Forwarders Inc. of Fairbanks. Gerald Valinske will represent unions on the board and Transportation Commissioner Richard Knapp and Commerce Commissioner Richard Lyon will represent state government.

Campbell's company moves substantial amounts of freight over the railroad, Greely said.

The Chapados nomination already is being reviewed by the ICC, said assistant attorney general Jack McGhee. The state requested the review, McGhee explained, because it is "unclear in our minds" whether ICC statutes governing freight forwarders "would preclude him from serving."

None of the appointees has filed a financial disclosure statement with the state.

Financial disclosure is not required by law, Greely said, and it "is not standard practice to ask for financial disclosure in the course of a job interview. Usually there's a verbal assurance that there are no conflicts of interest."

Sheffield elected Dickenson, Campbell and Chapados because "they know how the railroad operates."

Anchorage Daily News

Sheffield appoints 6 to Alaska Railroad panel

United Press International

JUNEAU — Gov. Bill Sheffield Wednesday appointed six people, including three Anchorage men, to the seven-member board that will oversee the Alaska Railroad when it is transferred to the state from federal ownership.

The three Anchorage residents, two businessmen and a union official, were among four members of the public selected by Sheffield.

Chosen were James Campbell, 52, president of Spenard Builders Supply and a former Anchorage city councilman and borough assemblyman; Lewis Dickinson, 52, a civil engineer and member of the Anchorage Port Commission; and Gerald Valinske, 33, who will fill the seat designated by law for a representative of labor unions affiliated with the railroad.

Campbell will serve a five year term on the board, Dickinson a four-year term and Valinske a three-year term, Sheffield said.

The other non-government appointee was Frank Chapados, 70, of Fairbanks, president of H & S Forwarders Inc. and a former state representative, who will serve a five-year term.

The appointments are subject to approval by the Interstate Commerce Commission.

The board will oversee the Alaska Railroad Corporation, established by the state legislature last year to manage the railroad when the state buys it from the federal government for $22.3 million, Sheffield said.

The state is expected to take over ownership in December or by January of next year, Sheffield said.

The state offered to buy the railroad, which runs from Seward to Fairbanks, to keep it running after the federal government decided to stop operating it.

Two appointments to the board from state government were required by law. The governor appointed Richard Knapp, commissioner of the Department of Transportation and Public Facilities, and Commissioner Richard Lyon of the Department of Commerce and Economic Development, as voting members.

A seventh seat is designated by law for a person with at least 10 years of railroad management experience.

port, a trucking firm in Alaska. Chapados has said he would give up his Lynden association and that his forwarding company is not in the trucking business.

"The successful operation of the railroad is critical to our city," Seward Mayor Don Cripps said Thursday. Dickinson and other railroad board members were in the Resurrection Bay community as part of an orientation tour of railroad facilities in Seward and Whittier.

Dickinson and Cripps met during the board's Seward stop. Cripps said he had received a letter from ICC which cleared Dickinson.

"There was nothing personal in our criticism," Cripps said. "We just felt uncomfortable with his nomination. It's essential that this railroad be operated correctly, and we were simply trying to voice our concern."

Seward is a deep-water port. The railroad is constructing coal loading facilities there. Seward also is a major barge port, which competes with the Anchorage port for business.

Cripps said he and other city officials had sent the names of two Seward residents to Sheffield for board consideration. "We wanted Beverly Dunham, a former local newspaper publisher in Seward, and Dale Lindsey, a local businessman," Cripps said. "If a board vacancy comes up, we'll submit those names again."

No further challenge is planned, Cripps said.

"We perceived a concern, and we've voiced that concern," he said. "The decision has been made, and we'll go with that decision."

Dickinson said his railroad board membership was no more of a conflict than that of board chairman James Campbell, president of Spenard Builders Supply Inc., which also is a major Alaska Railraod customer.

"From our point of view (his and Campbell's), and that of the governor," Dickinson said, "we know something about the railroad. I have done business with the railroad for 20 years as a consultant."

Dickinson said he would abstain from board voting anytime his participation might be considered a conflict of interest.

"Campbell plans to do the same thing," he said.

The board traveled to Whittier and Seward on a special train assembled for the orientation tour.

ICC OKs position of rail board member

by Kenneth R. Allen
Times Writer

The Interstate Commerce Commission has ruled Alaska Railroad Corp. board member Lewis Dickinson's position is acceptable, even though he is on the Anchorage Port Commission and Anchorage Sand and Gravel Inc.'s boards of directors.

Dickinson, a partner in DOWL Engineers of Anchorage, was criticized earlier this month by Seward city officials who said his Anchorage business and public board memberships would be in conflict with interests of the railroad.

The railroad board will oversee freight rates. Alaska Sand and Gravel is a principal customer of the railroad. The port commission has jurisdiction over tariffs on freight moving through Anchorage.

Gov. Bill Sheffield named Dickinson and four others to the board on Oct. 3. Seward officials wrote ICC criticizing Dickinson shortly after his nomination.

Another board member, Frank Chapados of Fairbanks, is still being reviewed by the ICC. Chapados is president of H & S Forwarders Inc. and a board member of the holding company of Lynden Trans-

MEMORANDUM

TO: ALL CONFERENCE PARTICIPANTS

FROM: REPRESENTATIVE GEORGE WALK, CHAIRMAN
LEGISLATIVE TRANSPORTATION COMMITTEE

I wanted to take this opportunity to thank each of you for participating in our statewide Transportation Safety Conference October 1-3 at the Sea-Tac Marriott. I also want to express our gratitude to the Traffic Safety Commission and the other co-sponsoring agencies.

This was the first such Conference ever held, and judging by the comments we've received, you found it a worthwhile effort. We are most appreciative of the enthusiastic participation by all attendees, and by your generous compliments on the Conference Evaluation forms. We also appreciate the many suggestions for additional topics and speakers should we decide to repeat the Conference in the future.

We are enclosing a final attendance roster, and a summary of conclusions from the Workshops as reported by the moderators at the Wednesday morning closing session.

During the coming months we will be talking with the other sponsoring agencies to determine whether we should continue this Conference, and, if so, at what frequency. We will advise you of our decision.

In the meantime, thank you again for attending, and for your continuing efforts to improve highway safety for all of us.

WORKSHOP REPORTS

WASHINGTON TRANSPORTATION SAFETY CONFERENCE

The Seattle Marriott
October 3, 1984

The issues set forth below represent the areas of concern and recommendations for possible legislative or administrative action expressed by participants in a series of workshops held during the Washington Transportation Safety Conference, October 1st through 3rd, at the Seattle Marriott Hotel. The Conference was sponsored by the Legislative Transportation Committee and the Washington Traffic Safety Commission.

ALCOHOL AND THE DRIVER

Moderator: Dr. Carl Klingberg, Bureau of Health Statistics, Department of Social and Health Services

1. Stronger sanctions for individuals driving without a drivers license, or while suspended or revoked.

2. Implementation of administrative license suspension for positive and swift control over the license of a driver convicted of driving while under the influence of alcohol.

3. Legal authorization of random sobriety checkpoints for detection of drinking drivers.

4. Clarification of a universally accepted definition for DWI. At what point does the individual become impaired to the extent that it interferes with safe driving practices? There is a disparity among states regarding consumptive levels implying intoxication, ranging from blood alcohol content levels of .08, .10, .15, to determining intoxication based upon observed behavior by law enforcement officials.

5. Development of a stable funding source for DWI enforcement, prosecution and education efforts.

6. Elimination of deferred prosecution for DWI offenders.

BICYCLE SAFETY

Moderator: Todd Littman, Secretary-Treasurer, Bicycle Federation of Washington

1. Recommends that the legislature address the problem of bicycle safety in the most cost effective manner:

   a) Create a statewide bicycle safety coordinator position to provide expertise for bicycle safety education programs;

BICYCLE SAFETY, cont'd.

b) Provide pilot project grants to communities with high bicycle accident rates to allow those communities the ability to develop bicycle safety plans -- with the objective of extending the program beyond state funding.

Notes:

Bicycling accidents have increased in Washington State by 15% in the last year.

The Seattle Cascade Bicycle Club has developed a program for the Seattle public school system which includes on-bike exercises and training for 4th graders.

The Olympia Police Department has developed a public bicycle education program, which includes increased bicycle safety presentations in the schools and increased enforcement of bicycle traffic laws.

COMMERCIAL VEHICLE SAFETY

Moderator: Captain David Boyd, Washington State Patrol

Presentation of Report: Don Lewis, Motor Carrier Law Enforcement Training Officer, Washington Utilities and Transportation Commission

1. Expansion of categories for commercial endorsements to include buses, tractors, or a "train", which is a semi-tractor, and two full trailers.

2. Notification by the Department of Licensing to municipalities and to the trucking industry of the suspension or revocation of commercial drivers licenses.

3. Bringing the private commercial carriers under the same safety regulation as the common and contract commercial carriers -- for both highway and terminal enforcement, including hazardous materials regulations, qualifications of drivers, parts and accessories necessary for safe vehicle operation, reporting of accidents, maintenance repair, as well as requiring that a copy of public liability and property damage insurance be filed with the state.

4. Authorization for state enforcement agencies to check medical certificates and drivers' hours of service on the highway.

Note:

Enactment of proposals 3 and 4 would qualify Washington State for federal funding from the Surface Transportation Act, which subsidizes enforcement of safety regulations for both private and contract commercial carriers.

LICENSING

Moderator: Charles Stansbury, Assistant Director, Driver Services, Department of Licensing

Recommendations for Possible Legislation:

1. A "conditional" license for all first-time drivers in the state, regardless of age, to promote safer driving. Driving privileges might be withdrawn if the driver has one hazardous moving violation or two minor moving violations within a certain period of time. (Similar to the juvenile "provisional" licensing concept.)

2. A one-time 90-day instruction permit for motorcycle riders. This would encourage the rider to enter a comprehensive motorcycle training program to learn to ride safely, and be able to pass the motorcycle licensing test, rather than renewing the instruction permit indefinitely.

3. Permitting the employer of a commercial driver accessibility to both the driver's personal and commercial driving record, rather than just the commercial portion.

4. Stronger sanctions against individuals driving without a valid operator's license, or with a license that has been suspended or revoked.

5. Sanctions to prevent vehicle operators from obtaining multiple drivers licenses from many different states. Suggestions were to include the social security number on all drivers licenses, or at least in the licensee's file; or to include an individual's thumb print on the driver's license.

6. Reclassification of a "steering trailer" to a motor vehicle -- and a classified license endorsement required for the operator.

   A "steering trailer" is used in the construction industry for moving concrete reinforced beams which may weigh up to 100,000 pounds. The beam sits over the top of the trailer, and a driver sits in the trailer, steering it around curves. Because it is not classified as a motor vehicle, the driver currently does not even need a drivers license to operate it.

7. A driver licensing classification for the recreational vehicle driver. Some recreational vehicles require additional skills for driving, particularly vehicles over 15,000 pounds gross weight, or the 40-foot fifth-wheel trailer pulled by a pickup.

8. Driver licensing pretesting.

   A pre-testing questionnaire containing 10 basic driver training questions could be mailed with the driver license renewal notice. The driver would be advised that three of the ten questions will be asked at the time the license is renewed. If the driver is unable to answer the questions, he/she will not be issued a license until they complete a standard driving examination.

LICENSING, cont'd.

Recommendations for possible legislation, cont'd.

9. Dissemination of information, possibly by the Department of Licensing or the Washington Traffic Safety Commission, to inform state residents, or at least those with driver licenses and vehicle and boat registrations of any relevant statutory changes adopted by the Legislature.

Recommendations for possible administrative change:

1. Behind-the-wheel testing of commercial vehicle drivers by the Department of Licensing to develop a more in-depth testing program.

2. Expansion of the commercial vehicle endorsements at a more comprehensive level, separating the different classes of commercial vehicles; for example, the common and combination endorsements.

   There are marked differences in skills required for driving a truck, a semi-tractor, a full trailer or a "train", which is a semi-tractor, and two full trailers.

3. Inclusion of more information for bicyclists on rules of the road in the Washington State Drivers Manual.

4. Development by the Commission on Equipment of a more comprehensive definition regarding the licensing of three-wheeled vehicles (as motorcycles or their own special category) and determination of the type of driver license endorsement, if any, they should have.

MOTORCYCLE SAFETY

Moderator: Don Mapp, State Coordinator, Washington Motorcycle Safety Program, Department of Licensing

1. Allocation to the motorcycle safety education account of an additional dollar from the motorcycle endorsement fee for such projects as promotion of the motorcycle training locations throughout the state, and motorcycle safety campaigns.

   Currently the only money used for these programs and allocated to the motorcycle safety account is the first dollar of the $2.00 endorsement fee.

2. Reduction in the time allotted for the term of a motorcycle instruction permit, from one year to ninety days.

   Some riders are continuing to drive with a motorcycle instruction permit in lieu of taking the motorcycle licensing test.

3. Allocation of the moneys collected from the $2.50 motorcycle instruction permit fees to be placed in the motorcycle safety education account, so that the motorcyclists are supporting their own program.

MOTORCYCLE SAFETY, cont'd.

4. Completion of an approved motorcycle training program to be required of a driver applying for his/her first motorcycle license.

5. Special license plates for mopeds and motorscooters.

6. Highway safety signing for motorcyclists should be included in the Department of Transportation's master traffic safety plan.

THE ROADWAY

Moderator: Wes Bogart. Chairman, Washington Highway Users Federation

1. Prohibition of the use of studded tires in Washington State.

   A Washington Department of Transportation study indicates that studded tires are only effective in temperatures from 10 to 34 degrees. Their use adds to the overlay costs for highway maintenance of approximately $3.9 million per year.

2. Better coordination between the Department of Transportation and the highway construction industry regarding a proper traffic control plan, particularly in the area of highway safety signing.

3. Encouragement of law enforcement to have vehicles which become disabled along the roadway moved to a location where there is an area wider than the shoulder to deposit the vehicle until the due process period has been completed.

TRAFFIC SAFETY EDUCATION

Moderator: Charles Hayes, Assistant Director, Washington Traffic Safety Commission

1. Development of a general communications system, with coordination between the Legislature, the Washington Traffic Safety Commission, and other state agencies, to keep the public informed of the most current traffic safety information.

2. Development of a comprehensive state approved health-education program which will include an alcohol and safety education format.

3. Enactment of a provisional driver licensing program for drivers under age 18, possibly withdrawing the driving privilege if the driver has one hazardous moving violation or two minor moving violations.

4. Mandatory safety belt usage for the first two years of driving.

5. Opposition to any movement to eliminate high school driver education programs in Washington State.

6. Motorcycle education programs to cover more of the motorcycling public (which is now one percent of the driver population).

VEHICLE OCCUPANT RESTRAINT SYSTEMS

Moderator: Katie Hicks, Passive Restraints Program Manager, Washington Traffic Safety Commission

1. Mandatory seatbelt laws for Washington State, and as many other states as possible.

   a) There is a need to disseminate more information on the federal "208"ruling, explaining that passage of a mandatory seatbelt law will not eliminate the existence of passive restraint systems (including air bags).

   b) Introduction of a multiplicity of slightly varying mandatory restraint bills should be avoided in order to maintain strong support.

   c) Sunset clauses and effective dates set far into the future should also be set aside in favor of an early or immediate effective date.

   d) No exemptions from the law other than for medical reasons.

   e) Development of a plan of action for grass roots support for this needed legislation.

Re: High Float Emulsion Treatment

The Honorable Bette Cato
Alaska State House
Pouch V
Juneau, AK 99811

Dear Representative Cato:

When I last saw you at the Red Dog Mine meeting in Kotzebue on September 5, you asked about the success of the High Float Emulsion Treatment that is being tested in the Fairbanks and Haines areas. I'm pleased to send you a copy of a memo I received from Billy Conner, Research Engineer, which summarizes the feelings of the Research Section on the use of this method of surfacing. As you will note, it cannot be judged a success or a failure at this point in time.

I hope this information will answer your questions. If I can be of further assistance, please contact me.

Sincerely,

William B. McMullen, P.E.
Director, D & C
Northern Region

SUBJECT: High Float
Emulsion Treatment

Pursuant to your inquiry of September 5, 1984 concerning the status the high float emulsion, I have prepared a brief summary of the project to date. During the past summer, approximately 6.4 miles of high float emulsion treated surface was placed in the State. Of this, 4.7 miles were placed near Fairbanks. The remaining 1.7 miles was placed in Haines. The performance of these sections is inconclusive to date, due to the newness of the surface.

Prior to proceeding with the discussion, a few basic concepts must be understood. First, the term "high float" refers to the asphalt cement type used and not to the placement process. This asphalt type must be purchased from Canadian rather than USA sources. Other types of asphalt can also be used and our field testing included a Chevron asphalt emulsion, grade CMS-2. However, the Canadians feel the high float works best for them primarily because of its cold weather characteristics and its workability. Our experience thus far has been that the high float emulsion seems to be a bit easier to handle.

As with any surface treatment, the technique in question provides no more structural strength to the roadway than linoleum flooring adds to the strength of a house. Its only function is to provide a dust free road surface. The performance of surface treatments therefore, will mirror the foundation materials. (1)

It is impossible to determine the success or failure of our high float projects at this time. With any new technique, there are several start up problems due to the lack of experience. These problems are reflected in the bid prices. The emulsion costs in Haines were equivalent to 1½ inches of a hot asphalt which is a far superior surface. Unless this cost can be reduced to less than ½ the cost of hot asphalt, the process will not be economically viable for some time. (1)

Generally, the construction of the three projects has gone as expected. There have been a few complaints. These complaints have stemmed primarily from the surface not meeting the publics expectations. The attached memo dated August 3, 1984, explains the problem in greater detail. This pavement is definitely not the surface the public visualizes when we use the term pavement. It is rougher and noisier than hot asphalt. Whether or not this type of surface is publically acceptable remains to be seen. We probably will not know how well the high float emulsion technique will perform for (2)

two or three more years. However, the following comments can be made at this point:

1) High float should only be used on low volume roads where the surface must be replaced every few years no matter what the surface. Such areas may be over permafrost, or in areas where the roadway will soon be reconstructed.

2) Each roadway must be analyzed on its own merits to determine the best surface alternative.

3) The foundation materials must be solid. A poor foundation will cause immediate failure of a surface treatment.

4) The maintenance budget for these surfaces must be increased because they are known to require a higher maintenance effort than hot mix asphalts. Canadian experience has shown that potholes must be repaired immediately or the surface will deteriorate very rapidly.

The Research Section intends to visit the Yukon Territory to determine the long term performance of their projects. This should give us an idea of what we should expect.

In summary, high float emulsion surfaces may have application. However, they are not a replacement for high type surfaces Because this is a surface treatment, it is more sensitive to the foundation and requires more maintenance effort.

I hope your questions have been answered. We cannot say that the high float technique is a failure or success at this juncture. However, we will continue to closely monitor the performance of these sections closely through the Research Section.

MEMORANDUM

State of Alaska
Department of Transportation & Public Facilities
SOUTHEASTERN REGION

TO: Dave Waldron
Director/Maintenance & Operations
Southeastern Region

DATE: August 3, 1984

FILE NO: 244E-1802

TELEPHONE NO: (907) 789-6215

SUBJECT: Mud Bay Road Surface Treatment Inspection Trip

FROM: Richard A. Hamilton
Ray D. Miller
Dale Miller
Ed Cavagnaro

Pursuant to your request of July 31, 1984 Ray Miller, Materials Engineer, Dale Miller, Assistant Construction Engineer, Ed Cavagnaro, Design Project Manager, and Dick Hamilton, Maintenance Manager travelled to Haines to meet with a concerned citizen, Mrs. Betty Holgate, and to make a field inspection of the recently completed Mud Bay Road project.

A brief history of how this particular project was developed follows in order to clear up any questions you might have in this regard.

This section of roadway was selected for the test project using High Float Emulsion Bituminous Surface Treatment (BST) per the attached Senate Resolution No. 27. It was scheduled for interum BST to protect the required structural section until funds were programmed for final paving. The Reconnaissance Report calls for placing hot asphalt pavement on this route when reconstruction of the roadway is completed to the Chilkat State Park or Flat Bay. It should also be noted that reconstruction of this road was programmed due to increased traffic on the route created by the opening of the Chilkat State Park. The present Average Daily Traffic is 250 while projected for the year 2000 is 450.

Reconstruction of the first stage of this project took place over the last two construction seasons and the roadway was accepted for traffic and maintenance on July 18, 1984. The prime contractor on the project was a joint venture between Taylor/Ritchie with the High Float Emulsion BST being constructed by Associated Sand & Gravel as the subcontractor. Since this was a new type of construction for Alaska contractors, considerable time was spent in researching and developing the specifications. Personnel assigned to the project, both Design and Construction, made several trips to Canada to observe this type of construction first-hand.

As in all new types of construction, there are certain instances where the specifications may have been improved or made more explicit. No major problems were evident that adversely affected the overall intent and scope of this project. Attached for your information is a memorandum from Larry Geise, Project Engineer, to Dale Miller, commenting on the project and specifications.

Our inspection of the project on July 31, 1984, as well as the final inspection of the project on July 16, 1984, revealed nothing out of the ordinary and the surface appeared to be as expected at this stage

of the project. The surface, as it exists, is loose gravel with the surface treated gravel at a depth of ±1 inch under the surface gravel. The gravel surface has not been dispersed of as fast as desirable because of low speed and low volume traffic. As stated, the general roadway appearance is that of a gravel highway and not a Bituminous Surface treatment at this stage. Some areas, particularly on the small tracts portion have the appearance of a BST roadway without the loose gravel. This is probably due to higher traffic volumes.

On August 1st, Mr. Hamilton discussed the situation of the loose gravel on Mud Bay with Ray Magnuson of Yukon Highways. Ray has put down several hundred miles of High Float BST with high success. It was Ray's recommendation that the loose gravel be removed, as leaving it in place will tend to erode the treated surface. He suggested using a grader with a rubber blade and then brooming the fines.

It should be noted that some slight washboarding may exist in the Cemetary/hill portion of the project because of the steep grade encountered, however, these are certainly not of the magnitude as expressed in Mrs. Holgate's complaint. The possiblity of washboarding in steeper grades is not a surprise as the Canadians had expressed this possiblity during conversations with them. When the excess gravel is removed, washboarding will be more identifiable and some corrective action may be necessary, but no major amount of work is anticipated. It is felt that nearly all the washboarding is in the loose surface gravel.

It is too early to tell the percentage of success of the project, however, it cannot be classified as a complete failure as indicated by Mrs. Holgate in her complaint to the Department. As with any test project, only time and close monitoring of the conditions will identify the success of the project. It should be pointed out that this type of surfacing when 100 percent successful does not create the ride of a hot asphalt pavement. The aggregate is coarse and the riding surface will have a cohesive but rough texture.

Striping of the project may have been ill-advised because brooming and the low speed traffic had not removed the excess cover coat material, however, safety was the prime concern in making the decision to proceed with striping. It was fully understood that the completed striping was of an interum measure, but it would suffice until next spring when the Department will be restriping the project as part of their annual restriping program. There is at least 50 percent of the striping remaining at this time.

All of the above points were discussed with Mrs. Holgate during our visit. The residents along the route, it appears based on our conversation with Mrs. Holgate, fully expected the black, smooth appearance of a hot asphalt pavement surface. It appears that a press release should have been issued to inform the residents that we were doing a test project and explain what the completed surface would be like. This should be Standard Operating Procedures for any new or experimental construction techniques.

This should sum up the facts concerning the project and should you have any specific question about the project or points not covered in this memorandum, please advise. Additionally, our Research Section in Fairbanks is doing a complete study of this type of surface treatment and will be collecting data from all projects in the state in order to assemble the facts and issue a final analysis. It is recommended that the project be inspected weekly after it is broomed.

Project Engineer

SUBJECT: Mud Bay Road
Stage I - RS-0987(3)

File

Considerable interest has been generated relative to the placement of high-float emulsion on subject project. Please find enclosed some comments on the procedure.

Specifications required the aggregate stockpile to have a moisture content between 2% and 4%. Baines had an extremely dry spring and the moisture content was achieved without difficulty. Under most conditions, in S.E. Alaska, this could not have been achieved without expending substantial time and money. Perhaps specifications should be reviewed to see if additional moisture is acceptable.

It would appear for this concept to be successful the unit cost has to be reduced considerably. The emulsion work was equivalent to the cost of a reasonable price 1½ inch hot asphalt overlay.

The lay-down crew's experience is critical in this operation. The chip spreader operator is more important than a paving machine operat Any variances in speed transmits through to mat surface immediately.

Prior concern about this type of placement on a steep hill (9.44%) appears warranted. The application technique difficulty is compounde on steep grades. Stopping the chip spreader smoothly while on oil and loose gravel is difficult. Gravel application has to be do so the wave of oil is of reasonable height. On this project we considered a satisfactory wave height to be 2 inches. Controlling traf action on the grade is mandatory.

The comb arrangement mounted on the chip spreader was a complete failure. This device was designed to delay aggregate transport to the grade. In reality, the only thing it accomplished was clogging the aggregate distribution. After the comb was damaged, th contractor was instructed to remove it. It was not utilized on the roadway main line.

The major delay encountered was due to the size of the distributor truck. The small truck (1300 gallons) allowed for the construction of only 900 feet of surface before refilling. This caused numerous unneeded stops. I suggest a change in specifications to require larger oil capacity.

The oil application rate of 0.75 gallons/sq. yd. was close to a practical maximum for equipment utilized. Maximum spray bar pressure, pump capacity, and truck speed of approximately 100 feet per minute was required to achieve the application rate.

The contract specified the roadway to be broomed not less than 10 days after aggregate application. Then the surface was to be painted. I suggest, if it is possible, to allow traffic action to remove loose aggregate. If this cannot be done brooming and painting should be accomplished at least a month after laydown.

My personal impression was that the EP-350S was an easier oil to use then the CRS. It definitely sprayed better with less clogging of the distributor bar. In addition, the oil flowed together easier and created a more uniform oil mat.

Most difficulties encountered on the project were standard start-up difficulties. These will be a problem encountered in all such types of applications until contractors personnel become familiar with the high float technique.

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

SENATE CONCURRENT RESOLUTION NO. 27 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

Relating to the designation of three sites for the application of high float emulsion asphalt.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a substantial portion of the state's money is spent on the rehabilitation and rebuilding of our highways; and

WHEREAS the present road building techniques are extremely expensive and may not be the most cost effective method for northern climate highways; and

WHEREAS the Yukon Territory Department of Highways and Transportation has had success with a less expensive and more durable surfacing technique known as high float emulsion asphalt; and

WHEREAS the climate and highway demands of Alaska are very similar to the climate and highway demands of the Yukon Territory; and

WHEREAS there are highway surfaces in the Interior region, the Southcentral region, and the Southeast region that are in need of rehabilitation and could therefore be designated as test sites for an alternate surfacing technique;

BE IT RESOLVED by the Alaska State Legislature that the governor is respectfully requested to direct the commissioner of transportation and public facilities to designate a representative site in each of the Interior, the Southcentral and the Southeast regions to be used as a test application site for high float emulsion asphalt; and be it

FURTHER RESOLVED that the Department of Transportation and Public Facilities document the cost effectiveness of the test applications and

report its findings and recommendations to the governor and legislature within 10 days of the convening of the 14th Alaska Legislature

ATC Confirmation Hearings

WHAT IS THE PURPOSE OF THE ATC AND HOW DO YOU PERCEIVE YOUR ROLE AS COMMISSIONER OF ATC?

DO YOU HAVE ANY PREVIOUS OR CURRENT RELATIONSHIPS WITH ATTORNEYS THAT PRACTICE BEFORE THE COMMISSION?

WHY WOULD YOU ACCEPT APPOINTMENT TO A COMMISSION THAT MAY BE ABOLISHED IN THE NEAR FUTURE?

WHAT IS YOUR RELATIONSHIP WITH WITS TRAVEL? ALL WAYS TRAVEL?

WHAT IS YOUR JUDICIAL ATTITUDE?

WHAT IS THE PURPOSE OF THE ATC AND HOW DO YOU PERCEIVE YOUR ROLE AS COMMISSIONER OF ATC?

DO YOU HAVE ANY PREVIOUS OR CURRENT RELATIONSHIPS WITH AIR CARRIERS? MOTOR CARRIERS?

DO YOU HAVE ANY PREVIOUS OR CURRENT RELATIONSHIPS WITH ATTORNEYS THAT PRACTICE BEFORE THE COMMISSION?

WHAT DO YOU FEEL IS THE FUTURE OF THE NTC?

WHY WOULD YOU ACCEPT APPOINTMENT TO A COMMISSION THAT MAY BE ABOLISHED IN THE NEAR FUTURE?

OTHER THAN PREVIOUSLY SERVING AS COMMISSIONER OF ATC, WHAT TRANSPORTATION EXPERIENCE DO YOU FEEL QUAILFIES YOU TO BE APPOINTED TO THE ATC AS THE MEMBER WITH 10 YEARS MANAGEMENT EXPERIENCE IN TRANSPORTATION?

WHAT TYPE OF TRANSPORTATION CONSULTING DO YOU CONDUCT?

DO YOU FORESEE ANY PREVIOUS OR CURRENT CLIENTS COMING BEFORE THE ATC?

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

April 24, 1984

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Kerttula:

Pursuant to applicable law, I submit the following name for legislative confirmation of appointment to the position noted:

BOARDS AND COMMISSIONS
(with Appt/Term)

Alaska Transportation Commission

Robert C. Rocker, Anchorage, 84/04/17 - 89/02/01

Sincerely,

Bill Sheffield
Governor

Box 100345
Anc., 99510

PERSONAL BACKGROUND:

Date of Birth: November 13, 1927, Buffalo, N. Y.

Married to Annamae Rocker in 1971. Wife is independent owner/manager of All Ways Travel, a full service retail travel agency in Anchorage. We have no children.

Political Affiliation: Lifelong registered democrat.

Hobbies: Golf, fishing, swimming.

Have never had any judgments or liens filed against me or my wife.

Never accused of or convicted of any felony.

Approximate Net Wroth: $500,000

All federal and state taxes filed and current.

EDUCATION:

Lafayette High School Graduate, 1946 - Buffalo, N. Y.

University of Buffalo - 1947-1948
University fo Washignton - 1957-1959
Degree in Business Administration, 1959
Major in Finance and Minor in Accounting

MILITARY:

U. S. Navy - 1945-1946 Honorable Discharge

BUSINESS BACKGROUND:

Miscellaneous jobs until 1948.

Employed by Northwest Airlines from 1950 - 1958 in capacity of Transportation Agent and Senior Transportation Agent. Duties consisted of weight and balance preparation, passenger service functions and shift supervision. Moved to Alaska - 1951 (33 year resident)

1959 - 1961	Manager, Brad Phillips Travel Service
1961 - 1964	Vice President, Western International Travel Service & WITS Air Cargo
1964 - 1971	Owner and Manager, WITS Travel Service and Vice President, North Land Tours, Seattle, Washington.
1971 - 1977	Served as Commissioner on Alaska Transportation Commission. 1971 - 1975 served as Chairman. Personally prepared budget and oversaw all functions of the Commission. The Commission lapsed funds every year that I was in charge.
1974 - 1977	Served on the Motor & Air Committee of the National Association of Regulatory and Utility Commissions from 1974 - 1977. Represented the State of Alaska through the Alaska Transportation Commission at many hearings before the Civil Aeronautics Board and the Interstate Commerce Committee.
197. - Present	Transportation consulting and operate as Owner/Broker ERA-Rocker Realty, a franchised real estate office. I am a licensed Real Estate Broker in the State of Alaska #3667.

COMMENT:

I have been in a management capacity for the past twenty five years. More details or authentication of any of the above as well as personal and financial references are available upon request.

BOARD: TRANSPORTATION COMMISSION, ALASKA

TITLE: Alaska Transportation Commission

DEPT: DCED

AUTHORITY: AS 42.07.011

STATUS: ACTIVE

REQUIREMENTS: LEGISLATIVE CONFIRMATION AND FINANCIAL DISCLOSURE

PROHIBITIONS: Conflict of Interest - restrictions in AS 42.07.061

TERM: 6-year - staggered

DESCRIPTION: 3 members appointed by Governor: with regard to fitness and ability to exercise the powers and duties of the commission, based upon experience and familiarity with principles of public utility regulation or educational and experience background (refer to statute); 1 graduate of accredited university with major or degree in economics; 1 with major or degree in financial management or business administration; and 1 with 10 years management experience in transportation; terms begin on February 1; Governor designates chair for 2-year term.

SPECIAL FACTS: May be removed for cause; quorum - 2 members; AG is legal counsel; annual report to Legislature

FUNCTION: Supervise and regulate transportation in the State

COMPENSATION: SALARIED - Range 26, Step C

MEETINGS: Continuous hearings throughout year

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

NEWS RELEASE

Rhonda

FOR INFORMATION CONTACT: GINGER JOHNSON, INFORMATION OFFICER (907) 465-3900

FOR IMMEDIATE RELEASE

DOT&PF Appointments
124

MAR 9 1983

March 8, 1983

Commissioner Dan Casey today outlined his streamlining of deputy commissioner duties to make the Department of Transportation and Public Facilities more quickly responsive to regional and local needs.

At the same time, in a speech at Fairbanks, Casey announced the appointment of two deputy commissioners, two more in an acting capacity, and several directors to carry out his goals in a reorganized department.

Topping Casey's staff are H. "Glen" Glenzer, previously Executive Director of Alaska Construction Industry Advancement Program, as Deputy Commissioner for the Interior Region; Fred Seeger, a former private engineering consultant and construction manager, as Deputy Commissioner for Standards and Statewide Programs; Jon Scribner, formerly Deputy Commissioner for Design and Construction, as Acting Deputy Commissioner for Southeast Region; and William Snell, who has been Director of Planning and Programming, as Acting Deputy Commissioner for Central Region.

In addition, the Commissioner has appointed John Bates, a former Deputy Commissioner, as Director for Planning and Programming, and Ron Lind, who moved from Deputy Commissioner for Administration to Director of Administrative Policy and Fiscal Management. He also announced that Marty Nusbaum remains Acting Director of the

(More)

Marine Highway System, and Mark Hickey is Coordinator for the Alaska Railroad Transfer Team.

Commissioner Casey said making the new deputy commissioners directly responsible for all DOT&PF operations in their regions will greatly improve first hand attention to regional needs, and will strengthen close contact with local officials and residents.

He explained the reorganization is a change from statewide deputy commissioner authority based on departmental functions to "a line organization" structure of responsibility. The new system, he said, will enable deputy commissioners to respond decisively to the whole range of needs in their regions rather than, as in the past, having their powers to act fragmented along functional lines. The public, he said, now will have a designated person to turn to below the commissioner level who is conversant with all the needs and problems of their regions. This same approach will also apply to the Marine Highway System.

The only other exception, Casey said, is Standards and Statewide Programs which logically remains on a statewide basis since its area of responsibility involves not day-to-day operations but department-wide policies and positions.

The commissioner noted that the reorganization reaches only to the top management alignment, and he stressed that it impacts few employees as to where they are assigned and what they do.

###

Fred Seeger

BACKGROUND INFORMATION

Summary

Fifteen years experience in engineering and construction of oil and gas industry related capital projects with emphasis in the State of Alaska.

1979-1983: Engineering and construction management consultant engaged in providing management service to major oil industry engineering and construction companies, including North Slope producers such as ARCO Alaska, Inc. Specific service functions included construction planning and design during the engineering phase of the projects, estimating and scheduling, economic analyses, and contracting strategy. Represented clients as construction manager to deliver projects within budget, schedule and quality requirements during the construction phase of the projects.

1978-1979: Employed by Northwest Alaska Pipeline Company in Senior Project Planning position involved with the Alaska Natural Gas Transportation System. Performed conceptual engineering and construction planning for the gas pipeline project relating to capital cost estimates, schedules, manpower and equipment estimates, labor relations, procurement and logistics.

1975-1977: Employed by Alaska Pipeline Service Company, in Senior Project Management position during construction of the Trans Alaska Pipeline. Developed and implemented policy and procedure to improve quality of construction on a section of the oil pipeline. Directed various construction programs, particularly those associated with the special Arctic construction and engineering problems; provided direction to contractor's management in planning and engineering.

1974-1975: Employed by Bechtel Incorporated, as Assistant Deputy Manager on Trans Alaska Pipeline and Roads Project. Handled administration and coordination of personnel in Engineering, Procurement, Inspection, and Traffic Departments for the proper and timely supply of over $2 billion worth of materials and equipment for camp and pipeline construction; coordinated task force groups in the development of unique Arctic construction procedures for the installation of engineered pipeline components; generated estimates and budgets for management.

1969-1973: Employed by Shell Oil Company, as Project Engineer and Project Manager. Through various assignments was responsible for producing project feasibility studies, capital budgets, project design, specifications, contracts, negotiations on right-of-way, and managing construction.

EDUCATION

Purdue University, School of Civil Engineering, Lafayette, Indiana. Earned Master of Science in Civil Engineering and Construction Management.

Clarkson College, School of Civil Engineering, Potsdam, New York. Earned Bachelor of Science in Civil Engineering.

Registered Professional Engineer in the States of Alaska, California, New York, and Washington.

H. "Glen" Glenzer

BACKGROUND INFORMATION

Summary

Over 30 years of active service as a U.S. Naval Aviator in positions of increasing responsibility, including command, exercising management control of national programs. Record of achievement in planning functions and policy development.

Experienced in the administration and management of a large air station and maritime terminals with all the problems and considerations of a civilian facility including management, operation, maintenance, development and FAA and maritime rules and regulations, as well as all other civil and governmental agencies.

Served as chief staff executive with Alaska Chapter of Associated General Contractors of America, Inc. involved with all problems and considerations commensurate with the construction industry. Directly involved with highway, building and utility construction as well as labor negotiations, personnel administration, education and training programs. Also active in safety, equal employment opportunity, ecology, budgeting, and all management functions pertaining to large construction contractor firms dealing extensively with governmental and civilian agencies and corporations. Most recently served as Executive Director of the Alaska Construction Industry Advancement Program involved with all the above activities including A.G.C. members plus others in the industry.

1981-1983: Executive Director - ACIAP. All duties encumbent upon previous position as they related to not only AGC members but entire industry at large. Also had various consulting jobs mainly pertaining to Aviation and Marine Transportation.

1973-1981: Chapter Manager, Alaska Chapter Association General Contractors of America, Inc. Responsible for Safety Public Relations, Equal Employment Opportunity & Ecology compliance as well as participated in and reviewed bargaining agreements and grievances of labor union contracts. Performed all duties attendant with personnel and engineering management functions, in relation to heavy construction industry. Also taught courses in financial management, economics and marketing at Alaska Pacific University.

1970-1973: Naval Safety Center, Norfolk, VA., Director of Aviation Safety Directorate. Supervised, established and adiministered safety programs within entire naval establishment and with other service and agencies including FAA, CAB and all airlines connected with them.

1968-1970: Commanding Officer, Naval Station, Adak, Alaska. Commanded large Naval Station which in addition to the administration of a community of 6000 people included a naval station and terminal as well as surface shipping harbor and terminal. Administrated a $4.5 million operating budget and $5 to $12 million annual construction project funds. Conducted contract negotiations and awarded and supervised contracts with airlines, contractors and industrial concerns.

1947-1968: U.S. Navy

EDUCATION

BA, University of Maryland. Earned Business Administration degree, Master of Science Degree from the George Washington University of business Administration. Graduate of University of Southern California Safety Management Course, the George Washington University Safety Course, the George Washington University Course in Multi-Variants and Naval Post Graduate School of Monterey, California.

Jonathan W. Scribner BACKGROUND INFORMATION

Summary

Fifteen years experience in engineering and engineering management. Has worked for private industry, military, and government in the fields of design and construction of all types of public facilities, environmental engineering and public health. Experience includes engineering investigations, teaching, planning, and management.

1982 - 1983: DOT&PF; Acting Deputy Commissioner, Design & Construction. Responsibility included those described for the Assistant Deputy Commissioner.

1979 - 1982: DOT&PF; Assistant Deputy Commissioner, Design & Construction. Supervised over 1500 positions. Program size of $400 million representing about 600 projects. Under general administrative direction of deputy commissioner. Responsible for administrative activities and programs of the unit, including budgeting, accounting, purchasing and supply, data processing, and personnel management.

1975 - 1979: Department of Environmental Conservation, Director, Division of Water Programs. Headed up division with major responsibility for statewide planning, water supply, water pollution control, monitoring, construction grants and village safe water programs. Overall manager of $20 million C.I.P. per year grant program for water and waste water systems and $3 million C.I.P. per year for sanitation facilities in rural villages. Responsible for preparing and managing construction of annual operating budget ($2 million/year).

1974 - 1975: Department of Environmental Conservation, Acting Director, Division of Water & Air Quality Control. Duties similar to above.

1971 - 1974: Department of Environmental Conservation, Chief of General Engineering. Responsible for water supply, radiation control, solid waste management, pesticide control, air faculty control on statewide level. Established and directed state's first village safe water program. Responsible for preparation and management of operating budget and management of $8 million C.I.P.

1969 - 1971: Department of Health and Welfare, Regional Sanitary Engineer. Responsible for all environmental health and engineering activities in the northern half of Alaska. Independently planned, directed and controlled all areas of responsiblity as Office Manager. Conducted pollution surveys, assisted government and industry to meet pollution requirements reviewed and approved water/sewer plans.

1967 - 1969: Employed by the U.S. Army as Captain, Sanitary Engineer. Instructor of graduate sanitary engineering officers in advanced sanitary engineering. Also gained practical experience in water supply, solid waste treatment, sanitation, industrial hygiene engineering and air pollution control.

1967 - 1967: Employed by Metcalf and Eddy Engineers as a Sanitary Engineer. Responsible for investigation, laboratory analysis, and reporting on ways to economically improve existing waste water treatment systems for a major west coast refinery to meet state standards for oil and suspended solids content.

EDUCATION

University of California. Earned Bachelor of Science in Civil Engineering. Stanford University. Earned a Master of Science in Civil Engineering. University of Alaska, Juneau and Fairbanks. Engineering and Management, Personnel Management, and Construction Management Systems.

Registered Professional Engineer, Alaska

John C. Bates

BACKGROUND INFORMATION

Summary

Thirteen years of experience in transportation in Alaska. Including design construction planning and administration.

1979 - 1983: Employed by the Department of Transportation & Public Facilities as Deputy Commissioner, Planning and Programming. Administered the development of the state transportation planning system leading to the development of the Department's Capital Improvements budget.

1979 - 1979: Employed by the Department of Transportation & Public Facilities as Director of Interior Region Planning and Programming. Directed the Interior regional development of the State's transportation plans. This included management of consultant contracts in the areas of transportation planning.

1978 - 1979: Employed by the Department of Transportation & Public Facilities as Director of Research. Handled the administration of the Department's research staff. Areas included advanced transportation systems, permafrost engineering related to transportation systems, building and engineering systems.

1977 - 1978: Employed by the Department of Transportation & Public Facilities as State Maintenance Engineer. Establised policy for the maintenance of the States roadways by the various regions. Compiled the Department's statewide M & O budget.

1974 - 1977: Employed by the Department of Transportation & Public Facilities as the Central District Maintenance Engineer.

1972 - 1974: Employed by the Department of Transportation & Public Facilities as the Central District LSR&T Engineer.

1970 - 1972: Employed by the Department of Transportation & Public Facilities as the Central Region Design Engineer.

1967 - 1970: Employed by the Pearl Harbor Naval Shipyard as a General Engineer, GS-11. Was head of the scientific computer section for the shipyard.

EDUCATION

Bradley University. School of Engineering, Peoria, Illinois. Earned a Bachelor of Science in Civil Engineering.

University of Hawaii. School of Engineering, Honolulu, Hawaii. Earned a Master of Science in Civil Engineering.

Registered Professional Engineer in the State of Alaska. Registered Land Surveyor in the State of Alaska

Ronald Lind

BACKGROUND INFORMATION

Summary

1980-1983: Deputy Commissioner for Administration and Marine Operations. Responsible for supervision and operation of five major divisions of DOT&PF with an authorized staff of approximately 1200 and an operating budget of approximately $75 million. These divisions are responsible for the operation of the Alaska Marine Highway, State equipment fleet, data processing development and operation, financial services, personnel, supply, payroll and EEO.

1979-1980: Deputy Commissioner for Administration, DOT&PF. Responsible for direction and supervision of the State equipment fleet, financial management, data processin, personnel, supply and general administrative services of the Department of Transportation and Public Facilities. 400 employees and an operating budget of $25 million.

1976-1979: Director of the Division of Budget and Management, Office of the Governor, State of Alaska. Responsible for preparation of operating, capital and supplemental budgets submitted by the Governor to the Legislature. Provided recommendations to the Governor on fiscal impact of legislation and programs proposed to him for approval. Responsible for presentation of budget revisions to the Legislatvie Budget and Audit Committee (an interim committee of the Legislature) to obtain their approval. Reviewed proposed budgetary amendments of State agencies to assure that they were within legal and policy boundaries.

1973-1976: Deputy Director, Division of Budget and Management, Department of Administration. Responsible for providing recommendations to Budget Director for budgetary items from all State agencies. Responsible for coordination of technical aspects fo budget preparation, printing of budget documents and providing computer tapes to Legislative Finance staff. Provided testimony to legislative committees concerning specific programs and coordinated budgetary information with House and Senate finance committee chairmen. Responsible for analysis and review of the Transportation category.

1972-1973: Administrative Officer III, Department of Commerce. Responsible for the supervision and provision of administrative services of the Department of Commerce. Areas included Personnel, supply and financial activities.

1971-1972: Program Budget Analyst IV, Division of Budget and Management, Department of Administration. Responsible for supervision of budget analysts as well as personally responsible for the analysis of the Transportation and General Government categories. Among others, was specifically responsible for the analysis of the Department of Highways and Department of Public Works.

1969-1971: Budget and Management Analyst III, Division of Budget and Management, Department of Administration. Responsible for the review of State agency budget requests. At this time, the division of Budget and Management had only five professional staff memberts fo the evaluation and preparation of the entire State budget; therefore through rotation of assignments, gained knowledge of all State agencies' operations.

EDUCATION

University of Alaska, Fairbanks, Graduated 1966, Cum Laude, Bachelor of Business Administration Degree.

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

OFFICE OF THE COMMISSIONER

POUCH Z
JUNEAU, ALASKA 99811
(TELEX 45 329)

March 8, 1983

Dear Employee:

I want to inform you first-hand of some changes the Department is undergoing to bolster our efficiency in carrying out projects and programs. This entails an improved system of direct responsibility through regional deputy commissioners, each in charge of all of the Department of Transportation and Public Facilities operations, except for the ferry system, for their region. Marine Transportation also will be headed by a deputy commissioner.

Heading regional offices at this time under the new system will be Jon Scribner, as Acting Deputy Commissioner of Southeast region, a move from his post as Deputy Commissioner of Design and Construction; H. "Glen" Glenzer, previously Executive Director of Alaska Construction Industry Advancement Program, as Deputy Commissioner Interior Region; William Snell, who has been a Director of Planning and Programming as Acting Deputy Commissioner for Central Region; and Fred Seeger, formerly a private engineering consultant and construction manager, as Deputy Commissioner for Standards and Statewide Programs.

In other changes, John Bates, who has been Deputy Commissioner for Planning and Programming becomes Director of Planning and Programming, and Ron Lind moves from Deputy Commissioner for Administration to Director of Administrative Policy and Fiscal Management. Marty Nusbaum remains Acting Director of Marine Transportation, pending a permanent deputy commissioner appointment to head the ferry system. Clark Hickey is Coordinator for the Alaska Railroad Transfer Team.

The reorganization is a change of statewide deputy commissioner authority, based on departmental functions, to one of a line organization. The Department through the regional deputy commissioner, can respond decisively to any need in the region, rather than, as in the past, have its power to act fragmented along functional lines.

The only other exception will be planning and programming functions, which will remain on a statewide basis. This unit will not be involved in day-to-day operations, but will formulate the department-wide policies and positions for overall relations with the state agencies and the legislature.

As permanently assigned deputy commissioners proceed on the job, they in turn will make their own assessments of directors and operations. There are several functions in the Department, as regards decentralization, that we need to work through together. Our plan is to initiate task force teams made up of representatives across the Department to develop specific proposals.

I recognize there has been considerable anticipation about possible changes in the Department but the these are in fact only in top management alignment and they impact few employees as to where they are assigned and what they do. I continue to find lots to be proud of, able work and good efforts, and the intent is that these changes will provide more opportunity for lower-level authority and localized team work.

Sincerely,

Daniel A. Casey
Commissioner

Anchorage, Alaska 99503
Phone: 907/276-3868

Home Address:
1901 West 15th Avenue
Anchorage, Alaska 99501
Phone: 907/276-3606

Single 6 feet 2 inches 190 pounds Excellent Health

EDUCATION

1972-74 HARVARD GRADUATE SCHOOL OF BUSINESS ADMINISTRATION Boston, Massachusetts

Received the degree of Master in Business Administration in June, 1974. Degree conferred with High Distinction. Elected Baker Scholar by Faculty. Awarded First Year Honors. General management curriculum, including Urban and Service Operations. Worked with Professor Pifer evaluating financing alternatives for the Trans-Alaska Pipeline and developing a case on the North Slope project.

1964-1972 UNIVERSITY OF CALIFORNIA Berkeley, California

Received Bachelor of Arts degree in Economics, with Political Science minor emphasis in June, 1972. Although at Berkeley only six and one-half semesters, undergraduate schooling was discontinuous for broader work experience prior to selecting graduate curriculum. Freshman Crew Team. R.O. Freshman Leadership Medal. Professorial nomination to Senior Honors Study. Field Project, "High School Aged Mothers and Their Children: A Challenge for Day Care," used later by congressional and legislative investigators and quoted in graduate research. GPA 3.9 during last two years.

1969-1969 UNIVERSITY OF ALASKA College, Alaska

Junior year completed as honor student. Awarded Alaska Businessmen's Association Scholarship. Presidential Representative to Conference on "Development of the Indian Ocean Basin," Annapolis, Maryland.

WORK EXPERIENCE

2 Years MANUFACTURING STRATEGY/MANAGEMENT Connecticut/New York

As Corporate Consultant, developed programs for integrating heretofore autonomous foreign operations. As Manufacturing Team Advisor, served as leading force in formulating organizational strategy for a new plant, including novel compensation and functional responsibility approaches to combat "Blue Collar Blues." Follow-on charge involved supervising startup of first two manufacturing lines.

8 Years PROJECTS MANAGEMENT Anchorage/Cook Inlet/Prudhoe Bay, Alaska

Employed initially as Construction Safety Inspector. Supervised all on-site personnel safety and material quality control for major projects on ARCO offshore platforms. Later, as Construction Superintendent responsible for total systems installations. As ARCO's Administrative and Planning Supervisor, oversaw all cost control, scheduling and contract administration for construction activities at Prudhoe Bay. After progressive technical/management assignments, promoted to North Slope Project Manager responsible for all construction activities for ARCO's Prudhoe Bay facilities. This entails several departments, involving 2,000 people and over $240 million annually.

1 1/4 Years GOVERNMENT RESEARCH/ADMINISTRATION Fairbanks/Juneau, Alaska/Washington, D.C.

Employed as Research Consultant to OEO field team evaluating co-ops as a vehicle for economic development. During 1971 legislature, served as Administrative Assistant for House Commerce and State Affairs Committees. Following this session, retained as Legislative Consultant to develop recommendations for telecommunications legislation and state's strategy. As Consultant to Washington-based consulting firm, developed Alaska telecommunications proposals for federal grant applications.

2 Years FIRE SUPPRESSION Oregon/Alaska

After two seasons as Mounted Wilderness Patrolman, employed as Smokejumper. Mission was quick control of inaccessible fires throughout Northwest, with project fire overhead assignments. Finally, as Line Boss, assumed responsibility for firewide operations on large burns.

PERSONAL BACKGROUND

Have lived in eight states and travelled throughout the United States and neighboring countries. Alaska has claimed most of my time, and through friends, investments and loyalty; my roots are here. Activities and interests include running, insightful reading, investments, skiing, socio-economic policy, tennis and racquetball. Climbed Mt. McKinley. Presented successful arguments before the Alaska Supreme Court reinforcing obligation to advise defendants representing themselves, as well as insuring accurate notice by police officers on citations. Member of Anchorage Chamber of Commerce, Commonwealth North, and the ACLU.

REFERENCES

Personal references available on request. January, 1982

SUPPLEMENT TO RESUME OF DANIEL A. CASEY
WORK EXPERIENCE

LINE EXPERIENCE

3/81-Present ATLANTIC RICHFIELD COMPANY Anchorage/Prudhoe Bay, Alaska

As North Slope Project Manager, Anchorage-based Contract Administration, Accounting, Employee Relations, Labor Relations and Lower '48 based Coordinators were added to my responsibilities. The organization subsequently tripled again with the total Project growing to 2000 people and over $250 million annually. As the largest spending unit for ARCO in Alaska and the largest construction employer in the state, added emphasis was placed on labor relations strategy, contracting strategy, including the involvement of the Native Regional Corporations, incentives for contractors' affirmative action, and community/government relations.

