1 IN THE SENATE

BY THE TRANSPORTATION COMMITTEE

2 HOUSE CS FOR CS FOR SENATE JOINT RESOLUTION NO. 10 (Transportation)

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 FOURTEENTH LEGISLATURE - FIRST SESSION

5 Requesting that the Department of Natu-
6 ral Resources and the Department of
7 Transportation and Public Facilities
8 expedite the identification and estab-
9 lishment of rights-of-way for roads and
10 trails on federal Bureau of Land Manage-
11 ment plats which qualify under RS 2477.

12 BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

13 WHEREAS the Alaska National Interest Lands Conservation Act of 1980
14 placed 124 million acres of land in Alaska into 71 federal conservation
15 units, and outlined specific use requirements and restrictions for those
16 units; and

17 WHEREAS there was no provision for establishing or protecting a trans-
18 portation system in the development of comprehensive management plans for
19 each conservation unit by the responsible federal management agency; and

20 WHEREAS several of the comprehensive management plans have been com-
21 pleted without recognition of existing roads and trails, preventing public
22 access through these units to state and private lands and to state waters;
23 and

24 WHEREAS comprehensive management plans for a minimum of nine national
25 park and preserve units and five fish and wildlife refuge units are to be
26 completed during calendar year 1985; and

27 WHEREAS the federal statutory authority for the establishment of
28 recognized rights-of-way for roads and trails is contained in RS 2477 (43
29 U.S.C. sec. 932); and

1 WHEREAS the Department of Natural Resources and the Department of
2 Transportation and Public Facilities on September 28, 1984, signed a Memo-
3 randum of Understanding with the federal Bureau of Land Management involv-
4 ing the northern region of Alaska only, establishing the procedure under
5 which the rights-of-way could be recognized on Bureau of Land Management
6 plats and in comprehensive plans for conservation units;

7 BE IT RESOLVED by the Alaska State Legislature that the Governor
8 instruct the Department of Natural Resources and the Department of Trans-
9 portation and Public Facilities to immediately develop, in consultation
10 with other affected land owners and managers, and propose a Memorandum of
11 Understanding with the Bureau of Land Management relative to the remainder
12 of the state; and be it

13 FURTHER RESOLVED that the Governor instruct the state agencies in-
14 volved to affirmatively solicit information from miners, engineers, land
15 surveyors, environmentalists, outdoor groups, landholders, or other persons
16 or organizations that may have knowledge of the historic use of roads and
17 trails to assist the departments in the identification of those roads and
18 trails that could qualify under the provisions of RS 2477 (43 U.S.C. sec.
19 932) for addition to the state transportation system, and that may be
20 useful to the federal agencies developing comprehensive management plans
21 for the various Alaska National Interest Lands Conservation units; and be
22 it

23 FURTHER RESOLVED that the Governor instruct the involved state
24 agencies to develop draft policies regarding management, maintenance,
25 liability, vacation, categories, widths, and other relevant concerns
26 related to RS 2477 roads and trails, and that the agencies review these
27 draft policies with affected landowners and managers, and then present
28 these draft policies to the legislature during the second session of the
29 Fourteenth Alaska State Legislature.

STATEMENT ON

SJR 10 (FS 2477 Rights of Way)

By Senator John B. Coghill

Senate Resources Committee - February 22, 1985

Thank you, Madam Chair, for the opportunity to present a few brief comments on an issue of vital importance not only to my district, but to all of Alaska - the salvaging of rights-of-way established under the federal RS 2477 provision. I appreciate your committee's willingness to examine this issue and to, I hope, take prompt action on it.

Prompt action is our mandate in this issue, because as we see with each passing day, the access potential created by our pioneering forebears when they struck out over those roads and trails into the heartland of Alaska - that access so essential to continued progress in Alaska - is quickly being bureaucratically removed from our grasp by those who would lock up Alaska. Over the next two years we will see the formation of dozens of state and federal land use plans, all of which must acknowledge the validity of the RS 2477 rights-of-way within the areas they cover or those rights-of-way will likely be gone forever.

Alaskans need those rights-of-way. I think Congress knew what it was doing - back then - when it made provision for us to have access across federal lands. It is regrettable that we must now take this kind of virtually desperate action - to insist that the state and federal government enter into a cooperative agreement - to protect what is already ours and keep these rights-of-way on the books.

Thank you again, Madam Chair, for this committee's time spent on this issue. I hope the members will act favorably on SJR 10.

BACKGROUND INFORMATION ON R.S. 2477

BRIEFING PAPER

Alaska Department of Transportation and Public Facilities

Northern Region

Division of Planning

REVISED STATUTE 2477 RIGHTS-OF-WAY

Legal Basis for RS 2477

Congress by the Act of July 26, 1866 granted rights-of-way for highways over unreserved public lands, and by doing so, established an extensive network of public rights-of-way in Alaska. This Act, now codified as 43 U.S.C. 932, Revised Statute (RS) 2477, states in full:

"The right-of-way for the construction of highways over public lands not reserved for public uses is hereby granted."

Although RS 2477 was repealed October 21, 1976 by Public Law 94-579, section 706 (90 stat. 2793), those rights-of-way previously established remain valid.

Geographic and Historical Development

In Alaska, RS 2477 rights-of-way are concentrated mainly in the Interior, Western and Southwestern regions of the state and in the Copper River basin. In Southeastern and along the Southcentral gulf coast, RS 2477 was not as important to transportation because of the accessibility via water.

RS 2477 highways have provided much of the access to areas of Alaska in the past and continue to do so. Historically, these roads were used for trade routes and access to mining areas. Today, they serve as access for mineral development, forestry, recreation, agriculture, hunting, fishing, inter-village travel, and access to homesteads, homesites, and other land disposals. Most of the well established, frequently traveled trails appearing on U.S.G.S. topographic maps are RS 2477 highways.

Since the RS 2477 statute was written in such a brief and nonspecific manner, it does not establish criteria for determining the location or width of the rights-of-way nor does it define what constitutes a "highway." What was considered a "highway" 118 years ago when the law was passed differs greatly from the modern concept. Further, a procedure for identifying and claiming rights-of-way was not established.

At this time, there is confusion and differences of opinion regarding the location, validity and extent of RS 2477 highways in Alaska. Although RS 2477 highways exist in several states, this issue has taken on special significance in Alaska because of the remoteness and inaccessibility of much of the state.

Additionally, the Alaska Statehood Act, the Alaska Native Claims Settlement Act (ANCSA), and the Alaska National Interests Lands Conservation Act (ANILCA) all initiated major changes in land ownership in Alaska. As land is transferred from the Public Domain to the State, Native corporations, private individuals, and other Federal agencies, there is a diversity of views regarding access and land management policies. Some landowners wish to regulate use by type of vehicle, weight, time of year, etc. Some favor preserving

PREPARED BY
MANAGEMENT
JUL 23 10 21 AM '04
HISTORICAL

access for local residents. Others prefer no access at all. Furthermore, as land is conveyed, the validity of RS 2477's is being questioned. Currently, in land conveyance documents, RS 2477 rights-of-way are protected only with the clause, "valid existing rights," with no visible evidence of them on the Federal or State land status plats. The existing Trail Inventory File, which catalogs many RS 2477 roads, is at a scale of 1:250,000 (standard U.S.G.S quad map) and does not show the location of RS 2477's in sufficient detail to allow them to be entered on the land status plats.

Need for Procedures

Confusion among State and Federal agencies and private landowners as to the implementation of RS 2477 continues to hinder management and use of these highways. It has become apparent that the public requires assistance in identifying RS 2477 roads. State, Federal and local governments, Native corporations, and other property owners need to know the location and authorized uses of RS 2477 roads in order to reasonably manage their lands.

For rights-of-way, land selection, land claims and other land transfer actions, land status plats serve as part of official records of land ownership for both the Federal government (through BLM) and the State government (through DNR). It is in the State's and the public's interest to establish these RS 2477 claims on both State and Federal land status plats, thereby asserting the RS 2477 claim and identifying its location. Placing the roads on the status plats would give more credibility to the State's claims and would establish, for the record, both a file and a geographic document asserting the claims. Thus, when land is conveyed, the State and public RS 2477 claims would be much more viable than simply a "valid existing rights" clause in a conveyance document. The location of each trail would be generally established, therefore it would be obvious to anyone researching land status that a right-of-way claim exists across a particular parcel.

If the State documents its claims, other parties are put in the position of challenging the State's claim rather than vice versa. Presently, the State would have to prove "valid existing rights," on conveyed land. If the trails were already on the status plats, anyone who disagreed would be in the position of challenging the State's claim. Asserting an RS 2477 claim in this manner is only an administrative determination since BLM does not adjudicate RS 2477 claims. If someone were to challenge the State, the State's claim would still have to be proven in court; however, we certainly would be in a much better position to do this.

Other Findings

Discussions with DNR personnel in Anchorage who had been investigating regulations and court decisions relating to RS 2477's revealed the following points:

- 1) It appears that the definition of what constitutes a "highway" (which is the term used in the statute), is a matter for each state to determine. In Alaska, AS 19.45.001(8) defines a highway as that which "...includes a highway (whether in the primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure or other similar or related structure or facility, and right-of-way thereof..."

2) DOT&PF has management authority on RS 2477 where they occur on non-state land. Where RS 2477's occur on state land, DOT&PF has concurrent authority with the state agency having management authority over the land (usually DNR).

3) The courts have held that acceptance of an RS 2477 does not "impose on the public authority the duty to maintain." Therefore, a perfectly valid management decision might be to provide little maintenance or not to maintain a particular trail at all. Additionally, lack of maintenance over the years does not imply abandonment.

4) There are contradicting legal opinions regarding use restrictions, right-of-way vacations, and the role of a local government (ie. boroughs) in the management of RS 2477's.

Task Force on RS 2477

This issue was discussed at the Annual Meeting between the Bureau of Land and Regional Management (BLM) Fairbanks District Office and DOT&PF Northern Region on April 27, 1984. At that meeting it was decided to form a regional "task force" to discuss the situation. The Alaska Department of Natural Resources (DNR) was invited to join.

The Task Force on RS 2477 rights-of-way held its first meeting June 15, 1984. BLM, DNR and DOT&PF were present. The meeting established guidelines and procedures for asserting RS 2477 claims and having them established on the land status plats. The procedure is as follows:

- 1) A claim can be asserted by the State or any private individual.
- 2) A cover letter asserting a claim or accepting an RS 2477 grant must be submitted along with documentation supporting the date claimed. The date should preferably be based on expenditure of funds (public or private) or the earliest known date of public use. (An individual's time in constructing a road could be "translated" into funds).
- 3) A map at a scale no smaller than 1:63,360 depicting the route must be submitted with the supporting documentation and cover letter.
- 4) The trail number and quad number from the existing Trail Inventory File should be noted (if applicable) for clarification and cross-reference.
- 5) BLM will review each claim to verify that the land was "unreserved public land" as of the date claimed.
- 6) BLM will issue a serial number and establish a case file for each claim, as will DNR and DOT&PF. All correspondence should reference these numbers.
- 7) BLM will plot each trail claimed on their Master Title Plats and DNR will plot each one on the State's land status plats.
- 8) In order to prevent confusion, either DNR or DOT&PF will have the responsibility of submitting all necessary information to BLM.
- 9) All files, including maps, supporting data, etc., established by one agency should be duplicated and forwarded to the other agencies.

RS 2477 Coordination Committee for Northern Alaska

To provide a orderly manner for claiming RS 2477's and to avoid duplication of effort, the Task Force has suggested establishing an "RS 2477 Coordination Committee for Northern Alaska." This committee would consist of representatives from BLM, DNR and DOT&PF. Its purpose would be to coordinate and

prioritize efforts on asserting RS 2477 claims, to discuss any areas of disagreement and to keep each agency informed on the other agencies' efforts.

RS 2477 Management Review Board for Northern Alaska

Regarding the management of these roads, the Task Force has recommended establishing an "RS 2477 Management Review Board for Northern Alaska." This board would provide a forum to discuss differences relating to the management of RS 2477's. Problems which have come up in the past such as use restrictions, requests to vacate, and alignment, will continue. With contradicting legal opinions, an inter-agency forum for handling these issues would benefit all concerned and provide a multi-agency response to problems. Discussions could lead to possible solutions. Recommendation passed by this board would show a concerted effort by all agencies involved to provide thoughtful management actions. This would also provide one agency with the means to seek additional support in making a management decision. Additionally, any decision would be the result of the actions of several agencies rather than the decision of just one. DOT&PF as manager or co-manager of these roads would have veto power over any board recommendation.

Composition of this board would consist of two members from BLM, DNR and DOT&PF, with one member from the Citizens' Advisory Commission on Federal Areas and one invited member from a related professional organization (i.e., an officer of the International Right-of-Way Association). Temporary membership could be extended to governmental land managing agencies affected by matters under discussion and to private land owners affected. The board would meet as needed at the request of any board members.

Memorandum of Agreement

To implement the Task Force recommendations, a preliminary Memorandum of Understanding (MOU) between BLM, DNR and DOT&PF has been drafted. At this time, the MOU would exist only between BLM's Fairbanks District Office, DNR's Northcentral District, and DOT&PF's Northern Region. Northern and Interior Alaska is most affected by RS 2477 roads. Since the Fairbanks offices of these agencies have begun efforts, and established a precedent with the Bulenberg Trail, it was felt that an MOU at the District/Regional level would serve as a "testing area" for this procedure. Also, the archives of the University of Alaska-Fairbanks are the largest in the state, making Fairbanks better suited for the historical research. Should this procedure succeed (as we are confident it will) then this MOU, or one similar, could be extended to other regions. A copy of the draft MOU is attached.

