FISCAL NOTE ANALYSIS

This legislation provides funds for the construction of a 17,000 square foot Statewide Forensic Sciences Laboratory in Anchorage. The vast majority of the operating costs represents a shift in direction for the Lab from a limited service AST facility to becoming a full-service operation designed to meet the needs of all law enforcement agencies in the State. Personal Services costs for FY 85 reflect the hiring of the seven new staff members beginning June 1, 1985 and minimal supporting costs. *FY 85 is shown on the next page - more detail.*

FY 86 includes full operational costs. Beyond FY 85, an anticipated 6% inflation rate and the cost of maintenance contracts on the new equipment are reflected.

By FY 88 it is anticipated that advances in technology will require replacement or new equipment to meet court evidence requirements each year.

The Trace Evidence Examiner can narrow the origin of minute bits of evidence such as human hair and fibers, that are exchanged during fight or rape, to a group that includes (or excludes) the suspect. The paint chips and broken headlights of a hit and run fatality may be analyzed to determine if they match the paint and headlight of the suspects car.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide a new expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

* New classification pending.

The Forensic Chemist tests and analyzes unknown substances. By testing substances thought to be illegal drugs, he can determine the type drug, its relative purity and the substances that may be mixed with the drug. He can also identify small amounts of accelerants from a suspected arson fire by testing charred and burned materials found at the fire, as well as other tasks requiring chemical analysis.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide an additional expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

* New classification pending.

The Forensic Serologist/Toxicologist analyses of body fluids found at the crime scene, can limit the population group of the assailant to those within certain blood groups, thus eliminating persons with other blood groups and characteristics as suspects in a given crime. Toxicology detects and identifies the presence of drugs or poisons in body tissues, fluids and organs. These tests are used in determining the presence and extent of alcohol that may have contributed to a death, as one example.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide an additional expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

The Fingerprint Examiner can compare fingerprints found on a gun or some other surface to those of the suspect based upon the matching of the characteristics of the fingerprint ridges that are unique to each individual. (The Automated Fingerprint Identification System, funded during the 1982 session of the legislature is now being developed and installed).

The position will function in the new expanded Statewide Forensic Science Laboratory and provide an additional expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

This position is needed to support the six new professional positions being requested and part of this Capital Project and the two new additional professional positions added to the Crime Lab during FY'83 and FY'84 through RP. Without this additional administrative support the professional staff will loose much of its productive capacity performing administrative tasks that could more economically be done by this position.

This position will supervise the other clerks presently employed in the Crime Lab including those in the O/L Photo section.

This position is needed to support the six new professional positions being requested and part of this Capital Project and the two new additional professional positions added to the Crime Lab during FY'83 and FY'84 through RP. Without this additional administrative support the professional staff will loose much of its productive capacity performing administrative tasks that could more economically be done by this position.

This position will supervise the other clerks presently employed in the Crime Lab including those in the O/L Photo section.

JAN FAIKS
POUCH V
CAPITOL BUILDING
JUNEAU, ALASKA 99811

MEMORANDUM

TO: All Members
Senate Finance Committee

FROM: Senator Jan Faiks

DATE: May 1, 1984

RE: House Bill 487-Statewide Crime Lab

CS 2d SSHB 487 (FIN) appropriates \$5,056,408 for the construction of a crime lab in Anchorage and \$40,100 for personal services for one month during FY 85.

As I'm sure you recall, similar legislation was introduced last year and passed by both Houses. However, the fiscal note was reduced by the Senate Finance Committee to appropriate only the money for the design of the crime lab rather than the planning and construction money. The bill was signed by the Governor on June 23, 1983 and is 28 SLA 83.

Site survey and soils testing has been completed by DOT/PF. The Department believes construction could begin in August of this year if money is appropriated by this Legislature.

The State of Alaska is the only state with no crime lab. Historically, the state has depended upon the FBI to perform tests on all its evidence to be used in a criminal trial. Federal budgetary restrictions and a 1980 General Accounting Office report charging the Bureau's policy of free laboratory services inhibits the growth of statewide crime labs raises the question of how long these services of the FBI will be provided free of charge.