5/79-2/81 ATLANTIC RICHFIELD COMPANY Anchorage/Prudhoe Bay, Alaska

Promoted to North Slope Construction Manager responsible for all aspects of the company's construction activities at Prudhoe Bay. During this time organizational build-up (three-fold) was a major undertaking. Four departments were set up encompassing field construction, administration and planning, quality assurance and safety, and construction support. Warehouses, equipment fleets, camps, EDP systems, policies and procedures were implemented as the construction program grew to require 1200 people at $100 million annually.

6/77-4/79 ATLANTIC RICHFIELD COMPANY Prudhoe Bay, Alaska

As Senior Facility Engineer, supervised a team of engineers and contractors handling one-half of ARCO's field construction activities at Prudhoe Bay. This responsibility encompassed all technical disciplines for process facilities, (including the world's largest gas compression plant) pipelines and civil construction.

9/74-1/76 CUMMINS ENGINE COMPANY, INC. Jamestown, New York

Employed as Manufacturing Team Advisor. Worked with top plant management in developing organizational plans, involving "Plants within a plant" and "Job Enrichment" approaches, for a new, one million square-foot, diesel components manufacturing facility. Supervised debug of new equipment for first two lines, including multiple station transfer machine-tools using minicomputer controllers. Responsible for hiring and training first two manufacturing teams. Developed and obtained top management approval of the application of a system of computer controlled industrial robots and automated conveyance which was a precedent-setting first for the machining industry. These organizational plans, machines and teams are successfully intact today.

6/70-9/72 V. E. CONSTRUCTION, INC. Kenai, Alaska

Employed as Construction Foreman, and subsequently Superintendent. Responsible for new system installations on ARCO oil platforms in the Cook Inlet. Also represented firm in making contract proposals to primary producers. Supervised crew assignments, on-board equipment arrivals, material procurement, on-site changes and startup tests to yield least cost, quality performance without compromising platform personnel safety. (Interim leaves for school and government assignments totaled ten months.)

7/69-2/70 WAGELY CONSTRUCTION INC. (McDERMOTT SUBSIDIARY) Anchorage, Alaska

Employed as Construction Safety Inspector supervising all on-site personnel safety for multimillion dollar projects on ARCO oil platforms. Responsibility included insuring proper use of protective gear, hot work clearance, approval of system tie-ins, and material quality control (ASTM specs and component-system design compatibility).

6/69-7/69 UNITED STATES FOREST SERVICE Anchorage, Alaska

Although scheduled to begin preceding job, employed as Fire Line Boss. Assumed emergency responsibility for firewide strategic planning on several thousand-acre burn. Charge included over three hundred fire fighters from throughout Northwest with numerous tankers, bulldozers, helicopters and transport vehicles.

4/68-9/68 BUREAU OF LAND MANAGEMENT Fairbanks, Alaska

Employed as Smokejumper providing swift attack on new fires throughout Alaska. Assumed major overhead positions on project fires (as illustrated in preceding job description). Assisted in air cargo and loft operations when not deployed.

WORK EXPERIENCE
(Continued)

6/67-4/68 UNITED STATES FOREST SERVICE Cave Junction, Oregon

Employed as Smokejumper. Upon successful completion of jump training, mission was quick control of inaccessible fires throughout Northwest. Winter work included jumps for emergency helispot construction, qualifying for FAA Senior Rigger License and experimental jumps to test new equipment.

6/66-1/67 UNITED STATES FOREST SERVICE Platina, California

Employed as Mounted Wilderness Patrolman. Given an assistant, government vehicles, horses and mules, responsible for fire prevention and game regulation programs affecting visitors to the Yolla-Bolly Wild Area. Also provided logistical support to forest service crews in the back country.

STAFF EXPERIENCE

2/76-5/77 ATLANTIC RICHFIELD COMPANY Prudhoe Bay, Alaska

Employed as Administrative and Planning Supervisor. Responsible for all aspects of cost control, construction planning, contract compliance, document control, accounting, and administrative procedures for the Prudhoe Facilities Project Group at Prudhoe Bay. Directly, or through those managers and senior professional people reporting to me, supervise a staff of 15-40, depending on the level of construction activities. Total project was $1.7 billion.

6/73-9/73 BEROL CORPORATION, INC. Danbury, Connecticut

Employed as Corporate Consultant. Assignment was initiating programs to better integrate marketing and manufacturing operations of heretofore autonomous subsidiaries. Completed firm's first set of international product line displays and data comparisons, proposals for enhancing intercountry marketing and product standardization and a cost/benefit analysis of interaffiliate production mold exchanges.

12/72-3/73 ARTIC ENTERPRISES, INC. Washington, D.C.

Employed as part-time Consultant while at Harvard. Developed proposal suggestions on Alaskan Federation of Natives Application for National Science Foundation Sponsorship of ETV experiment in Bethel, using satellite carry. Assisted in analysis of TELSAT, Canada's Northwest Territories programming application to Alaska.

5/71-8/71 LEGISLATIVE AFFAIRS AGENCY Juneau/Washington D.C.

Employed as Legislative Consultant to develop recommendations for telecommunications legislation in Alaska. Worked with House Speaker, Finance Committee Chairman and State officials on budgetary programs. Represented legislative thinking to those involved in FCC hearings on domestic satellite certification (i.e., Alaskan Congressional Delegation, COMSAT, Fairchild Corporation, HEW, Lockheed, President's Office of Telecommunications, RCA, etc.).

1/71-5/71 ALASKA STATE LEGISLATURE Juneau, Alaska

Employed as Administrative Assistant to the House Commerce and House State Affairs Committee. Given unique dual assignment by the Speaker: Responsibility was smooth functioning of each committee while advising both Chairmen on their personal legislative programs. Either directly or through my staff, exemplary function included arranging for appropriate witnesses and briefs; drafting bills, amendments and press releases; speech and letter writing; and sounding out lobbyists, officials and constituents impacted by bills under consideration.

5/69-6/69 INSTITUTE OF SOCIO-ECONOMIC RESEARCH College, Alaska

Employed as Research Consultant, evaluating central management and finances of Native Fishing Cooperatives in western Alaska. This report provided background for an OEO field team evaluating co-ops as a vehicle for development.

COMMENT For each job held, there exists a standing invitation to return.

Alaska State Legislature

House of Representatives

Rep. Bette Cato, Chairman

Committee on Transportation

MEMORANDUM

TO : Dan Casey, Commissioner
Department of Transportation and
Public Facilities

FROM : Rep. Bette Cato, Chairman
House Transportation Committee

DATE : March 7, 1983

RE : Committee Briefing Meetings

In anticipation of your visit to the House Transportation Committee next week, I have put together some general topics that we would like to discuss. At this writing, I am unsure of your schedule as to which day(s) you will be attending the meetings.

The committee had a general discussion of issues in our meeting. Transportation issues are foremost in the minds of many Alaskan's and the committee feels the need to become informed and address these issues.

This list of issues and concerns covers almost all phases and modes of transportation. We would like you to address these discussion questions and it has been strongly requested by the committee that as much visual aid as possible be used in making your presentation, i.e. maps of proposed roads and facilities, etc.

-We have been led to expect a change in the philosophy and in organization of the Department of Transportation and Public Facilities from the previous administration. Is this true and in what ways will it be different?

-What is your policy, as Commissioner, and that of the Governor, on surface transportation on new and existing infrastructure, such as: Alaska Highway, other state highways.

-In regards to Capital Improvement Projects, what are the plans of DOT/PF for new and existing projects; i.e. major international airports, rural airports, strips? Would you describe the system you use to put together the CIP

proposal? What are the priorities? Who determines the priorities?

-What improvements have been made or will be made to the Alaska Marine Highway System? What is the ferry maintenance plan for the ferries? What are the completion dates? What is the overall plan for the next 6 years for new and existing dock and port facilities; river transportation?

-What priority does maintenance have in DOT/PF? What is the status of maintenance on new and existing roads? Are you keeping up with the State of the art? What is the feasibility of contracting maintenance?

-How do you plan to develop a regional organization structure to improve the efficiency of administering the CIP within the region?

-Do you plan to increase, decrease or maintain the present level of department-wide personnel? How will you make DOT more responsive to local entities?

-How do you plan to improve dialogue with the Legislature to notify them of funding problems or other technical problems on approved CIP's?

Do you plan to continue the Local Service Roads and Trails program?

In addition to the above "discussion" questions, the committee has requested the following questions be answered with a written response:

1) Do you have established procedures for review and control of incumbrances and related expenditures in the capital projects area in accordance with the State Administrative Manual? Is a copy of these procedures available? Who is responsible for assuring they are being followed?

2) "What" type of monitoring and "who" monitors departmental expenditure controls and budgets to prevent overexpenditures? (travel and other)

3) Are specific and distinct appropriations commingled or combined for reporting purposes on the Management Information System? What on the MIS differentiates between allocations, appropriations or bonded projects? How are theses handled by the Department?

4) How do you plan to improve budgetary and expenditure controls over Reimbursable Service Agreement projects?

5) How do you plan to improve flow of data to Legislators (existing project status, funding levels of projects,

expenditures to date, etc.) and also how do you intend to provide estimates for future Capital Project appropriations? Does DOTPF reduce program appropriations when program revenues fall short and request supplemental appropriations? Or are funds transferred from the accounts to make up the shortfall? How is this handled? Who makes the determination of shortfall or overexpenditure?

6) Do you maintain perpetual inventory systems that provide accurate accountability of departmental assets?

7) What determining factors are used to justify transfer of expenditures between budget accounts? Transfer between appropriations? What happens to balances in accounts after projects are completed? Are General Fund project authorizations left on DOTPF books after projects are completed for use at a later date? Once a project is closed what is considered a "late" billing? What method is used to allow funds to remain for payment of these bills?

8) Do you obtain legislative approval before expending program receipts? Are expenditures against program receipts approved by the legislature?

9) Is it the procedure of DOTPF to reduce appropriated CIP funds to establish funding for administrative and planning positions that were not approved in DOTPF's operating budget request? If so, are these truly associated projects costs or operations cost?

10) What is your formal budgeting process for CIP planning and overhead cost?

11) What accurate and timely financial information is available on various projects?

12) Do you have a two-year(or two-phase) budget cycle for projects appropriated by the Legislature as additions to the Department's proposed budget?

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

March 25, 1983

MAR 2 [illegible] 1983

The Honorable Bette Cato
Chairman
House Transportation Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Cato:

Thank you for the opportunity to respond in writing to the questions you raised in your March 7 letter. To shorten our reply, numbers were assigned to each paragraph and our response follows in the same sequence.

1) Yes we follow the State Administrative Manual and in addition a copy of the appropriate section of our Financial Management Operations Manual is enclosed for your information.

2) Project Managers and Section Heads are responsible for monitoring expenditure controls and budgets through the review of cost accounting records indicating funds which are expended and their own projection of funds required to complete the work.

3) The control of appropriations and accounting by allocation as contained in legislation is done through the state accounting system and not the Department's current Financial Management System, FMS. Our current FMS provides reporting capability which identifies the project number and the various state accounting codes associated with it, as well as the total funding and expenditures related to the project.

The Management Informations System (MIS) which we are developing will continue to be subsidiary to the state accounting system but its capability to provide information concerning legislative allocations, appropriations, funding sources and interrelationships of projects will be greatly enhanced.

5A-T2LH

4) Individual RSA's are set up in a separate State accounting code and separately controlled. Identification of funding data and related controls will be enhanced by the MIS.

5) We have completed develoment and have entered the operational phase of automated systems called Program Development System (PDS) and Scheduling and Resource Allocation System (SRA) to provide the Department and the Legislature with more timely information. Also a publication entitled "Capital Budget Project Status" is enclosed.

Estimates for future capital project appropriations will be developed during the Capital Improvements Program process or via fiscal notes. When funds are not adequate to complete a project, continguency funds are used if available. If those funds are not available, then other projects in the allocation are reviewed for possible transfer. If funds are not available, and the scope of the project cannot be reduced, a supplemental is requested to complete the project.

Funds transferred between projects are handled in accordance with statutory procedures.

6) Perpetual inventory is maintained for accountable property and items of a sensitive nature, such as guns, ticket validators, museum items and licensed communication equipment.

7) Transfer between budget accounts are evaluated for their impact on each activity. Budgets are estimates made some time in advance, and there is a need as well as an expectation that changes will be required. Managers are expected to make these adjustments to provide the highest priority service. Each condition requires a separate evaluation. Transfers between appropriations may only be made by a bill which is enacted into law and, therefore, is also evaluated by the legislature.

Project balance are "left on the books" if there is an expectation that they will be needed to complete other projects in the same allocation. A project is then closed so that new activities may not be started, however, the funds are not immediately lapsed. A late billing, if received after closure but before lapse, would be paid by "reopening" the project record to allow payment. If the funds had been lapsed, the billing could only be paid from a contingency source or held and submitted to the legislature for a supplemental appropriation.

8) Our procedure is to obtain legislative approval before spending program receipts.

9) The Department does not reduce CIP funds to establish funding for administrative and planning positions. Since FY83, all planning and administration positions are listed in the operating budget.

10) All CIP planning and overhead costs are shown in the operating budget request.

11) We have monthly full cost reports; however, there is a four to six week delay in the personnel and equipment information due to processing and printing time. This should be corrected when the FMS becomes operational.

12) Once funded and approved, legislative add-ons are handled in the same manner as projects developed by the Department. There are no special two year budget cycles for those projects. Projects that we do not have Preliminary Engineering or right of way for, usually take two years to complete. For projects that are scoped and have cost estimates with adequate data, through Public Facilities Planning Fund funding or advance project definition funding, the Department uses a one year cycle.

During the coming months, you can expect to see improvements made in several of the areas of concern.

Sincerely,

Fred J. Seeger
Deputy Commissioner

FJS/WW/ag

CHAPTER: Accounts Payable

SUBJECT: CIP Project Contract Payments & Encumbrances

EFFECTIVE: February 1, 1982

UNIT: Regional Accounting Units

PURPOSE:

To establish a standard procedure for the payment and encumbering of CIP contracts.

POLICY:

The CIP Project Authorization Balances (R01-TBR-1615) will be referred to when preparing all CIP project contract payments and encumbrances.

PROCEDURE:

The instructions for preparing a payment or encumbrance on a CIP project contract are:

1. The payment clerk must verify that the collocation code where payment of encumbrances is requested is on the Outstanding Encumbrance Analysis under that project.

2. The payment clerk will check the project number in the R01-TBR-1615 (1615) to verify that sufficient funds are available in the project collocation code being encumbered, and the project net balance is sufficient to pay the bill or encumber the cost.

3. If the funding and collocation code do not agree, or if funding is not available, the clerk will inform the Accounts Payable Supervisor.

The Accounts Payable Supervisor will do the following:

1. Contact Budget & Analysis to determine if funding is available and in process of being input into FMS. Also determine what collocation code the funding is being recorded into in FMS.

2. Notify person who requested payment or encumbrance of funding of the collocation code problem.

3. Notify Planning & Programming of any project funding problem that cannot be solved by Budget & Analysis.

If supervisor is unable to solve the problem, the Accounting Supervisor and Regional Administrative Officer are to be notified and will take whatever action is necessary to bring the problem to a conclusion.

Project funding must be available in the 1615, or a PDA to establish the funding must have been received before bills are paid or contracts encumbered.

If the payment and/or encumbrance passes the manual edits, the documents can be prepared and processed. If the payment is against an encumbrance consult the latest Outstanding Encumbrance Analysis, use either a 371 or 381 transaction code and hand code the collocation code on to the document.

Any final payment against an encumbrance should use a 381 transaction code, though since this will liquidate the entire encumbrance, supervisory approval must be sought before this transaction code may be used.

HOUSE TRANSPORTATION
STANDING COMMITTEE
March 9, 1983

ACTION NARRATIVE

TAPE #22
Recording
Number 0003 Chairman Cato called the meeting to order at 8:35 a.m. Staff present were Rhonda Cargill and Steve Soenksen. The purpose of this meeting was to talk with Commissioner Casey as to what his plans and programs are for the department and to give the committee a chance to ask various questions.

Number 0041 Commissioner Casey began his presentation by

explaining he had just returned from Fairbanks where he made an announcement of his appointments and to describe his shift from a functional organization to the line management organization. This change includes the establishment of three regions with headquarters in Fairbanks, Juneau and Anchorage, as well as a stand alone organization in the marine highway system and a headquarter's organization titled Standard and Statewide Programs. He gave further explanation of the above.

Each region will have a Deputy Commissioner who will have resources reporting to them in regions that execute the program. These appointees include: Glenn Glenzer-Interior; Riley Snell, Acting Deputy Commissioner for Anchorage; John Scribner, Acting Deputy Commissioner, Southeast Region.

Number 0112 — Rep. Phillips requested resumes and re-organization plans in writing in save some time.

Number 0124 — Commissioner Casey agreed and finished with information that a Deputy Commissioner for the ferry system has not been appointed but Marty Nusbaum is Acting Director; Fred Seger is Deputy Commissioner for Statewide Standards Programs. John Bates is Director of Planning and Program within the Standards and Statewide Programs; Ron Lind is Director of Administrative Services within the Standard and Statewide Program.

All Directors are acting until the Deputy Commissioners have been put in place and have had the chance to work with the Directors and they will have the latitude to make a decision.

In terms of a change in philosophy; the change from an organizational management to a line organization structure is reflective of personal style preference and feels that the Deputy Director level will provide for better teamwork and coordination of functions at local levels; explanation of reorganization plans.

One change Commissioner Casey pointed out is the moving of bid openings to local regions rather than in Juneau; try to get in place

prior to summer construction programs.

Questions and discussion on procedures for bid openings.

Commissioner Casey continued that he would like to see more emphasis on project control and cost accounting; the department realizes they have a long way to go. Needs more visibility on regular reporting basis on distinction between engineer estimates and actual bids received; then can highlight the differences and focus attention on improvement.

Will apply the concept of the learning curve to project improvements or problems for projects in order to be more effective.

In regards to cost accounting in relationship to maintenance and operation; maintenance and operation had been funded at maintenance level or continuation level. He has grave concern of "deferred maintenance". He feels there are techniques which can be applied to get a handle on what those maintenance liabilities are; ought to be able to catalogue the capital stock of transportation facilities and public facilities...to compute the total budget of what maintenance should be. One of the challenges the department has is, exactly where does the department stand on maintenance liabilities as compared to traditional maintenance levels; to get a better judgement on development of the budget.

Number 0336

Rep. Abood asked if Commissioner Casey has any plans for replacement of equipment for road work or if he will contract it out to private industry. Also interested in the type of equipment which can be used for interchange...to become more efficient in equipment problems.

Number 0358

Commissioner Casey replied that they do charge equipment at hourly rate (or milely rate) to cover maintenance cost as well as replacement cost. This year's operating budget reflects a decrease to cover maintenance cost and depreciation of equipment.

As a matter of philosophy, we should position users to have increased flexibility to make their own trade-offs between cost to use the state equipment fleet and cost to use private sector provided equipment. Commissioner further explained cost effectiveness of equipment.

Number 0418 — Chairman Cato asked if Commissioner Casey will continue his low bid equipment procedure, whether equipment fits the situation or not?

Number 0430 — Commissioner Casey explained that where you have a defined scope, low bid is the best way to go. The problem you may have with the equipment not doing the job, may not have defined specifications for equipment provisions; then have to make sure low bidder is meeting specifications.

There has been frustration relative to control and selectability of equipment. Within the re-organization, have decentralized responsibility of equipment within the regions. There needs to be statewide procedures and policies and accounting, which will attempt to give more authority over equipment fleet at lower level so those people can budget to do the work within the budget - alot of trade-offs. Create environment of delegation and accountability; area manager responsible for maintenance of road system within the budget.

Number 0468 — Rep. Phillips asked if the $85 million the administration has projected is for the three regions.

Number 0472 — Commissioner Casey replied yes; the type of projects would merit conclusion in capital budget as opposed to part of maintenance and operation.

Number 0480 — Rep. Phillips asked what projects are in the $85 million.

Commissioner Casey referred to John Bates who then listed the various projects which would cover all major highways in the State.

Number 0499 — Rep. Phillips asked how they do research? Who are you dealing with as far as research?

Number 0508	Commissioner Casey said that the research division works at the U of A campus. He went into further detail explaining about the research division and John Bates added to the types of research which has and is being done. Further discussion and questions by the committee.
Number 0652	Rep. M. Miller requested a listing of equipment in different regions. Discussion of equipment and inventory.
Number 0702	Commissioner Casey ended with voicing his concerns with the equipment and accountability and realized there are legitimate concerns which DOT should be able to have control over and that needs to be addressed.
Number 0719	Meeting was adjourned.

Recording
Number 0003

Chairman Cato called the meeting to order at 8:33 a.m., and indicated the members present. Staff members present were Rhonda Cargill and Steve Soenksen. Chairman Cato requested Commissioner Casey to go through the DOT news release which tells of his appointees as she noticed quite a few

individuals have remained.

Number 0034 — Commissioner Casey asked to defer the question as the members' copies didn't appear to have the organizational chart which should have been attached. Commissioner Casey continued on with an explanation of the policy development regarding surface transportation. He explained the dramatic shift of $85 million in the capital budget and the development of a policy and cost...surface maintenance of state inventory. DOT is working on an inventory of road systems and has a good handle on the amount of years a road will last between refurbishing; department needs the inventory of these life cycles and test the budgeting to maintain inventory stock.

Discussion of inventory of roads.

Number 0158 — Rep. Herrmann asked about plans for rural Alaska refurbishing.

Number 0164 — John Bates answered that in this budget road systems in rural areas were not in the plan for refurbishing; but rural airports were.

Discussion of refurbishing roads - techniques, gravel and paving - effectiveness.

Number 0214 — Discussion of making trade-offs and questions of existing capital stock and new facilities. Commissioner Casey pointed out that through needs assessments over $6 billion of needs have been identified.

Commissioner Casey; what isn't known is on annual basis how much should the administration spend? Don't know where the breaking point should be - directionally concerned with maintenance.

Number 0290 — Rep. Davis asked if they knew how long it will take to know how much to take.

Number 0295 — Commissioner Casey felt alot of background has been put together and alot of history can be pulled out, its a matter of pulling it together before the 1985 budget process. Commissioner Casey continued to give explanation on what should be spent out of the operating budget on maintenance; the

volume has grown but the budget has been kept at a continuation level. He also gave policy for new and existing infrastructure, trade-offs and examples of projects and reason for road access and dock facilities.

Commissioner Casey said they are wrestling with the "authority" concept. Authorities were originally envisioned as optimism match that revenues will meet their cost - they are stand alone; viewed with public sector domain...explanation of policy view on authorities.

Number 0453 — Rep. Phillips showed interest in the planning process and explained that presently the delegates had to try to initiate planning and design and he feels this is DOT's responsibility.

Number 0470 — Commissioner Casey was in agreement and explained that in port it is happening; but it's not being done sufficiently. The Commissioner gave an example of recent meeting with Kenai Peninsula delegation where the people are marching together.

Continuation on discussion of planning process.

Number 0565 — Chairman Cato asked about the department's priority list.

Number 0570 — Commissioner Casey explained the problems of prioritization and the introduction of using a rating sheet for each project, its the beginning of an effort to recommend priorities on basis all can agree to. He feels one problem both the Administration and Legislature has is to educate the public of the gap between "needs" and "money available". Once the public is appreciative of the gap, then they can do battle with merits and try to reach an agreement.

Discussion on public understanding of gap, on percentage of money spent on planning as opposed to construction and what it takes to get a project done.

Number 0766 — Brief discussion on what is done with money not in use, (invested by Department of Revenue).

Number 0793	Brief discussion on gag rule, more delegation of responsibilities within the department.
Number 0835	The meeting was adjourned.

ACTION NARRATIVE

TAPE#26, Side 2

Recording Number 0003	Chairman Cato called the meeting to order and indicated all the members present. The purpose of the meeting was to talk with Commissioner Casey on the reorganization of the department and questions of the Marine Highway System.
Number 0050	Rep. Phillips requested visual aid for the Governor's budget on roads, airstrips, ports, docks and etc., and get down to the Administration's plan for the next four years.
Number 0075	Chairman Cato; referring to the memo - have not received written response to the questions we posed.
Number 0086	Rep. Abood; (February 3, 1983), December 1981 - Capital Improvement Projects - status projects; noted there were allocations made for project - fund sourcing - total of $5-9 million for Sand Point dock, but its not in the book.
Number 0114	Mr. Scribner said the reason the Sand Point project is not in the book is because its a completed project.
Number 0131	Mr. Scribner said it took all the money, plus there was a design error, and so the Legislature last year funded additional funds for the project. They went back to the designer who made up the money on error; the money goes back to the state.
Number 0152	Rep. Abood requested a breakdown on monies given and recuperated on Sand Point project.

Further discussion on funding of Sand Point project and old ports and harbor bond issues; enabling legislations.

Number 0292 — Rep. Abood; Capital Improvement Project status project system is provided for the Legislature? Is this report compiled from data by the department? Is it used for anything other than for Legislature?

Number 0299 — Mr. Bates stated it actually wasn't developed as main function of reporting to the Legislature. It was developed to keep the people above the project manager informed of the capital project status, its a quick and easy reference. It started two years ago in the House as a tool to keep track of capital projects because the existing accounting system was not oriented to keep track of capital project system; actually stored in computer in Texas contracted with Boeing. Developed a new Management Information System which takes over project status system and puts on state computer. It started 2 1/2 months ago and still debugging the program; its a major effort; installing capability to have regional office input on active basis. Inter-active type data with Texas, it can get information from terminal once the data is converted from the old system.

Further discussion on new data system and access to reports, it should be on screens for next session.

Number 0396 — Rep. Abood said one or two years ago the Legislature came up with over $900 million in balance of total Capital Improvement Projects - what happened to the balance?

Number 0406 — Mr. Scribner; have a breakdown of what the Legislature authorized - actual contract awards - $900 million; looked like $500 million did not get out; in between showed $1.1 billion; cash available got out $900 million; $1.1 billion and $1.4 billion authorized; backlog of $200 million - backlog of one year of projects. Mr. Scribner continued to explain breakdown of funds, including federal funds and what happened there and (over program funds).

Discussion of response to memo written by

committee to Commissioner Casey.

Number 0483 — Rep. Abood said will the report show balance of Capital Improvement Projects?

Number 0490 — Mr. Scribner gave a summary of the balance.

Number 0503 — Rep. Phillips; seems you don't know where committee is coming from on direction of committee in relationship to DOT.

Number 0521 — Rep. Abood; do you understand the committee's problem with DOT?

Number 0526 — Mr. Scribner; we see problems from different points of view and trying to communicate.

Discussion by committee of communication between the department and committee; committee's purpose as oversight committee for DOT.

Number 0661 — Chairman Cato; plans to make reason out of chaos on the marine highway system.

Number 0666 — Commissioner Casey; do not sense attitudinal problem but workable problem and lack of understanding. Takes re-organization to operation while Legislature is in session. Commissioner Casey's presentation of problem and solution to communication with the Legislature.

Number 0719 — Rep. Phillips; is there one person to contact to get answers on a variety of problems?

Number 0756 — Commissioner Casey; don't have ready answers but do agree should give you answers minus a number of transfers.

Number 0791 — Commissioner Casey gave explanation of reorganization plan referring to the organizational chart. He explained the role of the Deputy Commissioners as having responsibility for execution in his regional area; the purpose of the standards and statewide programs division and if a policy is unique to a division or region. He used the Marine Highway System as an example - pointed out the problems and reasons for the problems and the steps to be taken for solutions. He also explained the importance of the visibility of management level and

giving more attention to the system.

Commissioner Casey also explained the concept of "authorities" and where he feels the difference of opinion lies between Chairman Cato and DOT on establishing a Marine Highway Authority.

He asked the patience or indulgence of the committee on the Marine Highway System for him to bring "quality" to the system.

Number 0931

Chairman Cato adjourned the meeting.

MAR 23 1983

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

OFFICE OF THE COMMISSIONER

POUCH Z
JUNEAU, ALASKA 99811
(TELEX 45-328)

March 18, 1983

Representative Al Adams, Chairman
House Finance Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Legislators:

The Governor's FY '83 Capital Improvement Projects supplementary request (SB 162) includes provision for funding allocations to cover both State executed programs as well as grants. Recognizing this change in approach for DOT&PF from the past several years, I would like to provide some accompaning commitments on my part and this Administration's part.

Allocations for Department-executed projects are important in recognition of inadequacies inherent in the estimating process that occur at the early stages in a project's evolution. On the other hand, I empathize with the frustration on the part of the Legislature and the Public where in the past some projects, approved on an allocation basis, were subsequently shelved because of agency desires to expend monies for differing projects or to spend more money on one project than anticipated to the detriment of another project. Not only is legislative intent undetermined in the latter case with regard to which projects should be undertaken, but also, within a reasonable range of dollars, the legislative intent with regard to even authorizing a project based on the Legislature's and Governor's comparison of merits relative to anticipated cost. To notably increase the amount of money spent on a given project is to undermine the decision making process. Consequently, the Legislature and the Governor may not have approved that project had they known it was going to involve significantly higher cost. Therefore, I pledge the following policy for the Department of Transportation and Public Facilities:

> EVERY PROJECT WILL BE EXECUTED AS LONG AS THE SCOPE CAN BE COMPLETED WITHIN THE DOLLARS SET FORTH IN THE FUNDING BILL APPROVED BY THE LEGISLATURE AND SIGNED BY THE GOVERNOR. THIS WILL BE THE CASE EVENTHOUGH THE MONIES ARE APPROVED ON AN ALLOCATION BASIS. IN ADDITION, ANY PROJECT WHERE IT IS ANTICIPATED THAT THE COST WILL EXCEED THE CORRESPONDING LISTED AMOUNT IN THE BUDGET BY MORE THAN 20% WILL BE TERMINATED UNTIL SUCH TIME AS LEGISLATIVE APPROVAL IS OBTAINED TO PROCEED AT THE REVISED HIGHER COST ESTIMATE.

The above approach will accommodate a reasonable estimating range wherein projects may be completed for somewhat more cost than anticipated at the time the original budget estimate was developed. At the same time, if the costs exceed that budget estimate by a certain amount (as determined by the percentage) the Legislature has an opportunity to review whether or not the anticipated benefits still are meritorious in light of the additional cost. In the absence of allocation flexibility, however, we lose the ability to proceed with projects involving nominal estimating variances until the reconvening of the Legislature.

SA-T1LH

As many of you recognize, this trade off between cost control through the line item appropriation and execution flexibility through allocation has been, in the past, presented in extremes that have prevented the advantages of both. I am hoping that the approach contained herein will provide an optimal balance. I might add that similar flexibility is a common practice for construction projects within the private sector.

The administration of grants through the Department is also an area in the past that has been of concern. Once concern involves experiences where overhead charges appeared to be unreasonable coupled with the untimeliness of funding transmittals to local municipalities, etc. In addition, the Department was not charged with reviewing grants and sponsoring grant programs in parallel with those program that it was to execute directly. We have implemented several changes in the last year and most recently in the last few months in this regard. First, overhead costs for grants and Transfer of Responsibility Agreements (TORAs) are now statutorily funded through the Department's Operating Budget and thereby are not charged to specific projects. In addition, through the Municipal Grant Laws Procedure, if a grant is designated as such under the Department of Transportation and Public Facilities heading within a funding bill, the Department has the responsibility to execute the grant within the same statutory and regulatory guidelines as the Department of Administration. Accordingly, we make the following commitments as already supported by statute and regulation:

> THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES WILL EXPEDITE THE DISBURSEMENT OF GRANT MONIES TO THE DESIGNATED RECIPIENT AS HAS BEEN HANDLED IN THE RECENT PAST BY THE DEPARTMENT OF ADMINISTRATION AND WILL NOT WITHHOLD ANY PORTION OF THOSE GRANT MONIES FOR ANY STATE COST.

The advantages of the above approach are similar to the allocation and overrun limit policy previously described. A combination of the expedited fund flows for grants as was sought through the Department of Administration intially and retaining a linkage to DOT&PF to work with the communities in reviewing grant proposals, validating estimated accuracies and supporting planning and engineering integration prior to budget submittal is desireable. In short, we propose to put the Department of Transportation and Public Facilities on a similar footing as the Department of Environmental Conservation and the Department of Education, to name a few, where we close the loop within the same department and still insure cooperative relations with communities.

As suggested by Senate Finance Subcommittee members, we fully support the addition of a grant notation opposite those projects so intended. With that designation you can be assured that the Department of Transportation and Public Facilities will proceed with all vigor as set forth above.

Sincerely,

Daniel A. Casey
Commissioner

Re: Letter to Representative Al Adams dated March 18, 1983

Dear Commissioner Casey:

Thank you for the copy of your letter to Representative Adams regarding the FY '83 Capital Improvements Projects supplementary request (SB 162). I would like to make some general comments regarding the policies set forth in this letter.

It is refreshing to see commitments made by the Department on handling of funding allocations and on Municipal grants. As has been stated before, some of the frustration with DOT/PF has been the lack of written procedures and guidelines.

On your first Pledge, perhaps you could consider the following:

1) I have seen several instances where projects are halted because the engineer's estimate (apparently "in-house" estimates) were higher than the appropriation amount. Often, after bid proposals are submitted by prospective contractors, a figure lower than the engineer's estimate occurs. As stated in your letter, "inadequacies in the estimating process" often occur. The 20% "test" is probably a good one and I recognize that a line has to be drawn somewhere. 2) Please consider adding to this pledge, or at least in practice, provide for notification of legislators representing the districts in the event of a short-fall or possibly the legislative budget and audit committee. We in the legislature usually are not aware of projects being short-funded until a)several years after the appropriation and realization of a short-fall or b)we find that funds have

been transferred to another project; another very sore spot with many legislators.

Last year the entire Ports and Harbors contingency ($4 million) was placed into one project, namely, the La Touche Harbor Project. In my opinion, the monies for the original appropriation of $3 million, an additional $500,000 could have been better spent in Prince William Sound Harbor Projects. To have the Department place a contingency fund completely into one such controversial and in the view of many, "a capital project that serves mainly private landowners interest is inappropriate. (My information is that this project is currently still underfunded as estimates for completion are $8,700,000 for the harbor alone not including any inner harbor facilities, also who is responsible for police-fire and maintenance).

It is hard for me to consider any allocation when this type of activity occurs. I do not wish to belabor the point but this track record of project funds by DOT/PF with funds controlled by the planning Division must be curtailed if the reputation of DOT/PF is to be improved.

I hope you will consider these as constructive comments and again wish to say that I am encouraged by the developments in DOT/PF to date.

Sincerely,

Bette Cato

Bette Cato, Chairman
House Transportation Committee

MEMORANDUM

State of Alaska

Department of Transportation & Public Facilities

TO: The Honorable Bette Cato, Chairman
House Transportation Commission
Alaska State Legislature

DATE: April 11, 1983

FILE NO: 000H

APR 14 1983

TELEPHONE NO: 465-3900

FROM: Daniel A. Casey, Commissioner
Department of Transportation
and Public Facilities

SUBJECT: Your letter of March 28 concerning my approach to capital projects accountability

I appreciate your gracious and positively toned memo in response to my letter to Representative Adams dated March 18. I wholeheartedly endorse your perspective on the subject. It sounds like we are very much together. I concur with your concerns when an engineer's estimate may be somewhat high. In those instances, we should not prematurely back off from proceeding with the project if there is a reasonable chance that we may receive a bona fide bid at a sufficiently lower amount to enable us to complete the project within the funds available. As you point out, the 20% flexibility does allow us room to maneuver and we rarely find, where we consistently miss the mark, greater than that amount of error.

In addition, when engineer's estimates are close to funds available you can, in good faith, ask for contractors to submit bids, if there is a reasonable likelihood of proceeding with the work. We do not want to misuse good will capriciously due to frequent cancellation of bids for lack of funds. The quality of the contractor's bid work, otherwise, will begin to deteriorate. I think we can watch, in a better fashion, the gaps that occur between engineer's estimate and bids and develop trend lines. This tends to go in a cycle. Frequently, on the economic upswing, bids are found to be slightly high. By the time estimators adjust their assumptions, we are often in a downswing and find bids coming in at a lower amount than the engineer's estimate. In fact, as you might have intended between the lines of your comments, we are currently in the situation where frequently bids are under engineers' estimate. This is in sharp contrast to just a year ago.

With reference to your recommendation that I pledge to notify legislators representing the affected districts or the Legislative Budget and Audit Committee in the event of a shortfall, I apologize for not making that clear in my earlier letter. In the spirit of what we are trying to do, your request is a very reasonable one and one we fully intend to pursue. The hope is that we can develop some rapport with an interim committee and, in some instances at least, be able to get their endorsement to proceed in the absence of a full legislative body. I do think we can do a better job of status briefings, not only on exceptions, but on the bulk of ongoing projects. We have instituted a practice of having deputy commissioners from the various regions regularly assemble in Juneau and take an extra day to visit with legislators from their area. We are also developing status reports on projects and plan twice a year to sit down with legislators and discuss projects in their area. We are tentatively planning to do this at the beginning of the legislative session and in the

early summer. We hope this will better equip the legislators in answering questions from their constituents, as well as serve as a conduit in getting there early-on apprisals where we are running into difficulties. I think in this way you would agree, from the comments you have made earlier, that we can improve the team work between the executive branch and the legislature.

I've taken the liberty to copy this letter, as well as the relevant portion of your letter to me, to all the original recipients of my letter of March 18. I think your comments and my response are of general interest and seem to be complementary to what we set out to do.

Again I thank you for your interest and support. The encouraging words we have received from you make us attempt all that much harder to see if we can't continue to make good headway.

Sincerely,

Daniel A. Casey
Commissioner

Attachment

State Senate

MEMORANDUM Date: March 3, 1983

Subject: Questions Concerning DOT/PF Policy/Operations

To: Dan Casey, Commissioner
Department of Transportation and Public Facilities

From: H. Pappy Moss, Chairman
Senate Transportation Committee

(1) DOT/PF has been controversial and was even an election issue.

a) What are your plans to restore public confidence in DOT/PF?

b) I seldom hear anything about cost effectiveness or productivity in DOT/PF. It seems that your answer has always been "more money". What do you plan to do to make the Department more efficient and cost conscious?

c) How do you know if your Department is more efficient this year than last? What are your measures for efficiency and productivity?

(2) How do you feel we can better facilitate a flow of information between our organizations?

(3) The voters of Alaska in the last election clearly indicated they demanded a change. Governor Sheffield assured us there would be. If I remember right, you, yourself, have indicated these major changes would occur:

a) Is your reorganization plan any more than just "inserting another layer of costly overhead without real fundamental changes in the Department?

b) Are you anticipating major personnel changes?

(4) Previous philosophies in the Department have been pretty well reputed. I am speaking of such things as lack of financial accountability, lack of personal accountability and rivalries within the Department.

a) What are your plans to correct these or similar problems?

(5) We have copies of many reports and audits that are not very complimentary of DOT/PF operations. Year after year we have the same problems surface (right of way). It seems that you are constantly being cited by the Feds for the same things.

a) What's the problem? Can't you learn from past experience or is there some control problem within the Department?

b) Can you describe you control system? What does it cover?

(6) Legislative audits have pointed out an inherent inefficiency with your planning process. According to that report, your planning aspect flows through on a project from its inception to its final completion. This creates an additional layer and continued intervention by the planning division which results in additional project costs. In the legislative audit report there were recommendations made which have not been implemented. Why?

(7) DOT/PF is the largest department in the State. Your employees are not only State employees but are also citizens, some in my District. I understand that morale is extremely low.

a) What are your plans to restore morale to these employees of DOT/PF?

b) Has there been any employee involvement in your reorganization plans? Who? What level and how much?

(8) Since you have taken office have you attempted to analyze the level of technical qualifications of the staff you inherited from the previous administration? Do you have a program to train people within the Department?

(9) We hear that there is widespread dissatisfaction with the personnel system within DOT/PF.

a) What can you do or plan to do to restore employee confidence that the so-called merit system works in DOT?

(10) DOT/PF has completed or has currently in progress a number of regional transportation studies. How have the results of these studies been pulled together as one central planning tool? Have the timing of the regional studies and the statewide transportation plan been coordinated?

(11) The Legislature has given the Department practically every dollar you have asked for to implement a Management Information System. You've been at it for several years now.

a) Where is it?

b) Can you now get reports from this department?

c) Can the legislative committees get access to this information?

(12) We used to get reports from the status system -- we can't ever get them now.

a) What happened?

(13) How does one reconcile the CIP project status report (a public document) with the CIP Project Authorization Balance (on internal documents)?

(14) Audit reports seem to indicate a major problem with you financial system. Employees I have talked to have very little confidence in it. Reports are late, inaccurate and full of errors. I am concerned how you can manage a multi-million dollar operation without good financial information.

a) What are you doing to correct this?

b) What is your time schedule for this?

(15) a) Could you describe the system you use to put together the CIP proposal? Some people have described it as a very disorganized process.

b) What are priorities established.

c) Who sets priorities?

d) Do you have a system which takes into account:

-- some recognition of the need to dispense CIP projects more evenly around the State?

-- the political reality of Alaska?

-- areas of high unemployment?

(16) How do you feel legislative add-ons could better fit into the DOT/PF's process?

(17) The present transportation system is rapidly deteriorating. Many states have established a maintenance first priority.

a) What are you thoughts on our deteriorating transportation system?

b) How can we eliminate the practice of deferred maintenance on our highway system?

c) what priority does maintenance have in your department?

d) What evidence can we expect to see of any changes in your maintenance policy?

e) When you develop your projected maintenance cost for the budget how do you arrive at the figure you eventually settle with?

(18) I am concerned that through the use of authority to shift funds from project to project to cover bad estimating, or even a lack of simple financial controls, that you do not have the resources to complete projects already underway. I have heard of projects that, although authorized for funding, when actual construction took place did not have funding available to pay the bills.

a) How wide spread is this?

b) how much additional funding has been committed this way without legislative knowledge or authorization?

c) Is the legislature going to have a continual request for supplementals to cover already funded projects?

d) would it be possible for this committee to get a complete listing of the Department's project responsibility as indicated by legislation, and the status of each?

e) Do you have a backlog of contracts ready to go? If so, why?

MEMORANDUM

Date: March 16, 1983

Subject: Senate Transportation Committee Meeting, March 3, 1983

To: Daniel A. Casey, Commissioner
Department of Transportation and
Public Facilities

From: Senator H. Pappy Moss, Chairman
Senate Transportation Committee

Attached please find a copy of the minutes for the Senate Transportation Meeting held March 3, 1983. I am forwarding a copy of the minutes to you to assist you as you respond to the remaining questions we provided you. As you will note, we have requested a written response within a week or ten days of our meeting. I respectfully request you expedite your response.

ACTION NARRATIVE

800 Chairman Moss called the meeting to order at 1:35, noting that Senators Fahrenkamp, Faiks and Gilman were present. Moss indicated that the purpose of today's meeting was to meet and talk with people in the Department of Transportation and Public Facilities. The Chairman noted that Commissioner Casey was at the witness microphone, and had brought with him a copy of the January, 1983, edition of the Department's Six Year Transportation Improvement Program and the November, 1982, edition of the State Transportation Policy Plan. Moss also indicated that Transportation Committee staff had distributed to all Committee members and to Commissioner Casey a set of questions that would be asked during this meeting, and that Moss would ask for written answers to those questions. The purpose of the this and future meetings, Moss indicated, is to avoid a confrontation and to establish a common direction.

Indicating that the Department of Transportation and Public Facilities (DOT/PF) has been controversial to the point of being an an election issue, Moss asked Commissioner Casey about his plans to restore public confidence in DOT/PF and what plans the Commissioner has for making DOT/PF more efficient this year than last.

Commissioner Casey began his presentation by noting that that the reason the above-mentioned books had been distributed only today was that they had only just been published. Casey cautioned that there have been significant changes in everyone's financial outlook, and that the administration is desirous of shifting emphasis to private dollars rather than State dollars. The Six Year Plan, Casey indicated, allows an appreciation of the projects that have been identified on a needs basis, and, in consideration of permit and design lead times, how those projects might be spaced.

878 In answer to the questions concerning restoring public confidence in the Department, Casey said that the answer is two-fold. First, Casey indicated, the Department needs to do a better job of communicating to the public the good that has been, and continues to be, done very well within the Department. Next, Casey indicated, he will be putting more emphasis on the relative gap between revenues and the cost to run the system. Casey said he was concerned, especially on the maintenance side, that a much better job could be done of portraying what the cost pattern is from year to year and on what the State should be spending. Casey added that altough there has been a tremendous expansion in capital assets in the State over the last few years, maintenance operating funding has only increased at slightly less than the rate of inflation.

060 Chairman Moss asked whether Casey was, as had been rumored, on a two-year leave of absence with Atlantic Richfield. Casey responded that he was pleased to clear up a misconception that Moss and other people appear to have held. While Atlantic Richfield does have a leave of absence program for people who go into public service, Casey indicated, he left that company as though he were going to work for a competitor. He stated that he was not on leave of absence and while he expects a check from Atlantic Richfield in the next few weeks, that money represents a liquidation of stock and Casey's portion of the company's savings program.

122 Senator Fahrenkamp asked how recent changes in the law, which require limited operating budgets, will affect the transportation system, particularly in regard to improving or enlarging the transportation system.

150 Commissioner Casey indicated that he was not too concerned with the spending limit, because, while the spending limit could become an upper restraint on the capacity of the State to expand its capital budget, the revenue capacity of the State could not even reach the spending limit. Some 6.8 billion dollars would be required to meet the State's needs as identified in the Six Year Transportation Improvement Program, spread over a five-year period, while the State's

revenues have gone from 4.2 billion dollars in FY '80/'81 to a projected FY '85 income of 3.2 billion dollars, Casey noted. One of the biggest challenges that we all face as a team, Casey indicated, is the education of the public as to this tremendous gap between the needs assessments within the State, which amount to 20 billion dollars, and the State's projected income. Casey emphasized that while individual constituencies may favor one project or another, we all have to select and prioritize to get from the 20 billion in needs to what we are able to fund in one particular year.

230 Senator Gilman stated that many of the municipalities he represents have indicated they would take over the maintenance of what traditionally have been State roads, if they could get them upgraded through a capital process, so that the municipality would not where they did not have to spend their money to bring the road up to a reasonable standard. Gilman indicated that he supports such arrangements.

277 In response to a question from Senator Gilman, Casey said that DOT/PF does have contracts between the Department and the municipalities that transfers responsibility for signaling systems where the Department finds that, for example, ten years ago the signals that the State mounted, maintained, and coordinated were independent in conjunction with a regional or State crew, but now constitute a smaller portion of a whole grid, due to a municipality which has developed around those signals or roads, and it makes a lot more sense for one entity to handle.

317 Senator Moss asked what impact of the Surface Transportation Assistance Act of 1982 will have on Alaska, what total dollar amount is authorized for Alaska under STAA, what administrative structures have been designed to accept those funds, what Federal limitations exist on the use of this money as they relate to Alaska, how those funds would be dove-tailed into existing money receipts from both the State of Alaska and Federal funds, which Alaskan highways are designated as Interstate Highways, and how much money the State of Alaska receives for these highways from the Federal government.

366 Casey indicated that no organization or procedural changes would be needed in order to accept or administer STAA funds, stating that from DOT/PF's point of view, the major impact in the 5¢ tax increase is an increase in the Federal funds available over DOT/PF traditionally has received. Casey indicated that in 1982, the State received 104 million dollars from the Federal government, administered through the Federal Highway administration and Federal Aid standards, and there are design standards and contract and right of way acquisition standards developed nationally that the State must comply with in the application of those funds.

386 Commissioner Casey indicated that staff had prepared a set of handouts to portray visually for the Committee some of the questions raised, and introduced John Bates, Deputy Commissioner for Planning and Programming.

In response to a question from Senator Moss, Bates stated that the increase in Federal receipts is reflected in the FY '84 budget as a budget amendment, since that Bill did not pass until Christmas, and the budget documents had already been prepared and printed. The amendment has been sent to the Office of Budget and Management within the Governor's office.

405 Responding to a question from Senator Gilman, Bates indicated that the 5¢ increase in Federal gasoline taxes goes into effect on July 1st.

Senator Moss asked why, if the Federal tax on gasoline is increased from four to nine cents, or nearly doubled, the revenue received is not also doubling. In response Bates indicated, that prior to 1982, Bates indicated, the State of Alaska was receiving eight dollars for every one dollar it contributed to the trust fund through the Surface Transportation Act of 1978, as extended to '81 and '82. The other states were objecting very vehemently to this imbalance, and before the passage of the Surface Transportation Act of 1982 there were a lot of propositions around the house and Senate that gave Alaska almost nothing, Bates indicated. The Alaska delegation, in conjunction with the Governor's office in Washington, D. C. and DOT/PF staff, worked for the present six to one ratio. The Bill, Bates further explained, is a four-year bill which provides for the State of Alaska an increase from 140 million in FY 1983 to 169 million in FY 1986.

560 Senator Fahrenkamp indicated that many of the representatives of other States in the Congress of State Legislators were very unhappy with this five cent tax because of all the restrictions put upon the States, and that these representative felt that states were losing rights in the bill.

Bates responded that as far as those things in the bill which decreased states rights, the highway trust fund was already a very regimented pot of money. Traditionally, Bates indicated, if you deal with the Federal Highway Fund, you are used to dealing with rules and regulations and asking HWA what you can and can't do. He indicated that the new STAA had not changed much in that regard. Bates indicated that the new law made some truck size and weight limitations nationally so that the "blocker states" could no longer control the size of trucks going through their interstate system, but that these regulations did not affect Alaska significantly.

675 Commissioner Casey stated that Federal aid is a small portion of the total dollars in the transportation budget within the state. These Federal dollars are also not designated for any particular road systems, Casey indicated, so the Department expends Federal funds on those road systems that, because of the level of use and community needs, would need to be built to Federal design standards, to insure that there are a sufficient amount of road systems that are designed, and qualify for, continuing federal aid in any given year to fully utilize the funds available. Casey said that some states have not been able to fully utilize their funds because either they've not been in design-ready position to take advantage of the funds that have been set aside for that year, or made the error of moving too quickly to use State funds and expedited construction in a single year, resulting in disqualification of that road system because it didn't meet the design criteria.

757 In response to a question from Senator Gilman, Deputy Commissioner Bates indicated that the highways in Alaska's interstate system are the Alaska Highway to Fairbanks, the Parks Highway to Anchorage, from Anchorage back to Tok and Tok Cut-off, and from Anchorage down to Soldotna.

796 In response to a question from Senator Fahrenkamp, Deputy Commissioner Bates indicated that the State Transportation Plan book distributed to committee members represents the Department's needs assessment, from which was developed the Six Year Transportation Improvement Program for the four modes dealt with by DOT. Approximately 5.2 billion dollars worth of need is identified in that Six Year Program for the existing transportation system, without taking into consideration any new additions to the system, Bates indicated. He said that about 2.3 to 2.4 billion of that is for roads, the rest is for the other modes. Commissioner Casey indicated Department staff needs to compile a more complete inventory and complete the life-cycle analysis of current capital stock in order to fully understand and project exactly how much money ongoing maintenance of current systems and facilities will require. Casey noted that the Department submitted a capital budget of 85 million dollars from the general funds and some federal funds for FY '84 for the major renovation and refurbishment of existing road systems, in contrast to the 5 - 15 million that has been included in past budgets for major reconstruction of existing road systems. However, Casey indicated, he does not really know whether 85 million is sufficient. or will need to be adjusted. He hoped to have a better idea by next year.

934 Senator Fahrenkamp agreed that the public needed to be kept informed of the economic situation of the state, indicating that in the face of declining revenues, the general public is still calling for reduced or eliminated taxes.

969 Senator Moss asked Commissioner Casey what his reorganization plans were, and whether he was anticipating any major personnel changes.

Casey noted that some charts had been developed for the Finance Committee, and would be provided to the Transportation Committee, which illustrate that the Department has not increased greatly in number of personnel over the years. Casey indicated that he plans to move to a line management approach so that each deputy commissioner would be resposible for a single, regional, geographic area or business, such as marine transportation, and would have the full responsibilities and all the assets needed to accomplish their mission. He added that he is also considering eliminating some positions at the assistant commissioner level.

047 Senator Fahrenkamp asked whether contracts were being let to distribute some of the workload to the private sector, and whether such contracting has proved to be a cost-effective measure.

064 Commissioner Casey indicated that the Department has in fact been moving in that direction. Currently, approximately 20% of the design and construction, or design engineering work is contracted out according to Casey, adding that in some areas, such as building design, work is almost 100% contracted out to design firms.

(2) Senator Moss asked what Casey's plans were to restore the morale of DOT/PF employees, noting that state employees are also citizens, and some of those citizens in his district had indicated that morale is extremely low in DOT/PF. Senator Moss also asked whether there had been any employee involvement in the reorganization plans.