The participating agencies are in agreement that an effort such as this seems long overdue. It has the enthusiastic support of the BLM Fairbanks District Manager, Carl Johnson, who will be presenting this issue and the MOU concept to the BLM Advisory Council meeting on August 15, 1984 and to the Haul Road Meeting on August 23, 1984. It also has the support of the DNR Northcentral District Manager, Division of Land and Water Management, Jerry Brossia.

Program Needs

In order to complete this project, a commitment by DOT&PF and the other agencies is necessary. The prioritization and assertion of RS 2477 roads would be an ongoing process over several years (estimated 5 years for 100-150 trails). Historical research, personal interviews and preparation of maps are the

specific tasks needed for asserting the claims and having them plotted on land status plats. A rough estimate indicates that this effort would require approximately \$100,000 per year which would provide for the research of 20 - 25 trails per year. This estimate is based on the time and effort actually spent for the Bulenberg Trail acquisition.

In order to accomplish this, there are a number of alternatives for DOT&PF to consider.

1) Funding Sources

a) A current source of capital money is in the Bulenberg Trail Acquisition project which has \$95,000 remaining. This money was appropriated by the State Legislature for the purpose of acquiring the right-of-way of the Bulenberg Trail. DNR researched historical data and interviewed several people and asserted an RS 2477 claim. Since the right-of-way was secured in this manner (by DNR) most of the existing DOT&PF funds remains unspent. However, legislative action would be necessary to enable us to use the money on other trail acquisitions.

b) An item could be included in the FY 86 CIP Submittal which would change the existing Bulenberg Trail legislation and appropriate additional funds.

c) The RS 2477 activities could be included in the FY 86 DOT&PF operating budget as contractual and/or personal services.

2) Organization/Staffing

a) Should in-house staff be used, this project could be handled by either Planning, Right-of-Way or Special Projects. The decision of which group(s) to use would depend upon the manpower available and the funding levels of each section.

b) An alternative is to contract this project out to an independent firm which would prepare maps and research historical data for our use. This would require project management within DOT&PF.

c) Another alternative is a cooperative agreement with the University of Alaska-Fairbanks, using a Reimbursable Services Agreement (RSA). A university student could research historical data and provide the map(s) for the trails. This alternative has the advantage that DOT&PF would have more direct control over the person(s) doing the work. In addition this would probably be the least expensive alternative. Since this work is not so much difficult as it is time consuming, this project would be ideal for a student.

Recommendations

The MOU between BLM, DNR and DOT&PF should be reviewed and signed so this project may begin in a timely manner. First it must be decided whether

DNR or DOT&PF shall have the responsibility to submit the supporting documentation to BLM.

We recommend that DOT&PF seek a revised program change from the interim legislative committees to use the Bulenberg Trail appropriation for RS 2477 right-of-way acquisition. This amount could be used for the first year's work, beginning in FY 85.

Further, we recommend that an agreement with the University of Alaska-Fairbanks be entered into to establish a cooperative arrangement with a graduate level student(s) to research the historical data for the trails and possibly to provide the maps needed.

The Coordination Committee should be appointed and meet promptly to establish the "first priority" trails so that the first efforts will begin with inter-agency cooperation.

Adequate funds should be budgeted in the FY 86 Capital and Operating Budgets to continue this activity.

Citizens' Advisory Commission on Federal Areas

515 Seventh Avenue
Suite 310
Fairbanks, Alaska 99701
(907) 456-2012

TO: ALASKA LAND USE COUNCIL MEMBERS
FROM: CITIZENS' ADVISORY COMMISSION ON FEDERAL AREAS
RE: ~~RS 2477 RIGHTS OF WAY~~
DATE: SEPTEMBER 13, 1984

In 1866 the U.S. Congress passed a law entitled "An Act granting the right of way to Ditch and Canal Owners over the Public Lands, and for other Purposes." Section 8 of this act, which generally dealt with mining activities on the public lands, read as follows: "And be it further enacted, That the right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted."

This grant, more commonly known as Revised Statute (RS) 2477 (43 USC §932), was a standing offer by the Federal government until it was repealed with the passage of the Federal Land Policy and Management Act (FLPMA) of 1976. While RS 2477 is no longer the legal basis for the construction of new public highways, valid existing rights granted to the Territory, State and public of Alaska during the period of the act's efficacy are protected by FLPMA Section 701 and reaffirmed by ANILCA Section 1109.

There are perhaps 150 or more RS 2477 rights of way in Alaska, concentrated primarily in the interior, which were accepted directly by the public of the State and the Territory through actual construction and use. This is exclusive of the Section-line right of way dedicated by the State in AS 19.10.010, which legislation acts as formal acceptance of the grant offered. Informal acceptance, that which is accepted directly by the public through actual use, is an equally valid right recognized in case law on the subject.

On State owned lands, authority for the management of these public rights of way is vested in both the Department of Natural Resources (DNR) and the Department of Transportation and Public Facilities (DOT/PF). On Federal and private lands, DOT/PF has primary authority as the managing agency. This authority would extend to those ANILCA lands which were vacant and unreserved public lands during the period of time when the grant was in effect in the Territory and State. The Alaska Organic Act of 1884 was the legislation which brought United States law to Alaska, including RS 2477, and can be regarded as the date at which the grant became effective in the Territory.

In 1923 the Territorial legislature formally accepted the grant by dedicating all Section lines to be public highways with an

CITIZEN'S ADVISORY COMMISSION

easement of either 66 feet or 100 feet depending on the land status at the time of the dedication. Informal acceptance of the grant has occurred every time men cut their way through the wilderness during the gold rush in effect constructing public highways for all to use. Many years of use by succeeding fortune seekers, trappers, traders, subsistence users and recreationists along these routes has reinforced this legacy. Once granted and accepted, the vacant, unreserved public lands over which the right of way lies are severed from ownership by the federal government and pass to the Territory, the State or the public of those political entities.

The Alaska National Interest Lands Conservation Act (ANILCA) mandated the preparation of management plans for the lands added to the Conservation System Units (CSUs) created by that act. Unfortunately, both the Federal and State agencies have for the most part not adequately considered these public highways in the planning efforts now underway. Failure to confront the issue of RS 2477 has and will continue to do harm to the interests of the State, the Federal government and the Alaskan public.

Recently, a miner was arrested by Park Service personnel within the bounds of the Yukon-Charley National Preserve while moving a bulldozer along the Bulenberg Trail which both he and State officials claim is a valid RS 2477 right of way. The miner has patented and unpatented mining claims in the National Preserve to which he is guaranteed access by Section 1110 of ANILCA. These "guarantees" are honored by requiring miners and other traditional users of the lands in question to contend with considerable amounts of paperwork to receive permits providing access to these lands. This Commission believes that this system of permitting is contrary to the spirit and the letter of the law where legitimate RS 2477s are involved. Formal recognition of valid RS 2477 rights of way by the various Federal agencies would simplify the problem of access and allow the use of a transportation system that has been in existence for over eighty years. The use of valid rights of way belonging to the State of Alaska should not be subject to the issuance of permits by Federal land managers.

This is clearly the intent of the Congress as evidenced by the report of the Senate Energy and Natural Resources Committee (Report #96-413; November 14, 1979; page 303): "Those private lands, and those lands owned by the State of Alaska or a subordinate political entity, are not to be construed as subject to the management regulations which may be adopted to manage and administer any national conservation system unit which is adjacent to, or surrounds, the private or non-federal public lands. Federal laws and regulations of general applicability to both private and public lands, such as the Clean Air Act, the Water Pollution Control Act, U.S. Army Corps of Engineers wetlands regulations, and other Federal statutes and regulations of general applicability would be applicable to

private or non-federal public land inholdings within the conservation system units, and to such lands adjacent to conservation system units, and are thus unaffected by the passage of this bill."

The State officials responsible for asserting the State's claims and managing these rights of way on behalf of the Alaskan public have been reluctant to do so. Perhaps this is due to a desire to de-polemicize the relations between the State and Federal governments since the passage of ANILCA. However, an absence of both a clear policy and the political will to follow through on such a policy is tantamount to a "de facto" abandonment of these rights of way. This Commission is implacable in its opposition to such an abandonment.

The Yukon-Charley National Preserve case involves more than the issue of access by RS 2477 and will be settled in a court of law. One thing is clear however, according to personnel in both the Alaska Department of Transportation and the Department of Natural Resources, the trail used in this instance is a valid, documented RS 2477.

The Citizens' Advisory Commission on Federal Areas proposes the formation of a work group or task force which will establish a procedure to confirm the State's RS 2477 claims. The Commission requests that the member agencies of the ALUC cooperate fully in the implementation of this proposal. Such cooperation would include agency acknowledgement of identified RS 2477 rights of way in the planning efforts of the CSUs, as well as adequate personnel and funding for the necessary research.

The Commission recommends that the Alaska Department of Transportation and Public Facilities and the Department of Natural Resources act as the co-lead agencies on behalf of the State in the task force. We recommend the Bureau of Land Management as the lead agency for the Federal government.

This matter is in urgent need of attention. Access to legitimate inholdings on the CSUs is not being adequately addressed despite the guarantees of ANILCA Section 1110. In the absence of a clear initiative on the part of the State, there is little the land management agencies of the Federal government are able or willing to do on the issue of RS 2477 while plans for the CSUs are being prepared. Timely action by the appropriate State agencies is necessary to ensure federal and private recognition of RS 2477 rights of way.

The Citizens' Advisory Commission on Federal Areas believes the ALUC is the proper channel through which this problem may be addressed. Formation of an intergovernmental task force will clear up some of the unanswered questions faced by private and public land managers.

SUPPORT

RESOLUTION #2-185

RESOLUTION PERTAINING TO ESTABLISHMENT OF RS 2477 RIGHTS-OF-WAY

WHEREAS, the development and production of natural resources in Interior Alaska is a significant element in the economic base of the Fairbanks community and the welfare of its inhabitants; and

WHEREAS, expansion of resource production is dependent on adequate access to areas in which resources are located; and

WHEREAS, access to a number of resource areas in Interior Alaska may become possible by the use of routes established in the past and which are included in the inventory of trails owned by the State of Alaska as asserted by Memorandum 00-2528, April 8, 1974, to the U.S. Bureau of Land Management; and

WHEREAS, the procedures for the assertion of RS 2477 Rights-of-Way by the State of Alaska has been established in a Memorandum of Understanding between the Alaska Department of Natural Resources (DNR), and the Alaska Department of Transportation and Public Facilities (DOTPF, and Bureau of Land Management (BLM), September 28, 1984, promulgated by the interior regional offices of these three agencies; and

WHEREAS, a coordinating committee comprising a representative of each agency (John Martin, DOTPF; Joseph Sullivan, DNR; Dwight Hempel, BLM) has been established; and

WHEREAS, the historical research, documentation and mapping required for the routes already inventoried and identification of trails not previously inventoried will require a significant effort and John Martin, DOTPF, and Joseph Sullivan, DNR, are investigating the manpower and funding requirements to accomplish this effort.

NOW THEREFORE, be it resolved by the Greater Fairbanks Chamber of Commerce that the implementation of RS 2477 Memorandum of Understanding dated September 28, 1984, AK-023-MU5-002, be strongly supported; and

BE IT FURTHER RESOLVED, that the State Legislature encourage this project by supporting adequate budget and/or priority assignment of personnel in DOTPF and DNR and similar support by given by the Federal Government to BLM; and

BE IT FURTHER RESOLVED, to encourage all organizations and individuals to develop and submit to DOTPF and DNR a list of priority routes known to them in Interior Alaska which will be of maximum benefit for mineral, agricultural, commercial and recreation and that routes which can support more than one of the above be given particular emphasis; and

BE IT FURTHER RESOLVED; that full consideration be given to the corridor concept, alternate established routes and to existing land rights of others, including private owners and the national interest lands, in identifying RS 2477 Rights-of-Ways; and

BE IT FURTHER RESOLVED, that copies of this Resolution be forwarded to:

Honorable Bill Sheffield
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Re: RS 2477 Rights-of-Way

Dear Governor Sheffield:

You will recall that the Citizens' Advisory Commission on Federal Areas in September proposed formation of a task force sanctioned by the Alaska Land Use Council (ALUC) which would establish a procedure for confirming the State of Alaska's claims to RS 2477 rights-of-way. Our specific proposal was withdrawn when Bureau of Land Management (BLM) State Director Mike Penfold revealed that the Department of Natural Resources (DNR), the Department of Transportation and Public Facilities (DOTPF) and the BLM were negotiating a Memorandum of Understanding (MOU) for the implementation of a procedure similar to the one we were proposing. The MOU was signed September 28, 1984.

Our proposal advised that a necessary element in the success of such an undertaking would be the cooperation of the member agencies of the ALUC in the implementation of any procedure developed. Such cooperation would include adequate funding and manpower for the research needed. At this time we must advise you that it is necessary that adequate funds be allocated to permit the State agencies involved, DNR and DOTPF, to meet their objective of identifying and confirming RS 2477 rights-of-way.

