## POSITION PAPER

Senate Bill No. 129

"An Act relating to cardiopulmonary resuscitation (CPR) instruction in the public schools."

This bill would amend AS. 14.30.360 (a) to add instruction in cardiopulmonary resuscitation (CPR) to health education programs which are encouraged by the state to be taught in public schools.

The Division of Public Health of the Department of Health and Social Services strongly supports this bill for the following reasons:

- 1) Numerous national studies have shown that if a victim of cardiac arrest receives basic CPR within four minutes of collapse and advanced cardiac life support within eight minutes, the victim has a good chance of survival;
- 2) CPR is the basic, initial recommended treatment for any condition resulting in cardiac arrest, including severe trauma, drowning, or electric shock;
- 3) Medical experts in the Division of Public Health believe that, if all able bodied citizens are trained in CPR, numerous lives can be saved each year; and
- 4) One good way to ensure that large numbers of citizens receive CPR instruction is to include it in school curricula.