Casey said that he has begun by planning to do a better job of protraying to the public and to all the department employees the good things that this department does, noting that he has been impressed with the quality and the good-heartedness of the people in this Department. Casey indicated he though that morale can be affected if there is a sense that the top management in the organizational structure is aggressive in giving due where due is deserved. In addition, part of the morale problem has to do with the lack of delegation of authority, he added.

164 In response to Senator Moss's question, Casey indicated he had studied several grievances, and is working with Commissioner Rudd to revitalize the merit process. Senator Fahrenkamp suggested that Casey look at a way to reward an employee who comes with with a creative, cost-saving idea for the Department.

Senator Moss thanked Casey for his assistance at this meeting, and asked that Casey study the written questions provided, adding that he would like to see answers to them within the next week or ten days so that the Committee could schedule a follow-up meeting.

306 Chairman Moss adjourned the meeting at 3:00 p.m.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

OFFICE OF THE COMMISSIONER

POUCH Z
JUNEAU, ALASKA 99811
(TELEX 45-328)

March 29, 1983

26-2

The Honorable H. Pappy Moss
Chairman
Senate Transportation Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Chairman Moss:

Commissioner Casey requested that I provide you the answers to the questions contained in your memorandum of March 3, 1983, which were not answered by him at your committee meeting. Our records indicate that questions 1, 2, 3, 4, 5, 7, 8, and 9 were addressed by him. If there are still concerns in those areas, please let me know what additional information you require.

Question (6)

The reorganization of the Department, which has been announced, directly addresses one of the major recommendations in the area of planning coordination made by the Legislative Auditor. Through the creation of Regional Deputy Commissioners, with expanded authorities, there will be increased coordination at the local level and a reduction in the levels of approval required for projects.

The Legislative audit reports referred to in your question, examined operations approximately 3 1/2 years ago, and do not reflect current operations. The involvement of Planning and Programming in projects, even before the reorganization, had been reduced. After authorization to proceed on a project is given, Planning and Programming's involvement is limited to cases where additional funding is required.

Question (10)

Regional transportation studies provide a data base; identify regional social, economic, environmental factors and transportation related issues; identify and evaluate local and State needs in the region; and provide a multi-year Capital Improvement Program, CIP, listing of projects for the region. This continuing work all contributes to the statewide planning processes including the Statewide Needs Assessment, the State Transportation Policy Plan, Statewide Data Bank, the Annual CIP Request, and the Six-Year Transportation Improvement Program.

Yes, the timing of regional studies with the statewide transportation plan is coordinated and on-going. Each year emphasis is on regional studies and/or updates from January through April. From May September, consideration is given the Regional Needs Assessment; in October the Regional CIP is developed; in November the Statewide Transportation Improvement Program is drafted and the updated policy plan is published in January.

Question (11)

The funding was for Phase I of MIS which consists of the Program Development System, Scheduling and Resource Allocation and a Financial Information System.

We are getting production reports from both the Program Development System and the Scheduling and Resource Allocation System. See response to Question (14) for status on the Financial Information System.

The Legislative committees can have access through their CRT terminals in their own area or by using our terminals in DOT&PF. There are also a number of hard copy reports which might be of interest.

Question (12)

The Last Project Status report (PSS) was distributed to all members of the Legislature on January 28, 1983. We had planned to have the Program Development System (PDS) fully on-line in February, but technical difficulties have delayed that date. As soon as the system is operational and updated, copies will be provided to the legislature.

Question (13)

It is unclear as to which reports are being referenced in this question, but if the CIP project status report refers to the FMS 1615 and if the CIP Project Authorization Balance is the "State accounting authorization report", the following would describe our procedure.

When legislation appropriates funding, a journal voucher is used to record the authorization on the State accounting records and to restrict the funds from expenditure processing. Through data processing, we extract that information from the State system, and record it in FMS on a report entitled FY 74 to date CIP Authorization Control Report (A-139). When a Project Development Authorization (PDA) is issued we set in the level of funding authorized for the project and release the authorized funds in the State accounting system to allow expenditures to process.

At this time the A-139 report indicates the project funding and the amount of the original authorization not yet allocated to a project. The 1615 is also updated to identify the level of funding authorized for the project. The 1615 is then manually reconciled to the State accounting record monthly.

Question (14)

The most recent audit report issued by Legislative Audit reported that our FMS system is very complex and that those CIP authorizations established in prior years continue to be problems but that "...DOTPF's accounting controls and accountability over CIP's have substantially improved." As we have standardized and documented procedures and processing, confidence in the system has also improved. We intend to continue this documentation process and increase our internal training program. As stated earlier, our system is complex, but as individuals become more familiar with it, the accuracy and effectiveness of our reports increase. This has been reflected by a 56% reduction in the error register since June 1982.

Along with the effort of documenting our current system we are reviewing other project cost reporting systems with the objective of replacing our current system.

The timetable for this replacement will be impacted by the amount of modification required to allow us to use already developed systems. In fact, at this very time we have a group of employees meeting with users of two project accounting systems and the last system is scheduled for review April 14 and 15. Based upon the results of these reviews, a specific timetable can be agreed upon. Under favorable circumstances one of these systems could even begin to produce benefits this summer.

Question (15)

This past year the CIP process was as follows:

1) The Office of Management and Budget provided an estimate of the maximum funding we could expect for capital projects.

2) Each region developed requests for projects in their region and headquarters prepared the Statewide request based on the following priorities set by the previous Commissioner.

   a) Supplemental funding to complete on-going projects.
   b) Highest priority in the Statewide Needs Assessment.
   c) Rehabilitation projects.
   d) Life Safety.
   e) Bridge projects (limited designated funds).
   f) Projects were to be in the Six Year Plan.

In the past, there were not specific instructions requiring work to be prorated by election district, although guidelines were given by region. Neither "the political realilty of Alaska" nor areas of high unemployment were specific factors used.

Since taking office, we have developed a factoring system for the evaluation of projects which takes into account:

a) maintenance cost,
b) economic potential,
c) creation of employment,
d) need identified in a public plan, and
e) safety considerations

which reflect the emphasis of this administration.

Question (16)

One way to handle major legislative add-ons would be to utilize a two year cycle with the design work addressed the first year and the construction in year two. Perhaps a better way would be to combine the legislative projects into the planning process at the earliest possible time.

Question (17)

The Alaska Transportation System, mainly the highway portion, is in need of preventative maintenance as well as major rehabilitation projects, to bring the system back to the original condition. Transportation maintenance, like all other State expenditures, will need to undergo a careful review and in all likelihood, we will not be able to expend the amounts of money we would have had if more funding were available to the State.

The practice of deferring maintenance on our highway systems will likely continue, however, by improving our cost effectiveness through the identification of better practices, innovative approaches, and motivation of our employees, we feel that we will be able to expand our activities with our existing costs.

We anticipate that development of future maintenance budgets will be tied to unit costs of items of work that are required, and not just be a percentage adjustment on previous appropriations. Identification of unit costs, such as cost per lane mile of striping, cost per mile of brush cutting, cost per square foot of resurfacing, etc. will allow all concerned to agree upon a level of maintenance and the related cost.

Question (18)

Through our continuous review of project funding needs we attempt to identify projects which for one reason or another do not have sufficient funds to complete the phase or scope of work anticipated. When a project in this condition is identified it is necessary to decide to (a) reduce the scope of work, (b) identify a less costly way to produce the product, or (c) increase the funding. If a funding increase is decided upon, it may either come through a supplemental

appropriation or possibly a transfer from another project. Transfers from another project can occur only under certain conditions which are controlled by the format of the legislative appropriation and not exceed the original estimate by 20%. The Commissioner's new policy is that any project that is anticipated to exceed the amount listed in the budget by more than 20% will be terminated until legislative approval is obtained to proceed at the higher cost estimate.

If we can be of further assistance, or provide additional information, please let us know.

Sincerely,

Fred J. Seeger
Deputy Commissioner

cc: Vice-Chairman, Bettye Fahrenkamp
Senator Jan Faiks
Senator Don Gilman
Senator Jalmar Kerttula
Commissioner Daniel A. Casey

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

NEWS RELEASE

FOR INFORMATION CONTACT: GINGER JOHNSON, INFORMATION OFFICER (907) 465-3900

FOR IMMEDIATE RELEASE

DOT&PF Appointments
124

March 8, 1983

Commissioner Dan Casey today outlined his streamlining of deputy commissioner duties to make the Department of Transportation and Public Facilities more quickly responsive to regional and local needs.

At the same time, in a speech at Fairbanks, Casey announced the appointment of two deputy commissioners, two more in an acting capacity, and several directors to carry out his goals in a reorganized department.

Topping Casey's staff are H. "Glen" Glenzer, previously Executive Director of Alaska Construction Industry Advancement Program, as Deputy Commissioner for the Interior Region; Fred Seeger, a former private engineering consultant and construction manager, as Deputy Commissioner for Standards and Statewide Programs; Jon Scribner, formerly Deputy Commissioner for Design and Construction, as Acting Deputy Commissioner for Southeast Region; and William Snell, who has been Director of Planning and Programming, as Acting Deputy Commissioner for Central Region.

In addition, the Commissioner has appointed John Bates, a former Deputy Commissioner, as Director for Planning and Programming, and Ron Lind, who moved from Deputy Commissioner for Administration to Director of Administrative Policy and Fiscal Management. He also announced that Marty Nusbaum remains Acting Director of the

(More)

Marine Highway System, and Mark Hickey is Coordinator for the Alaska Railroad Transfer Team.

Commissioner Casey said making the new deputy commissioners directly responsible for all DOT&PF operations in their regions will greatly improve first hand attention to regional needs, and will strengthen close contact with local officials and residents.

He explained the reorganization is a change from statewide deputy commissioner authority based on departmental functions to "a line organization" structure of responsibility. The new system, he said, will enable deputy commissioners to respond decisively to the whole range of needs in their regions rather than, as in the past, having their powers to act fragmented along functional lines. The public, he said, now will have a designated person to turn to below the commissioner level who is conversant with all the needs and problems of their regions. This same approach will also apply to the Marine Highway System.

The only other exception, Casey said, is Standards and Statewide Programs which logically remains on a statewide basis since its area of responsibility involves not day-to-day operations but department-wide policies and positions.

The commissioner noted that the reorganization reaches only to the top management alignment, and he stressed that it impacts few employees as to where they are assigned and what they do.

###

Summary

Fifteen years experience in engineering and engineering management. Has worked for private industry, military, and government in the fields of design and construction of all types of public facilities, environmental engineering and public health. Experience includes engineering investigations, teaching, planning, and management.

1982 - 1983: DOT&PF; Acting Deputy Commissioner, Design & Construction. Responsibility included those described for the Assistant Deputy Commissioner.

1979 - 1982: DOT&PF; Assistant Deputy Commissioner, Design & Construction. Supervised over 1500 positions. Program size of $400 million representing about 600 projects. Under general administrative direction of deputy commissioner. Responsible for administrative activities and programs of the unit, including budgeting, accounting, purchasing and supply, data processing, and personnel management.

1975 - 1979: Department of Environmental Conservation, Director, Division of Water Programs. Headed up division with major responsibility for statewide planning, water supply, water pollution control, monitoring, construction grants and village safe water programs. Overall manager of $20 million C.I.P. per year grant program for water and waste water systems and $3 million C.I.P. per year for sanitation facilities in rural villages. Responsible for preparing and managing construction of annual operating budget ($2 million/year).

1974 - 1975: Department of Environmental Conservation, Acting Director, Division of Water & Air Quality Control. Duties similar to above.

1971 - 1974: Department of Environmental Conservation, Chief of General Engineering. Responsible for water supply, radiation control, solid waste management, pesticide control, air faculty control on statewide level. Established and directed state's first village safe water program. Responsible for preparation and management of operating budget and management of $8 million C.I.P.

1969 - 1971: Department of Health and Welfare, Regional Sanitary Engineer. Responsible for all environmental health and engineering activities in the northern half of Alaska. Independently planned, directed and controlled all areas of responsiblity as Office Manager. Conducted pollution surveys, assisted government and industry to meet pollution requirements reviewed and approved water/sewer plans.

1967 - 1969: Employed by the U.S. Army as Captain, Sanitary Engineer. Instructor of graduate sanitary engineering officers in advanced sanitary engineering. Also gained practical experience in water supply, solid waste treatment, sanitation, industrial hygiene engineering and air pollution control.

1967 - 1967: Employed by Metcalf and Eddy Engineers as a Sanitary Engineer. Responsible for investigation, laboratory analysis, and reporting on ways to economically improve existing waste water treatment systems for a major west coast refinery to meet state standards for oil and suspended solids content.

EDUCATION

University of California. Earned Bachelor of Science in Civil Engineering.
Stanford University. Earned a Master of Science in Civil Engineering.
University of Alaska, Juneau and Fairbanks. Engineering and Management, Personnel Management, and Construction Management Systems.

Registered Professional Engineer, Alaska

Ronald Lind

BACKGROUND INFORMATION

Summary

1980-1983: Deputy Commissioner for Administration and Marine Operations. Responsible for supervision and operation of five major divisions of DOT&PF with an authorized staff of approximately 1200 and an operating budget of approximately $75 million. These divisions are responsible for the operation of the Alaska Marine Highway, State equipment fleet, data processing development and operation, financial services, personnel, supply, payroll and EEO.

1979-1980: Deputy Commissioner for Administration, DOT&PF. Responsible for direction and supervision of the State equipment fleet, financial management, data processin, personnel, supply and general administrative services of the Department of Transportation and Public Facilities. 400 employees and an operating budget of $25 million.

1976-1979: Director of the Division of Budget and Management, Office of the Governor, State of Alaska. Responsible for preparation of operating, capital and supplemental budgets submitted by the Governor to the Legislature. Provided recommendations to the Governor on fiscal impact of legislation and programs proposed to him for approval. Responsible for presentation of budget revisions to the Legislatvie Budget and Audit Committee (an interim committee of the Legislature) to obtain their approval. Reviewed proposed budgetary amendments of State agencies to assure that they were within legal and policy boundaries.

1973-1976: Deputy Director, Division of Budget and Management, Department of Administration. Responsible for providing recommendations to Budget Director for budgetary items from all State agencies. Responsible for coordination of technical aspects fo budget preparation, printing of budget documents and providing computer tapes to Legislative Finance staff. Provided testimony to legislative committees concerning specific programs and coordinated budgetary information with House and Senate finance committee chairmen. Responsible for analysis and review of the Transportation category.

1972-1973: Administrative Officer III, Department of Commerce. Responsible for the supervision and provision of administrative services of the Department of Commerce. Areas included Personnel, supply and financial activities.

1971-1972: Program Budget Analyst IV, Division of Budget and Management, Department of Administration. Responsible for supervision of budget analysts as well as personally responsible for the analysis of the Transportation and General Government categories. Among others, was specifically responsible for the analysis of the Department of Highways and Department of Public Works.

1969-1971: Budget and Management Analyst III, Division of Budget and Management, Department of Administration. Responsible for the review of State agency budget requests. At this time, the division of Budget and Management had only five professional staff memberts fo the evaluation and preparation of the entire State budget; therefore through rotation of assignments, gained knowledge of all State agencies' operations.

EDUCATION

University of Alaska, Fairbanks, Graduated 1966, Cum Laude, Bachelor of Business Administration degree.

John C. Bates

BACKGROUND INFORMATION

Summary

Thirteen years of experience in transportation in Alaska. Including design construction planning and administration.

1979 - 1983: Employed by the Department of Transportation & Public Facilities as Deputy Commissioner, Planning and Programming. Administered the development of the state transportation planning system leading to the development of the Department's Capital Improvements budget.

1979 - 1979: Employed by the Department of Transportation & Public Facilities as Director of Interior Region Planning and Programming. Directed the Interior regional development of the State's transportation plans. This included management of consultant contracts in the areas of transportation planning.

1978 - 1979: Employed by the Department of Transportation & Public Facilities as Director of Research. Handled the administration of the Department's research staff. Areas included advanced transportation systems, permafrost engineering related to transportation systems, building and engineering systems.

1977 - 1978: Employed by the Department of Transportation & Public Facilities as State Maintenance Engineer. Establised policy for the maintenance of the States roadways by the various regions. Compiled the Department's statewide M & O budget.

1974 - 1977: Employed by the Department of Transportation & Public Facilities as the Central District Maintenance Engineer.

1972 - 1974: Employed by the Department of Transportation & Public Facilities as the Central District LSR&T Engineer.

1970 - 1972: Employed by the Department of Transportation & Public Facilities as the Central Region Design Engineer.

1967 - 1970: Employed by the Pearl Harbor Naval Shipyard as a General Engineer, GS-11. Was head of the scientific computer section for the shipyard.

EDUCATION

Bradley University. School of Engineering, Peoria, Illinois. Earned a Bachelor of Science in Civil Engineering.

University of Hawaii. School of Engineering, Honolulu, Hawaii. Earned a Master of Science in Civil Engineering.

Registered Professional Engineer in the State of Alaska. Registered Land Surveyor in the State of Alaska

Fred Seeger

BACKGROUND INFORMATION

Summary

Fifteen years experience in engineering and construction of oil and gas industry related capital projects with emphasis in the State of Alaska.

1979-1983: Engineering and construction management consultant engaged in providing management service to major oil industry engineering and construction companies including North Slope producers such as ARCO Alaska, Inc. Specific service functions included construction planning and design during the engineering phase of the projects, estimating and scheduling, economic analyses, and contracting strategy. Represented clients as construction manager to deliver projects within budget, schedule and quality requirements during the construction phase of the projects.

1978-1979: Employed by Northwest Alaska Pipeline Company in Senior Project Planning position involved with the Alaska Natural Gas Transportation System. Performed conceptual engineering and construction planning for the gas pipeline project relating to capital cost estimates, schedules, manpower and equipment estimates, labor relations, procurement and logistics.

1975-1977: Employed by Alaska Pipeline Service Company, in Senior Project Management position during construction of the Trans Alaska Pipeline. Developed and implemented policy and procedure to improve quality of construction on a section of the oil pipeline. Directed various construction programs, particularly those associated with the special Arctic construction and engineering problems; provided direction to contractor's management in planning and engineering.

1974-1975: Employed by Bechtel Incorporated, as Assistant Deputy Manager on Trans Alaska Pipeline and Roads Project. Handled administration and coordination of personnel in Engineering, Procurement, Inspection, and Traffic Departments for the proper and timely supply of over $2 billion worth of materials and equipment for camp and pipeline construction; coordinated task force groups in the development of unique Arctic construction procedures for the installation of engineered pipeline components; generated estimates and budgets for management

1969-1973: Employed by Shell Oil Company, as Project Engineer and Project Manager. Through various assignments was responsible for producing project feasibility studies, capital budgets, project design, specifications, contracts, negotiations on right-of-way, and managing construction.

EDUCATION

Purdue University, School of Civil Engineering, Lafayette, Indiana. Earned Master of Science in Civil Engineering and Construction Management.

Clarkson College, School of Civil Engineering, Potsdam, New York. Earned Bachelor of Science in Civil Engineering.

Registered Professional Engineer in the States of Alaska, California, New York, and Washington.

H. "Glen" Glenzer

BACKGROUND INFORMATION

Summary

Over 30 years of active service as a U.S. Naval Aviator in positions of increasing responsibility, including command, exercising management control of national programs. Record of achievement in planning functions and policy development.

Experienced in the administration and management of a large air station and maritime terminals with all the problems and considerations of a civilian facility including management, operation, maintenance, development and FAA and maritime rules and regulations, as well as all other civil and governmental agencies.

Served as chief staff executive with Alaska Chapter of Associated General Contractors of America, Inc. involved with all problems and considerations commensurate with the construction industry. Directly involved with highway, building and utility construction as well as labor negotiations, personnel administration, education and training programs. Also active in safety, equal employment opportunity, ecology, budgeting, and all management functions pertaining to large construction contractor firms dealing extensively with gonvermental and civilian agencies and corporations. Most recently served as Executive Director of the Alaska Construction Industry Advancement Program involved with all the above activities including A.G.C. members plus others in the industry.

1981-1983: Executive Director - ACIAP. All duties encumbent upon previous position as they related to not only AGC members but entire industry at large. Also had various consulting jobs mainly pertaining to Aviation and Marine Transportation.

1973-1981: Chapter Manager, Alaska Chapter Association General Contractors of America, Inc. Responsible for Safety Public Relations, Equal Employment Opportunity & Ecology compliance as well as participated in and reviewed bargaining agreements and grievances of labor union contracts. Performed all duties attendant with personnel and engineering management functions, in relation to heavy construction industry. Also taught courses in financial management, economics and marketing at Alaska Pacific University.

1970-1973: Naval Safety Center, Norfolk, VA., Director of Aviation Safety Directorate. Supervised, established and administered safety programs within entire naval establishment and with other service and agencies including FAA, CAB and all airlines connected with them.

1968-1970: Commanding Officer, Naval Station, Adak, Alaska. Commanded large Naval Station which in addition to the administration of a community of 6000 people included a naval station and terminal as well as surface shipping harbor and terminal. Administrated a $4.5 million operating budget and $6 to $12 million annual construction project funds. Conducted contract negotiations and awarded and supervised contracts with airlines, contractors and industrial concerns.

1947-1968: U.S. Navy

EDUCATION

BA, University of Maryland. Earned Business Administration degree, Master of Science Degree from the George Washington University of business Administration. Graduate of University of Southern California Safety Management Course, the George Washington University Safety Course, the George Washington University Course in Multi-Variants and Naval Post Graduate School of Monterey, California.

QUESTIONS FOR KNAPP/CONFIRMATION HEARING

How do you intend to continue with your open policy? Will it be an open policy with all DOT employees? Can we expect to continue to receive reports, for example on the Capital Project Clean-up?

In reference to the Capital Projects Clean-up, do we know if the income of non-participating funds (federal aid, other) has been balanced with expenditures and has the revenue problem been solved?

While cleaning up problems of past practices, what steps are being taken to avoid same or similar problems in the present and for the future?

During the interim period, and after being briefed this session on the Capital Project Clear-up on the status of the Financial Information System, has it as yet become a people system? (We realize that the programs exist and operators have been trained to use the computer, but is it a "people system"?)

After having been briefed on the latest status of the Capital Project Clean-up, one of the things that surfaced was over-programming? Has over-programming been discontinued?

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 1, 1984

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Kerttula:

Pursuant to applicable law, I submit the following name for legislative confirmation of appointment to the position noted:

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

Richard J. Knapp, Commissioner

TRSP
FIN.

Sincerely,

Bill Sheffield
Governor

REAR ADMIRAL RICHARD J. KNAPP

Richard Joseph Knapp was born on February 14, 1929, in Passaic, New Jersey, where he was graduated from Passaic High School in 1947. Appointed a Cadet in July, 1947, he was graduated from the U.S. Coast Guard Academy, New London, Connecticut, with a Bachelor of Science Degree in Engineering and a commission of Ensign on June 1, 1951.

His service career as an officer began with three years of sea duty aboard the USCGC ESCANABA and USCGC GRESHAM. Both of these cutters were homeported in Alameda, California, and engaged in ocean station patrols and search and rescue missions. In May, 1954, he returned ashore for a three-year tour as Commanding Officer of Ship Training Detachment No. 5 in Alameda.

Returning to sea once again in May, 1957, he served for a year as Operations Officer on board the USCGC SPENCER, out of New York City. After completing studies at the Merchant Marine Indoctrination School at New London, Connecticut, in July, 1958, he returned to New York City for a year as Hull Inspector at the Coast Guard Merchant Marine Inspection Office. From June, 1959, to June, 1961, he commanded the USCGC YEATON out of New London, Connecticut.

He was next assigned as a graduate student at George Washington University in Washington, D.C., where he was awarded a Master's Degree in Business Administration (MBA) in June, 1962. This was followed by three years as Staff Assistant to the Comptroller at Coast Guard Headquarters.

From May, 1965, until March, 1966, he served in the Republic of South Vietnam. During that period, he was first assigned as Chief Staff Officer, to Coast Guard Squadron One. Its mission was to interdict and counter the infiltration of men, munitions and supplies from the sea to Viet Cong guerillas ashore. In this capacity, he planned, organized and coordinated the deployment of the Squadron's first two divisions (Division 11 and 12) comprised of seventeen 82-foot Coast Guard patrol boats. He then commanded Division 12 based at DaNang and served as Commander, Task Group 115.3. During this time, he directed the training and operations of both Coast Guard cutters and Navy PCFs and developed tactics which made full use of the capabilities of both types of vessels. For his service in Vietnam, the then Lieutenant Commander Knapp was awarded the Legion of Merit with Combat Distinguishing Device.

Upon his return from Southeast Asia, he commanded the USCGC ACUSHNET out of Portland, Maine. From there, he returned to Headquarters in September, 1968, to serve as Chief, Cost Analysis Branch, Budget Division. For meritorious achievement while in that post, he was awarded the Coast Guard Commendation Medal.

Returning to sea in July of 1972, he commanded in succession the polar icebreakers USCGC SOUTHWIND and USCGC EDISTO. Both vessels were based at Baltimore, Maryland. In July, 1974, he returned for a third tour of duty at Headquarters as Chief, Ocean Operations Division, Office of Operations. For outstanding achievement during that tour, he was awarded the Meritorious Service Medal. In June, 1977, he was reassigned to duty as Deputy Chief, Office of Personnel at Headquarters.

On January 27, 1978, he was among six other captains nominated by President Carter for the rank of Rear Admiral. Promoted to the rank of Rear Admiral on July 1, 1978, he assumed duties as Comptroller of the Coast Guard. He has served as District Commander in Alaska since June 28, 1980.

Rear Admiral Knapp is married to the former Pamela Hancock Pelham. He and Mrs. Knapp have four children: Joseph, Marc, Nancy and Richard.

Senator Ray moved and asked unanimous consent that the Real Estate Commission be confirmed. Without objection, Ed Anders, John Benson, LaVerne Collins, Gilbert Serrano and Barbara Hill were confirmed.

Senator Ray moved and asked unanimous consent that the following appointments be confirmed:

COMMISSION ON JUDICIAL CONDUCT

Barbara Dale, Juneau, term expiring December 31, 1986
Georgianna Lincoln, Fairbanks, term expiring December 31, 1985

There being no objection, it was so ordered.

Senator Ray moved and asked unanimous consent that the following appointment be confirmed:

JUDICIAL COUNCIL

Renee Murray, Anchorage, term expiring May 18, 1989

There being no objection, it was so ordered.

Senator Ray moved and asked unanimous consent that the following appointments be confirmed:

BOARD OF MARINE PILOTS

Judith Brady, Anchorage, term expiring June 1, 1987
James Hodgman, Ketchikan, term expiring June 1, 1987

There being no objection, it was so ordered.

Senator Ray moved and asked unanimous consent that the following appointment be confirmed:

MEDICAL BOARD

Dr. Dolores Hughes, Juneau, term expiring January 12, 1988

There being no objection, it was so ordered.

BOARD OF FISHERIES

Val Angasan, Dillingham, term expiring January 31, 1986
Bix Bonney, Anchorage, term expiring January 31, 1986
Ernie Carter, Fairbanks, term expiring January 31, 1985
Jesse Foster, Quinhagak, term expiring January 31, 1986
John Garner, Juneau, term expiring January 31, 1987
Ron Jolin, Kodiak, term expiring January 31, 1987
Jerene Museth, Juneau, term expiring January 31, 1987

Senator P Fischer objected.

Senator Ray moved and asked unanimous consent that the Board of Fisheries appointments be moved to the bottom of the agenda. There being no objection, it was so ordered.

Senator Ray moved and asked unanimous consent that the following appointments be confirmed:

BOARD OF GAME

* Joel Bennett, Juneau, term expiring January 31, 1986
* Sidney Huntington, Galena, term expiring January 31, 1987
Nicholas Jackson, Gakona, term expiring January 31, 1987
Sarah Scanlan, Fairbanks, term expiring January 31, 1987

Representative Adams objected.

Senator Ray moved and asked unanimous consent that the Board of Game appointments be moved to the bottom of the agenda. There being no objection, it was so ordered.

Senator Ray moved and asked unanimous consent that the following appointment be confirmed:

HUMAN RIGHTS COMMISSION

* Morgan Solomon, Barrow, term expiring January 31, 1989

There being no objection, it was so ordered.

Sec. 08.60.090. Penalty. A person who operates, establishes, or maintains a junk yard in any location without procuring a certificate of approval is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500, or by imprisonment for a term of not more than one year, or by both. (§ 5 ch 26 SLA 1962)

Sec. 08.60.100. Definitions. For the purpose of AS 08.60.050 — 08.60.100

(1) "person" means an individual and, where consistent with a collective capacity, a committee, firm, partnership, company, corporation, club, governmental agency, organization, association, or other combination of individuals;

(2) "junk yard" means a location where junk is gathered together and stored for a commercial or public purpose;

(3) "junk" means any secondhand and used machinery, scrap iron, copper, lead, zinc, aluminum, or other metals; it also includes wrecked automobiles, tools, implements, rags, used building materials, rubber, and paper. (§ 6 ch 26 SLA 1962)

Chapter 62. Marine Pilots.

Article
1. Board of Marine Pilots (§§ 08.62.010 — 08.62.040)
2. Licensing (§§ 08.62.080 — 08.62.150)
3. General Provisions (§§ 08.62.160 — 08.62.200)

Collateral references. — 79 Am. Jur. 2d, Shipping, §§ 54-67, 190-194.
70 C.J.S., Pilots, §§ 1-6.

Article 1. Board of Marine Pilots.

Section		Section	
10.	Creation and membership of board	30.	Meetings
20.	Appointment and term of office	40.	Powers and duties

Sec. 08.62.010. Creation and membership of board. There is created the Board of Marine Pilots. It consists of two pilots licensed under this chapter who have been actively engaged in piloting on vessels subject to this chapter, two agents or managers of vessels subject to this chapter, two public members in accordance with AS 08.01.025, and the commissioner or the commissioner's designee. Not more than one pilot and one agent or manager shall be from any one judicial district. All members of the board shall be residents of the state. (§ 2 ch 106 SLA 1970; am § 8 ch 258 SLA 1976)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.62.020. Appointment and term of office. The governor shall appoint the pilot and agent or manager members of the board, subject to confirmation by a majority of the members of the legislature in joint session, for terms of four years, or until their successors are appointed. The first members shall be initially appointed for one, two, three and four year terms. No person, with the exception of the commissioner or the commissioner's designee, may be appointed to the board for more than two consecutive terms. (§ 2 ch 106 SLA 1970; am § 1 ch 143 SLA 1980)

Effect of amendments. — The 1980 amendment added the present third sentence.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.62.030. Meetings. The board shall hold a regular annual meeting. The board may hold special meetings at the call of the chairman with prior approval of the governor. (§ 2 ch 106 SLA 1970)

Sec. 08.62.040. Powers and duties. (a) The board shall

(1) provide for the maintenance of efficient and competent pilot service on all waters covered by this chapter to assure protection of shipping and the safety of human life and property;

(2) consistent with the law, adopt regulations, subject to the Administrative Procedure Act (AS 44.62), establishing the qualifications of pilots and providing for the examination of pilots and the issuance of original or renewal pilot licenses to qualified persons;

(3) keep a register of licensed pilots, and agents;

(4) adopt regulations under the Administrative Procedure Act (AS 44.62) establishing standards by which pilotage fees may be established, and pay for audits whenever an audit is necessary to collect information needed to apply the standards in the regulations;

(5) make available, upon request, copies of this chapter and the regulations adopted under it.

(b) The board may, by regulation, make any other provision for proper and safe pilotage upon the waters covered by this chapter and for the efficient administration of this chapter. (§ 2 ch 106 SLA 1970; am §§ 2, 3 ch 143 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "and" for "vessels, operators," and deleted "and managers" following "agents," in paragraph (3) of subsection (a), and rewrote paragraph (4) of subsection (a).

Article 2. Licensing.

Section
80. License requirement
90. Application
100. Qualifications
110. Previous licensure
120. Duration, renewal
130. Lapsed license
140. Fees
150. Denial, revocation or suspension

Sec. 08.62.080. License requirement. A person may not pilot a vessel subject to this chapter unless the person is licensed under this chapter. (§ 2 ch 106 SLA 1970)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.62.090. Application. (a) A person who desires to be licensed under this chapter shall apply in writing to the department.

(b) The application shall provide the information and be made on a form prescribed by the board. (§ 2 ch 106 SLA 1970)

Sec. 08.62.100. Qualifications. A person is entitled to a license under this chapter if the person

(1) is of good moral character;

(2) is a citizen of the United States;

(3) passes the examination given by the board; and

(4) qualifies under the regulations adopted under AS 08.62.040(a)(2) and (b). (§ 2 ch 106 SLA 1970)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.62.110. Previous licensure. A license that was issued under former AS 30.10 is considered as having been issued under this chapter. (§ 2 ch 106 SLA 1970)

Editor's notes. — AS 30.10, referred to in this section, was repealed by § 4, ch. 106, SLA 1970.

Sec. 08.62.120. Duration, renewal. A license issued under this chapter shall be renewed biennially on dates set by the department. A license issued under former AS 30.10 lapses at the end of calendar year 1970. A license issued between May 7, 1970 and the end of 1970 shall be issued for a fee of $100. A license shall be renewed without examination upon the payment of the biennial license fee. (§ 2 ch 106 SLA 1970)

Editor's notes. — AS 30.10, referred to in this section, was repealed by § 4, ch. 106, SLA 1970.

Sec. 08.62.130. Lapsed license. A lapsed license may be reinstated without examination if it has not remained lapsed for more than two years. However, if the license is lapsed for less than two years and the board has reason to believe that the person applying for reinstatement of a license is incapable or incompetent to carry out the duties of a licensed marine pilot, the board may require the applicant to take and pass the examination given by the board. (§ 2 ch 106 SLA 1970; am § 1 ch 22 SLA 1973)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.62.140. Fees. The following fees shall be imposed under this chapter when applicable:

(1) application fee . . . . . $ 50
(2) biennial license fee $300
(3) biennial registration fee for agents $100

(§ 2 ch 106 SLA 1970; am § 4 ch 143 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "$50" for "$10" in paragraph (1) and "$300" for "$200" in paragraph (2), and added paragraph (3).

Sec. 08.62.150. Denial, revocation or suspension. (a) The board, after compliance with the Administrative Procedure Act (AS 44.62), may deny, revoke or suspend the license of a person who

(1) is incompetent in the performance of pilotage duties;
(2) is habitually intoxicated;
(3) illegally uses or sells narcotic or hallucinogenic drugs;
(4) makes a false statement to obtain a license;
(5) violates a provision of this chapter or a regulation adopted under it;
(6) is guilty of misconduct during the course of employment; or
(7) has suffered revocation of federal licensure as a pilot.

(b) A license denied, revoked or suspended under (a) of this section may not be granted or reinstated until

(1) the reason for the license denial, revocation or suspension has been remedied; and
(2) the period of suspension has been served and all fines imposed under this chapter have been paid. (§ 2 ch 106 SLA 1970; am § 5 ch 143 SLA 1980)

Effect of amendments. — The 1980 amendment added paragraph (7) of subsection (a).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Article 3. General Provisions.

Section
160. Mandatory employment of licensed pilots
170. Pilot's lien for compensation
180. Exemptions
185. Certain licensed pilots required for oil tankers
187. Registration of agents required
190. Penalty
200. Definitions

Sec. 08.62.160. Mandatory employment of licensed pilots. A vessel subject to this chapter navigating the inside coastal waters of Alaska as determined by regulation shall employ a pilot holding a valid license under this chapter. (§ 2 ch 106 SLA 1970)

Sec. 08.62.170. Pilot's lien for compensation. Each vessel, its tackle, apparel and furniture and the owner of the vessel are jointly and severally liable for the compensation of a pilot employed on the vessel and the pilot has a lien on the vessel, the vessel's tackle, apparel and furniture for the pilot's compensation. (§ 2 ch 106 SLA 1970)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

08.62.180. Exemptions. This chapter does not apply to vessels under enrollment, except as provided in AS 08.62.185;

(2) fishing vessels registered in the United States or in British Columbia, Canada;

(3) motorboats as defined in sec. 1 of the federal Motor Boat Act of 1940 (54 Stat. 163; 46 U.S.C., sec. 526 et seq.);

(4) vessels of United States registry of less than 300 gross tons and tow boats of United States registry and vessels owned by the State of Alaska, engaged exclusively

(A) on the rivers of Alaska, or

(B) in the coastwise trade on the west coast of the United States including Alaska, Hawaii, and British Columbia, Canada;

(5) vessels of Canada, including Canadian cruise ships, engaged in frequent trade between British Columbia and Alaska, if reciprocal exemptions are granted by Canada to vessels owned by the State of Alaska and those of United States registry; and

(6) pleasure craft. (§ 2 ch 106 SLA 1970; am § 1 ch 73 SLA 1972; am § 2 ch 78 SLA 1977)

Sec. 08.62.185. Certain licensed pilots required for oil tankers. (a) Any oil tanker, whether enrolled or registered, of 50,000 dead weight tons or greater, shall, when navigating in state waters beyond Alaska pilot stations either

(1) employ a pilot licensed by the state under this chapter, or

(2) utilize a federally licensed pilot whose duty station has been on that tanker throughout that specific voyage.

(b) The pilot required in (a) of this section shall control the vessel during all docking operations. (§ 3 ch 78 SLA 1977)

Sec. 08.62.187. Registration of agents required. A person may not act as an agent of a vessel subject to this chapter unless the person's name appears on the register of agents kept under AS 08.62.040(a)(3). (§ 6 ch 143 SLA 1980)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.62.190. Penalty. A master or owner of a vessel required by this chapter to employ a licensed pilot who fails to do so when a licensed pilot is available, unless the perils or hazards of the sea prevent the employment of a pilot, is guilty of a misdemeanor and, upon conviction, is punishable by a fine of not less than $1,000 nor more than $5,000. A person who violates any other provision of this chapter or a regulation adopted under it is guilty of a misdemeanor and, upon conviction, is punishable by a fine of not less than $500 nor more than $1,000. (§ 2 ch 106 SLA 1970; am § 1 ch 34 SLA 1979)

Effect of amendments. — The 1979 amendment substituted "$1,000 nor more than $5,000" for "$500 nor more than $1,000" at the end of the first sentence.

Sec. 08.62.200. Definitions. In this chapter

(1) "board" means the Board of Marine Pilots;

(2) "commissioner" means the commissioner of the Department of Commerce and Economic Development;

(3) "department" means the Department of Commerce and Economic Development;

(4) "vessel" means all vessels not exempt under AS 08.62.180. (§ 2 ch 106 SLA 1970; am § 48 ch 218 SLA 1976)

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying:
Member, Board of Marine Pilots

Please list any other Board or Commission on which you serve:
None

Name	Previous Name applied under
James A. Hodgman	N/A
Mailing Address	**Residence Address**
415-A Front Street	415-A Front Street
City, State and Zip Code	
Ketchikan, Alaska 99901	Ketchikan, Alaska 99901
Home Telephone	**Business or Message Telephone**
225-2037	225-9696

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election.

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional)

543-03-6591
Social Security Number (Optional)

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating in the required authorized meetings? ☐ YES ☒ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating? No.

CONFLICTS OF INTEREST. Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☒ YES ☐ NO

Could you or any member of your family be affected financially by decisions to be made by the Board or Commission for which you have applied?
☒ YES ☐ NO If "YES", explain. I work as a Marine Pilot and the Board sets Marine Pilot tariffs.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01.012(2/81)

TRAINING & EXPERIENCE: (If résumé attached, it is not necessary to complete items A-D)

A. List any professional licenses, certifications, or registrations and dates obtained that may be used as qualifying criteria:

Coast Guard license as Master of steam and motor vessels of any gross ton: upon oceans; also First Class pilot of steam or motor vessels of any gros: tons upon the waters of southeast Alaska from Dixon Entrance to Cape Spenc and upon the waters of Yakatat Bay including the Port of Yakacat; and Icy Radar Observer.

State of Alaska unlimited license as marine pilot in Southeast Alaska, Yakatat and Icy Bay
Captain, U.S.Coast Guard (Retired)

B. List both formal and informal education and training experiences: (Use additional paper if necessary)

Graduated Ketchikan High School 1941
B.S. in General Engineering, U.S. Coast Guard Academy, 1944
Naval War College 1963
M.A. in Foreign Affairs, George Washington University 1964
Shiphandling Simulator Course, MITAGS, 1983

C. List any community service positions, municipal government positions, state positions held, and list any awards received. These include both compens. and uncompensated positions (for example, president of a service organization or a mayor). Also include length of time served in the positions.

President, Ketchikan Families in Action
Chairman, American Youth Hostel, Ketchikan
Chairman, Finance Committee, Methodist Church, Ketchikan
Chairman, Social Concerns Committee, Ketchikan
Legion of Merit
Meritorious Service Medal

D. Employment work history: paid, unpaid or voluntary: (Use additional paper if necessary)

1941-1972--Officer in U.S. Coast Guard. Served as officer and Master on several cutters including two years in Alaska on the CGC Bittersweet. Commanded CG Squadron in Vietnam. Served ashore in various planning, liaison and training positions.
1972-1973--Supervisor of Marinas, Dade County, Florida.
1973-1984--Marine Pilot, Southeast Alaska.

The Office of the Governor and the State of Alaska have an Affirmative Action Equal Employment Opportunity Program. To assist in the program, you are asked to voluntarily answer the following questions to provide the information necessary for reporting purposes. Under State and Federal law, the information you provide will not be used to illegally discriminate against you.

SEX
☒ Male
☐ Female

ETHNIC BACKGROUND
☐ White ☐ Black ☐ Hispanic ☐ Alaska Native ☐ Asian or Pacific Islander ☐ American Indian

Date of Birth: 06/19/23

Military Service (If applicable, give dates): 1941-1972 U.S.Coast Guard

CERTIFICATION: I swear that the information I have entered on this form is true to the best of my knowledge. I understand that if I deliberately conceal or enter false information on the form my application may be rejected, I may be removed from the list of eligible candidates or I may be removed from the position. I agree that the Office of the Governor may contact present or former employers or other persons who know me to obtain additional information about my skills and abilities. I understand that the information on this application is public information and may be released through a legal request for such information.

RESUME

JUDITH M. BRADY
3842 Wesleyan
Anchorage, Alaska

EDUCATION:

BA, Seattle University, 1963, Major: Journalism; Minor: History, Philosophy; Honors: Mike Donahue Journalism Scholarship, 1962, 1963; Best Writer of the Year, 1961, 1962, 1963; Who's Who, American Colleges and Universities, 1963.

Graduate Work: 21 hours toward interdisciplinary masters in Regional Economics, University of Alaska, 1968, 1969.

CURRENT EMPLOYMENT:

Executive Director, Commonwealth North. Commonwealth North is a private, non-partisan organization of business and political leaders involved with public policy issues affecting Alaska. Study teams explore questions of public policy and the conclusions are published as Action Papers. Prominent national and international speakers are invited to monthly breakfast forums to bring wider perspective to issues of interest to the membership.

The executive director reports to a 17-member Board of Directors co-chaired by former Governors William Egan and Walter Hickel. The executive director is responsible for the administration of the organization; the monthly forums; the study teams; and publication of the study team Action Papers. The executive director is expected to be knowledgeable in all current issues of major public policy.

PREVIOUS EXPERIENCE:

Chief Administrative Judge, Alaska Native Claims Appeals Board, U.S. Department of the Interior. January 1974 - July 1982. This was a quasi-judicial board appointed by the Secretary of the Interior in 1974 to hear and decide appeals on land selection decisions arising under the Alaska Native Claims Settlement Act. Board decisions could be appealed to the Federal Courts, but were final for the Department of the Interior. Since 1974 the Board decided an average of 75 land conveyance appeals a year, directly determining title to approximately 13 million acres of land

as between Native corporations, the State, federal agencies, private corporations, and individuals. None of the Board's land conveyance decisions have been overturned by the Courts. The Board's function was transferred to Washington on June 30, 1982, due to diminishing case load.

The Chief Administrative Judge was responsible for case assignments; for the administrative and policy-direction of the board members; and for the hiring and supervision of the Board's legal and administrative staff. The Chief Judge served as the authorized representative of the Secretary of the Interior and advised the Secretary on matters requiring broad policy determination, formulated policy for the Secretary in the area of appeals, and was responsible for the resolution of any conflicts which arose in the application of such policy.

July 72 - Jan. 74: Editor, Alaska Native Management Report, Alaska Native Foundation.

Recruited to evaluate the informationa requirements of the Native Regional Corporations established under the Alaska Native Claims Settlement Act, and to recommend the best method of providing that information. Developed and published the Alaska Native Management Report, a twice-monthly publication with an annual subscription rate of $245. Responsible for projecting and maintaining budget. The publication became self-sufficient within five months. Independently responsible for determining format and content of the Report and for developing a trust relationship with administrators of the regional corporations and government agencies responsible for implementing the Settlement Act.

Jan. 70 - Aug. 71: Research Associate, Community Enterprise Development Corporation.

CEDC is a non-profit private corporation funded by the Office of Economic Opportunity to assist in financing Native-owned cooperative businesses in rural Alaska.

Reviewed and made recommendations to the Director to accept/reject applications from groups requesting financial and/or training assistance; developed a training program for 23 staff members; developed training programs geared to the needs of the individual cooperatives. Coordinated with staff in co-authoring a budget request document that resulted in a $2.3 million funding allocation. Designed the grant proposal so that the information could be independently utilized by each cooperative each year for the purpose of budget review.

Feb. 67 - Jan. 70: Editor, Review of Business and Econimic Conditions, Institute of Social, Economic, and Government Research, University of Alaska, Fairbanks.

Initially under contract to edit economic and resource development studies. In 1968 was named Editor of the Review of Business and Economic Conditions, a 24-36 page published report scheduled every two months on subjects of special interest to the Alaska Legislature, such as annual economic forecasts and reports, resource development, etc. Responsible for coordinating with authors on revisions; establishing and maintaining author deadlines; editing, and publishing. Authored two of the Reports: The Reindeer Industry in Alaska, and Native Land Claims in Alaska.

Nov. 66 - July 67: Associate Editor, Tundra Times.

Employed under short-term contract to publish the Tundra Times, a weekly Native newspaper. Responsible for budgeting, staffing, payroll, selling enough ads to make the payroll, writing, editing, and printing the newspaper. During this period, won Best Editorial and Best Feature in the Alaska Press Club annual awards contest.

Sept. 63 - Aug. 66: Employed as a reporter, responsible for covering the court system, the Federal agencies, the Bureau of Land Management, the Bureau of Indian Affairs, and rural interior Alaska. As associate editor, was responsible for story assignment, deadlines, page layout, special editions, AP wire copy.

1961 - 1963: Night Editor, Associated Press, Spokane, Washington Bureau.

Summer and vacations during college.

COMMUNITY PROJECTS: Member, Fairbanks Native Association, 1964-1970; Board Member, Fairbanks Native Association, 1965-1967; Board member, Eskimo Olympics Committee, 1964-1967; alaska Press Club, 1964-1966; Alaska Native Boarding Home Program Parent, 1968-1969; Teacher, Junior High and High School CCD program, St. Anthony's Catholic Church, 1971-present; Toastmasters, 1977-present. Lt. Governor, Alaska-Yukon Council Toastmasters, 1979-1980; Gymnastics Coach, Special Olympics, 1980-present. Anchorage Port Commission - 1983 - present.

PERSONAL: 41 years old/married/3 children.

DOT

Overview

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

NEWS RELEASE

FOR INFORMATION CONTACT: GINGER JOHNSON, INFORMATION OFFICER (907) 465-3900

FOR IMMEDIATE RELEASE

DOT&PF Appointments
124

March 8, 1983

Commissioner Dan Casey today outlined his streamlining of deputy commissioner duties to make the Department of Transportation and Public Facilities more quickly responsive to regional and local needs.

At the same time, in a speech at Fairbanks, Casey announced the appointment of two deputy commissioners, two more in an acting capacity, and several directors to carry out his goals in a reorganized department.

Topping Casey's staff are H. "Glen" Glenzer, previously Executive Director of Alaska Construction Industry Advancement Program, as Deputy Commissioner for the Interior Region; Fred Seeger, a former private engineering consultant and construction manager, as Deputy Commissioner for Standards and Statewide Programs; Jon Scribner, formerly Deputy Commissioner for Design and Construction, as Acting Deputy Commissioner for Southeast Region; and William Snell, who has been Director of Planning and Programming, as Acting Deputy Commissioner for Central Region.

In addition, the Commissioner has appointed John Bates, a former Deputy Commissioner, as Director for Planning and Programming, and Ron Lind, who moved from Deputy Commissioner for Administration to Director of Administrative Policy and Fiscal Management. He also announced that Marty Nusbaum remains Acting Director of the

(More)

Marine Highway System, and Mark Hickey is Coordinator for the Alaska Railroad Transfer Team.

Commissioner Casey said making the new deputy commissioners directly responsible for all DOT&PF operations in their regions will greatly improve first hand attention to regional needs, and will strengthen close contact with local officials and residents.

He explained the reorganization is a change from statewide deputy commissioner authority based on departmental functions to "a line organization" structure of responsibility. The new system, he said, will enable deputy commissioners to respond decisively to the whole range of needs in their regions rather than, as in the past, having their powers to act fragmented along functional lines. The public, he said, now will have a designated person to turn to below the commissioner level who is conversant with all the needs and problems of their regions. This same approach will also apply to the Marine Highway System.

The only other exception, Casey said, is Standards and Statewide Programs which logically remains on a statewide basis since its area of responsibility involves not day-to-day operations but department-wide policies and positions.

The commissioner noted that the reorganization reaches only to the top management alignment, and he stressed that it impacts few employees as to where they are assigned and what they do.

###

Summary

Fifteen years experience in engineering and engineering management. Has worked for private industry, military, and government in the fields of design and construction of all types of public facilities, environmental engineering and public health. Experience includes engineering investigations, teaching, planning, and management.

1982 - 1983: DOT&PF; Acting Deputy Commissioner, Design & Construction. Responsibility included those described for the Assistant Deputy Commissioner.

1979 - 1982: DOT&PF; Assistant Deputy Commissioner, Design & Construction. Supervised over 1500 positions. Program size of $400 million representing about 600 projects. Under general administrative direction of deputy commissioner. Responsible for administrative activities and programs of the unit, including budgeting, accounting, purchasing and supply, data processing, and personnel management.

1975 - 1979: Department of Environmental Conservation, Director, Division of Water Programs. Headed up division with major responsibility for statewide planning, water supply, water pollution control, monitoring, construction grants and village safe water programs. Overall manager of $20 million C.I.P. per year grant program for water and waste water systems and $3 million C.I.P. per year for sanitation facilities in rural villages. Responsible for preparing and managing construction of annual operating budget ($2 million/year).

1974 - 1975: Department of Environmental Conservation, Acting Director, Division of Water & Air Quality Control. Duties similar to above.

1971 - 1974: Department of Environmental Conservation, Chief of General Engineering. Responsible for water supply, radiation control, solid waste management, pesticide control, air faculty control on statewide level. Established and directed state's first village safe water program. Responsible for preparation and management of operating budget and management of $8 million C.I.P.

1969 - 1971: Department of Health and Welfare, Regional Sanitary Engineer. Responsible for all environmental health and engineering activities in the northern half of Alaska. Independently planned, directed and controlled all areas of responsiblity as Office Manager. Conducted pollution surveys, assisted government and industry to meet pollution requirements reviewed and approved water/sewer plans.

1967 - 1969: Employed by the U.S. Army as Captain, Sanitary Engineer. Instructor of graduate sanitary engineering officers in advanced sanitary engineering. Also gained practical experience in water supply, solid waste treatment, sanitation, industrial hygiene engineering and air pollution control.

1967 - 1967: Employed by Metcalf and Eddy Engineers as a Sanitary Engineer. Responsible for investigation, laboratory analysis, and reporting on ways to economically improve existing waste water treatment systems for a major west coast refinery to meet state standards for oil and suspended solids content.

EDUCATION

University of California. Earned Bachelor of Science in Civil Engineering.
Stanford University. Earned a Master of Science in Civil Engineering.
University of Alaska, Juneau and Fairbanks. Engineering and Management, Personnel Management, and Construction Management Systems.

Registered Professional Engineer, Alaska

Ronald Lind

BACKGROUND INFORMATION

Summary

1980-1983: Deputy Commissioner for Administration and Marine Operations. Responsible for supervision and operation of five major divisions of DOT&PF with an authorized staff of approximately 1200 and an operating budget of approximately $75 million. These divisions are responsible for the operation of the Alaska Marine Highway, State equipment fleet, data processing development and operation, financial services, personnel, supply, payroll and EEO.

1979-1980: Deputy Commissioner for Administration, DOT&PF. Responsible for direction and supervision of the State equipment fleet, financial management, data processin, personnel, supply and general administrative services of the Department of Transportation and Public Facilities. 400 employees and an operating budget of $25 million.