Management authority for RS 2477 rights-of-way which cross non-State lands is vested with the Alaska DOTPF. We recognize that there are legitimate management concerns espoused by Federal land managers, Native and other private landowners and environmental groups. Adequate opportunities for interested parties to plan for State management of these rights-of-way exist and can be expanded if necessary, but only if the State retains its present authority to do so.

You are no doubt aware of the rigorous permitting process that Title XI of ANILCA requires prior to construction of a Transportation and Utilities System (TUS) on or across a Conservation System Unit (CSU). Most knowledgeable people in and out of the State government regard this process as extremely difficult, if not completely unworkable. Because of the difficulties inherent

CITIZEN'S ADVISORY COMMISSION 2-26-85

Governor Sheffield
RS 2477
Page 2

in the Title XI process, it is critical that the management authority over, and State ownership of, RS 2477 rights-of-way be adequately recognized in the CSU planning efforts of federal agencies. Language recently adopted by the National Park Service (NPS) for inclusion in the General Management Plans that agency is preparing illustrates this:

"The Park Service is aware the State might assert certain claims of rights-of-way under R.S. 2477. The Service intends to cooperate with the State (and any other claimant) in identifying these claims, the nature, extent and validity of which may vary depending on the circumstances under which they were acquired or asserted. Notwithstanding that certain R.S. 2477 rights-of-way may exist, it will still be necessary for users of any right-of-way to comply with applicable Park Service requirements." (emphasis added)

This is so despite the assurances of ANILCA Section 1109 which states:

"Nothing in this title shall be construed to adversely affect any valid existing right of access."

We are painfully aware of the decline in State revenues and the necessity to minimize unessential expenditures. We are also aware that the economy of the State of Alaska is overly dependent upon the oil industry. The need to develop our resources in a rational manner to diversify our economy is more evident every day. The timber, mineral and tourist industries of the State must have access in order to expand. The rights-of-way granted the State through RS 2477 can play a vital role in this effort both as an alternative to Title XI and as leverage in securing more favorable decisions in Title XI and other resource management issues on federal lands.

We believe that it is of the utmost importance that the State of Alaska's ownership and management of these public rights-of-way be forcefully defended. By doing so, we can go a long way towards ensuring that debate over proposals to cross a CSU with a transportation system is managed here in Alaska rather than in Washington, D.C. As governor of our State, your support is necessary for the success of this endeavor.

Senate Joint Resolution #10 (SJR #10), sponsored by a bipartisan group of legislators, requests that DOTPF and DNR expedite the identification and establishment of rights-of-way for roads and trails on federal BLM plats which qualify under RS 2477. The Resolution also calls for the expansion of the current MOU, which presently applies only to the Interior region, into a statewide process. We endorse this resolution and urgently request that you give it your strongest support as well.

Governor Sheffield

RS 2477

Page 3

We also ask that you use the power of your office to insure that DOTPF and DNR receive adequate funding to implement an effective course of action pursuant to the objectives of SJR #10.

We reiterate our earlier acknowledgement that legitimate concerns by federal land managers, Native land owners and environmental groups exist. But these concerns over the management of RS 2477 rights-of-way are separate from the issue of ownership, and are more properly accommodated in the State transportation planning process. To allow management concerns to interfere with confirming ownership of the rights-of-way is to put the cart before the horse; it is analogous to requiring an "acceptable" land use plan to be in place before the State or the Native corporations can be issued a land conveyance.

We hope you will consider these points and see the interests of the State require positive action to preserve the full range of State prerogatives.

Sincerely,

Phil R. Holdsworth
Chairman

(907) 456-2012

March 1, 1985

SJR 10

MAR 5 1985

Representative Bette Cato
Pouch V
Juneau, Alaska 99811

Dear Representative Cato:

The Citizens' Advisory Commission on Federal Areas is concerned about the lack of recognition of Revised Statute (RS) 2477 rights-of-way in the Conservation System Unit (CSU) planning efforts of federal agencies. Development of land management plans which recognize valid existing rights-of-way under RS 2477 or other applicable laws benefits not only the State but the federal agencies and private inholders within CSU's as well. Recognition would facilitate the evaluation of access and transportation needs for a variety of activities.

On February 16th, the Commission approved several recommendations on RS 2477 including one endorsing adoption of Senate Joint Resolution (SJR) #10. Proposed by a bipartisan group of legislators, SJR #10 urges the Department of Transportation and Public Facilities and the Department of Natural Resources to expedite identification of RS 2477 rights-of-way pursuant to a Memorandum of Understanding developed by those agencies and the Bureau of Land Management.

We are convinced that this issue is critical to the future well being of the State. While recognizing that there are legitimate concerns espoused by private landowners, environmental groups and federal agencies regarding the management of RS 2477's, we nonetheless view management and ownership as separate issues. Opportunities exist for interested groups to participate in the planning for management of rights-of-way and can be expanded if necessary to accommodate their concerns. Ownership of an RS 2477 is not dependent upon a particular management strategy, to insist that it should be is analogous to requiring a declaration of management intent on the part of the State or a Native corporation prior to conveyance of its land entitlement.

We urge you to support SJR #10 and to assist DNR and DOTPF through the budgetary process in their effort to identify and document the existence of RS 2477 rights-of-way.

Sincerely,

A handwritten signature in cursive script that reads "Stan Leaphart".

OPPOSITION

RESOLUTION ADDRESSING PROPOSED PLOTTING OF R.S. 2477 RIGHTS-OF-WAY TO PUBLIC LAND RECORDS

WHEREAS, the State of Alaska and the Bureau of Land Management have entered into a memorandum of understanding to identify and plot RS 2477 rights-of-way to the public land records; and

WHEREAS, the Alaska Native Claims Settlement Act corporations are major land holders which may be severely impacted by this action without an opportunity to participate in the decisions; and

WHEREAS, the notation of the public land records may provide the State of Alaska with added weight, in the case of litigation of an RS 2477 right-of-way, without a factual basis; and

WHEREAS, neither the State nor the Bureau of Land Management propose to adjudicate RS 2477 rights-of-way under the terms of the memorandum of understanding; and

NOW, THEREFORE, BE IT RESOLVED by the Alaska Native Land Managers Association that the Alaska Native Land Managers Association opposes the plotting of RS 2477 rights-of-way to the public land records.

WE FURTHER REQUEST that the following actions be taken:

1. Alaska Native Claims Settlement Act corporations are actively involved in the identification process, and
2. The Bureau of Land Management and the State of Alaska establish clear standards of construction and use against which all RS 2477 rights-of-way are to be considered, and
3. The issue of abandonment is clearly defined and addressed, and
4. Each RS 2477 right-of-way is adjudicated by the Bureau of Land Management, and
5. An accurate centerline description is provided to the Bureau of Land Management prior to plotting, and
6. A case file is established which sets out the history of each RS 2477 right-of-way together with complete documentation of the timing, duration type and amount of use and location.

BE IT FURTHER RESOLVED that this resolution be forwarded to the Alaska Federation of Natives, the Bureau of Land Management, the State Department of Natural Resources, the State Department of Transportation and Public Facilities, Alaska's Congressional Delegation, and to all State legislators.

Duly adopted this 30th day of January, 1985, in Anchorage, Alaska.

LAND MANAGERS ASSOCIATION OPPOSITION

Tanana Chiefs Conference, Inc.

Doyen Building
201 First Avenue
Fairbanks, Alaska 99701
Phone (907) 452-8251

December 21, 1984

Mr. Mike Penfold
State Director
Bureau of Land Management
Box 13
701 "C" Street
Anchorage, Alaska 99513

Dear Mr. Penfold:

We recently received copies of a Memorandum of Understanding (MOU) between BLM's Fairbanks District, DNR's North Central District, and DOT/PF's Northern Region. The MOU states in its Purpose that federal, state and local officials need to know the locations of RS 2477 rights-of-way assertions in order to manage their respective lands. The MOU goes on to set procedures under which DOT and DNR will submit evidence supporting RS 2477 r/w assertions and BLM's Fairbanks District will plot these assertions on the Master Title Plate (MTP).

We believe this is a serious mistake on BLM's part and will only add more confusion to land management in Alaska. RS 2477 r/w carry much more uncertainty than just their location. There continues to be unanswered questions about their width, the allowed uses, degree of public use needed to establish a valid grant, abandonment, and maintenance. By recording the State's asserted claims on MTP's, BLM perpetuates these vagaries and even passes them on to the recipients of lands conveyed By DEM. It is BLM's responsibility to convey clear title to land and it is the State's right to seek legal remedies to whatever argument they have with such title. By placing such nebulous claims as RS 2477's on their records, BLM adds credence to unproved assertions and puts those who receive BLM conveyances in the position of having to defend their titles from the moment they receive them. A government title then becomes a sham since the basic rights of the owner aren't even defined by the agency conveying the title.

Prior to the MOU, DOT/PF prepared a briefing paper on RS 2477 r/w which states in part:

"If the State documents its claims, other parties are put in the position of challenging the State's claim rather than vice versa. Presently, the State would have to prove 'valid existing rights' on conveyed land. If the trails

TANANA CHIEFS OPPOSITION

December 21, 1984

Page 2

were already on the status plats, anyone who disagreed would be in the position of challenging the State's claim. Asserting an RS 2477 claim in this manner is only an administrative determination since BLM does not ~~adjudicate RS 2477 claims~~. If ~~someone were~~ to challenge the State, the State's claim would still have to be proven in court; however, we certainly would be in a much better position to do this."

Clearly the State's strategy is to cultivate doubt about titles to lands crossed by their asserted rights-of-way and to place the burden of proof on the patentee. BLM is promoting this strategy in your own Instruction Memo, AK-85-72 of November 28, 1984 stating that "the BLM does not need comment or concurrence from Native Corporations to note assertions on lands that it manages (including lands that are merely selected by such corporation)". Furthermore, that, "A Native Corporation is free to challenge the assertion, in court, after it acquires title".

The use of the word 'free' in this context is ludicrous. Native Corporations and individuals should be FREE from receiving clouded title to their lands after waiting 13 years, and FREE from having to defend their titles from assertions to nonspecific encumbrances.

By putting the State's assertions on MTP's, the BLM invites trespass by third parties such as miners, hunters and recreationalists. We believe that BLM, in effect, is creating the conditions whereby such trespass will certainly result. This would affect not only private lands but national parks, wildlife refuges, and wilderness areas, since the MOU covers "any land within the State of Alaska, ... both state and non-state lands".

Section 4 of the MOU cites a State court decision contrary to BLM Manual 2801 B.l.a., which requires actual construction, rather than mere use to establish a valid grant. We would like to know which interpretation will apply to federal lands? Since the MOU only names the Fairbanks District, we would like to know what the statewide procedures are and what your bureauwide procedures are. We would also like to know what weight these assertions have on lands already patented or IC'd, and on Native Allotments; whether they are pending, approved or certificated. We would also like to know if landowners affected by these RS 2466 claims are being notified by BLM of these assertions and being given an opportunity to submit material for these case files.

December 21, 1984

Page 3

These right-of-way assertions are going to cloud land titles all over the State and BLM's present course is only passing the problem on to those receiving BLM conveyances. It is BLM's responsibility to convey CLEAR title and to protect the integrity of selected lands under BLM's BLM management. To accomplish this BLM should seek a statute of limitations for asserting rights-of-way under RS 2477. There should be Federal regulations that clearly define the requirements to be met before a valid grant can issue, as well as the width of the right-of-way, the responsibility for maintenance, the allowed uses, seasonal use, cessation of use, notice and appeals. These rights-of-way will greatly affect the management and development of all our lands. Their requirements and rights granted must be no less clear than any other type of right-of-way and cannot be left to interpretation if a Federal land patent is to carry its weight as the beginning in the chain of title. Valid public access certainly needs to be protected, but in the present situation RS 2477 jeopardizes far more than it protects.

Sincerely,

TANANA CHIEFS CONFERENCE, INC.

Dan Alex, President
Alaska Native Land Managers Association
Pouch 6699
Anchorage, AK 99502

Dear Dan:

Enclosed are copies of a recent MOU between BLM, DNR and DOT/PF (in Fairbanks), and a DOT/PF briefing paper on RS2477 Rights-of-Way. I have serious objections to them from both a land title and a land management perspective.

To begin, RS2477 Rights-of-Way are rights-of-way which, if valid, are rights granted outside the statutory realm of ANCSA or FLPMA, i.e., 43 USC 932. Basically, if a right-of-way is to be determined valid, the land over which it crossed had to be vacant, unreserved, public lands at the time use began and there has to be a determination, (frequently in court if the landowner objected), that there was sufficient public use or expenditure of public funds, to qualify under the statute. If determined valid, the right-of-way width was usually ditch to ditch. The only entity with the authority to adjudicate these rights is a court of law, not the BLM.

What this means in practical terms is that these rights-of-way have never been identified in title documents granted to private landowners in this state or elsewhere in the lower 48 until the State of Alaska pressured BLM to insert these rights-of-ways in native conveyances. Since BLM cannot, by law, adjudicate these rights, they are considered assertions until they are proven.

If a trail or road crossed a private landowners property and the landowner questioned the public's right to use the trail, the owner may block the trail. If the user objects, he can take the landowner to court to protect his right of access, or vice versa.

The MOU, needless to say, was written without native input. It establishes a de facto adjudication process which places these rights-of-way on BLM's land status documents and ultimately in Native Land conveyances. The Native landowner has no opportunity to protest. The State, on the other hand, has gained another leg up on the private landowner by having these assertions of rights placed on the public land records and Native land title without

INTERIOR VILLAGE ASSOCIATION

Dan Alex
October 23, 1984
Page 2

an opportunity for complete adjudication in the proper forum. (Please read their briefing paper closely.) If the RS2477 assertion ends up in the land conveyance, the Corporation receives a clouded title document and faces potentially significant management problems.

