CHAPTER 60.
Safety.
ARTICLE 8.
Plumbing Code.
CITATION Sec. 18.60.740.
CATCH LINE
DEFINITIONS.
TEXT In AS 18.60.705 - 18.60.740

(1) "code" means the Uniform Plumbing Code, 1979 edition, adopted at the 49th Annual Conference, September 1978, International Association of Plumbing and Mechanical Officials;

(2) "commissioner" means the commissioner of labor;

(3) "department" means the Department of Labor;

(4) "inspector" means a qualified inspector employed by, designated by, or under contract to the Department of Labor.

HISTORY (Sec. 1 ch 15 SLA 1972; am sec. 3 ch 88 SLA 1980)

International Conference of Building Officials

Alaska Southeast Chapter

CSHB 63

IN THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE

MEMBERS OF THE SENATE LABOR AND COMMERCE COMMITTEE,

The three Alaska Chapters of the International Conference of Building Officials urge you to adopt the 1985 Uniform Plumbing Code unamended. This position was strongly supported by the building and fire safety personnel who testified at the House Labor and commerce Committee teleconference hearings held on March 21, 1985.

Our organization is comprised of professional code administrators from all regions of the State. We represent Federal, State and Municipal governmental agencies. Duties of our members include administration of fire and life safety requirements as well as the Plumbing, Building, Electrical and Mechanical Codes in Alaska.

The 1979 Plumbing Code is outdated and does not reflect current changes in construction technologies. We believe that national consensus, or model, codes should be adopted with a minimum of changes to promote uniformity in commerce. There are no conditions unique to alaska which would justify adoption of the amendments contained in CSHB 63.

The language proposed in the substitute bill is not clear, understandable or effective. The term "VN" as used in the amendments is not defined in the Plumbing Code. In Section Four, the "grandfather" clause will not solve the problem of inconsistent regulations within the State. Each major city in Alaska has already, or is currently adopting the 1985 Plumbing Code without these restrictions on the use of plastic pipe.

We look forward to being of assistance to the Legislature in all future construction code-related matters.

Respectfully,

Stephen O Shows

Stephen O. Shows, Secretary
Alaska Southeast ICBO Chapter

International Conference of Building Officials

Alaska Southeast Chapter

April 1, 1986

Senator Fred Zharoff, Chairman
Senate Labor and Commerce Committee
P.O. Box V
Juneau, Alaska 99811

Honorable Senator Zharoff,

There is much concern about adoption of the current Uniform Plumbing Code. Support for adoption is statewide amongst virtually all Building and Code Officials, Architects, Engineers, and others in the development industry.

Alaska is faced with two major problems. First is uniformity between jurisdictions. Code standards in one jurisdiction is not usually the same as in the next. Many times State Inspectors are enforcing older, "out-of-sync" codes than those of the jurisdiction within which the project is located.

Secondly, code provisions are made with advancing technologies in mind. The code development and adoption process at the national level is done by experts in the field. By maintaining or adopting older code editions the State of Alaska is precluding professionals in the construction field from taking full advantage of the most advanced, cost effective materials and techniques known. This has serious affects on all Alaskans in terms of finances and life safety.

For these reasons the Alaska Southeast Chapter of the International Conference of Building Officials strongly supports adoption of the unamended 1985 Plumbing Code.

Respectfully,

Eric R. Davenport
President

Dear Mr. Shows:

There seems to be some question as to the stand the Fire Service takes on the use of plastic pipe for plumbing in certain occupancies. The question arises around the adoption of the new Uniform Plumbing Code without the amendments previously inserted restricting some usage.

The State Fire Marshal's Office no longer feels that those amendments are required since data has not indicated that plastic pipe has in fact contributed at all to loss of life or increased fire spread where it has been used.

I believe that it's use is not a critical fire and life safety matter and consequently the Plumbing Code should be adopted as it. Local jurisdictions will still have the option of being more restrictive when they adopt it if they are still doubtful about the matter.

Sincerely,

Dewey Whetsell
President

Dear Steve;

Per our discussion of this past week regarding legislative action on the adoption of the 1985 Uniform Plumbing Code.

This is to inform you that the Alaska State Homebuilders Association Board of Directors, at their March 18 board meeting, passed a motion in support of passage of legislation to adopt the use of the 1985 UPC without admendments.

If we can be of further assistance in this matter, please advise.

Sincerely,

Preston Burnett

ALASKA CHAPTER
THE AMERICAN INSTITUTE OF ARCHITECTS

March 28, 1986

State of Alaska
Senate Labor and Commerce Committee

Dear Senators,

We urge you to support an unamended adoption of the 1985 Uniform Plumbing Code.

Architects in Alaska have long been concerned with uniformity of the codes in the simplest form possible. Our profession has also supported building safety as a fundamental element of all types of construction. The American Institute of Architects has led the way, nationwide, in both of these areas.

CS HB 63 conflicts with current contemporary directions in the code industry. Specific amendments regarding the use of plastic pipe are not appropriate for adoption on a state level. They do not represent unique Alaskan conditions. They confuse the design professional and create inconsistencies between the codes. In addition, restricting the use of plastic pipe will add unnecessary costs to a project which will be passed on to the consumer in an unproductive way.

Please give careful attention to this bill. We would be pleased to discuss it in greater depth at your convenience.

Respectfully,

Gary Gillette, President
AK Chapter AIA

Catherine Fritz, Chair
AK Chapter AIA Codes and Standards Committee

Mr. Steve Shows
ICBO - Southeast Chapter
c/o City and Borough of Juneau Engineering Dept.
155 South Seward Street
Juneau, Alaska 99801

Dear Mr. Shows:

This is a reply to your inquiry of April 1, 1986 regarding our opinion of the effect on potable water quality of different types of pipe materials.

At an earlier date we had provided a statement to Representative Peter Goll concerning the possible conditions under which water being carried by plastic pipe could pick up organic contaminants. That same information is herein provided to you as follows:

Permeation of organic compounds through plastic pipe walls:

Both laboratory studies and actual field incidents have shown that passage of organic contaminants contained in soil or groundwater into plastic pipe and the water that it carries is possible, and indeed has occurred in municipal water systems. Studies have shown that this mode of contamination is possible for all common varieties of plastic water pipe.

Leaching of organic compounds from uncontaminated plastic pipe or pipe glue materials:

Existence of organic contaminants in potable water carried by non-contaminated plastic pipe has been shown to occur in laboratory studies. The origin of these compounds has been traced to the actual pipe itself and to the solvents used to cement sections of pipe together. It appears to be a phenomenon common to all types of plastic pipe.

The highest concentrations of contaminants are usually found within the first two weeks following installation of the pipe, with concentrations decreasing to below detectable levels after this period. However, use of higher than average amounts of plastic pipe cement has been shown to increase the levels and persistence of these contaminants in the water carried.

Additional information on other types of pipe:

Metal pipe has also been implicated as the source of inorganic contaminants in drinking water, primarily as the result of corrosion of pipe or joint material.

Several nationwide studies have shown that corrosion of metal pipe can supply sometimes significant levels of contaminants to the drinking water it carries, most notably copper, lead, zinc and iron. Water systems with high quality, and therefore chemically aggressive waters, have been known to cause significant corrosion of metal components of the system. The Seattle water system is one such example.

In Alaska we have had several incidents of aggressive source water dissolving lead from the tin-lead solder in copper pipe joints to the point where state standards were exceeded for lead in drinking water. The attached article describes this condition in the villages of St. Michael, Birch Creek, Gambell and Shismaref. In addition, this problem was extensively investigated by the North Slope Borough for eight water systems within the borough, with state standards for lead being exceeded in the villages of Point Lay, Nuiqsut and Barrow.

It is significant to note that the most feasible method recommended for mitigating the lead contamination problem in the North Slope water systems was to completely replace all of the pipe joints (copy of study attached).

Asbestos-cement pipe is also susceptible to corrosion by chemically aggressive waters, liberating asbestos fibers into the water in the process. However, information from the U.S. Environmental Protection Agency concerning the health effects of ingested asbestos is inconclusive at this time.

As you can see, there are drawbacks to the use of almost any kind of pipe, given particular operating conditions. However, at this time we feel we have insufficient evidence to limit the use of any type of pipe due to concern of health effects related to the pipe.

Sincerely,

Richard M. Farnell

The Guardian of Small Business

April 2, 1986

Sen. Fred Zharoff, Chairman
Senate Labor and Commerce Committee
State Capitol
Pouch V
Juneau, Alaska 99811

REF: HB 63 - Adoption of 1985 Edition of Plumbing Code

Dear Sen. Zharoff:

The National Federation of Independent Business is a national organization whose primary function is to represent small business interests in state legislatures and Congress. In Alaska, NFIB has in excess of 4,100 members representing a broad cross section of all types of businesses. Our members are very concerned about the existing situation in Alaska where the edition of the Plumbing Code adopted by the State is several years behind the times and is resulting in great confusion and much higher construction costs for any type of commercial structure.

The confusion results because the state adopted version of the Plumbing Code is the 1979 Edition while all municipalities who have a plumbing code have adopted either the 1982 or the 1985 editions. Since there are many differences between the 1979 edition and both later editions, anyone putting up a structure must make sure that their structure complies with edition adopted by their local municipality except when the 1979 code differs. Since the State adopted code controls because it is adopted by statute, the builder must modify their building to conform to the 1979 version.

One provision of the 1979 code which was modified in both the 1982 and 1985 editions and which impacts commercial buildings the most, is the one which mandates cast iron sewer pipe rather than the specified plastic pipe permitted by the later editions. This provision alone results in the cost of the sewer system being two to three times more costly than the plastic pipe approved in the later editions.

The situation is further compounded by the fact that even though communities of less than 2,500 in population are exempted from having to comply with the state adopted version of the plumbing code, the fire marshall and Dept. of Labor inspectors in some cases are requiring them to comply with it. In a recent state wide poll, our members voted in favor of having a uniform code statewide by a margin of 64% in favor with 24% opposed and 12% undecided.

NFIB/ALASKA
Legislative Office
P.O. Box 210194
Auke Bay, AK 99821
907/586-4100

We urge the Senate Labor and Commerce Committee to take quick action on HB 63 and amend it so that the 1985 Plumbing Code is adopted without the exceptions inserted by the House. We need a consistent code statewide, not more confusion and hassles. Your attention to this issue will be appreciated very much.

Very truly yours,

Gary L. Jenkins, Director
Governmental Relations/Alaska

March 19, 1986

Dear Mr. Zharoff,

The NFIB has brought to my attention HB 63, Adoption of 1985 Plumbing Code. I strongly encourage you to adopt it.

In 1983 I started a bakery in Tok. As there were unsuitable buildings to occupy, I was able to secure a loan to build my own. I tried to do everything as accurately and professionally as possible. However, I did not contact the Fire Marshall's office.

While in Fairbanks I sought advice concerning venting my oven at the Petrolane office. The owner suggested I contact the Fire Marshall's office, which I did. When I left his office, I was complete deflated. I not only paid $137.00 for a plan review, I also had to submit requests for waivers--they were promptly denied.

Presently, the Fire Marshall's office still wants me to tear open my walls and replace plasic pipe with non-burnable materials. I do not think this is reasonable, justifiable or warranted. For 9 months of the year I am open only 3 days a week which satisfies the local demand for our products. Knowing this, you can imagine the budgetary restraints we have.

I certainly hope you will think of all small businessmen while you are making your decision concerning this bill. Costs are high to replace plumbing and salaries often are not commesurate with the replacement demands. We need your support.

Sincerely,

Roger Skarie

March 28, 1986

Senator Fred Zharoff
State Capitol
Pouch V
Juneau, AK 99811

Dear Senator Zharoff:

I have been practicing in Juneau for the past 13 years and finally am about to complete the building of a new office. I was given a certain amount of time by the hospital board to vacate the space I am renting and, therefore, had to build during the winter months. Because of that I elected to build with modules, using Evergreen Mobile Co. in Issaquah, WA, since they have had experience building medical clinics. The modules are now in place and the roof is being constructed.

It is now my understanding that the state inspector reviewed my building and noted that there are plastic pipes for some of the plumbing instead of cast iron. It is also my understanding that this plastic pipe meets all local codes not only here in Juneau, but in the state of Washington, but that there is a requirement here in the state of Alaska for commercial buildings to use cast iron pipe. I have discussed this with my builder and other people and all those I have talked with confirm the concensus that plastic pipe is just as good, if not better, than cast iron and the only reason that it is required at this time is at the insistance of the Pipe Layer's Union. I, of course, was unaware of the requirement and at this time do not know exactly what to do. One of the objectives in using the modules was, #1, to be able to build during the winter and, #2, to complete the project under a minimum amount of time because I had been given a certain date to leave the hospital. If it is now insisted that I must change this pipe, this could easily go beyond the specified period of time that is available to me and in addition, the amount of monies that have been set aside by the bank, including AIDA.

I have been informed that the senate is considering a bill which would delete the requirement for cast iron pipe and allow plastic pipe to be used. May I at this time strongly urge you to consider favorably the use of plastic pipe.

Sincerely,

Jon A. Reiswig, M.D.

MEMORANDUM

TO: City Manager

FROM: Sandy Huss, Building Inspector

RE: Background on Minmum State Plumbing Code Legislation

This is in response to your request for background information on the current legislation to update the Uniform Plumbing Code.

At the present time the State has adopted the 1979 Uniform Plumbing Code. A feature of this Code which later editions do not feature is the prohibition of plastic pipe in most buildings (limiting them to residential structures of not more than two stories). Efforts were made by the legislature to adopt the 1982 edition of this Code but opposition by the Fairbanks plumbers union and others to inclusion or expansion of plastic provisions resulted in the failure to pass this legislation. This year the Alaska Department of Labor through the Governor requested adoption of the 1985 edition of the UPC without any amendment. HB 63 performed this task. SB 238 followed a different track in that it included amendments which would put us on the 1985 UPC but maintain the 1979 UPC ban on extensive use of plastic pipe.

The House Labor & Commerce Committe finally substituted another bill which was a mirror image of the SB 238 and this passed the Committee, passed the House floor and went to the Senate where it now sits in the Senate Labor & Commerce Committee. According to Sen. Fred Zharoff's staff member Michael Thill, the Committee does not plan to deal with the bill for a couple of weeks and does not considerany intention to re-write the bill.

The problems with this legislation is as follows:

1). Our current use of plastic in the water mains and sewer lines in the City is prohibited by both the 1979 and 1985 Codes (as proposed to be amended).

2). The major re-model of the Water Treatment Plant using extensive plastic piping was and is illegal under these provisions as it is not considered a residential structure.

3). Future plans to repair, replace, modify or expand either the water system or the treatment plant would be prohibited by this legislation.

4). While this law would only apply to cities of at least 2,500, if the new borough would pass the law would apply to all of the cities in the new borough.

5). This legislation would also prohibit the use of plastic piping in sprinkler systems, a new technological feature which has recieved Code approval and is heralded as a significant breakthrough in lowering the cost and expanding the availability of sprinkler systems.

6). This legislation has direct and expensive impacts on our local building market as copper and cast iron drain systems are significantly more expensive than plastic drain systems, are more freeze sensitive, and create many more maintenance problems.

7). Adoption of this legislation with the continued ban on plastic pipe would make millions and millions of dollars of State-funded rural water and sewer construction in violation of the Plumbing Code. Rigid enforcement of the provisions would also make future systems utilize metal pipe for which no adequate freeze protection technology is currently available and significantly increase the cost of these future projects.

If you have any questions, please feel free to contact me.

RE: HB 63 - 1985 Edition of the Plumbing Code

Dear Senator Zharoff:

I recently learned of an amendment concerning cast drain lines in commercial buildings the plumbers and pipefitters union had successfully lobbied for.

However, this ammendments presents a problem for plumbing contractors. Without uniforming between the state codes and local codes, you may get some inspectors enforcing the code in one manner, while another inspector will enforce it in a different manner. In addition, iron pipe costs more, thereby pushing up the cost of already expensive state projects.

I therefore urge you to throw out this amendment, since it did not have any justification in the beginning, and adopt a state code that is more in line with the existing local codes.

Thank you.

CC: NFIB/ALASKA

Tim Agosti

Tim Agosti
V.P. Operations

(907) 248-2525

3/15/86

Dear Sen. Zharoff,

I am writing concerning HB 63, 1985 Edition of Plumbing Code. Having just completed several projects here in Petersburg I was very frustrated that I was not able to use either the 1982 or 1985 version of the plumbing code which allows plastic pipe for commercial sewer applications. Now I find that a self serving union has got the legislature to not allow plastic again under the new 1985 code. This change hurts every business man that tries to develop his land or building. Not only that but, as in my case, the Pipefitters union didn't benefit at all as I still did the work myself. The only thing that happens is the cost of my projects have gone up far more than is needed.

Thus I urge you to support development in Alaska and remove the cast iron pipe requirement from the Plumbing Code.

Thank you.

Dave Ch——

"The Church with a Warm Heart"

March 21, 1986

Senator Fred Zharoff
State Capitol
Pouch V
Juneau, AK. 99811

Dear Mr. Zharoff -

You are aware, I am sure, of the proposed House Bill concerning the plumbing code in the State of Alaska. It is to this issue that I am addressing myself in this letter.

I am the pastor of the Auke Bay Bible Church where we are in the process of erecting a two-story building which is to be used for the education and fellowship needs of the congregation. We began the installation of the roughed-in plumbing according to the 1982 codes of the City and Borough of Juneau. Following an unannounced visit by the State Inspector we were informed that what had already been done would have to be torn out and replaced with cast iron. Since the building is being erected by a lot of volunteer help and cash donations from our people, working under certified contractors, this poses an extra heavy demand upon the congregation as well as needless delay in completing the project.

I would prevail upon you, sir, to exercise your skill and your influence to insist that the State of Alaska bring its code to meet that of the rest of the country and that of the City and Borough of Juneau.

I thank you for your concern and your immediate attention to this matter.

Sincerely yours,
Johnny Reimer, Pastor

International Conference of Building Officials

Alaska Southeast Chapter

CSHB 63

IN THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE

MEMBERS OF THE SENATE LABOR AND COMMERCE COMMITTEE,

Removing the restrictions of the use of plastic pipe in this bill would lower capital construction costs for the State of Alaska and the private sector.

Based on McGraw Hill's Dodge Digest for 1985, plumbing costs for elementary schools average 8.1% and for high schools 7.8% of the total project costs. Preliminary figures from the State Department of Education (DOE) in Alaska indicate school construction costs of 525 million dollars since FY 1982.

In DOE alone it is conservatively estimated that the State would have saved over 9 million dollars if the 1982 Uniform Plumbing Code (UPC) had been adopted as written.

By adopting the modern plumbing code savings of 1.75% could be realized on most public and private construction projects.

Statewide figures from the US Census Bureau indicate total commercial construction activity since 1982 was approximately 1.2 billion dollars.

There are no justifiable cost benefits to be gained by restricting plastic pipes beyond the provisions of the code.

Respectfully,

Stephen O. Shows, Legislative Chair
Alaska Southeast ICBO Chapter

CURTIS PLUMBING, HEATING & HOME SUPPLY

March 28, 1986

Senator Fred Zharoff
Pouch V
Juneau, AK 99811

Dear Senator:

I am writing concerning "HB 63-Adopt 1985 Edition of Plumbing Code".

I feel the use of plastic ABS piping in a commercial plumbing waste system is both economical and safe. The argument for using cast iron instead of ABS due to the fire fume hazard is totally groundless. Plastic pipe surely will emit deadly fumes when burned, but so will any item in a building that will burn including cast iron pipe - notice the tar like substance used to preserve the pipe that in many cases is over 1/8 " thick. I feel the opposition wishes to keep cast iron only in order to keep gross costs up which in turn will make profits increase. I also suspect the larger more organized mechanical companies feel that it is more difficult to install cast iron and thus the little guy may not want to get involved due to lack of experience and/or capitol.

It is time to get rational and start using common sense in this and many other areas of state government. More and more the silent majority is getting fed up and verbalizing their views. Please represent the people and put politics aside. Even a minority view can prevail if it is right. It just takes someone willing to back his convictions.

Sincerely,

Chuck Renfro

be posted: DANGER —

(p) **Vacuum breakers** shall be located outside any enclosure or hooded area containing fumes that are toxic or poisonous.

Section 1004—Materials

(a) Water pipe and fittings shall be of brass, copper, cast iron, galvanized malleable iron, galvanized wrought iron, galvanized steel, lead or other approved materials. Asbestos-cement, CPVC, PB, PE, or PVC water pipe manufactured to recognized standards may be used for cold water distribution systems outside a building. CPVC and PB water pipe and tubing may be used for hot and cold water distribution systems within a building. All materials used in the water supply system, except valves and similar devices shall be of a like material, except where otherwise approved by the Administrative Authority.

(b) Cast iron fittings up to and including two (2) inches (50.8 mm) in size, when used in connection with potable water piping shall be galvanized.

(c) All malleable iron water fittings shall be galvanized.

(d) Piping and tubing which has previously been used for any purpose other than for potable water systems shall not be used.

(e) Approved plastic materials may be used in water service piping, provided that where metal water service piping is used for electrical grounding purposes, replacement piping therefore shall be of like materials.

Exception: Where a grounding system, acceptable to the Administrative Authority is installed, inspected and approved, metallic pipe may be replaced with non-metallic pipe.

Section 1005—Valves

(a) Valves up to and including two (2) inches (50.8 mm) in size shall be brass or other approved material. Sizes over two (2) inches (50.8 mm) may have cast iron or brass bodies. Each gate valve shall be a fullway type with working parts of non-corrosive material.

(b) A fullway valve controlling all outlets shall be installed on the discharge side of each water meter and on each unmetered water supply. Water pipes, supplying more than one building on any one premises shall be equipped with a separate fullway valve to each building, so arranged that the water supply can be turned on or off to any individual or separate building; provided however, that supply piping to a single family residence and building accessory thereto, may be controlled on one valve. Such shutoff valves shall be accessible at all times. A fullway valve shall be installed on the discharge piping from water supply tanks at or near the tank. A fullway valve shall be installed on the cold water supply pipe to each water heater at or near the water heater. A fullway valve shall be installed for each apartment or dwelling of more than one (1) family. In lieu of the main supply shutoff in each apartment, individual shutoff valves may be provided at each fixture.

(c) All valves used to control two (2) or more openings shall be fullway gate valves or other approved valves designed and approved for the service intended.

April 25, 1986

Testimony before the Senate Labor and Commerce Committee
On. CSHB 63 April 23, 1986

Thank you Mr. Chairman and members of the committee for the opportunity to speak here today.

My name is Stephen Shows. I am representing the Northern, Central, and Southeast Chapters of the International Conference of Building Officials. Our membership is comprised mainly of State and local inspectors, building officials and private sector professionals. Our organizational goals promote uniform and appropriate statewide construction codes.

Toward this effort we support adoption of the 1985 UPC as written without amendments.

I am not representing the Municipalities, their Assemblies and Councils, who after independent review have adopted the 1982 or the 1985 UPC. Those communities include Anchorage, Fairbanks, Juneau, Sitka, Kodiak, Kenai, Soldotna and others. By statute communities who have a population of less than 2500 do not have to comply with any plumbing code.

There are three issues I would like to address.

The first concerns the proposed amendments in the Substitute limiting plastic pipe to VN residential buildings. This insertion makes the Bill more restrictive than the states current 1979 UPC. For example a two story apartment or condominium could no longer be plumbed in plastic although it is legal today.

The term "VN" is confusing and not contained or defined anywhere in the UPC. The Uniform Building Code does contain a method of determining if a building is a type five non rated structure, however many variables must be considered.. Since each of these criteria are subject to periodic change, you should cite the applicable edition of the building code you intend to use as a reference.

This may sound confusing but to accurately determine what type of building it is a plumber will have to know the height, number of floors or basements, floor area, width of all the yards around the structure and whether the building is sprinklered or not among other things... The 85 UPC is simple and direct. It says that if the code allows the building to be made of combustible materials than the pipes can also be combustible.

The second issue I will address are the concerns expressed about plastic pipes.

Experience has shown that these products have been used throughout Alaska and the Nation for many years and have proven themselves to be safe and dependable. The Alaska Department of Environmental Conservation (ADEC) indicates that there is no reason to restrict these pipes because of water quality. In fact they can solve the lead contamination problems encountered in many Alaskan communities that use rain water as their source and copper pipe distribution systems according to ADEC.

The Alaska Department of Labor OSHA official has informed me that there are no substantiated grounds to restrict the installation of plastic pipe from a worker safety standpoint. Containers of solvents and glue are explicit in their instructions to provide adequate ventilation. The "right to know law" in Alaska allows tradesmen to obtain complete information about the contents of any product used in the workplace.

The Alaska State Fire Marshal after careful review has deleted restrictions on the use of plastic pipe formerly contained in their regulations. The Alaska State Fire Chiefs Association has indicated that the use of plastic pipes as permitted in the 85 UPC is not a significant concern from a fire safety standpoint. In fact the fire service foresees low cost plastic pipe sprinkler systems as becoming a very important future element in saving lives and property in Alaska.

Electrical trade unions and [illegible] conduit manufacturers waged this same battle nationally with recent adoptions of the National Electric Code. The State has adopted the 1984 NEC into State Law. That code permits PVC conduit to be used in most commercial and residential buildings just as the 85 UPC does. These amendments if adopted would have the State Department of Labor inspector come on jobsite and reject a PVC plumbing pipe full of water and at the same time approve a PVC electric pipe full of wires right next to it in the same wall.

The third issue speaks to the heart of the matter, economics.

Plastic pipe systems are less expensive because the materials are cheaper and it takes fewer hours to install them. Depending on the job and the contractor savings on drain waste and vent systems can range between 30 and 50%. Whether the consumer is a private individual looking for affordable housing, a small business, or a governmental agency these added costs are passed along with no tangible benefits to the owners. Real estate appraisers do not give higher values to buildings with metal pipe systems.

Finally in these times of economic restraint we ask you to carefully consider the millions of dollars individual Alaskans will be asked to spend needlessly on their construction projects in the years ahead if these restrictions on plastic pipe are not removed. We are known as a pioneering people here in the Northland, and we ask our leaders to embrace new technologies and to work together with us toward the spirit of a bright future.

Mr. Chairman, thank you.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPT. OF ENVIRONMENTAL CONSERVATION
OFFICE OF THE COMMISSIONER
POUCH O, JUNEAU, ALASKA 99811

Telephone:(907)
Address:
(907)465-2600

February 13, 1986

Honorable Peter Goll
Alaska State House
Box V
Juneau, AK 99811

Dear Representative Goll:

In response to an inquiry from your office concerning the possibilities of contamination of drinking water carried by plastic pipe, my staff has prepared the following information:

A. Permeation of organic compounds through plastic pipe walls

Both laboratory studies and actual field incidents have shown that passage of organic contaminants contained in soil or groundwater into plastic pipe and the water that it carries is possible, and indeed has occurred in municipal water systems. Studies have shown that this mode of contamination is possible for all common varieties of plastic water pipe.

B. Leaching of organic compounds from uncontaminated plastic pipe or pipe glue materials

Existence of organic contaminants in potable water carried by non-contaminated plastic pipe has been shown to occur in laboratory studies. The origin of these compounds has been traced to the actual pipe itself and to the solvents used to cement sections of pipe together. It appears to be a phenomenon common to all types of plastic pipe.

The highest concentrations of contaminants are usually found within the first two weeks following installation of the pipe, with concentrations decreasing to below detectable levels after this period. However, use of higher than average amounts of pipe cement has been shown to increase the levels and persistence of these contaminants in the water carried.

I hope this information was sufficient to provide you with the preliminary information on this subject that you requested. Please contact Dick Farnell of my staff at (907) 465-2653 for additional information.

Sincerely,

Bill Ross
Commissioner

Bill No. Committee Substitute for House Bill 63 (L&C)

Title "An Act relating to the Plumbing Code."

Date February 11, 1986

Contact: Eileen Plate
465-2700
Bob Bacolas
465-4870

Committee Substitute for House Bill 63 provides for the modification and adoption of the 1985 Uniform Plumbing Code; and for adoption of the Uniform Solar Energy Code, and Uniform Swimming Pool, Spa and Hot Tub Code. The 1979 Uniform Plumbing Code currently in effect in Alaska is outdated.

The International Association of Plumbing and Mechanical Officials revises its minimum standards for the installation of plumbing every three years to incorporate technological advances, and the 1985 edition is the most recent effort in this regard. The standards for the installation of solar energy and the spa and hot tub standards have not previously been adopted in Alaska; the minimum standards for swimming pools were formerly included in the Uniform Plumbing Code.

In response to a number of water quality, worker safety and fire safety questions that have been posed on the use of plastic pipe in drainage and water distribution systems, the Committee Substitute modifies several provisions in the 1985 plumbing code to limit the use of plastic pipe in Alaska. As modified in this bill, Alaska's minimum plumbing standards on the use of plastic pipe would, therefore, be less restrictive than the 1979 code presently in effect and more restrictive than 1985 code per se. This appears to be a reasonable compromise on the issue.

The Department notes that Section 4 of the Committee Substitute provides that plastic pipe which was installed in the state prior to the effective date of the bill need not comply with either the 1979 code or the 1985 code as modified in this bill. The Department's understanding is that this "grandfather" clause stems from confusion that was created when various local governments adopted the 1982 or 1985 Uniform Plumbing Codes, which permitted such installations of plastic pipe. While the Department does not object to such a "grandfather" clause, it should be noted that it may be perceived as inequitable by those persons whom the Department has required to comply with the 1979 code. In several instances the Department's enforcement action in this regard has necessitated the removal of plastic pipe and installation of permissible materials.

This bill also removes an anomalous provision that instructs the Department of Labor to adopt the specific publications that constitute the plumbing code. The current statute leaves no discretion in the department as to whether to adopt or as to what to adopt. Thus the actions of the department in going

POSITION PAPER/Department of Labor

through the formal adoption procedures are unnecessary. Under the amendment in this bill, the statute will simply declare what constitutes the plumbing code. This is the approach already employed for the electrical code under AS 18.60.580.

Committee Substitute for House Bill 63 would not have a fiscal impact on the Department of Labor.

APPROVED:

Jim Robison, Commissioner
Department of Labor

International Association of Plumbing & Mechanical Officials

PROPOSED CODE CHANGE TO A SECTION AND/OR SECTIONS OF THE UPC - USPC - USEC

1004 (A)

Note: All Code Sections that may be affected by this change must be listed.

Name Robert J. Duffey Class of Membership D

Jurisdiction/Company You Represent U.A. Local Union #393 Date January 15, 198

Mailing Address 370 Umbarger Road

City San Jose State California Zip 95111

THE FOLLOWING AMENDMENT IS SUBMITTED:

Section 1004 - Materials

(a) Water pipe and fittings shall be of brass, copper, cast iron, galvanized malleable iron, galvanized wrought iron, galvanized steel or other approved materials. Asbestos-cement, CPVC, PB, PE, or PVC water pipe manufactured to recognized standards may be used for cold water distribution systems outside a building. ~~CPVC and~~ PB water pipe and tubing may be used for hot and cold water distribution systems within a building. All materials used in the water supply system, except valves and similar devices shall be of a like material, except where otherwise approved by the Administrative Authority.

REASON FOR CODE REVISION:

The California Department of Health Services Commissioned the Montgomer Testing Laboratory (MTL) to conduct the first government-authorized stu to measure the amount of solvents that leached into drinking water fron plastic pipe.

Excessive levels of carbon tetrachloride, telbracholoroethene and tricholoroethone were found in the MTL data. Because of the cancer risk associated with some of these chemicals, EPA suggests zero the safe I.E. non-threshold assumption level.

Use additional sheets if necessary Do not wr low this li.

incurred by such aggrieved parties in enforcing this agreement or in preparing the defense, preparing against, or seeking to obtain an abatement of or injunction against such action or proceeding, or in establishing or maintaining the applicability or validity of this agreement, or any provision thereof, or in prosecuting any claim or cross-claim based thereon.

10. CONSTRUCTION:

This agreement is the product of a collaboration among all parties hereto and shall not be construed against any party.

IN WITNESS WHEREOF, the parties have executed this Release and Settlement Agreement in person or by duly authorized officers or agents as of the days and years written below.

Dated: [redacted].

(Signature) [redacted]

(Signature) [redacted]

7. REPAIR:

(a) RELEASOR(S) acknowledge that RELEASED PARTIES have no obligation to investigate, design, perform, or otherwise participate in the identification and correction of any defects, deficiencies, code violations, or other dangerous or damaging conditions relating to the plumbing system in said residence.

(b) Nothing herein shall give RELEASED PARTIES a right or obligation to direct or compel RELEASOR(S) to make any repairs or perform any maintenance on the above-noted residence, with respect to the alleged plumbing-related defects in their residence.

(c) RELEASED PARTIES assume no responsibility for and have no control over the method or means of repair and bear no responsibility for the success or failure of either the method or means of which repair or replacement of the plumbing system is performed on the above-noted residence.

8. RELEASOR(S) who currently own the real property commonly known as _____, City of San Jose, County of Santa Clara, State of California, acknowledge the right of RELEASED PARTIES to record the Disclosure Statement previously executed by RELEASOR(S) in connection with this settlement.

9. ATTORNEYS' FEES:

In the event of any breach of this agreement, any party aggrieved, including third party beneficiaries to this agreement, shall be entitled to recover from the breaching party or parties, in addition to other relief awarded, all such damages, costs, reasonable attorneys' fees and expert fees,

RELEASOR(S) hereby expressly waive the provisions of §1542 on behalf of themselves, their heirs, assigns, and successors in interest.

5. HOLD HARMLESS AND INDEMNIFICATION:

RELEASOR(S), on behalf of themselves and their heirs, successors and assigns, hereby agree to indemnify, hold harmless and defend RELEASED PARTIES and their heirs, agents and assigns, and any of them, from and against any and all past, present and future claims, demands, lawsuits, arbitration, or other proceedings, including, but not limited to, claims for personal injury, property damage, economic loss, or any other form of injury or damage, or subrogated claims of any person, entity, or insurer, regardless of merit or lack thereof, made upon or initiated against any or all of RELEASED PARTIES and their heirs, agents and assigns, and any of them,, whether a party or stranger to this agreement, or by any past, present, or future owner of any interest whatsoever in the above-noted residence, arising out of or in any way related to any matter herein released.

6. EXECUTION:

This Releases and Settlement Agreement may be executed in any number of counterparts and signature pages and by different parties hereto on separate counterpart or signature pages and each of which, when so executed and delivered, shall be an original, and all such counterparts shall together constitute one and the same instrument.

Norwood Creek subdivision specifically reserve their rights to continue to pursue their claims for non-plumbing related construction defects in their residences against the William Lyon Company and expressly do not release the William Lyon Company in that regard.

(b) There is a risk that, subsequent to the execution of this release, RELEASOR(S) will suffer further damage related to the matters herein released, or which is unknown or unanticipated at the time this release is signed. There is also a risk that the damage presently known may be or may become more serious than RELEASOR(S) now expect or anticipate. RELEASOR(S) shall assume the above-mentioned risks, and this release shall apply to all unknown or unanticipated results of the matters described above, in that a portion of the settlement is premised on the entire plumbing system complained of being replaced by said RELEASOR(S).

(c) RELEASOR(S) and RELEASED PARTIES acknowledge that this Release and Settlement Agreement applies to all unknown or unanticipated injuries or damages, including claims for personal injury, property damage, economic loss, or other damage, including any and all claims now existent or which may arise in the future, arising out of the alleged defective plumbing system in said residence, and, under the terms of §1542 of the Civil Code of the State of California, which reads as follows:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him, must have materially affected his settlement with the debtor."

attorneys, and each of them, of all claims, demands, causes of actions, damages or liabilities of any kind and character whatsoever whether known or unknown, which RELEASOR(S), or their successors and assigns can, shall, or may have against RELEASED PARTIES arising out of the plumbing system in said residence, including but not limited to, any work, materials, acts, omission, fraud, misrepresentation, non-disclosure, breach of warranty, breach of contract, or other obligations of RELEASED PARTIES in connection with the design, manufacture, installation, construction, financing, sale, or repair of the plumbing system and tools and components used in the installation thereof, contained within the above-noted residence, including, but not limited to, damage to structure or improvements thereon, personal or bodily injury, damage to personal property, or economic loss, resulting from any defects or deficiencies in design, manufacture, installation, construction, disclosure, repair, or sale, of the plumbing system contained within the above-noted residence, whether now known or unknown, and any damages or deterioration arising therefrom whether now known or unknown, latent or patent or non-existent at the present time and which may arise in the future, or arising out of the facts, circumstances of issue or issues, raised or which might have been raised or in the future could be raised, pertaining to RELEASED PARTIES in the above-referenced litigation, including any past, present or future damage which may be or may have been sustained by RELEASOR(S), with respect to the plumbing system contained within the above-noted residence. RELEASOR(S) and RELEASED PARTIES acknowledge and agree that the RELEASOR(S) who are owners or former owners of residences in the William Lyon Company/

disclosure statements and dismissals, have been obtained. It is the intent of all parties that the terms of this agreement and release be approved and accepted by all parties and that the agreement be signed as expeditiously as practical.

(e) On receipt of signed releases, disclosure statements and dismissals, JOHN R. GRIFFITHS shall tender the settlement funds plus any interest earned to RELEASOR(S)' attorneys of record.

2. DISMISSALS:

RELEASOR(S) hereby agree to dismiss with prejudice the above-noted lawsuits, save and except the causes of action against the William Lyon Company. Because litigation is still pending between RELEASOR(S) and the William Lyon Company, Inc., referrable to non-plumbing related construction defects, which claims are not settled, released or affected by this Release and Settlement Agreement, RELEASOR(S) cannot at this time dismiss with prejudice their complaint against the William Lyon Company, notwithstanding the fact that RELEASOR(S) acknowledge the fact that they have settled with and released the William Lyon Company with respect to the alleged plumbing-related defects in their residence.

3. COSTS:

Each party shall bear its own costs and attorneys' fees upon dismissal.

4. RELEASE:

(a) RELEASOR(S) hereby forever release and discharge RELEASED PARTIES, and each of them, and their respective officers, agents, servants, employees, owners, predecessors, successors, assigns, insurers, related business entities, and

(e) All parties identified in this document desire to fully settle, once and for all, all claims and controversies of any kind existing between them regarding the plumbing system in each residence to the end that RELEASOR(S) agree that no further claims, controversies, or litigation involving the parties hereto regarding the plumbing system installed in the above-noted residence may or can arise in the future and that said settlement included funds specifically for the entire replacement of the polybutylene and Celcon plumbing system.

NOW, THEREFORE, for and in consideration of the terms herein, the undersigned parties agree as follows:

1. PAYMENT:

(a) The sum of $872,500.00 shall be paid by or on behalf of RELEASED PARTIES to the RELEASORS(S), and their attorneys of record.

(b) The settlement sums, as represented by settlement drafts and/or checks shall be tendered to Special Master JOHN R. GRIFFITHS, who shall receive the sums on behalf of RELEASOR(S).

(c) The settlement sums as represented by settlement drafts and/or checks shall be made payable to Special Master JOHN R. GRIFFITHS, TRUSTEE ACCOUNT, and tendered on or before June 9, 1985.

(d) On receipt of the settlement sums, JOHN R. GRIFFITHS shall be permitted to deposit the drafts, and/or checks into an interest bearing trust account on behalf of RELEASOR(S). The settlement funds shall not be withdrawn from the trust account or otherwise used for the benefit of RELEASOR(S) until all signatures to this agreement, the

RECITALS

(a) RELEASOR(S) are past or present owners of the real property commonly known as _____, which is located in the City of San Jose, County of Santa Clara, State of California, hereinafter referred to as the RESIDENCE.

(b) RELEASOR(S) have previously brought lawsuits against released parties, and others in the Superior Court of California, County of Santa Clara. In the above-noted lawsuits, RELEASOR(S) have alleged inter alia that the RELEASED PARTIES negligently, carelessly, improperly, or defectively performed, or failed to perform, plumbing work on the above-noted residence and/or supplied defective material, or fraudulently sold or misrepresented the residence, or otherwise committed some act, omission, fraud, misrepresentation, breach of warranty, or other breach of contract or are in some way responsible for damage to RELEASOR(S) because of an alleged defective polybutylene and Celcon plumbing system.

(c) RELEASED PARTIES deny the allegations of RELEASOR(S) as raised in the lawsuits, and each further denies the allegations of any and all cross-complaints in the lawsuits.

(d) RELEASOR(S) and RELEASED PARTIES, and each of them, understand that the liability of the RELEASED PARTIES, or any of them, for the above transactions, or any damage sustained by any party to this agreement or stranger hereto is disputed, and that the payment herein provided for is not to be construed as an admission of liability, which is expressly denied, and that this Release and Settlement Agreement arises from a compromise of said liability.

RELEASE AND SETTLEMENT AGREEMENT

PARTIES

I. The following parties are referred to as RELEASOR(S):

Name:

Street:

City, State:

II. The following are collectively referred to as RELEASED PARTIES:

1. United States Brass, Inc.
2. Wallace Murray Corporation.
3. Household Manufacturing, Inc.
4. Qest Products, Inc.
5. Lionel T. Wade, Individually.
6. Lionel T. Wade Company.

10. William Lyon Co., Inc.
11. Joe Amaral Plumbing, Inc.
12. H. K. Porter Company.
13. Celanese, Inc.

and any and all of their successors, any and all of their predecessors, officers, employees, heirs, administrators, executors, assigns and related business entities.

SUMMARY SHEET

PLASTIC PIPE WATER SERVICE FAILURES

Breakdown of Costs:

LOCATION	COSTS
Memphis, Tennessee	6.2 million
Napa, California	$208,000
San Antonio, Texas	50 million
El Paso, Texas	2 million
Irvine Ranch, California	38.1 - 38.25 million
Germantown, Tennessee	1.2 million (estimate)
TOTAL:	97.5 - 97.65 million

SUMMARY OF PLASTIC PIPE

WATER SERVICE FAILURES

The following is a summary of plastic pipe water service failures which have occurred throughout the United States.

MEMPHIS, TENNESSEE

This community used polybutylene from approximately 1972 to 1979. The pipe was used primarily for water service lines to the hookup to individual residences. Failures were recognized as early as 1972, and included stress cracks, pinhole leaks and cramps and creases. The water utility discontinued use, and is replacing the pipe as it fails. Estimated cost to the community is 6.2 million dollars.

NAPA, CALIFORNIA

This community used polybutylene and polyethylene from 1972 to approximately January, 1982. Polybutylene was used exclusively from 1972 to 1978, and polyethylene from 1978 to 1982. The city experienced failures which included sidewall cracks, pinholes, penetrations by pebbles, splits on the sides, stress failures and sheer breaks at a fitting. The City of Napa is replacing the plastic pipe as it fails, and the use of plastic pipe has been banned by the City Council. Estimated cost for the failures is $208,000.

SAN ANTONIO, TEXAS

This community has used polyethylene and polybutylene 2110. Polyethylene was used from 1966 to 1970, and polybutylene from 1970 to 1978. The pipe was used as standard material for all service lines and was used exclusively for new services as a replacement for copper. The failures which were experienced included pinholes, splits and sheers throughout the system. The city is replacing the plastic pipe en masse. At first, they only replaced it as the pipe failed, but then decided it was necessary to replace the entire system because of the extent of failure. The estimated cost to the city, as determined from a lawsuit which has been filed, is approximately 50 million dollars.

EL PASO, TEXAS

This community used polyethylene, 3406, Hyd-molecular. It was used for approximately eight years and began to be phased out in approximately 1979. No plastic pipe is used at this time. The failures included fine stress cracks, longitudinal cracks, caused by stress on the pipe itself. The water utility is replacing the pipes as they fail, and is not doing mass replacement. The estimated cost for the failures is approximately 2 million dollars.

SUMMARY OF PLASTIC PIPE

WATER SERVICE FAILURES

(continued)

IRVINE RANCH WATER DISTRICT, CALIFORNIA

This community used polyethylene beginning in 1961 and discontinued use in approximately November, 1982. It was used primarily in new development areas, and was not used to replace copper unless the whole line had to be replaced. Failures included the pipe splitting in half, which was attributed to a stress problem, longitudinal cracking and soil conditions. In addition, there was a hardening and shattering of pipe. A management decision was made to replace the pipe as it fails. The cost from the failures is approximately 38.1 to 38.25 million dollars.

GERMANTOWN, TENNESSEE

This community used polyethylene and polybutylene from approximately 1973 to 1978. Ninety percent of the plastic pipe was polyethylene. It was installed primarily in all new subdivisions. Failures from the pipe included breaking due to brittleness and snapping, usually very close to the connection at the main or the meter where there was the most stress. The pipe split around the circumference rather than longitudinally. Costs from the failures are estimated, due to the fact that this community is also involved in a lawsuit against the manufacturer. Estimated cost is 1.2 million dollars.

TOTAL ESTIMATED COSTS FOR FAILURES FROM THE ABOVE JURISDICTIONS:

97.5 - 97.65 million dollars

City fear: Plastic pipe lets poisons in

By Jane Hadley
P-I Reporter

The first time Alicia Berger, 29, drank a glass of water at the West Seattle house she was renting, she spit it out because it tasted so bad.

Soon, she and her boyfriend, Jeffrey Lewis, 38, found that their water was contaminated by xylene and toluene, two organic solvents commonly found in airplane glue, gasoline, paint solvents, plastics and other products.

As a result of five or six similar cases, the Seattle Water Department may stop using plastic water pipes, an official said.

The city already has tightened its policy within the past year on plastic water pipes, no longer installing them in industrial or commercial areas, said Jim Chapman, supervisor of water quality at the city Water Department.

Organic solvents

But now Water Department executives soon will discuss going even further and discontinuing their use altogether, he said.

The main problem with plastic pipes is that organic solvents can permeate the pipe, polluting the water they carry, said Roy Jones, an environmental scientist for the U.S. Environmental Protection Agency.

Typically, the ground around the pipe becomes saturated with a solvent, such as gas or oil or paint thinner, which passes through the pipe wall to the water.

A second problem is that certain kinds of adhesives used to join some plastic pipes also permeate the pipe and contaminate the water.

Plumbing code

The plumbing code requires that the right combination of adhesive and plastic be used, but Jones says it's hard for plumbing inspectors to know whether an installer has used the correct adhesive.

Chapman said the city began to use plastic pipe in the early 1960s and estimates that maybe half the city water lines serving residences are on plastic pipe today.

In the last two or three years, there have been about six cases in which residents have reported drinking water contaminated with organic solvents such as toluene, xylene and benzene, Chapman said.

Benzene is a known human cancer-causing agent, linked to leukemia. Xylene and toluene are

JOHN COLUMBERG / P-I PHOTO

Jeffrey Lewis and Alicia Berger had to leave a rental home because the water there was contaminated with organic solvents. Plastic water pipes may have been part of the problem.

Two leave rented house because city water there is contaminated

From Page A-1

not linked with cancer but can cause kidney, liver and central nervous system damage.

In all but one of the cases, the residents lived in commercial or industrial areas, Chapman said. But in one case, the home was in a residential neighborhood.

Chapman speculated that in that case somebody poured oil or some other petroleum product into the gutter and it leaked through an expansion joint in the concrete to saturate the soil around the water pipe.

In each case, the city replaces the plastic pipe that runs from the street to the property line with copper pipe. It's up to the property owner to replace the pipe from the property line to the house.

Berger and Lewis moved into a rented house last Nov. 28 on a sparsely populated, overgrown ridge in West Seattle just above Marginal Way Southwest. By Jan. 1, they had moved out.

The two were so upset by their experience they didn't even want to talk about it for several months, said Lewis, a teacher of Indian music.

He complained that officials at various agencies were slow to respond initially, never called back when they said they would, were timid and uninformative and tried constantly to limit their responsibility for the problem.

"Everybody was very nice, but nobody would make a commitment," he said. Meanwhile, the couple was driving 40 miles round-trip to shower every day, borrowing water from people across the street and eating elsewhere.

Berger, a graduate student at the University of Washington, and Lewis hired a private lab to test the water, because they felt the Water Department would not do a test.

But the Water Department crews digging up ground near the meter box along Marginal Way Southwest to install copper pipe, the soil was clearly contaminated and gave off a strong solvent odor, said Jones of the EPA.

Lewis said, "From 20 feet away you could smell this ground they were digging up. It stunk."

But though the Water Department did replace the pipe, nobody ever did anything about the contaminated soil.

In fact, Water Department crews started to cover over the new pipe with the old contaminated soil until Lewis questioned the wisdom of that move.

"Aren't you just asking for trouble?" Lewis asked. The crews then decided to haul the soil away and put clean dirt down instead.

Jones said he was at the site "strictly as an observer." Jane Lee of the Seattle-King County Department of Public Health said once she saw that the water department replaced the pipe, she considered her responsibility over.

Chapman said the Water Department's responsibility was only to replace the plastic pipe.

He said nobody checked to see whether the contamination is widespread or limited to the meter box area. And nobody checked the source of the contamination.

He said it would be hard to know where it came from, though he added, "Obviously, with the painting contractor next door, that would be suspicious." The meter box is adjacent to the property of Central Painting Inc. on Marginal Way Southwest.

Both Jones and Chapman said any soil contamination would be in the jurisdiction of the state Ecology Department. But the Ecology Department was never called about the case.

And Joan Thomas, director the Ecology Department's regional office in Redmond, said soil contamination is a problem that is rarely reported to her department. She said groundwater pollution almost always starts as soil pollution.

When asked whose responsibility the soil contamination would be, Thomas said: "I can't say it was anybody's responsibility. I'm saying I don't know."

Tom Hubbard, a water quality biologist for Metro, said he considers it important to follow up such reports of soil contamination. Hubbard has been meticulous in testing the shores of the Duwamish River the past several years trying to figure out where various river pollutants come from.

Jones of EPA said: "The problem is because of different jurisdictions since the delegation of programs back and forth, that has leaved some pretty big gaps in the system. I'm not saying they're right, but they exist."

Chapman said: "It's an area of mixed responsibilities. It's not entirely clear who does have responsibility. I agree it's not a terrific situation."

One person who has taken a stand on the source of the pollution is the owner of the house Berger and Lewis were renting. Landlady Carol Knox, a Cashmere resident, recently filed suit against Central Painting Inc.

Knox's Seattle lawyer, Linda Larson, said the suit alleges that the paint company released chemicals into the soil which ended up in the water line to Knox's house.

Though the new copper pipe put in by the Water Department reduced the levels of contamination, the drinking water is still contaminated, said Chapman.

Knox probably will have to replace at least some of the pipe on her property. To replace all of it up to her house, a long distance up a steep hill, would cost an estimated $23,000, said Knox's lawyer.

City halts use of plastic pipes for drinking water

By Jane Hadley
P-I Reporter

The Seattle Water Department has placed a moratorium on its use of plastic pipe that delivers drinking water.

"We're not using any until we do come to a final decision" about the safety of the pipe, said Jim Chapman, water quality supervisor for the department.

"We've been contacted by a number of people who claim to have further information."

Water contaminated

The moratorium follows the discovery by a couple renting a home in West Seattle that their water was contaminated with toluene and xylene, two substances commonly found in airplane glue, gasoline, paint solvents and other products.

When the department investigated, it found soil around the meter box contaminated with a strong-smelling solvent. The department then replaced the plastic pipe from the street main to the meter box with copper pipe.

Plastic pipe is a problem because it can be permeated by organic solvents such as gasoline or trichloroethylene, a widely used degreasing solvent. Also, certain glues used to join the pipes are toxic and permeate the pipe to contaminate the drinking water inside.

The city first began to use plastic pipe in the early 1960s for service lines that run from the mains in the street to meters, Chapman said. He estimated that about half the service lines in the city are some type of plastic pipe. The mains are not plastic.

Many lines from the meters to the houses probably also are plastic, Chapman said, but property owners are responsible for installing those.

Forbidding use of plastic for those lines would require a change in the plumbing code, which the City Council would have to do by ordinance.

Chapman said there have been six or seven cases in Seattle within the past two or three years in which drinking water was contaminated when organic solvents penetrated plastic pipe.

All but one were in primarily commercial or industrial areas, where the likelihood of gasoline spills and other soil contamination is greater than in residential areas.

Installations halted

Consequently, the city already has stopped installing plastic water pipes in commercial and industrial areas. The new moratorium applies to residential and all other areas.

Bob Giron, business agent for the United Association of Plumbers and Fitters Local No. 82 in Seattle, said yesterday that plumbers oppose the use of plastic pipe for drinking water.

"It's not delivering as pure an item as it should be," he said. "And from the workers' standpoint, the glues and solvents we have to use we feel are dangerous."

Reeves Journal - July 1985

Southwest Gas Replacing ABS Pipe in Gas Lines

PHOENIX, — Southwest Gas Corp. has been given the central business area top priority in its program to replace an estimated 2,300 miles of possibly defective gas pipe.

The utility acquired the gas distribution system from Arizona Public Service (APS) last November.

The first phase of the project is expected to require between three and four months and will depend on several contractors working simultaneously in various sections of the target area. Some of the work is already underway, according to John Hanenburg, program manager.

Utility officials noted that the program will involve all ABS-type plastic pipe. APS had used the pipe extensively in the Greater Phoenix area and in other parts of Arizona between 1959 and 1971.

Officials said the pipe constitutes about 23 per cent of the entire system. The whole replacement program will cost an estimated $120 million and will last about six years.

The ABS pipe was involved in an explosion in Phoenix last September that killed five persons and prompted an investigation. The probe revealed that the pipe was aging more rapidly than expected initially.

Reeves JOURNAL - JULY 1985

Oregon City Seeking $3 Million to Replace Broken Plastic Pipe

by Jim Norland

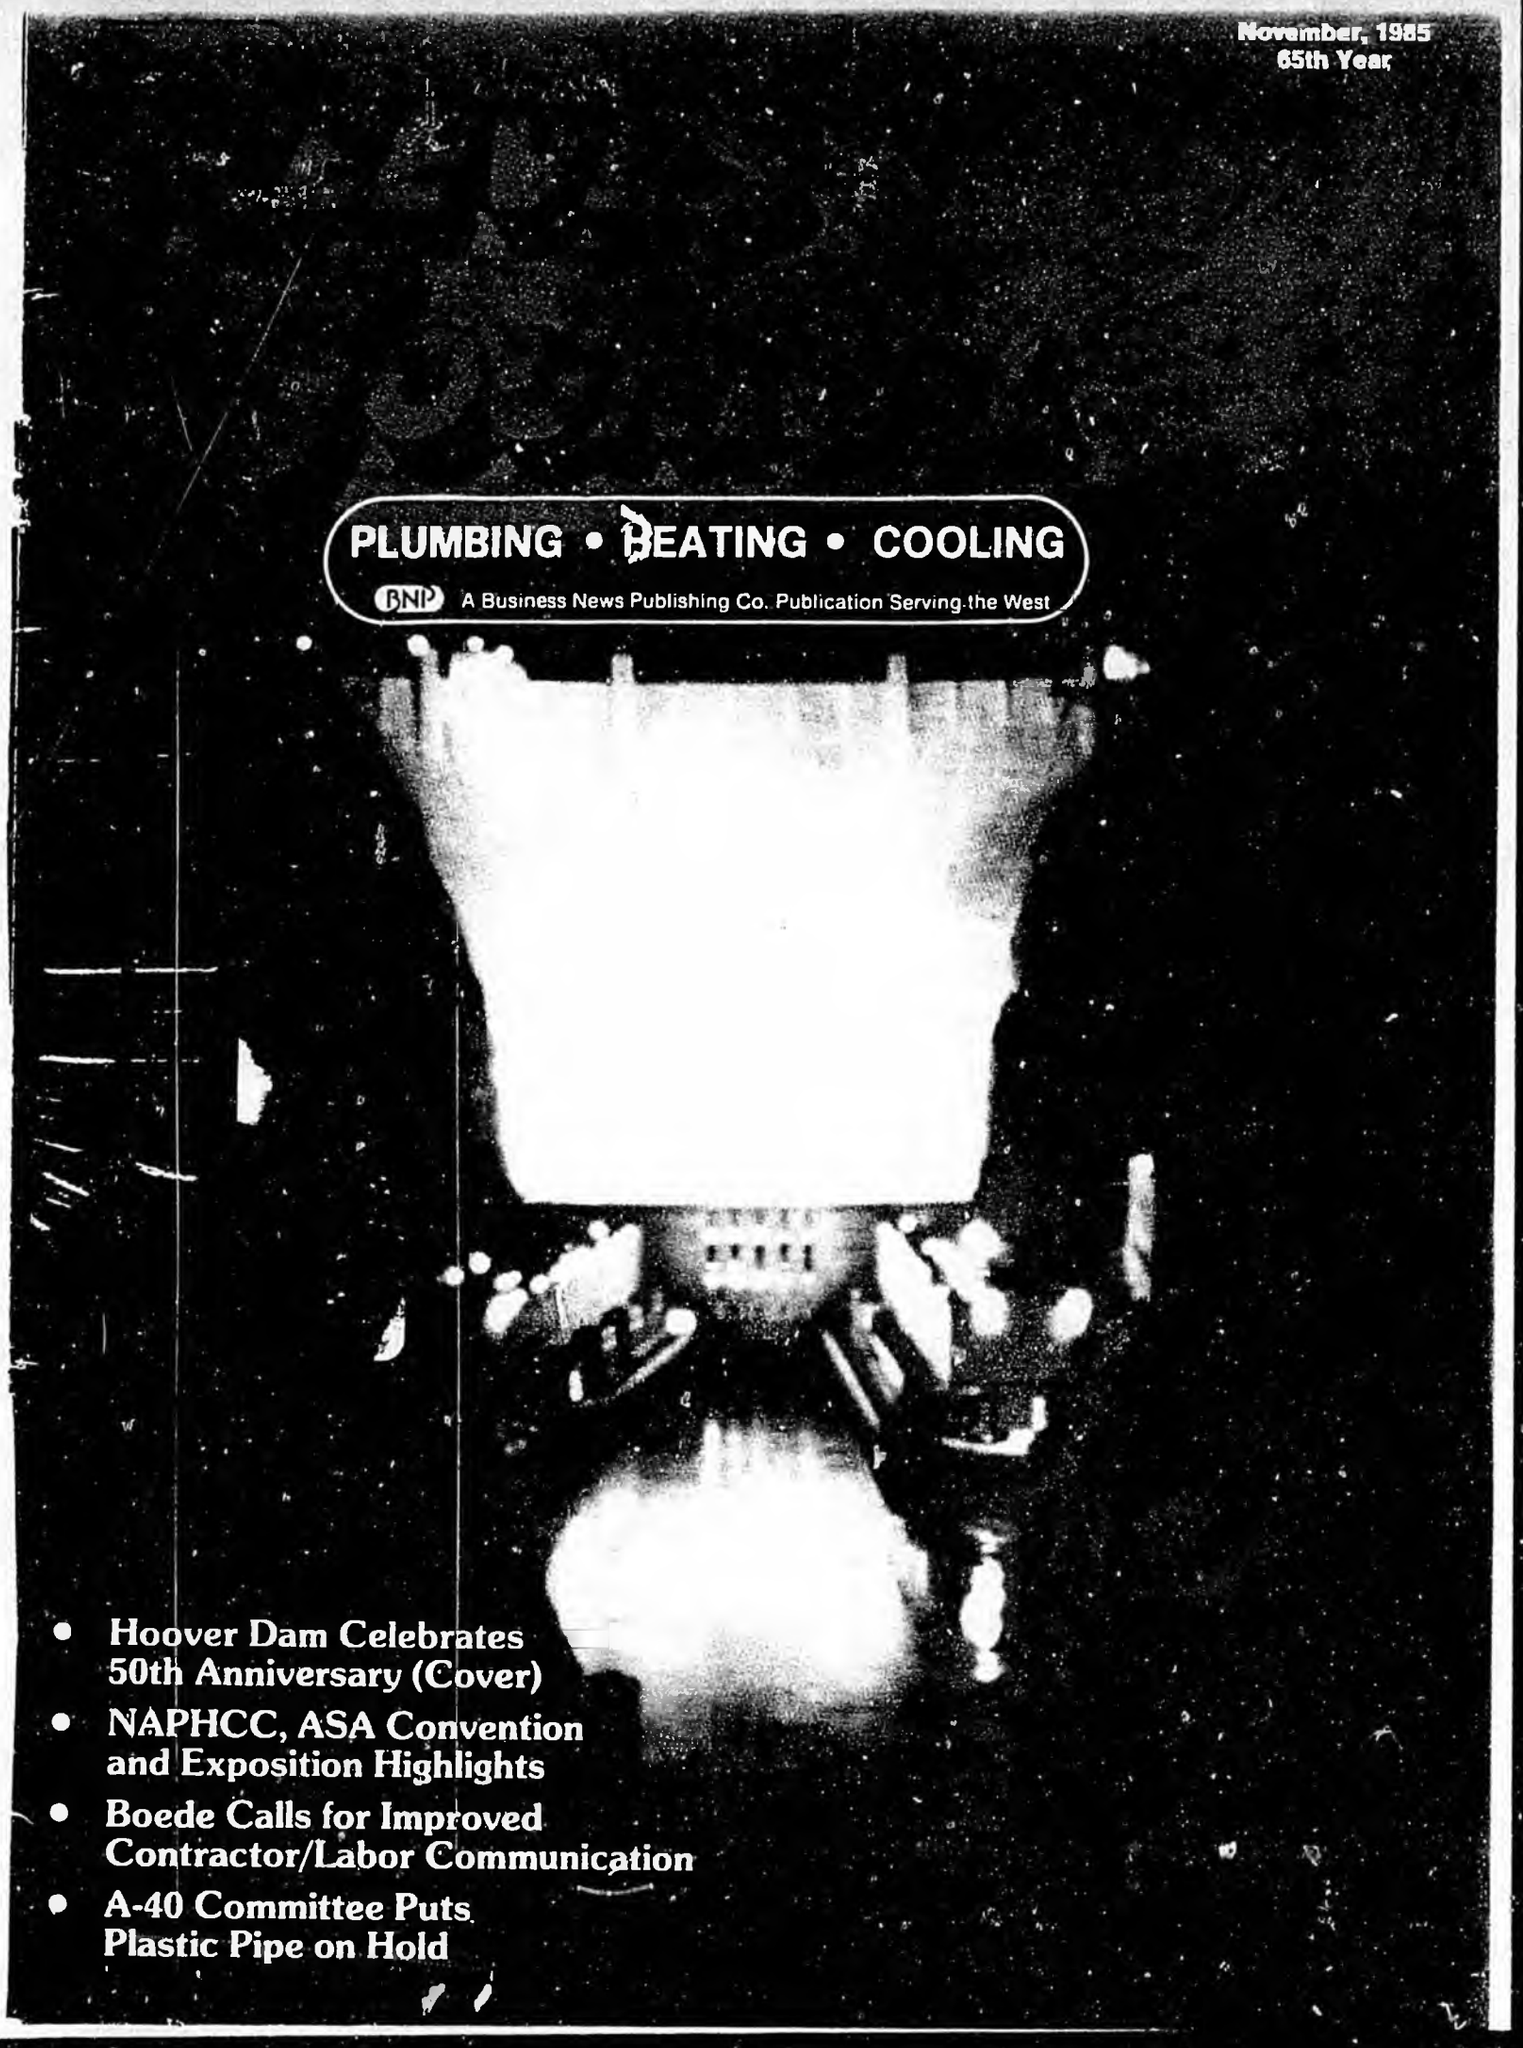
MEDFORD, Ore. — This southern Oregon city of 50,000 is asking seven suppliers of plastic pipe to reimburse more than $3 million in damages the city expects to sustain in replacing the polybutylene water pipe bought between 1971 and 1981.

Attorneys for the Medford Water Commission and the City of Medford told the suppliers by letter, "It would appear . . . that this water pipe does not meet the requirements, warranties or representations made by you at the time of sale."

The city and the water commission have recently discovered defects and consequent breaking of "numerous pipe," says W. V. Deatherage, a member of Frohnmayer, Deatherage, deSchweinitz, Pratt & Jamieson, P.C., Attorneys at Law, in Medford.

Deatherage has asked each of the seven suppliers to notify his firm by June 26 whether they want to reimburse the two government entities "for the damages they have suffered as a result of said defective pipe."

"The Medford Water Commission will be required to replace all of this water pipe, which it has estimated will be at a cost in excess of $2,000,000," Deatherage's letter continues.



Medford City Attorney Gene Clark told **Reeves Journal** that the total damage is expected to be "in excess of $3 million, but no one supplier is expected to be responsible for more than $2 million."

Letters identical to the one quoted went to The Flintkote Co., Pipe Products Group, Orangeburg, N.Y.; Clow Corp., Plastics Division, P.V.C. Plastic Pipe, Bensenville, Ill.; Western Products Co., Union City, Calif.; Hinds Supply Co., Beaverton, Ore.; Westflex Manufacturing Co., Division of Western Plastic & Rubber Co., Richmond, Calif.; Budge-McHugh Supply Co., Medford; and Consolidated Supply Co., Portland, Ore.

Calif. Attorney General Critical of IAPMO Decision

SACRAMENTO — California's attorney general has written a brief of amicus curiae in support of the anti-plastics factions involved in an appeal of a court decision requesting that an injunction ordered against the International Association of Plumbing and Mechanical Officials (IAPMO) in 1983 be extended to IAPMO's 1985 Uniform Plumbing Code (UPC).

A number of parties, including the State Building Constructio Trades Council of California (backed heavily by the United Association), filed suit in 1982 in an attempt to prevent IAPMO from circulating its 1982 edition of the UPC in California because of the addition of several new plumbing code changes which allowed plastic piping materials to be used for potable water within buildings for the first time under UPC guidelines.

The anti-plastics concerns attempted to stop circulation of the 1982 UPC in their lawsuit, which was also filed by the former director of the state's Department of Consumer Affairs, Richard Spohn, and a handful of environmentalist groups and individuals. The original suit alleged that IAPMO did not have the jurisdiction to make such additions to the code and that it was violati[illegible] the state's Business and Professions Code.

Los Angeles Judge Jack A. Crickard ruled in the county's superior court, however, that IAPMO was not in violation of any laws or alleged unfair business practices and ruled against the anti-plastics factions' efforts to stop the publication of the 1982 UPC.

Crickard based much of his decision in favor of IAPMO on his opinion that there was not sufficient evidence to back up the anti-plastics camp's claims that plastic piping could be hazardous to the public health. Crickard did rule in favor of an environmental impact report to provide further input and agreed to issue an injunction on the code calling for a disclaimer to be distributed with the 1982 UPC in California, stating that an environmental impact report is in progress and advising users of the newly added plastics materials to consult with their local officials as to the status of plastics.

IAPMO had already agreed to voluntarily print the disclaimer before the injunction was ordered.

The injunction was scheduled to be in effect only for the 1982 UPC. Now, as the 1985 UPC is being published (IAPMO issues a new update every three years), the plaintiffs in the case have attempted to continue the injunction through the appeals process.

California District Attorney John Van De Kamp issued his opinion, which has no enforcement powers, on Oct. 15. In his statement, Van De Kamp stated that he felt the appeals case in question falls "within the ambit of Business and Professions Code Section 17500" and that "IAPMO's conduct constitutes a violation of that section."

Van De Kamp called for the extention of the trial court's injunction to apply to the 1985 UPC and the 1985 IAPMO Research Directory (which lists approved products).

One of the primary contentions of the original lawsuit was that IAPMO did not have the authority to list products or grant product approval for products said to be in compliance with the standards of the UPC. Crickard rejected this claim and, in fact, praised IAPMO's efforts and professionalism in making such determinations, citing the input and testimony of the National Sanitation Foundation, which provides testing information for IAPMO and other model code writing bodies.

Van De Kamp's opinion challenges IAPMO's right to make such determinations and contends that the organization's operations should be governed under the Business and Professions Code.

A-40 Committee Puts Plastic on Hold

by Larry Dill

CAMBRIDGE, Mass. — In an effort to avoid becoming bogged down in a never ending materials debate that could slow progress on the American National Standards Institute's A-40 Committee on Safety Requirements for Plumbing, the committee voted during its Oct. 22-25 session here to withhold acceptance of plastic piping materials for use in domestic hot and cold water systems for potable use until it can receive more input on the subject from impartial, outside sources.

The action took place following a follow-up to the controversial discussions about plastic pipe at the committee's last session in July in Universal City, Calif. The July session of the A-40 Committee was highlighted by presentations from plastic pipe advocates and opponents. It was during the July session that both sides of the issue were provided with equal time to discuss the plastics issue.

The anti-plastics camp headed by the United Association presented a well organized and emotional program featuring its two key "expert witnesses," attorney Raymond Leonardini, and Dr. Marc Lappe, PhD., two of the key figures in the union-backed California Pipe Trades council's long running legal battle with the International Association of Plumbing and Mechanical Officials (IAPMO) over the use of plastic pipe in Uniform Plumbing Code (see page 24).

The Plastic Pipe and Fittings Association's participation in the July presentations consisted of a brief six-minute summary of its position on the issue of alleged permeation and leaching of plastic piping materials and the distribution of two documents supporting its position.

After much debate after the July program, PPFA, which had contended that it was not properly notified of the format of the July presentations (which was refuted strongly by A-40 officials), was extended a second invitation to present its case before the A-40 body during the October session. The presentations were established on a similar format with each side given 45 minutes to present its testimony. Following the testimonies equal time was also provided for rebuttals and question answering sessions.

This time it was the plastics advocates who rolled out their team of hired guns in the expert witness derby.

The United Association, which was called upon to make its presentation first, was content to have its legal counsel briefly state that the union felt it had adequately presented its case in July and that it did not feel further input was necessary to express its views on the plastics issue. The United Association then distributed new documents for the committee members' consideration including an opinion (which has no legal binding power) by California attorney general John Van De Kamp on the on-going IAPMO court case over the use of plastics in the Uniform Plumbing Code (see page 24). In his statement, Van De Kamp voiced the opinion that an injunction which called for the inclusion of a disclaimer notifying users of the 1982 UPC in California that an environmental impact report was in progress to study plastic products, be extended for distribution with the 1985 UPC in California.

The United Association also distributed copies of a study being conducted by scientific experts at the University of California, Berkeley. The study, commissioned upon the request of the state's Department of Health Services, is providing a review of recent literature and research on the permeation of plastic pipe. The materials distributed were released Sept. 30 and represent the first half of a study that is scheduled to be concluded by April 1, 1986.

Also distributed were copies of correspondence to Leonardini from a representative of the California Department of Housing and Community Development which included a recent press release explaining the suspension of the environmental impact report assigned to Versar, Inc., a Virginia based research firm. This was accompanied by an audit of the work performed by Versar before suspension of the project.

Plastics Testimony

The plastics proponents were keyed by PPFA representative Jack Lancaster, who repeated PPFA's position following the July presentations. Lancaster continued to state that "PPFA believes, as it has stated other times, that this committee is not the appropriate group to decide complex, scientific and technical issues with regard to plastics or with regard to any other materials."

"None of us has the professional expertise to decide issues like alleged permeation and leaching that have been raised against plastic pipe in this committee," Lancaster continued.

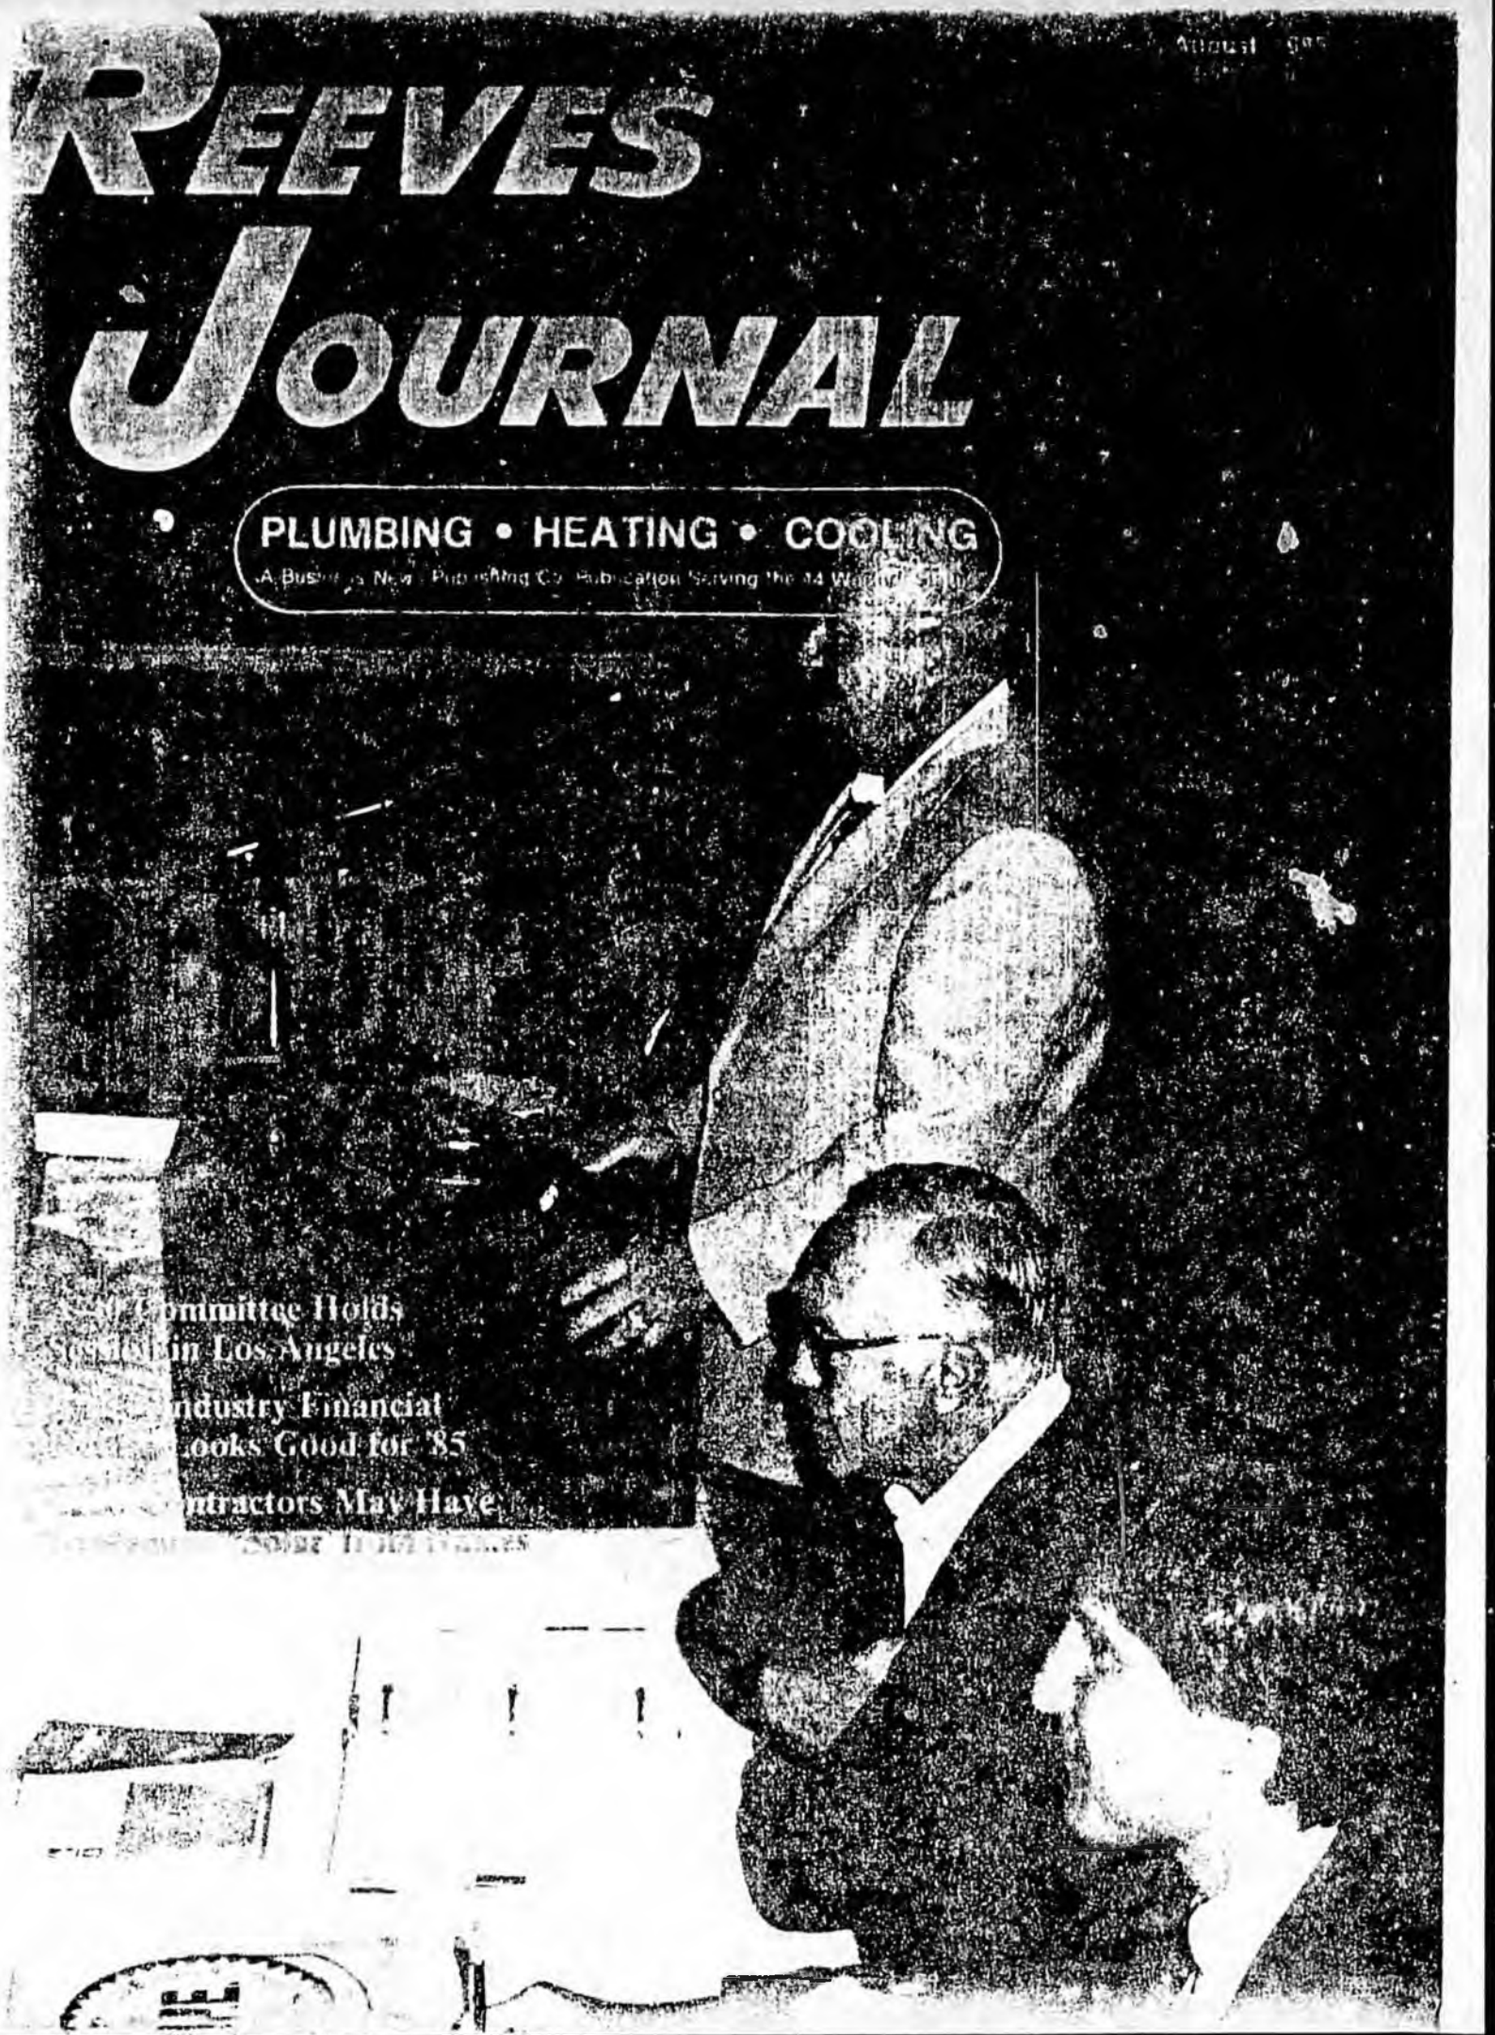
Apparently intent upon stressing its position that the members of the A-40 Committee did not have the technical or scientific background to make decisions on plastics materials, the PPFA representatives innundated the voting committee members with more than 50 documents on the plastics issue. They then presented three witnesses of their own to provide technical testimony on various aspects of the plastics issue.

PPFA's witnesses included Steven C. Packham, PhD, of Salt Lake City, a longtime toxicologist who has worked with a number of governmental and scientific agencies, who announced that he is currently conducting a study of all available data on plastics.

Another witness was Joseph Zicherman, PhD, of Innovative Fire Technology, Berkeley, who discussed his work with studies concerning plastic piping materials in fire stations.

The third PPFA witness was Alan Olson, PE, of B.F. Goodrich's chemical group. Olson addressed the charges of permeation in plastic piping.

Put on Hold



Following the presentations, the committee was still faced with the monumental task of forging ahead with the A-40 document's Table 3.1.3 which provides "standards for materials, equipment, joints and connections."

Realizing that the table, which must be passed before any definative progress can be made toward completing the document, contains hundreds of pro-

Continued from page 26

duct listings and their relating standards, the committee members were faced with the possibility of having progress slowed by debates on every plastics product that appears in the table.

In an effort to avoid such delays, Donald Dickerson, representing the American Society of Plumbing Engineers, suggested a motion which stated:

"Serious concerns regarding the suitability of plastic pipe to convey domestic hot and cold water for potable use have been brought before this committee.

"The committee has heard presentations and received materials regarding data which has been compiled and tests performed, planned and underway which deal with and address the 'complicated chemical, medical and public health questions' involved in such issues.

"It has been stated, and we believe, that much more work must be done in order to provide those data necessary to (make) a sound decision on these important matters.

"With all of the above in mind, the A-40 Committee is withholding acceptance of plastic pipe for use in domestic hot and cold water systems for potable use until such time as clear, definitive and impartial data are available which can substantiate its use for this purpose."

After acceptance of the motion, the committee members agreed that material from an outside source should be submitted and then studied before the committee made any decisions on plastics.

Refuting the charges by PPFA that the A-40 body is not capable of making the proper decisions on plastics, Dickerson noted that the body was qualified to make such determinations provided that it was given sound and impartial study results to evaluate. "I believe we have within this body the ability to analyze pretty technical reports," Dickerson said.

Vincent Doyle, co-chairman, said, "Collectively, we're probably the finest minds in the country in the plumbing industry."

PPFA's Richard Church protested the singling out of plastics materials and asked that all piping materials be studied. His pleas fell upon deaf ears. He continued his contention that the plastics industry would be willing to participate in such studies "if it was done across the board."

The A-40 Committee scheduled its next session for January in Tampa. At that time it will resume work on Table 3.1.3, which is nearly halfway completed with the exception of the plastics materials which have been placed on hold.

Materials Controversy Continues

Anti-Plastics Forces Bring Out Hired Guns in LA A-40 Session

by Larry Dill

UNIVERSAL CITY, Calif. — It was only fitting that the American National Standards Institute's A-40 Committee on Safety Requirements for Plumbing hold its latest meeting at the Universal Sheraton Hotel here July 23-25.

Overlooking the Universal Studio lots, soundstages and outdoor arenas used for western stunt shows and the like as part of the studio's tours, the hotel was the perfect site for an old fashioned shootout between the advocates and opponents of plastic piping materials. The only trouble with the shootout, however, was that it was as one-sided as Custer's debate with Sitting Bull. If it was a fight, it would have been stopped on cuts in the third round.

While the majority of the three-day exercise was dominated by tedious reviews of the A-40 Committee's Table 3.1.3 (Standards for Materials, Equipment, Joints and Connections) and discussions regarding the chapters pertaining to such products in the developing model code being formulated by the committee, the liveliest session took place on the opening afternoon when it was announced that there would be a 90-minute discussion on permeation of plastic piping materials, providing 45 minutes for both advocates and opponents of plastic pipe to speak, to be followed by a 10-minute question-and-answer session.

The first speaker called to the podium was Jack Lancaster, spokesman for the Plastic Pipe and Fittings Association (PPFA). Lancaster briefly outlined PPFA's position on the issue of pipe permeation and reviewed two documents — a review of the plastics industry's position on permeation (which had the joint letterheads of the Plastic Pipe Institute, the Vinyl Institute, the Uni-Bell PVC Plastic Pipe Association and PPFA) and a copy of PPFA's position that characteristics of water and soil should be considered when making materials selections.

The former document listed the advantages of using plastic piping materials and the latter stressed that proper evaluation of soil and water conditions would lead to responsible selection of materials. The conclusions of the second document stated that "in order to maintain a viable supply of potable water, thought must be given to the installation of affected materials in known or suspect soil and ground water conditions which may cause permeation, corrosion or structural failure of the pipe, tubing or fittings."

Jack Lancaster, Plastic Pipe and Fittings Association, reviews PPFA's position on pipe permeation.

The point of Lancaster's presentation, it appeared, was that all piping materials are subject to failure or permeation and leaching under particular circumstances.

Lancaster's statement was concluded in approximately six minutes and he sat down with nearly 40 minutes still alotted to him. The shortness of Lancaster's presentation was surprising to many of the committee members present at the session, including one who candidly told **Reeves Journal**, "I went to the bathroom and when I got back Jack was sitting down."

Opponents Speak

After Lancaster concluded his remarks and left the podium, chairman Vincent Doyle, representing the Mechanical Contractors Association of America as part of the joint committee with the National Association of Plumbing-Heating-Cooling Contractors as joint secretariats of the committee, called for the other speakers to step forward.

If Lancaster's presentation appeared to be surprisingly short and light to the committee members, what was to follow was a grand performance.

The committee members next witnessed a very organized, polished, professional and dynamic presentation by Raymond J. Leonardini, the attorney who has represented the California Pipe Trades (consisting primarily of United Association interests) in its legal battles with the International Association of Plumbing and Mechanical Officials (IAPMO) during the last three years over the addition of certain plastic pipe products to the Uniform Plumbing Code. He was followed by Marc Lappe, PhD and the chief consultant to the California Pipe Trades on matters concerning its charges that plastic pipe contains toxic materials which are hazardous to the health of the public.

Leonardini, in his best courtroom manner, delivered a moving presentation blasting plastic piping products and their usage in plumbing systems. He also called for the A-40 Committee members to use their own judgment to keep plastics from their model code document. Lappe followed with supporting statements from a health policy consultant's viewpoint, before Leonardini delivered the closing summation.

Toxic Spills

Addressing the subject of permeation, Leonardini cited statistics that estimate 300 toxic waste spills in California every three months. "You don't know where those spills are going to be," he said, "so the idea of analyzing permeation and saying not to put them (plastic pipes) in areas where there are known toxins" is similar to "closing the corral after the horses are out."

"How are you going to know where there is going to be a toxic spill?" Leonardini asked, labeling the committee members "public policy makers and public health officials."

The attorney then pointed out that while efforts are made to determine locations that were once the sites of hazardous wastes, several cases pop up each year where housing tracts have been found to be built on waste sites three or four years after their construction.

One of Leonardini's strongest contentions was that research performed by the American Water Works Company revealed that toxic vapors, particularly from gasoline products, can permeate plastic piping as well as liquids.

"Now where are you going to put pipe to avoid infiltration and permeation by vapors?" he asked.

Leonardini went on to discuss a recent lawsuit filed in the San Jose region concerning polybutylene piping system failures. Submitting a deposition on the issue for the record, Leonardini called the failure rate of PB "time dependent."

"Because of the chemical development of that pipe (PB), if you wait long

enough that particular installation will fail," he claimed.

Leonardini concluded his opening remarks and called upon Lappe, a former official with California's Department of Health and the chief consultant in the lawsuit brought forward by the California Pipe Trades Council and the state's former director of the Department of Consumer Affairs, Richard Spohn, who lent his name to the IAPMO lawsuit under the banner of the Department of Housing.

"I want to thank this group for giving me the opportunity to speak, and the United Association for bringing me here," Lappe said in his opening remarks.

Lappe later explained that the quality of drinking water is generally measured at its source in public treatment facilities. "We assume that nothing happens to it to aid and abet any levels of contaminants in transit," he added, charging that contaminants are being picked up through plastic piping systems.

"We also know of contaminants from metal ions and we are assuming that they are not raising the level of lead, copper or arsenic above the levels that are permissible from the source."

Lappe pointed to three studies conducted by the Pipe Trades Council (under his supervision), the American Water Works Company and the Vinyl Institute.

"What each of these studies found was that there are differences as clear as day and night between plastic and metal," he said. "Plastic permeates certain organic chemicals of health concern. Metal absolutely unequivocally does not."

Leonardini Summarizes

Leonardini followed with a tight, passionate conclusion that hit home with a number of emotional charges and pleas to the committee members.

The attorney challenged IAPMO (which has successfully defended its position on plastics against the Pipe Trades Council, et al in the courts, largely from a judge's ruling that no sufficient evidence has been produced to show any health hazards from plastic piping) and its 1982 UPC additions of plastics. He also questioned the validity of the National Sanitation Foundation which presented key testimony in IAPMO's California lawsuit.

Noting that IAPMO relies upon NSF testing, Leonardini said "NSF 14 is an inadequate standard for the evaluation and analysis of leaching characteristics in plastic pipe.

"Can you trust EPA? EPA is talking about relying on NSF. EPA has not developed drinking water standards for any of the chemicals that are involved."

Leonardini concluded by stating that all of the data is yet to be received and that it would probably take at least another year and a half to gather all information and comments on the conclusions.

"You have nothing to gain and everything to lose" by acting before governmental studies are completed, he said in closing.

John Woodward, Cast Iron Soil Pipe Institute, expresses his opinion during a discussion of the A-40 Committee's proposed product standards.

Confusion Begins

The polished presentation by Leonardini and Lappe was followed by Doyle's announcement that "in the interest of fairness to both sides and everyone who is on the committee," a 10-minute question-and-answer period would follow.

Lancaster returned to the podium and began to comment on the remarks made by the other two speakers by first acknowledging that he, indeed, represented PPFA and that the other speakers were employed to represent the interest of the United Association.

Lancaster's remarks were quickly met with an objection from Edward Brabec, executive vice president of the United Association. This was followed by Doyle's announcement that the remaining time would be limited to questions from the floor, not rebuttal statements.

Lancaster protested the procedures and then left the podium where Leonardini and Lappe proceeded to answer several questions from the committee members regarding their statements.

Very Convincing

To the members of the audience, it must have appeared as though the anti-plastic speakers clearly presented a very convincing argument for their case, while the plastic concerns failed to prove any of their contentions.

When confronted with the question of why Lancaster had failed to make a more comprehensive and prepared statement, PPFA attorney Robert Creamer and Lancaster both charged that they had no prior knowledge that speakers were going to be given 45 minutes each nor were they informed of the type of presentation Leonardini and Lappe were going to make.

While the plastics representatives claimed that they had not been contacted directly by the committee, but that a message was delivered through a third party, chairman Doyle told **Reeves Journal** that he did speak to Lancaster personally by telephone. William Abernathy, committee secretary, George Kaufman, co-chairman, and at least two A-40 members told **Reeves Journal** they had been told that PPFA was notified of the anti-plastics concerns' plans to appear at the meeting more than a month prior to the sessions.

Creamer told **Reeves Journal** that PPFA did not have any plans of making a similar presentation before the committee because the organization did not feel it was the proper venue to air such testimony.

"This group, regardless of what they call themselves or how they self-anoint themselves, is not competent to make these kinds of decisions, and we are not going to engage in a debate before the A-40 Committee on scientific and technical matters.

"The union can bring in people to talk about whatever they want, but we are not going to do anything that would imply that this committee is competent enough to make those kinds of judgments.

"For us to bring in toxicologists would be, in effect, to submit this issue to this group; and it doesn't belong here. This may be a safety code in terms of traditional concern of plumbers for safety, in terms of what is a safe plumbing system, but I don't believe that makes this group competent to decide whether a particular kind of plastic pipe leaches or is permeable to

Final Arguments Presented In Calif. Suit Challenging AC Efficiency Rates

by Larry Dill

SACRAMENTO, Calif. — A Sacramento county superior court judge is expected to deliver a final decision in early October on the lawsuit pitting air conditioning manufacturers against the California Energy Commission (CEC) over the CEC's proposed 1988 and 1993 minimum energy efficiency standards.

Judge James I. Morris heard final arguments from attorneys on July 16, and agreed to allow both sides of the litigation to file final closing briefs within 15 days. Upon filing of the briefs, which will be limited to material presented during the July 16 court session, the parties involved in the suit will then have 30 days to file written responses. Upon review of the material submitted, Morris will then deliver his written decision, probably in early October.

The suit was filed by Lennox Industries, Inc., Bard Manufacturing Co., Heil Heating and Cooling Products and Borg-Warner Central Enviromental Systems, Inc.. In a related action, American Standard's Trane Division has petitioned the CEC to reconsider its decision to adopt a minimum seasonal energy efficiency ratio (SEER) of 8.9 — beginning in 1988. The SEER would raise to 9.9 in 1993. California's current minimum SEER is 8.0.

The majority of the July 16 session centered around closing arguments by attorneys Thomas Knox, who represents Lennox Et Al. and Bruce Dodge, legal counsel for Trane.

The plaintiffs' attorneys focused their attention on charges that the CEC staff was selective in its use of reference materials, particularly data from the Department of Energy, and claims that the proposed regulations would drastically increase costs while resulting in products and requirements that would not be cost effective for consumers.

"We're very optimistic about the outcome," David F. Lewis, director of marketing for Lennox Industries, told **Reeves Journal.** "We think that the regulations will end up costing the consumer a lot more money. The key is that we don't feel it will be cost effective for the consumer."

Lewis also pointed out that the manufacturers contend CEC reached its decision through the selection of data that would only support its position.

Knox outlined a number of points raised in previous testimony which are being challenged by the manufacturers.

While questioning the methodology used to evaluate such factors as feasibility of compliance, discount rates, maintenance costs and particularly the "design life of units," Knox zeroed in on his clients' contention that the CEC did not have sufficient evidence to develop its regulation. Knox contended that CEC used the wrong "baseline" to determine the cost efficiency of air conditioners that would be subject to the regulations.

"They used the wrong yardstick to measure the cost effectiveness of the 1993 standards," Knox said. "There is no evidence considered that states SEER 9.9 will be cost effective in 1999," he added.

A large portion of the final session was spent arguing the language used in the regulation. The primary question was whether units covered by the regulation should be classified as residential or commercial or single and triple phase air conditioners.

Dodge stated that no data was submitted on a commercial category and that there is no evidence to support the contention the proposed SEERs would be cost effective. He suggested that the regulation be sent back to the CEC staff to either add language specifying commercial air conditioners or that commercial units be exempted from the action.

Exemption would be more favorable, he argued, because of the projected difficulty in enforcing such distinctions, particularly in light of the possibility of units designated for commercial applications being used for residential installations.

In challenging the CEC's selection of data in its regulation formulation process, Knox contended that the CEC staff ignored workshop testimony and input from industry sources and instead selectively referred to data that only tended to back its position on SEER minimums, particularly information from DOE.

Alan B. Lilly, deputy attorney general representing the CEC and the State of California, responded that CEC didn't rely on testimony supplied by industry because it was "just the opinions of their engineers."

CEC has been joined in the defense of the proposed regulation by Carrier Corp. and the Natural Resources Defense Council.

A-40 Committee

Continued from page 10

such a point that it should not be used in plumbing systems.

"No one on that committee is competent to make those kinds of decisions, and it's ironic to note that through all of the procedures they have said they are incompetent to decide whether lead should be used. They have decided they aren't competent to decide whether certain kinds of asbestos products should be used in the code. They have said they are not competent to make judgments whether certain kinds of pipe assemblies are fire retardant. They have denied competence to determine all kinds of issues, but yet when it comes to these extremely complex, complicated and controversial issues about plastic pipe, then all of a sudden there is a group of people that is in there who deem themselves highly competent to decide if plastic pipe should be used.

"And that's what we have, but we simply aren't going to submit that issue to this group. So we're not going to come in with our own dog and pony show."

Both Lancaster and Creamer contend that governmental agencies such as EPA and the Department of Health should be involved in the study and evaluation of the issue.

Couldn't Rebut

Lancaster protested the fact that he was not provided the opportunity to answer the charges made by Leonardini and Lappe, stating that they made several misstatements of fact.

As an example, he countered that the lawsuit in San Jose is centered around a mechanical fastening system, not issues concerning cancer. "He was pulling apples and oranges," Creamer added of his legal counterpart.

When it was pointed out to the plastics spokesmen that a member of the audience would surely have to be influenced by the presentation made by their foes, based on PPFA's lack of performance, Creamer concluded, "You got the message that the sponsors and the union people wanted you to get because, again, we were never told what was going to happen and they had a canned, rehearsed, slick presentation. The other thing to remember, and I'll stop saying it eventually, is that this is not the forum for that kind of thing."

Regardless of the contentions of PPFA, they may find that their counterparts on the committee left with a very strong impression from the presentation made by Leonardini and Lappe. If they were keeping score in the grandstands, the committee members may have concluded that it was no contest. The hired guns scored a TKO.

BRIEF OF AMICUS CURIAE
IN SUPPORT OF APPELLANTS'
FRIENDS OF THE EARTH, ET AL.

* * *

INTRODUCTION

This Amicus Brief is filed by John K. Van de Kamp, Attorney General of the State of California, pursuant to his duties as chief law enforcement officer to assure uniform and adequate enforcement of state laws. (Cal. Const., art. V, § 13; Daily v. Superior Court (1977) 19 Cal.3d 132, 149-150.) The specific focus of this brief will be the applicability of Business and Professions Code sections 17500, et seq. to the type of conduct and type of defendant at issue in this case.

The central issue in this case is the applicability of section 17500 of the Business and Professions Code, forbidding false and misleading advertising, to the publication by the International Association of Plumbing and Mechanical Officials ("IAPMO") of the Uniform Plumbing Code ("UPC") and the IAPMO Research Directory. The Attorney General believes that Business and Professions Code section 17500 is applicable to these activities of IAPMO.

STATEMENT OF FACTS

The facts have been set out at length by the parties in their briefs, and will be reviewed only briefly here, as they are germane to the applicability of Business and Professions Code section 17500.

IAPMO is an organization made up of plumbing inspectors, and governmental entities and officials who enforce or administer plumbing codes, or who regulate plumbing, heating, air conditioning, and related construction matters. (Complaint, ¶ 10; Answer, ¶ 6.) IAPMO publishes a model plumbing code called the Uniform Plumbing Code, or UPC. The UPC has remarkable prestige and influence in the plumbing industry. Testimony shows that it is regarded as the industry bible, and is used widely by contractors and architects. (R.T. pp. 304-311, 388.) It is also used widely by government. The evidence

demonstrated that the UPC is widely carried by local plumbing inspectors in the field; in California, inspectors very often carry the UPC in place of the California Administrative Code sections relating to plumbing. (Id.) Many jurisdictions use the UPC, either as the basis for their plumbing codes, or by simply adopting the UPC by reference. California is among these jurisdictions, in that state law provides that the California Department of Housing and Community Development must adopt a plumbing code that imposes substantially the same requirements as the most recent edition of the UPC. (Health & Saf. Code, § 17922(a).) Evidence in the record, then, shows that the UPC is recognized, used and substantially relied upon both by private industry and by local and state government.

The UPC itself makes statements regarding the degree and type of reliance that may be made on the UPC. The UPC states that its purpose is to provide "minimum requirements and standards for the protection of the public health, safety and welfare." It also carries the IAPMO seal, bearing the inscription, "plumbing safety." (Complaint, ¶ 11; Answer, ¶ 7.)

IAPMO also publishes a Research Directory. While the UPC lists materials that may be used for specific purposes (e.g., copper piping of one-inch diameter may be used for certain applications in home plumbing), the

Research Directory lists specific products that IAPMO states are acceptable for use under the UPC (e.g., "X" brand of one-inch copper piping is acceptable for use in the applications listed in the UPC). (Respondent's Brief at p. 2.) IAPMO also affixes its seal of "plumbing safety" to the Research Directory. (Complaint, ¶ 11; Answer, ¶ 7.) The Forward to the Research Directory also states that a listing is a representation by IAPMO that the listed product has been found to "meet or exceed applicable standards and requirements of the latest edition of the Uniform Plumbing Code." (Exh. 7.)

In compiling and publishing the UPC and Research Directory, IAPMO reviews products for compliance with what IAPMO regards as "applicable recognized standards" as well as the UPC requirements. (Respondent's Brief, p. 17.) IAPMO also does a certain amount of quality control of its own on the products it lists, performing unannounced inspections at listed manufacturers' plants. (Id., at p. 18.) IAPMO recognizes that inspectors use the IAPMO publications to evaluate products. (Id., at p. 17.) However, IAPMO does no testing of the products it lists, although it sometimes requires independent laboratory testing to be done of some products. (R.T. pp. 676-677.)

IAPMO requires, and receives, a fee from any manufacturer seeking to have a product or products listed in

the IAPMO publications. In fact, the UPC is totally paid for by the fees paid by manufacturers. (Complaint, ¶ 15; Answer, ¶¶ 6 and 9.)

ARGUMENT

I

IAPMO IS ENGAGED IN ACTIVITIES THAT COMPRISE THE PERFORMANCE OF SERVICES WITHIN THE MEANING OF BUSINESS AND PROFESSIONS CODE SECTION 17500

A. The Status of IAPMO As a Nonprofit Organization Is Not Relevant

IAPMO argues that it is not engaged in the sort of activity--namely disposing of a product or performing a service--that is covered by Business and Professions Code section 17500. As support for this argument, it cites the fact that it is a nonprofit organization, which makes no profit on the publication and sale of its publications. This argument is irrelevant.

The applicability of section 17500 depends upon the nature of the activities engaged in by a person or entity, not upon the person or entity performing those activities. Whether a corporation is a for-profit or a nonprofit corporation has no bearing on the question of whether or not it offers goods or services for sale. As an example, if a charity sells goods of some kind to raise funds, and it makes a false or misleading statement in selling them, then

section 17500 would apply. The statute simply makes no exemptions for nonprofit organizations; it applies, on its face, to any person who makes false or misleading statements in the course of selling goods or services. The provisions of IAPMO's corporate charter, or the state of its balance sheet, are irrelevant. It is IAPMO's activities and intent that are germane here.

B. IAPMO Has Disseminated Statements With the Intent to Dispose of Goods or Services

IAPMO also argues that it has not made any statements with the intent of disposing of goods or services, as required by the statute. This is not correct.

It is true that IAPMO does not make the statements at issue in this case with the intent of disposing of piping or other construction materials that it manufactures itself. IAPMO appears to argue that it simply acts as a neutral umpire, impartially calling balls and strikes, and then just reporting the score, with no intent as to how its calls affect the salability of listed products. This argument does not square with what IAPMO actually does. IAPMO knows that it is widely and heavily relied upon by government and industry. It is well aware that contractors may select products, and building inspectors approve them, because IAPMO lists them. Indeed, IAPMO takes considerable pains to ensure that government and industry will rely on IAPMO's

listings. IAPMO observes listing procedures, reviews products, and inspects some manufacturers. It makes representations that it is competent to evaluate the safety and fitness of products, and that the products it lists may be trusted to meet applicable standards and to meet minimum safety requirements in the listed use. Were this not true, IAPMO's publications would not be purchased and its primary activity and purpose would vanish.

IAPMO here is in the role, not of a direct seller of goods, but of an endorser of goods, an entity that presents itself as an expert and presents its expert evaluation of products it evaluates. It cannot avoid responsibility for its representations simply by saying that it does not manufacture the products it endorses.

A similar argument was rejected in Hanberry v. Hearst Corp. (1969) 276 Cal.App.2d 680. Plaintiff in that case alleged that she had purchased defectively designed shoes bearing the Good Housekeeping Seal. Defendant argued that it had no responsibility for any consequences, since its seal constituted nothing more than a statement of opinion. Rejecting that argument, the court said:

> "Respondent was not the seller or manufacturer of the shoes; it held itself out as a disinterested third party which had examined the shoes, found them satisfactory, and gave its

endorsement. By the very procedure and method it used, respondent represented to the public it possessed superior knowledge and special information concerning the product it endorsed. Under such circumstances, respondent may be liable for negligent misrepresentations of either fact or opinion." (276 Cal.App.2d at p. 686.)

IAPMO is similarly responsible for its representations concerning the safety of plastic pipe.

More importantly, IAPMO is in the business of selling its own services as a product endorser. It is with intent to dispose of its services as an endorser that it makes its statements that the products it lists meet applicable requirements and are safe. Having presented and established itself as an expert on plumbing codes, IAPMO actively attempts to preserve that image. As a result, manufacturers come to IAPMO to be evaluated and listed, and they pay for the IAPMO seal and the IAPMO endorsement that their products may be relied upon to meet all applicable standards and to meet minimum safety requirements.

The situation of IAPMO as an endorser, selling its services as an endorser, falls within the ambit of section 17500 as surely as if such services as writing wills or repairing cars were being sold. The statute requires only that a person make certain kinds of statements with the

intent to sell goods or services for section 17500 to be applicable. IAPMO meets this test. It publishes the UPC and the Research Directory publications, which state that certain materials and products meet applicable standards and are safe, with every apparent intention that these publications will be widely bought and relied upon. IAPMO also evinces every intent that manufacturers avail themselves of IAPMO's services as an endorser, and that they pay for these services. This meets the test of section 17500.

This office has held that section 17500 is not limited to "misrepresentations in commercial situations involving a quid pro quo." (66 Ops.Cal.Atty.Gen. 40, 46 (1983).) That opinion dealt with charitable solicitations, but noted the broad sweep of the section:

> "The general purport of section 17500 evident from its language is to protect a person from being deceived or misled when statements and representations concerning the disposing of property or the performing of services seek to induce such person to expend money for a result he desires." (Id., at p. 46.)

IAPMO's publications unquestionably have such effects. Manufacturers surely would not pay to have their products listed if such listing did not have a positive effect on sales.

II

IAPMO'S STATEMENTS ARE MISLEADING WITHIN THE MEANING OF BUSINESS AND PROFESSIONS CODE SECTION 17500

A. Section 17500 Prohibits Untrue and and Misleading Statements

Business and Professions Code section 17500 makes it unlawful for any person to make any statement which the person knows or by the exercise of reasonable care should know to be untrue or misleading in order to dispose of goods or services. It is not necessary that any person be misled by the statements; the gravamen of the offense is the making of untrue or misleading statements, and the offense is "complete without regard to whether or not anyone is deceived or damaged." (In re Application of O'Connor (1927) 80 Cal.App. 647, 652.) A statement is impermissibly untrue or misleading if the statement merely has the capacity to deceive members of the public:

> "A statement is false or misleading if members of the public are likely to be deceived. Intent of the disseminator and knowledge of the customer are both irrelevant. Referring to both section 17500 and Civil Code section 3369 [the predecessor to section 17200], it has been said: 'The statute affords protection against the probability or likelihood as well as the actuality of deception or confusion.'" (Chern v. Bank of America (1976) 15 Cal.3d 866, 876; emphasis added.)