1976-1979: Director of the Division of Budget and Management, Office of the Governor, State of Alaska. Responsible for preparation of operating, capital and supplemental budgets submitted by the Governor to the Legislature. Provided recommendations to the Governor on fiscal impact of legislation and programs proposed to him for approval. Responsible for presentation of budget revisions to the Legislatvie Budget and Audit Committee (an interim committee of the Legislature) to obtain their approval. Reviewed proposed budgetary amendments of State agencies to assure that they were within legal and policy boundaries.

1973-1976: Deputy Director, Division of Budget and Management, Department of Administration. Responsible for providing recommendations to Budget Director for budgetary items from all State agencies. Responsible for coordination of technical aspects fo budget preparation, printing of budget documents and providing computer tapes to Legislative Finance staff. Provided testimony to legislative committees concerning specific programs and coordinated budgetary information with House and Senate finance committee chairmen. Responsible for analysis and review of the Transportation category.

1972-1973: Administrative Officer III, Department of Commerce. Responsible for the supervision and provision of administrative services of the Department of Commerce. Areas included Personnel, supply and financial activities.

1971-1972: Program Budget Analyst IV, Division of Budget and Management, Department of Administration. Responsible for supervision of budget analysts as well as personally responsible for the analysis of the Transportation and General Government categories. Among others, was specifically responsible for the analysis of the Department of Highways and Department of Public Works.

1969-1971: Budget and Management Analyst III, Division of Budget and Management, Department of Administration. Responsible for the review of State agency budget requests. At this time, the division of Budget and Management had only five professional staff members fo the evaluation and preparation of the entire State budget; therefore through rotation of assignments, gained knowledge of all State agencies' operations.

EDUCATION

University of Alaska, Fairbanks, Graduated 1966, Cum Laude, Bachelor of Business Administration degree.

John C. Bates

BACKGROUND INFORMATION

Summary

Thirteen years of experience in transportation in Alaska. Including design construction planning and administration.

1979 - 1983: Employed by the Department of Transportation & Public Facilities as Deputy Commissioner, Planning and Programming. Administered the development of the state transportation planning system leading to the development of the Department's Capital Improvements budget.

1979 - 1979: Employed by the Department of Transportation & Public Facilities as Director of Interior Region Planning and Programming. Directed the Interior regional development of the State's transportation plans. This included management of consultant contracts in the areas of transportation planning.

1978 - 1979: Employed by the Department of Transportation & Public Facilities as Director of Research. Handled the administration of the Department's research staff. Areas included advanced transportation systems, permafrost engineering related to transportation systems, building and engineering systems.

1977 - 1978: Employed by the Department of Transportation & Public Facilities as State Maintenance Engineer. Established policy for the maintenance of the States roadways by the various regions. Compiled the Department's statewide M & O budget.

1974 - 1977: Employed by the Department of Transportation & Public Facilities as the Central District Maintenance Engineer.

1972 - 1974: Employed by the Department of Transportation & Public Facilities as the Central District LSR&T Engineer.

1970 - 1972: Employed by the Department of Transportation & Public Facilities as the Central Region Design Engineer.

1967 - 1970: Employed by the Pearl Harbor Naval Shipyard as a General Engineer, GS-11. Was head of the scientific computer section for the shipyard.

EDUCATION

Bradley University. School of Engineering, Peoria, Illinois. Earned a Bachelor of Science in Civil Engineering.

University of Hawaii. School of Engineering, Honolulu, Hawaii. Earned a Master of Science in Civil Engineering.

Registered Professional Engineer in the State of Alaska. Registered Land Surveyor in the State of Alaska

Fred Seeger

BACKGROUND INFORMATION

Summary

Fifteen years experience in engineering and construction of oil and gas industry related capital projects with emphasis in the State of Alaska.

1979-1983: Engineering and construction management consultant engaged in providing management service to major oil industry engineering and construction companies including North Slope producers such as ARCO Alaska, Inc. Specific service functions included construction planning and design during the engineering phase of the projects, estimating and scheduling, economic analyses, and contracting strategy. Represented clients as construction manager to deliver projects within budget, schedule and quality requirements during the construction phase of the projects.

1978-1979: Employed by Northwest Alaska Pipeline Company in Senior Project Planning position involved with the Alaska Natural Gas Transportation System. Performed conceptual engineering and construction planning for the gas pipeline project relating to capital cost estimates, schedules, manpower and equipment estimates, labor relations, procurement and logistics.

1975-1977: Employed by Alaska Pipeline Service Company, in Senior Project Management position during construction of the Trans Alaska Pipeline. Developed and implemented policy and procedure to improve quality of construction on a section of the oil pipeline. Directed various construction programs, particularly those associated with the special Arctic construction and engineering problems; provided direction to contractor's management in planning and engineering.

1974-1975: Employed by Bechtel Incorporated, as Assistant Deputy Manager on Trans Alaska Pipeline and Roads Project. Handled administration and coordination of personnel in Engineering, Procurement, Inspection, and Traffic Departments for the proper and timely supply of over $2 billion worth of materials and equipment for camp and pipeline construction; coordinated task force groups in the development of unique Arctic construction procedures for the installation of engineered pipeline components; generated estimates and budgets for management

1969-1973: Employed by Shell Oil Company, as Project Engineer and Project Manager. Through various assignments was responsible for producing project feasibility studies, capital budgets, project design, specifications, contracts, negotiations on right-of-way, and managing construction.

EDUCATION

Purdue University, School of Civil Engineering, Lafayette, Indiana. Earned Master of Science in Civil Engineering and Construction Management.

Clarkson College, School of Civil Engineering, Potsdam, New York. Earned Bachelor of Science in Civil Engineering.

Registered Professional Engineer in the States of Alaska, California, New York, and Washington.

H. "Glen" Glenzer

BACKGROUND INFORMATION

Summary

Over 30 years of active service as a U.S. Naval Aviator in positions of increasing responsibility, including command, exercising management control of national programs. Record of achievement in planning functions and policy development.

Experienced in the administration and management of a large air station and maritime terminals with all the problems and considerations of a civilian facility including management, operation, maintenance, development and FAA and maritime rules and regulations, as well as all other civil and governmental agencies.

Served as chief staff executive with Alaska Chapter of Associated General Contractors of America, Inc. involved with all problems and considerations commensurate with the construction industry. Directly involved with highway, building and utility construction as well as labor negotiations, personnel administration, education and training programs. Also active in safety, equal employment opportunity, ecology, budgeting, and all management functions pertaining to large construction contractor firms dealing extensively with gonvermental and civilian agencies and corporations. Most recently served as Executive Director of the Alaska Construction Industry Advancement Program involved with all the above activities including A.G.C. members plus others in the industry.

1981-1983: Executive Director - ACIAP. All duties encumbent upon previous position as they related to not only AGC members but entire industry at large. Also had various consulting jobs mainly pertaining to Aviation and Marine Transportation.

1973-1981: Chapter Manager, Alaska Chapter Association General Contractors of America, Inc. Responsible for Safety Public Relations, Equal Employment Opportunity & Ecology compliance as well as participated in and reviewed bargaining agreements and grievances of labor union contracts. Performed all duties attendant with personnel and engineering management functions, in relation to heavy construction industry. Also taught courses in financial management, economics and marketing at Alaska Pacific University.

1970-1973: Naval Safety Center, Norfolk, VA., Director of Aviation Safety Directorate. Supervised, established and adiministered safety programs within entire naval establishment and with other service and agencies including FAA, CAB and all airlines connected with them.

1968-1970: Commanding Officer, Naval Station, Adak, Alaska. Commanded large Naval Station which in addition to the administration of a community of 6000 people included a naval station and terminal as well as surface shipping harbor and terminal. Administrated a $4.5 million operating budget and $6 to $12 million annual construction project funds. Conducted contract negotiations and awarded and supervised contracts with airlines, contractors and industrial concerns.

1947-1968: U.S. Navy

EDUCATION

BA, University of Maryland. Earned Business Administration degree, Master of Science Degree from the George Washington University of business Administration. Graduate of University of Southern California Safety Management Course, the George Washington University Safety Course, the George Washington University Course in Multi-Variants and Naval Post Graduate School of Monterey, California.

State of Alaska
House Transportation Committee
Ms. Bette Cato, Chairman
Pouch V
Juneau, Alaska 99811

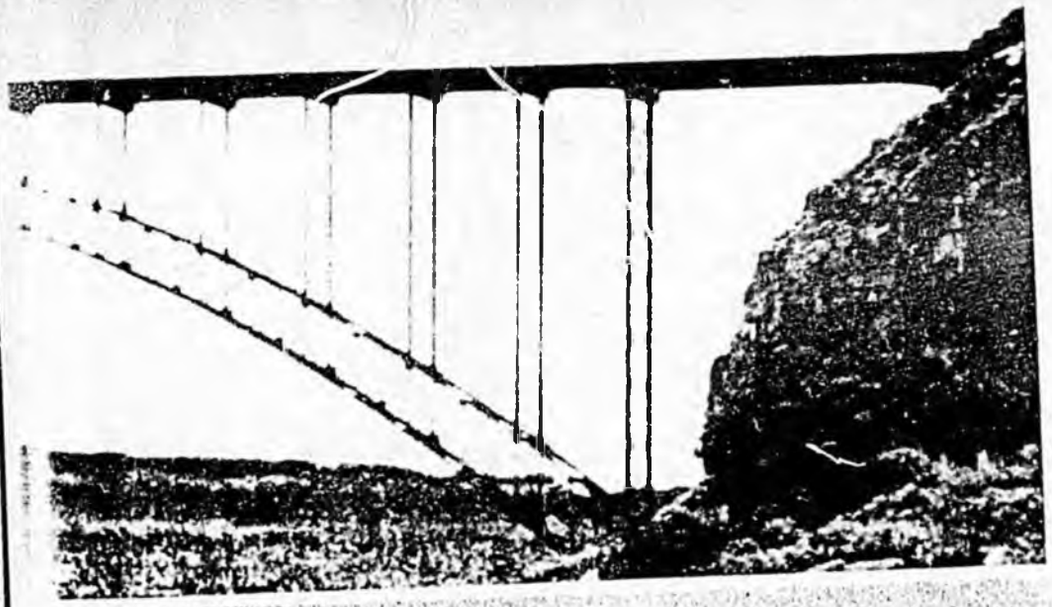
Dear Ms. Cato:

Federal-aid Highway funds in the amount of $1,285,335 have been obligated as a part of the preliminary engineering for a new ferry vessel to replace the Tustumena. Our records indicate we have obligated $69,520,547 in the Marine Highway system since 1961.

You also asked what categories of Federal-aid funds are available in Alaska. These categories are:

Interstate
Interstate 4-R (Rehabilitation, Restoration, Resurfacing, Reconstruction)
Consolidated Primary
Primary 4-R
Rural Secondary
Secondary 4-R
Urban
Bridge Off-System (not on a Federal-aid designated system)
Bridge On-System
Bridge On or Off-System
Economic Growth Center
Forest Highway
Hazard Elimination
Highway Planning and Research
Metropolitan Planning
Public Lands
Rail-Highway Protective Devices
Rail-Highway-Elimination of Hazards
Non-urban Public Transit

Sincerely yours,



Barry F. Morehead

Barry F. Morehead
Division Administrator

Bill Sheffield, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811
PHONE: (907) 465-4700

January 13, 1983

Dear Official:

Governor Sheffield, as stated in his press release of January 4, 1983, supports capital improvement projects which stimulate economic development and create jobs in the private sector. An orderly budget process is also one of his key objectives. Based on these objectives, the Department of Community & Regional Affairs invites you to submit requests for state grant funding for capital improvement projects.

Generally, capital improvement refers to projects of a large size, fixed nature, or long life which provide new or additional public facilities or services. Major replacements, upgrading, or rehabilitation of existing facilities are included. Three other kinds of expenditures may also be termed capital improvements: 1) land acquisition; 2) major equipment, fixtures and furniture; and 3) project planning activities, including architectural, engineering, legal expenses and feasibility studies.

Please provide this department with your request in a narrative form which addresses the following:

Project description (including the circumstances relating to why this project is needed)

Time tables for project completion

Budgetary needs

Operation and maintenance costs once the project has been completed - (How will your community/ region continue to operate the facility once it is complete or maintain equipment once it is purchased?)

Impact on the economic development of the community or region

Effect on local employment - (How many short and long term jobs will be created through the implementation of this project?)

Impact on the maintenance of life, health and safety

Also, within the narrative please provide a statement on land status if requesting a construction project.

If these projects have been included in a comprehensive plan, an agency study, or previously requested of another agency, please provide that information. Engineering plans, architectural plans or feasibility studies would also be helpful, if available.

A final item which should be included in your letter is the name and telephone number of the contact person within your agency for each project requested. This will assist us if there are issues to be clarified or if additional information is needed.

Non-profit organizations should submit their requests through municipalities. This will allow for an integrated community plan.

Once submitted, your request will be reviewed by this agency or another appropriate state agency. All recommended requests will be presented to the Governor who, in turn, will present his priorities to the legislature in the FY84 capital budget request.

The Department realizes that there is little time to prepare these requests since Governor Sheffield has asked for them by February 1. We do hope you can provide as much information as possible to help us review, evaluate, and make recommendations on the funding for these capital projects. Hopefully, next year there will be a process which provides enough time to adequately plan your grant requests.

It is also important to note that with the state's declining revenues and the voter approved spending limitation, the Department requests that only real community needs be identified.

Requests should be submitted to the address identified above. If you have any questions, please contact this office.

Sincerely,

Mark Lewis
Commissioner

The Department of Community and Regional Affairs

1982

OFFICE OF THE COMMISSIONER

MARK LEWIS

Commissioner

Commissioner's Office:

Room 213, Community Building
Pouch B
Juneau, Alaska 99811
465-4700

The Office of the Commissioner provides overall program and policy direction for the Department. The Commissioner is responsible for formulating Department policy and coordinating the activities of the staff in a manner that will maximize the capabilities of the Department to assist local governments.

The Commissioner serves in an advisory capacity to the Governor and the State Legislature on matters affecting local governments. The Commissioner also works with other state agencies to coordinate efforts to resolve problems affecting a community or region.

As provided by Section 14(c)(3) of the 1971 Alaska Native Claims Settlement Act and subsequently by State law (AS 44.47.150), the Commissioner is the Municipal Land Trustee for "community expansion lands" for unincorporated villages. The Commissioner administers these lands on behalf of the current residents and any future municipality which may be established.

The Commissioner also serves on the following boards and commissions:

- Alaska Coastal Policy Council
- Alaska Housing Finance Corporation Board
- Alaska Industrial Development Authority
- Alaska Municipal Bond Bank Authority
- State Census Coordinating Committee
- Alaska State Geographic Names Board
- Medical Facilities Authority
- Older Alaskans Commission

ALASKA COASTAL POLICY COUNCIL

The Council, consisting of nine members of the public and seven officials of State government, oversees the Alaska Coastal Management Program. The program provides for the planning and management of the State's coastal land and water resources.

ALASKA HOUSING FINANCE CORPORATION BOARD

The seven member board governs the operation of the Alaska Housing Finance Corporation. The AHFC has the power to make or participate in construction and mortgage loans (or other financing mechanisms) for lower and moderate income individuals and for those living in remote, underdeveloped or blighted areas.

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY

The Alaska Industrial Development Authority, a five member board, is responsible for providing a means of financing industrial and manufacturing plant construction, conversion or expansion within the State.

ALASKA MUNICIPAL BOND BANK AUTHORITY

The Bond Bank borrows money and issues bonds and notes to make funds available for borrowing by municipalities. The Commissioner is one of five directors.

STATE CENSUS COORDINATING COMMITTEE

The State Census Coordinating Committee, made up of State agency representatives, works with the U.S. Bureau of the Census to suggest techniques and methodologies to improve the U.S. Census count. Committee activities also focus on improving State population counts.

STATE GEOGRAPHIC BOARD

The eight member Board determines appropriate names for lakes, streams, places and other geographic features in the State. The Board also cooperates with the United States Geographic Board to coordinate State and federal designations of geographic features.

DIVISION OF ADMINISTRATIVE SERVICES

BOB REHFELD
Director

Director's Office:

Room 216, Community Building
Pouch B
Juneau, Alaska 99811
465-4709

Anchorage Office:

225 Cordova, Building B
Anchorage, Alaska 99501
264-2230

The Administrative Services Division provides general administrative support to the Department's program managers in the areas of fiscal planning, analysis, reporting and control, accounting, records management, and purchasing. Support is provided to offices in Juneau, Anchorage, Fairbanks, Bethel, and Nome. Support services will be extended to departmental loan information offices to be established in Kotzebue and Dillingham in 1981.

The Division is also responsible for the departmental personnel functions. Assistance is provided in the areas of recruitment and hiring. The Division, under the guidance of the Deputy Commissioner, advocates equal employment opportunities for Department staff, as well as for applicants.

The Division coordinates the preparation of the Department's operating budget (totalling in excess of $90 million for FY 1981).

Assistance is also provided in compiling applications for federal funding. The Division contracts with private CPA firms to satisfy the audit requirements of federal programs.

EMPLOYMENT OPPORTUNITY DIVISION

(formerly the)

DIVISION OF COMMUNITY EMPLOYMENT AND TRAINING ASSISTANCE (CETA)

KAREN PERDUE
Director

Director's Office:

Room 109, Community Building
Pouch BC
Juneau, Alaska 99811
465-4890

Field Offices:

225 Cordova, Building B

Juneau, Alaska 99811
465-4814

Council Office:

Alaska Private Industry Council
Coordinator
225 Cordova, Building B
Anchorage, Alaska 99501
279-3462

The CETA Division operates the federally-funded manpower programs of the Comprehensive Employment and Training Act. The Division provides unemployed and low-income Alaskans with the training and experience needed to find and keep permanent jobs. Employment counselors work directly with program participants, while private businesses, educational institutions, community organizations and public agencies, with whom the Division contracts, offer the needed job training.

The Division operates the CETA program in all of the State, except for Anchorage. The Municipality of Anchorage and 15 Native nonprofit organizations administer their own programs.

The major programs of the Division include:

- Classroom Training
- On-The-Job Training
- Adult Work Experience
- Youth Employment Programs
- Job Counseling and Support Services
- Day Care Assistance
- Matching Grants for Head Start Programs

The Division staff also work with a variety of advisory councils:

- Alaska Private Industry Council
- State Manpower Services Council
- Governor's Manpower Planning Council/Regional Advisory Boards

CLASSROOM TRAINING

Classroom training takes place in a college or vocational school where the participant learns the technical skills for a specific job. This activity also provides remedial studies in math and reading or help with the GED (General Educational Development) diploma. The cost of tuition, books and supplies is covered and participants are paid a living allowance.

ON-THE-JOB TRAINING, ADULT WORK EXPERIENCE

The CETA Division also provides training in which the participant gains experience under actual working conditions. These programs include on-the-job training and adult work experience. The participant is hired by the CETA contractor and becomes an employee of that firm or agency under its work and personnel rules. The CETA participant is hired for a beginning-level job at prevailing wages and benefits. The CETA Division reimburses the firm or agency for all or part of the employee's wages.

"On-the-Job Training" oversees the placement of CETA participants in private (profit-making only) businesses. During the four or five months it takes to train the participant, the program reimburses the employer for certain training costs.

"Adult Work Experience" places participants in public agencies and community organizations. Positions are part-time or short-term and are for individuals who have never worked, have a poor work history or who have been out of work for a long time.

YOUTH EMPLOYMENT PROGRAMS

Youth employment programs are aimed at helping young people make a successful transition between school and work. CETA activities such as classroom training, on-the-job training and work experience are often combined. Special emphasis is placed on encouraging youth to finish and/or continue their education. The program consists of "Transition Services" and "Career Employment Experience." Transition Services gives in-school youth career counseling, labor market information and job seeking skills. Career Employment Experience combines this assistance with actual work experience.

JOB COUNSELING AND SUPPORT SERVICES

Additional employment services are also available to CETA participants who need them in order to start or stay in training. These services include job counseling and temporary help with medical, child care, legal and housing problems.

ALASKA PRIVATE INDUSTRY COUNCIL

When CETA was reauthorized by Congress in 1978, special emphasis was placed on training participants for jobs in the private sector. The Council advocates the training and hiring of low-income Alaskans by private enterprise. The Council is sponsored jointly by the CETA Division and the Municipality of Anchorage.

STATE MANPOWER SERVICES COUNCIL

The State Manpower Services Council advises the State CETA Division and the Municipality of Anchorage on their manpower programs. The Council coordinates their efforts with those of 15 Native nonprofit organizations which operate CETA programs, the employment services of several State agencies, and the vocational training programs of numerous institutions.

GOVERNOR'S MANPOWER PLANNING COUNCIL/REGIONAL ADVISORY BOARDS

The Governor's Manpower Planning Council advises the State on its CETA programs. Regional advisory boards provide input on local employment needs to the five regional (field) offices.

DAY CARE ASSISTANCE

The Day Care Assistance program provides aid to low income parents needing day care for their children in order for them to work or receive training. Funds are awarded to municipalities through subcontracts. The program is administered at the local level and child care must be provided through licensed centers or homes.

MATCHING GRANTS FOR HEAD START PROGRAMS

The Division awards grants to various non-profit agencies participating in the Federal Head-Start program. The grants are used to satisfy the required 20% local match. Technical assistance is also provided.

DIVISION OF COMMUNITY PLANNING

LAWRENCE H. KIMBALL, JR.
Director

Director's Office:

225 Cordova, Building B
Anchorage, Alaska 99502
264-2206

Juneau Office:

Room 310, Community Building
Pouch B
Juneau, Alaska 99811
465-4750

The Division of Community Planning offers a broad range of planning related services in support of community and regional development. Services offered include direct staff technical assistance as well as matching grants under a variety of State and federal programs.

The Division's activities include:

- Planning Advisory Services
- Alaska Coastal Management Program/Coastal Energy Impact Program
- HUD '701' Comprehensive Planning Program
- Bottomfish Community Development Program
- Municipal Lands Trustee Program
- Alaska Native Claims Settlement Act 14(c) Technical Assistance Program
- Major Project Review
- National Flood Insurance Program
- Policy Research and Planning Studies
- Interagency Task Force Participation
- Publications

PLANNING ADVISORY SERVICES

Upon request, the Division will assist communities in their planning efforts. The Division offers training sessions for city councils, traditional councils, planning commissions, municipal land planners/ managers, regional non-profit corporations, etc. Assistance is also provided in developing community land use plans, implementing ordinances, performing housing site analyses and selection. Additionally, assistance is offered in matters pertaining to land reconveyances under the terms of Section 14(c) of the Alaska Native Claims Settlement Act (including the preparation of "Plans of Survey" for these reconveyances).

ALASKA COASTAL MANAGEMENT PROGRAM

Financial and technical assistance is provided to "coastal resource districts" (local units responsible for preparing coastal resource plans). Grants requiring a minimum 20% local contribution are offered. The grant funds can be used to prepare new or continuing district programs, carry-out or revise a program already approved by the State, or for special projects which further the objectives of an approved program. The Division also offers staff assistance and will assist a district in obtaining consultant services for developing a local program.

Division personnel also share responsibility for the Coastal Energy Impact Program with the Local Government Assistance Division. The Division assists municipalities in assessing planning and facility needs and in preparing related studies.

HUD '701' COMPREHENSIVE PLANNING PROGRAM

The U.S. Department of Housing and Urban Development offers Comprehensive Planning Assistance ('701') funds to the State. Local planning projects supported by the '701' program include comprehensive plans, housing studies, and the development of implementation ordinances. The '701' program also addresses statewide planning issues and supports a work-study program for graduate students. Staff assistance and planning grants (which require a minimum one-third local contribution) are available through the Division.

BOTTOMFISH COMMUNITY DEVELOPMENT PROGRAM

This program is a key strategy within the State's overall program to develop the Alaskan bottomfish industry. Through the Community Development Program, the Division assesses the needs and capabilities of targeted communities to support fisheries development, assists communities with physical, socio-economic, environmental, legal and financial planning for fisheries development, and offers a limited amount of grant funds to communities for studies related to the development of facilities and services. The Division also conducts special studies related to community development issues (such as the feasibility of port authorities, development of housing strategies and evaluations of facility site alternatives).

MUNICIPAL LANDS TRUSTEE PROGRAM

Section 14(c)(3) of the Alaska Native Claims Settlement Act (ANCSA) requires village corporations in approximately 94 unincorporated Native villages to convey "community expansion" lands to the State in trust. Pursuant to State law (AS 44.47.150), the Commissioner of the Department of Community and Regional Affairs, is designated to accept, administer and dispose of [illegible] trust lands on behalf of the current residents and any future municipalities which may be established. Under the Municipal Lands Trustee Program, these lands are made available for schools, airports, solid waste disposal sites, health clinics, community halls, housing, and other public uses desired by village residents. When a village incorporates, the Division transfers all remaining trust lands and associated revenues [illegible]t village to the new municipality.

ALASKA NATIVE CLAIMS SETTLEMENT ACT (ANCSA) 14(c) TECHNICAL ASSISTANCE PROGRAM

This program provides training and technical assistance on community planning, realty, and land management principles for communities and village corporations involved with ANCSA 14(c) "Plans of Survey." Training materials and instruction by Division staff provide the knowledge necessary to complete a "Plan of Survey" for submission to the U.S. Bureau of Land Management. Clients of the program are local residents, local staff and officials, and village corporation representatives. Requests for assistance under this program may be generated from a local government or jointly from a local government and village corporation.

MAJOR PROJECT REVIEW

Major Project Review is a procedure established by the Governor which requires a detailed review of development projects proposed in the State. A complete analysis of the project's effects as well as benefits is done. Types of activities which are subject to Major Project Review include the Haul Road, major coal development projects in which the State would become involved, and State oil and gas lease sales. These analyses are used by the Governor to guide decisions on issues related to these projects. One of the criteria used in the review is "community well-being." Division personnel address this question.

NATIONAL FLOOD INSURANCE PROGRAM

The National Flood Insurance Program (NFIP) is a federal program which identifies floodprone areas within communities and provides insurance for owners of structures or improvements located within the floodprone areas. The insurance is available only if the community enacts regulations for locating improvements in the floodprone areas. The Division provides communities with information about the program and aids local governments desiring to join the program (including assisting in the development of floodplain management regulations). The Division is developing educational materials that will explain the dynamics of flood hazards and suggest possible mitigation factors. Increased participation in the development of the State's floodplain management policy is also planned.

POLICY RESEARCH AND PLANNING STUDIES

The Division frequently conducts research into planning and development issues facing local communities or residents of a particular region. Examples of such research include a major study of planning mechanisms for the Unorganized Borough (initiated in 1980) and a study of community planning and development issues associated with the Alaskan bottomfish industry (completed in 1980).

INTERAGENCY TASK FORCE PARTICIPATION

The Division actively participates in several task forces. These committees address such issues as floodplain management, Beluga coal development, and the natural gas pipeline. In this role, the Division contributes to the development of State policy and evaluates the effect of policy options on local communities, regions and other programs. By participating in State, federal and local task forces, the Division offers a comprehensive approach to problem solving and issue identification.

PUBLICATIONS

The Division publishes a newsletter, *Planning Insert*, approximately eight times a year. The Division is also developing a series of handbooks on planning issues. The "Alaska Coastal Management Program Guidebook Series" was published in 1979. Additionally, the Division has developed Community Profiles for cities and villages throughout the State. To date, Community Profiles have been completed for the Northwest Alaska, Copper River Basin, Aleutian/Pribilof Islands, Lower Yukon, and Middle Kuskokwim regions of the State. Community Profiles for the Bering Straits Region and Prince of Wales Island in Southeast Alaska will be completed in 1981.

DIVISION OF HOUSING ASSISTANCE

BARBARA MORSE-QUINN

The Division of Housing Assistance, established during the 1980 Legislative Session, administers programs which provide financing for home mortgages, construction of senior citizen rental housing and supplemental funding for financing of HUD low income housing.

In an effort to serve the rural areas of Alaska, the Division has established five field offices located in Kotzebue, Bethel, Dillingham, Fairbanks, and Nome. These offices are staffed by loan information officers who are trained to assist individuals seeking a Rural Housing Loan and provide comprehensive loan information on all State loan programs.

The major programs of the Division include:

°Rural Housing Loans

°Urban Nonconforming Housing Loans

°Rural Non-Owner Occupied Housing Loans

°Senior Citizen Housing Development Grants

°Supplemental HUD Housing Development Grants

RURAL HOUSING LOAN PROGRAM

The Rural Housing Loan Program provides monies to be used for the origination or purchase of housing loans in rural areas of Alaska. A rural area is defined as any area under 4,500 population not directly connected by road or rail access to Anchorage and Fairbanks. Housing loans include mortgages, construction loans, rehabilitation loans and loans for non-conforming housing. Non-conforming housing is defined as housing that does not meet national or State building code requirements. The housing must, however, meet minimum standards of structural integrity and be devoid of any hazardous conditions. The interest rate for all rural housing loans has been set by the Legislature at 10 1/2/%.

URBAN NON-CONFORMING HOUSING LOAN PROGRAM

The Urban Non-Conforming Housing Loan Program provides for the origination or purchase of non-conforming housing loans in urban Alaska. The interest rate for this program has been set by the Legislature to equal the same interest rate charged by the Alaska Housing Finance Corporation for its single family owner-occupied housing loan program.

RURAL NON-OWNER OCCUPIED HOUSING LOAN PROGRAM

The Rural Non-Owner Occupied Housing Loan Program provides financing for rental housing from 1 to 8 units in rural areas of Alaska. This program is designed to serve rural communities with a significant housing shortage or abundance of inadequate housing. The interest rate on loans under this program has been set by the Legislature at 10 1/2%.

SUPPLEMENTAL HUD HOUSING DEVELOPMENT GRANT PROGRAM

The Supplemental HUD Housing Development Grant Program provides up to 20% of the cost of roads, electricity and water/sewer associated with construction of Federal HUD low-income housing in rural areas of the State. Funds are awarded to the 12 regional housing authorities that participate in the HUD program.

SENIOR CITIZEN HOUSING DEVELOPMENT PROGRAM

The Senior Citizen Housing Development program provides grants to municipalities and public non-profit corporations for the planning and construction of senior citizen housing.

The purpose of this program is to:

°assure that all senior citizens have safe and comfortable housing within their communities so that they may remain in a familiar and supportive environment among family and friends;

°assure that all new federal funds allocated for construction, management and operation of senior citizen housing in Alaska are used in Alaska and not lost through allocation to other states; and

°prevent premature institutionalizing of senior citizens in the Pioneer Home or other nursing homes by providing subsidized housing.

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

JEFF SMITH
Director

452-7126

The Division of Local Government Assistance provides technical assistance for and information on a variety of government programs. Additionally, the Division is concerned with municipal government in Alaska and provides assistance to communities wishing to incorporate.

The Division's activities include:

- Bulk Fuel Storage Grants
- Circuit Rider Training Program
- Community Legal Assistance Grants
- Farm and Agricultural Land Deferred Tax Program
- Full Value Determinations
- Juneau Indemnification Act Reimbursements
- Municipal Officers Training Seminars
- Rural Development Assistance Grants
- Senior Citizen Tax Relief
- State Revenue Sharing
- Coastal Energy Impact Program
- Legislative Grant Program
- Publications

The Division also provides staff support for the

- Local Boundary Commission

BULK FUEL STORAGE GRANTS

Grants of up to $60,000 are available for communities to construct and equip bulk fuel storage facilities. The principal objective of the program is to lower the cost of home heating fuel by facilitating the purchase of fuel in bulk. Communities must assume responsibility for the operation and maintenance of the facility once construction is completed.

CIRCUIT RIDER TRAINING PROGRAM

The Circuit Rider Training Program provides regular municipal management training assistance to selected municipalities. Assistance is also provided to other communities when requested and as resources allow.

COMMUNITY LEGAL ASSISTANCE GRANTS

Community Legal Assistance is a program that provides grants to communities and regions enabling them to obtain legal assistance for a single legal problem. Grants are awarded when the community or region is unable to procure legal aid due to the high costs involved and/or the lack of local financial resources.

FARM AND AGRICULTURE LAND DEFERRED TAX PROGRAM

The Farm and Agriculture Land Deferred Tax Program provides reimbursement to municipalities for lost revenue resulting from assessments based on farm use rather than full value. The principal objective of the program is to provide a measure of tax relief as an incentive for farmers to retain their land for agriculture and/or the raising of livestock.

FULL VALUE DETERMINATIONS

The annual Full Value Determination provides comparative assessment-equalized taxable property values for organized boroughs and cities. The principal objective of the program is to provide municipalities with comprehensive Ad Valorum tax base information and insight into local revenue efforts. The full value figures are used for determining statewide average per capita values, municipal property tax limitations, municipal entitlements under the State Revenue Sharing Program, and equalized percentage formulas (used in determining the amount of state aid for which a school district may qualify under the Public School Foundation Program).

JUNEAU INDEMNIFICATION ACT REIMBURSEMENTS

The Division oversees implementation of the Juneau Indemnification Act. The Act allows Juneau property owners, upon the sale or transfer of ownership (or the inability to sell), to be reimbursed for loss of investment capital if and when property values in the Juneau area reflect a depressed economy due to the capital relocation initiative.

MUNICIPAL OFFICERS TRAINING SEMINARS

The Division offers annual training seminars for municipal managers, attorneys, accountants, assessors and clerks. The objective of the program is to increase the effectiveness of municipal officials in the performance of their duties.

RURAL DEVELOPMENT ASSISTANCE GRANTS

Rural Development Assistance Grants are offered to communities under 2,000 in population (including first class and home rule cities) for projects that will increase employment or promote economic development. The grants have been used to construct health clinics, city offices, harbormaster facilities, libraries, day care centers, electrical generating and distribution systems, etc. Communities must show the ability and the commitment to provide for the operation and maintenance of the facility once it is completed.

SENIOR CITIZEN TAX RELIEF PROGRAMS

The Division oversees several senior citizen tax relief programs. The "Senior Citizen Homeowner's Exemption" exempts the permanent dwelling of a resident, 65 years of age or older, from municipal property tax. The State reimburses the municipality for the lost revenue.

The "Senior Citizen Renter Property Tax Equivalency Payment" supplements the Homeowner's Exemption program by reimbursing eligible senior citizen renters for the portion of their rent that pays for property tax.

The "Senior Citizen Special Assessment Exemption" defers the special assessment fee, levied by municipalities, for water and/or sewer installations. The State reimburses municipalities for the lost revenues. The exemption requires that a lien, in favor of the State, be filed on the property.

The "Senior Citizen Motor Vehicle Registration Tax Payment" exempts the Annual Motor Vehicle registration fee and any local vehicle tax for senior citizens. The exempted local tax amount is reimbursed to municipalities by the State.

STATE REVENUE SHARING

Municipalities, native village governments outside cities, and volunteer fire departments outside cities and boroughs are eligible to apply annually for financial aid under the State Revenue Sharing Program. Entitlements for municipalities are computed according to an established equalization formula that considers the applicant's population, taxable wealth and tax effort. Additionally, payments are made for certain municipal services (roads, health facilities, hospitals, etc.) The equalization formula is intended to benefit those municipalities with the greatest need for revenue sharing funds (those with a relatively low tax base). All municipalities are entitled to a minimum of $25,000 + COLA. Payments to native village governments are $25,000 each. Volunteer fire departments are entitled to $10 for each person served.

COASTAL ENERGY IMPACT PROGRAM (CEIP)

The Coastal Energy Impact Program is a federal grant program designed to assist local and State governments plan for and minimize the adverse impacts from energy related activities in the coastal zone. The U.S. Congress authorized a $2 billion appropriation for the program in 1976. Allotments to Alaska during the initial years of the program have funded a variety of studies, including comprehensive plans, feasibility studies, engineering and architectural designs for capital improvements, as well as evaluations of possible effects on fisheries and other wildlife resources. Division personnel, with the assistance of the Community Planning Division, administer the Coastal Energy Impact Program. In addition to the grants made available by the program, the Division offers low interest loans for certain capital improvements.

LEGISLATIVE GRANT PROGRAM

The Division administers many of the grants given to unincorporated communities and non-profit corporations by the Legislature. For FY 1981, for example, the Division will administer 75 grants (totaling over $9.5 million) along with 22 active grants from FY 1980 (for $2.5 million). Grant projects include the purchase of heavy equipment, construction of community facilities, community electrification, the development of educational programs, etc.

PUBLICATIONS

Annually, the Division prepares and distributes the following general reference documents:

- Alaska Municipal Officials Directory (in cooperation with Alaska Municipal League)
- A map illustrating Alaska's municipalities
- Alaska Taxable, Municipal Property Assessment and Full Value Determinations Report
- City Financial Reporting Manual
- Total 29 (an updated version of Alaska Statutes Title 29--Municipal Government)

TASK FORCE ON FIRE PREVENTION AND CONTROL

The Task Force on Fire Prevention and Control (created by the 1980 Legislature) is responsible for identifying the major causes of fire and recommending organizational and/or operational modifications to the State's fire fighting system. The changes are intended to reduce the loss of life and property and to improve the effectiveness of the local, state and federal systems. The Task Force submitted their final report, Alaska on Fire, to the Governor and Legislature 8/82.

LOCAL BOUNDARY COMMISSION

The Local Boundary Commission, consisting of five members appointed by the Governor, is responsible for the review and disposition of local government boundary changes, petitions for incorporation, annexations and detachments. The Commission considers the ramifications of local boundary petitions on the State, as well as the affected local government. In addition to acting on these petitions, the Commission may independently recommend boundary changes to the Legislature.

Work Sessions

Goals 3

Issues

HOUSE TRANSPORTATION COMMITTEE MEETING

DAILY AGENDA

1) CALL MEETING TO ORDER

2) Wednesday, March 7, 1984
Note Time

3) Note members present and excused

4) Recognize VIP's

PROCESSION OF MEETING

5) Discuss proposed legislation:
LSR&T Legislation: Have in Folders a Committee Substitute Work Draft. Also have answers to questions asked in Committee concerning LSR&T Program. We have Charles Karella from DOTPF and the LSR&T Program here to address the Committee and any questions/concerns members have.

6) Committee Schedule for this week:
Thursday HB 512 Work Session-Subcommittee

7) Announce time of adjournment

RE: 242C-2519
Atka
LSR&T Program

Ms. Julie Dirks
Administrator
Atka Village Council
Atka Rural Branch
Atka, Alaska 99502

Dear Ms. Dirks:

Thank you for your letter of November 7, 1983, expressing a need for aid in the funding of another LSR&T road construction project in the community of Atka.

I regret to inform you that presently we do not have the monies needed to fund the upgrading of your communities existing road system. Our Local Service Roads and Trails program now functions on a five year plan, with contingency monies being made available during the third year of the five year plan.

As you are probably aware, LSR&T projects are funded by a voter approved bond issue every two years. Recently our program for projects scheduled for the years 1984 and 1985 was submitted to Juneau for inclusion in the State budget. Funds approved for these projects will be conditional to voter approval of the next November bond issue (November, 1984).

At the earliest, it is improbable that any LSR&T funds will be available for your construction needs prior to the year 1986. The exceptions to this time frame would be if a previously scheduled LSR&T project was deleted for some valid reason or if a special appropriation was made available by the legislature for this purpose.

Your request will be placed on active file in our office and given consideration for funding at every opportunity. We will contact you when your project advances beyond the planning stage. Should you have any questions concerning the Local Service Roads and Trails program, feel free to contact this office at the above address or call me at 266-1542.

Sincerely,

Robert L. Haneline

Robert L. Haneline
Central Regional
LSR&T Engineer

QUESTIONS POSED IN COMMITTEE 2/7/84
FOR DOTPF

1. Need clarification from DOTPF on why the Governor reduced the funding from last year.

2. Are there any funds left over from the $7 million appropriated SL'83, Chapter 94?

3. What are the characteristics of the expenditures for those projects, and funding amounts?

MEMORANDUM

State of Alaska
Department of Transportation & Public Facilities

TO: John J. Simpson, Director
Standards and Technical Services

DATE: March 5, 1984

FILE NO:

TELEPHONE NO: 789-6247

FROM: Charles D. Karella
Standards LSR&T Engineer

SUBJECT: House Transportation Inquiry

In response to questions posed in committee 2/7/84:

Question 1. Need clarification from DOT&PF on why the Governor reduced the funding from last year.

Response: The Governor reduced the funding at the request of DOT&PF. Since the SLA 1983 Allocation was not considered as a "one-time-shot-in-the-arm", the DOT&PF recommended the reduced amount and inclusion of annual funding for LSR&T in all future Capital Improvement Program.

Question 2. Are there any funds left over from the $7 million appropriated SLA '83, Chapter 94?

Response: The attached funding status reflects $4.8 million remaining to be obligated.

During the period of time the program was in phase-out status (1/2/82 to 7/25/83) no planning for future LSR&T projects was accomplished. As a result, it has taken some time to accelerate the program. A Statewide five-year program has now been prepared, and by the end of calendar year 1984, the program should be up to its former capability once again with the remaining funds used.

Question 3. What are the characteristics of the expenditures for these projects, and funding amounts?

Response: The following reflects the character and funding amounts for these projects:

Collocation Code	Project	Name	Funding
24811560	G00001	Local Govt I	70,000.00
	G17005	RR Lease Area Paving-Whittier	100,000.00
		Collocation Totals:	170,000.00
24811561	G10114	DOT-Equipment	250,000.00
	G10154	Newhalen Subdivision Rds	50,000.00
	G10155	New Stuyahok City Streets	100,000.00

FILE NO: 2519

TELEPHONE NO: 789-0841

FROM: Charles D. Karella
LSR&T Engineer
DC&M Standards

SUBJECT: LSR&T Program

This program is designed to accomplish the most with the least amount of State dollars under the rules and regulations of the Alaska State Statutes, 19.30.111 - 19.30.251.

FUNDING

First Allocation	1971	$ 6 Million
	1972	4 Million
	1974	8 Million
	1976	7 Million
	1978	15.8 Million
	1980	10 Million
Last Allocation	1983	7 Million
Total Allocation		$60.8 Million

Reimbursements remaining — ~~remaining~~ ~~Projects~~ what's that mean?

Projects (Dollars)

Completed or under agreement	$54.5 Million
Reimbursements remaining	6 Million

Under the present allocation, Local Governments throughout the State share 57% of each LSR&T Bond issue. The unorganized boroughs share in the remaining 43%. Annual expenditures average to this percentage.

ANNUAL PROGRAM (Typical)

1. 150 Active Projects
   50 Road Projects Completed
   50 Miles of Road Completed
   2000 Miles of Winter Trail Staking
   Several Miles of Boardwalk
   Foot Trails and Bike Paths

2. Expenditures For Typical $6.0 Million Annual Program

Roads	$4.5 Million	(75%)

Includes $1.1 million (25%) for subdivision streets and roads.

Trail Staking	$100,000	(2%)
Boardwalks	600,000	(10%)
Foot Trails	200,000	(3%)
Bike Paths	100,000	(2%)
Shelter Cabins	50,000	(1%)
State Maintenance Routes	250,000	(4%)
Engineering and Administration	200,000	(3%)

3. Administrative support is $200,000 or 3%

PROGRAM PHASE OUT

During the period of time the program was in a phase-out status (1/2/82 to 7/25/83) no planning for future LSR&T projects was accomplished. As a result, it has taken some time to accelerate the program. A Statewide five-year program has now been prepared, and by the end of calendar year 1984, the program should be up to its former capability once again.

MANAGEMENT

LSR&T Managers and Project Engineers are tailored after the early Alaska bush pilots. Quite often, they have to operate by the seat of their pants, which is why this program is successful.

LSR&T PROGRAM 1977-1981

1. 250 road projects completed.
   Average Length one mile.
   Average cost $100,000.00

2. Expenditures $25 Million.

3.* $19.0 million for road projects, includes five million for subdivision roads.

4. $750,000 for project administration charged to projects.

*It is difficult to define subdivision roads or streets, i.e. access roads to new subdivisions can be considered an intergal part of the subdivision network or in some communities, it may be the only transportation corridor available. For this report, subdivision roads are those roads or streets within subdivisions, designated as such, by the local entity.

5. One million dollars for program support ($200,000 per year).

6. Administered several special legislative appropriated projects; totalling in excess of a million annually.

COST COMPARISON

The cost of a project constructed under contract ranges between 25% and 200% more than a comparable project constructed with local equipment rental when available or LSR&T equipment and local hire, depending on size and location. Much of this is due to our policy of paying the prevailing community wage.

PRESENT PROGRAM

See Attached.

SUMMARY

Over 95% of all Alaskan communities have had at least one LSR&T project since the program set out to "Get the people out of the mud" in 1971.

There are many reasons why the program is successful, least of which is the maximization of State dollars. The LSR&T Program offers more to a rural community than just a finished product; it offers a learning experience. Traditionally, LSR&T has been able to offer additional benefits to the community as the program is tailored to their needs.

The LSR&T program spends a considerable amount of time administering projects funded through special Legislative appropriations and grants. In administering these projects for the Department, the program guarantees the credibility of the State in its commitment to meet the transportation needs of the bush communities.

CITY OF PETERSBURG	1 Project	20,000
CITY AND BOROUGH OF JUNEAU	2 Projects	361,000
CITY OF KETCHIKAN	3 Projects	80,000
Total Local Government	11 Projects	$826,000(2)
TOTAL REGION	24 Projects	$1,291,000

(1) Includes 8 projects funded with $144,000 from 1983 allocation.

(2) Includes 6 projects funded with $291,000 from 1983 allocation.

LOCAL SERVICE ROADS AND TRAILS PROGRAM

Primary Functions:

The Local Service Roads and Trails (LSR&T) program was established by the State Legislature in 1971 to provide for special needs to "bush" communities, rural communities and communities both within and outside of organized boroughs.

Local Service Roads and Trails was designed to aid communities in accomplishing projects that do not have the financial means nor the technical expertise to achieve alone. These projects were to be in the nature of roads, trails, bridges and boardwalks specifically. Special exceptions are considered and granted if justification is sufficient.

The LSR&T Program is wholly State funded. Wherever costs are not prohibitive, generally within organized boroughs, projects are awarded by bid contract. In the remote areas where, because of location and size of the project bid contracts cost are prohibitive, LSR&T maintains its own small fleets of equipment or rents equipment, if available, and directs the operation of the projects.

The scope of LSR&T is basically three-fold. This is particularly true for "bush" projects. It provides:

1. Needed projects to communities that have not the capabilities of accomplishing alone.

2. A source of training for construction work by employing local residents as laborers and equipment operators.

3. Provides supplemental income to communities that are single-income or subsistence oriented.

Project Limitation:

Local Service projects are confined to roads which are not part of the primary federal-aid system and are not the responsibility of corporate units or private individuals but are dedicated to public use. These projects cover wide ranging road needs. They include State recreation routes, connections between outlying villages and airports, villages and canneries, villages and port facilities, short routes needed to better integrate subdivision roads and State highways, and improvements to existing roads.

PLANNING

Five Year Program

The allocation districts are the boundaries of the Highway Department established in 1970. The larger of the five districts being the Western District, engulfing nearly half of the land mass of Alaska, is administered by the Central and Northern Regions. This split jurisdiction is strictly an economic measure.

Whenever organized boroughs whose boundaries partially overlap allocation districts, the administrative responsibility lies with the primary region.

A construction program utilizing LSR&T construction equipment, State employees, village labor, and equipment rental when available, is the primary mode of operation in the unorganized boroughs of the Central, and Northern Regions. Programming the projects in the unorganized boroughs depends on requests from local governing bodies (both submitted and solicited), available road building materials, right-of-way access, and coordination of other projects in the area.

The State equipment fleet and maintenance personnel are utilized when local equipment is not available or when a contract for the work is not feasible.

The Local Service Roads and Trails Program is a vital link in the State road network. It is the only State program established for solving local transportation needs. During a typical construction season, several miles of new road, new and reconstructed boardwalk, year around foot trails, winter trail staking, foot bridges, paved bike paths and vehicle bridges are constructed with LSR&T funds.

These and other special projects are completed each year in answer to what the LSR&T is all about, "Get the people out of the mud". This program does a lot for all the people of Alaska and is presently performing a service the people of Alaska could not do without.

Summary

I. Definition

A. Purpose

a. To get people out of the mud
b. Flexibility of Program
c. To aid communities with no revenue
d. Economy of operation

B. Type of Projects

a. Local Service Roads
b. Year around foot trails
c. Winter trail staking
d. Bicycle paths
e. Erosion control
f. Foot bridges
g. Boardwalks

II. Allocation

A. F.Y. Year Legislation (6 million proposed)
B. Five Year Duration
C. 50-50 Factor, Area - Population
D. Operating Budget - Program Support

a. Bridge Design - Headquarters
b. Road Design and Advertising - Region
c. R/W Certification - Region
d. Construction Review - Region
e. Administration Headquarters and Region

III. Administration

A. Allocation District - Regional Control
B. Organized Boroughs and Home Rule Cities

a. Construction contract by Local Government
b. Local Government Labor and Equipment

C. Unorganized Boroughs

a. Construction Contract by Local Government or State
b. Village or City Labor and Equipment
c. State Equipment and Village Labor
d. State Equipment and State Employees
e. State Equipment and Village State Employees

IV. Five Year Program

A. Project Selection

a. Organized Boroughs, First Class Cities and Home Rule Cities

1. Select their own projects
2. Able to change program at will

b. Unorganized Boroughs

1. Cities and Villages select their own projects.
2. Region sets priorities within funds available.
3. Regions may subfill projects with funds available on non-federal routes.

APPLICANT GUIDELINES

Nature and Purpose of Program:

To provide State assistance in the development of roads and trails on routes that are not eligible for federal-aid matching funds.

Who May Apply:

Each organized borough, first class city and home rule city is eligible for a direct allocation, based on their population and area. All other areas are considered unorganized boroughs and are eligible for projects administered by the Department, subject to priority scheduling within the respective allocation districts.

Authorizing Legislation:

AS 19.30.111-251

Administrative Agency:

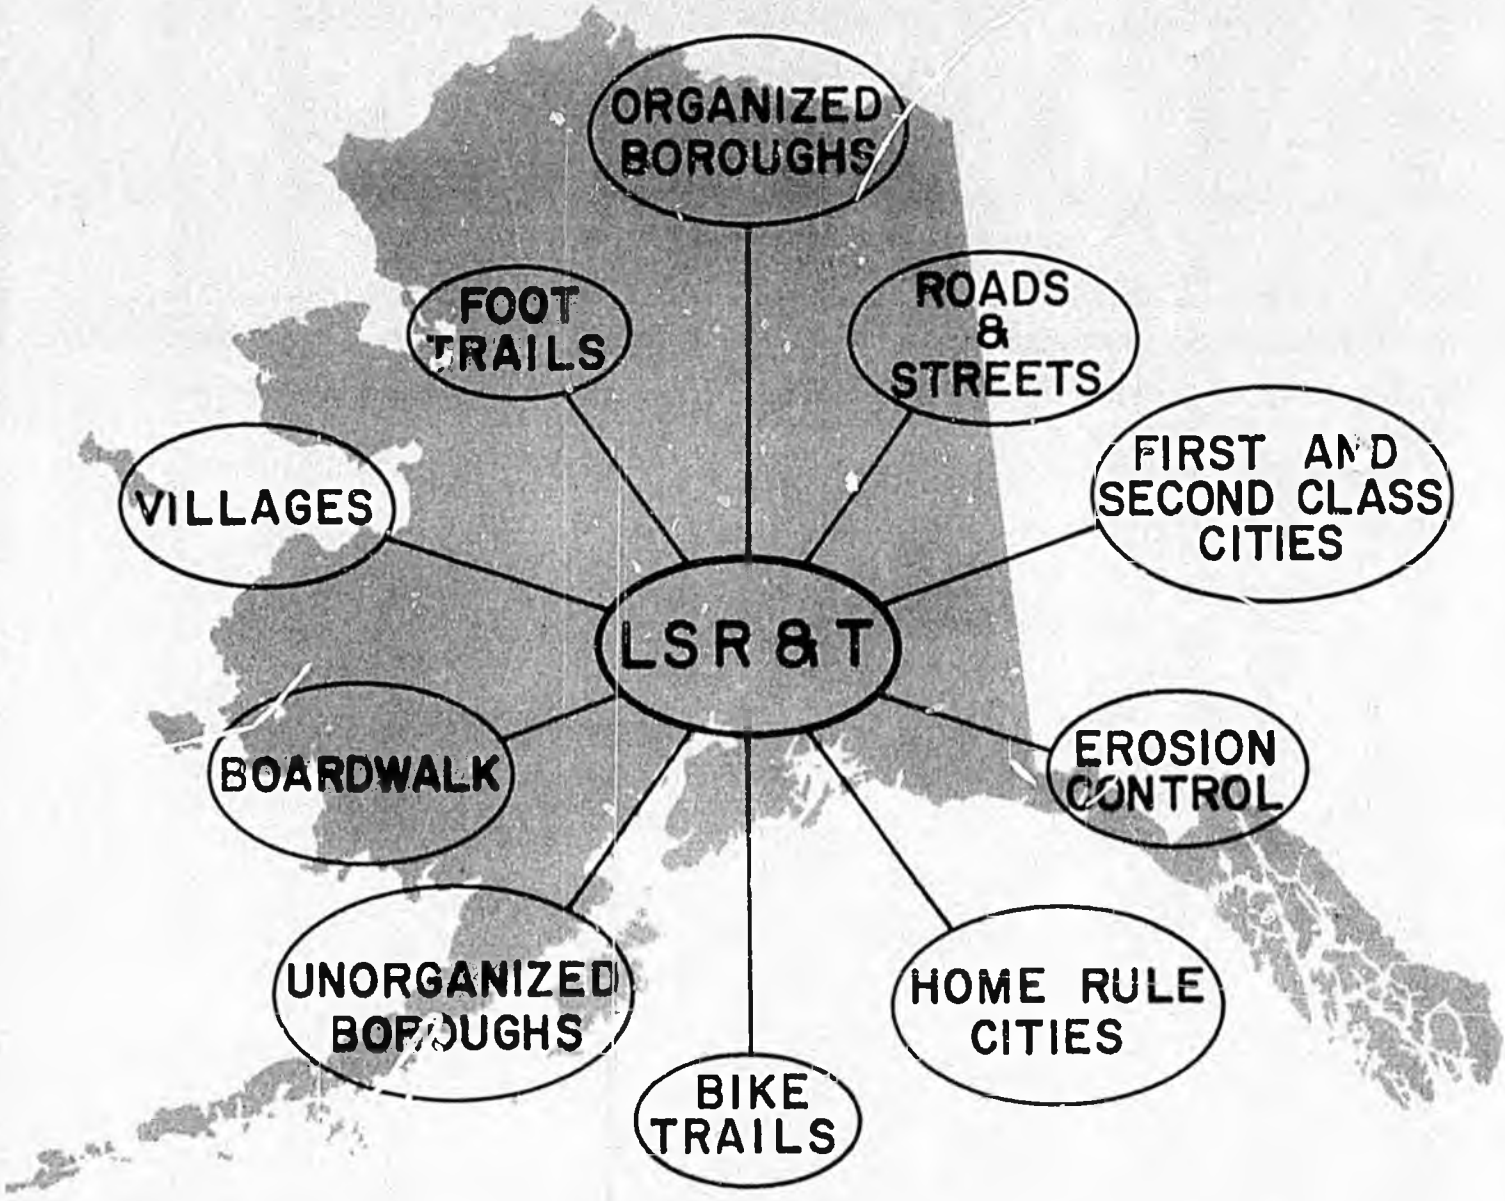
Department of Transportation and Public Facilities, State of Alaska.