The management problems can be significant. First, most of these RS2477 assertions are made on cold winter trails. With modern technology many people want to use these trails in the summertime, a period when it is impractical to use the trail in its winter location, so they begin to move this way and that to avoid the pot holes and permafrost areas creating new trails and often serious surface damages. This creates surface damage problems for the landowner. There is also a question whether the public has the right to use a winter trail in the non-winter months.

Secondly, as the DOT/PF briefing paper points out, even if an RS2477 is determined to be valid, the state has reserved the right to decline to maintain the rights-of-way. This leaves the landowner with continued resource destruction and the public using a potentially unsafe public right-of-way. In simple terms, the state wants this cake and eat it, too. I say that if they want the rights of ownership, they should accept the obligation to manage and maintain them!

My recommendation to the Native Land Managers is to consider these points and, if they agree, develop a strategy involving our congressional delegation and state legislators to remove these assertions from the public land records until proven valid in the proper forum and seek legislation that would require the state to accept management responsibility when they assert title.

Sincerely,

Paul C. Costello
President

Lavelle Black
Dept. of Interior
Alaska Program Staff (311)
18th and "C" Streets, N.W.
Washington, D.C. 20240

Dear Lavelle:

Here is the letter and enclosures we discussed today. As I indicated, they create problems in three related areas.

1). To begin, if I were a native landowner, I would be offended that BLM drafted such a document without any visible effort to involve the native community. As my lawyer friends would say, "It flies in the face of ANCSA."

2). Next, the MOU establishes a de facto adjudication of less than fee interests when BLM does not have the authority to adjudicate RS 2477 interests. The only forum to properly adjudicate them is with the landowner, or if that proves to be unsuccessful, in court. The only Federal land title to be prejudiced with these questionable assertions are native lands. In my experience I have never found a Federal patent in the Lower 48 which purported to adjudicate an RS 2477.

3). It represents land management philosophy at its least, i.e., the State would like title any way they can get it, but want "the right to refuse service" (maintenance) to anyone. This creates a conflict between the unsuspecting user and the landowner when a user attempts to use a damaged trail and finds that he cannot because of permafrost degradation, for example. He makes the choice of not going or just moving the trail over a bit to avoid the impassable section. Hence, he infuriates the landowner by destroying surface resources and trespassing. The user then faces an irate landowner, possible criminal charges and the State who chooses to do nothing. The Seventy Mile Trail in Eagle is a good example.

My solution is simple. Revoke the MOU and let the landowners and the State decide in the manner most practical which right is valid and who is responsible for that right. If a right is valid because there is a continuing public use and need, then let the State seek the funds to maintain the right-of-way on a case by case basis. BLM is helping neither themselves

nor the Native ~~community~~ nor, in the run, the taxpayers of this state, in trying to decide what is best for a situation that they have no legal obligation to be involved in.

I hope that ~~this~~ finds you well and enjoying the fall season in Washington. Give ~~my~~ regards to Bob.

Sincerely,

Paul C. Costello

Briefing Paper
MOU

PCC/bap

Northern Alaska Environmental Center

218 DRIVEWAY
FAIRBANKS, ALASKA 99701
(907) 452-5021

TO: Senate Resources Committee
Arliss Sturgulewski, Chair

FROM: Randy R. Rogers, Director, NAEC

SUBJ: SJR 10--R.S. 2477

Date: February 21, 1985

In September the Bureau of Land Management and the Alaska Departments of Transportation and Natural Resources signed a memorandum of understanding the full implications of which those parties are most likely not even aware. This memorandum establishes a procedure for placing formal assertions of R.S. 2477 rights-of-way by the state on both state and federal master title plats, signifying the legitimization of a state right-of-way.

The process of developing this agreement took place with absolutely no public involvement and, in fact, BLM would not even allow representatives of the Northern Alaska Environmental Center to review copies of the memorandum while in its draft stages. In addition to the lack of public involvement, representatives of the National Park Service, Fish and Wildlife Service, and native corporations, whose lands may be substantially impacted by this agreement, were not included on the committee that drafted the memo.

Revised Statute 2477 was originally established by the U.S. Congress in the Act of July 26, 1866. The entire, original statute provided:

"The right of way for the construction of highways over public lands not reserved for public uses is hereby granted."

This law was established at a time when automobiles and D-9 Cats did not exist and a "highway" referred to a wagon trail at most.

Because the law is so vague most of the parameters defining the actual use of R.S. 2477 have been established through case law. Yet, there have been very few cases in Alaska which define how the law applies within the state. Despite this lack of a conclusive definition, the memorandum of understanding uses what small body of law is available to establish criteria for the BLM to accept the assertions. This will result in placing the burden of legally challenging the application of the law on individual persons who disagree with the shaky BLM definition.

There are literally hundreds of historic trails in Alaska which could possibly be claimed under R.S. 2477. Many of these trails cross portions of conservation units and have the potential to severely compromise the purposes for which the units were established.

An example of one such trail is the Bielenberg Trail where a miner was arrested this fall when he moved mining equipment across the Yukon-Charley National Preserve to his mining claims on Woodchopper Creek. The miner contends that, because the route he was using is a public highway established under the terms of R.S. 2477 (a claim which has not been legally proven), he does not need an access permit from the National Park Service.

This case of trespass on NPS lands is now in court. Meanwhile, the State of Alaska has filed a formal assertion of this right-of-way with BLM under the process defined in the new memorandum of understanding, an action which jeopardizes NPS' position in court because of the R.S. 2477 policy of BLM. BLM, it should be pointed out, is an agency of the Department of the Interior, as is NPS.

Another controversy with regard to R.S. 2477 which is extremely disturbing involves Gates of the Arctic National Park. In February, 1984, the Department of Natural Resources sent a letter to NPS stating that, because the route of the Coldfoot Classic Sleddog Race lies on state-claimed R.S. 2477 rights-of-way and on navigable waterways, the organization conducting the race need not obtain a special-use permit from the Park Service.

This action regarding a sleddog race may be viewed as an innocent action, however, under the current state policy, or lack of policy, once the right-of-way is established it could be used for unrestricted mining access or other purposes which would be devastating to the wilderness resources of the park. In this instance, NPS responded to the state that the route would not be considered a valid right-of-way until legally proven through the courts.

This example further demonstrates the widely differing interpretations of R.S. 2477 by NPS and BLM. Although the agreement between BLM and the state is not intended to apply to lands not under BLM management, validation of the rights-of-way on BLM lands could establish a precedent that would be detrimental to legal challenges of their validity on NPS, Fish and Wildlife Service, native, or private lands.

In developing its R.S. 2477 policy, BLM has obviously not considered its ramifications to other land managing agencies, nor has it thoroughly considered how it will affect land under its own jurisdiction.

At the November 15, 1984, meeting of the Fairbanks District BLM Advisory Council, a BLM representative indicated that, if the state asserted an R.S. 2477 claim into the primitive portion of the White Mountains National Recreation Area, (which is closed to all off-road vehicle use) and the assertion met the criteria spelled out in the memorandum of understanding thereby ending up on the BLM master title plats, a miner could drive a D-9 Cat through the primitive area with no BLM approval required.

Many potential R.S. 2477 routes are important for their recreational use but their status as such is unclear because of the confusion surrounding R.S. 2477. Two primary examples are the Chena Hot Springs Winter Trail and the Circle-Fairbanks Historic Trail.

In July, 1982, the state acknowledged that the Chena Hot Springs Winter Trail has standing as an R.S. 2477 right-of-way yet refused to protect the trail's recreational properties because it is not a "main or significant arterial thoroughfare." When the Fairbanks North Star Borough discussed the establishment of the Circle-Fairbanks Trail as a recreation trail, the Department of Natural Resources indicated that, because the trail is identified as an R.S. 2477, they could do nothing to manage it for recreational purposes.

The importance of clearing up the R.S. 2477 issue is demonstrated by the fact that over 30 percent of recreational trails in the Fairbanks North Star Borough inventory are tentatively identified as R.S. 2477 rights-of-way by the Department of Transportation.

Equally disturbing as the recent developments with the R.S. 2477 issue is that, although the new agreement between the state and BLM defines a procedure for placing R.S. 2477 rights-of-way on land status plats, thereby legitimizing the claims, the involved state agencies are not certain who will be responsible for managing, maintaining or accepting liability for the roads. And questions such as what period of non-use constitutes abandonment of the rights-of-way, if the rights-of-way are restricted to historical types and seasons of use, and what width the rights-of-way are, remain to be answered.

The manner in which this major state and federal action has taken place is highly questionable. It is irresponsible land management on the part of both the BLM and the state to establish an agreement or take action to validate any of these possible rights-of-way before it is known what purpose they will serve, what effects they will have on management of surrounding lands, how they will be managed, and where the legal responsibilities lie. The need to delineate how R.S. 2477 will be dealt with in Alaska is clear, but a procedure to administratively approve the rights-of-way without public involvement, and prior to an adequate understanding of how they will be managed makes a travesty of safeguarding the public interest.

The state and BLM should abolish the existing memorandum of understanding, examine the basic legal, fiscal, and management responsibilities associated with the rights-of-way, and establish a new procedure for solving this dilemma which is accompanied with full public involvement and the participation of all affected land owners and managers.

BACKGROUND INFORMATION
AND
CONCERNS FROM VARIOUS SOURCES

MAR 24 1985

Honorable Arlis Sturgulewski
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

I have reviewed Senate Joint Resolution (SJR) No. 10 and do not resist your resolution to propose a statewide Memorandum of Understanding between the State of Alaska and the Bureau of Land Management regarding R.S. 2477 rights-of-way. I attended your Anchorage teleconference hearing held in Juneau on February 22, but did not testify as I wish to put my comments to you in writing.

In September of 1984, the Alaska Land Use Council (ALUC) was considering addressing the R.S. 2477 issue on a statewide basis. At that time, we were already working on a MOU with the State of Alaska covering the Fairbanks jurisdictional area. This MOU is now in effect. My proposal to the ALUC was to complete and use the Fairbanks MOU as a pilot project prior to executing a statewide agreement. I believe that it is now timely to address the issue on a statewide basis.

I have one major concern with your resolution in that it addresses other Federal lands (i.e. National Parks and Wildlife Refuges) but calls for an MOU with only BLM. If the State desires to include other Federal agency lands, it must negotiate separate agreements with the affected land agencies.

For purposes of clarification, it must be remembered that either noting or failure to note our records does not affect the validity of a R.S. 2477 grant. Since it is a matter of law whether the offer of grant was properly accepted, only a court can determine the validity of the grant.

We believe there are number of areas in the State where there are valid R.S. 2477's that do not meet "modern" access needs. Some of those rights-of-way are located in terrain where it will be extremely costly for the State to maintain a road in usable or environmentally acceptable standard. There are the areas where we need to work closely with Department of Transportation in location of new State rights-of-way to better serve the people of Alaska.

I realize the benefits to the public, BLM and the state in identifying and noting valid R.S. 2477's on BLM lands and am supportive of your efforts to inventory the State's transportation system. We stand ready to work with the State agencies on this matter.

Sincerely yours,

/s/ Michael J. Penfold
STATE DIRECTOR

MEMORANDUM OF UNDERSTANDING
BETWEEN ALASKA DEPARTMENT OF NATURAL RESOURCES AND
ALASKA DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES
AND
BUREAU OF LAND MANAGEMENT

PURPOSE

1. The purpose of this agreement is to establish the procedures for the assertion of RS 2477 rights-of-way by the Alaska Department of Natural Resources (DNR) and the Alaska Department of Transportation and Public Facilities (DOT&PF) to the Bureau of Land Management (BLM). Federal, state, and local officials need to know locations of RS 2477 public right-of-way assertions in order to assist such officials in their land and resource management decisions. The public needs to know the location of RS 2477 public right of way assertions to avoid unauthorized uses on private lands. This Memorandum of Understanding (MOU) will establish procedures that will enable RS 2477 rights-of-way assertions to be placed on land status plats.

BACKGROUND

2. RS 2477, formally codified as 43 U.S.C 932 (repealed by P.L. 94-579, Federal Land Policy and Management Act of October 21, 1976), provides:

The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

3. By regulation found in 43 C.F.R. 2802.5 (b), the Bureau of Land Management has provided:

In order to facilitate management of the public lands, any person or state or local government which has constructed public highways under the authority of RS 2477 (43 U.S.C. 932, repealed October 21, 1976) may file a map showing the location of such public highways with the authorized officer.

4. In Hamerly v. Denton, 359 P. 2d 121, 123 (Alaska 1961), the Alaska Supreme Court stated that the general rule regarding acceptance of the RS 2477 federal grant:

Before a highway may be created, there must be either positive act on the part of appropriate public authorities of the state, clearly manifesting an intention to accept the grant, or there must be public use for such a period of time and under such conditions as to prove that the grant has been accepted.