See Fletcher v. Security Pacific National Bank (1979) 23 Cal.3d 442, 451; Ball v. American Trial Lawyers Assn. (1971) 14 Cal.App.3d 289, 310; People ex rel. Mosk v. Lynam (1967) 253 Cal.App.2d 959, 965-966; People v. Wahl (1940) 39 Cal.App.2d Supp. 771, 773. These cases clearly indicate that an action predicated on violations of section 17500 is not the same as an action for fraud or common law deceit: intent to deceive, reliance, and damage are not elements of a section 17500 cause of action. (See also People v. Superior Court (Olson) 1979) 96 Cal.App.3d 181, 190, 198, cert. den. (1980) 446 U.S. 935.)

In determining whether a representation has the capacity to deceive, the courts look to the least sophisticated members of the public. (Exposition Press, Inc. v. FTC (2d Cir. 1961) 296 F.2d 869, 872.[1/] Although a statement may not deceive or mislead a sophisticated consumer, the statement may be misleading or deceptive to others who are less experienced or more vulnerable. As the United States Supreme Court stated nearly fifty years ago:

> "The fact that a false statement may be obviously false to those who are trained and

---

1. Because of the similarity between California and federal statutes in the area of deceptive business practices, decisions of federal courts are more than ordinarily persuasive. (People ex rel. Mosk v. National Research Co. of Cal. (1962) 201 Cal.App.2d 765, 772.)

experienced does not change its character, nor take away its power to deceive others less experienced. There is no duty resting upon a citizen to suspect the honesty of those with whom he transacts business. Laws are made to protect the trusting as well as the s spicious. The best element of business has long since decided that honesty should govern competitive enterprises, and that the rule of caveat emptor should not be relied upon to reward fraud and deception." (FTC v. Standard Education Society (1937) 302 U.S. 112, 116.)

Accordingly, courts have ruled that:

"The law is not made for experts but to protect the public, -- that vast multitude which includes the ignorant, the unthinking and the credulous, who, in making purchases, do not stop to analyze but too often are governed by appearances and general impressions." (Aronberg v. FTC (7th Cir.1942) 132 F.2d 165, 167.)

IAPMO's statements may not be actively false, only misleading or incomplete. However, the law provides that words and sentences may be literally and technically true and still be used in a manner to mislead or deceive the

public. (FTC v. Sterling Drug, Inc. (2d Cir. 1963) 317 F.2d 669, 675; Koch v. FTC (6th Cir. 1953) 206 F.2d 311, 31.) If a representation is susceptible to both a misleading a truthful interpretation, the representation will be construed against the person making it. (Murray Space Shoe Corp. v. FTC (2d Cir. 1962) 304 F.2d 270, 272; Rhodes Pharmaceutical Co. v. FTC (2d Cir. 1953) 208 F.2d 382, 387, mod. for other reasons, 348 U.S. 940.) As the Court of Appeal has stated:

> "'The use of a word having a double meaning is a common device of those desiring to deceive or mislead others. One who does this cannot escape the charge of misleading or deceiving by saying that to him or as he meant the words, they were true.'" (Garvai v. Bd. of Chiropractic Exmrs. (1963) 216 Cal.App.2d 374, 379, citing Smulson v. Bd. of Dental Exmrs. (1941) 47 Cal.App.2d 584, 590.)

Further, even the failure to disclose information can be actionable, for as the California Supreme Court has noted:

> "[T]he omission of crucial information can be as misleading as a direct misstatement of fact." (Ford Dealers Assn. v. Department of Motor Vehicles (1927) 32 Cal.3d 347, 363-364.)

* * * * * *

The listing by IAPMO of certain plastic piping in the UPC and the Research Directory is such an incomplete, and therefore misleading, statement. By listing them in the Research Directory for use for potable water, IAPMO has brought plastic pipe products within the representation made as to all listed products, namely that it meets all applicable standards. By listing it in the UPC, IAPMO has brought plastic piping within the statement in the UPC that materials listed therein meet minimum safety requirements.

In the case of plastic piping for drinking water uses, such statements are, at best, incomplete when made in California. Plastic pipe is not approved for use in California in carrying potable water inside structures; plastic pipe therefore does not meet all applicable requirements in California. Any generalized statement that materials listed in the UPC meet all applicable requirements is false as to this use of plastic pipe in California; it is certainly a statement so incomplete as to be misleading. The carefully self-cultivated influence of IAPMO makes it even more likely that its listing of plastic pipe in the UPC and the Research Directory will mislead the many persons in government and private industry who use the IAPMO publications into assuming that the listed materials and products are acceptable in California for the uses IAPMO lists. This is more than sufficient to bring IAPMO's statements within the ambit of section 17500.

III

THE INJUNCTION SHOULD BE EXTENDED TO THE 1985 UPC

The applicability of section 17500 to IAPMO's conduct in this case is not an academic question of law, but a vital matter of public safety. The State of California is deeply concerned about the possibility that known or suspected human carcinogens may enter the drinking water of families and individuals because of the use of plastic piping for the carrying of potable water in homes. The state is sufficiently concerned to take the unusual step of researching and preparing a full environmental impact report (EIR) on the use of this building material for carrying water people drink, bathe in, and cook with. See judgment entered by Honorable Judge Crickard on January 24, 1984, pages 2-3.) The state has not yet approved plastic pipe for certain drinking water uses precisely because of the unknowns and the risks, and the state is attempting to ensure that sufficient time and sufficient effort is taken to evaluate the risks before it does so approve plastic pipe.

It was in this context of many unknowns and substantial potential risks that the trial court issued its injunction requiring that IAPMO inform all users of the 1982 UPC that plastic pipes are not approved for certain potable

water uses in California. The injunction reflects concerns the trial court obviously must have had for protection of public health and protection of the public against possible exposure to carcinogenic chemicals.

The injunction was well founded and, indeed, compelled by the evidence in the case. However, given the showing made by appellants, the trial court erred in limiting the injunction to the 1982 UPC and Research Directory. Under a proper application and interpretation of Business and Profession Code section 17500, the injunction should be continued until an appropriate change in circumstances occurs.

The injunction provisions connected with section 17500 create a different situation from the normal request for an injunction. Under Business and Professions Code section 17535, a court may issue an injunction upon a finding that section 17500 (or other sections of that code dealing with false advertising or unfair business practices) has been violated. The finding of a violation is all that is required; no showing of irreparable harm need be made, and no balancing of the equities need be done. Rather, a rebuttal presumption of irreparable harm arises in such a case. (IT Corp. v. County of Imperial (1983) 35 Cal.3d 63.) In effect, the Legislature has itself decided the questions of harm and of the balance of equities, and has decided that

whenever section 17500 has been violated, an injunction may issue.

Here, a very convincing showing was made that IAPMO's conduct in publishing the 1982 UPC and the Research Directory violated section 17500. The trial court very properly issued an injunction requiring appropriate disclaimers regarding the use of plastic pipe for potable water uses in structures. However, this injunction was limited to the 1982 editions of these publications, and automatically terminated when the 1985 editions were published. This was an error on the trial court's part.

The identical facts exist as to the 1985 editions of the UPC and Research Directory as existed as to the 1982 editions. The influential and well known IAPMO is widely circulating publications that imply that plastic pipe is acceptable and approved for use in carrying potable water. It expects that these publications will be relied on in both the public and private sector and, indeed, actively encourage such reliance. IAPMO circulates these publications in California, a state in which it knows that plastic pipe is not accepted for certain of these uses and is being studied by a government agency for possible health hazards, including cancer. IAPMO does not inform its California readers of what it well knows, that they cannot rely on IAPMO's implied representations of acceptability and

safety as to plastic pipe for drinking water uses in California. Now, as when the injunction issued, an EIR is being prepared. Neither the facts nor the law has changed.

Where a violation of section 17500 has been shown, and where identical facts exist to those that existed when the injunction was issued, the injunction should not be terminated but should continue until either the underlying facts or the underlying law change significantly. Amicus believes that the injunction should be extended to apply to the 1985 UPC and Research Directory.

* * * * * *

CONCLUSION

The Attorney General believes that this case falls within the ambit of Business and Professions Code section 17500, and that IAPMO's conduct constitutes a violation of that section. Accordingly, the Attorney General feels that the trial court's injunction should be extended to apply to the 1985 editions of IAPMO's publications.

DATED: OCTOBER 15, 1985

Respectfully submitted,

JOHN K. VAN DE KAMP, Attorney General
of the State of California
ANDREA SHERIDAN ORDIN,

COUNTY CLERK

SUPERIOR COURT OF THE STATE OF CALIFORNIA

FOR THE COUNTY OF LOS ANGELES

MARIE SHIBUYA-SNELL, DIRECTOR OF THE CALIFORNIA DEPARTMENT OF CONSUMER AFFAIRS, FRIENDS OF THE EARTH, CONSUMER FEDERATION OF CALIFORNIA, STATE BUILDING AND CONSTRUCTION TRADES COUNCIL OF CALIFORNIA, AND AILEEN ADAMS, Plaintiffs, vs. INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIALS, a California corporation, and DOES I through XX, Defendants.	CASE NO. C 395 294 JUDGMENT EXTENDING AND MODIFYING INJUNCTION

The above-captioned matter was duly and regularly called for trial on December 12, 1983, in Department 32 of the Superior Court, the Honorable Jack A. Crickard, Judge Presiding. Roger Dickinson, Esq., appeared on behalf of plaintiff Marie Shibuya-Snell, Director of the California Department of Consumer Affairs ("Director"); Michael H. Remy, Esq., and Tina A. Thomas, Esq., appeared on behalf of plaintiff California State Building and Construction Trades Council, AFL-CIO ("Union Council"); and Geoffrey Cowan, Esq.,

entered an appearance on December 12, 1983, behalf of plaintiffs Consumer Federation of California, Friends of the Earth and Aileen Adams.

John F. McKenna, Jr., Esq., appeared on behalf of defendant International Association of Plumbing and Mechanical Officials ("IAPMO").

The matter was heard on December 12, 13, 14, 15, 16, 20 and 21, 1983. Evidence, both oral and written, was submitted by all parties, and the matter was duly submitted.

IT IS NOW ORDERED, ADJUDGED AND DECREED:

1. Upon the authority of Code of Civil Procedure Section 526, Subdivision (1), the existing preliminary injunction, granted upon the application of plaintiff Director's predecessor in office, is partially modified and continued in force as the permanent order of this Court.

2. Pursuant thereto, Defendant IAPMO, its agents, officers, employees, and representatives, and all persons acting in concert or participating with IAPMO are hereby permanently enjoined from disseminating, directly or indirectly, to any individual or organization in California, the 1982 Edition of the Uniform Plumbing Code ("UPC") or the IAPMO Directory of Plumbing Research Recommendations ("Research Directory"), without including a warning notice. The warning notice required to be included shall appear in no less than 10-point bold type and shall state as follows:

> NOTICE: An Environmental Impact Report is now being prepared in California to determine whether the use of CPVC, PVC, or PB plastic pipe for transing potable water poses a danger to public health or the environment. At the time of this printing of the 1982 Edition of the Uniform Plumbing Code,

and this update of IAPMO's Directory of Plumbing Research Recommendations, the State of California does not permit any expansion of the use of such pipe, in applications permitted by the Uniform Plumbing Code, beyond those applications permitted in the 1979 Edition of the Uniform Plumbing Code.

For information on California restrictions, contact the State Housing Law Section of the California Housing and Community Development Department.

Immediately below the notice, in the same size or smaller type, the following statement may appear, at the option of IAPMO:

(This notice is inserted herein pursuant to a court Order in the case of CALIFORNIA DEPARTMENT OF CONSUMER AFFAIRS v. INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIALS, Los Angeles Superior Court No. C-395294.)

The notice shall not contain, include, or be accompanied by any other information or materials.

3. The notice shall be affixed

(a) To the inside cover of each copy of the UPC affected by this Order, and

(b) Upon the reverse side of the division page entitled "Water Systems and Related Items" (No. 5) of each copy the Research Directory,

(c) By suitable adhesive material along the notice's top and bottom borders, in a manner calculated to ensure that the accidental removal of the notice does not occur.

4. The foregoing orders shall take effect 30 days after entry of this Judgment, and the foregoing orders shall automatically terminate, both as to the UPC and the Research Directory, upon the date the 1982 Edition of the UPC is superceded by the publication of the 1985 Edition of the UPC.

5. All relief sought by plaintiffs, other than the relief granted to plaintiff Director by the foregoing orders, is denied.

6. Each party shall bear their own court costs.

DATED: _____.

JACK A. CRICKARD
JUDGE OF THE SUPERIOR COURT

STATE OF CALIFORNIA—STATE AND CONSUMER SERVICES AGENCY GEORGE DEUKMEJIAN, Governor

DEPARTMENT OF Consumer Affairs (916) 445-4465
1020 N STREET, SACRAMENTO, CALIFORNIA 95814

December 20, 1984

Mr. Thomas Higham
Executive Director
International Association
of Plumbing and Mechanical
Officials
5032 Alhambra Avenue
Los Angeles, CA 90032

Dear Mr. Higham:

As you know, this department actively participated in litigation concerning IAPMO last year. While our formal role in that matter has ceased, we remain abreast of current developments and are involved, in conjunction with HCD, in the ongoing environmental impact report.

I recently learned that IAPMO voluntarily has elected to include the notice concerning the use of plastic pipe in your upcoming edition of the Uniform Plumbing Code. It is also my understanding that the language to be used is identical to that which appeared in the last publication.

I applaud your decision. This action on the part of IAPMO carries forward the spirit of the trial court decision and allows all interested parties to focus their attention upon other critical problems.

While I trust that the information which I have received is correct, please don't hesitate to contact me if I have misstated your decision.

Sincerely,

Marie Shibuya-Snell

MARIE SHIBUYA-SNELL

INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIAL

5032 ALHAMBRA AVENUE, LOS ANGELES, CALIFORNIA 90032-3490 • (213) 223-1471

January 14, 1985

Marie Shibuya-Snell, Director
Department of Consumer Affairs
1020 N Street
Sacramento, CA 95814

Dear Ms. Shibuya-Snell:

This is in response to your letter of December 20, 1984, regarding the insertion of the notice on the status of plastic pipe in California in the 1985 edition of the Uniform Plumbing Code.

At its recently held meeting, the IAPMO Board of Directors determined that IAPMO will voluntarily continue to insert the notice in copies of the Uniform Plumbing Code sold in California. The wording of the nctice will be substantially the same as at present. We are, however, contemplating deleting the portion in parenthesis which refers to the "pending litigation". Since the litigation is no longer pending, there is no reason to continue to refer to it.

Very shortly I will be forwarding a copy of the proofs of the 1985 edition of the Uniform Plumbing Code to John Worsley so the Building Standards Commission can proceed with its adoption in a timely fashion.

Thank you for your letter and your interest. I hope we can continue to work closely together for the mutual benefit of the citizens of California.

Cordially,

Tom Higham

STATE OF NEW YORK

8988

IN SENATE

March 30, 1982

Introduced by Sen. DUNNE—read twice and ordered printed, and when printed to be committed to the Committee on Finance

AN ACT providing for a study into the feasibility of establishing a program to analyze and measure the fire-related behavior of certain materials and making an appropriation therefor

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The legislature hereby finds that there is a growing concern regarding injuries and deaths related to the toxic behavior of certain building and furnishing materials when exposed to fire or high temperatures. The legislature further finds that model test methods exist for rating the toxicity of combustion products, but that no adequate program exists to improve upon and integrate such tests into the state uniform fire prevention and building code established pursuant to article eighteen of the executive law.

§ 2. The secretary of state is hereby directed to conduct or have conducted a study of the toxicity of smoke and gases given off under various temperatures by materials used in building construction and furnishings. Such study shall assess the hazards from smoke and gases produced by the combustion of such materials, and the feasibility of developing or adopting a system of rating the toxicity of such materials, and shall result in the development of a set of recommendations to the state fire prevention and building code council established pursuant to section three hundred seventy-four of the executive law. Such recommendations shall be in the form of performance standards for various materials at various temperature conditions. For purposes of effectuating this section, the secretary of state shall consider appropriate tests and standards as currently exist in the field of combustion toxicology. The secretary of state shall report the results of the study, together with his recommendations, to the governor and the legislature on or before June thirtieth, nineteen hundred eighty-three.

EXPLANATION—Matter in *italics* (underscored) is new; matter in brackets [ ] is old law to be omitted.

LBD2-21-27-262

Fire Gas Toxicity

Recommendations of the Secretary of State to the Uniform Fire Prevention and Building Code Council
MAY 1984

New York State
DEPARTMENT OF STATE

Gail S. Shaffer
Secretary of State

Francis A. McGerry
State Fire Administrator
Office of Fire Prevention and Control

§ 3. The sum of three hundred thousand dollars ($300,000), or so much thereof as may be necessary, is hereby appropriated to the department of state out of any moneys in the state treasury in the general fund to the credit of the state purposes account not otherwise appropriated, for its expenses, including personal service, maintenance and operation, and travel in the state, in carrying out the provisions of this act.

§ 4. This act shall take effect immediately.

STATE OF NEW YORK
DEPARTMENT OF STATE
ALBANY, N.Y. 12231

GAIL S. SHAFFER
SECRETARY OF STATE

May 4, 1984

Honorable Yvonne Scruggs-Leftwich
Chairwoman
Uniform Fire Prevention and
Building Code Council
Two World Trade Center
New York, NY 10047

Dear Commissioner Scruggs-Leftwich:

Chapter 552 of the Laws of 1982, directed the Secretary of State to conduct a study of the toxicity of smoke and gases in fires. The legislation further required the Secretary to make recommendations to the Uniform Fire Prevention and Building Code Council based upon this study. The study report and my preliminary recommendations were previously transmitted to you and the Code Council. The attached recommendations fulfill the legislative mandate and follow-up on my previous transmittal.

I will be pleased to continue to work with you to promote the implementation of these recommendations.

Sincerely,

Gail S. Shaffer

INTRODUCTION

It is estimated that 80% of the people who die in fires die not as a result of flames but from inhaling toxic smoke and gases.

The reality of this statistic and the toll it represents in terms of human life were made particularly clear in a fire at the Stouffer's Inn in Westchester County in 1980 in which 26 people died.

This tragedy prompted then-Governor Hugh L. Carey to establish the Special Fire Safety Task Force to review fire safety conditions in New York State with a special emphasis on the adequacy of existing fire codes and recommendations for their improvement. In 1981, the Task Force, working with the Department of State's Office of Fire Prevention and Control, issued its report to the Governor. Among its conclusions: most fire deaths are caused by smoke inhalation and further, the apparent increase in such fatalities has occurred as a result of the toxic gases and smoke produced when certain materials, now commonly contained in buildings and furnishings, burn.

Accordingly, the Task Force recommended that the State undertake an intensive study of "combustion toxicity" -- an increasing threat to human life and safety. The Legislature in recognition of the Department of State's lead role in fire prevention and control, authorized the Secretary of State to conduct a study of the toxicity of smoke and gases given off under various temperatures by materials used in building construction and furnishings.

In undertaking this study, New York State has assumed a leadership role in developing public policy to address the causes and effects of combustion toxicity. Our work in the field of fire safety will serve as a model for other states and for the federal government to

follow. While the study of combustion toxicity is in its early stages of development, the Department of State is committed to learning more about the problems of toxic emissions of burning materials.

Contained on the following pages is a summary of the findings issued by Arthur D. Little Inc., which conducted the Department's study, and the resultant recommendations of the Secretary of State to the Uniform Fire Prevention and Building Code Council.

LEGISLATIVE HISTORY

Chapter 552, Laws of 1982, recognized the growing concern of the people of the State of New York about injuries and deaths resulting from the toxic behavior of building materials and furnishings when exposed to fire or high temperatures. At the time Chapter 552 was enacted, the Legislature acknowledged that while model test methods exist for rating the toxicity of combustion products, no adequate program exists to improve upon and integrate such tests into the Uniform Fire Prevention and Building Code. In light of this, the Legislature directed the Secretary of State to conduct a study of the toxicity of smoke and gases given off under various temperatures by materials used in building construction and furnishings.

The specific tasks to be performed by the study were as follows:

- *to assess the hazards from smoke and gases produced by the combustion of materials used in building construction and furnishings.*
- *to assess the feasibility of developing or adopting a system of rating the toxicity of materials used in building construction and furnishings.*

The study was to result in the development of a set of recommendations to the New York State Uniform Fire Prevention and Building Code Council. Considering the appropriate tests and standards that currently exist in the field of combustion toxicology, the Legislature anticipated that the Secretary's recommendations might take the form of performance standards for various materials at various temperature conditions.

Assessing the Feasibility of Incorporating Combustion Toxicity Requirements into the Uniform Fire Prevention and Building Code

The firm of Arthur D. Little of Cambridge, Massachusetts, was awarded a contract to undertake a study on the feasibility of incorporating combustion toxicity requirements into the Uniform Fire Prevention and Building Code. Arthur D. Little considered four possible regulatory options available to the State of New York as follows:

- *data filing, which would involve submission of data on combustion toxicity to a designated agency;*
- *product labeling, which would require test results or similar information to be affixed to building materials and furnishings;*
- *performance standards, which would require products to meet or exceed specified test result limits;*
- *material-specific regulation, which would ban materials based on regulatory agency determinations.*

Fourteen test methods for evaluating combustion toxicity were identified and reviewed. Two methods, the National Bureau of Standards Test Method and the University of Pittsburgh Test Method, were selected for more intensive scientific analysis. Both are bio-assay tests involving the exposure of rodents to the products of combustion.

The study concluded that:

- *The University of Pittsburgh Test Method is the most useful test currently available for assessing the hazards of the products of combustion; and*
- *A filing requirement for numerical test data (LC_{50}) is the appropriate performance testing standard at this time. (The*

LC_{50} is the lethal concentration which will cause the death of 50% of exposed animals within the test period.)

The Secretary of State submitted the findings of the Arthur D. Little study to scientific peer review prior to formulation of the following recommendations.

Recommendations of the Secretary of State to the Uniform Fire Prevention and Building Code Council

It is recommended that the Uniform Fire Prevention and Building Code Council require that certain building materials and furnishings be subjected to performance testing to provide information related to the hazard they pose to life safety in a fire scenario. The results of these performance tests should be filed with the Department of State in a Building Materials and Furnishings Data File and this information should be made readily available to the scientific community, the building and construction industry, the fire service and consumers of these products.

The tests and standards that currently exist in the field of combustion toxicology are sufficiently refined to support such performance testing and disclosure at this time. The information subject to public disclosure as a result of adoption of these recommendations will lead to a time when specific performance standards could be considered to minimize the hazards posed by building materials and furnishings in a fire scenario.

The specific recommendations regarding the creation of a Building Materials and Furnishings Data File follow:

- *It is recommended that the Uniform Fire Prevention and Building Code Council establish a Building Materials and Furnishings Data File in the Department of State, that will contain information on specific classifications of building materials and furnishings to be subject to performance testing, and that the file be available for public scrutiny.*

There is without question a need to increase the quality and quantity of information readily available to the public regarding the various properties of building materials and furnishings. The availability of this information will advance combustion toxicology

research and enable architects, builders, owners and occupants of buildings to make better informed decisions when selecting building materials and furnishings.

- *It is recommended that the Uniform Fire Prevention and Building Code Council require that the following classifications of building materials and furnishings be subjected to performance testing, the results of which shall be filed at the Department of State at the earliest practicable date as determined by the Uniform Fire Prevention and Building Code Council:*

  - *Furniture Upholstery*
  - *Mattresses*
  - *Bed Pads*
  - *Interior Wall Finish*
  - *Interior Ceiling Finish*
  - *Interior Floor Finish*
  - *Electrical Wire Insulation and Conduit*
  - *Water Distribution and Sanitary Pipes installed in buildings*

- *It is recommended that the Uniform Fire Prevention and Building Code Council prohibit the installation of any building materials or the use of newly acquired furnishings subject to the recommended performance testing and filing requirements, if the manufacturer of such product has not complied with the performance testing and filing requirements.*

This will help to ensure that the performance test and filing requirements are enforced.

- *It is recommended that the performance testing and data filing requirements imposed by the Uniform Fire Prevention and Building Code Council on these building materials and furnishings include the use of the University of Pittsburgh bio-assay protocol for measuring combustion toxicity.*

This test method was certified by Arthur D. Little as an appropriate performance test considering those currently available in the field of combustion toxicology.

- *It is recommended that the Uniform Fire Prevention and Building Code Council require manufacturers to disclose the percentage of halogens (chlorine, bromine, iodine, fluorine) contained in the products included in the categories of building materials and furnishings listed above. This information should be incorporated into the data filed with the Department of State and should be calculated to the nearest percent.*

Bio-assay tests alone do not fully account for the action of acid gases produced by products containing halogens or other chemical elements which are inclined to release acid gases. This limitation is attributable to the differences in the way rodents and humans breathe under stress: humans, unlike rodents, breathe through the mouth, exposing the lungs and trachea more directly to acid gases.

- *It is recommended that the Uniform Fire Prevention and Building Code Council require that information regarding the ignitibility and flame spread characteristics of the building materials and furnishings listed above be included in the Building Materials and Furnishings Data File.*

The following standard fire performance tests will provide the necessary information for these classifications of materials and furnishings to which these performance testing and filing requirements should apply:

- *Wall and ceiling materials - the Steiner Tunnel Test, also known as ASTM 84, NFPA 255 and UL 723.*

- *Interior Floor Finish - Critical radiant flux of floor covering systems using a radiant heat energy source, NFPA 253 and ASTM E 648.*
- *Upholstered furniture - NFPA 260A, Standard Methods of Test and Classification System for Cigarette Ignition Resistance of Components of Upholstered Furniture, 1983. This method is to be used for upholstered furniture, other than that used in facilities, such as hospitals, nursing homes, residential-custodial care, and supervisory facilities, such as (1) educational, (2) assembly, or (3) residential occupancies. NFPA 260B, Standard Method of Test for Determining Resistance of Mock-up Upholstered Furniture Material Assemblies to Ignition by Smoldering Cigarettes, 1983. This method is to be used for upholstered furniture used in facilities, such as hospitals, nursing homes, residential-custodial care and supervisory facilities or in public areas or facilities, such as (1) educational, (2) assembly, or (3) residential occupancies.*
- *Mattresses and Mattress Pads - Standard for Flammability of Mattresses and Mattress Pads (16 CFR Part 1632).*

The public interest in arriving at a meaningful approximation of the fire hazards posed by building materials and furnishings, is further served by requiring the disclosure of flame spread and ignitibility, in addition to combustion toxicity and chemical components.

CONCLUSION

The Uniform Fire Prevention and Building Code Council will review these recommendations and has indicated an intent to act upon them in six months. In its deliberations, the Council is urged to consider whether complying products should be labeled, tagged or otherwise identified.

Furthermore, It is recommended that the Code Council conduct a series of public hearings throughout the State prior to taking final action.

Adoption of these recommendations by the Code Council will raise a number of issues for consideration by the Governor and the Members of the Legislature as follows:

- *Possible restriction on sales of affected products which have not been tested or for which appropriate data have not been filed.*
- *Extension statewide of the applicability of the performance testing, filing and labeling requirements and the related use of sales restrictions. This would provide that building materials and furnishings used in New York City, as well as any other municipality in the State not covered by the Uniform Fire Prevention and Building Code, be subject to the requirements.*
- *Appropriation of adequate funding to the Department of State to support the recommended responsibilities related to data filing and analysis.*

LEGISLATIVE ACTIVITIES OF INTEREST REGARDING ELECTRICAL NON-METALLIC TUBING AND OTHER PLASTIC CONSTRUCTION MATERIALS

CONFERENCE OF INSURANCE LEGISLATORS

The Conference of Insurance Legislators is an organization of influential state legislators whose legislative duties include or have included state insurance codes. As an organization, COIL and a number of its members have been very active in fire safety. On November 1, 1981, the Resolutions Committee of COIL and members of the Missouri Legislature held a public hearing aimed at finding legislative responses to the fires at MGM Grand and Stouffers' Inn, among other tragedies. As a result of that public hearing, COIL adopted Resolution No. 6. Of particular interest to this Committee is the following finding by COIL:

> "Whereas, there are several avenues which state legislatures can take to marshall the power of state and local governments to bring about greater safety in hotels and other facilities of public accommodation, such as the enactment of laws which:
> --improve structural and fire safety codes to include among others, recently obtained data on toxicology . . ." (emphasis added)

To further refine that finding of fact and its ultimate resolution, COIL created a Task Force on Hotel Fire and Structural Safety. That Task Force is chaired by the Honorable Charles Butts, Senator of the State of Ohio. Senator Butts addressed the Symposium on Combustion Toxicology recently held at the NFPA's Annual Meeting. During his address, Senator Butts said:

"One of the things that I think is important to say and why I am grateful for the opportunity to speak to you is that when you have the fire storms in the media as we have had with the hotel fires particularly, but some of the other things; supper clubs and others, that there will be legislative reactions good or bad, and we will enact laws. We will enact into the statutes, code changes!"

Sen. Charles Butts,
NFPA Symposium on Toxicity
May 17, 1982

Senator Butts' observations were not only prophetic in terms of future legislation but he was relating some of the reactions that law makers and public officials across the country have already had when the issue of fire-gas toxicity and codes, such as the electrical code came before them.

STATE OF NEW MEXICO

In late July, 1981, the Electrical Bureau Chief of the Construction Industries Division of the Commerce and Industry Department of the State of New Mexico added Article 331 to the 1979 National Electrical Code under which the state was then operating. Upon learning of the development Allied brought the facts regarding the potential hazards of PVC in a fire situation to the attention of the Construction Industries Committee, a group appointed by the Governor to oversee the adoption of codes throughout the State of New Mexico. Although the state's approval of proposed Article 331 was quickly withdrawn by the Electrical Bureau, the Committee, on the basis of the evidence presented by both Allied and the proponents of combustible, toxic electrical conduit decided there was sufficient evidence to warrant holding a full evidentiary hearing on the use of toxic building

materials. The Construction Industries Division held that hearing, which was chaired by Richard W. Lisle, Director of the Division on April 15, 1982. The purpose of the hearing was to gather information on the various kinds of plastic materials used in New Mexico.

The New Mexico statute, under which all minimum codes are adopted for the entire state, requires that the Division begin with model codes such as the National Electrical Code and amend those only so as to increase the standards. Prompted by the abortive attempt to gain approval for proposed Article 331, and by the facts regarding fire-gas toxicity, the state is now considering the question of whether PVC, along with other synthetics commonly used in construction materials, ought to be prohibited from use in the state.

Richard W. Lisle has now released a report recommending cutbacks on the use of synthetic building materials. His report cited growing evidence of injuries and often lethal effects of synthetic products when they decompose in a fire. New Mexico is the first state to study the issue and recommend that PVC conduit no longer be permitted in high-rise buildings or non-fire-rated high density occupancy structures.

CITY OF CHICAGO

The City of Chicago is one of the largest cities which does not authorize the use of combustible, toxic electrical wiring methods or water, drain, waste or vent systems in any of its codes. In October, 1981, the Major of Chicago proposed wide-sweeping revisions to the City's electrical, plumbing and building codes so as to promote the rehabilitation of existing but dilapidated housing in Chicago. There were several extensive hearings before the Committee on Buildings and Zoning of the City Council of the City

of Chicago. At those hearings, both the opponents and the proponents of combustible, toxic building materials had a full opportunity to present their view of the facts to the Committee. The result of those hearings was that, while extensive changes were made to Chicago's codes, the Committee and later the full City Council, voted to retain the City's ban on the use of plastic wiring and plumbing methods. The Chairman of the Building and Zoning Committee, Alderman Edward R. Vrdolyak, was quoted as saying:

> "There are too many questions the experts can't answer. I certainly am not a chemist or a toxicologist . . . but there are safety questions. We're going to take a good look until most, if not all, of the evidence is in."

Chicago Tribune
February 27, 1982

STATE OF NEW YORK

Chicago is not the only major city to protect its citizens from the unrestricted loading of its buildings with combustible, toxic materials. New York City has, for many years, prohibited the use of building materials which, in a fire, produce smoke more toxic or denser than that produced by wood. The City of New York has been requiring toxicity testing of building materials using several commercial testing laboratories for several years.

Until the unfortunate tragedy of the Stouffers' Inn fire, however, the State of New York did not have a uniform, state-wide code. Following that fire, the Governor of New York appointed a special fire safety Task Force chaired by the Honorable Basil A. Paterson, Secretary of State of New York. A key conclusion of that Task Force report, which was issued to the Governor of New York on February 19, 1981, was:

"Most fire deaths are caused by smoke inhalation with an apparent increase of involvement of petrochemical based and other synthetic materials."

Special Fire Safety Task Force Report, p. 3

The Task Force recommended that a Uniform Fire Prevention and Building Code to take effect on January 1, 1984, be adopted. That Act, which provides for mandatory and uniform state-wide construction and material requirements for public and private buildings, based on performance standards, was passed in 1981. To facilitate the work of the Council which is required to formulate this state-wide code, State Senator Dunne and Assemblyman Branca introduced legislation in March, 1982. This legislation contains very important legislative findings. It says:

"The legislature hereby finds that there is a growing concern regarding injuries and deaths related to the toxic behavior of certain building and furnishing materials when exposed to fire or high temperatures. The legislature further finds that model test methods exist for rating the toxicity of combustion products, but that no adequate program exists to improve upon and integrate such tests into the state uniform fire prevention and building code established pursuant to article eighteen of the executive law."

On May 6, 1982, the Fire Safety Subcommittee of the Senate Finance Committee held a public hearing to consider toxicity and fire safety. Several of the statements made during the course of that hearing are particularly important to note:

"Neither building codes nor fire regulations seem to have taken much account of the dangerous aspects of plastics. Such codes and

regulations are inadequate. Many buildings were made to withstand fire rather than smoke, but some flame retardants minimize burning and maximize smoke. Those codes and regulations, based on heat generated by fires, may not be sufficient for smoldering plastic."

Hon. Basil A. Paterson, p. 12
Secretary of State of New York

"We think it (N.Y. Senate Bill S8988, Attachment 3,) is a milestone piece of legislation, something that should be done on a national level. I don't foresee it at a national level, so I feel fortunate to live in the State of New York where we are assured that we will have some further study done in the area of toxic materials and the effects that it not only has on firefighters but the effects it's having on civilians.

We know it's killing people. We know it is coming from gases. If this study will help prevent some of these materials from being used in the buildings in the state, then it's a major step forward. Particularly, as I cited before, plastic pipes and plumbing should be outlawed, some of the other plastic materials that are being used in building construction."

Mr. Robert Gollnick, President
New York State Professional
Firefighters Association, p. 51

"From my experience, many thermoplastics, such as styrofoam, polyethylene, polyvinyl chloride, to name a few, used as building materials make the difficult job of firefighting more difficult. They, by virtue of their high fuel values, their ability to generate toxic thick smoke, and their thermoplastic melt-flow nature at fire

ground temperatures too often deprive firefighting [illegible] from reaching their objective to seat the fire."

Officer Scott Kirchhofer,
Ladder Company No. 40
New York City Fire Department
p. 106

"Polyvinyl Chloride (PVC), polychlorinated biphenyl (PCB) are only a few of the compounds that can produce immediate or delayed injuries or death when involved in fire. State and federal legislation is needed to control the composition of materials used in furnishings and building construction so that the public may be properly safeguarded in the case of fire."

Chief Joseph C. Hess,
Chief of Fire Prevention
New York City Fire Department
p. 218

This testimony and the clear and cogent testimony of toxicologists experienced in fire-gas toxicity such as Dr. Merritt Birky formerly of the National Bureau of Standards, Center for Fire Research and now of the Foundation for Fire Safety and Dr. Yves C. Alarie, Chairman, Department of Respiratory Physiology and Toxicology, Graduate School of Public Health, University of Pittsburgh that it was feasible to rate the toxicity of materials resulted in Senate Bill 8988 being unanimously passed in the New York State Senate. On July 3, 1982, despite enormous budgetary pressures, this legislation was passed 140 to 1 by the New York State Assembly and was signed by the Governor on July 20.

At the same time as the New York legislature was considering this landmark toxicity legislation, a dispute arose regarding PVC electrical conduit installed in the New York City subway system. As in the other

instances where the facts on fire-gas toxicity were brought to the attention of responsible lawmakers charged with the duty to protect the safety of their constituency, there was quick governmental action. The New York Subway Authority discontinued the use of PVC electrical conduit based upon their concerns about the toxic hydrogen chloride gases emitted by the PVC electrical conduit in a fire. The controversy did not end, however, with discontinuance of the use of such material. On June 2, 1982, Carol Bellamy, President of the New York City Council called for the removal of all of the PVC tubing in use in the New York subway system. Answering the standard assertion that combustible, toxic PVC conduit presents no imminent hazard, Ms. Bellamy was quoted as saying:

> "The system-wide use of PVC tubing indoors poses a clear and present danger to millions of subway passengers and transit workers, as well as to firefighters responsible for controlling fires in the system. Our first concern must be safety. Using PVC tubing is perilous economy."(emphasis added)
>
> Journal of Commerce Daily
> June 2, 1982

Finally, on June 25, 1982, the New York City Council appropriated $2,000,000 to remove PVC electrical conduit from the subway system.

TULSA, OKLAHOMA

The recent action of the Board of Commissioners of the City of Tulsa is another example of the overwhelming response of lawmakers to the facts on fire-gas toxicity. In Tulsa's case, when asked to permit the use of flexible non-metallic conduit, the Mayor and Board of Commissioners referred the matter to the Fire Marshal. His conclusion was to reject the material and said, "The danger of PVC, particularly under fire conditions,

ALASKA LEGISLATURE COMMITTEE FILES 1985-1986 8672

4206 SLAB HB 63 (FILE 2) - HB 68

1086

are well known because of the hazardous, death-dealing products of combustion."

STATE OF CALIFORNIA

The Supreme Court of California recently enjoined the publication in California of a model plumbing code which would have expanded the use of plastic pipe in California. The Court decided that unless the public was adequately informed about the health hazards of such pipe, that that model code could not be sold in California until a complete environmental impact report, currently about to begin, was completed. How that report would deal with the problem and solution to the problem of combus_ible, toxic building materials was not clear enough for members of the California Assembly. As a result, on June 29, 1982, Assemblywoman Maxine Waters, a member of the majority leadership, introduced Assembly Concurrent Resolution No. 146 which would direct the development of a standard toxicity test method by the state and require the environmental impact report to include the toxicity of all building materials included in the electrical, plumbing, structural, or any other building code of the state.

On August 31, 1982, the legislature of the state of California passed the resolution with amendments requiring the establishment of tests to determine the fire-gas toxicity and combustibility of materials used in buildings. The measure calls for the Department of Industrial Relations and the State Fire Marshal to review combustion toxicology test methods and to "adopt or adapt the most appropriate existing test method to rate the relative toxicity of all materials intended for use in or as part of high-density occupancy buildings."

POLYVINYL CHLORIDE FUMES CAUSE LONG-TERM HEALTH PROBLEMS FOR FIRE SURVIVORS, STUDY SHOWS

Long-term health effects of exposure to polyvinyl chloride fumes from electrical fires can include permanent damage to lungs, heart, vocal cords and other organs, a study of fire survivors discloses in the November, 1981 issue of Journal of Combustion Toxicology.

The study covers survivors of the 1977 fire that claimed 161 lives in the Beverly Hills Supper Club near Cincinnati and the 1975 New York Telephone Company fire, in which 239 fireman required medical attention for toxic gas inhalation. The fires are described as two of the largest polyvinyl chloride electrical fires in the 1970's.

Deborah N. Wallace, president, Public Interest Scientific Consulting Service, reports in the study that four Beverly Hills Supper Club survivors died of severe respiratory impairments several weeks to several months after the fire. Autopsies also revealed kidney damage in three of the four victims, Dr. Wallace reports.

In-depth interviews of eight other survivors showed "a consistent picture... of severe damage to both upper and lower respiratory tract and secondary subsequent infections," Dr. Wallace notes. "Long-term diminuation of respiratory disease resistance, headaches, sleep problems, and inability to work constitute present secondary impacts of the respiratory damage....Several interviewees

experienced one or more of the following: irregular heart beat, skin problems, and visual perception impairment. Psychological effects included frequent nightmares, memory lapses, and heavy guilt characteristic of survivor syndrome."

A survey of 113 of the firefighters treated at the scene of the New York Telephone Company blaze covered the first sign of aftereffect injury and symptoms before later medical attention. "By far, the most frequent first symptoms were sore throat, irritated eyes ('burning'), dizziness, aching nostrils, and confusion. Other moderately frequent first symptoms included nausea, chest pains, chest congestion, and headache."

Nearly two-thirds of the firemen complained of persistent or permanent effects, Dr. Wallace reports. "Many men complained of being hoarse from the time of the fire to the present," she adds. "This condition became progressively worse in two men who...were found to have vocal cord lesions...The high prevalence of hoarseness indicates that the vocal cords of many of the men should be watched for growths."

Polyvinyl chloride (PVC) fumes were clearly identified in the Wallace study as the primary cause of death and injury in the two fires. She points out that in the Beverly Hills Supper Club fire, "A total of 161 people died that night without any direct involvement with the flames and long before the carbon monoxide had reached a concentration which affected the rescuers, most of whom wore no respiratory masks, and before any wood was burning in or near the...room."

During the New York Telephone Company fire, "...firefighters were collapsing or running out to the medical vans," Dr. Wallace reports. "Some men in the building depleted their airpacks and had to breathe the undiluted hot, acidic smoke. Some of the men on the outside also suffered from airpack depletion and breathed the dense downwash of smoke from the building."

Both fires have been traced to electrica. 'ein. An estimated "minimum of 4,000 and a maximum of 8,000 feet of Romex-' .ed cabling containing several PVC-insulated wires in the plenum of the Cabaret Room alone..." where most of the Beverly Hills Supper Club fatalities occurred. "Although the fire was discovered in the Zebra Room about 8:40-8:45 pm, it had been building in the wall undiscovered for abou: one-two hours. By this time, the process of thermal decomposition which is the initial stage of a polyvinyl chloride fire had already spread through the wiring to the Cabaret Room."

The New York Telephone Company fire began in the main Manhattan switching center cables entering the basement vault. The 490 cables there were clad either in polyethylene plastic or lead sheathing. "The fire remained confined to these apparently, for some time because the heat had to reach about 600° C to ignite the PVC cables leading from the vault to the upper floors," Dr. Wallace recounts. "By the time the alarm was turned on, much thermal decomposition had occurred and the PVC cables were burning.

"The initial fire was extinguished only about 3¼ hours after the alarm was sounded. However, the gases from the decomposition of the PVC cables

accumulated in the vault and burst into flames on contacting the hot wires. The second fire spread rapidly along the cables to the upper floor, and all the burning cables were of the type with each individual wire coated in PVC .... According to the New York fire department and NYS Public Service Commision inventories of what burned and was available to burn, PVC cable insulation and jacketing constituted over 80% of the fuel....No other cable insulation or jacketing was used in the building itself, and only very small quantities of wood were present on the distribution frames."

The combination of PVC electrical insulation and its ready access to combustion-supporting air thus appear to have magnified the intensity of the two fires. The Beverly Hills Supper Club wiring used reinforced plastic-jacketed wires individually insulated in PVC, and the New York Telephone Company building contained large amounts of PVC-clad wire in open distribution channels. Neither installation had the protection of metal conduit capable of both resisting high heat and blocking access of combustion air that supported the fires.

The Journal of Combustion Toxicology article notes that "by the early-to-mid 1970's, PVC had become a common electric wire insulation and cable jacket because if its electrical properties, flexibility, and high ignition temperature (600° C). Combustion toxicological research of the late 1960's-early 1970's had, however, uncovered a problem with PVC and several other halogenated plastics, namely that the combustion products were extremely toxic compared to those of most natural materials.

"Further research on PVC in the early-to-mid 1970's revealed a special pattern of thermal decomposition, characterized by evolution of anhydrous hydrogen chloride and traces of benzene and toluene from the surface of the plastic at temperatures as low as 100° C. When temperatures reach 250-300° C, the reaction accelerates to the point that significant quantities of HCl are generated. Long before actual ignition temperatures are reached, long before the presence of visible fire, and long before quantities of carbon monoxide become significant, both gaseous and soot-absorbed HCl are generated in high concentrations."

The article also notes that the pattern of decomposition of PVC into HCl varies with a number of factors, including "configuration of many wires vs few; and whether the wire is in metal conduit, PVC conduit, or no conduit."

Dr. Wallace also points out that in addition to combining with water in tissue of the upper respiratory tract (to form hydrochloric acid), "another effect of PVC decomposition products is that they impair perception and behavior. The smoke is extremely dense and drastically reduces visibility, and its irritation of the eyes, skin, respiratory tract, and possibly nervous system provokes disoriented movement, blind groping and incapacitation. The potential for escape from PVC decomposition products is low compared to that of the initial stages of a fire with natural products as fuel."

She urges that "because the decreased potential for escape appears to have contributed to increasing the number of people subjected to relatively lengthy exposure to high concentrations of PVC decomposition and combustion products,

monitoring survivors of wire insulation fires for long-term health effects would be an important contribution to both the field of combustion toxicology and to the body of data on which fire safety decisions are based."

FIREGAS TOXICITY: THE LEGISLATIVE APPROACH

July 20, 1982, will be well remembered by advocates of greater fire and human safety. In a landmark action, New York Governor Hugh Carey signed a law appropriating $300,000 to create a system for rating the toxicity of plastics and other materials used in building construction and furnishings.

Although New York state's determination to reduce further fire tragedies is so far the most comprehensive in the nation, it is not merely an isolated occurrence. On the contrary, the apathy which once characterized the attitudes of most citizens and their elected representatives toward fire deaths is being swept aside by action.

From Maine to Oregon, there is growing recognition that America's contemptible fire death rate--8,000 a year, one every hour--is one of the worst among industrialized nations, not because of killer flames, but because of deadly gases. Smoke, not flames, kill over 80% of those who die in fires. And the plastic materials that are integral parts of modern hotel rooms and offices are being accused of increasing the toxic danger.

The expert task force appointed by Governor Carey to study the causes of the December 4, 1980, Stouffers Inn fire in Harrison, New York, reported in February, 1981: "One of the major causes of death in fire tragedies is a direct result of the hazards of petrochemical based and other synthetic construction materials and furnishings."

Recalling 287 deaths in recent tragic fires, including Stouffers, where 26 died, the Beverly Hills Supper Club near Cincinnati, MGM Grand in Las Vegas and the Westchase Hilton in Houston, California state assemblywoman Maxine Waters stated, "Strong evidence developed that decomposing plastics caused the vast majority of the fatalities. I find this intolerable--there are proven methods which can measure the toxic dangers of materials. These methods should be employed before we permit the construction of more toxic gas chambers."

Finally, the word is getting around about polyvinyl chloride, the most pervasive of the synthetic materials.

- o Congressmen Claude Pepper of Florida and Mario Biaggi of New York conducted hearings on the vulnerability of persons in nursing homes to toxic fires, a subject of direct concern to the Select Committee on Aging of the United States House of Representatives. Reportedly, legislation will soon be introduced in the United States Congress to address the danger of toxic building material in health care facilities.
- o The State of New York and the State of California have adopted landmark legislation providing for the prompt, detailed and independent study of toxic gases given off in fire situations by all materials which are now used in the construction of buildings. The New York legislation also provides for the development of performance standards for materials in a fire as a means of combatting this major hazard. Reportedly, legislation will be introduced in

the California legislature next year that will address how to limit the use of materials which are rated as hazardous under the test methods to be adopted pursuant to the California study.

- o A panel appointed by the State of New Mexico's Construction Industries Committee held hearings in April, 1982, to consider whether there was a problem posed by the use of toxic building materials. The New Mexico hearing panel found a problem existed and recommended that plastic materials currently being used in construction ought to be prohibited from use in high density occupancy structures. The full Construction Industries Committee of New Mexico is currently considering the adoption of that recommendation.
- o The City Council of Chicago, after extensive hearings, recently determined to continue its ban on the use of plastic wiring methods and plumbing materials.
- o The City of Tulsa, on the strong recommendation of its Fire Marshall, rejected an application to permit the introduction of a new flexible plastic conduit because of its toxicity in a fire situation.
- o The City of New York not only discontinued use of plastic electrical conduit in the subway system but appropriated $2,000,000 to remove such existing conduit from the system when it realized the extent of the toxicity problems.
- o The Department of Public Safety of the State of Massachusetts resolved not to permit more plastic behind the walls until a solution to this problem can be found.

Additionally, the state safety officials in such states as Colorado, Ohio, Illinois and Wisconsin are beginning to focus carefully on toxicity and how to address this problem with respect to building materials. Houston, Texas and Cincinnati, Ohio, have recently proposed severe limitations on the use of plastics behind the walls and in the ceilings of high-density occupancy buildings. Departments with safety responsibility in Peoria, Illinois; Nashville, Tennessee; Corpus Christi, Texas; Kokomo, Indiana; Modesto, California and Atlanta, Georgia have held or are considering hearings on the subject of the toxicity of commonly used building materials in a fire.

Legislators and City Councils are not the only public bodies giving consideration to how to deal with the problem of toxicity. Throughout the United States, as a result of the series of tragic deaths in fires, many courts are being asked to rule on these issues. Toxicity was a major element in the litigation which followed the Beverly Hills Supper Club fire. In Des Moines, Iowa, a $300,000,000 suit is pending against many in the plastics industry as a result of a fire there which claimed ten lives.

In a recent speech, David Miller, lawyer for many of the victims of the Stouffers Inn fire, described the suits arising out of that situation and how plastics and toxicity were a key factor.

In Las Vegas, the federal courts have been asked to rule on the liability of the manufacturers of many of the synthetic products used in the construction of the MGM Grand Hotel. One of the lawyers involved in that case has estimated the damages sought at over a half billion dollars.

At the same time, during the past year organizations such as the Foundation for Fire Safety, the National Fire Protection Association, the Society of Toxicology and the American Chemical Society have continued their studies of the problem. Similarly, the National Bureau of Standards, and various universities and other private and public institutions, have continued to refine their research designed to identify the nature of these lethal gases and to specify ways of measuring the relative toxic danger of various building materials.

Hopefully, these are just early signs of a massive national reaction against senseless fire deaths. Whether they know it or not, Americans today are literally surrounded in homes, hotels and factories by space-age plastic materials that can give off deadly gases. Indeed, modern hotel rooms are showplaces of synthetic technology, from carpets, draperies and upholstery in the rooms, to pipes, cables and ducts inside the walls.

Time was when materials were made of wood, steel and cotton which were much less toxic, but that is true no longer. Developed on a crash schedule in World War II as substitutes for national materials in short supply, plastics were cheaper and more versatile and the petroleum from which they were developed was low-cost, all-American and abundant. Soon their use proliferated, so that today, particularly in the form of polyvinyl chloride, they are present in almost every residence. Now, with vigor, fire safety and health officials are seriously questioning whether yesterday's

miracle has transformed itself into today's monstrous mistake: they are wondering whether in the name of profit and progress, human life somehow got lost.

To be sure, recognition of the lethal and hazardous properties of firegas toxicity did not just emerge overnight. Research began in the early 1970's focusing on PVC, a versatile plastic that is widely used in various types of industrial and consumer applications for airplanes, buildings and homes such as cable insulation, residential siding, electrical fittings and architectural moldings.

Research determined that when PVC decomposes (at a temperature not much hotter than that needed to bake an apple pie) it produces hydrogen chloride, which in combination with other gases, causes the intoxication syndrome and death. Reports Dr. Yves Alarie, noted toxicologist at the University of Pittsburgh:

> "The fumes from burning plastics strike victims very quickly . . . with inhalation of smoke, they lose their motor coordination, they lose their sense of perception so they really cannot escape properly. So with some of them you will find them very close to a doorway. That person did not have enough oxygen left in their blood to move."

We believe that what industrial progress did, motivated citizens and legislatures can undo. It's a large task. In recent years, a key contributor to the nation's horrible fire record has been a well-organized effort to weaken building codes, to permit greater amounts of life-threatening synthetic materials to be used in construction. Recently, the National Fire Protection Association, the nation's most prestigious building and fire safety organization, rebuffed high-pressure campaigns

designed to permit the use of more plastic conduit in its National Electrical Code. For its efforts to maintain safety oriented codes in the public interest, NFPA should be acclaimed and supported.

In the wake of recent fire tragedies, 30 states are in the process of reassessing codes. Now is the time to strengthen codes, not weaken them as some interests desire.

The proliferation of plastic materials has coincided for years with widespread inattention and apathy toward the role of building codes, standards, rules and fire fatalities. Sadly, for thousands of fire victims, many codes have not been reviewed for years, some even for several decades. Therefore, codes have fallen behind the state of the art. The state of New York is contemplating a review of the entire code structure every three years to keep pace with advancing research and technology.

In point of fact, although the National Bureau of Standards and the University of Pittsburgh each have developed sophisticated methods for determining the toxicity levels of materials, no organization or government agency responsible for the development of model building codes has yet enforced a toxicity standard. Therefore, numerous toxic products have been authorized for use in buildings, even though research reveals that synthetic materials can be from 10 to 100 times more toxic than wood. Research by the University of Pittsburgh, for example, indicates that five ounces of polyvinyl chloride can emit enough hydrogen chloride gas to kill sleeping people in ten minutes in an average sized bedroom.

Clearly, the nation needs building and fire prevention codes with easily understood minimum toxicity standards and sprinkler requirements in all new structures designed for high density occupancy. Death and serious injury by fire must not be considered inevitable.

For years we have been committed to the voluntary standards system as the best way of developing consistent, safe and technically sound codes for the nation. That system has recently come under tremendous pressure from opposing interests while attempting to come to terms with the toxicity issue. More than ever before participation from public interests are needed to keep the code-making process from being distorted by commercial interests.

Today's codes, both at the state and local level, must address the toxicity issue. Until then, Americans will live--and die--in a nation whose fire death rate is inexcusably the shame of the industrialized world.

Good codes and standards are absolutely essential to fire safety. Now is the time to strengthen codes, to protect human lives--not weaken them to protect profit margins.

.....FIRES, PLASTICS AND TOXIC GASES
SOME QUESTIONS AND ANSWERS

Q. ARE MODERN BUILDINGS FIRE SAFE?

A. The classic, non-combustible materials used in construction today--steel, concrete, glass--provide a basic structure which is fire safe. Fireproof? No. Factors other than basic construction materials enter into the problems of fire ignition, spread, containment and control.

Q. WHAT ARE SOME OF THESE FACTORS?

A. For one, the materials that are put into the walls and rooms of buildings. We fill our modern buildings with synthetic material products -- wall coverings, furniture, decoration, piping, conduit made of plastics. When plastics burn, they burn hotter and faster than traditional materials. Further, they emit toxic gases when burning. In fact, these poisonous fumes can be released when the temperature of plastic is as low as that of boiling water: it need not be in flames.

Q. WHAT IS THE EFFECT OF THESE TOXIC FUMES?

A. It is important to remember that flames are not the major killer in fires. Toxic gases are. At the MGM Grand fire in Las Vegas, 68 of the 84 people who died in that fire succumbed to toxic fumes, not flames. Furthermore, those victims of poison gases were found more than 20 floors away from the fire. Toxic gases kill. They can kill directly by poisoning the body or indirectly through a condition known as the Intoxication Syndrome.

Q. WHAT IS THE INTOXICATION SYNDROME?

A. The Intoxication Syndrome is a condition so named because some of the symptoms it produces are similar to those resulting from an overindulgence in alcoholic drinks. These

include loss of coordination, dizziness, blurred vision, diminished mental abilities, headaches, nausea and incapacitation. And in a fire situation it can prove fatal. At a time when a person needs all his senses intact to escape from a fire, the Intoxication Syndrome can rob him of the ability to perceive the situation, to see, to breathe, to understand the perils and most of all, to make the proper choices. It can even mask the fact that danger exists.

Q. SPECIFICALLY, WHAT CAUSES THE INTOXICATION SYNDROME?

A. The release of plastic-induced toxic fumes from burning or smoldering plastic. When plastics burn they produce an alarming roster of toxic gases. Hydrogen Chloride, Hydrogen Cyanide, Hydrogen Sulfide, Benzene, Nitrogen Oxides, Carbon Monoxide, and many more.

Q. ARE SOME PLASTICS MORE DANGEROUS THAN OTHERS?

A. In 1976, two medical doctors, Robert F. Dyer and Victor H. Esch, singled out polyvinylchloride as "causing the most serious problem in firefighting today," after a five-year study of firefighters exposed to the material. Polyvinyl chloride (PVC) is widely used in upholstery, wall coverings, siding, cable insulation, window frames and conduit. When PVC burns or smolders it gives off Hydrogen Chloride (HCl), which in combination with other gases, is a prime cause of the Intoxication Syndrome, incapacitating people trapped in fires. Further, when HCl combines with water such as the substances coating the eyes and tongue, it becomes hydrochloric acid, a powerful corrosive substance.

Q. WHAT CAN BE DONE ABOUT THE DANGER OF PLASTIC-INDUCED TOXIC GASES?

A. First, we need to keep building codes strong. There have been efforts recently to allow more plastics into the walls of buildings. In 1981, the National Fire Protection Association, an influential group which promulgates model building codes, defeated two pressure campaigns to permit more PVC

conduit in the walls of commercial buildings in the writing of its National Electrical Code. Many states and localities are now developing new building and fire codes. They must be kept strong, not weakened by plastics.

Second, we need definitive research on toxicity and plastic...research which would lead to the ability to rate the toxicity of building materials.

And finally, until a definitive research study is completed, no further incursion of plastics into construction should be considered.

* * * * *

City to weigh ban on plastic fire risk in future buildings

By Jon Schmitz
The Pittsburgh Press

Pittsburgh City Councilman Ben Woods tomorrow will propose an ordinance to outlaw the use of plastic building materials, which he says are "agents of death" in fires.

Woods' bill would prohibit plastic pipe, insulation and conduit in all commercial construction in the city. Existing buildings would not be affected, and the bill does not apply to residences.

Plastic materials have been blamed in a number of fatal fires, including the November 1980 fire at the MGM Grand Hotel in Las Vegas, which killed 84, and a 1977 inferno at a Kentucky supper club in which 165 perished.

Woods said scientific studies have shown plastics emit lethal quantities of toxic fumes when burned.

The most commonly used plastic building material, polyvinyl chloride, emits 77 different compounds when burned, including hydrogen chloride. When inhaled, hydrogen chloride mixes with moisture in the lungs and throat to form hydrochloric acid.

Studies at the University of Pittsburgh have shown that a few ounces of burning polyvinyl chloride can produce enough toxic fumes to kill everyone in an average-size bedroom within 10 minutes.

Woods said plastics burn faster, produce more dense smoke and fail to trigger smoke alarms until after lethal concentrations of fumes have built up.

His proposal has drawn opposition from the plastics industry, which contends it is "based on erroneous information and falsehoods."

Roy Gottesman, executive director of the Vinyl Institute, said the legislation here and elsewhere is being pushed mainly by plastic's competitors — the manufacturers of iron and steel pipe and conduit.

"Just about everything — wood, paper, cotton, you name it — gives off toxic fumes when burned. There is really no such thing as a non-toxic material," Gottesman said. Banning toxic materials would "eliminate virtually everything that can go into a building," he said.

The Vinyl Institute is a division of the Society of the Plastics Industry Inc., a New York-based trade association which represents 10 major producers of polyvinyl chloride and the raw material from which it is made.

Paul Imhoff, city superintendent of building inspection, said the current building code requires that plastic fixtures be in a fire-resistant enclosure.

Imhoff and Robert Anderson, chief of plumbing inspection for Allegheny County, said plastics were not used extensively in recently constructed skyscrapers Downtown.

> *"(Plastic is) one of the most dangerous materials ever invented in the name of modern civilization."*
>
> *— Lyle Hall*
> *L.A. fireman*

The cost of enclosing plastic fixtures in fire-resistant walls makes the use of plastic unfeasible in many larger structures, Anderson said. Plastic plumbing is common in residential construction, he said.

A PAT spokesman confirmed that some polyvinyl chloride is being used in construction of sewers for the new Downtown subway.

Spokesman Mike Scanlon described the use of plastic as "very minimal" and said the authority has stringent fire safety specifications.

At least 35 major cities, including New York, Los Angeles, Chicago, Philadelphia, Detroit, Boston, Dallas, Cleveland, St. Louis and Atlanta have enacted restrictions on plastic building materials, Woods said.

Public outcry forced New York to spend $1.5 million in 1982 to rip out newly installed plastic electrical tubing in several subway stations.

Investigators have blamed fumes from burning plastics for many of the MGM Grand fatalities. While the fire was contained on the hotel's ground level, 67 persons died between the 20th and 25th floors.

Gottesman, however, said investigators determined the fire was caused by electrical arcing along a metal conduit. Use of plastic conduit, which does not conduct electricity, would have prevented the fire, he said.

"The thing that solves the problem (of fire safety) is early detection of a fire and a quick-acting sprinkler system," Gottesman said. Firefighters, he said, must be properly equipped with self-contained breathing apparatus.

A different view came from Lyle Hall, president of the Los Angeles firefighters union, who last year called plastic "one of the most dangerous materials ever invented in the name of modern civilization."

Woods' bill will be referred to the city's Board of Code Review for a public hearing.

Fighting the new fire danger

The science of fire holds mysteries that Americans must soon solve if they want their nation dethroned as the fire-death capital of the industrialized world.

The swift passage of Assembly Concurrent Resolution 146 through the Legislature is a good sign that leaders are awaking to the inadequacies of fire protection in the U.S. The resolution, sponsored by Los Angeles Assemblywoman Maxine Waters, directs the departments of Health Services and Industrial Relations to develop a standard toxicity testing method for burning building materials.

As an Emmy-award winning NOVA show on the Public Broadcasting System recently pointed out, current fire codes are largely inadequate in addressing the danger of toxic gases from burning plastics and other new building materials.

Most fire codes are written to deal with the fire dangers of an age of steel, glass and wood. They have stressed the need to keep fires in large buildings from spreading.

But as buildings are filled with new plastic and petroleum-based materials, a new danger — toxic gases from burning materials — has come to the forefront.

Experts know the gases kill. But the codes do not reflect the latest scientific knowledge about when and how fumes become lethal.

California has been spared the tragic fires of recent years, such as the MGM Grand Hotel fire in Las Vegas, which claimed 84 lives. Most of the deaths in that fire occurred 20 floors from the flames. Strong evidence suggests that burning plastics caused many of them.

But such fires could happen here. California permits more plastic materials in construction than many experts consider safe.

Yet, for a variety of reasons, there has been little movement to revise fire codes to bring them up to date.

Writing new codes requires the latest in scientific knowledge, but for many years, the physics and chemistry of fire have been neglected. The National Bureau of Standards began focusing on materials toxicity in the late 1970s only after time revealed that regulations dealing with ignition and combustion could not cope with the dangers of plastics.

Moreover, the agencies that have combined responsibility for fire prevention were ill-equipped to meet the problems of the plastics' age.

Fire departments, already spread thin fighting fires and investigating arson, have few resources to carry out basic research into fire science.

The National Fire Protection Association, which writes and sells fire codes, is first of all a commercial organization. Critics charge that NFPA investigators have been slow to see modern fire dangers because of their interest in protecting the reputation of NFPA's existing codes.

The International Society of Builders writes the Uniform Building Code with little input from fire experts. Since none of the code books is mandatory, there is a subtle pressure to keep them from being too rigorous and thus less likely to be adopted.

Congress in 1974 created the U.S. Fire Administration as a resource bank which collected data, published reports, paid for research, and had planned to train firefighters. But the Reagan administration dissolved it.

The issue of the fire danger of modern materials is further complicated by a battle between the plastics industry and the metal industry for sales of their respective building materials. With all these factors, is it any wonder that there is little hard data on the toxicity of burning building materials?

The Legislature's overwhelming support for the study of the toxicity of burning materials is a step in the right direction. But the real struggle will come when the test results are in, standards are proposed, and attempts are made to write regulations that would make California as fire-safe as the rest of the industrialized world.

Then California will have to make the tough decision whether it would rather regu-

Concern grows over potential hazards in PVC plastic

Experts trying to set standards for material's toxicity, fire resistance

By Catherine Foster
Special to The Christian Science Monitor
Boston

It's present, to some degree, in almost every American home. Now, fire safety and health officials are increasingly questioning its use.

It's PVC, or polyvinylchloride, and it's been used for 35 years in everything from telephones to automobile bumpers to wallpaper. Inexpensive, lightweight, and versatile, in the last decade it has overtaken steel as the chief ingredient in drains, vents, and underground pipes. The use of some PVC products grew from 30 percent in 1972 to 46 percent in 1980.

But the glamour appears to be wearing off:

- Statewide public hearings were held recently in New Mexico by construction industries to determine whether to ban certain PVC products from the state's electrical code.
- The New York Transit Authority decided last month against further use of PVC electrical tubing in subway stations after health officials warned of the danger posed by burning plastic.
- The Chicago City Council decided against including PVC in the city building code as electrical conduit after testimony by toxicologists.

As PVC's use has grown so have questions about its safety. Fire-safety experts say that the large quantity of plastics, including PVC, in several major fires — the MGM Grand Hotel in Las Vegas, the Stouffer's Inn in Harrison, N.Y., and the Beverly Hills Supper Club in Southgate, Ky. — contributed to the spread of the fire and to the injuries and deaths. One toxicologist says PVC burns hotter and faster than wood, and produces smoke 20 times as toxic. PVC can smolder for hours at temperatures too low to trigger certain fire detectors, releasing toxic fumes, says Gordon Vickery, director of the Foundation for Fire Safety in Arlington, Va.

Fire-safety officials express concern at the use of PVC in places where fast exits aren't always possible: prisons, high-rises, nursing homes, airplanes, and subways.

Spokesmen for two PVC manufacturers, B. F. Goodrich and Carlon, claim that steel manufacturers have fueled the uproar over the plastic. The spokesmen say steel firms don't want to lose their once-exclusive conduit and tubing markets. A steel industry spokesman denies that steel companies advocate removing all plastics.

Plastics manufacturers assert that PVC is not the only building material that releases toxic fumes when burned. Michael O'Mara, vice-president of research and development at B. F. Goodrich, claims that "although PVC does release toxic combustion products when it burns, so do other materials. And PVC is no worse."

Several of the major fires, he says, can be attributed to fire-code violations, rather than PVC. In the MGM Grand fire, for example, there was a lack of sprinklers and fire-resistant barriers, according to the National Fire Protection Association (NFPA).

Plastics and steel manufacturers alike call for stricter adherence to fire codes and more testing. One problem: Duplicating actual fire conditions in a laboratory is difficult — there is no way of determining how different elements react with one another, says Rosalind Anderson, of Arthur D. Little Inc., a Boston research firm.

Although the plastics industry and independent labs have conducted toxicity and flammability tests on PVC for the last 10 years, a national test standard has yet to be established that would utilize this research and control the application of PVC. That is changing. The NFPA is examining the toxicity issue and plans to discuss it, for the first time, at this year's annual meeting. The National Bureau of Standards has developed a test for toxicity, which it is now in the process of approving.

MAR 1 5 1985

Bill No. Committee Substitute House Bill No. 64 (L&C)

Title "An Act relating to elevator safety standards."

Date March 15, 1985

Contact: Robert J. Bacolas
465-4870
Eileen Plate
465-2700

Every three years, the American Society of Mechanical Engineers updates the safety code for elevators and escalators to incorporate technical advances; and in 1984 it revised the 1981 code. House Bill No. 64 provides for the adoption of the 1984 code, but specifically excludes the adoption of one new provision in the 1984 code. This section (111.12) requires installation of a positive device to prevent elevator doors from being opened if the elevator is more than 18 inches from the floor. Such a device could impede evacuation of passengers by emergency personnel in case of a fire or other emergency and, therefore, is not recommended for inclusion in Alaska's minimum elevator standards. Our understanding is that the elevator industry nationwide has petitioned the American Society of Mechanical Engineers to review the implications of this particular provision from this standpoint also.

This bill also provides for adoption of the latest Inspection Manual which is used as a guideline by the Department's elevator inspectors.

Adoption of the latest code and inspection manual will bring Alaska's minimum standards into line with those commonly accepted and used by industry and by political subdivisions in their building inspection programs.

The Department supports Committee Substitute for House Bill No. 64. It will not have a fiscal impact on the Department.

The Honorable Mike Navarre
Chairman, Labor and Commerce Committee
House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Navarre:

As you requested during the February 21, 1985 hearing on House Bill 64, enclosed are copies of the seven proposals Scott Dicker of Otis Elevator Company provided us with. The specific proposals came from the Municipality of Anchorage, CMW Elevator Company of Anchorage and T.R. Slaton, a consulting electrical engineer from Anchorage.

Also enclosed are the Department's responses to the individual proposals. You will note that the Department concurs with the recommendation in proposal #4, that Section 111.12 of the 1984 Elevator Code not be adopted by the State of Alaska. The following amendments to House Bill 64 are required to achieve this.

Sec. 1, line 13, needs to be amended to read:

safety code in the state. Section 111.12, Restricted Opening of Hoistway Doors and/or Car Doors on Passenger Elevators, and Section 100.1 [100.1a], Inspection and Test Periods of the
100.1

Sec. 1, line 15, needs to be amended to read:

Escalators are [IS] not adopted as a part of the minimum elevator safety

My understanding is that the other concerns expressed in the enclosed proposals have been satisfied.

Thank you for your continued help with this bill.

Sincerely,

Jim Robison

Jim Robison
Commissioner

DOL Response to Proposed Amendments

Department of Labor Response
to proposed Amendments to
1984 Elevator Code

Proposal 1: (Municipality of Anchorage)

Do not Adopt the National Safety Practice for the Inspection of Elevators and Escalators (Inspector's Manual--ANSI/ASME A17.2 as set out in Section 2 of House Bill 64.

Department's Response:

The A17.2 Inspectors Manual is used by the department as a guide to assure uniform application of minimum elevator standards. It is important to continue to include this provision in the law as it advises the public and industry of the procedures used by the Department when conducting inspections.

Proposal 2: (Municipality of Anchorage)

Amend Section 2000.7A of the Elevator code to provide that the travel of handicapped elevators should not exceed 6 feet.

Department's Response:

Section 2000.7 of the Elevator code provides that the travel of a handicapped elevator shall not exceed 12 feet. Since a handicapped car is required to have key operation and cannot penetrate a floor, the Department does not believe 12 feet of travel poses any safety problems.

The Department would point out that the municipality could, by local ordinance, adopt the more stringent 6 foot maximum if it wished.

Proposal 3: (Municipality of Anchorage)

The 1984 ANSI A17.1 Code for Elevators and Escalators should be adopted.

Department's Response:

The Department concurs. The 1984 code is the latest code, and the 1981 code now in effect is outdated.

Proposal 4: (Municipality of Anchorage)

Section 111.12 of the 1984 Elevator code should not be adopted.

Department's Response:

The Department concurs. This provision requires installation of a positive device to prevent elevator doors from being opened if the elevator is more than 18 inches from the floor. This could impede evacuation of passengers by emergency personnel in case of a fire or other emergency.

Proposal 5: (Municipality of Anchorage) Add a requirement to Section 101.32 of the Elevator Code to provide that access to machine rooms cannot be over the roof of unless a closed walkway is provided.

Department's Response: The Department has no particular problem with the intent of this proposal. However, here again the municipality could, by local ordinance, adopt the more stringent provision it is seeking. In the interest of minimizing deviations from the Elevator Code, the Department would prefer such a local remedy.

Proposal 6: (T.R. Slaton Consulting Electrical Engineer) The Uniform Building Code and Elevator Code contain conflicting provisions in smoke detector requirements.

Department's Response: The conflict between the Elevator Code A17.1 and the Uniform Building Code Section 5103.4(D) will not affect the Elevator Code. The Elevator Code would supersede the UBC when there are conflicts between the two codes.

Proposal 7: (CMW Elevator Company) Amend the Elevator Code to permit the use of mathematical formulas in lieu of test weights.

Department's Response: The Department is opposed to this proposed amendment. The Department has witnessed valve failures when the weight test was administered to the elevator, and the use of the mathematical formula would never have revealed this safety problem. To the department's knowledge, this is not an acceptable practice anywhere else in the United States.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502-0650
(907) 786-8160

TONY KNOWLES,
MAYOR

DEPARTMENT OF PUBLIC WORKS
(3500 East Tudor Road)

February 8, 1985

To Whom It May Concern:

I believe the adoption of ANSI A-17.1-1984 elevator is needed. The Municipality of Anchorage is now in the process of adopting the 1984 Code with a few proposals for local amendments.

However, I don't believe the A-17.2 inspector's manual should be adopted as law. The preface of the manual indicates the following:

PREFACE

This Manual is intended to serve only as a guide for the general use of inspectors. While it is in general based on the rules of the A17.1 Code, it also contains recommendations for the inspection of equipment which is not required to conform to that Code. Reference to the rules of the A17.1 Code are applicable to the 1971 edition including Supplement ANSI A17.1a-1972 thereto. While many legal codes, including additional orders, amendments, changes, or interpretations issued by the enforcement authorities are based upon the A17.1 Code, inspectors should be guided by whatever elevator code is legally in force. Any recommendations made herein apply only insofar as they conform to the legal requirements. It is not intended that this Manual be used as, or in place of a legal elevator code, but rather that it be used in whole or in part as a practical guide to the inspection of elevators, escalators and moving walks.

The terms *Section*, *Rule*, or *Table* refer to the identifying section, rule, or table, in ANSI A17.1–1971. The term *Item* refers to a numbered portion of this Manual.

Bill No. House Bill 66

Date January 21, 1985

Title "An Act relating to workers' compensation; and providing for an effective date."

Contact J. L. McClintock 465-2790

The Department of Labor and the Workers' Compensation Board recommends passage of House Bill 66, providing an additional board panel for Southcentral Alaska. This increases the composition of the board from eight lay members to ten lay members.

The additional board panel is required for the Southcentral region in order to expeditiously handle the heavy board hearing load for that area. In the past, it took up to four months for parties to obtain a board hearing in the Anchorage area. By scheduling additional hearing rounds, which more than doubles the days Southcentral board members sit hearings compared to the other panels, we have been able to schedule parties for hearing within 45 to 60 days. However, the lay board members are unable to dedicate that much time to hearings because of their job commitments in the private sector. During the last two years, three Southcentral board members have been forced to resign board positions due to the expanded hearing schedule.

It is critical that an additional board panel be added in Southcentral so that the expanded hearing schedule will be met, allowing the parties to be scheduled for hearing within 45 days.

Juneau, AK 99811

Dear Senator Zharoff:

The Department's Workers' Compensation bill, House Bill 66, is presently before your committee.

After this bill passed the House, it came to our attention that it should have carried an immediate effective date instead of the July 1, 1985 date reflected. Accordingly, I would appreciate your assistance in amending Section 2 of House Bill 66 to read:

> This Act takes effect immediately in accordance with AS 01.10.070(c).

This will provide immediate relief to our existing board members who are having difficulty dedicating so much time to Workers' Compensation Board hearings.

I apologize for the Department's oversight in this regard.

Thank you for your help.

Sincerely,

for Jim Robison
Commissioner

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the Workers' Compensation Board. This bill establishes an additional Workers' Compensation Board panel for the south-central region to deal with the increased load of hearings held in the Anchorage area. (Currently it takes up to four months to obtain a hearing.) Additionally, the bill proposes to bring the law into conformity with actual practice by stating that the lay members of the board, but not the commissioner of labor or his designee, are subject to confirmation by the legislature. (As a department head, the commissioner is, of course, already subject to confirmation.)

This bill is a high priority for the Department of Labor, and I urge your prompt and favorable consideration of it.

Sincerely,

Bill Sheffield

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.30.005(a) is amended to read:

(a) The Alaska Workers' Compensation Board consists [SHALL CONSIST] of [NINE MEMBERS, INCLUDING] a southern panel of three members sitting for the first judicial district, a northern panel of three members sitting for the second and fourth judicial districts, two southcentral panels [A SOUTH-CENTRAL PANEL] of three members each sitting for the third judicial district, and one panel of three members that may sit in any judicial district. Each panel must [SHALL] include the commissioner of labor or the designated representative of the commissioner, a representative of industry, and a representative of labor. The latter two members of each panel shall be appointed by the governor and [. ALL PANEL MEMBERS] are subject to confirmation by a majority of the members of the legislature in joint session.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

The Honorable Richard Shultz
House of Representatives
Juneau, Alaska 99811

Dear Mr. Shultz;

It is my understanding, that you were the sponsor of House Bill # 68, dealing with the Mandatory Insurance Law. I would appreciate a few minutes of your valuable time to relate an incident that occurred recently and the resulting frustrations I encountered.

Last Christmas morning, while returning from my daughter's house, my new Thunderbird was struck by an old beat up Volkswagon, causing $809.56 in damages. The other driver clearly stated to the investigating trooper "I was driving too fast because I was late for breakfast." However, the trooper did not cite him. Later when I called the trooper to ask why he was not cited, the trooper replied, he would look at the accident reports before making a judgement. At the scene of the accident, the trooper "ran" our cars and licenses, they apparently came back with the correct information or at least the trooper did not indicate anything to the contrary. The trooper then asked if we were both covered by insurance. We both answered to the affirmative.

The next day when I pursued the matter a little more, I found in my investigations, the driver was only licensed to drive a Toyota and had a limited SR 22 license. Also, I found, the owner of the Volkswagon did not have insurance either.

Within the next few days, after making numerous phone calls to various state and insurance people, I was informed that the best way to receive restitution would be to file in small claims court, against the driver and owner. Having done this, I am still stuck with a rusting and damaged car, which used to be my pride and joy. My insurance company will change a $200.00 deductible fee if I should decide to file with them. However, I am very mad at the whole system. Why should I be penalized when the owner and the other driver are still driving around free and clear?

[redacted]

BACK UP INFORMATION

Sir, I feel an amendment should be added to House Bill # 68, that would and could prove immediately, to the investgating officer, verification of insurance, to both parties involved in an accident. Such an addition to the law, would alleviate some of the problems and frustrations I have been going through plus it would aid the police and courts, and would make this law, a law more efficient, fair and effective.

Sincerely;

Myke Augustus

KCAM TALK

THIS IS REP. DICK SHULTZ SPEAKING TO YOU FROM JUNEAU.
LAST WEEK I MENTIONED I WOULD DISCUSS HB 68 MY ALTERNATE MANDATORY INSURANCE BILL. THIS BILL IS INTRODUCED ONLY AS AN ALTERNATIVE TO THE PRESENT INSURANCE LAW AND IS NOT MEANT TO REPLACE IT.

IT IS MY BELIEF THE DRIVER SHOULD BE INSURED--NOT THE VEHICLE. HB 68 ACCOMPLISHES THIS. I ALSO CONTEND THE DRIVER'S DRIVING RECORD SHOULD DETERMINE THE POLICY PREMIUM--NOT THE AGE OF THE VEHICLE OR WHETHER IT HAS 4 CYLINDERS OR 16 CYLINDERS. FOR EXAMPLE--IF THE INSURANCE RECORDS RATE ME A AS POOR DRIVER AND MY WIFE AS A GOOD DRIVER THEN I DON'T BELIEVE OUR INSURANCE PREMIUMS SHOULD REFLECT A HIGHER RATE FOR BOTH OF US BECAUSE OF MY INEPTNESS. UNDER THIS BILL ONLY I WOULD BE REQUIRED TO PAY THE HIGHER PREMIUM. UNDER THE PRESENT LAW, IF A PERSON HAS NUMEROUS PIECES OF EQUIPMENT BUT ONLY USES IT FOR PART OF THE YEAR ~~HE OR SHE~~ You ARE REQUIRED TO PAY THE FULL PREMIUM. EVEN IF ONE IS LUCKY ENOUGH TO FIND AN INSURANCE COMPANY WHO WILL ALLOW A WAIVER ON DEAD-LINED EQUIPMENT THE REPORTS NECESSARY FOR THIS ALLOWANCE CAN BE TIME CONSUMING AND VERY TEDIOUS. FOR EXAMPLE--UNDER THE PRESENT LAW IF YOU HAVE A PICK-UP TRUCK THAT IS USED ONLY FOR HAULING YOUR GARBAGE TO THE DUMP 2 OR 3 TIMES A MONTH--YOU ARE REQUIRED TO CARRY FULL LIABILITY INSURANCE ON THIS PICK-UP. THIS CAN MAKE YOUR GARBAGE HAULING PRETTY EXPENSIVE . HB 68 IS DESIGNED EXPRESSLY FOR THE FAMILY WHO OWNS A LOT OF VEHICLES THAT MUST BE LICENSED BUT ARE ONLY DRIVEN ON A PART-TIME BASIS.

INSURANCE COMPANIES AND THE STATE OF ALASKA DO NOT SUPPORT THIS BILL. INSURANCE COMPANIES CLAIM IT WILL FORCE THEM TO RAISE THEIR RATES

BECAUSE OF THE NECESSITY FOR ADMINISTRATIVE CHANGES. NO ONE LIKES CHANGES--ESPECIALLY IF THEY THINK IT IS GOING TO COST THEM MONEY. INSURANCE COMPANIES CAN FORCE US AS INDIVIDUALS TO ACCEPT THEIR CHANGES IN POLICY BUT WHEN THE SHOE IS ON THE OTHER FOOT--IT IS AN ENTIRELY DIFFERENT STORY. LIKEWISE THE STATE HAS PUT A VERY LARGE FISCAL NOTE ON THIS BILL BECAUSE OF THE MANY ADMINISTRATIVE CHANGES REQUIRED. THE STATE CLAIMS IT WILL TAKE YEARS TO COMPILE DATA TO USE AS A BASIS FOR REGULATING INSURANCE RATES. THE STATE INSURANCE COMMISSION MAKES THE STATEMENT THEY WOULD HAVE NO REAL WAY OF DETERMINING WHETHER INSURANCE RATES ARE JUST OR NOT. WELL--- THE REASON I INTRODUCED THIS BILL IS BECAUSE A GREAT MANY CONSTITUENTS AND I THINK OUR PRESENT INSURANCE RATES ARE UNJUST.

112 Signatures

P.S.

Some other ideas from people were —

① each person should show liability insurance when getting / renewing their license to drive.

② do not wait until 1st accident over $500.00 for insurance, Also follow #1

③ motorcyclists should have to pay for only ½ year of motorcyle liability because of our short driving season.

④ a wife + husbands driving records should be individualy considered — not one penalized for anothers poor driving, but each rewarded for good driving. The same for a minor.

REP DICK SHULTZ

POSITION PAPER / Department of Commerce & Economic Development

CSHB 68 (L&C): "An Act relating to motor vehicle liability insurance."

The department is in favor of this legislation, if amended. This legislation offers a third form of automobile insurance that may comply with the provisions of the mandatory automobile insurance law which became effective on January 1, 1985.

Under current law, there are two forms of automobile liability insurance recognized. The first is "owner's" coverage which insures an owner for a specified vehicle or vehicles and anyone operating the specified vehicle with the consent of the owner. Typically, there is also a limited extent of nonowned vehicle coverage extended for temporary replacement vehicles.

The second form is "operators" coverage which covers the insured person's use of nonowned vehicles only. Typically, this coverage is written for a person who does not own a motor vehicle but may be driving nonowned vehicles.

The two available forms can work a financial hardship on persons owning a number of vehicles, where that person is the sole operator of a motor vehicle. For this person and others who wish to avail themselves of the option, a third choice is proposed. This option is called the "personal" policy and it is a combination of the first two forms. This form covers all vehicles operated by only the person named, whether the vehicle operated is owned or not. No vehicles are specified and coverage would not extend to other operators. This kind of coverage will be particularly attractive to the owner and sole operator of a number of vehicles.

During work on the CS, a provision was unintentionally added to the description of the "owner's" coverage. The language on page 1, lines 15-16, "or the use by an insured person of a nonowned motor vehicle" should be removed. Inclusion of this language substantially and unnecessarily broadens that form of coverage.

Loren H. Lounsbury, Commissioner
Department of Commerce & Economic Development

CSHB 68 (Rules): Sectional Analysis

Section 1) Requires an "owner's" motor vehicle liability policy to designate the vehicles covered, and the name of the person being insured.

"Operator's" liability policy must insure the policy holder for liability arising from the use of a car which is not owned by the insured.

"Personal" motor vehicle liability policy must insure the named person for liability on owned or unowned vehicle.

All 3 types of motor vehicle liability insurance must provide the following coverage for use in the US and Canada:

1) $50,000 bodily injury/death for one person
$100,000 for 2 persons;

2) $25,000 property destruction/per accident

Requires the same coverage limits for 28.22.1[illegible]-130 (Uninsured and Underinsured Motorist Coverage)

Policy must state name and address of insured and meet the requirements of 21.42.160-170;

Section 2) If the owner and operator of a vehicle are unknown, payment under the uninsured or underinsured coverage maybe made only where direct contact between motor vehicles has occured. If one person leaves the scene of an accident, the other person is presumed to be insured if he or she reports the accident to the authorities within 24 hours.

Sections 3 and 4) technical changes to conform with changes made earlier.

Section 5) Definitions

CHAIRMAN'S INFORMATION: CSHB 68 (Rules)

1) BILL TITLE: "An act relating to motor vehicle liability insurance."

a) Introduced: Rep Schultz

b) Co-sponsors:

2) INTENT: This measure expands the two forms of motor vehicle liability insurance currently permitted, and creates a category of "personal" motor vehicle liability insurance. This type of liability insurance would cover all vehicles driven by the person named in the policy, whether the person owned them or not.

CONTENTS OF POLICIES IN GENERAL.
TEXT (a) Each policy shall specify
(1) the names of the parties of the contract;
(2) the subject of the insurance;
(3) the risks insured against;
(4) the time when the insurance thereunder takes effect and the period during which the insurance is to continue;
(5) the premium;
(6) the conditions pertaining to the insurance.

(b) If under the policy the exact amount of premium is determinable only at stated intervals or termination of the contract, a statement of the basis and rates upon which the premium is to be determined and paid shall be included.

(c) Subsections (a) and (b) of this section do not apply to surety contracts, or to group insurance policies.

(d) Each policy and annuity contract issued by a domestic insurer, and the forms thereof filed with the director, shall have printed on them an appropriate designating letter or figure, or combination of letters or figures or terms identifying the respective forms of policies or contracts, together with the year of adoption of the form. When a change is made in the form, the designating letters, figures or terms and year of adoption shall be correspondingly changed.

POINT SYSTEM.
TEXT (a) For the purpose of identifying habitually reckless or negligent drivers and habitual or frequent violators of traffic laws, the commissioner shall adopt regulations establishing a uniform system for the suspension, revocation, limitation or denial of a driver's license or driving privilege by assigning demerit points for convictions for violations of traffic laws which are required to be reported to the department under AS 28.15.191.

(b) The regulations adopted under (a) of this section shall include a designated level of point accumulation which identifies drivers who are habitually reckless or negligent or who are habitual or frequent violators of traffic laws, so as to show a disrespect for traffic laws and a disregard for the safety of other persons. In formulating the point system authorized by this section, the commissioner shall, in the interest of interstate uniformity, provide for suspension, revocation or denial of a driver's license or privilege for an accumulation of 12 or more points as a result of offenses committed during any consecutive 12-month period or 18 or more points as a result of offenses committed during any 24-month period.

SELF-INSURERS.
TEXT (a) A person in whose name more than 25 vehicles are registered in this state may qualify as a self-insurer by obtaining a certificate of self-insurance issued by the department as provided in (b) of this section.

(b) The department may issue a certificate of self-insurance when it is satisfied that the person has and will continue to have ability to pay judgments obtained against the person. The certificate may be issued authorizing a person to act as a self-insurer for either property damage or bodily injury, or both, or within the limits the department prescribes.

(c) Upon not less than 10 days' notice and a hearing pursuant to the notice, the department may upon reasonable grounds cancel a certificate of self-insurance. Failure to pay a judgment within 30 days after judgment becomes final is a reasonable ground for the cancellation of a certificate of self-insurance.

MOTOR VEHICLE LIABILITY POLICY.
TEXT (a) The owner's policy of liability insurance shall

(1) designate by description or appropriate reference all vehicles that it covers;

(2) insure the person named against loss from the liability imposed by law for damages arising out of the ownership, maintenance, or use of the vehicle in the United States or Canada, subject to limits exclusive of interest and costs, with respect to each vehicle, as follows:

(A) $50,000 because of bodily injury to or death of one person in any one accident, and, subject to the same limit for one person, $100,000 because of bodily injury to or death of two or more persons in any one accident; and

(B) $25,000 because of injury to or destruction of property of others in any one accident;

(3) contain coverage prescribed in AS 28.22.100 - 28.22.130 in the amounts set out in (2) of this subsection for the protection of the persons insured under the policy who are legally entitled to recover damages from the owner or operator of an uninsured or underinsured motor vehicle because of bodily injury or death, or damage to or destruction of property arising out of the ownership, maintenance, or use of the uninsured or underinsured motor vehicle.

(b) The operator's policy of liability insurance shall insure the person named as insured against loss from the liability imposed on the operator by law for damages arising out of the use by the operator of a motor vehicle not owned by the operator, within the same territorial limits and subject to the same limits of liability as are required for an owner's policy of liability insurance.

(c) The motor vehicle liability policy shall state the name and address of the named insured, the coverage, the premium charges, the policy period, and the limits of liability, and shall contain an agreement or an endorsement that insurance is provided in accordance with the coverage defined in (a) of this section for bodily injury and death or property damage, or both.

Chairman's Information:

1) HB 77 am: "An act relating to the capital funds required of domestic and foreign insurers"

   a) Introduced: Cato
   b) Co-Sponsors: none

2) INTENT: This legislation increases the capital and surplus requirements for insurance companies to operate in the state. The justification for this proposed increase is to assure that the insurer is able to meet its financial obligations. The capital and surplus minimums were last increased in 1976, and the proposed increases would restore the purchasing power of the minimums to slightly over the 1976 level.

   The bill also has "grandfather" provisions for domestic life companies (we have one) and for domestic reciprocals (we have two).

   The Div of Insurance feels that the domestic reciprocals (Alaska Timber Insurance Exchange and Alaska Rural Electric Cooperative Association) are watched closely, and that as non profit corporations the increased minimums would present a hardship to them.

   NOTE: The proposed increases will make it more difficult for new companies (in Alaska and outside) to do business in the state. Although there is no demonstrable evidence that this will impact the "bush" negatively, it would be a good question to pose. Don Koch from the Div of Insurance should be present to give testimony.

   FISCAL NOTES: 0

3) COMMITTEE COMMENTS: SCS drafted regarding the "grandfathering" of the one domestic life insurer. Language occurs on page 3, lines 18 thru 21 and states that the "grandfathering" will not occur if the ownership is changed, or the class, line, and volume of business written is "materially" changed from that written on Dec 31st, 1984.

4) PUBLIC HEARINGS:

BY THE LABOR AND COMMERCE COMMITTEE

IN THE HOUSE

SENATE CS FOR HOUSE BILL NO. 77 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the capital funds required of foreign and domestic insurers."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.09.070(a) is amended to read:

(a) To qualify for authority to transact any one kind of insurance as defined in AS 21.12, or combination of kinds of insurance as shown below, a foreign insurer, or a domestic insurer applying for its original certificate of authority in this state, or an insurer reapplying for a certificate of authority in this state after having withdrawn from this state for any cause, shall possess and thereafter maintain unimpaired basic paid-in capital stock (if a stock insurer) or unimpaired basic surplus (if a foreign mutual insurer or foreign reciprocal insurer), and shall possess when first so authorized additional funds in surplus as follows:

Kind or Kinds of Insurance	Basic Capital or Basic Surplus		Additional Surplus	
Life	$\underline{\$800,000}$	[$400,000]	$\underline{\$800,000}$	[$400,000]
Disability	$\underline{800,000}$	[400,000]	$\underline{800,000}$	[400,000]
Life and Disability	$\underline{1,000,000}$	[500,000]	$\underline{1,000,000}$	[500,000]
Property	$\underline{600,000}$	[400,000]	$\underline{600,000}$	[400,000]
Casualty excluding vehicle	1,000,000	[500,000]	1,000,000	[500,000]

Vehicle	800,000	[400,000]	800,000	[400,000]
Marine & Transportation	1,000,000	[450,000]	1,000,000	[450,000]
Surety	1,000,000	[500,000]	1,000,000	[500,000]
Title	300,000	[250,000]	300,000	[250,000]
Any two or more of the following kinds of insurance: property, marine and transportation, vehicle, casualty excluding vehicle, surety and disability	1,500,000	[550,000]	1,500,000	[550,000]
[MULTIPLE LINES (ALL LINES EXCLUDING LIFE AND TITLE INSURANCE)		750,000		750,000]
Legal Expenses	600,000	[400,000]	600,000	[400,000]
Mortgage Guarantee	1,000,000	[400,000]	1,000,000	[400,000]

* Sec. 2. AS 21.09.080 is repealed and reenacted to read:

Sec. 21.09.080. CAPITAL FUNDS REQUIRED OF OLD DOMESTIC INSURERS. (a) A domestic insurer holding a valid certificate of authority to transact insurance in this state immediately before January 1, 1985, may continue to transact the same kinds of insurance permitted by the certificate of authority provided that after January 1, 1985, the insurer maintains unimpaired no less paid-in capital stock (if a stock insurer) and no less minimum surplus (if a mutual insurer) than the amount required of the insurer by AS 21.09.070 on December 31, 1984, as if the law had continued in force.

(b) An insurer described in this section may not, after January 1, 1985, declare a dividend or distribute assets to its

shareholders, members or subscribers until it has a total capital and surplus equal to the total capital and surplus required for a like insurer under AS 21.09.070.

(c) Annually on December 31, beginning in 1985, each domestic insurer described in this section with less paid-in capital stock (if a stock insurer) or less surplus (if a mutual insurer) than required by AS 21.09.070 as to new domestic insurers shall increase their unimpaired basic paid-in capital stock or surplus by an amount equal to 20 percent of the difference between the actual paid-in capital stock or surplus on December 31, 1983, and that required by AS 21.09.-070 as to new domestic insurers. By December 31, 1989, all domestic insurers shall maintain paid-in capital stock and surplus in amounts no less than required by AS 21.09.070 as to new domestic insurers.

(d) Notwithstanding the provisions of this section, a domestic life insurer duly licensed and capitalized on December 31, 1984, shall have and maintain the capital and surplus required under the laws of this state on December 31, 1984, as if the laws had continued in force. This subsection does not apply to a domestic life insurer if the ownership of the insurer is changed, or the class, line, and volume of the business written is materially changed from that written on December 31, 1984.

* Sec. 3. AS 21.69.220(b) is amended to read:

(b) When applying for an original certificate of authority, the insurer must be otherwise qualified under this title, and must have received and accepted bona fide applications as to substantial insurable subjects for insurance coverage of a substantial character of the kind of insurance proposed to be transacted, must have collected in cash the full premium at a rate not less than that usually charged by stock insurers for comparable coverages, must have surplus funds on

hand and deposited as of the date the insurance coverages are to become effective, or, in lieu of the applications, premiums and surplus, may deposit surplus, all in accordance with that part of the following schedule which applies to the one kind of insurance the insurer proposes to transact:

(A) Kind of Insurance	(B) Minimum No. of Applicants Accepted	(C) Minimum No. of Subjects Covered	(D) Minimum Premium Collected
Life (1)	500	500	annual
Disability (2)	500	500	quarterly
Property (3)	100	250	annual
Casualty (4)	250	500	annual
With Workers' Compensation	250	1,500	quarterly
Marine, Wet Marine, and Transportation	50	50	annual

(E) Minimum Amount of	(F) Maximum Amount of Insurance	(G) Minimum Surplus	(H) Deposit

Insurance Each Subject	Each Subject (5)	Funds Deposited (6)	of Surplus in Lieu of (6)
$1,000	$ 2,500	$800,000 [$ 50,000]	$800,000 [$100,000]
$ 10 (weekly indem.)	$ 25 (weekly indem.)	$800,000 [$ 50,000]	$800,000 [$100,000]
$1,000	$ 3,000	$600,000 [$100,000]	$600,000 [$200,000]
$1,000	$10,000	$1,000,000 [$150,000]	$1,000,000 [$200,000]
$1,000	$10,000	$1,000,000 [$200,000]	$1,000,000 [$300,000]
$1,000	$25,000	$1,000,000 [$100,000]	$1,000,000 [$200,000]

* Sec. 4. AS 21.75.050 is amended by adding a new subsection to read:

(d) Notwithstanding (a) and (c) of this section, or AS 21.09.-080, domestic reciprocal insurers duly licensed and capitalized on December 31, 1984, shall have and maintain the capital and surplus required at the date of their original license.

IN THE HOUSE BY CATO

HOUSE BILL NO. 77 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the capital funds required of foreign and domestic insurers."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.09.070(a) is amended to read:

(a) To qualify for authority to transact any one kind of insurance as defined in AS 21.12, or combination of kinds of insurance as shown below, a foreign insurer, or a domestic insurer applying for its original certificate of authority in this state, or an insurer reapplying for a certificate of authority in this state after having withdrawn from this state for any cause, shall possess and thereafter maintain unimpaired basic paid-in capital stock (if a stock insurer) or unimpaired basic surplus (if a foreign mutual insurer or foreign reciprocal insurer), and shall possess when first so authorized additional funds in surplus as follows:

Kind or Kinds of Insurance	Basic Capital or Basic Surplus		Additional Surplus	
Life	$800,000	[$400,000]	$800,000	[$400,000]
Disability	800,000	[400,000]	800,000	[400,000]
Life and Disability	1,000,000	[500,000]	1,000,000	[500,000]
Property	600,000	[400,000]	600,000	[400,000]
Casualty excluding vehicle	1,000,000	[500,000]	1,000,000	[500,000]

Vehicle	800,000	[400,000]	800,000	[400,000]
Marine & Transportation	1,000,000	[450,000]	1,000,000	[450,000]
Surety	1,000,000	[500,000]	1,000,000	[500,000]
Title	300,000	[250.000]	300,000	[250,000]
Any two or more of the following kinds of insurance: property, marine and transportation, vehicle, casualty excluding vehicle, surety and disability	1,500,000	[550,000]	1,500,000	[550,000]
[MULTIPLE LINES (ALL LINES EXCLUDING LIFE AND TITLE INSURANCE)		750,000		750,000]
Legal Expenses	600,000	[400,000]	600,000	[400,000]
Mortgage Guarantee	1,000,000	[400,000]	1,000,000	[400,000]

* Sec. 2. AS 21.09.080 is repealed and reenacted to read:

Sec. 21.09.080. CAPITAL FUNDS REQUIRED OF OLD DOMESTIC INSURERS. (a) A domestic insurer holding a valid certificate of authority to transact insurance in this state immediately before January 1, 1985, may continue to transact the same kinds of insurance permitted by the certificate of authority provided that after January 1, 1985, the insurer maintains unimpaired no less paid-in capital stock (if a stock insurer) and no less minimum surplus (if a mutual insurer) than the amount required of the insurer by AS 21.09.070 on December 31, 1984, as if the law had continued in force.

(b) An insurer described in this section may not, after January 1, 1985, declare a dividend or distribute assets to its

shareholders, members or subscribers until it has a total capital and surplus equal to the total capital and surplus required for a like insurer under AS 21.09.070.

(c) Annually on December 31, beginning in 1985, each domestic insurer described in this section with less paid-in capital stock (if a stock insurer) or less surplus (if a mutual insurer) than required by AS 21.09.070 as to new domestic insurers shall increase their unimpaired basic paid-in capital stock or surplus by an amount equal to 20 percent of the difference between the actual paid-in capital stock or surplus on December 31, 1983, and that required by AS 21.09.070 as to new domestic insurers. By December 31, 1989, all domestic insurers shall maintain paid-in capital stock and surplus in amounts no less than required by AS 21.09.070 as to new domestic insurers.

(d) Notwithstanding the provisions of this section, a domestic life insurer duly licensed and capitalized on December 31, 1984, shall have and maintain the capital and surplus required under the laws of this state on December 31, 1984, as if the laws had continued in force.

* Sec. 3. AS 21.69.220(b) is amended to read:

(b) When applying for an original certificate of authority, the insurer must be otherwise qualified under this title, and must have received and accepted bona fide applications as to substantial insurable subjects for insurance coverage of a substantial character of the kind of insurance proposed to be transacted, must have collected in cash the full premium at a rate not less than that usually charged by stock insurers for comparable coverages, must have surplus funds on hand and deposited as of the date the insurance coverages are to become effective, or, in lieu of the applications, premiums and

surplus, may deposit surplus, all in accordance with that part of the following schedule which applies to the one kind of insurance the insurer proposes to transact:

(A) Kind of Insurance	(B) Minimum No. of Applicants Accepted	(C) Minimum No. of Subjects Covered	(D) Minimum Premium Collected
Life (1)	500	500	annual
Disability (2)	500	500	quarterly
Property (3)	100	250	annual
Casualty (4)	250	500	annual
With Workers' Compensation	250	1,500	quarterly
Marine, Wet Marine, and Transportation	50	50	annual

(E) Minimum Amount of Insurance Each	(F) Maximum Amount of Insurance Each Subject	(G) Minimum Surplus Funds Deposited	(H) Deposit of Surplus in Lieu of

Subject	(5)		(6)	(6)	
$1,000	$ 2,500	$800,000	[$ 50,000]	$800,000	[$100,000]
$ 10 (weekly indem.)	$ 25 (weekly indem.)	$800,000	[$ 50,000]	$800,000	[$100,000]
$1,000	$ 3,000	$600,000	[$100,000]	$600,000	[$200,000]
$1,000	$10,000	$1,000,000	[$150,000]	$1,000,000	[$200,000]
$1,000	$10,000	$1,000,000	[$200,000]	$1,000,000	[$300,000]
$1,000	$25,000	$1,000,000	[$100,000]	$1,000,000	[$200,000]

* Sec. 4. AS 21.75.050 is amended by adding a new subsection to read:

(d) Notwithstanding (a) and (c) of this section, or AS 21.09.-080, domestic reciprocal insurers duly licensed and capitalized on December 31, 1984, shall have and maintain the capital and surplus required at the date of their original license.

HB 77am Sectional Analysis:

Section 1) Increases the amount of capital and surplus requirements for "new" foreign and domestic insurers applying for a certificate to operate in the state. Also requires insurers who were previously certified in the state but withdrew to provide the increased capital and surplus amounts. Scheduled increases are established in this section.

Section 2) (a) Allows those domestic insurers presently holding valid certificates to continue to transact the same kinds of insurance as long as they maintain no less capital or surplus than they are currently required to have.

(b) prohibits insurers from declaring a dividend or distributing assets to their shareholders, members, or subscribers until they have the total capital and surplus required under this proposed legislation.

(c) Allows domestic insurers currently holding valid certificates of authority until Dec 31st 1989 to increase their capital and surplus requirements to the schedule adopted in section 1). Starting on December 31st, 1985, and then annually, domestic insurers with less than the required minimums proposed in this bill must increase their capital and surplus minimums by 20% of the difference between the amounts held on Dec 31st 1983 and the new required amounts.

(d) "Grandfathers" domestic life insurance companies at the capital and surplus requirement levels in effect on Dec 31st, 1984.

Section 3) Amends the "minimum surplus funds deposited" and the "deposit surplus in lie of" for insurers who are applying for a certificate of authority.

Section 4) Exempts domestic reciprocal insurers licensed and capitalized on Dec 31st, 1984 from the requirements of the new provisions.

Sectional Analysis

Department of Commerce & Economic Development / POSITION PAPER

FEB 6 1985

HB 77 An Act relating to the capital funds required of foreign and domestic insurers.

An insurance company desiring to do business in Alaska must have, among other things, certain amounts of unimpaired paid-in basic capital and unimpaired basic surplus before it can open its doors for business. These amounts, which are specified in Alaska Statutes, are intended to be a minimum cushion to assure that the insurer is able to meet its financial obligations.

These minimums were last revised in 1976. Since that time, the purchasing power represented by the specified limits has substantially diminished. For example, the value of a limit of $1,000,000 in 1976 has diminished as follows:

1976	$1,000,000	1981	$625,000
1977	$939,000	1982	$590,000
1978	$873,000	1983	$574,000
1979	$797,000	1984 est.	$559,000
1980	$693,000	1985 est.	$543,000

The proposed bill would effectively restore the purchasing power of the minimums to slightly over the 1976 level.

This proposal has grandfather provisions for domestic life companies (we have one) and for domestic reciprocals (we have two). All other domestics would have four years to reach the new required minimums. We view this as appropriate.

The Department lends its full support to this measure as proposed with a few minor nonsubstantive amendments. We urge the committee to consider the bill on its merits. The proposal is timely and we encourage its passage.

Loren H. Lounsbury, Commissioner

Date: 1/30/85

Alaska National
INSURANCE COMPANY
A policy of service and protection

January 11, 1985

The Honorable Betty Cato, Representative
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Betty:

I very much appreciate your undertaking to draft, prefile and introduce the legislation requiring increased capital and surplus minima for the formation and operation of insurance companies in the State of Alaska.

BACKGROUND

Insurance companies formed and doing business in the state of Alaska are closely regulated by Title 21 as implemented and enforced by the Division of Insurance.

Historically, and still today, the most important consideration in regulating insurance companies and the whole insurance business is to insure the solvency of the industry, that is to ensure that the insurance companies selling policies will have the financial resources to pay obligations under those contracts when claims are made. This becomes a particularly acute problem when one realizes claims under our casualty insurance policies may not be made for three, four even five years after the policy has been paid for and for life insurance companies the claims may not be made for as much as twenty years, for title companies an equally long period of time.

The insurance regulatory scheme, which is directed towards assuring the financial capability of all of the carriers selling insurance, attempts to meet this challenge by overseeing almost all phases of an insurance company's activities; its pricing, its investments, its management, its ownership and its significant business transactions.

Perhaps the most important control which statutes give the insurance department is to require that insurance companies have a minimum amount of cash in its capital and free surplus accounts before they are licensed and further requiring that it maintain those levels so long as it is licensed to do business in the state.

Periodically it is necessary for these requirements to be reviewed to determine if they are still adequate to meet current needs.

chorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

In 1966 the minima were doubled over what they had been prior to that time. The capital and surplus requirements were last reviewed by the legislature in 1976 at which time they were increased by 100% over the requirements on the books at that time.

Since 1976 there has been no change in the capital and surplus requirements but there have been significant changes in the exposures for insurance companies not the least of which has been double digit inflation which has so decreased the value of money since 1976 making it extremely important that these be again reviewed.

CAPITAL AND SURPLUS REQUIREMENTS

Basic capital or basic surplus and additional surplus are the accounts denominated in Alaska statutes as policyholders' surplus. This is the statutory accounting term applied to the accounts which are more commonly known by accountants as a company's net worth.

I was one of the key people responsible for starting Alaska National Insurance Company in October of 1980. I have been in the insurance industry since 1968, from October of 1975 through December of 1978 I was the director of the Division of Insurance and have been involved as a lawyer or as an executive officer for insurance companies

With this background I believe I can say with assurance that one of the most important concerns that the insurance industry has is the adequate capitalization of new entrants into the insurance business.

There are two reasons why the insurance industry is concerned about the financial security of other insurance companies:

(a) Those in the industry know full well that for the first several years of an insurance company's operation, capital and surplus is marketedly reduced partly because of genuinely incurred operating expenses and losses during the formative years and partly because of the peculiarities of statutory accounting, and that, if a company is not adequately capitalized it will quickly become insolvent even though it may be operating in accordance with rates, forms and procedures common to the rest of the industry.

(b) In Alaska there is an insurance guarantee association which provides among other things that all of the property and casualty insurance companies doing business in the state of Alaska must pay for losses which an insolvent insurance company doing busines in the state are unable to pay. We understand that it is the desire of the Division of Insurance to introduce a life insurance guarantee association which will have the same function with respect to life insurance companies.

Since losses left unpaid by an insolvent insurance carrier whether property, casualty or life must be paid for by those of us who are attempting to act responsibly in the industry we have a good and sufficient reason to be concerned that no company be started in the state of Alaska or allowed to enter the state from another state unless it has at least a minimum capital and surplus which in our judgement is necessary to properly operate a good insurance company.