Type of Assistance:

Financial and Engineering.

How Program is Financed:

100% State. Organized boroughs and home rule cities may supplement their allocation with local funding in any amount. Unorganized borough areas will be encouraged to provide local participation whenever possible. Federal and State grants can be used in conjunction with LSR&T funds.



How to Apply:

Each organized borough, first class city and home rule city may receive their allocation by submitting a five-year project program for the construction of such roads to their Regional DOT&PF Deputy Commissioner by October 1 of each year, indicating the priorities for construction on the program. When a project is approved, a project agreement will be drafted, and development of the project may proceed. No payment can be made for work done prior to execution of the project agreement.

Unorganized borough communities should provide input data for road needs in their areas to their Regional DOT&PF Deputy Commissioner, who will compile a five-year program and establish priorities for the unorganized borough projects within his jurisdiction. When a project is approved, the Department will proceed with development of the project.

FIVE YEAR LOCAL SERVICE ROADS AND TRAILS PROGRAM

1984 - 1988

STATE OF ALASKA
DEPARTMENT OF TRANSPORTATION
AND PUBLIC FACILITIES

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 1, 1984

Fellow Alaskans:

This document outlines the Local Service Roads and Trails Program for the next five years. Included are project locations, descriptions, and estimated costs.

It should be noted that this is a long-range planning document of the Department of Transportation and Public Facilities, and, as with all plans, changing conditions may require modification of the plans in later years.

All of these projects are in conformance with the local governments' requests.

Your extraordinary support of local service roads and trails gives me great pleasure as I submit this, your Five Year Local Service Roads and Trails Program.

Sincerely,

Bill Sheffield
Governor

NARRATIVE

LOCAL SERVICE ROADS & TRAILS PROGRAM

The Local Service Roads and Trails Program provides for construction of local roads and trails which are not included in the federal-aid primary highway system.

Under the Local Service Roads & Trails Act, funds for home rule and first class cities, municipalities and organized boroughs are allocated by strict formula. These local governments then establish their own project scheduling; therefore, this publication is merely a listing of their individual programs as submitted. Project priorities and scheduling in the unorganized boroughs are based primarily on requests and recommendations of village councils and residents. Personal contact with the communities is established by LSR&T representatives from the Department's regional offices. Community needs are thus determined first-hand, along with approximate costs. Since the cost of requested projects usually exceeds the funds available, priorities must be established based on need. Local communities often participate in project costs their own funds.

Local labor and equipment are utilized wherever practical in the construction of these projects. Not only is this beneficial to the economy of the communities, but it normally reduces the overall cost of the project. A side benefit is the training of local residents who will, in many cases, be maintaining the completed project.

This five year LSR&T Program is based on funds from a recent allocation of $7,000,000 for calendar year 1984 and with proposed allocations of $5,000,000 for calendar year 1985 and $6,000,000 per year for calendar years 1986 through 1988.

Funding shown in this program anticipates using all of these funds by the end of calendar year 1984. Therefore, projects shown for calendar years beyond 1984 can only proceed if additional funds are made available.

Re: Local Service Roads & Trails Program

The Honorable Adelheid Herrmann
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Herrman:

Enclosed is the information you requested on the Local Service Roads and Trails (LSR&T) program.

1. The five year plan.
2. The latest LSR&T Status Report.
3. An example of how LSR&T funds are distributed with a clarification of the allocations.

After a review of SB 332, we would suggest deleting the lapse date of one year after enactment. The LSR&T projects are subject to the same project approval requirements, permits, design, and right of way certification as are other construction projects. A year to commit the funds is too short a time frame.

I hope you will find this information helpful.

Sincerely,

R. S. Armstrong

LOCAL GOVERNMENTS WITH ROAD POWERS

SECTION I

CHAPTER I - DEFINITION

Local governments with road powers are those local governments which are either an organized borough, a home rule city, or a home rule municipality, and which have assumed road powers by a vote of the people, or by virtue of their charter. However, road construction and maintenance authority is granted to local governments which do not otherwise have that authority for the construction and maintenance of local service roads, as specified in A.S. 19.30.251.

SECTION I - 2

A. ALLOCATION OF FUNDS

The allocation formula is clearly defined in the Article 3. Local Service Roads and Trails, Section 19.30.111 to 19.30.251 of the Alaska Statutes, but a brief description is included herein for explanatory purposes.

The distribution follows a sequential breakdown and is based on area and population factors. Half the funds are allocated on the basis of area and half on the basis of population. Salt water areas are excluded from allocation areas and the latest Federal Census is used for population figures.

The first stage distribution is made to allocation districts, which correspond to the highway districts existing on June 30, 1971.

Each allocation district's distribution is then broken down and allocated to the boroughs within that allocation district, each organized borough figuring for a share and all areas outside organized boroughs combining together for a share. The important distinction here is that the "borough" is considered an area within an allocation district.

The third and final breakdown allocates to the local government. If a home rule city exists within an organized borough, the borough government and the city government share the "borough" (second stage) allocation in proportion to their area-population factors. If no home rule city exists within the organized borough, the entire allocation is to that borough's government. If a home rule city exists in an unorganized borough, the home rule city's allocation is their area-population proportion of the unorganized borough's allocation.

Using the highway district boundaries existing on June 30, 1971, the allowation is as follows:

Allocation District	Corresponding Highway District	Allocation Factor
I	Central Region	.306486
II	Interior Region	.249049
III	Southeastern Region	.104827
IV	Western Region	.296550
V	Southcentral Region	.043088
		1.000000

94

AN ACT

Making an appropriation to the Department of Transportation and Public Facilities for local service roads and trails; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1 LINE 11

Approved as Reduced by the Governor
Actual Effective Date: July 26, 1983

Chapter 94

AN ACT

Making an appropriation to the Department of Transportation and Public Facilities for local service roads and trails; and providing for an effective date.

$ 7,000,000 UA

* Section 1. The sum of ~~$10,000,000~~ is appropriated from the general fund to the Department of Transportation and Public Facilities for allocations for local service roads and trails authorized under AS 19.30.111 - 19.30.251.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

QUESTIONS POSED IN COMMITTEE 2/7/84
FOR DOTPF

1. Need clarification from DOTPF on why the Governor reduced the funding from last year.

2. Are there any funds left over from the $7 million appropriated SL'83, Chapter 94?

3. What are the characteristics of the expenditures for those projects, and funding amounts?

LOCAL SERVICE ROADS AND TRAILS LEGISLATION:

To date two pieces of legislation have been introduced relating to the local service roads and trails program

SB 332 by Senator Ferguson which appropriates $10 million from the general fund which the unexpended and unobligated portion of the appropriation made lapses into the general fund June 30, 1985.

DOTPF has suggested that Section 2 (regarding lapse date) be deleted from SB 332 as a year to commit the funds is too short a time frame.

HB 558 by The Rules Committee by the Request of the Governor, which is a housekeeping measure to make allocation district boundaries coincide with DOTPF's regional boundaries; and to require LSR&T projects constructed on a Federal-aid secondary route to be approved by the Commissioner of DOTPF to assure that Federal requirements for roadway width, design standards and right-of-way are met.

Would the House Transportation Committee like to introduce legislation similar to Session Law 1983 Chapter 94 (House Committee Substitute for Senate Bill 7 (Transportation)) which appropriates $10 million from the general fund for local service roads and trails and would take effect immediately in accordance with AS 01.10.070 (c).

According to HB 511 ...operating and capital expenses of state government - the Governor has put in a request for $5 million for the Local Service Roads, Trails and Bikeways, thus, does the committee want to a bill to appropriate $10 million or $5 million?

PROPOSED LEGISLATION BY HOUSE TRANSPORTATION COMMITTEE

"An Act relating to transfers between allocations and items of expenditures."

The purpose of this proposed legislation is to inform the Legislature, by means of the Legislative Budget and Audit Committee, of any transfer of funds between an allocation of appropriation, within an agency. (This proposed legislation will also provide an opportunity to review any inappropriate transfer of funds in the future.)

Copy of AS 37.07.080(e) attached to copy of proposed legislation

finance committees only through the 60th legislative day. (§ 1 ch 188 SLA 1970; am § 1 ch 66 SLA 1977; am § 9 ch 168 SLA 1978; am § 6 ch 2 SLA 1982; am §§ 7, 8 ch 63 SLA 1983)

Effect of amendments. — The 1982 amendment rewrote this section.

The 1983 amendment inserted "and capital" in paragraph (1) and substituted "30th" for "45th" in that paragraph and in paragraph (2) substituted "60th" for "75th."

Sec. 37.07.080. Program execution. (a) Except as limited by policy decisions of the governor, appropriations by the legislature, and other provisions of law, the several state agencies have full authority for administering their program service assignments and are responsible for their proper management.

(b) Each state agency shall prepare an annual plan for the operation of each of its assigned programs except for programs that are exempted from this requirement by the office. The operations plan shall be prepared in the form and content and be transmitted on the date prescribed by the office.

(c) The office shall

(1) review each operations plan to determine that it is consistent with the policy decisions of the governor and appropriations by the legislature, that it reflects proper planning and efficient management methods, that appropriations have been made for the planned purpose and will not be exhausted before the end of the fiscal year,

(2) approve the operations plan if satisfied that it meets the requirements under (1) of this subsection; otherwise, the office shall require revision of the operations plan in whole or in part.

(d) No state agency may increase the salaries of its employees, employ additional employees, or expend money or incur obligations except in accordance with law and properly approved operations plan.

(e) Transfers or changes between objects of expenditures or between allocations may be made by the head of a state agency upon approval of the office. No transfers may be made between appropriations except as provided in an act making the transfers between appropriations.

(f) The office shall report quarterly to the governor and the legislature on the operations of each state agency, relating actual accomplishments to those planned and modifying, if necessary, the operations plan of any agency for the balance of the fiscal year.

(g) The governor may direct the withholding or reduction of appropriations to a state agency at any time during the fiscal year only if the governor determines that

(1) the planned expenditures can no longer be made due to factors outside the control of the state which make the expenditure factually impossible; or

(2) estimated receipts and surpluses will be insufficient to provide for appropriations.

(b) The increase of an appropriation item based on additional federal or other program receipts not specifically appropriated by the full legislature may be expended in accordance with the following procedures:

(1) the governor shall submit a revised program to the Legislative Budget and Audit Committee for review;

(2) 45 days shall elapse before commencement of expenditures under the revised program unless the Legislative Budget and Audit Committee earlier recommends that the state take part in the federally or otherwise funded activity;

(3) should the Legislative Budget and Audit Committee recommend within the 45-day period that the state not initiate the additional activity, the governor shall again review the revised program and if the governor determines to authorize the expenditure, the governor shall provide the Legislative Budget and Audit Committee with a statement of the governor's reasons before commencement of expenditures under the revised program. (§ 1 ch 188 SLA 1970; am §§ 1—3 ch 26 SLA 1976; am §§ 2, 3 ch 74 SLA 1977; am §§ 4, 5 ch 60 SLA 1979; am §§ 9-12 ch 63 SLA 1983)

Effect of amendments. — The 1979 amendment substituted "an act making the transfers between appropriations" for "(b) of this section" at the end of the second sentence of subsection (e) and rewrote subsection (b).

The 1983 amendment substituted "office" for "division" in subsections (b), (c), (e), and (f).

Legislative history reports. — For report on ch. 26, SLA 1976 (HB 760 am S), see 1976 House Journal, p. 388.

Opinions of Attorney General. — Vesting authority in the Legislative Budget and Audit Committee to approve transfers between appropriation items violates the separation of powers doctrine and is an improper delegation of a legislative function to an interim committee. July 22, 1976, Op. Att'y Gen.

Section 1303 of the 1976 budget bill, which authorized the Budget and Audit Committee to supervise the governor's execution of the budget act, specifically over that portion of it which permitted him to transfer appropriation items, constituted an encroachment on executive power and offended the Alaska Constitution. July 22, 1976, Op. Att'y Gen.

NOTES TO DECISIONS

Budgetary system established by statutes implementing Constitution. — Statutory language implementing Alaska Const., art. IX, § 13, establishes a budgetary system in which all appropriations are made by legislative act. Municipality of Anchorage v. Frohne, Sup. Ct. Op. No. 1477 (File Nos. 3050, 3104), 568 P.2d 3 (1977).

Sec. 37.07.090. Performance reporting. (a) Each state agency shall submit a performance report to the office no later than September 1 for the preceding fiscal year. These reports shall be in the form prescribed by the office after consultation with the legislative finance division, and shall include

(1) an identification of the objectives intended for the program and the problem or need which the activities and operations of the board, commission or program is intended to address;

finance committees only through the 60th legislative day. (§ 1 ch 188 SLA 1970; am § 1 ch 66 SLA 1977; am § 9 ch 168 SLA 1978; am § 6 ch 2 SLA 1982; am §§ 7, 8 ch 63 SLA 1983)

Effect of amendments. — The 1982 amendment rewrote this section.

The 1983 amendment inserted "and capital" in paragraph (1) and substituted "30th" for "45th" in that paragraph and in paragraph (2) substituted "60th" for "75th."

Sec. 37.07.080. Program execution. (a) Except as limited by policy decisions of the governor, appropriations by the legislature, and other provisions of law, the several state agencies have full authority for administering their program service assignments and are responsible for their proper management.

(b) Each state agency shall prepare an annual plan for the operation of each of its assigned programs except for programs that are exempted from this requirement by the office. The operations plan shall be prepared in the form and content and be transmitted on the date prescribed by the office.

(c) The office shall

(1) review each operations plan to determine that it is consistent with the policy decisions of the governor and appropriations by the legislature, that it reflects proper planning and efficient management methods, that appropriations have been made for the planned purpose and will not be exhausted before the end of the fiscal year;

(2) approve the operations plan if satisfied that it meets the requirements under (1) of this subsection; otherwise, the office shall require revision of the operations plan in whole or in part.

(d) No state agency may increase the salaries of its employees, employ additional employees, or expend money or incur obligations except in accordance with law and properly approved operations plan.

(e) Transfers or changes between objects of expenditures or between allocations may be made by the head of a state agency upon approval of the office. No transfers may be made between appropriations except as provided in an act making the transfers between appropriations.

(f) The office shall report quarterly to the governor and the legislature on the operations of each state agency, relating actual accomplishments to those planned and modifying, if necessary, the operations plan of any agency for the balance of the fiscal year.

(g) The governor may direct the withholding or reduction of appropriations to a state agency at any time during the fiscal year only if the governor determines that

(1) the planned expenditures can no longer be made due to factors outside the control of the state which make the expenditure factually impossible; or

(2) estimated receipts and surpluses will be insufficient to provide for appropriations.

(h) The increase of an appropriation item based on additional federal or other program receipts not specifically appropriated by the full legislature may be expended in accordance with the following procedures:

(1) the governor shall submit a revised program to the Legislative Budget and Audit Committee for review;

(2) 45 days shall elapse before commencement of expenditures under the revised program unless the Legislative Budget and Audit Committee earlier recommends that the state take part in the federally or otherwise funded activity;

(3) should the Legislative Budget and Audit Committee recommend within the 45-day period that the state not initiate the additional activity, the governor shall again review the revised program and if the governor determines to authorize the expenditure, the governor shall provide the Legislative Budget and Audit Committee with a statement of the governor's reasons before commencement of expenditures under the revised program. (§ 1 ch 188 SLA 1970; am §§ 1—3 ch 26 SLA 1976; am §§ 2, 3 ch 74 SLA 1977; am §§ 4, 5 ch 60 SLA 1979; am §§ 9-12 ch 63 SLA 1983)

Effect of amendments. — The 1979 amendment substituted "an act making the transfers between appropriations" for "(h) of this section" at the end of the second sentence of subsection (e) and rewrote subsection (h).

The 1983 amendment substituted "office" for "division" in subsections (b), (c), (e), and (f).

Legislative history reports. — For report on ch. 26, SLA 1976 (HB 760 am S), see 1976 House Journal, p. 388.

PROPOSED LEGISLATION BY HOUSE TRANSPORTATION COMMITTEE

LOCAL SERVICE ROADS AND TRAILS

Does the House Transportation Committee desire to duplicate Senate Bill 332 sponsored by Senator Ferguson:

"An Act making special appropriation to the Department of Transportation and Public Facilities for local service roads and trails and providing for an effective date."

Appropriation of $10,000,000; unspent portions lapses June 30, 1985 (prompts communities to get everything obligated in one year)

Last session we heard HB 169 and SB 7 both dealing with the LSR&T programs:

House Bill 169 by Rep. Herrmann and House CS Senate Bill 7(TRSP) by Senator Ferguson were identical.

House CS for SB 7 (TRSP) was signed by the Governor July 27 with the attached message:

> ...reducing the appropriation made for local service roads and trails in House CS for SB 7 (TRSP) from $10 million to $7 million.....

The difference found in SB 332 is Section 2 which states that the unexpended and unobligated funds lapses.

LETTER OF INTENT
TO ACCOMPANY
HOUSE BILL 169

It is the intent of the House Transportation Committee that the Local Service Roads and Trails (LSR&T), program not be discontinued as recommended by the previous Commissioner of the Department of Transportation and Public Facilities, (DOT/PF).

The LSR&T program is vital to local governments and provides very important benefits to communities in the rural and urban areas of Alaska.

The House Transportation Committee intends the DOT/PF support continued operation of this vital program and request continued funding for it's operations in subsequent fiscal years.

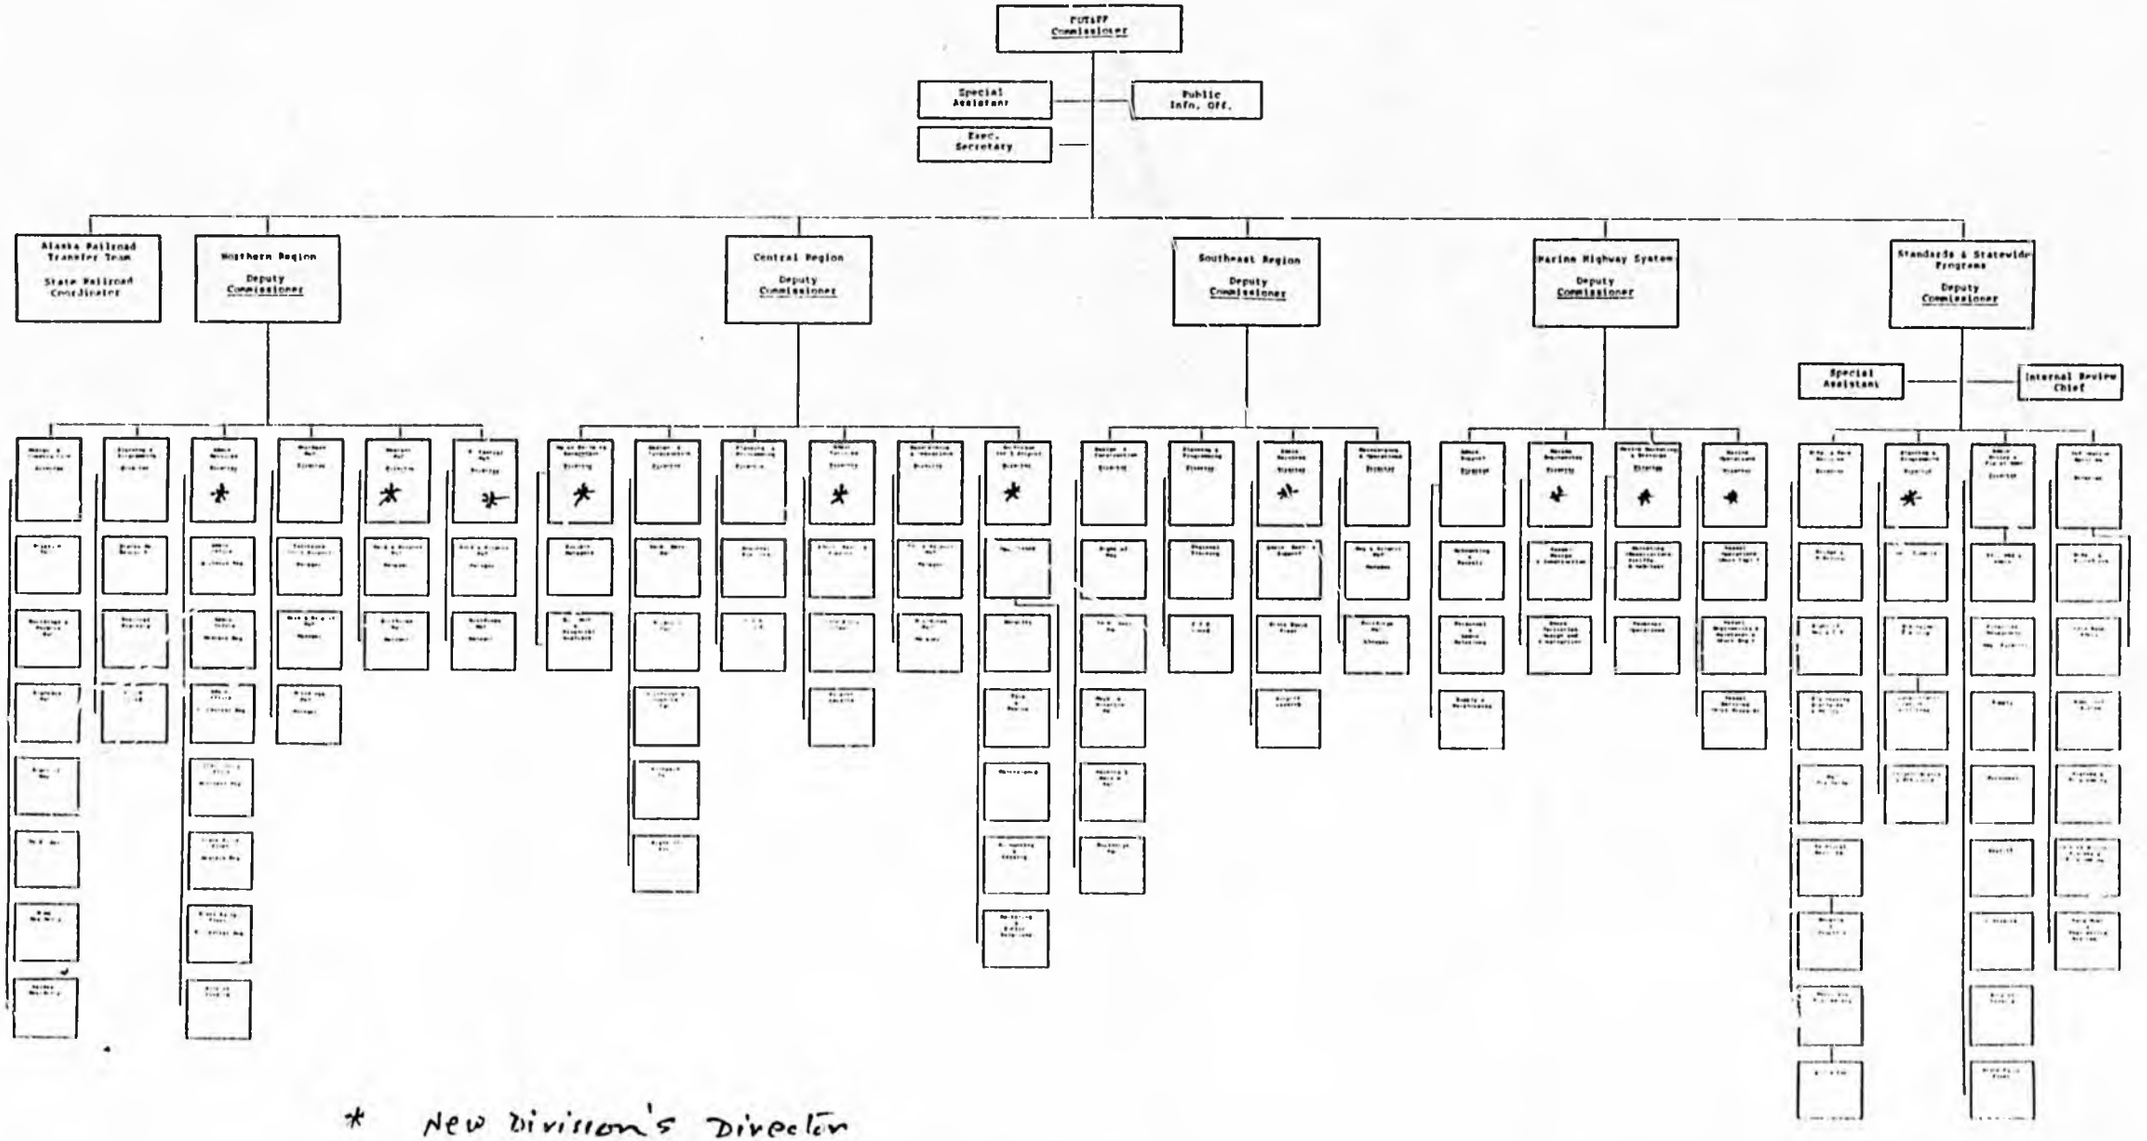
OVERVIEW

a presentation of house transportation

committee staff

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES



The Department of Transportation and Public Facilities (DOTPF) is responsible for the planning, construction, and maintenance of state airports, highways (including the marine highway), buildings, and ports and harbors for Alaskan residents and the general public. The goal of the Department is to ensure the rapid movement of people and freight throughout Alaska in a manner that is safe, reliable, economic, and convenient to all Alaskans.

Functions within DOTPF include planning, design and construction, maintenance and operations, marine transportation, and administration. All of these functions, except marine transportation, are organized geographically into three major regions with a Deputy Commissioner for each. Marine transportation and statewide support offices are also each headed by a Deputy Commissioner. Regional headquarters are located in Anchorage, Fairbanks, and Juneau, with Valdez and Nome serving as district headquarters for maintenance and operations, and administration. Regionalization of DOTPF functions was initiated during FY 83 and FY 84, and will be reflected in the budget for the first time in FY 85.

Outside of the headquarters, regional, and district offices, the Department's employees are scattered widely throughout the State to maintain the highway and aviation systems. Direct services are provided to the public through operation of the international airports in Anchorage and Fairbanks, and the State Ferry System in Southeast and Southwest Alaska.

State of Alaska
Department of Transportation
& Public Facilities

ORGANIZATION CHART 9/1/83

* New Division's Director

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

OPERATING BUDGET $ (Millions)

	AUTH FY 84	ADJUSTED FY 84	GOV. FY85	% CHANGE
General Fund	$ 170.2	$ 184.5 *	$ 181.1	- 1.9
Total	$ 287.5	$ 292.7	$ 286.8	- 2.0
Positions:				
Perm. Full Time	3047	3047	2949	- 3.3
Perm. Part Time	1101	1101	1004	- 9.7

* The major adjustments are result of Legislative transfer of $11,306,000 from Highway Working Capital Fund to General Fund and appropriated salary increase of $4,183,000.

ORGANIZATIONAL COMPARISON

	FY 84 Adjusted		FY 85		% Change		
	General Fund	Total	GF	Total	GF	Total	
Headquarters	$ 12.1	$ 17.4	$ 10.8	$ 15.9	-12.0	-9.4	
Alaska Railroad Team				0.3			(1)
Central Region	40.6	88.1	39.5	87.5	- 2.7	-0.6	
Northern Region	50.2	92.9	48.3	88.3	- 3.9	-5.2	
Southeast Region	17.7	28.7	17.0	27.4	- 4.1	-4.7	
Marine Highways	63.8	65.5	64.3	66.1	+ 0.7	+0.9	(2)
Snow and Ice Fund			1.0	1.0			(3)
Headquarters Move			0.4	0.4			(4)
	$184.5	$292.7	$181.1	$286.8	- 1.9	-2.0	

MAJOR CHANGES:

(1) The Alaska Railroad Transfer Team budget was established to plan an orderly transaction should the transfer occur.

(2) Marine Highway System is much more self sufficient. Engineering and administrative support positions were transferred in from other units.

(3) A snow and ice contingency fund is provided to facilitate service continuity in case of snow and ice conditions in excess of those budgeted in any one Region's budget.

(4) Funding is provided to enable rental of additional space in Juneau to consolidate headquarters units.

OPERATING BUDGET NOTES

The operating budget has been structured to support the regional organization of the Department of Transportation and Public Facilities to provide responsive, local management of services. Substantial reductions were made in many components to provide for continuation of vital services within the spending limits imposed.

- Staffing within the headquarters administrative component is at a minimum. Further reductions would be detrimental to departmental operations.

- The Information Systems BRU is funded at 90% of FY 84. While operations may continue at this level, flexibility is severely restricted. No additional reduction is possible.

- The Alaska Railroad Transfer Team is a planning unit, funded by interagency receipts, which will insure an orderly transition should the federal agency function be transferred to the State.

- The Marine Highways System has been restructured to provide internal engineering and administrative staff. It is now essentially self sufficient.

- The "Headquarters Move" funding reflected separately on the data sheet is actually contained within the contractual services (300) line of the Office of the Commissioner's budget. These monies will enable the rental of sufficient additional office space to consolidate all headquarters units.

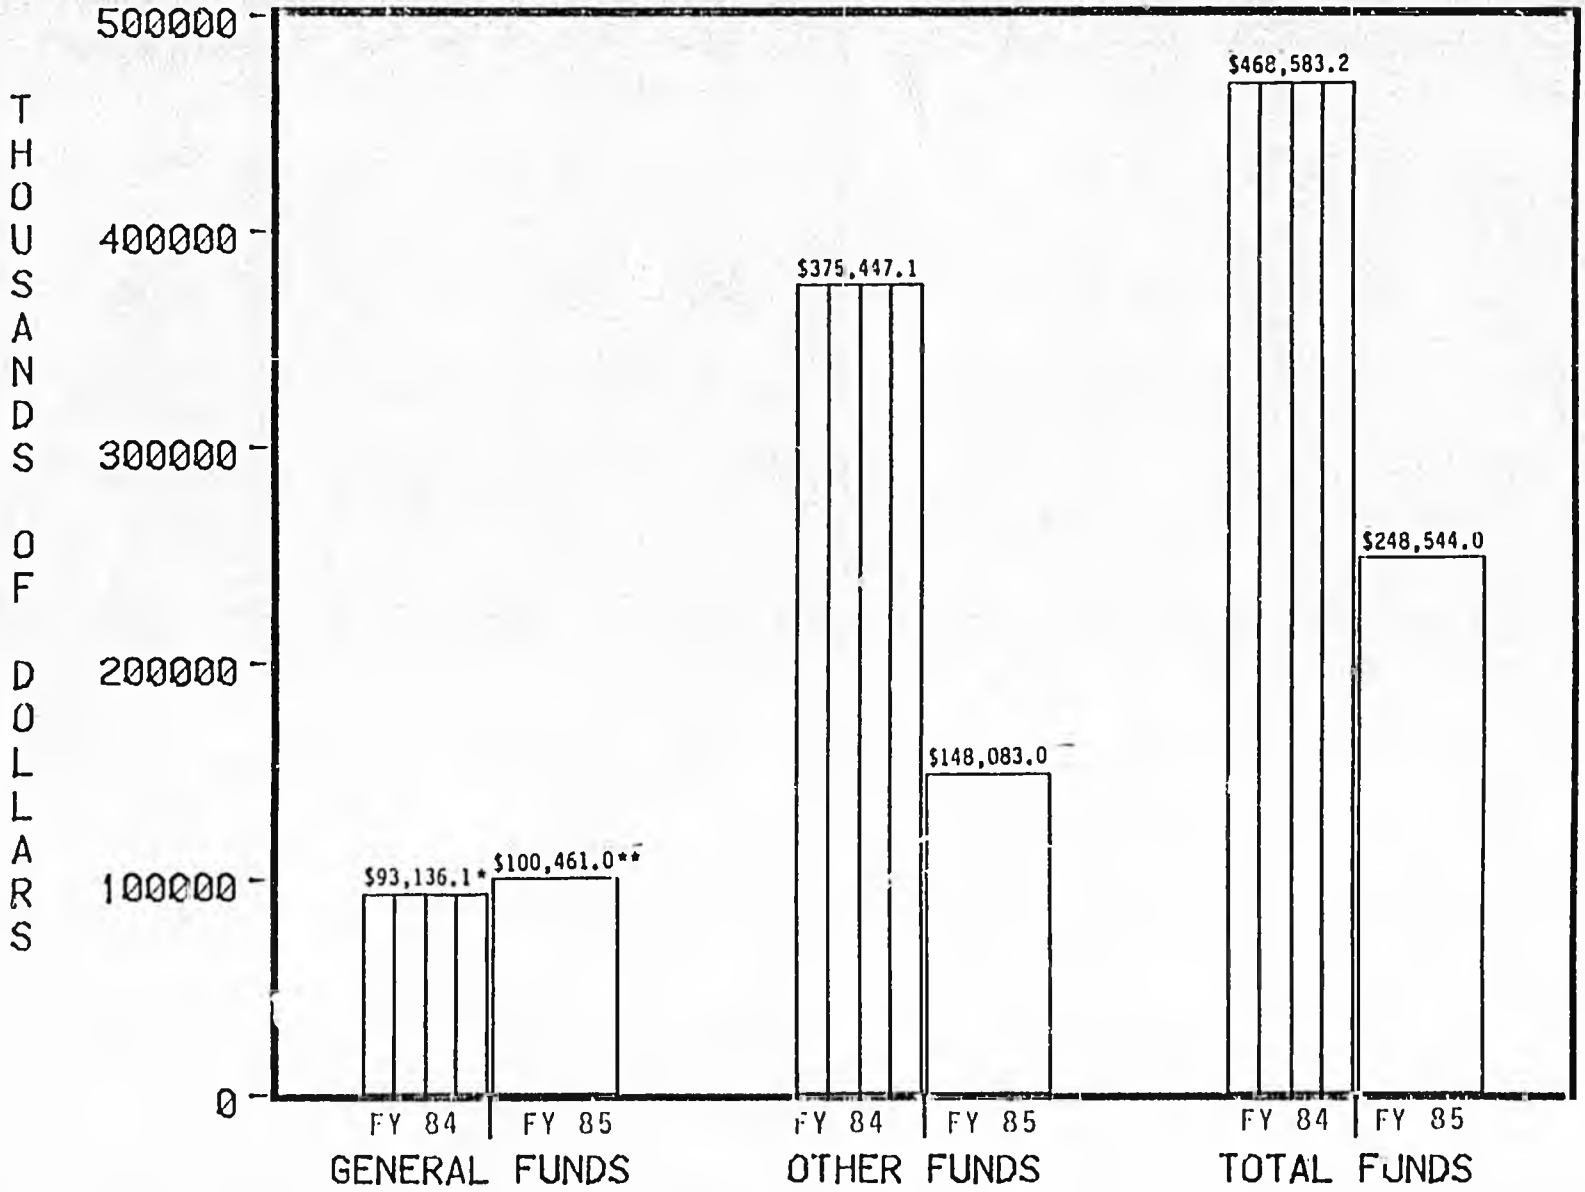
CAPITAL BUDGET NOTES

This analysis details changes made by the Governor in his review of the Department's capital budget. Basically the Governor funded all requests at the $75.0 million general fund request level and added projects as follows:



- Regional requests for Local Service Roads and Trails were consolidated. The project name was changed to Local Service Roads, Trails and Bikeways, and the funding was increased from $2499.9 to $5,000.0.

- Dutch Harbor/Unalaska Airport was not requested by the agency, however, Governor Sheffield proposed $3,500.0 for this project.

- The regional erosion control programs were not included in the $100.0 million agency level but Statewide did include a request at the $75.0 million base. Only Northern Region's erosion control program was chosen from among the regions.

- Kotzebue City Streets project in Northern Region was budgeted outside the $100.0 million level but was included in the Governor's budget.

portation and Public Facilities if constructed outside local government units which have zoning ordinances. If these roads are constructed within the boundaries of local government units which have zoning ordinances, the width shall conform to subdivision control ordinances of the local government units. Contracts for the work shall be awarded to the lowest responsible bidder qualified to contract with the state. (§ 1 ch 122 SLA 1961; am § 3 ch 7 SLA 1964; am Executive Order No. 39, § 11 (1977))

Effect of amendments. — The 1977 amendment substituted the reference to the Department of Transportation and Public Facilities in the third sentence for a reference to the Department of Highways.

Article 3. Local Service Roads and Trails.

Section
111. Purpose
131. Allocation of funds
141. Acquisition and construction programs
151. Local government participation
161. Design standards, rights-of-way and widths
171. Acquisition and conveyance of rights-of-way
181. Project agreements
191. Letting of contracts
201. Construction
211. Maintenance
221. Availability of allocated sums
231. [Repealed]
233. Reports
241. Definitions

Sec. 19.30.111. Purpose. It is the purpose of AS 19.30.111 — 19.30.251 to provide for the acquisition and construction of local service roads and trails which are not included in the approved federal-aid primary highway systems eligible for federal-state matching funds. (§ 2 ch 84 SLA 1971; am § 1 ch 38 SLA 1981)

Effect of amendments. — The 1981 amendment, effective July 1, 1981, added "acquisition and" preceding "construction of local service roads" and deleted "or secondary" preceding "highway systems."

Sec. 19.30.131. Allocation of funds. (a) During each fiscal year the commissioner shall allocate sums appropriated or otherwise designated for expenditure upon local service roads for that fiscal year among the five allocation districts in the following manner: one-half in the ratio which the area of each allocation district bears to the total area of the state and one-half in the ratio which the population of each allocation district bears to the total population of the state as shown by the latest available federal census.

(b) The commissioner shall also further allocate the sums in each allocation district to the boroughs within each allocation district in the following manner: one-half in the ratio which the area of each organized borough (excluding salt water areas) within that district bears to the total area of the allocation district and one-half in the ratio

trict bears to the total population of the allocation district as shown by the latest available federal census.

(c) The commissioner shall also further allocate portions of the sum allocated to any borough, either organized or unorganized, and to any home rule or first class city within the borough in the following manner:

(1) one-half in the ratio which the area of each home rule or first class city bears to the total area of the borough excluding salt water areas; and

(2) one-half in the ratio which the population of each home rule or first class city bears to the total population of the borough as shown by the latest available federal census.

(d) The sums not allocated within each district to a local government under (b) and (c) of this section shall be allocated to the unorganized borough and administered by the department. (§ 2 ch 84 SLA 1971; am § 2 ch 38 SLA 1981)

Effect of amendments. — The 1981 amendment, effective July 1, 1981, added "or first class" following "home rule" in three places in subsection (c). Also in subsection (c), the amendment added the paragraph designations (1) and (2).

Sec. 19.30.141. Acquisition and construction programs. Before October 1 of each fiscal year each local government eligible for allocation of funds under AS 19.30.131 shall submit to the commissioner for approval a five-year plan for the acquisition and construction of local service roads and trails. Before December 1 of each fiscal year the commissioner shall submit to the governor a five-year plan for the acquisition and construction of local service roads and trails, including the approved local government programs. An organized borough shall include in its five-year plan local service road acquisition and construction programs for all cities other than home rule and first class cities within the boundaries of the borough. The commissioner shall include in his five-year plan local service road and trail acquisition and construction within the unorganized borough. (§ 2 ch 84 SLA 1971; am § 3 ch 38 SLA 1981)

Effect of amendments. — The 1981 amendment, effective July 1, 1981, substituted "five-year plan" for "long-range program" in four places, added "acquisition and" preceding "construction" in four places and added "and first class" preceding "cities within the boundaries" in the next to the last sentence.

Sec. 19.30.151. Local government participation. (a) Upon application by a local government, local service roads and trails constructed under the provisions of AS 19.30.111 — 19.30.241 and located within the jurisdictional boundaries of a local government, as defined in AS 19.30.241(3), may be transferred to that local

(b) The commissioner shall, upon request of a local government, transfer funds allocated under AS 19.30.131 to any local government which has assumed local road powers for project cost amounts and contract award amounts submitted to the commissioner.

(c) Nothing in AS 19.30.111 — 19.30.241 prohibits a local government from participating financially in the acquisition and construction of a local service road or trail. (§ 2 ch 84 SLA 1971; am Executive Order No. 39, § 11 (1977); am §§ 2, 3 ch 158 SLA 1980; am § 4 ch 38 SLA 1981)

Effect of amendments. — The 1977 amendment substituted a reference to the Department of Transportation and Public Facilities for a reference to the Department of Highways in the first sentence of subsection (a).

The 1980 amendment deleted the former second sentence in subsection (a), which read: "A local government which has assumed road powers before May 20, 1971, may not be required to hold an election as provided by this section", and rewrote subsection (b).

The 1981 amendment, effective July 1, 1981, added "acquisition and" preceding "construction" in subsection (c).

Sec. 19.30.161. Design standards, rights-of-way and widths. Design standards, rights-of-way and widths for each local service road and trail project shall have the prior approval of the commissioner, unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the supervision of a local government that has assumed road powers, design standards, rights-of-way and widths shall be established by the local government. (§ 2 ch 84 SLA 1971; am § 4 ch 158 SLA 1980)

Effect of amendments. — The 1980 amendment inserted "rights-of-way and widths" at the beginning of the section, and added the material at the end of the section following, "approval of the commissioner" and beginning, "unless the project is."

Sec. 19.30.171. Acquisition and conveyance of rights-of-way. (a) The local government shall acquire all rights-of-way required for local service road and trail construction. However, if the local government is unable to acquire the necessary right-of-way, the commissioner is authorized to acquire it in accordance with AS 19.05.080 — 19.05.120. The commissioner may convey to the local government, by appropriate instrument executed in the name of the state, any land or interest in land which has been acquired by the state for the construction of local service roads or trails.

(b) The costs incurred by the commissioner in acquiring this land or interest in land includes all costs and any fees incidental to acquisition. All costs incurred in connection with the acquisition of the land or interest in land for local governments that have assumed local road powers shall be charged to the project allocation for which the land or interest in land is acquired. Right-of-way acquisition costs incurred by

under AS 19.30.151(a) shall be charged to the project allocation for the local government for which the land or interest in land is acquired.

(c) When rights-of-way for local service roads are acquired over land or interest in land owned by the state, the commissioner may make such arrangements with the department having jurisdiction over the land as may be necessary to give the local government adequate rights-of-way, and any such department is directed to transfer the jurisdiction of the land to the commissioner. (§ 2 ch 84 SLA 1971; am § 17 ch 71 SLA 1972; am § 5 ch 158 SLA 1980; am § 5 ch 38 SLA 1981)

Effect of amendments. — The 1980 amendment deleted "including relocation assistance and payments in accordance with AS 34.60" following "to acquisition" at the end of the first sentence of subsection (b), deleted "by the commissioner" following "All costs incurred" near the beginning of the second sentence of subsection (b), inserted "for local governments that have assumed local road powers" near the middle of the second sentence of subsection (b), and added the present third sentence of subsection (b).

The 1981 amendment, effective July 1, 1981, substituted "charged to the project allocation" for "paid by the local government" in the second sentence of subsection (b).

Sec. 19.30.181. Project agreements. A local government which has assumed local road powers may enter into a formal project agreement with the commissioner for the acquisition and construction of a specific project. (§ 2 ch 84 SLA 1971; am § 6 ch 158 SLA 1980; am § 6 ch 38 SLA 1981)

Effect of amendments. — The 1980 amendment rewrote the section.

The 1981 amendment, effective July 1, 1981, added "acquisition and" preceding "construction of."

Sec. 19.30.191. Letting of contracts. (a) Repealed by § 15 ch 158 SLA 1980.

(b) Contracts entered into by a local government that has assumed local road powers for the construction of each project shall be awarded only on the basis of the lowest responsible bid submitted by a bidder meeting established criteria of responsibility.

(c) All contracts by a local government that has not assumed local road powers must have the prior concurrence of the commissioner. The commissioner may delegate the power to approve contracts to a local government that has assumed local road powers for the acquisition and construction of local service roads and trails.

(d) Except as provided in (b) and (c) of this section and in AS 44.33.300, construction of each project shall be administered by the department in accordance with guidelines established by the commissioner by regulation. (§ 2 ch 84 SLA 1971; am § 4 ch 277 SLA 1976; am §§ 7 — 9, 15 ch 158 SLA 1980, §§ 7, 8 ch 38 SLA 1981)

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: SS HB 40 Date on Bill: 2/11/83
Title: An act repealing motor fuel tax.
Sponsor: Hayes
Requestor: House Transportation

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital								
Operating			-0-	(65)	(65)			
Total			-0-	(65)	(65)			

b. Revenues:

Revenue			-0-	(48,000)	(33,000)			

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:
Since the bill would eliminate the Motor Fuel Tax, positions currently allocated to those sources could eventually be eliminated. The elimination of those positions could not occur until sometime in FY 84 because there would be substantial clean up work between now and the several months succeeding the effective date of the bill. The task of refunding the numerous fuel users could be monumental.

The loss in revenues to the state are as a result of repealing highway, marine, and aviation taxes.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

Prepared By: Mary Rehfeld Phone: 465-2300
Division: Comm. Office Date: 2/28/83

Approved by Commissioner: Robert O'Keefe Date: 2/28/83
Department: Revenue

80. [Repealed]

Sec. 43.35.080. Penalties.

Repealed by § 46 ch 113 SLA 1980.

Cross references. — For present provisions concerning civil penalties, see AS 43.05.220. For present provisions concerning criminal penalties, see AS 43.05.290.

Editor's notes. — The repealed section derived from § 48-3-3 ACLA 1949; § 3, ch. 142, SLA 1960; § 2, ch. 58, SLA 1971.

Chapter 40. Motor Fuel Tax.

Article 1. General Tax Levy on Transfers or Consumption of Motor Fuel.

Section

10. Tax on transfers or consumption of motor fuel and expenditure of proceeds
20. [Repealed]
30. Refund for nonhighway use
35. Other refunds and credits
40. [Repealed]
50. Refund claim by affidavit
80. Examination of books and records
90. [Repealed]
100. Definitions

Sec. 43.40.010. Tax on transfers or consumption of motor fuel and expenditure of proceeds. (a) There is levied a tax of eight cents a gallon on all motor fuel sold or otherwise transferred within the state, except that

(1) the tax on aviation gasoline is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

(b) There is levied a tax of eight cents a gallon on all motor fuel consumed by a user, except that

(1) the tax on aviation gasoline consumed is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

(c) Every dealer who sells or otherwise transfers motor fuel in the state shall collect the tax at the time of sale, and remit the total tax collected during each calendar month of each year to the Department of Revenue by the last day of each succeeding month. Every user shall likewise remit the tax accrued on motor fuel actually used by him during each month. At the time the remittance is made, each dealer or user shall submit a statement to the Department of Revenue showing all motor fuel which he has distributed or used during the month.

(d) Repealed by § 3 ch 166 SLA 1976.

(e) Sixty per cent of the proceeds of the revenue from the taxes on aviation fuel, excluding the amount determined to have been spent by the state in its collection, shall be refunded to a municipality owning and operating or leasing and operating an airport in the proportion that the revenue was collected at the municipal airport. All other proceeds of the taxes on aviation fuel shall be paid into a special aviation fuel tax account in the state general fund. The legislature may appropriate funds from this account for aviation facilities.

(f) The proceeds from the revenue from the tax on motor fuel used in boats and watercraft of all descriptions shall be deposited in a special watercraft fuel tax account in the general fund. The legislature may appropriate from this account for water and harbor facilities.

(g) The proceeds of the revenue from the tax on all motor fuels, except as provided in (e), (f) and (j) of this section, shall be deposited in a special highway fuel tax account in the state general fund. The legislature may appropriate funds from it for expenditure by the Department of Public Works directly or as matched with available federal-aid highway money for maintenance of highways, construction of highway projects and ferries included in the program provided for in AS 19.10.150, including approaches, appurtenances and related facilities and acquisition of rights-of-way or easements, and other highway costs including surveys, administration, and related matters. All departments of the state government authorized to spend funds collected from taxes imposed by §§ 10 — 100 of this chapter shall perform, when feasible, all construction or reconstruction projects by

contract after the projects have been advertised for competitive bids, except that, when feasible, arrangements shall be made with political subdivisions to carry out the construction or reconstruction projects. If it is not feasible for the work to be performed by state engineering forces, the commissioner of public works may contract on a professional basis with private engineering firms for road design, bridge design, and services in connection with surveys. If more than one private engineering firm is available for the work the contracts shall be entered into on a negotiated basis.

(h) All motor fuel tax receipts shall be paid into the general fund and distributed to the proper accounts in the general fund. Valid motor fuel tax refund claims shall be paid from the highway fuel tax account in the general fund.

(i) Within 30 days after the legislature convenes the Department of Public Works shall submit an annual budget covering anticipated revenues and their expenditure, for the consideration and approval by the legislature. The budget shall cover all money collected or anticipated to be collected under §§ 10 — 100 of this chapter for the year following the adjournment of each regular session of the legislature.

(j) The proceeds from the tax on motor fuel used in snow vehicles and, unless a tax refund is applied for under § 40 of this chapter, other internal combustion engines not used in or in conjunction with a motor vehicle licensed to be operated on public ways shall be deposited in a special nonpublic highway use account in the general fund. The legislature may appropriate from this account to the Department of Highways for trail staking and shelter construction and maintenance.

(k) The tax on the transfer or consumption of motor fuel provided for in this section does not apply to liquified petroleum gas.

(*l*) If a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel, the dealer need not collect the motor fuel tax. If the tax is not collected, the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel. The department may not collect the motor fuel tax from a dealer for fuel for which a certificate of use has been properly obtained under this subsection. The dealer shall retain a copy of each certificate of use obtained under this subsection for examination or audit on request by the department. The form of a certificate of use may be prescribed by regulation adopted by the department. (§ 48-5-2 ACLA 1949; am § 1 ch 80 SLA 1951; am § 1 ch 47 SLA 1955; am §§ 1, 2 ch 27 SLA 1957; am § 1 ch 134 SLA 1957; am § 1 art VI title II ch 152 SLA 1957; am § 2 art V title III ch 152 SLA 1957; am § 2 ch 124 SLA 1959; am §§ 1, 2 ch 20 SLA 1960; am § 1 ch 150 SLA 1960; am § 1 ch 110 SLA 1961; am § 1 ch 136 SLA 1961; am §§ 1 — 3 ch 131 SLA 1962; am § 1 ch 130 SLA 1968; am § 10 ch 143 SLA 1968; am §§ 1, 2 ch 215 SLA 1968; am §§ 1 — 3 ch 158 SLA 1970;

am § 3 ch 58 SLA 1971; am §§ 1, 2 ch 124 SLA 1971; am §§ 2, 3 ch 125 SLA 1971; am §§ 1 — 3 ch 153 SLA 1972; am § 3 ch 166 SLA 1976; am §§ 1, 2 ch 116 SLA 1977; am § 4 ch 82 SLA 1982)

Effect of amendments. — The 1982 amendment, effective June 4, 1982, added subsection (*l*).