In the FY ending September 30, 1983 FBI laboratory examiners traveled to Alaska 50 times. A "testimony trip to Alaska is a 5 day affair for the FBI, and salaries, per diem, and air fare alone cost the FBI \$2362 per trip". This is exclusive of overhead costs to the FBI.

The FBI operates an expansive training program for state and local forensic science personnel on a no-cost basis at their lab in Quantico, Virginia. They have indicated that prospective attendees from Alaska will go to the head of the list for positions in those training classes.

The Department of Transportation/Public Facilities has indicated that if construction begins this summer, the building will be completed about May of next year. For this reason, they included personal service costs for 7 personnel for the month of June.

I believe that Alaska should have its own crime lab for basic tests, and only rely on the FBI laboratory for examinations which involve more sophisticated, expensive, and unusual equipment needs and areas of expertise.

January 20, 1984

The Honorable Charlie Bussell
Chairman
Committee on the Judiciary
Alaska House of Representatives
Juneau, Alaska

Dear Mr. Bussell:

I am writing today concerning House Bill 487, which provides for the construction of a State Crime Laboratory, and for first year funding.

Although I have not read the Bill, and thus cannot state that I unequivocally support each of its provisions, I can surely state that the FBI strongly supports the establishment of effective basic-service crime laboratories at state and local levels.

You might be interested in a recounting of events in what might be the most simple exchange between Alaska law enforcement/prosecutive authorities and the FBI Laboratory, upon whose forensic science services Alaska now depends.

An Alaska law enforcement agency dispatches items of clothing in a sexual assault case to the Laboratory, and requests examination of fluid stains on the items. The Laboratory conducts the requested examinations, and advises the Alaska agency of its results. The District Attorney deems these results to be vital to a successful prosecution of his case, and requests the FBI Laboratory examiner to travel to Alaska to testify in trial in an Alaska Superior Court. (This occurred 50 times in the Fiscal Year ending September 30, 1983; 51 times in Fiscal Year 1982.)

My associates in the FBI Laboratory advise me that a "testimony trip" to Alaska is generally regarded as a five day committment. One day of travel in each direction, and three days in Alaska consumed by pre-trial discussions with the prosecutor, waiting to testify, and actual time on the witness stand.

Here is a tabulation of the direct cost to the FBI attendant upon such a series of events (again in a case of minimum complexity).

Salaries: FBI Laboratory technician for two days consumed in examination, plus FBI Special Agent Examiner, one day on examination and five days on testimony trip - \$1,296.

Per diem costs: Special Agent Examiner, five days in Alaska at lowest federal per diem rate in Alaska (\$92) totalling \$460.

Air fare: Washington, D.C. to Anchorage and return at U. S. Government contract rate of \$606.

A total of these three primary cost items is:	\$1,296
	460
	606
	<hr/>
	\$2,362.

This figure, of course, does not include incidental expenses nor, more importantly, the substantial personnel and facilities "overhead" costs attendant upon the operation of the FBI Laboratory.

One can readily see that even a relatively uncomplicated matter becomes a most expensive proposition, and that the existence of a state crime laboratory would substantially reduce salary, travel, and per diem costs in most cases. Further, I can assure you that a small percentage of our Laboratory's work results in testimony. In the vast majority of the cases, the investigation and prosecutive action is completed without the necessity of examiner travel. The latter cases still represent a most substantial expenditure of FBI salary and overhead expenses.

Due to the absence of a state crime laboratory, and based on its population, Alaska is the greatest per capita user among the states of the services of the FBI Laboratory. Even without regard to population, Alaska is among the leaders. Thus, from the FBI's standpoint, we are rendering our greatest level of service to the state most distant from our Laboratory.