POLICYHOLDER SURPLUS LEVEL

This legislative proposal requires that all the existing capital and surplus requirements be essentially doubled. If this legislation were adopted as proposed it would put Alaska near the top but not among the highest capital and surplus requirements for all of the states; that is, there are several states such as California, New York and Colorado which have capital and surplus requirements which are even higher than those which would be required by Alaska even after this bill were adopted.

It is my judgement that these minima are, particularly for Alaska, essential given the higher cost of workers' compensation claims, the higher property values involved, the higher exposure on auto and general liability claims and so forth.

ACCEPTABILITY

This measure was essentially drafted over a year ago and discussed among the insurance industry but never introduced as legislation.

At the time it was drafted, in November of 1983, it was presented to the then director of the Division of Insurance, Kenneth Moore who approved the language of the bill and agreed that he would suppport it if it were introduced.

I do not have a specific committment from him but I believe that the new director, John George likewise approves of this proposal.

In addition, the measure was submitted to the Board of Governors of the Alaska Insurance Guarantee Association for their comment. Their response was that all members of the Board Governors except one for themselves and for whatever trade associations in the insurance industry they represent, either approved of or did not disapprove of the measure.

IMPACT ON INSURERS

Enclosed is an exhibit showing the capital and surplus of domestic insurers in the state of Alaska. It can be seen that the bill would not adversely affect any of the existing domestic insurance companies except Umiliak Insurance Company, Life Insurance Company of Alaska, The Alaska Timber Insurance Exchange and a newly formed reciprocal owned by the Alaska Rural Electric Association. All other companies either meet or exceed the capital requirements or are wholly owned by large insurance companies which could easily downstream capital without any loss or expense to themselves in order to meet the requirements. Umiliak Insurance Company would have to come up with additional monies, but I have discussed this matter with the manager of Umiliak who informed me that on his behalf and on behalf of his ownership they approved of the bill and would meet the requirements.

Language has been included in the bill which would grandfather the Alaska Timber Exchange the only other reciprocal in the state and the Life Insurance Company of Alaska the only domestic life insurance company.

Should you have any further questions concerning the general purpose of the proposed bill or its specific language, I would be happy to have you or your staff call upon me.

Yours cordially,

Richard L. Block
President

CSHB 78(L&C): Sectional

Section 1) Identifies the occupations administered by the Division of Occupational Licensing and adds new language to include those occupations which are administered by the division but which do not have governing boards.

Section 2) Adds a new section which allows the department to establish fees by regulation. The department may not adopt a fee in regulation without the concurrence of the board regulating the occupation, and fees must reflect, to the extent possible, the actual cost to the department for which the fee is charged.

Section 3) Provides authority for the department, with the concurrence of the board, to establish a penalty fee by regulation for permit renewals that have lapsed for more than 60 days. This penalty is in addition to delinquent renewal fees.

Sections 4 thru 53) Makes cleanup changes which reflect the changes authorized in sections 1 thru 3, i.e. fees established by regulation.

Section 54) Repealers

Section 55) Sections 1 thru 3 take effect immediately

Section 56) Sections 4 thru 54 take effect on the effective date of regulations adopted under 08.01.065, enacted in section 2 of this bill.

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

BILL ANALYSIS

HB 78: "An Act relating to occupational licensing fees; and providing for an effective date."

HB 78 was requested by the Division of Occupational Licensing, Department of Commerce and Economic Development. It would authorize the establishment of all occupational licensing fees by regulation. Currently, most fees are set by statute, and revisions to the fees to reflect changing costs of licensing programs are infrequent.

Passage of this legislation will give the members of licensed professions and trades a greater opportunity to assist in regulating their own fees. The Administrative Procedure Act, AS 44.62, provides for public input at the time new regulations are being proposed and also gives the public the opportunity to petition an agency for adoption, amendment or repeal of a regulation. When petitioned, an agency must take action within 60 days.

This bill will also give the department flexibility in balancing the costs of licensing activities with the fees changed.

The granting of fee setting authority to occupational licensing boards is not an entirely new venture. Last year, the Legislature revised statutes relating to dentists and dental hygienists (Sec. 10, Chap. 100 SLA 1984) and in that bill there was authorization for the department to set fees by regulation. Additional precedent is found in the following statutes:

AS 08.48.091	Architects, Engineers and Land Surveyors. This provides that fees for examinations will be set by the board.
AS 08.48.231(c)	Architects, Engineers and Land Surveyors. This provides that regulations shall establish fees for reexamination and penalty fees for failure to renew.
AS 08.64	Medical Board. Fees for paramedics and physicians' assistants are currently set by the board.

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

HB 78 Sectional Analysis

HB 78: "An Act relating to occupational licensing fees; and providing for an effective date."

Section 1: This section identifies the occupations administered by the Division of Occupational Licensing. It adds new language to include the four occupations administered by the division which do not have governing boards.

Section 2: This section is the body of the entire bill. It directs the department to set occupational licensing fees by regulation. It directs the division to consult with the appropriate licensing boards before adopting regulations. It also states that the fees established by regulation must, to the extent possible, reflect the actual cost of the activity for which the fee is assessed.

Section 3: Provides the authority to establish a penalty for renewing a license which has been lapsed for 60 days or more.

Section 4 through Section 52: These sections bring the statutes of the individual licensing boards into compliance with the new regulatory fee language set out in Section 2.

Section 53: This section deletes statutory redundancy. With one exception, these all repeal statutes which say that the revenues generated by licensing fees shall be deposited into the general fund. This is already provided for in Title 37 and Article IX, Section 7 of the constitution.

Section 54: Effective date clause. Sections 1 through 3, the base sections of the bill, take effect immediately.

Section 55: Effective date clause. Sections 4 through 53 take effect on the effective date of regulations adopted under Section 2 of this bill. Until the effective date of new regulations, the current fee schedule will remain in effect.

PROPOSED FEE FORMULA

1) Actual Division cost allocated to a particular board for a fiscal year;

+

2) Cost of Board and License Examiners travel and per diem for a fiscal year;

+

3) Contractual costs for the Board for a fiscal year;

-

4) Subtract examination costs from the contractual costs;

÷

5) Divide the above total by the number of licensees;

=

6) Base application fee (i.e. comity, credentialling, endorsement);
Exam application fee = Base fee + cost of examination.

(Total Division Cost) + (Board/Examiner) + (Contractual) - (Examination Costs)
Tvl & Per diem

BASE LICENSE/APPLICATION FEE

EXAMPLES

Based on the proposed fee formula, the following two examples are suggested:

1) MEDICAL LICENSURE: (High)

70.8 (Div. cost) + 14.1 (Tvl/PD) + 7.4 (Contractual) = 92.3 - .8 (Exam cost) = 91.5 (Total Bd cost

91.5 ÷ 1393 (licensees) = $ 65.69 (Base annual license fee)

$65.69 x 4 = $262.76 for current 4 year license. A reduction from the current cost of $600 for four years.

This example is the basic formula that will be used with the additional computations for each category under a particular licensing authority.

2) NURSING LICENSURE: (Low)

166.4 (Div. cost) + 14.6 (Tvl/Pd) + 10.1 (Contractual) = 191.1 (Total Bd cost)

191.1 (Total Bd cost) - 3.0 (Exam cost) = 188.1 ÷ 6261 (licensees) = $ 30.04 (Base annual fee)

Base annual license fee = $30.04
Examination application/license fee = $30.04 + 25.00 = $ 55.04

30.04 x 2 = $60.08 (Biennial license fee); an increase from the current license fee of $50 for RN's and $30 for LPN's.

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3600

April 25, 1985

Honorable John Sackett
Co-Chair
Senate Finance Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Re: SCSHB 78(L&C) -- occupational licensing fees
Our file: 377-006-85

Dear Senator Sackett:

This letter is to clarify and correct my responses to two questions you asked me about this bill at the Senate Labor and Commerce Committee hearing on April 24.

First, HE 78 affects all occupational licensing fees collected by the Department of Commerce and Economic Development for professions licensed under AS 08. This means the 22 professions listed in AS 08.01.010 which is amended in sec. 1 of the bill plus the real estate profession which is included in secs. 2 and 50 of the bill. However, the bill does not affect the fees for the licensing of attorneys under AS 08.08, the Integrated Bar Act. Those fees are already fixed by the Board of Governors of the Alaska Bar Association under AS 08.08.080(b)(2), rather than by statute. Also, the bill does not include licensing fees for the insurance profession under AS 21. Another bill now in the Senate Finance Committee, CSHB 80(L&C), would authorize setting these fees by regulation rather than by statute. Nor does the bill affect commercial fishing permit fees which are set by regulation by the Limited Entry Commission under AS 16.43.160. Finally, of course, the bill does not affect statutorily set fees collected by non-occupational licensing regulatory agencies like the Public Utilities Commission, the division of banking, securities, and corporations, and the athletic commission.

In summary, the direct answer to your question about which I equivocated somewhat at the hearing is that SCSHB 78(L&C) authorizes all statutorily set occupational licensing fees to be set by regulation except for the fees for the insurance profession which are covered by CSHB 80(L&C).

Secondly, I was mistaken when I said that I thought most of the repealers in sec. 54 of the bill were repealers of fee setting statutes. In fact, only three of the statutes repealed set fees. They are AS 08.48.201(b), AS 08.48.241(e), and AS 08.54.170(c). With one exception, the other repealed statutes all state that fees will be deposited in the general fund. These statutes are repealed because they unnecessarily restate the obvious and for only some professions. Under art. IX, sec. 7, of the Alaska Constitution, dedication of license fees for all professions is prohibited. The other repealed statute is AS 8.48.290 concerning refunds and the time for payment of medical board exam fees.

I hope this letter adequately narrows, clarifies, and corrects my responses to your questions. Please let me know if I can provide any further information on this bill.

Sincerely,

NORMAN C. GORSUCH

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to occupational licensing fees; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 08.01.010 is amended to read:

Sec. 08.01.010. APPLICABILITY OF CHAPTER. This chapter applies to the

(1) Board of Public Accountancy (AS 08.04.010);

(2) [REPEALED

(3) REPEALED

(4)] Board of Chiropractic Examiners (AS 08.20.010);

[(5) REPEALED]

(3) [(6)] Board of Dental Examiners (AS 08.36.010);

(4) [(7)] Board of Electrical Examiners (AS 08.40.010);

(5) [(8)] State Board of Registration for Architects, Engineers and Land Surveyors (AS 08.48.011);

(6) [(9)] State Medical Board (AS 08.64.010);

(7) [(10)] Board of Nursing (AS 08.68.010);

(8) [(11)] Board of Examiners in Optometry (AS 08.72.010);

(9) [(12)] Board of Pharmacy (AS 08.80.010);

[(13) REPEALED]

(10) [(14)] Board of Veterinary Examiners (AS 08.98.010);

(11) [(15)] Board of Psychologist and Psychological Associate Examiners (AS 08.86.010);

[(16) REPEALED

(17) REPEALED]

(12) [(18)] Board of Marine Pilots (AS 08.62.010);

(13) [(19)] Board of Dispensing Opticians (AS 08.71.010);

(14) [(20)] Guide Licensing and Control Board (AS 08.54-.010);

(15) [(21)] State Physical Therapy Board (AS 08.84.010);

(16) [(22)] Board of Nursing Home Administrators (AS 08.-70.010);

(17) [(23)] regulation of professional geologists under AS 08.02.011;

(18) [(24)] Board of Barbers and Hairdressers (AS 08.13-.010);

(19) regulation of construction contractors under AS 08.18;

(20) regulation of collection agencies under AS 08.24;

(21) regulation of morticians under AS 08.42;

(22) regulation of concert promoters under AS 08.92.

* Sec. 2. AS 08.01 is amended by adding a new section to read:

Sec. 08.01.065. FEES ESTABLISHED BY REGULATION. (a) The department shall adopt regulations that establish the amount and manner of payment of application fees, examination fees, license fees, registration fees, permit fees, investigation fees, and all other fees as appropriate for the occupations covered by this chapter and for real estate brokers and salesmen under AS 08.88.

(b) The department may not adopt a regulation under (a) of this section unless the board responsible for regulating the affected occupation concurs.

(c) A fee established under this section must reflect, to the extent possible, the actual costs to the department of the activity for which the fee is charged.

* Sec. 3. AS 08.01.100(b) is amended to read:

(b) A registration, license, permit, or certificate [CERTIFICATES] requiring renewal to continue to be effective must be renewed on or before the date set by the department or it will lapse. With the concurrence of the appropriate board the department may establish by regulation a [A] penalty [OF $10 SHALL BE CHARGED IN ADDITION TO ALL DELINQUENT RENEWAL FEES] for reinstatement of a registration, license, permit, or certificate that [WHICH] remains lapsed for more than 60 days. The penalty is in addition to delinquent renewal fees.

* Sec. 4. AS 08.04.190 is amended to read:

Sec. 08.04.190. EXAMINATION FEE. An [THE BOARD SHALL CHARGE EACH APPLICANT A FEE OF $50 FOR THE INITIAL EXAMINATION AND FOR EACH REEXAMINATION. THE] applicant shall pay the appropriate fee at the time of application for examination or reexamination.

* Sec. 5. AS 08.04.390 is amended to read:

Sec. 08.04.390. PERMIT FOR INDIVIDUAL PRACTICE AS A PUBLIC ACCOUNTANT. The board shall issue a permit to engage in the practice of public accounting to a holder of a certificate or license if all offices of the certificate holder or licensee are maintained and registered as required by AS 08.04.350 - 08.04.380. The permit is valid for two years [THE BIENNIAL PERMIT FEE IS $60].

* Sec. 6. AS 08.04.400 is amended to read:

Sec. 08.04.400. PERMIT FOR PARTNERSHIP OR CORPORATE PRACTICE AS A PUBLIC ACCOUNTANT. The board shall issue a permit to engage in the practice of public accounting as a partnership or as a corporation to a partnership or corporation registered under AS 08.04.240. The permit is valid for two years [THE BIENNIAL PERMIT FEE IS $60]. A permit is valid only for practice under the registered name of the partnership or corporation. A partnership registered under

AS 08.04.330 - 08.04.340 on June 29, 1980, qualifies for a permit under this section as long as each partner personally engaged in the practice of public accounting in this state holds a license or permit under AS 08.04.661.

* Sec. 7. AS 08.04.410 is amended to read:

Sec. 08.04.410. PERMIT FOR PERSON NOT ENGAGED IN PRACTICE. A person holding a certificate or license who is not engaged in the practice of public accounting may maintain the certificate or license in good standing by registering with the board and paying an annual registration fee [OF $10].

* Sec. 8. AS 08.04.420 is amended to read:

Sec. 08.04.420. PERMIT FOR GENERAL PRACTICE AS A CERTIFIED PUBLIC ACCOUNTANT. A certified public accountant, or a partnership or corporation of certified public accountants in good standing in a state, not holding a permit under AS 08.04.390 or 08.04.400 nor maintaining an office in this state but engaging in the practice of public accounting in this state, shall apply to the board for a permit to practice. The board shall determine whether the applicant is eligible for the permit. [THE ANNUAL FEE FOR THE ISSUANCE OF A PERMIT IS $100.]

* Sec. 9. AS 08.04.430 is amended to read:

Sec. 08.04.430. EXPIRATION AND RENEWAL. A permit or registration under this chapter, unless revoked or suspended, must [SHALL] be renewed biennially upon payment of a renewal fee [IN THE SAME AMOUNT AS THE INITIAL BIENNIAL FEE].

* Sec. 10. AS 08.04 is amended by adding a new section to article 4 to read:

Sec. 08.04.495. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for examinations,

reexaminations, permits, licenses, certificates and registrations.

* Sec. 11. AS 08.13.185 is repealed and reenacted to read:

Sec. 08.13.185. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for initial licenses and renewals for the following:

(1) schools;

(2) school owners;

(3) instructor;

(4) shop owner;

(5) practitioner of barbering;

(6) practitioner of hairdressing;

(7) practitioner of cosmetology;

(8) temporary permit;

(9) student permit.

(b) The Department shall set fees under AS 08.01.065 for examination and investigation.

* Sec. 12. AS 08.18.041 is repealed and reenacted to read:

Sec. 08.18.041. FEES. The Department of Commerce and Economic Development shall set registration and renewal fees under AS 08.01.065 for the following:

(1) general contractor;

(2) specialty contractor.

* Sec. 13. AS 08.20.130(d) is amended to read:

(d) An applicant may take a reexamination within one year after failing the examination [UPON PAYMENT OF A FEE OF $10].

* Sec. 14. AS 08.20.180 is repealed and reenacted to read:

Sec. 08.20.180. FEES. (a) An applicant for an examination, reexamination, issuance of a temporary permit, or initial issuance or renewal of a license shall pay a fee established under AS 08.01.065.

(b) License renewal fees are due every four years.

* Sec. 15. AS 08.24.100(b) is amended to read:

(b) The [ANNUAL] operator's license <u>is</u> [SHALL BE] renewable on or before July 1 of each second year [BEGINNING ON JULY 1, 1968, AND THE BIENNIAL FEE IS $100].

* Sec. 16. AS 08.24.110(a) is amended to read:

(a) To qualify for an operator's license, the applicant shall:

(1) [REPEALED,

(2)] be a high school graduate, or have the equivalent education of a high school graduate;

<u>(2)</u> [(3)] be of good moral character;

<u>(3)</u> [(4)] not have been convicted of violating this chapter, nor have any unsettled complaints under this chapter against the applicant;

<u>(4)</u> [(5)] not have been convicted of a felony or a crime of larceny or embezzlement or a crime involving moral turpitude;

<u>(5)</u> [(6)] be 19 years of age or older at the time of application;

<u>(6)</u> [(7)] not be a disbarred attorney or have filed bankruptcy;

<u>(7)</u> [(8)] pay the biennial license fee [WHICH IS FIXED AT $100].

* Sec. 17. AS 08.24.120(a) is amended to read:

(a) An application for an operator's license <u>must</u> [SHALL] be made on forms furnished by the department and <u>must</u> [SHALL] contain the information required in AS 08.24.110 and[, IN ADDITION,] the following:

(1) a complete set of fingerprints;

(2) a 2" x 3" photograph showing a front view of head and

shoulders;

(3) if it is an original application, the [AN] application fee [OF $40];

(4) the biennial license fee [REQUIRED BY AS 08.24.100].

* Sec. 18. AS 08.24 is amended by adding a new section to read:

Sec. 08.24.135. FEES. The department shall set fees for licenses and applications under AS 08.01.065 and shall set fines under AS 08.01.100.

* Sec. 19. AS 08.24.140(a) is amended to read:

(a) The application must [SHALL] be accompanied by:

(1) if it is an original application, the [AN] application fee [OF $100];

(2) the biennial license fee for a collection agency [WHICH IS FIXED AT $200] for the principal place of business and the same amount [$200] for each branch office;

(3) a bond running to the state with a surety or sureties to the satisfaction of the department, and conditioned that the licensee shall, within 30 days after the close of each calendar or fiscal month, report and pay to the licensee's customers the net proceeds due and payable of all collections made during the calendar or fiscal month that exceed [WHICH EXCEEDS] $20.

* Sec. 20. AS 08.24.200(b) is amended to read:

(b) If a licensee under this chapter is delinquent for a period of 15 days in applying for the renewal of a license, the department shall suspend the license and notify the licensee by certified mail or by personal service. The notice must [SHALL] state that the license will be revoked if application for renewal is not made within 15 days after [FROM] the date on which the notice was mailed or personally served. When a licensee has been delinquent more than 60 days in

renewing a license or certificate, the department shall charge an additional penalty established under AS 08.01.100(b) before [FEE OF $50 FOR THE] renewal of the license.

* Sec. 21. AS 08.24.370 is amended to read:

Sec. 08.24.370. NONRESIDENTS. A nonresident may apply for and receive a collection agency license or an operator license or both on the same basis as a resident. The application fee and the biennial license fee for a nonresident operator or nonresident agency license are double the same fees established by regulations under AS 08.01.065 for a resident operator or agency [THE APPLICATION FEE FOR A NONRESIDENT OPERATOR LICENSE IS $100, AND THE BIENNIAL LICENSE FEE IS $200. THE APPLICATION FEE FOR A NONRESIDENT AGENCY LICENSE IS $200, AND THE BIENNIAL LICENSE FEE IS $400 FOR THE PRINCIPAL PLACE OF BUSINESS AND $400 FOR EACH BRANCH OFFICE].

* Sec. 22. AS 08.32.097 is amended to read:

Sec. 08.32.097. FEES. The Department of Commerce and Economic Development [DEPARTMENT] shall, by regulations adopted under AS 08.01.065 [AS 08.01.080], establish fees for dental hygienists for the following:

(1) filing an examination and licensing application;

(2) examination fee;

(3) credential fee;

(4) initial license;

(5) registration fee;

(6) filing a reexamination application;

(7) duplicate license;

(8) delinquent registration.

* Sec. 23. AS 08.36.290 is amended to read:

Sec. 08.36.290. FEES. The department shall, by regulations

adopted under AS 08.01.065 [AS 08.01.080], establish fees for dentists for the following:

(1) filing an examination and licensing application;

(2) examination fee;

(3) credential review;

(4) initial license;

(5) registration fee;

(6) filing a reexamination application;

(7) specialty license;

(8) branch office registration;

(9) duplicate license;

(10) delinquent registration.

* Sec. 24. AS 08.40.135(b) is amended to read:

(b) A lapsed license may be reinstated upon proof of continued competency by payment of all unpaid renewal fees and any [A] penalty fee established under AS 08.01.100(b), [OF $25 FOR EACH YEAR THE LICENSE HAS BEEN LAPSED] unless the license has been lapsed for more than two years. If a person's license has been lapsed for more than two years, the person is required to take an examination under AS 08.-40.120.

* Sec. 25. AS 08.40.150 is repealed and reenacted to read:

Sec. 08.40.150. FEES. Each applicant and each licensee shall pay application and renewal fees established by regulations adopted under AS 08.01.065.

* Sec. 26. AS 08.42.100 is amended to read:

Sec. 08.42.100. FUNERAL ESTABLISHMENT PERMIT. After January 1, 1977, a person may not conduct, maintain, manage, or operate a funeral establishment unless a permit for each establishment has been issued by the department and is conspicuously displayed in the funeral

establishment. Each permit is [SHALL BE] valid only for one specific location, and each firm [SEPARATE PERMITS SHALL BE REQUIRED OF TWO OR MORE FIRMS] operating from the same funeral establishment shall obtain a separate permit. The department shall issue a [A] permit to operate a funeral establishment [SHALL BE ISSUED BY THE DEPARTMENT] upon application for the permit on a form provided by the department. All permits [SHALL] expire at the time established under AS 08.01.100 [ON DECEMBER 31 OF EACH YEAR] and may be renewed for successive [ONE-YEAR] terms. Violation of a provision of AS 08.42.090 by a person operating a funeral establishment or, with that person's knowledge or consent, by an employee is [SHALL BE] considered sufficient cause for suspension or revocation of the funeral establishment permit.

* Sec. 27. AS 08.48.091 is amended to read:

Sec. 08.48.091. WRITTEN EXAMINATIONS AND EXAMINATION FEES. Written examinations must [SHALL] be held at least twice each year at places determined by the board unless the examination administered by the board is a national examination prepared only once each year, in which case the examination must [SHALL] be held at least once each year. A candidate failing an examination may apply for reexamination. [THE EXAMINATION FEE FOR APPLICANTS SHALL BE ESTABLISHED BY THE BOARD AND SHALL ACCOMPANY THE APPLICATION.]

* Sec. 28. AS 08.48.231(b) is amended to read:

(b) The renewal of a certificate does not require reapplication if the certificate has not expired or has not been suspended or revoked. [THE RENEWAL FEE FOR A CERTIFICATE MAY NOT EXCEED $100.]

* Sec. 29. AS 08.48.231(c) is amended to read:

(c) An [RENEWAL OF AN] expired certificate may be renewed [EFFECTED] under regulations adopted [PROMULGATED] by the board establishing [REGARDING] requirements for [OF] reexamination [AND PENALTY

FEES].

* Sec. 30. AS 08.48 is amended by adding a new section to article 2 to read:

Sec. 08.48.265. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for examinations, registrations, certificates of authorization, and renewals of a certificate.

* Sec. 31. AS 08.52.050 is amended to read:

Sec. 08.52.050. FEE [FEES]. An applicant for a certificate of fitness shall pay a fee [OF $75] at the time of application in the amount established by regulations adopted by the department.

* Sec. 32. AS 08.54.160 is amended to read:

Sec. 08.54.160. LICENSING OF MARINE MAMMAL GUIDES. The board may establish qualifications [, SET LICENSE FEES,] and issue licenses for marine mammal guides.

* Sec. 33. AS 08.54.170(a) is repealed and reenacted to read:

(a) The Department of Commerce and Economic Development shall set license fees under AS 08.01.065 for each of the following:

(1) master guide;

(2) registered guide;

(3) class A assistant guide;

(4) assistant guide;

(5) transporter.

* Sec. 34. AS 08.54.180 is amended to read:

Sec. 08.54.180. EXAMINATION FEE. An applicant for a guide examination shall pay a fee established by regulations adopted under AS 08.01.065 [OF $25].

* Sec. 35. AS 08.62.140 is repealed and reenacted to read:

Sec. 08.62.140. FEES. The department shall set fees under

AS 08.01.065 for applications, licenses, and agent registrations.

* Sec. 36. AS 08.64.260(c) is amended to read:

(c) Applicants failing portions of part I or part II of the examination may retake the portions failed at a prorated fee [PRESCRIBED IN THE REGULATIONS BY THE BOARD].

* Sec. 37. AS 08.64.260(d) is amended to read:

(d) Applicants failing part III of the examination shall retake the entire part at a prorated fee [PRESCRIBED IN THE REGULATIONS BY THE BOARD].

* Sec. 38. AS 08.64.275(d) is amended to read:

(d) Within 10 days <u>after</u> [FROM] the <u>permit has been granted</u> [GRANTING OF THE PERMIT], the board member shall forward [THE FEE] to the department [WITH] a report of the issuance of the permit.

* Sec. 39. AS 08.64.315 is repealed and reenacted to read:

Sec. 08.64.315. FEES. The department shall set fees under AS 08.01.065 for each of the following:

(1) application;

(2) license by examination;

(3) license by endorsement or waiver of examination;

(4) temporary permit;

(5) locum tenens permit;

(6) license renewal, active;

(7) license renewal, inactive;

(8) license by reexamination.

* Sec. 40. AS 08.68.220 is repealed and reenacted to read:

Sec. 08.68.220. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for each of the following:

(1) registered nursing:

(A) application;

(B) license by examination;

(C) license by endorsement;

(D) license renewal;

(E) temporary permit;

(2) practical or vocational nursing:

(A) application;

(B) license by examination;

(C) license by endorsement;

(D) license renewal;

(E) temporary permit.

* Sec. 41. AS 08.70.150 is repealed and reenacted to read:

Sec. 08.70.150. FEES. The department shall set fees under AS 08.01.065 for examination and investigation of persons applying for a license, initial license, and license renewal.

* Sec. 42. AS 08.71.120 is repealed and reenacted to read:

Sec. 08.71.120. FEES. The department shall set fees under AS 08.01.065 for examination, initial license, and license renewal.

* Sec. 43. AS 08.71.130(b) is amended to read:

(b) If the license is not renewed on or before <u>the</u> [THAT] date <u>set by the department under (a) of this section, the license lapses. Before</u> [, IT SHALL LAPSE. A PENALTY OF $10 SHALL BE CHARGED, IN ADDITION TO ALL DELINQUENT FEES, FOR THE] reinstatement of a license <u>that has remained</u> [WHICH REMAINS] lapsed for more than 60 days<u>, the applicant must pay all delinquent renewal fees and any penalty established under AS 08.01.100(b)</u>.

* Sec. 44. AS 08.72.191 is repealed and reenacted to read:

Sec. 08.72.191. FEES. The department shall set fees under AS 08.01.065 for the following:

(1) examination;

(2) reexamination for the written portion;

(3) waiver of examination;

(4) certificates;

(5) renewal;

(6) branch office registration and renewal.

* Sec. 45. AS 08.80.160 is repealed and reenacted to read:

Sec. 08.80.160. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for the following:

(1) examination;

(2) reexamination;

(3) investigation for licensing by credentials;

(4) pharmacist license;

(5) temporary license;

(6) wholesale drug dealer license;

(7) retail pharmacy license;

(8) pharmacy intern registration;

(9) emergency permit;

(10) hospital pharmacy license (inpatient and outpatient);

(11) hospital drug room license (inpatient);

(12) nursing home and related facilities license for inpatient dispensing;

(13) license amendment or replacement.

* Sec. 46. AS 08.84.032 is amended to read:

Sec. 08.84.032. FOREIGN-TRAINED PHYSICAL THERAPY OR PHYSICAL THERAPY ASSISTANT APPLICANTS. To be eligible for licensure by the board as a physical therapist or physical therapy assistant, an applicant who is a graduate of a school of physical therapy <u>that</u> [WHICH] is located outside of the United States shall

(1) have completed, to the satisfaction of the board, a resident course of study and professional instruction equivalent to that provided by a school approved by the Council on Medical Education and Hospitals of the American Medical Association or the American Physical Therapy Association, and furnish documentary evidence of compliance with this paragraph, translated, if necessary, into the English language by a person verifying the accuracy of the translations;

(2) have completed, to the satisfaction of the board, an internship under the continuous direction and immediate supervision of a physical therapist in an institution that [WHICH] ordinarily provides physical therapy and is approved by the board, for that period of time specified by the board, and furnish documentary evidence of compliance with this paragraph;

(3) pass an oral examination administered by a member of the board;

(4) have met applicable requirements under the federal Immigration and Nationality Act (8 U.S.C. 1101 et seq.), unless a United States citizen;

(5) pass the examination administered by the board under AS 08.84.030(3); and

(6) pay the fee required [PRESCRIBED] under AS 08.84.050 [AS 08.84.050(2) AND (3)].

* Sec. 47. AS 08.84.050 is repealed and reenacted to read:

Sec. 08.84.050. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for the following:

(1) application;

(2) license by examination;

(3) license by acceptance of credentials;

(4) renewal;

(5) temporary permit.

* Sec. 48. AS 08.84.100(b) is amended to read:

(b) Before [A PENALTY OF $10 SHALL BE CHARGED IN ADDITION TO ALL DELINQUENT RENEWAL FEES FOR] reinstatement of a license that [WHICH] remains lapsed for more than 60 days, the applicant must pay all delinquent renewal fees and any penalty established under AS 08.01.100(b). If a [THE] license remains lapsed for more than three years, the board may require the applicant to take and pass the examination given under AS 08.84.030(3).

* Sec. 49. AS 08.86.140 is repealed and reenacted to read:

Sec. 08.86.140. FEES. (a) The department shall set fees under AS 08.01.065 for the following:

(1) application;

(2) examination;

(3) credential review;

(4) initial license;

(5) license renewal.

(b) A license must be renewed every four years.

* Sec. 50. AS 08.88.221 is repealed and reenacted to read:

Sec. 08.88.221. FEES. The Department of Commerce and Economic Development shall set fees under AS 08.01.065 for a real estate broker, associate broker, or salesman licensee or applicant for the following:

(1) examination;

(2) reciprocity;

(3) initial license;

(4) renewal of an active license;

(5) renewal of an inactive license;

(6) amending or transferring a license.

* Sec. 51. AS 08.92.020 is amended to read:

Sec. 08.92.020. FEES. (a) An applicant for a promoter's certificate of registration shall pay an original registration fee established by regulations adopted under AS 08.01.065 [OF $75].

(b) The biennial fee for the renewal of a registration certificate is also established by regulations adopted under AS 08.01.065 [$40].

* Sec. 52. AS 08.98.180 is amended to read:

Sec. 08.98.180. TEMPORARY LICENSE. A person who meets the requirements of AS 08.98.165(a)(1) and (5) is entitled to be temporarily licensed after applying for examination, if the person works under the supervision of a licensed veterinarian. A license issued under this section is valid until the results of the examinations are published. A person may not receive more than one temporary license. An application for a temporary license must be signed by the supervising veterinarian and accompanied by the temporary license fee required [AS PRESCRIBED] under AS 08.98.190.

* Sec. 53. AS 08.98.190 is repealed and reenacted to read:

Sec. 08.98.190. FEES. The department shall set fees under AS 08.01.065 for the following:

(1) application;

(2) examination;

(3) investigation of credentials;

(4) license;

(5) license renewal;

(6) temporary license;

(7) temporary permit.

* Sec. 54. The following are repealed AS 08.13.200; AS 08.20.190;

AS 08.32.050; AS 08.48.201(b), 08.48.241(i); AS 08.54.170(c); AS 08.64.290, 08.64.320; AS 08.80.090.

* Sec. 55. Sections 1 - 3 of this Act take effect immediately in accordance with AS 01.10.070(c).

* Sec. 56. Sections 4 - 54 of this Act take effect on the effective date of regulations adopted under AS 08.01.065, enacted in sec. 2 of this Act.

ANALYSIS: Attach a separate page if necessary

The requested travel and contractual funds are not necessary since the teleconference network is available to perform the same function. Revenues generated by the bill will depend on how much is spent by the Division on the board each year and how many licensees there are in a given fiscal year.
See attached proposed formula.

[redacted]

1) Actual Division cost allocated to a particular board for a fiscal year;

+

2) Cost of Board and License Examiners travel and per diem for a fiscal year;

+

3) Contractual costs for the Board for a fiscal year;

-

4) Subtract examination costs from the contractual costs;

÷

5) Divide the above total by the number of licensees;

=

6) Base application fee (i.e. comity, credentialling, endorsement);
Exam application fee = Base fee + cost of examination.

(Total Division Cost) + (Board/Examiner Tvl & Per diem) + (Contractual) - (Examination Costs)

BASE LICENSE/APPLICATION FEE

Based on the proposed fee formula, the following two examples are suggested:

1) MEDICAL LICENSURE: (High)

70.8 (Div. cost) + 14.1 (Tvl/PD) + 7.4 (Contractual) = 92.3 - .8 (Exam cost) = 91.5 (Total Bd cost

91.5 ÷ 1393 (licensees) = $ 65.69 (Base annual license fee)

$65.69 x 4 = $262.76 for current 4 year license. A reduction from the current cost of $600 for four years.

This example is the basic formula that will be used with the additional computations for each category under a particular licensing authority.

2) NURSING LICENSURE: (Low)

166.4 (Div. cost) + 14.6 (Tvl/Pd) + 10.1 (Contractual) = 191.1 (Total Bd cost)

191.1 (Total Bd cost) - 3.0 (Exam cost) = 188.1 ÷ 6261 (licensees) = $ 30.04 (Base annual fee)

Base annual license fee = $30.04
Examination application/license fee = $30.04 + 25.00 = $ 55.04

30.04 x 2 = $60.08 (Biennial license fee); an increase from the current license fee of $50 for RN's and $30 for LPN's.

BILL SHEFFIELD
GOVERNOR

HB 94

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 18, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that will authorize the Department of Commerce and Economic Development to establish occupational licensing fees by regulation, and that amends accordingly the various statutory provisions in AS 08 that now set those fees. This change will result in greater flexibility and ease of fee adjustment to accommodate inflation and other fluctuations in the costs of implementing the various licensing statutes. Currently, many Alaska licensing fees are low compared to those of other states, and revisions are necessary. This bill will enable the department to make the appropriate adjustments without unduly burdening the legislature with the task. This authority was granted to the department last year by ch. 100 SLA 1984 for fees involved in licensing dental hygienists and dentists.

The second and third sections of the bill authorize the department to set the fees and penalties by regulation to reflect costs, after consulting with the appropriate licensing board. Most of the remaining sections of the bill delete the current statutory fees and make other appropriate changes to statutes in the chapters concerning the various occupations affected.

I request your support for this bill which will greatly increase the efficiency and reduce the net cost of our occupational licensing programs.

Sincerely,

Bill Sheffield
Governor

ANALYSIS: Attach a separate page if necessary

This bill would amend each licensing fee structure for the various professions with the concurrence of the particular board, licensed under Title 8 of the Alaska Statutes, and allow the fee structure to be set by regulations.

To increase or decrease present licensing fees requires new legislation which previously has not been considered priority legislation. The inability to modify present fees has caused wide disparity between mandated fees and operating costs.

FISCAL IMPACT: Occupational Licensing Fee Bill

200 TRAVEL:

One staff person to meet and consult with individual boards before public hearings are conducted and again after the public hearings are concluded on the proposed fee structures. It is anticipated that one-third of the board meetings be held in Anchorage, one-third in Fairbanks and the remaining one-third in Juneau. Travel expenses would be incurred for Anchorage and Fairbanks only.

12 trips to Anchorage - 2 days each (6 boards)	
Transportation: 1 person @ $400.00 each x 12 =	$ 4,800.00
Per Diem: 24 days @ $80.00 per day =	1,920.00
12 trips to Fairbanks - 2 days each (6 boards)	
Transportation: 1 person @ $610.00 each x 12 =	7,320.00
Per Diem: 24 days @ $90.00 per day =	2,160.00

1 staff to conduct regulation hearings in Anchorage and Fairbanks on license fee structure (4 trips):

2 trips to Anchorage - 6 days each	
Transportation: 1 person @ $400.00 x 2 =	800.00
Per Diem: 12 days @ $80.00 =	960.00
2 trips to Fairbanks - 6 days each	
Transportation: 1 person @ $610.00 x 2 =	1,220.00
Per Diem: 12 days @ $90.00 =	1,080.00

NOTE: It is anticipated that travel costs for FY '87 and successive years will be absorbed in the agency's budgeting process.

	$ 20,260.00

300 CONTRACTUAL:

Rental charges for meeting rooms for holding public hearings on license fee settings: 24 days of pu... hearings @ $200.00 per day =	$ 4,800.00
Printing of materials, statute and regulation booklets (estimated costs) =	8,000.00

OSHB 78(1)(c) Page 3 of 3

Advertising - required state-wide advertising of public notices of regulation hearings on proposed license fee structures (estimated costs) = 1,000.00

NOTE: It is anticipated that contractual costs for FY '87 and successive years will be absorbed in the agency's budgeting process.

	$ 13,800.00
GRAND TOTAL:	$ 34,060.00

PROJECTED REVENUE:

In an attempt to equalize the operating budget with revenue, it will be necessary to revise existing licensing fee structures to provide the additional revenue required.

The initial projection is to increase the license fees of various professions and licensure categories to off-set the deficit for FY '87 and project an annual increase of 15.0% for inflation factors.

No revenue is projected for FY '86 as it is anticipated that it would require the majority of the fiscal year to implement all the necessary license fee changes.

CORPORATIONS.
TEXT (a) This chapter does not prevent a corporation from offering architectural, engineering or land surveying services; however, the corporation shall file with the board
(1) an application for a certificate of authorization upon a form to be prescribed by the board and containing information required to enable the board to determine whether the corporation is qualified in accordance with the provisions of this chapter to offer to practice architecture, engineering or land surveying in this state;
(2) a certified copy of a resolution of the board of directors of the corporation designating persons holding certificates of registration under this chapter as responsible for the practice of architecture, engineering or land surveying by the corporation in this state and providing that full authority to make all final architectural, engineering or land surveying decisions on behalf of the corporation with respect to work performed by the corporation in this state is granted by the board of directors to the persons designated in the resolution; however, the filing of this resolution does not relieve the corporation of any responsibility or liability imposed upon it by law or by contract;
(3) a designation in writing setting out the name of one or more persons holding certificates of registration under this chapter who are in responsible charge of each major branch of the architectural, engineering or land surveying activities in which the corporation specializes in this state; if a change is made in the person in responsible charge of a major branch of the architectural, engineering or land surveying activities, the change shall be designated in writing and filed with the board within 30 days after the effective date of the change.
(b) Upon filing with the board the application for certificate of authorization, certified copy of resolution, affidavit, and designation of persons specified in this section, the board shall, subject to
(c) of this section, issue to the corporation a certificate of authorization to practice architecture, engineering or land surveying in this state upon a determination by the board that
(1) the bylaws of the corporation contain provisions that all architectural, engineering or land surveying decisions pertaining to architectural, engineering or land surveying activities in this state will be made by the specified architect, engineer or land surveyor in responsible charge, or other registered architects, engineers or land surveyors under the direction or supervision of the architect, engineer or land surveyor in responsible charge;
(2) the application for certificate of authorization states the type of architecture, engineering or land surveying practiced or to be practiced by the corporation;
(3) the applicant corporation has the ability to provide architectural, engineering or land surveying services;
(4) the application for certificate of authorization states the professional records of the designated person who is in responsible charge of each major branch of architectural, engineering or land surveying activities in which the corporation specializes;
(5) the application for certificate of authorization states the experience of the corporation, if any, in furnishing architectural, engineering or land surveying services during the preceding five-year period;
(6) the applicant corporation meets other requirements related to professional competence in the furnishing of

architectural, engineering or land surveying services as may be established and promulgated by the board in furtherance of the objectives and provisions of this chapter.

(c) The board may, in the exercise of its discretion, refuse to issue, or may suspend or revoke a certificate of authorization to a corporation if the board finds that any of the officers, directors, incorporators or the stockholders holding a majority of the stock of the corporation has committed misconduct or malpractice, or has been found personally responsible for misconduct or malpractice under the provisions of this chapter.

(d) The certificate of authorization shall specify the major branches of architecture, engineering or land surveying of which the corporation has designated a person in responsible charge as provided in this section. The certificate of authorization shall be conspicuously displayed in the place of business of the corporation, together with the names of persons designated as being in responsible charge of the professional activities.

(e) If a corporation, organized solely by either a group of architects, a group of engineers, or a group of land surveyors, each holding a certificate of registration under this chapter, applies for a certificate of authorization, the board may, in its discretion, grant a certificate of authorization to the corporation based on a review of the professional records of the incorporators, in place of the required qualifications set out in this section. If the ownership of the corporation is altered, the corporation shall apply for a revised certificate of authorization, based upon the professional records of the owners, if exclusively architects, engineers or land surveyors, or otherwise under the qualifications required by (b)(1) - (4) of this section.

(f) A corporation authorized to offer architectural, engineering or land surveying services under this chapter, together with its directors and officers for their own individual acts, is responsible to the same degree as the designated individual registered architect, engineer or land surveyor, and must conduct its business without misconduct or malpractice in the practice of architecture, engineering or land surveying as defined in this chapter.

(g) If the board, after a proper hearing, finds that a corporation holding a certificate of authorization has committed misconduct or malpractice, the board shall suspend or revoke the certificate of authorization. The board shall also suspend or revoke the certificate of registration of any registered individual architect, engineer or land surveyor who, after a proper hearing, is found by the board to have participated in committing the misconduct or malpractice.

(h) Plans, specifications, designs and reports, when issued in connection with work performed by a corporation under its certificate of authorization, shall be prepared by or under the responsible charge of and shall be signed by and shall be stamped with the official seal of a person holding a certificate of registration under this chapter.

(i) For each certificate of authorization issued to a corporation under the provisions of this chapter, there shall be

paid an initial fee not to exceed $300.

and Finance

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 79 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to financial institution examinations; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 06.01.010(b) is amended to read:

(b) The commissioner shall assess every financial institution, and every applicant to establish a financial institution, a fee for the actual expenses incurred by the department in connection with any examination or investigation, whether regular or special. The fee shall include the proportionate part of the salaries and cost of employee benefits of the examiners while conducting examinations or investigations and while preparing reports of them, and transportation costs and per diem of each examiner while away from his duty station. However, the cost to the financial institution in connection with an examination may not exceed $12,000 [$7,500] per examination. The assessment shall be made by the commissioner as soon as feasible after the examination or investigation has been completed. All assessments shall be paid to and must be received by the department [BY EACH INSTITUTION] within 30 days after the financial institution receives [RECEIPT OF] notice of the assessment.

* Sec. 2. AS 06.05.025(c) is amended to read:

(c) Banks regulated under this chapter are subject to examination [AT LEAST ONE EXAMINATION A YEAR. ADDITIONAL EXAMINATIONS MAY BE CONDUCTED] at the discretion of the commissioner but not less than once every 24 months.

* Sec. 3. The $12,000 maximum assessment for examinations of financial institutions enacted in sec. 1 of this Act applies to examinations or investigations commenced on or after the effective date of this Act.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

FISCAL NOTE

7/1/84

Almost all (82%) of the financial entities regulated and examined by the Division of Banking, Securities and Corporations pay for most if not all of the cost of their examinations. With the exception of credit unions and one small savings and loan association, the $7,500 maximum allowable charge rarely covers the cost of an examination of those financial entities that are classified "depository financial institutions," i.e. banks (see Exhibit A).

The increase of the limit from $7,500 to $12,000 would not only cover the increased costs of doing examinations since the $7,500 was set back in 1977, but this increase would also provide a more equitable sharing of the examination costs by the larger financial institutions.

It is urged that the assumption of increased revenues not be classified program receipts. To tie examinations of financial institutions to a program receipt requirement has the effect of assuming that all examinations can be scheduled alike and are predictable as to length of time and expense. In order to be effective in the determination in safety and soundness, the agency must have the latitude to concentrate in those areas of concern. To meet program receipt requirements would choke the very purpose for the examinations.

BILL SHEFFIELD
GOVERNOR

HB 79

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 18, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill which increases the fee that the commissioner of commerce and economic development may assess a financial institution for investigation and examination costs. It raises the existing maximum of $7,500 to a maximum of $12,000 per examination. The fee increase is necessary because costs associated with these examinations have risen more than 50 percent since 1978 when the $7,500 maximum fee was first established.

The bill also eliminates the requirement in current law that state banks be examined by the department annually. Examination of a bank under the bill is left to the discretion of the commissioner. This will allow the department to focus on problem banks and will free banks that are in stable condition from unnecessary paperwork and examination costs.

An additional, technical amendment is included in sec. 1 of the bill, rewriting but not changing the substance of the last sentence of AS 06.01.010(b).

Sincerely,

Bill Sheffield
Governor

CSHB 80 (L&C): Summary

This legislation provides authority for the Division of Insurance to set fees by regulation. Most of the current fees were set by statute in 1966 and this bill will increase fees to more adequately reflect the actual cost to the division of insurance. Fees may be collected for, but are not limited to, applications, examinations, licenses, license renewals, certificates of authority, service of process, printed or photocopied material, and postage.

Summary

APR 15 1985

Pouch V (MS 3100)
Juneau, Ak. 99811

RE: HB 80 (L&C)

Dear Sir:

We would like to request your assistance with regards to a provision of HB 80, a bill relating to insurance fees and licenses that past the House.

The Insurance Agents in Fairbanks and myself object to a provision of the bill that starts on line 22, which is the repeal of Sec. 2 AS 21.06.250, FEES AND LICENSES.

We feel that most Agents in State, if they were aware, would object to it. While we have no differences with our current Director of Insurance, we have in the past and could again in the future have serious differences with a Director.

We feel it would be unwise and is unnessessary to let a Director be the sole authority for setting license fees. It is our believe that Agents would be better able to fight an unjust fee in the Legislator.

Please use your influence to delete that portion of HB 80.

Thank you.

Respectfully,

Gordon E. Depue

RE: HB 80 (Lic.)

Dear Senator Zharoff:

This bill leaves insurance and license fees that could be charged up to the Director of Insurance An unfriendly Director to the industry could charge several hundred dollars to renew an agents license.

We would rather leave the law as it is, where the legislature approves fees, the Director recommends if such fees are just and reasonable.

Thank you for listening to my position on this bill.

Sincerely,

Dale E. Yoder, CLU

RE: HB 80 (C & L)

Dear Sir:

I am writing to you on behalf of the Fairbanks Association of Life Underwriters and respectfully request your assistance regarding a provision of HB 80, a bill relating to insurance fees and licenses,

Our members, including myself, object to the provision of the bill which deals with FEES and LICENSES, repeal of Sec. 2 AS 21.06.250.

Even though we have no differences with our present Director of Insurance, we very well could have serious problems with a future Director, as we have had in the past.

We feel it would be unwise and is unnessessary to let a Director be the sole authority for setting license fees.

It is our believe that Agents would be better able to fight an unjust fee in the Legislature.

On behalf of our Association I urge you to use your influence to delete that portion of HB 80, starting on line 22.

Thank you.

Respectfully,

Elfriede F. Eldridge

Elfriede F. Eldridge
President

CSHB 80 (L&C)

THIS LEGISLATION RPOVIDES AUTHORITY FOR THE DIVISION OF INSURANCE TO SET FEES BY REGULATION. MOST OF THE CURRENT FEES WERE SET BY STATUTE IN 1966, AND THIS BILL WILL GIVE THE DIVISION THE ABILITY TO SET FEES WHICH REFLECT THE ACTUAL COST.

BILL SHEFFIELD
GOVERNOR

HB 80

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 18, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill raising current fees collected by the division of insurance, Department of Commerce and Economic Development, under AS 21.

The statutes currently setting fees for the division of insurance do not provide adequate revenue to the state to cover the division's present budget. Most of the fees were set by statute in 1966 and have not been increased since. This bill would raise fees to more closely approximate the actual cost of services and would provide for periodic reports by the division to the legislature in order to encourage future adjustments, as they become necessary. This bill is virtually identical to the committee substitute of a bill introduced last session, CSHB 633 (L&C).

I urge your support of and prompt action on this measure.

Sincerely,

Bill Sheffield
Governor

L&C CS CHANGES)

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 102 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Resources Corporation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 37.12.071 is amended to read:

Sec. 37.12.071. ADDITIONAL POWERS. Notwithstanding other provisions of law governing disposal of state property, the board may, at either public or private sale, dispose of the assets of the corporation as required in AS 37.12.075. Disposal shall be made in a manner that serves the best interests of the state, and may include amortization of payments over a period of 25 years or less, but may not be by lease. In addition, the corporation may spend money to protect the assets of the corporation.

* Sec. 2. AS 37.12.075 is amended by adding new subsections to read:

(b) In divesting the corporation of equity investments, the board may convert the equity investment of the corporation in a particular enterprise to debt, if the governing board of the enterprise approves the conversion. The debt created by the conversion may include amortization of payments over a period of 25 years or less, and becomes part of the outstanding loan portfolio of the corporation.

(c) If the board proposes to dispose of an interest in real property to a private party at less than ~~80~~ 50 percent of its appraised or assessed value, the board shall notify the municipalities in which the real property of the proposed disposal is located. A municipality may acquire the interest in the real property for the same value as the

proposed disposal to the private party if, within 30 days of receiving the notice, the municipality elects to acquire the interest in the real property.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE HOUSE (Old version) BY THE LABOR AND COMMERCE COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 102 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Resources Corporation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 37.12.071 is amended to read:

Sec. 37.12.071. ADDITIONAL POWERS. Notwithstanding other provisions of law governing disposal of state property, the board may, at a [EITHER] public [OR PRIVATE] sale, dispose of the assets of the corporation as required in AS 37.12.075. Disposal shall be made in a manner that serves the best interests of the state, and may include amortization of payments over a period of 25 years or less, but may not be by lease. In addition, the corporation may spend money to protect the assets of the corporation.

* Sec. 2. AS 37.12.075 is amended by adding new subsections to read:

(b) In divesting the corporation of equity investments, the board may convert the equity investment of the corporation in a particular enterprise to debt, if the governing board of the enterprise approves the conversion. The debt created by the conversion may include amortization of payments over a period of 25 years or less, and becomes part of the outstanding loan portfolio of the corporation.

(c) If the board proposes to dispose of an interest in land to a private party at less than 80 percent of its appraised value, the board shall notify the municipality in which the land of the proposed disposal is located. The municipality may acquire the interest in land on the same terms as the terms of the proposed disposal to the

private party if, within 30 days of receiving the notice, the municipality elects to acquire the interest in the land. The board shall determine the value of the public benefits that may accrue as a result of the municipal acquisition, and shall reduce the cost of the acquisition of the interest in land by the municipality by that amount.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

SCS CSHB 102(L&C) Version 2: Sectional Analysis

Section 1) Requires that disposal of assets held by ARC shall be by either public or private sale, and that the disposal must serve the best interest of the state, may include amortization of payments over 25 years or less, but may not be by lease.

Section 2) Provides that the board may convert equity investments of ARC into debt, if the governing board of the enterprise approves the conversion. The conversion of equity to debt may include amortization of payments over a period of 25 years or less, and becomes part of the outstanding loan portfolio of ARC.

If the board plans to dispose of an interest in real property at less than 80% of the appraised value, the board shall notify the municipalities in which the land is located. A municipality may acquire the interest in the real property for the same value as the proposed disposal to a private party, if the municipality elects to acquire that interest within 30 days of receipt of the notice.

Section 3) Immediate effective date.

CS FOR HOUSE BILL NO. 102 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Ala. a Resources Corporation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 37.12.071 is amended to read:

Sec. 37.12.071. ADDITIONAL POWERS. Notwithstanding other provisions of law governing disposal of state property, the board may, at either public or private sale, dispose of the assets of the corporation as required in AS 37.12.075. Disposal shall be made in a manner that serves the best interests of the state, and may include amortization of payments over a period of 25 years or less, but may not be by lease. In addition, the corporation may spend money to protect the assets of the corporation.

* Sec. 2. AS 37.12.075 is amended by adding a new subsection to read:

(b) In divesting the corporation of equity investments, the board may convert the equity investment of the corporation in a particular enterprise to debt, if the governing board of the enterprise approves the conversion. The debt created by the conversion may include amortization of payments over a period of 25 years or less, and becomes part of the outstanding loan portfolio of the corporation.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

HB102

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF REVENUE

TREASURY DIVISION

ELEVENTH FLOOR
STATE OFFICE BUILDING
POUCH SB
JUNEAU, ALASKA 99811
PHONE:

January 29, 1985

The Honorable John Sund
Chairman
House Special Committee on Loans
Pouch V
Juneau, AK 99811

Dear Mr. Sund:

Ch. 161, SLA 1984 directs the Alaska Resources Corporation (ARC) to divest all its assets, except its loan portfolio, by July 1, 1989. ARC's assets to be divested include equity in various corporations and assets acquired in foreclosure of ARC loans. Several of the enterprises in which ARC has invested are in bankruptcy proceedings. Several of the foreclosed properties are not currently operating as businesses and their prospect of doing so is uncertain.

Under these circumstances, bank or other outside financing for a potential buyer to purchase ARC equity or foreclosed properties may not be available or available on reasonable terms. The only means of financing the purchase may be for ARC to take a promissory note for all or part of the purchase price. In some cases, the only interested buyer of ARC equity may be the corporation in which ARC has invested. In this case, conversion of equity to debt is tantamount to taking a note on sale.

HB 102 would authorize ARC to take a note on sale or enter into an installment sale contract as well as to convert equity to debt. This is a necessary tool which will be used only when a cash buyout for ARC cannot be negotiated.

The ARC board of directors has endorsed this legislation.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 23, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the divestiture of assets and equity investments of the Alaska Resources Corporation (ARC).

Section 1 of the bill permits the board to dispose of assets, including those acquired through default or foreclosure, in any manner that serves the best interests of the state, including extended payments over time.

Section 2 of the bill permits the board to convert its equity investments into debt, which will then be treated in the same manner as the corporation's current outstanding loan portfolio.

This bill is necessary to permit the ARC board the flexibility necessary to wind up the corporation's affairs by 1989, in accordance with ch. 161, SLA 1984.

Sincerely,

Bill Sheffield
Governor

Governor's Transmittal Letter

House Finance Committee
Letter of Intent
for
Committee Substitute for House Bill 102 (Finance)

In adopting CS House Bill 102 (Finance), "An Act relating to the Alaska Resources Corporation; and providing for an effective date," it is the intent of the legislature that the assets of the Alaska Resources Corporation (ARC) be fully liquidated by July 1, 1989.

While the authority granted in CS HB 102 (Finance), allows credit terms of sale for ARC assets to extend beyond 1989, it is the intent of the legislature that this authority be used only when there is a compelling economic reason to allow terms of sale other than cash payment, and then only to the extent that any credit granted is collateralized. No terms of sale should require state management effort beyond that needed for any other high-quality note receivable.

Chapter 11. Renewable Resources Funds.

[Repealed, § 16 ch 161 SLA 1984.]

Chapter 12. Alaska Resources Corporation.

Section	Section
10. Alaska Resources Corporation created	55. Compensation of board members
15. Purpose	60. [Repealed]
22. Development capital fund	70. Powers
23. Deposit of money	71. Additional powers
30. Composition of the board of directors	75. Duties
35. [Repealed]	80. [Repealed]
45. [Repealed]	85. [Repealed]
50. Quorum and transaction of business	125. Definitions

Revisor's notes. — Sections 17 and 18, ch. 161, SLA 1984, provides for the repeal of this chapter on July 1, 1989 and the attendant transfer of the administration of the then outstanding loan portfolio to the Department of Revenue.

Cross references. — For legislative findings and purpose in connection with the 1984 amendment and the July 1, 1989 repeal of this chapter, see § 1, ch. 161, SLA 1984 in the Temporary and Special Acts.

Sec. 37.12.010. Alaska Resources Corporation created [Repealed effective July 1, 1989]. There is created the Alaska Resources Corporation to carry out the purposes of this chapter. The corporation is a public corporation of the state and an instrumentality of the state within the Department of Revenue, but has a legal existence independent of and separate from the state. The exercise by the corporation of the powers conferred by this chapter is considered an essential function of the state. (§ 3 ch 179 SLA 1978; am § 1 ch 142 SLA 1982; am § 2 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, substituted "Department of Revenue" for "Department of Commerce and Economic Development" in the second sentence.

Sec. 37.12.015. Purpose [Repealed effective July 1, 1989]. The purpose of the corporation is to effect an orderly wind-up of its affairs. (§ 3 ch 179 SLA 1978; am § 2 ch 142 SLA 1982; am § 3 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, rewrote this section.

ly 1, 1989]. The
up of its affairs.
§ 3 ch 161 SLA

Sec. 37.12.022. Development capital fund [Repealed effective July 1, 1989]. The development capital fund is established in the corporation, consisting of money appropriated to the corporation. The development capital fund shall be used to pay for liabilities of the corporation that might arise during the wind-up of its affairs. (§ 3 ch 142 SLA 1982; am § 4 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, deleted "or assets" following "money," "or transferred" following "appropriated," and "and payments of principal and interest on loans and equity investments made by the corporation" from the end, all in the first sentence; rewrote the second sentence; and deleted the former third sentence.

Sec. 37.12.023. Deposit of money [Repealed effective July 1, 1989]. Repayments of principal and payments of interest and other income from loans of the corporation, dividends received from capital stock investments, and money received from the sale of equity investments or other assets of the corporation must be deposited in the general fund. (§ 5 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effective dates. — Section 19, ch. 161, SLA 1984, makes this section effective July 7, 1984, in accordance with AS 01.10.070(c).

Sec. 37.12.030. Composition and term of board of directors [Repealed effective July 1, 1989]. The board consists of the commissioner of revenue, who shall serve as chairman, and the commissioners of two other principal executive departments designated by the governor. The term of office of these board members continues until the corporation is dissolved. (§ 3 ch 179 SLA 1978; am § 5 ch 142 SLA 1982; am § 6 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, rewrote this section.

Sec. 37.12.035. Term of office. [Repealed, § 16 ch 161 SLA 1984.]

Sec. 37.12.045. Qualifications of board members. [Repealed, § 16 ch 161 SLA 1984.]

Sec. 37.12.050. Quorum and transaction of business [Repealed effective July 1, 1989]. (a) Two members of the board constitute a quorum for the transaction of business and the exercise of the powers and duties of the board.

(b) The board may meet and transact business by electronic media if (1) public notice of the time and locations where the meeting will be held by electronic media has been given in the same manner as if the meeting were held in a single location; (2) participants and members of the public in attendance can hear and have the same right to partici-

pate in the meeting as if the meeting were conducted in person; and (3) copies of pertinent reference materials, statutes, regulations, and audio-visual materials are reasonably available to participants and to the public. A meeting by electronic media as provided in this subsection has the same legal effect as a meeting in person. (§ 3 ch 179 SLA 1978; am § 7 ch 142 SLA 1982; am § 7 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, substituted "Three members" for "Two members" at the beginning of subsection (a).

Sec. 37.12.055. Compensation of board members [Repealed effective July 1, 1989]. Members of the board are entitled to per diem and travel expenses authorized by law for state boards and commissions under AS 39.20.180. (§ 3 ch 179 SLA 1978; am § 8 ch 142 SLA 1982; am § 8 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, deleted "receive $200 for each day spent on official business of the corporation, and" following "Members of the board."

Sec. 37.12.060. Executive director; staff. [Repealed, § 16 ch 161 SLA 1984.]

Sec. 37.12.070. Powers [Repealed effective July 1, 1989]. In carrying out the corporate powers of the corporation, the board may

(1) adopt, alter, and use a corporate seal;

(2) prescribe, adopt, amend, and repeal bylaws;

(3) sue and be sued in the name of the corporation;

(4) enter into any agreements necessary to the exercise of its powers and functions;

(5), (6) *[Repealed, § 16 ch 161 SLA 1984.]*

(7) appear in behalf of the corporation before boards, commissions, departments, or other agencies of municipal, state, or federal government;

(8) acquire, hold, use, lease, sell, or otherwise dispose of property of any kind, real, personal, or mixed, or any interest in it;

(9) hold, as a means of securing the providing of financial assistance, patents, copyrights, trademarks, royalties, or any other evidences of protection or exclusivity issued under the laws of the United States or any state or nation;

(10) prepare, publish, and distribute technical studies, reports, bulletins and other materials it considers appropriate;

(11) *[Repealed, § 16 ch 161 SLA 1984.]*

(12) *[Repealed, § 33 ch 142 SLA 1982.]*

(13) adopt regulations governing the exercise of its corporate powers;

Effect of amendments. — The 1984 amendment, effective July 7, 1984, repealed paragraphs (5), (6), and (11).

Sec. 37.12.071. Additional powers [Repealed effective July 1, 1989]. Notwithstanding other provisions of law governing disposal of state property, the board may, at either public or private sale, dispose of the assets of the corporation as required in AS 37.12.075. In addition, the corporation may spend money to protect the assets of the corporation. (§ 9 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effective dates. — Section 19, ch. 161, SLA 1984, makes this section effective July 7, 1984, in accordance with AS 01.10.070(c).

Sec. 37.12.075. Duties [Repealed effective July 1, 1989]. In carrying out the purposes of this chapter the board shall

(1) contract with the Department of Revenue to manage the assets of the corporation;

(2) divest the corporation of all equity investments by July 1, 1989; and

(3) divest the corporation of all other remaining assets, with the exception of the outstanding loan portfolio, by July 1, 1989. (§ 3 ch 179 SLA 1978; am § 12 ch 142 SLA 1982; am § 10 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, rewrote this section.

Sec. 37.12.080. Financial assistance. [Repealed, § 16 ch 161 SLA 1984.]

Sec. 37.12.085. Eligibility for financial assistance. [Repealed, § 16 ch 161 SLA 1984.]

Sec. 37.12.125. Definitions [Repealed effective July 1, 1989]. In this chapter, unless the context otherwise requires,

(1) *[Repealed, § 16 ch 161 SLA 1984.]*

(2) "board" means the Board of Directors of the Alaska Resources Corporation;

(3) "corporation" means the Alaska Resources Corporation;

(4)—(7) *[Repealed, § 16 ch 161 SLA 1984.]* (§ 3 ch 179 SLA 1978; am §§ 23 — 28 ch 142 SLA 1982; am § 16 ch 161 SLA 1984; r § 18 ch 161 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 7, 1984, repealed paragraphs (1), (4)—(7).

Chapter 15. State Bonding Act.

Article
1. General Obligation Bonds (§ 37.15.012)
3. International Airports Revenue Bonds (§ 37.15.415)

FISCAL NOTE ANALYSIS

This bill, if enacted, will require that the Securities Section of the division undertake securities registration for the sale of oil and gas leases located in Alaska and will undoubtedly result in increased filings as well as substantial efforts in compliance and enforcement activities including hearings. A Business Registration Examiner position will be necessary to support these registrations. The current substantially increased workload has stretched the examining/enforcement staff to the limit. The additional clerical support will free up the professional staff time to cope with the expanded registration and enforcement duties imposed by the proposed legislation.

Travel of 3.0 will be required for investigation of wrongdoers in the field. Contractual funds of 3.0 is needed for hearing officer purposes in administrative proceedings. Additionally, a one time expense of 5.0 is included to cover costs of typewriter and computer terminal for the new position.

Amounts shown in FY '85 assume bill passage with an effective date that will permit one month personal services and purchase of equipment within this fiscal year. Form C5 reflects 5.0 in FY '86 for equipment assuming we do not have authority in FY '85.

0932W10884a

Fiscal Note
Analysis

December 12, 1984

This bill amends the state's existing securities laws to strengthen the state's law enforcement jurisdiction over securities offerings made in other states, where the underlying "value" of the security is a (non-competitive) oil, gas, or mineral lease on Alaska land. Sales of speculative investments in such leases are already regulated "security" transactions, but Alaska's current law does not allow the state to require registration, or to take enforcement action against sellers who set up offices outside Alaska but who market Alaskan leases as securities, usually only to non-Alaskans.

These sales are often fraught with misrepresentations about the value of the Alaskan oil or gas lease, or the true cost of exploring and developing production on the lease land. Investors in other states pay up to $1,000 an acre for state and federal lease lands available over-the-counter in Alaska for $1.00 an acre, in hopes of striking it rich, in line with the promoters' glowing promises.

These sales, and the subsequent losses of $6,000, $10,000, even $20,000 to each of thousands of out-of-state investors, are very damaging to Alaska's commercial and investment image. Moreover, the subdividing into smaller parcels of these 640 acre leases may well defeat the underlying purpose of the state and federal exploratory (non-competitive) leasing program.

Enactment of this bill will require the attorney general to provide additional legal support for research, advice and enforcement action in the courts, as requested by the Division of Banking and Securities. As most of the offending companies are located outside Alaska, lawsuits to obtain injunctions against them will require substantial out-of-state travel funds to take depositions and interview witnesses, as well as funds to conduct those depositions and interviews.

It is expected that, at a minimum, five trips outside Alaska will be necessary to enforce registration of sales Alaskan oil, gas, or mineral leases outside Alaska. It will also be necessary to hire court reporters in order to take depositions and to hire outside counsel to file actions in jurisdictions outside the state.

Out-of-state Travel

5 trips X $800 fare =	$4,000
5 X 10 days X $80 per day =	$4,000
Total travel & per diem =	$8,000

Contractual

Court reporter services 6 hrs. X $80 X 40 days =	$19,200
Outside counsel 4 occurrences X $5,000 =	$20,000
Total	$39,200
TOTAL COSTS	$47,200

Costs beyond FY 86 include a 6% annual inflation factor.

JUSTIFICATION

A new position will be required when the Alaska Securities Act is amended to protect the public against the shams in oil and gas land leases involving Alaska lands. The Securities Section will undertake the registration of these leases and will experience a substantial increase in the requirements for compliance, enforcement including hearings.

The responsibility for this position will be to set up investigative files, maintain data entry, file investigative reports, coordinate material necessary for preparation of Cease and Desist Orders or possible court actions, screen initial registration documents, do follow-up for inquiry with other securities jurisdictions, BLM, DNR, as well as local State and federal law enforcement agencies.

Manage files and documents relative to registration, record funds. In-field registration inspection as required. Generally assist securities examiner as directed.

CSHB 126(Jud)

This bill amends the state's existing securities laws to strengthen the state's law enforcement jurisdiction over "fraudulent" securities offerings made in other states.

Alaska's current law does not allow the state to require registration or to take enforcement action against sellers who set up offices outside of Alaska, but who market Alaskan leases as securities to non Alaskans.

This legislation will broaden the Alaska Securities Act to cover these business firms even if the "investment" sales are not made in Alaska or to Alaskan residents.

This bill will not affect legitimate companies engaged in oil, gas, or mineral exploration or production, as they are already exempted from the Alaska Securities Act by AS 45.55.140(b) (17).

MEMORANDUM State of Alaska

TO: Louann Cutler, Staff Assistant
House Finance Committee

DATE: April 2, 1985

FILE NO:

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: CSHB 126 (Jud)
Sectional analysis

By: Jeffrey W. Bush
Assistant Attorney General

As requested, I have prepared a sectional analysis of CSHB 126 (Jud). This bill is designed to expand the jurisdiction of the Alaska Securities Act to enable the Administrator of Securities (Director, Division of Banking and Securities, Department of Commerce and Economic Development) to regulate certain transactions in securities which are not covered under the present Act.

1. Proposed AS 45.55.260(c)(3). This paragraph expands jurisdiction under the Securities Act to cover any transaction involving the sale of an interest in an oil, gas, or mining lease where the lease is on land located in Alaska, even if both parties to the transaction are outside of the state.

2. Proposed AS 45.55.260(c)(4). This paragraph, which also involves interests in oil, gas, or mining leases located on Alaska lands, extends jurisdiction under the act to transactions involving payments, such as royalties, from production under these leases, even if the parties to the transaction are outside of Alaska.

3. Proposed AS 45.55.260(c)(5). This paragraph, which was added by the Judiciary Committee, expands jurisdiction under the Act to include all transactions between nonresidents who sell security interests in real property located in Alaska, corporations incorporated in Alaska, or limited partnerships registered in Alaska. Recognizing that this paragraph would otherwise be subject to challenge as a violation of the Commerce Clause or the Due Process Clause of the United States Constitution, jurisdiction under this paragraph is expressly limited to those cases where its exercise is constitutionally acceptable.

You have also asked whether the amendment adopted by the Judiciary Committee will result in any change in the fiscal note submitted by the Department of Commerce and Economic Development. I have checked with the department, and they have

02-001A(Rev. 10/79)

informed me that the fiscal note originally sub ed is still correct and should be considered in conjunct ch CSHB 126 (Jud).

JWB/mf

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

HB 126

January 25, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that amends the Alaska Securities Act (AS 45.55) by extending its scope to include offers to buy or sell interests in oil, gas, or mining rights on land in the state, regardless of where the offer or sale occurs.

The bill was jointly prepared by the division of banking, securities and corporations of the Department of Commerce and Economic Development and the consumer protection section of the Department of Law in response to numerous complaints of fraudulent oil and gas lease schemes. These schemes typically involve solicitations by firms located outside Alaska who acquire an interest in oil or gas leases through bid offerings of the Department of Natural Resources or the federal Bureau of Land Management.

The lease tracts these firms acquire are often the least likely to contain valuable oil, gas, or mineral resources. However, these firms conduct massive high pressure telephone sales and media advertising aimed at would-be investors in the lower 48 states, promising them high returns if they "invest" in a portion of one of these Alaskan oil or gas leases. The offering firms often falsely represent that they have expertise in oil, gas or mineral exploration or development. What is especially offensive to our state is that these slick operators often use names such as "Alaska Oil and Gas Exploration" or "Alaska Petroleum Investments," and set up empty "shell" corporations with Alaska addresses.

This bill would broaden the Alaska Securities Act to cover these business firms even if the "investment" sales are not made in our state or to Alaska residents. Essentially, the bill would do this by extending the jurisdiction of our state securities regulators and of our courts over these

[redacted]

Governor's letter of transmittal

fraudulent schemes. The state would be able to take legal action against these out-of-state sellers of Alaska mineral rights. By amending the Securities Act, Alaska can require these firms to file securities registrations regarding their sales, and to give prospective purchasers truthful information about the likelihood of realizing a gain on such investments.

This legislation will not affect legitimate companies engaged in oil, gas, or mineral exploration or production, as they are already exempted from the Alaska Securities Act by AS 45.55.140(b)(17).

This bill should be supported by consumer groups as well as by the legitimate members of the oil and gas industry. Therefore, I urge your prompt action on this bill to prevent further damage to the commercial image, nationwide, of Alaska.

Sincerely,

Bill Sheffield
Governor

(specializing) lawfirms out of Denver and Texas - but you probably couldn't afford even an hours worth of their time! Also remember, there are NO state or federal laws that protect or help we little guys! The first point you'll have to prove is that the accounting they give you is probably more crooked than a witch's hairpin! And without some knowledge of how and where to prove that (even for a geologist with a foundation in mineral/security law) will have to spend thousands and probably come up with nothing! The only ones who will win will be the lawyers, and that will be through their terribly high hourly legal fees!

Letter 3

PHONE PEDLARS SELLING OIL FRAUDS THINK EVERYONE THEY CALL IS AN A.. H...

Dear Sirs

"Please find inclosed, an oil & gas leaseing rip off I received in the mail today. I have during the past several months received numerous telephone calls, from any numbers of file for you agents. I always give them a bad time. The windup telling them off in terms which would be inprintable. Then Ha[illegible] Up. In one case I got a call back, the fellow representing himself as THE DISTRICT ATTORNEY!

So I started giving him a BAD TIME, but before I got around to really telling him off. He beat me to it by telling me. (QUOTE: "I knew you were A BIG A-- H--- BEFORE I CALLED YOU, BUT YOU ARE A BIGER A-- H--- THAN I THOUGHT YOU WERE"). THEN HE SLAMS UP THE PHONE! HE BEAT ME TO THE PUNCH, AND TOLD ME OFF. BUT I GOT A BIG LAUGH OUT OF IT ANYWAY."

Yours truly [ ]

ANS: Dear subscriber - you learned a silly but happily good lesson from the "teleracketeer" who called you! [You are too intelligent to be taken - the poor slob who called you is the "class rated" JACK-ASS!] Your letter really "tells it like it is!" That psychopath showed you just how low such telemarketers (as they call themselves) can get to ..(the gutter)!

He proved exactly what Thyra Thompson, Secretary of State for Wyoming wrote in one of her excellent legal opinions (on the subject) in late 1983! He proved what the Denver Post described in a funny article in 1984 - giving the same descriptive (slang terms and names) such boiler room con-artist use to describe their potential VICTIMS! The low-life that call their sucker lists across the U.S. consider the public dribbling morons. They have less respect for ... public they call than killing a rat.

When, in fact, the boiler room bosses (allegedly most of the time) are right out of the arrested in Florida recently were described by "federal authorities," "Underworld characters!"

I recently read about a $250,000 study and report commissioned by the Justice Department. And it clearly states that such "underworld" swindlers have gotten SO RICH (the Godfathers behind the scenes) that run all types of "SECURITY swindles"--are RICHER than the federal government and the state governments. And its now too expensive to fight these criminals!

We have found in recent years that when it comes down to the various federal agencies who do good to excellent investigations - then have to hand it all over to young, inexperienced federal attornies (low in the pecking order) that all the "task force's investigations eventually go for nothing!" Now, you make up your own mind - come to your own conclusions WHY THAT IS A FACT?! I know what I believe! And it goes right back to the statement made in the report - "the people who head such "franchised" security scams HAVE BIG MONEY!" And what is the old saying? -- Money Talks?!

Its no wonder that the public is so gullible. For "ignorance is bliss!" Even with the swindlers, their ignorance is only exceeded by their stupidity, lead by arrogance and cunning!

You got a good dose (happily so, from what you report), of just exactly what LOW esteem these salesmen think of the people they swindle! They are the lowest form of human - as you now know, they aren't fit to lick your boots! And they darned well know exactly what they are doing! The "room" bosses - their secret "godfathers"-and YES - including the salespeople (they also USE) are lower than grave-robbers and from what that early 1984 Airline Magazine reported, these salesmen even "stink like a major-leagues' locker room!" - Its reported (alleged) the real "Underworld" bosses (the king-pins at the top in the real high chain of command) have always been pushing prostitution, drugs, gambling, you name it ... -- And many a "low-level soldier" has been watched getting on and off planes to and from Las Vegas "every week-end." This was reported by a well-known (respected) investigative reporter from Phoenix several years ago! [And he recently came out with still another article about the same "mob figure!"]

I'm glad that many readers are finding this all out on their own! YES! we've heard tapes of threatening (egotistical) salesmen's high-pressure calls. When a client tells them off! (Calling back and threatening potential victims .. nothing new)! Your letter is one of many received (only more expressive and clear)! "They" are obviously using OLD sucker-lists - worked over and over again! As we stated in earlier issue, "The people being called are weary of such time consuming bunk." And some are "getting mad!"

In a way you were lucky, He did you a big forget! Such "Underworld" characters, as you now know, are low-life that can't earn a living in any other way (outside of "armed robbery" as one recent Classified ad so stated in late 1984 - seeking more salesmen)! At least you really got the last laugh and the biggest laugh! -- Such temper-tantrums are classic and reveal more than a psychiatric evaluation! He exposed himself completely, proving his mouth and mind are nothing more than a sewer! -- And that joker is trying to make his suckers believe he's an "investment advisor?! ?! ?!" The FBI's warnings last summer, namin[illegible] men's names, was most significant! It proves these people are capable of any kind of violence and are the worst of human types! Yet they love to portray themselves as such up-right citizens in their slick promotional brochures! And they guarantee everything! But then why should they care! So far such long past histories reveal a series of C&Ds, civil lawsuits, and often criminal histories-and they are still out there calling people using ever new names and shell corporations! And invariably "lawyers" names show up prominently in their expensive literature!

We have got too little state and federal law enforcement, along with 'know nothing' staff (about security fraud). Most are green-behind-the-ears (about how legitimate O&G deals work). They couldn't recognize O&G security frauds if they fell in them. All too many bureaucrats don't really care, as long as their paychecks arrive. The general public be damned! Victims must realize they are responsible for their own involvement in sending thousands to a fraudulant investment! There are laws on books to be enforced. Legislatures fund such state agencies. And even the Justice Dept. gives only 'lip service.' (such as last March when top of criminal division promised "grand jury indictments soon")! [When D.C. official made TV-news of Postal Inspectors raids on "22 boiler rooms" nationwide!] It's past due for "buyer beware!" But I must say, not to get in trouble with ALL security agencies, that there are a few states (such as Alaska, Iowa, Texas, etc.), that have done good jobs of attempting to clean up and stop white-collar/career criminals. Texas is doing best job with court sentences of as much as 25-years to such criminals.

Don't move without letting us know! - Include your old address (address sticker if possible).

Dear Representative Navarre:

Re: House Bill 126 - An Act Amending the Alaska Securities Act

You have requested of this division whether or not the enclosed HB 126, amending the Alaska Securities Act, is in conflict with any federal law.

Last year when this particular legislation was drafted and compiled by the Department of Law, that same question was treated by the Attorney General. In seeking their counsel on this matter, we were advised that the proposed legislation does not conflict with the Interstate Commerce provisions of federal law, and, because this deals with an important state's rights interest, i.e., the lease held lands are located in Alaska, the State was well within its jurisdiction to require disclosure and registration on offerings concerning Alaska land. I believe the position of the Department of Law is unchanged with respect to this matter but suggest that, should confirmation of this position be desired, a request be made of the Department of Law, specifically either Mr. Jeffrey Bush, who represents the division on matters of this nature, or to the Attorney General, himself, who testified on this matter at last year's Senate and House hearings.

We see no apparent conflicts with federal law or, at least, none that are insurmountable and defer to the department of law with respect to any formalized opinions.

I remain at your disposal should you require any further information or assistance.

Yours very truly,

Lawrence P. Carroll

OFFICE OF THE ATTORNEY GENERAL

March 23, 1984

The Honorable Fritz Pettyjohn
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Re: SB 432, "an Act amending the Alaska Security's Act"

Dear Senator Pettyjohn:

At the Senate Labor and Commerce Committee hearing on February 15, 1984, you requested our opinion with respect to the effect on the jurisdictional scope of SB 432. This legislation would clarify the existing Alaska Security's Act to better reach fraudulent or high pressure out-of-state sales of oil and gas lease hold interests on state or federal lands in Alaska.

The Administration believes that Alaska is well served by having an ability to regulate sales of land or lease hold interests located in Alaska, even where the transactions take place outside the state between non-residents of the state. The state may protect the legitimate concerns of its citizens by exercising the right to sue according to the doctrine of parens patriae. This doctrine is recognized in Alaska. State v. First National Bank of Anchorage, 660 P.2d 406, 420-21 (Alaska 1982); Public Defender Agency v. Superior Court, 534 P.2d 947 (Alaska 1975).

Because we believe there is a substantial state interest in preventing fraudulent sales of oil and gas leases located within the state's border, we believe a constitutional challenge against Alaska's assertion of jurisdiction provided by the proposed legislation would fail. A claim that the jurisdiction afforded by the proposed legislation violates an out-of-state citizen's rights under the Due Process Clause, Full Faith and Credit Clause or Commerce clause of the U.S. Constitution would, in all likelihood, be dismissed. See generally, Aldens, Inc., v. Packel. 524 F.2d 38 (3rd Cir. 1975). The Aldens case is instructive because it involved a challenge to Pennsylvania's right to enforce state credit sales laws as applied to an

Illinois corporation operating a mail order business in all fifty states and where all orders were accepted in Chicago. In that case, the court performed a thorough and comprehensive analysis of a variety of constitutional issues and concluded that none of the constitutional provisions were violated by enforcement of Pennsylvania's laws.

The currently accepted approach to Due Process Clause limitation challenges is one of interest analysis where the court focuses on whether a state has sufficient interest "to justify any exercise of it's sovereignty in connection with the transaction and dispute." Id. at 42-43, (citing McGee v. International Company, 355 U.S. 220 (1957)) emphasis in original. The court further noted in Alden that a relatively low threshold of state interest is needed to justify jurisdiction. Id. at 43.

In conclusion, because Alaska has a substantial interest in transactions involving land or interest of land within its borders, we believe a court would find that the exercise of jurisdiction through the proposed legislation does not interfere with an out-of-state defendant's due process or other constitutional rights.

Please feel free to call if we can be of additional assistance.

Sincerely,

Norman C. Gorsuch
Attorney General

FEDERAL TRADE COMMISSION
WASHINGTON, D. C. 20580

BUREAU OF
CONSUMER PROTECTION

March 14, 1984

The Honorable Richard I. Eliason
Chairman
Senate Labor and Commerce Committee
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Chairman Eliason:

The Federal Trade Commission's Bureaus of Competition, Consumer Protection, and Economics,[1] at the request of Governor Sheffield, submit comments on Senate Bill No. 432. We wish to thank you and Governor Sheffield for the opportunity to share our views on S. 432. We think that expanding the jurisdiction of the Alaska Securities Act of 1959 to cover all oil and gas leases to land located in Alaska would complement our efforts and those of other federal and state agencies to control what appear to be serious abuses in the rapidly growing, nation-wide marketing of Alaska oil and gas leases. The Commission staff favors passage of S. 432.

The Commission, in fulfilling its Congressionally-mandated mission to protect consumers from unfair and deceptive practices in the nation's commerce, has been investigating suspected fraud by sellers of oil and gas leases and related services. In the course of these investigation the Commission staff has identified from the public records of the federal Bureau of Land Management ("BLM") and the Alaska Department of Natural Resources a number of companies that have acquired oil and gas leases to millions of acres of land in Alaska. These companies acquired most of their leases for $1 per acre under the BLM noncompetitive oil and gas leasing program.[2] Most of these acquisition have occurred in the Minchumina, Denali, and Tiekel block areas of Alaska.[3]

---

[1] This statement reflects the views of the Bureaus of Competition, Consumer Protection and Economics of the Federal Trade Commission, but does not necessarily reflect the views of the Commission or of any individual Commissioner. The Federal Trade Commission has voted, however, to authorize the Bureaus to submit these comments.

[2] 43 C.F.R. § 3110 et seq.

[3] Public Land Orders Nos. 6098, 46 Fed. Reg. 61472 (December 17, 1981), and 6329, 47 Fed. Reg. 39495 (September 8, 1982).

for lands located in Alaska. This revision would empower the Alaska Division of Securities to require these companies to register their leases as securities and to provide prospective purchasers with meaningful disclosures of the speculative nature of these investments.

Senate Bill No. 432 should not materially hinder the development of Alaska's resources. The Alaska Securities Act already includes an exemption for sales of leases to bona fide oil and gas exploration companies. Thus, the expansion of the securities law's jurisdiction should not materially change the effect of the statute on those firms actually exploring and developing Alaska's resources.

The Commission staff strongly supports passage of S. 43.. With the new authority granted by this bill, state officials could effectively join the Commission and other federal law enforcement agencies in our efforts to protect consumers and to stop the possible misuse of Alaska's name and its resources.

Very truly yours,

Michael C. McCarey

RECEIVED
'85 JAN 31 A 11:28

Subject: Alaska Land Leasing Inc.
(A California based Alaska Corperation)

To: Alaska Banking, Securities and Corperation Division
of Commerse and Economics.
Pouch D
Juneau, Alaska 99811

In June 1983 I purchased a 160 acre BLM Oil Lease, serrial # AA048253 through the Alaska Land Leasing Inc., a State of Alaska Corperation with offices in and around Las Angeles, California. legally described as the SE¼ Section 27, Twp.32 N, Rng.10E in the Seward Meridian. The ALLI principals in this transaction were:

Frank Smith, Sales Representative ALLI
Terry J. Risenhoover, Chairman of the Board ALLI
Vic Gainer, Executive Vice-President ALLI
David Castle, Documents Control Manager ALLI
Marjorie Diehl Foote, Tundra Oil, INC

Shortly thereafter, I became concerned when there were NEWS releases about Fraud in the Oil Leasing Industry and I wrote to the Bettor Business Bureau, Los Angeles Counties, 639 South New Hampshire Ave, L.A., CA 90005; I received a "form letter" which indicated no fraudulent Business dealing being conducted by ALLI.

In December 1983 I purchased a one-thirtyfifth (1/35) interest in the Prudhoe Uplands 34-231 Associates, a subsidiary of Alaska Land Leasing Inc. The principals in the Prudhoe Uplands Associates were:

Frank Smith, Sales Representative ALLI
Terry J. Risenhoover, Chairman of the Board ALLI
Vic Gainer, President, ALLI
Ms. Marlana Huter, ALLI ("one of the General Partners P.U. 34-231)
David Castle
Marjorie D. Foote

I received a letter, dated May 14, 1984from Terry Risenhoover, ALLI informing me of a reorganization with a change in address and new telephone numbers (see attached copy). On May 15, 1984 I received a telephone call from a Richard Brown, Master Securities Management, sayig that he was taking over my account. When he was unable to answer my questions I ask him to have Vic Gainer call me. Finally, on June 20, 1984 I received a call from Vic Gainer who promised to send me a list of the shareholders in the Prudhoe Uplands 34-231 Associates. To date I have not received that list nor have I been successful in my attempts to contact anyone associated with ALLI.

I understand that the State of Alaska has filed a civil suit in the Superior Court,against both Alaska Land Leasing Inc and Tundra Oil, Inc. I would appreciate any information you may be able to give me including addresses and telephone numbers of the corperation(s) and the remaining principals in the organizations.

Thanking you in advance, I am

Sincerely Yours,

J. R. Thornton

Suite 408 - P.O. Box 101326
Los Angeles, CA 90049
(213) 826-2[illegible]3

May 14, 1984

Dear Alaskan Lease Holder:

After many months of serious consideration, we at Alaska Land Leasing Inc. have decided to cease all retail marketing.

We are continuing to function as a wholesaler of large blocks of oil and gas leases for publicly registered offerings.

As a result of this decision we have found it necessary to close both our Brentwood and Thousand Oaks, California offices.

We have opened a new service office at:

Alaska Land Leasing Inc.
5655 Lindero Canyon Road
Suite #408
Westlake Village, CA 91362

This office will be staffed by Mr. Vic Gainer and myself. Either one of us may be reached by calling:

(818) 889-9061

We have hired Masters Management Company, an affiliate of Masters Securities, to complete all lease processing and to handle all inquiries regarding your leases.

Masters Management Company has hired a few former Alaska Land Leasing Inc. administrative staff members to provide you with the best possible service.

If you have any questions regarding your lease, please call either David Castle or Marjorie Foote at:

(818) 991-5805

Thank you for your consideration. I remain . . .

Cordially yours,

ALASKA LAND LEASING INC.

Terry J. Risenhoover

Terry J. Risenhoover,
Chairman

investment contract. — Sufficient evidence was presented to support a jury finding that vending machine sales program was an investment contract where the company, through advertisements, verbal representations to potential investors, and various investment documents prepared and signed by defendant acting as a corporate officer and by the sales agent, sold a package of contractual benefits which included, in addition to vending machines themselves, the precise experience, expertise and resources necessary to assure profits from the machines. Wheeler v. State, Ct. App. Op. No. 227 (File No. 5428), 659 P.2d 1241 (1983).

Territorial distributorships must be registered. — Territorial distributorships constitute an investment contract and are securities subject to registration. American Gold & Diamond Corp. v. Kirkpatrick, Sup. Ct. Op. No. 2799 (File No. 7608), P.2d (1984).

Sec. 45.55.140. Exemptions.

See 45.55.140 (b)(17)

NOTES TO DECISIONS

Quoted in Greater Area, Inc. v. Bookman, Sup. Ct. Op. No. 2589 (File No. 5557), 657 P.2d 828 (1982).

Sec. 45.55.200. Orders and injunctions. (a) Whenever it appears to the administrator that a person has engaged or is about to engage in an act or practice in violation of any provision of this chapter or rule or order under this chapter, the administrator may

(1) in the public interest or for the protection of investors, issue an order (A) directing the person to cease and desist from continuing the act or practice, (B) directing the person, for a period not to exceed three years, to file the annual reports, proxies, consents or authorizations, proxy statements, or other materials relating to proxy solicitations required under AS 45.55.139 with the administrator for examination and review 10 working days before a distribution to shareholders, and (C) voiding any proxies obtained by a person required to file under AS 45.55.139, including their future exercise or actions resulting from their past exercise, if the proxies were solicited by means of an untrue or misleading statement prohibited under AS 45.55.160; or

(2) bring an action in the superior court to enjoin the acts or practices and to enforce compliance with this chapter or rule or order under this chapter, and upon a proper showing, the appropriate remedy shall be granted and a receiver or conservator may be appointed for the defendant or the defendant's assets; the court may not require the administrator to post a bond.

(b) Before issuing an order under (a)(1) of this section the administrator shall give reasonable notice of and an opportunity for a hearing. However, the administrator may issue a temporary order pending the hearing which order shall remain in effect until 10 days after the hearing is held and which shall become final if the person to whom notice is addressed does not request a hearing within 15 days after the receipt of notice. (§ 308 ch 198 SLA 1959; am § 1 ch 126 SLA 1968; am § 1 ch 65 SLA 1981; am § 107 ch 16 SLA 1982)

Alaska law pursuant to the federal Act. To the extent of an inconsistency between a provision of this Act and a provision of AS 10.05 or 10.20, this Act prevails with regard to a corporation organized under Alaska law pursuant to the federal Act."

Sec. 45.55.139. Reports of corporations. A copy of all annual reports, proxies, consents or authorizations, proxy statements and other materials relating to proxy solicitations distributed, published or made available by any person to at least 30 Alaska resident shareholders of a corporation which has total assets exceeding $1,000,000 and a class of equity security held of record by 500 or more persons and which is exempted from the registration requirements of AS 45.55.070 by AS 45.55.138, shall be filed with the administrator concurrently with its distribution to shareholders. (§ 1 ch 58 SLA 1977)

For case construing common law prohibition of materially false and misleading statements in proxy solicitations, see Brown v. Ward, Sup. Ct. Op. No. 1825 (File No. 3579), 593 P.2d 247 (1979).

Sec. 45.55.140. Exemptions. (a) The following securities are exempted from AS 45.55.070:

(1) a security, including a revenue obligation, issued or guaranteed by the United States, a state, a political subdivision of a state, or an agency or corporate or other instrumentality of one or more of the foregoing; or a certificate of deposit for any of the foregoing;

(2) a security issued or guaranteed by Canada, a Canadian province, a political subdivision of a Canadian province, an agency or corporate or other instrumentality of one or more of the foregoing, or a foreign government with which the United States currently maintains diplomatic relations, if the security is recognized as a valid obligation by the issuer or guarantor;

(3) a security issued by and representing an interest in or a debt of, or guaranteed by, a bank organized under the laws of the United States, or a bank, savings institution, savings and loan association, building and loan association, or trust company organized and supervised under the laws of a state or of the United States;

(4) a commercial paper which arises out of a current transaction or the proceeds of which have been or are to be used for current transactions, and which evidences an obligation to pay cash within nine months of the date of issuance, exclusive of days of grace, or any renewal of the paper which is likewise limited, or a guarantee of the paper or of the renewal, if the commercial paper is of the type eligible for discount by a federal reserve bank;

(5) an investment contract issued in connection with an employee's stock purchase, savings, pension, profit-sharing, or similar benefit plan if the administrator is notified in writing 30 days before the inception of the plan or, with respect to plans which are in effect on May 9, 1959, within 60 days thereafter, or within 30 days before they are reopened if they are closed on May 9, 1959;

(6) a security issued by and representing an interest in or a debt of, or guaranteed by, a federal savings and loan association, or a building and loan or similar association organized under the laws of a state and authorized to do business in this state;

(7) a security issued by and representing an interest in or a debt of, or guaranteed by, an insurance company organized under the laws of a state and authorized to do business in this state; but this exemption does not apply to an annuity contract, investment contract, or similar security under which the promised payments are not fixed in dollars but are substantially dependent upon the investment results of a segregated fund or account invested in securities; except that policies or annuity contracts of insurance companies admitted to do business in the state are not subject to this chapter;

(8) a security issued or guaranteed by a federal credit union or any credit union, industrial loan association, or similar association organized and supervised under the laws of this state;

(9) a security issued or guaranteed by a railroad, other common carrier, public utility, or holding company which is

(A) subject to the jurisdiction of the Interstate Commerce Commission;

(B) a registered holding company under the Public Utility Holding Company Act of 1935 or a subsidiary of the company within the meaning of that Act;

(C) regulated in respect of its rates and charges by a governmental authority of the United States or a state; or

(D) regulated in respect of the issuance or guarantee of the security by a governmental authority of the United States, a state, Canada, or a Canadian province;

(10) a security listed or approved for listing upon notice of issuance on the New York Stock Exchange, the American Stock Exchange, the Midwest Stock Exchange, or the Pacific Coast Stock Exchange, or any other security of the same issuer which is of senior or substantially equal rank; a security called for by subscription rights or warrants so listed or approved; or a warrant or right to purchase or subscribe to any of the foregoing;

(11) a security issued by a person organized and operated not for private profit but exclusively for religious, educational, benevolent, charitable, fraternal, social, athletic, or reformatory purposes, or as a chamber of commerce or trade or professional association.

(b) The following transactions are exempted from AS 45.55.070:

(1) a transaction between the issuer or other person on whose behalf the offering is made and an underwriter, or among underwriters;

(2) a transaction in a bond or other evidence of indebtedness secured by a real or chattel mortgage or deed of trust, or by an agreement for the sale of real estate or chattels, if the entire mortgage, deed of trust, or agreement, together with all the bonds or other evidence of indebtedness, secured thereby, is offered and sold as a unit;

(3) a transaction by an executor, administrator, sheriff, marshal, receiver, trustee in bankruptcy, guardian, or conservator;

(4) an offer or sale to a bank, savings institution, trust company, insurance company, investment company as defined in the Investment Company Act of 1940, pension or profit-sharing trust, or other financial institution or institutional buyer, or to a broker-dealer, whether the purchaser is acting for itself or in some fiduciary capacity;

(5) sales by an issuer

(A) to no more than 10 persons in this state other than those designated in (4) of this subsection during a period of 12 consecutive months whether or not the seller or any of the buyers is then present in this state, if

(i) no commission or other remuneration is paid or given directly or indirectly for soliciting a prospective buyer in this state;

(ii) the total dollar amount invested during a period of 12 consecutive months does not exceed $100,000;

(iii) a legend is placed on the certificate or other document evidencing ownership of the security, stating that the security is not registered under this chapter and cannot be resold without registration under this chapter or exemption from it;

(iv) offers are made without public solicitation or advertisement; and

(v) the issuer files with the administrator a notice specifying the issuer, the security to be sold and the terms of the offer at least two days before any sales are made;

(B) to no more than 25 persons in this state other than those designated in (4) of this subsection during a period of 12 consecutive months whether or not the seller or any of the buyers is then present in this state, if

(i) the sales are made solely in this state;

(ii) before any sale, each prospective buyer is furnished access to the information that would be provided to a prospective buyer in a registration under AS 45.55.100 (which information shall be furnished to the administrator upon his request);

(iii) the total dollar amount invested during a period of 12 consecutive months does not exceed $500,000;

(iv) commissions or other remuneration meet the requirements of this chapter and are made only to persons registered under AS 45.55.040;

(v) a legend is placed on the certificate or other document evidencing ownership of the security, stating that the security is not registered under this chapter and cannot be resold without registration under this chapter or exemption from it;

(vi) the issuer obtains a signed agreement from the buyer acknowledging that he is buying for investment purposes and that the securities will not be resold without registration under this chapter;

(vii) offers are made without public solicitation or advertisement; and

(viii) the issuer files with the administrator a notice specifying the issuer, the security to be sold, and the terms of the offer at least two days before any sales are made;

(6) an offer or sale of a preorganization certificate or subscription if

(A) no commission or other remuneration is paid or given directly or indirectly for soliciting a prospective subscriber,

(B) the number of subscribers does not exceed 10, and

(C) no payment is made by any subscriber;

(7) a transaction under an offer to existing security holders of the issuer, including persons who at the time of the transaction are holders of convertible securities, nontransferable warrants, or transferable warrants exercisable within not more than 90 days of their issuance, if

(A) no commission or other remuneration, other than a standby commission, is paid or given directly or indirectly for soliciting a security holder in this state, or

(B) the issuer first files a notice specifying the terms of the offer and the administrator does not by order disallow the exemption within the next five full business days;

(8) an offer (but not a sale) of a security for which registration statements have been filed under both this chapter and the Securities Act of 1933 if no stop order or refusal order is in effect and no public proceeding or examination looking toward an order is pending under either Act;

(9) an isolated nonissuer transaction, whether effected through a broker-dealer or not;

(10) a nonissuer distribution of an outstanding security if

(A) a recognized securities manual contains the names of the issuer's officers and directors, a balance sheet of the issuer as of a date within 18 months, and a profit and loss statement for either the fiscal year preceding that date or the most recent year of operations, or

(B) the security has a fixed maturity or a fixed interest or dividend provision and there has been no default during the current fiscal year or within the three preceding fiscal years, or during the existence of the issuer and any predecessors if less than three years, in the payment of principal, interest, or dividends on the security;

(11) a nonissuer transaction effected by or through a registered broker-dealer under an unsolicited order or offer to buy; however, the administrator may by rule require that the customer acknowledge upon a specified form that the sale was unsolicited, and that a signed copy of each form be preserved by the broker-dealer for a specified period;

(12) a transaction executed by a bona fide pledgee without any purpose of evading this chapter;

(13) a transaction incident to a right of conversion or a statutory or judicially approved reclassification, recapitalization, reorganization, quasi-reorganization, stock split, reverse stock split, merger, consolidation or sale of assets, if

(A) no commission or other remuneration, other than a standby commission is paid or given directly or indirectly for soliciting a security holder in this state; and

(B) the issuer files a notice in the form specified by the administrator not less than 30 days before making the offer;

(14) a stock dividend, whether the corporation distributing the dividend is the issuer of the stock or not, if nothing of value is given by stockholders for the dividend other than the surrender of a right to a cash or property dividend when each stockholder may elect to take the dividend in cash or property or in stock;

(15) an act incident to a class vote by stockholders, under the certificate of incorporation or the applicable corporation statute, on a merger, consolidation, reclassification of securities or sale of securities of another corporation;

(16) the offer or sale by a registered broker-dealer, acting either as principal or agent, of securities previously sold and distributed to the public if

(A) the securities are sold at prices reasonably related to the current market price at the time of sale, and, if broker-dealer is acting as agent, the commission collected by the broker-dealer on account of the sale is not in excess of usual and customary commissions collected with respect to securities and transactions having comparable characteristics;

(B) the securities do not constitute the whole or a part of an unsold allotment to or subscription or participation by the broker-dealer as an underwriter of the securities or as a participant in the distribution of the securities by the issuer, by an underwriter or by a person or group of persons in substantial control of the issuer or of the outstanding securities of the class being distributed; and

(C) the securities have been lawfully sold and distributed in this state under this chapter;

(17) offers or sales of certificates of interest or participation in oil, gas, or mining rights, titles or leases, or in payments out of production under such rights, titles or leases, if the purchasers

(A) are or have been during the preceding two years engaged primarily in the business of exploring for, mining, producing, or refining oil, gas, or minerals; or

(B) have been found by the administrator upon written application to be substantially engaged in the business of exploring for, mining, producing, or refining oil, gas, or minerals so as not to require the protection provided by AS 45.55.070.

(c) In any proceeding under this chapter, the burden of proving an exemption or an exception from a definition is upon the person claiming it.

(d) The administrator may by order deny or revoke an exemption specified in (a)(5), (7) or (11) of this section or in (b) of this section with respect to a specific security or transaction. The order may not be entered without appropriate prior notice to all interested parties, opportunity for hearing, and written findings of fact and conclusions of law, except that the administrator may by order summarily deny or revoke any of the specified exemptions pending final determination of a proceeding under this subsection. Upon the entry of a summary order, the administrator shall promptly notify all interested parties that it has been entered and of the reasons for it and that within 15 days of the receipt of a written request the matter will be set down for hearing. If no hearing is requested and none is ordered by the administrator, the order remains in effect until it is modified or vacated by the administrator. If a hearing is requested or ordered, the administrator, after notice of and opportunity for hearing to all interested persons, may modify or vacate the order or extend it until final determination.

(e) No order under (d) of this section may operate retroactively. No person may be considered to have violated AS 45.55.070 or 45.55.150 by reason of an offer or sale effected after the entry of an order under this subsection if he sustains the burden of proof that he did not know, and in the exercise of reasonable care could not have known of the order.

(f) The administrator shall by regulation prescribe a schedule of fees for examination or investigation of claimed exemption. (§ 302 ch 198 SLA 1959; am §§ 3 — 11 ch 105 SLA 1961; am § 1 ch 8 SLA 1966; am § 1 ch 25 SLA 1968; am §§ 11 — 13 ch 86 SLA 1972; am § 15 ch 218 SLA 1976; am §§ 1 — 3 ch 132 SLA 1977; am § 1 ch 56 SLA 1978; am § 50 ch 94 SLA 1980)

Effect of amendments. — The 1976 amendment inserted "not" preceding "by order disallow" in paragraph (7)(B) of subsection (b).

The 1977 amendment rewrote paragraph (5) of subsection (b), substituted "under this chapter" for "or any other state of the United States under this or any act regulating the sale of the securities" in paragraph (16)(C) of subsection (b), and substituted "(a)(5), (7) or (11)" for "(a)(5) or (7)" in the first sentence of subsection (d).

The 1978 amendment added paragraph (17) of subsection (b).

The 1980 amendment, in subparagraph (b)(5)(B)(viii), substituted "sold" for "offered" near the middle of the subparagraph, and substituted "any sales are" for "the offer is" near the end of the subparagraph.

Legislative history reports. — For report on ch. 8, SLA 1966, see House Journal (1966), p. 169. For report on ch. 132, SLA 1977 (SB 48), see 1977 Senate Journal, p. 190.

ALR references.—What securities are exempt from registration under § 402(a) of the Uniform Securities Act, 84 ALR3d 575.

uniformity in the form and content of registration statements, applications, and reports wherever practicable.

(c) All financial statements shall be prepared in accordance with generally accepted accounting practices. The administrator may by rule or order prescribe (1) the form and content of financial statements required under this chapter, (2) the circumstances under which consolidated financial statements shall be filed, and (3) whether any required financial statements shall be certified by independent or certified public accountants.

(d) No provision of this chapter imposing liability applies to an act done or omitted in good faith in conformity with a rule, form, or order of the administrator, notwithstanding that the rule, form, or order may be later amended or rescinded or be determined by judicial or other authority to be invalid.

(e) Every hearing in an administrative proceeding shall be public unless the administrator in his discretion grants a request joined in by all the respondents that the hearing be conducted privately. (§ 312 ch 198 SLA 1959)

Sec. 45.55.250. Administrative files and opinions. (a) A document is filed when it is received by the administrator.

(b) The administrator shall keep a register of all applications for registration and registration statements which are or have ever been effective under this chapter and all denial, suspension, or revocation orders which have been entered under this chapter. The register shall be open for public inspection.

(c) The information contained in or filed with a registration statement, application, or report may be made available to the public under the rules which the administrator prescribes.

(d) Upon request and at the reasonable charges which he prescribes, the administrator shall furnish to any person photostatic or other copies (certified under his seal of office if requested) of any entry in the register or any document which is a matter of public record. In a proceeding or prosecution under this chapter, a copy so certified is prima facie evidence of the contents of the entry or document certified.

(e) The administrator in his discretion may honor requests from interested persons for interpretative opinions. (§ 313 ch 198 SLA 1959; am §§ 16, 17 ch 105 SLA 1961)

Sec. 45.55.260. Scope of the chapter and service of process. (a) AS 45.55.010, 45.55.030(a), 45.55.070, 45.55.170, and 45.55.220 apply to persons who sell or offer to sell when (1) an offer to sell is made in this state, or (2) an offer to buy is made and accepted in this state.

(b) AS 45.55.010, 45.55.030(a), and 45.55.170 apply to persons who buy or offer to buy when (1) an offer to buy is made in this state, or (2) an offer to sell is made and accepted in this state.

(c) For the purpose of this section, an offer to sell or to buy is made in this state, whether or not either party is then present in this state, when the offer (1) originates from this state or (2) is directed by the offeror to this state and received at the place to which it is directed, or at a post office in this state in the case of a mailed offer.

(d) For the purpose of this section, an offer to buy or to sell is accepted in this state when acceptance is communicated to the offeror in this state and has not previously been communicated to the offeror, orally or in writing, outside this state. Acceptance is communicated to the offeror in this state, whether or not either party is then present in this state, when the offeree directs it to the offeror in this state reasonably believing the offeror to be in this state and it is received at the place to which it is directed, or at a post office in this state in the case of a mailed acceptance.

(e) An offer to sell or to buy is not made in this state when (1) the publisher circulates or there is circulated on his behalf in this state a bona fide newspaper or other publication of general, regular, and paid circulation which is not published in this state, or which is published in this state but has had more than two-thirds of its circulation outside this state during the past 12 months, or (2) a radio or television program originating outside this state is received in this state.

(f) AS 45.55.020, 45.55.030(c), and 45.55.170, so far as investment advisers are concerned, apply when any act instrumental in effecting prohibited conduct is done in this state, whether or not either party is then present in this state.

(g) Every applicant for registration under this chapter and every issuer which proposes to offer a security in this state through a person acting on an agency basis in the common-law sense shall file with the administrator, in the form which he prescribes by rule, an irrevocable consent appointing the administrator or his successor in office to be his attorney to receive service of lawful process in a civil suit, action, or proceeding against him or his successor executor or administrator which arises under this chapter or a rule or order under this chapter after the consent has been filed, with the same force and validity as if served personally on the person filing the consent. A person who files the consent in connection with a previous registration need not file another. Service may be made by leaving a copy of the process in the office of the administrator, but it is not effective unless (1) the plaintiff, who may be the administrator in a suit, action, or proceeding instituted by him, immediately sends notice of the service and a copy of the process by registered mail to the defendant or respondent at his last address on file with the administrator, and (2) the plaintiff's affidavit of mailing is filed in the case on or before the return day of the process, if any, or within the further time which the court allows.