Editor's notes. — Section 15, ch. 82, SLA 1982, provides: "The Department of Revenue may not collect the motor fuel tax from a dealer, as defined in AS 43.40.100(1), on a sale or transfer of motor fuel that occurs before the effective date of this Act [June 4, 1982] if the dealer did not collect the tax from a purchaser or transferee because of a reasonable belief that the fuel was not to be used as motor fuel, as that term is defined in AS 43.40.100(2), or if the dealer relied upon the purchaser's representation that the fuel would not be used as motor fuel. This section is intended to clarify ambiguities in the existing language of AS 43.40 concerning the party responsible for collecting the tax and to resolve an administrative dispute between certain fuel dealers and the Department of Revenue. For this reason, this section serves the general public interest in the fair and equitable administration of AS 43.40."

Sec. 43.40.020. Penalty for violation.

Repealed by § 46 ch 113 SLA 1980.

Cross references. — For present provisions concerning criminal penalties, see AS 43.05.290.

Editor's notes. — The repealed section derived from § 48-5-3, ACLA 1949; § 4, ch. 153, SLA 1972; § 3, ch. 116, SLA 1977.

Sec. 43.40.030. Refund for nonhighway use. (a) Except as specified in AS 43.40.010(j), a person who uses motor fuel to operate an internal combustion engine is entitled to a refund of six cents a gallon if

(1) the tax on the motor fuel has been paid;

(2) the motor fuel is not aviation fuel, or motor fuel used in or on watercraft; and

(3) the internal combustion engine is not used in or in conjunction with a motor vehicle licensed to be operated on public ways.

(b) The entire tax levied by this chapter shall be refunded to the purchaser on that part of the motor fuel used in a foreign country on which the tax has been paid when the fuel is sold and delivered in the state for non-highway use in a foreign country.

(c) The department shall establish the necessary regulations and prescribe the appropriate forms to prove that the motor fuel is taken to and used in foreign countries.

(d) If a person obtains motor fuel on which the tax levied by this chapter has been paid and the motor fuel is exempt from the tax, the person is entitled to a refund of the tax paid. (§ 2 ch 47 SLA 1955; am § 3 ch 27 SLA 1957; am § 2 ch 136 SLA 1961; am § 4 ch 158 SLA 1970; am § 3 ch 124 SLA 1971; am § 4 ch 125 SLA 1971; am § 4 ch 116 SLA 1977; am §§ 35, 36 ch 113 SLA 1980; am § 5 ch 82 SLA 1982)

Effect of amendments. — The 1980 amendment substituted a reference to this chapter in subsection (b), and added subsection (d).

The 1982 amendment, effective June 4, 1982, substituted "the tax has been" for "duty is" in subsection (b).

Editor's notes. — Section 52, ch. 113, SLA 1980 makes this section applicable to tax years beginning after December 31, 1979.

Sec. 43.40.035. Other refunds and credits. (a) A person who resells fuel on which the tax under AS 43.40.010(a) or (b) was previously paid is entitled to a credit or refund of the tax if (1) the resold fuel is not motor fuel and a certificate of use is acquired under AS 43.40.010(1); or (2) the amount of tax previously paid exceeds the tax due on the resale. The amount of the credit or refund under this section is equal to the amount of tax previously paid on the resold fuel less the amount of tax prescribed by AS 43.40.010(a) or (b).

(b) A reseller may elect, with the express written consent of the supplier of the resaler, to receive the credit or refund under this section directly from the supplier rather than by filing a claim for the credit or refund with the department. When an election is properly made under this subsection, the supplier may claim the credit or refund from the department. To be effective an election under this subsection must be signed in quadruplicate by the reseller and by the supplier. The reseller and the supplier shall each file one copy of the election, with original signatures, with the department. The reseller and supplier shall each retain a copy of the election with original signatures for audit review by the department. If an election is made under this subsection, it may not be revoked without the express written consent of the supplier. (§ 6 ch 82 SLA 1982)

Effective dates. — Section 19, ch. 82, SLA 1982, makes this section effective June 4, 1982, in accordance with AS 01.10.070(c).

Sec. 43.40.040. Applications and permits for refund.

Repealed by § 45 ch 113 SLA 1980.

Cross references. — For present provisions concerning contents of applications for refunds, see AS 43.40.050(a).

Editor's notes. — The repealed section derived from § 3, ch. 47, SLA 1955; § 4, ch. 131, SLA 1962.

Section 52, ch. 113, SLA 1980 makes the repeal of this section applicable to tax years beginning after December 31, 1979.

Sec. 43.40.050. Refund claim by affidavit. (a) A person who claims a refund under AS 43.40.030 shall present the claim for the refund to the commissioner of revenue by affidavit upon a form provided by the commissioner. The claim shall include the name, address and occupation of the applicant, the nature of the business of the applicant, and a description sufficient to identify the machinery or equipment in which the motor fuel for which the refund is claimed was used.

The claim shall be accompanied by each invoice issued to the claimant at the time the motor fuel was purchased. The commissioner may require any additional information which the commissioner considers necessary for the administration of this subsection.

(b) A claim for refund under AS 43.40.030 or 43.40.035 shall be filed within one year from the date of the purchase of the motor fuel as indicated on the invoice, and failure to file within the one-year period is a waiver of the right to the refund. A claim is considered to be filed when the claim is mailed or personally presented to an office of the department.

(c) A reseller who claims a refund or credit under AS 43.40.035 shall present the refund claim to the department or to the supplier of that reseller by affidavit on a form provided by the department. The claim shall include the name, address, and occupation of the applicant, the nature of the business of the applicant, and a description sufficient to identify the reason for the refund or credit. The claim shall be supported by documentation required by the department. (§ 4 ch 47 SLA 1955; am § 1 ch 139 SLA 1960; am § 37 ch 113 SLA 1980; am §§ 7—9 ch 82 SLA 1982)

Effect of amendments. — The 1980 amendment in subsection (a), changed a reference to this chapter at the beginning and at the end of the subsection, substituted the present second sentence for the former material, which read: "with the information the commissioner requires", and substituted "was" for "is" preceding "purchase" at the end of the present third sentence.

The 1982 amendment, effective June 4, 1982, substituted "under AS 43.40.030" for "as provided in AS 43.40.010 — 43.40.100" and "the claim for the refund" for "his claim" in the first sentence of subsection (a), substituted "the commissioner" for "he" and "this subsection" for "AS 43.40.010 — 43.40.100" in the last sentence of subsection (a), inserted "under AS 43.40.030 or 43.40.035" in the first sentence of subsection (b), and added subsection (c).

Editor's notes. — Section 52, ch. 113, SLA 1980 makes this section applicable to tax years beginning after December 31, 1979.

Sec. 43.40.080. Examination of books and records. (a) To determine the validity of a claim for refund, the Department of Revenue may examine the books and records of the claimant and the books and records of a distributor of motor fuel. The Department of Revenue may cancel the refund permit of the claimant relying upon a fraudulent invoice for a period of not more than one year.

(b) Repealed by § 46 ch 113 SLA 1980. (§ 5 ch 47 SLA 1955; am § 46 ch 113 SLA 1980)

Effect of amendments. — The 1980 amendment repealed subsection (b).

Sec. 43.40.090. Criminal violation.

Repealed by § 46 ch 113 SLA 1980.

Editor's notes. — The repealed section derived from § 11, ch 47, SLA 1955; § 4, ch. 27, SLA 1957.

Sec. 43.40.100. Definitions. In AS 43.40.010 — 43.40.100

(1) "dealer" means a person who sells or otherwise transfers in this state motor fuel upon which the taxes imposed by AS 43.40.010 — 43.40.100 have not been paid;

(2) "motor fuel" means fuel used in an engine for the propulsion of a motor vehicle or aircraft, and fuel used in and on watercraft for any purpose, or in a stationary engine, machine or mechanical contrivance which is run by an internal combustion motor; "motor fuel" does not include

(A) fuel assigned to foreign countries;

(B) fuel sold for use in jet propulsion aircraft operating in flights to foreign countries;

(C) fuel used in stationary power plants operating as public utility plants and generating electrical energy for sale to the general public;

(D) fuel used by nonprofit power associations or corporations for generating electric energy for resale;

(E) fuel used by charitable institutions;

(F) fuel which is at least 10 percent alcohol by volume;

(G) fuel sold or transferred between qualified dealers;

(H) fuel sold to federal, state, and local government agencies for official use;

(I) fuel used in stationary power plants that generate electrical energy for private residential consumption;

(J) fuel used to heat private or commercial buildings or facilities, or;

(K) fuel used for other nontaxable purposes as prescribed by regulations adopted by the department;

(3) "user" means a person consuming or using motor fuel, who either

(A) purchases the fuel out of the state and ships it into the state for personal use in the state;

(B) manufactures the fuel in the state; or

(C) purchases or receives fuel in the state that is not taxed at the time of purchase or receipt or is taxed at a rate that is less than the rate prescribed by AS 43.40.010.

(4) "qualified dealer" means a person who (A) refines, (B) imports, (C) manufactures, (D) produces, (E) compounds, or (F) wholesales motor fuel, who satisfies criteria for qualified dealers established by the department by regulation and who obtains a qualified dealer's license from the department. (§ 48-5-1 ACLA 1949; am § 1 ch 56 SLA 1949; am § 9 ch 47 SLA 1955; am § 26 ch 70 SLA 1964; am §§ 6, 7 ch 158 SLA 1970; am § 1 ch 74 SLA 1972; am § 5 ch 116 SLA 1977; am § 10 ch 83 SLA 1980; am §§ 10—12 ch 82 SLA 1982)

Effect of amendments. — The 1980 amendment added subparagraph (F) in paragraph (2).

The 1982 amendment, effective June 4, 1982, in paragraph (2), added subparagraphs (G)-(K); in paragraph (3) added the subparagraphs (A) and (B) designations, substituted "personal use" for "his own use" and deleted "or" from the end, in subparagraph (A), added "or" to the end of subparagraph (B), and added subparagraph (C); and added paragraph (4).

Chapter 45. School Tax.

Section

10—60. [Repealed]

Secs. 43.45.010 — 43.45.060. Tax imposed; persons exempt; record of withholding; overpayment, credit and refund; failure to file return; penalties.

Repealed by § 3 ch 166 SLA 1976; § 2 ch 64 SLA 1980; § 46 ch 113 SLA 1980.

Editor's notes. — The repealed chapter derived from §§ 37-4-3 — 37-4-6, ACLA 1949; § 1, ch. 41, SLA 1957; § 1, ch. 175, SLA 1957; § 1, ch. 149, SLA 1959; §§ 1—5, ch. 179, SLA 1960; § 111, ch. 127, SLA 1974.

Section 3, ch. 64, SLA 1980 makes the repeal of this chapter applicable to tax years beginning after December 31, 1979.

Section 4, ch. 64, SLA 1980 provides: "The Department of Revenue shall establish procedures for refunding to a taxpayer amounts received in payment of the school tax levied under AS 43.45 for the 1980 tax year and shall refund to the taxpayer the tax which was withheld for the 1980 tax year by an employer and paid to the department under AS 43.45.010(c). Other tax money paid to the Department of Revenue under AS 43.45 for the 1980 tax year shall be refunded to the taxpayer who made the payment."

Chapter 50. Tobacco Tax.

Article 1. Cigarette Tax Act.

Section

10. License
100. Civil penalties
150. Administration
160. [Repealed]

Sec. 43.50.010. License. (a) No person may sell, purchase, possess, or acquire cigarettes as a manufacturer, distributor, direct-buying retailer, vending machine operator, or buyer without a license.

(b) The department, upon application and payment of the fee, shall issue a license to each manufacturer, distributor, direct-buying retailer, vending machine operator, or buyer. The department shall make reasonable regulations which it considers necessary in respect to the application for and the issuance of licenses.

(c) The department may refuse to issue a license if there is reasonable cause to believe that the applicant has wilfully withheld information requested of him to determine his eligibility to receive a license, or if there is reasonable cause to believe that information submitted in the application is false or misleading and is not made in good faith.

Sec. 43.40.060. Separate invoices. The Department of Revenue may require the issuance of separate invoices for fuel sold, distributed, or transferred when the invoices will be the basis for a refund claim. (§ 6 ch 47 SLA 1955)

Sec. 43.40.070. Refund warrants. Upon approval of a refund claim by the Department of Revenue, a warrant shall be drawn on the highway fuel tax account in the general fund in favor of the applicant in the amount of the claim. (§ 7 ch 47 SLA 1955; am § 5 ch 131 SLA 1962)

Sec. 43.40.080. Examination of books and records. (a) To determine the validity of a claim for refund, the Department of Revenue may examine the books and records of the claimant and the books and records of a distributor of motor fuel. The Department of Revenue may cancel the refund permit of the claimant relying upon a fraudulent invoice for a period of not more than one year.

(b) If an invoice relied upon for a refund claim is fraudulent, the claimant is guilty of a misdemeanor and is punishable by a fine of not more than $500. (§ 5 ch 47 SLA 1955)

Sec. 43.40.085. Preservation of books and records. Dealers and users shall preserve for three years all books and records pertaining to sales, transfers, and uses of motor fuel which are taxed under this chapter. (§ 5 ch 158 SLA 1970)

Sec. 43.40.090. Criminal violation. A person who uses motor fuel with knowledge that the tax has not been paid is guilty of a misdemeanor, and is punishable by a fine of not more than $500, or by imprisonment for not more than one year, or by both. (§ 11 ch 47 SLA 1955; am § 4 ch 27 SLA 1957)

C.J.S. reference. — 53 C.J.S. Licenses § 66.

Sec. 43.40.100. Definitions. In §§ 10—100 of this chapter

(1) "dealer" means a person who sells or otherwise transfers in this state motor fuel upon which the taxes imposed by this chapter have not been paid;

(2) "motor fuel" means fuel used in an engine for the propulsion of a motor vehicle or aircraft, and fuel used in and on watercraft for any purpose, or in a stationary engine, machine or mechanical contrivance which is run by an internal combustion motor; "motor fuel" does not include

(A) fuel consigned to foreign countries,

(B) fuel sold for use in jet propulsion aircraft operating in flights to foreign countries,

(C) fuel used in stationary power plants operating as public utility plants and generating electrical energy for sale to the general public,

State Capitol
Juneau, Alaska 99811
(907) 465-3720

Official Business

March 2, 1983

To: Members of House Transportation Committee

From: Jeff Day
Assistant to the Speaker

Re: HB 40/ Repeal of Motor Fuel Tax

As I stated, I have attached a copy of the general testimony I presented on behalf of Representative Hayes to the Committee on March 1. I would also like to take this opportunity to summarize a few of the remarks I made to the Committee which were not contained in those prepared remarks.

The question of Alaska's image has been discussed a great deal in connection with these bills. While the repeal of the income tax and the distribution of $1000 checks certainly made headlines nationwide, it is not believed repeal of these 8¢,5¢ and 4¢ taxes would exactly get front page coverage in the Wall Street Journal.

As a related matter, there have been questions raised regarding what the federal government might do as a result of our repealing the taxes and our lessened image. First, it must be noted that in FY 82, Alaska committed $230 million in state funds to transportation projects. These taxes we are talking about repealing amount to $30 million or roughly 9% of the total state committment to transportation. It is believed that repeal of these taxes will not necessarily mean any lessening of that committment to transportation or in paying the states share of projects which are financially shared with the federal government. Those decisions, though, will be made by the Legislature and not as any direct result of a repeal of reduction of fuel taxes. It is not believed our image will be lessened nor federal dollars jeopardized since it is assumed legislators will vote for a major financial committment to transportation and that is still the image this state will present to the nation.

I refer to the figure of 30 million dollars. However, the fiscal note you received on the bill shows a fiscal impact of $48 million. The fiscal note and the Departments own revenue projections from these taxes do not match, unless possibly they are including, in that 48 million, taxes collected before refunding.

If that is the case, then the fiscal note is quite misleading. I would suggest the Committee ask for further clarification of how the $48 million figure was arrived at. In my discussions with the Department, they said my assumption of a $30 million dollar loss of revenue as a result of the repeal was accurate.

Finally, I wish to emphasize the whole philisophical point of this bill. If we repeal the taxes, we are not directly lessening the amount of money that will go towards transportation releated projects. Though there are separate accounts established in the GENERAL FUND for the proceeds of these taxes, the monies cannot be dedicated to transportation projects. The funds are simply a part of the whole general fund which is the source of everything in the state budget. By eliminating the tax we are eliminating 30 million dollars in revenue available to be spent in any way as part of state Government.

Many representatives ran campaigns advocating less government and a lowered government budget. Though you are not the Finance Committee, positive action on HB 40 will result in an indirect budget cut since you will be eliminating 30 million dollars in revenue which would otherwise be available for general government to spend. A positive vote on HB 40 indicates your belief the state does not need this money, that the budget is too large and that there are better indirect effects this 30 million dollars will have for Alaskans rather than increased government. If you vote against repeal of the taxes, you are in effect saying government needs this money, the budget is at a proper level or needs to be increased.

Please contact me in Room 208 of the Capitol if I can be of further assistance.

Thanks.

HAYES' REMARKS RE: HB 40: REPEAL OF MOTOR FUEL TAX

THIS COMMITTEE HAS BEFORE IT SEVERAL PIECES OF LEGISLATION RANGING FROM ELIMINATION OF THE WATERCRAFT MOTOR FUEL TAX, TO A REDUCTION OF THE HIGHWAY MOTOR FUEL TAX, TO AN INCREASE IN THE MOTOR FUEL TAX. AND THEN THERE IS THE LEGISLATION WHICH I HAVE INTRODUCED WHICH ELIMINATES THE MOTOR FUEL TAX TOTALLY IN ALL AREAS.

YOU HAVE HEARD THE ARGUMENTS FOR ELIMINATION OF THE TAX FOR FUEL USED IN AND ON WATERCRAFT. I CONCUR IN THE REASONS STATED IN SUPPORT OF THAT LEGISLATION LAST WEEK BY REPRESENTATIVES GRUSSENDORF AND ZHAROFF. THOSE SAME REASONS CAN APPLY TO ELIMINATION OF THE TAX IMPOSED ON THE SALE OF AVIATION FUEL.

THE AVIATION FUEL TAX IS ESTIMATED TO BRING THE STATE ABOUT 5.4 MILLION DOLLARS IN FY 84...CLEARLY A VERY SMALL AMOUNT COMPARED TO THE ENTIRE REVENUE PICTURE. THE DEPARTMENT OF REVENUE HAS ALSO ESTIMATED THAT THE INCOME PRODUCED FROM THE TAX ON WATERCRAFT FUEL WILL BE ABOUT 4 MILLION DOLLARS.

THE MAJOR TAX THAT WOULD BE ELIMINATED UNDER THIS BILL IS THE 8 CENT PER GALLON TAX ON HIGHWAY FUEL SUCH AS GASOLINE. IT'S ESTIMATED THAT THIS TAX WOULD BRING THE STATE ABOUT 21 MILLION DOLLARS THIS YEAR.

THE TOTAL IMPACT OF REPEALING THE MOTOR FUEL TAX ENTIRELY WOULD BE A LOSS OF REVENUE TO THE STATE OF ABOUT 30 MILLION DOLLARS...ROUGHLY ONE PERCENT ON THIS STATES TOTAL REVENUES.

HOWEVER, THAT LOSS OF REVENUE TO THE STATE MEANS 30 MILLION DOLLARS IN THE POCKETS OF ALASKANS WHO DRIVE CARS OR OWN BOATS AND AIRPLANES. IT MEANS THE COST OF AIR TRAVEL SHOULD BE LESS IN A STATE THAT IS VERY DEPENDENT ON THE AIRPLANE AS A MODE OF TRANSPORTATION. IT MEANS THE OPERATION OF MASS TRANSIT SYSTEMS WHICH ARE USUALLY HEAVILY SUBSIDIZED BY LOCAL GOVERNMENTS WILL COST LESS TO OPERATE. IT MEANS THE AVERAGE CONSUMER OF MOTOR FUELS WILL RECEIVE ADDITIONAL MONEY DIRECTLY AND INDIRECTLY THAT WILL IN TURN BE PUT INTO THE ECONOMY IN OTHER WAYS.

THE REPEAL OF THE TAX DOES NOT MEAN THERE WILL BE 30 MILLION DOLLARS LESS FOR PORTS, AIRPORTS AND HIGHWAYS. WHILE THE STATUTES DO ESTABLISH SEPARATE ACCOUNTS WITHIN THE GENERAL FUND FROM THE PROCEEDS OF WATERCRAFT, AVIATION AND HIGHWAY FUEL TAXES...THE MONEY IS SIMPLY <u>PART OF</u> THE OVERALL GENERAL FUND. THE STATUTES SAY THE LEGISLATURE <u>MAY</u> APPROPRIATE FROM THESE FUNDS FOR BUILDING DOCKS, ROADS OR AIRPORT IMPROVEMENTS.

THE FACT IS THAT APPROPRIATIONS FOR SUCH PROJECTS ARE NOT TIED TO THESE FUNDS SPECIFICALLY. THE LEGISLATURE APPROPRIATES FAR MORE THAN 30 MILLION ANNUALLY FOR SUCH PROJECTS..AND THOSE APPROPRIATIONS COME FROM THE GENERAL FUND OF WHICH THESE THREE ACCOUNTS ARE SIMPLY A PART.

REPEAL OF THE TAX DOES NOT NECESSARILY MEAN WE WILL NOT BE ABLE TO DEVOTE AS MUCH MONEY TO TRANSPORTATION RELATED DEVELOPMENT. IT DOES MEAN 30 MILLION DOLLARS LESS FOR STATE BEAURACRACY TO PROVIDE GOVERNMENT SERVICES. CERTAINLY I WOULD EXPECT THE PUBLIC TO ANTICIPATE 30 MILLION DOLLARS LESS IN GOVERNMENT SERVICE AS A RESULT OF HAVING 30 MILLION DOLLARS INDIRECTLY ADDED TO THEIR SPENDING POWER.

YOU ALSO HAVE BEFORE YOU TODAY HB 55 BY REPRESENTATIVE MARTIN WHICH WOULD REDUCE THE HIGHWAY MOTOR FUEL TAX FROM 8 TO THREE CENTS IN AN EFFORT TO OFFSET THE 5¢ PER GALLON TAX WHICH WILL SOON TAKE EFFECT AS A RESULT OF FEDERAL LEGISLATION. HOWEVER, HB 55 MAKES NO CHANGE TO THE AVIATION OR WATERCARFT FUEL TAX. WHILE A 5¢ REDUCTION IN THE HIGHWAY FUEL TAX MIGHT BE A POTENTIAL COMPROMISE IN ONE AREA, I FEEL IT WOULD BE UNFAIR TO REDUCE ONE TAX AND NOT REDUCE TAXES FOR WATERCRAFT AND AVIATION.

AS A MINIMUM I WOULD HOPE THIS COMMITTEE WOULD ENDORSE THE CONCEPT OF REDUCING ALL THESE TAXES AND ELIMINATE THE CUMBERSOME REFUND PROCEDURES WHICH ARE IN EFFECT FOR THE HIGHWAY MOTOR FUEL TAX.

AT BEST I WOULD HOPE YOU WOULD ADOPT HB 40 WHICH WOULD ELIMINATE THIS SO CALLED NUISANCE TAX ALLTOGETHER.
THE BASIC QUESTION IS SIMPLY WHO GETS THE 30 MILLION DOLLARS THIS TAX GENERATES. WILL THE STATE GET IT TO PROVIDE MORE GOVERNMENT OR WILL ALASKANS RETAIN IT AND IN TURN PROVIDE BENEFITS TO THE ALASKAN ECONOMY THROUGH THE MARKET PLACE.

THANK YOU FOR THE OPPORTUNITY TO TESTIFY ON THIS BILL TODAY.
I LOOK FORWARD TO THIS COMMITTEES ACTION.

# # # # #

Imitation Controlled Substances

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 10, (see pages 28 and 134). The major change in the bill is elimination of lengthy section on forfeitures. Instead provides that property used during or in aid of a violation of laws regulating imitation controlled substances may be forfeited to the state to the extent permitted under laws regulating controlled substances (AS 17.30--see AS 17.30.110, Forfeitures).

The Sponsor Substitute would add "Imitation Controlled Substances Act" to Title 11 (Criminal Law) rather than to Title 17 (Food and Drugs).

Replaces the term "distribute" with "deliver" throughout the bill (e.g. "Delivery of an Imitation Controlled Substance to a Minor"). Definition reads "the actual, constructive, or attempted transfer from one person to another of an imitation controlled substance, whether or not there is an agency relationship."

Adds the following to the list of illegal imitation drugs contained in original bill: lidocaine; procaine; tetracaine; dyclonine; acetaminophen; salicylamide; doxylamine; diphenhydramine; pheniramine; chlorpheniramine; pyrilamine. Would also make possession or delivery of a salt of an imitation controlled substance illegal.

Introduced February 11 and referred to Judiciary and Finance.

Motor Fuel Tax (repeal of)

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 40, (see page 40), by Hayes, Martin, Lindauer, Tischer and Barnes. Would only repeal the state motor fuel tax (AS 43.40), retroactive to January 1, 1983, and applying to tax years beginning after December 31, 1982. Directs the Dept. of Revenue to adopt regulations providing for refunds of motor fuel taxes collected after December 31, 1982. Effective immediately. Original HB 40 also repealed the Permanent Fund Dividend Program and the $100 tax credit for campaign contributions--see p. 40.

Introduced February 11 and referred to Transportation and Finance.

Permanent Fund Dividend Prog. (repeal of)

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 85, (see page 55), by Szymanski. Adds new section to original version of bill amending the law relating to the disposition of income of the Alaska Permanent Fund. Provides that annually an amount sufficient to offset inflation on the principal of the Permanent Fund shall be transferred from net income to the principal of the Fund for reinvestment (deletes language that now excludes income on the Undistributed Income Account). Provides the balance of the net income shall be transferred to the Undistributed Income Account "and then shall be returned to the principal of the Alaska permanent fund to be treated as principal of the permanent fund in all respects." (The law currently provides: "The balance of the net income. . .shall be transferred to the undistributed income account in the Alaska permanent fund. Money in the undistributed income account shall be invested in investments authorized under AS 37.13.120. Income from the investment of the undistributed income account shall be treated as an addition to that account."

HB 39, (cont'd)

counseling, adoption assistance, maternity home and foster home care, postnatal care and parenting skills. Would require persons providing services to be licensed if required by the Department. Provides Act takes effect immediately.

Introduced January 17 and referred to Health, Education and Social Services, then to Finance.

Revenue & Tax Laws (repeal of certain)

HOUSE BILL NO. 40, by Hayes, Martin, Lindauer and Tischer. Would repeal certain state revenue and taxation laws: AS 43.20.013(a) (Alaska Net Income Tax Act. Individual Tax Credits.--allows a $100 tax credit for campaign contributions); AS 43.23 (Permanent Fund Dividends.--would repeal the Permanent Fund Dividend program); AS 43.31 (Alaska Estate Tax); AS 43.40 (Motor Fuel Tax). Amends certain statutory references to the Permanent Fund Dividend program and the estate tax. Amends section of law relating to the choosing of a jury that allows use of the list of person who filed for a Permanent Fund dividend, deleting reference to the Permanent Fund. Provides Act is retroactive to January 1, 1983 and applies to tax years beginning after December 31, 1982. Provides Act takes effect immediately.

Introduced January 17 and referred to State Affairs, then to Finance.

Municipal Roads (state aid)

HOUSE BILL NO. 41, by Lacher, Larson, Phillips, Szymanski and Tischer. Would increase the amount of state aid to municipalities for road maintenance from $2,500 a mile to $3,500 a mile for each mile of road, street or highway maintained by the municipality (amends AS 29.89.020(a) to so reflect). Also would amend a new Municipal Code when enacted by the Thirteenth Legislature (see SB 1, page 1). Provides Act takes effect July 1, 1983, and provides payments of state aid shall start during the fiscal year beginning July 1, 1983.

Introduced January 17 and referred to Community & Regional Affairs, Transportation, then to Finance.

Population Determination (state aid)

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 42, by Lacher and Larson. Relates to the determination of population for purposes of calculating amounts of state aid. Adds new language to AS 29.88.015 (Municipal Tax Resource Equalization. Determination of Population) and AS 29.89.060 (State Aid for Miscellaneous Municipal Purposes. Population Determination) to provide that the population does not include an individual who is employed in the taxing unit or area for which the determination is made but whose primary place of residence is outside the area, regardless of the amount of time that individual spends in the taxing unit. The bill would amend the exisiting Municipal Code (AS 29), as well as a new Municipal Code (see SB 1, page 1) when enacted by the Thirteenth Legislature. Provides Act takes effect July 1, 1983.

Representative Cato

Dear Legislator:

We are a Tesoro distributor in Fairbanks and we are quite concerned about the present statues, regulations, and various forms that are involved with motor fuel tax.

We simply feel that present laws and regulations are out of line. What has been created here is a mountain of paper work that is quite simply "uncalled for".

We understand that there is a house bill (40) that would eliminate this tax all together. We would like to see this passed and that the present law not be implemeted until the 1985 legistators review it.

Thank you for your consideration in this matter.

Yours truly,

Joe Gilbertson 1/85

Sales/Use Taxes

FUEL

Tax is levied on aviation fuel, highway fuel, and marine fuel at the following rates. (AS 43.40)

Aviation fuel: 4¢ per gallon on aviation gas and 2 1/2¢ per gallon on aviation jet fuel.

Highway fuel: Gasoline and diesel fuel is taxed at the rate of 8¢ per gallon. "Off-highway" users may claim a refund of 6¢ per gallon on motor fuel within one year of purchase if the 8¢ tax was paid.

Marine fuel: Rate is 5¢ per gallon for fuel used in engines for the propulsion of boats and watercraft.

Due Date	Allocation
By last day of month for prior month	General Fund

(Administered by the Department of Revenue.)

ALCOHOLIC BEVERAGE

Tax rates are based on alcoholic content: Malt beverages (1% or more alcohol) $0.25 per gallon; wine (21% or less alcohol) $0.60 per gallon; hard liquor (more than 21% alcohol) $4.00 per gallon. (AS 43.60)

Due Date	Allocation
By last day of month for prior month	General Fund

(Administered by the Department of Revenue.)

TO: House C & RA Committee Members

FROM: Staff

SUBJECT: House Bill 41

AS 29.89.020 provides $2,500 per road mile to municipalities that maintain roads excluding the official state highway system (state maintained) and roads maintained under the local service roads and trails program.

The amount of $2,500 per road mile of maintainance was established by the Legislature in 1980. There has been no increase in the amount authorized in recognition of inflation in the cost of maintaining roads.

According to figures provided by the Department of Transportation and Public Facilities, they requested an average of $9,300 per mile for maintenance of state roads in FY 83.

Programs Effects

This Bill would increase the per mile amount distributed for road maintenance under the Municipal Revenue Sharing program. It would raise it from $2500 per mile to $3500 per mile.

Comments

The Department supports the intent of this bill to increase aid to communities. The Department would suggest an increase to the appropriation to the Municipal Revenue Sharing Fund if this bill were passed. For the current year Chapter 89 Revenue Sharing funds are prorated at 81% of the total each community is eligible for; if this bill were in place that proration factor would be approximately 75%. That would mean that Municipal Revenue sharing for other areas (Health Care, Volunteer Fire Departments, and Unincorporated Communities.) would be reduced to pay for increased assistance for roads if the appropriation were not increased.

Additionally, increasing the amount per mile of road could weight the formula disproportionately in favor of Municipalities located on the road system.

The bill should also be reviewed in light of other proposed changes in the Municipal Revenue Sharing program and projected funding over the next few years.

MEMORANDUM

TO: Representative Barbara Lacher
Attention: Bob Harris

FROM: Christine Johnson and Jonathan Sherwood
Research Staff

RE: Road Maintenance Costs
Research Requests 83-33

Bob Harris of your staff has requested the following information for hearings scheduled on HB 41. This bill would increase the amount municipalities receive from the State for road maintenance from $2,500 to $3,500 per road mile.

(1) How would HB 41 affect the amount of money received for road maintenance in each election district?

(2) How much did the State Department of Transportation and Public Facilities receive for road maintenance in FY 83?

(3) What is the average cost of maintenance per road mile on roads maintained by the State?

Increase in Revenues by Election District

Table 1 on the following page shows the amount of money which would be received in each House district in FY 84 at $2,500 per mile and at $3,500 per mile. As the table indicates, municipalities would receive approximately $11.1 million for road maintenance in FY 84 under HB 41. This compares to $7.9 million which they could receive under the current program in FY 84, given full funding. The amounts shown on the table include a cost-of-living adjustment computed by the Department of Administration. State law (AS 29.89.070) currently requires that payments to municipalities under this program reflect area cost-of-living differentials.

Please note that where a municipality encompasses more than one House district we have combined those districts.

State Expenditures for Road Maintenance

According to Paul Harris, with the Department of Transportation and Public Facilities Maintenance and Operation Division in Anchorage,

the approximate cost of State road maintenance can be obtained by adding the FY 83 appropriation for each region in the Maintenance and Operation Budget Request Unit of DOT/PF's budget (see FY 84 Executive Budget, page 481). The total for all regions, including the Dalton Highway is about $56 million. According to Mr. Harris, the State is responsible for maintaining approximately 6,000 road miles. Based on this estimate, the average cost per road mile of maintaining State roads is $9,300.

If you would like any additional information on this topic, please don't hesitate to contact us.

re: HB 41 - State Aid to Municipalities for Roads

The Alaska Municipal League supports the adoption of HB 41, increasing state aid to municipalities for roads from $2,500 a mile to $3,500 a mile if the revenue sharing appropriation is increased to cover the increased entitlement. If the total appropriation is not increased, then municipalities will receive decreased funding in the other revenue sharing categories to make up for the road increases.

It has been three years since the allocation per mile has been increased. Needless to say, the cost of road maintenance has gone up considerably since then. At that time, it was estimated that the actual costs of maintaining a mile of road were between $4,000 and $8,000.

(2) to a Native village government under AS 29.89.050. (§ 3 ch 155 SLA 1980)

Sec. 29.89.020. State aid to municipalities for roads. (a) The department shall pay to a municipality which has power to provide for road maintenance and exercises that power, $2,500 a mile for each mile of road, street or highway maintained by the local government, excluding (1) the official state highway system, (2) roads, streets or highways not dedicated to public use, (3) roads, streets or highways maintained under the local service road program (AS 19.30.111 — 19.30.251), and (4) alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. A payment may not be made under this subsection for maintenance of a road which is not used by automotive equipment.

(b) A frozen waterway and a connection from an inhabited area to a waterway which may be safely used for public transportation by automotive equipment and is so used during a portion of a year is eligible for a payment of $1,500 per mile if the waterway and connection are maintained during the period of use by a municipality or combination of municipalities. The department, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipalities shall receive the payments under this subsection, unless the municipalities involved have agreed in writing to a particular distribution. (§ 3 ch 155 SLA 1980)

Sec. 29.89.030. State aid to municipalities and other eligible recipients for health facilities and hospitals. (a) The department shall pay

(1) to a municipality which has the power to provide hospital facilities and services and which exercises that power, $1,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the hospital, or $250,000 a hospital for those hospitals with 10 or more beds, or $50,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; money received under this paragraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(2) on the basis set out in (1) of this subsection to a municipality for a nonprofit hospital not operated by a municipality if the municipality first certifies to the department that the nonprofit hospital is in compliance with all standards for hospitals which have been adopted by the municipality; money may not be paid on behalf of a nonprofit hospital without this certification; payments to the municipality shall be transferred to the nonprofit hospital in accordance with the basis by which the payment was generated by the hospital, and shall be applied to the

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

This bill would increase the amount Municipalities receive from State Aid (AS 29.89) for road maintainence.

The above projections are based on the currently approved 2883.35 road miles and incorporates the COLA for all the areas. They reflect the difference between the current $2500 per mile and the proposed $3500 per mile.

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act decreasing the motor fuel tax to offset tax increase by federal government, repealing motor fuel tax refund provisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.40.010(a) is amended to read:

(a) There is levied a tax of three [EIGHT] cents a gallon on all motor fuel sold or otherwise transferred within the state, except that

(1) the tax on aviation gasoline is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

* Sec. 2. AS 43.40.010(b) is amended to read:

(b) There is levied a tax of three [EIGHT] cents a gallon on all motor fuel consumed by a user, except that

(1) the tax on aviation gasoline consumed is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

STATE OF ALASKA
DEPARTMENT OF REVENUE

M E M O R A N D U M

TO: The Honorable Representative Robert Bettisworth

FROM: Robert R. Kessel
Director, Audit Division
Department of Revenue

RE: Amendments to Motor Fuel Law

DATE: February 16, 1983

The Department of Revenue has conducted public meetings with motor fuel dealers and other interested parties in Fairbanks, Anchorage and Juneau. In the opinion of the Department of Revenue, if the following changes could be made to Chapter 40, Title 43 of the Alaska Statutes, the motor fuel dealers would feel satisfied with the existing law.

1. Eliminate the certificate of use requirement, in total, for fuel used exclusively for heating a private residence.

2. Eliminate the certificate of use requirement, in total, for fuel which is at least 10% alcohol by volume.

3. Require only an annual certificate of use for almost all other exempt sales, reserving some discretionary judgement for exempt sales handled on an individual basis under sub-paragraph (K) of Section 43.40.100(2).

In addition we believe that motor fuel dealers should be granted a 1% commission, limited to $100, to compensate them for collecting the tax and for the demands required in maintaining records. Alaska currently allows a commission for cigarette taxes and most other states have similar provisions. I believe the motor fuel dealers would, obviously, like this change. For example, application would be as follows:

Tax To Be Remitted	Commission
$ 600	6 (1%)
5,000	50 (1%)
10,000	100 (1%)
20,000	100 (1%-limited to $100)

dealers extra work and yet would not be costly to the state. There are a limited number of dealers.

The recommended change to AS 43.40, per attached Exhibit 1, would provide for the above recommendations; the changes could very well be incorporated into Senate Bill 117 (By the Rules Committee by Request of the Governor) which is "An Act making technical amendments relating to state taxation."

AS 43.40.010(c) is amended to read:

(c) Every dealer who sells or otherwise transfers motor fuel in the state shall collect the tax at the time of sale, and remit the total tax collected during each calendar month of each year to the Department of Revenue by the last day of each succeeding month. Every user shall likewise remit the tax accrued on motor fuel actually used by him during each month. <u>If the monthly tax return is timely filed, one percent of the total monthly tax due, limited to a maximum of $100, can be deducted and retained to cover the expense of accounting and filing the monthly tax return.</u> At the time the remittance is made, each dealer or user shall submit a statement to the Department of Revenue showing all [MOTOR] fuel which he has distributed or used during the month.

AS 43.40.010(l) is amended to read:

(l) If a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel, the dealer need not collect the motor fuel tax. If the tax is not collected, the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel. The Department of Revenue may not collect the motor fuel tax from a dealer for fuel for which a certificate of

use has been properly obtained under this subsection. A Certificate of use is not required for fuel used to heat a private residence or for fuel which is at least 10% alcohol by volume. An annual certificate of use is required for all other exemptions, as listed under AS 43.40.100(2), except sub-paragraph (K) where certificate of use needs will be determined by the Department of Revenue. The dealer shall retain a copy of each certificate of use obtained under this subsection for examination or audit on request by the Department of Revenue. The form of a certificate of use may be prescribed by regulation adopted by the Department of Revenue.

AS 43.40.035(a) is amended to read:

(a) A person who resells fuel on which the tax under AS 43.40.010(a) or (b) was previously paid is entitled to a credit or refund of the tax if (1) the resold fuel is not motor fuel and the requirements prescribed by AS 43.40-.010(L) have been fulfilled [A CERTIFICATE OF USE IS ACQUIRED UNDER AS 43.40.010(1)]; or (2) the amount of tax previously paid exceeds the tax due on the resale. The amount of the credit or refund under this section is equal to the amount of tax previously paid on the resold fuel less the amount of tax prescribed by AS 43.40.010(a) or (b).

AS 43.40.100 IS AMENDED TO INCLUDE:

(L) fuel used in stationary power plants that generate electrical energy for commercial enterprises;

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER

POUCH S
JUNEAU, ALASKA 998[illegible]
PHONE: (907) 465-2300

March 4, 1983

The Honorable Bette Cato
Representative
Alaska State Legislature
Pouch V
Juneau, AK 99811

RE: Motor Fuel Special Tax Accounts -
Your Request of Mr. Robert Kessel

Dear Representative Cato:

You requested certain information from Mr. Kessel during the March 2, 1983 hearing relating to various motor fuel bills. The information has been somewhat difficult to compile but I hope what I present herein is adequate. If not, please feel free to call me and we will make additional efforts.

Our qualified conclusion is that even though specific accounts are provided for in the motor fuel statutes (AS 43.40.010), the legislature does not, in fact, correlate appropriations to the amount in the accounts. In other words, appropriations for water and harbor facilities, maintenance of highways, etc. are not limited to the amounts accumulated in the special accounts. As will be demonstrated, monies appropriated come partly from the special accounts and partly from other General Fund monies.

Our contacts during this mini-project have been the Finance Section of the Department of Administration and the Finance Section of the Department of Transportation.

REVENUES - FUEL TAX ACCOUNTS

Gross receipts deposited as unrestricted revenues in the General Fund, and designated as unreserved special accounts in the General Fund (thousands of dollars) are as follows:

	Actual FY 81	Actual FY 82	Estimated FY 83	Three Year Total
Fuel Taxes - Aviation	$ 4,100	$ 6,300	$ 5,100	$15,500
Fuel Taxes - Highway	15,600	20,300	21,000	56.900
Fuel Taxes - Marine	3,600	3,700	3,800	11,100

04-D2LH

APPROPRIATIONS - FUEL TAX ACCOUNTS

Included within the General Fund appropriations for the operating and capital expenses of the state government were the following amounts from the above unreserved special accounts (thousands of dollars):

	Actual FY 81	Actual FY 82	Actual FY 83	Three Yr Total
Aviation Fuel Tax Acct.	$ 3,700	$ 4,300	$ 4,500	$13,500
Highway Fuel Tax Acct.	19,000	20,200	18,500	57,700
Watercraft Fuel Tax Acct.	3,200	3,300	3,800	10,300

The amounts shown for the highway fuel tax and the aviation fuel tax accounts were included in the appropriations from the General Fund for the Operating Budget. The amounts shown for the watercraft fuel tax account were included in the appropriations from the General Fund for the capital budget for water and harbor facilities. The original capital budget for FY 1983 for ports and harbors appropriated from the General Fund was $4,707,000. Included in this is the $3,300,000 from the watercraft fuel tax account.

EXPENDITURES FROM FUEL TAX ACCOUNTS

The General Fund summary of expenditures and encumbrances compared with appropriations for the operating programs of the Department of Tranportation and Public Facilities supports the previous statement made in this memo regarding lack of correlation. Example: The line item amount for Highway Design & Construction expenditures and encumbrances for FY 1982 was $39,577,000. Included in this would be the $20,200,000 appropriated from the highway fuel tax account in the General Fund. The balance of this line item expenditure apparently came from other General Fund monies.

The General Fund summary of expenditures and encumbrances compared with appropriations for the capital outlay projects of the Department of Transportation & Public Facilities further supports our statement. Example: The total expenditures for capital outlay projects for the Department of Transportation & Public Facilities for FY 1982 was $46,742,000. Included in this was the $3,300,000 appropriated from the watercraft fuel tax account. The balance of the expenditure came from other General Fund monies.

CONCLUSION

It would require many hours of work to match the actual expenditures for highway, airport, and port & harbor facilities against the appropriations from the unreserved highway, aviation and watercraft fuel tax accounts in the General Fund. Since these funds are not restricted in the General Fund or

set aside in a Special Revenue Fund, they are always included in the general appropriations made from the General Fund for airports, highways, and port & harbors operating and capital budgets.

QUALIFICATION

Please bear in mind that the above is from the limited perspective of this Department. If the Committee has more specific questions pertaining to federal matching funds, the Department of Revenue would defer to the Department of Transportation, or the Office of Management and Budget for a more comprehensive explanation of the funding formulas.

Sincerely,

Robert D. Heath
Commissioner of Revenue

BILL COMPARISON

SSHB 40 Hayes, Martin, Kubley, Fischer, Barnes	SSHB 55 Martin/Grussendorf	HB 150 Zharoff + Grussendorf
An Act repealing the motor fuel tax (AS 43.40); and providing for an effective date.	An Act decreasing the motor fuel tax to offset tax increase by federal government, repealing motor fuel tax refund provisions; and providing for an effective date	An Act repealing the tax on motor fuel used in or on watercraft; and providing for an effective date.
Would only repeal the state motor fuel tax (AS 43.40), retroactive to January 1, 1983, and applying to tax years beginning after December 31, 1982 Directs the Dept. of Revenue to adopt regulations providing for refunds of motor fuel taxes collected after December 31, 1982. Effective immediately.	Lowers motor fuel tax to 3¢ per gallon, and repeals motor fuel tax refund provisions contained in the following statutes: --AS 43.40.030 "Refund for Nonhighway Use," allows six-cent-per-gallon refund on any tax paid for fuel used for a vehicle which is not operated on highways in the state (does not apply to aviation fuel and watercraft fuel). Allows total refund on that part of the fuel sold for non-highway use in a foreign country. --AS 43.40.035 "Other Refunds and Credits," which allows a person who resells fuel on which the motor fuel tax was previously paid to receive a refund of the tax. --AS 43.40.050 "Refund Claim by Affidavit," containing procedure for claiming refund of motor fuel tax by filing an affidavit with the Dept. of Revenue. --AS 43.40.060 "Separate Invoices," which allows the Dept. of Revenue to require separate invoices for fuel sold, distributed, or transferred when the invoices will be the basis for a refund claim -continued-	Would repeal the 5¢ per gallon tax on motor fuel tax used in or on watercraft.

SSHB 40	SSHB 55	HB 150
	--AS43.40.070, "Refund Warrants," directs the Dept. of Revenue, upon approval of a refund claim, to issue a warrant drawn on the Highway Fuel Tax Account in favor of the applicant in the amount of the claim. --AS 43.40.080, "Examination of Books and Records," allows the Dept. of Revenue to examine a claimant's books and records to determine validity of a claim for refund. Note: bill also includes repealer for AS 43.40.040, "Applications and Permits for Refund," however this section was repealed in 1980 by Sec. 45 of Ch. 113, SLA 1980. (Required person seeking refund to obtain a permit from the Dept. of Revenue.) Fiscal Note Info.: The proposed bill reduces the tax on motor fuel, thus reducing General Fund revenues - FY 83 - 2.0 mill. FY 84 - 17.0 mill. FY 85 - 10.0 mill. Only AS 43.40.030(a) needs to be repealed	Fiscal Note Info.: Shows a loss of revenues in the General Fund as follows: FY 83 - 0 FY 84 - 3.2 mill. FY 85 - 4.2 mill.

INSTRUCTIONS FOR THE CLAIM FOR REFUND OF MOTOR FUEL TAX BY A RESELLER

GENERAL INFORMATION

The Claim for Refund of Motor Fuel Tax must be filed with the Department of Revenue or with your supplier (if an election has been properly made in accordance with AS 43.40.035 (b)) within one year from the date you sold or transferred the fuel as indicated on the invoice you issued. The claim must be supported by copies of the orignial invoices you issued to the purchaser of the fuel along with copies of the certificate of use you obtained from the purchaser.

1. Complete Form 04-536, Supporting Schedule for all exempt sales except sales of fuel for heating purposes. A list of all heating fuel accounts, except residential accounts, must be submitted with this claim for refund.

2. Complete Form 04-535, Claim for Refund of Motor Fuel Tax by a Reseller.

   a. Line 1 thru 11 - Enter the gallonage sold by fuel type and distribution item from the Supporting Schedule(s).

   b. Line 12 - Add lines 1 thru 11.

   c. Line 13 - Enter the total number of gasoline gallons upon which you paid tax at 8¢ per gallon and sold for use in or on watercraft.

   d. Line 14 - Enter the total number of diesel gallons upon which you paid tax at 8¢ per gallon and sold for use in or on watercraft.

   e. Summary of Amount Claimed:

      Line A. - Enter the gallonage from Line 12, column (a) and enter the refund claimed at 4¢ per gallon.

      Line B. - Enter the gallonage from Line 12, column (b) and enter the refund claimed at 2 1/2¢ per gallon.

      Line C. - Enter the gallonage from Line 12, column (c) and enter the refund claimed at 8¢ per gallon.

      Line D. - Enter the gallonage from Line 12, column (d) and enter the refund claimed at 8¢ per gallon.

      Line E. - Enter the gallonage from Line 12, column (e) and enter the refund claimed at 5¢ per gallon.

      Line F. - Enter the gallonage from Line 12, column (f) and enter the refund claimed at 7¢ per gallon.

      Line G. - Enter the gallonage from Line 13 and enter the refund claimed at 3¢ per gallon.

      Line H. - Enter the gallonage from Line 14 and enter the refund claimed at 3¢ per gallon.

      Line I. - Enter the total number of gallons on Lines A thru H.

      Line J. - Enter the total of refund amounts on Lines A thru H.

   f. Signature - The claim must be signed by an officer or agent of the company. Failure to sign the claim will result in a denial of the refund.

CERTIFICATE OF USE FOR EACH SALE

No.:_____

Covering Purchases of Fuel Not Intended to be Used as Motor Fuel
AS 43.40.010

NAME OF SELLER	DATE OF SALE	NAME OF PURCHASER
MAILING ADDRESS	INVOICE NO	MAILING ADDRESS
CITY, STATE, ZIP CODE	NO. OF GALLONS	CITY, STATE, ZIP CODE

TYPE OF FUEL: ☐ Aviation Gasoline ☐ Highway Gasoline ☐ Marine Gasoline
☐ Aviation Jet Fuel ☐ Highway Diesel ☐ Marine Diesel

My purchase of fuel is not subject to the Alaska Motor Fuel Tax because it is a: (check appropriate box)

☐ 1. Sale to a public utility plant or a non-profit power association.
☐ 2. Sale of jet fuel for use in a direct flight to a foreign country.
☐ 3. Sale of jet fuel to a common storage tank for use in a direct flight to a foreign country.
☐ 4. Sale of blended jet fuel.
☐ 5. Sale of fuel to a charitable institution.
☐ 6. Sale of fuel consigned to a foreign country.
☐ 7. Sale of fuel which is at least 10% alcohol by volume.
☐ 8. Sale of fuel for other exempt purpose as approved by the department.

The undersigned understands that the fraudulent use of this certificate will subject the undersigned and all guilty parties, upon conviction, to a fine not to exceed $25,000 or by imprisonment for not more than three years, or by both. The undersigned also understands that he must be prepared, upon request, to supply satisfactory evidence establishing the purpose for which the fuel was used.

I declare under penalty of perjury that I have examined this certificate and to the best of my knowledge and belief it is a true, correct and complete statement showing the manner in which the fuel will be used. I also certify that this fuel has not been delivered to a common storage tank servicing both taxable and non-taxable uses except bulk purchases of jet fuel by a person who exclusively flies directly from Alaska to a foreign country.

INSTRUCTIONS FOR THE MONTHLY MOTOR FUEL TAX RETURN

1. Complete Form 04-541, Motor Fuel Tax Return, lines 1-4

   a. Enter the total gallons of all taxable and non-taxable fuel sold or transferred during the month.

   b. Line 2 - Enter the total gallons of fuel you used during the month.

   c. Line 3 - Enter the total gallons of fuel exported out of Alaska, actual losses and use-conversion sales made during the month and any other distributions of fuel not entered on Line 1 or Line 2. NOTE: Use-conversion sales should be shown as a reduction in total highway gasoline or diesel and an increase in total marine gasoline or diesel sales. Example: The ABC Company purchased 1,000 gallons of highway gasoline and paid 8¢ per gallon tax in January and sold the fuel for use in or on watercraft. On its return for the month of February, the ABC Company will reduce its total highway gasoline sold by 1,000 gallons and increase its total sales of marine gasoline by 1,000 gallons. This will give the ABC Company the three cent per gallon difference in the tax rate paid. The Supporting Schedule, Form 04-543, must be attached to substantiate all use-conversion sales.

   d. Line 4 - Add Lines 1 thru 3.