DOT-DNR / BLM M.O.U. 1

5. The United States Department of the Interior, Office of the Solicitor, stated in a memorandum dated July 7, 1983:

"[(T)he Department of the] Interior has long recognized that State law controls what constitutes a (R.S. 2477) highway within each state;" and

6. Alaska Statute 19.45.001(8) states:

"Highways includes a highway (whether included in the primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure and other similar or related structure or facility, and right-of-way thereof, and further includes a ferry system, whether operated solely inside the state or to connect with a Canadian highway, and any such related facility;" and

7. WHEREAS by statute, AS 19 SLA 1923; 123 SLA 1951; 35 SLA 1953; AS 19.10.010, the State of Alaska has accepted the RS 2477 grant.

8. The RS 2477 grant has also been accepted in many cases by actual public use or expenditure of public monies on unreserved public lands for highway purposes.

POLICIES AND PROCEDURES

9. DOT&PF shall have responsibility for asserting and for identifying and submitting maps to BLM of all RS 2477 rights-of-way established before October 21, 1976, identified on the list of state maintained highways. DOT&PF's responsibility under this paragraph includes both state and non state lands.

10. DNR or DOT&PF may identify, assert, and submit maps and evidence of use to BLM for all other RS 2477 rights-of-way established before October 21, 1976, situated upon any land within the State of Alaska.

11. DNR or DOT&PF shall accept evidence of use on any right-of-way established before October 21, 1976, from other state agencies, local governments, and members of the public. For all claims of RS 2477 rights-of-way which involve state land or provide access to state land or public water an ADL/LAS case file will be established.

12. DNR or DOT&PF may maintain duplicate sets of all files regarding RS 2477 rights-of-way. All newly created RS 2477 files, or any documents to be added to an existing file, will be duplicated and forwarded from one agency to the other.

13. All maps showing the location of RS 2477 rights-of-way established before October 21, 1976, submitted to BLM shall be the best maps possible but not of lesser detail than standard USGS maps a scale 1:63,360. Maps and supporting documentation shall be submitted by both agencies concurrently. The submission of such maps showing the location of RS 2477 rights-of-way on public lands shall not be conclusive evidence as to their existence. Similarly, failure to show the location of RS 2477 rights-of-way on any map shall not preclude a later finding as to their existence.

14. There shall be established an RS 2477 coordination committee in the Northern Region of Alaska composed of DNR, DOT&PF and BLM. The purposes for this committee are as follows:

(a) coordination of agency priorities for identifying, locating, and asserting RS 2477 rights-of-way;

(b) coordination of RS 2477 processing procedures for identifying, locating, establishing case files, making assertions, and platting claims on both federal and state land status plats; and

(c) coordination of requests made to and by the agencies.

15. Each assertion of the existence of an RS 2477 right-of-way made pursuant to this agreement and the submissions to BLM will be reviewed by BLM to ensure the land was unreserved public land as of the date claimed and was established prior to the repeal of the law on October 21, 1976. BLM will not adjudicate the validity of RS 2477 assertions.

16. BLM, DNR, and DOT&PF shall each issue a serial number and establish a case file for each claim made pursuant to this agreement. All correspondence shall reference all agencies' file numbers.

17. BLM shall plot each RS 2477 right-of-way asserted on their Master Title Plats when the following criteria are met (BLM Manual 2801.24 B.1, Rel. 2-152, 9/10/82):

1. Criteria for identification of R.S. 2477 Public Highways, include four elements:

a. In order for a valid right-of-way to come into existence, there must have been the actual building (construction) of a highway. Mere use, planning, or surveying, does not equal construction. However, construction may not have occurred all at once. Road maintenance often equals improvement, or even construction.

Increments of maintenance over several years may equal construction. When public funds have been spent on the road it may be a public road. When the history of a road is unknown or questionable, its mere existence in a condition adequate for public use may be evidence that construction has taken place.

b. A highway is freely open to everyone. Roads that have had access restricted to the public by locked gates or other means may not be public highways.

c. The construction of a public highway on unreserved public land must have occurred prior to October 21, 1976.

d. A State has to have a procedure to confirm the R.S. 2477 public highway right-of-way permit.

18. This MOU establishes the state's procedure to confirm the RS 2477 and thereby fulfills item d in paragraph 17 above.

19. DNR shall plot each RS 2477 right-of-way asserted on their land status plats.

20. Nothing in this Memorandum of Understanding shall obligate any party in the expenditure of funds, or for future payments of money, in excess of appropriations authorized by law.

21. Each party agrees that it will be responsible for its own acts and the results thereof and each party shall not be responsible for the acts of the other parties; and each party agrees it will assume to itself risk and liability resulting in any manner under this agreement.

22. Nothing in this MOU is intended to limit agency or individual rights to normal administrative or judicial appeal processes.

23. Nothing herein is intended to conflict with Federal, State or local laws or regulations. If there are conflicts, this agreement will be amended as soon as practical to bring it into conformance with conflicting laws or regulations.

24. It is understood by all parties that individual citizens may be entitled to assert rights-of-way under RS 2477 notwithstanding this agreement. Nothing in this Agreement shall affect the right of private citizens to assert rights-of-way under RS 2477 in conformance with applicable law.

25. The effective date of this agreement shall be from the date of final signature. The agreement shall remain in effect until the parties jointly agree otherwise.

Memorandum

To: Member of ALUC

From: State Director, Alaska

Subject: R.S. 2477 Issue Paper

Transmitted herewith is an issue paper which sets forth BLM's policy on R.S. 2477 rights-of-way. The policy has been altered enough in recent years to allow us to note these claims on our records provided the State takes the initiative and files an application for notation which meets the criteria set out in the issue paper.

In the absence of the State formally asserting its rights under the Statute, BLM has no choice but to consider the lands involved to be vacant public lands without established public access. BLM has had numerous discussions with the State concerning R.S. 2477 and the State is well aware of our policy and procedures.

Enclosed is a draft MOU between our Fairbanks District Office and the State of Alaska which is intended to facilitate the policy set out in the issue paper. Also enclosed is a copy of our BLM Manual section on R.S. 2477 and a copy of a Regional Solicitor's Office memorandum to the Bureau of Indian Affairs dated May 21, 1980.

The Fairbanks District Office and the State of Alaska, Department of Transportation and Public Facilities, Northern Region have been working on this Draft MOU for sometime now and have established a good working document which fits well within the constraints of our regulations.

Our first preference would be to have the cooperative State Federal work on R.S. 2477 started in Fairbanks proceed. However, we would not object to the Council taking this matter under its wing if this is what the State wishes. Under any circumstance, the State must clearly take the leadership role.

Michael J. Penfold
State Director

Enclosure (1) w/Exhibits I, II, and III

BLM POSITION

Issue Paper - R.S. 2477 Roads and Trails

Under DOI existing authority and policy, it is the responsibility of the State of Alaska to officially assert its claimed rights by filing applications for notation of such rights-of-way on our records. Such applications in addition to providing the information required to show the highway meets the four criteria set out below must provide a plottable description of the facility so that BLM's records can be properly noted.

The Act of July 26, 1866, R.S. 2477 (43 U.S.C. 932) provided:

"The right-of-way for the construction of highways over public lands not reserved for public uses, is hereby granted."

This statute, which was repealed by the Federal Land Policy and Management Act (FLPMA) of October 21, 1976, 90 stat. 2743, has been interpreted as granting a right-of-way for public use over public land without limiting the method of establishment of that right-of-way. The grant becomes fixed when a public highway is definitely established in one of the ways authorized by the laws of the State where the land is located.

The Act (R.S. 2477) did not specify the extent of the grant, the width of the right-of-way, or the nature of the right conveyed. Since the Department does not grant such rights-of-way, it has consistently held that it has no authority to adjudicate claims made under this Act. Therefore, acknowledgements of such claims have not been inserted in Federal Land Patents. The courts have held that reservation of an R.S. 2477 right in our patents is not necessary to validate or protect rights-of-way created under the statute.

In order to facilitate proper management of the public land, the Department has to have sound transportation plans. It is, therefore, necessary to identify all public roads in a given area. To facilitate such identification the Bureau of Land Management has recently been given authority to note claimed R.S. 2477 highways (roads, trails, etc.) on its official status plats, provided that requests for notation meet the following criteria:

1. In order for a valid right-of-way to exist, there must have been actual construction of a highway. Mere use, planning, or survey is not considered construction. However, construction of the highway need not have occurred all at once. Road maintenance often equals improvement and even construction. When the history of a road is questionable, its existence in a condition adequate for public use may constitute evidence that construction has taken place.
2. The highway is free and open to the public at large.
3. The construction of the highway on unreserved public land must have occurred prior to repeal of R.S. 2477 on October 21, 1976.
4. The State must have a procedure to confirm the R.S. 2477 public highway right-of-way grant.

Once the State application is received, BLM has the responsibility to assure that the lands covered by the claimed right-of-way were, on the date of establishment of the highway, unreserved public lands. If the information submitted by the State meets the four criteria above, BLM assumes (it does not adjudicate the claim) that the road is a bona fide R.S. 2477 highway. The BLM then acknowledges the State's claim and plots the right-of-way on its records.

Any uses other than for highway purposes within the boundaries of an R.S. 2477 right-of-way must be permitted by BLM by a separate right-of-way grant. It should also be noted that the R.S. 2477 grant extends only to the right-of-way itself, it does not include ancillary facilities such as material sources and stockpile areas.

The Fairbanks District of BLM is currently working on a Memorandum of Understanding with the State of Alaska, Department of Transportation and Public Facilities. This MOU is intended to facilitate notation of the State's claimed R.S. 2477 rights on BLM's official records.

BLM has no objection to elevating this MOU to State level if the Council so desires. However, even if the MOU is elevated to State level, BLM cannot by law or regulation note the State's R.S. 2477 claims to its records until the State DOT/PF files a formal request for notation accompanied by a plottable description and a date of appropriation. The initiative to begin the record notation process rests with the State.

Further, until the State officially identifies its claimed R.S. 2477 rights, so they can be noted on the records, Federal agencies have no recourse but to treat the lands involved as if they were free and clear of encumbrances. As an example, numerous contacts were made with the State of Alaska during the planning process on the Steese NCA and the White Mountains NRA. At no time has the State of Alaska identified any R.S. 2477 claims within these planning areas.

Instruction Memorandum No. AK-85-72
Expires 9/30/ 85

To: DM's and DSD's

From: State Director, Alaska

Subject: Notation of R.S. 2477 Right-of-Way Assertions on the Public Land Records

This memorandum is intended to supplement manual guidance on notation of R.S. 2477 right-of-way assertions. The BLM manual policy on notation of claimed R.S. 2477 is intended to facilitate BLM management of those lands it administers. BLM needs a sound transportation plan in order to effectively manage those public lands it administers; therefore, it is necessary to identify existing access routes on the Bureau's official records.

Notation of any particular R.S. 2477 assertion of right to these records is discretionary. The manual merely provides BLM a procedure of noting R.S. 2477 claims on its records, if BLM agrees that the assertions have at least potential validity. The manual procedure is not intended to force BLM to note assertions it believes to be questionable or invalid.

It should, however, be remembered that an R.S. 2477 grant is created by taking. The rights acquired thereunder attached immediately when the facility was first appropriated or constructed under the statute. Once a right-of-way is established under R.S. 2477, it may be abandoned only under procedures established by State law.

The BLM should work with the State of Alaska to identify those existing access roads and trails which may be potentially valid R.S. 2477 assertions. When BLM agrees that a right may exist (i.e. the assertion may be valid) under the statute, it should note the assertion on its official land status records. If BLM does not agree that the right may exist, the assertion should not be noted to the records. BLM's notation of a potential right does not validate an invalid assertion and its failure to note a valid assertion does not void such assertion. The actual validity or nullity of an R.S. 2477 assertion can only be determined by a court of competent jurisdiction.

If an R.S. 2477 is asserted on a road or trail historically used only as a winter trail and use begins to occur during the other seasons which causes environmental damage, BLM's recourse is to try to get the State to maintain the trail or for BLM to sue for damages on Federal lands. Seasonality of use should

BLM NOTATION MEMO

be defined by the type of use which existed at the time the trail or road was established or appropriated. The background and history of the trail may need to be checked to determine if use has been seasonal.

BLM will note potentially valid R.S. 2477 assertions only across lands which it administers. Notations will not be made on lands withdrawn for other agency use, unless BLM has an MOU regarding notation with that agency having jurisdiction over the land. Assertions of rights will not be noted on land which have been Interim Conveyed or Patented to a Native Corporation or Tentatively Approved or patented to the State of Alaska.

The BLM does not need comment or concurrence from Native Corporations to note assertions on lands that it manages (including lands that are merely selected by such corporations.) BLM is only acknowledging a claim of a valid existing right to such lands. Such an acknowledgment does not change the validity or invalidity of the right. The existence of such a potential right will not be cited in any conveyance document as an encumbrance. A Native Corporation is free to challenge the assertion, in court, after it acquires title.

BLM will not specifically reference an R.S. 2477 claim, assertion or notation in the deeds or patents it issues for any claim or entry made under the public land laws, unless the inclusion of a reference to such claim has been agreed to, in writing by all affected parties.

There may be situations where the State of Alaska may find it advantageous to acquire a right-of-way under Title V of the Federal Land Policy and Management Act in lieu of an R.S. 2477 notation. Patents for entries made after granting of a Title V right-of-way are made subject to the right-of-way.

It should also be noted that the BLM cannot impose restrictions or stipulations restricting the use of an R.S. 2477 road or trail for those purposes authorized by statute. Only the State can impose restrictions on such uses. However, R.S. 2477 did not authorize the construction of non-access facilities such as powerlines, pipelines, etc. Such facilities, if not covered by a granted right-of-way constitute unauthorized use.