(h) When a person, including a nonresident of this state, engages in conduct prohibited or made actionable by this chapter or a rule or order

under this chapter, and he has not filed a consent to service of process under (g) of this section and personal jurisdiction over him cannot otherwise be obtained in this state, that conduct is considered equivalent to his appointment of the administrator or his successor in office to be his attorney to receive service of process in a civil suit, action, or proceeding against him or his successor executor or administrator which grows out of that conduct and which is brought under this chapter or a rule or order under this chapter, with the same force and validity as if served on him personally. Service may be made by leaving a copy of the process in the office of the administrator, but service is not effective unless (1) the plaintiff, who may be the adminstrator in a suit, action, or proceeding instituted by him, forthwith sends notice of the service and a copy of the process by registered mail to the defendant or respondent at his last known address or takes other steps which are reasonably calculated to give actual notice, and (2) the plaintiff's affidavit of compliance with this subsection is filed in the case on or before the return day of the process, if any, or within such further time as the court allows.

(i) When process is served under this section, the court, or the administrator in a proceeding before him, shall order the continuance which is necessary to afford the defendant or respondent reasonable opportunity to defend. (§ 314 ch 198 SLA 1959; am § 18 ch 105 SLA 1961)

Sec. 45.55.270. Short title. This chapter may be cited as the Alaska Securities Act of 1959. (§ 315 ch 198 SLA 1959)

Chapter 57. Takeover Bid Disclosure Act.

Section	Section
10. Provisions of takeover bids	70. Criminal penalties
20. Disclosure	80. Civil liabilities
30. Recommendations to accept or reject	90. Consent to service of process
40. Deceptive practices	100. Regulations
50. Investigations and subpoenas	110. Definitions
60. Injunctions	120. Short title

Sec. 45.57.010. Provisions of takeover bids. The following provisions apply to every takeover bid:

(1) The period of time within which securities may be tendered by an offeree under a takeover bid shall not be less than 21 days nor more than 35 days from the date copies of the takeover bid are first published or sent or given to offerees.

(2) Securities deposited under a takeover bid may be withdrawn by an offeree or his attorney-in-fact by demand in writing on the offeror or the depository at any time within 21 days from the date copies of the takeover bid are first published or sent or given to offerees.

RECORDS CERTIFICATION

I, the undersigned, an employee of the State of Alaska, do hereby certify that the microfilm images on this microform are accurate reproductions of the original records of the State of Alaska as accumulated during the regular course of business, and that it is the established policy and practice of this State to microfilm its records and to dispose of the original records after microfilm reproductions have been made.

Purpose of the Report	1
Organization and Function	3
Findings and Recommendations	5
Appendix:	
A. Disposition of Allegations on DMS Management	17
Agency Response:	
Department of Commerce and Economic Development	27

PURPOSE OF THE REPORT

In accordance with a Legislative Budget and Audit Committee special request and Title 24 of the Alaska Statutes, an examination of the Department of Commerce and Economic Development, Division of Measurement Standards (DMS), was conducted to determine if:

1. The Division has complied with applicable State statutes and regulations governing its fiscal and budgeting activities.

2. The allegations submitted to the Legislative Budget and Audit Committee are true. (See Appendix A of this report).

3. The performance of the Division is acceptable in terms of economy, efficiency, and effectiveness.

DMS was organized in July, 1982, with the transfer of the permit and weigh station functions of the Department of Public Safety to the Department of Commerce and Economic Development, Weights and Measures Section. We recognize the problems created by the transition from a section of 18 employees who were located in three areas of the State to a division of 58 employees stationed in eight different locations. Therefore, in general, we focused our evaluation of program performance on those program areas which were in existence within the Weights and Measures Section prior to July, 1982.

The policy and audit approach utilized by the Division of Legislative Audit for Performance Review can best be described as "audit by exception".

This methodology focuses audit effort on areas of an auditee's operations that have been identified by a preliminary survey as having a high degree of probability for needing improvements.

Therefore, by design finite audit resources are used to identify where and how improvements can be made and little time is devoted to reviewing well run operations or programs. Consequently, this report highlights those areas needing improvement and does not emphasize those operations and programs that are properly functioning.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Division of Measurement Standards (DMS) was established in July 1982 with the transfer of the permit and weigh station functions from the Department of Public Safety to the Department of Commerce and Economic Development, Weights and Measures Section. The Division has four distinct statutory requirements:

1. Public and consumer protection through maintenance of uniform standards which ensure the accuracy of commercial weighing and measuring devices within the State (AS 45.75).

2. Consumer protection for buyers of mobile homes through the enforcement of mobile home warranties (AS 45.30).

3. Operation of weigh stations to identify and remove overweight commercial vehicles from the State highway system (AS 44.33.020(25)).

4. Issuing of special permits authorizing the operation of overweight and oversize vehicles, and the collection of fees for these special permits (AS 44.33.020(25)).

The "Weights and Measures Act", AS 45.75, requires a system of weights and measures that conforms to the standards customarily in use in the United States. The weights and measures obtained by the State are to be verified by the National Bureau of Standards (NBS) and are to be properly maintained to ensure their reliability and traceability to NBS.

To accomplish this mandate, DMS is the custodian of the State's weights and measures and conducts the periodic verification with NBS. The State's standards of weights and measures are used to verify all office standards. The office standards then are used to verify all field standards used by DMS. In addition, these standards become the basis for verification of all instruments and devices used for determining weight or measure in commercial transactions within the State.

DMS fulfills its responsibilities through physical inspection of devices, examination of packaging, and the investigation of complaints. DMS may issue "stop-use" or "removal orders" of measuring devices and commodities offered for sale, when it is necessary to enforce the Weights and Measures Act.

Alaska Statute 45.30 mandates the responsibility to resolve warranty defects of mobile homes. Manufacturers selling mobile homes in the State are required to post a bond guaranteeing the warranty of that mobile home for one year. If the warranty is violated and a complaint is submitted through the Division, the Mobile Home Inspector has the authority to resolve the warranty defect through negotiations with the manufacturer, local dealer, and home owner.

If the problem cannot be resolved, the Division may revoke the bond and use the proceeds to repair the warranty defect.

Under AS 44.33.020(25) the Division is responsible for the operation of 12 weigh stations located on the State highway system. The primary function of these weigh stations is to remove vehicles from the highway system that are in violation of the axle and gross weight limitations adopted by the Department of Transportation under AS 19.10.060.

In addition, DMS administrates the oversize and overweight permit program within AS 44.33.020(25). Commercial vehicles that exceed the maximum allowable size, weight, and load limitations are able to legally travel over the highway system by obtaining special permits which are issued for a fee. DMS also regulates pilot cars under this statute.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Department should take immediate action to improve the employee morale of the Division of Measurement Standards (DMS).

As a result of interviews with 15 employees which is 28% of the current staff and the review of written communications (see Appendix A), it is obvious that a serious morale problem exists within DMS. The cause of the low employee morale does not appear to be centered around any single issue but is due to a build up of problems within the Weights and Measures Section over the past several years. Additional morale problems occurred with the transfer of the permit and weigh station functions to DMS.

During our review the Director of DMS and the Commissioner of the Department of Commerce and Economic Development recognized the severity of the morale problem and its potentially negative effect on program performance. Procedures, including employee interviews conducted by the Department's personnel officer, have been initiated to determine the causes of the low employee morale and to provide for possible solutions.

We encourage the Commissioner to continue these efforts to ensure improved employee morale and to avoid deterioration in program operations.

Recommendation No. 2

DMS should avoid situations that give the appearance of a conflict of interest.

We noted several situations during our review which at a minimum give the appearance of a conflict of interest to employees (see Appendix A, Question Nos. 1 and 2) and other persons outside the Division. The situations noted are as follows:

1. Complaints may be filed with DMS by consumers against mobile home dealers and/or manufacturers when a mobile home has warranty defects. The DMS Mobile Home Inspector acts as a mediator between the consumer and the mobile home dealer and/or manufacturer to resolve the complaint.

   During the period from July 1, 1981 to January 31, 1983, the Mobile Home Inspector received and mediated at least four complaints involving the mobile home dealership owned by his father. We understand the father has voluntarily dissolved his business as part of an out-of-court settlement with the State's Consumer Protection Section. However, other relatives own mobile home dealerships in the State.

2. During our review of contract procedures, we found that three contracts were awarded to a mobile home service and repair company. The DMS Mobile Home Inspector is a former employee of this business and his brother currently is employed there. The contracts were for remodeling of the current DMS offices, repair of a damaged weigh station, and construction of stairs at another weigh station. These contracts totalled $3,689 and required two informal competitive bid proposals, and awarded the contracts.

   In order to avoid the appearance of a conflict of interest, DMS should provide written procedures which would require an additional review of the bids by the Section Chief in these situations prior to awarding the contract. In addition, DMS should ensure that the person delegated the responsibility of awarding contracts is familiar with AS 37.05, Section 4, Uniform Purchasing and the State's contract procedures in Chapter 8 of the Purchasing Regulations.

3. A person convicted of price fixing in a retail gasoline business was hired by the Director in March, 1981, as a Weights and Measures Inspector I. The inspector's duties include inspection and testing of retail gasoline pumps.

   The Division of Personnel requires a written description of a misdemeanor or felony conviction with the State employment applications. The description is evaluated to determine if the applicant is suitable for the responsibilities of a particular position. The evaluation may include discussions with the probation officer, if any, and the hiring authority.

   In this case the hiring authority was the Director of DMS who had full knowledge of the employee's past, however, no written description of the conviction was in his personnel file.

   The employee was asked to resign and his termination was effective April 17, 1981. However, as an agency entrusted with the responsibility of regulating industry for the public's protection, DMS should exercise a greater degree of care in its hiring practices.

Recommendation No. 3

DMS should improve its budgeting and financial management.

Our review of the last three fiscal year budget requests and DMS financial records resulted in the following recommendations (see also Appendix A, Question Nos. 4 through 7).

A. DMS should ensure performance indicators in their budget requests are accurate.

The State budget request includes a form for each agency to report its performance activities of a past fiscal year based on predetermined measurements. In addition, the agency is to project its planned performance activities for the budget year. These performance indicators are one of the guidelines used to determine whether or not the amount of funds requested by the agency is reasonable.

In a review of the Fiscal Year 1983 and 1984 budget requests, we determined that some of the information reported by DMS for actual performance activities in Fiscal Years 1981 and 1982 was not accurate. The exceptions noted were as follows:

Performance Activity	Number per Budget Request	L/A Findings
Fiscal Year 1981		
Commodity items audited	699,485	This number represents the estimated population of commodity items from which a sample of items was audited. In comparison, the number reported for Fiscal Year 1982 was 12,577, which was the number of items audited that year rather than the estimated population of commodities.
Fiscal Year 1982		
Value of prepackaged goods found in violation	648,900	This number represents the estimated population of commodity items (see Fiscal Year 1981 above) which does not relate to dollar value. In contrast, DMS reported an estimated $66,500,000 for this performance activity for Fiscal Year 1981. However, the methods used to derive this dollar amount are questionable.

Performance Activity	Number per Budget Request	L/A Findings
Devices tested	16,500	The activity reports submitted to management showed a total of 11,276 devices. See Recommendation No. 7(C) concerning the accuracy and completeness of activity reports.
Mobile home inquiries/complaints received	100/150	The number of inquiries is unknown as no log or record is kept by DMS. The number of complaints based on a review of DMS records was actually 26 instead of 150. See Recommendation No. 5 relating to the mobile home program.

The budget instructions state that the agency should select only measures of activities for which data is already being collected or reasonably can be collected in the budget year. In addition, they state that once a useful measure has been identified it is useful to look at the same measure from year-to-year. DMS presented 17 performance activity measures in the last three fiscal year budgets of which only two have been reported all three years.

DMS should ensure information that is used, in part, to determine their level of funding is accurately and consistently presented in the budget requests.

B. DMS should prepare their fiscal year budgets in accordance with their anticipated spending plans.

The DMS Fiscal Year 1982 budget requested $96,900 for rental of State vehicles through DOTPF. Actual costs during 1982 totalled approximately $62,000, 36% less than budgeted. DMS staff explained that this budget line item was intentionally overbudgeted and the excess funds were used to cover expenditures in other underbudgeted line items within the contractual services category for which funding was harder to secure.

State budget requests should reflect anticipated spending to provide the Legislature with an accurate estimate of program needs.

C. DMS should ensure State funds are expended only for authorized purchases in accordance with the State Administrative Manual.

DMS purchased seafood in August, 1981, and September, 1982, totalling $100 and $548 respectively. The seafood was presented to the members of the Western Weights and Measures Conferences. The State Administrative Manual, Section 6820, prohibits expenditure of State funds for nonessential foodstuffs.

D. DMS should ensure appropriations are expended in accordance with law.

DMS received an appropriation totalling $33,200 through Chapter 50, SLA 1980 to "purchase scale testing equipment and to provide transportation to test scales for seafood processors in the Aleutian Islands and Western Alaska". Through a review of the related expenditures, we found $8,148 was expended for travel to areas other than the Aleutian Islands or Western Alaska.

In addition, DMS received another appropriation totalling $39,100 through Chapter 120, SLA 1980, to implement the Mobile Home Warranty Program enacted by Chapter 104, SLA 1980. We determined that $2,875 of these funds were expended on travel unrelated to the Mobile Home Warranty Program.

Recommendation No. 4

DMS should improve its personnel management.

During our review we noted personnel matters which may have contributed to the low employee morale (see Appendix A, Question Nos. 16 and 17). Our findings and recommendations are as follows:

A. DMS should update job descriptions and classifications as required by the State Personnel Rules.

We determined through a review of job descriptions and employee interviews that material changes have occurred in the duties and responsibilities of two classified positions since the formation of the Division.

A Weights and Measures Inspector IV position no longer has the supervisory authority over the inspectors. The employee's current responsibilities include only administrative and budgeting duties. The Mobile Home Inspector's duties now include supervision of the weigh stations in addition to mediating mobile home warranty complaints.

The State Personnel Rules, 2.04.2, require each appointing authority to report to the Division of Personnel, material changes in the duties and responsibilities of existing positions. Memorandums in the employees' personnel files indicate that these changes in duties and responsibilities are temporary, however, based on our review and discussions with employees, the changes appear to be more permanent in nature. We recognize the difficulties encountered by management in the transition of becoming a full division. However, the job descriptions and duties should now be changed to reflect the actual duties and responsibilities of these positions to decrease the confusion and misunderstandings within the Division.

B. DMS should utilize promotional eligibility lists to the extent possible.

In July, 1982, DMS assumed the responsibility of the weigh stations from the Department of Public Safety. Twenty-eight commercial vehicle inspectors were transferred from the Department of Public Safety to DMS, however, DMS did not receive a transfer of any supervisory personnel. In order to provide sufficient supervision of the weigh stations, DMS upgraded three of the commercial vehicle inspector positions from a range 12 to a range 15. The incumbents in two of the upgraded positions became supervisors while the other inspectors were not afforded the opportunity to interview for the positions.

The State Personnel Rules, 3.01.3, state where adequate competition exists among permanent employees qualified for promotion an examination may be announced on a promotional basis.

DMS should utilize the promotional eligibility list in future situations where sufficient competition warrants to ensure the selection of the most qualified person for the position and to afford equity in their hiring practices.

Recommendation No. 5

The Department should seek legislation to transfer the Mobile Home Warranty Program to the Consumer Protection Section of the Department of Law.

We reviewed the function of the Mobile Home Warranty Program and the activity from July, 1981, through March, 1983. Based on our review we noted the following:

1. The Mobile Home Inspector acts as a mediator between the consumer and the dealer and/or manufacturer in order to resolve complaints.

2. During Fiscal Year 1982, DMS received 26 mobile home warranty complaints.

3. As of March, 1983, DMS had received nine complaints in Fiscal Year 1983.

4. The Consumer Protection Section receives and investigates mobile home complaints from consumers. According to a memorandum dated March 17, 1983, from an assistant attorney general, the Consumer Protection Section had five complaints currently under investigation.

Since the Consumer Protection Section is the agency which the public looks to for resolution of consumer problems and the Mobile Home Warranty Program deals with consumer protection warranty laws, it appears that the program could be more efficiently and effectively administered by the Consumer Protection Section.

We understand the Department has signed a reimbursable services agreement with the Department of Law to transfer the Program. The Department of Law plans to draft and initiate the necessary legislative change.

Recommendation No. 6

The Department should seek removal of DMS staff as delegates to the National Conference of States on Building Codes and Standards.

The Director and the Mobile Home Inspector are delegates to the National Conference of States on Building Codes and Standards, Incorporated (NCSBCS). The assessment fee of the NCSBCS is $2,000 which DMS remits annually. During the period from May, 1981, through January, 1983, the Director attended five meetings related to NCSBCS which were held in Seattle, WA; Denver, CO; Boston, MA; Atlanta, GA; and New Orleans, LA. The Mobile Home Inspector also attended the meetings at Seattle and New Orleans. According to correspondence from NCSBCS, delegates must be active in and have responsibilities for building regulations.

DMS duties and responsibilities relating to building codes and standards were greatly diminished with the repeal of the State mobile home standards in September, 1980, and the enactment of the Mobile Home Warranty Program. Furthermore, current activity in the Mobile Home Warranty Program does not warrant involvement of DMS in NCSBCS.

Recommendation No. 7

DMS should improve its procedures to ensure compliance with statutory requirements.

We noted two areas of statutory compliance in which DMS should improve their procedures. Our recommendations are as follows:

A. DMS should provide sufficient documentation that office and field standards (official test devices) are verified in accordance with law.

We could not find sufficient documentation to determine if DMS is in compliance with AS 45.75.060 which requires verification of office and field standards on an annual basis.

In addition, we determined that it is a DMS policy not to verify field standards in remote locations on an annual basis due to the high transportation costs and infrequent use of the standards.

In order to provide sufficient documentation, DMS should develop a complete inventory of all office and field standards with identifying numbers (where possible); the location of the standard; and the last date of verification. DMS should obtain a current State property list and utilize their word processing equipment to aid in the development of the inventory. In addition, the test lab's recording sheets should include sufficient identifying information to determine exactly which standard was tested.

B. DMS should develop procedures to ensure that weight and measure devices are inspected and tested semiannually in accordance with law.

DMS does not have sufficient documentation to determine that they are in compliance with AS 45.75.080 which requires all weights and measures in commercial use to be inspected and tested at least semiannually or more often as the Director considers necessary. We were able to review inspection dates for 110 businesses located in Southeastern Alaska. Of those 110 businesses, 43 received annual inspections, 23 received semiannual inspections, and the remaining 44 did not have sufficient information to determine the frequency of inspections.

Alaska Statute 45.75.050 states the Director may promulgate regulations which exempt classes of devices from the semiannual inspection and testing required by AS 45.75.080. These regulations should include schedules fixing the frequency required for retests of the exempted class of devices.

DMS staff indicated that the high cost of transportation hinders their ability to comply with the required semiannual inspections. We recognize this problem. However, DMS should compile an inventory of devices including location and the last date of testing. This will provide management with data to determine the extent of compliance possible within budgetary constraints. We recommend the use of DMS word processing equipment, where practicable, to facilitate the compilation and maintenance of the inventory list. In addition, DMS should promulgate regulations to reflect any exemptions of classes of devices from the requirements of AS 45.75.080.

C. DMS should develop a uniform method for compilation of weights and measures verification activity data.

An inspector, in order to verify a weight or measure device, performs an inspection which is an evaluation of the physical characteristics of the device, and a test which is the actual test for accuracy through the use of standards, e.g. test weights. We noted inconsistencies in the methods used by inspectors to count the number of devices, and inspections and tests of those devices.

When the Chief of the Weights and Measures Section was asked to explain the correct method of accounting for these activities, the method described did not agree with the instructions he gave the staff in a memorandum dated August 17, 1982. The Chief stated that the memorandum was incorrect. We also noted that the method described in the memorandum would inflate the actual number of devices verified by the inspectors.

In addition to the inconsistencies in accounting for activities, we noted that monthly activity information is not organized in a manner to facilitate managerial use of data for planning and budgeting purposes. The Fiscal Year 1982 activity data was entered into the DMS word processing system. According to DMS staff, this data was used to calculate the total number of devices tested in Fiscal Year 1982 reported in the Fiscal Year 1984 budget request. However, we could not reconcile the recorded amount of devices totalling 11,276 to the reported number of 16,500 (see Recommendation No. 3A). The Fiscal Year 1983 activity data has not been entered into the word processing system.

DMS should develop procedures to ensure activity data is accounted for in a consistent manner and that data is complete and organized in a manner which facilitates use by management.

(Intentionally left blank)

APPENDIX

(Intentionally left blank)

APPENDIX A

DISPOSITION OF ALLEGATIONS ON DMS MANAGEMENT

Presented below are the allegations concerning the management of DMS along with our findings. We have not included questions for which there was no documentation to prove or disprove the allegation.

CONFLICT OF INTEREST

Question No. 1

Has DMS hired a mobile home inspector who is related to proprietors of mobile home dealerships in Anchorage?

Finding

We determined the Mobile Home Inspector is related to owners of mobile home dealerships in Anchorage (see Recommendation No. 2(1).

Question No. 2

Did the Director hire a person as a Weights and Measures Inspector who had been convicted for price fixing of gasoline prices in Anchorage?

Finding

A person convicted of a misdemeanor was hired by the Weights and Measures Section in March, 1981 (see Recommendation No. 2(3).

Question No. 3

Was the 1978 directive from DMS, to all fish processors and buyers, disallowing the use of hydraulic type scales in the best interests of the State?

Finding

In May, 1978, a legislative bill (House Bill No. 964) was introduced which would have required fish processors to use electronic hanging scales to determine the weight of fish sold. However, a directive was issued by the Weights and Measures Section (now DMS) before any action was taken on the legislation. The directive stated it had been determined that the hydraulic type scales would not hold the tolerances set by Title 3, Chapter 32 of the Alaska Administrative Code. According to the directive, hydraulic type scales were not to be utilized after January, 1980.

We discussed the issue with the Alaska manager of the Pacific Seafood Processors Association. He stated there had been a problem with the accuracy of hydraulic type scales. The processing companies in the organization were not happy about the idea of having to expend monies to replace their hydraulic scales. However, he believes it was in the best interests of the industry. In addition, we sent questionnaires to 78 seafood processors operating in Alaska. Of the 29 questionnaires returned, 9 did not believe the replacement of hydraulic type scales was necessary; 4 believed it was necessary; and 16 had no opinion.

FINANCIAL MANAGEMENT

Question No. 4

Has DMS reported accurate information for performance indicators in their budget requests?

Finding

In a review of the Fiscal Year 1983 and 1984 budget requests, we determined that some of the information reported by DMS for actual performance activities in Fiscal Years 1981 and 1982 was not accurate (see Recommendation No. 3A).

Question No. 5

Has DMS inflated the amount budgeted for State vehicle expense?

Finding

DMS budgeted and received funds in excess of 36% of actual State vehicle costs (see Recommendation No. 3B).

Question No. 6

Were State funds used to purchase seafood for members of the Western Weights and Measures Conference?

Finding

DMS purchased seafood in August, 1981, and September, 1982, totalling $100 and $548, respectively (see Recommendation No. 3C).

Question No. 7

Did DMS expend a 1979 appropriation for field test weights and a 1978 appropriation for commercial fishing scale inspections on the Alaska Peninsula and the Aleutian Chain in accordance with legislative intent?

Finding

We determined that DMS received an appropriation totalling $33,200 in Chapter 50, SLA 1980, to "purchase scale testing equipment and to provide transportation to test scales for seafood processors in the Aleutian Islands and Western Alaska". Through a review of the related expenditures we found that $8,148 was expended for travel to areas other than the Aleutian Islands or Western Alaska (see Recommendation No. 3D).

Question No. 8

Did DMS expend $10,000 to purchase food for the 1980 Western Weights and Measures Conference held in Juneau?

Finding

DMS budgeted and received $4,000 in Fiscal Year 1981 for the State's contribution to the costs of the 1980 Western Weights and Measures Conference held in Juneau. In August, 1980, DMS issued a warrant for the $4,000 to the Western Weights and Measures Conference. Additional costs of the Conference, according to DMS staff, were paid for by sources of funding other than the State.

Question No. 9

Did DMS rent facilities in Seattle for fishing scale inspections in Fiscal Years 1982 and 1983?

Finding

DMS budgeted $900 for Fiscal Year 1982 and $1,000 for Fiscal Year 1983 to rent facilities in Seattle to conduct fishing scale inspections and conduct a seminar. However, DMS did not rent any such facilities in either fiscal year. According to DMS staff, they could not find rental space in Seattle for either budgeted amounts, however, space was provided free of charge to the State by a scale company and seafood processor. DMS is not requesting funds in their Fiscal Year 1984 budget for rental facilities in Seattle.

Question No. 10

Have personal long-distance telephone calls been charged to the State?

Finding

We reviewed a sample of telephone charges occurring between July 1, 1982, and January 31, 1983. It was determined that internal control over long-distance telephone calls was nonexistent prior to January, 1983.

Effective August, 1979, the Department policy and procedures manual requires a record be kept of all long-distance telephone calls indicating date, number, person contacted, and purpose of the call. The recorded telephone calls are to be reconciled to the monthly billing. This procedure was implemented by DMS in January, 1983.

Question No. 11

Was DMS appropriated $40,000 to purchase electric meter test equipment which actually cost $5,000?

Finding

DMS received a capital appropriation totalling $49,500 through Chapter 25, SLA 1982, which was effective August 1, 1982. Through a review of the capital budget request submitted by DMS and discussions with the staff, we determined that approximately $36,000 of the $49,500 was for the purchase of new electric meter test equipment and the remaining funds were to be used for the purchase of a mass comparator with a 500 pound capacity.

As of December 31, 1982, DMS had expended $14,962 of the appropriation. Instead of purchasing new electric meter test equipment, DMS purchased used equipment costing $5,000. DMS staff stated they knew about the used equipment when they requested the $36,000 but were not sure it would still be available when DMS received the appropriation. Therefore, DMS budgeted and requested the $36,000 rather than the $5,000. In addition, DMS has purchased field weight standards costing $9,692 to be stored mainly in the Aleutian Islands and Bristol Bay areas to facilitate the testing of fishing scales in those areas. Also, DMS has encumbered $9,535 for the purchase of a mass comparator with a capacity of 5 to 60 pounds for the Juneau laboratory.

Question No. 12

What was the cost of the truck mounted liquid petroleum prover purchased by DMS and why were funds budgeted for its purchase in both Fiscal Years 1982 and 1983?

Finding

DMS requested $37,500 in their Fiscal Year 1982 budget for the purchase of a new prover. However, the Legislature did not fund the full request of $41,000 for equipment purchases but instead only funded $3,400 making it impossible for DMS to purchase the prover in Fiscal Year 1982. Again in Fiscal Year 1983, DMS requested funds to purchase a prover. The amount requested decreased to $28,700 due to instructions from the Department to pare down the request. As a result, DMS could not purchase a new prover but instead purchased a used prover for the $18,750.

Question No. 13

Did DMS properly expend funds for the purchase of office equipment and furniture in Fiscal Year 1983?

Finding

As of December 31, 1982, DMS had expended $13,944 on various types of office equipment and furniture, including desks, chairs, bookcases, transcribers, tape recorders, etc. These expenditures have been charged against the $28,700 operating appropriation allocation for equipment, which was requested for the purchase of the truck mounted prover discussed in Question No. 12 and an additional $7,800 transferred from the Department of Public Safety with the permit and weigh station functions.

We conclude that DMS has properly expended funds to purchase office equipment and furniture.

Question No. 14

Has DMS equipped a weights and measures testing laboratory in Juneau in addition to the one maintained in Anchorage?

Finding

DMS has either purchased or transferred from the Anchorage metrology laboratory equipment totalling $19,220 for the Juneau laboratory. This equipment will be used to verify the DMS field standards and the standards (test weights) of the fishing and construction industries used in Southeastern Alaska. We conclude that the use of this equipment will result in a cost savings to the State and the industries due to the elimination of costly transportation expenses to transport the standards to Anchorage for verification.

Question No. 15

Has DMS properly budgeted for program revenues?

Finding

DMS budgeted program revenue for Fiscal Years 1981 and 1982 totalling $10,100 and $11,300, respectively. The revenue was to be collected from processors and contractors who requested scale inspections which had not been scheduled by DMS. Actual revenue collected for reimbursement of per diem, transportation, and/or mileage totalled $10,223 in Fiscal Year 1981 and $2,805 in Fiscal Year 1982 leaving an unrealized balance of $8,495. DMS budgeted $12,300 in program revenue for Fiscal Year 1983 none of which has been collected.

DMS staff stated they had discontinued the policy to request reimbursement for unscheduled scale inspections and would not be collecting the program revenue budgeted for Fiscal Year 1983. The Fiscal Year 1984 budget request reflects a decrease resulting from the change in policy.

PERSONNEL MANAGEMENT

Question No. 16

Has a Weights and Measures Inspector IV and the Mobile Home Inspector been performing duties and responsibilities different from those described on their job descriptions and class specifications?

Finding

We determined that material changes have occurred in the duties and responsibilities of these two positions since the formation of the Division (see Recommendation No. 4A).

Question No. 17

Did DMS select supervisors of the weigh stations in accordance with the State Personnel Rules?

Finding

The selection of the weigh station supervisors was in compliance with the State Personnel Rules. However, we recommend DMS utilize the promotional eligibility list in future situations where sufficient competition warrants to ensure the selection of the most qualified person for the position and to afford equity in hiring practices (see Recommendation No. 4B).

Question No. 18

Did DMS comply with the State hiring procedures in the selection of the Chiefs of the Weights and Measures Section and the Permits and Weigh Stations Section?

Finding

We reviewed the personnel records and determined that these positions were filled in accordance with the State Personnel Rules. In addition, the Office of the Ombudsman reviewed the selection of the Chief of the Permits and Weigh Stations Section. In a letter dated January 23, 1983, the Ombudsman concluded that the person hired was within the top five available eligibles, as required by Personnel Rule 5.02.2. None of the other persons in the top five were considered.

The Ombudsman stated that even though the Personnel Rules do not require consideration of all persons within the top five, the Department would benefit by adopting a policy which requires the appointing officers to consider those persons. Such a practice would improve the quality of appointments by bringing the best qualified applicant to the attention of the appointing officer.

Question No. 19

Was a Weights and Measures Inspector IV position held open approximately one year while the Division attempted to qualify a staff member for the position?

Finding

A Weights and Measures Inspector IV position was vacant from May to December, 1980. On December 8, 1980, a Weights and Measures Inspector trainee was promoted to the Weights and Measures Inspector IV position. The employee's application had been rewritten to include work experience not previously included on his application submitted for the trainee position.

Question No. 20

Has DMS complied with the State Personnel Rules and the State Administrative Manual concerning employee moving expenses?

Finding

In November, 1981, a Weights and Measures Inspector I was promoted and transferred from Anchorage to Kenai to operate the field office. He accepted the promotion with the understanding that his moving costs could not be reimbursed by the State due to the agency's fiscal constraints. Then in July, 1982, DMS promoted a Weights and Measures Inspector III to Chief of Weights and Measures Section. DMS transferred him and his family from Juneau to Anchorage reimbursing all moving expenses.

According to the Deputy Director of the Division of Personnel, an agency may offer a promotional transfer without reimbursement of moving expenses if the agency has fiscal constraints and/or the position could be filled by advertising in the area where the position is vacant.

We conclude that DMS has complied with State Personnel Rules and procedures concerning reimbursement of employee moving expenses.

Question No. 21

Is overtime pay properly approved, supported, and recorded in the State accounting records?

Finding

We reviewed expenditures for overtime pay for Fiscal Years 1981, 1982, and 1983 (through January 31, 1983). Based on the results of our test, we determined that overtime pay is properly approved, supported, and recorded in the accounting records.

PROGRAM MANAGEMENT

Question No. 22

Is the Division's participation in the Western Weights and Measures Conference (WWMC) and the National Conference of States on Building Codes and Standards, Incorporated (NCSBCS) justifiable in terms of economy, efficiency, and effectiveness?

Finding

The participation by the Director and staff in the WWMC is directly related to their duties and responsibilities under AS 45.75, Weights and Measures Act. However, the duties and responsibilities of DMS relating to building codes and standards were greatly diminished in 1980 with the enactment of the Mobile Home Warranty Program. Furthermore, implementation of Recommendation No. 5 which recommends the transfer of the Program to the Consumer Protection Section, would remove all responsibilities relating to the building codes and standards. Therefore, we recommend the Department seek removal of DMS staff as delegates to the NCSBCS (see Recommendation No. 6).

Question No. 23

Have actions taken by the Mobile Home Inspector, relating to an investigation in 1982, resulted in a class action suit being filed against the State, the Director of DMS, and the Mobile Home Inspector?

Finding

Through inquiries of the Alaska Court System and the Office of the Attorney General, we determined that no suit has been filed naming the State, the Director of DMS, or the Mobile Home Inspector as defendants.

Question No. 24

Is DMS discontinuing safety inspections of commercial vehicles in March, 1983?

Finding

On July 15, 1982, the permit and weigh station functions of the Bureau of Vehicle Maintenance, Department of Public Safety, were transferred to DMS.

(Intentionally left blank)

The Legislature did not include the transfer of authority for safety enforcement. In order to fulfill the requirements of a federal contract for a safety demonstration project, DMS received a delegation of authority for safety enforcement from the Alaska Transportation Commission which was effective July 1, 1982. This allowed DMS to continue the safety inspections through the completion date of the federal contract, March 11, 1983.

This issue was reviewed by the Office of the Ombudsman and a letter report was issued January 28, 1983. The Ombudsman concluded that the statement which alleges the Department of Commerce is not fulfilling its statutory responsibility for enforcing commercial safety standards is "unsupported". Further, the Department does not have statutory responsibility for commercial safety enforcement. We concur with this conclusion of the Office of the Ombudsman.

Presently, the Director of DMS is working with the Commissioner of the Department of Commerce and Economic Development to provide alternative plans for a commercial vehicle safety program.

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE &
ECONOMIC DEVELOPMENT

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

OFFICE OF THE COMMISSIONER

June 10, 1983

Gerald L. Wilkerson, Legislative Auditor
Legislative Affairs Agency
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Recommendation Number 1

The Department should take immediate action to improve the employee morale of the Division of Measurement Standards (DMS).

RESPONSE:

The Division of Measurement Standards acknowledges that some morale problems existed during the period of the audit and since the formation of the Division. Positive steps have been taken by both the Department and the Division to respond to the problems, to expand the lines of communications, and to ensure addressing individual concerns. The response to these increased efforts have been very positive and progress will be closely monitored to ensure achieving desired results.

The Division does not agree that the cause was a build up of problems that existed within the Weights and Measures Section over the past several years, with the exception of isolated personnel problems, the specific items identified by the Division's employees are of recent origin and the approach has been to provide solutions to these.

It may also be noted that only two employee grievances were filed in Weights and Measures in the five years preceding the transition to Division status.

Recommendation Number 2

DMS should avoid situations that give the appearance of a conflict of interest.

1. During the period from July 1, 1981 to January 21, 1983, the mobile home inspector received and mediated at least four

08-H2LH

complaints involving the mobile home dealership owned by his father. We understand the father has voluntarily dissolved his business as part of an out-of-court settlement with the State's Consumer Protection Section. However, other relatives own mobile home dealerships in the State.

RESPONSE:

1. The mobile home warranty program has been transferred to the Department of Law, office of Consumer Protection.

2. During our review of contract procedures, we found that three contracts were awarded to a mobile home service and repair company. The DMS Mobile Home Inspector is a former employee of this business and his brother currently is employed there.

RESPONSE:

2. During the period when the contracts were awarded, neither the Mobile Home Inspector nor his brother were employed by the company providing the service.

Recommendation Number 3

DMS should improve its budgeting and financial management.

A. DMS should ensure performance indicators in their budget requests are accurate.

In a review of the fiscal year 1983 and 1984 budget requests, we determined that some of the information reported by DMS for actual performance activities in fiscal years 1981 and 1982 was not accurate. The exceptions noted were as follows:

Commodity items audited
Value of prepackaged goods found in violation
Devices tested

The budget instructions state that the agency should select only measures of activities for which data is already being collected or reasonably can be collected in the budget year. In addition, they state that once a useful measure has been identified it is useful to look at the same measure from year-to-year.

RESPONSE:

A. Some of the confusion associated with the figures are based on lack of understanding of the methods used to document activity and the value of certain information. The following is offered to clarify the information:

In conducting audits of commodities offered for sale, a representative sample of the total population is selected. The selected items are tested to ensure conformance to specified standards. The size of the sample is determined by the size of the estimated total population and the requirement to test sufficient items to achieve statistical accuracy for the inferences made.

Three units of measurement are generally used for documenting activity impact:

Inspections - The number of individual commodity items actually tested for compliance with standards.
Audits - The number of items in the total population.
Value - The cost of the individual items.

The inspection is a measure of the weights and measures officials productive activity. The audit defines the population available for consumption and the value denotes the dollar impact of the commodities. By considering all of these factors, we may analyze a range of management factors from the employee's productivity to their impact on the marketplace.

The misunderstanding stems from typographical errors in the FY 84 budget request. Correct performance indicator titles should be:

1. Commodity items tested
1. Commodity items audited

Devices tested:

Actual count of devices tested was 16,519. See response to recommendation 7(c).

As defined in the budget instructions, the purpose of a performance indicator is to "identify the extent of major BRU activities and functions." As program requirements and emphasis have changed and we have increased the availability of quantifiable management information, we have attempted to select indicators that would represent measures of both activity and economic impact. The intent was to provide a more comprehensive indication of the Division's involvement in the regulatory process. It has been the Division's goal to develop quantifiable measurement indicators that permit analysis of all activities.

B. DMS should prepare their fiscal year budgets in accordance with the instructions provided by the Office of the Governor.

The State budget instructions require agencies to report transfers between line items with an expenditure category on a specific form provided. This allows the agency to develop a budget which reflects actual anticipated spending.

RESPONSE:

B. The Division of Measurement Standards will prepare all future budget requests in accordance with the instructions provided by the Office of the Governor.

DMS should ensure appropriations are expended in accordance with law.

DMS received an appropriation totaling $33,200 through Chapter 50, SLA 1980 to "purchase scale testing equipment and to provide transportation to test scales for seafood processors in the Aleutian Islands and Western Alaska." Through a review of the related expenditures, we found $8,148 was expended for travel to areas other than the Aleutian Islands or Western Alaska.

In addition, DMS received another appropriation totaling $39,100 through Chapter 120, SLA 1980, to implement the mobile home warranty program enacted by Chapter 104, SLA 1980. We determined that $2,875 of these funds were expended on travel unrelated to the mobile home warranty program.

RESPONSE:

D. The audit team did not identify the specific trips that they considered inappropriate, therefore, a general explanation is offered in an attempt to clear up some possible misunderstandings.

Fish buying scales are a highly mobile device that are moved from the factory to the scale repair facility, to various locations throughout the state, depending on specific requirements and appropriate seasons. Every effort is made by the Division to test the maximum number of devices at the most economical cost. An example of device mobility is a particular scale may be used in Seward during the herring season and shipped to the Aleutian Chain for the salmon season. If we can test the device in Seward before it is shipped to the Aleutian Chain, the cost for the inspector's travel will be significantly lower. Another example of a very successful method is the Seattle inspection program. The fishing industry in the Aleutian Chain and Western Alaska normally ship all their scales to Seattle for rebuilding every two years. The Division sends an inspector to Seattle whenever the number of available devices warrant the expenditure, to test and certify fish buying scales at company headquarters and scale repair facilities. By utilizing this procedure, the devices are tested prior to being

shipped to Alaska and being placed into service. This program has permitted the Division to not only increase the number of devices tested prior to their being used in commercial transactions throughout the state and has reduced the cost to the industries involved, but has allowed us to increase the number of devices tested and certified that are used in the remote areas of the Aleutian Chain and Western Alaska.

Some of the trips to Seattle were charged to this supplemental account because it was more economical to test the devices there rather than wait until they had been shipped to the Aleutian Chain. We felt that the intent of the appropriation was to ensure that accurate devices were being used and our effort was directed toward testing the devices where ever they could be located. Some administrative trips were charged to both appropriations to coordinate program requirements.

Recommendation Number 4

DMS should improve its personnel management.

During our review we noted personnel matters which may have contributed to the low employee morale.

A. DMS should update job descriptions and classifications as required by the State personnel rules.

RESPONSE:

A. All the Division employees P-402's were updated prior to the period the audit was conducted. As noted, two personnel were assigned to special projects during the transition period when the Division was in the process of establishing the structure necessary to respond to its basic management requirements. It must be kept in mind that when the permits and weigh station program was transferred from the Department of Public Safety to the Department of Commerce and Economic Development, the management and administrative support staff was not included. With the establishment of the Division of Measurement Standards to consolidate the weights and measures and permits and weigh station functions, both the management and the support staff had to be recruited and trained while continuing the daily activities required by statute. This necessitated the utilization of existing personnel to perform diverse duties to ensure program continuity. This transition period is largely complete and the organizational structure has been redefined to be responsive to program needs. P-402's will be updated to reflect actual duties being performed when the Division structure has been clearly defined and those recently hired into supervisory positions are fully trained.

It should be noted that the opening statement referred to two instances in the five year period considered. It was also noted that these are not violations of the personnel rules. We find the negative implication of the statement to be unjustified.

Recommendation Number 7

DMS should improve its procedures to ensure compliance with statutory requirements.

We noted two areas of statutory compliance in which DMS should improve their procedures.

A. DMS should provide sufficient documentation that office and field standards (official test devices) are verified in accordance with law.

RESPONSE:

A. The Division does have the documentation necessary to identify its inventory of office and field standards and to determine date of verification. To ensure more convenient access to the information, the word processing equipment will be used.

B. DMS should develop procedures to ensure that weight and measure devices are inspected and tested semiannually in accordance with law.

DMS staff indicated that the high cost of transportation hinders their ability to comply with the required semiannual inspections. We recognize this problem. However, DMS should compile an inventory of devices including location and the last date of testing. This will provide management with data to determine the extent of compliance possible within budgetary constraints. We recommend the use of DMS word processing equipment, where practicable, to facilitate the compilation and maintenance of the inventory list.

RESPONSE:

B. This is already being accomplished using manual records. The word processing equipment will be utilized to the maximum extent possible with current administrative staff.

C. DMS should develop a uniform method for compilation of weights and measures verification activity data.

An inspector, in order to verify a weight or measure device performs an inspection which is an evaluation of the physical characteristics of the device, and a test which is the actual test for accuracy through the use of standards, e.g. test weights. We noted inconsistencies in the methods used by inspectors to count the number of devices, and inspections and tests of those devices.

In addition to the inconsistencies in accounting for activities, we noted that monthly activity information is not organized in a manner to facilitate managerial use of data for planning and budgeting purposes. The fiscal year 1982 activity data was entered into the DMS word processing system. According to DMS staff, this data was used to calculate the total number of devices tested in fiscal year 1982 reported in the fiscal year 1984 budget request. However, we could not reconcile the recorded amount of devices totaling 11,276 to the reported number of 16,500.

DMS should develop procedures to ensure activity data is accounted for in a consistent manner and that data is complete and organized in a manner which facilitates use by management.

RESPONSE:

C. A management information system is in place. The annual reports are used for management planning. These reports are developed by counting the individual field test reports.

The monthly reports are utilized by the individual supervisors to compare actual to scheduled activities. A format is being developed that will permit entering the data from each field test report into the word processing system. Device and activity data will be maintained on this system, limited only by availability of administrative staff time.

There is not a point of confusion in where to count various types of field activity. As indicated by our verification of field test reports, the inspection activity and the testing activity are accounted for separately. An actual count of the reports provided the following activity for FY 82:

Device inspections - 14,200
Device tests - 16,519

As indicated previously, management decisions and budget requests are prepared based on activity data documented on field test reports. Additionally, every reasonable effort is made to verify data prior to drawing conclusions. We afforded the audit team this same opportunity by offering the field test reports to them to verify the data contained in the budget request. This offer was repeated during the audit team's exit briefing and the records are available if verification of accuracy is a concern. We do not feel that drawing conclusions from unverified data is justified. To reemphasize the activity indicator as reported in the FY 84 budget request of 16,500 devices tested, was reverified by the Division by individually counting the field test reports on May 17, 18, and 19, 1983.

APPENDIX A
DISPOSITION OF ALLEGATIONS ON DMS MANAGEMENT

Question Number 1

Has DMS hired a Mobile Home Inspector who is related to proprietors of mobile home dealerships in Anchorage:

Finding:

We determined the Mobile Home Inspector is related to owners of mobile home dealerships in Anchorage.

RESPONSE:
Relationship is acknowledged (see response to recommendation number 2).

Question Number 3

Was the 1978 directive from DMS. to all fish processors and buyers, disallowing the use of hydraulic type scales in the best interests of the State?

Finding:

In May, 1978, a legislative bill (House Bill 964) was introduced which would have required fish processors to use electronic hanging scales to determine the weight of fish sold. However, a directive was issued by the Weights and Measures Section (now DMS) before any action was taken on the legislation. The directive stated it had been determined that the hydraulic type scales would not hold the tolerances set by Title 3, Chapter 32 of the Alaska Administrative Code. According to the directive, hydraulic type scales were not to be utilized after January, 1980.

We discussed the issue with the Alaska manager of the Pacific Seafood Processors Association. He stated there had been a problem with the accuracy of hydraulic type scales. The processing companies in the organization were not happy about the idea of having to expend monies to replace their hydraulic scales. However, he believes it was in the best interests of the industry. In addition, we sent questionnaires to 78 seafood processors operating in Alaska. Of the 29 questionnaires returned, 9 did not believe the replacement of hydraulic type scales was necessary; 4 believed it was necessary; and 16 had no opinion.

RESPONSE:

The issue that was not addressed by the audit team was whether the device was legal. This device is not legal for use for purchasing fish.

Question Number 4

Has DMS reported accurate information for performance indicators in their budget requests?

Finding:

In a review of the fiscal year 1983 and 1984 budget requests, we determined that some of the information reported by DMS for actual performance activities in fiscal years 1981 and 1982 was not accurate.

RESPONSE:

We do not agree that the information was not accurate (see response to recommendation number 3).

Question Number 10

Have personal long distance telephone calls been charged to the State?

Finding:

We reviewed a sample of telephone charges occurring between July 1, 1982 and January 31, 1983. It was determined that internal control over long distance telephone calls was nonexistent prior to January, 1983.

RESPONSE:

Long distance telephone logs are now being maintained.

Question Number 18

Did DMS comply with the State hiring procedures in the selection of the Chief of the Weights and Measures Section and the Permits and Weigh Stations Section?

Finding:

We reviewed the personnel records and determined that these positions were filled in accordance with the State personnel rules. In addition, the Office of the Ombudsman reviewed the selection of the Chief of the Permits and Weigh Stations Section. In a letter dated January 28, 1983, the Ombudsman concluded that the person hired was within the top five available eligibles, as required by personnel rule 5.02.2. None of the other persons in the top five were considered.

The Ombudsman stated that even though the personnel rules do not require consideration of all persons within the top five, the Department would benefit by adopting a policy which requires the

appointing officers to consider those persons. Such a practice would improve the quality of appointments by bringing the best qualified applicant to the attention of the appointing officer.

RESPONSE:

The finding that none of the other people in the top five were considered is incorrect. All available eligibles were interviewed and considered for both positions.

CONCLUSION:

Due to the public nature of the final audit report and the possibility that the statement would be construed to lend some validity to unspecified allegations, the Department feels that the opening statement to Appendix A should be limited to: "Presented below are the allegations concerning the management of DMS along with our findings."

Sincerely,

Richard A. Lyon
Commissioner

RAL:JS:cw

THE MOBILE HOME WARRANTY ACT AND CONSUMER PROBLEMS WITH MOBILE HOMES

A Report by the Consumer Protection Section,
Department of Law,
February 4, 1984

Introduction

Mobile homes have become a major housing alternative for Alaskans, one which often involves considerable expense. Ranging in price from $10,000 to well over $100,000 (not including land), mobile homes in the state sold for an average of $40,263 in mid-1984, as reported by the Alaska Housing Finance Corporation. Often mobile homes are purchased by consumers who lack the income needed for conventional housing and who are less able to protect themselves from defective products and unfair sales techniques. Yet unlike conventional housing, mobile home construction is not subject to regulation or inspection by local or state authorities, nor is the sale of mobile homes subject to professional licensing requirements.

Apart from the Department of Law's general enforcement powers against unfair or deceptive trade practices, state efforts to prevent and remedy the widespread problems confronted by mobile home purchasers rest solely on the mobile home warranty act, AS 45.30. The Consumer Protection Section's recent experience in administering this act shows that defects in mobile homes and consumers' problems in obtaining corrective action continue to be frequent occurrences and continue to demand significant efforts on the part of the section.

Background of the Mobile Home Warranty Law

In 1980, the Legislature acted to ensure that consumers receive adequate warranty protection when they purchase mobile homes. (Ch. 104, SLA 1980, amending AS 45.30.) This statute requires new mobile homes to be covered by a one-year written warranty against substantial defects in materials and workmanship. One important provision of the mandated warranty is that the dealer and manufacturer are each fully responsible for correcting defects, so that the consumer is not shuttled back and forth with no one taking responsibility. Another important provision is that the warranty must cover not only the structure of the mobile home but also all mechanical systems, equipment, and appliances included when it is sold.

The statute also establishes a method to enforce compliance. Written notices of violations may be issued by a

Backup - Consumer Protection section - Dept. of Law

ALASKA LEGISLATURE COMMITTEE FILES 1985-1986 8672
4210 SLAB HB 148 - HB 168 1090

state inspector, and the enforcement agency may hold administrative hearings on alleged violations. When it is determined, following such a hearing, that a dealer or manufacturer has violated a provision of the law, the violator may be ordered to take corrective action. Moreover, in appropriate cases the manufacturer's $35,000 performance bond may be forfeited and the proceeds distributed to the injured parties.

The 1980 mobile home legislation did more than establish state warranty requirements; it also repealed existing portions of AS 45.30 which regulated mobile home construction standards. The reason for this repeal was not, it must be emphasized, a belief that such regulation was unnecessary. Rather, it was simply a matter of federal preemption. In 1976 the U.S. Department of Housing and Urban Development (HUD) had taken over the regulation of mobile home construction throughout the country. This meant the preemption of Alaska's construction standards program.

The HUD program, however, did not come close to eliminating many kinds of serious problems that frequently afflict purchasers of mobile homes. As pointed out in a 1980 Federal Trade Commission study of mobile home warranty problems, the scope of the HUD standards is limited and the agency's remedial powers when defects occur are "severely circumscribed." The construction standards, which cover only basic components and focus on safety concerns, do not protect consumers from defects in appliances, cabinetry, carpeting, ceiling tile or wall paneling, floor coverings, and so on; nor do they address damage occurring during transportation or set up. Equally important, inspection is required of a mobile home only once -- at any point -- during the manufacturing process, so that defects may readily occur which are not detected. Indeed, HUD has acknowledged that "no mobile home is completely without failures to conform to the Federal standards." Finally, once a mobile home has been purchased by a consumer, the only defects which HUD can require the manufacturer to correct are those which present an unreasonable risk of injury or death.

Thus, when the Alaska Legislature passed its mobile home warranty act, joining seventeen other states at that time with similar legislation, it did so in recognition of the need to fill a major gap in the legal protection provided to consumers. The House committee which recommended passage of the act had before it a report from the Attorney General's Consumer Protection Section analyzing complaints within the past two years from some 68 consumers having problems with mobile homes. In addition to multitudinous defects reported in interior construction, exterior construction. plumbing, appliances, electrical systems, and plumbing systems, a common thread running through the consumers'

experience was a lack of response from dealers and manufacturers to their complaints. Long delays in merely getting someone to look at the problem were common, and in many cases the defects remained uncorrected even after repeated attempts at repair. Experience since that time amply demonstrates the continuing importance of the warranty law.

Recent Consumer Protection Section Experience with Mobile Home Problems

Since the enforcement of the mobile home warranty act was administratively transferred to the Consumer Protection Section in May of 1983, the section has handled 65 complaints and has responded to over 96 inquiries and requests for assistance. Although most consumer mobile home complaints involve several individual problems that the consumer has experienced, the major focus of complaints received during the past year and a half may be summarized as follows:

1.	Defects in materials and workmanship	27%
2.	Misrepresentative sales techniques	46%
3.	Shoddy repair services	16%
4.	Mobile home park and other problems	11%

Specific mobile home related complaints include but are not limited to the following:

1. Doors and windows that will not open or close properly.
2. Cracked sinks and bathtubs.
3. Overly expensive to operate or inadequate heating sytems.
4. Excessively high interior humidity
5. Buckling walls and separating components.
6. Misrepresentations about the ability to qualify for a loan, or about the outcome or penalty resulting from not qualifying for or not obtaining a loan to purchase a mobile home.
7. Settling of mobile homes resulting from inadequate or improper setup procedures.
8. Numerous failed attempts to repair mobile home defects by unqualified service persons.
9. Misrepresentations of the authority of a salesperson.
10. Failure to deliver title.

Although a report regarding consumer problems with their mobile homes must be brief, because as one consumer wrote to Consumer Protection just last week "there isn't enough paper in Alaska to state the dissatisfaction we've experienced," a few specific examples will help provide a clear understanding of the seriousness of consumer mobile home problems.

During the past year, three purchasers of a particular brand of mobile home complained to the Consumer Protection Section that the roofs on the mobile homes were leaking severely and that they had been unable to obtain a remedy from either the manufacturer or dealer. The consumer found that the dealer had "disappeared" and the manufacturer's response was that the consumers needed to shovel their roofs more adequately in the winter time (despite the dealer's original claim that their roofs were specially designed for "Alaska conditions"). Yet only a minor amount of snow had accumulated on them, and moreover the manufacturer's own "homeowners manual" stated that the roofs should not be climbed or walked on. Although the manufacturer's warranty had expired on two of the mobile homes, through mediation and negotiation the Consumer Protection Section obtained for the consumers new roofs and a one year warranty from the manufacturer that the structure of the roof would remain free from defects.

After resolution of the complaints one of the consumers confided that had the problem not been resolved he would have had to leave his home. It should be pointed out that since February of 1984, 56 mobile homes purchased between 1980 and 1984 were repossessed. According to AHFC personnel many of these homes were abandoned by their owners. With a 17% increase in the cost of a new mobile home between 1983 and 1985 and a slight decrease in the average monthly income of a new mobile home purchaser during the same period, it has become increasingly difficult for mobile home consumers to bear the burden of major defects such as these.

Many consumer complaints have involved the formation of large amounts of condensation on interior surfaces of their mobile homes. In many instances this leads to wet and ruined walls and carpets; in one case a consumer reported mushrooms growing on the floor. Homes inspected by this section have been found to possess warped ceilings, floors and walls. In some cases permanent fixtures such as bathtubs and toilet bowls have begun to sink through the floors. Often manufacturers respond to these problems with allegations that the consumer is improperly ventilating or utilizing the mobile home.

In other recent complaints consumers stated that they ordered mobile homes with particular features and amenities to be included by the manufacturer. They found, however, that when the mobile homes arrived many of these features were not included with the homes. Although the purchase agreements clearly stated that these items would be included, the dealer claimed that the consumer had agreed to accept the home without them. One consumer stated that the dealer kept telling him that he would "take care of it"; the outcome is pending. Consumer Protection records show

that many consumers are promised features or amenities with their mobile homes and then find those features missing upon delivery. They also find that the homes are many times improperly installed and in fact the homes themselves have been damaged in transit or were not properly constructed in the first place.

During the past two and one half years the Consumer Protection Section has recovered over $132,000 for consumers who experienced defects in their mobile homes or mobile home transactions.

BUSINESS RESPONSE INFORMATION

Consumer Protection Section

The Consumer Protection Section of the Attorney General's Office enforces Alaska's Unfair Trade Practices and Consumer Protection laws, which laws benefit both individual consumers and business people. One of the functions of this office is to handle consumer complaints.

Consumer Complaints

Any consumer who believes that he/she has been subjected to an unfair or deceptive trade practice may file a complaint with this state office. A staff member initially reviews all complaints to determine whether there is evidence of a clear, serious violation of law. If so, the complaint will go to a staff attorney. Otherwise, we will handle the complaint in our informal complaint resolution procedure.

We do not attempt to prejudge the merits of complaints by either refusing to handle some complaints or by assuming that one or the other side is "right." It would be impossible, as well as unfair, to make any assumptions on so little information. We do screen complaints to verify that we have jurisdiction to handle the subject matter of the complaint.

The Complaint Resolution Process

Our complaint handling process is informal and relies upon cooperation from all parties. Whenever a consumer files a complaint against you, we will send the complaint to you as a respondent. By doing so, we are requesting your cooperation in clarifying the situation and resolving the problem. We cannot force you as a respondent to offer a settlement, nor can we force a settlement on either party.

We recognize that there are two sides to every story, and we listen to both sides. We know that sometimes consumer complaints are inaccurate or unreasonable. The fact that both sides may be angry does not make either one of them "right."

By our mediation efforts, we hope to give both sides to a consumer complaint a chance to better understand each other and, once understood, resolve their problem. Much of the time, this process yields satisfactory results for both sides.

How to Respond to a Complaint

We request that you respond, in writing, to the complaint. Written responses help you give us all the details we need, avoid misunderstandings, and help us work faster. (We can handle several matters in the time it takes to do an interview, and somebody still has to write all the details.)

To enable both this office and the consumer to better understand your position, we ask that you investigate the complaint; for instance, talk to the employees involved and check your business records. We request that you respond with a discussion of the facts of this complaint and any figures that might be necessary to better understand the situation. Often, it is important to include a statement of your standard business procedure so that there is a context in which to view this particular complaint. Finally, please include a statement of your position on this consumer complaint, as well as any suggestions or plans you may have for resolving this matter.

What Happens When Mediation Fails

If mediation fails (or if you fail to respond), we will review the information we obtained to determine whether or not there is a pattern or serious indication of deceptive practices which justifies formal action by the state. Formal actions include conducting a formal investigation or, in the face of serious violations of the law, filing a lawsuit seeking an injunction to stop the disputed practice and to seek restitution for consumers and civil penalties.

If we determine that formal state action is not appropriate, we will usually advise consumers that they have the right to proceed privately through small claims court or a private attorney if they so choose. The fact that the state does not take formal action does not necessarily reflect on the merit of either party's position in this matter.

All complaint files are kept for future reference in case other complaints against the business are received. This way we can keep track of deceptive or fraudulent patterns which may begin to evolve. However, unless we file formal legal action in court, all complaints are confidential. We do not perform the function of a Better Business Bureau by releasing complaint information about particular businesses.

CONSUMER INFO

CONSUMER PROTECTION SECTION

The Consumer Protection Section of the Attorney General's office enforces Alaska's Unfair Trade Practices and Consumer Protection laws, which laws benefit both individual consumers and business people. One of the functions of this office is to hand' consumer complaints.

WHY WE NEED YOUR COMPLAINT IN WRITING

Consumer Protection is here to serve you. We can do a better job and process your complaint faster if you help us. We need to have your complaint in writing because written complaints help you give us all the details we need and help us work faster than with initial interviews. (We can handle several complaints in the time it takes to do an interview, and somebody still has to write out all the details.) If we need more details after reading your complaint, we will contact you.

If you aren't sure whether you have a complaint, go ahead and fill out one of our complaint forms anyway. If you don't have a complaint, we will contact you promptly. Usually you do have a complaint or you wouldn't be here.

WHAT WE DO WITH YOUR COMPLAINT

A staff member initially reviews all complaints to determine whether there is evidence of a clear, serious violation of law. If so, the complaint will go to a staff attorney. Otherwise, we will handle the complaint in our informal complaint resolution procedure.

We send the business a letter and a copy of your complaint, asking them to tell their side of the story. When we get their reply, we will contact you for your comments or to tell you about any proposed settlement offer from the business. Much of the time, this process yields satisfactory results.

If there is no voluntary offer of settlement or the proposed settlement is not acceptable to you, you must then proceed privately through the Small Claims Court or a private attorney. The state can only take formal action when there is a serious indication of deceptive practices in violation of law. The fact that we do not take formal action does not necessarily reflect on the merit of either party's position in this matter.

All complaint files are kept for future reference in case other complaints against the business are received. This way we can keep track of deceptive or fraudulent patterns which may begin to evolve. However, unless we file formal legal action in court, all complaints are confidential; we do not perform the function of a Better Business Bureau by releasing complaint information about particular businesses.

YOU SHOULD REALIZE THAT:

1. THE CONSUMER PROTECTION OFFICE CANNOT ACT AS YOUR ATTORNEY. WHEN THE ATTORNEY GENERAL SUES A BUSINESS, HE SUES FOR THE STATE--TO STOP THE PRACTICE AND COLLECT FINES.

2. THE COMPLAINT HANDLING PROCESS USUALLY TAKES AT LEAST SIXTY (60) DAYS.

3. IT IS NOT POSSIBLE FOR THE STATE TO SUE EVERY TIME A CONSUMER IS TREATED UNFAIRLY OR EVEN DEFRAUDED. THE STATE CAN ONLY ACT IN THE GENERAL PUBLIC INTEREST.

4. EVEN THOUGH YOU FILE A CONSUMER COMPLAINT WITH OUR OFFICE YOU ALSO WANT TO CONSULT A PRIVATE ATTORNEY, OR THE LEGAL SERVICES ATTORNEY, OR FILE A CLAIM IN SMALL CLAIMS COURT AT THE SAME TIME.

CSHB 148 (Jud) Sectional

Section 1) Increases the performance bond required of a mobile home manufacturer from $35,000 to $100,000.

Section 2) Adds a new section which would permit a buyer to pursue a "private cause of action" against a manufacturers bond;

Section 3) Adds a new section which outlines the sureties responsibilities, liabilities, and duties with respect to the cancellation of a surety bond.

Section 4) Transfers the enforcement authority from DCED to the Department of Law.

Section 5) Adds a new paragraph to the unfair trade practices/consumer protection statutes relating to mobile home warranties.

NOTE: The bill which passed over from the House shows two section 2's; This will be corrected prior to the meeting.

April 11, 1985

Honorable Fred Zharoff, Chairman
Senate Labor and Commerce Committee
Alaska State Legislature
Pouch V (MS 3100)
Juneau, AK 99811

Re: HB 148

Dear Senator Zharoff:

This letter is written to encourage the Senate Labor and Commerce Committee to quickly consider and pass HB 148. This bill passed the House Labor and Commerce Committee unanimously and also passed the House Judiciary Committee unanimously, although the present version is a committee substitute that was developed in the House Judiciary Committee. House Bill 148 passed the House on a vote of 39 to 0 with one excused. As you can see there was tremendous support for this legislation. I believe the reason for this support and the popularity of the bill is the important relief granted to a purchaser of a mobile home in Alaska. Essentially the bill accomplishes three changes in the present law:

1. It raises the performance bond required of a manufacturer of mobile homes from $35,000 to $100,000.
2. It creates a private cause of action for a mobile home buyer against the manufacturer's bond for warranty violations.
3. It transfers warranty enforcement authority from the Department of Commerce and Economic Development to the Department of Law.

Increase in bond amount from $35,000 to $100,000.

This bill would amend AS 45.30.015(a) to increase the bond amount that a manufacturer of mobile homes would have to post with the State from $35,000 to $100,000. The purpose of this bond is to assure compliance with the provisions of AS 45.30.011, which set forth the warranty obligation by a manufacturer of a mobile home. The increase in the cost of mobile homes since the statue was first enacted suggests the need for the increase in the bond. You are probably aware that there are many persons in the state who live in mobile homes or choose to purchase mobile homes for

their primary residence. There are no manufacturers of mobile homes in the State of Alaska, and the posting of this bond aids in making certain the mobile homes sold in the state are warranted for one year and that the manufacturer corrects any substantial defects that occur. Attached is a report that we prepared which sets forth some of the problems mobile home consumers have had with their mobile homes.

We, in this section, conducted a survey to determine the cost to a manufacturer if the bond amount were increased from $35,000 to $100,000. Our research showed that there would not be significant increase to the cost of a manufacturer whose mobile homes were sold in Alaska if the bond were increased. The cost of a bond pursuant to AS 45.30.015 would be between 1% and 2% of the face value annually, but in most cases only about 1% of the face amount. Thus, a $100,000 bond would cost a manufacturer approximately $1000, with an upper limit of $2000 a year.

The financial stability and net worth of a manufacturer might well determine the cost of a bond or even if the manufacturer can obtain a bond. Any company's inability to obtain a bond would probably be a good indication of its level of reliability in fulfilling its bonded obligations, according to one local insurance broker. If the manufacturer is currently able to obtain a $35,000 bond that same manufacturer would likely be able to obtain a $100,000 bond. Thus the manufacturer would be looking at an increase from approximately $350 to approximately $1000 if this bill is enacted increasing the bond required from $35,000 to $100,000

Private cause of action against the bond

The current mobile home warranty statute, at AS 45.30.040, only allows a private buyer injured by the manufacturer of a defective home to request the state to take administrative action against the bond. In order to obtain the proceeds of the bond for any consumers, the state would have to show in an administrative action that the mobile home manufacturer's violations of the warranty act were "regular and recurring." Thus, an individual mobile home buyer may have a serious defect in the purchased mobile home but not be able to obtain the bond proceeds absent state action. The state is not likely to take action unless there are several mobile home buyers who experienced defects in a particular manufacturer's mobile homes.

Also, a buyer may believe she or he has a valid claim against the bond in a case in which the state enforcing authority

does not agree that administrative action is warranted. Providing a clear private cause of action against the bond may relieve a burden on government by reducing the number of administrative hearings and yet ensure that a individual can choose to enforce his own rights, whether or not a state agency agrees with the individual. Of course the mobile home buyer under the proposed revision to the statute would still have to file an action in court and prove that the mobile home manufacturer had violated the warranty provisions of the Mobile Home Warranty Act. The benefit to the mobile home buyer to be able to bring his or her private action against the mobile home manufacturer's bond becomes readily apparent in that case where the mobile home manufacturer has gone out of business, gone bankrupt or has no assets that can be used to satisfy a judgment that a mobile buyer might receive in court. Since all the mobile home manufacturers are located outside the state, collection efforts against an outside mobile home manufacturer may be very difficult for an individual mobile home buyer in the state. It is hoped that creating this private cause of action will make it possible for many claims to be settled without any formal action. The mobile home buyer would notify the manufacturer and the surety on the bond and hopefully some settlement or agreement could be arrived at to provide repairs or correct the defect without the necessity of litigation in many cases.

Transfer of enforcement from the Department of Commerce and Economic Development to the Department of Law

The bill proposes a change in the definition of "department" to mean the Department of Law in AS 45.30.100(2).

The Department of Commerce and Economic Development and the Department of Law agree that this is the most appropriate place to locate the enforcement of the Mobile Home Warranty Act. The Division of Legislative Audit prepared a special report on the Department of Commerce and Economic Development, Division of Measurement Standards, on April 6, 1983. In that report Legislative Audit recommended the transfer of the responsibility to resolve warranty defects of mobile homes found at AS 45.30 from the Department of Commerce and Economic Development to the Department of Law. The audit reflected three reasons for the need for the transfer:

1. Alleged possible conflicts of interest involving the Department of Commerce and Economic Development mobile home inspector;

2. Alleged possible failure of the Department of Commerce and Economic Development to carry out the duties of the mobile home warranty act / and alleged use of money appropriated for that purpose in other ways.

3. The public perception that the Consumer Protection Section of the Department of Law is the agency to contact concerning consumer complaints with problems relating to mobile homes.

A follow up report was issued by the Division of Legislative Audit on June 4, 1984. That audit report provided:

> "The 1983 audit of the Division recommended that the Mobile Home Warranty Program would be better served under the Consumer Protection Section of the Department of Law. The recommendation was made on the basis that the Consumer Protection Section is the agency to which the public looks for resolution of consumer problems and would therefore be best suited to administer the program. The Department of Commerce and Economic Development has entered into a Reimbursable Service Agreement with the Department of Law to transfer the program. Legislation to make the transfer permanent was introduced into the 1984 session of the legislature."

For your convenience I have attached a copy of the 1983 report and the 1984 follow up report by the Division of the Legislative Audit.

We respectfully request that the Senate Labor & Commerce Committee carefully consider enacting the suggestions of the Division of Legislative Audit and transferring the responsibility for enforcement of AS 45.30 to the Department of Law. From a consumer viewpoint it would seem beneficial to alert the public to the fact that the actual enforcement of the Mobile Home Warranty Act now lies with the Department of Law. For instance, if a private attorney were advising mobile home owners, the attorney would no doubt look to the current statute and attempt to make contact with the Department of Commerce for additional information. It is difficult to justify the referral from one agency to another that is necessitated simply because the definition contained in AS 45.30.100 of "department" has not been changed by the legislature to the Department of Law.

Thank you for consideration of this legislation. We stand ready to assist the committee in any way that we can. I would be happy to testify via teleconference or in person. I have

a very moving and interesting video tape of the defects in one particular mobile home. The House Labor and Commerce Committee viewed a portion of that video tape. I would be happy to play a portion of that for your committee. Again, we encourage you to consider this legislation as quickly as possible and pass the bill out of your committee. Thank you for considering our position.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

Agency Response:	
Department of Commerce and Economic Development.	13

PURPOSE OF THE REPORT

In accordance with the provisions of Title 24 of the Alaska Statutes and a special request of the Legislative Budget and Audit Committee, a follow-up review of the Department of Commerce and Economic Development's Division of Measurement Standards was conducted to determine the extent of implementation of recommendations presented in our report titled A Special Report on the Department of Commerce and Economic Development, Division of Measurement Standards, April 5, 1983.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Division of Measurement Standards (DMS) was established in July 1982 with the transfer of the permit and weigh station functions from the Department of Public Safety to the Department of Commerce and Economic Development, Weights and Measures Section. The Division has four distinct statutory requirements:

1. Public and consumer protection through maintenance of uniform standards which ensure the accuracy of commercial weighing and measuring devices within the State (AS 45.75).

2. Consumer protection for buyers of mobile homes through the enforcement of mobile home warranties (AS 45.30).

3. Operation of weigh stations to identify and remove overweight commercial vehicles from the State highway system (AS 44.33.020(25).

4. Issuance of special permits authorizing the operation of overweight and oversize vehicles, and the collection of fees for these special permits (AS 44.33.020(25).

The "Weights and Measures Act", AS 45.75, requires a system of weights and measures that conforms to the standards customarily in use in the United States. The weights and measures obtained by the State are to be verified by the National Bureau of Standards (NBS) and are to be properly maintained to ensure their reliability and traceability to NBS.

To accomplish this mandate, DMS is the custodian of the State's weights and measures and conducts the periodic verification with NBS. The State's standards of weights and measures are used to verify all office standards. The office standards then are used to verify all field standards used by DMS. In addition, these standards become the basis for verification of all instruments and devices used for determining weight or measure in commercial transactions within the State.

DMS fulfills its responsibilities through physical inspection of devices, examination of packaging and the investigation of complaints. DMS may issue "stop-use" or "removal orders" of measuring devices and commodities offered for sale, when it is necessary to enforce the Weights and Measures Act.

Alaska Statute 45.30 mandates the responsibility for resolving warranty defects of mobile homes to the Department of Commerce and Economic Development. The Department assigned the responsibility for carrying out the provisions of the

statute to the Division of Weights and Measures upon its creation in July of 1982.

The 1983 audit of the Division recommended that the Mobile Home Warranty Program would be better served under the Consumer Protection Section of the Department of Law. The recommendation was made on the basis that the Consumer Protection Section is the agency to which the public looks for resolution of consumer problems and would therefore be best suited to administer the program. The Department of Commerce and Economic Development has entered into a Reimbursable Service Agreement with the Department of Law to transfer the program. Legislation to make the transfer permanent was introduced into the 1984 session of the Legislature.

The Division, under the provisions of AS 44.33.020(25) has the responsibility for the operation of the weigh stations located on the State highway system. The primary function of the weigh station program is the enforcement of the size, weight and load limitations adopted by the Department of Transportation and Public Facilities under AS 19.10.060.

Additionally, DMS administers the oversize and overweight permit program as provided under AS 44.33.020(25). Permits are issued, for a fee, which allows commercial vehicles that exceed the maximum allowable size, weight or load limitations the right to legally travel over the State highway system. DMS also regulates pilot cars under this statute.

PRIOR AUDIT RECOMMENDATIONS

In a previous audit report dated April 6, 1983, we presented the Commissioner of Commerce and Economic Development with seven recommendations relating to the operation of the Division of Measurement Standards. Three of those recommendations had a total of nine sub-recommendations. The following is the current status of each:

Prior Audit Recommendation No. 1

The Department should take immediate action to improve the employee morale of the Division of Measurement Standards (DMS).

As a result of interviews with fifteen employees and a review of written communications during our prior audit, it was obvious that a serious morale problem existed within DMS. The cause of the low morale did not appear to be centered around any single issue but was due to a build up of problems within the Weights and Measures Section over the past several years.

Legislative Audit's Current Position

Prior to the final release of our previous report, the Department initiated procedures to determine the causes of the low morale and to provide for possible solutions. These efforts have continued and included:

1. Employee interviews conducted by the Department's personnel officer.

2. The Director meeting collectively and individually with employees of the Division.

3. The development of a new employee evaluation manual and procedures that define management's expectations of employees and provides for ongoing communication between the staff and management.

4. The Director's standing offer to meet with any employee to discuss problems and, if possible, provide reasonable solutions.

During our present review, we found that there continues to be a certain amount of employee dissatisfaction, however, in our opinion, the Department and Division management are making a reasonable and good-faith effort at resolving remaining problems.

Prior Audit Recommendation No. 2

DMS should avoid situations that give the appearance of a conflict of interest.

During our prior audit, we noted three situations which, at a minimum, gave the appearance of a conflict of interest to employees and other persons outside the Division.

Two of the situations involved the DMS Mobile Home Inspector and the third related to the 1981 hiring of a person convicted of price fixing in a retail gasoline business as a weights and measures inspector. This employee was asked to resign and his termination was effective April 17, 1981.

Legislative Audit's Current Position

The Division no longer administers the Mobile Home Warranty Program. On June 15, 1983, the Division entered into a Reimbursable Service Agreement (RSA) with the Department of Law wherein the Department of Law would, through its Consumer Protection Division, administer the program.

The issue of hiring a person convicted of price fixing, in the retail gasoline business as Weights and Measures Inspector I was addressed and resolved prior to the initiation of the original audit. During the current audit nothing came to our attention which would lead us to believe that DMS is not exercising care in the selection of employees.

In our opinion, these situations were isolated instances and the Division is cognizant of the need to avoid conflict of interest situations.

Prior Audit Recommendation No. 3A

DMS should ensure performance indicators in their budget requests are accurate.

The State budget documents for Fiscal Years 1983 and 1984 included forms for each agency to report its performance activities of the prior year based on predetermined measurements.

In our review of the Fiscal Year 1983 and 1984 budget documents, we found that some of the information reported by DMS for actual performance activities in Fiscal Years 1981 and 1982 was not accurate.

Legislative Audit's Current Position

Beginning with Fiscal Year 1985, the budget request format has been revised. The section devoted to agency performance

in meeting its objectives no longer identifies prior years' actual performance. Information is limited to those measurements planned for the prior year and those estimated for the budget year at various levels of funding.

DMS has continued to maintain actual performance statistics as a measure against planned performance objectives. Prior to Fiscal Year 1984, the Division's methods of compiling and reporting performance data were cumbersome.

During Fiscal Year 1984, DMS began developing methods, including data processing, for improving the system of data collection, retention, analysis and reporting. A review of Fiscal Year 1984 performance activity summaries and supporting documentation showed no significant errors.

Prior Audit Recommendation No. 3B

DMS should prepare their fiscal year budgets in accordance with their anticipated spending plans.

The DMS Fiscal Year 1982 budget requested $96,900 for rental of State vehicles through the Department of Transportation and Public Facilities (DOTPF). Actual costs during 1982 totalled approximately $62,000, 36% less than budgeted. DMS staff explained that this budget line item was intentionally overbudgeted and the excess funds were used to cover expenditures in other underbudgeted line items within the contractual services category for which funding was harder to secure.

Legislative Audit's Current Position

For Fiscal Year 1984, DMS budgeted $77,900 for State vehicle rental costs which represents a $19,000 reduction from the inflated Fiscal Year 1982 budget amount.

For Fiscal Year 1985, the DMS budget reflects a change from the "wet lease" approach, in which both a fixed rental cost and a repair and maintenance rate are paid to DOTPF, to a "dry lease" approach whereby a fixed rental cost is paid to DOTPF and DMS assumes responsibility for repair and maintenance. According to DMS, this change will result in a significant reduction in vehicle costs.

Prior Audit Recommendation No. 3C

DMS should ensure State funds are expended only for authorized purchases in accordance with the State Administrative Manual.

DMS purchased seafood in August, 1981, and September, 1982, totalling $100 and $548 respectively. The seafood was presented to the members of the Western Weights and Measures

Conferences. The State Administrative Manual, section 6820, prohibits expenditure of State funds for nonessential food-stuffs.

Legislative Audit's Current Position

A review of the Division's Fiscal Year 1984 expenditures showed no unauthorized purchases of seafood. The seafood presented at the most recent Western Weights and Measures Conference was purchased at the Director's personal expense.

Prior Audit Recommendation No. 3D

DMS should ensure appropriations are expended in accordance with law.

DMS received an appropriation totalling $33,200 through Chapter 50, SLA 1980 to "purchase scale testing equipment and to provide transportation to test scales for seafood processors in the Aleutian Islands and Western Alaska". Through a review of the related expenditures, we found $8,148 was expended for travel to areas other than the Aleutian Islands or Western Alaska.

In addition, DMS received another appropriation totalling $39,100 through Chapter 120, SLA 1980, to implement the Mobile Home Warranty Program enacted by Chapter 104, SLA 1980. We determined that $2,875 of these funds were expended on travel unrelated to the Mobile Home Warranty Program.

Legislative Audit's Current Position

A review of Fiscal Year 1984 expenditures and correspondence showed the Division is cognizant of the legal limitations of expending appropriations. During the year, DMS has requested approval and/or advice on certain expenditures from the Department's Division of Administrative Services, the Office of Management and Budget, and the Division of Legislative Audit.

Prior Audit Recommendation No. 4A

DMS should update job descriptions and classifications as required by the State Personnel Rules.

We determined through a review of job descriptions and employee interviews that material changes had occurred in the duties and responsibilities of two classified positions since the formation of the Division.

A Weights and Measures Inspector IV position no longer had the supervisory authority over the inspectors. The employee's responsibilities included only administrative and budgeting duties. The Mobile Home Inspector's duties

included supervision of the weigh stations in addition to mediating mobile home warranty complaints.

We recommended that job descriptions and duties should be changed to reflect the actual duties and responsibilities of these positions to decrease the confusion and misunderstandings within the Division.

Legislative Audit's Current Position

The Weights and Measures Inspector IV position was reclassified to a Management Analyst III on November 23, 1983.

With the transfer of the Mobile Home Warranty Program to Consumer Protection in the Department of Law, DMS reclassified the Mobile Home Inspector position to a Weigh Station Operator II.

Prior Audit Recommendation No. 4B

DMS should utilize promotional eligibility lists to the extent possible.

In July, 1982, DMS assumed the responsibility of the weigh stations from the Department of Public Safety. Twenty-eight commercial vehicle inspectors were transferred from the Department of Public Safety to DMS, however, DMS did not receive a transfer of any supervisory personnel. In order to provide sufficient supervision of the weigh stations, DMS upgraded three of the commercial vehicle inspector positions from a range 12 to a range 15. The incumbents in two of the upgraded positions became supervisors while the other inspectors were not afforded the opportunity to interview for the positions.

Legislative Audit's Current Position

DMS has used the Division of Personnel's departmental eligibility lists in making promotions since our previous audit.

Prior Audit Recommendation No. 5

The Department should seek legislation to transfer the Mobile Home Warranty Program to the Consumer Protection Section of the Department of Law.

We reviewed the function of the Mobile Home Warranty Program and the activity from July, 1981 through March, 1983. Based on our review, we noted the following:

1. The Mobile Home Inspector acts as a mediator between the consumer and the dealer and/or manufacturer in order to resolve complaints.

2. During Fiscal Year 1982, DMS received 26 mobile home warranty complaints. As of March, 1983, DMS had received nine complaints in Fiscal Year 1983.

3. The Consumer Protection Section receives and investigates mobile home complaints from consumers. According to a memorandum dated March 17, 1983, from an assistant attorney general, the Consumer Protection Section had five complaints currently under investigation.

Since the Consumer Protection Section is the agency to which the public looks for resolution of consumer problems and the Mobile Home Warranty Program deals with consumer protection warranty laws, it appears that the program could be more efficiently and effectively administered by the Consumer Protection Section.

Legislative Audit's Current Position

The Mobile Home Warranty Program is presently being administered by Consumer Protection through a Reimbursable Service Agreement with DMS. For Fiscal Year 1985, the program is budgeted within Consumer Protection.

During the 1984 legislative session, Senate Bill No. 497 was introduced to amend AS 45.30 by placing the responsibility for the program in the Department of Law. The bill was not passed by the 1984 Legislature.

We recommend that the Department resubmit the proposed legislation change to the 1985 Legislature.

Prior Audit Recommendation No. 6

The Department should seek removal of DMS staff as delegates to the National Conference of States on Building Codes and Standards.

The Director and the Mobile Home Inspector are delegates to the National Conference of States on Building Codes and Standards, Incorporated (NCSBCS). During the period from May, 1981, through January, 1983, the Director attended five meetings related to NCSBCS which were held in Seattle, Denver, Boston, Atlanta, and New Orleans. The Mobile Home Inspector also attended the meetings at Seattle and New Orleans.

DMS duties and responsibilities relating to building codes and standards were greatly diminished with the repeal of the State mobile home standards in September, 1980, and the enactment of the Mobile Home Warranty Program. Furthermore, activity in the Mobile Home Warranty Program does not warrant involvement of DMS in NCSBCS.

Legislative Audit's Current Position

The Director of the Division of Measurement Standards is still the delegate of record to NCSBCS however, he has initiated action to have his name removed as a delegate. A review of the Director's Fiscal Year 1983 and 1984 travel showed that no travel involving NCSBCS business has occurred since September of 1982.

Prior Audit Recommendation No. 7A

DMS should provide sufficient documentation that office and field standards (official test devices) are verified in accordance with law.

We could not find sufficient documentation to determine if DMS was in compliance with AS 45.75.060 which requires verification of office and field standards on an annual basis.

In order to provide sufficient documentation, DMS should develop a complete inventory of all office and field standards with identifying numbers (where possible), the location of the standards, and the last date of verification.

Legislative Audit's Current Position

The Division has developed a complete inventory of field standards and laboratory standards. The field standards status report lists the standards by type, serial number, location, inventory date, last certification date and certification due date. According to Division personnel, the lists will be maintained on a current basis.

Prior Audit Recommendation No. 7B

DMS should develop procedures to ensure that weight and measure devices are inspected and tested semiannually in accordance with law.

DMS did not have sufficient documentation to determine that they were in compliance with AS 45.75.080 which requires all weights and measures in commercial use to be inspected and tested at least semiannually or more often as the Director considers necessary. We were able to review inspection dates for 110 businesses located in Southeastern Alaska. Of those 110 businesses, 43 received annual inspections, 23 received semiannual inspections, and the remaining 44 did not have sufficient information to determine the frequency of inspections.

DMS should compile an inventory of devices including location and the last date of testing. This will provide management with data to determine the extent of compliance possible

within budgetary constraints.

Legislative Audit's Current Position

Beginning with the Anchorage area, the Division is in the process of developing a route system for the inspection and testing of devices. Inventory schedules using the data processing equipment are being prepared which will list location of the commercial device, type, serial number, date of previous inspection and date of previous approval, date of current inspection and date of current approval. The inventory lists should provide a positive response to the problem of testing devices semiannually in heavily populated areas. In addition, legislation was introduced during the 1984 session of the Legislature which would eliminate semiannual inspections in favor of annual inspections (Senate Bill No. 491).

The Fiscal Year 1985 budget for DMS approved by the Legislature and the Governor reflects a significant reduction in the inspection activity of the Division. In light of this reduction, the proposed statutory change appears justified.

Prior Audit Recommendation No. 7C

DMS should develop a uniform method for compilation of weights and measures verification activity data.

An inspector, in order to verify a weight or measure device, performs an inspection which is an evaluation of the physical characteristics of the device, and a test which is the actual test for accuracy through the use of standards, e.g. test weights. We noted inconsistencies in the methods used by inspectors to count the number of devices, and inspections and tests of those devices.

In addition to the inconsistencies in accounting for activities, we noted that monthly activity information is not organized in a manner to facilitate managerial use of data for planning and budgeting purposes.

Legislative Audit's Current Position

Monthly statistics are compiled from test reports submitted by the inspectors. Since the system is manual, it is relatively cumbersome and error prone. DMS is working towards a uniform method of compiling verification data. DMS should continue to work for a more efficient system of data compilation.

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

RECEIVED

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
The Legislature
Pouch W
Juneau, Alaska 99801

Dear Mr. Wilkerson:

I have received your follow-up report on the Department of Commerce and Economic Development, Division of Measurement Standards dated June 4, 1984 and have no disagreement with the recommendations in the report. As stated, all recommendations have been addressed and corrective measures taken by the division.

Thank you and your staff for your efforts in performing this follow-up audit.

Sincerely,

Richard A. Lyon
Commissioner

CSHB 148(Jud): "AN ACT RELATING TO MOBILE HOME WARRANTIES"

THIS LEGISLATION MAKES 3 MAJOR CHANGES TO THE CURRENT MOBILE HOME WARRANTY LAW:

1) IT INCREASES THE PERFORMANCE BOND REQUIRED OF A MOBILE HOME MANUFACTURER FROM $35,000 TO $100,000

2) IT ALLOWS A CONSUMER TO PURSUE A PRIVATE CAUSE OF ACTION AGAINST A MOBILE HOME MANUFACTURER FOR WARRANTY VIOLATIONS.

3) IT ALSO TRANSFERS WARRANTY ENFORCEMENT AUTHORITY FROM THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT TO THE DEPARTMENT OF LAW.

Chairman's Information:

1) CSHB 148(Jud) "An act relating to mobile home warranties"

a) Introduced: Governor
b) Co-Sponsors:

2) INTENT: This legislation raises the performance bond required of a mobile home manufacturer from $35,000 to $100,000; it also allows a consumer to pursue a private cause of action against the manufacturer for warranty violations, and it transfers warranty enforcement authority from DCED to the Department of Law.

CSHB 148:

Additional comments from Robert Mintz (279-0428) of the Consumer Protection Section of the Department of Law.

1) There are currently NO manufacturer's of mobile homes in the State of Alaska;

2) Warranties on Mobile Homes are typically about a year; This provision would not extend to a dealer who purchases a mobile home from a person while it is still under warranty, however if a private person sold a mobile home to another private person and the mobile home was under warranty, then the provisions of this statute would apply.

3) They don't have a clear handle on the number of mobile homes in the state however, AHFC has financed the following numbers of mobile homes:

    a) FY83: 1,872

    b) FY84: 1,619

    c) First half of FY85: 383

4) Penalty provisions:

amount for a period of 24 months after the date the last mobile home was delivered to a buyer in the state. (§ 1 ch 104 SLA 1980)

Sec. 45.30.020. Duties of department.

Repealed by § 5 ch 123 SLA 1972.

Editor's note. — The repealed section derived from § 2, ch. 80, SLA 1971.

Sec. 45.30.030. Administration.

Repealed by § 5 ch 123 SLA 1972 and § 5 ch 104 SLA 1980.

Cross reference. — For current provisions concerning deposit of performance bonds, see AS 45.30.015.

Editor's note. — The repealed section derived from § 2, ch. 80, SLA 1971; §§ 2, 5, ch. 123, SLA 1972; §§ 3, 4, ch. 114, SLA 1974.

Sec. 45.30.040. Enforcement of compliance. (a) A department inspector shall give written notice to the owner, dealer or manufacturer of a mobile home of each violation of AS 45.30.011. The notice of violation shall accurately describe the violation and give specific reference to the section and paragraph of the statutes.

(b) Repealed by § 5 ch 104 SLA 1980.

(c) Whenever it determines that there may be a violation of the provisions of this chapter by a manufacturer or dealer of mobile homes, the department may give notice of hearing and, within 30 days after giving notice, hold a hearing to determine whether there has been a violation. After notice and hearing,

(1) if the department finds that there has been a violation of the provisions of this chapter, the department may issue an order directing that the person who is violating the provision cure the violation in a reasonable time and in a reasonable manner;

(2) if the department determines that violations of the provisions of this chapter are regular and recurring, it may require forfeiture of the bond to the benefit of the state and arrange for distribution of the proceeds of the bond to the mobile home owners injured by the activities of the dealer or manufacturer, or to mobile home dealers injured by the activities of the manufacturer.

(d) The provisions of AS 44.62.330 — 44.62.630 apply to a hearing held under (c) of this section. (§ 2 ch 80 SLA 1971; am § 3 ch 123 SLA 1972; am § 5 ch 114 SLA 1974; am §§ 2, 3, 5 ch 104 SLA 1980)

Effect of amendment. — The 1980 amendment, in subsection (a), inserted "dealer" preceding "or manufacturer" near the beginning of the first sentence, substituted "AS 45.30.011" for "the regulations adopted under AS 45.30.010" at the end of the first sentence, and substituted "statutes" for "regulations" at the end of the second sentence; repealed subsection (b); and added subsections (c) and (d).

I think this is what they are getting at but I am not 100% sure.

Michael

ANALYSIS:

This bill creates a private cause of action relating to mobile home warranties, and transfers responsibility for enforcement of mobile home warranties from the Department of Commerce and Economic Development to the Department of Law. A 1983 legislative audit report recommended transfer of the enforcement process to the Department of Law. The transfer of the existing mobile home warranty enforcement position, including funding, from the Department of Commerce and Economic Development to the Department of Law, was accomplished July 1, 1984. Consequently, enactment of this bill will not require additional funding nor will it cause a fiscal impact.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 30, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to mobile home warranties. This bill increases government efficiency in enforcement of mobile home warranties, and encourages private consumer self-help.

The bill has two main components: (1) the creation of a private cause of action in a mobile home buyer against the manufacturer's bond, which AS 45.30.015 requires be posted with the state; and (2) a transfer of warranty enforcement authority from the Department of Commerce and Economic Development (DCED) to the Department of Law.

With regard to the first of the components, it is the understanding of both DCED and the Department of Law that, when the mobile home warranty statute, AS 45.30.011, took effect in 1980, a private buyer injured by a manufacturer who sold a defective home to a buyer in this state would be allowed to make a claim against the bond under AS 45.30.040. However, that statute only provided a procedure for the consumer to petition the state to take administrative action against the bond. Experience in the last few years has shown that a buyer may believe that he or she has a valid claim against the bond in a case in which the state enforcing authority does not agree that administrative action is warranted. Providing a clear, private cause of action against the bond may relieve a burden on the government by reducing the number of administrative hearings, and insure that an individual can choose to enforce his or her own rights, whether or not a state agency agrees with the individual.

The second component of the bill is a transfer of the warranty enforcement powers from DCED to the Department of Law. The April 1983 legislative audit of the division of measure-

ment standards, DCED, studied this issue and recommended

> The Department [of Commerce and Economic Development] should seek legislation to transfer the mobile home warranty enforcement program to the Consumer Protection Section of the Department of Law.

Both departments have agreed that this is a more efficient enforcement pattern, as the Department of Law, consumer protection section, already processes mobile home complaints that fall outside the warranty Act, as well as those that may duplicate warranty Act enforcement by DCED. In FY 84, DCED transferred the one mobile home investigator position to the Department of Law through a reimbursable services agreement.

The bill promotes government efficiency by encouraging private self-help, rather than reliance on government. I feel that it will have the support of both industry and consumers. I urge your affirmative action on this measure.

Sincerely,

Bill Sheffield
Governor

Mobile Homes and Mobile Home Parks.
CITATION Sec. 45.30.011.
CATCH LINE
MOBILE HOME WARRANTIES.
TEXT (a) After August 27, 1980, a new mobile home sold by a mobile home dealer to a buyer is subject to a mobile home warranty. A mobile home warranty shall be set out in a separate written document entitled "Mobile Home Warranty" which shall be delivered to the buyer by the mobile home dealer at the time a contract of sale is signed. The warranty shall contain the name, address and telephone number of the mobile home manufacturer and the mobile home dealer and shall include at least the following provisions:

(1) the mobile home is free from any substantial defects in materials and workmanship;

(2) the manufacturer or dealer, or both, shall take appropriate action at the site of the mobile home to correct substantial defects in materials or workmanship which become evident within one year of the date of delivery of the mobile home to the buyer if the buyer, or his transferee, gives written notice of the defect by registered or certified mail addressed to the business address of the manufacturer or dealer on a date which is not more than one year and ten days after date of delivery of the mobile home;

(3) the manufacturer and the dealer are jointly and severally liable to the buyer, or his transferee, for the fulfillment of the terms of warranty, and the buyer may notify the manufacturer or the dealer, or both, in the event action is required to correct substantial defects in materials or workmanship;

(4) the warranty is applicable to the mobile home structure, its plumbing, heating and electrical systems, and all appliances and equipment installed or included in the mobile home unit by the manufacturer or dealer; and

(5) notwithstanding separate warranties applicable to appliances contained within a mobile home unit issued by the manufacturers of the appliances, primary responsibility for appropriate corrective action under the warranty rests with

the manufacturer and the dealer of the mobile home unit, and written notice of defects must be initially reported to them.

(b) The warranty provided under (a) of this section is in addition to and not in derogation of all other rights and remedies which a buyer may have under any other law or instrument.

(c) The manufacturer and the dealer may not require the buyer to waive his rights under (a) of this section. A waiver of rights required by a manufacturer or dealer is contrary to public policy and is unenforceable.

(d) A mobile home dealer shall display a notice of reasonable size stating the applicability of the warranty required by this section, and shall, upon request, provide a sample copy of the warranty. The notice shall be posted in each area in which purchase orders and sales contracts for mobile homes are written.

(e) The manufacturer shall compensate a mobile home dealer who incurs expenses as a result of warranty obligations for which the manufacturer is legally responsible or for obligations which the manufacturer imposes upon the dealer. A provision of contract which is contrary to this subsection is void as against public policy.

(f) In this section, a defect is "substantial" if it materially affects the fitness of the mobile home for occupancy or use by the buyer or his transferee.

UNLAWFUL ACTS AND PRACTICES.

TEXT (a) Unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce are declared to be unlawful.

(b) The terms "unfair methods of competition" and "unfair or deceptive acts or practices" include, but are not limited to, the following acts:

(1) fraudulently conveying or transferring goods or services by representing them to be those of another;

(2) falsely representing or designating the geographic origin of goods or services;

(3) causing a likelihood of confusion or misunderstanding as to the source, sponsorship, or approval, or another person's affiliation, connection, or association with or certification of goods or services;

(4) representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have;

(5) representing that goods are original or new if they are deteriorated, altered, reconditioned, reclaimed, used, secondhand, or seconds;

(6) representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another;

(7) disparaging the goods, services, or business of another by false or misleading representation of fact;

(8) advertising goods or services with intent not to sell them as advertised;

(9) advertising goods or services with intent not to supply reasonable expectable public demand, unless the advertisement prominently discloses a limitation of quantity;

(10) making false or misleading statements of fact concerning the reasons for, existence of, or amounts of price reductions;

(11) engaging in any other conduct creating a likelihood of confusion or of misunderstanding and which misleads, deceives or damages a buyer or a competitor in connection with the sale or advertisement of goods or services;

(12) using or employing deception, fraud, false pretense, false promise, misrepresentation, or knowingly concealing, suppressing, or omitting a material fact with intent that others rely upon the concealment, suppression or omission in connection with the sale or advertisement of goods or services whether or not a person has in fact been misled, deceived or damaged;

(13) failing to deliver to the customer at the time of an installment sale of goods or services, a written order,

contract, or receipt setting out the name and address of the seller and the name and address of the organization which he represents, and all of the terms and conditions of the sale, including a description of the goods or services, which shall be stated in readable, clear, and unambiguous language;

(14) representing that an agreement confers or involves rights, remedies or obligations which it does not confer or involve, or which are prohibited by law;

(15) knowingly making false or misleading statements concerning the need for parts, replacement, or repair service;

(16) misrepresenting the authority of a salesman, representative or agent to negotiate the final terms of a consumer transaction;

(17) basing a charge for repair in whole or in part on a guaranty or warranty rather than on the actual value of the actual repairs made or work to be performed on the item without stating separately the charges for the work and the charge for the guaranty or warranty, if any;

(18) disconnecting, turning back or resetting the odometer of a vehicle to reduce the number of miles indicated;

(19) using a chain referral sales plan by inducing or attempting to induce a consumer to enter into a contract by offering a rebate, discount, commission, or other consideration, contingent upon the happening of a future event, on the condition that the consumer either sells, or gives information or assistance for the purpose of leading to a sale by the seller of the same or related goods;

(20) selling or offering to sell a right of participation in a chain distributor scheme;

(21) selling, falsely representing or advertising meat, fish or poultry which has been frozen as fresh food;

(22) failing to comply with AS 45.02.350;

(23) failing to comply with AS 45.45.130 45.45.240;

(24) counseling, consulting or arranging for future services relating to the disposition of a body upon death whereby certain personal property, not including cemetery lots and markers, will be furnished or the professional services of a funeral director or embalmer will be furnished, unless the person receiving money or property deposits the money or property, and money or property is received, within five days of its receipt, in a trust in a financial institution whose deposits are insured by an instrumentality of the federal government designating the institution as the trustee as a separate trust in the name only of the person on whose behalf the arrangements are made with a provision that the money or property may only be applied to the purchase of designated merchandise or services and should the money or property deposited and any accrued interest not be used for the purposes intended on the death of the person on whose behalf the arrangements are made, all money or property in the trust shall become part of his estate; upon demand by the person on whose behalf the arrangements are made, all money

or property in the trust including accrued interest, shall be paid to him; this paragraph does not prohibit the charging of a separate fee for consultation, counseling or arrangement services if the fee is disclosed to the person making the arrangement; any arrangement under this paragraph which would constitute a contract of insurance under AS 21 is subject to the provisions of AS 21;

(25) failing to comply with the terms of the Alaska Gasoline Products Leasing Act (AS 45.50.800 45.50.850).

(c) The unlawful acts and practices listed in (b) of this section are in addition to and do not limit the types of unlawful acts and practices actionable at common law or under other state statutes.

(d) Repealed by sec. 21 ch 166 SLA 1978.

HISTORY (Sec. 2 ch 246 SLA 1970; am sec. 1 ch 53 SLA 1974; am sec. 1 ch 138 SLA 1974; am sec. 1 ch 183 SLA 1975; am sec. 2 ch 146 SLA 1976; am sec. 3 ch 197 SLA 1976; am sec. 3 ch 234 SLA 1976; am sec. 21 ch 166 SLA 1978)

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 168 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to construction contractors; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.18.011 is amended by adding a new subsection to read:

(b) A general contractor may not allow a person required to be registered under this chapter to work for the general contractor as a specialty contractor unless the person is registered under this chapter.

* Sec. 2. AS 08.18.031 is amended by adding a new subsection to read:

(b) The commissioner may not issue a certificate of registration or renew the registration of an applicant whose registration has been revoked or suspended or against whom a fine has been imposed under this chapter until the period of revocation or suspension has expired and any fine has been paid.

* Sec. 3. AS 08.18.051 is amended to read:

Sec. 08.18.051. IDENTIFICATION REQUIREMENTS [REGISTERED NAME]. (a) Except as provided otherwise by [STATE] law, a [NO] person who has registered under one name as required by this chapter may not act in the capacity of a contractor under any other name unless that name also is registered.

(b) All advertising, contracts, correspondence, cards, signs, posters, papers and documents prepared by a contractor for the contracting business shall [WHICH] show the contractor's name, mailing

[AND] address, and address of the contractor's principal place of business. Advertising and contracts shall also include the contractor's registration number [SHALL SHOW THE NAME AND ADDRESS AS REGISTERED UNDER THIS CHAPTER].

(c) Individual contractors and partners, associates, agents, salesmen, solicitors, officers and employees of contractors shall use their true names and addresses and the true name of the contractor firm at all times while acting in the capacity of a contractor or performing related activities.

* Sec. 4. AS 08.18.071(b) is amended to read:

(b) If the applicant is a general contractor the amount of the bond shall be $10,000 [$5,000]; if the applicant is a specialty contractor the amount of the bond shall be $5,000 [$2,000]. In lieu of the surety bond the applicant may file with the commissioner a cash deposit or other negotiable security acceptable to the commissioner [OF COMMERCE,] in the amount specified for bonds.

* Sec. 5. AS 08.18 is amended by adding new sections to article 3 to read:

Sec. 08.18.116. INVESTIGATIONS. Either the Department of Commerce and Economic Development or the Department of Labor may investigate alleged or apparent violations of this chapter. These departments, upon showing proper credentials, may enter, during regular hours of work, a construction site at which it appears that contracting work is being done. The departments may make inquiries about the identity of the contractor or the person acting in the capacity of a contractor. Upon demand, a contractor or person acting in the capacity of a contractor, or that person's representative, shall produce evidence of current registration.

Sec. 08.18.117. ISSUANCE OF CITATIONS. Either the Department of

Commerce and Economic Development or the Department of Labor may issue a citation for a violation if there is probable cause to believe a person has violated this chapter. Each day a violation continues after a citation for the violation has been issued constitutes a separate violation.

Sec. 08.18.118. PROCEDURE AND FORM OF CITATION ISSUANCE AND PROCEDURE. (a) A citation issued under this chapter shall be in writing. A person receiving the citation is not required to sign a notice to appear in court.

(b) The time specified in the notice to appear on a citation issued under this chapter shall be at least five days, not including weekends and holidays after the issuance of the citation, unless the person cited requests an earlier hearing.

(c) The Department of Commerce and Economic Development and the Department of Labor are responsible for the issuance of books containing appropriate citations, and each shall maintain a record of each book issued and each citation contained in it. Each department shall require and retain a receipt for every book issued to an employee of the department designated by the commissioner to provide investigative services to enforce provisions of this chapter.

(d) An employee who issues a citation under this chapter shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. Upon its deposit with the court, the citation may be disposed of only by trial in the court or other official action taken by the magistrate, judge, or prosecutor. The employee who issued the citation may not dispose of it or copies of it or of the record of its issuance except as required under this subsection and (e) of this section.

(e) The Department of Commerce and Economic Development and the

Department of Labor shall require the return of a copy of every citation issued by an employee of the respective department under this chapter, and of all copies of every citation that has been spoiled or upon which an entry has been made and not issued to an alleged violator. The departments shall also maintain, in connection with every citation issued by an employee of the respective department, a record of the disposition of the charge by the court where the original or copy of the citation was deposited.

(f) If the form of citation issued under this chapter includes the essential facts constituting the offense charged, and if the citation is sworn to as required under the laws of this state for a complaint charging commission of the offense alleged in the citation, then the citation when filed with a court having jurisdiction is considered to be a lawful complaint for the purpose of prosecution.

Sec. 08.18.119. FAILURE TO OBEY CITATION. Unless the citation has been voided or otherwise dismissed by the magistrate, judge, or prosecutor, a person who without lawful justification or excuse fails to appear in court to answer a citation issued under this chapter, regardless of the disposition of the charge for which the citation was issued, is guilty of a class B misdemeanor.

* Sec. 6. AS 08.18.121(f) is amended to read:

(f) If the Department [COMMISSIONER] of Labor or the Department of Commerce and Economic Development [LABOR] determines that a contractor or a person [IS] acting in the capacity of [AS] a contractor, is in violation of this chapter, that department may [THE COMMISSIONER SHALL] give written notice to the person prohibiting further action by the person as a contractor. The prohibition continues until the person has submitted evidence acceptable to that department [THE COMMISSIONER OF LABOR] showing that the violation has been corrected.

* Sec. 7. AS 08.18.121(g) is amended to read:

(g) A person affected by an order issued under this chapter may seek equitable relief preventing the Department of Labor or the Department of Commerce and Economic Development [COMMISSIONER OF LABOR] from enforcing the order.

* Sec. 8. AS 08.18.131 is amended to read:

Sec. 08.18.131. INJUNCTION. In an action instituted in the superior court by the commissioner [OF LABOR OR THE COMMISSIONER'S REPRESENTATIVE], a person may be enjoined from acting in the capacity of a contractor in violation of this chapter [MAY BE ENJOINED FROM DOING SO]. In addition to other relief, a civil penalty not to exceed $250 may be imposed for each violation. Each day that an unlawful act continues constitutes a separate violation.

* Sec. 9. AS 08.18.141 is amended to read:

Sec. 08.18.141. MISDEMEANOR. (a) A contractor or a person acting in the capacity of a contractor in violation of AS 08.18.011 [THIS CHAPTER] is guilty of a class B misdemeanor. A person who violates another provision of this chapter is guilty of a violation punishable under AS 12.

(b) Criminal prosecution for a violation of this chapter does not preclude the Department of Commerce and Economic Development or the Department of Labor from seeking available civil remedies.

* Sec. 10. AS 08.18.171 is amended by adding a new paragraph to read:

(4) "department" means the Department of Commerce and Economic Development, unless the context indicates otherwise.

* Sec. 11. Sections 1, 2 and 4 - 10 of this Act take effect July 1, 1985.

* Sec. 12. Section 3 of this Act takes effect July 1, 1986.

* Sec. 13. Section 4 of this Act applies to general contractor and

Amend- E. Com- mea- both CEP & L.

specialty contractor licenses that are issued or renewed by the Department of Commerce and Economic Development after July 1, 1985.

* Sec. 11. Sections 1, 2 and 4 - 10 of this Act take effect July 1, 1985.

* Sec. 12. Section 3 of this Act takes effect July 1, 1986.

* Sec. 13. Section 4 of this Act applies to general contractor and specialty contractor licenses that are issued or renewed by the Department of Commerce and Economic Development after July 1, 1985.

Chairman's Information:

1) CSHB 168 (L&C) "An act relating to construction contractors; and providing for an effective date."

   a) Introduced: Sund

   b) Co-Sponsors: Taylor and Boucher

2) INTENT: To better protect the public from unlicensed and unbonded construction contractors. The bill increases the bonding requirements for general and special contractors, provides for the issuance of citations, and the assessment of civil penalties. Further, this legislation enhances the Department of Labor's enforcement authority and provides such authority to DCED so they can work in concert.

   FISCAL NOTE: 117.0 FY86 for DCED; House letter of intent establishes that the fiscal note is to be shared between Dept of Labor and DCED;

   Note: NEED TO ADOPT HOUSE LETTER OF INTENT

3) ADDITIONAL REFERRALS: Judiciary and Finance.

4) PUBLIC HEARINGS:

   b) Public witnesses:

5) BILL ACTION:

   a) Hold in committee?
   b) Assign to sub committee for further review?
   c) Move from Committee?
   d) close public hearings?

6) COMMITTEE ACTION:
   a) amendments?
   b) CS adoption? → L&C SCS contains changes on page 5, lines 8-10; Designates Both Commissioners of Labor & DCED to institute injunctions in Superior Court and makes gramatical changes which puts section in the "active voice."

House Finance Committee
Letter of Intent
for
CSHB 168 (Labor and Commerce)

This bill intends to expand the enforcement authority over contractors by both the Department of Labor and the Department of Commerce and Economic Development. It is the intent that funds provided by the fiscal note be shared by both departments taking into account existing enforcement personnel, capabilities, and office locations.

Al Adams, Chairman

February 20, 1985

MEMORANDUM

TO: Representative John Sund

FROM: Nancy Pease Nancy Pease
Legislative Analyst

RE: Licensing and Bonding of Contractors: Update
Research Request 85-180

Kitty Rodriguez of your staff requested an update of Research Request 83-251, "Licensing and Bonding of Contractors in Other States." I have contacted each of the eight states originally surveyed and amended the summary table accordingly (see attachment).