From time to time an item of information appears which indicates that the FBI intends to, or may be directed to, reduce its level of service to state and local agencies and/or begin charging for Laboratory services. I would be less than candid if I did not say that the FBI has always resisted these concepts in the past, and intends to continue to resist them. I see nothing in the future to indicate that the FBI Laboratory will

not stand ready for years to come to continue to accommodate, on a cost free basis, every legitimate request from state and local agencies for forensic science examinations. We would much prefer, however, that state and local agencies operate basic-service laboratories and use the services of the FBI Laboratory only in those cases in which the examinations involve the most sophisticated, expensive, and unusual equipment needs and/or areas of examiner expertise.

I have been informed that approximately 47 of the 51 testimony trips taken to Alaska by FBI Special Agent Examiners in Fiscal Year 1982 involved basic examinations in such areas as firearms, documents, and serology examinations. I would expect that most, if not all, of those 47 examinations could have been conducted by the basic-service laboratory envisioned by the Department of Public Safety.

The FBI operates a fine, expansive training program for state and local forensic science personnel on a no-cost basis at our training academy at Quantico, Virginia. We stand ready to serve Alaska in this regard. I will personally attempt to insure that whenever possible prospective attendees from Alaska "go to the head of the line" waiting for positions in those training classes. My superiors in Washington would almost certainly regard that preferential treatment as a fair trade, in recognition of Alaska's willingness to assume a greater share of the burden which until now has been equally borne by the taxpayers throughout the nation.

I support House Bill 487, and urge its favorable consideration.

Please do not hesitate to contact my office, directly or through Commissioner Sundberg, if you require further information from the FBI.

Sincerely yours,

Lawrence J. Nelson
Special Agent in Charge

cc: Commissioner of Public Safety
Representative Walt Furnace

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER

Support

Passage of this bill will result in an increase in the number and quality of arrests and convictions in felony cases statewide. Construction of this Capital Project will mark a major shift in direction for the State Troopers from a limited service Crime Lab to a full service professional Forensic Laboratory designated to serve all law enforcement agencies statewide. This project will consist of 17,000 square feet of space for testing and analysis, and equipment to establish a full-service Statewide Crime Laboratory.

Within the last decade a series of Supreme Court decisions relative to search and seizure, interrogation and confessions has had the effect of limiting the scope of permissible investigative activities by law enforcement agencies. This situation, in turn, has resulted in the increased attention to the use of physical evidence in criminal investigations, and the subsequent development of crime laboratories to analyze this evidence throughout the nation.

The application of the technologies and techniques of the natural and physical sciences to items of evidence found at a crime scene is an increasing part of modern investigations and courtroom trials. The expectation that these sciences are devoid of prejudice makes the results of crime laboratory tests and analyses an often critical part of judicial proceedings. It also confers upon crime laboratories the responsibility for the highest degree of professionalism in their work. The availability of physical facilities is the essential first step in making these services available to Alaska's state & local law enforcement agencies. All services performed will be at no cost to the Troopers and the 25 or so local departments throughout the state.

Beyond establishing drug identification and fingerprint comparisons within the existing limited Laboratory, Alaska has no crime laboratory with the broad capabilities needed to analyze clothing from a rape, compare shell casings to bullets found at a homicide, analyze carbon residue from a suspected arson fire for traces of accelerants, compare blood characteristics of blood on an assault victim to the blood of a suspect, compare pry marks on a window casing with a tire iron found in possession of a suspect, and the many additional tests required for modern, effective law enforcement investigations. The existing "crime lab" is located in crowded quarters in the basement of the State Troopers headquarters building in Anchorage.

Lack of additional personnel and physical limitations prevent its expansion. Alaska is the only state that does not yet have a full service lab to assist its local, as well as state, law enforcement agencies.