In deciding whether to note an assertion on the BLM records, BLM may perform a field examination and/or prepare a report to substantiate its decision as to disposition of the assertion. However, such action is not required.

Subject: Rights of Way on Allotments --
R.S. 2477 and Other Access Questions

I. INTRODUCTION

A. Your Requests

Over the last twelve months you have directed three opinion requests to this office regarding access to and across Native allotments. Your first request (dated May 22, 1979) asked about the effect of Native occupancy on the establishment of section line road easements under R.S. 2477. Your second request (dated July 6, 1979) was for general guidance about the method for assuring access to landlocked Native allotments you had advertised for sale. You also asked if you have to disclose any access problems in your sale advertisement. With respect to R.S. 2477 easements, you asked whether a section line easement for public access would suffice for private access to an otherwise landlocked

The request was entitled "Effect of Statutory Reservations on Native Allotments" and was answered in a memorandum by Dennis Hopewell of this office, dated September 4, 1979. The section line easement question was specifically excluded from that response pending this reply.

①

BIA MEMO:

Exhibit III

allotment. Your final request (dated April 4, 1980) reduced to its essentials, asked whether the Indian right of way laws and regulations apply when the right of way on or through a certified allotment coincides with a surveyed section line easement arguably granted under R.S. 2477.

B. R.S. 2477 in Brief

R.S. 2477 is an 1866 Act "granting" highway rights of way over public lands in the following deceptively simple terms:

The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted. Act of July 26, 1866, c. 262, sec. 8, 14 Stat. 253.

This act was initially codified as Revised Statute (R.S.) 2477 and later as 43 U.S.C. 932. It was repealed by Section 706(a) of the Federal Land Policy and Management Act (FLPMA) of October 21, 1976, PL 94-576, 90 Stat. 2743, 43 U.S.C. 1701, et seq.

Your questions focus on the section line easements appropriated by the Territory and State of Alaska under this federal authorizing legislation. The State statute appropriating the section line easements is codified as Alaska Statute (AS) 19.10.010. However, the the R.S. 2477 grant includes other kinds of rights of way other than those appropriated under this statute. On the other hand, you should note that the R.S. 2477 grant is specifically limited to rights of way over "public lands." The latter point is significant, because it is our opinion that Alaska Native use and occupancy sufficient to qualify for a certificate of allotment is also sufficient to withdraw the land occupied from "public land" status.

Finally, the State's acceptance of the R.S. 2477 grant along section lines has had an on-again, off-again history that must be taken into account when determining whether the easements granted under R.S. 2477 have ever been accepted by the State. Thus, the answers to your questions require some background in the meaning of the term "public lands" and in the history of the application of R.S. 2477 in Alaska. In order to give some direction to that discussion, however, we have provided short answers to each of the questions posed in your opinion requests.

II. SHORT ANSWERS

A. May 22, 1979 Request

We agree with the conclusion expressed at page 2 of your opinion request about the effect of Native use and occupancy on the establishment of a section line easement. However, we would state your conclusion more definitely: ~~If~~ use and occupancy were initiated ~~after survey of the section line~~ ^{if} then the section line easement is superior to the allottee's rights and a right of way across the allotment does not require the consent of the allottee or a grant from the United States. If use and occupancy began any time before the survey, then the easement can only be granted with the consent of the allottee and according to the applicable Indian right of way laws.

B. July 6, 1979 Request

We know of no principle requiring you to disclose whether or not there is access to advertised parcels; furthermore, otherwise valid section line easements can be used to provide private access, but they are also open to the public. Under some circumstances, however, easements by necessity can be implied across otherwise unencumbered lands to afford private access to landlocked parcels.

C. April 4, 1980 Request

Whether the Indian right of way laws apply to a Native allotment depends on whether the allottee commenced use and occupancy before or after a section line right of way was appropriated by survey.

III. DISCUSSION

A. R.S. 2477

1. History and Purpose of R.S. 2477

U.S. Supreme Court and Ninth Circuit cases have cast some doubt on whether R.S. 2477 applies in Alaska. A narrow reading of the U.S. Supreme Court's opinion in Central Pacific Railway Co. v. Alameda County, 284 U.S. 463 (1931), and the Ninth Circuit's later decision in U.S. v. Dunn, 478 F.2d 433, 445 (9th Cir. 1973) would indicate that R.S. 2477

was only a recognition of pre-existing rights rather than a grant of new rights. Strictly construed, this interpretation could mean that R.S. 2477 was never applicable to Alaska, since it was enacted in 1866, one year prior to the purchase of the Territory.

The Territorial and State cases, on the other hand, consistently characterize R.S. 2477 as "in effect, a standing offer from the federal government" for the grant of a right of way, Girves v. Kenai Peninsula Borough, 536 P.2d 1221, 1226 (Alaska 1975). Under this interpretation, the right of way has been held to come into existence upon the "acceptance" of the standing offer. See Berger v. Ohlson, 9 Alaska 389 (D. Alaska 1938); Clark v. Taylor, 9 Alaska 298 (D. Alaska 1938); United States v. Rogge, 10 Alaska 130 (D. Alaska 1941); State v. Fowler, 1 Alas. L.J. 7 (April 1963); Hammerly v. Denton, 359 P.2d 121 (Alas. 1961). Given the weight of authority in this jurisdiction and the historical reliance placed upon R.S. 2477 in Alaska as a source of rights of way across the public domain, we are unwilling to conclude that the statute has no applicability to Alaska. We suspect that if the question were squarely presented to the Ninth Circuit Court of Appeals it would agree.

It has been held that R.S. 2477 first became applicable in Alaska by the Organic Act of May 17, 1884, 23 Stat. 254, whereby Alaska first became an organized territory. Section 9 of that Act, among other things, provided that the laws of the United States be extended to the Territory of Alaska, U.S. v. Rogge, 10 Alaska, *supra* at 147. As noted previously, R.S. 2477 is construed as a standing offer from the federal government for the creation of a right of way, Girves v. Kenai Peninsula Borough, 536 P.2d, *supra* at 1226. Under this construction, it has been held that the offer can be accepted (and the right of way created) either (1) by a positive act of the state or territory clearly manifesting an intent to accept the offer, Hammerly v. Denton, 359 P.2d, *supra* at 123.^{2/}

^{2/} Accord: Wilderness Society v. Morton, 479 F.2d 942, 882 (D.C. Cir. 1973), cert. den'd. 411 U.S. 917.

or (2) ~~by~~ public use of the right of way for such a period of ~~time~~ under such conditions as to prove that the offer has been accepted, id.

Statutory acceptance of the grant, formal expression on the part of public officials of an intention to construct a highway or actual public construction of a highway may all constitute acceptance of the R.S. 2477 grant by the "positive act" of the appropriate public authorities. Thus, in Girves, supra, the Alaska Supreme Court held that AS 19.10.010 (establishing a highway easement along all section lines in the State) was sufficient to establish a right of way along the boundary of plaintiff's homestead coinciding with a surveyed section line. In Wilderness Society v. Morton, 479 F.2d 342 (D.C. Cir. 1973) - it was held that the State's application to the Bureau of Land Management to construct a "public highway" from the Yukon River to Prudhoe Bay, along with enabling State legislation, was sufficient to establish an acceptance of the federal grant. In addition, the actual construction or public maintenance of a highway may constitute acceptance. See Moulton v. Irish, 218 P.2d 1053 (Montana 1923), construction of highways; Streeter v. Stalnaker, 85 NW 47 (Nebraska 1901), public maintenance and improvement of highways.

Public use (sometimes called "public user") may also constitute acceptance of the grant in the absence of any positive official act. Whether any claimed use constitutes acceptance of the grant, however, is a question of fact to be decided by the court. It appears that continued and consistent use of a right of way across the public lands by even one person with an interest in the lands to which the road gives access may be sufficient to establish public user, State v. Fowler, 1 Alas. L.J., supra at 8 (April 1963). See also Hamerly v. Denton, supra at 125. However, the Alaska Supreme Court has held that mere desultory or occasional use of a road or trail does not create a public highway, id.³⁷

³⁷ Of course, it is no longer possible to accept the R.S. 2477 grant by any of these methods, because R.S. 2477 was repealed by FLPMA, supra, in 1976.

2. Allotments As "Public Lands"

By its terms, R.S. 2477 is only an offer for a right of way across "public lands." In discussing this term in the context of R.S. 2477, the Alaska Supreme Court has noted:

The term "public lands" means lands which are open to settlement or other disposition under the land laws of the United States. It does not encompass lands in which the rights of the public have passed and which have become subject to individual rights of a settler. Hammerly v. Denton, supra at 123.

Beginning with the 1884 Organic Act, previously discussed, Congress has specifically provided for the protection of lands used or occupied by Alaska Natives. Section 8 of the Organic Act provided in part:

That the Indians or other persons in [Alaska] shall not be disturbed in the possession of any lands actually in their use or occupation or now claimed by them but the terms under which such persons may acquire title to such lands is reserved for future legislation by Congress.^{4/}

Federal decisions have long recognized the statutory protection afforded Alaska Native use and occupancy. See, e.g., U.S. v. Berrigan, 2 Alaska 442 (D. Alas. 1904); U.S. v. Cadzow, 5 Alaska 125 (D. Alas. 1914). Departmental regulations and policy reinforce the statutes. See, e.g., 43 CFR §§ 2091.1(e), 2091.2-1, 2091.5, 2091.6-3; see also Government Appropriation of Rights-of-Way in Alaska, Opinion of the Associate Solicitor, Public Lands (M-36595, March 15, 1960, copy attached).

In analogous circumstances, the U.S. Supreme Court has consistently recognized that railroad land grants are not to be construed in derogation of Native use and occupancy

^{4/} Similar provisions appear in the following acts: Act of March 3, 1891, c. 561, 26 Stat. 1095, § 14; Homestead Act of May 14, 1898, c. 299, 30 Stat. 412, § 7; Act of June 8, 1900, c. 786, 31 Stat. 330, § 27.

rights. That is particularly true where those rights have been protected by treaty, Leavenworth L & GR Co. v. United States, 92 U.S. 733 (1875), or specific statutory exceptions, Buttz v. Northern Pacific Railway Co., 119 U.S. 55 (1886). See generally, Bardon v. Northern Pacific Railway Co., 145 U.S. 535, 540-543 (1892). Most significantly, the U.S. Supreme Court has specifically protected rights of individual Native occupancy against competing federal grants even in the absence of any statutory or treaty protections where those rights flow "from a settled government policy." Cramer v. United States, 261 U.S. 219, 229 (1923). Whether from the statutory protection afforded in the 1884 Organic Act and the other legislation specifically noted or from the settled government policy of protecting Alaska Native use and occupancy, we think it is clear that lands used and occupied by individual Alaska Natives are not "public lands" within the meaning of R.S. 2477 and that the R.S. 2477 grant cannot attach during any period of such occupancy.

3. Acts Accepting the R.S. 2477 Grant

(A) Section Line Easements. You have noted that AS 19.10.010 establishes rights of way of varying widths along the section lines in the State. As noted earlier, the Alaska Supreme Court has concluded this statute is a positive official act constituting acceptance of the R.S. 2477 grant, Girves, *supra*. The Territorial statute accepting the grant was originally enacted on April 6, 1923 (19 SLA 1923), but was subsequently repealed (perhaps inadvertently) on January 18, 1949. Op. Ak. Atty. Gen. No. 7 at 3 (December 18, 1969). The statute was subsequently reenacted in substantially its present form by the 1953 Territorial legislature (Act of March 21, 1953, 35 SLA 1953). *Id.* Thus, whether a section line easement has attached to Native occupied land must be viewed against the backdrop of the dates of Native occupancy and the dates during which Alaska's acceptance of the grant was in effect. The section line easements could only attach to lands not occupied by Natives between the dates of April 6, 1923, and January 18, 1949, and from March 21, 1953, forward.

Additionally, by the terms of the State statute, the acceptance is dependent on the existence of a "section line." In the Opinion previously noted, the State Attorney General also concluded that for the R.S. 2477 grant to attach under the statute, the "public lands must be surveyed and section lines ascertained," *id.* at 7. We agree with this conclusion; therefore, you must also determine whether

the lands in question were subject to individual Native use and occupancy on the date the section line was actually surveyed.

(B) Other Official Acts of Acceptance. As noted earlier, other official actions (i.e., construction, repair, dedications, etc.) can constitute official acceptance of the R.S. 2477 grant. Whether such official action has created an R.S. 2477 right of way will have to be determined on a case-by-case basis.

(C) Public User. Rights of way claimed to have been created by public use must also be determined on a case-by-case basis. On the one extreme, an obvious public road established prior to Native use and occupancy would certainly be sufficient to constitute acceptance of the R.S. 2477 grant; see State v. Fowler, 1 Alas. L.J. 7, supra. On the other extreme, it is equally clear that desultory or occasional use of a road or trail by individuals having no interest in the land to which they obtain access is not sufficient to create an R.S. 2477 right of way, Hamerly v. Denton, supra. Whether a given use is sufficient to constitute acceptance of the R.S. 2477 grant, may have to be determined judicially in all but the most obvious cases.

4. Widths

By State statute, section line easements on "public lands" are four rods (66 feet) wide with the section line as a center of the dedicated right of way.^{5/} Other official

^{5/} The Attorney General also concluded that the R.S. 2477 grant attaches on the date the "protracted surveys" were published in the Federal Register. We do not agree with this position; as a practical matter, the protraction diagrams are not a reliable means of ascertaining the correct position of the surveyed section line.