Licensing requirements do not appear to have changed in the eight states surveyed. Of the eight states surveyed, only Ohio has no state licensing or bonding requirements for contractors. However, Ohio counties and municipalities may license and bond contractors. Michigan and Oregon license general and specialty contractors for residential construction but not for commercial construction. Idaho and Montana contractors must be state-licensed in order to bid for public works contracts let by the state, federal or local governments but not for contracts with the private sector. Several states exempt contractors from obtaining licenses for jobs below a designated cost limit. California waives contractor licensing requirements for jobs costing less than $200 while Montana waives licensing requirements for public works jobs costing less than $5,000.

As noted in the earlier memorandum, licensing requirements vary considerably from trade to trade and state to state. Several states, including Alaska, Washington and Oregon, register as contractors persons who are not personally qualified in skilled trades for which they will be contracting. These contractors may be required to hire or subcontract a qualified, licensed specialty tradesman as a condition of the contracting license. Alaska, Washington and Oregon require contracting license applicants to provide proof of liability insurance in addition to a surety bond or assignment of savings. In Alaska and Washington, applicants must carry a minimum coverage of $20,000 for property damage and $100,000 for personal injury to more than one person.

[redacted]

Backup

The summary table shows several changes in bond requirements. Washington has increased the amount of the bonds required of general and specialty construction contractors. Oregon now requires a $5,000 bond for all residential contractors; previously the bond amount varied for general and specialty contracting. Michigan no longer requires a $2,000 bond for specialty contractors but does require a $50 deposit to the Construction Lien Recovery Fund for each specialty trade a contractor practices. Michigan also requires a $1,000 bond before licensing nonresident electricians.

I hope this information is helpful. If you have further questions, please let us know.

FOOTNOTES

[1]Applicants for contracting licenses must provide proof of liability insurance. In Washington and Alaska, applicants must carry a minimum of $20,000 for propertty damage and $100,000 for personal injury or death of more than one person.

[2]AS 8.18.171 defines "general contractor" as a contractor whose business operations require the use of more than two distinct trades whose work the general contractor superintends; the terms "general contractor" and "builder" are synony mous: a "specialty contractor" is a contractor whose operations do not fall within the definition of "general contractor". Contractors are persons who undertake or bid for projects to construct, alter, repair, move or demolish a building, highway, road, railroad, or a type of fixed structure, including excavation, site development and erection of scaffolds.

[3]No contracting license is required for projects costing less than $200. A bond of three to ten times this amount is required for the licensing of applicants who have been a party to business infractions resulting in the revocatio their own or other contractors' licenses. Swimming pool contractors must post a bond of $10,000.

[4]If the responsible managing employee of a construction firm does not himself own at least 20 percent of the inte the firm, the managing employee may be required to post a $5,000 "qualifying individual" bond in addition to the $5,000 licensing bond.

[5]The bond takes the form of a Deposit to the Homeowners Construction Lien Recovery Fund. The amount of the bond i usually $50. Michigan requires a $1,000 bond before licensing nonresident electricians.

[6]No contracting license is required for public works projects costing under $5,000.

[7]Bonds are required for residential construction (building projects of up to four residential units). All construction trades satisfy the bond requirement for residential construction through the Builders Board.

[8]Washington plumbers must post bonds and apply for contracting licenses as general contractors if they let bids, supervise workers or perform more than two specialty trades.

Prepared by House Research Agency, February 1985.

SUMMARY OF CONSUMER COMPLAINTS
INVOLVING CONTRACTOR DISPUTES
Received by the Consumer Protection Section
Department of Law

Fiscal year 1984

We received a total of 136 consumer complaints in FY 84 that involved a contractor or specialty contractor. Six of those consumer complaint files are still pending in our section.

We recovered a total of $15,423.30 for consumers on these complaints. We estimate that we recover only about 10% to 20% of the money consumers claim is due them in these types of complaints, so that the amount actually claimed as consumer loss is estimated to have been approximately $75,000 - $150,000. Because of our questionable jurisdiction over real property transactions we believe many consumers do not file complaints with our office who otherwise would. Our overall recovery rate on all types of consumer complaints is near 50%.

Fiscal year 1985

To date in FY 85 we have received 114 consumer complaints and have recovered $15,448.31 for consumers. Of the 114 complaints filed in FY 85, 41 are still pending. We estimate the total value of these 114 claims as $60,000 - $100,000 on the same basis as explained in the FY 84 summary.

March 28, 1985

HB168- An act relating to construction contractors and providing for an effective date.
OVERVIEW prepared by Rep. John Sund's office

HISTORY OF THE BILL

As the law now stands, anyone wishing to work as contractor must have a license. General contractors must have a $5,000 bond and specialty contractors must have a $2,000 bond.

Little protection is provided to the consumer who receives shoddy work from an unlicensed contractor. He is likely to find that the contractor has left the state and did not post a bond. Also, an unlicensed contractor who does not comply with the law can operate more cheaply and is likely to outbid a licensed contractor.

Enforcement is the job of the Department of Commerce and Economic Development. However, enforcement has been lax for two reasons:
1) a lack of enforcement powers. Cease and desist orders can be issued to a contractor who does not have proper bonding or a license, but criminal prosecution is rare.
2) a lack of personnel. Once a cease and desist order has been issued, the investigator might not return to the site until work has been completed and the contractor has left. The department is not able to effectively monitor contractors at their current staffing level.

HB610, introduced in 1984, began as a vehicle for creating a Board of Builders and, as CSHB610, focused on changes which were substantially similar to HB168. It passed the House with a vote of 34 yeas and 6 nays and was left in the Senate upon adjournment.

PURPOSE OF THE BILL

Under CSHB168, a general contractor must post a $10,000 bond and a specialty contractor must post a $5,000 bond. This essentially doubles the current level required and will allow more adequate compensation for unacceptable work, since the licensing procedure in itself does not guarantee competency.

A contractor must show his registration number in all ads. This is intended to heighten consumer awareness of licensing and bonding requirements when choosing a contractor.

The Department of Commerce and Economic Development and the Department of Labor will have citation authority. They will have the authority to enter work sites to inspect licenses. Working without a license will be a Class B misdemeanor.

A $117,000 fiscal note provide 2 Investigator positions, in Anchorage and Fairbanks, and travel monies for two already existent Juneau positions, to enforce contractor requirements. These provisions will strengthen the enforcement of current regulations.

Bill No. Committee Substitute for House Bill No. 168 (L&C) Date March 29, 1985

Title "An Act relating to construction contractors; and providing for an effective date."

Contact: Eileen Plate

APR 1 5

Committee Substitute for House Bill No. 168 seeks to strengthen the contractor licensing enforcement powers of the Department of Labor and the Department of Commerce and Economic Development.

Currently, the Department of Commerce is responsible for the registration of construction contractors, with enforcement being provided by the Department of Labor. The Department of Labor's enforcement is primarily carried out in connection with other inspection/enforcement responsibilities (mechanical inspections, occupational safety and health inspections, and wage and hour investigations). This bill extends enforcement authority to the Department of Commerce in order that it may focus on residential construction and other areas where the Department of Labor is not highly visible. This would bridge the gap that presently exists in contractor licensing enforcement.

In addition, this bill increases the bonding requirements for both general and specialty contractors, and provides for the issuance of citations, the assessment of civil penalties, and the imposition of injunctive relief for violations of the contractor licensing laws.

The provisions of this bill are designed to combat the proliferation of unlicensed contractors in the state in order to better protect the public from unlicensed and unbonded construction contractors.

A section-by-section analysis of this bill is attached.

The Department of Labor supports passage of this bill. It will not have a fiscal impact on the Department.

APPROVED:

Jim Robison, Commissioner
Department of Labor

POSITION PAPER/- Position paper: Dept. of Labor

Department of Commerce & Economic Development / POSITION PAPER

CSHB 168 (L & C): An Act relating to Construction Contractors; and providing for an effective date.

The Department of Commerce and Economic Development supports CSHB 168 (L & C).

The committee substitute provides the Department of Commerce and Economic Development and the Department of Labor the authority to enforce unlicensed activity with a strong citation program.

Unlicensed activity in the area of construction contractors has been a rapidly growing problem. A joint effort by the departments will strengthen enforcement ability.

The bill also increases bonding requirements and adds additional requirements to mandate that a contractor identify the principal place of business, mailing address and license number.

CSHB 168(L&C) Sectional Analysis:

Section 1) Adds a new subsection which makes it unlawful for a general contractor to allow a specialty contractor to begin working for him, unless the specialty contractor is licensed.

Section 2) Adds a new subsection which prohibits the commissioner of DCED from issuing a new or renewal registration to a contractor whose registration is currently revoked or suspended, or who has an outstanding fine imposed under this chapter.

Section 3) Subsection (a) makes grammatical changes; subsection (b) and (c) add the principal place of business, the contractor's registration number, and the true name of the firm, to the list of items required in all advertising and contracts.

Section 4) Increases the bond requirements for general contractors from $5,000 to $10,000, and increases the bond requirements for specialty contractors from $2,000 to $5,000.

Section 5) Adds a new section which allows DCED and DOL the authority to investigate alleged violations of this chapter, to issue citations for violations, including the issuance of citations for each day a violation continues. This section also requires records of citations to be maintained by the commissioner, and that there be at least 5 days between the issuance of a citation and the notice to appear. A person failing to appear is guilty of a class "B" misdemeanor.

Section 6&7) reflect the dual authority of DCED and DOL

Section 8) Allows both the Commissioners of DCED and DOL to institute an injunctive proceeding in Superior court and impose a civil penalty not to exceed $250 for each violation of this chapter.

Section 9) Provides that an unlicensed contractor, or a general contractor who hires an unlicensed specialty contractor, is guilty of a class "B" misdemeanor (maximum 90 days jail/$1,000 fine).

Further provides that criminal prosecution does not preclude the departments from seeking civil remedies as well.

TESTIMONY OF RICHARD T. HALL
SENIOR VICE PRESIDENT, NATIONAL BANK OF ALASKA

Proposed SCS CSHB-217 (Labor and Commerce)

Mr. Chairman, my name is Richard T. Hall. I am Senior Vice President of National Bank of Alaska. My remarks today pertain to a proposed Senate Committee substitute for CSHB-217.

There are three banks offering credit card services in Alaska (1st National, Alaska National Bank of the North and National Bank of Alaska), and while I can only speak for National Bank of Alaska, we have discussed this legislation over the years and find we have similar views and support passage of this bill in its current form but may approach any rate change from a different philosophy.

Approximately 150,000 Alaskans who have VISA and Mastercharge cards issued by Alaska banks are not getting the full benefits of falling interest rates, a result of the way Alaska's laws on credit card interest rates are structured.

What's more, current state laws are placing Alaska banks who offer charge card services at a competitive disadvantage with new competition from out-of-state banks who have recently captured about half the Alaska credit card market and who, ironically, charge substantially higher rates than the local banks.

This results in Alaska banks being disadvantaged, local jobs jeopardized, and in consumers paying higher rates and getting less service than would be the case if we adopt HB217. Passage of this bill will allow the open market to establish rates.

Current law leads to the opposite of state policy that should promote consumer protection, local employment, and business development in Alaska.

Alaska's law - the problem

Alaska is one of the five states with laws restricting interest rates on charge cards that are, on the average, less than what they would be in the open market. But the real problem is not so much the limit, but the way the limit is structured.

Alaska has a "two-tier" limit, a top rate of 18% on the first $1,000 owed on local bank cards, and a lower rate on balances over $1,000 that "floats" at five points over the federal discount rate. Because the discount rate has been falling, this lower rate is now 12%.

Like any other price control, these limits create distortions and shortages in the marketplace. The shortage is in the ability of Alaska banks to offer lower-cost credit card services to local consumers, many of whom must turn to out-of-state cards which charge higher interest rates. Alaska law, therefore, results in service being denied to people the law is intended to protect. State laws do not apply to out-of-state banks who issue cards under more liberal laws of their home states. Some of these rates approach 20%. For example, Sears will charge 19.8% with its new "Discover" card and plans to aggressively promote the card nationwide in 1986. Bank of America charges 19.8% and even Citibank, the largest bank in the nation charges 19.8%.

But an almost bizarre distortion is this: The "two-tier" structure of the Alaska law creates a situation where a majority of card owners who carry relatively low balances on their cards pay the maximum 18% rate, while a minority of more affluent card owners can carry large balances at the lower 12% rate. In effect, they use the card as a source of cheap credit. In other words, the less affluent majority are subsidizing low credit card rates to a more affluent minority.

The solution

House Bill 217, now before you, would partly deregulate Alaska's limit on credit card interest rates by removing the lower limit on balances over $1,000. While the 18% maximum rate would remain. Actual rates on this portion today would fall in the current interest rate environment. This has happened in the other states with one uniform interest rate limit. It is also demonstrated in Alaska where, due to a technicality in the federal credit union statute, a credit union in Alaska is able to charge up to a legal maximum of 21%.

But in actuality, they are only charging 16.5%. This is one reason why, if current laws were changed, the majority of Alaskans with locally-issued bank cards could see a reduction, possibly to 16.5% or less.

But just as important, sufficient earnings would enable local banks to extend service to far more people. These are the people who would enjoy the greatest benefit under the change, since they would not have to buy or look for service to the more expensive or higher rate out-of-state cards.

With earnings now restricted, local banks are themselves restricted as to how widely they can offer card services. Credit card operations are much more complex and expensive to operate than conventional bank lending activity. Because of this, Alaska banks must be restrictive in the issuing of cards. The system results in people being turned away. Out-of-state banks, because they charge higher rates and have huge volumes, can afford to be less restrictive and, therefore, more competitive in Alaska.

Who wins? Who loses with passage of HB217

The winners would include most Alaska consumers and, yes, local banks who offer card services. The majority of those now holding Alaskan-issued bank cards would see a rate reduction. But the real winners are those now unable to get local cards who must buy cards from out-of-state banks. They would enjoy the most substantial gain.

Other winners would include those employees who work in the credit card and accounting departments of banks offering card services, whose jobs would be more secure because the banks can be more competitive against the out-of-state competition.

The losers? To some extent, a small number of those relatively more affluent Alaskans who can take advantage of the current system by using their credit cards as a source of inexpensive credit. For these people, rates would increase.

Other losers would include out-of-state banks, for certain. Alaska bank card services, with lower rates, would be able to serve far more people and capture back that portion of the market lost to the competition.

A 17-year perspective

National Bank of Alaska brought the VISA card to Alaska 17 years ago. We brought it because consumers demanded it for the convenience of its use. It was a service to smaller merchants, who could be relieved of the burden of carrying expensive credit service or accounts receivable in competing with larger retailers. And by providing the service, the local banks had hoped to make a profit.

Unfortunately, times have changed. The program no longer benefits the consumer, many of whom are driven to buy out-of-state cards at higher interest rates. Alaska banks have not attained their profit objectives and, further, have been put into a disadvantaged position against out-of-state card issuers. While merchants have benefited, they could benefit even more through this legislation.

If ever there was a state policy contrary to the spirit of Alaska-hire, benefits to the consumer, and local preference, we are now in that position. We urge you to pass this committee substitute.

SCS CSHB 217(L&C): Sectional Analysis (UPDATED TO REFLECT 5/2 CHANGES IN SCS)

Section 1) Amends the Small Loans Act by requiring a lender who violates the interest rate provisions of that act to reimburse the extra interest and charges. In the case of repeated violations, the commissioner may, after a hearing, require the lender to reduce the interest and charges to 10.5% per annum.

Section 2) Extends the same provisions of section 1 to the Premium Finance Act; i.e. reimbursal for interest charged in excess of the terms of that act, and after repeated violations, adjustment of the interest rate to 10.5%.

Section 3) Increases the interest rate on judgements and decrees from 10.5% to 14%.

Section 4) Repeals and reenacts the service charge provisions of the Retail Sales Installment Act by increasing the rate to 1.5% per month (18% per annum).

The 5/2 SCS eliminates the 1.5% per month interest rate and, and replaces that figure with a 17% per year interest rate.

Section 5) Concerns the "most favored lender doctrine" and states that Alaska declines to override the federal preemption provisions.

Section 6) July 1, 1986 effective date.

CHAIRMAN'S INFORMATION: CSHB 217(Jud)

1) BILL TITLE: " An act relating to interest rates on judgements and decrees, interest rates on agreements subject to the provisions of AS 06 and AS 45, and certain interest rate preemptions by the federal government; and providing for an effective date."

a) Introduced: Duncan, Pearce, Ringstad, Boucher

b) Co-sponsors:

2) INTENT: The L&C CS amends the Small Loans Act and the Premium Finance Act, increases the interest rate on judgements and decrees from 10.5% to 14%, and increases the service charge provision of the Retail Installment Sales Act to 1.5% per month or 18% per annum.

Section 5 of the CS states that Alaska declines to overide the federal "most favored lender doctrine".

SENATE CS FOR CS FOR HOUSE BILL NO. 217 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to interest rates on judgments and decrees, interest rates on agreements subject to the provisions of AS 06 and AS 45, and certain interest rate preemptions by the federal government; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 06.20.320(a) is amended to read:

(a) A licensee or lender who, in the making or collection of a loan contract, does any act <u>that</u> [WHICH] violates AS 06.20.230 - 06.20.260 or 06.20.280 - 06.20.310 shall at the option of the commissioner reimburse the portion of the interest and charges in excess of that provided in those sections, or, in the case of repeated violations of those sections by the licensee, the commissioner may, upon a hearing, require the licensee to adjust the loan contract interest or other charges down to <u>10.5 percent a year</u> [THE CONTRACT INTEREST LIMITATION SPECIFIED IN AS 45.45.010(a)].

* Sec. 2. AS 06.40.160(a) is amended to read:

(a) A lender who, in the making of any contract, loan or premium finance agreement or the collection of interest or charges, does any act <u>that</u> [WHICH] violates AS 06.40.010, 06.40.020, 06.40.090, or 06.40.110 - 06.40.130 shall at the option of the commissioner reimburse that portion of the interest and charges in excess of that provided in those sections, or, in the case of repeated violations of those sections by the lender, the lender shall adjust the contract,

loan, or premium finance agreement interest and other charges down to 10.5 percent a year [THE CONTRACT INTEREST LIMITATION SPECIFIED IN AS 45.45.010(a)].

* Sec. 3. AS 09.30.070 is amended to read:

Sec. 09.30.070. INTEREST ON JUDGMENTS. The rate of interest on judgments and decrees for the payment of money is 14 [10.5] percent a year, except that a judgment or decree founded on a contract in writing, providing for the payment of interest until paid at a specified rate not exceeding the legal rate of interest for that type of contract, bears interest at the rate specified in the contract if the interest rate is set out in the judgment or decree.

* Sec. 4. AS 45.10.120(c) is repealed and reenacted to read:

(c) A seller or holder of a retail charge agreement, revolving charge agreement or other retail charge agreement may charge, receive and collect a service charge computed on the outstanding balance from month to month at a monthly rate that results in 17 percent a year. If the service charge so computed is less than $1 for any month, then the service charge is $1. The service charge may be computed on a schedule of fixed amounts if as so computed it is applied to all amounts of outstanding balances equal to the fixed amount minus a differential of not more than $5 provided that it is also applied to all amounts of outstanding balances equal to the fixed amount plus at least the same differential.

REPHRASED

* Sec. 5. AS 45.45 is amended by adding a new section to read:

Sec. 45.45.015. ELECTION NOT TO OVERRIDE FEDERAL PREEMPTION. In accordance with Section 525 of P. L. 96-221 (the Depository Institutions Deregulation and Monetary Control Act of 1980), the state declines to override the federal interest rate preemption provisions contained in Sections 521, 522, and 523 of that act.

* Sec. 6. This Act takes effect July 1, 1986.

The service charge may be computed on a schedule of fixed amounts if as so computed it is applied to all amounts of outstanding balances equal to the fixed amount minus a differential of not more than $5 provided that it is also applied to all amounts of outstanding balances equal to the fixed amount plus at least the same differential.

* Sec. 6. AS 45.45.010(b) is amended to read:

(b) Interest may not [NO INTEREST MAY], be charged by express agreement of the parties in a contract or loan commitment which for

loans of $10,000 or under is more than six and one-half [FIVE] percentage points and for loans over $10,000 and not more than $25,000 is more than 10 percentage points above the annual rate charged member banks for advances by the 12th Federal Reserve District on the day on which the contract or loan commitment is made. A contract or loan commitment in which the principal amount exceeds $25,000 is exempt from the limitation of this subsection.

* Sec. 7. AS 45.45 is amended by adding a new section to read:

Sec. 45.45.015. ELECTION TO OVERRIDE FEDERAL PREEMPTION. In accordance with Section 525 of Public Law 96-221 (the Depository Institutions Deregulation and Monetary Control Act of 1980), the state declares that it overrides the federal interest rate preemption provisions contained in the following sections of that act:

(1) section 521, which amends the Federal Deposit Insurance Act (12 U.S.C. 1811-1832) with respect to the interest rate that may be taken, received, reserved, or charged on a loan or discount made, or on a note, bill of exchange, or other evidence of debt, by foreign bank branches and state-chartered banks that are insured in accordance with that act;

(2) section 522, which amends subchapter IV of the National Housing Act (12 U.S.C. 1724-1730g) with respect to the interest rate that may be taken, received, reserved, or charged on a loan or discount made, or on a note, bill of exchange, or other evidence of debt, by institutions that are insured under that subchapter; and

(3) section 523, which amends section 205 of the Federal Credit Union Act (12 U.S.C. 1785) with respect to the interest rate that may be taken, received, reserved, or charged on a loan by a credit union that is insured in accordance with subchapter II of the Federal Credit Union Act (12 U.S.C. 1781 - 1790).

* Sec. 8. This Act takes effect July 1, 1985.

Dear Clem:

Re: Herring Stripping

I have been asked by your local representa... provide comment on current restrictions ... dumping in Prince William Sound.

As I understand the current interpretation of the statute concerning wastage of fish and game resources, "waste" of herring is defined as failure to use the carcass for things such as reduction to meal, fish or domestic animal food, human consumption, bait, etc.

I understand your company is currently supporting legislation to legalize dumping as an alternative primarily for economic reasons. I'll just relay a few observations on the situation:

1. The current restrictions pose a serious financial burden on herring processors. The economics of fully utilizing herring carcasses are at best marginal and in many cases prohibitive. Also, Japanese import quotas on round herring can present real market limitations.

2. The current restrictions significantly affect several coastal communities in Alaska in that they in effect make it non-profitable to strip locally and thus preclude the positive economic benefits of local processing.

3. The sac-roe fishery is an extremely important one both in timing and in the magnitude of economic benefits

4. Deep water dumping is probably one of the most economic alternatives available to processors.

5. Deep water dumping of stripped carcasses would not, in a strict marine ecological sense, constitute "waste" of organic material. The biochemical constituents of the carcasses will be rather quickly reincorporated into the marine food web that supports biomass production. If carcasses are dumped in deep water, a number of mechanical (wave action, turbulence, etc.), biological (bacterial digestion, grazing by other zooplankters and fish), and chemical (oxidation, etc.) processes will within a relatively short amount of time degrade all the material into its basic organic components which will then be reincorporated into either the benthic (bottom) or pelagic (water column) food webs. Such an addition of nutrients, especially the nitrates from degraded amino acids and proteins, could enhance phytoplankton production on a very limited scale, since most oceanic phytoplankton production seems to be limited by available sources of nitrate. It would be, in effect, fertilizing a very, very small volume of ocean water. The degradation process would be sped along by grinding the carcasses but will occur even if they are not ground. Larger chunks of carcasses might make their way into benthic food webs via crabs or bottom feeding fishes such as black cod, halibut, rockfish, etc. In a strict sense, the nutrient balance of Prince William Sound is being upset by continual removal of organic nutrients incorporated into both salmon and herring and could possibly even exceed the rate of usable nutrient input at specific times and places. If such a situation does indeed exist, then these localized nutrient deficits could actually be limiting the overall productivity of the Sound for things such as wild and hatchery-reared salmon fry, herring, etc. Any reintroduction of nutrients removed by commercial fishing, if done in the proper manner, could only help the productivity of the sound. The University of Alaska Institute of Marine Science presently is involved in a multi-

institution program to study just such a process of nutrient cycling in the Bering Sea. The project is called ISHTAR.

6. The main issue in "wastage" of herring carcasses seems to be more moral/ethical than biological.

7. It would probably be to the long-term economic advantage of Alaskan processors to develop an economical means of fully utilizing herring carcasses, i.e., meal, ensiling, etc. I would be glad to help you analyze any of these alternatives.

If you have any questions on any of this or need any additional information, please give us a call.

Sincerely,

Rick Steiner

RICK STEINER
Assistant Professor of Fisheries

Alaska State Legislature
HOUSE OF REPRESENTATIVES
COMMITTEE ON RESOURCES

POUCH V
JUNEAU, ALASKA 99811
(907) 465-3715

LETTER OF INTENT FOR HOUSE BILL 229

March 29, 1985

It is the intent of the Legislature that the approval process by the Alaska Department of Fish and Game for operations permitted under Section 1 be kept as simple as possible. The Commissioner should base his authorization upon a letter from the operator of the processing plant which details specific plans to operate in accordance with applicable state laws and regulations.

It is also the intent of the Legislature that an ongoing assessment of economically feasible alternatives for the use of herring carcasses should be a priority within existing fisheries programs of the administration, particularly the Department of Commerce. This priority should be made because of (1) the changing economics of the herring industry which sometimes make it impossible for local citizens in some areas of the state to derive benefits from utilization of the herring resource under current Alaska Statutes, (2) the current lack of economically feasible processing alternatives for the developing Bering Sea herring fisheries, and (3) the tremendous potential for increase in employment in Alaska's processing industry, statewide, which might be realized through such ongoing research.

It is the intent of the Legislature that the Department of Commerce will report to the Legislature by the fifteenth day of the first regular session of each legislature, with this information.

Adelheid Herrmann

Representative Adelheid Herrmann
Co-Chairman, House Resources Committee

March 29, 1985

Date

[redacted] Letter of Intent

Adopted by House 4/1/85

HISTORY OF HB 229

To: House Resources Committee Files
From: Janet Fries, Committee Aide
Date: March 17, 1985

AS 16.10.172 and 173, the statutes which prohibit the waste of carcasses from herring that have been stripped of roe, were passed by the Legislature in 1977. Section 173 included an exception from these statutes for the Bering Sea until January 1, 1979, because there was little or no infrastructure for the developing herring fishery in this area to support the processing of herring without disposal of the carcasses.

During the 1978 and 1979 herring seasons, many processors in the state who were not equipped to either freeze the roe herring whole or near enough to a reduction plant to have it reduced to fish meal economically, shipped the herring whole, lightly salted, to Japan. This herring was stripped for roe in Japan, Alaska fishermen and processors were paid less for it, and Japanese labor was used to process it, thus leaving Alaska with little economic benefit from this fishery.

In 1980, the Legislature passed Section 1, ch. 27, SLA 1980, Legislative Findings and Policy on Herring Stripping. This law did three things:

(1) It created the language which appears in the statutes (although it is not part of the statutes) following AS 16.10.172. These findings report that in some circumstances, stripping herring may provide such important economic benefits to the state that they may outweigh the waste involved in the process.

(2) It created an exception from the stripping law for the Bering Sea only from September 1, 1980 to July 1, 1982.

(3) This law also added AS 16.10.175 to the statutes, which prohibits removal of herring from the state before it is processed. This was done to solve the problem of herring being shipped from Alaska with little or no processing, that was created when the stripping statutes first became effective.

In 1983, the Legislature passed House Bill 267 which became Chapter 14 SLA. This bill created a third exception from the stripping law for the Bering Sea only until July 1, 1984, because the herring fishery was still developing in western Alaska and there was still no freezing capacity or reduction plant to support many local processing operations.

Analysis:

HB 260 seeks to repeal an AS16.10.173 exception which allows the roe of commercially harvested herring in the Bering Sea to be stripped and the carcasses disposed of in the Bering Sea. HB 229 seeks to extend that exception through July 1, 1988.

If either bill is enacted, the impacts on state programs and funding requirements will be negligible. The only foreseeable direct costs to the state would involve Board of Fisheries time allocated to public hearing and regulatory considerations, and these should represent comparatively insignificant time and cost requirements under either bill.

Should the exception be repealed (HB 260), some herring fishermen who have traditionally taken herring roe in the Bering Sea by allowing the flesh to decompose prior to roe stripping would have to conform to freezing techniques. While this prevents wastage of the flesh, it may increase capital and processing costs for the affected fishermen and processors and thereby reduce fisherman profits. Some minor impacts to local economics could therefore occur.

5 AAC 27.070. REGISTRATION AND INSPECTION DOCUMENTS. Repealed 4/14/82.

ARTICLE 3.
PROHIBITIONS

Section
90. Unlawful possession of herring or herring gear
92. Unlawful acts within an adjacent seaward biological influence zone
93. Disposal of herring
95. General restrictions
96. Violation of reporting requirements
97. Violation of landing requirement
98. Violation of regulations

5 AAC 27.090. UNLAWFUL POSSESSION OF HERRING OR HERRING GEAR. (a) It is unlawful for any person to possess unprocessed herring aboard a vessel licensed as a commercial fishing vessel within any statistical area unless the season is open or unless the person is acting under the authorization of 5 AAC 27.030(b). This prohibition does not apply to herring possessed for subsistence or personal bait purposes under applicable cable regulations.

(b) It is unlawful for any person to possess aboard a vessel licensed as a commercial fishing vessel within any statistical area any herring or any gear used in the taking of herring if the herring or herring gear are prohibited by other regulations in 5 AAC 27 governing the area, unless the vessel is acting under the authorization of 5 AAC 27.030(b).

(c) It is unlawful for any person to possess, purchase, sell, barter, or transport herring within the state or within waters subject to the jurisdiction of the state if that person knows or has reason to know that that herring was taken or possessed in contravention of the regulations of this chapter. (In effect before 1982; am 4/14/82, Reg. 82)

Authority: AS 16.05.251(a)(4),(7) and (10)
AS 16.05.720
AS 16.05.900
AS 16.05.920

5 AAC 27.092. UNLAWFUL ACTS WITHIN AN ADJACENT SEAWARD BIOLOGICAL INFLUENCE ZONE. It is unlawful for any person to take, attempt to take, cause to be taken, or possess herring, or to operate, attempt to operate, or cause to be operated any vessel or gear or to possess any gear or to take, attempt to take, cause to be taken, or fail to take any action in violation of 5 AAC 27.010(b).

Authority: AS 16.05.251(a)(4),(7) and (10)
AS 16.05.720
AS 16.05.900
AS 16.05.920

5 AAC 27.093. DISPOSAL OF HERRING. In statistical areas N, T, W and Q, herring carcasses may be disposed of only as follows:

(1) any vessel with less than 5 metric tons of herring on board may only dump herring carcasses in waters more than five fathoms in depth;

(2) any vessel with five metric tons or more of herring on board may only dump herring carcasses in waters more than three miles from the mainland;

(3) or as specified by a permit issued by the Department of Environmental Conservation.

Authority: AS 16.05.251(a)(7)
AS 16.10.172–16.10.173

5 AAC 27.095. GENERAL RESTRICTIONS. A person shall obtain a permit from the department before taking herring during the period June 15 through February 28 in statistical areas K, L, M and N. (In effect before 1982; am 4/14/82, Reg. 82)

Authority: AS 16.05.251(a)(2) and (7)

5 AAC 27.096. VIOLATION OF REPORTING REQUIREMENTS. (a) It is unlawful for any person to file a fish ticket representing the catch governed by the fish ticket as having been taken in a particular statistical area when in fact the catch or part of the catch were taken in another statistical area.

(b) It is unlawful to file any fish ticket containing information which has been purposely falsified.

Authority: AS 16.05.251(a) AS 16.05.900
AS 16.05.690 AS 16.05.920
AS 16.05.720

5 AAC 27.097. VIOLATION OF LANDING REQUIREMENT. It is unlawful for any vessel

Article 3. Herring Spawn.

Section
172. Legislative policy on utilization of herring
173. Utilization of commercially taken herring
175. Removal of herring from state

Sec. 16.10.140 — 16.10.170. Taking of herring spawn; exceptions; certain restrictive covenants; penalties. [Repealed, § 2 ch 91 SLA 1970.]

Sec. 16.10.172. Legislative policy on utilization of herring. The legislature finds the following: (1) extensive and valuable herring populations are available for harvest in waters subject to the jurisdiction of the state; (2) commercial markets are available for herring processed in several forms; (3) one processing technique presently employed involves deliberately permitting decomposition of the herring carcass to allow for removal and subsequent sale of the roe product, with the consequence that the flesh is unusable and discarded. The legislature declares that the process referred to in (3) of this section is wasteful and does not constitute utilization of this resource for the maximum benefit of the people. Therefore, it is the policy of the legislature that this process should be eliminated to the fullest extent possible. (§ 1 ch 9 SLA 1977)

Editor's notes. — Section 1, ch. 27, SLA 1980 provides: "LEGISLATIVE FINDINGS AND POLICY ON HERRING STRIPPING. (a) Notwithstanding AS 16.10.172, the legislature finds that in certain circumstances the processing technique described in AS 16.10.172(3), commonly referred to as "stripping", provides benefits of such importance to the state economy that the benefits may outweigh the waste involved in the process.

"(b) It is the policy of the legislature that notwithstanding AS 16.10.173 the disposal of herring carcasses is acceptable only if

"(1) the herring is taken from waters in which the herring population is large enough to support a stripping industry without substantially reducing the availability of the herring for other uses; and

"(2) the stripping process is conducted in an area of the state where local industry either does not exist or, if it does exist, it is insufficient to provide reasonable economic support to the people who live in the area."

Sec. 16.10.173. Utilization of commercially taken herring. (a) A person may not waste or cause to be wasted any commercially taken herring. For purposes of this subsection, "person" has the meaning given in AS 01.10.060 and also includes a joint venture.

(b) As used in this section, "waste" means the failure to use the flesh of commercially taken herring for reduction to meal, production of fish food, human consumption, food for domestic animals, scientific or educational purposes, or round herring bait. Normal, inadvertent loss of flesh associated with the uses described in this subsection which cannot be prevented by practical means does not constitute waste. The com-

missioner may authorize other uses of commercially taken herring consistent with the intent of this section and AS 16.10.172 upon receipt of a request accompanied by a detailed justification.

(c) For purposes of this section, "flesh" means all muscular body tissue surrounding the bony skeleton of the herring.

(d) The Board of Fisheries may adopt regulations under the Administrative Procedure Act (AS 44.62) it considers necessary for implementation of this section. The board may delegate its authority under this section to the commissioner.

(e) The provisions of this section do not apply to herring taken commercially in the Bering Sea (including appurtenant bays, sounds, estuaries, and water of the state) north of 56° North Latitude, until January 1, 1979. (§ 1 ch 9 SLA 1977)

Editor's notes. — Section 1, ch. 14, SLA 1983 reads as follows:

"Section 1. HERRING STRIPPING. (a) Notwithstanding AS 16.10.173 and until July 1, 1984, the stripping of commercially taken herring for the purpose of removing and selling the roe product is authorized if the herring is taken from and the carcass disposal process occurs in the Bering Sea.

"(b) The Board of Fisheries shall adopt regulations in accordance with the Administrative Procedure Act (AS 44.62) regarding disposal of herring carcasses for each administrative area where disposal occurs.

"(c) The provisions of AS 46.03.100 apply to the disposal of herring carcasses under this section."

Sec. 16.10.175. Removal of herring from state. (a) A person may not remove herring from the state before the herring has been frozen or otherwise processed for shipment.

(b) In this section, "processed for shipment" includes, but is not limited to, icing, stripping or salting of the herring; however, it does not include salting of the herring if five percent or more of the body weight of the herring consists of roe. (§ 3 ch 27 SLA 1980)

Article 4. Migratory Fish and Shellfish.

Section
180. Legislative findings
190. Regulations
200. Unlawful taking prohibited
210. Unlawful sale or offer prohibited
220. Penalties for violation of AS 16.10.200 and 16.10.210
230. Exemptions

Sec. 16.10.180. Legislative findings. The legislature finds and recognizes these facts:

(1) Migratory fish and migratory shellfish are present in commercial quantities inside and outside the territorial waters of the state.

(2) Migratory fish and migratory shellfish taken from the waters of the state are indistinguishable, in most cases, from those taken from the adjacent high seas.

(3) Substantial quantities of migratory fish and migratory shellfish move inshore and offshore intermittently and at various times during

Sec. 46.03.090. Plans for pollution disposal. The department may require the submission of plans for sewage and industrial waste disposal or treatment or both for a publicly or privately owned or operated industrial establishment, community, public or private property subdivision or development. (§ 3 ch 120 SLA 1971)

Sec. 46.03.100. Waste disposal permit. (a) A person who conducts an operation which results in the disposal of solid or liquid waste material or heated process or cooling water into the waters or onto the land of the state must procure a permit from the department before disposing of the waste material or water. The permit must be obtained for direct disposal and for disposal into publicly operated sewerage systems.

(b) This section does not apply to a person discharging only domestic sewage into a sewerage system.

(c) A permit for disposal of a hazardous waste may not be issued under this section unless the applicant for the permit has furnished proof to the commissioner of financial ability to control the hazardous waste. Proof of financial responsibility may be demonstrated by self-insurance, insurance, surety, or guarantee, under regulations issued by the department. Acceptance of proof of financial responsibility under this subsection expires

(1) one year from its issuance for self-insurance;

(2) on the effective date of a change in the surety bond, guarantee, or insurance agreement; or

(3) on the expiration or cancellation of the surety bond, guarantee, or insurance agreement. (§ 3 ch 120 SLA 1971; am § 3 ch 220 SLA 1976; am § 9 ch 93 SLA 1981)

Cross references. — As to compliance with financial responsibility requirements, see AS 46.03.833.

Effect of amendments. — The 1981 amendment added subsection (c).

Opinions of attorney general. — This section confers upon the Department of Environmental Conservation permit authority over dredge or fill activities, including residential subdivisions, within wetlands, estuaries, and inland and coastal marshes periodically inundated by discernible bodies of fresh or salt water upland from the mean high tide line to the extent of the aquatic or salt water vegetation line. November 13, 1975, Op. Att'y Gen.

Dredge or fill activities in coastal and fresh water wetlands shoreward to the aquatic vegetation line to result in the disposal of solid waste material into the waters of the state within the meaning of this section and thus, to the extent that these activities are of a commercial or industrial nature, do require a permit from the Department of Environmental Conservation. November 13, 1975, Op. Att'y Gen.

Sec. 46.03.110. Waste disposal permit procedure. (a) An application for a permit shall be made on forms prescribed by the department or on forms prescribed by the United States Environmental Protection Agency and shall contain the name and address of the applicant, a description of his operations, the quantity and type of waste material sought to be disposed of, the proposed method of disposal, and

any other information considered necessary by the department. Application for permit shall be made at least 60 days before commencement of a proposed discharge.

(b) Upon receipt of a proper application the department shall publish notice of the application in two separate publications of a newspaper of general circulation within the general area in which the disposal of waste material is proposed to be made. The notice may also be published in other appropriate information media. The notice shall include a statement that a person who wants to present his views to the department in regard to the application may do so in writing to the department within 30 days of the second publication of the notice. The written response entitles the writer to a copy of the application.

(c) When the department receives an application, the commissioner shall immediately send copies of the application to the commissioner of fish and game, the commissioner of natural resources, the commissioner of commerce and economic development and the commissioner of health and social services.

(d) The department may specify in a permit the terms and conditions under which waste material may be disposed of. The terms and conditions shall be directed to avoiding pollution and to otherwise carry out the policies of this chapter. No permit may be effective for a period in excess of five years from the date of issuance.

(e) If the department has certified a National Pollutant Discharge Elimination System permit under sec. 401 of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. sec. 1341), and the United States Environmental Protection Agency has issued that permit to a person, the department may waive the requirements of this section, and adopt the federal permit as the permit required under AS 46.03.100. (§ 3 ch 120 SLA 1971; am § 6 ch 104 SLA 1971; am § 116 ch 218 SLA 1976; am §§ 4, 5 ch 220 SLA 1976)

Opinions of attorney general. — This section requires no more than that the Department of Environmental Conservation allow a 30-day public comment period, and that it fully and completely review those comments on receipt. June 11, 1975. Op. Att'y Gen.

The Department of Environmental Conservation cannot issue a waste disposal permit prior to expiration of the 30-day public comment period. June 11, 1975. Op. Att'y Gen.

If the Department of Environmental Conservation has reviewed and considered all public and agency comments prior to the expiration of the 60-day period, and has also completed the preparation of the permit itself within that period, it would be competent for the department to waive the remainder of the 60-day "pre-commencement" period, and issue the permit at that time. June 11, 1975. Op. Att'y Gen.

The public comments received pursuant to subsection (b) of this section function similarly to environmental impact statements for federal agencies contemplating major federal actions significantly affecting the quality of the environment. June 11, 1975. Op. Att'y Gen.

Sec. 46.03.120. Termination or modification of waste disposal permit. (a) The department may terminate a permit upon 30 days written notice if the department finds

State Capitol
Juneau, Alaska 99811

CSSSHB 229(Res)am Sectional Analysis:

Section 1) Authorizes herring stripping until July 1, 1986, under the following conditions:

1) herring taken from the Bering Sea or the Prince William Sound Area;

2) carcass disposal process must occur in the Bering Sea or Prince William Sound area;

3) prior authorization must be obtained from the commissioner of ADF&G. The commissioner may authorize the disposal of herring carcasses in the Bering Sea or Prince William Sound Area if the person submits an operational plan demonstrating intent to comply with herring stripping prohibitions by July 1, 1986.

b) Board of Fisheries shall adopt regs regarding the disposal of herring carcasses for each administrative area where the disposal occurs.

c) DEC waste disposal permit does [redacted] apply to the disposal of herring carcasses under this section

Section 2) Repeals section 1 (b), CH 27, SLA 1980 See editor's notes beneath AS 16.10.172 "LEGISLATIVE FINDINGS AND POLICY ON HERRING STRIPPING" in each members packet.

COST OF TRANSPORTING HERRING CARCASSES TO SEWARD FISH MEAL PLANT

To: House Resource Committee Files
From: Janet Fries, Committee Aide
Date: March 27, 1985

Source of Carcasses	PWS	Cook Inlet and Kodiak	Bering Sea
Transportation to Seward by tender[1]	$15/ton[2]	$20/ton[2]	$115 - 240/ton[3]
Offloading charge at Seward Fisheries Fish Meal Plant[4]	10/ton	10/ton	10/ton
Total	$25/ton	$30/ton	$125 - 250 /ton

1. These are estimated costs by sources noted.

2. Source: Mike Meehan, Manager, Seward Fisheries Fish Meal Plant, Seward, based on actual deliveries made during the 1984 herring season. The figures have been rounded to the next higher $5. Since no deliveries were made to the Seward plant from the Bering Sea in 1984, another method of determination was used for those estimates, as noted below. Note that when the figures used to determine a probable range of costs for the Bering Sea are used to estimate the Kodiak and Cook Inlet tendering costs, the lower end of the range is well within the figures cited by Meehan, but the upper range is slightly higher. The reason for this is probably because of the high availability of tendering vessels for hire in both of these areas at this time.

3. Source: Range estimates are based on ranges of costs for each of the transportation variables noted below, made by Tom King, Icicle Seafoods, Seattle. Tendering rates for 100 ft. vessels are approximately $1,800 - 2,400 / day, plus fuel costs @ $500 - 800 / day. Vessels hold a range of 150 - 250 tons of carcasses. The trip from Togiak to Seward is approximately 5 days, however, because most of the tenders in Togiak either travel north after the herring season to Norton Sound, or stay in Bristol Bay to tender the salmon season, it is necessary to compute a round trip, or 10 days of tender time. The trip from Norton Sound to Seward is approximately 10 days, however, all the tenders avsilable in Norton Sound after the herring fishery would most likely be heading back to Bristol Bay for the salmon season, so the round trip to Seward would be approximately 15 days.

4. Seward Fisheries charges $10/ton to offload fish waste at their dock in Seward.

FISCAL IMPACT: ☐ NONE ☐ FISCAL NOTE ATTACHED

BACKGROUND/LEGISLATIVE INTENT

Except for 1984, similar legislation has been in effect since about 1979. The intent is to allow this activity until full processing can take place. Most roe herring are now frozen on the grounds, with a small amount being transported to locations such as Kodiak for shoreside reprocessing. It is this product that is stripped on the grounds.

ANALYSIS OF BILL/PROGRAM EFFECTS

None. Regulations governing herring carcass disposal in the Bering Sea are still in effect; see 5 AAC 27.093.

AMENDMENTS PROPOSED

None.

ABSTRACT

A total of 22,743 metric tons (mt) of Pacific herring and 202 mt of spawn on rockweed kelp (Fucus sp.) was harvested in eastern Bering Sea commercial fishing districts during 1984. This was the third largest Pacific herring harvest recorded in the history of these fisheries. Estimated total value of harvests to fishermen was $8.9 million. Average roe recovery from commercially harvested Pacific herring was 9.8% yielding about 2,229 mt of roe. Approximately 17% of the total estimated Pacific herring biomass of 139,000 mt within the commercial Pacific herring fishing districts was harvested. Subsistence fishermen representing at least 46 families from Yukon River delta villages harvested an estimated 10 mt of Pacific herring. Age 6 and 7 Pacific herring (1978 and 1977 year classes) comprised 29% and 41%, respectively, of the total run and 32% and 46%, respectively, of the total catch. Season openings in Togiak, Security Cove, Goodnews Bay and Cape Romanzof Districts were regulated through Emergency Order during 1984. This allowed a more controlled fishery, enhanced roe yield, resulted in minimal wastage and allowed the Department to make periodic reassessments of the resource. Total spawn sightings for all areas was a record 205 linear kilometers (km) of milt. Due to the continued large returns of age 6 and 7 Pacific herring in 1984, harvestable surpluses of Pacific herring should be available in all districts in 1985. Management strategies for 1985 will be similiar to those followed during 1984.

INTRODUCTION

The objectives of this report are to: 1) provide results from 1984 Pacific herring stock assessment programs, 2) review and evaluate 1984 harvests and management strategies for all commercial fishing districts and the Yukon - Kuskokwim River delta subsistence fishery, and 3) present management strategies for the 1985 Pacific herring fishing season.

A total of 22,743 metric tons (mt) of Pacific herring and 202 mt of spawn on rockweed (Fucus sp.) and 3 mt of imported kelp (Macrocytis sp.) were harvested in eastern Bering Sea commercial fishing districts during 1984 (Table 1, Figures 1 and 2). This was the third largest Pacific herring harvest recorded in the history of these fisheries (Table 2). The spawn on rockweed kelp harvest was about average for the period 1976 - 1983 (average 152.2 mt, range 108.2 - 209.1 mt) (Table 3). Estimated value of total harvests to fishermen was $8.9 million. Wastage of Pacific herring was estimated to be less than 300 mt. Most wastage was due to abandoned gear and loss of gear to sea ice movement rather than to dumping of unwanted Pacific herring. Spawn on kelp wastage appeared to have been minimal. In the sac roe fishery, the number of fishermen increased in Togiak, Goodnews Bay and Cape Romanzof Districts but decreased from 1983 levels in all other districts (Table 4). Twenty-five buyers participated in the fishery compared to 23 during 1983. In the spawn on kelp fishery, the number of pickers nearly tripled in the Togiak District and decreased slightly in the Norton Sound District (Table 3). The number of kelp buyers increased in the Togiak and Norton Sound Districts. Average percent roe recovery from harvested Pacific herring ranged from 8.6 in Cape Romanzof to 11.8 in Security Cove District (Table 2). Percent harvest of estimated Pacific herring biomass ranged from 6.4 in Security Cove to 19.5 in Cape Romanzof District.

Subsistence fishermen representing at least 46 families from three Yukon River delta villages harvested an estimated 10 mt of Pacific herring (Table 5). No subsistence surveys were conducted in Nelson Island or Kuskokwin River delta villages.

The total estimated spawning Pacific herring biomass of 155,100 mt for the surveyed portion of the eastern Bering Sea was lower than the 1983 estimate (Table 6). Recruitment of age 4 Pacific herring (1980 year class) during 1984 was below that documented for age 4 Pacific herring in 1983 (1979 year class).

SEASON SUMMARY

Stock Status

Assessment Methods

Aerial surveys were flown throughout the Pacific herring spawning season in all commercial fishing districts to determine relative abundance, distribution and biomass of spawning Pacific herring. Occurrence and extent of milt, numbers of fishing vessels, and visibility factors affecting survey quality were also recorded. Data collection methods were similiar to those used since 1978. A total of 172 hours (h) was spent in aerial surveys: 83 h in Togiak,

20 h in Security Cove - Goodnews Bay, 8 h in Nelson - Nunivak Islands area, 2 h in Cape Romanzof and 59 h in Norton Sound. Weather and sea conditions were generally fair to good in Togiak and Norton Sound Districts. Storms and turbid water hampered survey coverage much of the season in all other districts.

Standard conversion factors of 1.2 (water depth 5 meters (m) or less), 2.5 (water depth greater than 5 m) and 3.0 mt/50 m2 (water depth greater than 8 m) were used to convert estimated Pacific herring school surface areas to biomass within all districts.

Test fishing with variable mesh gillnets and sampling of commercial landings were conducted in all fishing districts to determine age, size and sexual maturity of Pacific herring and to estimate occurrence and relative abundance of other schooling fishes. Additionally, volunteer purse seine and gillnet vessels collected Pacific herring samples within Togiak District. This information was used during post-season analysis to interpret and modify aerial survey biomass data.

Ground surveys were conducted in most districts to obtain information on the distribution and density of kelp beds and Pacific herring spawn deposition.

Spawning Populations

Togiak District

A total of 37 aerial surveys was flown on 33 days during the 1984 season, from 19 April - 4 June. Half of these surveys were made under fair to excellent conditions.

Test fishing with variable mesh gillnets was conducted from 1 - 29 May. A total of 1,083 Pacific herring was sampled from these catches. Pacific herring comprised 85% of the total catch of pelagic schooling fishes. Test fishing with purse seine gear from volunteer vessels was conducted from 5 - 15 May. A total of 1,321 Pacific herring was sampled from 18 different sets. Test fishing aboard volunteer gillnet vessels was conducted from 11 - 18 May. A total of 268 Pacific herring was sampled. The commercial harvest was sampled from 19 - 21 May. A total of 1,267 and 1,109 Pacific herring was sampled from seine and gillnet catches, respectively.

The in-season Pacific herring biomass was estimated to be 96,100 mt. Analysis of data from aerial surveys, test fishing and commercial harvests resulted in a post-season Pacific herring spawning biomass of 104,200 mt (Table 6). Approximately 73% of the total biomass was composed of age 6 and 7 Pacific herring (1978 and 1977 year classes respectively) (Figure 3). Age 4 Pacific herring (1980 year class) accounted for less than 2% of the biomass. Although the relative proportion of young, newly recruited Pacific herring (age 4 and less) showed a slight increase as the season progressed, it was not possible to identify separate abundance peaks for young and old age (age 5 and greater) Pacific herring.

Spawn deposition appeared to be extensive. A record total of 99 linear kilometers (km) of milt was observed in 171 sightings during aerial surveys with most spawn occurring 18 - 19 May.

Security Cove District
A total of 24 aerial surveys was flown on 16 days during the 1984 season, from 28 April - 1 June. About one-third of these surveys were made under fair to excellent conditions.

Test fishing was conducted during 5 May - 2 June. A total of 1,002 Pacific herring was sampled from these catches. Pacific herring comprised 85% of the total catch of schooling fishes.

During the season, Pacific herring biomass was estimated to be 4,000 mt. A post-season estimate of 4,600 mt was obtained based on post-season aerial surveys and analysis of data from test fishing (Table 6). Age 6 and 7 Pacfic herring represented 71% of the sampled population (Figure 3). Age 4 Pacific herring comprised about 1% of the population. A total of 13 linear km of milt was observed during aerial surveys.

Goodnews Bay District
A total of 15 aerial surveys was flown on 14 days during the 1984 season, from 28 April - 1 June. Survey conditions were the best on record with about 40% of these surveys made under fair to excellent conditions.

Test fishing was conducted from 6 May - 2 June. A total of 719 Pacific herring was sampled from these catches. Pacific herring comprised 70% of the total catch of schooling fishes. During the season, the Pacific herring biomass was estimated to be 3,300 mt. Further aerial surveys and analysis of data from test fishing resulted in a post-season biomass estimate of 3,700 mt (Table 6). Approximately 73% of the total biomass was composed of age 6 and 7 Pacific herring (Figure 3). Age 4 Pacific herring accounted for about 1% of the biomass. A total of 11 linear km of milt was observed during aerial surveys.

Nelson - Nunivak Islands Area
Three aerial surveys were flown during the 1984 season on 30 May, 2 and 15 June. Survey conditions were fair to excellent on all surveys.

No test fishing was conducted in the Nelson Island area. However, a total of 594 Pacific herring was sampled from subsistence catches.

Pacific herring biomass was estimated to be 10,000 mt for Nelson Island and 6,074 mt for Nunivak Island (Table 6). Totals of 10 and 3 linear km of milt were sighted during aerial surveys of Nelson and Nunivak Islands, respectively.

Age 6 and 7 Pacific herring comprised 78% of the subsistence catch (Figure 4).

Cape Romanzof District
A total of two aerial surveys was flown on 2 days during the 1984 season on 30 and 31 May. Under fair surveys conditions, the biomass in Scammon Bay was estimated to be 3,300 mt. Turbid water conditions within Kokechik Bay precluded assessment of that area. Test fishing was conducted during 25 May - 17 June. A total of 764 Pacific herring was sampled from these catches. Pacific herring comprised 94% of the total catch of schooling fishes.

Although aerial survey results could not be used to estimate total biomass, test fishing study results and commercial harvest rates indicated that Pacfic herring were probably slightly more abundant than in 1983. Therefore, a post-season biomass estimate of 5,500 mt was adopted, an amount 500 mt greater than the 1983 estimate (Table 6). Age 6 and 7 Pacific herring comprised 63% of the sampled population (Figure 4). Age 4 Pacific herring comprised less than 1% of the population. In general, spawn deposition extent and intensity appeared comparable to that documented in 1983.

Norton Sound District

A total of 27 aerial surveys was flown on 17 days during the season, from 24 May - 26 June. Sea ice prevented complete district aerial assessment until 25 June, however, about half of the surveys completed over ice free waters were made under fair to excellent conditions.

Test fishing was conducted from 6 June - 1 July. A total of 1,428 Pacific herring was sampled from these catches. Pacific herring comprised 83% of the total catch of schooling fishes.

Due to the extensive distribution of sea ice, the peak aerial survey during the commercial fishing season resulted in a biomass estimate of 10,500 mt. However, the in-season biomass was estimated at 15,000 mt based on projection of 1983 aerial survey and Pacific herring age class composition data. Continued aerial surveys and analysis of data from test fishing resulted in a post-season estimate of 21,000 mt (Table 6). Age 5 and 7 Pacific herring comprised 68% of the total biomass (Figure 4). Peak abundance of Pacific herring occurred 18 - 25 June. A record total of 69 km of milt was observed during aerial surveys. Peak spawning throughout the district occured 10 - 19 June.

SUBSISTENCE FISHERY

Subsistence fishing for Pacific herring is generally most important in villages on the Yukon - Kuskokwim River delta. Average annual Pacific herring subsistence harvests in the eastern Bering Sea have been approximately 100 mt since 1975 (Table 5). About 75% of the total annual harvest is taken in the Nelson Island area at the villages of Tununak, Toksook Bay and Umkumiut (Nightmute). In 1984, subsistence surveys were not conducted in the Nelson Island area. Three villages on the Yukon delta, Scammon Bay, Hooper Bay and Chevak, were surveyed in 1984. Total harvest was 9.9 mt taken by 46 families. Although subsistence survey results are believed to accurately reflect harvest trends, reported catches represent minimum figures since all fishermen cannot be contacted.

COMMERCIAL FISHERY

Togiak District

Commercial Pacific herring fishing has been regulated by Emergency Order since 1981 to eliminate wastage problems and achieve exploitation rate objectives. Four commercial openings were allowed during 18 - 21 May resulting in a total harvest of 17,529 mt (Table 2). Fishing time was regulated by gear type under Board of Fisheries directives, as in the past two years. When commercial

purse seine openings were less than 24 hours, gillnet openings were three times as long. When purse seine openings were 1 hour or less, gillnet openings were 5 hours in duration. Total fishing time during the 1984 season was 11 hours for purse seine gear and 35 hours for gillnet gear. A harvest total of 17,272 mt (98.5%) of Pacific herring was purchased for sac roe, with 152 mt (0.9%) purchased for bait and 105 mt (0.6%) purchased for food. Purse seine vessels accounted for 75% of the total harvest and gillnet vessels accounted for 25%. Average roe recovery for the season was 9.8%, the highest ever achieved. Average roe recovery from purse seine catches was 10.4% and average recovery from gillnet catches was 8.2%. The 1984 Pacific herring harvest was the fourth largest in the history of Togiak District and the highest reported in the State for 1984. Wastage of Pacific herring was estimated at 140 mt. Value of harvested Pacific herring to fishermen was estimated to be $7.2 million. Average price was $385 per short ton (st) for 10% roe recovery, with an increase or decrease of $49 per st for each percentage point above or below 10%. Average price for food and bait herring was $119 per st. Numbers of processors increased 9% from 1983 with 25 companies purchasing Pacific herring (Table 4). Numbers of fishing vessels increased 24% with 196 purse seine and 300 gillnet vessels participating in 1984.

Spawn on kelp harvests were also regulated by Emergency Order in accordance with a plan adopted by the Board of Fisheries in 1984. Three commercial openings were allowed during 21 - 24 May, (30 hours total fishing time) resulting in a total harvest of 184 mt (Table 3). Since several K areas (Figure 5) did not contain marketable quantities of spawn on kelp, all of the harvest came from only two areas (K-4; 98 mt and K-9; 86 mt). Approximately 3% of the estimated total standing stock of rockweed kelp was removed. Six commercial processors purchased spawn on kelp from 330 fishermen, a 64% increase in fishermen from 1983 (Table 3). Value of the total harvest to fishermen was estimated to be $0.2 million. Average price was $0.50 per lb. The 1984 spawn on kelp harvest was about 35% greater than the average harvest for the 1976 - 1983 period (average harvest = 136 mt).

The overall Pacific herring exploitation rate was calculated to be 18.3% of the estimated spawning biomass based on an adjusted total harvest of 19,077 mt (17,529 mt sac roe harvest, 140 mt wastage, 1,408 mt herring equivalent of spawn on kelp) (Table 2). Age 6 and 7 Pacific herring comprised 79% of the harvest (Figure 3). Age 4 Pacific herring represented less than 1% of the harvest. Separate harvest strategies could not be used on young, newly recruited Pacific herring (age 4 and less) and old Pacific herring (age 5 and greater). Although the relative proportion of young Pacific herring did increase slightly as the season progressed, separate abundance peaks for young and old Pacific herring were not evident. This was probably due to poor recruitment of young Pacific herring into the spawning population. Good visibility conditions generally persisted during the season which allowed reliable aerial assessments to be made of Pacific herring biomass. Four commercial openings were allowed 18 - 21 May when biomass was approaching 50,000 mt and Pacific herring were ripening. Test fishing was done with volunteer vessels from 5 - 18 May to monitor sexual maturity and age composition of the Pacific herring spawning population. During this time period, a meeting was held with industry representatives to discuss the quality and roe content of Pacific herring samples. By late May, it became evident that most Pacific herring had spawned and left the district and no

further openings were allowed.

In general, management of the commercial Pacific herring fishery has greatly benefited by adoption of Emergency Order procedures and Board of Fisheries harvest directives since 1981. Wastage has been reduced, catch reporting has been timely and accurate, and stock assessment capabilities have been improved. Increased mobility provided by a chartered helicopter has also aided in efforts to monitor and manage the fishery. Availablity of the Fish and Wildlife Protection vessels P/V WOLSTAD and PUBLIC SAFETY I enhanced efforts to enforce regulations. The most common violations were gillnets fishing after closures and purse seine vessels making sets prior to and after openings. Numerous oil slicks, due to bilge pumping by vessels and various accidents within the large fleet, were again documented. Staff from the Alaska Department of Environmental Conservation and U.S. Coast Guard were present on the grounds to monitor these problems and help reduce occurrences. The effects on Pacific herring spawn (embryos) exposed to oil and fuel in areas such as Nunavachak Bay, where a large portion of the fishing fleet anchors, is not known.

Security Cove District

Commercial Pacific herring fishing has been regulated by Emergency Order since 1981 to provide for a more orderly fishery and allow for periodic reassessment of Pacific herring biomass. The district was opened to the commercial harvest of Pacific herring on 21 May and was closed 4 June for a total fishing time of 345 hours. Total harvest was 294 mt (Table 2). Forty-seven percent of the harvest was taken during 29 May by 13 fishermen. Prior to and after this time period, the number of fishermen making deliveries ranged from 0 - 18 each day. All of the harvest was sold for sac roe. Average sac roe recovery for the season was 11.8%. Wastage of Pacific herring was estimated to be only 10 mt tons. Value of harvested Pacific herring to fishermen was estimated to be $0.1 million. Average price was $272 per st for 10% roe recovery, with an increase or decrease of $37 per st for each percentage point above or below 10%. Four processors, two less than in 1983, purchased Pacific herring (Table 4). Most processors established 8% roe recovery as a minimum required for Pacific herring to be purchased for sac roe. The first processor arrived on the grounds 22 May. A total of 38 fishermen in 39 gillnet vessels participated in the 1984 fishery, the lowest on record. This was a 40% decrease in fishermen and a 53% decrease in vessels from 1983. Area residents (i.e. fishermen living in Platinum, Goodnews Bay, Quinhagak and Bethel) accounted for 16% of the effort and 22% of the harvest.

Overall exploitation rate of Pacific herring was 6.4% of estimated available biomass (Table 2). Age 6 and 7 Pacific herring comprised 79% of the total harvest (Figure 3). Age 4 Pacific herring represented less than 1% of the commercial harvest.

Although weather conditions limited assessment capabilities, management of the 1984 commercial Pacific herring fishery was without major problems. Fish and Wildlife Protection vessel P/V Public Safety I was on the grounds for a portion of the season. Few violations were noted.

Goodnews Bay District

Commercial Pacific herring fishing has been regulated by Emergency Order since 1981. The district was opened to the commercial harvest of Pacific herring on

21 May and was closed 27 May for a total fishing time of 139 hours. Total Pacific herring harvested for the season was 605 mt (Table 2). All of the harvest was sold for sac roe. Wastage of Pacific herring was estimated at 42 mt and was attributed primarily to catches of spawn-outs. Average roe recovery was 10.1% Value of harvested Pacific herring to fishermen was estimated to be $0.2 million. Average price was $250 per st for 10% roe recovery, with an increase or decrease of $25 per st for every percentage point above or below 10%. Four processors purchased Pacific herring, the same number as in 1984 (Table 4). Most processors established 8% as the minimum roe recovery required for Pacific herring to be purchased for sac roe. A total of 130 fishermen in 106 gillnet vessels participated in the 1984 fishery, a 35% increase in fishermen and a 39% increase in vessels from 1983. Local fishermen (i.e. residents of Platinum, Goodnews Bay, Quinhagak and Bethel) accounted for 75% of the effort and about 71% of the harvest.

Overall exploitation rate of Pacific herring was 16.4% of estimated available biomass (Table 2). Age 6 and 7 Pacific herring comprised 81% of the total harvest, (Figure 3). Age 4 Pacific herring accounted for less than 1% of the harvest.

Management of the 1984 commercial Pacific herring fishery was without major problems. Weather conditions permitted continous fishing and the best stock assessment since 1981. Presence of Fish and Wildlife Protection vessel P/V Public Safety I for a portion of the season enhanced efforts to enforce regulations. Few violations were noted.

Cape Romanzof District

Commercial Pacific herring fishing periods have been established by Emergency Order since 1982. Three fishing periods were allowed during 31 May - 3 June for a total fishing time of 90 hours. Total harvest was 1,075 mt (Table 2). All of the harvest was sold for sac roe. Average roe recovery was 8.6%. Wastage of Pacific herring was not a problem in this district. Value of harvested Pacific herring to fishermen was estimated to be $0.3 million. Average price was $300 per st for 10% roe recovery with an increase or decrease of $30 per st for each percentage point above or below 10%. Three processors purchased Pacific herring, the same number as in 1983 (Table 4). A total of 66 fishermen in 59 gillnet vessels participated in the fishery resulting in a 5% increase in fishermen and a 3% increase in vessels from 1983. Fisnermen from the local area (primarily Hooper Bay, Chevak and Scammon Bay) accounted for about 98.5% of the effort and 99.8% of the total harvest, a higher percentage than in previous years. Increased success of local fishermen can be attributed to implementation of exclusive area registration, development of improved catch transfer techniques, use of more suitable commercial gear and excellent weather conditions.

Overall exploitation rate of Pacific herring was estimated to be 19.5% of available biomass (Table 2). Age 6 and 7 Pacific herring comprised about 77% of the total harvest (Figure 4). Age 4 Pacific herring represented less than 1% of the harvest.

Management of the 1984 commercial Pacific herring fishery was without major problems. No Fish and Wildlife Protection vessel or personnel were present in the Cape Romanzof District during the season. However, few fishing violations were observed by ADF&G staff.

Norton Sound

In contrast to other Bering Sea fishing districts, commercial Pacific herring fishing within Norton Sound continues to be opened on a specific date by regulation. During 1984, fishing did not begin until 6 June, although the fishery opened on 15 April. Fishing was continuous and terminated under Emergency Order on 12 June. The total district harvest was 3,240 mt, the fourth highest on record (Table 2). The entire harvest was taken in subdistrict 3 (Cape Denbigh area) since other primary fishing areas were iced over throughout the commercial fishing season. Most of the harvest (92%) was purchased for sac roe and 8% (249 mt) was purchsed as bait. Gillnet vessels accounted for 91% of the total harvest and beach seine vessels accounted for 9%. Average sac roe recovery for the season was 10.3%. Wastage of Pacific herring was estimated at 80 mt and was primarily attributed to abandoned gear due to sea ice movement. Value of harvested Pacific herring to the fishermen was estimated to be $0.9 million. Average price was $250 per st for 10% roe recovery, with an increase or decrease of $50 per st for each percentage point above or below 10%. Average price for food and bait herring was about $50 per st. A total of 8 companies purchased Pacific herring, one less than in 1983 (Table 4). There were 184 fishermen that made gillnet landings and 10 fishermen that made beach seine landings with 5 fishermen making deliveries from both gear types. This was the lowest effort on record since a large scale domestic fishery began in 1980, representing a 28% decrease from 1983 levels. This decline in fishing effort can be attributed to sea ice conditions which prevented Stebbins and St. Michael, as well as some Unalakleet fishermen, from participating in the fishery.

Local fishermen (i.e residents of Nome, Golovin, Koyuk, Shaktoolik, Unalakleet, St. Michael, Stebbins and other area villages) accounted for 42% of the effort and 29% of the harvest. The percentage of harvest taken by local fishermen decreased from 1983, but remained similiar to prior years.

The 1984 commercial spawn on kelp harvest was regulated by Emergency Order for a second consecutive year. This provided for a more controlled fishery and allowed the harvest in subdistrict 1 to be maintained within the 30 mt guideline level. Subdistrict 1 was opened 22 June for only two hours, since below average amounts of spawn on kelp were present. A total harvest of 17.5 mt was made by 32 fishermen (Table 3). Wastage was not a problem. Three companies purchased the harvest. The total value of the subdistrict 1 spawn on kelp fishery was $21,500. The average price paid was $0.56 per lb. The 1984 harvest was about 22% less than the average harvest for 1978 - 1983 (average harvest = 22.4 mt).

Subdistricts 4, 5 and 7 (Norton Bay, Elim and Nome), were opened to the harvest of spawn on kelp on 21 June for an 18 hour period. A total of 3 mt of spawn on imported kelp (Macrocystis sp.) was harvested by a single fishermen-buyer. No rockweed spawn on kelp was harvested from these areas. The value of the spawn on Macrocystis sp. kelp was estimated at $3.00 per lb for a total of approximately $20,000.

Overall exploitation of Pacific herring was 16.5% of the estimated spawning biomass based on an adjusted total harvest of 3,469 mt (3,240 mt sac roe harvest, 80 mt wastage, 149 mt herring equivalent of spawn on kelp) (Table 2). Due to extensive sea ice distribution, a large portion of the biomass did not

become visible until well after the commercial fishery. Age 6 and 7 Pacific herring comprised 67% of the total harvest (Figure 4). Age 4 Pacific herring represented less than 1% of the harvest.

Management of the 1984 commercial Pacific herring fishery was without major problems, however, logistics and biomass assessment were hindered by the presence of sea ice. Catch reporting was timely and accurate. Availability of four Fish and Wildlife Protection officers using a skiff and a single engine aircraft enhanced efforts to enforce regulations. Violations of regulations was greatly reduced over 1983. Only two citations were issued involving licensing requirements.

OUTLOOK AND MANAGEMENT STRATEGY FOR 1985

Based upon continued large returns of the 1977 and 1978 year classes in 1984 (age 7 and 6 Pacific herring respectively), a harvestable surplus of Pacific herring should be available in all districts during 1985. However, since methods to reliably forecast actual returns are still being developed and estimates of recruitment are not available, harvest levels will be adjusted during the season according to observed Pacific herring biomass. If it is not possible to determine Pacific herring abundance using aerial survey methods, stock abundance will be assessed using information from test and commercial catches along with spawn deposition observations. Projections from post-season escapement estimates, using mean rates of natural mortality and growth for each age class, indicate that the 1985 spawning biomass should be 115,700 mt (27% lower than 1984 biomass). However, increased recruitment of ages 3 through 5 year old Pacific herring could increase this figure.

Togiak District

As initiated during 1981, different management strategies will be applied to early run, old age Pacific herring (age 5 and above) and late run, young age Pacific herring (age 4 and below) if these two population components arrive on the grounds at sufficiently different times. Magnitude and age composition of the run will be monitored during the spawning season by aerial surveys, test fishing and commercial catch sampling. Emergency Order authority will be used to adjust the occurrence and length of fishing periods in relation to stock strength and spawning. Projected return, based upon 1984 escapement, is 74,500 mt, which would allow a maximum projected harvest of 14,900 mt (20% exploitation rate). No fishing will be allowed until older age Pacific herring reach a total daily observed biomass of 5,000 mt and spawning has started. This will allow a normal onshore migration, assure commencement of spawning, increase roe quality and content and minimize waste. Harvest of old age Pacific herring will be 10 to 20% of estimated biomass. Spawn on kelp harvests will also be allowed during this period in areas judged to have sufficient spawn deposition and an adequate kelp standing crop. A more conservative approach will be taken in managing harvests of young, newly recruited Pacific herring since these herring will contribute to future harvests and provide future spawning stock. A minimum observed biomass of 20,000 mt of younger age Pacific herring must be present before fishing is allowed. A graduated harvest rate of up to 20% of the biomass of these younger age Pacific herring will be allowed at this time. Additional spawn on kelp openings may also be permitted during this period, if additional spawn deposition and the remaining kelp standing stock are at levels which allow

further harvest.

Security Cove District
Emergency Order authority will be used to adjust the occurrence and length of fishing periods to stock strength and spawning. No fishing will be allowed until total biomass reaches 800 - 1,000 mt and spawning has started. Attempts will be made to maintain an overall harvest of 10 - 20% of the available biomass. Projected return is 3,600 mt. No major change in management strategy from 1984 is anticipated.

Goodnews Bay District
Management strategy for this district will be similiar to that used for Security Cove. The season will be opened by Emergency Order, a minimum total biomass of 800 - 1000 mt will be required on the grounds prior to the first opening, and harvest levels will be maintained between 10 - 20% of available biomass. Projected return is 2,700 mt.

Cape Romanzof District
Emergency Order authority will be used to adjust the occurrence and length of fishing periods so that greater management control, better stock assessment and adequate spawning are assured. A threshold level of biomass cannot be used to determine the first opening, since turbid water conditions usually preclude aerial assessments. Test and commercial catch rates and spawn deposition will be the primary information on which fishery openings and fishing time will be based. Average harvest for the period 1980 - 1984 was 740 mt. Projected return, based upon limited data from 1984, is 3,900 mt.

Norton Sound District
Major changes in management strategy are not anticipated. The season will open by date and will close when 10 - 20% of the available Pacific herring biomass has been harvested. Varied harvests rates will be applied to individual subdistricts based on biomass distribution, roe quality, weather and sea ice conditions. Projected return is 17,000 mt. In-season closures may be used to monitor sac roe recovery so that it can be maximized and to maintain harvest levels within the guideline of 10 - 20% of available biomass. All processors, buyers and tenders will be required to report landings twice each day to allow the Department to adequately evaluate harvest data. The spawn on kelp harvest will be managed to minimize wastage problems and evenly distribute effort levels. Spawn on kelp harvest openings may be of short duration to maintain the guideline harvest level.

ALASKA SPORTS *and* WILDLIFE CLUB

P.O. Box 5122 • Ketchikan, Alaska 99901

March 1, 1985

Mr. Don Collingsworth, Commissioner
Department of Fish and Game
P.O. Box 3-2000
Juneau, Alaska 99802

Dear Mr. Collingsworth:

As you are aware, there has been growing concern over the Herring Roe Fishery for several years. Our membership, which has been increasing rapidly, has indicated to its Directors a solid backing in pursuing efforts to end this needless depletion of our herring stocks.

We have had several meetings on this subject, which included not only our members, but other sportsmen, charter groups and commercial seiners, trollers and gillnetters. All groups oppose the continuation of taking herring for roe. The comments from various members of these groups (some have more time on Alaskan waters than they care to admit) indicate that herring are in short supply in waters where there once was abundance, that King and Silver Salmon no longer have stomachs filled with herring, but are empty or contain only needlefish. It was the general concensus that herring, to continue to support salmon, seal, sea lion, bait, seagulls, eagles, etc., can no longer withstand the tremendous pressure of providing roe to the Japanese and others. It would seem that the harvest of millions of pounds of salmon roe would be sufficient. Further, it is our opinion that if the harvest of Herring Roe ceased today, it would still take years to re-build to marginal stocks. It is suggested by many that our King Salmon shortages are directly related to the lack of herring in our waters.

It should be noted that Senator Frank Murkowski, several years ago, addressed Governor Jay Hammond on this very subject and received a reply that the Fish and Game had a handle on the Herring Fishery and not to be concerned. We are concerned and in all fairness, do not believe the Fish and Game has "a handle on herring fishing". As one of your own biologists once stated, "there is no such thing as having too many herring in the ocean". We cannot stand by and watch our herring stocks disappear, as evidenced by the decline of the southeast deer population, the northern Caribou herds or more recently, the Alaska King Crab, without a fight. We are not interested in spending millions on studies, we just want the Herring Roe fishing stopped NOW.

The State of Alaska is actively promoting new fish hatcheries, fertilizing and stocking lakes and generally promoting programs that will enhance salmon escapement and returns. We applaud these efforts. The Ketchikan Deer

Mountain Hatchery alone is providing returns of nearly 10,000 King Salmon from early June into late July and this is just a beginning. The returns of September Silver Salmon to Neets Bay, Herring Cove and Ketchikan Creek are difficult to measure and are providing a harvest bonanza for both commercial and sports interests. With these programs prospering and projecting such promising potential in the years ahead, we fail to see the justification for the continued rape of herring stocks. The disaster of such a gamble, we feel, is totally unwarranted.

Finally, our reports indicate a total of 183 southeastern Herring Roe fishing premits, which include both seine and gillnet. It is interesting to note that a large percentage of these permits are held by individuals who are non-residents. Further, with few exceptions, fishermen holding these licenses also have salmon permits and actively seine or gillnet during the summer season. This should preclude any claims of hardship in eliminating the Herring Roe Fishery.

We would appreciate your comments and what action, if any, your Department is taking in this matter, as soon as possible.

Sincerely,

Dick Borch

Tuesday.

Adams, D-Kotzebue and chairman of the House Finance Committee, was spelling out strategy agreed upon earlier in the day by that body's 28-member, Democrat-dominated majority caucus.

The Republican-led Senate, meanwhile, wants to pull an additional $100 million from Sheffield's proposed $2.4 billion operating budget and cut another $63 million from loans and public construction projects.

Those reductions would be in addition to the $300 million already erased from the spending blueprints because of oil-induced revenue shortfalls.

House and Senate leaders met privately Monday afternoon — another in a series of closed-door budget meetings — and resolved some of their differences on spending priorities.

The Senate is "entertaining" the House strategy and another leadership meeting is likely later this week, one observer said.

"We think that would be a little too drastic," Adams said of the Senate's plan to cut yet another $100 million from the operating budget. "The House realizes there needs to be some reductions in the cost of running government, but we'd like to see them be more gradual. We need to keep programs and services."

Adams said he's checking the legality of not funding the employee pay hikes negotiated last year. Instead, he wants to give the governor $43.6 million for "optional salary increases" and drop the issue in Sheffield's lap.

That means not funding the $43.6 million that had been requested by Sheffield for salary hikes negotiated in 1984. And it means taking another $43.6 million from current salary money. That would force Sheffield to choose between funding salary increases or maintaining current staff levels.

Scores of state jobs could rest on that decision.

"Take DEC (Department of Environmental Conservation) for example," Adams said. "We'd take their $600,000 in salaries and shift it to the governor's budget.

"We'd specify in the intent language that it's up to the unions and (the state's) negotiating units to come back to the table and say, 'Do you want fewer employees and salary increases or employees and lower salaries?'"

"That leaves it up to the administration to work out," Adams said.

John Shively, Sheffield's chief of staff, labeled that proposal "a negotiating argument."

"We have neither the desire nor the legal right to go outside the agreements" negotiated last year, he said.

from the operating budget.

—$20 million would be saved by refusing to fund fiscal 1985 supplementary requests.

—$43.6 million in salary increases would not be funded, leaving the pay hike question to Sheffield.

—$13.9 million would come from new Alaska Housing Finance Corporation's revolving loan fund.

—$10 million would come from money appropriated for the Department of Transportation and Public Facilities but not spent.

—$69.7 million would be cut from the capital budget.

End Herring Fishery Now, Longliner Says

By Sentinel Staff

Does Sitka Sound have enough herring to sustain what has been slated to be the largest sac roe harvest ever?

Seiners and pilots acting as spotters say they have never seen so many herring in the area.

However, some Sitkans, most of them fishermen for species that use herring as a food source, say the run doesn't look that big to them.

Bob DeJong, area management biologist for the State Department of Fish and Game, said "we're not seeing as many fish as we normally do," but blamed the problem not to a lack of herring but to a lack of good weather.

At today's meeting of the seiners and fishery managers at the Sheffield Hotel, DeJong said he believes the fish are staying in deep waters off shore rather than heading for the beach.

"There is a delay in spring and this lousy weather," said DeJong. Spawning activity takes place annually over a three-week period, he said.

"Conditions are different this year than in recent years. It's colder and there's storm after storm after storm."

Longliner Mike Mayo, who is not taking part in the herring fishery, attended the meeting and said he believes the 20 percent harvest level set by the state is too high. Mayo is a member of the Sitka Fish and Game Advisory Board.

He asked if the planned harvest level of 7,700 tons could be reduced at this point if biologists continue to see fewer fish on the beach.

DeJong replied he saw no problems with the 20 percent limit, noting that the fish returning are largely the mature stocks, about 4 and 5 years in age.

"I would like to see these fish a few years down the road here in Sitka," said Mayo.

Seiners immediately argued that there are more fish in Sitka Sound now than in many years, and that part of the reason is because of conservation efforts by the Department of Fish and Game and seiners.

This year, the quota is so large that some of the 50 limited entry permit holders are using two seiners. The permit holder is required to be on board whichever vessel has its nets in the water. Once the nets are lifted, he can jump aboard another vessel, which then lowers a new set of nets.

"I'm extremely touchy" about overharvesting the fish I'm dependent on," said seiner Wayne Alex. Seiners have too much invested in the fishery to want to jeopardize its future, he said.

Mayo replied he was not asking anyone to give up a living and had no qualms about the harvest of herring.

"I just haven't seen the stocks I saw last year," he said.

DeJong noted the department conducts acoustical studies during the winter, but during the spring studies are more difficult because the fish scatter.

"Let's not get into a gear war here," said one seiner to cut off the impromptu debate.

On Tuesday the seiners agreed not to ask for an opening today. After today's briefing, they agreed to meet again Thursday morning at the Sheffield Hotel.

Updates on the herring sac roe fishery can be obtained by calling the Sitka office of Fish and Game, 747-5022.

All of Herring Slated for Consumption

By Sentinel Staff

This year, just about 100 percent of the entire mass of 7,700 tons of herring expected to be caught in the Sitka Sound sac roe fishery will be processed for human consumption.

Harold Thompson, manager of Sitka Sound Seafoods, said the entire catch is being frozen whole by the shore-based and American floating processors in the area for the fishery. The frozen herring will be transported to Japan, China and Korea for further

Seiners immediately argued that there are more fish in Sitka Sound now than in many years, and that part of the reason is because of conservation efforts by the Department of Fish and Game and seiners.

Blatchley Junior High May Get Sister School

By Sentinel Staff

Blatchley Junior High School may soon become the "sister school" of a school in another country.

Blatchley Principal Walt Clark told the Sitka School Board during a short meeting Tuesday night that the program would aid curricula in both sister schools.

Under the program, the Alaska Department of Education would put Blatchley in contact with a foreign school, and the two schools would share materials and students would participate in audioconferences, said Clark.

"Sister schools would be an approach in which the state department (of education) would become a brokerage service and match us with a school in, say, Japan," said Clark.

Clark said Blatchley has already applied for the program and is on a Department of Education list. The principal said he hopes the project will be ready by the time school opens in the fall.

The program would be most beneficial in subject areas in which Sitka has difficulty obtaining materials, said the junior high principal. A prime example, he said, would be Pacific Rim studies.

Various committees are in the process of reviewing and revising school curriculum programs. The social studies committee recently recommended more emphasis on Pacific Rim studies, pointing out that a large amount of Alaska's trade is with the countries of this region. While it is possible to find textbooks on individual countries on the Pacific Rim, said Clark, no resource materials seem to be available that include all Pacific Rim nations and their interaction with Alaska.

Initially, said Clark, the junior high will become involved with a project with a Japanese school. In future years, Blatchley probably would expand the program to other nations.

"It's a real interesting way to expose kids to other information," said board member Peter Esquiro about the sister school program.

"It sounds neat," concurred board member Shirley McCoy.

In other business, the board:

— received a report on review and revision of the math curriculum, which coordinates programs from elementary through high school. A detailed report will be made to the board by instructors at a future meeting, said administrators.

— adopted a resolution authorizing Supt. Art Woodhouse to act as the district's representative in procuring surplus property distributed by the federal government. The resolution is required to create an orderly method of distribution, explained Woodhouse.

— heard a report from Woodhouse that a budget for the 1985-86 school year, adopted by the board Thursday night, was presented to city administration Friday. A joint meeting of the board and the assembly is expected in April, said Woodhouse.

Thursday morning at the Sheffield Hotel.

Updates on the herring sac roe fishery can be obtained by calling the Sitka office of Fish and Game, 747-5022.

All of Herring Slated for Consumption

By Sentinel Staff

This year, just about 100 percent of the entire mass of 7,700 tons of herring expected to be caught in the Sitka Sound sac roe fishery will be processed for human consumption.

Harold Thompson, manager of Sitka Sound Seafoods, said the entire catch is being frozen whole by the shore-based and American floating processors in the area for the fishery. The frozen herring will be transported to Japan, China and Korea for further processing.

The real target of the fishery is the roe, or eggs, of the female fish, but the roe only accounts for around 10 percent of the herring "biomass" that is caught. Thompson said the roe is stripped in the Oriental countries, and packed in a brine solution. It is a popular delicacy for the Japanese, especially during the Christmas season, he explained. The small, golden jelly-like eggs are similar to caviar.

After the roe is removed, the remains of the female fish and the male fish are dried and sold for human consumption, Thompson said. It makes a low cost, high protein food, he said.

Thompson noted that the drying of herring is a growing cottage industry in the importing countries. In Korea some of the herring byproduct of the roe fishery is canned, he said.

Only in unusual circumstances would the fish be stripped of roe in the Sitka area, Thompson said.

When the Sitka Sound sac roe fishery first developed in the 1970s, the roe would be stripped at processing plants here. The 90 percent of the catch that was not roe would be discarded onto barges under the docks and then dumped at sea.

After state and federal governments prohibited such dumping and adopted regulations requiring more utilization of the resource, the non-roe portions would be shipped to a Petersburg plant to be ground for fertilizer and fish oil.

Only in recent years have the sac roe herring fishery byproducts been dried and sold as for human consumptic Thompson said.

Re: CSHB 229

Dear Peter:

This is to confirm my phone call to you in which I expressed my feeling on the CSHB 229 concerning the "Stripping of herring." This is a bad bill and should not be put into law. It allows special Privilege to a small area and will be discriminating to other communities that do not waste any part of the harvest of herring.

Only a small amount of "Roe" is taken from a large take of herring from the female species and if the males are included this becomes a large woton waste, this is not including the immature portion of the complete harvest of herring.

Unalakleet, Stebbins and Shaktoolik, has begun to fish herring commercially since 1979 which is about six years ago and still do not have a freezing plant to handle their harvest makes us stop to think if there will be any at all.

The bill CSHB 229 if passed will open the doors to other areas to "strip for the Roe"only. This is what we should stop from becoming law before it results in depletion of the herring population in our State. We should prevent the practise of stripping herring for the "Roe only" from spreading to other areas of our fishing industries which depends on herring.

All species of fish follow the herring and feeds on it, and where there are no feed there are no salmon. We should do all we can to preserve our herring stock.

Let me touch on Personal use, fishing. There are still those that depand on fish for a living. There are those that cannot get a job during the winter months that have to put up enough fish for the hard winter ahead. So when you vote on personal use fishing bill please remember these people when you vote, this is my plea.

Yours with best regards,

March 4, 1985

Representative Binkley
Pouch V
Juneau, AK 99811

Dear Representative Binkley:

I am writing to express our strong support for House Bill 229. The bill proposes to waive, for the Bering Sea, the statute prohibiting fishermen from stripping herring for roe.

A number of fishermen from Nelson Island and Nunivak Island are interested in participating in the herring fishery which will open this year. The Bering Sea Fishermen's Association (BSFA) anticipates training a minimum of 80 fishermen from Nelson Island and Nunivak Island in order to prepare them for the fishery. As you know, these areas are poor in terms of a cash economy, and commercial fishing will be the main source of jobs and income for many.

As this is the first time residents of Nelson Island and Nunivak Island will be participating in a commercial herring fishery, their lack of experience during the first year or two will naturally put them at a significant disadvantage in competing for the limited quota of herring available.

The participation of Nelson and Nunivak Island fishermen during the start-up of the commercial herring fishery is dependent upon their being able to strip for roe. At present, there are no facilities available on either Nelson Island or Nunivak Island for refrigeration and processing of herring carcasses. And, it is neither practical nor feasible to build these facilities prior to initial participation in the fishery.

We see waiving the statute prohibiting the stripping of herring for roe in the Bering Sea as an interim yet crucial measure which will provide the people of Nelson and Nunivak Island the opportunity to become competitive in the fishery. Once the fishery is successful, it would then make sense to build refrigeration facilities and to process

herring carcasses -- thus providing more jobs and income for residents.

If I can provide any further information on this very important issue, please do not hesitate to contact me.

Sincerely,

Henry Mitchell

February 28, 1985

Representative A. Herrman
Pouch V
Juneau, AK

RE: Herring Carcass Utilization

Dear Rep. A. Herrman:

It has come to our attention that you are introducing legislation towards a moritorium on the Herring Carcass Utilization bill now in effect.

We have been deluged with calls from native fishermen in Togiak Twinn Hills and Manakotak villages on the possibility of our company purchasing drift net herring during the Togiak fisheries.

At this time we are budgeting for 2,200 tons of herring (seine) for processing on the M/V Bering Trader and our shore plant in Dillingham. These facilities are set up to freeze the product and will not be able to take any additional product other than that which is already committed.

Most of these fishermen are alternates on the list for the Japanese Herring Co-op in Dillingham, Alaska. These people in the past have not been able to sell because of the volume already caught by the co-op. We would be able to offer these fishermen a market if we could process at our Togiak facility. But there is no freezing. We would have to strip the roe then grind the carcasses.

We would be able to purchase approximately 350 to 400 of gillnet herring if processing is available in Togiak.

This would mean, in dollars, a total of $297,500 to $340,000 for the fishermen that would not have been there previously. The fish tax would be $2,975.00 to $3,400.00 for a shore based facility. The local labor for the herring processing would be approximately $43,000. This is for the nonfishermen type of local villagers.

Again our company would be happy to offer a market but are unable to do so as the laws stand now. We do not want a total moratorium, only for the next two seasons to place freezers into our Togiak facility.

Regards,

Kemp Paulucci Seafoods

Capital Room # 500/502
Pouch V
Juneau, Alaska 99811

Dear Rep. Fuller:

On behalf of 3NC Fisheries, I am requesting a permit to dump the herring carcasses in the Norton Sound area for this coming 1985 fishing season. We anticipate to open the herring processing in the Stebbins area, in hopes that their economy will benefit both their people and our company. We understand that dumping herring has special guidelines and know that there are certain limits to dumping.

3NC Fisheries consists of the Unalakleet, Shaktoolik, and Stebbins Native corporations and is a profit company. Our main goal is to provide some form of economy for our people and service the people in our region. We have worked with the salmon species for the past two years and look forward for a profitable one this coming season.

We understand the problems that may occur with discarding of the herring and we plan to work on this along with your help. Our latest talk with other companies was to sell the whole female herring and transport them out of the Norton Sound Region. It is also our contention that some plan be made with male herring, and in working with your office, we hope that a solution will be drawn up.

If you need further information please call me at 624-3053 during the workhours and at 624-3931 during the evenings. You may also call Davis Nashalook with the Arctic Sea Fisheries in Anchorage at 562-2322.

Our anticipated tonage with herring for the 1985 season is 300 metric tons.

Thank you.

Sincerely yours,

Henry Oyoumick

MEMORANDUM

TO: Rep. Peter Goll, Chairman
House Special Committee on Fisheries
FROM: Rep. Jack Fuller
DATE: March 2, 1985
SUBJECT: Additional information regarding HB 229 - herring stripping

Three different groups of fishermen in Western Alaska have contacted either Rep. Herrmann or me requesting a temporary waiver of the herring stripping law.

In my district, 3NC Fisheries, a cooperative effort of the native corporations of Unalakleet, Stebbins and Shaktoolik, has asked for additional time to gear up. These local people began to fish herring commercially in 1979, and at this time don't have enough on-shore freezing capacity to process all of the herring caught by their members.

In the Yukon-Kuskokwim area, the people of Nelson Island plan to begin their first commercial herring fishery next year. Until now, herring was fished for subsistence only, but with the rebuilding of herring stocks they are looking to this new fishery for much-needed cash income.

In Togiak, about 35 local gillnet fishermen without markets have asked Kemp-Paulucci to operate the shore-based plant this year. This plant will be able to provide a market for all their fish. Kemp just recently bought the plant and plans to install freezers within the next two years, but would only be able to operate the plant this season if they were able to strip.

The closest fish meal plant is in Seward, thousands of miles away, and there is not enough freezing capacity for all of the fish. Because the non-local fishermen who come up to western Alaska to fish sell their catch mostly to floating processors with freezing capacity, the herring stripping law affects local fishermen who are relatively new to the fishery and do not have established markets.

Unlike the rest of the state, the herring fishery in western Alaska is in its infancy. The fishery used to be almost entirely within the domain of outsiders, with very few locals participating even as fishermen. Local fishermen are just now learning to take vertical control of the fishery themselves, without total dependence on outsiders. As fishermen and as managers, they have gained much valuable

experience in a short time. With limited entry for Bering Sea herring fisheries looming on the horizon, I want local people to have every opportunity to become established in the fishery. Outside of fishing, there are very few ways of making a living in these villages.

The herring season comes at the end of the long winter and before salmon season starts, a time when cash is very low. On-shore herring processing provides much-needed cash income for local people, as well as markets for local fishermen. In Unalakleet alone, stripping 50-60 tons of fish provides up to twenty people with jobs, and puts up to $35,000 into the economy. With an average annual income of less than $3,000 in rural Alaska this is an important source of cash.

I will be providing you with additional back-up from 3NC, Nelson Island and Togiak Natives Limited, which will set out each group's reasons for requesting an extension of the time they are allowed to strip herring, as well as their plans for compliance as the fishery is developed.

RE: HB 229 - EXTENDING HERRING STRIPPING IN THE BERING SEA

I STRONGLY SUPPORT HB 229 AND OPPOSE HB 260. SINCE THERE ARE NO CARCASS REDUCTION PLANTS IN THE BERING SEA, THE PASSAGE OF HB 229 WILL ALLOW SMALL PROCESSORS AND GROUPS OF FISHERMEN TO PROCESS THEIR OWN HERRING ROE. THIS ADDED VALUE PROCESSED HERRING ROE COULD BENEFIT MANY SMALL COMMUNITIES.

EOM

Cordova District Fisheries Union

Headquarters: Box 939, Cordova, Alaska 99574
(907) 424-3447 (907) 424-7473

3/29/85

Mr. Madam Chairman - Members of the committee:

While you are discussing CS for HB 229 we would like the Committee to consider including Prince William Sound in addition to the Bering Sea. We request your consideration because by doing so you would be increasing the economy of Cordova, Valdez and possibly Whittier, increasing the prices paid for the resource to Alaskan fishermen and subsequently increasing the revenues to the State via the raw fish tax.

The following is a list of reasons we feel are pertanant to your consideration.

1- Current market conditions of stripped herring roe loses exceed the value of frozen roe herring.

2- Increased profits to processors means increased prices to the fishermen. Increased prices means more raw fish taxes to the State.

3- Increased raw fish taxes return more revenue to the communities.

4- Under present processing restrictions local land based processors can only process about 20% of the 5000 ton herring quota.

5- With relief from the present restrictions the local land based processors could process up to 40 or 50% of the quota providing they can purchase that amount from the fishermen.

Cordova District Fisheries Union

Headquarters: Box 939, Cordova, Alaska 99574
(907) 424-3447 (907) 424-7473

6- 5 of the 6 established land based processors are Alaskan owned corporations.

7- A large labor force will be required for a two week period rather than a small labor force for a one week period. Probably a four fold increase in labor requirements.

8- Because of the current market conditions - and if the processing restrictions are not relaxed much of this herring will be transported to Canada or the Lower 48 for processing which will be a substantial loss to the local and state wide economy.

9- There are no objections by PWS residents to this proposal.

We urge your careful consideration of this proposal

Thank you

Bob Blake

Report Conclusion.	5
Analysis of Public Need.	7
Appendix:	
A. Board of Veterinary Examiners, Revenues Compared with Expenditures	11
Agency Response:	
Department of Commerce & Economic Development. . . .	13

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Alaska Statutes 24.20.271(1) and 44.66.050 (sunset legislation), a review of the activities and accomplishments of the Board of Veterinary Examiners was conducted to determine if the Board has been operating in an efficient, effective, and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Board of Veterinary Examiners should be reestablished. The law currently specifies that this Board will terminate on June 30, 1985, but will continue until June 30, 1986, for the purpose of concluding its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, and complaint functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.
2. Interviews with the license examiner.
3. Tests of files and documents of licensees.
4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman Office.
5. Discussions with Board members.
6. Minutes of Board meetings and Division correspondence files.
7. Attorney General Opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Veterinary Examiners is a regulatory board consisting of four licensed veterinarians and one public member. The authority of the Board is outlined within Alaska Statutes 08.98.010-.250.

The Board determines the minimum quality of veterinary care in the State by:

1. Examining and issuing licenses to qualified applicants;

2. Establishing or amending rules and regulations necessary to enforce State statutes; and

3. Holding hearings to revoke or suspend the license of a person violating the veterinary statutes and regulations.

The Board is organized under the Department of Commerce and Economic Development, Division of Occupational Licensing (OL). OL provides the Board with licensing and investigative support. The licensing section processes applications, maintains license files, answers inquiries, and provides other administrative help.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committees should take into consideration the findings and recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Board of Veterinary Examiners should be reestablished. The regulation and licensing of qualified professionals is necessary to protect the public's health, safety, and welfare. The Board provides this service by establishing minimum educational and experience requirements that provide reasonable assurance that persons licensed are qualified. Also, assurances that those licensed act in a competent manner is provided by active investigation of complaints and revocation or suspension of licenses where appropriate.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses of the Board's activities relate to the public need factors defined in the "sunset" law. These analyses are not intended to be all-inclusive, but address those areas we were able to cover within the scope of our review.

I. The extent of which the board, commission, or program has operated in the public interest.

A. The Board has served the public by examining and licensing qualified applicants, and proposing changes in regulations that are necessary to enforce State statutes and improve the quality of veterinary care. To conduct these functions the Board has held an average of three board meetings and two examination sessions a year for the past two calendar years.

B. Specifically, the Board has enhanced the practice of veterinary care by adopting regulations concerning:

1. the maintenance of competency of practitioners through continuing education;

2. the establishment of standards for the practice of veterinary medicine;

3. the disbursement of prescription drugs; and

4. the establishment and control of activities relating to veterinary technicians.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The public's confidence and well-being has been enhanced through a statute amendment of requiring a public member on the Board. Currently, the Board membership consists of four licensed veterinarians and one public member.

III. The extent to which the board, commission, or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board has proposed statutory changes concerning qualifications for licensure, temporary licensing, temporary permits, and licensing applicants by credentials. To improve veterinary care, the Board has proposed to amend the statutes by adding a new section concerning emergency treatment for injured animals. These proposed changes are currently under review in the Department of Law and have not been submitted to the Legislature.

IV. The extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. The Board has advertised proposed regulation changes in major newspapers in Anchorage, Fairbanks, and Juneau. The Board has not actively solicited comments on its operations and services it has provided.

V. The extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board has encouraged public participation through newspaper announcements concerning proposed changes and additions to regulations.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board, or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

A. In the last three years there has been one complaint filed against the Board with the Ombudsman Office. The complainant did not believe the Board would take action on his complaint. However, the Ombudsman Office found this to be an unsubstantiated complaint.

B. There have been no complaints filed against the Board with the Attorney General's Office.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. The Board has issued 59 licenses, temporary permits, and temporary licenses in the last three fiscal years.

B. The Board requires foreign medical graduates to have qualifications equivalent to other applicants. This is evidenced by the requirement of the foreign graduates to pass the examination of the American Veterinary Association's Education Commission for Foreign Veterinary Graduates.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

A. The Human Rights Commission and the Equal Employment Opportunity Office have received no complaints related to the Board's activities.

IX. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this section.

A. Legislative Audit has no recommendations concerning the Board's compliance with the public need factors as enumerated in this section of the report.

(Intentionally left blank)

APPENDIX A

BOARD OF VETERINARY EXAMINERS
REVENUES COMPARED WITH EXPENDITURES

For the Fiscal Year Ended June 30, 1983

(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$ 4940.00
Less: Expenditures (Note 3)	($ 4198.57)
Excess of Revenues Over Expenditures	$ 741.43

Revenue Type	Amount	Collection Time
Application fee	$ 25	With issuance of License
Examination fee	50	With taking the Examination
Investigation of Credentials fee	50	With issuance of License
License fee	200	With issuance of License
Renewal of License fee	200	Due every four years
Temporary License fee	50	With issuance of License
Temporary Permit fee	50	With issuance of Permit

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and accordingly we do not express an opinion on the Board's Statement of Revenues Compared with Expenditures.

Note 2

The majority of revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and cause revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1982 and 1983 in order to obtain a more accurate representation of revenues collected.

Note 3

Expenditures include those made by Board members, such as travel, per diem, and contractual items. They do not include expenditures for efforts of other departments assisting the Board or administrative overhead expenses incurred by the Division of Occupational Licensing.

MEMORANDUM

TO: Senator Fred Z aroff

FROM: Rep. John Ring ad

DATE: April 12, 1985

RE: HB 256, An ac lating to economic development policy

Attached are materials in support of HB 256. You will find my written comments, letters of support from the Resources Development Council, Fairbanks North Star Borough, and Alaska Miners Assoc. In addition other organizations in support of HB 256 are: Alaska Conference of Mayors, Alaska Municipal League, Western Alaska Building and Construction Trade Council, Alaska State Chamber of Commerce, Anchorage Convention & Visitors Bureau, and the Fairbanks Chapter of the Society of Professional Engineers.

Also included is a summary of a December '84 poll by Alaska Construction & Oil on Alaskan business attitudes. This reflects that 74% of Alaskan business people believe that the state discourages responsible development through its policies and regulations. Further emphasizing the need for economic development are some recent newspaper articles.

Fred, as the Legislature is running short on time, and in the interest of HB 256 being given ample opportunity to pass this session, I respectfully request your action to waive HB 256 out of Senate Labor & Commerce Committee, and allow hearings to take place in one Senate committee only, that being the Senate Resources Committee.

Thank you for your consideration in this matter.

Memo from prime sponsor/ Backup

House of Representatives

HB 256, an act establishing the economic development policy of the state, is a general policy statement, addressing the need for a stable, diversified economic base, and declaring Alaska's commitment to foster such development through the state's cooperation with the private sector.

Alaska sorely lacks an economic development policy.

This fact has hit us hard, with the sudden decline in revenues we are currently facing. It had been anticipated, that by the time the oil revenue dollars started falling off, Alaska would be well on the road to a stable, diversified economy. The oil revenues are now on the decline, and looking at the world-wide market situation and pricing structure for oil, this is a long-term situation.

HB 256 reflects Alaska's need and desire to further its economic viability. This confirmation is a long-term commitment towards the goal of diversifying our economy, thus creating more jobs for the citizens of this great state, and allowing them the opportunity to continue to make Alaska their home. Further, HB 256 will serve as a signal to domestic and foreign businesses of our commitment to economic development.

Passage of HB 256 will confirm this intent. This legislation is a general policy statement and is not intended to favor any industry or project.

I've been asked about the need for this legislation as a statute rather than a resolve. Billy Berrier, Director of Legal Services, has stated that a resolve does not have the weight or intent that a statute carries. Further, the intent of a resolution only holds for a particular Legislature. Our goal must be a long-term, continuous commitment to develop Alaska's economy.

I ask for your support, and thank you for your consideration of HB 256.

Fairbanks
North
Star
Borough

Mayor: B.B. Allen

February 12, 1985

FEB 19 1985

Representative John Ringstad
Alaska State Legislature
Pouch V
Juneau AK 99811

Dear John:

Based on the advice of several people including Harold Heinze, President, ARCO Alaska, Inc., Bob Bettisworth, Dr. Earl Beistline, Dr. William Wood and others, we have formed a statewide Resource Policy Coalition to address the needs of resource development throughout our state.

At our initial meeting, the first resolution we adopted was a policy statement on economic development. I would like for you and other members of the interior delegation to review the policy statement in hopes that you will do whatever is necessary to establish this as a statement of the State of Alaska's policy on economic development.

This policy statement on economic development has been supported by the Alaska Municipal League, Alaska Conference of Mayors, Fairbanks North Star Borough, Greater Fairbanks Chamber of Commerce, City of Seward, Alaska Mining Association and several others. I think it is important that members of the interior delegation, representing the area where most of the resources are located, provide the leadership by introducing and supporting the resolution for the development and processing of those natural resources.

If you have questions regarding this matter, please do not hesitate to contact me.

Sincerely yours,

Bill

Dear John:

We are so pleased to see HB 256 introduced with you as sponsor. This is an important bill for the state of Alaska and the Resource Development Council. Your sponsorship is significant and is creating support for the bill by those who know you and your record.

We and others have been pushing for this sort of state economic development policy for several years. With this bill Alaska can have the statutory guidelines for economic development envisioned in our constitution.

I am aware that HB 256 is tentatively scheduled to be heard in House Resources March 20. You can be sure that the Resource Development Council will have testimony prepared to support this bill and encourage its timely passage in the House.

Please let us know if there is any background or related information we can provide to aid its passage.

Thank you again for your support.

Sincerely,

THE AftI-DITTMAN POLL

of Alaska business leaders

The AftI-Dittman Poll is a regular monthly feature of Alaska Construction & Oil *and Alaska Analysts/Dittman Research. Each month several hundred Alaska business men and businesswomen are contacted and asked their opinions on questions of statewide importance. The statewide totals are combined and published in the weekly business newsletter* Alaska from the Inside (AftI) *and in* Alaska Construction & Oil. *The respondents included in the sample are representative of their fields of activity and are located throughout the state.*

QUESTION

"Overall, do you feel state government regulations and policies are most likely to encourage or discourage well-planned, responsible resource development?"

RESULTS

	Encourage	Discourage	Undecided
Construction and Timber	22%	78%	—
Petroleum and Mining	13%	85%	2%
Finance and Services	42%	56%	2%
TOTAL	24%	74%	2%

ANALYSIS

Nearly three-quarters (74%) of Alaska's business leaders interviewed in November feel state government regulations and policies *discourage* well-planned and responsible resource development.

The percentage of respondents agreeing varies widely by industry. Petroleum and Mining respondents are the most adamant, with 85% answering "discourage."

A review of the respondents' comments offered during the poll shows that the Alaska Department of Fish and Game was the most frequently mentioned example of a state agency that discourages resource development. The comments also indicated two main reasons for respondents' concern about government policies:

(1) It is difficult to justify the expense and time required to design a well-planned development and take it through the permitting process when the likelihood of success is always in doubt.
(2) The state employees who work in regulatory agencies are more likely to have regulatory ("protective") mentalities which may blind them to the benefits of resource development.

COMMENTS

"Mainly in the permit area — the Department of Fish and Game stops more projects than any agency. They are always on the side of the Sierra Club and SEACC. *No development* is their policy."

"It took 16 years to get a water-use permit for mining and I have a coal prospecting permit application that is nine years old and still pending."

"The tendency in state government is to over-regulate. There can only be one result of that tendency — operating costs are increased both by the requirements for compliance and the cost of processing paper."

"It takes too much time and effort to get permission for access. It discourages people before they even start."

"Regulations are built around a negative attitude."

"Definitely encouraged — a marked improvement noted in both words and deeds!"

"Until the Department of Fish and Game is restricted from making unilateral and arbitary decisions concerning resource development, we will be unable to encourage development no matter how well-planned and responsible!"

CALENDAR

ENERGY-SOURCES TECHNOLOGY CONFERENCE & EXHIBITION — Sponsored by the American Society of Mechanical Engineers at Loews Anatole Hotel, Dallas, TX, (214) 247-1747, Feb. 17-22.

TRAINING SESSIONS ON DRILLING AND BLASTING TECHNIQUES — Explosives Services Corp. of Issaquah, Wash., (206) 392-7112, is conducting a five-day training session on drilling and blasting techniques in Ketchikan, Feb. 18-Feb. 22; and in Anchorage, Feb. 25-March 1.

INTRODUCTION TO MICROCOMPUTERS — A short course presented by the Society of Mining Engineers of the American Institute of Mining, Metallurgical and Petroleum Engineers, Hilton Hotel New York, NY, (303) 973-9550, Feb. 23-24.

FINANCE FOR THE MINERALS INDUSTRY — A symposium that is part of the annual meeting events for the Society of Mining Engineers of the American Institute of Mining, Metallurgical and Petroleum Engineers; Hilton Hotel, New York, NY, (303) 973-9550, Feb. 24-28.

STATE OIL AND GAS LEASE SALE NO. 46A — Anchorage Westward Hilton Hotel, Anchorage, Feb. 26.

A strategy for the future

Alaskans concerned about resource development have been meeting in Anchorage this week to discuss a strategy for the future. The occasion was a conference sponsored by the Resource Development Council, and the agenda was packed with representatives of government and industry.