The greatest reason to develop a full service Crime Lab in Alaska is the increasingly longer time required to receive results of tests now routinely being sent to the FBI laboratory in Washington, D.C. The time required for laboratory tests of a routine nature from the FBI now require from four to six months. The reasons for this situation are a general budget tightening among federal agencies and an ever increasing number of requests nationwide for tests by the FBI laboratory. The problem of long turn-around sometimes conflicts with the Alaska Supreme Court Rule, which requires that the trial begin within 120 days following arrest, barring any delays by the judge as may be requested by either side. This problem is expected to increase in the future. Increasing turn-around time is also occurring with the very limited capabilities of the existing Trooper laboratory. Currently the average time required for test results is several weeks for just drug-related tests. No room for expansion within current facilities is available or practical.

During the 1983 Legislative session the legislative appropriated \$402.0 to cover the design and engineering costs of this project (Chapter 28, SLA 83). This stage of the project has proceeded on schedule and current cost estimates by the architects have confirmed our original estimate of \$5,603.0.

An extensive study was made during FY 82 and FY-83 concerning the needs for a Statewide Crime Laboratory by the Department of Public Safety personnel. This study is too exhaustive to be made part of this bill analysis, however, copies may be obtained by contacting Colonel Michael C. Kolivosky, Division of Alaska State Troopers, P.O. Box 6188 Annex, Anchorage, AK 99502 (269-5646), or through the Commissioner's office in Juneau.

FISCAL NOTE
SECTION IV ANALYSIS

This legislation provides funds for the construction of a 17,000 square foot Statewide Crime Laboratory in Anchorage. The attached Schedule I details the Capital Cost and Schedule II details the Operating Costs. The vast majority of the Operating Costs represents a shift in direction for the Crime Lab from a limited service A.S.T. facility to becoming a full-service operation designed to meet the needs of all law enforcement agencies in the state. Personal Services costs for FY'85 reflect the hiring of the seven new staff members at various dates throughout the year. (See supporting schedules.) and other costs at 75% of a full years' cost.

FY'86 and each subsequent year reflect an anticipated 6% inflation rate and the cost of maintenance contracts on the new equipment.

By FY'88 it is anticipated that advances in technology will require replacement or new equipment to meet court evidence requirements each year.

SCHEDULE I

ANCHORAGE COMBINED FACILITY

CAPITAL COSTS

1) Construction Costs

Crime Lab - 17,000 sq. ft. \$3,825.0

DOT/PF Overhead, Architect,
Planning Contingency, etc. \$1,147.0

CS SS HB 33 (402.0) 745.0

Subtotal \$4,570.0

2) Equipment 962.0

3) Commodities - Initial Stock 71.0

TOTAL \$5,603.0

The Trace Evidence Examiner can narrow the origin of minute bits of evidence such as human hair and fibers, that are exchanged during fight or rape, to a group that includes (or excludes) the suspect. The paint chips and broken headlights of a hit and run fatality may be analyzed to determine if they match the paint and headlight of the suspect's car.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide a new expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska

* New classification pending.

The Firearms & Tool Marks Specialist can match a spent bullet to the gun that fired it by examination of the microscopic markings on the bullet caused by the irregularities on the inner surface of the gun barrel, among other capabilities. As a Tool Marks Specialist, he can identify the tire iron or other implement found in the suspect's car as the one that did or did not pry open the window or door of the victim's home by using a microscope to compare and match the nicks on the blade of the tire iron to the impressions left in the window sill.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide a new expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

The Forensic Chemist tests and analyzes unknown substances. By testing substances thought to be illegal drugs, he can determine the type drug, its relative purity and the substances that may be mixed with the drug. He can also identify small amounts of accelerants from a suspected arson fire by testing charred and burned materials found at the fire, as well as other tasks requiring chemical analysis.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide an additional expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

The Forensic Serologist/Toxicologist analyses of body fluids found at the crime scene, can limit the population group of the assailant to those with certain blood groups, thus eliminating persons with other blood groups and characteristics as suspects in a given crime. Toxicology detects and identifies the presence of drugs or poisons in body tissues, fluids and organs. These tests are used in determining the presence and extent of alcohol that may have contributed to a death, as one example.