^{6/} A right of way 100 feet wide is granted between sections of land owned by or acquired from the State. Since Native occupied lands could not fall within this category, section line easements on Native allotments will be confined to the 66 foot width.

acts could conceivably establish larger rights of way. Rights of way established by public user appear to be confined to the width actually used, State v. Fowler, supra.

3. Other Access Questions

1. Obligations To Provide Access

We do not believe either the allottee or the United States is obligated to provide a warranty of access to the purchaser of an allotment. By statute (AS 34.15.030) Alaska has incorporated the common law covenants for title into any deed which by its terms "conveys and warrants" real property to another. Thus, a deed substantially in the statutory form includes implied warranties that at the time of the conveyance the grantor: (1) is lawfully seized of the estate in fee simple and has the right and power to convey the premises; (2) that the premises are free from encumbrances and (3) that he warrants quiet enjoyment of the premises and to defend the title against all persons claiming the premises.

You have advised that you use a special warranty deed to convey restricted Indian lands. As you know, a special warranty deed limits the grantor's obligation to defend only against claims arising through him. It does not require the grantor to defend against claims arising through other persons, 21 CJS "Covenants" § 49. Except as so limited, we believe the deed form you used includes all of the statutory covenants implied by AS 34.15.030. None of these, however, include a covenant of access to the land granted. See generally, Powell on Real Property, ¶ 904, et seq. (1968 edition). Furthermore, AS 34.15.030 specifically provides: "No covenant is implied in a conveyance of real estate, whether the conveyance contains special covenants or not." We interpret this to mean that unless there is a specific covenant of access, the grantor is not obligated to provide it.

2. Easements By Conveyance Or Covenant

In spite of the protection this doctrine affords both the United States and the allottee, we recommend that as a prudent land manager you advise the allottee to provide whatever access it is within his power to provide incident to the sale of an allotment. That is especially true if, as in one case you described to us, the allottee is selling a

portion of the allotment which would be landlocked by the remaining lands of the allottee or others. In these circumstances, we advise you to insure that appropriate access is guaranteed through the allottee's other lands either by covenant or specific grant of easement. See generally, Powell on Real Property, ¶ 407 and 408. See also, 28 CJS Easements, § 25, et seq. Conversely, if the allottee's other lands will be landlocked by conveyance of a portion of the allotment to a third party, the allottee should insure that he is reserved an easement in the lands granted. See 28 CJS Easements, § 29. Under these circumstances, failure to provide or obtain access at the time of conveyance could result in later litigation to establish an easement by necessity.

3. Easements By Necessity

Easements by necessity are implied easements across otherwise unencumbered tracts where necessary to afford access to an otherwise landlocked parcel. See generally, Powell on Real Property, supra, ¶ 410. This doctrine comes into play only where there is a unity of ownership between the dominant and servient parcels at the time the landlocked (i.e., dominant) parcel was severed from the rest of the estate. The doctrine would apply to both examples discussed above where the grantor conveys a portion of the allotment thereby isolating either the land conveyed or the grantor's retained lands. In these circumstances, the courts have construed the intention of the parties to create an easement of necessity across the servient estate to provide access to the landlocked (i.e., dominant) estate.

As applied in this jurisdiction, the doctrine only requires proof of reasonable (as opposed to absolute) necessity in order to imply an easement. U.S. v. Dunn, 475 F.2d 443, 446 (9th Cir. 1973). Although the easement must be something more than a mere "convenience," it is not necessary to show that it is the only means of access to the property. In any event, the determination of whether the easement is a "reasonable necessity" is a fact question which involves considerations of public policy as well as the intent of the parties and the reasonable utilization to be made of the landlocked parcel. See generally, Powell on Real Property, supra, ¶ 410.

The doctrine has also been applied to Indian lands in this jurisdiction, cf. Superior Oil Co. v. United States, 353 F.2d 34 (9th Cir. 1965). The oil company in this case

sought to obtain an easement to move heavy oil drilling equipment across Indian reservation lands in order to drill on lands owned by a mission society and leased to the oil company. The mission society had previously been granted the land by the United States under a statute permitting such grants to religious organizations engaged in mission or school work on Indian reservations. The court concluded that although the mission society had an easement by necessity for mission purposes, the scope of that easement could not be expanded to accommodate the purposes of the oil company. We know of no principle which would preclude an easement of necessity from attaching to lands merely because they are Indian trust or restricted lands where the easement of necessity doctrine is otherwise applicable. See also, U.S. v. Clarke, 529 F.2d 984 (9th Cir. 1976), aff'd U.S. _____, (No. 78-1693, March 18, 1980).

IV. SUMMARY

This, of necessity, has been a rather wide-ranging opinion dealing with the several general concerns you raised regarding easements across Indian allotments. We will summarize some of our conclusions below for ease of reference.

A. R.S. 2477 Easements

R.S. 2477 easements can be created either by the positive acts of authorized authorities or public user of a right of way across the "public lands." Native used and occupied lands, however, are not "public lands." Therefore, a right of way under R.S. 2477 can only be obtained if, at the time the R.S. 2477 grant is accepted, the lands were not subject to the individual use and occupancy rights of an Alaska Native who has applied for an allotment.

B. Section Line Easements

Whether a section line easement supersedes Native use and occupancy depends on whether the Native use and occupancy preceded either the statutory acceptance or actual survey of the section line easement. If Native use and occupancy began prior to April 6, 1923, or between January 13, 1949, and March 21, 1953, then the easement could not be imposed on those lands by subsequent survey of a section line. If unoccupied lands were surveyed either between April 6, 1923,

and January 18, 1949, or after March 21, 1953, then the section line easement supersedes Native occupancy rights.

C. Guarantees of Access

Although there is no legal requirement to guarantee access to otherwise landlocked allotments, you would be well advised to counsel the allottees to provide access if it is within their power to do so. It is especially important to provide access where there is an initial unity of title in the allottee. Under these circumstances an easement of necessity can be imposed to benefit a landlocked parcel. Providing access at the time of the grant will avoid later confusion and possible litigation.

D. Public or Private Access

You should also be aware that any R.S. 2477 right of access (whether by section line easement or otherwise) predating Native use and occupancy is a right of public access. While it may also permit private individuals to have access to otherwise landlocked parcels, it also permits the public at large to use the right of way. Of course, that does not permit the public to trespass on the allottee's or anybody else's private property.

DATE: March 4, 1986
SUBJECT: RS 2477

Need for Signature on RS 2477 Letter

Enclosed for your signature is a letter to Assistant Secretary of the Interior Bill Horn. This letter is similar to the letter sent earlier to Senator Murkowski on RS 2477. If you wish to sign please put your initials by your name and the final will be given to you for your signature.

Also, a copy of the telegram sent to Senator Murkowski will be forwarded to the rest of the Congressional Delegation. If you do not want your name included, please let me know.

Background on RS 2477

Enclosed for your review are the following documents pertaining to RS 2477:

- 1) a copy of the telegram to Senator Murkowski,
- 2) a briefing paper,
- 3) a letter from Assistant Secretary of the Interior Bill Horn.

HONORABLE FRANK MURKOWSKI

UNITED STATE SENATE 709 HART BLDG

WASHINGTON DC 20510

DEAR SENATOR MURKOWSKI,

AS YOU KNOW, FEBRUARY 9TH, 1986 IS THE FINAL DATE FOR COMMENT ON NINE NATIONAL PARK MANAGEMENT PLANS. IT IS OUR UNDERSTANDING THAT THE DEPARTMENT OF INTERIOR INTENDS TO INCLUDE IN THESE PLANS MAPS OF HUNDREDS OF "RS 2477" RIGHTS-OF-WAY FOR POTENTIAL ASSERTION BY THE STATE. AS REPRESENTATIVES OF RURAL ALASKA WE ARE ALARMED BY THIS, AND ARE DEEPLY CONCERNED BY THE POTENTIAL IMPACTS THAT THESE INVALIDATED RIGHTS-OF-WAY COULD HAVE ON THE PUBLIC.

THIS SITUATION POSES A SERIOUS THREAT TO MANY RURAL PEOPLE WHO ARE IN-HOLDERS OR OWNERS OF LAND ADJACENT TO THESE POSSIBLE ROADS AND TRAILS. THESE LAND OWNERS ARE LIKELY TO EXPERIENCE SERIOUS PROBLEMS WITH TRESPASSERS AND LAND MANAGEMENT IF THE USE OF THE POSSIBLE RS 2477 RIGHTS-OF-WAY IS PROMOTED BY DEPICTING THEM ON MAPS

PAGE 2

IN THE PARK PLANS. WE BELIEVE THAT DESPITE ANY WRITTEN DISCLAIMERS ABOUT THE STATUS OF THESE ROUTES, INCLUSION OF THE MAPS IN THE PLANS WILL MISLEAD THE PUBLIC INTO THINKING THAT THESE ROUTES EXIST AND THEY CAN BE USED.

A PARK PLAN, LIKE ANY OTHER LAND MANAGEMENT PLAN, IS INTENDED AS A TOOL FOR RESOLVING OR AVOIDING LAND USE PROBLEMS. ACCORDINGLY, IT SEEMS POINTLESS TO INCLUDE THESE MAPS IF IT WILL ONLY SERVE TO CREATE MORE PROBLEMS THAN IT WOULD RESOLVE.

THE INCLUSION OF MAPS DEPICTING POTENTIAL RS 2477 RIGHTS-OF-WAY IS ESPECIALLY DISTRESSING BECAUSE THE LEGAL UNCERTAINTIES AND PRACTICAL QUESTIONS SURROUNDING RS 2477S ARE SO GREAT, AND BECAUSE IT IS THE STATE AND NOT THE FEDERAL GOVERNMENT WHO BEARS THE COST ASSOCIATED WITH RESOLVING THESE QUESTIONS. IN ADDITION IT IS THE STATE AND NOT THE FEDERAL GOVERNMENT WHO MUST ASSUME ANY MANAGEMENT RESPONSIBILITIES FOR THESE RIGHTS-OF-WAY.

FURTHER WE OPPOSE THE INCLUSION OF THESE MAPS IN THE PLANS BECAUSE, AS WE UNDERSTAND IT, THE RS 2477 RIGHTS-OF-WAY THAT ARE DEPICTED ARE BEING INCLUDED DESPITE A LACK OF SUFFICIENT INFORMATION TO DOCUMENT THEIR EXISTENCE.

WHILE WE HAVE NO OBJECTION TO IDENTIFYING AND PROVIDING ACCESS WHERE ACCESS IS APPROPRIATE, WE DO NOT BELIEVE THAT THE APPROACH THE DEPARTMENT OF THE INTERIOR IS TAKING IS HELPFUL. GIVEN THAT THE STATE

PAGE 3

AND NOT THE FEDERAL GOVERNMENT BEARS THE COST OF MANAGEMENT AND VALIDATION OF THE ASSERTIONS, IT SEEMS THAT THE PROCESS OF DECIDING WHEN AND HOW TO ASSERT RS 2477 RIGHTS-OF-WAY SHOULD ONLY PROCEED AFTER PUBLIC REVIEW.

IN ADDITION, IT IS OUR VIEW THAT WITHOUT THESE MAPS THE STATE HAS NOT LOST ANY OPPORTUNITY TO ASSERT ONE OF THESE RIGHTS-OF-WAY AT A LATER DATE IF IT SO CHOOSES. HOWEVER, BY INCLUDING THESE MAPS, RURAL ALASKANS AND NATIVE LAND OWNERS WILL BE PUT IN A POSITION OF UNNECESSARY RISK.

THESE CONCERNS ABOUT RS 2477 RIGHTS-OF-WAY HAVE BEEN VOICED BY THE ALASKA FEDERATION OF NATIVES, NORTHWAY NATIVES INC., COOK INLET REGIONAL INC., BETHEL NATIVE CORP, EVANSVILLE INC., AHTNA INC., AND OTHERS. FOR THIS REASON, WE BELIEVE THAT THE INCLUSION OF THESE MAPS IN THE PLANS WOULD EXHIBIT A BLATANT DISREGARD ON THE PART OF THE FEDERAL GOVERNMENT FOR THE CONCERNS THESE GROUPS HAVE RAISED.

AS OUR SENATOR, WE WOULD APPRECIATE ANYTHING YOU COULD DO TO PREVENT ANY MAPS FROM BEING INCLUDED IN THE NATIONAL PARK PLANS WHICH SHOW ANY INVALIDATED RS 2477 ROADS OR TRAILS.

THANK YOU FOR YOUR HELP AND YOUR CONCERN.

REP. JACK FULLER, CHAIRMAN BUSH CAUCUS,

REP. KAY WALLACE, REP. ADELHEID HERRMANN, REP. BETTE CATO, REP. BEN GRUSSENDORF, REP. JOHNE BINKLEY, REP. AL ADAMS, SEN. FRANK FERGUSON, SEN. JOHN SACKETT, SEN FRED ZHAROFF.

BRIEFING PAPER ON RS 2477 - HIGHWAY RIGHTS OF WAY
Representative Adelheid Herrmann January 1986

Topic

The topic for discussion is 1) the program proposed by the DNR & DOT/PF for developing guidelines on the assertion of RS 2477 highway-rights-of-way, and, 2) the inclusion in national park and wildlife refuge plans of maps identifying approximately 1500 RS 2477 rights-of-way.