It's that mix of government and industry that Alaska must tend to if we are to meet our goals of economic development and diversification.

Though the private sector usually operates best with a minimum of government involvement, the high percentage of government-owned land in Alaska necessitates close cooperation from all three levels of government—federal, state and local.

Most of the industries Alaska hopes to encourage—mining, agriculture, fishing, natural gas, petrochemicals—can't be developed unless land is made available and access is provided. That's where governments come in, for private land owners in Alaska continue to hold only a small share of the land, even when Native corporation land holdings are included in the reckoning.

Economic development is not an easy job for our state. For though we're blessed with abundant natural resources that can serve as the foundation of such efforts, we're seeking to balance their development with an appreciation of the natural beauty of our land and of the resources such as fish and wildlife for which natural habitat is critical.

What we can accomplish depends to a large extent upon the attitude of Alaskans. Our state has a high level of citizen involvement in decision-making and it is possible for a few people to influence major decisions.

What we must seek, then, is a recognition that Alaska cannot long afford the luxury of our diverse lifestyles if our economy does not remain strong. Nor will we be able to provide the amenities we've come to enjoy if we do not diversify our state revenue sources.

By recognizing the complexity of the economic development job, Alaskans should be able to plan a strategy that will protect our land and at the same time develop our resources. It will take planning and foresight, but it's not a job to shirk.

FDNM

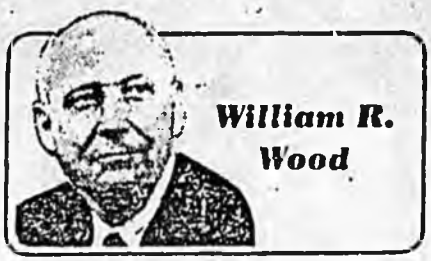
OPINIO

Revenue projections provide sobering trut

At the opening session of last week's
nformative and stimulating confer-
nce on "Alaska's Economic Priori-
es" at the Sheraton/Anchorage,
airbanksan Mary Nordale, well-
nown attorney and now state com-
.isioner of revenue, presented a
.ost enlightening and encouraging
ummary of Alaska's "Petroleum
evenue, Production and Price Pro-
ctions."

Such projections, however sophisti-
ited the analysis of pertinent data
ailable, of necessity are based upon
sumptions, probablities, and, in
me parts, sheer guesswork. They
fer, however, the best guidelines to
oughtful action we have.

The Alaska oil revenue projections
nding downward from a peak, as is
evitable in the production scenario
anything on a gigantic scale, have
en featured recently in the press
d media as gloom and doom fore-
sts. They are not. On the contrary,
wringing of hands and the wailing
the wigwams of the mighty have
en depressing evidence merely that
me among us love to be dependent.



Viewed in the perspective of *what is* B.O.P. (Before Oil Production),
current state revenue projections
the year 2000 and beyond are neith-
bleak nor hopelessly discouraging.
ering, yes. This, of course, all resi-
dents of Alaska should find comfort-
ing and enormously encouraging. At
last, a return to common sense fiscal
behavior is in prospect.

In summary, the Nordale projec-
tions remind us that in 1975 the stat 's
"General Fund Unrestricted Re-
venues" were about $333 million. This
more than doubled the very next year.

The flood of North Slope oil dollars
continued to swell to $2.5 billion by
1980—nearly an eight-fold increase in
five years! The gusher crested at $4.1
billion two years later and has gra-
dually tapered downward since. In
1985 the General Fund Unrestricted
Revenues are estimated to reach a
total of $3.3 billion. A ten-fold increase
in one decade, 1975-1985, Wow! Re-
member how it was in 1960? About $30
million total, or one hundred times
smaller!

No wonder Alaska went on a spend-
ing spree, led by the Legislature and
the administration eager to catch up
on capital needs and services desired
to enhance the good life as they saw it
throughout the state. Let's not forget
they were responding to pressure at
home. All of us were more or less ac-
tive in the "gimme" posture, both
hands outstretched and pleading,
"More! More!"

What really got out of hand was the
bureaucracy, not just in government,

William R. Wood

Views expressed here do not necessarily represent those of the Daily News-Miner

but in the industrial, commercial,
financial, educational, and labor are-
nas as well. The phenomenon of over-
indulgence permeated every corner
of Alaska. It has been particularly de-
vastating to Alaska's future pros-
pects in the over-staffing of regula-
tory activities and paperwork impos-
itions. This has been far too costly for
the residents to afford since the zeal to
achieve the last measure of perfec-
tion for one cause or another has
ranged far beyond the realm of
reason and common sense.

Fortunately, there is the Perma-
nent Fund acting as a safety valve of
sorts to keep the whole barrel from
running dry. It didn't exist until 1977.
Now in 1985 the annual earnings from
this savings account are over $600
million. In the next 10 years it is esti-
mated that the Permanent Fund will
be earning about $1.5 billion and will
approach $2.5 billion annually by the
turn of the century, just 15 years from
now. That amount combined with an
estimated $2.2 billion from oil and
other sources, such as mining,
fishing, timber harvest, tourism, and
agriculture, would bring the General
Fund Unrestricted Revenues to near-
ly $5 billion for state spending in the
year 2000. Moreover, by that time the
Permanent Fund itself would be
something over $20 billion.

Not too shabby a prospect for Alas-
ka, even should the population double
by then to one million residents. All
such projections, of course, are tem-
pered by change, both the predictable
and the unforeseen.

The alarm over necessary spending
cuts this session at the state level may
be a blessing in disguise. Spending
restraints are clearly overdue. There
could be substantial reductions in
government regulatory and adminis-
trative operations even if revenues
were rising instead of falling. A grea-
ter depth of prudence should prevail
in selecting for funding capital im-
provement projects in the statewide
"catch-up" and "Reach for Excell-
ence" programs. In general, priority
might well be given to ...frastructure
items in energy, transportation, and
communications matter:
make possible the crea
wealth from things tha
and from things that do n
where.

The reduction of ove
spending can increase s
adaptability as well as ea
the heart. Having fewe
spend may give our le
time to think—to think n
and deeply about how b
create some new dollar
mineral and agricultura
These two, we are remi
and again, are the only sou
wealth.

Neither boom nor gloom
pect for 1985 and beyon
the whole picture. The o
the rest of the world are
Alaska's opportunity.
character for each of us
meet the challenge i
together toward a greater
self-discipline and self-rel
ing forward together in
and with mutual respect,
whatever needs to be
more.

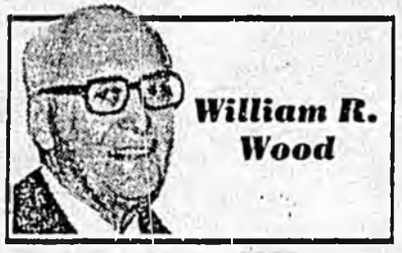
Opinion

FDNM

Wednesday, February 27,



Efforts to diversify economy are serious

The single *big project* is not dominant in the thinking of community speakers at the Fifth Annual International Conference on Alaska's Resources that convened Feb. 13-14 at the Sheraton Anchorage.

Diversification is. From every region of Alaska the message is clear and strong: tourism, mining, and fishing are the common denominators of interest, then timber and farming wherever trees or crops grow. There was mention of fur ranching, poultry farming, dairying, livestock husbandry, and greenhouse culture. This was not idle talk. Serious effort is being made on each in one or more Alaska communities. Innovation, ingenuity, inventiveness, advanced technology, were mentioned to remind us how young we are in Alaska. How fine the prospect for creative young thinkers.

Seven minute presentations were made by 18 representatives from nine cities, six boroughs, two combined city/borough units, Juneau and Sitka, and Alaska's metropolis, the municipality of Anchorage. The coverage was widespread, from Ketchikan to Kotzebue, from Unalaska, Bethel and Bristol Bay to the North Slope Borough, Valdez, and the Fairbanks North Star Borough, from Haines and Cordova to Kenai Peninsula, and Matanuska-Susitna to Kodiak Island. Impressive participation! In addition, several places not listed on the program for presentations joined in the excellent All-Alaska community displays featured throughout the conference: Delta, Nenana, Barrow, Skagway, Seward among others. The occasion sponsored by the Resource Development Council for Alaska provided an excellent opportunity for insight into what Alaskans are thinking and doing.

Few of the presentations and displays turned up any brand-new prospects or special projects, the exception, perhaps, being the great Red Dog lead/zinc/silver venture near Kotzebue. From all points in

William R. Wood

Views expressed here do not necessarily represent those of the Daily News-Miner

Alaska, however, was demonstrated renewed determination to find some way, any way to bring into production for processing and marketing Alaska's extraordinary variety of natural resources. Not all non-attenders of the conference may share in the enthusiasm expressed, yet among those present reporting on how things were at home there seemed evident a common belief that the habitat, whether land or marine, can be enhanced and made more productive and attractive for the ultimate benefit of residents of the Great Land.

Surfacing now and again was recognition that the burden of idle resources, natural and human, could reach the level of the intolerable. The spirit expressed was strong: Let's do all that we can ourselves with what we have. Let's not depend on any one source of income, fur, fish, timber, gold, oil, or government, as we have in the past. Let's make intelligent use of all our possibilities and drive toward a greater measure of self-reliance and self-sufficiency.

Not one speaker even hinted at being satisfied with overdependency upon government at any level or any other largesse giver. Each of the 18 community speakers was enthusiastic, optimistic, excited about the potential of the place where he lives, full of cheer and wit, each proud to be an Alaskan. Rated outstanding at the end of the conference was the far-ranging presentation accenting our people potential by our own Mayor Bill Allen.

The agenda for the conference was studded with other spark presentations, some provoca enough to generate fresh think and new awareness among several hundred in attendar These were offered by a rang specialized talent from Texas, (gon, Washington D.C., Seattle, Canada as well as Alaska's c from Juneau, Fort Yukon, Anch age, and Fairbanks.

Yet the great lift at the conf ence came from the 18 commu ties each with the encouragi news of what it was devising ar undertaking on itw own wi reasonable assistance from the o side to insure a brighter tomorr for the great place where they liv And each of the 18 it was empl sized, is more than willing to sha the good life he enjoys with visito and new residents. Come see us ar time!

RDC conference debriefing hits a 'we're-in-this-together' theme

By BERT TARIANT

"We're in this together" was the theme of a debriefing held by the Resource Development Council following its fifth annual International Conference on Alaska's Resources.

The conference was titled "Alaska's Economic Priorities: A Five Year Strategy" and offered a number of communities from around the state an opportunity to present their own economic conditions, problems and priorities.

It was the mayor and/or representatives of the participating communities that gathered after the two days (Feb. 13-14) of presentations and discussions for the debriefing.

"Last year after our conference we got the speakers and major players together for a private meeting to get their feelings on the conference," said Paula Easley, RDC Executive Director. "It worked well so we decided to do the same this year with the communities."

The debriefing wasn't just a pat yourself on the back for a job well done. Easley had a slate of 10 conference objectives on which she wanted input from the communities.

• Identify a process for ranking capital projects for state funding

"There was a large consensus at the debriefing that there needs to be a process for ranking capital projects," Easley said, "but there also is no quick and easy, super way of doing that ranking."

She noted the communities had their wish lists for the state legislature but that most had never looked at that list "from a point of view of what would sustain the local economy."

"So far the state legislature has never looked at Alaska's oil wealth with an eye to prioritizing, to ranking needs," she said. "And part of that is due to the fact there has been no clear direction of what we want to do in our state."

But the concept of declining petroleum revenues as production from Prudhoe Bay begins to slip has "finally begun to sink in," the RDC chief said. "Alaska's communities are very concerned. They want more effort made in dealing with priorities and we'll work with them on it."

RDC Executive Director Paula Easley received a bouquet of roses at the conference close.

• Create a more active, vocal constituency for economic development

"This was definitely accomplished by the conference in the view of the communities," Easley said. "Many had never discussed such an idea before and now the momentum is going."

The communities concluded the Resource Development Commission had gotten the whole thing started and "they don't want to see the ball dropped; they want to keep up the momentum," she said.

"The communities asked us to have 3-4 meetings where the mayors or their representatives get together to discuss the constituency issue before we hold our next international conference," she added.

• Give direction to the Governor and legislature that wise spending decisions are needed now

"The mayors concluded they must work at their own level with their own community government and their legislators if they are to make progress in this area," she said.

The community leaders also requested the Council to help with resources and support in their efforts to get the importance of wise spending decisions across to elected representatives.

• Encourage formation of local economic development

See RDC, Page 18

• RDC conference participants find they share problems

Continued from Page 14

ation's groups that an problem.

Many of the communities felt they had good, dedicated people working in their various resource and business opportunities development sections, Easley said, "but they also felt something was missing."

"They felt their efforts at development had not been as productive as they could be and concluded a big reason for this was that the development departments had not been given a strong enough mandate," Easley said.

• Stimulate cooperative effort between private industry/Native groups, local chambers, labor and government bodies to pursue economic goals

"This topic ties in with development study groups. The communities felt they must get their development departments more in touch with the community and its leaders if a concerted effort for development and economic diversification were to take place."

Easley noted one of the state's boroughs already is in such a position. "The Kenai Peninsula Borough has a Resource Development Council that is staffed with a director, Frank Mellhargey, and that has been instrumental in that borough's expansion," she said.

"Many of the other communities are looking to the Kenai Peninsula Borough as a good example of economic diversification, how it can be done, and done very well," she added.

• Generate awareness of need for major infrastructure investments that enhance development potential

"I think we can safely say the communities around Alaska are very aware of the need for infrastructure investment but we all agreed the key question was: how do you get this message across to the state legislature?"

• Design a system for statewide opinion gathering

"During the conference we told the community participants we would have experts ranking the projects that were presented and some of the communities weren't that happy – not so much at the idea of ranking but that their projects may not get the priority they felt those projects deserved," Easley said.

"We did settle on a plan that will be put into effect with the next conference – the concept of a multi-year opinion survey using people who came to the conference," Easley said.

The key is getting opinions from around the state and Easley said most of that battle is won. "For the first time, the RDC International Conference had more people from outside Anchorage attending, plus 20 village corporations and the Native Regional Corporations," she noted.

"By any definition of a valid survey sample, we had it –

See RDC, Page 16

Fifth Annual International Conference on Alaska's Resources
Alaska's Economic Priorities: A five-Year Strategy and All-Alaska Community Expo

• RDC conference draws strong reviews

• RDC debriefs participants

Continued from Page 15

economic, geographic, ethnic, etc.," she added.

• Provide information on project financing alternatives

The community representatives were very vocal, Easley says, in their "need to know what investors needed from them and how the communities could be prepared with such information."

"They wondered why and how investors choose one area or community over another for a development project," she added. "They were keenly interested in the criteria for such location factors and they want to work on it."

• Educate public on community activities, attractions, needs and constraints to development

At the conference, the RDC also sponsored a "Community Exposition" at which each community and others could place exhibits designed to educate attendees of the communities' status and potentials.

"But unless you have a knowledgeable community leader manning the booth, you are not going to be in a position to answer questions should an investor want to know more about the community," Easley said.

"Unfortunately, most of the community leaders were in the conference hall, listening to the presentations, rather than being out on the booth," she added. "The mayors agreed next year they make sure community leaders were at the booths, ready to answer questions and give insight."

• Foster a "we're in this together" attitude between communities

"I believe this is what excited the participants the most," Easley said. "All of them indicated they were members of the Alaska Municipal League but our conference marked the first time they had ever had a forum to address a large cross section of Alaskans and talk about their problems and potentials."

See RDC, Page 17

Continued from Page 16

"They were not only able to discuss their own problems but also learned much about what is happening in other communities. They found they have many similar problems," she said.

Other areas of concern also were discussed at the debriefing, including need expressed by many for technical expertise in working toward goals. "These people are available but it costs money to bring them in," noted Easley.

"They also suggested that in a future conference, after the communities have had the opportunity to make their presentations, that a second set of discussions be held concerning a more regional approach to problems and priorities," Easley said.

An immediate outcome of the conference and debriefing will be release of a booklet on community economic development.

"The booklet was authored by Ron Wall and others in the Division of Economic Enterprise of the state Department of Commerce & Economic Development," Easley noted, "but a lack of funding had kept the booklet from being published. Ron promised the communities he would get it to them."

Attending the debriefing in addition to Easley and other RDC staff were Mellhargey for the Kenai Peninsula Borough, John R. Pugh and Wayne Haerer for the city and borough of Kodiak, Walt and Paul Fletcher of the Division of Economic Enterprise, Jim Gove of the city of Wrangell, Mayor Dorothy Jones of the Matanuska-Susitna Borough, RDC President Chuck Webber, John Devens of Valdez, Mayor Bill Allen and Buzz Otis of the city of Fairbanks and the North Star Borough, Mayor Fran Ulmer of Juneau, Ted Ferry for the city of Whittier and Anita McGrath of Anchorage.

State Capitol
Juneau, Alaska 99811

HB 256am: Summary

Amends Title 44 by adding a new chapter which makes a declaration of the State economic policy. Legislature declares that the state has a commitment toward "purposeful" development of its natural resources. The bill also provides legislative intent with respect to development and defines the activities which the state should undertake to promote such an economic policy.

Introduced: 3/1/85
Referred: Resources and Finance

BY RINGSTAD, ADAMS, GRUSSENDORF, CATO, FRANK, LARSON, M.W.MILLER, PEARCE, RIEGER, SHULTZ, SUND, TAYLOR, UEHLING, HANLEY AND JENKINS

IN THE HOUSE

HOUSE BILL NO. 256 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing the economic development policy of the state."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44 is amended by adding a new chapter to read:

CHAPTER 67. GENERAL STATE POLICY.

Sec. 44.67.010. DECLARATION OF STATE ECONOMIC DEVELOPMENT POLICY. (a) To further the goals of a sound economy, stable employment, and a desirable quality of life, the legislature declares that the state has a commitment to foster the economy of Alaska through purposeful development of the state's abundant natural resources. It is the legislature's intent that this development

(1) offer long-term benefits and increased employment to Alaskans by strengthening and diversifying the state's economic base and encouraging new activities;

(2) provide opportunities for increased personal income or reduced living costs by creating activity in economic sectors;

(3) have a positive effect on the revenue needs and fiscal conditions of the state and local communities;

(4) be undertaken after consideration of the views of citizens impacted by the development, and only after adequate protection is assured for Alaska's environment, ~~and the Alaskan life style.~~

(b) To take advantage of investment opportunities afforded by Alaska's abundant resources, the legislature finds that the state must

undertake activities that serve as a catalyst to responsible economic development in the state for the benefit of its citizens. It is the policy of the state to

(1) develop and provide information to domestic and foreign investors to use in evaluating project feasibility;

(2) with cooperation from investors, identify constraints to economic development imposed by all levels of government and work with government agencies to solve problems created by those constraints;

(3) with cooperation from investors, identify constraints to economic development such as lack of transportation and energy systems necessary to support the extraction, production, and transport of resources to markets, and implement capital improvement or other programs to resolve the deficiencies;

(4) provide a stable tax and regulatory climate that encourages expansion of the state's economic base;

(5) encourage "value-added" processing in the state;

(6) improve the state's comparative position by offering economic incentives that support the constitutional mandates for utilization, development and conservation of natural resources.

Chairman's Information:

1) HB 256am "An act relating to the economic development policy of the state"

a) Introduced: Ringstad plus 14 others

b) Co-Sponsors:

2) INTENT: Makes a declaration of the State's economic development policy and defines the activities the state should undertake to promote this policy.

Eileen Plate
465-2700

Since 1982, one of the Department's highest priorities has been the enforcement of preferential hiring of Alaska residents on state-funded public works projects, pursuant to AS 36.10.010. In late 1983, however, the state's resident hire law was challenged on constitutional grounds and resulted in a Superior Court decision that the law was unconstitutional. That decision is now on appeal to the Alaska Supreme Court.

One of the Superior Court's key findings was that there was insufficient evidence to show that the in-migration of non-residents was displacing qualified and available Alaska residents from public works employment. By explicitly setting forth the legislative findings underlying the resident hire law, House Bill No. 294 would provide a more solid foundation from which to defend the principle of Alaska hire. The Department of Labor, therefore, strongly endorses the comprehensive legislative findings contained in the bill.

In response to concerns that the Department's resident hire enforcement capability should be enhanced, a fiscal note has been prepared to provide funding for two additional enforcement staff.

The Department of Labor supports House Bill No. 294.

MEMORANDUM April 22, 1985

SUBJECT: Term "royalty" as used in HB 294

TO: Representative Red Boucher

FROM: Billy G. Berrier
Director
Division of Legal Services

At the request of Representative Cotten, he, Dave Donely and I met to discuss the appropriateness of use of the term "royalty" in findings 15 and 16 of Sec. 36.10.005 of House Bill 294. I was requested to furnish you my comments.

Royalty has a fixed meaning in the oil industry. It is the landowners share of production free of expenses of production. (Handbook of Oil Industry Terms and Phrases - Lagenkamp, PPC Books 1977 and Manual of Oil and Gas Terms, Williams and Meyers, Matthew Bender 1981) A copy of these references is enclosed.

In finding 15 the term is properly used and emphasizes the use of money derived from the ownership interest in land of the state rather than from traditional governmental sources of revenue for traditional governmental functions. This distinction may be relevant and material in determining the market participant status of the state in many instances.

Finding 16 however is factually in error. It is clear that the term there is not intended to be limited to the landowners royalty but was intended to include all natural resource income. This is an incorrect useage of the term "royalty". I would suggest that on page 2, line 24 the term "these royalties" be deleted and the term "natural resources income" be substituted.

Legal Services memo

ROUSTABOUT
A production employee who works on a lease or around a drilling rig doing manual labor.

ROYALTY
See Landowner royalty

ROYALTY, COMPENSATORY
Payments to royalty owners as compensation for loss of income which they may suffer due to the failure of the operator to develop a lease properly.

ROYALTY, FIXED-RATE
Royalty calculated on the basis of a fixed rate per unit of production without regard for the actual proceeds from the sale of the production.

ROYALTY, GUARANTEED
The minimum amount of royalty income a royalty owner is to receive under the lease agreement, regardless of his share of actual proceeds from the sale of the lease's production.

ROYALTY, LANDOWNER'S
A share of the gross production of the oil and gas on a property by the landowner without bearing any of the cost of producing the oil or gas. The usual landowner's royalty is one-eighth of gross production.

ROYALTY OIL
Oil owned by the government, federal, state or local.

ROYALTY, SHUT-IN
Payment to royalty owners under the terms of a mineral lease which allows the operator or lessee to defer production from a well which is shut in for lack of a market or pipeline connection.

RUN
A transfer of crude oil from a stock tank on a production lease to a pipeline gathering system, for transportation to the buyer's facilities; running oil from a tank into a pipeline for delivery to a purchaser.

RUNNING THE TOOLS
Putting the drill pipe, with the bit attached, into the hole in preparation for drilling.

RUN TICKET
A record of the oil run from a lease tank into a connecting pipeline. The ticket is made out in triplicate by the gauger and witnessed by the lease owner's representative, usually the pumper. The run ticket, an invoice of oil delivered, shows opening and closing gauge, API gravity, and tank

ature, tank temperature, and BS&W. The or

Royalty

(1) The landowner's share of production, free of expenses of production.

(2) A share of production, free of expenses of production, *e.g.*, an OVERRIDING ROYALTY (*q.v.*) of ⅛ of the ⅞ working interest.

The landowner's royalty is frequently ⅛th production, but it may be any other fractional share of production (or, as is typical in California, the royalty may be expressed as a percentage of production rather than a fractional share of production). In some parts of the industry, anything larger than a ⅛th royalty may be called an OVERRIDING ROYALTY (*q.v.*) in practice, even though it goes to the landowner. Thus a 1/6th royalty may be called "an ⅛th royalty and a 1/24th override."

Royalty may be payable in kind (that is, the royalty owner is entitled to a share of the oil or gas as produced), or it may be payable in money (that is, the royalty owner is to be paid in money for the value or market price of his share of the product). The former type of royalty gives its owner in some states, *e.g.*, Texas, a corporeal interest, whereas the latter type of royalty may give rise only to a debtor-creditor relationship after production between the operator and the royalty owner. For other differences in the legal consequences of the two types of royalty clause, see TREATISE § 659.1. Cancellation of the lease is

normally not an available remedy for non-payment of royalty. See TREATISE § 656.3.

Although the royalty is not subject to costs of production, usually it is subject to costs incurred after production, *e.g.*, production or gathering taxes, costs of treatment of the product to render it marketable, costs of transportation to market. Occasionally a lease provides that the royalty payable to the lessor shall be a larger or smaller fractional interest depending on the volume of production. A royalty is freely assignable.

The term royalty may be used in a more general or loose sense in some instances as covering all returns from a claimed interest in oil and gas. See Denio v. City of Huntington Beach, 22 Cal.2d 580, 140 P.2d 392, 149 A.L.R. 320 (1943).

In United States v. 525 Co., 342 F.2d 759, 22 *O.&G.R.* 483 (5th Cir. 1965), the court said that the term "royalty" as used with respect to oil and gas matters, refers to the landowner's royalty, and not to oil payments.

Royalty, as used in connection with mineral leases, is defined by Article 213 of the Louisiana Mineral Code (R.S. 31:213) as:

> "any interest in production, or its value, from or attributable to land subject to a mineral lease, that is deliverable or payable to the lessor or others entitled to share therein. Such interests in production or its value are 'royalty,' whether created by the lease or by separate instrument, if they comprise a part of the negotiated agreement resulting in execution of the lease. 'Royalty' also includes sums payable to the lessor that are classified by the lease as constructive production."

As the Comment to this article indicates, the statutory definitions of bonus and royalty are intended to be complementary. Thus if a production payment is created at the time of the execution of a lease, it will be characterized as royalty (and hence payable to those persons entitled to share in royalty) if the production payment is payable from the property being leased, whereas it will be characterized as bonus (and hence payable to those persons entitled to share in bonus) if the production payment is granted by the lessee out of another producing lease.

> "Generally, then, under subparagraphs (1) and (2) of Article 213, any interest in production or its value from or attributable to a lease granted by the holder of an executive right would be royalty and not bonus, even though it might be termed in the documentation as an overriding royalty or a production payment

taken out of the working interest. Coupled with the provisions concerning executive rights, this means that one holding an executive interest cannot, by the device of calling an interest in production an overriding royalty rather than a lessor's royalty, deprive the holder of a mineral royalty or other nonexecutive interest of the right to share in production."

See TREATISE § 339.4.

Bonus is distinguished from "royalties" as that term is used in the Small Business Corporation Act in Swank & Son, Inc. v. United States, 362 F.Supp. 897, 46 *O.&G.R.* 291 (D. Mont. 1973).

The term "royalty" as used in a contract under which royalty was promised for services was held to include "advance royalty" received by the promisor which was recoverable from subsequent production, if any. Rouse v. McDonough, 622 P.2d 106, — *O.&G.R.* — (Col. App. 1980).

The definition in this MANUAL was cited in Whitehall Oil Co. v. Eckart, 197 So.2d 664, 26 *O.&G.R.* 778 (La. App. 1966), *rev'd sub nom.* Gardner v. Boagni, 252 La. 30, 209 So.2d 11, 29 *O.&G.R.* 22 (1968).

DATE: April 16, 1985

TO: Representative Red Boucher

FROM: Dave Donley

SUBJECT: Staff Analysis of HB294, Alaska Hire Legislation for Public Works Projects

---

HB 294 - An act relating to preferential hire of Alaskans: and providing for an effective date.

Section 1.	AS 36.10.005	Legislative Findings
	AS 36.10.006	Statement of Purpose
	AS 36.10.007	State Policy
Section 2.	Making section 1 retroactive to July 16, 1983	
Section 3.	Immediate Effective Date	

SECTION 1.

AS 36.10.005 LEGISLATIVE FINDINGS

A section on "legislative findings" is created under the state's Resident Hire on Public Works law, AS 36.10. The 18 findings address factors that make Alaska unique and assert that: these factors have contributed to the high rate of unemployment among Alaskan residents; that the state spends most of it's royalty oil earnings on government and public works projects; that the construction industry accounts for a substantial amount of available employment; that Alaskan workers receive a greater amount of unemployment benefits than in other states; and that the state has an obligation to reduce unemployment among it's resident construction workers through projects funded by state royalty oil monies.

Backup

Under the Privileges and Immunities Clause of the U.S. Constitution, a state must show a compelling reason for giving an employment preference to residents. If a resident hire law is challenged in a court of law, sufficient evidence to show that the in-migration of non-residents is displacing qualified and available Alaska residents from public works employment is necessary. By explicitly setting forth the legislative findings underlying the Alaska hire law, a more solid foundation will be provided from which to defend the principals of that law.

AS 36.10.006 STATEMENT OF PURPOSE

In 1983 the legislature amended the existing Resident Hire on Public Works law (AS 36.10.010) in response to problems and concerns identified by the The Legislative Findings (the findings of fact) for the purpose of (1) reducing the level of unemployment among residents and (2) ensuring that qualified resident workers do not remain unemployed while non-resident workers are employed on state public works projects. There are three subsections to the statement of purpose. The first is the most specific and all-inclusive. The second and third subsections are less specific and address each purpose individually. Because we do not know how specific a "statement of purpose" must be to be upheld in a court of law, the purposes are broken out this way to allow the courts, if necessary, to establish how specific the statement needs to be.

AS 36.10.007 STATE POLICY

It is the policy of the state that, for projects funded with public monies, an employment preference will be given to Alaska residents.

SECTION 2.

Makes the act retroactive to July 13, 1983. On this date the present Resident Preference on Public Works Projects law (AS 36.10.010-.020) was enacted. This section makes it clear that (as is well supported by the record) the findings of fact are accurate for 1983 as well as for the present and that statements of purpose and policy are those of the legislature when AS 36.10.010 was amended in 1983.

SECTION 3.

Makes the act effective immediately.

FISCAL NOTE ANALYSIS

THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE
BILL/RESOLUTION NO.: HB 295
TITLE: "An Act making special appropriation for study of unemployment"
AGENCY AFFECTED: Department of Labor

This bill makes a special appropriation to the Alaska Department of Labor to study the affect of employment of nonresidents on unemployment among residents of Alaska and other issues related to Alaska hire.

Assumptions:

1. The Alaska Department of Labor will assign a Labor Economist II for six months and a Statistical Technician I for four months to research and provide this information.

2. Approximately one third of the funds will be used to key enter Alaska's certified payrolls from state funded construction projects.

3. $26,000 will be spent to complete crossmatches of the workers on the certified payroll with wage items on the unemployment insurance wage file, the unemployment insurance claimant file and permanent fund dividend recipients.

5. The project will begin immediately after the effective date of this legislation with a written summary to be presented to the Alaska Legislature by the first day of the next session.

Bill No. House Bill No. 294 (C

Date March 28, 1985

Title "An Act relating to preferential hire of Alaskans; and providing for an effective date."

Contact: Robert Landau
465-2700
Eileen Plate
465-2700

Since 1982, one of the Department's highest priorities has been the enforcement of preferential hiring of Alaska residents on state-funded public works projects, pursuant to AS 36.10.010. In late 1983, however, the state's resident hire law was challenged on constitutional grounds and resulted in a Superior Court decision that the law was unconstitutional. That decision is now on appeal to the Alaska Supreme Court.

One of the Superior Court's key findings was that there was insufficient evidence to show that the in-migration of non-residents was displacing qualified and available Alaska residents from public works employment. By explicitly setting forth the legislative findings underlying the resident hire law, House Bill No. 294 would provide a more solid foundation from which to defend the principle of Alaska hire. The Department of Labor, therefore, strongly endorses the comprehensive legislative findings contained in the bill.

The Department of Labor supports House Bill No. 294. It will not have a fiscal impact on the department.

Juneau, Alaska 99802

LEGISLATIVE FINDINGS	ATTACHMENTS	COMMENTS
(1) because of its unique climate and its distance from contiguous states, the state has historically suffered from unique social, seasonal, geographic, and economic conditions that result in an unstable economy;	1	The degree of economic instability is documented here. Determination as to which factors were most significant in causing this instability will require additional study. Comparing total nonagricultural wage and salary employment between Alaska and the U.S. shows a much higher seasonal fluctuation in Alaska (as indicated by both the monthly percentages of the respective annual averages, and the standard deviation of that relationship). Longer term economic instability is not as evident in the 1970-1984 data. This is probably because of the stabilizing effects of relatively high per capita State expenditures in the past several years.
(2) the unstable economy is a hardship on the residents of the state and is aggravated by the large numbers of seasonal and transient nonresident workers;	1, 2	The legislative members are probably in the best position to comment on the hardships experienced by their constituents. Recently the Alaska Dept. of Labor, Research and Analysis section did a computer cross match of the social security numbers of individuals who worked at any time in 1984 (under the coverage of Unemployment Insurance), with the social security numbers of Permanent Fund dividend recipients. This is the first time Alaska has had objective data to infer nonresident employment patterns. More work is planned to further analyze the relationships between residency and the receipt or nonreceipt of a Permanent Fund dividend.
(3) the rate of unemployment among residents of the state is one of the highest in the nation;	3, 4	Alaska's unemployment rate relative rank varies from year to year. In 1984 Alaska's annual average unemployment rate was tied for the fifth highest in the country; in 1983 it was sixteenth. Since our current time series began in 1976 Alaska's annual average unemployment rate has always been above that of the total nation.
(4) the state has one of the highest ratios of nonresident to resident workers in the nation;	2, 5, 6, 7	The recent computer match (see attachment 2) indicates that Alaska has a high percentage of nonresident workers. Unfortunately no similar data exists for other states. Comparing the nonagricultural wage and salary employment by place of residence (from the 1980 census) to its closest equivalent by place of work does indicate that Alaska has a higher than average level of nonresident employment. Alaska ranks second in the percentage of benefits paid to workers who collect outside the state (interstate benefits).

LEGISLATIVE FINDINGS	ATTACHMENTS	COMMENTS
		Future possibilities for research into this question are possibly working cooperatively with the U.S. Bureau of Labor Statistics.
(5) the state has a compelling interest in reducing the level of unemployment among its residents;	7	In addition to the individual's economic and social hardship attributed to unemployment there were $83,807,759 in benefits paid to unemployed workers, which were funded by Alaska's UI employer and employee taxes. Reducing the level of unemployment would correspondingly reduce the expenditure level.
(6) the construction industry in the state accounts for a substantial percentage of the available employment;	8, 9	Alaska's construction employment consistently accounts for a larger percentage of its total employment than the national average for the same time period.
(7) construction workers receive a greater percentage of all unemployment benefits paid by the state than is typical of other states;	10	Alaska's construction workers receive a large portion of total Unemployment Insurance benefit payments (as indicated in attachment 10). Unfortunately similar data is not published in a single source for other states. This data can be acquired directly from most states at a later time.
(8) historically, the rate of unemployment in the construction industry in the state is higher than the rate of unemployment in other industries in the state;	11, 12	Alaska's unemployment rate by industry has only been available since October 1982 (1981 data), and then only for the annual average. In all three years it has been available construction's unemployment rate has been the highest of any Alaska industry for which the U.S. Bureau of Labor Statistics has had sufficient sample to publish.
(9) it is appropriate for the state to consider the welfare of its residents when it funds construction activity;	none	This is a policy, not an economic issue.
(10) it is in the public interest for the state to allocate public funds for capital projects in order to reduce unemployment among its resident construction workers;	none	Economic impacts of spending alternatives can be made (such as the article by Scott Goldsmith of the Institute of Social and Economic Research in September 1984), but determination of what is in the public interest remains a policy issue.

LEGISLATIVE FINDINGS	ATTACHMENTS	COMMENTS
(11) in-migration of nonresident construction workers contributes to or causes the high unemployment rate among resident construction workers because nonresident workers compete with residents for the limited number of available construction jobs;	2	The recent computer match of Permanent Fund dividend recipients to workers covered by Unemployment Insurance in 1984 supports this finding, but additional computer matching and analysis is necessary to: a) cross check duration in the state, as indicated by the quarters in which workers either worked or claimed UI benefits, to receipt or nonreceipt of a Permanent Fund dividend; and b) match UI claims for both interstate (see Finding 44 by Judge Johnstone in the Francis, v. Robison case) and intrastate claimants against the file of Permanent Fund dividend recipients.
(12) nonresident workers displace a substantial number of qualified, available, and unemployed Alaska workers on jobs on state funded public works projects;	2	The Research and Analysis section of the Alaska Dept. of Labor does not yet tabulate state funded public works data separately from all other construction. However, when other units of this department have enforced the residency requirements of Title 36 employers are nearly always able to find unemployed, qualified residents. James N. Francis was replaced by a resident when his employer reacted to Department of Labor enforcement. Inferring from the entire construction industry's high percentage of nonrecipients (of Permanent Fund dividends) this seems likely. Additional research to isolate state funded construction would be useful in any future defense of Title 36 residency provisions.
(13) the state has a special interest in seeing that the benefits of state construction spending accrue to its residents;	none	Again determination of the state's interest is a policy issue. Economic theory does indicate that money spent locally has a multiplier effect as a portion is respent in subsequent iterations. Nonresident construction workers probably spend less locally than residents would.
(14) the natural resources of land owned by the state belong to the citizens of the state;	none	This is a legal and/or policy issue.
(15) Alaskans have chosen to use the majority of the royalties derived from the state's natural resources to fund state government;	none	This data is not collected by our department. Defer verification to the Office of Management and Budget.

LEGISLATIVE FINDINGS	ATTACHMENTS	COMMENTS
(16) the vast majority of the state's revenue is derived from these royalties rather than from other forms of taxation;	none	Data from the Department of Revenue indicates that this has been true since 1976.
(17) because the state has no personal income tax or sales tax, nonresident workers use services provided by the state but do not contribute fairly to the costs of those services;	none	The logic of the next finding supports this finding.
(18) Alaskans, more than the residents of other states, suffer economically when nonresidents displace qualified residents since resident workers contribute local taxes as well as their share of the royalties from natural resources.	none	The economic suffering of Alaskans, displaced by nonresidents, is more than that of the residents of other states, primarily because of the higher cost of living in this state. The Bureau of Labor Statistics Urban Family Budget for 1981 (the last year that it was estimated), indicated that the lower and intermediate budgets for a four-person family were the highest of any city surveyed (150% and 126% of the national average respectively).

M E M O R A N D U M

DATE: March 14, 1985

TO: All Representatives

FROM: Representative H.A. "Red" Boucher

SUBJECT: Alaska Hire Legislation

On Friday, March 15, I will be introducing two pieces of legislation that deal with the subject of Alaska Hire. The Department of Labor has endorsed both pieces of legislation and Representative Davis, prime sponsor of HB 266, another Alaska Hire bill, has agreed to cosponsor this version of the legislation. I would like to invite you to cosponsor either or both of the two attached bills.

The first bill adds legislative finding of fact and purpose to the current Alaska Hire law (AS 36.10.010). This law is currently in effect but has been challenged in the pending Alaska Supreme Court case of Francis V Robinson.

The additions proposed by this bill were drafted in cooperation with the Department of Labor and incorporate case law established since the 1983 adoption of the Alaska Hire Law. The most notable case law being a recent decision by the Wyoming Supreme Court which upheld a local hire law similar to Alaska's.

The second bill makes a special appropriation of $100,000 to the Department of Labor to study how the state may provide preference to Alaskan workers.

Both bills have been endorsed by the Department of Labor as providing the necessary factual foundation to support a resident hire preference under current legal standards. The study would allow the Department to assemble information currently not available to support future state action to ensure that Alaskans receive preference for jobs in Alaska

For your background I am attaching a memorandum on this subject. Representative Gruenberg has allowed Dave Donley of his staff to assist me on this matter. For more information contact Dave Donley at 465-4986. If you are interested in cosponsoring either or both of these bills, contact Linda Hanger in my office at 465-4931.

Juneau, Alaska 998

BACKGROUND

The history of preferential hire for residents of Alaska has been turbulent, with the first Alaska hire law being adopted in 1960. Over the years, the 1960 law was enforced with varying degrees of enthusiasm. In 1972 an effort was made to obtain employment for Alaskans on the construction of the Trans-Alaska Pipeline by the adoption of the "Local Hire Under State Leases Law." The 1972 law required that Alaska residents be employed in preference to non-residents in all construction involving oil and gas development. However, In 1978, in Hicklin V. Orbeck, the U.S. Supreme Court struck down the 1972 law as being contrary to the Privileges and Immunities clause of the U.S. Constitution. Even though the 1972 law was struck down, the 1960 law was not challenged and remained in effect, though unenforced, until 1983.

In 1983, in response to public desire for an enforceable Alaska hire law and new legal developments, the Alaska legislature amended the 1960 law. The 1983 act, currently in effect, requires 95% Alaska hire on most construction projects funded by State or local dollars.

In 1984, the 1983 act was challenged in Francis v. Robison. On May 23, 1984, Superior Court Judge Johnston ruled that the law was in violation of the privileges and immunities clause of the U.S. Constitution. By request of the State of Alaska, the Alaska Supreme Court stayed Judge Johnston's action until the State could appeal the decision.

The case is currently on appeal before the Alaska Supreme Court and a decision is expected in the later half of 1985.

In January of this year, the Supreme Court of Wyoming upheld a Wyoming Hire law that is even stronger than our current Alaska Hire law. The Wyoming law requires 100% Wyoming hire, not just 95%, on public construction projects. The Wyoming Supreme Court overruled a lower Wyoming court which found, as Judge Johnston found for the Alaska Hire law, that the Wyoming law violated the privileges and immunities clause of the U.S. Constitution.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF LABOR

OFFICE OF THE COMMISSIONER

P.O. BOX 1149
JUNEAU, ALASKA 99802
PHONE: (907) 465-2700

March 15, 1985

The Honorable Red Boucher
House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Boucher:

I have reviewed your draft legislation pertaining to preferential hire of Alaskans and making a special appropriation to the Department of Labor for study of unemployment in Alaska and other issues related to Alaska hire.

As you know, since 1982, one of the Department's highest priorities has been the enforcement of preferential hiring of Alaska residents on state-funded public works projects, pursuant to AS 36.10.010. In late 1983, however, the state's resident hire law was challenged on constitutional grounds and resulted in a Superior Court decision that the law was unconstitutional. That decision is now on appeal to the Alaska Supreme Court.

One of the Superior Court's key findings was that there was insufficient evidence to show that the in-migration of non-residents was displacing qualified and available Alaska residents from public works employment. By explicitly setting forth the legislative findings underlying the resident hire law, the draft bill would provide a more solid foundation from which to defend the principle of Alaska hire. The Department of Labor, therefore, strongly endorses the comprenensive legislative findings contained in the draft legislation.

I note that section 2 of the draft bill proposes a retroactive effective date for the provisions of section 1. The Department has no problem with the retroactive date per se. However, the legality of the retroactive effective date could play a major role in determining the constitutionality of section 1 as a whole should a legal challenge to the section arise in the future. Therefore, a careful legal review may be in order to assure that the provisions of section 1 do fall within the legal parameters of the types of provisions which can be retroactive.

The department also strongly endorses the proposal to fund a study of unemployment and resident hire in Alaska. The basic purpose of the study would be to collect and organize specific information on the impact of nonresidents on employment in Alaska. Currently, such information is not available in a form that would meet the current legal

> ployment offices and request the names of other available laborers. Every person required to employ Wyoming laborers shall inform the nearest state employment office of his employment needs. If the state employment office certifies that the person's need for laborers cannot be filled from those listed as of the date the information is filed, then the person may employ other than Wyoming laborers."

On September 22, 1983, the Converse County prosecuting attorney charged Roger Antonich, general superintendent of Westates Construction Company, with violating § 16-6-203, supra. The information alleged that Antonich fired a Wyoming worker from a public-school construction project in order to hire out-of-state workers. The county court judge dismissed the charge on the ground that § 16-6-203, supra, violates the privileges and immunities clause of the federal constitution. The court relied on Hicklin v. Orbeck, 437 U.S. 518, 98 S.Ct. 2482, 57 L.Ed.2d 397 (1978), and recent cases from other jurisdictions in which the courts have invalidated statutory preferences for local workers. After examining these and similar opinions, we conclude that certain distinguishing features in Wyoming's Preference Act sufficiently limit its scope so as to satisfy the demands of the privileges-and-immunities clause.

PRIVILEGES-AND-IMMUNITIES CLAUSE ANALYSIS

An examination of a state enactment to determine its validity under the privileges-and-immunities clause involves a two-step analysis. First, the reviewing court must determine whether the statute burdens a fundamental right or activity, since only those "privileges" and "immunities" which bear upon the concept of interstate harmony fall within the scope and purpose of the clause. United Building and Construction Trades Council of Camden County and Vicinity v. Mayor and Council of the City of Camden, ___ U.S. ___, ___ S.Ct. ___, 79 L.Ed.2d 249, 258-259 (1984); Baldwin v. Fish and Game Commission of Montana, 436 U.S. 371, 383-388, 98 S.Ct. 1852, 56 L.Ed.2d 354 (1978); Toomer v. Witsell, 334 U.S. 385, 395-396, 68 S.Ct. 1156, 92 L.Ed. 1460 (1948). Second, the court must examine the reasons for the discriminatory treatment to determine their validity and their relation to the degree of discrimination imposed by the statute. This portion of the test was developed by the United States Supreme Court in Toomer v. Witsell, supra:

> "Like many other constitutional provisions, the privileges and immunities clause is not an absolute. It does bar discrimination against citizens of other States where there is no substantial reason for the discrimination beyond the mere fact that they are citizens of

Construction Trades Council of Camden County and Vicinity v. Mayor and Council of the City of Camden, supra; Hicklin v. Orbeck, supra. We turn, therefore, to an examination of the relationship between this legitimate reason underlying the Wyoming Preference Act and the discrimination mandated against nonresidents.

Enactments to alleviate high unemployment levels through the hiring of residents in preference to nonresidents generally have swept too broadly to survive challenges brought under the privileges-and-immunities clause. The prime example of such legislation is the "Alaska Hire" Act at issue in Hicklin v. Orbeck, supra. That Act required the employment of qualified Alaska residents in preference to nonresidents for positions associated with

> "* * * all oil and gas leases, easements or right-of-way permits for oil or gas pipeline purposes, unitization agreements, or any renegotiation of any of the preceding to which the state is a party * * *." 437 U.S. at 520, n.2.

The United States Supreme Court cited three bases for holding that the discrimination imposed by this statute failed to bear a close relation to the problem of high unemployment in Alaska. First, the state had made no showing that nonresidents were a peculiar source of widespread unemployment. Rather than the influx of nonresidents looking for work, the major cause of unemployment appeared to be the inadequate education and training and the geographical remoteness of many jobless residents--particularly the Eskimo and Indian residents. 437 U.S. at 526-527. Secondly, the Court determined that Alaska Hire did not narrowly address the problem of unemployment, since the Act simply preferred all residents, regardless of their employment status, education or training. 437 U.S. at 527. Finally, the Supreme Court observed that the discriminatory effect of Alaska Hire extended well beyond those activities in which the state held a substantial proprietary interest:

> "* * * In sum, the Act is an attempt to force virtually all businesses that benefit in some way from the economic ripple effect of Alaska's decision to develop its oil and gas resources to bias their employment practices in favor of the State's residents. We believe that Alaska's ownership of the oil and gas that is the subject matter of Alaska Hire simply constitutes insufficient justification for the pervasive discrimination against nonresidents that the Act mandates." 437 U.S. at 531.

A number of state courts have adopted the foregoing rationale in invalidating enactments which grant an employment preference to local workers. Laborers Local Union No. 374 v. Felton Construc-

> "Every inquiry under the Privileges and Immunities Clause 'must . . . be conducted with due regard for the principle that the states should have considerable leeway in analyzing local evils and in prescribing appropriate cures.' Toomer v. Witsell, 334 U.S. 385, 396, 92 L.Ed 1460, 68 S.Ct. 1156 (1948). This caution is particularly appropriate when a government body is merely setting conditions on the expenditure of funds it controls." 79 L.Ed.2d at 261.

The Wyoming statute at issue in the present case requires merely that governmental funds, allocated to public-works projects, be used to hire qualified, available residents in preference to nonresidents. The statute does not effect the sort of wide-ranging discriminatory treatment fatal to Alaska Hire in Hicklin v. Orbeck, supra. Since the Wyoming Preference Act limits its discriminatory effect to government-created jobs, it presents minimal affront to the privileges and immunities of noncitizens. United Building and Construction Trades Council of Camden Count, and Vicinity v. Mayor and Council of the City of Camden, supra.

We hold that the Wyoming Preference Act does not violate the privileges-and-immunities clause of the federal constitution, notwithstanding the Act's infringement upon a recognized fundamental right. The Act narrowly addresses the goal of reduced unemployment among the state's taxpayers by preferring available, qualified residents for government-funded positions. Since the degree of discrimination bears a close relation to the state's valid reasons for discriminatory treatment, we affirm the Act's validity under the test established in Toomer v. Witsell, supra, and refined in subsequent cases.

Although not determinative of our decision here, we recently held in Galesburg Construction Company, Inc. of Wyoming v. Board of Trustees of Memorial Hospital of Converse County, Wyo., 641 P.2d 745 (1982), that Wyoming's preference for resident bidders on public-works contracts, § 9-8-302, W.S.1977, does not violate the equal-protection provisions of the state and federal constitutions. Our result in the instant case, upholding Wyoming's preference for resident workers on public-works projects, harmonizes with our decision in Galesburg Construction Company, Inc. of Wyoming v. Board of Trustees of Memorial Hospital of Converse County, supra.

The bill of exceptions is sustained.

> only in the sense that it limits benefits generated by a state program to those who fund the state treasury and whom the State was created to serve. * * * Such policies, while perhaps 'protectionist' in a loose sense, reflect the essential and patently unobjectionable purpose of state government--to serve the citizens of the State."

Conceding that the Court there was dealing with the application of the Commerce Clause, because of the mutually reinforcing relationship between the two clauses, I find that concept applicable in this instance with respect to the Privileges and Immunities Clause.

It cannot be held objectionable for a sovereign state to adopt legislation which provides in essence that to the extent possible public works contracts benefit the citizens of the state whose contributions to the public treasury fund those projects. A state should not be foreclosed by the invocation of the Constitution of the United States of America from loyalty to interests of its own citizens. So long as a statute is narrowly drawn to protect only the right of the state to contract as it sees fit with respect to expenditures for public works projects which it owns and which it funds, I am satisfied that as a matter of law such a statute does not offend the Privileges and Immunities Clause found in Art. IV, § 2 of the Constitution of the United States of America. This, of course, makes it unnecessary for the court to pursue the remand technique invoked in United Building and Construction Trades Council of Camden County and Vicinity v. Mayor and Council of the City of Camden, supra.

I would agree that the bill of exceptions should be sustained for the foregoing reasons.

Bill No. House Bill 295

Date March 26, 1985

Title "An Act making a special appropriation to the Department of Labor for Study of Unemployment in Alaska and other issues related to Alaska hire; and providing for an effective date."

Contact: Robert Landau
465-2700
Eileen Plate
465-2700

House Bill 295 makes an appropriation to the Department of Labor for a special study of unemployment and resident hire in Alaska.

Specifically, under this appropriation measure, the Department would collect and analyze a variety of information on the impact of nonresidents on employment in Alaska. Currently, such information is not available in a form that will withstand legal scrutiny. Although the State's counsel in the pending resident hire lawsuit wove together different kinds of information to show the impact of nonresidents on employment, the Superior Court concluded that there was insufficient evidence to show that the influx of nonresident workers was a "peculiar source" of unemployment in the construction industry in Alaska against which the resident hire law was directed.

The study which this bill provides for was also recommended by a recent legal analysis prepared by Attorney Robert Goldberg. This analysis, "Legislative Remedies for Rural Unemployment," specifically recommends that the State collect a substantial body of specific, reliable data on unemployment, income, population trends, etc. and that specific legislative and/or administrative findings be made on the basis of the data.

The Department expects that the study will support the State's contention that nonresidents are a primary cause of high unemployment in Alaska, and that it will also show that the resident hire law is necessary to remedy the problem.

The Department strongly supports this proposal to fund a study of unemployment and resident hire in Alaska.

FISCAL NOTE ANALYSIS

THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE
BILL/RESOLUTION NO.: HB 295
TITLE: "An Act making special appropriation for study of unemployment"
AGENCY AFFECTED: Department of Labor

This bill makes a special appropriation to the Alaska Department of Labor to study the affect of employment of nonresidents on unemployment among residents of Alaska and other issues related to Alaska hire.

Assumptions:

1. The Alaska Department of Labor will assign a Labor Economist II for six months and a Statistical Technician I for four months to research and provide this information.

2. Approximately one third of the funds will be used to key enter Alaska's certified payrolls from state funded construction projects.

3. $26,000 will be spent to complete crossmatches of the workers on the certified payroll with wage items on the unemployment insurance wage file, the unemployment insurance claimant file and permanent fund dividend recipients.

5. The project will begin immediately after the effective date of this legislation with a written summary to be presented to the Alaska Legislature by the first day of the next session.

RECORDS CERTIFICATION

I, the undersigned, an employee of the State of Alaska, do hereby certify that the microfilm images on this microform are accurate reproductions of the original records of the State of Alaska as accumulated during the regular course of business, and that it is the established policy and practice of this State to microfilm its records and to dispose of the original records after microfilm reproductions have been made.

PURPOSE AND SCOPE OF THE REPORT

PURPOSE

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Barbers and Hairdressers for the past three fiscal years. Our examination was conducted to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Barbers and Hairdressers should be reestablished. The law now specifies that the Board will terminate June 30, 1984, and have one year from that date to conclude its affairs.

SCOPE

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.
2. Interviews with the licensing examiners.
3. Tests of files and documents of licensees.
4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Office of the Ombudsman.
5. Discussions with Board members.
6. Minutes of Board meetings and Division correspondence files.
7. Attorney General Opinions applicable to professional boards.
8. Discussions with the United States Food and Drug Administration.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Barbers and Hairdressers was created in 1980. This Board is the result of the Legislature combining the Board of Barbers and the Board of Hairdressing and Beauty Culture Examiners. The membership of the Board consists of two licensed barbers, two licensed hairdressers, and one public member. Each member is appointed by the Governor for a three year term, but can serve no more than two consecutive full terms.

The Board regulates the vocations of barbering, hairdressing, and cosmetology. The Board has been given the authority to examine applicants, issue licenses and permits, suspend or revoke licenses and permits, and investigate complaints. The Board issues the following licenses: beauty or barber schools, school owners, shop owners, instructors, barbers, hairdressers, and cosmetologist practitioners. They also issue temporary and student permits.

The Board is organized under the Department of Commerce and Economic Development, Division of Occupational Licensing (OL). OL provides the Board with licensing and investigative support. The licensing section processes applications, maintains license files, answers inquiries and provides other administrative help to the Board.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committee should take into consideration the Findings and Recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

The primary purpose of a regulatory board with a licensing function is to protect the public. The questions that have to be evaluated to determine if licensing is needed are:

1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well-being?

2. Can the potential users be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services?

3. Do the benefits to the public clearly outweigh any potential harmful effects, such as a decrease in the availability of practitioners, higher costs of services, and restriction on optimum utilization of personnel?

During our review to determine if the Board's licensing function is required and meets the previously mentioned criteria, we examined existing complimentary statutes, complaints, and various Board functions. As a result of our examination we found:

1. The Department of Environmental Conservation (DEC) is required by Alaska Statute 44.46.020 to adopt regulations for a standard of cleanliness and sanitation in connection with the construction, operation, and maintenance of barber shops, hairdressing, or cosmetology establishments. DEC has codified regulations to fulfill their statutory responsibility in 18 AAC 30.700-760. These statutes and regulations provide adequate protection for public sanitation.

2. Postsecondary Education, under the Department of Education, issues Certificates of Registration to postsecondary institutions (of which barber and beauty schools are) that meet minimum standards concerning quality of education, ethical and business practices, health and safety, and fiscal responsibility as required by AS- 14.48.010. These statutes provide protection to those students who wish to attend beauty college or barber school.

3. The Department of Revenue, as required by AS 43.70.020, issues business licenses to individuals engaging in business in this State.

4. Included in OL investigation/complaint files were complaints against Board members for their conduct during the State examination. They included asking improper questions, such as where the student went to school, not adequately examining the work performed by the student, changing final grades, including the grade of a Board member's apprentice, and holding the examination only in Fairbanks and Anchorage (see Recommendation No. 1).

As a result of our examination, we conclude that there is not sufficient reason to support the licensing of schools, school owners, shop owners, and instructors. The licensing of practitioners can be done by the Division of Occupational Licensing by licensing those individuals who have met predetermined educational or experience qualifications.

An alternative to licensing of practitioners would be certification. Certification is a form of State regulation that recognizes individuals who have met predetermined qualifications established by a state agency. Only those who meet the qualifications may legally use the designated title. Non-certified individuals may offer similar services to the public as long as they do not describe themselves as being "certified."

Therefore, we recommend that the Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

The primary purpose of a regulatory board with a licensing function is to protect the public. The questions that have to be evaluated to determine if licensing is needed are:

1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well-being?

2. Can the potential users be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services?

3. Do the benefits to the public clearly outweigh the potential harmful effects, such as a decrease in the availability of practitioners, higher costs of services, and restriction on optimum utilization of personnel?

During our review to determine if the Board's licensing function is required and meets the previously mentioned criteria, we examined existing complimentary statutes, complaints, and various Board functions. As a result of our examination we found:

A. In two instances after the practical examination was given and grades were calculated, Board members and examination proctors reviewed the grades and changed six individuals' failing grades to passing grades (see Recommendation No. 4).

B. For the past two and a half years, State examinations have been held exclusively in Anchorage and Fairbanks. Of the last 12 exams, 9 have been in Anchorage and 3 have been in Fairbanks. This presents an economic hardship to those students who wish to take the examination from other parts of the State, because they must pay travel and living expenses for themselves and their model for up to three days.

C. There have been numerous complaints made to the Division of Occupational Licensing concerning the Board's conduct during the State examination.

D. The Board issues duplicative and unnecessary licenses which only provide another layer of licensing without providing any additional public protection (see Recommendation No. 2).

The licensing of practitioners could be done by the Division of Occupational Licensing by licensing those individuals who have met predetermined education and experience qualifica-

tions. These qualifications could be obtained from either schooling or apprenticeship at the hourly requirement already established in the regulations.

An alternative to the licensing of practitioners would be certification. Certification grants recognition to individuals who have met predetermined qualifications. Only those who have met these qualifications may legally use the designated title, however, noncertified individuals may offer similar services to the public as long as they do not describe themselves as being certified. This would assist the public in identifying competent practitioners.

Because the public can be adequately protected through either licensing or certifying practitioners, we recommend that the Board of Barbers and Hairdressers be allowed to terminate on June 30, 1984.

However, in the event that the Board is reestablished we recommend the following changes be made in their operations.

Recommendation No. 2

The Board should seek legislation that would reduce and restrict its various licensing functions.

The Board, in addition to testing individual practitioners to determine their minimum qualifications for licensure, also issues four other categories of licenses. These other categories are schools, school owners, shop owners, and instructors. Each of these additional categories represent an extra unnecessary layer of licensing, specifically:

A. Schools - AS 08.13.185 establishes the fee and 12 AAC-09.125 establishes the requirements for school licenses and in summary they are:

   1. An initial fee of $700 and biennial renewal fee of $400.

   2. A Certificate of Registration issued by the Department of Education.

   3. The name of the school owner.

   4. The location of the school with an exact description of the floor plan that meets the Board's specifications.

In addition to the license issued by the Board, a school has to obtain a business license issued by the Department of Revenue which also requires the owner's name, school location, and a $25.00 fee. In order to obtain a Certificate of Registration from the Department of Education, the school has to meet the minimum standards set out in AS 14.48.060. Among these are, the school can operate so that "the quality and content of each course or program of instruction, train-

ing or study are such as may reasonably and adequately achieve the stated objective for which the course or program is offered," and, that "the institution has, or has access to adequate space, equipment, instructional materials, and personnel where applicable to achieve the stated objective of the course or program of study." There is an initial $100 fee with additional renewal fees for the Certificate of Registration.

B. School Owner - AS 08.135 establishes the fee and 12-AAC 09.120 establishes the requirements for a school owner's license and in summary they are:

1. An initial fee of $70 with a biennial renewal fee of $60.

2. The names of all parties having financial interest in the school.

3. A copy of the valid bond filed with the Department of Education.

Again, a business license requires the names of the owners, and the bond is already required to be filed with the Department of Education.

C. Shop Owner - AS 08.13.185 establishes the fee and 12 AAC 09.110 establishes the requirements for a shop owner's license and in summary they are:

1. An initial fee of $45 with a biennial renewal fee of $40.

2. The business name, physical location, and addresses of all shops owned.

3. A report of a sanitary health inspection by the Department of Environmental Conservation.

4. The license number of the practitioner employed as a manager of the shop if the owner is not a licensed practitioner.

The Department of Environmental Conservation has independent statutory authority in AS 44.46.020 to adopt regulations for "standard of cleanliness and sanitation in connection with the construction, operation, and maintenance of . . . barbershops, hairdressing or cosmetology establishments." Again, a business license requires the name and location information. The fourth requirement is unnecessary; there is no additional protection gained from having a licensed practitioner as owner or manager when all the employees have to be licensed practitioners.

D. Instructors - The statutory authority for licensing instructors is construed from AS 08.13.185, which

establishes an instructor's license fee of $70 and a $60 biennial renewal fee. Using that as authority, the Board adopted regulations for licensing of instructors. The licensing requirements established in the regulation are summarized as follows:

1. A current practitioner's license.

2. Three years of practice or one year of practice and six-hundred hours of student instructor training.

3. Passing the written and practical portions of the instructor's examination given by the Board.

The licensing of these instructors is not necessary since the third minimum standard required by the Department of Education for their Certificate of Registration in AS 14.48-.060 is that "the education or experience qualifications of directors, administrators, supervisors, and instructors are such as may reasonably insure that the students will receive education consistent with the objectives of the course or program of study."

As we have seen, each of the four categories represent an unnecessary and duplicative licensing function.

The Board tests each individual to determine if they have the minimum qualifications to practice all phases of their profession. Therefore, the additional categories of licensing provide no additional public protection.

Recommendation No. 3

The Board should review existing statutes and regulations and seek appropriate revision where necessary.

During our examination, we reviewed the Board's statutes and regulations to determine if any were obsolete, vague, or unduly restrictive. Examples of what we found are as follows:

A. The Board has promulgated considerable regulations for the licensing of instructors when the only statutory authority to issue instructors' licenses is implied by AS 08.13.185 which defines license fees.

B. AS 08.13.120 authorizes and 12 AAC 09.110(b) provides the criteria for the licensing of shops, however, the Board does not license shops.

C. AS 08.13.120 also requires that either the shop owner be a licensed practitioner, or employ a licensed practitioner as the manager. Since all practitioners in the shop must be licensed, that requirement is not necessary.

AS 08.13.030 provides that the Board shall exercise general control over the vocations of barbering, hairdressing, and cosmetology. This cannot be done effectively without clear and concise statutes and regulations. Therefore, the Board should review their statutes and regulations for obsolescence, vagueness, and restrictiveness, and propose appropriate changes where necessary.

Recommendation No. 4

The Board should improve their procedures for the administration of the State examination.

We reviewed the examination function of the Board and noted problems and complaints concerning the Board's administration of the examination, specifically:

A. The State examination is currently given only in Anchorage and Fairbanks. While we recognize that these locations represent the residence of a large majority of students taking the examination, there remains a high economic cost to students from other parts of the State who have to pay travel and living expenses for themselves and their model for the duration of the examination. We suggest that the Board administer the examination periodically statewide with the possible use of examination proctors.

B. After two separate examinations, the Board members and proctors met after the practical examination had been completed. They reviewed the score sheets and in six cases, changed failing grades to passing grades. The Division of Occupational Licensing has notified the Board that grades cannot be changed at a post-examination review session.

C. The Division of Occupational Licensing has received numerous complaints from students concerning Board members' behavior during the practical examination. The complaints included Board members asking students questions such as where they went to school, and not adequately checking the work done by the students. Again, Occupational Licensing sent a letter to the Board addressing these and other problems and offered suggestions for their possible resolution.

According to AS 08.13.030, it is the Board's duty to examine applicants and approve the issuance of licenses and permits to practice. We, therefore, recommend the Board improve their procedures for administering the State examination.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board issues licenses to schools, school owners, shop owners, and instructors that are unnecessary (see Recommendation No. 2).

B. The Board has only held the State examinations in Fairbanks and Anchorage. Of the last 12 examinations, 9 have been in Anchorage and 3 in Fairbanks. This can cause an economic hardship to individuals from other parts of the State who have to travel to take the examination (see Recommendation No. 4).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board is not issuing shop licenses as required by Alaska Statute 08.13.120 (see Recommendation No. 3).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board proposed various statutory changes to definitions of a cosmetician, an instructor, and other statutory areas. None of these changes have been submitted to the Legislature from the Executive Branch.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. Board meetings are announced to the public. Comments on regulation changes are solicited by announcement in public newspapers. The Board does not actively solicit comments on its effectiveness.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board has published notices of its meetings in Anchorage, Fairbanks, and Juneau. However, such notices have not always been published in a consistent and timely manner as required by statute.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board, or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

A. During our review, we found the average case length for complaints and investigations filed with the Office of the Ombudsman to be approximately 1 month; with the Division of Occupational Licensing, approximately 7 months, and; with the Attorney General's Office, Consumer Protection Agency was approximately 1 month.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. In two instances after the practical examination was completed and the final grades were calculated, the Board members and examination proctors reviewed the grades and changed six individuals' grades in various sections of the examination from failing to passing (see Recommendation Nos. 1 and 4).

B. According to the Division of Occupational Licensing's records for the Fiscal Year 1982, there were a total of 464 new licenses issued. Of these new licenses, 181 were issued by credentials.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. Applications for licensure as a practitioner require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the recommendations section of this report.

(Intentionally left blank)

APPENDIX A

BOARD OF BARBERS AND HAIRDRESSERS
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended June 30, 1982

(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$75,697
Less: Expenditures (Note 3)	70,713
Excess of Expenditures Over Revenues	$ 4,984

Revenue Type	Amount	Collection Time
School	$ 700	With license issuance
School Renewal	400	Biennially
School Owner	70	With license issuance
School Owner Renewal	60	Biennially
Instructor	70	With license issuance
Instructor Renewal	60	Biennially
Shop Owner	45	With license issuance
Shop Owner Renewal	40	Biennially
Barber Practitioner	[illegible]	With license renewal
Barber Practitioner Renewal	40	Biennially
Hairdresser Practitioner	55	With license issuance
Hairdresser Practitioner Renewal	40	Biennially
Cosmetology Practitioner	45	With license issuance
Cosmetology Practitioner Renewal	30	Biennially
Temporary Permit	30	With permit issuance
Student Permit	20	With permit issuance
Examination	25	With application
Investigation	25	With application
Delinquent Fee for Late Renewal	20	With application

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and accordingly we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in Fiscal Years 1981 and 1982 in order to obtain a more accurate representation of revenues collected.

Note 3

Expenditures include those made by board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of the Division of Occupational Licensing. They do not include expenditures for efforts of other departments (such as the Department of Law) assisting the boards and the Division.

STATE OF ALASKA
DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT
OFFICE OF THE COMMISSIONER

BILL SHEFFIELD, GOVERNOR

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

August 12, 1983

RECEIVED
AUG 15 1983

Mr. Gerald Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Legislative Affairs Agency
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: Preliminary Audit Report
Board of Barbers and Hairdressers

Thank you for the opportunity to comment on the Preliminary Audit Report of the Board of Barbers and Hairdressers. We have reviewed your recommendations and, based on information you supplied and information in our files, at this time we concur that the Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

Opposition to this position will come from licensed professionals. The consuming public has indicated neither support for continuing nor dissolving the board. Complaints have been made that the board was not acting in the best interests of hairdresser students.

RECOMMENDATION #1

The Board of Barbers and Hairdressers should be allowed to terminate on June 30, 1984.

We would concur. However, we will respond to those individual items your report has listed as A, B, C, and D.

Item A. We concur. This problem did occur. The division has attempted to correct this type of action by requiring the Licensing Examiner to place the score sheets in a sealed envelope.

Item B. Your assessment is correct. However, Anchorage and Fairbanks are the only locations where there are schools with sufficient facilities that can accommodate the number of applicants who must be tested.

Item C. This statement is correct. Complaints have been discussed with the board.

Item D. Response follows (see Recommendation #2).

08-H2LH

RECOMMENDATION #2

The board should seek legislation that would reduce and restrict its various licensing functions.

We disagree with the general assumption that the additional categories of licensure represent an unnecessary layer of licensing. Each category evaluates and identifies separate functions. We would agree to eliminate the school owner license, but would strongly support continued licensing of the facility. Students are able to obtain State student loans to attend beauty and/or barbering schools. The school should be responsible for an accurate and legitimate course of training or instructions. We would not be opposed to having all fees paid to one State agency, be it Department of Education or the Department of Commerce and Economic Development.

We support some registration or recording of the shop owner, for public protection. It would be necessary to identify a responsible party for redress of damages in the event of public harm.

Because instructor fees are addressed in statutory language, it is assumed the legislative intent was another level of competency. It also substantiates a licensee just out of beauty school could not begin teaching others. We would support a position of graduation from a licensed school and a specified number of years in practical experience to qualify for an instructor's license.

The additional licensing does offer additional public protection by insuring competent practitioners.

RECOMMENDATION #3

The board should review existing statutes and regulations and seek appropriate revision where necessary.

We would concur with this recommendation in substance. The board has continually worked on regulations. Efforts were made for statutory change.

RECOMMENDATION #4

The board should improve their procedures for the administration of the State examination.

We agree. Responses to the items listed as A, B, and C were provided on previous pages of this response.

Division records will reflect that efforts were made to address these problems and assist the board. They recently began training licensed professionals to serve as proctors. With the division's assistance, extra examinations were conducted to reduce the expense to a number of applicants from the Kenai area.

The division is currently polling the licensed professionals as to the attitude toward the existing State examination process. The survey asks if there is a need for State examinations.

We would encourage schools to assume responsibility of graduating competent, qualified professionals and to set graduation standards to ensure only those meeting professional criteria would receive diplomas or certificates.

Should the survey indicate a desire to eliminate State exams, we would look toward higher requirements in courses and for graduation.

Persons entering the profession by apprenticeship could be required to pass a school examination before licensure.

Again, thank you for the opportunity to respond to your Preliminary Audit Report.

Sincerely,

Richard A. Lyon
Commissioner

Senate Finance Committee

Senator Jan Faiks, Co-Chairman Senator John Sackett, Co-Chairman

JCS:

Hairdressers/barbers:

Aside from the fact that I think it's dumb that the state has to regulate who cuts your hair the amendments requested by the Board (through John Melvin) do provide for a greater degree of flexibility in determining who shall be licensed to cut hair in Alaska.

Largely, they want to make sure that people who provide hair dressing services are properly trained and know what they're doing.

The amendments make sense and would, in my opinion, add to the bill.

Thur. May 8th

JCS:

Attached is a copy of the BARBERS/HAIRDRESSERS bill, SCS CSHB 305(L&C), which was held till today.

John Melvin called and wanted additions to the bill.

I have drafted the two amendments (attached).

Amendment #1 adds a new phrase to existing law which would give the board more discretionary authority when deciding to reinstate a license.

Amendment #2 would add a new subsection to the Qualifications of Applicants chapter of existing statutes, broadening the requirements of applicants for licensure and giving the board flexibility in deciding an applicants qualifications for licensure.

The reason these amendments were not added in committee is because the board just held a meeting following labor and commerce's committee issuance of the CS for HB-305.

Proposed Statutory Changes to AS 08.13,

Barbers and Hairdressers

Section 08.13.140. Lapsed License. A lapsed license may be reinstated if the license has not been lapsed for a period of more than three years, or otherwise at the discretion of the Board, and all renewal and delinquent fees for the period during which the license has been lapsed are paid.

Section 08.13.080. Qualifications of Applicants. An applicant for examination must

(1) have successfully completed all courses that a school with a program in barbering is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice barbering;

(2) have successfully completed all courses that a school with a program in hairdressing is required to teach to be licensed under AS 08,13.110 if applying for a license to practice hairdressing;

(3) have successfully completed all courses that a school with a program in cosmetology is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice cosmetology; or

(4) have served an apprenticeship under AS 08.13.032 [(Sec. 1 Ch 159 SLA 1980)]; or

(5) have completed a combination of coursework and apprenticeship acceptable to the board. (Sec. 1 Ch 159 SLA 1980)

ND/dg15258D
043086b

Amendment #1
SACKETT

AMENDMENT to SCS CSHB 305(L&C), relating to barbers, hairdressers, and cosmetologists,

add new Sec. 8 AS 08.13.140 is amended to Read.

Page 4, line 9, ~~ADD a new section to read:~~

Section 08.13.140. Lapsed License. A lapsed license may be reinstated if the license has not been lapsed for a period of more than three years, or otherwise at the discretion of the Board, and all renewal and delinquent fees for the period during which the license has been lapsed are paid.

Renumber remaining sections accordingly

AMENDMENT #2

by Sackett

SCS CSHB 305(L&C), relating to barbers, hairdressers, and cosmetologists,

Page 3, line 6: following the word "instructor" delete the period, add a semi-colon and the word or, and on line 7, add a new subsection to read:

(6)have completed a combination of coursework and apprenticeship acceptable to the board. (Sec. 1 Ch 159 SLA 1980).

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 305 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to barbers, hairdressers, and cosmetologists; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.03.010(c)(16) is amended to read:

(16) Board of Barbers and Hairdressers (AS 08.13.010) -- June 30, 1989 [1986].

* Sec. 2. AS 08.13.050 is amended to read:

Sec. 08.13.050. RECORDS OF THE BOARD. The Department of Commerce and Economic Development [BOARD] shall keep a record of the board's [ITS] proceedings related to the issuance, refusal, suspension, and revocation of each license and permit. The record shall contain the name of the person to whom a license or permit is issued, the person's place of business, the date of issuance for each license and permit, and whether it is currently valid. The record shall be open to inspection by the public at all reasonable times. The board shall submit an annual report on its operations to the governor.

* Sec. 3. AS 08.13.070 is amended to read:

Sec. 08.13.070. LICENSE REQUIRED. A person may not

(1) practice barbering, hairdressing, or cosmetology without a license, temporary permit, or student permit unless exempted under AS 08.13.160(d);

(2) practice barbering, hairdressing, or cosmetology except in a shop or school licensed under this chapter unless exempted under AS 08.13.160(d) or permitted under AS 08.13.160(e);

(3) open or conduct a school of barbering, hairdressing, or cosmetology without a license;

(4) teach in a school of barbering, hairdressing, or cosmetology, or supervise an apprentice without an instructor's license;

(5) [(3)] operate a shop in violation of AS 08.13.120;

(6) [(4)] permit an employee or other person being supervised who is not exempted under AS 08.13.160(d) to practice barbering, hairdressing, or cosmetology without a license, temporary permit, or student permit;

(7) [(5)] permit the use of the person's license, temporary permit, or student permit by another person;

(8) [(6)] obtain or attempt to obtain a license, temporary permit, or student permit by fraudulent means.

* Sec. 4. AS 08.13.080 is amended to read:

Sec. 08.13.080. QUALIFICATIONS OF APPLICANTS. An applicant for examination must

(1) have successfully completed all courses that a school with a curriculum [PROGRAM] in barbering approved by the board is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice barbering;

(2) have successfully completed all courses that a school with a curriculum [PROGRAM] in hairdressing approved by the board is required to teach to be licensed under AS 08.13.110 if applying for a license to practice hairdressing;

(3) have successfully completed all courses that a school with a curriculum [PROGRAM] in cosmetology approved by the board is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice cosmetology; [OR]

(4) have served an apprenticeship under AS 08.13.082; or

(5) specify the field of practice in which the applicant intends to teach and have held a license to practice in the field for three years or have held a license in the field for one year and have completed 600 hours of student training as an instructor in the field of practice from a licensed school with a curriculum approved by the board if applying for a license as an instructor.

* Sec. 5. AS 08.13.082(a) is amended to read:

(a) The period of apprenticeship required to qualify an applicant for a license to practice barbering is 2,000 [1,500] hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than 12 [NINE] months from the date of its commencement and must be completed in not more than two years from the date of its commencement.

* Sec. 6. AS 08.13.100(d) is amended to read:

(d) A person holding a current valid license from a board of barbering, hairdressing, or cosmetology in another state [OR COUNTRY] is entitled to a license under this chapter without examination in this state. An application must [SHALL] include:

(1) proof of a valid license issued by another licensing jurisdiction;

(2) proof of completed training, testing and working experience that [WHICH] the board finds to meet the minimum requirements of the state; and

(3) payment of a credential investigation fee.

* Sec. 7. AS 08.13.130 is amended to read:

Sec. 08.13.130. DISPLAY OF LICENSE OR PERMIT. A practitioner [PRACTITIONERS] shall display the practitioner's [THEIR] license in a conspicuous location in the practitioner's [THEIR] place of business. Each shop owner is responsible for the display of the licenses of

employees. [PRACTITIONERS WHO PRACTICE OUTSIDE OF A PLACE OF BUSINESS SHALL CARRY THEIR LICENSE WITH THEM TO BE SHOWN TO PERSONS UPON WHOM WORK IS PERFORMED.] A person holding a student permit or temporary permit shall display the permit in a conspicuous location in the school in which the person is enrolled or the shop in which the apprentice works. The school or shop owner is responsible for the display of a permit for each enrolled student or apprentice [HAVE THAT PERMIT AVAILABLE FOR INSPECTION WHEN ENGAGED IN PRACTICE].

* Sec. 8. AS 08.13.160(d) is amended to read:

(d) The licensing and permit provisions of this chapter do not apply to

(1) a person practicing barbering, hairdressing, or cosmetology in a community having a population of less than 1,000 people that [WHICH] is not within 25 miles of a community of more than 1,000 people and who uses only chemicals available to the general public;

(2) a shampoo person;

(3) a licensed health care professional;

(4) a person licensed by another licensing jurisdiction in a field of practice licensed by this chapter while demonstrating techniques or products to persons holding licenses or permits under this chapter.

* Sec. 9. AS 08.13.160 is amended by adding a new subsection to read:

(e) The board shall adopt regulations to permit a person licensed under this chapter to practice outside a licensed shop or school for limited purposes including

(1) care of clients confined to an institution or health care facility;

(2) care of clients with limited mobility;

(3) participation in charitable events; and

(4) participation in workshops or demonstrations of techniques or products.

* Sec. 10. AS 08.13.170 is repealed and reenacted to read:

Sec. 08.13.170. TEMPORARY PERMITS. The department shall issue a temporary permit to an applicant for licensing who holds a license to practice as a barber, hairdresser, or cosmetologist in another state. The permit is valid until the board either issues a permanent license or rejects the application. The board shall act on an application within six months.

* Sec. 11. AS 08.13.180 is amended to read:

Sec. 08.13.180. STUDENT PERMITS. A person attending a licensed school of barbering, hairdressing, or cosmetology, and a person apprenticed to a licensed instructor [PRACTITIONER] in a shop approved by the board shall obtain a student permit. A student permit to practice barbering or hairdressing is valid for two years. A student permit to practice cosmetology is valid for one year. A student permit may not be renewed, but, upon application, the board may issue a new permit to the same person, or extend an expired permit to the date of the next scheduled examination. Credit earned under an expired student permit may be transferred to a new permit as determined by the board.

* Sec. 12. AS 08.13.210 is amended to read:

Sec. 08.13.210. HEALTH AND SANITARY CONDITIONS. Health and sanitary conditions in shops and schools of barbering, hairdressing, and cosmetology shall be supervised by the Department of Environmental Conservation [HEALTH AND SOCIAL SERVICES].

* Sec. 13. AS 08.13.220(1) is amended to read:

(1) "apprentice" means a person who receives on-the-job training under [THE] direct supervision [OF A PRACTITIONER, WHO DOES

NOT RECEIVE A WAGE OR COMMISSION BEFORE COMPLETING 350 HOURS OF TRAINING, AND FOR WHOSE WORK NO CHARGE IS MADE BEFORE COMPLETING 350 HOURS OF TRAINING];

* Sec. 14. AS 08.13.220(2) is amended to read:

(2) "barbering" means shaving, trimming, or cutting, styling, curling, permanent waving, bleaching, coloring, cleansing, or chemically straightening the beard or hair of a living person for a fee and for cosmetic purposes;

* Sec. 15. AS 08.13.220(4) is amended to read:

(4) "cosmetology" means the use of the hands, [MECHANICAL OR ELECTRIC APPARATUS OR] appliances, cosmetic preparations, antiseptics, or lotions in massaging, cleansing, stimulating, or similar work on the scalp, face or neck, including skin care, make-up, and temporary removal of superfluous hair, [HUMAN BODY] for cosmetic purposes for a fee;

* Sec. 16. AS 08.13.220 is amended by adding a new paragraph to read:

(9) "instructor" means a person who teaches barbering, hairdressing, or cosmetology in a school or who supervises an apprentice.

* Sec. 17. A person who, on the effective date of this Act, holds a valid license issued by the Board of Barbers and Hairdressers may continue to practice as permitted by the license until the license expires and may renew the license in the appropriate field of practice without meeting the new requirements for licensure.

* Sec. 18. This Act takes effect immediately in accordance with AS 01.-10.070(c).

SENATE CS FOR CS FOR HOUSE BILL NO. 305 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to barbers, hairdressers, and cosmetologists; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.03.010(c)(16) is amended to read:

(16) Board of Barbers and Hairdressers (AS 08.13.010) -- June 30, [1989] 1986].

* Sec. 2. AS 08.13.050 is amended to read:

Sec. 08.13.050. RECORDS OF THE BOARD. The Department of Commerce and Economic Development [BOARD] shall keep a record of the board's [ITS] proceedings related to the issuance, refusal, suspension, and revocation of each license and permit. The record shall contain the name of the person to whom a license or permit is issued, the person's place of business, the date of issuance for each license and permit, and whether it is currently valid. The record shall be open to inspection by the public at all reasonable times. The board shall submit an annual report on its operations to the governor.

* Sec. 3. AS 08.13.070 is amended to read:

Sec. 08.13.070. LICENSE REQUIRED. A person may not

(1) practice barbering, hairdressing, or cosmetology without a license, temporary permit, or student permit unless exempted under AS 08.13.160(d);

(2) practice barbering, hairdressing, or cosmetology except in a shop or school licensed under this chapter unless exempted under AS 08.13.160(d) or permitted under AS 08.13.160(e);

(3) open or conduct a school of barbering, hairdressing, or cosmetology without a license;

(4) teach in a school of barbering, hairdressing, or cosmetology, or supervise an apprentice without an instructor's license;

(5) [(3)] operate a shop in violation of AS 08.13.120;

(6) [(4)] permit an employee or other person being supervised who is not exempted under AS 08.13.160(d) to practice barbering, hairdressing, or cosmetology without a license, temporary permit, or student permit;

(7) [(5)] permit the use of the person's license, temporary permit, or student permit by another person;

(8) [(6)] obtain or attempt to obtain a license, temporary permit, or student permit by fraudulent means.

* Sec. 4. AS 08.13.080 is amended to read:

Sec. 08.13.080. QUALIFICATIONS OF APPLICANTS. An applicant for examination must

(1) have successfully completed all courses that a school with a curriculum [PROGRAM] in barbering approved by the board is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice barbering;

(2) have successfully completed all courses that a school with a curriculum [PROGRAM] in hairdressing approved by the board is required to teach to be licensed under AS 08.13.110 if applying for a license to practice hairdressing;

(3) have successfully completed all courses that a school with a curriculum [PROGRAM] in cosmetology approved by the board is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice cosmetology; [OR]

(4) have served an apprenticeship under AS 08.13.082; or

(5) specify the field of practice in which the applicant intends to teach and have held a license to practice in the field for three years or have held a license in the field for one year and have completed 600 hours of student training as an instructor in the field of practice from a licensed school with a curriculum approved by the board if applying for a license as an instructor.

* Sec. 5. AS 08.13.082(a) is amended to read:

(a) The period of apprenticeship required to qualify an applicant for a license to practice barbering is 2,000 [1,500] hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than 12 [NINE] months from the date of its commencement and must be completed in not more than two years from the date of its commencement.

* Sec. 6. AS 08.13.100(d) is amended to read:

(d) A person holding a current valid license from a board of barbering, hairdressing, or cosmetology in another state [OR COUNTRY] is entitled to a license under this chapter without examination in this state. An application must [SHALL] include:

(1) proof of a valid license issued by another licensing jurisdiction;

(2) proof of completed training, testing and working experience that [WHICH] the board finds to meet the minimum requirements of the state; and

(3) payment of a credential investigation fee.

* Sec. 7. AS 08.13.130 is amended to read:

Sec. 08.13.130. DISPLAY OF LICENSE OR PERMIT. A practitioner [PRACTITIONERS] shall display the practitioner's [THEIR] license in a conspicuous location in the practitioner's [THEIR] place of business. Each shop owner is responsible for the display of the licenses of

employees. [PRACTITIONERS WHO PRACTICE OUTSIDE OF A PLACE OF BUSINESS SHALL CARRY THEIR LICENSE WITH THEM TO BE SHOWN TO PERSONS UPON WHOM WORK IS PERFORMED.] A person holding a student permit or temporary permit shall display the permit in a conspicuous location in the school in which the person is enrolled or the shop in which the apprentice works. The school or shop owner is responsible for the display of a permit for each enrolled student or apprentice [HAVE THAT PERMIT AVAILABLE FOR INSPECTION WHEN ENGAGED IN PRACTICE].

* Sec. 8. AS 08.13.160(d) is amended to read:

(d) The licensing and permit provisions of this chapter do not apply to

(1) a person practicing barbering, hairdressing, or cosmetology in a community having a population of less than 1,000 people that [WHICH] is not within 25 miles of a community of more than 1,000 people and who uses only chemicals available to the general public;

(2) a shampoo person;

(3) a licensed health care professional;

(4) a person licensed by another licensing jurisdiction in a field of practice licensed by this chapter while demonstrating techniques or products to persons holding licenses or permits under this chapter.

* Sec. 9. AS 08.13.160 is amended by adding a new subsection to read:

(e) The board shall adopt regulations to permit a person licensed under this chapter to practice outside a licensed shop or school for limited purposes including

(1) care of clients confined to an institution or health care facility;

(2) care of clients with limited mobility;

(3) participation in charitable events; and

(4) participation in workshops or demonstrations of techniques or products.

* Sec. 10. AS 08.13.170 is repealed and reenacted to read:

Sec. 08.13.170. TEMPORARY PERMITS. The department shall issue a temporary permit to an applicant for licensing who holds a license to practice as a barber, hairdresser, or cosmetologist in another state. The permit is valid until the board either issues a permanent license or rejects the application. The board shall act on an application within six months.

* Sec. 11. AS 08.13.180 is amended to read:

Sec. 08.13.180. STUDENT PERMITS. A person attending a licensed school of barbering, hairdressing, or cosmetology, and a person apprenticed to a <u>licensed instructor</u> [PRACTITIONER] in a shop approved by the board shall obtain a student permit. A student permit to practice barbering or hairdressing is valid for two years. A student permit to practice cosmetology is valid for one year. A student permit may not be renewed, but, upon application, the board may issue a new permit to the same person, or extend an expired permit to the date of the next scheduled examination. Credit earned under an expired student permit may be transferred to a new permit as determined by the board.

* Sec. 12. AS 08.13.210 is amended to read:

Sec. 08.13.210. HEALTH AND SANITARY CONDITIONS. Health and sanitary conditions in shops and schools of barbering, hairdressing, and cosmetology shall be supervised by the Department of <u>Environmental Conservation</u> [HEALTH AND SOCIAL SERVICES].

* Sec. 13. AS 08.13.220(1) is amended to read:

(1) "apprentice" means a person who receives on-the-job training under [THE] direct supervision [OF A PRACTITIONER, WHO DOES

NOT RECEIVE A WAGE OR COMMISSION BEFORE COMPLETING 350 HOURS OF TRAINING, AND FOR WHOSE WORK NO CHARGE IS MADE BEFORE COMPLETING 350 HOURS OF TRAINING];

* Sec. 14. AS 08.13.220(2) is amended to read:

(2) "barbering" means shaving, trimming, or cutting, styling, curling, permanent waving, bleaching, coloring, cleansing, or chemically straightening the beard or hair of a living person for a fee and for cosmetic purposes;

* Sec. 15. AS 08.13.220(4) is amended to read:

(4) "cosmetology" means the use of the hands, [MECHANICAL OR ELECTRIC APPARATUS OR] appliances, cosmetic preparations, antiseptics, or lotions in massaging, cleansing, stimulating, or similar work on the scalp, face or neck, including skin care, make-up, and temporary removal of superfluous hair, [HUMAN BODY] for cosmetic purposes for a fee;

* Sec. 16. AS 08.13.220 is amended by adding a new paragraph to read:

(9) "instructor" means a person who teaches barbering, hairdressing, or cosmetology in a school or who supervises an apprentice.

* Sec. 17. A person who, on the effective date of this Act, holds a valid license issued by the Board of Barbers and Hairdressers may continue to practice as permitted by the license until the license expires and may renew the license in the appropriate field of practice without meeting the new requirements for licensure.

* Sec. 18. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE HOUSE BY THE FINANCE COMMITTEE

CS FOR HOUSE BILL NO. 305 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to barbers, cosmetologists, and estheticians; and providing for an effective date."

BE IT ENACTED BY THE ~~LEGISLATURE~~ OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010(24) is amended to read:

(24) Board of Barbers and Cosmetologists [HAIRDRESSERS] (AS 08.13.010).

* Sec. 2. AS 08.03.010(c)(16) is amended to read:

(16) Board of Barbers and Cosmetologists [HAIRDRESSERS] (AS 08.13.010) -- June 30, 1989 [1986].

* Sec. 3. AS 08.13.010 is amended to read:

Sec. 08.13.010. CREATION AND MEMBERSHIP OF BOARD. (a) There is created the Board of Barbers and Cosmetologists [HAIRDRESSERS] consisting of five members appointed by the governor.

(b) The board consists of

(1) two persons licensed as barbers under this chapter;

(2) two persons licensed as cosmetologists [HAIRDRESSERS] under this chapter; and

(3) one public member.

* Sec. 4. AS 08.13.030 is amended to read:

Sec. 08.13.030. POWERS AND DUTIES OF THE BOARD. (a) The board shall exercise general control over the vocations of barbering, cosmetology, esthetics, and manicure and pedicure [HAIRDRESSING, AND COSMETOLOGY].

(b) The board shall

(1) examine applicants and approve the issuance of licenses and permits to practice;

(2) authorize the issuance of licenses for schools of barbering, cosmetology, and esthetics [HAIRDRESSING, AND COSMETOLOGY].

(c) The board may

(1) suspend or revoke a license or permit;

(2) on its own motion or upon receipt of a written complaint, conduct hearings and request the Department of Commerce and Economic Development to investigate the practices of a person, shop, or school involved in the practice or teaching of barbering, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING, OR COSMETOLOGY];

(3) adopt regulations or do any act necessary to carry out the provisions of this chapter.

* Sec. 5. AS 08.13.040 is amended to read:

Sec. 08.13.040. MEETINGS AND EXAMINATIONS. The board shall meet as often as necessary to conduct its business. It shall conduct separate examinations covering each field of practice: barbering, cosmetology, esthetics, and manicure and pedicure [HAIRDRESSING, AND COSMETOLOGY]. Examinations shall be given at least twice in every year for each field of practice for which applications for licensure are pending. An applicant may take an examination in more than one field during the same testing session.

* Sec. 6. AS 08.13.050 is amended to read:

Sec. 08.13.050. RECORDS OF THE BOARD. The Department of Commerce and Economic Development [BOARD] shall keep a record of the board's [ITS] proceedings related to the issuance, refusal, suspension, and revocation of each license and permit. The record shall contain the name of the person to whom a license or permit is issued,

the person's place of business, the date of issuance for each license and permit, and whether it is currently valid. The record shall be open to inspection by the public at all reasonable times. The board shall submit an annual report on its operations to the governor.

* Sec. 7. AS 08.13.070 is amended to read:

Sec. 08.13.070. LICENSE REQUIRED. A person may not

(1) practice barbering, cosmetology, esthetics, or manicuring and pedicuring [HAIRDRESSING, OR COSMETOLOGY] without a license, temporary permit, or student permit unless exempted under AS 08.13.160(d);

(2) practice barbering, cosmetology, esthetics, or manicure and pedicure except in a shop or school licensed under this chapter unless exempted under AS 08.13.160(d) or permitted under AS 08.13.-160(e);

(3) open or conduct a school of barbering, cosmetology, or esthetics [HAIRDRESSING, OR COSMETOLOGY] without a license;

(4) teach in a school of barbering, cosmetology, or esthetics or supervise an apprentice without an instructor's license;

(5) [(3)] operate a shop in violation of AS 08.13.120;

(6) [(4)] permit an employee or other person being supervised who is not exempted under AS 08.13.160(d) to practice barbering, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING, OR COSMETOLOGY] without a license, temporary permit, or student permit;

(7) [(5)] permit the use of the person's license, temporary permit, or student permit by another person;

(8) [(6)] obtain or attempt to obtain a license [,TEMPORARY PERMIT,] or student permit by fraudulent means.

* Sec. 8. AS 08.13.080 is amended to read:

Sec. 08.13.080. QUALIFICATIONS OF APPLICANTS. An applicant for

examination must apply on a form provided by the board, submit a recent unmounted, autographed photograph of the applicant, and must

(1) have successfully completed all courses that a school with a curriculum [PROGRAM] in barbering approved by the board is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice barbering;

(2) have successfully completed all courses that a school with a curriculum [PROGRAM] in cosmetology approved by the board [HAIRDRESSING] is required to teach to be licensed under AS 08.13.110 if applying for a license to practice cosmetology [HAIRDRESSING];

(3) have successfully completed all courses that a school with a curriculum [PROGRAM] in esthetics approved by the board [COSMETOLOGY] is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice esthetics [COSMETOLOGY]; [OR]

(4) have served an apprenticeship under AS 08.13.082;

(5) have successfully completed all the courses that a school with a curriculum in manicure and pedicure approved by the board is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice manicure and pedicure; or

(6) specify the field of practice in which the applicant intends to teach and have held a license to practice in the field for three years or have held a license in the field for one year and have completed 600 hours of student training as an instructor in the field of practice from a licensed school with a curriculum approved by the board.

* Sec. 9. AS 08.13.082 is amended to read:

Sec. 08.13.082. APPRENTICESHIP. (a) The period of apprenticeship required to qualify an applicant for a license to practice

barbering is 2,000 [1,500] hours. [THE APPRENTICESHIP MUST BE SERVED IN A SHOP APPROVED BY THE BOARD.] The apprenticeship may not be completed in less than 12 [NINE] months from the date of its commencement and must be completed in not more than two years from the date of its commencement.

(b) The period of apprenticeship required to qualify an applicant for a license to practice cosmetology [HAIRDRESSING] is 2,000 hours. [THE APPRENTICESHIP MUST BE SERVED IN A SHOP APPROVED BY THE BOARD.] The apprenticeship may not be completed in less than one year from the date of its commencement and must be completed in not more than two years from the date of its commencement.

(c) The period of apprenticeship required to qualify an applicant for a license to practice esthetics [COSMETOLOGY] is 350 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than three [SIX] months from the date of its commencement and must be completed in not more than nine months [ONE YEAR] from the date of its commencement.

(d) The board shall adopt regulations to establish the requirements for an apprenticeship to qualify an applicant for a license to practice manicure and pedicure.

* Sec. 10. AS 08.13.100 is amended to read:

Sec. 08.13.100. LICENSE. (a) The board shall authorize the issuance of a license to each qualified applicant who has passed each part of the [AN] examination under AS 08.13.090. The license is valid for two years and subject to renewal.

(b) A license must [SHALL] state the areas of practice (barbering, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING, COSMETOLOGY], or any combination) that [WHICH] the practitioner is qualified to perform.

(c) The board may by regulation create areas of limited professional licensing in the field of esthetics, including regulating [COSMETOLOGY, EXCEPT THAT THE BOARD MAY NOT RESTRICT OR OTHERWISE REGULATE] the practice of manicure and [OR] pedicure. Any limitation must be stated on the license.

(d) A person holding a current valid license from a board of barbering, cosmetology, or esthetics [HAIRDRESSING, OR COSMETOLOGY] in another state [OR COUNTRY] is entitled to a license under this chapter without examination in this state. An application must [SHALL] include:

(1) proof of a valid license issued by another licensing jurisdiction;

(2) proof of completed training, testing and working experience that [WHICH] the board finds to meet the minimum requirements of the state; and

(3) payment of a credential investigation fee.

* Sec. 11. AS 08.13.110 is amended to read:

Sec. 08.13.110. SCHOOL LICENSE. The board shall adopt regulations for the licensing of schools of barbering, cosmetology, and esthetics [HAIRDRESSING, AND COSMETOLOGY]. The regulations shall include details of the curriculum, minimum hours of instruction, physical condition of the facilities, and financial responsibility of the owner.

* Sec. 12. AS 08.13.130 is amended to read:

Sec. 08.13.130. DISPLAY OF LICENSE OR PERMIT. A practitioner [PRACTITIONERS] shall display the practitioner's [THEIR] license in a conspicuous location in the practitioner's [THEIR] place of business. Each shop owner is responsible for the display of the licenses of employees. [PRACTITIONERS WHO PRACTICE OUTSIDE OF A PLACE OF BUSINESS

SHALL CARRY THEIR LICENSE WITH THEM TO BE SHOWN TO PERSONS UPON WHOM WORK IS PERFORMED.] A person holding a student permit or temporary permit shall display the permit in a conspicuous location in the school in which the person is enrolled or the shop in which the apprentice works. The school or shop owner is responsible for the display of a permit for each enrolled student or apprentice [HAVE THAT PERMIT AVAILABLE FOR INSPECTION WHEN ENGAGED IN PRACTICE].

* Sec. 13. AS 08.13.150 is amended to read:

Sec. 08.13.150. GROUNDS FOR REFUSAL, SUSPENSION OR REVOCATION OF A LICENSE OR PERMIT. The board may refuse, suspend, or revoke a license, student permit, or temporary permit for a failure to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board.

* Sec. 14. AS 08.13.160(d) is amended to read:

(d) The licensing and permit provisions of this chapter do not apply to

(1) a person practicing barbering, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING, OR COSMETOLOGY] in a community having a population of less than 1,000 people that [WHICH] is not within 25 miles of a community of more than 1,000 people and who uses only chemicals available to the general public;

(2) a shampoo person;

(3) a licensed health care professional;

(4) a person licensed by another licensing jurisdiction in a field of practice licensed by this chapter while demonstrating techniques or products to persons holding licenses or permits under this chapter.

* Sec. 15. AS 08.13.160 is amended by adding a new subsection to read:

(e) The board shall adopt regulations to permit a person

licensed under this chapter to practice outside a licensed shop or school for limited purposes including

(1) care of clients confined to an institution or health care facility;

(2) care of clients with limited mobility;

(3) participation in charitable events; and

(4) participation in workshops or demonstrations of techniques or products.

* Sec. 16. AS 08.13.170 is repealed and reenacted to read:

Sec. 08.13.170. TEMPORARY PERMITS. The department shall issue a temporary permit to an applicant for licensing who holds a license to practice as a barber, cosmetologist, esthetician, manicurist or pedicurist in another state. The permit is valid until the board either issues a permanent license or rejects the application. The board shall act on an application within six months.

* Sec. 17. AS 08.13.180 is amended to read:

Sec. 08.13.180. STUDENT PERMITS. A person attending a licensed school of barbering, cosmetology, or esthetics [HAIRDRESSING, OR COSMETOLOGY], and a person apprenticed by [TO] a licensed instructor [PRACTITIONER] in a shop [APPROVED BY THE BOARD] shall obtain a student permit. A student permit to practice barbering or cosmetology [HAIRDRESSING] is valid for two years. A student permit to practice esthetics [COSMETOLOGY] is valid for nine months [ONE YEAR]. The board shall establish by regulation the term of a student permit to practice manicure and pedicure. A student permit may not be renewed, but, upon application, the board may issue a new permit to the same person, or extend an expired permit to the date of the next scheduled examination. Credit earned under an expired student permit may be transferred to a new permit as determined by the board.

* Sec. 18. AS 08.13.180 is amended by adding a new subsection to read:

(b) A person is eligible for a student permit if the person

(1) is at least 16 years of age; and

(2) has graduated from high school or holds a G.E.D. equivalency.

* Sec. 19. AS 08.13.185 is repealed and reenacted to read:

Sec. 08.13.185. FEES. The department shall adopt regulations under AS 08.01.065 that establish the amount and manner of payment of fees for examination and investigation, and for initial licenses and renewals for the following:

(1) schools;

(2) school owners;

(3) instructor;

(4) shop owner;

(5) practitioner of barbering;

(6) practitioner of cosmetology;

(7) practitioner of esthetics;

(8) practitioner of manicure and pedicure;

(9) student permit.

* Sec. 20. AS 08.13.190 is amended to read:

Sec. 08.13.190. FAILURE TO POSSESS A LICENSE OR PERMIT. A person who practices barbering, <u>cosmetology, esthetics, or manicure and pedicure</u> [HAIRDRESSING, OR COSMETOLOGY], or operates a shop, or operates a school of barbering, <u>cosmetology, or esthetics</u> [HAIRDRESSING, OR COSMETOLOGY], or teaches in a school of barbering, <u>cosmetology, or esthetics</u> [HAIRDRESSING, OR COSMETOLOGY], without a license, temporary permit, or student permit and who is not exempt under AS 08.13.120 or <u>08.13.160(d)</u> [UNDER AS 08.13.160(d)] is guilty of a class B misdemeanor.

* Sec. 21. AS 08.13.210 is amended to read:

Sec. 08.13.210. HEALTH AND SANITARY CONDITIONS. Health and sanitary conditions in shops and schools of barbering, cosmetology, esthetics, and manicuring and pedicuring [HAIRDRESSING, AND COSMETOLOGY] shall be supervised by the Department of Environmental Conservation [HEALTH AND SOCIAL SERVICES].

* Sec. 22. AS 08.13.220 is amended to read:

Sec. 08.13.220. DEFINITIONS. As used in this chapter,

(1) "apprentice" means a person who receives on-the-job training under [THE] direct supervision [OF A PRACTITIONER, WHO DOES NOT RECEIVE A WAGE OR COMMISSION BEFORE COMPLETING 350 HOURS OF TRAINING, AND FOR WHOSE WORK NO CHARGE IS MADE BEFORE COMPLETING 350 HOURS OF TRAINING];

(2) "barbering" means shaving, trimming, or cutting, styling, curling, permanent waving, bleaching, coloring, cleansing, or chemically straightening the beard or hair of a living person for a fee and for cosmetic purposes;

(3) "board" means the Board of Barbers and Cosmetologists [HAIRDRESSERS];

(4) "esthetics" ["COSMETOLOGY"] means the use of the hands, [MECHANICAL OR ELECTRIC APPARATUS OR] appliances, cosmetic preparations, antiseptics, or lotions in massaging, cleansing, stimulating, or similar work on the scalp, face or neck, including skin care, make-up, and temporary removal of superfluous hair, [HUMAN BODY] for cosmetic purposes for a fee;

(5) "cosmetology" ["HAIRDRESSING"] means performing, for a fee, the following services for cosmetic purposes:

(A) shaving, trimming, or cutting the beard of a living person; [AND]

(B) arranging, styling, dressing, curling, temporary waving, permanent waving, cutting, singeing, bleaching, coloring, cleansing, conditioning, or similar work on the hair of a living person;

(C) esthetics; and

(D) manicure or pedicure;

(6) "instructor" means a person who teaches barbering, cosmetology, or esthetics in a school or who supervises an apprentice;

(7) "practitioner" means a person licensed to practice barbering, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING, OR COSMETOLOGY] under this chapter;

(8) [(7)] "shampoo person" means a person who, for a fee and under the supervision of a practitioner of barbering or cosmetology [HAIRDRESSING], cleanses or conditions the hair of the human head with products that [WHICH] have no effect other than cleaning or conditioning the hair;

(9) [(8)] "shop" means [IS] an establishment operated for the purpose of engaging in barbering, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING, OR COSMETOLOGY].

* Sec. 23. AS 44.46.020 is amended to read:

Sec. 44.46.020. DUTIES OF DEPARTMENT. The Department of Environmental Conservation shall

(1) have primary responsibility for coordination and development of policies, programs and planning related to the environment of the state and of the various regions of the state;

(2) have primary responsibility for the adoption and enforcement of regulations setting standards for the prevention and abatement of all water, land, subsurface land and air pollution, and other sources or potential sources of pollution of the environment,

including by way of example only, petroleum and natural gas pipelines;

(3) promote and develop programs for the protection and control of the environment of the state;

(4) take actions that are necessary and proper to further the policy declared in AS 46.03.010;

(5) adopt regulations for

(A) the prevention and control of public health nuisances;

(B) the regulation of sanitation and sanitary practices in the interest of public health;

(C) standards of cleanliness and sanitation in connection with the construction, operation, and maintenance of a camp, cannery, food handling establishment, food manufacturing plant, mattress manufacturing establishment, industrial plant, school, barbershop, cosmetology, esthetics, or manicure and pedicure [HAIRDRESSING OR COSMETOLOGY] establishment, soft drink establishment, beer and wine dispensaries, and for other similar establishments in which lack of sanitation may create a condition that [WHICH] causes disease;

(D) the regulation of quality and purity of commercially compressed air sold for human respiration.

* Sec. 24. AS 44.62.330(a)(51) is amended to read:

(51) Board of Barbers and Cosmetologists [HAIRDRESSERS] (AS 08.13.010)

* Sec. 25. (a) A person who, on the effective date of this Act, holds a valid license issued by the Board of Barbers and Hairdressers may continue to practice as permitted by the license until the license expires and may renew the license in the appropriate field of practice without meeting the new requirements for licensure.

(b) Notwithstanding AS 08.13.090, the Board of Barbers and Cosmetologists shall issue a license to practice manicure and pedicure to a person who is a practitioner of manicure and pedicure in the state on the effective date of this Act without examination.

* Sec. 26. This Act takes effect immediately in accordance with AS 01.-10.070(c).

NOTES TO DECISIONS

Practice of law not defined. — There is no rule defining the practice of law. Nor is there a statute defining the term except in the context of the requirements of active practice of law as a qualification for justices. In re Robson, Sup. Ct. Op. No. 1573 (File No. 3448), 575 P.2d 771 (1978).

Sec. 08.08.240. Suspension upon conviction of certain crime.

Repealed by § 11 ch 181 SLA 1976.

Editor's notes. — The repealed section derived from § 13, ch. 196, SLA 1955.

Section
10. Creation and membership of board
20. Term of office and removal of members
30. Powers and duties of the board
40. Meetings and examinations
50. Records of the board

(2) have successfully completed all courses that a school with a program in hairdressing is required to teach to be licensed under AS 08.13.110 if applying for a license to practice hairdressing;

(3) have successfully completed all courses that a school with a program in cosmetology is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice cosmetology; or

(4) have served an apprenticeship under AS 08.13.082. (§ 1 ch 159 SLA 1980)

Sec. 08.13.082. Apprenticeship. (a) The period of apprenticeship required to qualify an applicant for a license to practice barbering is 1,500 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than nine months from the date of its commencement and must be completed in not more than two years from the date of its commencement.

(b) The period of apprenticeship required to qualify an applicant for a license to practice hairdressing is 2,000 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than one year from the date of its commencement and must be completed in not more than two years from the date of its commencement.