The position will function in the new expanded Statewide Forensic Science Laboratory and provide an additional expertise capability which will expand the level of service that can be provided to law enforcement agencies in Alaska.

This position is needed to support the six new professional positions being requested and part of this Capital Project and the two new additional professional positions added to the Crime Lab during FY'83 and FY'84 through RP. Without this additional administrative support the professional staff will lose much of its productive capacity performing administrative tasks that could more economically be done by this position.

This position will supervise the other clerks presently employed in the Crime Lab including those in the O/L Photo section.

STATE OF ALASKA

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

FINANCE DIVISION
POUCH WF-STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3795

MEMORANDUM

Date: February 11, 1983

To: Albert P. Adams, Chairman
House Finance Committee

From: Robert F. Schroeder, Fiscal Analyst
Legislative Finance Division

Subject: HB 33 State Trooper crime laboratory and office facility

To put the size of this project into perspective, the proposed building would be slightly larger than the combined square footage of the fourth and fifth floors of the state capitol building which contain approximately 14,500 square feet on each floor (this includes halls, elevator area, stairway and lavatories). The information provided by the Department of Public Safety shows the proposed facility will provide a 30,000 square foot building with 17,000 sq. ft. allocated for office and laboratory space for a full-service statewide crime lab. The other 13,000 square feet will house the Trooper and Fish & Wildlife enforcement posts, a three bay garage, an indoor shooting range and the metropolitan drug enforcement unit.

By using the fiscal note provided by the Department of Public Safety and dated January 25, 1983, in combination with the capital project proposal on pages 62-73 of the Department's capital budget the costs can be prorated by user and function as follows:

	<u>Crime Lab</u>	<u>AST + FWP Posts</u>	<u>Metro Unit</u>	<u>Total</u>
construction costs	3,366.0	1,210.0	220.0	4,796.0
DOT/PF overhead, architect, planning, contingency fund, etc. (30%)	1,033.2	371.4	67.6	1,472.2
commodities	71.0			71.0
equipment	859.0	37.5		896.5
Subtotal	5,329.2	1,618.9	287.6	7,235.7
Inflation (12%)	636.5	193.4	34.4	864.3
Total	5,965.7	1,812.3	322.0	8,100.0

February 11, 1983

It appears that the amount of the budget pertaining to the constructing and outfitting of the crime lab is approximately \$6,000,000. This amount includes a 30 per cent assessment on construction costs for Department of Transportation and Public Facilities overhead, architect, planning, contingency fund, and other costs. It also contains an amount for inflation of 12%.

Project Description:

This facility will provide a 30,000 sq. ft. building which will include 17,000 sq. ft. of office space and specialized equipment to establish a full-service Statewide Crime laboratory, 11,000 sq. ft. of office space to house the local posts of the Alaska State Trooper and Fish & Wildlife Divisions, which will include a three-bay garage and three lane indoor shooting range and 2,000 square feet of office space of the Metropolitan Drug Enforcement Unit adjacent to the existing Tudor Road Public Safety Building in Anchorage.

Construction of this Capital Project will mark a major shift in direction for the Crime Lab from an Alaska State Trooper limited service lab to a full service professional Forensic Laboratory designated to serve all law enforcement agencies statewide.

on 1st floor of capitol bldg is 14,800 sq ft

Project Justifications:

NEED: STATEWIDE CRIME LAB

Within the last decade a series of Supreme Court decisions relative to search and seizure, interrogation and confessions has had the effect of limiting the scope of permissible investigative activities by law enforcement agencies. This situation, in turn, has resulted in the increased attention to the use of physical evidence in criminal investigations, and the subsequent development of crime laboratories to analyze this evidence throughout the nation. The application of the technologies and techniques of the natural and physical sciences to items of evidence found at a crime scene is an increasing part of modern investigations and courtroom trials. The expectation that these sciences are devoid of prejudice makes the results of crime laboratory tests and analyses an often critical part of judicial proceedings. It also confers upon crime laboratories the responsibility for the highest degree of professionalism in their work.