2. Complete Form 04-543, Motor Fuel Tax Return, lines 5 - 24.

   a. Line 5-18 - Enter all exempt distributions and losses from the Supporting Schedule, Form 04-543. NOTE: Do not enter any use-conversion sales here.

   b. Line 19 - Add lines 5 thru 18.

   c. Line 20 - Subtract line 19 from line 4.

   d. Line 21 - Multiply line 20, column (a) by 4¢.

   e. Line 22 - Multiply line 20, column (b) by 2 1/2¢.

   f. Line 23 - Multiply line 20, column (c) and (d) by 8¢.

   g. Line 24 - Multiply line 20, column (e) and (f) by 5¢.

   h. Total Tax - Add lines 21 thru 24.

   i. Penalty - If you do not file your return or pay the tax by the last day of the month following the month the fuel was sold or transferred, penalty is imposed at the rate of 5% per month or fraction of month.

   j. Interest - Any delinquent payment is subject to interest at 12% per Annum.

   k. Total Amount - Add the total tax, penalty and interest. This is the amount due with the return.

Form 08-544 (Rev. 11/79)

SCHEDULE A. STATEMENT OF MOTOR FUEL USE UPON WHICH REFUND IS CLAIMED

STATEMENT OF USE (Use additional sheets if necessary)

Total Gallons Used (To line A3 on front)				

GENERAL INSTRUCTIONS

1. First complete Form 04-545, Schedule B - Invoice Listing Sheet.

   a. Original invoices only will be accepted.

   b. Invoices must show: (1) Name and address of distributor, (2) Name and address of the purchaser, (3) Type of motor fuel purchased, (4) Quantity of motor fuel purchased, (5) Unit price, (6) Total price, & (7) Signatures of both seller and purchaser or their agents.

   c. Invoices that have been changed, erased or altered in any manner will not be accepted.

   d. Invoices that have been made out to cash will not be accepted.

2. A person who used motor fuel to operate an internal combustion engine is entitled to a return of six cents a gallon if:

   a. The tax on the motor fuel has been paid,

   b. The motor fuel is not aviation fuel or motor fuel used in or on watercraft, and

   c. The internal combustion engine is not used in, or in connection with, a motor vehicle licensed to be operated on public ways.

   If the incorrect tax rate has been paid on fuel used in or on watercraft or in aircraft, a refund may be applied for.

   Motor fuel tax paid on fuel used in a manner not specified as being taxable by Alaska Statute is refundable, i.e., heating fuel.

   Use of fuel must be summarized in Schedule A above.

3. In accordance with law, claims must be filed within one year of the date of purchase.

4. A permit to file claim for refund of motor fuel tax must be obtained before or at the time of filing such claim. All permits expire June 30th following the date of issuance.

   REMEMBER A fraudulent claim is a misdemeanor punishable by a fine not to exceed $500.00. The Commissioner may also cancel the refund permit of the offender for a period of one year.

ALASKA DEPARTMENT OF REVENUE

INSTRUCTIONS FOR THE MONTHLY MOTOR FUEL TAX RETURN

SUPPORTING SCHEDULE

1. Check the applicable type of exemption or use. Do not combine two or more types of exempt sales on the same schedule. A separate schedule must be completed for each type of exempt sale.

2. Name of Purchaser - Enter the name of the agency, company, organization or person who purchased the fuel.

3. Type of Fuel - Indicate the type of fuel sold, e.g., highway gasoline, marine diesel.

4. Number of Gallons - Enter the number of gallons sold.

Alaska Department of Revenue

Motor Fuel Tax
Discussion Topics
February, 1983

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF REVENUE

STATE OFFICE BUILDING
POUCH SA
JUNEAU, ALASKA 99811

Dear Motor Fuel Dealer:

I believe we can all agree that Chapter 40 of Title 43 of the Alaska Statute has provided for a motor fuel tax that has been difficult to administer or comply with. Determining the point of taxability and defining the term "motor fuel" are only two of the problems which have created controversy between the Department of Revenue and motor fuel dealers. The 1982 Legislature passed new legislation addressing these problems. That legislation, among other things, provided for the transfer of fuel ex-tax to an exempt user provided a Certificate of Use was issued by the purchaser to the seller. The Department of Revenue promulgated regulations intended to interpret Chapter 40 as amended by Chapter 82 of the 1982 Session Laws.

Obviously, the regulations have not created a cure-all for all ills. The Department of Revenue, however, with some recent administrative action has reduced the Certificate of Use requirements to a more logical and workable format.

We are most appreciative of the cooperation shown by you dealers in assisting the Department toward its objective of equitable administration. I realize you may feel that we impose many reporting and compliance requirements. Let me assure you, however, that the reporting requirements for Alaska motor fuel dealers cannot compare to the exhaustive demands of other states. A review of motor fuel regulations and forms as required by states such as Texas, California, Illinois, North Dakota and others supports that conclusion.

I hope this question and answer booklet will help in responding to some of your questions. The booklet is not intended as a substitute for the statutes or regulations.

Please feel free, always, to contact our office when necessary. The Department of Revenue is sincere in its belief that we must work together to assure proper collection of motor fuel taxes without requiring elaborate forms and reports.

Sincerely,

Robert R Kessel

Robert R. Kessel, CPA, CMA
Director
Audit Division

ALASKA MOTOR FUEL EXCISE TAX
QUESTIONS AND ANSWERS

Motor Fuel Definition and Exemptions

Question 1: What is considered motor fuel and thus subject to the Alaska motor fuel tax?

Answer: Motor fuel is defined as fuel used in an engine for the propulsion of a motor vehicle or aircraft, and fuel used in and on watercraft for any purpose, or in a stationary engine, machine or mechanical contrivance which is run by an internal combustion motor.

Question 2: What fuel is not considered motor fuel and thus exempt from the Alaska motor fuel tax?

Answer: The following uses of fuel are not included in the definition of motor fuel and are thus exempt from the motor fuel tax:

(1) Fuel sold to, transferred to, or used by United States, Alaska, or local government agencies for official use, except motor fuel sold to a contractor who purchases motor fuel either for its own account or as the agent of a government agency for use in the performance of a contract with that agency.

(2) Fuel sold to, transferred to, or used by auxiliary military units for official use, not including fuel purchased by a volunteer member of an auxiliary unit for use in a private vehicle.

(3) Fuel used in stationary power plants operating as public utility plants and generating electrical energy for sale to the general public.

(4) Fuel used exclusively for use in heating private residential buildings.

(5) Fuel sold exclusively for use for heating commercial buildings or facilities including apartment buildings, not including fuel used in or on watercraft.

(6) Fuel used in stationary power plants that generate electrical energy exclusively for private residential consumption.

(7) Fuel used by non profit power associations or corporations for generating electrical energy for resale.

(8) Fuel used by charitable institutions.

(9) Refined fuel transported as cargo out of the state on a vessel from a port in this state to a port outside this state, except fuel purchased in the state for use in the exploration for and development of subsoil and seabed resources in and upon the adjacent outer continental shelf of the state.

(10) Fuel consigned to foreign countries.

(11) Fuel sold to, transferred to, or used on jet propulsion aircraft operating flights from the state to a foreign country, except flights to a foreign country with intermediate stops within the United States.

(12) Fuel which is at least 10 percent alcohol by volume.

(13) Fuel sold to or transferred between licensed qualified dealers.

(14) Actual losses of volume which occur during handling, transporting or storing motor fuel, including shrinkage and losses from fire and other accidents.

(15) Additives that are used for improving existing characteristics of fuel, not including blended fuels.

(16) Fuel used for any other purpose which the department determines does not meet the definition of motor fuel.

Question 5: Is fuel used in off highway vehicles and equipment exempt from the motor fuel tax?

Answer: No, fuel used in any equipment with an internal combustion engine is motor fuel and is taxed at 8¢ per gallon. However, there is a provision for a refund of 6¢ per gallon for motor fuel used to operate an internal combustion engine if the internal combustion engine is <u>not used in or in conjunction with a licensed motor vehicle</u>. If the fuel is used in or in conjunction with a licensed motor vehicle, even if the use is off highway, no refund is allowed.

Tax Rate

Question 4: What is the current tax rate on motor fuel?

Answer: The tax on motor fuel is 8¢ per gallon unless it is aviation gasoline which is 4¢ per gallon, or fuel used in and on watercraft which is 5¢ per gallon, or aviation fuel other than aviation gasoline which is 2 1/2¢ per gallon.

Certificates of Use

Question 5: What is the purpose of the certificate of use?

Answer: The certificate of use allows a purchaser of fuel the privilege of buying tax free under one of the motor fuel tax exemptions. If a customer does not sign a certificate, he or she should pay the tax on the fuel purchased, otherwise the dealer would remain liable for the tax.

Question 6: How does a fuel dealer know when the motor fuel tax is to be collected?

Answer: The motor fuel tax is collected when a dealer sells or otherwise transfers motor fuel in Alaska unless a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel. If the tax is not collected the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel.

Question 7: How often do these certificates of use have to be obtained in order for the dealer not to be liable if he does not collect the tax?

Answer: By statute it appears that a certificate of use is required whenever the tax is not collected. AS 43.40.010(1) states:

> If a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel, the dealer need not collect the motor fuel tax. If the tax is not collected, the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel.

Regulation 15AAC 40.030 and subsequent Department of Revenue memoranda have served to greatly relax this stringent requirement. The requirements for certificates of use are now as follows:

(1) A one-time only certificate of use is required for sales of fuel to a consumer for use in heating a residential building. A statement, as mandated by the department, and in lieu of the certificate of use, may be incorporated into the dealer's invoice as long as it is signed by the fuel purchaser. A third alternative is the use of a rubber stamp.

(2) An annual certificate of use is required:
(a) for sales of fuel to United States, Alaska and local government agencies and auxiliary military units for official use;
(b) sales of fuel to a consumer for use to heat a commercial building or facility including apartment units, not including fuel used in and on watercraft;
(c) sales of fuel to a consumer for use in a private residential power plant; and
(d) sales of fuel to a licensed qualified dealer.

(3) A certificate of use at the time of every sale is required for all the other motor fuel exemptions.

Question 8: I'm a dealer and I make many sales of fuel every week to public utilities, non profit organizations for electrical generation for resale, and charitable institutions. Why do I need to get a certificate of use at the time of every sale when these are exempt users of the fuel? Why can't there be an annual certificate of use requirement or at least a monthly requirement for these exempt uses? Many deliveries of fuel are made every week to these exempt agencies and it is very difficult to have someone to sign a certificate of use at every delivery which constitutes a sale for us.

Answer: The Department is giving consideration to adopting an annual certificate for these type of sales. A decision will be made in the near future. In the meantime, you must continue obtaining a certificate for each sale.

Question 9: Why can't there be a blanket certificate of use for exempt agencies such as government agencies? Once the agency meets the requirement for exemption then a blanket certificate would be all that is necessary.

Answer: Since the fuel sold to a government agency is exempt only if it is for official use, then an annual reminder of this by requiring an annual certificate of use to be signed, should not be an undue hardship on the government agency. An annual certificate of use should be a very small administrative burden on the dealer as compared to requiring a certificate at the time of every sale.

Question 10: I'm a heating fuel dealer and I have 500 residential heating accounts. These constantly change because of people moving so often and I am required to have each owner of the residence sign a once only certificate of use. What do I do if customers refuse to sign the certificate and I have already delivered the fuel?

Answer: In order for the dealer not to be liable for the tax the dealer by statute has to obtain a certificate of use. If a certificate of use is not signed then the dealer should charge the tax. If a certificate of use is not signed the dealer bears the risk of being billed for the tax. Unless the law is changed, a certificate of use has to be obtained for each residential customer, unless the dealer decides to bear the risk that he or she will be able to provide, upon audit, evidence that the sale was for residential heating.

Question 11: If numerous customers purchase five and ten gallons of fuel, do I need to have them sign a certificate of use each time or can there be a minimum gallonage upon which a certificate of use is not required? An invoice is often not used for these cash sales so a statement can't always be incorporated on the invoice for the customer to sign.

Answer: AS 43.40.010(1) does not allow for a minimum gallonage which would not require a "certificate of use". However, for sales of 25 gallons or less, the dealer may decide to bear the risk on these walk-in sales. If these sales amount to a substantial gallonage every day, the dealer should have the customer sign a certificate of use so that the dealer will not be

liable for the tax. Some flexibility in the application of the certificate can be used, as follows: An exempt use statement could be posted on a clipboard and all customers would be required to sign this statement and to show the number of gallons purchased for this exempt use. Separate certificate of use forms would therefore not be required.

Question 12: Why is there an exemption for fuel used in private residential generators and not for fuel used in commercial generators?

Answer: The statute specifically exempts only fuel used in private residential generators, not commercial generators. The only exemption for commercial generators is if all the generated power is used exclusively for heating.

Question 13: Customer A has a lodge in the Alaskan wilderness and the only source of power for lighting, heating and cooking is from a generator. 90% of the fuel is used to heat the lodge which is an exempt use of the fuel. A has to pay all the tax up front on all his fuel purchases even though 90% of the fuel use is exempt. Even though A can claim a refund for the fuel generating heat how does A determine how much fuel flowed through the generator for the tax exempt use of heating, and the taxable uses of lighting and cooking?

Answer: Since all the fuel flowing through the generator serves both taxable and non taxable uses A has to pay 8¢ per gallon on all fuel purchased. A can claim a refund of 8¢ per gallon for the estimated gallons of fuel used in the generator for heating the lodge, and 6¢ per gallon for the other uses of the generated power. A must use his best estimate of the gallons of fuel used to generate power for heating. This estimate would be subject to audit by the Department.

Question 14: Dealer A sells to customer B, a hotel, and customer B signs a certificate of use that the fuel is to be used exclusively to heat the commercial building, the hotel. If unforseen circumstances arise such as a power outage and the hotel uses some of the fuel in a standby generator to produce electricity for heating, lighting and cooking, can B account for the taxable use at this time as a user and pay the tax?

It will be very difficult to determine how much generator power is used for taxable lighting and cooking purposes.

Answer: If taxable and non taxable use is anticipated the "common storage tank" provision would require the hotel to pay the tax on all the fuel up front if only one storage tank is involved. If the power outages are a rare occurance the hotel owner can still purchase fuel tax free if at the time of purchase he certifies to the best of his belief that the fuel is to be used exclusively for heating purposes. If fuel has to be used in a generator upon the occurrance of an emergency event such as a power outage, the hotel can submit to the department the tax on the fuel used.

Question 15: Can I as a fuel dealer design my own certificate of use form or do I have to use the form as prescribed by the department?

Answer: Although the regulations have not specifically addressed this question, the statute is very clear in that the certificate of use may be prescribed by the Department of Revenue. Other than for fuel used for residential heating purposes, the certificate of use form as prescribed by the department has to be used. The forms are being redesigned and will be invoice size with separate certificate of use forms for the "annual and once only requirements," and the "at the time of every sale" requirements. The new forms will be less burdensome for the dealer.

Question 16: I am a fuel dealer and customer A walks in and purchases four 55 gallon drums of fuel and signs a certificate of use certifying that the fuel is to be used for private residential heating purposes. I know A has a commercial business license operating a truck delivery service out of his home, so I do not have a reasonable belief that the fuel is not to be used as motor fuel. Am I liable for the tax if I make an exempt fuel sale to A?

Answer: If you have explained the law to customer A and he has make it clear that the fuel is to be used in a tax exempt manner, you would have a reasonable belief and could have A sign the certificate of use and receive the fuel tax exempt.

Question 17: What is the responsibility of the dealer to determine if a "common storage tank" situation exists? Example: Dealer A sells to customer B which is a construction company and B signs a certificate of use that he is purchasing fuel to be used exclusively for heating purposes. Does dealer A have to determine if B has a common storage tank before allowing the tax free sale of the fuel?

Answer: The responsibility is upon B, the purchaser of the fuel who signs the certificate of use to certify that he does not have a common storage tank situation. The new certificate of use forms will require this certification. However the dealer must exercise some judgment. Example: If the fuel is being delivered to a "truck tank at a construction site" then the dealer should question the signing of the certificate of use for an exempt sale. The ultimate liability for the tax will however be on the person signing the certificate of use if tax free fuel is used in a taxable manner.

Question 18: Can I, a user, sign a certificate of use to avoid paying tax for fuel used in an asphalt plant if it does not operate with an internal combustion engine?

Answer: Yes. You must contact the Department of Revenue, Excise Tax Unit, to obtain an exemption letter for this use authorized by Regulation 15 AAC 40.020(b)(16).

Question 19: I am an airline operating jet flights exclusively from Alaska to foreign countries. A certificate of use is required at the time of every sale to support this exempt use of fuel. Can I obtain an annual certificate of use for this exemption?

Answer: The Department is giving consideration to adopting an annual certificate for these type of sales. A decision will be made in the near future. In the meantime, you must continue obtaining a certificate for each sale.

Question 20: A construction company has a fuel tank at their shop and this fuel is used to heat the shop. Another fuel tank at the camp is used to heat the camp. Also, the construction company uses space heaters to heat visquene enclosed construction sites in the winter. The fuel is delivered to a portable tank that supplies these space heaters. Should the dealer obtain an annual certificate of use for the tank at the shop and the portable tank?

Answer: A separate certificate of use should be obtained once a year for each heating fuel tank. i.e. a separate annual certificate of use should be obtained for the shop tank, the camp tank and the portable tank provided that the portable tank is used exclusively for the space heater.

Qualified Dealer License

Question 21: How do I become a licensed qualified dealer so I can purchase my fuel tax exempt?

Answer: A person is eligible to become a qualified dealer if he refines, imports, manufactures, produces, or compounds fuel, or if in the regular course of business he sells at least 20% of his fuel to another party for resale or for residential heating purposes or for a combination of these purposes. License application form 04-407 is completed and accompanied by affidavit form 04-408 which requires security for the motor fuel tax. Alternatives for the security are:

1) A surety bond equal to twice the average monthly tax but not less than $5000.
2) A letter of credit, CD or cash equal to twice the average monthly tax but not less than $5000.
3) Real property or interest therein equal to twice the average monthly tax.

Question 22: I am a major supplier of fuel and have a good track record of having filed and paid my monthly motor fuel tax on time. With the new regulations a large amount of money now has to be provided as security for twice the average monthly tax, in order for me to get my qualified dealer license. Why is security necessary for existing suppliers and dealers? Can there be a ceiling on the security requirement for suppliers and dealers who have already established a good track record of collecting and filing the tax?

Answer: Security requirements for licensing are a common practice for motor fuel excise taxes in other states, and for other tax types in Alaska. A fuel distributor obtains a qualified dealer license for the privilege of receiving all fuel tax free, and then collecting and paying tax to the department only when taxable sales and uses occur. For this privilege and the

obvious cash flow advantage to a licensed qualified dealer, the department requires security for twice the monthly tax with a minimum of $5000. The department recognizes that some fuel distributors have good track records of paying their taxes, but not all have, so it is not unreasonable for us to require security.

Question 23: If I am strictly a heating fuel distributor and will have no monthly tax liability, why do I have to provide any security?

Answer: As discussed above, the security is required for the privilege of receiving fuel tax free plus it provides a security for any taxes which will be due the department. Even if no taxes will be collected because all sales will be exempt, security is still required for the privilege of becoming a licensed qualified dealer. A recent approximate quote on the tax deductable cost of the $5000 bond was $100 per year. This is not an unreasonable cost for the privilege of purchasing all fuel tax free. A reasonable alternative to the $5000 security requirement would be the pledging of real property as provided under Regulation 15 AAC 40.050(b).

Question 24: Dealer A has an average $100 monthly tax. Why does he have to secure this with a minimum of $5000 when he has a good track record of paying his tax on time? Can't the department remove the $5000 minimum and only require security for twice the average monthly tax?

Answer: See answer 23 above.

Question 25: Distributor A sells no fuel for resale but 100% of his fuel to users to heat commercial buildings. Does A have to pay all the tax on his purchases of fuel from his supplier because he does not meet the definition of a qualified dealer even though all his sales of fuel are exempt.

Answer: Yes, distributor A will have to pay tax on all his fuel purchases because he does not meet the requirements for a qualified dealer. However, A will be eligible for a credit for the tax from his supplier or a refund from the department, if A obtains an annual certificate of use from his commercial heating customers. A cannot sign a certificate of use as using the fuel for commercial heating purposes unless A himself is actually consuming the fuel to heat his own buildings or facilities.

Question 26: As a dealer do I have to obtain a qualified dealer license in order to obtain fuel tax free?

Answer: Yes. It is very simple. A dealer can obtain fuel tax free only if he or she is a qualified dealer. Otherwise he or she has to pay tax up front on all fuel purchased.

Question 27: Is it to my advantage to become a qualified dealer?

Answer: That depends. If a dealer makes many exempt sales it may be to his advantage to receive fuel tax free and report monthly to the department his small proportion of taxable sales. If a dealer makes very few exempt sales to customers it may be more advantageous to pay all the tax up front and then claim a refund from the supplier or department for any exempt sales made. This way he would avoid having to file a monthly tax return. A dealer's decision whether or not to become a qualified dealer will depend on each situation. Most heating fuel dealers should find it advantageous to become a qualified dealer if most of their sales are exempt.

Question 28: Dealer A sells to dealer B who signs a certificate of use that he is a qualified dealer. Does dealer A have a responsibility to determine that B is actually a qualified dealer, or does the fact that B signs the certificate of use relieve A of any responsibility to determine if B really is a qualified dealer? Who will the Department of Revenue bill if B is not a licensed qualified dealer or the license has been recently revoked? Will the department publish a list of licensed qualified dealers and if so, how often?

Answer: In signing the certificate of use as a qualified dealer, B is relieving A from any responsibility. If B is not a qualified dealer then the department will bill B for the tax. Yes, the department does plan on publishing an annual list of current licensed qualified dealers and sending this to all dealers and resellers of fuel.

Question 29: If I become a qualified dealer can I purchase my gasoline tax paid and my diesel tax free? If I do purchase my gasoline tax paid and then sell some to an exempt government agency, can I claim credit for this on my monthly motor fuel tax return?

Answer: It is the intent of the Department of Revenue that a qualified dealer receive all his fuel tax exempt. It should also be advantageous for a qualified dealer to do this because he will not have to pay tax on his fuel purchases, but will collect the tax on his taxable sales of fuel.

Question 30: I own a gas station and purchase all gasoline and diesel for the pumps tax paid. I also have a separate tank for which I purchase diesel to sell to customers to heat residential and commercial buildings. I cannot qualify as a qualified dealer so do I have to buy this "heating fuel" tax paid even though it is in a separate tank?

Answer: If you are not a licensed qualified dealer all fuel must be purchased tax paid.

Question 31: I have a lodge in a remote area and I have one fuel storage tank. I use fuel from this tank to heat the lodge and I also sell fuel for heating purposes to residences nearby as the nearest town is too far for that fuel dealer to deliver to these residences. All fuel I sell is for residential heating purposes and I make very few sales. How can I still purchase my fuel tax exempt since all my use of fuel and sales of fuel are exempt?

Answer: If all your sales are for residential heating purposes you would qualify as a qualified dealer and once licensed you could obtain all your fuel tax exempt. If you do not wish to become a qualified dealer you could sign a certificate of use for the fuel you used to heat the lodge and pay the tax on all the other fuel. This could only happen if you had separate tanks for the fuel you used and the fuel you sold. Otherwise, if you have only one tank, you would have to pay tax on all the fuel you purchase and then you could claim a refund for the exempt use and sales of the fuel for heating purposes.

Question 32: How long does my qualified dealer license remain in effect? Does it have to be renewed annually?

Answer: The qualified dealer license remains in effect indefinitely until:

1) The business ceases or
2) The 20% quota of yearly sales made for resale or for residential heating purposes is no longer met or
3) The license is revoked by the Department of Revenue

The license itself does not have to be renewed annually but an affiviait of security for motor fuel tax due, form 04-408, must be completed annually on or before September 1 of each year.

MOTOR FUEL TAX RETURN & SUPPORTING SCHEDULE

Question 33: As a qualified dealer why do I have to file a monthly motor fuel tax return with supporting schedules if I have no monthly tax liability, and all my sales are tax exempt heating fuel sales?

Answer: For federal reporting purposes we need to know the final exempt use of the fuel. If your supplier reports sales of fuel to you as sales to a qualified dealer, we will not know the nature of your exempt heating fuel sales if you do not report to us. If all your sales are exempt, the monthly reporting is very simple and no supporting schedules are required for sales of fuel for heating purposes. Therefore you do not have to prepare schedules of your commercial or residential heating fuel sales every month. In lieu of this, we require an annual list of all commercial heating fuel accounts. Schedules are required only for other exempt sales.

Question 34: Do I need supporting schedules showing names of customers and fuel gallons sold if all my sales are taxable sales?

Answer: No. Support schedules are only required for tax exempt sales of fuel except fuel sold and used for heating purposes.

Question 35: Can I substitute a computer printout of my sales of fuel in lieu of having to manually prepare the supporting schedules?

Answer: Yes, as long as the same data required on the supporting schedule, is shown on the printout.

Question 36: Why is a supporting schedule necessary for the other exempt sales when you don't require it for fuel sold for heating purposes? As a dealer I would be glad to supply the names of all exempt customers on an annual basis. A monthly report of the number of gallons sold to each exempt customer requires alot of work as this information is not often readily available even with a computer.

Answer: The supporting schedules are required in order to provide an audit trail for the department, as these schedules show the final users of the fuel. The amendment to the law, HB101, intended to transfer the liability for tax exempt sales from the dealer to the user if certificates of use were properly obtained. Unless each licensed qualified dealer submits supporting schedules showing their tax exempt fuel customers and tax exempt gallons sold, we will not have an audit trail to the final user, and we may have to audit the dealer to obtain this. We already greatly relaxed the supporting schedule requirement for fuel sold for heating by requiring an annual list of commercial heating accounts in lieu of monthly heating fuel schedules.

REFUNDS

Question 37: In order for me to file a refund claim for fuel used in my unlicensed equipment, my first claim filed during each calendar year must include a list of all my equipment including license and serial number. Does this mean the first claim filed during each calendar year even though the claim covers a period of use in the prior year?

Answer: No, the listing of equipment is required when you first file in a calendar year and the claim period is also for a period in that calendar year.

Question 38: Why am I denied being able to claim a refund if I am unable to produce original fuel invoices? In certain cases original invoices are lost and the fuel user is out of luck in claiming a refund on this fuel. Can't dealer certified copies of the original invoices be allowed when originals are not available?

Answer: Dealer certified copies of original invoices are allowed under the following circumstances:

1) the taxpayer must furnish an acceptable explanatory statement as to why originals are not being submitted.

2) the taxpayer must obtain a statement that copies submitted are true copies (with invoice numbers, dates and amounts), from the vendor.

MISCELLANEOUS ISSUES

Question 39: If I import fuel into Alaska, or I refine fuel in Alaska for my own use, when is the fuel subject to tax?

Answer: The fuel is subject to tax as you use it. The tax on the fuel actually used during a calendar month should be remitted to the department by the last day of the month following the month the fuel was used.

Question 40: Why do I have to keep monthly inventory records? Can't this be an annual or semi-annual requirement? What if I don't keep inventory records but pick up my fuel from a bulk plant and deliver directly to customers? The only fuel on hand at any given time is fuel sitting in the trucks. Do I have to keep inventory records of this fuel?

Answer: Monthly fuel inventory records are required of all dealers, fuel resellers and users, so that upon audit, we can determine the correct amount of monthly tax liability. Fuel inventory records should therefore be kept on a monthly basis for fuel in the trucks.

Question 41: Could you please give examples of which type of organizations are covered under your tax exempt definition of charitable institutions?

Answer: The Department of Revenue recognizes that it needs to do a comprehensive analysis of this subject, and we will then publish a list of examples. If you have a question regarding a specific institution, you should submit to the department for approval or disapproval as a charitable institution.

Question 42: Could you please define "watercraft" as this is not defined in the law or regulations?

Answer: "Watercraft" means a ship, boat, vessel or other structure which is capable of being moved in or on water either under its own propulsion or in conjunction with the propulsion of another craft.

Question 43: Does this definition of watercraft include barges and floating seafood fisheries?

Answer: Yes

Question 44: If I file a claim for refund how long after I file my claim will it be before I receive my refund?

Answer: If the claim is properly filed the refund should be received in three to four weeks from the date we receive your claim. If we have to correspond with you because of ommissions in your claim, this three to four week period of time would begin when we receive a properly filed claim.

Question 45: What if I charge a residential home heating individual with the Motor Fuel tax because he refuses to sign the certificate of use and that user switches suppliers? Will the Department of Revenue reimburse me for my loss of revenue from that customer?

Answer: No, the department can not reimburse you for lost revenue. In the case of a residential home heating customer, if, upon audit, you can provide evidence that the fuel was delivered to a residence and you made reasonable effort to get the customer to sign the certificate of use, the department would not hold you liable for the tax.

Question 46: Why doesn't Alaska tax liquified petroleum gas and compressed natural gas used as motor fuel? Do other states tax these items?

Answer: Liquified petroleum gas is specifically not included as motor fuel under AS 43.40.010(k). Compressed natural gas, if used as motor fuel, would be subject to the tax.

Question 47: Does Alaska tax gasohol?

Answer: Gasohol, defined as fuel which is at least 10 percent alcohol by volume, is specifically exempt from the motor fuel tax.

Question 48: Are sales to farmers exempt? If not, can the farmer claim a refund of 6¢ a gallon? Do other states tax farmers?

Answer: No, sales of fuel to farmers are not tax exempt in Alaska, although other states have this provision for farmers. A farmer can sign a certificate of use for his purchases of fuel for heating purposes if this fuel is kept in a separate tank from his taxable fuel. Fuel for his equipment is taxed at 8¢ per gallon, but the farmer can claim a 6¢ per gallon refund for fuel used in his unlicensed equipment.

Question 49: What is the "importers-for-use" tax that other states impose on certain taxpayers?

Answer: This tax is related to inter-state trucking and is generally not applicable to Alaska. However, if fuel is brought into Alaska, it is subject to the motor fuel tax as it is sold or used.

Question 50: Why doesn't Alaska allow motor fuel dealers a commission for collecting the motor fuel tax?

Answer: Many states provide for a commission for collecting the motor fuel tax, and the Alaska cigarette tax statute provides for a commission. This definitely helps to offset the cost of collecting the tax. Legislation would be required to accomplish this statutory change.

Question 51: Are contractors who perform federal or state contracts exempt from the motor fuel tax?

Answer: No, fuel sold to a contractor who purchases motor fuel either for his own account or as the agent of a government agency for use in the performance of a contract with that agency, is not exempt from the motor fuel tax.

Question 52: How can I determine the amount of shrinkage which I am allowed to deduct as a result of the new regulations?

Answer: The dealer should keep records, through his inventory reconciliation, of fuel temperature shrinkage and expansion, tank filling losses, and loading and unloading losses of fuel.

Question 53: Are sales of fuel to well drillers which operate equipment utilizing a power take-off which transmits power from vehicles to auxiliary equipment exempt from the motor fuel tax?

Answer: The major issue here is whether or not the vehicle is licensed. If the vehicle is licensed all sales of fuel to the well drillers for this purpose will be taxable at 8¢ per gallon with no refund allowed. If the vehicle is unlicensed, the fuel is taxed at 8¢ per gallon, but the well driller can claim a refund of 6¢ per gallon.

Question 54: Isn't it silly to require certificates of use for fuel sold to the United States Government, the State of Alaska and local governmental agencies? After all, everyone knows who the government is and all sales to those agencies are exempt.

Answer: Not all divisions of government agencies are well known in Alaska especially in the more remote areas of the state. The annual certificate of use requires certification that the purchaser of fuel is actually a government agency and thus tax exempt. Also, for the fuel to be tax exempt, it must be used for official use, so an annual reminder of this should not be an undue administrative hardship for the privilege of buying fuel tax exempt.

Administration and Compliance

Question 55: Does the Department of Revenue intend to assess additional motor fuel tax for the period July 1, 1982 - December 31, 1982 for failure to obtain either a qualified dealers license or certificate of use?

Answer: No, because the Department recognizes the uncertainty that exists in the these two areas.

Question 56: Does the department intend to enforce the qualified dealers licensing provisions?

Answer: The department will make every effort to enforce full compliance with the qualified dealer licensing requirements for every dealer purchasing tax exempt fuel as a qualified dealer.

Question 57: How does the department intend to enforce these regulations?

Answer: The department has a three person excise tax unit who, along with assistance from the Anchorage and Juneau Field audit staff, will enforce full compliance with these regulations. We will select an area and visit five to ten dealers per day to test for compliance. If compliance is not adequate, we will schedule in depth audits from these visits

Question 58: There has been much speculation in the past one year regarding the Department of Revenue and its audit program. Exactly what kind of assessments did the department make and were dealers assessed for sales made to what later was proven to be residential heating purposes?

Answer: The majority of motor fuel tax assessments made by the department were for large sales of so called "heating fuel" to contractors which was used in a taxable manner by the contractor. You can therefore see the importance of the dealer having certificates of use signed by these contractors whenever tax exempt sales are made. If properly complied with, this should avoid future tax assessments in this area. To our knowledge the department has not made any assessments for sales which were proven to be for residential heating purposes.

Question 59: Since Maureen Thomas has resigned, which individual within the Department of Revenue will be our main source of contact in the future when questions arise?

Answer: Richard Kirkland has just moved into Maureen's position and he will be happy to research and answer any questions you have. The Director of Audit and the Chief of Audit Services will also on occasion be available to answer questions. Maureen Thomas will be attending college in Oregon in pursuit of a veterinary career.

Question 60: It sure seems as if we dealers have a lot of silly forms, including certificates of use, to complete to satisfy the Alaska Department of Revenue. Is this just the Alaska bureaucracy or do other states require a large amount of forms and if so how come?

Answer: As discussed in the introductory memorandum, many states have much more detailed and stringent reporting requirements for motor fuel tax.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF REVENUE

ELEVENTH FLOOR
STATE OFFICE BUILDING
POUCH SA
JUNEAU, ALASKA 99811

March 11, 1983

To Motor Fuel Licensed Qualified Dealers:

During our February motor fuel meetings in Fairbanks, Anchorage and Juneau, the question was addressed whether a qualified dealer can purchase all gasoline fuel tax-paid and all diesel fuel tax-exempt. In answering this question, we indicated that it is the intent of the Department of Revenue that a qualified dealer receive all fuel tax-exempt, and then subsequently collect the tax on all taxable sales and uses of the fuel.

Since our motor fuel meetings, several qualified dealers have specifically asked to be allowed to continue to purchase gasoline fuel tax-paid by their supplier, and to use the qualified dealer license to purchase only diesel fuel tax-exempt. In these instances, the supplier and the qualified dealer have both agreed that it would be in both their best interests for the supplier to continue to collect and remit the tax on all gasoline fuel.

We have therefore decided that if a qualified dealer wishes to purchase only diesel fuel tax-exempt, and to continue to purchase all gasoline fuel tax-paid, he or she may do so as long as this agreement has been reached between the qualified dealer and his or her supplier. A qualified dealer wishing to do this must submit to us a copy of this agreement with their supplier.

If you have any questions regarding specific situations, do not hesitate to contact the Excise Tax Unit at 465-2322 for more information.

Sincerely,

Paul W. Taylor

Paul W. Taylor
Chief, Audit Services
Audit Division

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF REVENUE

STATE OFFICE BUILDING
POUCH SA
JUNEAU, ALASKA 99811

February 18, 1983

Dear Motor Fuel Dealers and
Suppliers:

This letter is in response to the many questions generated during our recent informal meetings in Fairbanks, Anchorage and Juneau. Our division was very gratified to see the public response in the form of good attendance at all three meetings with plenty of input from the industry. The problems of dealing with administering the new motor fuel tax law and regulations have been rather large and have generated a great deal of interest. This letter is just another small step in a procedure designed to arrive at a workable law and workable procedures. I believe that you will find as a result of these meetings, and the answers to these questions herein, that we are on the path to good administration of the tax. Again, thank you for everyone's participation in these meetings.

As a way to begin to present this material, let me state that we have sent to Representative Bettisworth suggested legislation to cure many of the ills sensed by you and our division. In summary, the main points of the suggested legislation are as follows:

1. To eliminate the certificate of use requirements in total for fuel used exclusively for heating a private residence.

2. To eliminate the certificate of use requirement in total from fuel which is at least 10% alcohol by volume.

3. For virtually all of the other exempt uses, only an annual certificate will be required.

The only exempt use now that could possibly require multiple certificates would be a situation under sub-paragraph (k) of Section 100 where the department was approached by someone that had an unusual usage of fuel that had not been anticipated by the statute and subsequent determination indicated that it was of an exempt nature. Under those conditions the division has retained some rights to make a judgement at that time as to whether or not an annual certificate or multiple certificates would be appropriate.

4. We have recommended the adoption of a commission of 1% of the monthly tax with the maximum of $100 (on a timely filed return) in order to compensate the fuel dealers for collecting the tax and maintaining the records necessary to verify the proper collection of the tax.

With that bit of background I'm going to repeat most of the questions that were raised at the three seminars and answer them as best I can in the context of the legislation that we are suggesting. Incidentally, I would encourage you to contact your legislators and inform them of Representative Bettisworth's efforts with regards to the motor fuel tax and would suggest that you would lend your support and your recommendations to his efforts.

1. Would we supply a feed-back letter to everyone who attended the seminar?

Answer This is it.

2. Mr. Bud Wiese requested that a list of the attendees at all the meetings be sent to him as he would like to contact the other fuel dealers in the state.

Response That was done as of February 8.

3. Mr. Wiese also requested that the department sponsor a half-page or a full page newspaper ad in the newspapers around the state in order to educate dealers and the public alike with regards to the basic concepts of the new motor fuel law. His question was "Would we do it?"

Answer It is a distinct possibility that we could place an ad but we feel that it would be premature to do it at this time due to the pending legislative changes that will make a considerable difference with regards to the public's responsibilities to comply with the new statutes. We should know within the next sixty (60) days as to whether or not the suggested legislative changes are going to proceed with some alacrity through the legislature.

4. Would we check with the Attorney General's office to see if we have more administrative room to eliminate the home heating certificates - or at least have the discretionary authority to take that action?

Answer At this time we believe that the best procedure to follow to eliminate the requirements for home heating oil certificates would be with legislative change. There appears to be a receptive mood in the legislature to get rid of this

paper work and if that is able to be accomplished smoothly, it may be accomplished in about the same time frame as it would in getting an Attorney General's opinion with regards to this question.

5. Can we expand the use of a stamp to other exempt sales-"fuel will not be used for motor fuel" ?

Answer As our suggested legislative changes propose to have only an annual certificate for almost all exempt sales we feel that the document that is being signed by the customer should be one designed by the department that lays out the full parameters of the law with regards to the user's responsibility in signing that exemption certificate. Therefore we feel that there is some merit to utilization of a department form as opposed to instituting a statement on an invoice.

6. Will there be a moritorium with regards to solictiting residential heating certificates of use?

Answer Yes, the department has instituted a moritorium on the requirement that the dealers obtain residential heating oil certificates for the next sixty (60) days from the date of this letter in order to give the legislature and the department time to see if our legislative changes stand a good chance of being adopted. We will continue to be in correspondence with each of the motor fuel dealers to keep them posted on the legislative progress.

7. Does the fact that the statute indicates that sales of motor fuel that "will be" taking place open the door for us (The Department)to have more legislative latitude towards a certificate of use?

Answer The need to answer this question is now a moot point as the legislative changes we've proposed specifically authorize the implementation of annual certificates of use.

8. Earl Billingsly, from the Kenai area, felt that the words "may be prescribed by the department" pertaining to the wording with regards to the certificates of use, should allow the department flexibility in allowing dealers to incorporate the certificate of use language on their invoices and their statements. Would we recognize that flexibility by allowing dealers to do that.?

Answer As we have proposed legislation to have only annual certificates for exempt sales, we do feel there is merit to using the department designed form and to stay away from individually designed invoices and statements at the dealer

level. Certainly, if the "every sale" concept was going to have to be incorporated, then we would probably agree that some sort of statement printed on invoices might be more economical and feasible, but with the emphasis now being placed on an annual certificate, we again feel that the department's form should be used.

9. Dale Lindsey, from Seward, raised the question as to "Whether or not we should collect the marine fuel tax of 5¢ per gallon on fuel delivered into the operating fuel tanks of foreign vessels who put in port for infrequent fillups and then either fish exclusively outside the three (3) mile limit of Alaska or are bound for foreign ports", and along with that question "Whether or not fuel used on oil drilling rigs beyond the outer continental shelf should be subject to the marine fuel tax?" A portion of the logic at question here is based on the premise that jet fuel which is delivered into the wing of a plane bound for a foreign port is exempt from the motor fuel tax and couldn't that same logic be applied to a vessel also bound for a foreign port.

Answer We do not have statutory authority to exempt these sales. Legislative changes would be necessary in order to exempt these types of sales, and that may be the only remedy. In the meanwhile, if the sale of the fuel occurs within Alaska, the dealers should charge and collect the marine fuel tax.

10. On listing exempt sales to government agencies, how detailed a list of agency breakdown is necessary in order for the department to properly examine the motor fuel tax return?

Answer We will require a breakdown of governmental exempt sales at least by the particular governmental agency. For example, so many sales to the department of Fish & Game, sales to the Department of Labor, sales to the Department of Health & Social Services, to U.S. Forest Service, to Bureau of Land Management, etc. This minimal amount of breakdown is necessary for us to be able to "desk examine" the tax returns that are submitted so that we have some method of determining whether or not we agree that these particular sales were tax exempt. Some of the dealers have indicated that their newly acquired computer packages do not breakdown their exempt sales by a particular government agency. I am sorry that this will present a logistical or programming problem for some, but we are trying to keep the requirement broad enough and yet detailed enough so that we can determine that all of the exempt sales are indeed exempt, short of having to conduct a field examination of the documentation to support them.

11. Will the department set a policy with regards to recognition of normal spillage and evaporation losses?

Answer The answer here will have to be qualified with a statement that if the procedure for handling spillages and losses that I'm going to suggest does not meet with unfavorable response, then we will probably follow it both from a desk audit point of view and also from an auditing point of view. Basically, the procedure would be to:

1. Recognize the normal breathing allowances that are common throughout the industry based on mathematical charts that convert fuel volumes according to temperatures and so forth for determining gallons to be taxed.

2. I believe, in the industry, that for incidental spillages, there are acceptable and recognized allowances for these losses which we will attempt to become familiar with and apply fairly.

3. For unusual and abnormal losses, such as a broken pipe, or spillage at sea, or a fire, where an identifiable event has occurred and the gallons can be ascertained with a reasonable accuracy, that with adequate verification of the loss through affidavits and an explanantion of the circumstances, and some verification fro either insurance companies or the supplier, we would also recognize that loss and not require tax to be paid on those gallons. Some industry input on these three (3) procedures will be welcomed.

12. Will our department be responsive to suggestions and changes?

Answer I hope that we have put feet to our intentions through these different questions and answers in this letter and in the booklet and through suggested legislative changes which indicate that we are making a diligent effort to be responsive.

13. This question dealt with eliminating the tax on sales of fuel for use in commerical generators. From the definition of a taxable sale or taxable use, this question I believe relates back to the situation of a generator being used primarily for heating, but occasionally, being used for supplying energy to people in need, in emergency situations or for cooking and lighting where the percentage is relatively small. We're locked into some statutory language here that indicates that in order for the sale to be exempt, the generator must be used exclusively for heating or the electricity should be for resale.

Of course, the question is, "Is this a good procedure and how should the taxes be handled in this situation?"

Answer My recommendation is that where the taxable use of the generator is going to be very limited and a very small percentage, we would probably recognize the economies involved and suggest that the owner of the generator sign a certificate of use and then remit whatever tax is due on taxable use of the fuel on a "user" basis and thereby fulfill his/her obligation with regards to the motor fuel tax.

14. Why are we going after the wrong people? Shouldn't we concentrate on the industry or industries where the abuse of using so-called heating fuel for taxable purposes is occurring?

Answer This is a tough one to answer. The objective of the legislation was not to identify an industry or certain industries where diesel fuel that had been purchased as heating fuel was being used as motor fuel. The objective of the legislation was to proceed in a broad and general way by being able to clearly identify situations where if the dealer had reasonable doubt that all of the fuel would not be used as heating fuel, that he should either collect the tax or obtain a certificate of use and thereby shift the potential tax burden to the user. I'm sure the legislature was purposefully not specific as to an industry or industries where abuse was occurring. Rather the approach was a general solve-all approach, and hopefully to cure the ills that have been occurring. But I think now, with the elimination of home heating certificates and the going to annual certificates for all other exempt uses except for an exceptional case by case basis under sub-paragraph (k), we've achieved a better perspective. There is some merit to mentioning that the dealer, even now, may be of a mind to avoid the new rather limited application of the certificate of use, and continue to bear the risk of selling heating fuel for potential taxable purposes. I certainly would not recommend this because then he is not utilizing the law as it was intended to be used. I also think that the utilization of the certificate of use by the customers will be an effective means to put them on notice that "Let's be up front with regards to the use of the fuel which I am buying and that I can not fail to be accountable to the government for proper use of the fuel purchased."

This concludes our approach to handling the specific questions which have arisen during our public meetings. I am very optimistic with regards to the current efforts to bring about legislative changes in our motor fuel statutes.

It is our intent to fairly administer these laws and we really appreciate the opportunity to discuss them with you and to have your input because after all, we are public servants and the law basically is the law of the people and our objective has to be to make sure that it's fairly administered and applies to everyone in the same manner.

I appreciate again this opportunity to communicate with you. Please feel free to call either myself or Mr. Kessel at anytime to further discuss ways that we can improve our administration of this particular tax.

Sincerely,

Paul W. Taylor

For your information the following is a list of all qualified dealer licenses issued or in process:

QUALIFIED DEALER LICENSES ISSUED

Alaska Fuel Service
Alaska Oil Sales, Inc.
Alaska Transfer Company
Anderes Oil Company
Chevron, U.S.A.
Columbus Distributing Company
Denali Fuel Company, Inc.
Doyles Fuel Service
Exxon Corporation
Fisher's Fuel, Inc.
Harbor Enterprises, Inc.
Katmai Oil & Gas, Inc.
Kodiak Oil Sales, Inc.
Mobil Oil Corporation
Petro Products, Inc.
Pye-Per Transport
Service Oil & Gas, Inc.
Sitka Sound Oil
Synder Mercantile Company
Tesoro Alaska Petroleum Company
Texaco, Inc.
Tok Tesoro, Inc.
Unifuels, Inc.
Union Oil Co of California
Valley Fuel Service
Vangas, Inc.
Whittier Service, Inc.
Wrangell Oil Heat, Inc.

February 18, 1983

QUALIFIED DEALER LICENSE APPLICATIONS APPROVED IN EXCISE TAX UNIT AND CURRENTLY IN PROCESS IN OUR LICENSING DIVISION

Big State Equipment Co
Chilkat Fuel, Inc.
Cottles Fuel
Harbor Fuel Company, Inc.
Interior Energy Corp.
Johnny's Express
Johnson Fuel Service
Marathon Fuel Service
North Pole Fuel
Petroleum Sales Ltd.
Reliable Transfer, Inc.
Sitka Fuels, Inc.
Star Heating Fuels, Inc.
Taku Oil Sales, Inc.
Union Products, Inc.
Willners Fuel Distributors, Inc.

The above companies who are in process of becoming licensed, should be considered qualified dealers for the purpose of receiving all fuel tax exempt, as long as their license is issued within sixty(60) days of this letter.

IN THE HOUSE BY THE TRANSPORTATION COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 55 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act amending motor fuel tax provisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.40.010(c) is amended to read:

(c) Every dealer who sells or otherwise transfers motor fuel in the state shall collect the tax at the time of sale, and remit the total tax collected during each calendar month of each year to the Department of Revenue by the last day of each succeeding month. Every user shall likewise remit the tax accrued on motor fuel actually used by him during each month. <u>If the monthly tax return is timely filed, one percent of the total monthly tax due, limited to a maximum of $100, can be deducted and retained to cover the expense of accounting and filing the monthly tax return.</u> At the time the remittance is made, each dealer or user shall submit a statement to the Department of Revenue showing all [MOTOR] fuel which he has distributed or used during the month.

* Sec. 2. AS 43.40.010(l) is amended to read:

(l) If a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel, the dealer need not collect the motor fuel tax. If the tax is not collected, the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel. The <u>Department of Revenue</u> [DEPARTMENT] may not collect the motor fuel

tax from a dealer for fuel for which a certificate of use has been properly obtained under this subsection. A certificate of use is not required for fuel used to heat a private residence or for fuel which is at least 10 percent alcohol by volume. An annual certificate of use is required for all other exemptions, as listed under AS 43.40.-100(2), except subparagraph (K) where certificate of use needs will be determined by the Department of Revenue. The dealer shall retain a copy of each certificate of use obtained under this subsection for examination or audit on request by the Department of Revenue [DEPARTMENT]. The form of a certificate of use may be prescribed by regulation adopted by the department.

* Sec. 3. AS 43.40.035(a) is amended to read:

(a) A person who resells fuel on which the tax under AS 43.40.-010(a) or (b) was previously paid is entitled to a credit or refund of the tax if (1) the resold fuel is not motor fuel and the requirements prescribed by AS 43.40.010(1) have been fulfilled [A CERTIFICATE OF USE IS ACQUIRED UNDER AS 43.40.010(1)]; or (2) the amount of tax previously paid exceeds the tax due on the resale. The amount of the credit or refund under this section is equal to the amount of tax previously paid on the resold fuel less the amount of tax prescribed by AS 43.40.010(a) or (b).

* Sec. 4. This Act takes effect April 1, 1983.

Introduced: 2/4/83
Referred: Transportation and Finance

IN THE HOUSE BY MARTIN AND GRUSSENDORF

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 55

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act decreasing the motor fuel tax to offset tax increase by federal government, repealing motor fuel tax refund provisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.40.010(a) is amended to read:

(a) There is levied a tax of three [EIGHT] cents a gallon on all motor fuel sold or otherwise transferred within the state, except that

(1) the tax on aviation gasoline is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

* Sec. 2. AS 43.40.010(b) is amended to read:

(b) There is levied a tax of three [EIGHT] cents a gallon on all motor fuel consumed by a user, except that

(1) the tax on aviation gasoline consumed is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

* Sec. 3. AS 43.40.030, 43.40.035, 43.40.040, 43.40.050, 43.40.060, 43.40.070 and 43.40.080 are repealed.

* Sec. 4. This Act takes effect April 1, 1983.

Sec. 43.31.171. Civil penalties.

Repealed by § 45 ch 113 SLA 1980.

Cross references. — For present provisions concerning civil penalties, see AS 43.05.220.

Editor's notes. — The repealed section derived from § 2, ch. 24, SLA 1970; § 3, ch. 166, SLA 1976.

Section 52, ch. 113, SLA 1980 makes the repeal of this section applicable to tax years beginning after December 31, 1979.

Secs. 43.31.360 — 43.31.390.

Repealed by § 46 ch 113 SLA 1980.

Cross references. — For present provisions concerning criminal penalties, see AS 43.05.290.

Editor's notes. — The repealed sections derived from § 2, ch. 24, SLA 1970.

Chapter 35. Coin-Operated Devices and Punchboards.

Article 1. Coin-Operated Amusement and Gaming Devices.

Section

80. [Repealed]

Sec. 43.35.080. Penalties.

Repealed by § 46 ch 113 SLA 1980.

Cross references. — For present provisions concerning civil penalties, see AS 43.05.220. For present provisions concerning criminal penalties, see AS 43.05.290.

Editor's notes. — The repealed section derived from § 48-3-3 ACLA 1949; § 3, ch. 142, SLA 1960; § 2, ch. 58, SLA 1971.

Chapter 40. Motor Fuel Tax.

Article 1. General Tax Levy on Transfers or Consumption of Motor Fuel.

Section

10. Tax on transfers or consumption of motor fuel and expenditure of proceeds
20. [Repealed]
30. Refund for nonhighway use
35. Other refunds and credits
40. [Repealed]
50. Refund claim by affidavit
80. Examination of books and records
90. [Repealed]
100. Definitions

Sec. 43.40.010. Tax on transfers or consumption of motor fuel and expenditure of proceeds. (a) There is levied a tax of eight cents a gallon on all motor fuel sold or otherwise transferred within the state, except that

Early collection as it goes later in collection - exemptions grow.

(1) the tax on aviation gasoline is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

(b) There is levied a tax of eight cents a gallon on all motor fuel consumed by a user, except that

(1) the tax on aviation gasoline consumed is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

(c) Every dealer who sells or otherwise transfers motor fuel in the state shall collect the tax at the time of sale, and remit the total tax collected during each calendar month of each year to the Department of Revenue by the last day of each succeeding month. Every user shall likewise remit the tax accrued on motor fuel actually used by him during each month. At the time the remittance is made, each dealer or user shall submit a statement to the Department of Revenue showing all motor fuel which he has distributed or used during the month.

(d) Repealed by § 3 ch 166 SLA 1976.

(e) Sixty per cent of the proceeds of the revenue from the taxes on aviation fuel, excluding the amount determined to have been spent by the state in its collection, shall be refunded to a municipality owning and operating or leasing and operating an airport in the proportion that the revenue was collected at the municipal airport. All other proceeds of the taxes on aviation fuel shall be paid into a special aviation fuel tax account in the state general fund. The legislature may appropriate funds from this account for aviation facilities.