(c) The period of apprenticeship required to qualify an applicant for a license to practice cosmetology is 350 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than six months from the date of its commencement and must be completed in not more than one year from the date of its commencement. (§ 1 ch 159 SLA 1980)

Sec. 08.13.090. Examinations and other requirements. (a) A written examination shall be given to each applicant for examination at a time and place determined by the board. The board may delegate the power of examination to a committee of the board or a board member.

(b) The written examination shall cover subjects designated by the board and shall test the applicant's knowledge of sanitary practices, safety of all procedures, and use of instruments, equipment and chemicals permitted within the field of practice for which the applicant is seeking a license.

(c) The board may by regulation establish requirements for a practical examination for licensure. (§ 1 ch 159 SLA 1980)

Sec. 08.13.100. License. (a) The board shall authorize the issuance of a license to each qualified applicant who has passed an examination under AS 08.13.090. The license is valid for two years and subject to renewal.

(b) A license shall state the areas of practice (barbering, hairdressing, cosmetology, or any combination) which the practitioner is qualified to perform.

(c) The board may by regulation create areas of limited professional licensing in the field of cosmetology, except that the board may not restrict or otherwise regulate the practice of manicure or pedicure. Any limitation must be stated on the license.

(d) A person holding a current valid license from a board of barbering, hairdressing, or cosmetology in another state or country is entitled to a license under this chapter without examination. An application shall include:

(1) proof of a valid license issued by another licensing jurisdiction;

(2) proof of completed training and working experience which the board finds to meet the minimum requirements of the state;

(3) payment of a credential investigation fee. (§ 1 ch 159 SLA 1980)

Sec. 08.13.110. School license. The board shall adopt regulations for the licensing of schools of barbering, hairdressing, and cosmetology. The regulations shall include details of the curriculum, minimum hours of instruction, physical condition of the facilities, and financial responsibility of the owner. (§ 1 ch 159 SLA 1980)

Sec. 08.13.120. Shop license. The board shall adopt regulations for the licensing of shops. A shop owner will be licensed to operate a shop without examination, but unless the shop owner is a practitioner the shop owner may not conduct business without employing a manager who is a practitioner. This section does not apply to a shop located in a community having a population of less than 1,000 people which is not within 25 miles of a community of more than 1,000 people. (§ 1 ch 159 SLA 1980)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.13.130. Display of license or permit. Practitioners shall display their license in a conspicuous location in their place of business. Each shop owner is responsible for the display of the licenses of employees. Practitioners who practice outside of a place of business shall carry their license with them to be shown to persons upon whom work is performed. A person holding a student permit or temporary permit shall have that permit available for inspection when engaged in practice. (§ 1 ch 159 SLA 1980)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.13.140. Lapsed license. A lapsed license may be reinstated if the license has not been lapsed for a period of more than three years, and all renewal and delinquent fees for the period during which the license has been lapsed are paid. (§ 1 ch 159 SLA 1980)

Sec. 08.13.150. Grounds for refusal, suspension or revocation of a license or permit. The board may refuse, suspend, or revoke a license, student permit, or temporary permit for failure to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board. (§ 1 ch 159 SLA 1980)

Collateral references. — Cancellation or suspension irrespective of licensee's personal fault, validity of statute or rule making specified conduct or condition the ground for. 3 ALR2d 107.

Bias of members of license revocation board. 97 ALR2d 1210.

Sec. 08.13.160. Application of license requirements. (a) A person holding a valid license to practice barbering under former AS 08.12, is licensed under this chapter, and may continue to practice barbering under the conditions imposed by former AS 08.12 and the regulations issued under former AS 08.12 until the license expires.

(b) A person holding a valid license under former AS 08.28 may continue to practice under the conditions imposed under former AS 08.28 and the regulations issued under former AS 08.28 until the license expires.

(c) A person holding a valid license issued under former AS 08.12 or former AS 08.28 shall be entitled upon its expiration to a license to practice under this chapter in the field of practice for which the person was originally licensed, without meeting requirements for new licensure.

(d) The licensing and permit provisions of this chapter do not apply to

(1) a person practicing barbering, hairdressing, or cosmetology in a community having a population of less than 1,000 people which is not within 25 miles of a community of more than 1,000 people and who uses only chemicals available to the general public;

(2) a shampoo person. (§ 1 ch 159 SLA 1980)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

AS 08.12, referred to in this section, was repealed by § 5, ch. 159, SLA 1981. AS 08.28, also referred to in this section, was repealed by § 3, ch. 59, SLA 1966, § 3, ch. 46, SLA 1968, § 7, ch. 94, SLA 1978 and § 5, ch. 159, SLA 1980.

Sec. 08.13.170. Temporary permits. (a) A person not licensed under this chapter who wishes to practice and teach barbering, hairdressing, or cosmetology temporarily and primarily for educational purposes who is otherwise qualified to practice barbering, hairdressing, or cosmetology as determined by the board shall first obtain a temporary permit.

(b) The temporary permit shall specify

(1) the purpose for which it is granted;

(2) the period during which the holder of the temporary permit may practice;

(3) the place or places the holder of the temporary permit may practice. (§ 1 ch 159 SLA 1980)

Sec. 08.13.180. Student permits. A person attending a licensed school of barbering, hairdressing, or cosmetology, and a person apprenticed to a practitioner in a shop approved by the board shall obtain a student permit. A student permit to practice barbering or hairdressing is valid for two years. A student permit to practice cosmetology is valid for one year. A student permit may not be renewed, but, upon application, the board may issue a new permit to the same person, or extend an expired permit to the date of the next scheduled examination. Credit earned under an expired student permit may be transferred to a new permit as determined by the board. (§ 1 ch 159 SLA 1980)

Sec. 08.13.185. Fees. The following fees are imposed under this chapter: AS

(1) schools:	
initial two-year license fee	$700
biennial renewal	400
(2) school owner:	
initial two-year license fee	$ 70
biennial renewal	60
(3) instructor:	
initial two-year license fee	$ 70
biennial renewal	60
(4) shop owner:	
initial two-year license fee	$ 45
biennial renewal	40
(5) practitioner of barbering:	
initial two-year license fee	$ 55
biennial renewal	40
(6) practitioner of hairdressing:	
initial two-year license fee	$ 55
biennial renewal	40
(7) practitioner of cosmetology:	
initial two-year license fee	$ 45
biennial renewal	30
(8) temporary permit	$ 30
(9) student permit	$ 20
(10) examination fee	$ 25
(11) investigation fee	$ 25
(12) delinquent fee for late renewal	$ 20

SECTIONAL ANALYSIS: CSHB 305

Section 1) Extends the Board of Barbers and Hairdressers to June 30, 1989.

Section 2) States that the Department of Commerce and Economic Development will keep a record of license activities.

Section 3) Adds two new sections to prohibit the practice of barbering, hairdressing or cosmetology outside a licensed shop or school and to require that teachers have an instructor's license.

Section 4) Specifies that all persons applying for licensure to have completed courses in a school that offers a curiculum approved by the Board. This section is expanded to include requirements for licensure for teachers.

Section 5) Changes the applicant qualification requirements for licensure from 1,500 hours apprenticeship in not less than nine months to 2000 hours apprenticeship in not less than twelve months.

Section 6) States that licenses from other countries are not qualified for licensure in Alaska, although licenses from other states are qualified, and changes license application requirements to include proof of tests.

Section 7) Changes current language to specify a "practitioner" as well as a student or apprentice must display a license or permit in the place of business and removes the requirement that a practitioner who practices outside a place of business carry their license.

Section 8) Expands the list of exemptions to include health care professionals and persons demonstrating products.

Section 9) Is expanded to require the Board to adopt regulations to allow practice in situations outside a shop or school.

Section 10) Repeals current specifications on temporary permits and reinstates that the Board will issue a temporary permit to an applicant until an

Alaska license can be issued.

Section 11) Changes the requirement that an apprentice study with a licensed instructor, rather than a practitioner, to be elligible for a permit.

Section 12) Allows for supervision by the Department of Environmental Conservation instead of the Department of Health and Social Services.

Sections 13, 14, 15, and 16)
Defines apprentice, barbering, cosmetology, and instructor.

Section 17) States that a person can renew their license without meeting new license requirements.

Section 18) Effective date.

CHAIRMAN'S INFORMATION: SCS CSHB 305(L&C)

1) BILL TITLE: "An act relating to barbers, hairdressers, and cosmetologists; and providing for an effective date."

a) Introduced: Sund

b) Co-sponsors:

2) INTENT: This measure extends the Board of Barbers and Hairdressers until June 30, 1989, and makes additional amendments to their statutes. The L&C SCS removed those portions in the House bill which concerned the licensure of estheticians.

Letter of Intent for SCS CSHB 314(Fin)

It is the intent of the Senate Finance Committee that duplicative reporting requirements for REA financed electric cooperatives be eliminated. Because of the similarity of the information required in REA quarterly reports, and that required by the APUC in it's annual report, the commission should allow submittal of REA forms for the annual reporting requirements of electric cooperatives.

SCS CSHB 314(fin): Sectional Analysis

Section 1) Substitutes "municipality" for "city or borough, whether home rule or otherwise" to reflect changes made in the Municipal Code adopted last year, and limits the amount of the fee that a municipality may charge to the actual cost.

Section 2) Requires the commission to issue a statement of reasons for rejecting a tariff filing, and imposes a time limit of 45 days on the commission's authority to reject a filing that is not consistent with the chapter or the regulations of the commission.

Section 3) Adds a new section to require the commission to adopt regulations that permit a simplified rate filing procedure for electric cooperatives.

Section 4) Requires the commission to consider the financial covenants contained in mortgages and other debt instruments of cooperative utilities when setting the rates they may charge.

Section 5) Subjects wholesale power agreements between public utilities to advance approval by the commission. After a wholesale power agreement is in effect, the commission may not invalidate the agreement; however, if the rates are not just and reasonable, the commission may order the parties to negotiate an amendment to the contract.

Section 6 Extends the termination date of the APUC for 3 years (1987).

Section 7) Applicability section

Section 8) Applicability of wholesale power agreement section

Section 9) Immediate effective date.

Fred:

The amendment being offered by Sharon Macklin would have the following effect:

1) The language which appears on Page 2, lines 26 thru page 3, line 1, pertains to both electric and telephone cooperatives. In essence, it requires the commission to set rates adequate to meet the financial covenants of all (telco and electric) cooperative utilities.

2) The sentence following that qualifies the obligation imposed upon the commission to honor those agreements. In effect it allows the commission to disapprove the mortgage or debt instrument, in the event they find it to be excessive.

3) The amendment which may be offered by Sen Kerttula on the floor would have the effect of allowing the telco's debt instruments to be approved without further consideration by the commission.

   By inserting the word "electric" on page 3, line 1, the APUC would only be able to disapprove the debt instruments of electric coops, and the debt instruments of telco's, even if excessive, would be safe from commission review.

Letter of Intent for SCS CSHB 314(Fin)

It is the intent of the Senate Finance Committee that duplicative reporting requirements for REA financed electric cooperatives be eliminated. Because of the similarity of the information required in REA quarterly reports, and that required by the APUC in it's annual report, the commission should allow submittal of REA forms for the annual reporting requirements of electric cooperatives.

ALASKA RURAL ELECTRIC COOPERATIVE ASSOCIATION, INC.

237 E. FIREWEED LANE • SUITE 301
ANCHORAGE, ALASKA 99503 • (907) 276-3235

May 12, 1986

Senator Fred Zharoff
Pouch V
Juneau, Alaska 99811

Dear Senator Zharoff:

AREA was the special interest group that first proposed language requiring the APUC to respect the financial covenants of mortgages entered into by cooperative utilities.

The APUC objected to the language on the grounds they would have no authority to prevent unjust rate increases which might occur due to mortgage agreements.

The language in the Senate Finance CS for HB314 is a compromise agreed to by your association and the APUC.

The proposed amendment by Sharon Macklin of MTA would make telephone cooperatives subject only to the language proposed by ARECA, but not to the compromise agreed to by the APUC.

I have spoken with the commission about this amendment. Like our association, they are opposed to it.

The telephone cooperatives should either be subject to the whole provision or exempted from it.

Thank you for the opportunity to make our comments on this issue.

Respectfully,

Kenneth S. Johnson

IN THE HOUSE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 318 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to rights of injured state employees."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.40 is amended by adding a new section to read:

Sec. 23.40.075. ITEMS NOT SUBJECT TO BARGAINING. The parties may not negotiate terms contrary to the reemployment rights for injured state employees under AS 39.25.158.

* Sec. 2. AS 39.25 is amended by adding new sections to read:

Sec. 39.25.157. POSITION DESCRIPTIONS. The division of personnel, in consultation with the appropriate department or agency, shall require the preparation of and shall maintain a position description for each position in the classified and partially exempt services. The position description shall describe the essential functions of the position and the actual skills and abilities required to perform the tasks assigned to the position. A general requirement for physical abilities may not be imposed on a job classification unless each position within the class requires the use of the physical ability.

Sec. 39.25.158. REEMPLOYMENT RIGHTS FOR INJURED STATE EMPLOYEES. (a) An injured employee is eligible for reemployment rights under this section if the employee requests to return to work for the state within 90 days after receipt of a release from a physician indicating that the employee is able to return to full or modified work.

(b) After an employee requests to return to work, the rehabilitation administrator of the division of workers' compensation or the

director of vocational rehabilitation in the Department of Education shall review the request and certify that the employee is able to return to work under (c), (d), (e), or (f) of this section, or defer certification until the employee completes retraining under (f) of this section.

(c) If the rehabilitation administrator or the director of vocational rehabilitation certifies that the employee is able to perform the tasks assigned to the employee's former position, the agency shall reemploy the employee within 30 days after receipt of the certification unless the position no longer exists. If a permanent, probationary or provisional employee is currently employed in the position, the agency shall cause a vacancy under the layoff provisions of AS 39.25.150(13).

(d) If the employee is not eligible for reemployment under (c) of this section but is able to perform the essential functions of the position, then the agency shall reemploy the employee in the position after making a reasonable accommodation to the physical and mental limitations of the employee unless the position no longer exists. Reasonable accommodation may include imposing work restrictions on the tasks performed by the employee, making job or site modifications necessary to permit the employee to perform the tasks of the position, removing institutional and architectural barriers, and providing additional support services.

(e) If the employee is not eligible for reemployment under (c) or (d) of this section and if the agency has a vacant position for which the employee is qualified that is comparable in wage to the position the employee previously held, then the agency shall offer the employee the position. If the employee is unable to perform the essential functions of a comparable position within the agency, then

the employee is entitled to reemployment in a comparable position for which the employee is qualified with another agency if the position is vacant and the employee is able to perform the essential functions of that position.

(f) If the agency and other agencies in the state are unable to reemploy the employee in a position at a wage comparable to the employee's previous wage, the employee may request reemployment at a lower wage or accept retraining under AS 23.30.041. After completing the training the employee may request reemployment in a position for which the employee has been retrained in the agency. If the agency cannot offer reemployment, the employee may request reemployment in a position for which the employee has been retrained with another agency.

(g) An agency may refuse to reemploy or continue the employment of a former employee if reasonable accommodation imposes an undue hardship on the operation of the agency's program or if, after reasonable efforts at accommodation, the injured employee cannot perform the essential functions of the position in a manner that would not endanger the health or safety of

(1) the employee because the job imposes an imminent and substantial degree of risk to the employee; or

(2) others to a greater extent than if a nonhandicapped person performed the job.

(h) Factors an agency may consider in determining undue hardship under (g) of this section include the current number of employees in the section or office, number and type of facilities, size of budget, nature and cost of the accommodation needed, and the type, composition, and structure of the work force.

(i) Notwithstanding any other provision of law, if an injured

employee requests reemployment under (e) or (f) of this section and if the employee is able to perform the essential functions of the position, the state may not hire another person for that position except an employee in layoff status for that job class.

(j) A collective bargaining agreement under AS 23.40.070 - 23.40.260 may not include terms contrary to this section.

(k) In this section

(1) "agency" includes a department, division, office, agency, board, commission, authority, or other organizational unit of the executive, legislative, and judicial branches of state government including the University of Alaska;

(2) "injured employee" or "employee" means a permanent, probationary, or provisional employee of an agency whose injury is a compensable injury or condition under AS 23.30.

* Sec. 3. Nothing in this Act modifies or terminates the terms of a collective bargaining agreement in existence on the effective date of this Act.

A BILL

For an Act entitled: "An Act relating to rights of injured state employees."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.40 is amended by adding a new section to read:

Sec. 23.40.075. ITEMS NOT SUBJECT TO BARGAINING. The parties may not negotiate terms contrary to the reemployment rights for injured state employees under AS 39.25.158.

* Sec. 2. AS 39.25 is amended by adding new sections to read:

Sec. 39.25.157. POSITION DESCRIPTIONS. The division of personnel, in consultation with the appropriate department or agency, shall require the preparation of and shall maintain a position description for each position in the classified service. The position description shall describe the essential functions of the position and the actual skills and abilities required to perform the tasks assigned to the position. A general requirement for physical abilities may not be imposed on a job classification unless each position within the class requires the use of the physical ability.

Sec. 39.25.158. REEMPLOYMENT RIGHTS FOR INJURED STATE EMPLOYEES. (a) An injured employee is eligible for reemployment rights under this section if the employee requests to return to work for the state within 30 days after receipt of a release from a physician indicating that the employee is able to return to full or modified work.

(b) After an employee requests to return to work, the rehabilitation administrator of the division of workers' compensation or the

director of vocational rehabilitation in the Department of Education shall review the request and certify that the employee is able to return to work under (c), (d), (e), or (f) of this section, or defer certification until the employee completes retraining under (f) of this section.

(c) If the rehabilitation administrator or the director of vocational rehabilitation certifies that the employee is able to perform the tasks assigned to the employee's former position, the agency shall reemploy the employee within 30 days after receipt of the certification unless the position no longer exists. If a permanent, probationary or provisional employee is currently employed in the position, the agency shall cause a vacancy under the layoff provisions of AS 39.25.150(13).

(d) If the employee is not eligible for reemployment under (c) of this section but is able to perform the essential functions of the position, then the agency shall reemploy the employee in the position after making a reasonable accommodation to the physical and mental limitations of the employee unless the position no longer exists. Reasonable accommodation may include imposing work restrictions on the tasks performed by the employee, making job or site modifications necessary to permit the employee to perform the tasks of the position, removing institutional and architectural barriers, and providing additional support services.

(e) If the employee is not eligible for reemployment under (c) or (d) of this section and if the agency has a vacant position for which the employee is qualified that is comparable in wage to the position the employee previously held, then the agency shall offer the employee the position. If the employee is unable to perform the essential functions of a comparable position within the agency, then

the employee is entitled to reemployment in a comparable position for which the employee is qualified with another agency if the position is vacant and the employee is able to perform the essential functions of that position.

(f) If the agency and other agencies in the state are unable to reemploy the employee in a position at a wage comparable to the employee's previous wage, the employee may request reemployment at a lower wage or accept retraining under AS 23.30.041. After completing the training the employee may request reemployment in a position for which the employee has been retrained in the agency. If the agency cannot offer reemployment, the employee may request reemployment in a position for which the employee has been retrained with another agency.

(g) An agency may refuse to reemploy or continue the employment of a former employee if reasonable accommodation imposes an undue hardship on the operation of the agency's program or if, after reasonable efforts at accommodation, the injured employee cannot perform the essential functions of the position in a manner that would not endanger the health or safety of

(1) the employee because the job imposes an imminent and substantial degree of risk to the employee; or

(2) others to a greater extent than if a nonhandicapped person performed the job.

(h) Factors an agency may consider in determining undue hardship under (g) of this section include the current number of employees in the section or office, number and type of facilities, size of budget, nature and cost of the accommodation needed, and the type, composition, and structure of the work force.

(i) Notwithstanding any other provision of law, if an injured

employee requests reemployment under (e) or (f) of this section and if the employee is able to perform the essential functions of the position, the state may not hire another person for that position except an employee in layoff status for that job class.

(j) A collective bargaining agreement under AS 23.40.070 - 23.40.260 may not include terms contrary to this section.

(k) In this section

(1) "agency" includes a department, division, office, agency, board, commission, authority, or other organizational unit of the executive branch of state government;

(2) "injured employee" or "employee" means a permanent, probationary, or provisional employee of an agency in the classified service whose injury is a compensable injury or condition under AS 23.30.

* Sec. 3. Nothing in this Act modifies or terminates the terms of a collective bargaining agreement in existence on the effective date of this Act.

Bill No. 2nd Sponsor Substitute for House Bill No. 318

Title "An Act relating to rights of injured State employees."

Date April 23, 1985

Contact: Joy L. McClintock 465-2790

The Department of Labor supports passage of the 2d Sponsor Substitute for HB 318, providing rehire rights for injured state employees.

The latest sponsor substitute adds several key features which strengthen the provisions of the bill and responds to the Department's concerns over potential conflicts between the earlier provisions of the bill and the workers' compensation rehabilitation provisions of AS 23.30.041.

Jim Robison
Commissioner

POSITION PAPER/Department of Labor

Bill No. Committee Substitute for Sponsor Substitute for House Bill No. 318 (L&C)

Date February 12, 1986

Title "An Act relating to rights of injured state employees."

Contact: Jacque L. McClintock 465-2790

The Department of Labor supports CSSSHB 318 which provides rehire rights for injured state employees.

Under the provisions of this bill, the state is required to reemploy an injured state employee in the former job position if the employee is medically able to perform the duties of the position or, if not medically able, to rehire the employee in a modified or comparable position. This bill applies to all state employees who have sustained an occupational injury or illness and who wish to return to work for the state.

This bill will afford return to work protection for injured state employees, and should, overall, reduce the state's costs of workers' compensation by returning injured and disabled employees to suitable gainful employment.

APPROVED:

Jim Robison

Jim Robison, Commissioner
Department of Labor

POSITION PAPER/Department of Labor

SECTIONAL ANALYSIS -- HB 318

(CS for Sponsor Substitute for HB 318, dated 5/1/86)

Section 1. Adds a new section to AS 23.40 that states that terms contrary to the provisions of this legislation may not be negotiated. Added at the request of the division of personnel.

Section 2.

Subsection 39.25.157. Requires the division of personnel, in consultation with the appropriate department or agency, to develop and maintain a detailed position description for each position within the classified and partially exempt services.

Also disallows the imposition of general physical ability requirements on a job class unless each position within the class requires the use of the physical ability.

Subsection 39.25.158.

(a) within 90 days after a physician's release to return to full or modified work, an injured employee must request to return to work for the state to be eligible for reemployment rights under this section.

(b) once an employee requests to return to work, the employee will be certified by the division of workers' compensation or the director of vocational rehabilitation. The certification will determine the employee's reemployment rights under this section. Certification may be delayed until after the employee completes retraining under (f).

(c) requires that a state agency offer an injured employee the employee's former position within 30 days, if the employee is certified able to perform the tasks assigned to the position and the position still exists. If the position is filled, the current employee shall be laid off under provisions of the personnel regulations that allow for layoffs without any reflection on an employee's work performance.

(d) requires agencies to make efforts of reasonable accommodation to the physical and mental limitations of an injured employee who is not able to perform all of the tasks assigned to the employee's former position, but who is able to perform the essential functions of the position.

Following federal language, the section defines reasonable accommodation.

(e) if, after reasonable accommodation, the employee is still unable to perform the essential functions of the employee's former position, then the agency is required to offer the employee a vacant position comparable in wage to the position the employee previously held.

If the employee is unable to perform the essential functions of a comparable position within the agency, then the employee is entitled to reemployment in a comparable position in another agency, provided that (1) the employee is qualified for the position and able to perform the essential functions of the position and (2) the position is vacant.

(f) if the employee cannot be reemployed in a comparable position by an agency of the state, then the employee may request reemployment at a lower wage or accept retraining under AS 23.30.041. After completing retraining, the employee may request reemployment in a state position for which the employee has been retrained.

(g) establishes guidelines for refusal by an agency to reemploy or continue the employment of a former employee.

(h) defines factors to be considered when determining if accommodation of an injured employee would constitute undue hardship to an agency. Factors to be considered include the number of employees in the section or office, number and type of facilities, size of budget, nature and cost of the accommodation needed, and the type, composition, and structure of the work force.

(i) requires that an injured employee requesting reemployment who is able to perform the essential functions of the position be the only person certified for that position, excepting any employees in layoff status for that job class.

(j) precludes collective bargaining agreements from including terms contrary to this section.

(k) definitions:

"agency" includes a department, division, office, agency, board, commission, authority, or other organizational unit of the executive, legislative, and judicial branches of state government including the University of Alaska.

"injured employee" or "employee" means a permanent, probationary, or provisional employee of an agency whose injury is a compensable injury or condition under AS 23.30 (Alaska Workers' Compensation Act).

Section 3. States that nothing in this act modifies or terminates the terms of a collective bargaining agreement in existence at the effective date of the act.

CHAIRMAN'S INFORMATION: SCS CSSSHB 318(L&C)

1) BILL TITLE: "An act relating to the rights of injured state employees."

a) Introduced: Szymanski, Collins, Reiger

b) Co-sponsors:

2) INTENT: This measure concerns reemployment rights of injured state employees and would require the rehire of an injured state employee if the employee was medically able to perform the duties of his former employment. If the employee is not medically able to perform the duties of his former employment, the state would have to rehire the employee in a comparable or modified position.

L&C CS requires the injured employee to request to return to work within 30 days after receipt of the physicians release, rather than the 90 day period in the House version. The SCS also limits the applicability of the bill to state employees in the classified service.

FISCAL NOTE: 0 (should reduce the state's cost of workers comp by returning an injured employee to gainful and suitable employment)

3) ADDITIONAL REFERRALS: Sen Finance and Sen Rules

4) PUBLIC HEARINGS:

a) Sponsor:

b) Public Witnesses:

5) BILL ACTION:

a) Hold in committee?
b) Assign to sub committee for further review?
c) Move from committee?
d) Close public hearings?

6) COMMITTEE ACTION?

a) amendments?
b) CS adoption? Need to move for the adoption of the SCS.

MEMORANDUM

TO: Representative Mike Szymanski

FROM: Sharman Haley
Legislative Analyst

RE: Priority Rehire For Disabled State Employees
Research Request 35-025

You have asked about instituting a policy of preferential rehire for State employees who are forced to leave their jobs due to work-related disabilities. Short summaries of rehire policies in Washington, Oregon, and Idaho as well as the U.S. Postal Service and the Municipality of Anchorage are provided below. A discussion of policy alternatives for amending Alaska law along similar lines follows.

WASHINGTON

An employee of the State of Washington who becomes disabled cannot be terminated for at least sixty days. Supervisors have broad discretion to extend leave without pay to the injured employee and fill the position temporarily until the employee is able to resume his or her duties. If the injured employee is out longer than sixty days and is terminated from his or her position, the employee is eligible to be placed on the Reduction In Force (RIF) list for that job class when he or she is ready to return to work. Persons on the RIF list have the right of first hire when vacancies in that job class appear.

If the disabled employee is not able to resume the duties of his or her former job class and seeks reemployment in an alternate job class, the employee must go through the normal application and testing procedures to be certified to the register for the alternate job class. Once certified, the disabled employee is entitled to hiring preference over applicants on the open competitive register. If the alternate job class constitutes a promotion, the disabled employee has second hire priority after those on the RIF list. If the alternate job class is a demotion or lateral transfer, reemployment preference over open competitive candidates is at the discretion of the hiring authority.

BACK UP INFORMATION

Under Washington law, a person whose disability keeps them out of work for more than 120 days is referred to a vocational rehabilitation counselor for evaluation and vocational rehabilitation planning. A person who is permanently disabled may qualify for the state's equal employment opportunity program for the handicapped. Washington State civil service rules allow handicapped persons to test for any job class for which they meet the minimum qualifications, whether or not that register is open for recruitment. State agencies have the option of using the list of qualified handicapped workers, in preference to the regular register when filling vacancies.

Incentive for state agencies (or any employer) to hire workers with occupational injuries is provided by the Preferred Worker Progam, which excludes the worker from the computation of workers' compensation premiums for a period of three years. The benefits due the worker in the event of an injury during the three-year period are covered by the state's Second Injury Fund.

OREGON

Of the states contacted, Oregon has the stongest laws for rehiring injured employees. Oregon civil rights law provides that an injured employee has the right to reinstatement on demand in his or her former position, or in any other job, if a position is available and the worker able to perform the duties of the job. In the state system, responsibility for rehiring the injured employee falls on each agency. Oregon statutes also require "reasonable accommodation" for the special needs of handicapped workers. In the state personnel system, this may include some restructuring of the job.

IDAHO

Idano personnel rules provide that when an employee is absent due to injury or illness, the job is held open for the employee and may not be declared vacant for at least six months. If the worker has not returned to work within six months and is terminated, for an additional 12 months the worker is eligible to be placed on the lay-off register for that agency if the doctor has cleared the employee for return to work. If the employee is not able to resume the same job duties, the agency has some discretion to modify work for the employee, but there is no program or policy to further accommodate workers who must change job classes.

U.S. POSTAL SERVICE

The U.S. Postal Service goes beyond the requirements of federal law to return injured employees to work. Under federal law, an injured federal employee who is able to return to work within one year has the right to return to the same or an equivalent position in the same agency. If it takes longer than a year to return to work, the employee has the right to priority placement in the same or equivalent position in that or another federal agency. The returning federal employee is credited with wage step increases and other benefits based on length of service for the entire time he or she was out on disability compensation.

A partially or temporarily disabled postal employee is on leave status until the doctor certifies that the employee is able to return to work. The worker is either returned to his or her former job, with some modification of duties if needed, or transferred to an alternate job. In planning a placement, the post office considers the risk of reinjury and the potential compensation costs as well as the skills and abilities of the worker. Only if this assessment indicates that the worker will not be returned to federal service is the employee terminated.

The responsibility for finding or creating a job falls on the local postmaster. To encourage the placement of partially disabled workers, the salary of a partially disabled employee is not paid out of the operating unit's budget, nor are the hours worked by a partially disabled worker counted in computing the operating unit's productivity rating. Thus the operating units are able to show a higher productivity, for which they are rewarded, by utilizing partially disabled workers.

ANCHORAGE

The Municipality of Anchorage has implemented a modified work program for municipal employees injured on the job. The stated purposes of the program are to minimize long-term costs to the municipality and to return the employee to good health and productive employment at the earliest opportunity.

Under the modified work program, an injured worker who is able to resume partial duties will be placed in modified work for up to three months while the worker is in transition back to full duties. If rehabilitation requires a complete change in employment, participation in the modified work program may exceed three months. The worker is paid his or her full regular salary during the period of modified work. If the worker's permanent job placement is at a lower salary than his or her old job, two-thirds of the difference is paid to the employee through the city's workers compensation account. Workers whose disability precludes them from placement in a permanent position receive a worker's compensation settlement.

While providing modified work is the responsibility of each municipal agency, a job placement coordinator for the municipality as a whole oversees the development of modified jobs and placements. According to Harry Sjoberg, Risk Manager for the municipality, the city's experience with the program has shown significant reductions in compensation claims and changes in the attitudes of supervisors and injured employees alike. Prior to institution of the modified work program, the prevailing pattern was that supervisors were not inclined to rehire an employee at anything less than 100 percent productivity. Employee morale suffered from prolonged periods off work. Mr. Sjoberg said that now less work time is lost, supervisors show more concern for the circumstances of their injured employees, and rehabilitation is quicker.

ALASKA

Under the Alaska personnel rules, leave without pay due to a disability is at the discretion of the supervisor, but in any case may not exceed the employees length of service or 24 months, whichever is shorter. The supervisor may cancel leave without pay upon notice to the absent employee. If the employee does not report for duty on the specified date, he or she may be terminated immediately.

A disabled classified employee terminated "in good standing" has rehire rights for two years from the date of termination. This means that they will be placed on the transfers and rehires list for that job class, which agencies may use in preference to the regular register when seeking applicants to fill vacancies. A few departments such as Health and Social Services have internal policies requiring agency heads to use the transfer and rehire list first, but most departments leave this to the discretion of the supervisor.

Injured State workers who are unable to resume the duties of their former job have few advantages in seeking other State jobs. They must go through the same process as anyone else of finding job classes for which they qualify, waiting for an open recruitment period for that class, taking applicable tests, getting on the job register, and successfully competing with other applicants. If the worker is fortunate enough to still be on leave and thus retain permanent employee status, he or she may be eligible for noncompetitive appointment at the discretion of the hiring authority.

State law provides that workers absent from work more than 90 days due to an on-the-job injury have a right to vocational rehabilitation evaluation. This includes an assessment of skills and abilities, aid in planning for training and rehabilitation, and job placement assistance.

If the worker qualifies as severely handicapped and is a client of the Division of Vocational Rehabilitation, the worker may be referred to a State job and hired noncompetitively if the hiring authority chooses.

State workers whose occupational injuries disable them from resuming their former job duties qualify for a disability pension under the Public Employees Retirement System. The pension is terminated in one year, however, unless the recipient submits evidence that he or she meets the qualifications for federal Social Security disability income (SSI). Federal standards for SSI are stringent; the worker must be unable to hold any gainful employment, not merely his or her former job.

Policy alternatives to facilitate reemployment of injured State workers in Alaska, patterned after some of the preferential rehire programs in other jurisdictions, are listed below:

POLICY OPTIONS

1. Employees could be guaranteed the right to disability leave.

2. Injured workers returning to work could be placed on the lay-off list, which assures them priority placement within their former job class.

3. Injured workers unable to resume the duties of their former job class could be allowed to test for any other job class for which they meet the minimum qualifications, whether or not recruitment is open.

4. Hiring preference in alternate job classes for which the worker qualifies could be granted by making the worker eligible for the lay-off, promotion, or transfer and rehire lists. Eligibility for the lay-off list would guarantee the worker first priority placement, while the promotion and the transfer and rehire lists would give the worker preference only at the option of the hiring authority.

5. A modified work program could provide injured workers job duties tailored to their capabilities during a period of transition back to full duties or to a new job.

6. State agencies could be given incentives to rehire disabled State workers, such as omitting the disabled worker from the calculation of their worker's compensation assessment.

7. State employees injured in the course of their employment could be guaranteed State jobs when doctors certify that the employees

are able to return to work. The employeee would be reemployed in their original job class if they were able to perform the duties, in an alternate job class for which they qualify, in an alternate job class for which they may be retrained, or in a modified job tailored to their individual capabilities.

8. The injured worker could also be extended the right to receive pay no less than the pay he or she received prior to injury, regardless of the final job placement.

These policy changes could be effected by amending AS 39.25.150 to direct the Department of Administration to provide for these policies in the personnel rules. Alternatively, reemployment could be mandated for all employers in the state under the workers' compensation or civil rights laws. Copies of the Oregon law and the Postal Service policy manual, both of which are regarded by vorational rehabilitation professionals as model policies, are attached.

Because the State is a self-insurer and is liable for workers' compensation benefits as well as for the disability pension payments, it may be in the State's financial interests as well as the interests of the injured worker to implement a preferential rehire policy and return the worker to a job as quickly as possible. Approximately 1,200 injured State employees file worker's compensation claims per year, of which about 200 to 250 include a claim for wage loss due to being out of work more than three days. Compensation is also paid for loss of earning capacity if the injured worker's prospective employment pays less than his or her former job. Compensation for wage loss is generally calculated at two-thirds of the lost wages, but because workers' compensation is tax exempt, the take home compensation is worth more than two-thirds of net wages lost.

* * * * *

I am still expecting some additional information from other states to come in the mail. If upon reviewing the material I find that it provides any significant information on this issue that I have not adequately covered here, I will forward it on to you with a supplemental memo. Meanwhile, I hope that this memorandum provides you with the information that you need.

If you have any futher questions please call me.

SH

659.410 Discrimination against workers applying for workers' compensation benefits prohibited. It is an unlawful employment practice for an employer to discriminate against a workman with respect to hire or tenure or any term or condition of employment because the workman has applied for benefits or invoked or utilized the procedures provided for in ORS 656.001 to 656.794 and 656.802 to 656.824, or of 659.400 to 659.435 or has given testimony under the provisions of such sections. [1973 c.660 §4]

659.415 Reinstatement of worker receiving compensable injuries; certificate of physician evidencing ability to work; effect of collective bargaining agreement. (1) A worker who has sustained a compensable injury shall be reinstated by the worker's employer to the worker's former position of employment upon demand for such reinstatement, provided that the position is available and the worker is not disabled from performing the duties of such position. If the former position is not available, the worker shall be reinstated in any other position which is available and suitable. A certificate by a duly licensed physician that the physician approves the worker's return to the worker's regular employment shall be prima facie evidence that the worker is able to perform such duties.

(2) Such right of reemployment shall be subject to the provisions for seniority rights and other employment restrictions contained in a valid collective bargaining agreement between the employer and a representative of the employer's employes.

(3) Any violation of this section is an unlawful employment practice. [1973 c.660 §5; 1979 c.813 §3; 1981 c.874 §14]

659.420 Employment of injured worker in other available and suitable work; certificate of physician; effect of collective bargaining agreement. (1) A worker who has sustained a compensable injury and is disabled from performing the duties of the worker's former regular employment shall, upon demand, be reemployed by the worker's employer at employment which is available and suitable.

(2) A certificate of the worker's attending physician that the worker is able to perform described types of work shall be prima facie evidence of such ability.

(3) Such right of reemployment shall be subject to the provisions for seniority rights and other employment restrictions contained in a valid collective bargaining agreement between the employer and a representative of the employer's employes.

(4) Any violation of this section is an unlawful employment practice. [1973 c.660 §6; 1979 c.813 §4]

659.425 Discrimination against mentally or physically impaired persons in employment or public accommodation prohibited; mental disorder treatment not evidence of inability to work or manage property. (1) For the purpose of ORS 659.400 to 659.435, it is an unlawful employment practice for any employer to refuse to hire, employ or promote, to bar or discharge from employment or to discriminate in compensation or in terms, conditions or privileges of employment because:

(a) An individual has a physical or mental impairment which, with reasonable accommodation by the employer, does not prevent the performance of the work involved;

(b) An individual has a record of a physical or mental impairment; or

(c) An individual is regarded as having a physical or mental impairment.

(2) It is an unlawful employment practice for an employment agency to fail or refuse to refer for employment, or otherwise discriminate against, any individual because that individual is a handicapped person, or to classify or refer for employment any individual because that individual is a handicapped person.

(3) It is an unlawful employment practice for a labor organization, because an individual is a handicapped person, to exclude or to expel from its membership such individual or to discriminate in any way against such individual.

(4) It is an unlawful practice for any place of public accommodation, resort or amusement as defined in ORS 30.675, or any person acting on behalf of such place, to make any distinction, discrimination or restriction because a customer or patron is a handicapped person.

(5) Receipt or alleged receipt of treatment for a mental disorder shall not constitute evidence of a person's inability to perform the duties of a particular job or position, or of a person's inability to acquire, rent or maintain property. [1973 c.660 §7; 1979 c.640 §3]

659.430 Discrimination against handicapped persons in real property transactions prohibited; advertising discriminatory preference prohibited; assisting discriminatory practices prohibited. (1) No person because the purchaser, lessee or renter is a handicapped person shall:

U.S. POSTAL SERVICE

LWOP for an initial period of up to 1 year from the date OWCP compensation began.

.92 Extensions. If the employee is unable to return to work at the end of the 1 year period on LWOP, the LWOP may be extended for successive additional periods of up to 6 months. Extensions are granted only if it appears that the employee is likely to return to work within the period of the extension.

.93 Separations. If it is not likely that the employee will be able to return to work at the end of one year of LWOP or during the authorized extended period, the employee may be separated. Before any employee who is on the rolls of the OWCP can be separated, the postal official must submit a comprehensive report to the General Manager, Employee Relations (Region), with appropriate recommendations and retain the employee on the rolls of the Postal Service pending a decision.

.94 Deciding Appropriate Action. In considering the action to take in matters involving extended leave, the installation head sends Form 2573, *Request for OWCP Claim Status,* in duplicate, to the appropriate OWCP district office; and, upon receiving a completed Form 2573 from OWCP, does one of the following:

a. Extends LWOP for an additional period, at the end of which an additional determination must be made.

b. Authorizes a fitness-for-duty examination by a medical officer as provided in 547.31, .32, and .33 if OWCP does not respond within a maximum of 60 days or if OWCP's response does not explain the situation; or

c. Request permission to terminate LWOP as required in .93; and

d. Terminates LWOP after receiving permission from the General Manager, Employee Relations (Region) as follows:

(*1*) If the employee has 5 or more years of creditable civilian service, inform the employee of retirement rights. Allow the employee 14 calendar days to file a retirement application under the Civil Service Retirement Act.

(*2*) If the employee does not file a retirement application within the 14 day period, terminate LWOP and take action to separate the employee as described in 365 and 568.

(*3*) If the employee has less than 5 years creditable civilian service, terminate LWOP and take action to separate the employee as described in 365.

546 Reemployment of Employees Injured On Duty

546.1 Law

.11 General. The USPS has legal responsibility to employees with job-related disabilities under 5 U.S.C. 8151 and the Office of Personnel Management's (OPM) regulations, as outlined below

.12 Disability Fully Overcome Within 1 Year

.121 Obligation. When the injury or disability is fully overcome within one year after the commencement of compensation payments from OWCP, or after compensable disability recurs, the USPS must give an employee the right to resume employment in the former or equivalent position.

.122 Rights and Benefits. Upon reemployment, all rights and benefits which an employee would have had or acquired in the former position, had there been no injury or disability, must be restored.

.13 Disability Fully Overcome More Than 1 Year

.131 Obligation. When the injury or disability is fully overcome more than one year after compensation began, the USPS must give an employee priority consideration for reemployment into the former position or an equivalent one.

.132 Reemployment List. The names of all former employees who fully recover from their compensable disabilities more than one year after compensation begins must be entered on a reemployment list in two groups. *Group one* will include all such former employees who are entitled to 10 point veteran preference. *Group two* will include all other such former employees. Persons in *group one* will be considered for employment before persons in *group two,* and persons in *group two* will be considered before other sources of recruitment, such as transfers from other agencies, reinstatements, or appointments from hiring registers.

.133 Rights and Benefits. The same as 546.122.

.14 Disability Partially Overcome

.141 Current Employees. When an employee has partially overcome a compensable disability, the USPS must make every effort toward assigning the employee to limited duty consistent with the employee's medically defined work limitation tolerances (see 546.321). In assigning such limited duty, the USPS should minimize any adverse or disruptive impact on the employee. The following considerations must be made in effecting such limited duty assignments:

a. To the extent that there is adequate work available within the employee's work limitation tolerances; within the employee's craft; in the work facility to which the employee is regularly assigned; and during the hours when the employee regularly works; that work shall constitute the limited duty to which the employee is assigned.

b. If adequate duties are not available within the employee's work limitation tolerances in the craft and work facility to which the employee is regularly assigned, within the employee's regular hours of duty, other work may be assigned within that facility.

c. If adequate work is not available at the facility within the employee's regular hours of duty, work outside the employee's regular schedule may be assigned as limited duty. However, all reasonable efforts shall be made to assign the employee to limited duty within the employee's craft and to keep the hours of limited duty as close as possible to the employee's regular schedule.

d. An employee may be assigned limited duty outside of the work facility to which the employee is normally assigned only if there is not adequate work available within the employee's work limitation tolerances at the employee's facility. In such instances, every effort will

be made to assign the employee to work within the employee's craft, within the employee's regular schedule, and as near as possible to the regular work facility to which normally assigned.

.142 Former Employees. When a former employee has partially recovered from a compensable injury or disability, the USPS must make every effort toward reemployment consistent with medically defined work limitation tolerances. Such an employee may be returned to any position for which qualified, including a lower grade position than that held when compensation began.

.15 Employee Appeal Rights. An employee who believes the proper consideration for reemployment was not received may appeal to the Merit Systems Protection Board, under 5 CFR, 353.

546.2 Collective Bargaining Agreements

Reemployment under this section will be in compliance with applicable collective bargaining agreements. Individuals so reemployed will receive all appropriate rights and protection under the applicable collective bargaining agreement.

.21 Contractual Considerations

.211 Scope. Collective bargaining agreement provisions for filling job vacancies and promotions, and procedures relating to retreat rights due to reassignment, will be complied with before an offer of employment is made to a former postal employee on the OWCP rolls for more than 1 year.

.212 Reemployment. A former employee will be offered reemployment in a residual vacancy (a vacancy which has been posted for bid or application and for which there are no successful bidders or applicants), or may work as an unassigned regular or as a part-time flexible. Regional Directors, Employee and Labor Relations (APMG, Employee Relations, for Headquarters and Administrative Support Facilities (ASFs) may waive minimum qualification requirements (including written examinations) in individual cases for former employees injured on duty who are being considered for reemployment when there is evidence (including that submitted by the medical officer) that the employee can be expected to perform satisfactorily in the position within ninety days after assignment.

.22 Types of Appointments

.221 Former career employees will be reemployed as career full-time or part-time employees.

.222 Former substitute rural carriers will be reemployed as substitute rural carriers or in any other position for which they qualify.

.223 Former casual and temporary employees will be reemployed as casual or temporary employees. Upon satisfactory demonstration of ability to meet job requirements during two 90-day casual appointments or one 180-day temporary appointment, the employee's status may be noncompetitively converted to a career appointment (NOA 501).

546.3 OWCP Referrals

.31 General. OWCP will make referrals of current and former postal employees who may be candidates for reemployment.

.32 Work Limitation Tolerances. The individual's physician of record, or other physician selected by the individual or OWCP, will furnish OWCP with a definitive medical summary, clearly documenting the medical limitations that will have to be accommodated. The OWCP District Medical Director evaluates the work limitation tolerances, submitted by the physician of record, and upon concurrence, refers them to the USPS for consideration.

.33 USPS Medical Review

.321 Reemployment Physical Examination

a. The medical officer will evaluate fully all medical records referred to the USPS from the OWCP district offices.

b. A complete physical examination, paid for by the USPS, will be required by the appointing officer. The result of the physical examination will be documented on Form 2485, *Certificate of Medical Examination.*

c. The medical officer will make a statement of concurrence with the OWCP documented medical limitations, or further restrict the former employee's work limit tolerances. The medical officer can in no way liberalize the medical limitations tendered by the OWCP district offices.

.322 Special Considerations

a. An individual referred for reemployment consideration by OWCP may have some degree of concurrent disability, not caused by or related to the original job injury or disability. The medical officer should examine for any concurrent medical condition that might prevent the individual from performing the duties of the position for which the individual is being considered.

b. The medical officer will carefully evaluate all concurrent disabilities and include their potential impact in the recommendation for reemployment to the appointing official.

c. All former employees, now permanently, partially disabled, have some type of residual handicap. The medical officer, conducting the physical examination, will be responsible for assigning the correct handicap code as defined in Handbook P-11, *Personnel Operations,* Chapter 6.

546.4 Restoration Rights

.41 OPM Regulations. OPM has responsibility for the implementing regulations of 5 USC 3151. These regulations are codified in 5 CFR Part 353. 5 USC 8151(b) provides that an individual, injured or disabled on duty, who resumes employment with the USPS is to be credited with the time during which compensation

was received for purposes of certain rights and benefits based upon length of service.

.42 Rights and Benefits upon Partial Recovery

.421 Seniority. Individuals, reemployed into bargaining unit positions will be credited with seniority in accordance with the collective bargaining agreement covering the position to which reemployed.

.422 Probationary Period. Reemployed individuals who have completed their probationary periods, or would have completed their probationary periods but for their compensable injuries, will not be required to serve a new probationary period.

.423 Leave Credit. Former employees who were eligible to accrue leave under ELM 510 will be credited with the total time compensation was received from OWCP for purposes of computing leave rate accrual upon reemployment.

.424 Retirement. Former employees who were covered by the Civil Service Retirement Act (see ELM 560) will be credited with the time spent on OWCP compensation in computing retirement credit.

.425 Salary Determination. The following salary restoration criteria must be met (*Note:* The term "Grade/Step," as used below, means "Grade/Salary" for individuals in a non-step salary schedule):

a. Reemployment to the Former Grade/Step. These individuals reemployed into a position with the same grade/step as held at the time of injury or disability will receive the current salary for that grade/step from the appropriate salary schedule.

b. Reemployment to a Higher Grade. Those individuals reemployed to a position with a grade higher than that of the position held at the time of injury or disability will be placed in the higher grade at the current salary for the grade/step held at the time of injury or disability. If that salary is between steps in the higher grade, the individual's salary will be increased to the next higher step.

c. Reemployment to a Lower Grade/Step.

(1) Salary Below Maximum of Lower Grade. The individual will be placed in any higher step in the lower grade which is less than one full step above the current salary for the grade/step of the position held at the time of injury or disability.

(2) Salary Above Maximum of Lower Grade. In those cases where the current salary for the grade/step held at the time of injury or disability exceeds the maximum salary of the lower grade position, the employee will be afforded a saved rate at the higher grade/step salary. These saved rate provisions apply for an indefinite period and are subject to the rules of the salary schedule to which assigned.

d. Reemployment to a Position in a Different Salary Schedule. When an individual is reemployed to a position in a salary schedule different from the schedule under which paid at the time of injury or disability, once reemployed, the individual will be treated under the rules applicable to the salary schedule to which reemployed:

(1) The individual will be reemployed at the grade appropriate for the position to which reemployed.

(2) The individual will be placed in any higher step in the new grade which is less than one full step above the current salary for the grade/step of the position held at the time of injury or disability.

(3) If reemployment is to a nonstep schedule, the individual will be placed at a salary equal to the current salary for the grade/step of the position held at the time of injury or disability.

(4) If the current salary for the grade/step held at the time of injury or disability exceeds the maximum salary of the new grade, the individual will be given a saved rate. These saved rate provisions apply for an indefinite period and are subject to the rules of the salary schedule to which assigned.

e. Former Position Under Different Salary Schedule. Where the position held at the time of injury or disability is no longer under the same salary schedule, the current salary for the former grade/step will be determined by:

(1) Regional Compensation Division, for field, district, and regional positions.

(2) Office of Compensation, Headquarters, for Headquarters and Headquarters-related positions.

f. Step Increases. Upon reemployment, permanently, partially disabled individuals begin a new waiting period for step increases.

.43 Rights and Benefits Upon Full Recovery. See 546.122.

546.5 Retirement Considerations

.51 Status. Pursuant to the Civil Service Retirement Act, a former employee who applied for and received Civil Service disability retirement status will cease to be an annuitant upon reemployment and restoration of that individual's wage earning capacity.

.52 Reinstatement of Eligiblity

.521 If an annuitant, reemployed under the procedures in this section, is later found unable to successfully perform in the new position due to the original compensable injury or disability, and is again separated, the employee will be entitled to the restoration of disability retirement status under the Civil Service Retirement Act.

.522 If an employee becomes disabled for the position due to a new injury or disability after entry into that position, the employee would have a right to apply for a new Civil Service disability retirement status.

.53 Refunded Retirement Deductions. A former employee who withdrew retirement deductions based on previous employment, may redeposit the amount refunded, plus interest, after reemployment to a position from which retirement deductions are withheld.

.54 Notification. Upon reemployment of a disability annuitant (or in advance, if possible), the appointing official must notify the Office of Personnel Management, Compensation Group, Room 3305, Attention: Annuitant

Services Division, Washington, DC 20415. The notification must include the individual's name, social security number, date of birth, Civil Service Annuity claim number (CSA-Civil Service Account), date of reemployment, Form 2485, Certificate of Medical Examination and whether retirement deductions will be made from the salary for the position to which reemployed.

546.6 Relocation Considerations

.61 Scope. In some cases, former employees receiving OWCP compensation may have relocated to other geographic areas. Every effort must be made to reemploy these individuals within their current area of residence by treating them as if they had been employed at that office at the time of injury. Any offer to reemploy in a different location will be considered only after all reasonable attempts have been made to rehire within the area of the former employee's present domicile.

.62 Expense. Any relocation and travel expenses will be the responsibility of the former employee. However, under certain mitigating circumstances the SAPMG for E&LR, or the SAPMG's designee, may authorize relocation and travel expenses consistent with the provisions of Handbook M-9, *Travel.*

546.7 Reemployment Procedures

.71 Offer of Appointment

.711 Evaluation. Upon receipt and evaluation of the OWCP referral containing documented medical limitations, and evaluation of the medical officer's recommendations, the appointing official will determine if a reemployment offer can be made.

.712 Interview. During the preemployment interview, the appointing officer will ensure that the individual receives the following information:

a. In-depth analysis of medical limitations and the individual's responsibility to work within the prescribed work limitation tolerances.

b. If applicable the status of injury compensation and disability retirement benefits and future eligibility.

c. A full explanation of all restoration rights and benefits (see 546.4).

d. Full particulars regarding the position, including title, duties, grade, salary, location of work assignment, and all other information required in a preemployment interview. (See Handbook P-11, 264.8 and 265.)

e. Instructions for completion and submission of any required employment forms.

.713 Appeal

a. Those employees who fully recover in less than one year from the date on which OWCP compensation began, may appeal to the Merit Systems Protection Board (MSPB) if they believe a proposed offer of reemployment does not meet the requirements of Office of Personnel Management regulations 5 CFR Part 353. The letter of appeal must be submitted within 20 days after the date of the offer or 20 days after the date of reemployment, whichever is later.

b. Those employees or former employees whose full recovery extends beyond one year, or whose partial recovery falls either within or beyond one year of compensation, may appeal to the Merit Systems Protection Board only when they have requested restoration through formal application to the installation head and restoration has been refused them. An appeal to the denial of restoration must be filed with MSPB within 20 days from the day the denial letter is received. Upon restoration, however, the employees are not given the right to appeal the nature of the restoration.

.72 Refusal of Reemployment Offer. When a former employee refuses an offer of suitable employment within the OWCP defined medical limitations, the appointing officer must do the following:

a. Offer the individual an opportunity to sign a declination of employment.

b. Advise the individual that the effect of such refusal may result in the termination or reduction of compensation benefits by the Department of Labor.

c. Notify the OWCP district office by telephone of the declination and reasons given.

d. Within 2 working days, forward a full written summary of the former employee's interview, including the signed declination, and medical evaluations or other pertinent information to the OWCP district office. OWCP has the responsibility to notify the Retirement and Insurance Division, Office of Personnel Management, when disability retirement status is to be evaluated.

.73 Refusal to Reemploy. The appointing official may not be able to accommodate the former employee for medical reasons or other considerations. If the former employee will not be reemployed, the appointing officer must:

a. Notify the employee in writing of that fact, with a copy to the OWCP; and

b. Include a paragraph informing the individual of the right to appeal to the Merit Systems Protection Board.

.74 Processing Personnel Actions. The reemployment of former employees injured or disabled on duty requires uniform information on Form 50-B, *Request for Personnel Action (Processing Copy for New Hires Only),* before forwarding to the Employee and Labor Relations Information Center. (See 612.5 of Handbook P-11.)

547 Return to Duty

547.1 Therapy Obligations

The installation head must ensure that an employee reports for scheduled therapy treatment. The employee

must be advised that failure to keep appointments with a physician or hospital is a form of absenteeism. Control office/control point personnel will report failures to keep appointments to the OWCP district office.

547.2 Medical Reports

.21 Progress reports received from the attending physician may show the employee is capable of some work during convalescence or after medical treatment has been completed.

.22 If not, this information is requested by the control office/control point from the attending physician or the OWCP district office by use of Form CA-17.

.23 If the attending physician submits a medical report, Form CA-17, indicating that the employee is medically capable of performing some of the normal duties for a limited number of hours, or other work of a different nature than the employee's former assignment, the installation head must make every reasonable effort to place the employee in an approriate assignment.

547.3 Fitness-For-Duty Determination

.31 Determining Fitness. The fact that an injured or ill employee is scheduled for a series of treatments or appointments with a physician or hospital does not, by itself, establish that the employee is not fit-for-duty in the interim. Control personnel will recommend, upon medical justification, to the installation head that any employee being treated by a physician or hospital be required to report to a USPS medical unit (or contract equivalent) for a fitness-for-duty examination. Only an installation head is authorized to approve a fitness-for duty examination.

.32 Examination Report. This physical examination may include the parts of the anatomy being treated, provided the examination in no way disturbs or interferes with the treatment regimen. The results of this examination will be brought to the attention of the OWCP district office for consideration.

.33 Physician Report Questioned. If the medical officer questions the medical procedures and/or determination of the employee's attending physician, no administrative action may be taken to change the employee's compensation or employment status until the medical issue is settled.

.34 Resolving Determination. The following procedures apply only to fitness-for-duty determinations incident to an on-the-job injury or illness. Fitness-for-duty determinations for other purposes are not covered by this instruction.

a. The physician or hospital must, for each visit of the employee, make a professional statement, using Form CA-17, showing the employee either:

(1) Fit-for-duty; or

(2) Fit for limited duty, and the work tolerance limitations due to the injury; or

(3) Not fit for duty with an expected return-to-duty date.

b. If the physician or hospital is unable to predict an employee's fitness for duty on either a short-term or long-term basis, the control office/control point supervisor may request information from the OWCP by sending Form 2573, Request—OWCP Claim Status, in duplicate, to the OWCP district office. If OWCP does not respond within a maximum of 60 days, or if the OWCP response does not explain the situation, a fitness-for-duty examination may be recommended to the installation head as provided in 547.31, .32, and .33. However, a fitness-for-duty examination can be initiated at any time to determine the duty status of the injured employee.

c. If the results of the fitness-for-duty examination disagree with the findings of the attending physician, the matter, along with justification for the USPS position, is referred by the control office/control point supervisor to the OWCP Deputy Commissioner for resolution.

d. A fitness-for-duty determination is not limited to the employee's regular duties, but should be based on whether the employing installation has any temporary alternative duties available which the employee may safely perform.

RECORDS CERTIFICATION

I, the undersigned, an employee of the State of Alaska, do hereby certify that the microfilm images on this microform are accurate reproductions of the original records of the State of Alaska as accumulated during the regular course of business, and that it is the established policy and practice of this State to microfilm its records and to dispose of the original records after microfilm reproductions have been made.

SUMMARY and EVALUATION of

Alaska Health Project/ Department of Labor Seminars

HOW TO IMPLEMENT THE NEW RIGHT TO KNOW LAW IN YOUR BUSINESS

January 4, 1985

Authors:
Mark Catlin and David Wigglesworth, Alaska Health Project
Max Andrews, Alaska Department of Labor

The Alaska right to know law requires employers, as of July 1, 1984, to collect information on hazardous substances used on their job sites and train their workers on these hazards. Both the Alaska Health Project and the Department of Labor received numerous requests from Alaskan businesses for assistance in implementing right to know programs during the spring and early summer of 1984. In response to these requests, the Alaska Health Project and Department of Labor decided to conduct a joint seminar series in the summer and fall of 1984. The Alaska chapter of the American Society of Safety Engineers and Collins and Associates cosponsored the seminars.

Five half-day seminars were scheduled, four in Anchorage and one

Back-up Information

in Fairbanks. Two additional seminars were added after the original five were filled because of continuing requests from businesses (see seminar outline, Appendix A). Max Andrews and Stan Godsoe from the Department of Labor and Mark Catlin, David Wigglesworth and Lawrence Weiss from the Alaska Health Project developed the seminar program. Max Andrews, David Wigglesworth and Mark Catlin taught the seminars (Stan Godsoe taught at one seminar when Max Andrews was unavailable).

In all, 94 persons attended the seven seminars (see Table 1). Most of those attending were managers in the private and public sector (see Table 2).

After each seminar, participants were asked to complete an evaluation form (see summary of evaluations in Appendix B). These evaluations were very positive, with 90 % rating the seminar as excellent or good and 96% rating the quality of instruction as excellent or good. Many of the participants specifically liked having instructors from both the Department of Labor and the Alaska Health Project. Participants also said they appreciated the informal nature of the seminars, the ample opportunity to ask questions, the case studies and the written material prepared for the seminar.

During these seminars, participants discussed their problems with implementing the right to know law. Common problems mentioned were: delays in obtaining material safety data sheets from distributers and the Department of Labor; lack of final regulations; need for more specific criteria for acceptable training; and the need for more information about chemical hazards.

Overall, the attitude of the participants was positive toward the right to know law. Many saw the need for and advantages to such programs. Several commented that compliance with the law would be fairly easy for their companies and required only "common sense".

This joint seminar series was successful in reaching many employers in the state, and assisting them to begin or improve their right to know programs. Even so, the Department of Labor and the Alaska Health Project continue to recieve requests for assistance with the right to know law. We anticipate the need for additional seminars during 1985. In addition, we also suggest exploring the need for a follow up series of seminars covering chemical hazards, air sampling, and hazard control methods.

APPENDIX B: SUMMARY

How To Implement The New Right To Know Seminar In Your Business

Participant Evaluation

1. Overall, how would you rate this seminar?

   Excellent 22%
   Good 68%
   Fair 9%
   Poor 1%

2. How much did you learn that you didn't know before?

   Much 51%
   Some 41%
   Little 8%
   Nothing 0%

3. How was the class instruction?

   Excellent 26%
   Good 70%
   Fair 3%
   Poor 1%

4. Did you feel that the seminar was

   Too long 12% ?
   Too short 18% ?
   Just right 70% ?

5. Did you have enough time to ask questions?

   Yes 90%
   No 10%

6. What did you like most about the seminar?

   Joint Dept. of Labor/AHP speakers; informal structure; time to ask questions; case studies; seminar notebook

7. What did you like least about the seminar?

   Need more information on training; need more information on chemical hazards.

Re: H.B. 319

Dear Senator:

I am writing to you in regard to H.B. 319 and my support for it. When the 'Right to Know' law was passed I was pleased to see our legislature act in a responsible manner toward worker and public saftey. However at the time it seemed somewhat odd that physical agents were not specifically included. Now with these proposed amendments to the law I believe we are moving more closely to what I believe is necessary in the workplace to protect both the workers and business.

Small business has too much regulation, God only knows. But the longterm health and saftey of employees is very important to the longterm profitability of even the smallest of businesses. More complete information for both the business and the worker is good. All too often we in business get so involed in the day to day work that it's hard to keep aware of potential on the job hazards. This bill will force business to rethink their saftey efforts at work, and specifically the exposure of workers to potentially harmful physical agents.

Please support this bill and urge others on your committee to push for its approval as well.

Sincerely,

Richard E. Sewell
President

Dear Senator Zharoff,

I am an Alaskan business owner who believes strongly in informing workers about workplace hazards. Existing Worker Right-to-Know legislation has resulted in healthy dialogue between the worker and the employer. The result has been fewer worker injuries and illnesses.

I urge you to support HB 319, that adds physical agents to the workplace hazards covered under the Right-to-Know law.

My understanding is that this bill merely adds ten fact sheets to the information that I, as a business owner, am required by law to provide my employees. If providing information can save a life or circumvent an injury, I am all for it!

Respectfully,

Alan Gaddie

Dear Senator Zharoff:

As a company that handles a number of chemical compounds and employs many people in manufacturing operations, we are familiar with the many occupational health hazards in the workplace. As an employer, and as concerned citizens, we make a point of being aware of our responsibility and legislation affecting that responsibility.

We feel that the state worker right-to-know law is a good piece of legislation and we further support the proposed amendments to the law currently being considered in both the House and Senate. We urge you to support both HB 319 and SB 253.

Sincerely,

David D. Thorp
Operations Supervisor

Dear Senator:

I would like to support HB 319 which would amend the right to know law to include 10 "physical agents" along with the existing several hundred hazardous and toxic substances of which employers must inform employees.

It should not cost any more to accomplish this goal.

I believe hearings would help to identity different feelings on this issue and gather additional information.

I believe this bill would further the intention of the previously passed right to know legislation. We often "assume" people know things and find out too late that they do not. Informing people of hazards before they are confronted seems a minor inconvenience.

Sincerely,

Dear Senator Zharoff,

As you are chairman of the Senate Labor and Commerce committee, I hope that you are planning to schedule HB 319, the Physical Agent Amendments to the Worker Right-to-Know law, for hearing soon. These amendments are crucial in filling gaps in the information provided to workers under existing Right-to-Know law. It may prevent catastrophe in the workplace.

As someone who has worked with asbestos, I am acutely aware of the need for workers to be provided information about workplace hazards. The resources gained in circumventing loss time will more than compensate for resources spent in producing ten fact sheets required by the bill. As information about chemical hazards is already required by law, I see no reason why physical hazards should not be included.

Sincerely,

Dan Middaugh

HB 319

Dear Senator Zharoff:

Traditionally, the Alaska Center for the Environment has spoken out for legislation that minimizes the risk of exposure to hazardous agents. We supported the original Worker Right-to-know bill, that provides workers with information about hazardous chemicals in the workplace.

However, we think that the existing law does not go far enough in protecting workers from workplace hazards. Physical agents such as noise and microwave radiation have a real effect on worker's health in this state. Technicians at the Clear tracking station have had their lives changed profoundly by exposure to microwave radiation.

Please schedule this important bill for hearing.

Sincerely,
Cliff Landesman

FACT SHEET: THE PHYSICAL AGENT AMENDMENTS

HB 319 AND SB 253

BUILD ON EXISTING RIGHT TO KNOW LAW

Three years ago, the Alaska legislature adopted the Worker Right-to-Know Law (CBSB 79) giving workers the right to request and receive from their employers information about workplace hazardous chemicals. The bill received broad-based support from labor, health, business, and environmental groups.

Two bills introduced last year, HB 319 (Pourchot) and SB 253 (Josephson), seek to amend the existing Right-to-Know Law to include physical agents. Physical agents, such as noise and ionizing radiation, similar to chemical agents, are potentially harmful to the health of workers. Health problems such as hearing loss and cancer can be attributed to exposure to some physical agents.

LOGICAL EXTENSION

The physical agent amendments are logical extensions of the existing Right-to-Know Law, building on pre-existing regulatory structures. HB 319 passed the house (34-4) last year. Both bills now reside in the Senate Labor and Commerce Committee. There are no fiscal notes attatched to either bill.

NOT DIFFICULT TO IMPLEMENT

The bill makes the Department of Labor responsible for listing, gathering information, and educating employers about potentially harmful physical agents. This amounts to writing and notifying employers of eight additional workplace hazards. Since the department is already carrying out these responsibilities for chemical hazards, the addition of eight fact sheets should not require any major manpower changes.

The bill makes employers reponsible for educating employees about how to work with physical agents safely. As they are already required to train employees about chemical hazards, this additional training should be easy to implement. Employee training will include information about the location, properties, and chronic effects of physical agents, handling procedures, and how to use safety equipment. The empoloyer is required to have updated information on hand about potential hazards of physical agents that are a risk in the workplace. Posters and information about physical agents will be provided by the Department of Labor.

PHYSICAL AGENTS

Physical agents covered by this bill are those listed by the respected American Conference of Industrial Hygienists in Threshhold Limit Values for Physical Agents. Potentially harmful physical agents include:

NOISE can cause damage to delicate tissues of the ear. Occupations at risk include construction workers, machine operators, and airport employees. Exposure to excess noise has been linked to:

* Permanent hearing loss and deafness.
* Stress and high blood pressure.

IONIZING RADIATION can be harmful as it can cause genetic damage to workers tissues. Occupations at risk include laboratory workers and x-ray operators. Exposure has been linked to:

* Burns, rashes, and skin disease.
* Cancer.
* Birth defects.

LASERS are intense beams of light that can cause burns and blindness. Objects that scatter the lasers can cause inadvertant exposure.

HEAT can be harmful when more heat is absorbed into the body than can be dissipated. Occupations at risk include food service workers, roofers, and deep bed miners. Prolonged exposure to heat has been linked to:

* High blood pressure and heart disease.
* Sexual impotence.
* Birth defects.

RADIOFREQUENCY AND MICROWAVE RADIATION are non-ionizing radiation produced by radio and television broadcast that produce heat. Occupations at risk include radio and television workers, radar workers, cooks, users of radiofrequency heaters, physical therapists, and electrical workers. Exposure has been linked to:

* Depression.
* High blood pressure and heart disease.
* Birth defects.

ULTRAVIOLET RADIATION is high energy non-ionizing radiation that can cause burns. Occupations at risk include welders, solderers, and laborers. Exposure has been linked to:

* Severe burns.
* Blindness.
* Skin cancer.

What can you do?

** Contact your legislator and ask him or her to support this bill. You can write, call, or send a Public Opinion Message. If you are unsure who represents your district, call the Legislative Information Office nearest you.

** Write a letter to sponsoring legislators requesting that this issue be considered a top priority.

** Ask your friends and colleagues to do the same.

** Call the Alaska Health Project (276-2864) for information about the current status of the bill.

How do you do it?

1) During session, write all legislators or committees at:

NAME
ALASKA STATE LEGISLATURE
POUCH V (MS 3100)
JUNEAU, ALASKA 99811

2) To call a legislator, contact the Legislative Information Office nearest you. There is an Alaska State Legislature Directory (1985-1986), available through Legislative Information Offices, which lists Juneau phone numbers for all legislators.

3) Send a Public Opinion Message (POM) by contacting your nearest Legislative Information Office. This is a free service that can be used by any constituent to wire a message to any individual member of the legislature or to all members of a committee. Always state who should receive the POM and the specific bill number. Be prepared to give your name, address, and phone number. You can request a POM by telephone.

The Anchorage Legislative Information Office is located on 6th Avenue between K and L Streets. The telephone number is 278-3668. Check your phone book for other regional offices.

Bill No. Committee Substitute for House Bill No. 319(L&C) Date April 12, 1985

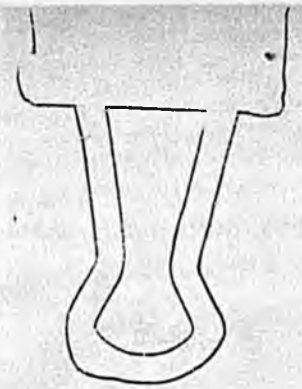
Title "An Act relating to physical agents." Contact: Richard Arab
465-4856
Eileen Plate
465-2700

Under existing law, employers are required to provide information and training to employees on certain toxic and hazardous substances. This bill seeks to expand the "Right-to-Know" law to include physical agents.

Physical agents are defined as those listed in the "Threshold Limit Values for Chemical Substances and Physical Agents in the Work Environment" as published by the American Conference of Governmental Industrial Hygienists. The latest edition of this publication lists the following physical agents:

- Heat Stress
- Ionizing Radiation
- Lasers
- Noise
- Impulse or Impact Noise
- RF/Microwave Radiation
- Ultraviolet Radiation
- Airborne Upper Sonic and Ultrasonic Acoustic Radiation
- Cold Stress
- Hand-Arm (Segmental) Vibration

Exposure to physical agents can result in permanent disabilities, such as deafness. Often employers and employees are not aware of the harmful effects of a particular physical hazard present in the workplace, and the training and information requirements provided in this bill would assist in filling this void. This would, in turn, effect implementation of protective measures by the employer to safeguard employees, as well as provide employees with an understanding of the importance of following safe and healthful work practices.



As part of its Occupational Safety and Health program, the Department of Labor enforces regulations to protect employees from certain physical hazards (ionizing radiation, lasers, noise, RF/microwave radiation, and ultraviolet radiation). The information and training requirement of this bill would, therefore, enhance the Department's efforts to protect Alaska's workers.

The Department of Labor supports Committee Substitute for House Bill No. 319. It will not have a fiscal impact on the Department.

APPROVED:

Jim Robison, Commissioner
Department of Labor

POSITION PAPER/Department of Labor

Rep. Pat Pourchot

SUMMARY CSHB 319 (L&C)
WORKER RIGHT-TO-KNOW LAW AMENDMENTS
TO INCLUDE PHYSICAL AGENTS

HB 319 amends the "worker right-to-know" statutes to include "physical agents" with other toxic and hazardous substances about which employers must inform their employees.

The existing statute (AS 18.60) directs the Department of Labor to prepare for employers information data sheets on hazardous and toxic materials to which employees may be exposed in the workplace. Information which is compiled by the Department is transmitted to the workers by employers and includes: description of the substantiated effects of the substance, known threshold levels where effects occur, activities and situations where the substances are encountered and practices, technology and preventative measures which are available to the workers which will reduce or eliminate the negative impacts of the substance. Safety training for new employees is also required.

The same notice and training requirements for hazardous and toxic substances would be applied to "physical agents" under CSHB 319. "Physical agents" are only those identified by the American Conference of Governmental Industrial Hygenists (ACGIH) and include:

Ionizing radiation (x-ray)
Heat and cold stress
Impulsive and impact noise
Radiofrequency, microwave, ultraviolet, and infrared radiation
Lasers
Hand-arm (segmented) vibration

With enactment of this bill industrial accidents could be reduced in number and severity. For example, accidents such as the microwave exposure at Clear Air Force Station may be avoided if workers are better informed of the substances to which they may be exposed and are aware of preventative and safety precautions. Many occupations are not readily associated with exposure to dangerous levels of physical agents. Welders and pipe fitters, for example, are often exposed to hazardous exposures of ionizing radiation (x-rays) when examining welds and joints.

It should be emphasized that the bill requires only the dissemination of information and safety training by employers. It does not require that employers or employees implement any safety practices or measures.

The fiscal note for the bill is $0. The Department of Labor essentially will be editing existing information from national organizations relating to health and safety in the workplace, including the ACGIH, the Center for Disease Control, and the Occupational Safety and Health Administration (OSHA).

CSHB 319 (L&C): Sectional Analysis

Section 1) Expands the duties of the Department of Labor concerning occupational health and safety regulation and expands the "worker's right to know" law by including physical agents. The department would be required to publish an annual list of physical agents, maintain a current set of OSHA form 20's or equivalent information for each physical agent, and other information relevant to physical agents.

Department would also be required, upon request, to develope employee safety education programs, and obtain information on physical agents.

Section 2) Employer would be required to conduct a safety education program before an employee performs a new work task and is exposed to physical agents for which he has not already been trained. Also defines the employee safety instruction program.

Section 3) Employer is required to make available on the request of an employee, information on the physical agents to which the employee may be exposed. If the employer does not have a copy of the information requested, he shall request a copy within 3 state government working days after the request has been made.

Section 4) Concerns requirements for the posting of information on physical agents by employers.

Department shall print posters and provide information on each physical agent which the employee may be exposed to.

Section 5) defines "being exposed" to a physical agent

Section 6) defines "physical agent" as defined by the department thru regs; department shall initially define the term to include those agents listed in the 84/85 edition of the "Threshold Limit Values for Chemical Substances and Physical Agents in the Work Environment". Department shall amend the definition to include physical agents listed in future editions, but not include an agent, the exposure to which does not pose a health hazard.

Section 7) definitions

Section 8) Department may continue using existing posters until the next printing.

CHAIRMAN'S INFORMATION: CSHB 319(L&C)

1) BILL TITLE: "An act relating to physical agents"

a) Introduced: Pourchot, Gruenberg, Koponen

b) Co-sponsors:

2) INTENT: This measure expands the "worker right to know law" by including "physical agents" among the list of those hazards which employers must inform employees of. The department of Labor will be required to provide posters and information fact sheets to employers for the education of their employees. Additionally, safety training will be required before new employees become exposed to physical agents in the work place.

HB 356 Summary

Measure would allow the "assignment" of group life insurance policies which provides a means of reducing federal estate taxes and simplifying the estate planning process.

If a person other than the insured is assigned a policy, the proceeds do not pass through the insured's estate, and thus are not subject to federal estate tax. Currently, 48 states have passed similar legislation, and the IRS has concurred as long as state's statutorily authorize "assignment" of group life policies. Without this authorization, the IRS requires payment of estate taxes on the policy before the proceeds go to the heir.

FROM: Jim Jordan

SUBJECT: Assignment - Group Life

I recently had several more inquiries regarding the assignment of group life benefits. However, this time, I have found the insurer's reason for stating that group life benefits are not assignable in Alaska.

The situation described was one in which a two person partnership was looking for a group life contract to provide coverage for themselves as well as their employees. In addition, the two partners wished to assign their group life benefits and to name the assignee as beneficiary (the other partner) in order to obtain the favorable federal estate tax treatment as well as to fund a buy-sell arrangement. The insurer involved would not issue a group life contract allowing for assignment because, by their interpretation, in so doing they would not be contracting with a duly formed group pursuant to AS21.48.020.

AS21.48.020 states, in part, "...The lives of a group of individuals may be insured under a policy issued to an employer....to insure employees of the employer for the benefit of persons other than the employer...." (emphasis added). The insurer's contention is that if assignment were included, then this would benefit the employer and by so doing, violate the AS21.48.020 definition of a duly constituted group. One theory for this type of definition relates to the employer's purpose of providing group life coverage. That theory is the employer's purpose in providing for part or all of the cost of group life insurance is to provide for the employee's family upon death. In this specific case, the insurer deemed the partnership (the employer) would benefit by the assignment upon death of either or both of the partners as opposed to their families (as dependents of employees). However, in this specific instance, this is a very close call situation made by the insurer. The family of a deceased partner surely would benefit by receiving prompt cash for that partner's share of the business. Also, the surviving partner and his family would benefit by not having to liquidate other personal assets in order to satisfy the buy-sell arrangement.

It still appears to me that group life may be assigned pursuant to AS21.42.270 so long as such an assignment does not cause a situation which would violate AS21.48.020. This holds true, in general, for all employees. The only time a problem enters in, is when the employee and the employer are one in the same person, as in the case of a partnership. I believe that AS21.48.020 could be interpreted, in the case of a partnership, so that assignment would be allowed. I would not be surprised if some insurers have not made that interpretation and are allowing for assignment in such instances as the above example. Even where jurisdictions expressly allow for assignment, many group insurers do not allow it because of the additionally complex administration involved. Otherwise, some economies of scale would be lost thus threatening the lower cost, group approach.

Back-up Information

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

DIVISION OF INSURANCE

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2515

February 11, 1986

The Honorable Fred Zharoff
Chairman
Senate Labor & Commerce Committee
P.O. Box V
Juneau, AK 99811

Dear Senator Zharoff:

Re: HB 356 - Assignment of Group
Life Insurance

A number of questions concerning references to an Attorney General's Opinion were raised at the Senate Labor and Commerce hearing on HB 356 held on February 10, 1986. The suggestions of Mr. Jordan never resulted in a formal request for an Attorney General's Opinion. There were some casual discussions with the director at that time and the Attorney General's Office. The general drift of discussions at that time was, that in view of the potential impact from federal estate tax situations, the preferred method of dealing with the issue would be specific legislation to clarify the extent of assignment possible. The thinking was that interpretations would be subject to question where clear statutory language would probably not be so subject. I'm sorry that I did not anticipate the questions generated by the memo and accompany it with an explanation.

Very truly yours,

Donald P. Koch
Chief of Market Surveillance

DPK/me022OK
021186a

08-H11LH

Historically this has not been a very "hot" issue because of the small group life benefits offered in most schedules. However, this issue has come more to the forefront in the last few years due to the combination of larger amounts of group life offered to groups of lessor size. So, the market now has large amounts of group life coverage which can be issued to small employers who many times are partners interested in low cost ways to fund buy-sell arrangements. The partners can see a way to help provide for two needs - to fund a buy-sell arrangement and at the same time provide an employee benefit which, in theory, will help in retention of employees.

I think at this time we need an attorney general's opinion concerning this situation. If the opinion parallels my interpretation of AS21.48.020 in this circumstance, then we can state positively that assignment is allowable. If not, I think a legislated solution is in order. In either event, this will stop insurer's from using the code and the division's interpretation as excuses for not allowing group life assignment. For many insurers, I'm sure this is the most expedient and painless response to their marketing staff when confronted on this issue.

In any event, opposition to this interpretation or legislated solution will come from the individual product agent. They will see this as an infringement upon their private domain. This is so because there is no doubt that individual life policies can be assigned. However, I think competition would be good for this markerplace. Also, if partners are unable to assign group life benefits, they may reduce or even forgo entirely a group life program for their employees in order to have the capital for premiums for individual life policies to fund a buy-sell arrangement.

I would appreciate your thoughts on this issue both in general and in this specific circumstance. I think the time has come to address this issue with the attorney general.

January 24, 1986

PRESS RELEASE

RE: HB 356, "Assignment of Group Life Insurance Policies"

Reduced federal taxes for Alaskans could result from legislation scheduled for a House floor vote today, according to Max Gruenberg, Anchorage Democrat and prime sponsor of HB 356, "Assignment of Group Life Insurance Policies."

The bill authorizes assignment of group life insurance policies by an insured person to another party.

"Forty-eight other states already have group life policies assignable by statute. By joining the other states, we correct an inequitable federal tax situation which discriminates against Alaskans," said Gruenberg.

"According to the IRS, for tax purposes you need specific statutory authorization to assign your group life policy to someone else. Without the authorization, IRS requires payment of estate taxes on the policy before the proceeds go to the heir."

"The reduction in federal tax income is insignificant, but the bill makes estate planning simpler and fairer for Alaskans," said Gruenberg.

Rep Gruenberg Press Release

MEMORANDUM

TO: Representative Gruenberg

FROM: Dave Donley

RE: April 24, 1985

DATE: HB 356, "Assignment of Group Life Policies of Insurance"

Under current estate tax law, if an insured owns a life insurance policy, upon the insured's death the proceeds of that policy will pass through his estate and be subject to estate tax prior to receipt by the named beneficiary.

If a person other than the insured owns a policy, the proceeds do not pass through the insured's estate and thus are not subject to estate tax.

At common law, it is questionable whether group life policies can be assigned, and the IRS has held that without statutory authorization assignments are not effective for tax purposes. Accordingly, some 18 states have made group life policies assignable by statute.

Considering that 48 states have already passed similar laws, enactment of HB 356 by the state of Alaska would result in an insignificant reduction in federal revenues. The advantages in estate planning for Alaskans to be provided by this legislation are substantial and fair. Failure to pass this legislation will result in continuance of an inequitable federal tax situation that discriminates against Alaskans.

Re: Proposed Statutes Regarding Assignment of Group Term Life Insurance Policies

Dear Dick:

Enclosed is a proposed statute relating to the assignability of group life insurance policies. This statute shall affirmly establish the right of an individual to transfer his ownership of any group life insurance policy to any individual he wishes. Although at the present time there is no law in effect which specifically prohibits such an assignment, the United States Treasury Department may contest such a person's right unless the state of residency has a statute authorizing such an assignment. The Alaska Bar Association taxation law section supports inactment of this proposed statute.

Very truly yours,

George E. Goerig, Jr.

Unsafe Harbor

Alaska Pipeline Firm Is Accused of Polluting Sea Water Since 1977

Alyeska Documents Support Claims of Lax Procedures At Water-Treating Plant

Company Insists It Complies

By Andy Pasztor and Robert E. Taylor
Staff Reporters of The Wall Street Journal

First, federal inspector Dianne Soderlund noticed a layer of brownish scum on water ready to be discharged into Valdez harbor from the trans-Alaska oil pipeline's water-treatment plant. Later, when she spotted an oil slick at the same location, suspicion turned to alarm.

"It appears," she concluded, "there are significant operational problems at the cility." The plant is supposed to screen oil and toxic pollutants from huge quantities of ballast water poured into the harbor by tankers as they queue up at the pipeline terminal to load crude oil at the feet of majestic, snow-shrouded peaks.

But evidence is piling up that the plant hasn't been doing its job effectively and that sludge containing toxic pollutants isn't properly removed from water that the plant discharges back into the harbor.

Larger Questions

The preliminary warning from Ms. Soderlund to the Environmental Protection Agency came 17 months ago. Since then, a flurry of federal and state investigations has shaken public confidence in the pipeline's management and forced it to make costly improvements. The revelations also raise larger questions: Can state and federal officials adequately monitor pollution from such large, complex facilities? And why did it take them so long to act in this case?

Investigators have uncovered a history of questionable plant actions since the 1977 opening of the pipeline's huge southern terminal in Valdez, Alaska, which currently supplies roughly 15% of total U.S. oil needs. And the scrutiny is far from over. Still under investigation are the reasons why some pollution-control devices designed for the plant were never installed and others were disconnected or modified without notification to the EPA.

State probers are looking into further allegations of such criminal violations as submission of fraudulent environmental test results and false testimony to government regulators about potential hazards. Internal company documents show that some pipeline officials years ago suspected that the plant posed potential environmental hazards, but federal and state regulators contend that management failed to take steps to resolve the deficiencies until it was ordered to do so in the past few months.

Improprieties Denied

Alyeska Pipeline Service Co., which operates the pipeline for eight major oil companies, says that it has complied with all anti-pollution laws and that all allegations of record-tampering, improper discharges and other improprieties are unfounded. It calls the pipeline terminal's ballast-water treatment plant "probably the best and most modern" facility of its kind in the industry, arguing that the criticism is fanned by misunderstanding of plant operations.

The focus of all this attention is a sprawling complex of giant tanks and miles of piping designed to remove and dispose of harmful pollutants contained in the roughly 13 million gallons of ballast water discharged by tankers daily. Empty tankers take on ballast water for added stability on the voyage to Valdez, then pump it out to take on crude oil destined for the lower 48 states.

An EPA administrative order issued last summer accuses Alyeska of violating the treatment plant's water-discharge permit by systematically recirculating potentially harmful sludge. A second compliance order was issued in conjunction with Alaska's Department of Environmental Conservation. Government officials contend that transfers of oily water and sludge from tank to tank within the plant allowed high levels of potentially harmful pollutants to build up in the system over the years and flow unnoticed into the bay.

'Serious Threat'

Ihor Lysyj, the main consultant hired by the EPA, recently reported to the agency that the plant's deficiencies allow "uncontrolled quantities" of toxic pollutants to enter the harbor. He also informally told the agency that such pollution presents an "imminent and serious threat to the environment."

Mr. Lysyj, one of the country's leading experts on ballast-water treatment, estimates that the plant currently spews 1,600 pounds of pollution into the harbor every day, including "extremely toxic and hazardous substances." Assuming that that rate has remained steady since the pipeline began operations more than eight years ago, he calculates, the plant may have released enough potentially hazardous sludge to cover completely about four football fields three feet deep.

The EPA's consultant compares Alyeska's sludge-handling procedures to "vacuuming your house, dumping all the collected dust back on the carpet and then starting the whole process over again." Federal and state regulators are conducting tests to determine how much of the sludge ends up in the rich fishing grounds of Prince William Sound and whether there has been any damage to marine life.

Although pipeline executives deny vio-

Please Turn to Page 13, Column 1

Unsafe Harbor: Pollution of Ocean By Alaska Pipeline Firm Is Charged

Continued From First Page

lating any laws, they clearly are on the defensive. Under pressure from state and EPA officials, Alyeska appears to be spending millions of dollars to revise operating procedures, install new pollution controls and upgrade laboratory equipment at the treatment plant. The company also has promised to take additional steps that may be necessary to comply with what are likely to be more-stringent requirements for a new federal permit for continued operations at Valdez.

But local fishermen and some environmental groups complain that the state and EPA officials still haven't gone far enough. "The regulators did a very poor job over the years by failing to devote the necessary attention and expertise to supervise plant operations," contends Robert Blake, the president of the Cordova District Fishermen United and one of Alyeska's sharpest critics.

Budget Pressures

Some state and federal enforcement officials concede that budget pressures, staff shortages and the press of other business contributed to the problem. Harold Geren, the regional chief of the EPA's water-pollution-control programs, recalls hearing concerns from his staff about the adequacy of the treatment plant as far back as 1981. But work on permits for pulp mills, offshore oil rigs and other facilities, Mr. Geren says, diverted attention from Alyeska. "We've been hard-pressed keeping permits issued promptly," he says.

The original design called for the plant to remove sludge from the system and burn it in a large incinerator. But Alyeska never constructed the incinerator and says it wasn't legally required to do so. A spokesman says the company decided it was unnecessary because the amount of sludge produced in the beginning was less than anticipated. Alyeska has said it segregated and stored only 450 cubic yards of the stuff since operations began in 1977. Also, under standard procedure, some is channeled into outgoing crude oil.

State and federal officials argue that much more sludge than that should have been removed. They say its recovery was impaired by operating and equipment changes, many of which Alyeska made without the notification that EPA officials say is required. For instance, the company substituted small, paddlewheel skimmers for the large, sweeping arms designed to skim oily scum off the surface of one set of tanks; and it stopped using equipment designed to scrape sludge off the bottom of the same tanks and to heat water to separate it from oil.

Effectiveness Unimpaired?

Alyeska has told federal investigators that such changes didn't reduce the plant's effectiveness. But pipeline officials refuse to answer questions from The Wall Street Journal or discuss specifics until their discussions with the EPA are completed. Company officials previously said many of the changes were intended to reduce costly maintenance problems. The company says it has fully complied with its water permit by generally curbing the plant's releases of oil, grease and three other oil and pollutants specifically limited by the permit.

Investigators counter that the plant must be operated as efficiently as possible to remove all pollutants—regardless of whether they are explicitly mentioned in the permit. "There isn't any question that the practices we found are unacceptable, and they are violations of federal permit requirements," asserts Jamie Sikorski, former head of the EPA's clean-water compliance office for the region.

William Lamoreaux, a state environmental official who helped draft the plant's original operating permit, agrees. He says that a sludge pit, originally intended for temporary storage of wastes awaiting incineration, had been converted so that waste material was routinely pumped directly back into the ballast-water treatment tanks. Such recirculation of sludges was "never approved or contemplated by anyone involved at the beginning," Mr. Lamoreaux asserts.

For its part, Alyeska told the EPA in 1982 that toxic pollutants not specifically limited by the permit were found "in concentrations so low as to pose no possibility of significant or deleterious effects" on the port.

Earlier Documents

Nevertheless, company concerns about the amount of sludge generated by the plant—and what to do with it—have surfaced in internal Alyeska documents written at least as far back as 1978. In that year, the terminal's then superintendent, F.C. Jones, wrote a letter to engineers at Exxon Corp., one of the eight owners of the pipeline, complaining that the treatment plant "does not provide any facility to remove solids" and asking for their help in solving the problem. The letter went on to say that while some of the materials "exit in the water effluent," the plant's "high recirculation rate of solids is currently interfering in" the system's overall operation.

State and federal investigators are examining the letter, which was obtained separately by The Wall Street Journal along with other Alyeska documents on the plant. Exxon officials say they don't know what their company did in response to the letter. Alyeska documents say that an Exxon official studied the plant, found that the sludge disposal would cost at least $1.5 million annually and urged instead that more oily waste be diverted into crude oil destined for outgoing tankers.

In December 1978, an internal memo from plant operators estimated that "solids have accumulated at a rate of 1 to 2 tons per day (dry basis)," which, if accurate, would be far more than Alyeska has claimed to have separated and stored. State and federal regulators say that the company appears to be leaning toward building an incinerator at the treatment plant to dispose of stored sludge.

State officials also are investigating the adequacy of the pipeline's contingency plans for an oil spill. The EPA and congressional investigators are looking into allegations that Alyeska improperly used the treatment plant to dispose of some chemical wastes that didn't come from ballast water. And the state's attorney general has collected documents relating to Alyeska's earlier statements about sludge-handling and to the question of whether some plant workers may have been improperly exposed to harmful chemicals over the years.

Broker's Role

Some of the documents that investigators are using were obtained by Charles Hamel, an independent oil-transportation broker from Alexandria, Va. He has spearheaded criticism of Alyeska's management after contending that he suffered losses on some oil shipped through the pipeline that allegedly contained excess water. His allegations indirectly led to questions about the pollution-control practices at the plant, alerted Alaskan newspapers about the plant's apparent problems and prompted the EPA and the state to step up their investigations.

Investigators also have testimony from several former Alyeska employees claiming that their bosses encouraged or told them to tamper with pollution tests, report incorrect data and engage in other improper activities at the plant.

In sworn testimony to the Alaska Public Utilities Commission, Erlene J. Blake, a former plant laboratory technician, last year alleged it was "standard operating procedure at times" to "alter" such records. She told utility regulators that she was instructed to provide false reports to the EPA when the volume of treated water flowing into the bay exceeded maximum federal limits.

James Woodle, a former marine superintendent at the terminal, told the utility commission that "problem areas were masked and records modified" to suggest normal conditions at the treatment plant. Mr. Woodle also testified that plant operators were under instruction to disregard required safeguards if necessary in order to deal with unusually heavy incoming ballast flows. The operating principle, he said, was, "Just empty the tanks and make room."

Mr. Woodle is suing Alyeska, alleging that he was unfairly forced to leave the company before the investigations started. The company won't comment on the pending litigation.

Bill Ross, Alaska's top environmental official, several months ago confirmed that state officials, "working in concert with" the EPA, are conducting interviews and combing through Alyeska files to determine "whether any criminal violations may have occurred."

Many questions about the "sludge problem" at Valdez remain unanswered. But even the preliminary conclusions reached so far worry many scientists. David Shaw, a professor at the University of Alaska's Institute of Marine Sciences, who has studied Valdez harbor for Alyeska since the late 1970s, says of the increasing pollution on the sea bottom there: "I'm concerned it could be the tip of a serious problem."

Senate Labor and Commerce Committee

The Senate Labor and Commerce Committee announces a joint hearing with the Senate Judiciary Committee to be held on Wednesday, February 26th, at 3:00p.m. in the Senate Finance Chambers. The agenda for the meeting will be a presentation on insurance.

HB 356: "AN ACT RELATING TO THE ASSIGNMENT OF GROUP LIFE POLICIES OF INSURANCE."

THIS MEASURE WOULD ALLOW THE "ASSIGNMENT" OF GROUP LIFE INSURANCE POLICIES, PROVIDING A MEANS OF REDUCING FEDERAL ESTATE TAXES, AND SIMPLIFYING THE ESTATE PLANNING PROCESS.

IF A PERSON OTHER THAN THE INSURED IS ASSIGNED A POLICY, THE PROCEEDS DO NOT PASS THRU THE INSURED'S ESTATE, AND THUS ARE NOT SUBJECT TO FEDERAL ESTATE TAX.

CURRENTLY, 48 STATES HAVE PASSED SIMILAR LEGISLATION. WITHOUT STATUTORY AUTHORIZATION, THE IRS REQUIRES PAYMENT OF ESTATE TAXES ON THE POLICY <u>BEFORE THE PROCEEDS GO TO THE HEIR</u>. I URGE SUPPORT FROM THE BODY.

HOUSE BILL NO. 356

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to assignment of group life policies of insurance."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42.270 is amended to read:

Sec. 21.42.270. ASSIGNMENT OF POLICIES. A policy may be assignable or nonassignable, depending upon its terms. Subject to its terms relating to its assignability, a life, group life or disability policy, whether issued before or after July 1, 1966, under the terms of which the beneficiary may be changed upon the sole request of the insured, may be assigned either by pledge or transfer of title by an assignment executed by the insured alone and delivered to the insurer, whether or not the pledgee or assignee is the insurer. The assignment entitles the insurer to deal with the assignee as the owner or pledgee of the policy in accordance with the terms of the assignment until the insurer has received at its home office written notice of termination of the assignment or pledge, or written notice by or on behalf of some other person claiming an interest in the policy which is in conflict with the assignment.

The Honorable Don Clocksin
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Clocksin:

You have asked for our preliminary view as to the effect of adoption of HB 392, as amended, on those projects for which money has been previously appropriated. Where the state has already entered into a lease-financing agreements prior to the effective date of the legislation, as in the case of the Alaska Vocational and Technical Education Center, the bill would not, in our view, have any application. In contrast, where the state has not entered into a lease-financing agreement, the bill would condition the authority to do so upon specific review and approval by the legislature. With specific reference to the proposed Seward prison facility, the state has not as yet entered into a lease-financing agreement, and HB 392, as amended on the floor, would therefore require specific legislative approval.

We attach a draft letter of intent which clarifies the question of retroactive application of HB 392.

Sincerely yours,

NORMAN C. GORSUCH
ATTORNEY GENERAL

By: Jonathan B. Rubini
Jonathan B. Rubini
Assistant Attorney General

DRAFT LETTER OF INTENT

It is the intent of the Legislature that the requirement of specific legislative approval of lease-financing agreements apply to only those projects or office facilities for which the state has not previously entered into a lease-financing agreement. Projects for which the state has entered into lease-financing agreement are not affected by this legislation.

LETTER OF INTENT

House Bill 392

It is the intent of the Legislature that the requirement of specific legislative approval of lease-financing agreements apply to only those projects or office facilities for which the state has not previously entered into a lease-financing agreement. Projects for which the state has entered into lease-financing agreements are not affected by this legislation.

Further, it is the intent of the Legislature that the Department of Administration examine the opportunities for centralizing of government office space in Alaska communities which express an interest in consolidating office space. The Department should work closely with these communities to define options for office space consolidation. A report on the possibilities of office space centralization, including an evaluation of costs, should be submitted to the Legislature by January 15th, 1986.

The purpose of this analysis is to identify opportunities for cost savings to the state through more efficient use of office space. A related benefit would be to make government offices more accessible to constituents by centralizing many different offices which may be scattered throughout a community. Where appropriate, consideration should be given to inclusion of federal and/or local government office space in central facility.

Approved
3-7-3

BILL HISTORY HB 392

HOUSE CALENDAR: MAY 4 1985- SATURDAY

BILL	HB0392
PAGE	01001
DATE	04/19/85
CHAMBER	HOUSE
TEXT	HOUSE BILL NO. 392 by the Rules Committee by request of the Governor, entitled:

"An Act relating to the acquisition and development of state office and prison facilities; and providing for an effective date."

was read the first time and referred to the Finance Committee.

A zero fiscal note with an analysis was attached and appears in House Journal Supplement No. 52.

The Governor's transmittal letter, dated April 19, 1985, appears below:

"Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that relates to financing for the acquisition and development of public facilities.

During my recent address to the joint session of the legislature, I stated that the Anchorage Office Complex would not proceed unless the project is approved by the legislature. As you know, the money for developing the Anchorage Office Complex is intended to be provided through the sale of certificates of participation in rental payments, i.e., lease-financing agreements. My commitment to seek legislative approval was offered in recognition of the substantial legislative interest in a project as substantial and as costly as the proposed Anchorage Office Complex.

It is important for the Legislature to understand the long-term implications of this legislation. I believe it is good public policy to find creative ways to finance buildings when such financing saves us money in the future. We have an obligation to our citizens to take advantage of these savings whenever we can.

The desirability of legislative review of the Anchorage Office Complex raises the more general question of how to assure adequate legislative involvement when the state seeks to enter into lease-financing agreements. As we enter an era of declining state revenues, I believe that it is all the more critical to explore all available opportunities to provide needed public facilities in the most cost-efficient method. In some instances, lease-financing transactions offer an extremely attractive vehicle to finance the development of public buildings. While I believe that the authority to enter into long-term leases under AS 37.05.280 provides a statutory basis for lease-financ... I am equally cognizant of the need to assure that the legislature is accorded an opportunity to review these projects before their actual development. Section 1 of

this bill amends AS 37.05.280 to provide that legislative approval must be obtained before the Department of Administration may enter into a lease-financing agreement. I must observe that the proposed amendment to AS 37.05.280 poses difficult separation-of-powers considerations. Traditionally, a requirement of specific project approval is not a proper exercise of legislative powers. Yet where lease-financing arrangements are at issue, the practical fact is that the decision to enter into such an agreement may, as a practical matter, place a far-reaching economic burden on the state. In these circumstances, I recognize that providing legislative review only through the annual appropriation process is somewhat limited. In short, because I believe lease-financing transactions do have a substantial impact on the state's fiscal affairs over a period of fiscal years, I welcome the legislature's participation in the process of project review.

I believe that this bill offers the legislature a strong role in review and approval of proposed lease-financings. I urge your prompt review and passage of this legislation.

Sincerely,
/s/
Bill Sheffield
Governor"

HB0392
01232
05/02/85
HOUSE

The Finance Committee has considered HOUSE BILL NO. 392 (acquisition and development of state office and prison facilities; effective date) and reports it back as follows: Adams (Chairman), Ringstad, Szymanski, Cotten, Uehling and Larson recommend do pass. Duncan, Rieger, Pourchot and Frank have no recommendation.

HB 392 was referred to the Rules Committee for placement on the calendar.

State Offices & Prison Facilities -

HOUSE BILL NO. 392, by the Rules Committee by Request of the Governor. Relates to acquisition and development of state office and prison facilities (see * SB 293, page 645, identical, also Governor's letter). (below)

Introduced April 19 and referred to Finance.

* **SENATE BILL NO. 293, by the Rules Committee by request of the Governor. Authorizes the state to enter into lease-financing agreements, including lease-purchase arrangements for the financing of state office and prison facilities. Effective immediately. Identical to HB 392.**

Introduced April 19 and referred to State Affairs, Judiciary and Finance.

In his message transmitting the bill to the Senate for consideration, Governor Sheffield stated:

> Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that relates to financing for the acquisition and development of public facilities.
>
> During my recent address to the joint session of the legislature, I stated that the Anchorage Office Complex would not proceed unless the project is approved by the legislature. We have an obligation to our citizens to take advantage of these savings whenever we can.
>
> The desirability of legislative review of the Anchorage Office Complex raises the more general question of how to assure adequate legislative involvement when the state seeks to enter into lease-financing agreements. As we enter an era of declining state revenues, I believe that it is all the more critical to explore all available opportunities to provide needed public facilities in the most cost-efficient method. In some instances, lease-financing transactions offer an extremely attractive vehicle to finance the development of public buildings. While I believe that the authority to enter into long-term leases under AS 37.05.280 provides a statutory basis for lease-financing, I am equally cognizant of the need to assure that the legislature is accorded an opportunity to review these projects before their actual development. Section 1 of this bill amends AS 37.05.280 to provide that legislative approval must be obtained before the Department of Administration may enter into a lease-financing agreement.
>
> I must observe that the proposed amendment to AS 37.05.280 poses difficult separation-of-powers considerations. Traditionally, a requirement of specific project approval is not a proper exercise of legislative powers. Yet where lease-financing arrangements are at issue, the practical fact is that the decision to enter into such an agreement may, as a practical matter, place a far-reaching economic burden on the state. In these circumstances, I recognize that providing legislative review only through the annual appropriation process is somewhat limited. In short, because I believe lease-financing transactions do have a substantial impact on the state's fiscal affairs over a period of fiscal years, I welcome the legislature's participation in the process of project review.
>
> I believe that this bill offers the legislature a strong role in review and approval of proposed lease-financings. I urge your prompt review and passage of this legislation.

SUBJECT: Legislative Intent of House Bill 392

As you are no doubt aware, House Bill 392 passed the House and is currently in the Senate Labor and Commerce Committee awaiting action next session.

Please find attached a copy of the letter of intent which was adopted with this bill which has particular relevence for District 26. More specifically, the City of Dillingham is interested in the possibility of consolidating State and/or federal office space in a single complex. At this point, the idea is only tenative but some preliminary information is available. I have also enclosed a copy of a House Research Agency Report which identifies the current State and federal office space requirements.

I wanted to draw your attention to this bill in the hope that the provisions contained in the letter of intent regarding office space consolidation are given favorable consideration and possibly made stronger by inclusion in the bill itself.

MEMORANDUM

TO: Representative Adelheid Herrmann

ATTN: Eric Myers

FROM: Eric Laschever
Legislative Analyst

RE: Dillingham Government Employees and Office Costs
Research Request 85-301

At your request, I have prepared the following information regarding the number of State and federal employees based in Dillingham and the costs of leasing space for these individuals.

I was able to identify a total of 64 to 71 employees, 31,268 square feet of space and $17,938.49 per month in lease expenses.

State Employees and Office Costs

Table 1 summarizes the number of State employees, the amount of office space and office space costs by agency. The table is based on information provided by the Department of Administration, the Division of Legislative Finance and the Dillingham phone book. According to these sources, there are 40 State employees located in Dillingham, not including summer seasonal staff for the Department of Fish and Game. State workers occupy approximately 17,573 square feet of office and shop space. The Departments of Administration, Fish and Game, Health and Social Services, Public Safety and Transportation occupy State-owned facilities. The State is still making ASHA payments on the facility occupied by the Departments of Health and Social Services and Labor. These payments were $10,733.41 in FY 84, the most recent year for which I could find data. Five departments lease space, paying $16,186.49 per month or $194,237 per year. The University of Alaska has nine employees in Dillingham. They occupy 4,370 square feet of space. The University owns the facility which is located on land for which it has a $1.00 100-year lease from the city.

Table 1

State Employees and Office Space

Department	Number of Employees	Square Feet	Monthly Costs
Administration, Division of Communication	1	256	State-Owned
Commerce	1	238	$ 449.82
Community and Regional Affairs	3	1,030	1,957.00
Environmental Conservation	1	351	662.40
Fish & Game	10[a]	4,000	State-Owned
Health and Social Services	3 - 5	331	State-Owned
Labor	2	600	State-Owned
Law	3	1,154	2,480.09
Legislative Affairs	2	800	1,600.00
Public Safety	2	2,000	State-Owned
Transportation	7	3,200	State-Owned
District Court System	3.5	3,633	$ 8,937.18
Universtiy of Alaska	9	4,370	State-Owned
TOTAL	47.5 - 49.5	21,943	$16,186.49

[a]Includes Department of Natural Resources Park Ranger.

Source: Personal Communications with State Agencies.

Prepared by the House Research Agency, April 1985.

* * * *

Federal Employees and Office Costs

I was able to identify five federal agencies which have offices in Dillingham. Table 2 lists the number of employees, amount of space and lease costs for these agencies. The people whom I interviewed at the hospital and air field said that it was unlikely that they would be able to relocate away from their current locations. The Corps of Engineers occupies a federally owned building. The remaining two agencies occupy 2,963 square feet of leased space.

Table 2

Federal Employees and Office Space

Program	Number of Employees	Square Feet	Monthly Costs
Corps of Engineers	2-7	3,500	Federal Govt. owns building
Togiak National Wildlife Refuge	5	975	$1,852
Post Office	6	4,850	NA
Public Health	NA	Stationed at Hospital	
Federal Aviation Administration	4	Stationed at Airfield	
TOTAL	17-22	9,325	$1,852

I hope this information if useful. If you need additional information, please do not hesitate to contact our agency.

EL

LETTER OF INTENT

House Bill 392

It is the intent of the Legislature that the requirement of specific legislative approval of lease-financing agreements apply to only those projects or office facilities for which the state has not previously entered into a lease-financing agreement. Projects for which the state has entered into lease-financing agreements are not affected by this legislation.

Further, it is the intent of the Legislature that the Department of Administration examine the opportunities for centralizing of government office space in Alaska communities which express an interest in consolidating office space. The Department should work closely with these communities to define options for office space consolidation. A report on the possibilities of office space centralization, including an evaluation of costs, should be submitted to the Legislature by January 15th, 1986.

The purpose of this analysis is to identify opportunities for cost savings to the state through more efficient use of office space. A related benefit would be to make government offices more accessible to constituents by centralizing many different offices which may be scattered throughout a community. Where appropriate, consideration should be given to inclusion of federal and/or local government office space in central facility.

Dan Clocherine

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

April 19, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that relates to financing for the acquisition and development of public facilities.

During my recent address to the joint session of the legislature, I stated that the Anchorage Office Complex would not proceed unless the project is approved by the legislature. As you know, the money for developing the Anchorage Office Complex is intended to be provided through the sale of certificates of participation in rental payments, i.e., lease-financing agreements. My commitment to seek legislative approval was offered in recognition of the substantial legislative interest in a project as substantial and as costly as the proposed Anchorage Office Complex.

It is important for the Legislature to understand the long-term implications of this legislation. I believe it is good public policy to find creative ways to finance buildings when such financing saves us money in the future. We have an obligation to our citizens to take advantage of these savings whenever we can.

The desirability of legislative review of the Anchorage Office Complex raises the more general question of how to assure adequate legislative involvement when the state seeks to enter into lease-financing agreements. As we enter an era of declining state revenues, I believe that it is all the more critical to explore all available opportunities to provide needed public facilities in the most cost-efficient method. In some instances, lease-financing transactions offer an extremely attractive vehicle to finance the development of public buildings. While I believe that the authority to enter into long-term leases under AS 37.05.280

cognizant of the need to assure that the legislature is accorded an opportunity to review these projects before their actual development. Section 1 of this bill amends AS 37.05.280 to provide that legislative approval must be obtained before the Department of Administration may enter into a lease-financing agreement.