What Is RS 2477?

Revised Statute 2477 is a federal "highway" law enacted prior to the invention of the automobile and modern transportation systems. The law was enacted in 1866 in response to a widespread problem experienced by miners and homesteaders at that time. At that time, a federal law or regulation required anyone needing access across federal land to deal with Washington, D.C. directly. Without modern telecommunication systems, this process for granting access was finally viewed by Congress as an unnecessary delay to developing the western United States. To alleviate these delays Congress passed this law which stated in its entirety:

The right-of-way for the construction of highways over public lands is hereby granted.

In light of modern transportation and telecommunication systems Congress saw fit in 1976 to repeal this act. Nonetheless, a provision was included in the 1976 repeal honoring 'existing valid rights'.

In theory, under this repealed statute, if the state could prove that the public used an access route at the time the land was unreserved federal land, then the state is entitled to assert that the public has a right to access and that the state has management authority. However, because the enabling legislation was enacted prior to the advent of modern transportation networks, and provided nothing either in statute or in legislative history to guide the implementation of the act, any attempt to assert an RS 2477 opens up numerous legal questions.

These include questions such as: If the state asserts an RS 2477 right-of-way, how wide can it be? Does the assertion of one of these rights-of-way entitle the state to pave a four lane highway along the route? Can these rights-of-way be asserted across private lands? There are many others; The courts are the only entity who can make any final adjudicatory decision on RS 2477 rights-of-ways.

What Is the Issue Surrounding the Proposed Guidelines?

On its face, the issue of RS 2477 is a question of access, with those who want more access across federal and private lands in strong support of the proposed guidelines. On the other hand, those who believe these access routes encourage trespass and believe they are unreasonable and are costly to manage have opposed establishing a program for their assertion.

Ironically, however, the interest in developing a statewide program for asserting RS 2477 rights-of-way does not seem to be in response to any

major problem the state is currently having with access or expects to have. Nor are all the potential routes under consideration ones that the public has expressed an interest in using. No good examples have been provided to demonstrate that the statutory authority already available to the state to gain access has failed and could be secured through RS 2477.

Rather, it seems that the interest in RS 2477 rights-of-way that spurred the proposed guidelines is one of people who have a philosophical difference with the amount of Alaska land owned by the federal government, or, who believe that if the state managed certain existing access routes across federal lands that the state would then become the managing authority.

While some people have been vocal about wanting to see the state develop this program, the Alaska Federation of Natives, many Native Allottees and other Native land managers have expressed their opposition to this program. The concern expressed by the Alaska Federation of Natives and supported by others is that as adjacent land-owners, the state pursuit of RS 2477 rights-of-way will invite trespass and many land management problems.

The Department of Natural Resources and the Department of Transportation view this as an opportunity to negotiate the general issue of access across park lands with the federal government and as additional mechanism to their statutory authorities for securing access. However, neither seems particularly interested in assuming the costs associated with assuming management authority. The cost to the state includes extensive inventory, evaluation, historical documentation of use, but also includes costs associated with the court cases to adjudicate each claim and resolve the associated legal questions, with respect to use and management.

What Is the Issue Surrounding Maps in the Park Plans?

February 9, is the final date for comment for nine National Park Plans within Alaska. The idea was proposed to include maps in each plan depicting the location of potential RS 2477. Because these maps are based on information of questionable reliability, are not actual access routes but only potential routes for assertion, and are viewed to encourage trespass, their inclusion has been opposed by the Alaska Federation of Natives and others. Additionally it is believed that including the maps in the plans will help promote use of these trails and create problems for adjacent landowners and in-holders. The federal government has indicated they have found the inclusion of these maps in the best public interest, but the state has taken no formal position on this issue.

Alternative Approaches

Apart from the controversy surrounding this issue, there is the question about whether an RS 2477 assertion program is necessary to protect the state's interest. The state can use the existence of this law to argue its right to access on a case by case basis when it is needed in the context of trying to carry out a high priority capital project or plan. This is an alternative to the current approach of creating a program to look at each of some 1500 or 2000 potential roads and trails and deciding on each one of them regardless of whether the public has expressed concern about access along these routes.

OFFICE OF THE SECRETARY
WASHINGTON, D.C. 20240

NOV 13 1985

Memorandum

To: Director, Fish and Wildlife Service
Director, National Park Service

From: Assistant Secretary for Fish and Wildlife and Parks /s/ William P. Borja

Subject: Identification and Assertion of Rights-of-Way by the State of Alaska or Other Claimants Under RS2477 Grant

As you know, the State of Alaska has begun a program of identifying possible rights-of-ways within the Alaska units of the National Park Service and the Fish and Wildlife Service. Since my last visit to Alaska I have given this program some thought and requested my Special Assistant in Alaska to chair a task force on the matter.

Of immediate concern is how we respond to the efforts of the State, or any other party, in receiving claim assertions or maps that identify possible rights-of-ways. While in Alaska I made the decision that it was in the public interest to include the maps provided by the Chairman of the Alaska State Senate Transportation Committee as an appendix in the Park Service General Management Plans. The inclusion of these maps in the GMP's provides the public general notice that the State believes there are potential pre-existing rights-of-ways in the park units. I am informed that normally the claim assertion process does not afford public notice and therefore have insisted that we include these maps in the plans.

It is important to recognize the difference between the "identification" of possible rights-of-ways and the formal assertion of a right-of-way claim under the RS2477 grant. The inclusion of these "identification maps" in no way establishes or recognizes a right-of-way or relinquishes rights-of-ways not identified. The map simply alerts the public and unit managers that these rights-of-ways may exist within the park or refuge under the RS2477 grant. I believe the inclusion of the maps in our plans to be in the public interest.

The State is also providing "identification" maps for each of the refuges in Alaska. It is my decision that each Comprehensive Conservation Plan for the refuges include these maps at the earliest practicable opportunity.

Although I recognize that some of the CCP's are finished and others are close to being completed, I ask you to include the maps in the proper

areas of the plans. It would be most effective to have these maps available in the DRAFT CCP's presented for public review. Each of the maps must be properly titled to assist plan reviewers in understanding that the maps only "identify" "possible" rights-of-ways within the refuge.

My staff in Alaska is in the process of providing, for our review, DRAFT guidelines on the receipt and processing of formal RS2477 claim assertions. The Bureau of Land Management in Alaska and in Washington, D.C. has been most helpful in this effort and we are building on their experience in this area. It is my intent to have you review the DRAFT Guideline for the receipt and processing of RS2477 claim assertions by the Fish and Wildlife Service and the National Park Service in Alaska soon.

At present neither agency has guidelines in this area although BLM does. Given the very complex legal and land management questions involved, guidelines applicable to NPS and FWS lands will be needed. It is also my intention to formally publish these guidelines in the Federal Register

Please advise if you have any specific concerns regarding our approach to this problem. The principal contact in my office for the RS2477 issue is Ric Davidge (907) 786-3435.

RS 2477, Rights-of-Ways of historic trails through federal lands, is in my estimation one of the most important issues facing the state today. Comment on the draft Policy and Procedures document issued Nov. 6th by DNR/DOT, which I hope you have, will continue until Dec. 20th. I have listed below what I feel to be the most crucial points of the document that need revision.

There are some good points set forth in the document; especially important is allowing for public input and the point that assertion decisions be based not just on facts but also with regards to the best interest of the state.

Points that in my view need revision during this short review period are:

1) Section V-Management (p.18) My gravest concern regards management of a validated claim--Section V. Should the state have sole authority to regulate use even in national parks/preserves it could spell disaster for a park's ability to maintain wildlife/ecology. This then could result in a significant decrease in tourism. Such potential is present right now in our most popular national park--Denali. If an RS 2477 claim is validated there without Park Service's ability to control or jointly control use, the result would be devastating. No where in this document or elsewhere can I find where the Park Service is allowed control over 2477 usage. This serious deficiency needs correction.

2) Sec. IV-B (?) page 15. Once an assertion has been determined to be in the state's best interest the document states the route shall be identified on the state status plats. This procedure in my estimation, is extremely dangerous and only invites misuse of the trail, despite any disclaimer. If the state is not willing to take total responsibility for ensuring proper use of trails (as stated on the bottom of p. 15) then it should not place such trails on the maps. It might also be illegal to do so until final validation by the court.

3) Sec. IV-B Assertions: condition(s) that must be present for the state to initiate a formal assertion. The document states that only one condition need be present before asserting. Condition 4 is simply a formal request to pursue an assertion. I believe several of the six conditions listed should be met before the state decides to assert, thus possibly avoiding a politically motivated assertion request. The last condition however I feel should be deleted because it merely involves enhancing our legal position and our right to valid and existing claims is already guaranteed in ANILCA.

To research, assert, litigate, survey for cultural resources and then build/manage 2477 rights-of-ways will be expensive and lengthy--more so than most people and legislators realize. Considering that the 1974 inventory of trails that is being redrawn (without up-to-date data) for possible inclusion in CSU's management plans is not a complete list of 2477's, I question the need to spend the money on the maps. Indepth research will be needed before any assertion is made and the state's right to assert is guaranteed in ANILCA regardless of any presently identified trail, thus rendering the 1974 redrawn maps unnecessary. I would hope you would examine closely any future attempts to expend money for such purposes.

There will be a meeting on December 3rd at 10AM in DNR's Commissioner's Conference Room, 12th floor Frontier Building, Anchorage. I hope you will comment on the problems I have outlined. Public input is vital on such issues; I value the opportunity to do so and wish to speak to you in person on these points.

Sincerely,

A handwritten signature in cursive script that reads "Dianne Holmes". The signature is written in dark ink and is positioned to the right of the typed name.

Dianne Holmes,

HOUSE OF REPRESENTATIVES

BUSH CAUCUS CHAIRMAN

March 4, 1986

FILE
RS 2477

Bill Horn, Assistant Secretary
Fish and Wildlife and Parks
United States Department of the Interior
Interior Building
C Street between 18th and 18th Street N.W.
Washington, D.C. 20240

Dear Mr. Horn:

Over the next two or three months you will have an opportunity to consider the comments on nine National Park Management Plans. It is our understanding that the Department of Interior intends to consider including in these plans, maps of hundreds of "RS 2477" rights-of-way for potential assertion by the state. As representatives of rural Alaska we are alarmed by this, and are deeply concerned about the potential impacts that these invalidated rights-of-way could have on the public.

This situation poses a serious threat to many rural people who are in-holders or owners of land adjacent to these possible roads and trails. These landowners are likely to experience serious problems with trespass and land management if the use of these possible RS 2477 rights-of-way is promoted by depicting them on maps in the park plans. We believe that despite any written disclaimers about the status of these routes, inclusion of the maps in the plans will mislead the public into thinking that these routes exist and that they can be used.

A park plan like any other land management plan is intended as a tool for resolving or avoiding land use problems. Accordingly, it seems pointless to include these maps if it will only serve to create more problems than it would resolve.

The inclusion of maps depicting potential RS 2477 rights-of-way is especially distressing because the legal uncertainties and practical questions surrounding RS 2477s are so great, and because it is the state and not the federal government who bears the cost associated with resolving these questions. In addition it is the state and not the federal government who must assume any management responsibilities for these rights of way.

Bill Horn
March 4, 1986
Page Two

We further oppose the inclusion of these maps in the plans because, as we understand it, the RS 2477 rights-of-way that are depicted are being included despite a lack of sufficient information to document their existence.

While we have no objection to identifying and providing access where access is appropriate, we do not believe that including the maps helps address any problems with access there may be. Given that the state and not the federal government bears the cost of management and validation of these assertions, it seems that the process of deciding when and how to assert RS 2477 rights-of-way should only proceed after public review.

In addition, it is our view that without these maps the state has not lost any opportunity to assert one of these rights-of-way at a later date if it so chooses. However, by including these maps, rural Alaskans and Native landowners will be put in a position of unnecessary risk.

These concerns about RS 2477 rights-of-way have been voiced by the Alaska Federation of Natives, Northway Natives, Inc., Cook Inlet Regional, Inc., Bethel Native Corp., Evansville, Inc., Ahtna, Inc., and others. For this reason, we believe that the inclusion of these maps in the plans would exhibit a blatant disregard on the part of the federal government for the concerns these groups have raised.

As the final decision maker on this matter within the Department of Interior, we would appreciate anything you could do to prevent any maps from being included in the National Park Plans maps which show any invalidated RS 2477 roads or trails.

Thank you for your help and your concern.

Dear Interested Party:

We are pleased to transmit, for your review, the first in a series of reports on the identification of Alaskan Historical Trails. Some of the routes in this report are mail trails, freight routes and other commerce-related routes dating back to the 1880's. Under the Revised Statute of 1866, commonly known as RS 2477, possible rights-of-ways exist for the State of Alaska.

This report identifies historical roads and trails for eight National Park and nine U.S. Fish and Wildlife Service draft management plans.

The purpose of these identifications is to allow current or future flexibility in planning for roads, trails and other rights-of-way for the State, individuals, municipalities, resource users, large land owners (like Native corporations) and other interested parties.

It is the intent of the Alaska Senate Transportation Committee to insure that these trails are not ignored by the U.S. Federal Government and are identified as historic access routes of this state. If you or any of your constituents have comments on this report, feel free to contact this office.

Sincerely,

A large, stylized handwritten signature in black ink, appearing to read "John B. Coghill".

John B. Coghill