(f) The proceeds from the revenue from the tax on motor fuel used in boats and watercraft of all descriptions shall be deposited in a special watercraft fuel tax account in the general fund. The legislature may appropriate from this account for water and harbor facilities.

(g) The proceeds of the revenue from the tax on all motor fuels, except as provided in (e), (f) and (j) of this section, shall be deposited in a special highway fuel tax account in the state general fund. The legislature may appropriate funds from it for expenditure by the Department of Public Works directly or as matched with available federal-aid highway money for maintenance of highways, construction of highway projects and ferries included in the program provided for in AS 19.10.150, including approaches, appurtenances and related facilities and acquisition of rights-of-way or easements, and other highway costs including surveys, administration, and related matters. All departments of the state government authorized to spend funds collected from taxes imposed by §§ 10 — 100 of this chapter shall perform, when feasible, all construction or reconstruction projects by

contract after the projects have been advertised for competitive bids, except that, when feasible, arrangements shall be made with political subdivisions to carry out the construction or reconstruction projects. If it is not feasible for the work to be performed by state engineering forces, the commissioner of public works may contract on a professional basis with private engineering firms for road design, bridge design, and services in connection with surveys. If more than one private engineering firm is available for the work the contracts shall be entered into on a negotiated basis.

(h) All motor fuel tax receipts shall be paid into the general fund and distributed to the proper accounts in the general fund. Valid motor fuel tax refund claims shall be paid from the highway fuel tax account in the general fund.

(i) Within 30 days after the legislature convenes the Department of Public Works shall submit an annual budget covering anticipated revenues and their expenditure, for the consideration and approval by the legislature. The budget shall cover all money collected or anticipated to be collected under §§ 10 — 100 of this chapter for the year following the adjournment of each regular session of the legislature.

(j) The proceeds from the tax on motor fuel used in snow vehicles and, unless a tax refund is applied for under § 40 of this chapter, other internal combustion engines not used in or in conjunction with a motor vehicle licensed to be operated on public ways shall be deposited in a special nonpublic highway use account in the general fund. The legislature may appropriate from this account to the Department of Highways for trail staking and shelter construction and maintenance.

(k) The tax on the transfer or consumption of motor fuel provided for in this section does not apply to liquified petroleum gas.

(*l*) If a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel, the dealer need not collect the motor fuel tax. If the tax is not collected, the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel. The department may not collect the motor fuel tax from a dealer for fuel for which a certificate of use has been properly obtained under this subsection. The dealer shall retain a copy of each certificate of use obtained under this subsection for examination or audit on request by the department. The form of a certificate of use may be prescribed by regulation adopted by the department. (§ 48-5-2 ACLA 1949; am § 1 ch 80 SLA 1951; am § 1 ch 47 SLA 1955; am §§ 1, 2 ch 27 SLA 1957; am § 1 ch 134 SLA 1957; am § 1 art VI title II ch 152 SLA 1957; am § 2 art V title III ch 152 SLA 1957; am § 2 ch 124 SLA 1959; am §§ 1, 2 ch 20 SLA 1960; am § 1 ch 150 SLA 1960; am § 1 ch 110 SLA 1961; am § 1 ch 136 SLA 1961; am §§ 1 — 3 ch 131 SLA 1962; am § 1 ch 130 SLA 1968; am § 10 ch 143 SLA 1968; am §§ 1, 2 ch 216 SLA 1968; am §§ 1 — 3 ch 158 SLA 1970;

am § 3 ch 58 SLA 1971; am §§ 1, 2 ch 124 SLA 1971; am §§ 2, 3 ch 125 SLA 1971; am §§ 1 — 3 ch 153 SLA 1972; am § 3 ch 166 SLA 1976; am §§ 1, 2 ch 116 SLA 1977; am § 4 ch 82 SLA 1982)

Effect of amendments. — The 1982 amendment, effective June 4, 1982, added subsection (*l*).

Editor's notes. — Section 15, ch. 82, SLA 1982, provides: "The Department of Revenue may not collect the motor fuel tax from a dealer, as defined in AS 43.40.100(1), on a sale or transfer of motor fuel that occurs before the effective date of this Act [June 4, 1982] if the dealer did not collect the tax from a purchaser or transferee because of a reasonable belief that the fuel was not to be used as motor fuel, as that term is defined in AS 43.40.100(2), or if the dealer relied upon the purchaser's representation that the fuel would not be used as motor fuel. This section is intended to clarify ambiguities in the existing language of AS 43.40 concerning the party responsible for collecting the tax and to resolve an administrative dispute between certain fuel dealers and the Department of Revenue. For this reason, this section serves the general public interest in the fair and equitable administration of AS 43.40."

Sec. 43.40.020. Penalty for violation.

Repealed by § 46 ch 113 SLA 1980.

Cross references. — For present provisions concerning criminal penalties, see AS 43.05.290.

Editor's notes. — The repealed section derived from § 48-5-3, ACLA 1949; § 4, ch. 153, SLA 1972; § 3, ch. 116, SLA 1977.

Sec. 43.40.030. Refund for nonhighway use.

(a) Except as specified in AS 43.40.010(j), a person who uses motor fuel to operate an internal combustion engine is entitled to a refund of six cents a gallon if

(1) the tax on the motor fuel has been paid;

(2) the motor fuel is not aviation fuel, or motor fuel used in or on watercraft; and

(3) the internal combustion engine is not used in or in conjunction with a motor vehicle licensed to be operated on public ways.

(b) The entire tax levied by this chapter shall be refunded to the purchaser on that part of the motor fuel used in a foreign country on which the tax has been paid when the fuel is sold and delivered in the state for non-highway use in a foreign country.

(c) The department shall establish the necessary regulations and prescribe the appropriate forms to prove that the motor fuel is taken to and used in foreign countries.

(d) If a person obtains motor fuel on which the tax levied by this chapter has been paid and the motor fuel is exempt from the tax, the person is entitled to a refund of the tax paid. (§ 2 ch 47 SLA 1955; am § 3 ch 27 SLA 1957; am § 2 ch 136 SLA 1961; am § 4 ch 158 SLA 1970; am § 3 ch 124 SLA 1971; am § 4 ch 125 SLA 1971; am § 4 ch 116 SLA 1977; am §§ 35, 36 ch 113 SLA 1980; am § 5 ch 82 SLA 1982)

Effect of amendments. — The 1980 amendment substituted a reference to this chapter in subsection (b), and added subsection (d).

The 1982 amendment, effective June 4, 1982, substituted "the tax has been" for "duty is" in subsection (b).

Editor's notes. — Section 52, ch. 113, SLA 1980 makes this section applicable to tax years beginning after December 31, 1979.

Sec. 43.40.035. Other refunds and credits. (a) A person who resells fuel on which the tax under AS 43.40.010(a) or (b) was previously paid is entitled to a credit or refund of the tax if (1) the resold fuel is not motor fuel and a certificate of use is acquired under AS 43.40.010(1); or (2) the amount of tax previously paid exceeds the tax due on the resale. The amount of the credit or refund under this section is equal to the amount of tax previously paid on the resold fuel less the amount of tax prescribed by AS 43.40.010(a) or (b).

(b) A reseller may elect, with the express written consent of the supplier of the reseller, to receive the credit or refund under this section directly from the supplier rather than by filing a claim for the credit or refund with the department. When an election is properly made under this subsection, the supplier may claim the credit or refund from the department. To be effective an election under this subsection must be signed in quadruplicate by the reseller and by the supplier. The reseller and the supplier shall each file one copy of the election, with original signatures, with the department. The reseller and supplier shall each retain a copy of the election with original signatures for audit review by the department. If an election is made under this subsection, it may not be revoked without the express written consent of the supplier. (§ 6 ch 82 SLA 1982)

Effective dates. — Section 19, ch. 82, SLA 1982, makes this section effective June 4, 1982, in accordance with AS 01.10.070(c).

Sec. 43.40.040. Applications and permits for refund.

Repealed by § 45 ch 113 SLA 1980.

Cross references. — For present provisions concerning contents of applications for refunds, see AS 43.40.050(a).

Editor's notes. — The repealed section derived from § 3, ch. 47, SLA 1955; § 4, ch. 131, SLA 1962.

Section 52, ch. 113, SLA 1980 makes the repeal of this section applicable to tax years beginning after December 31, 1979.

Sec. 43.40.050. Refund claim by affidavit. (a) A person who claims a refund under AS 43.40.030 shall present the claim for the refund to the commissioner of revenue by affidavit upon a form provided by the commissioner. The claim shall include the name, address and occupation of the applicant, the nature of the business of the applicant, and a description sufficient to identify the machinery or equipment in which the motor fuel for which the refund is claimed was used.

The claim shall be accompanied by each invoice issued to the claimant at the time the motor fuel was purchased. The commissioner may require any additional information which the commissioner considers necessary for the administration of this subsection.

(b) A claim for refund under AS 43.40.030 or 43.40.035 shall be filed within one year from the date of the purchase of the motor fuel as indicated on the invoice, and failure to file within the one-year period is a waiver of the right to the refund. A claim is considered to be filed when the claim is mailed or personally presented to an office of the department.

(c) A reseller who claims a refund or credit under AS 43.40.035 shall present the refund claim to the department or to the supplier of that reseller by affidavit on a form provided by the department. The claim shall include the name, address, and occupation of the applicant, the nature of the business of the applicant, and a description sufficient to identify the reason for the refund or credit. The claim shall be supported by documentation required by the department. (§ 4 ch 47 SLA 1955; am § 1 ch 139 SLA 1960; am § 37 ch 113 SLA 1980; am §§ 7—9 ch 82 SLA 1982)

Effect of amendments. — The 1980 amendment in subsection (a), changed a reference to this chapter at the beginning and at the end of the subsection, substituted the present second sentence for the former material, which read: "with the information the commissioner requires", and substituted "was" for "is" preceding "purchase" at the end of the present third sentence.

The 1982 amendment, effective June 4, 1982, substituted "under AS 43.40.030" for "as provided in AS 43.40.010 — 43.40.100" and "the claim for the refund" for "his claim" in the first sentence of subsection (a), substituted "the commissioner" for "he" and "this subsection" for "AS 43.40.010 — 43.40.100" in the last sentence of subsection (a), inserted "under AS 43.40.030 or 43.40.035" in the first sentence of subsection (b), and added subsection (c).

Editor's notes. — Section 52, ch. 113, SLA 1980 makes this section applicable to tax years beginning after December 31, 1979.

Sec. 43.40.080. Examination of books and records. (a) To determine the validity of a claim for refund, the Department of Revenue may examine the books and records of the claimant and the books and records of a distributor of motor fuel. The Department of Revenue may cancel the refund permit of the claimant relying upon a fraudulent invoice for a period of not more than one year.

(b) Repealed by § 46 ch 113 SLA 1980. (§ 5 ch 47 SLA 1955; am § 46 ch 113 SLA 1980)

Effect of amendments. — The 1980 amendment repealed subsection (b).

Sec. 43.40.090. Criminal violation.

Repealed by § 46 ch 113 SLA 1980.

Cross references. — For present provisions concerning criminal penalties, see AS 43.05.290.

Editor's notes. — The repealed section derived from § 11, ch. 47, SLA 1955; § 4, ch. 27, SLA 1957.

Sec. 43.40.100. Definitions. In AS 43.40.010 — 43.40.100

(1) "dealer" means a person who sells or otherwise transfers in this state motor fuel upon which the taxes imposed by AS 43.40.010 — 43.40.100 have not been paid;

(2) "motor fuel" means fuel used in an engine for the propulsion of a motor vehicle or aircraft, and fuel used in and on watercraft for any purpose, or in a stationary engine, machine or mechanical contrivance which is run by an internal combustion motor; "motor fuel" does not include

(A) fuel consigned to foreign countries;

(B) fuel sold for use in jet propulsion aircraft operating in flights to foreign countries;

(C) fuel used in stationary power plants operating as public utility plants and generating electrical energy for sale to the general public;

(D) fuel used by nonprofit power associations or corporations for generating electric energy for resale;

(E) fuel used by charitable institutions;

(F) fuel which is at least 10 percent alcohol by volume;

(G) fuel sold or transferred between qualified dealers;

(H) fuel sold to federal, state, and local government agencies for official use;

(I) fuel used in stationary power plants that generate electrical energy for private residential consumption;

(J) fuel used to heat private or commercial buildings or facilities, or;

(K) fuel used for other nontaxable purposes as prescribed by regulations adopted by the department;

(3) "user" means a person consuming or using motor fuel, who either

(A) purchases the fuel out of the state and ships it into the state for personal use in the state;

(B) manufactures the fuel in the state; or

(C) purchases or receives fuel in the state that is not taxed at the time of purchase or receipt or is taxed at a rate that is less than the rate prescribed by AS 43.40.010.

(4) "qualified dealer" means a person who (A) refines, (B) imports, (C) manufactures, (D) produces, (E) compounds, or (F) wholesales motor fuel, who satisfies criteria for qualified dealers established by the department by regulation and who obtains a qualified dealer's license from the department. (§ 48-5-1 ACLA 1949; am § 1 ch 56 SLA 1949; am § 9 ch 47 SLA 1955; am § 26 ch 70 SLA 1964; am §§ 6, 7 ch 158 SLA 1970; am § 1 ch 74 SLA 1972; am § 5 ch 116 SLA 1977; am § 10 ch 83 SLA 1980; am §§ 10—12 ch 82 SLA 1982)

Effect of amendments. — The 1980 amendment added subparagraph (F) in paragraph (2).

The 1982 amendment, effective June 4, 1982, in paragraph (2), added subparagraphs (G)-(K); in paragraph (3) added the subparagraphs (A) and (B) designations, substituted "personal use" for "his own use" and deleted "or" from the end, in subparagraph (A), added "or" to the end of subparagraph (B), and added subparagraph (C); and added paragraph (4).

Chapter 45. School Tax.

Section

10—60. [Repealed]

Secs. 43.45.010 — 43.45.060. Tax imposed; persons exempt; record of withholding; overpayment, credit and refund; failure to file return; penalties.

Repealed by § 3 ch 166 SLA 1976; § 2 ch 64 SLA 1980; § 46 ch 113 SLA 1980.

Editor's notes. — The repealed chapter derived from §§ 37-4-3 — 37-4-6, ACLA 1949; § 1, ch. 41, SLA 1957; § 1, ch. 175, SLA 1957; § 1, ch. 149, SLA 1959; §§ 1—5, ch. 179, SLA 1960; § 11[illegible], ch. 127, SLA 1974.

Section 3, ch. 64, SLA 1980 makes the repeal of this chapter applicable to tax years beginning after December 31, 1979.

Section 4, ch. 64, SLA 1980 provides: "The Department of Revenue shall establish procedures for refunding to a taxpayer amounts received in payment of the school tax levied under AS 43.45 for the 1980 tax year and shall refund to the taxpayer the tax which was withheld for the 1980 tax year by an employer and paid to the department under AS 43.45.010(c). Other tax money paid to the Department of Revenue under AS 43.45 for the 1980 tax year shall be refunded to the taxpayer who made the payment."

Chapter 50. Tobacco Tax.

Article 1. Cigarette Tax Act.

Section

10. License
100. Civil penalties
150. Administration
160. [Repealed]

Sec. 43.50.010. License. (a) No person may sell, purchase, possess, or acquire cigarettes as a manufacturer, distributor, direct-buying retailer, vending machine operator, or buyer without a license.

(b) The department, upon application and payment of the fee, shall issue a license to each manufacturer, distributor, direct-buying retailer, vending machine operator, or buyer. The department shall make reasonable regulations which it considers necessary in respect to the application for and the issuance of licenses.

(c) The department may refuse to issue a license if there is reasonable cause to believe that the applicant has wilfully withheld information requested of him to determine his eligibility to receive a license, or if there is reasonable cause to believe that information submitted in the application is false or misleading and is not made in good faith.

Sec. 43.40.060. Separate invoices. The Department of Revenue may require the issuance of separate invoices for fuel sold, distributed, or transferred when the invoices will be the basis for a refund claim. (§ 6 ch 47 SLA 1955)

Sec. 43.40.070. Refund warrants. Upon approval of a refund claim by the Department of Revenue, a warrant shall be drawn on the highway fuel tax account in the general fund in favor of the applicant in the amount of the claim. (§ 7 ch 47 SLA 1955; am § 5 ch 131 SLA 1962)

Sec. 43.40.080. Examination of books and records. (a) To determine the validity of a claim for refund, the Department of Revenue may examine the books and records of the claimant and the books and records of a distributor of motor fuel. The Department of Revenue may cancel the refund permit of the claimant relying upon a fraudulent invoice for a period of not more than one year.

(b) If an invoice relied upon for a refund claim is fraudulent, the claimant is guilty of a misdemeanor and is punishable by a fine of not more than $500. (§ 5 ch 47 SLA 1955)

Sec. 43.40.085. Preservation of books and records. Dealers and users shall preserve for three years all books and records pertaining to sales, transfers, and uses of motor fuel which are taxed under this chapter. (§ 5 ch 158 SLA 1970)

Sec. 43.40.090. Criminal violation. A person who uses motor fuel with knowledge that the tax has not been paid is guilty of a misdemeanor, and is punishable by a fine of not more than $500, or by imprisonment for not more than one year, or by both. (§ 11 ch 47 SLA 1955; am § 4 ch 27 SLA 1957)

C.J.S. reference. — 53 C.J.S. Licenses § 66.

Sec. 43.40.100. Definitions. In §§ 10—100 of this chapter

(1) "dealer" means a person who sells or otherwise transfers in this state motor fuel upon which the taxes imposed by this chapter have not been paid;

(2) "motor fuel" means fuel used in an engine for the propulsion of a motor vehicle or aircraft, and fuel used in and on watercraft for any purpose, or in a stationary engine, machine or mechanical contrivance which is run by an internal combustion motor; "motor fuel" does not include

(A) fuel consigned to foreign countries,

(B) fuel sold for use in jet propulsion aircraft operating in flights to foreign countries,

(C) fuel used in stationary power plants operating as public utility plants and generating electrical energy for sale to the general public,

Truckers, Transit Operators Complain:

Fuel Tax Hike Takes Effect Amidst Drive to Change Law

A nickel-a-gallon increase in federal gasoline and diesel fuel taxes goes into effect April 1 amidst an intense lobbying drive by mass transit operators and truckers who complain that they are not being treated fairly.

Mass transit operators, who had supported passage of the legislation raising the fuel tax partly because it diverted 1-cent of the new tax to public transportation, bitterly contend that President Reagan has reneged on transit funding. Meanwhile, the truckers, who had opposed the law, are trying to change the increased taxes they would have to pay on heavy trucks.

Public transportation and city officials charge that they have been betrayed by the Reagan administration, which has proposed cutting transit funding in 1984 to $3.53 billion, instead of providing the full $4.47 billion authorized by the new law (PL 97-424). They say the administration promised them the funds, including more than $1 billion in gas tax revenue, in exchange for the support of urban interests in passing the controversial fuel tax increase three months ago. *(Weekly Report, p. 310; 1982 Weekly Report, p. 3088)*

"Promises have been broken," said William R. Lucius, commissioner of the Metropolitan Transportation Commission, Berkeley, Calif. Lucius was one of 500 transit officials in Washington, D.C., March 14-15 for an American Public Transit Association conference aimed at getting Congress to override the proposed cuts.

The transit operators won an early round with the House March 23 approval of a budget resolution (H Con Res 91) restoring the Reagan cuts. However, whether they will succeed in the Senate — and forestall a possible presidential veto — is uncertain. Transit operators also will have to fight later in the year for actual appropriations. *(Story, p. 601)*

—By Judy Sarasohn

Truckers' Complaints

While the transit operators argue that the law should be carried out fully, truckers are campaigning to keep some parts of the law from taking effect.

Their main target is the higher tax that they would be required to pay beginning in 1984 on heavy trucks — those weighing 80,000 pounds or more. The levies, based on the theory that big trucks have not paid their share of road maintenance costs, would go from the current maximum of $240 a year up to $1,500 July 1, 1984, and to $1,900 July 1, 1988.

Highway Tax Revenues

Following are the funds available from U.S. gas, diesel, truck and other highway use taxes for highway and mass transit programs.

FY 1982 (actual)	$6.744 billion
FY 1983 (estimated)	8.469 billion
FY 1984 (estimated)	11.420 billion

Source: Office of Management and Budget

The tax on small owner-operator fleets would not go into effect until 1985.

At least 13 bills have been introduced to change the truck taxes. Although congressional tax-writing committees do not plan to consider the legislation soon, truckers say they will continue to press their case.

"We're going to push for early hearings. We just can't take that thing [the heavy-truck tax]," Edward V. Kiley, senior vice president of the American Trucking Associations, said.

Political Trade-offs

The transit funding and the truck tax provisions in contention were included in the 1982 Transportation Assistance Act as part of the political trade-offs required to pass the controversial law.

The statute increased fuel taxes a nickel a gallon, from 4 cents to 9 cents, and for the first time, allowed a major diversion of the Highway Trust Fund monies for public transportation. The trust fund — made up of taxes on fuel, tires and truck sales, and fees for heavy trucks — has been earmarked for highway projects. The 1982 law targeted 1-cent-a-gallon of the fuel tax, or about $1.1 billion a year, for transit.

The new taxes feeding the trust fund would raise an estimated $8.469 billion in fiscal 1983 for highway and transit programs and $11.420 billion in fiscal 1984. *(Table, this page)*

Former Transportation Secretary Drew Lewis backed the diversion of gas tax revenue to ensure funding for badly needed mass transportation capital improvements.

But President Reagan does not believe federal funds should be used to subsidize mass transit operating expenses, and he demanded an end to operating subsidies.

City and public transportation officials pushed for continuing the operating aid arguing that it was necessary to prevent the elimination of vital transit service. The compromise bill signed Jan. 6 by the president continued the operating subsidies but with deep cuts of up to 20 percent for the largest cities.

Increased fees for heavy trucks were imposed by House members in exchange for granting the truckers' request to permit heavier and longer trucks on highways. Truckers argued that bigger trucks would allow them to increase productivity.

The law required all states to allow trucks weighing up to 80,000 pounds on Interstate Highways, up from 73,280 pounds. Also vehicle lengths were set at 48 feet for a single

COPYRIGHT 1983 CONGRESSIONAL QUARTERLY INC.
Reproduction prohibited in whole or in part except by editorial clients.

truck trailer or 28 feet for each semi-trailer in a double combination. States could not bar twin-trailer trucks. The length requirements applied to Interstate and qualified Primary routes.

Lewis maintained that the big trucks did not pay their fair share of highway costs, and in return for the increased size limits, they should pay higher fees. But the industry fought the heavy-truck tax hike, contending it was too severe.

Tire and truck excise taxes also were changed to shift the burden to heavier trucks. However, levies on truck parts and lubricating oil expired in January. *(Table, this page)*

Transit Proposals

Although the 1982 transportation act authorized a total of $4.47 billion for mass transit in 1984, Reagan requested a level of only $3.53 billion, including 1 cent from the gas tax.

He also proposed that $275 million of the funds be available for transit operating subsidies, rather than the $873 million authorized, and he renewed his longstanding plan to eliminate the subsidies after fiscal 1984.

In response to the angry outcry of transit operators to Reagan's Jan. 31 budget proposal, administration officials maintained that the president never promised to support the operating aid program. They said Reagan was not committed to everything in the bill that he signed.

And Budget Director David A. Stockman said at a Feb. 3 House Budget Committee hearing that the total requested funds for public transportation was "a pretty healthy sum to spend on mass transit" given the nation's budget deficit problem.

Betrayal Charged

Representatives of transit systems and cities contend that public transportation needs as a bare minimum the full $4.5 billion for fiscal 1984, plus assurance of continued operating subsidies.

If operating subsidies are ended as Reagan wants, some 100 urban and small rural transit systems probably will be forced to shut down, according to William R. Blue, general manager of the Mass Transportation Authority of Flint, Mich. Blue is the transit association's vice president for small operations.

Some urban interests supported the gas tax hike in exchange for what they thought was a presidential commitment for the transit funding.

Frank Shafroth, legislative counsel for the National League of Cities (NLC), said that cities have not received a fair share of the gas tax revenues, which are generated mostly by city residents.

"If we had known that the administration only planned to carry out those provisions of the legislation it wanted and to disregard the compromise necessary to secure our support, NLC would have strongly opposed the legislation," George Latimer, first vice president of the league and mayor of St. Paul, said in a March 18 letter to Transportation Secretary Elizabeth Hanford Dole.

Message to the Hill

About 500 transit operators and suppliers came to Washington in March for the transit association legislative conference, according to Jack R. Gilstrap, executive vice president of the association. That was the association's largest turnout for what has become an annual event, he said.

And this year, the transit officials were angry and anxious to lobby Congress to restore the funding.

"Not to see this legislation culminate in real funding got a lot of people very agitated," Gilstrap said.

The program included suggestions for association members to use when meeting with their representatives in Congress.

Richard S. Page, general manager of the Washington Metropolitan Area Transit Authority and chairman of the association's legislative committee, led the attendees in a how-to-lobby-Congress exercise. They were given copies of "talking points" and instructed in filling in the blanks to show members of Congress how transit systems in their districts will be hurt by the Reagan budget.

"We didn't like the legislation, but it was legislation that let us survive until 1986. At least we knew

Fuel Tax, User Fee Changes

Following are the major changes in fuel taxes and other user fees required by the Transportation Assistance Act of 1982. The money raised will go into the Highway Trust Fund to be used for highway projects and mass transit.

	Current Rate	New Rate	Effective Date
Gasoline, diesel fuel	4¢/gallon	9¢/gallon	April 1, 1983
Gasohol	0	4¢/gallon	April 1, 1983
Tire excise tax	9.75¢/lb.	Graduated increases for tires over 40 lbs. Fee for tires under 40 lbs. repealed.	Jan. 1, 1984
Truck sales	10 percent on manufacturer's price for trucks 10,000 lbs.	12 percent on retail price of trucks over 33,000 lbs. and truck trailers over 26,000 lbs.	April 1, 1983
Heavy-vehicle use fee	$3/1,000 lbs. for trucks 26,000 lbs.	Graduated increases for trucks 33,000 lbs. and more.	July 1, 1984
		Trucks 80,000 lbs. and over would pay a maximum of $1,900 by 1988.	

**Taxes on lubricating oil and truck parts expired in January 1983. Taxes on tread rubber and inner tubes will be repealed Jan. 1, 1984*

where we were going. You can't cut people's legs off this quickly," Harold C. Jenkins, general manager of the Cambria County Transit Authority, Johnstown, Pa., said.

"I always thought when Secretary Lewis spoke, he spoke for the administration," said John C. Pingree, general manager of the Utah Transit Authority, Salt Lake City.

The transit officials also met with sympathetic key members of Congress.

Sen. Alfonse M. D'Amato, R-N.Y., a key transit backer in the debate last year on the transportation legislation, said even non-transit supporters in Congress recognized that "fair play" was involved.

"You cannot make an agreement one day and renege on it the next day," D'Amato told the transit association March 14.

House Majority Leader Jim Wright, D-Texas, exhorted the transit officials to pressure their representatives to support the budget resolution approved by the House Democrats, which included the restored funds.

"You can assist powerfully in seeing that this budget is passed," Wright said at the association's dinner March 15, before House passage of the budget proposal. The Senate Budget Committee has not yet acted on its measure.

Trucks and Taxes

Many truckers accepted the fuel tax hikes as necessary to help complete the Interstate Highway System and to repair potholed highways and inadequate bridges. But they vigorously opposed the increases in the levies that heavy trucks must pay and the excise tax on trucks and trailers.

Industry spokesmen maintained that the administration's studies on the truckers' "fair share" of highway costs were wrong. And, they said the increases will seriously hurt an industry already reeling from the depressed economy.

They also disputed the administration's contention that the taxes were "user fees," levies charged a specific group for special federal services.

"It's not a user fee. You pay it if you go 10 feet or 10 miles," said Bill Scheffer, vice president of the Independent Truckers Association (ITA), which represents 30,000 of the 100,000 independent owner-operators.

ITA called on truckers to park their vehicles in protest Jan. 31. The violence-marked strike was called off Feb. 10 after many members of Congress agreed in an "expression of concern" letter to review the taxes. *(Weekly Report p. 357)*

Scheffer claimed that the introduction of several bills, as well as the "expression of concern," was an indication of the strike's success. "There's no doubt in my mind that these bills would not have been introduced if we had not parked our rigs," he said.

However, the Transportation Department contended that no more than 20 percent of the independent truckers honored the strike. ITA officials claimed many more did stop driving. The ATA, which represents regulated truckers, did not join the strike, arguing that it would hurt efforts to convince Congress to modify the taxes.

Potential Compromise

While administration officials said they would not compromise on the overall total amount of tax revenue that would be generated by truckers, they said they would consider a different type of tax, such as a further increase in the diesel fuel levy for trucks.

Also the study on the tax situation mandated by the Transportation Assistance Act will be moved up to January 1984, from January 1985, DOT officials said.

Many of the truck bills introduced in Congress this year would repeal the heavy-truck tax and increase the levy on diesel fuel by varying amounts. Although ATA and ITA officials said they were not commited to one measure yet, a bill (HR 2124) they lean toward supporting was proposed by Reps. Bill Frenzel, R-Minn.; Carroll A. Campbell Jr., R-S.C.; and Ed Jenkins, D-Ga.

HR 2124 would increase the diesel fuel tax to a total of 12 cents a gallon in 1983 and to 14 cents in 1984. Vehicles under 10,000 pounds, such as automobiles, would not be subject to any increase over 9 cents.

"It can also be more easily assimilated by the trucking industry because it is a pay-as-you-go system," Frenzel said in a statement March 17.

Kiley and Scheffer said their trucking organizations need to study the bill to make sure it is adequate before throwing their lobbying weight behind it.

The Truck Owner-Operators Association, an independent truckers group which claims about 4,500 members, also supports an increased diesel fuel levy instead of the heavy-truck tax hike. The group also pushed an anti-inflation program to improve the economy, which in turn would help the trucking industry.

Rep. Peter H. Kostmayer, D-Pa., who promoted the "expression of concern" letter, is urging members of the House Ways and Means Committee to review changes in the heavy-truck and excise taxes.

Signing the letter did not commit anyone to support actual changes in the taxes.

Staffers of the Ways and Means and the Senate Finance committees said their panels are not expected to take up any truck bills soon because of busy agendas dealing with the budget and other matters.

They noted that the heavy-truck tax increase does not begin to go into effect until July 1, 1984.

The excise taxes on trucks and truck-trailers, however, go into effect April 1. ■

"If we had known that the administration only planned to carry out those provisions of the legislation it wanted and to disregard the compromise necessary to secure our support, NLC would have strongly opposed the legislation."

MOTOR FUEL TAXES

Proposals to increase state taxes on motor fuels have surfaced in 27 states. Bills have passed in three legislatures.

FLORIDA - Effective April 1, 4¢ of the current 8¢ state tax will be replaced by a new 5% of wholesale "sales tax." This sales tax will be computed at 5.7¢/gal. for two years, then recalculated annually. The state road fund's share of the motor fuel tax, thus, increases by 1.7¢/gal. However, county commissions are given the authority to adopt local option taxes up to 4¢/gal., in addition to the current 1¢ local tax which requires voter approval.

RHODE ISLAND - Effective April 1, the state's current 10% of wholesale variable tax changes to 11% with a 13¢/gal. floor. This automatically increases the tax from 11¢ to 13¢. Rhode Island is a general fund state, but 1.5¢/gal. of this increase has been earmarked to bus transit.

WEST VIRGINIA - Effective April 1, a 5% of wholesale "sales tax" will be added to the state's current 10.5¢/gal. tax. The sales tax will be converted annually to cents-per-gallon using an average wholesale price of at least 97¢/gal. This increase of about 5¢ /gal. is dedicated to highways.

Motor fuel tax increase bills have been passed by one house in four states.

Idaho - 3¢ (now 12.5¢).
Montana - 3.5¢ on gasoline; 4.5¢ on diesel (now 9¢ and 11¢).
North Dakota - 5¢ passed by House; 1¢ by Senate.
South Dakota - 1¢ in conference committee.

Proposals are under consideration in 19 states.

Alaska
Arkansas (diesel)
California (sales)
Colorado
Connecticut
Illinois
Maine
Massachusetts
Minnesota
Mississippi (sales)
Missouri
New Jersey
Oklahoma
Oregon
Pennsylvania
Texas
Vermont
Washington
Wisconsin

A Wyoming bill for a cents-per-gallon diesel tax died.

Four states have introduced bills to reduce motor fuel taxes.

Alaska - by 5¢ to offset Federal tax increase.
Maryland - repeal 2.5¢ increase scheduled for June 1.
New Hampshire - keep only 1¢ of 3¢ scheduled to expire July 1.
Virginia - bill to repeal 3% excise tax on motor fuels died.

A local option tax passed in FLORIDA (see above); is pending in Montana; failed in Georgia.

GASOHOL TAX EXEMPTIONS

Legislation in 13 states would grant tax breaks to gasohol or extend current tax reductions. Legislatures in three states have passed such bills.

ARKANSAS - Exempt from sales tax if produced in state. Gasohol is now exempt from the motor fuel tax but - unlike gasoline or diesel - is charged the retail sales tax.

FLORIDA - New motor fuel tax structure increases amount of exemption given gasohol. Gasohol will be charged 4¢ per gallon (of 9.7¢ tax) until April 1, 1985, when half of "sales tax" will be added. Tax reduction would expire in 1987.

SOUTH DAKOTA - Legislature extended current 4¢ tax break (from 13¢) until June 30, 1985.
NOTE: Report that tax break expired June 30, 1982 (State Legislative Report, Jan. 10, 1983) was in ERROR.

Bills to give new or extended tax breaks are pending in ten states.

Arizona
Illinois
Maine
Maryland
Massachusetts
Minnesota
Mississippi
New Jersey
New York
South Carolina

GASOHOL TAX INCREASES

Six states are considering legislation removing or limiting the tax breaks now offered to gasohol. One has approved such a tax increase.

OKLAHOMA - Effective Mar. 1, the total exemption from motor fuel taxation was repealed. The tax on gasohol is now 6.58¢/gal., the same as on gasoline.

Such bills are pending in five other states.

Arkansas
Indiana
Iowa
Montana
Nebraska

AUTOMOBILE REGISTRATION FEES

Bills to increase registration (license tag) fees for cars and pickup trucks have been introduced in 11 states. Only one has passed.

FLORIDA - $2 increase in all weight classes.

Bills are pending in nine states.

Colorado
Illinois
Iowa
Missouri
Montana
Nebraska
New York
North Dakota (Senate passed)
Washington

A $ crease failed in Wyoming.

TRUCK FEES & TAXES

Increases in special truck taxes or permit fees have been considered in 18 states. Two legislatures have passed higher fees.

FLORIDA - Increased registration fees; more than doubled for heaviest trucks.
SOUTH DAKOTA - Increased overweight permit fees from $25 to $250.

Bills are pending in 15 states.

Arizona
Arkansas (Senate passed)
Colorado (each house passed
Idaho own bill)
Illinois
Indiana
Kansas
Maine
Missouri (House passed)
Montana
North Dakota
Oklahoma
Oregon
Vermont
West Virginia

Bills died in Wyoming.

BOND ISSUES

Ten states are looking at bond financing for highway projects.

ALABAMA - Authority to counties to offer revenue bonds for roads and bridges.

Bills are pending in nine other states.

Connecticut
Minnesota
Montana
Nebraska
New Hampshire
New Mexico
New York
Rhode Island
Wisconsin

DEDICATION OF USER REVENUES

Ten states are considering legislation to earmark various user-generated revenues to highway purposes.

Three "general fund" states without any dedication have such bills pending.

Connecticut
New Jersey
New York

Bills in five other states would earmark additional user fees, such as vehicle sales taxes, to highway programs.

Indiana
Kansas
Montana
New Mexico
Texas

Such bills died in Massachusetts and Wyoming.

DIVERSION OF USER REVENUES

Bills in 14 states would divert user-generated revenues to non-highway purposes.

RHODE ISLAND - Currently a "general fund" state, the bill which raises the motor fuel tax also specifically earmarks a portion of its revenues to bus transit.

Diversion bills are pending in 11 other states.

Arizona
Colorado
Illinois
Indiana
Iowa
Maine
Maryland
Minnesota
Nebraska
Nevada
Washington

Such bills were killed in South Dakota and Wyoming.

TOLL FINANCING

Only Connecticut has introduced legislation concerning tolls. Several bills would phase out turnpike and bridge tolls.

Introduced: 1/18/83

IN THE HOUSE BY MARTIN AND GRUSSENDORF

HOUSE BILL NO. 55

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act decreasing the motor fuel tax to offset tax increase by federal government; repealing motor fuel tax refund provisions and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* ~~Section 1. AS 43.40.010(a) is amended to read:~~ (added) (deleted)

(a) There is levied a tax of three [EIGHT] cents a gallon on all motor fuel sold or otherwise transferred within the state, except that

(1) the tax on aviation gasoline is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

~~Sec. 2. AS 43.40.010(b) is amended to read:~~

(b) There is levied a tax of three [EIGHT] cents a gallon on all motor fuel consumed by a user, except that

(1) the tax on aviation gasoline consumed is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

* Sec. 3. ~~This Act takes effect April 1, 1983.~~ AS 43.40.030, 43.40.040, 43.40.050, 43.40.060, 43.40.070 and 43.40.080 are repealed.

* Sec. 4 This Act takes effect April 1, 1983

Section
50. Refund claim by affidavit
60. Separate invoices
70. Refund warrants
80. Examination of books and records
85. Preservation of books and records
90. Criminal violation
100. Definitions

Sec. 43.40.010. Tax on transfers or consumption of motor fuel; rate; exemptions; proceeds. (a) There is levied a tax of eight cents a gallon on all motor fuel sold or otherwise transferred within the state, except that

(1) the tax on aviation gasoline is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

(b) There is levied a tax of eight cents a gallon on all motor fuel consumed by a user, except that

(1) the tax on aviation gasoline consumed is four cents a gallon,

(2) the tax on motor fuel used in and on watercraft of all descriptions is five cents a gallon, and

(3) the tax on all aviation fuel other than gasoline is two and one-half cents a gallon.

(c) Every dealer who sells or otherwise transfers motor fuel in the state shall collect tax at the time of sale, and remit the total tax collected during each calendar month of each year to the Department of Revenue by the last day of each succeeding month. Every user shall likewise remit the tax accrued on motor fuel actually used by him during each month. At the time the remittance is made, each dealer or user shall submit a statement to the Department of Revenue showing all motor fuel which he has distributed or used during the month.

(d) Repealed by § 3 ch 166 SLA 1976.

(e) Sixty per cent of the proceeds of the revenue from the taxes on aviation fuel, excluding the amount determined to have been spent by the state in its collection, shall be refunded to a municipality owning and operating or leasing and operating an airport in the proportion that the revenue was collected at the municipal airport. All other proceeds of the taxes on aviation fuel shall be paid into a special aviation fuel tax account in the state general fund. The legislature may appropriate funds from this account for aviation facilities.

(f) The proceeds from the revenue from the tax on motor fuel used in boats and watercraft of all descriptions shall be deposited in a special watercraft fuel tax account in the general fund. The legislature may appropriate from this account for water and harbor facilities.

(g) The proceeds of the revenue from the tax on all motor fuels, except as provided in (e), (f), and (j) of this section, shall be deposited in a special highway fuel tax account in the state general fund. The legislature may appropriate funds from it for expenditure by the Department of Public Works directly or as matched with available federal-aid highway money

for maintenance of highways, construction of highway projects and ferries included in the program provided for in AS 19.10.150, including approaches, appurtenances and related facilities and acquisition of rights-of-way or easements, and other highway costs including surveys, administration, and related matters. All departments of the state government authorized to spend funds collected from taxes imposed by §§ 10—100 of this chapter shall perform, when feasible, all construction or reconstruction projects by contract after the projects have been advertised for competitive bids, except that, when feasible, arrangements shall be made with political subdivisions to carry out the construction or reconstruction projects. If it is not feasible for the work to be performed by state engineering forces, the commissioner of public works may contract on a professional basis with private engineering firms for road design, bridge design, and services in connection with surveys. If more than one private engineering firm is available for the work the contracts shall be entered into on a negotiated basis.

(h) All motor fuel tax receipts shall be paid into the general fund and distributed to the proper accounts in the general fund. Valid motor fuel tax refund claims shall be paid from the highway fuel tax account in the general fund.

(i) Within 30 days after the legislature convenes the Department of Public Works shall submit an annual budget covering anticipated revenues and their expenditure, for the consideration and approval by the legislature. The budget shall cover all money collected or anticipated to be collected under §§ 10—100 of this chapter for the year following the adjournment of each regular session of the legislature.

(j) The proceeds from the tax on motor fuel used in snow vehicles and, unless a tax refund is applied for under § 40 of this chapter, other internal combustion engines not used in or in conjunction with a motor vehicle licensed to be operated on public ways shall be deposited in a special nonpublic highway use account in the general fund. The legislature may appropriate from this account to the Department of Highways for trail staking and shelter construction and maintenance.

(k) The tax on the transfer or consumption of motor fuel provided for in this section does not apply to liquified petroleum gas. (§ 48-5-2 ACLA 1949; am § 1 ch 80 SLA 1951; am § 1 ch 47 SLA 1955; am §§ 1, 2 ch 27 SLA 1957; am § 1 ch 134 SLA 1957; am § 1 art VI title II ch 152 SLA 1957; am § 2 art V title III ch 152 SLA 1957; am § 2 ch 124 SLA 1959; am §§ 1, 2 ch 20 SLA 1960; am § 1 ch 150 SLA 1960; am § 1 ch 110 SLA 1961; am § 1 ch 136 SLA 1961; am §§ 1—3 ch 131 SLA 1962; am § 1 ch 130 SLA 1968; am § 10 ch 143 SLA 1968; am §§ 1, 2 ch 216 SLA 1968; am §§ 1—3 ch 58 SLA 1970; am § 3 ch 58 SLA 1971; am §§ 1, 2 ch 124 SLA 1971; am §§ 2, 3 ch 125 SLA 1971; am §§ 1—3 ch 153 SLA 1972; am § 3 ch 166 SLA 1976; am §§ 1, 2 ch 116 SLA 1977)

Cross reference. — For civil penalty imposed for failure to file a return or report, or pay the full amount of a tax, or a portion or a deficiency of the tax, see AS 43.05.220.

Effect of amendments. — The 1976 amendment repealed subsection (d), which provided for an additional amount to be added to the tax for failure to file a return and remit the tax within the time prescribed by law or prescribed by the department pursuant to law, due to wilful neglect.

The 1977 amendment rewrote paragraph (2) of subsection (a) and paragraph (2) of subsection (b).

Editor's note. — Section 1, ch. 125, SLA 1971, provides: "**Intent.** The intent of this Act is to provide funds for trail staking and shelter construction and maintenance projects in sparsely populated areas where the interests of safety require their establishment for the protection of traveling citizens of the state."

Purpose of subsection (g). — The purpose of the dedication of the taxes on motor fuels contained in subsection (g) of this section is public highways. 1959 Op. Att'y Gen., No. 9.

A proposed alteration going to the geographical area of expenditure rather than to the special purpose of a dedication, does not contravene the constitution. 1959 Op. Att'y Gen., No. 9.

Amendment of 1957 effected no change in dedication. — The 1957 amendment to this section, which reduced the tax on motor fuel used in commercial fishing crafts for purposes of commercial fishing from five cents to two cents per gallon, effected no change in the dedication inasmuch as the reduction in the tax was coupled with an exemption from the refund of three cents per gallon formerly allowed to users of fuel in commercial fishing craft for commercial purposes. Nothing has been done which increased or decreased the dedication. 1959 Op. Att'y Gen., No. 14.

Civil Air Patrol exempt. — The Civil Air Patrol is exempt from taxation under the Alaska Motor Fuel Oil Tax Act because it is an instrumentality of the federal government. 1961 Op. Att'y Gen., No. 26.

But volunteer members of Civil Air Patrol are not exempt. 1961 Op. Att'y Gen., No. 26.

Am. Jur. and C.J.S. references. — 51 Am. Jur., Taxation, §§ 1260 to 1279.

53 C.J.S. Licenses § 30.

Sec. 43.40.020. Penalty for violation. (a) A person who violates a provision of §§ 10—100 of this chapter upon conviction is punishable for each violation by a fine of not less than $50 nor more than $5,000, or by imprisonment for not more than one year, or by both. Each day's violation is a separate offense.

(b) Repealed by § 3 ch 116 SLA 1977. (§ 48-5-3 ACLA 1949; am § 4 ch 153 SLA 1972; am § 3 ch 116 SLA 1977)

Effect of amendment. — The 1977 amendment repealed subsection (b), which read "A person who claims the nonpropulsion use fuel tax exemption under § 10 (a) (2) or § 10 (b) (2) of this chapter and who uses a portion of the amount of the exempted fuel for another purpose is guilty of a misdemeanor, and is punishable by a fine of not more than $5,000."

C.J.S. reference. — 53 C.J.S. Licenses § 62.

Sec. 43.40.030. Refund for nonhighway use. (a) Except as specified in § 10 (j) of this chapter, a person who uses motor fuel to operate an internal combustion engine is entitled to a refund of six cents a gallon if

(1) the tax on the motor fuel has been paid;

(2) the motor fuel is not aviation fuel, or motor fuel used in or on watercraft; and

(3) the internal combustion engine is not used in or in conjunction with a motor vehicle licensed to be operated on public ways.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: SS HB 55 Date on Bill: 2/4/83
Title: "An Act decreasing the motor fuel tax."
Sponsor: Martin, Grussendorf
Requestor: Transportation

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital								
Operating								
Total								

b. Revenues:

Revenue			(2.0 mil.)	(17.0 mil.)	(10.0 mil.)			

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:

The proposed bill reduces the tax on motor fuel, thus reducing General Fund revenues. Only AS 43.40.030(a) needs to be repealed.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

This bill would substantially reduce Motor Fuel tax collections. Motor fuel funds are used, in part, to finance repair of hignways, bridges, etc. These expenditures are sometimes matched with available federal-aid highway money. A reduction in motor fuel tax would not only lower the general fund money available for expenditures by the Department of Transportation and Public Facilities but potentially could reduce federal aid.

Since the tax is proposed to be lowered from 8¢ to 3¢ a gallon, a refund of 6¢ a gallon cannot occur. Therefore, AS 43.40.030 must be amended to eliminate or lower the refund.

SENATE BILL NO. 17

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making an appropriation to the Department of Revenue for financial assistance to municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $25,100,000 is appropriated from the general fund to the Department of Revenue for the municipal assistance fund (AS 43.20.016(a)) for distribution to municipalities for the fiscal year ending June 30, 1984.

* Sec. 2. The unexpended and unobligated portion of the appropriation made by this Act lapses into the general fund June 30, 1984.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE HOUSE BY THE TRANSPORTATION COMMITTEE

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act amending motor fuel tax provisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.40.010(c) is amended to read:

(c) Every dealer who sells or otherwise transfers motor fuel in the state shall collect the tax at the time of sale, and remit the total tax collected during each calendar month of each year to the Department of Revenue by the last day of each succeeding month. Every user shall likewise remit the tax accrued on motor fuel actually used by him during each month. <u>If the monthly tax return is timely filed, one percent of the total monthly tax due, limited to a maximum of $100, can be deducted and retained to cover the expense of accounting and filing the monthly tax return.</u> At the time the remittance is made, each dealer or user shall submit a statement to the Department of Revenue showing all [MOTOR] fuel which he has distributed or used during the month.

* Sec. 2. AS 43.40.010(l) is amended to read:

(l) If a dealer has a reasonable belief at the time of sale or transfer that fuel that is sold or transferred is not to be used as motor fuel, the dealer need not collect the motor fuel tax. If the tax is not collected, the dealer shall obtain a certificate of use from the buyer or transferee stating that the fuel that has been or will be purchased or received is not intended for use as motor fuel. The <u>Department of Revenue</u> [DEPARTMENT] may not collect the motor fuel

tax from a dealer for fuel for which a certificate of use has been properly obtained under this subsection. A certificate of use is not required for fuel used to heat a private residence or for fuel which is at least 10 percent alcohol by volume. An annual certificate of use is required for all other exemptions, as listed under AS 43.40.-100(2), except subparagraph (K) where certificate of use needs will be determined by the Department of Revenue. The dealer shall retain a copy of each certificate of use obtained under this subsection for examination or audit on request by the Department of Revenue [DEPARTMENT]. The form of a certificate of use may be prescribed by regulation adopted by the department.

* Sec. 3. AS 43.40.035(a) is amended to read:

(a) A person who resells fuel on which the tax under AS 43.40.-010(a) or (b) was previously paid is entitled to a credit or refund of the tax if (1) the resold fuel is not motor fuel and the requirements prescribed by AS 43.40.010(1) have been fulfilled [A CERTIFICATE OF USE IS ACQUIRED UNDER AS 43.40.010(1)]; or (2) the amount of tax previously paid exceeds the tax due on the resale. The amount of the credit or refund under this section is equal to the amount of tax previously paid on the resold fuel less the amount of tax prescribed by AS 43.40.010(a) or (b).

* Sec. 4. This Act is retroactive to April 1, 1983.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.-10.070(c).

BILL COMPARISON

Hayes, Martin, Lindauer, Tischer, Barnes SSHB 40	Martin & Grussendorf SSHB 55	Zharoff & Grussendorf HB 150
An Act repealing the motor fuel tax (AS 43.40); and providing for an effective date.	An Act decreasing the motor fuel tax to offset tax increase by federal government, repealing motor fuel tax refund provisions; and providing for an effective date	An Act repealing the tax on motor fuel used in or on watercraft; and providing for an effective date.
Would only repeal the state motor fuel tax (AS 43.40), retroactive to January 1, 1983, and applying to tax years beginning after December 31, 1982 Directs the Dept. of Revenue to adopt regulations providing for refunds of motor fuel taxes collected after December 31, 1982. Effective immediately.	Lowers motor fuel tax to 3¢ per gallon, and repeals motor fuel tax refund provisions contained in the following statutes: --AS 43.40.030 "Refund for Nonhighway Use," allows six-cent-per-gallon refund on any tax paid for fuel used for a vehicle which is not operated on highways in the state (does not apply to aviation fuel and watercraft fuel). Allows total refund on that part of the fuel sold for non-highway use in a foreign country. --AS 43.40.035 "Other Refunds and Credits," which allows a person who resells fuel on which the motor fuel tax was previously paid to receive a refund of the tax. --AS 43.40.050 "Refund Claim by Affidavit," containing procedure for claiming refund of motor fuel tax by filing an affidavit with the Dept. of Revenue. --AS 43.40.060 "Separate Invoices," which allows the Dept. of Revenue to require separate invoices for fuel sold, distributed, or transferred when the invoices will be the basis for a refund claim. -continued-	Would repeal the 5¢ per gallon tax on motor fuel tax used in or on watercraft.

SSHB 40	SSHB 55	HB 150
	--AS43.40.070, "Refund Warrants," directs the Dept. of Revenue, upon approval of a refund claim, to issue a warrant drawn on the Highway Fuel Tax Account in favor of the applicant in the amount of the claim. --AS 43.40.080, "Examination of Books and Records," allows the Dept. of Revenue to examine a claimant's books and records to determine validity of a claim for refund. Note: bill also includes repealer for AS 43.40.040, "Applications and Permits for Refund," however this section was repealed in 1980 by Sec. 45 of Ch. 113, SLA 1980. (Required person seeking refund to obtain a permit from the Dept. of Revenue.) Fiscal Note Info.: The proposed bill reduces the tax on motor fuel, thus reducing General Fund revenues - FY 83 - 2.0 mill. FY 84 - 17.0 mill. FY 85 - 10.0 mill. Only AS 43.40.030(a) needs to be repealed	Fiscal Note Info.: Shows a loss of revenues in the General Fund as follows: FY 83 - 0 FY 84 - 3.2 mill. FY 85 - 4.2 mill.

Representative Bette Cato, Chair
House Transportation Committee
House of Representatives
Capitol Building
Juneau, Alaska

Dear Bette.

I'm writing in follow-up to yesterday's meeting of your committee to furnish "on paper" supporting information relative to HB 55, a bill to lower the state motor fuel tax by five cents to three cents a gallon.

There are, I submit, seven major advantages which this bill offers which, as a result of yesterday's deliberations in committee, I feel compelled to re-emphasize at this time:

1) HB 55 represents significant savings to state and local governments in physical plant heating costs.

2) Major savings in automotive fuel charges to state trooper and city police vehicles, as well as to state and municipal non-law enforcement vehicles and mobile equipment, will result through passage of this bill. HB 55 will mean reduced costs for school transportation services, as well.

3) HB 55 will result in reduced costs in mass transportation for public carriers in Alaska, on land, in the air or over water -- savings in the competetive market will be passed on to Alaskans.

4) Reductions in motor fuel costs through enactment of HB 55 will be of direct benefit to the trucking industry in Alaska and particularly helpful to high overhead, small-scale independent trucking operations.