I must observe that the proposed amendment to AS 37.05.280 poses difficult separation-of-powers considerations. Traditionally, a requirement of specific project approval is not a proper exercise of legislative powers. Yet where lease-financing arrangements are at issue, the practical fact is that the decision to enter into such an agreement may, as a practical matter, place a far-reaching economic burden on the state. In these circumstances, I recognize that providing legislative review only through the annual appropriation process is somewhat limited. In short, because I believe lease-financing transactions do have a substantial impact on the state's fiscal affairs over a period of fiscal years, I welcome the legislature's participation in the process of project review.

I believe that this bill offers the legislature a strong role in review and approval of proposed lease-financings. I urge your prompt review and passage of this legislation.

Sincerely,

Bill Sheffield

ANALYSIS: (Attach a separate page if necessary)

This bill provides for prior project notification to the legislature if the department intends to use lease-purchase agreements. At that time, the agency must provide details as to anticipated annual lease costs, total project or acquisition costs. A separate law must be passed to approve the project. At that time a separate fiscal note would indicate the full fiscal impact for that particular project.

Department of Commerce & Economic Development / POSITION PAPER

SB 392: "An Act relating to periodic payments for future damages in certain civil actions; amending Alaska Rules of Civil Procedure 49 and 58; and providing for an effective date."

This bill is focused on a tort reform concerning periodic payments for future damages in certain civil actions. The position of the department on these issues is neutral.

This bill has an impact on the Division of Insurance. The division would be required to adopt regulations under this legislation to determine which insurers, self insurers, plans, or arrangements are financially qualified to provide security under the section dealing with security for payment of annuity and to designate those entities as qualified insurers. This requires a fiscal impact and places the division in the position of making regulatory judgments concerning entities that it does not regulate. The entire expense can be avoided as well as the conflict by using a slightly different approach to Sec. 09.30.480, which changes the fiscal impact to $0.

On Page 6, replace lines 13 - 18 with the following:

Sec. 09.30.480. ELIGIBLE SECURITIES FOR PAYMENT OF ANNUITY. A governmental entity with taxing authority, or an insurer authorized under AS 21.09 by the Director of Insuance to sell annuities, is qualified to provide the security required under AS 09.30.430.

Department of Commerce & Economic Development / POSITION PAPER

CSHB 430 (HESS) "An Act regulating audiologists, hearing aid dealers and the dispensing of hearing aids.

The Department of Commerce and Economic Development, Division of Occupational Licensing, supports the regulation of audiologists, hearing aid dealers, and the dispensing of hearing aids.

Although the division is aware of only 12 audiologists and approximately 10 legitimate hearing aid dealers, complaints filed with Consumer Protection in the Department of Law, the Communicable Disease Control Section of the Department of Health & Social Services and the Office of the Ombudsman document that Alaskan consumers have been financially harmed by many fly-by-night individuals.

The elderly population is the most vulnerable to abuse by fly-by-night individuals. Therefore, in the interest of public protection, the department feels that regulation of audiologists and hearing aid dealers may be one instance where the need for licensure outweighs the small number of practitioners.

Nancy Dunn, Director 465-2534
Division of Occupational Licensing

Date: 5/1/86

Lorer H. Lounsbury, Commissioner
Department of Commerce and
Economic Development

Date: 5/1/86

POSITION PAPER

CSHB 430 (Fin) Sectional Analysis

Section 1) Legislative Findings and Purpose Section

Section 2) Adds audiologists and hearing aid dealers to the centralized licensing chapter.

Section 3) Adds audiologists and hearing aid dealers to those provided with services by the department, without requiring a board or commission.

Section 4) Adds audiologists and hearing aid dealers to the list of those subject to regulation, investigation, and enforcement procedures required by the department.

Section 5) Redefines license and occuptaion to include trades or professions listed in the amended centralized licensing chapter that are not covered by a board or commission.

Section 6) Adds audiologists to the professional designation requirements.

Section 7) Adds the following sections to the chapter:

08.11.010: provides for qualifications for the licensing of professional audiologists

08.11.020: addresses temporary license to practice audiology

08.11.030: provides for duration and renewal of licenses

08.11.040: provides for display of current license

08.11.050: empowers the department to set fees for licensing;

08.11.070: allows audiologists to fit and sell hearing aids. Requires audiologists to comply with applicable provisions of consumer protection language of the bill.

08.11.080: defines grounds for disciplinary actions against audiologists;

08.11.090: lists disciplinary sanctions

08.11.100: lists prohibited acts

08.11.120: provides for exemptions under this chapter; prevents those individuals who may be exempt, but who are not audiologists, from representing themselves as audiologists;

08.11.200: Definition section

Section 8) Adds a new chapter to AS 08 concnerning hearing aid dealers

08.55.010: licens[illegible]ualifications

08.55.020: duration and renewal of license;

08.55.030: requires bonding of hearing aid dealers

08.55.040: empowers the department to set fees;

08.55.050: requires a hearing aid dealer, when entering into a contract with a consumer for the purchase or lease of a hearing aid, to provide the consumer with an instruction brochure; the dealers registration number, specifications, make model, and serial number of the hearing aid; a clear statement of the contract; written information on complaint rights; and the address of the department.

Also requires that any used or reconditioned hearing aid be clearly labeled as such, and specify what guarantee may be offered;

08.55.060: Requires a medical evaluation prior to the sale or lease of a hearing aid; allows the consumer, if 18 or older, to waive the medical evaluation by signing a statement; provides language for the evaluation waiver statement form; requires the hearing aid dealer to retain statement or medical evaluation for 4 years after the sale of a hearing aid.

08.55.070: provides for method of mailing hearing aids to consumer.

08.55.080: Allows consumer to file a complaint within 3 years of purchase date.

08.55.100: requires hearing aid dealers to keep audiometers calibrated to national standards.

08.55.110: outlines cancellation requirements for purchase or lease of hearing aids;

08.55.120: restricts type of hearing testing allowed by hearing aid dealers; requires all dealers to specify, in their advertising, what type of hearing testing they are allowed to perform.

08.55.130: grounds for disciplinary sanctions

08.55.140: lists disciplinary sanctions department may impose.

08.55.150: lists prohibited acts;

08.55.160: makes violations of prohibited acts a class B misdemeanor;

08.55.170: requires a hearing aid dealer to provide the department with an address of their regular place of business.

08.55.180: Admin Procedures act applies to this chapter;

08.55.200: definitions section

IN THE HOUSE

SENATE CS FOR CS FOR HOUSE BILL NO. 430 ( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act regulating audiologists, hearing aid dealers and the dispensing of hearing aids."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE FINDINGS, PURPOSE. (a) The legislature finds that the practice of audiology and the dispensing of hearing aids affects the health, safety and welfare of the public and requires regulation and control by the state in the public interest.

(b) The purpose of this Act is to establish the procedures necessary to ensure that the public is protected from the incompetent, unprofessional, improper, and unauthorized practice of audiology and dispensing of hearing aids, and to assure the availability of the highest possible quality audiology and hearing aid services for the hearing impaired persons of the state.

* Sec. 2. AS 08.01.010 is amended by adding new paragraphs to read:

(24) regulation of audiologists under AS 08.11;

(25) regulation of hearing aid dealers under AS 08.55.

* Sec. 3. AS 08.01.050(a) is amended to read:

(a) The department shall provide the following administrative and budgetary services when appropriate:

(1) collect fees and issue receipts;

(2) maintain records and files;

(3) issue and receive application forms;

(4) notify applicants of acceptance or rejection of applicants as determined by the board or as determined by the department

under AS 08.11 for audiologists or under AS 08.55 for hearing aid dealers;

(5) designate dates examinations are to be held and notify applicants;

(6) publish notice of examination;

(7) arrange space for holding examinations;

(8) notify applicants of results of examinations;

(9) issue licenses and certificates or temporary licenses or certificates as authorized by the board or as authorized by the department under AS 08.11 for audiologists or under AS 08.55 for hearing aid dealers;

(10) issue duplicate licenses or certificates upon proof by the licensee of loss of the original and payment by the licensee of a fee of $2 except as otherwise provided in this title;

(11) notify licensees of renewal dates at least 30 days before the expiration date of their licenses;

(12) compile and maintain current a register of licenses;

(13) answer routine inquiries;

(14) maintain files relating to individual licensees;

(15) arrange for printing and advertising;

(16) purchase supplies;

(17) employ secretarial help when needed;

(18) perform other services that [WHICH] may be requested by the board;

(19) provide investigative services to the boards established under AS 08.04, AS 08.20, AS 08.36, AS 08.64, AS 08.68, AS 08.70, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline and in responding to consumer complaints.

* Sec. 4. AS 08.01.087 is amended to read:

Sec. 08.01.087. POWERS AND DUTIES OF DEPARTMENT. (a) The department may, upon its own motion, conduct investigations to determine whether a [ANY] person has violated a provision of this chapter or a regulation adopted under it, or a provision of [A CHAPTER IN] this title or regulation adopted under this title dealing with an occupation or board [ONE OF THE BOARDS] listed in AS 08.01.010 [OR A REGULATION ADOPTED BY ONE OF THOSE BOARDS], or to secure information useful in the administration of this chapter.

(b) If it appears to the commissioner that a person has engaged in or is about to engage in an act or practice in violation of a provision of this chapter or a regulation adopted under it, or a provision of this title or regulation adopted under this title dealing with an occupation or board [OR ANY OF THE LAWS PERTAINING TO OR REGULATIONS ADOPTED BY THE BOARDS] listed in AS 08.01.010, the commissioner may, if the commissioner considers it in the public interest, and after notification of a proposed order or action by telephone or telegraph to all board members, if a board regulates the act or practice involved, [BY TELEPHONE OR TELEGRAPH OF A PROPOSED ORDER OR ACTION] unless a majority of the members of the board object within 10 days,

(1) issue an order directing the person to stop the act or practice; however, reasonable notice of and an opportunity for a hearing must first be given to the person, except that the commissioner may issue a temporary order before a hearing is held; a temporary order remains in effect until a final order affirming, modifying, or reversing the temporary order is issued or until 15 days after the person receives the notice and has not requested a hearing by that time; a temporary order becomes final if the person to whom the notice

is addressed does not request a hearing within 15 days after receiving the notice; the commissioner or the commissioner's designee shall be the hearing officer at the hearing and shall issue a final order within 10 days after the hearing;

(2) bring an action in the superior court to enjoin the acts or practices and to enforce compliance with this chapter, a regulation adopted under it, [OR] an order issued under it, or with a provision of this title or regulation adopted under this title dealing with an occupation or board [OR ANY OF THE LAWS PERTAINING TO OR REGULATIONS ADOPTED BY THE BOARDS] listed in AS 08.01.010;

(3) examine or have examined the books and records of a [ANY] person whose business activities require licensure by a board listed in AS 08.01.010, or whose occupation is listed in AS 08.01.010; the commissioner [AND HE] may require the [THAT] person to pay the reasonable costs of the examination; and

(4) issue subpoenas for the attendance of witnesses, and the production of books, records and other documents.

* Sec. 5. AS 08.01.110 is amended to read:

Sec. 08.01.110. DEFINITIONS. In this chapter

(1) "board" includes the boards and commissions listed in AS 08.01.010;

(2) "department" means the Department of Commerce and Economic Development;

(3) "commissioner" means the commissioner of commerce and economic development;

(4) "license" means a [ANY] license, certificate, permit, or registration or similar evidence of authority issued for an occupation or by one of the boards listed in AS 08.01.010;

(5) "licensee" means a [ANY] person who holds a license;

(6) "occupation" means a trade or profession [ANY OF THE TRADES OR PROFESSIONS FOR WHICH LICENSURE IS REQUIRED BY ONE OF THE BOARDS] listed in AS 08.01.010.

* Sec. 6. AS 08.02.010(a) is amended to read:

(a) An audiologist licensed under AS 08.11, a [A] person licensed in the state as a chiropractor under AS 08.20, a dentist under AS 08.36, a medical practitioner or osteopath under AS 08.64, a registered nurse under AS 08.68, an optometrist under AS 08.72, a registered pharmacist under AS 08.80, a registered physical therapist under AS 08.84, or a psychologist under AS 08.86, shall use as professional identification appropriate letters or a title after that person's name which represents that person's specific field of practice. The letters or title shall appear on all signs, stationery or other advertising in which the person offers or displays personal professional services to the public. In addition, a person engaged in the practice of medicine or osteopathy under AS 08.64.380(2), or a person engaged in any manner in the healing arts who diagnoses, treats, tests, or counsels other persons in relation to human health or disease and uses the letters "M.D." or the title "doctor" or "physician" or another [ANY OTHER] title that [WHICH] tends to show that the person is willing or qualified to diagnose, treat, test, or counsel another person, shall clarify the letters or title by adding the appropriate specialist designation, if any, such as "dermatologist", "radiologist", "audiologist", "naturopath", or the like.

* Sec. 7. AS 08 is amended by adding a new chapter to read:

CHAPTER 11. AUDIOLOGISTS.

Sec. 08.11.010. QUALIFICATIONS FOR AUDIOLOGIST LICENSE. The department shall issue a license to practice audiology to an individual who

(1) is 18 years of age or older;

(2) applies on a form provided by the department;

(3) pays the fee required under AS 08.11.050;

(4) furnishes evidence satisfactory to the department that the person

(A) has not engaged in conduct that is a ground for imposing disciplinary sanctions under AS 08.11.080;

(B) holds a master's degree or doctorate in audiology from an accredited educational institution approved by the department; and either has

(i) a Certificate of Clinical Competence in Audiology from the American Speech-Language-Hearing Association or the equivalent of the certificate; or

(ii) practiced audiology for two years as of January 1, 1986, or is in the process of completing the year of supervised clinical experience required for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association.

Sec. 08.11.020. TEMPORARY LICENSE TO PRACTICE AUDIOLOGY AS AN AUDIOLOGIST. (a) On receipt of the completed application the department shall issue a temporary license for the practice of audiology as an audiologist to an individual who is licensed to practice audiology in another state and has submitted to the department an application for a license under AS 08.11.010.

(b) The department may issue a temporary license to the following:

(1) a nonresident for the practice of audiology as an audiologist in the state for 30 days or less in a calendar year, if the individual is licensed to practice audiology in another state,

territory of the United States, foreign country, or province that has requirements for a license to practice audiology that are substantially equivalent to or higher than the requirements of AS 08.11.010;

(2) a nonresident for the practice of audiology as an audiologist in the state for 30 days or less in a calendar year, if the individual meets the qualifications and requirements for a license under AS 08.11.010, and resides in a state or territory of the United States or a foreign country or province that does not license individuals to practice audiology.

(c) The department may impose by regulation additional limitations that it determines appropriate on a temporary license issued under this section.

Sec. 08.11.030. DURATION AND RENEWAL OF LICENSE. (a) A license issued under this chapter is subject to renewal every four years on a date set by the department. The department shall renew the license of an individual licensed under this chapter who applies for renewal and pays the renewal fee.

(b) If an individual fails to renew a license under (a) of this section, the license lapses.

(c) The department may reinstate a lapsed license if the license has lapsed for less than two years and if the individual submits to the department an application for renewal and pays a delinquency fee in addition to the renewal fee.

(d) A suspended license is subject to expiration and must be renewed as provided in this section, but the renewal does not entitle the individual while the license remains suspended to practice audiology or to engage in other activity or conduct that violates the order or judgment that suspended the license.

Sec. 08.11.040. DISPLAY OF LICENSE. (a) An individual licensed

to practice audiology as an audiologist in the state shall display the license in a prominent place at each place of business of the individual.

(b) If an audiologist has more than one place of business, the department shall, on request and payment of a fee, issue a duplicate license for each place of business of the individual.

Sec. 08.11.050. FEES. The department shall set fees under AS 08.01.065 for each of the following:

(1) application;

(2) credential review;

(3) audiologist license;

(4) temporary license;

(5) renewal of license;

(6) delinquency;

(7) reinstatement;

(8) duplicate license.

Sec. 08.11.070. DEALING IN HEARING AIDS. An audiologist may deal in hearing aids as a hearing aid dealer without being licensed as a hearing aid dealer under AS 08.55, but shall comply with AS 08.55.-050, 08.55.070, 08.55.100, 08.55.110(a), 08.55.110(b)(3) and (c) - (h), and 08.55.130(7) - (13) when dealing in hearing aids.

Sec. 08.11.080. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS ON AN AUDIOLOGIST. After a hearing, the department may impose a disciplinary sanction on an audiologist when the department finds that the licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of practicing audiology;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime that affects the person's ability to continue to practice competently and safely;

(5) continued to practice audiology after becoming unfit due to

(A) professional incompetence;

(B) use of drugs or alcohol in a manner that affects the person's ability to practice audiology competently and safely;

(C) physical or mental disability;

(6) permitted another person to use the licensee's license;

(7) employed a person who does not have a valid current license to practice audiology to perform work covered by this chapter;

(8) failed to comply with a provision of this chapter or a regulation adopted under this chapter, or an order of the department.

Sec. 08.11.090. DISCIPLINARY SANCTIONS. (a) When it finds that an audiologist has committed an act listed in AS 08.11.080, the department may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require the licensee to

(A) report regularly to the department on matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the department to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The department may withdraw a limitation, condition, or probationary status if it finds that the deficiency that required the sanction has been remedied.

(c) The department may summarily suspend a license before final hearing or during the appeals process if the department finds that the licensee poses a clear and immediate danger to the public welfare and safety if the licensee continues to practice. An individual whose license is suspended under this subsection is entitled to a hearing by the department no later than seven days after the effective date of the order. The individual may appeal the suspension after the hearing to the superior court.

(d) The department may reinstate a license that has been suspended or revoked if the department finds after a hearing that the individual is able to practice with reasonable skill and safety.

(e) One year after revocation of a license issued under this chapter, the individual whose license was revoked may reapply for the license. The department may require an examination for reinstatement.

Sec. 08.11.100. PROHIBITED ACTS. Unless a person is licensed under this chapter, the person may not

(1) practice audiology;

(2) use a title indicating or representing that the person practices as an audiologist;

(3) advertise that the person practices audiology.

Sec. 08.11.110. PENALTY. A person who violates AS 08.11.100 is

guilty of a class B misdemeanor.

Sec. 08.11.120. EXEMPTIONS. (a) This chapter does not apply to an individual who practices audiology consistent with the accepted standards and code of ethics of the individual's profession as part of the individual's duties as

(1) a physician licensed under AS 08.64;

(2) an employee of the federal government who is required to practice audiology during the employment, if

(A) the employer maintains appropriate supervision of the individual's practice of audiology;

(B) the individual practices audiology as part of the duties for which the individual is employed;

(C) the individual practices audiology in the facility where the individual is employed or under the supervision of the federal governmental unit where the individual is employed; and

(D) the individual does not render or offer to render audiology services to the public for compensation in addition to the salary the individual receives from the federal governmental unit;

(3) a student, intern, or resident pursuing a course of study in audiology at an accredited college or a clinical training facility approved by the department, if the activities of the student, intern, or resident constitute part of a supervised course of study and the student, intern, or resident is designated as an "audiology intern," "audiology trainee," or other title approved by the department that clearly indicates that the person is training to be an audiologist.

(b) Notwithstanding the provisions of this chapter,

(1) a nurse licensed under AS 08.68 may perform hearing

sensitivity evaluations;

(2) an individual licensed as a hearing aid dealer under AS 08.55 may deal in hearing aids;

(3) an individual holding a class A certificate issued by the Conference of Executives of American Schools of the Deaf may teach the hearing impaired;

(4) an individual may engage in the testing of hearing as part of a hearing conservation program that complies with the regulations of the Occupational Safety and Health Administration of the federal government if the individual is certified to do the testing by a state or federal agency acceptable to the Occupational Safety and Health Administration.

(c) An individual who is not an audiologist, but who is exempt under this section may not use a title or description stating or implying that the person is an audiologist.

(d) An individual exempt under (a)(2) of this section may consult with and disseminate research findings and scientific information to accredited academic institutions or governmental agencies, and offer lectures to the public for a fee, monetary or otherwise, without being licensed under this chapter.

(f) An individual who is not licensed under this chapter but who teaches the practice of audiology in an audiology training program at a college or university may use the title "audiologist" but may not practice audiology.

Sec. 08.11.130. PROCEDURES. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under this chapter.

Sec. 08.11.200. DEFINITIONS. In this chapter, unless the context indicates otherwise,

(1) "audiologist" means an individual who is licensed under

AS 08.11.010 to practice audiology in the state;

(2) "dealing in hearing aids" has the meaning given in AS 08.55.200;

(3) "department" means the Department of Commerce and Economic Development;

(4) "hearing aid" has the meaning given in AS 08.55.200;

(5) "practice of audiology" means the application of principles, methods, and procedures of measurement, testing, appraisal, prediction, consultation, habilitation, rehabilitation, counseling and instruction related to hearing and hearing impairment for the purpose of modifying communicative disorders involving speech, language, auditory function, including auditory training, speech reading and the recommendation, evaluation, fitting, and sale of hearing aids, including the fitting of ear molds.

* Sec. 8. AS 08 is amended by adding a new chapter to read:

CHAPTER 55. HEARING AID DEALERS.

Sec. 08.55.010. QUALIFICATIONS FOR LICENSE. (a) The department shall issue a license to act as a hearing aid dealer to an individual who

(1) is 18 years of age or older;

(2) applies on a form provided by the department;

(3) has a high school diploma or the equivalent;

(4) has a business license issued under AS 43.70.020;

(5) furnishes evidence satisfactory to the department that the individual has not engaged in conduct that is a ground for imposing disciplinary sanctions under AS 08.55.130;

(6) submits with the application a statement disclosing whether the applicant

(A) has, during the five-year period immediately

preceding the date of the application been convicted of a felony, or had a final judgment entered against the applicant in a civil action, if the felony or civil action involved fraud, embezzlement, or misappropriation of property;

(B) is subject to an injunctive order that is currently in effect from a pending proceeding or action brought by a public agency;

(C) is a defendant in a pending criminal or civil action relating to fraud, embezzlement, misappropriation of property, or the antitrust or trade regulation laws of the United States or a state;

(D) has, during the five-year period immediately preceding the date of the application, been reorganized, had a debt adjustment, or has been adjudicated a bankrupt under bankruptcy proceedings due to insolvency or was a principal executive officer or general partner of a business that has been reorganized, had a debt adjustment, or has been adjudicated a bankrupt due to insolvency during the five-year period;

(7) furnishes a description of each item in (6) of this subsection that the applicant disclosed as being applicable to the applicant.

(b) An individual who is a physician or an audiologist may deal in hearing aids without being licensed under this chapter, but shall comply with AS 08.55.050, 08.55.070, 08.55.100, 08.55.110(a), 08.55.-110(b)(3) and (c) - (h), and 08.55.130(7) - (13) when dealing in hearing aids.

(c) If an individual licensed under this chapter has more than one place of business, the department shall, on request and payment of a fee, issue a duplicate license for each place of business of the

individual.

Sec. 08.55.020. DURATION AND RENEWAL OF LICENSE. (a) A license to act as a hearing aid dealer is valid for one year and is subject to renewal.

(b) On or before the expiration of one year after the issuance of a license under this chapter, a licensee may apply for renewal of the license, and the department shall renew the license if the licensee pays the renewal fee, has a current business license to act as a hearing aid dealer under AS 43.70.020, and provides evidence satisfactory to the department that the individual has not engaged in conduct that is a ground for imposing disciplinary sanctions under AS 08.55.130.

(c) If a licensee fails to renew a license under (b) of this section, the license lapses.

(d) The department may reinstate a lapsed license under (b) of this section if the license has not lapsed for more than two years and if the person pays a delinquency fee in addition to the renewal fee.

Sec. 08.55.030. BOND REQUIRED. (a) An applicant for a license under AS 08.55.010 shall at the time of applying for the license file with the department a surety bond in the amount of $5,000 running to the state and conditioned on the applicant's promise to pay all

(1) taxes and contributions due the state and political subdivisions of the state;

(2) amounts that may be adjudged against the applicant by reason of negligently or improperly dealing in hearing aids or breaching a contract when dealing in hearing aids.

(b) In lieu of the surety bond the applicant may file with the department a cash deposit or other negotiable security acceptable to the department in the amount specified for the bond.

(c) The bond required by this section remains in effect until cancelled by action of the surety, the principal, or the department. A person may not commence an action on the bond later than three years after cancellation of the bond.

Sec. 08.55.040. FEES. The department shall set fees under AS 08.01.065 for each of the following:

(1) application;

(2) hearing aid dealer license;

(3) renewal of license;

(4) renewal delinquency;

(5) duplicate license.

Sec. 08.55.050. ITEMS TO BE PROVIDED BY HEARING AID DEALER. (a) A hearing aid dealer shall give the following items to a consumer at the time the consumer contracts with the hearing aid dealer to buy or lease a hearing aid:

(1) an instructional brochure that contains operating instructions, purchase privileges, and performance data for the hearing aid;

(2) a statement of the dealer's registration number;

(3) a statement of the manufacturer's specifications, make, model, and serial number for the hearing aid;

(4) a clear statement of the full terms of the contract; and

(5) a written statement indicating that the consumer may file a written complaint about a hearing aid or a hearing aid dealer with the department and giving the mailing address and location address of the department.

(b) Before the sale of a used hearing aid, the hearing aid dealer shall clearly mark the receipt and the container for the

hearing aid as "used" or "reconditioned," whichever is applicable, and with the terms of a guarantee that the dealer provides.

Sec. 08.55.060. PRIOR MEDICAL EVALUATION. (a) A hearing aid dealer who is not a physician may not sell or lease a hearing aid unless the prospective user of the hearing aid presents to the hearing aid dealer a written statement signed by a physician stating that the physician has evaluated the prospective user's hearing and that the prospective user is a candidate for a hearing aid.

(b) The exam on which the physician bases the statement required in (a) of this section must have occurred within the six months immediately preceding the date when the prospective user presents the statement to the hearing aid dispenser.

(c) If the prospective user is 18 years of age or older, the hearing aid dealer may afford the prospective user an opportunity to waive in writing the evaluation required by (a) of this section if the hearing aid dealer

(1) informs the prospective user that the exercise of the waiver is not in the best interest of the prospective user's health;

(2) does not actively encourage the prospective user to waive the evaluation; and

(3) affords the prospective user the opportunity to sign the following statement:

> I have been advised by (HEARING AID DEALER'S NAME) that it would be in my best interest if I had a medical evaluation by a licensed physician (preferably a physician who specializes in diseases of the ear) before purchasing or leasing a hearing aid.
>
> _____
>
> (PROSPECTIVE USER'S SIGNATURE)

(d) The hearing aid dealer shall retain the evaluation statement of the physician, or the prospective user's signed waiver statement for four years after the date of the sale of the hearing aid.

Sec. 08.55.070. TRANSMITTAL OF HEARING AID BY MAIL. If a hearing aid dealer mails a hearing aid to a customer, the dealer shall send the hearing aid by certified mail.

Sec. 08.55.080. COMPLAINTS. (a) A person may file a complaint with the department about a hearing aid or a hearing aid dealer within three years from the date of the cause of the complaint.

(b) A hearing aid dealer shall prominently display in the business establishment of the dealer a sign indicating that a person may file a complaint with the department about a hearing aid or a hearing aid dealer and giving the mailing and location address of the department.

Sec. 08.55.100. CALIBRATION REQUIREMENTS. A hearing aid dealer shall maintain in conformity with the standards set by the American National Standard Institute the calibration of each audiometer used by the hearing aid dispenser, and shall keep a record of the results of the annual calibration of each audiometer used by the dealer.

Sec. 08.55.110. CANCELLATION OPTION. (a) In addition to the cancellation allowed under AS 45.02.350, a person who has purchased or leased a hearing aid from a hearing aid dealer may cancel the sale or lease as provided under (b) of this section or by giving written notice of the intention to cancel the sale or lease to the dealer not later than 30 days following the later of (1) the date the person receives the hearing aid, or (2) the date the hearing aid dealer provides the person with the notice under (c) of this section. The person may use the notice received under (c) of this section to cancel the sale or lease by signing the form where indicated.

(b) In addition to the other rights and remedies the purchaser or lessee of a hearing aid may have, the purchaser or lessee of a hearing aid has the right to cancel the sale or lease by giving written notice of the cancellation to the hearing aid dealer if

(1) the hearing aid dealer is not a physician or an audiologist, and within 60 days from the receipt by the purchaser or lessee of the hearing aid or the notice to be provided under (c) of this section, whichever receipt is later, a physician or an audiologist advises the person in writing to cancel the sale or lease and specifies in writing the medical or audiological reason for the advice; or

(2) the hearing aid dealer, if not a physician or audiologist, has violated a provision of this chapter in the sale or lease of the hearing aid to the person;

(3) the hearing aid dealer who is a physician or audiologist has violated (a) or (c) - (h) of this section or AS 08.55.050, 08.55.070, 08.55.100, or 08.55.130(7) - (13) in the sale or lease of the hearing aid to the person.

(c) A hearing aid dealer shall give a person who has purchased or leased a hearing aid from the dealer notice of the right to cancel the purchase or lease that is substantially identical to the following form with all of the information filled in except the signature and date lines for the purchaser or lessee:

NOTICE OF RIGHT TO CANCEL

_____

Name of Hearing Aid Dealer

_____

Address of Hearing Aid Dealer

_____

Date of Sale or Lease

You may cancel this transaction within 30 days from the date you receive the hearing aid or this notice, whichever is later.

You may also cancel this transaction within 60 days from the date you receive the hearing aid or this notice, whichever is later, if the hearing aid dealer is not a licensed physician or a licensed audiologist and if a licensed physician or a licensed audiologist advises you in writing to cancel this transaction.

If you cancel this transaction, the property you traded in, the payments you made under the sale or lease (less certain costs allowed by state law) and any negotiable instrument executed by you will be returned within 20 days following receipt by the hearing aid dealer of your cancellation notice, and the hearing aid dealer will cancel any security interest arising out of the sale or lease.

If you cancel, you must make available to the hearing aid dealer, in as good a condition as when received, less normal wear and tear, the goods delivered to you under this sale or lease, unless the dealer notifies you to keep the goods or to hold them until the dealer collects them.

If the goods have been damaged, the hearing aid dealer may deduct from any refund due you the reasonable costs incurred in repairing the goods to make them suitable for resale. If the goods have been damaged beyond repair, you are liable for the full purchase

price, even if you are just leasing the goods.

If you make the goods available for the hearing aid dealer to collect after your cancellation, and within 20 days of receiving your cancellation the hearing aid dealer does not collect them from you or provide you with instructions for returning the goods by mail, you may retain or dispose of the goods without further obligation to the hearing aid dealer. If you fail to make the goods available for the hearing aid dealer to collect after your cancellation, then the sale or lease is not cancelled and you remain liable for performance of the obligations of the sale or lease.

To cancel this transaction, mail (by certified mail, return receipt requested) or deliver a signed and dated copy of this notice or another written notice to (name of hearing aid dealer), at (address of hearing aid dealer's place of business) and (hearing aid dealer's telephone number) no later than midnight of (Date).

I hereby cancel this transaction.

(Date) _____

_____

(Purchaser's or Lessee's signature)

I have read and understand the terms of cancellation of this purchase/lease.

_____

Purchaser's or Lessee's signature

_____

Date

(d) If a purchaser or lessee of a hearing aid cancels the purchase or lease under (a) or (b) of this section, the hearing aid dealer shall within 20 days of receipt of a notice of the cancellation

(1) refund to the purchaser or lessee all deposits, including the downpayment, less (A) 10 percent of the total purchase price for each 30 days that the purchaser or lessee had the hearing aid, to pay for the reasonable rental value of the hearing aid; (B) the reasonable price of ear molds or custom casings prepared for the purchaser or lessee; and (C) the reasonable costs actually incurred by the hearing aid dealer to make goods that were traded in by the purchaser or lessee ready for sale; the hearing aid dealer may retain the money allowed under this paragraph only up to the amount of a downpayment made by the purchaser or lessee;

(2) return to the purchaser or lessee all goods traded in to the hearing aid dealer as part of the sale or lease;

(3) return to the purchaser or lessee a negotiable instrument signed by the purchaser or lessee; and

(4) cancel a security interest taken by the hearing aid dealer for the purchase or lease.

(e) If the hearing aid returned by the purchaser or lessee has been damaged, the hearing aid dealer may deduct from any refund due the purchaser or lessee the reasonable costs incurred in repairs necessary to make the hearing aid suitable for resale. If the hearing aid is damaged beyond repair, the purchaser or lessee is liable for the full purchase price.

(f) The purchaser or lessee may retain or dispose of the hearing aid if within 20 days of receipt of the notice of cancellation, the hearing aid dealer fails

(1) to collect the hearing aid from the purchaser or lessee; or

(2) to provide the purchaser or lessee with instructions for returning the hearing aid by mail.

(g) If a purchaser or lessee of a hearing aid fails to make the hearing aid available for the hearing aid dealer to collect, the purchaser or lessee remains liable for the purchase or lease.

(h) To give written notice under this section, a person shall deliver the notice to the hearing aid dealer in person or to the place of business of the dealer, or mail the notice to the place of business of the dealer by certified mail, return receipt requested.

Sec. 08.55.120. TESTING OF HEARING. (a) A hearing aid dealer may take threshold measurements to determine the need for a hearing aid, but may not perform diagnostic procedures to determine the cause of a hearing impairment or charge a fee for a hearing measurement.

(b) A hearing aid dealer shall include in every printed advertisement for the services of the dealer the following statement bordered in black:

Alaska law permits a hearing aid dealer who is not a licensed physician or a licensed audiologist to test hearing only for the purpose of selling or leasing hearing aids; the tests given by a hearing aid dealer are not to be used to diagnose the cause of a hearing impairment.

Sec. 08.55.130. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. After a hearing, the department may impose a disciplinary sanction on an individual licensed under this chapter when the department finds that the person

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime that affects the individual's ability to continue to practice competently and safely;

(5) failed to comply with a provision of this chapter or a regulation adopted under this chapter, or an order of the department;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) addiction to or severe dependency on alcohol or another drug that impairs the individual's ability to practice safely;

(C) physical or mental disability;

(7) employed a person who did not have a valid current license to deal in hearing aids to perform work covered by this chapter;

(8) failed or refused to honor a representation, promise, agreement or warranty made by the person while dealing in hearing aids;

(9) advertised a model, type, or kind of hearing aid for sale that the person does not sell;

(10) failed to maintain a business address and telephone number at which the individual could normally be reached during regular business hours;

(11) included in a contract or receipt for the purchase or lease of a hearing aid a confession of judgment or a waiver of a right

of the consumer under this chapter;

(12) used undue influence, coercion, or other wilful act or representation to interfere with the exercise by the consumer of the rights provided in this chapter;

(13) negotiated, transferred, sold, or assigned a note or other evidence of indebtedness to a finance company or other third party within two months of delivering a hearing aid to a purchaser or lessee of the hearing aid by mail or in person;

(14) permitted another person to use the licensee's license;

(15) dealt in hearing aids while suffering from a serious disease that was contagious or infectious.

Sec. 08.55.140. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee has committed an act listed in AS 08.55.130, the department may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require the licensee to

(A) report regularly to the department on matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the department to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The department may withdraw a limitation, condition, or

probationary status if it finds that the deficiency that required the sanction has been remedied.

(c) The department may summarily suspend a license before final hearing or during the appeals process if the department finds that the licensee poses a clear and immediate danger to the public welfare and safety if the licensee continues to practice. A person whose license is suspended under this subsection is entitled to a hearing by the department no later than seven days after the effective date of the order. The person may appeal the suspension after the hearing to the superior court.

(d) The department may reinstate a license that has been suspended or revoked if the department finds after a hearing that the applicant is able to deal in hearing aids with reasonable skill and safety.

Sec. 08.55.150. PROHIBITED ACTS. (a) Unless a person is licensed under this chapter or AS 08.11, the person may not

(1) deal in hearing aids;

(2) use a title indicating or representing that the person deals in hearing aids or is licensed to deal in hearing aids;

(3) advertise that the person deals in hearing aids.

(b) A person may not

(1) sell, barter, or offer to sell or barter a license issued under this chapter;

(2) purchase or obtain by barter a license issued under this chapter with the intent to use it as evidence of the holder's qualification to deal in hearing aids;

(3) materially alter a license issued under this chapter with fraudulent intent;

(4) use or attempt to use as valid a license to deal in

hearing aids that has been purchased, fraudulently obtained, counterfeited, or materially altered.

Sec. 08.55.160. PENALTY. A person who violates AS 08.55.150 is guilty of a class B misdemeanor.

Sec. 08.55.170. NOTICE OF PLACE OF BUSINESS. A person who holds a license under this chapter shall notify the department in writing of the regular address of the place or places where the person deals or intends to deal in hearing aids.

Sec. 08.55.180. PROCEDURES. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under this chapter.

Sec. 08.55.200. DEFINITIONS. In this chapter

(1) "audiologist" means an individual licensed as an audiologist under AS 08.11;

(2) "dealing in hearing aids" means the sale or lease, or attempted sale or lease of hearing aids, and the recommendation, selection, fitting, or adaptation of hearing aids;

(3) "department" means the Department of Commerce and Economic Development;

(4) "hearing aid" means a prosthetic instrument or device designed for or represented as aiding, improving, or correcting defective human hearing and the parts, attachments, or accessories of the instrument or device; "hearing aid" does not include cochlear implants, middle-ear implants, vibro-tactile speech-reading aids, other aids for cued speech, or group or individual auditory training units and assistive devices;

(5) "hearing aid dealer" means an individual licensed under AS 08.55.010;

(6) "physician" means a person licensed as a physician under AS 08.64.

* Sec. 9. AS 09.55.560(1) is amended to read:

(1) "health care provider" means <u>an audiologist licensed under AS 08.11;</u> a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; and a hospital as defined in AS 18.20.130, including a governmentally owned or operated hospital; a corporate entity covered under AS 21.88.050(b)(12); and an employee of a health care provider acting within the course and scope of employment;

* Sec. 10. AS 21.88.900(a)(9) is amended to read:

(9) "health care provider" means <u>an audiologist licensed under AS 08.11;</u> a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; a hospital as defined in AS 18.20.130, including a governmentally owned or operated hospital; a corporate entity covered under AS 21.88.050(b)(11); an employee of a health care provider acting within the course and scope of employment;

* Sec. 11. AS 44.62.330(a) is amended by adding new paragraphs to read:

(53) Department of Commerce and Economic Development concerning the licensing and regulation of audiologists (AS 08.11);

(54) Department of Commerce and Economic Development concerning the licensing and regulation of hearing aid dealers (AS 08.-55).

* Sec. 12. AS 45.50.471(b) is amended by adding a new paragraph to read:

(27) dealing in hearing aids and failing to comply with AS 08.55.

* Sec. 13. AS 45.50.561 is amended by adding new paragraphs to read:

(10) "dealing in hearing aids" has the meaning given in AS 08.55.200;

(11) "hearing aid" has the meaning given in AS 08.55.200.

* Sec. 14. AS 47.17.070(9) is amended to read:

(9) "practitioner of the healing arts" includes chiropractors, dental hygienists, dentists, health aides, nurses, nurse practitioners, optometrists, osteopaths, physical therapists, physicians, physician's assistants, psychiatrists, psychologists, psychological associates, <u>audiologists licensed under AS 08.11, hearing aid dealers licensed under AS 08.55,</u> religious healing practitioners, and surgeons;

ANALYSIS: Attach a separate page if necessary.

The bill charges the department with the responsibility of licensing audiologists and hearing aid dealers. Information received indicates that the number of practitioners affected by the bill are few--12 audiologists and 10 legitimate hearing aid dealers. Apparently, fly-by-night individuals have harmed Alaskan consumers as documented by complaints on file with Consumer Protection in the

Department of Law, the Office of the Ombudsman, and the Department of Health and Social Services, Communicable Disease Control Section. Licensing of Audiologists and Hearing Aid Dealers may be one instance where the need for licensure out-weighs the small number of practitioners.

An estimate of operating costs derived from comparing qualifications and numbers of practitioners with a similar existing license function indicate the costs to total $1.4 each year. Of the yearly costs, $.1 is expected to be new costs as a result of this legislation, for printing of application and statute booklets. The remainder consists largely of personal services costs which would be absorbed by the division through funding already included in the agency's operating budget. The fiscal note will be zero.

The following fee schedule was developed so that fees generated over the four-year renewal cycle would match, as closely as possible, costs over the same period. These fees are still estimates at this time.

Revenues were estimated on the following fee schedule:

Application/Credentials Review fee	$20
Temporary Permit fee	$25
Audiologists License/Renewal fee	$50 - quadrennially
Hearing Aid Dealers License/Renewal	$80 - annually

As a result of quadrennial licenses issued to Audiologists, revenues collected in FY 87 essentially covers a portion of the costs in FY 88 to FY 91. A detailed description follows:

FY 87:

		Distribution across quadrennial renewal:
12 Audiologists seeking licensure ($50 x 12) =	$ .6	
10 Hearing Aid Dealers ($80 x 10) =	.8	
22 Application/Credentials Review ($20 x 22) =	.4	
	$ 1.8	$ 1.8
		- 1.4 costs
		$ .4 balance

FY 88:

Assuming there will be two new applicants seeking Audiology Temporary Permits ($25 x 2)	$ .05	
2 new Hearing Aid Dealers:		
Application/Credentials Review Fee ($20 x 2)	.04	
Hearing Aid Dealers License ($80 x 2)	.2	
10 Hearing Aid Dealers renewing ($80 x 10)	.8	
	$ 1.1	$ .4
		+ 1.1
		$ 1.5
		- 1.4 costs
		$ .1 balance

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. CSHB 430 (HESS)

FY 89:

Assuming there will be two new applicants seeking Audiology Temporary Permits ($25 x 2)	$ .05	
2 new Hearing Aid Dealers:		
Application/Credentials Review Fee ($20 x 2)	.04	
Hearing Aid Dealers License ($80 x 2)	.2	
12 Hearing Aid Dealers renewing ($80 x 12)	1.0	
	$ 1.3	$ .1 balance forward
		+ 1.3
		$ 1.4
		- 1.4 costs
		$ Ø balance

FY 90:

Assuming there will be two new applicants seeking Audiology Temporary Permits ($25 x 2)	$ .05	
2 new Hearing Aid Dealers:		
Application/Credentials Review Fee ($20 x 2)	.04	
Hearing Aid Dealers License ($80 x 2)	.2	
12 Audiologists renewing ($50 x 12)	.6	
14 Hearing Aid Dealers renewing ($80 x 14)	1.1	
	$ 2.0	$.Ø
		+ 2.0
		$ 2.0
		- 1.4 costs
		$ .6 balance

FY 91:

Assuming there will be one new applicant seeking licensure as an Audiologist ($50 x 1)	$ .05	
2 new Hearing Aid Dealers ($80 x 2)	.2	
3 paying Application/Credentials Review ($20 x 3)	.06	
16 Hearing Aid Dealers renewing ($80 x 16)	1.3	
	$ 1.6	$ .6
		+ 1.6
		$ 2.2
		- 1.4 costs
		$ .8 balance

NOTE:

The revision in this fiscal note from the previous version is in the total estimated annual costs to administer the function. The original estimate was based on $4.5 annually. As a result of adjusting costs in relation to the number of licensees, this revised fiscal note is based on $1.4 annual expenditures.

Protection in the Department of Law, the Office of the Ombudsman, and the Department of Health and Social Services, Communicable Disease Control Section. Licensing of Audiologists and hearing aid dealers may be one instance where the need for licensure out-weighs the small number of practitioners.

An estimate of operating costs derived from comparing qualifications and numbers of practitioners with a similar existing license function indicate the costs to total $4.5 each year. Of the yearly costs; $.1 is expected to be new costs as a result of this legislation, for printing of application and statute booklets. The remainder of $4.4 consists largely of personal services costs which would be absorbed by the division through funding already included in the agency's operating budget.

The following fee schedule was developed so that fees generated over the four-year renewal cycle would match, as closely as possible, costs over the same period.

Revenues were estimated on the following fee schedule:

Application Fee	$ 30	
Credentials Review Fee	20	
Temporary Permit Fee	100	
Audiologist:		
License & Renewal Fee	520	quadrennially ($130 annually)
Hearing Aid Dealers	200	annually

As a result of quadrennial licenses issued to Audiologists, revenues collected in FY 87 essentially covers a portion of the costs in FY 88 to FY 90. A detailed description follows:

FY 87:		Distribution across quadrennial renewal:	
12 Audiologists seeking licensure	$ 6.2		
10 Hearing Aid Dealers	2.0		
22 Application/Credentials Review	1.1		
	$ 9.3	$ 9.3	
		- 4.5	costs
		$ 4.8	balance
FY 88:			
Assuming there will be two new applicants seeking Audiology temporary permits	$ .2		
2 new Hearing Aid Dealers:			
Application & Credentials Review Fee	.1		
License fee	.4		
10 Hearing Aid Dealers renewing	2.0	$ 4.8	balance forward
	$ 2.7	2.7	
		$ 7.5	
		- 4.5	costs
		$ 3.0	balance

FY 89:

Assuming there will be two new applicants seeking Audiology temporary permits	$ .2		
2 new Hearing Aid Dealers:			
Application & Credentials Review Fee	.1		
License Fee	.4		
12 Hearing Aid Dealers	2.4	$ 3.0	balance forward
	$ 3.1	3.1	
		$ 6.1	
		- 4.5	costs
		$ 1.6	balance

FY 90:

Assuming there will be two new applicants seeking Audiology temporary permits	$ .2		
2 new Hearing Aid Dealers:			
Application & Credentials Review Fee	.1		
License Fee	.4		
14 Hearing Aid Dealers renewing	2.8	$ 1.6	balance forward
	$ 3.5	3.5	
		$ 5.1	
		- 4.5	costs
		$ .6	balance

FY 91 will be the start of a new quadrennial license period for Audiologists, and is the reason for revenues increasing from $3.5 in FY 90 to $10.1 in FY 91.

FY 91:

Assuming there will be one new applicant seeking licensure as an Audiologist	$ .5
2 new Hearing Aid Dealers, license fee	.4
Application & Credentials fee for 3 new applicants	.2
12 Audiologists renewing	6.2
14 Hearing Aid Dealers renewing	2.8
	$10.1

The FTC And The Hearing Aid Industry

by Rocky Stone

In the United States, the role of government in regulating industry and providing consumer protection has usually been contentious, time-consuming—and costly! Way back in June 1975, the Federal Trade Commission (FTC) initiated a proceeding for promulgation of a Trade Regulation Rule for the Hearing Aid Industry. Ten years later (August 1985), the FTC recommended against the proposed rule. What happened?

FTC conducted 58 days of hearings on the proposed rule. It heard 203 witnesses and compiled almost 60,000 pages of documents. The final Staff report to the Commission, along with the Proposed Trade Regulation Rule was published in two volumes during September 1978. The report contains the staff's analysis of the record which forms part of the basis for the Commission's final determination. In transmitting the report to the Commission, the Director, Bureau of Consumer Protection, observed, "While I am somewhat uncomfortable with the manner in which the staff has characterized some of the record evidence, I support their recommendation that a trade regulation rule is necessary and that the rule is supported by the record evidence.

"There appears to be sufficient record evidence to establish the conclusion that the over 14.5 million (1978 figure) hearing impaired individuals suffer a lack of information about hearing loss, hearing aids, and the variety of individuals and their respective qualifications who dispense and sell hearing aids. Hearing aids can benefit some, but not all of these hearing impaired individuals. In addition, periods of adjustment are almost always required. The record also reveals the prevalence of a variety of *deceptive* and *unfair* marketing techniques that take advantage of the existing consumer ignorance or vulnerability to mislead consumers into the belief that the hearing aid can offer greater benefits than may in fact be true. (Words like "deception" and "unfair" have long been the basis on which the FTC takes action against a particular company or industry. The problem is that such words can be interpreted differently and they can cover an awful lot of territory. When James C. Miller III was FTC Chairman, he asked Congress to limit the FTC's discretion by providing a legal definition of both terms as they pertain to the agency's jurisdiction over business practices. Miller felt that "unguided discretion creates great ambiguity about how the law will be applied.")

"The recommended rule attempts to remedy the documented problems by a comprehensive approach to the advertising and marketing of hearing aids. Of critical importance is the buyer's right to cancel. This portion of the rule requires retailers to provide each buyer with the opportunity to cancel the purchase within 30 days after delivery of the aid and receive a refund less certain allowable charges. The record clearly reveals that consumers can only assess the benefits the aid will offer by actual use. The trial period should thus allow consumers adequate opportunity to inspect the aid, adjust to its use (and limitations), and verify whether or not it will, in fact, offer them some benefit. The trial period should also provide disincentives that will inhibit sellers from engaging in deceptive techniques to market aids. If claims are not borne out through actual experience, sellers will have to refund the purchase price. In addition, any returned hearing aids will have to be sold as used rather than new aids."

1978—The Director, Bureau of Consumer Protection

"While I am somewhat uncomfortable with the manner in which the Staff has characterized some of the record evidence, I support their recommendation that a trade regulation rule is necessary and that the rule is supported by the record evidence.

For the next six years the FTC staff analyzed and reanalyzed the record, gathered additional post-hearing documents (another 4,000 pages) and sent two proposed rules to the Commissioners for consideration. During this time, staff and commissioners changed, political differences emerged, points of view shifted. The process was also characterized by recrimination, bitterness, invective and a general sense of guerrilla warfare. In 1979, Robert Petosky, a Carter appointee found the staff's case plagued by "bias" and sent it back for further review. In April 1983, George W. Douglas, a conservative Democrat from Texas appointed by Reagan, took charge of the case. He sat on it for more than a year and then in May 1984, sent it back to the staff without taking it to the full commission for debate. By 1984, the process had consumed more than 50,000 staff hours of time and probably cost about $700,000 according to FTC figures cited by the Washington Post.

The final act in the saga of the hearing aid rule was opened with Commissioner Douglas' request for a new survey of

Given the limitations of the study, it is hard to understand why the FTC staff should have been led to its sanguine view that the marketplace will do the job of protecting the hearing impaired consumer.

consumers to gather information on the industry, hearing aid users, and their perceptions of the product. The main focus was to be on the consumer trial period since several commissioners felt that events had overtaken the proposed rule. A Food and Drug Administration regulation placed new conditions on hearing aid sales (see *Shhh*, November/December 1984, page 8), many states had passed new legislation regarding consumer protection, and some hearing aid dispensers had adopted a voluntary 30-day trial period.

The issue was whether market forces could be relied on to insure that consumers have a chance to try a hearing aid before purchasing it. Thus, the survey aimed at comparing the reports of hearing impaired persons living in states having mandatory trial periods with those of persons living in states where no such requirement exists.

The principal finding of the survey, as reported to the Commission by the Bureau of Consumer Protection, was that "in states that required trial periods, only 62% of the respondents said a trial period was available. Yet, in states that did not have this requirement, 65% of hearing aid purchasers had access to a trial period. *Thus, market forces appear to have been as effective as legal requirements in promoting the proliferation of trial periods.*" (Emphasis SHHH.)

We could rest in confidence in the small discrepancy this three percentage point difference represents—except for the fact that the survey was not designed to support this kind of a comparison. The study was done by Market Facts, a highly regarded consumer and market research firm. Nonetheless, the sampling plan for the study had severe limitations for purposes of this comparison upon which the FTC staff rests its recommendation.

First, the survey was of persons who were part of a "panel" of consumers, i.e., had agreed to participation in periodic surveys by Market Facts for its diverse clients. The sample is not a true cross-section of the American public. There is a bias in the exclusion of persons who declined to join the panel for one reason or another. Moreover, to the extent participants in the panel were involved in Market Facts studies prior to the FTC survey, they tend to become more self-conscious about their behavior as consumers. Thus, it is highly probable that they are more attentive to the terms of their purchases, thereby yielding a degree of measured awareness about the trial period that is artificially inflated.

Second, the survey was conducted by mail. As a result it suffers the expected problem of people not responding. There are ways survey researchers deal with this problem, but there is no evidence that Market Facts or the FTC staff made such an effort.

Third, and most important, only five states and the District of Columbia have mandatory trial periods. Given the design of the sample, only 74 respondents were produced living in these jurisdictions. So small a number of cases greatly limits the comparisons that are valid with the experience of those living in areas where no required trial periods exist. Specifically, a difference of at least twelve percentage points between the two percentages would be needed to be able to conclude that the difference did not occur by chance. With a three percentage point difference found in the survey, there is no way the conclusion of the FTC staff can be supported with any statistical confidence. Given the limitations of the study, it is hard to understand why the FTC staff should have been led to its sanguine view that the marketplace will do the job of protecting the hearing impaired consumer.

Conclusion: Unfortunately, we are dealing in extremes. According to a number of people with different points of view, the 1978 report *was* biased. The staff seemed to be throwing the baby out with the bath water. The situation was not as bad as it was portrayed. Now the Market Facts survey indicates that everything is okay. It isn't. That's the other extreme. Our mail convinces us that the situation today, is neither as bad nor as good as the FTC has variously represented it. Good consumer education is probably the best consumer protection. But there is a large group of elderly hearing impaired persons who remain vulnerable and who will never be able, adequately to protect themselves. How we get the use of amplification to them in a fair context, is our challenge.

According to the White House Office of Consumer Affairs:

96% of unhappy customers never complain.

91% of those will not buy again from the business that offended them.

The average unhappy customer will tell at least nine others and 13% tell more than 20 people.

In a market as complicated, emotionally charged, yet in dire need of the product, hearing aid dispensers should not take too much satisfaction from the final decision of the FTC. People, not laws, will continue to determine the sales volume of hearing aids and the dispenser's image—rightly or wrongly—has yet a way to go.

. . . there is a large group of elderly hearing impaired persons who remain vulnerable and who will never be able, adequately to protect themselves. How we get the use of amplification to them in a fair context, is our challenge.

You will note the issue here was not the quality of hearing aids but how they are marketed. Hearing aids today do pretty much what they are supposed to do but they remain inadequate for many people. As Gerry Williams notes, "To expect

the tiny hearing aid microphone, located in or behind the ear, to pick up sound from the front of a classroom, from a distant stage or from a speaker standing 50 to 100 feet away is beyond the state of the art.

"The small microphone simply cannot be made with sufficient directionality to exclude all the reverberant sounds that compete with the desired sound. The shotgun microphones used at sports events to pick up and isolate distant sounds employ highly sophisticated technology, which allows them to zero in on the desired sound and exclude most others. The hearing-aid microphone, because of its size limitations, cannot be expected to produce a comparable performance.

"A person who has lost hearing in one ear will experience the same problem of selectively discriminating sounds. So merely amplifying a mixture of desired and undesired sounds will only increase the loudness of confused sound.

"The problem boils down to having the desired signal sufficiently louder than the background noise so that people can hear it." That's where assistive listening devices come in.

So, the issue here revolves around market practices.

Exactly five years ago we wrote: "We can agree with The National Hearing Aid Society (NHAS) that hearing aid dealers—like the rest of us (including audiologists)—are human. Some are more (or less) ethical than others. We, as consumers, need to know enough about the subject to avoid being victimized. Or, if we are victimized, we need to have adequate recourse to correct the situation.

"Assuming that we will always have some abuse in the current system, NHAS would be well advised not to defend dealers generically but to help remove those dealers who are proven unethical. They are the ones who give hearing aid dealers, as a group, a poor image.

"The same thing would be true of audiologists who dispense hearing aids. Being human, some will certainly abuse their trust. They should be dealt with promptly and effectively. Self-policing methods often are not successful. But if users of hearing aids begin to speak with one voice, all service providers in the field of hearing loss will find themselves under increased pressure to satisfy better a clientele which has heretofore been characterized as being 'vulnerable, easily intimidated, passive'—in short, people who don't make waves. That time may soon be past."

Not yet. But soon.

In a memorandum to the FTC, Deputy Director Amanda B. Pedersen, discusses trial periods being available to those who want them. She says, "The National Hearing Aid Society, whose members are estimated to sell 75% of the hearing aids sold in this country, requires its members to offer trial periods upon request under most circumstances."

THE CONSUMER SHOULD ASK for a 30-day trial period with money-back guarantee (less a previously agreed to charge). If a dealer won't give it to you—find one who will.

In discussing allegedly unfair sales practices including generating leads or gaining entry for home sales, Pedersen notes that "less than 1% of all respondents indicated that the seller had come to their home without calling first."

The consumer should not permit hearing aid salespersons into their homes without prior appointments. If there is a SHHH chapter in your area seek help if you are in doubt about how to handle your purchase of a hearing aid.

Nursing Home Study

The Health and Human Services Department is planning more study on nursing homes and community services for elderly people. About one elderly person in four needs nursing home care or special help at home. A report from the Population Reference Bureau found that there are 1.4 million elderly people in nursing homes and 5.2 million others who, while remaining at home, need help. That help comes mostly from friends and relatives (about four-fifths of it). But the Population Reference Bureau projects that by the year 2020, the number of people needing nursing home care and home-health assistance will nearly double, as the population gets older, and the number of people over 85 increases dramatically.

To make the problem worse, more women will be working and unavailable to take care of their parents at home, and there will be a lower ratio of younger people to older people. Alice Day, author of the study thinks that large numbers of elderly people could be kept at home at less cost if family members were given some relief from the problems of caring for them—such as government aid for home help, respite care, overnight care and temporary care. She adds that policy makers should tighten screening procedures to assure that the bulk of aid goes to those who most need it.

More emphasis should also be placed on preventive health care such as diet and exercise to avoid disabling conditions, setting up a system of "co-payments" to make the elderly share the costs of their care, and developing the new concept of "intermediate housing" which would provide affordable health services to elderly residents, including hearing health services.

Dear Mr. Malone:

I wish Older Persons Action Group could tell you exactly how many older consumers have been victimized by unscrupulous hearing aid dealers in Alaska. Unfortunately, no one knows for certain the extent of the problem. Not many "victims" find it easy to admit that they've been "taken" and not many are willing to admit that they have a hearirg problem.

However, what we do know about the problem is this: Nearly a dozen older consumers have contacted Older Persons Action Group offices in Anchorage over the past two years to complain that they lost money (in amounts ranging from $800 to $2,000) to hearing aid salespeople (both "established" businesses and door-to-door salesmen) for worthless aids or non-delivery of aids.

One older woman told us she'd lost more than $1,800 to hearing aid dealer Louis DeLegge of Anchorage, who skipped town with her money and failed to deliver the purchased aid. DeLegge was responsible for a majority of complaints OPAG received last year regarding hearing aid fraud, but DeLegge is by no means the only culprit involved in these scams. It's important to note that without consumer protections in place in Alaska, these abuses could easily happen again and again to consumers. For this reason, Older Persons Action Group supports Rep. Mike Navarre's efforts to bring about strong legislative measures to regulate hearing aid sales practices in the state.

Sincerely,

Rebecca J. Goodman

OLDER ALASKANS COMMISSION

February 12, 1986

Representative Navarre
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Navarre:

The Older Alaskans Commission appreciates your sponsorship of House Bill No. 430 to regulate audiologists, hearing aid dealers and the dispensing of hearing aids. The Commission endorsed protective legislation for consumers of these products and professions last fall. This action was taken due to our personal knowledge of significant problems in this area.

We will inform older Alaskans of the importance of supporting the effort now represented by this bill. Do not hesitate to contact our executive director, Jon Wolfe for any assistance we may provide.

Sincerely,

Peggy Burgin

Feb. 14, 1986

Representative Mike Navarre
House of Representatives
Juneau, Alaska

Dear Sir:

I would like to go on record in support of House Bill 430.

I have had several hearing aids which have cost in the hundreds of dollars purchased from various agents. After using them for a period of time, they have given me problems and in a lot of cases the agent or company has gone out of business, leaving me holding the sack.

I heard of the state program and called the Health Clinic here for an appointment with Susan Bunting, State Audiologist. On 11/6/84, I received two aids from her, after going thru tests, and have them since. They have given me no problems and if they do, I know where to go to have them corrected.

I think Bill 430 would protect individuals like myself both physically and financially. I was born in Ketchikan 74 years ago.

Thank you,

Arthur J. Thompson

Pat Malone

I have enclosed the info I have on consumer complaint. It would probably be wise to call the Senior Voice (Becky Goodman 364-3874) to get an update on complaints. They were getting calls and letters in response to an article they ran a few months ago. The attorney Generals office may also provide current information. Hope this helps.

RE: Hearing and Consumer Complaints

Dear Sir:

Enclosed please find copies of consumer complaints received by our office during fiscal year '85 that involve hearing aids. All of these complaints (except the Wrangell Publishing, Inc. complaint) have been either resolved, or closed/unresolved due to our inability to locate the respondent or elicit his cooperation.

We noticed your article in the August edition of the "Senior Voice" and believe these complaints may support you and your efforts with respect to HB-430. For your information, a major problem is that the businesses are often closed and the owner somewhere out-of-state by the time the complaint reaches our office. Needless to say, this situation interferes with, and sometimes precludes any efforts on our part to resolve these matters. If the complaint involves defective merchandise, we are sometimes able to obtain restitution through the manufacturer. However, if the problem is with a distributer who has accepted partial or full payment for merchandise not delivered, there is little this office can do.

We hope this information is helpful to you. If you have any questions, please feel free to call.

Sincerely,

HAROLD M. BROWN
ATTORNEY GENERAL

I PURCHASED HEARING AID FROM TOM GARCIA AT "CUSTOM HEARING AIDS" FOR $650.00 AFTER A FEW MONTHS IT BEGAN TO FAIL AND FINALLY IT QUIT ALTOGETHER. I TRIED CALLING COMPANY BUT WAS TOLD THIS WAS A NON WORKING NUMBER I ALSO WENT BY THERE. SHOP IT WAS VACATED. THIS HEARING AID IS OF NO USE TO ME AS IT DOES NOT WORK AND I CAN NOT GET IT REPAIRED I WILL BE FORCED TO PURCHASE ANOTHER HEARING AID, [redacted]. SO I WOULD LIKE TO BE REIMBURSED FOR MY $650.00 FOR I PAID DEFECTIVE HEARING AID

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN?

I WOULD LIKE MY MONEY REFUNDED, I NEED A NEW HEARING AID, AS I CANNOT HEAR WITHOUT IT, AND I HAVE NO MONEY TO PURCHASE ONE.

Order (2) pairs of hearing aid, Thru salesman Jack E. Hurd
two weeks after I order them. - Mr Hurd had to come back & take second impress of the canal of ones ears.
Then I had to wait another couple weeks for hearing aid. Then I went to Alaska Native Hospital, and I was told that the price I was paying was to much for them
So I called Mr Hurd. Asked him to return some down payment. And he said he would But I would have to wait for my money. this what I do not under. - stand Because! - I notice they had deposit my check here in Anchorage Bank I don't see why they can't make out Anchorage Bank check to me.
I gave them #1,000.00 & I expect to get back. #800.00. as agreed upon
Copy are enclose with this statement.
I was told by Mr. Hurd - I got a check from Company in Minneapolis, Minn.

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN?
Return of #800.00 as I agreed to in their contract.

~~I~~ I paid the Alaska Hearing center $450.00 down to make me Two hearing aids with a Balance of $750.00 left to Pay after he has another of my hearing aids to fix which should be worth about $350.00 when fixed. I called the Alaska hearing center 6-14-25 to see if my aids where ready & Sharon Clark answered she said she was Taking Her Messages. I ask her when my aids where it had been a whole month since orders they were to be Delivered in 2 weeks. Sharon said she would call me back. She did & Told me that Dr. Delagge had closed his office & was selling everything & better start doing some thing. He is getting ready to leave Town.

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN? I would like my $450.00 back & my hearing aid What I figure is worth about $350.00

SUBJECT: Custom Hearing Aid — Purchased - 24 MARCH 1983

SALESMAN - BILL LYONS

SERVICEMAN - THOMAS S. GARCIA

I purchased TWO (2) hearing aids from Custom Hearing Aid Center
3136 New Seward Hiway
Anchorage, Alaska 99503

The salesman was Bill Lyons, about 3 weeks after they delivered them. They had to send one (Left Ear) to Florida, as it did not fit.

About 4 weeks later delivered it to me & it did not work due to the inside parts. They took it in again & about 3 weeks returned it again. (Same Aid - Left Ear) Seems to work except it has been using batteries at the rate of one battery every 8 days for the last 2 mo.

I have been trying to reach Bill or Thomas for 2 months. My sons went by his office & left word and my daughter & Son-in Law have called - No one there has returned my calls.

The girl who answers the phone there claims she doesn't know where they can be reached or when they will return.

I would like the hearing aid replaced or a full refund of my purchase price.

I am a Senior Citizen on a fixed income

My witness - Mr. & Mrs M. Hartsock 338-5730

Don C. Illery

Florence Illery 562-7114

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN?

Put down the names of any witnesses.

Please attach copies of any documents which explain or support your complaint, including the cancelled checks, copies of advertisements, letters, etc.

Received hearing aids on 5/27/93. Had recurring problems with them and they were returned to Washington for repairs three separate times). In November '93 the right hearing aid was returned for repairs and I have not yet received it back. I have placed four call to the company trying to locate the hearing aid. The Company called me twice & on the last occasion told me they had located the hearing aid & it was being mailed to Anchorage. As of this date 5/27/94 I have not yet received the hearing aid. (Also, the other hearing aid for the left ear is not working and I was instructed by the company not to return it to them until I received the right one.

In my conversations with the Company I was told that a Mr. Jose Garcia had taken over their Anchorage office. I have tried to locate Mr. Garcia but have been unable to do so.

I also received a call from a gentleman who works for Senior Citizens Bill O'Connor 279-2332, who told me a lot of other people were having trouble with the same hearing aid people.

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN? I would like to have my money refunded and will return the hearing aids to the company.

HOW TO WRITE YOUR COMPLAINT:

Start at the beginning. Describe all the events in the order they happened.

Put down the names of any witnesses.

Please attach copies of any documents which explain or support your complaint, including the cancelled checks, copies of advertisements, letters, etc.

I. the fall of 1983 I answered an ad in the Anchorage papers. it was an insert for Miracle Hearing Aid.

On October 19 a Mr. Steve Kaufman and Lou ? reps of the Fifth Avenue Hearing Aid Centers in Seattle came to our home and sold me two Dahlberg hearing aid units to the cost of $1100 for bo

Mr. Steve Kaufman being advised we were leaving for 4-1/2 mos. and would return March 23 stated if I didn't like the hearing aid in my right ear, he would refund the money upon our return or by April 1, 1984. He also stated he would be in touch w[illegible] us before April 1 to follo up on the aids. However, he did no follow up at all.

While in Seattle on March 12, 1984 one hearing aid was defective. I called the Seattle office ~~of the Fifth Avenue Hearing Aid that Mr. Kaufman represented. I asked for a warranty booklet,~~ and also a cap for the volume control knob and also other items pertaining to the aids working. ~~These were never received.~~

~~April 2, 1984 I contacted the Seattle office again as I was unable to obtain Mr. Steve Kaufman~~ here in the Anchorage area. I called for his telephone number, and again they stated they would ~~send me the volume control cap and warranty booklet. I was having other problems with the unit~~ as it wouldn't hold the battery in place... I contacted the Anchorage office this same day, but received no answer.

April 19, 1984 I again, called the Anchorage office and the fellow Lou ~~[illegible]~~ told me he would come out and make the service call and follow up call before April 26, which was the date I was leaving to care for my invalid Mother from an emergency doctors call to me. No call or attempt to contact me.

While in Minneapolis, someone called my husband here and he (my husband) told them they were too late I had already left.

May 4, I contacted the St. Cloud Hearing Aid Service Center in Minnesota to please fix my hearing aid. This the man came out and temporarily fixed it, and again they called the Dahlberg rep in Mineapolis. The Minneapolis rep told me in no way did the Dahlberg reps act this way, and to contact the home office. I didn't know where it was, and accidently left the reps name from the Minneapolis area out or at my mothers place.

After my return to Anchorage, on July 16, I called Mr. Steve' Kaufman's office. I was advised ~~by the receptionist that Mr. Kaufman was in town and also started up another office of Miracle~~ Ear and Fifth Avenue Hearing Center. I asked the girl to please have Mr. Kaufman or someone ~~contact me before the end of that week — July 20, or I would have no other recourse but to~~ file with the Anchorage Consumer Protection office here in Alaska. To date there has been ~~no contact or answer to my July 16 call.~~

~~While talking to this Lou on April 19, I advised him I knew of 4 more hearing aids they could~~ sell here to one person in the valley.. He wanted to know to whom and I told him when he came to repair and fix my aid I would advise him of such.

Of course, since this shoddy way of treating someone who put out $1100. I wouldn't recommend them to anyone. I feel senior citizens of Alaska deserve better treatment than this one and they should be made aware of the fly-by-night service and selling procedures.

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN?

Either refund of both aides or repair of same. Preferably Refund

(Please use additional sheets if necessary)

March 5, 1985

The Consumer Protection Agency
1031 W. 4th Avenue, Suite 110
Anchorage, Alaska 99501

Gentlemen:

I have been having a problem for some time now with Miracle Ear Hearing Center, located at 2909 Arctic Boulevard, Suite 101. Anchorage, 99503, telephone number 562-4425.

The facts in this case are the following, substantiated by the attached documentation. I am seeking the return of $2,000.00 (what I paid in cash for this (these) hearing aids), plus the $190.00 discount I was due for paying cash for the items at the time of purchase, September 5, 1984. I purchased this (these) hearing aid(s), in a hurry before leaving Anchorage for Florida, where we generally stay through February of each year. After having received no answer to my last two letters to them requesting a refund (see Atchmnts 6 and 8), I decided to wait until our return to Anchorage in early March but now find we will have to remain here longer than expected. That is why I am now writing you to see if you can help me.

At the time I purchased these items I was assured by Jerry Callahan, the salesman, that I had thirty days in which to try them and if I was not totally satisfied I could return them and get full reimbursement. Because of the rush we were in to leave Anchorage at the time of purchase, I neglected to deduct the $190.00 discount which was stated on the contract (Atch 1 below) at the time of purchase. I, therefore, paid them $2000.00 which I should only have paid them $1810.00. Jerry Callahan should have known this at the time I signed the contract but said nary a word. Of course, he had come to the house about 10 in the morning to put me through a series of tests and then had given me the usual salesman's spiel and by that time I was weary, and hungry, and simply forgot the pitch about the $190.00 discount for cash. I should add that I am 74 years of age and, while my hearing is impaired, I am doing very nicely without any kind of a hearing aid at this time.

Listed in chronological order by attachments are the following:

Atch #1 -- Contract for Purchase, dated September 5, 1984. This shows the $190.00 discount I was due for paying cash. Please note I had 30 days in which to try the merchandise and "if for any reason a refund will be made if not satisfied."

Atch #2 -- copy of my check for $2,000.00 with endorsement on reverse.

Atch #3 -- letter dated October 17, 1984, wherein I asked for a 30-day extension trial period because I was having trouble with bleeding and "squealing" in my left ear.

Atch #4 -- statement from Eglin Air Force Regional Hospital personnel that I not wear the hearing aids for two weeks to allow recovery.

Atch #5 -- letter dated October 29, 1984, from Miracle Ear granting me a 30-day extension, through November 30, 1984, telling me where to go for assistance and my notes talking with the Miracle Ear people in Tallahassee, Florida, the closest place they advised I could have the ear molds made and/or pared down or modified to fit my ear.

Atch #6 -- letter dated November 17, 1984, from me to Miracle Ear, explaining the problem I was having getting a new mold made and the requirement they were placing on me to travel back and forth to Tallahassee for assistance. Please note that in the next to the last paragraph I stated I was returning the hearing aids and asked for a refund of my money. This was within the 30 day extension granted in Atch #5.

Atch #7 -- registered receipt number R125714C dated November 20, 1984, for return of the hearing aids, insured for $2000.00 and receipt from them dated November 26, 1984.

Atch #8 -- letter dated January 18, 1985, from me to them asking what had happened to my request for reimbursement and again asking for reimbursement.

I have received no replies to either of the letters mentioned in Atchs. 6 and 8 above.

I thought I was dealing with reputable people but I am now convinced these people are frauds. I want the return of my money in the amount of $12,000.00 plus the $190.00 discount I was supposed to have gotten for a cash payment of $2,000.00.

If I have come to the wrong people in this matter then please direct this request to the proper persons who will ensure that a consumer is not bilked by a supposedly reputable company.

Thanking you in advance, I am,

Sincerely yours

Gladys M. Thomas

(Mrs.) Jay N. Thomas

Atch #9 -- receipt from Miracle Ear dated January 24, 1985, showing they received my letter of January 18, 1985 (Atch #8 above)

I HAVE A HEARING LOSS AND I'M WEARING HEARING AIDS, BUT ALWAYS SEARCHING FOR SOMETHING BETTER. THOMAS S. GARCIA, WHO CALLS HIMSELF "CUSTOM HEARING AID CENTER" STATED HIS HEARING AIDS WERE COMPUTERS. AFTER TRYING THEM OUT, I FOUND THEM TO BE VERY INFERIOR TO WHAT I HAD BEEN USING, DUE TO THE FACT THEY DID NOT FILTER OUT BACKGROUND NOISE. I FINALLY RETURNED THESE HEARING AIDS TO HIM.

AFTER SEVERAL CALLS BACK TO HIM, HE COULD NOT TALK ME INTO CONTINUING WITH THEM, SO HE FINALLY AGREED TO PREPARE ANOTHER PAIR. I INFORMED HIM I WAS GOING SOUTH FOR A FEW MONTHS, AND HE AGREED TO SEND THE NEW ONES TO ME. I NEVER RECEIVED THE HEARING AIDS AND UPON RETURN TO ANCHORAGE, APPROXIMATELY MAY 1, 198. MR. GARCIA, OFFICE & ALL WERE GONE AND HE LEFT NO FORWARDING ADDRESS.

I AGREED TO PAY HIM HIS PRICE OF $1300.00, 50% DOWN, CHECK No. 662 DATED SEPTEMBER 6, 1983 FOR $650.00.

I AM NOW DESIROUS OF RECOVERING THE ABOVE PAYMENT, SINCE I HAVE TOTALLY LOST CONFIDENCE IN HIS PROFESSIONAL ABILITY AS WELL AS HIS HONESTY.

WHAT TYPE OF SETTLEMENT DO YOU WISH THIS OFFICE TO ATTEMPT TO OBTAIN?

Anchorage, Alaska 99504

Dear Mr. Canterbury;

At the present time I am director of an adult day care center here in Kethcikan and had the opportunity to meet Susan Bunting, regional Audiologist, during her recent visit to Ketchikan.

I had accompanied one of our participants for her hearing evaluation. This woman, Caroline Thompson, had purchased two heari g aids from Miracle Ear Hearing Center, Dahlbery hearing systems, 2909 Arctic Blvd. Suite 101, Anchorage, Alaska 99503. Their representative Jack Hurd sold these two hearing aids to Caroline 8-9-84 and finalized the contract 10-9-84 to the total sum of $1400.00. $700 paid initiallly and the other $700 C.O.D. Needless to say Caroline expected miracles from these hearing aids but the miracle did not occur. All through the winter the hearing aides have buzzed and cuase general discomfort.

After meeting Ms. Bunting severalitems were clarified:

1. The hearing aid is a Dahlberg not a Miracle Ear
2. The fit is not correct for Caroline. New molds were made.
3. The price was excessive.
4. The dealer is from out of town thereby eliminating any follow up contact for problems or questions

The consumer must be protected, especially our senior citizens, from this type of fraud through proper legislation. Better educating of our population in the above matters is imperative, and we need more audiologist to serve the Alaskan population.

Caroline already suffers from low self-esteem and chronic depression and lives on a marginal income and to be taken advantage of hurts deeply.

If action can be taken and the problems remedied then our seniors will be better served.

Sincerely,

Patricia Fordney

Oct 2-85

Dear Dr. Canterbury,

I had a fraud dealing with hearing aids. the alaska Hearing center received $450.00 check from me for a hearing aid & also took my old one to be repaired which I had only bought two years before for $600.00. So I do strongly support the legislation to regulate the dispensing of hearing aids & have made my complaint to the consumer protection section. I am out my money & no hearing aids. which I need for both ears. I would like to find this guy whose name is Lou Delegge. I even wrote to Dear Bud but he didn't put my letter in the paper. this Happened 5-16-83

David Canterbury
Chief of Communicative Disorders Program
Department of Health and Social Services
3401 E. 42nd Avenue
Anchorage, Alaska 99504

Dear Mr. Canterbury:

Enclosed is a receipt for a used hearing aid sold to an elderly woman on Medicaid. She did understand the aid was used when she purchased it. There is no indication as to the make or age of the aid or if it had been reconditioned prior to the sale.

A visual check revealed this to be a modular unit that snapped into an "all purpose" ear mold. The model of this aid could not be determined.

This aid fit very poorly resulting in discomfort and feedback. The consumer had used a kitchen knife to try and modify the mold so that it fit comfortably. She and her family were extremely dissatisfied with this aid as well as the method of sale.

Through this Center, she was fit with a postauricular aid with good subjective and objective results.

I will send further documentation of abuse as received.

Sincerely,

Jeri Powers

RE: House Bill 430

Dear Dave:

Thank you for providing me with a copy of the above House Bill. I am encouraged by this Bill in that better regulation of hearing aid dispensing will be enforced. It's frustrating when someone from your region ends up with hearing aids that are inappropriate or monstrously expensive or unreturnable! I assume most States have this kind of regulation (at least they do where I've been), and it's about time Alaska quit hiding behind that "wilderness-anything-goes" excuse.

After reading this comprehensive bill, I find only one area of possible conflict. Under Section 08.11.110 Exemptions is listed "a physician..." Usually, physicians are their own employers, so I don't see who is going to supervise their audiological procedures. I would think that a physician would either make an appropriate referral to an audiologist, or only practice limited hearing screening procedures (unless he/she is also a certified audiologist).

I think it is important to set up a supervision structure for those held exempt from licensure - perhaps with the State?

Let me know if any further comments are needed. I know you'll keep me informed.

Sincerely,

NORTON SOUND REGIONAL HOSPITAL

VOLUME 85-1

The Illinois Hearing Aid Consumer Protection Program

"A Hearing Aid Can Be A Good Sound Investment." This is the promotional theme for the new Illinois law designed to promote the benefits of hearing aids and protect the public from fraudulent dispensing practices which threaten the health, safety and welfare of Illinois citizens.

The Illinois Hearing Aid Consumer Protection Act (HACPA-Supplement to Ill. Rev. Stat. 1983, chap. 111, par. 7403 et seq.) supports sound hearing aid dispensing practices through the certification of dispensers and the follow-up of complaints and/or inquiries. The Illinois Department of Public Health is responsible for administering the provisions of the Hearing Aid Consumer Protection Act (HACPA) by initiating a four component action plan which focuses on:

1. health promotion/ consumer education;
2. continuing education services for hearing aid dispensers;
3. certification of dispensers; and
4. follow-up of inquiries and complaints.

The Illinois Department of Public Health has developed and implemented a system to follow-up consumer inquiries and problems. Inquiries can be received by the toll-free action line or by mail. Program staff are available to respond to all inquiries and initiate follow-up activities, whether received by the toll-free action line or by mail. Should a reconciliation be unattainable, the individual case and all documentation will be forwarded to the Department and after review, if warranted, to the Board. The Board has the authority, by mandate, to conduct hearings and make recommendations to the Director, should disciplinary action be indicated. The Board is comprised of:

Jack D. Clemis, M.D.
Board Chairman, Otolaryngologist, Chicago, Illinois

Thomas Regnier, Hearing Aid Dispenser, Illinois Society of Hearing Aid Specialists, Peoria, Illinois

Gail Gudmundsen, Hearing Aid Dispenser, Illinois Speech, Hearing and Language Association, Hoffman Estates, Illinois

Bee White, Senior Advocate, Springfield, Illinois*

To facilitate the promotion of the HACPA, its provisions, and the service it provides to consumers, program staff are currently developing a statewide networking effort to involve all state and community programs which provide a link to the senior citizens. By successfully educating these interested allied agencies to the services and provision of the HACPA, a larger population of hearing aid consumers can be served.

* One Board position is currently vacant due to the recent resignation of Richard Gelula, Chicago Hearing Society, Chicago, Illinois.

THE ILLINOIS HEARING AID DISPENSERS EXAMINATION

To carry out the requirements for the hearing aid dispensers examinations as stated in the Illinois Hearing Aid Consumer Protection Act, the Department of Public Health convened a statewide committee of hearing aid dispensers to review available tests and decide upon a test for Illinois hearing aid dispensers. This committee chose to work with the Educational Testing Service (ETS) to develop the Illinois Hearing Aid Dispensers' Examination. Guided by the committee, ETS designed a job analysis survey that was completed by over half of the practicing dispensers in Illinois. Based on the survey results and the committee's recommendations, ETS developed multiple forms of a 75-question exam, using questions drafted by the committee.

This first examination is intended for temporary certificate holders. Those temporary certificate holders who registered with IDPH on or before May 31, 1985 will be notified by ETS regarding the examination scheduled for August 24, 1985. On this date, two examinations will be conducted simultaneously in Springfield and Chicago. The times and locations will be announced in registration packages. Registration packages must be completed and returned to ETS so that an entrance ticket to the examination can be mailed to each registrant.

The examination will consist of multiple-choice questions. Each question will have four options and only one correct answer. Test-takers are encouraged to choose the option they think is more than likely correct when they do not know the correct answer. There is no penalty for guessing on this examination.

Test-takers will have ample time to complete this exam. The three and one-half hours scheduled for the test should allow sufficient time for all test-takers. You need only bring one or two #2 pencils. No notes, dictionaries, etc., will be allowed in the test room. You may bring a silent, hand-held calculator. Calculators, however, are not really needed for this exam.

The examination questions will cover the following subjects:

1. ACOUSTICS
2. NATURE OF THE EAR (normal ear, hearing process, disorders of the ear)
3. HEARING MEASUREMENT (data collection and measurement)
4. HEARING AID TECHNOLOGY
5. SELECTION OF HEARING AIDS
6. DISPENSING AND SERVICING HEARING AIDS
7. CONSUMER PROTECTION REGULATIONS —(Federal and State)

In developing this examination, the committee has made every effort to limit the examination to basic information that all hearing aid dispensers should know so that the public may be adequately protected.

The passing score on the examination will be set in a meeting of the committee on July 11. The committee, in reviewing the test, will define what it expects a person to know in order to be minimally qualified as a hearing aid dispenser.

Test-takers will be informed of the passing score as they begin the examination on August 24. Again, the purpose of the passing score will be to assure that the public is adequately protected. This is not a competitive examination in which the top group passes and the rest fail. If all test-takers are minimally qualified, as defined above, all will pass this examination.

The practicum component of the examination is only available to those who successfully complete the written examination. (The written exam will be offered October 19, 1985 only, at the ETS Headquarters in Evanston for those who fail the written component and wish to retake the examination.) The practicums will be comprised of eight stations each, manned by two examiners (certified hearing aid dispensers). All examiners will be trained by ETS to objectively and uniformly evaluate the practicum performance. This examination component is scheduled to take approximately one hour per person. Admission tickets with the assigned date and location will be mailed with notifications of passing the written examination. The practicums will be conducted:

October 22, 23, 24, 25 and December 4
(Chicago Metropolitan Area)

November 12, 13, (Springfield)

AT YOUR FINGER TIPS:

A toll-free action line was established earlier this year to acilitate the consumer service component of the Hearing Aid Consumer Protection Act (HACPA). Since its development, over 400 calls have been received by the Illinois Department of Public Health. A majority of the calls received focused on consumer education and awareness about the newly enacted program.

The toll-free telephone line (1-800-572-3270) is provided to respond to problems, questions, or about hearing aid goods and services. In addition, a telecommunication device for the deaf (TDD) can be accessed through this same number. Program staff are available 8:00 a.m. - 5:00 p.m. Monday - Friday to accept calls. A telephone answering device will accept telephone calls received after work hours. The toll-free action line is being promoted on posters and pamphlets developed and disseminated by the Hearing Aid Consumer Protection Program. Copies are available upon request by contacting the toll-free action line. All telephone calls are forwarded to IDPH Vision and Hearing Regional Consultants for follow-up.

"CONSUMER FRAUD AND DECEPTIVE BUSINESS PRACTICES ACT"

The Consumer Fraud and Deceptive Business Practices Act protects consumers, borrowers, and businessmen against fraud, unfair methods of competition and deceptive acts or practices in the conduct of any trade or commerce. It also clarifies the powers of the Attorney General. For these reasons, it is crucial that hearing aid dispensers and consumers understand the Consumer Fraud and Deceptive Business Practices Act. Several major points of this Act are identified below.

1. If a sale of merchandise involving $25 or more is made or contracted to be made to a consumer as a result of or in connection with a person's contact

with or call on the consumer, that consumer may void the contract or transaction by notifying the seller within three full business days following that day on which the contract was signed or the sale was made. In addition, the consumer must return in its original condition, any merchandise delivered to the consumer under the contract or sale.

2. At the time of a transaction, the dispenser should furnish the consumer with a completed receipt or contract containing a "Notice of Cancellation" informing the consumer that the transaction may be cancelled within three days.

3. The following statement shall be, located near the consumer's signature on the contract or on the front page of the receipt (if a contract is not used) in at least 10-point type.

   "YOU, THE CONSUMER, MAY CANCEL THIS TRANSACTION AT ANY TIME PRIOR TO MIDNIGHT OF THE THIRD BUSINESS DAY AFTER THE DATE OF THIS TRANSACTION. SEE THE ATTACHED NOTICE OF CANCELLATION FORM FOR AN EXPLANATION OF THIS RIGHT."

4. Attached to the receipt or contract shall be a completed form in duplicate, captioned "NOTICE OF CANCELLATION", which shall be easily detachable and shall contain in 10-point bold face type the information identified in the Consumer Fraud and Deceptive Business Practices Act.

These points are provided only to highlight a few of the major issues contained in this Act. If you would like to obtain a copy of this Act, contact the Illinois Department of Public Health.

ROSTER OF PREFERRED MAILING ADDRESSES FOR HEARING AID DISPENSER APPLICANTS

If the place of business of a certificant is changed from that address provided on the certificate and maintained on file by the Illinois Department of Public Health (IDPH), the certificant should notify IDPH in writing within 10 working days of the change. After a change in the business location, the dispenser should leave a forwarding address with the post office for one year and a forwarding telephone number for six months where the consumer can contact the dispenser.

A roster of preferred mailing addresses for Certified and Temporary Hearing Aid Dispenser applicants is now available to the general public. This list identifies each applicants preferred mailing address and the dispenser's certification status.

The cost of the roster is 25c/page which covers duplication, postage and handling expenses.

To obtain this list, contact the HACP Action Line by calling 1-800-572-3270.

IDPH WORKSHOP
Hearing Aid Dispensing Practices: An Overview

The Illinois Department of Public Health is offering a workshop entitled "Hearing Aid Dispensing Practices: An Overview," to orient hearing aid dispensers to the use of acceptable and appropriate dispensing practices. Especially designed for Temporary Certified Dispensers, the workshop was created to augment the skill and knowledge of dispensers. Experts from the field of medicine and the hearing aid industry will provide information regarding hearing aid selection and

fitting. The workshop will be offered at two locations:

August 1, 1985	August 2, 1985
Holiday Inn East 3100 S. Dirksen Parkway I-55 Junction By Pass 66 Stevenson Drive Audiovisual Room Springfield, Illinois	Holiday Inn 4400 Frontage Road Churchill Room Hillside, Illinois

AGENDA

8:00 a.m.	Registration	
8:30 a.m.	Consumer Protection: The Responsibilities of the Dispenser.	James. R. Nelson, Chief, Division of Health Promotion and Screening, IDPH
9:00 a.m.	Shall I Sign the Medical Waiver?	Leonard Rybak, M.D., Ph.D. Otolaryngologist, Springfield Memorial Medical Center (Springfield) Richard Wiet, M.D., Otolaryngologist, Hinsdale, IL (Hillside)
10:00 a.m.	BREAK	
10:15 a.m.	Hearing Aid Selection: Options and Alternatives	Ronald Regan, President, Argosy Electronics, Edina, Minnesota
11:45 a.m.	LUNCH	
1:00 p.m.	Earmolds: Making a Good Impression	Marie Jablin, Vice President Marketing & Audiological Research, Audiovox, Bensonville, IL
2:45 p.m.	BREAK	
3:00 p.m.	The Educational Testing Service (ETS):Test Preparation and Administration	Terri Strand, Ph.D., Professional Associate, ETS, Evanston, IL (Springfield)

3:00 p.m. (Continued)		George Elford, Director, Midwestern Region, Educational Testing Service, Evanston, Illinois (Hillside)
4:00 p.m.	Laboratory Session: Introduction to the Qualitone Acoustic Appraiser and the Bioacoustic Audiometric Simulator*	IDPH Staff
5:00 p.m.	CLOSURE	

* This equipment will be used in the practicum component of the Illinois Hearing Aid Dispenser Examination.

Those interested in attending this workshop should complete the following registration form.

REGISTRATION
Hearing Aid Dispensing Practices: An Overview

Please check the date and location you plan to attend. Advance registration fee is $40.00 (includes lunch, coffee and materials). At site registration will be $50.00.

____ August 1, 1985 (Springfield) ____ August 2, 1985 (Hillside)

Please type or print

NAME: _____

CERTIFICATION I.D. NUMBER: _____

Springfield, Illinois 62761

NO REFUNDS WILL BE AVAILABLE AFTER JULY 19, 1985

such receipt in Court shall be grounds for dismissal of the action.

For repeal of Act, see note preceding ¶ 7001 of this chapter.

7025.16. Penalties

§ 25.16. Any person who is found to have violated any provision of this Act is guilty of a Class A misdemeanor. On conviction of a second or subsequent offense, the violator shall be guilty of a Class 4 felony.

For repeal of Act, see note preceding ¶ 7001 of this chapter.

7026. State powers and functions

§ 26. It is declared to be the public policy of this State, pursuant to paragraphs (h) and (i) of Section 6 of Article VII of the Illinois Constitution of 1970, that any power or function set forth in this Act to be exercised by the State is an exclusive State power or function. Such power or function shall not be exercised concurrently, either directly or indirectly, by any unit of local government, including home rule units, except as otherwise provided in this Act.

For repeal of Act, see note preceding ¶ 7001 of this chapter.

7027. Administrative Procedure Act

§ 27. "The Illinois Administrative Procedure Act", approved September 22, 1975, as amended,[1] is hereby expressly adopted and incorporated herein as if all of the provisions of such Act were included in this Act, except that the provision of paragraph (c) of Section 16 of "The Illinois Administrative Procedure Act", as amended,[2] which provides that at hearings the licensee has the right to show compliance with all lawful requirements for retention, or continuation or renewal of the license, is specifically excluded, and for the purpose of this Act the notice required under Section 10 of "The Illinois Administrative Procedure Act", as amended,[3] is considered sufficient when mailed to the last known address of a party.

[1] Chapter 127, ¶ 1001 et seq.

[2] Chapter 127, ¶ 1016.

[3] Chapter 127, ¶ 1010.

For repeal of Act, see note preceding ¶ 7001 of this chapter.

7028. Rights under prior laws

§ 28. Rights and obligations incurred and any actions commenced under the "Veterinary Medicine and Surgery Practice Act", approved August 14, 1961, as amended,[1] as it existed prior to the effective date of this Act shall not be impaired by the enactment of this Act. Rules adopted under the former Act, unless clearly inconsistent with the provisions of this Act, shall remain in effect until amended or rescinded.

All licenses heretofore legally issued in this State permitting the holder thereof to practice veterinary medicine and surgery and valid and in effect on the taking effect of this Act shall have the same force, and be subject to the same authority of the Department to revoke or suspend them as licenses issued under this Act.

[1] Paragraph 4901 et seq. (repealed) of this chapter.

For repeal of Act, see note preceding ¶ 7001 of this chapter.

HEARING AID CONSUMER PROTECTION ACT

AN ACT to regulate the selling, practice of fitting, dispensing or servicing of hearing aids in the State of Illinois. P.A. 83-928, am. veto overridden Nov. 1, 1983, eff. July 1, 1984.

Repeal of Act

P.A. 81-959, the Regulatory Agency Sunset Act, eff. Sept. 22, 1979, which provides for the legislative review of programs and agencies which regulate professions, occupations, business, industry and trade in Illinois, as amended by P.A. 83-928, § 37, eff. July 1, 1984, provided in section 1.1 of the Act for repeal of "The 'Hearing Aid Consumer Protection Act', enacted by the 83rd General Assembly, as now or hereafter amended", effective Dec. 31, 1995. For complete text of the Regulatory Agency Sunset Act, see ¶ 1901 et seq. of chapter 127.

7401. Purpose

Paragraph effective July 1, 1984.

§ 1. The purpose of this Act is to protect the hearing-impaired public from incompetent and dishonest dispensers of hearing aids who could endanger the health, safety and welfare of the People of this State. The Federal Food and Drug Administration has recommended that State legislation is necessary in order to establish standards of competency and to impose stringent penalties for those who violate the public trust in this field of health care.

For repeal of Act, see note preceding this paragraph.

7402. Short title

Paragraph effective July 1, 1984.

§ 2. This Act shall be known as the Hearing Aid Consumer Protection Act.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7403. Definitions

Paragraph effective July 1, 1984.

§ 3. As used in this Act, except as the context requires otherwise:

(a) "Department" means the Department of Public Health.

(b) "Director" means the Director of the Department of Public Health.

(c) "Certification" means a certificate issued by the State under this Act to a hearing aid dispenser.

(d) "Temporary certificate" means a certificate issued while the applicant is in training or is qualifying to become a certified hearing aid dispenser.

(e) "Clinical Audiologist" means a person with a Masters Degree in Audiology who holds a certificate of clinical competence in Audiology from the American Speech and Hearing Association or its equivalent.

(f) "Hearing Aid Audiologist" means a person who has been so certified after qualification by examination and experience by the National Board of Certification of the National Hearing Aid Society.

(g) "Licensed Physician" means a physician licensed to practice medicine in all of its branches.

(h) "Board" means the Hearing Aid Consumer Protection Board.

(i) "Hearing aid" means any instrument or device designed, intended or offered for the purpose of effectively compensating for impaired human hearing and any parts, attachments or accessories, including earmold. However, batteries, cords and individual or group auditory training devices and any instrument or device used by a public utility in providing telephone or other communication services are excluded.

(j) "Practice of fitting, dispensing and servicing of hearing aids" means the selection, adaptation, sale and service of hearing aids and include the testing of hearing by means of an audiometer properly calibrated to American National Standard Institute standards.

(k) "Sell" or "sale" means any transfer of title or of the right to use by lease, bailment, or any other contract, excluding wholesale transactions with distributors or dealers.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7404. Consumer information—Medical evaluation—Waiver—Complaint procedure—Liability insurance

Paragraph effective July 1, 1984.

§ 4. Every person fitted and sold a hearing aid shall be given, at no charge, the "User Instructional Brochure", supplied by all hearing aid manufacturers, containing advice to the user regarding requirements for evaluation by licensed physicians, specific waivers to the medical evaluation requirements, hearing aid manufacturer evaluations, purchase privileges and technical data.

Any person who fits, dispenses, services or sells hearing aids shall deliver to each person supplied with a hearing aid a receipt which shall contain the seller's signature, number, the manufacturer's specifications, the name, model and serial number of the hearing aid furnished and the full sales terms clearly stated. If a used hearing aid is sold, the receipt and the container thereof shall be clearly marked as "used" or "reconditioned", whichever is applicable, with terms of guarantee, if any.

A hearing aid dispenser shall not sell a hearing aid unless the prospective user has presented to the hearing aid dispenser a written statement signed by a licensed physician which states that the patient's hearing loss has been medically evaluated and the patient may be considered a candidate for a hearing aid. The medical evaluation must have taken place within the 6 months immediately preceding the time the written statement is presented by the prospective hearing aid user to the hearing aid dispenser. If the prospective hearing aid user is 18 years of age or older, the hearing aid dispenser may afford the prospective user an opportunity to waive the medical evaluation requirement of this Section, provided that the hearing aid dispenser:

(i) Informs the prospective user that the exercise of the waiver is not in the user's best health interest;

(ii) Does not in any way actively encourage the prospective user to waive such a medical evaluation; and

(iii) Affords the prospective user the opportunity to sign the following statement:

I have been advised by _____ (Hearing aid dispenser's name) that the Food and Drug Administration has determined that my best interest would be served if I had a medical evaluation by a licensed physician (preferably a physician who specializes in diseases of the ear) before purchasing a hearing aid. I do not wish a medical evaluation before purchasing a hearing aid.

The hearing aid dispenser shall retain such proof of medical examination or waiver for at least 4 years.

If the parent or guardian of any individual under the age of 18 years is a member of any church or religious denomination, whose tenets and practices include reliance upon spiritual means through prayer alone and objects to medical treatment and so states in writing to the hearing aid dispenser, such individual shall undergo a hearing examination as provided by this Section, but no proof, ruling out any medically treatable problem causing hearing loss, shall be required.

All persons certified under this Act shall have conspicuously displayed in their business establishment a sign indicating that formal complaints regarding hearing aid goods or services may be made to the Department. Such sign shall give the address of the Department. All persons purchasing hearing aids shall be provided with a written statement indicating that formal complaints regarding hearing aid goods or services may be made to the Department and shall give the address of the Department.

Any person wishing to make a complaint, against a hearing aid dispenser under this Act, shall file it with the Department within 3 years from the date of the action upon which the complaint is based. The Department shall investigate all such complaints.

All persons certified under this Act shall maintain liability insurance as set forth by rule and shall be responsible for the annual calibration of all audiometers in use by such persons. Such annual calibrations shall be in conformance with the standards set by American National Standard Institute.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7405. Certified hearing aid dispensers

Paragraph effective July 1, 1984.

§ 5. No person shall engage in the selling, practice of fitting, dispensing or servicing hearing aids or display a sign, advertise or represent oneself as a person who practices the fitting and selling of hearing aids after January 1, 1985, unless such person holds a current certificate issued by the Department as provided in this Act. For purposes of this Act, such person shall be known as a certified hearing aid dispenser. The certificate shall be conspicuously displayed in the place of business. Duplicate certificates shall be issued by the Department to valid certificate holders operating more than one office, with such additional payment as may be required.

Nothing in this Act shall prohibit a corporation, partnership, trust, association or other organization maintaining an established business address, from engaging in the business of fitting and selling or offering for sale hearing aids at retail without a certificate, provided it employs only certified individuals in the direct fitting and dispensing of such products. Each such corporations, partnerships, trusts, associations or other organizations shall file annually, with the Department, a list of all certified hearing aid dispensers employed by it. Such organizations shall also file with the Department a statement that they comply with this Act, the rules issued pursuant to it and the regulations of the Federal Food and Drug Administration

and the Federal Trade Commission insofar as they are applicable.

For repeal of Act, see note preceding ¶ 7101 of this chapter.

7406. Sale of hearing aids by business organizations—Registration—Disclosure statement—Consent to service of process—Right of cancellation by consumer of mail order—Other requirements

Paragraph effective July 1, 1984.

§ 6. Nothing in this Act shall prohibit a corporation, partnership, trust, association or other organization maintaining an established business address, from engaging in the business of selling or offering for sale hearing aids at retail by mail to persons 18 years of age or older who have not been examined by a licensed physician or tested by a certified hearing aid dispenser provided that:

(a) Each such organization is registered by the Department prior to engaging in business in this State.

(b) Each such organization files with the Department, prior to registration and annually thereafter, a Disclosure Statement containing the following:

(1) the name under which the organization is doing or intends to do business and the name of any affiliated company which the organization recommends or will recommend to persons as a supplier of goods or services or in connection with other business transactions of the organization;

(2) the organization's principal business address and the name and address of its agent in this State authorized to receive process;

(3) the business form of the organization, whether corporate, partnership, or otherwise and the state of other sovereign power under which the organization is organized;

(4) the names of the directors or persons performing similar functions and names and addresses of the chief executive officer, and the financial, accounting, sales, and other principal executive officers, if the organization is a corporation, association, or other similar entity; of all general partners, if the organization is a partnership; and of the owner, if the organization is a sole proprietorship, together with a statement of the business background during the past 5 years for each such person;

(5) a statement as to whether the organization or any person identified in the disclosure statement:

(i) has during the 5 year period immediately preceding the date of the disclosure statement been convicted of a felony, pleaded nolo contendere to a felony charge, or been held liable in a civil action by final judgment, if such felony or civil action involved fraud, embezzlement, or misappropriation of property, and a description thereof; or

(ii) is subject to any currently effective injunctive or restrictive order as a result of a proceeding or pending action brought by any public agency or department, and a description thereof; or

(iii) is a defendant in any pending criminal or material civil action relating to fraud, embezzlement, misappropriation of property or violations of the antitrust or trade regulation laws of the United States or any state, and a description thereof; or

(iv) has during the 5 year period immediately preceding the date of the disclosure statement had entered against such person or organization a final judgment in any material civil proceeding, and a description thereof; or

(v) has during the 5 year period immediately preceding the date of the disclosure statement been adjudicated a bankrupt or reorganized due to insolvency or was a principal executive officer or general partner of any company that has been adjudicated a bankrupt or reorganized due to insolvency during such 5 year period, and a description thereof;

(6) the length of time the organization and any predecessor of the organization has conducted a business dealing with hearing aid goods or services;

(7) a financial statement of the organization audited by an independent certified public accountant, as of the close of the most recent fiscal year of the organization. If the financial statement is filed later than 120 days following the close of the fiscal year of the organization it must be accompanied by a statement of the organization of any material changes in the financial condition of the organization. The Department may in its discretion waive the requirement for audited statements for organizations who have not previously had such certified audits, if the unaudited financial statement is prepared by an independent certified public accountant. If the unaudited financial statement is filed later than 120 days following the close of the fiscal year of the organization, it must be accompanied by a statement of the organization of any material changes in the financial condition of the organization;

(8) a general description of the business, including without limitation a description of the goods, training programs, supervision, advertising, promotion and other services provided by the organization;

(9) a statement of any compensation or other benefit given or promised to a public figure arising, in whole or in part, from (i) the use of the public figure in the name or symbol of the organization or (ii) the endorsement or recommendation of the organization by the public figure in advertisements;

(10) a statement setting forth such additional information and such comments and explanations relative to the information contained in the disclosure statement as the organization may desire to present.

(c) Each such organization files with the Department prior to registration and annually thereafter a statement that they comply with the Act, the rules issued pursuant to it and the regulations of the Federal Food and Drug Administration and the Federal Trade Commission insofar as they are applicable.

(d) Each such organization files with the Department at the time of registration an irrevocable consent to service of process authorizing the Department and any of its successors to be served any notice, process or pleading in any action or proceeding against such organization arising out of or in connection with any violation of this Act. Such service shall have the effect of conferring personal jurisdiction over such organization in any court of competent jurisdiction.

(e) Each such organization affords the prospective user an opportunity to waive the medical evaluation requirement of Section 4 of this Act [1] and the testing requirement of subsection (j) of Section 3 [2] and subsection (z) of Section 18 [3] provided that the organization:

(1) informs the prospective user that the exercise of the waiver is not in the user's best health interest;

2) does not in any way actively encourage the prospective user to waive such a medical evaluation or test; and

3) affords the prospective user the opportunity to sign a following statement:

"I have been advised by ____ (Hearing Aid dispenser's name) that the Food and Drug Administration and the State of Illinois have determined that my best interests would be served if I had a medical evaluation by a licensed physician, preferably a physician who specialized in diseases of the ear, before purchasing a hearing aid; or a test by a certified hearing aid dispenser utilizing established procedures and instrumentation in the fitting of hearing aids. I do not wish either a medical evaluation or test before purchasing a hearing aid".

(c) Where a sale, lease, or rental of hearing aids is sold or contracted to be sold to a consumer by mail order, that consumer may avoid the contract or sale by notifying the seller within 45 full business days following that day on which the hearing aids were mailed by the seller to the consumer and by returning to the seller in its original condition, any hearing aid delivered to the consumer under the contract or sale. At the time the hearing aid is mailed the seller shall furnish the consumer with a fully completed receipt or copy of any contract pertaining to such sale containing a "Notice of Cancellation" informing the consumer that he may cancel the sale at any time within such 45 days and which shows the date of the mailing and contains the name, address and telephone number of the seller, and in immediate proximity to the space reserved in the contract for the signature of the consumer or on the front page of the receipt if a contract is not used and in bold face type of a minimum size of 10 points, a statement in substantially the following form:

"You, the buyer, may cancel this transaction at any time prior to midnight of the 45th business day after the date of this transaction. See the attached notice of cancellation form for an explanation of this right".

Attached to the receipt or contract shall be a completed form in duplicate, captioned "NOTICE OF CANCELLATION" which shall be easily detachable and which shall contain in 10 point bold face type the following information and statements in the same language as that used in the contract:

NOTICE OF CANCELLATION

enter date of transaction

(DATE)

YOU MAY CANCEL THIS TRANSACTION, WITHOUT ANY PENALTY OR OBLIGATION, WITHIN 45 BUSINESS DAYS FROM THE ABOVE DATE.

IF YOU CANCEL, ANY PROPERTY TRADED IN, ANY PAYMENTS MADE BY YOU UNDER THE CONTRACT OR SALE, AND ANY NEGOTIABLE INSTRUMENT EXECUTED BY YOU WILL BE RETURNED WITHIN 10 BUSINESS DAYS FOLLOWING RECEIPT BY THE SELLER OF YOUR CANCELLATION NOTICE, AND ANY SECURITY INTEREST ARISING OUT OF THE TRANSACTION WILL BE CANCELLED.

IF YOU CANCEL, YOU MUST MAKE AVAILABLE TO THE SELLER AT YOUR RESIDENCE, IN SUBSTANTIALLY AS GOOD CONDITION AS WHEN RECEIVED, ANY GOODS DELIVERED TO YOU UNDER THIS CONTRACT OR SALE, OR YOU MAY IF YOU WISH, COMPLY WITH THE INSTRUCTIONS OF THE SELLER REGARDING THE RETURN SHIPMENT OF THE GOODS AT THE SELLER'S EXPENSE AND RISK.

IF YOU DO MAKE THE GOODS AVAILABLE TO THE SELLER AND THE SELLER DOES NOT PICK THEM UP WITHIN 20 DAYS OF THE DATE OF YOUR NOTICE OF CANCELLATION, YOU MAY RETAIN OR DISPOSE OF THE GOODS WITHOUT ANY FURTHER OBLIGATION. IF YOU FAIL TO MAKE THE GOODS AVAILABLE TO THE SELLER, OR IF YOU AGREE TO RETURN THE GOODS TO THE SELLER AND FAIL TO DO SO, THEN YOU REMAIN LIABLE FOR PERFORMANCE OF ALL OBLIGATIONS UNDER THE CONTRACT.

TO CANCEL THIS TRANSACTION, MAIL OR DELIVER A SIGNED AND DATED COPY OF THIS CANCELLATION NOTICE OR ANY OTHER WRITTEN NOTICE, OR SEND A TELEGRAM, TO (name of seller), AT (address of seller's place of business) AND (seller's telephone number) NO LATER THAN MIDNIGHT OF ____ (date).

I HEREBY CANCEL THIS TRANSACTION.

(Date) _____

_____

(Buyers Signature)

Such written "Notice of Cancellation" may be sent by the consumer to the seller to cancel the contract. The 45 day period provided for in this Section does not commence until the consumer is furnished the Notice of Cancellation, the address and phone number at which such notice to the seller can be given is furnished.

If the conditions of this Section are met, the seller must return to the consumer the full amount of any payment made or consideration given under the contract or for the merchandise.

It is an unlawful practice within the meaning of this Act for a seller to: (1) mail hearing aids to a consumer other than by certified mail; (2) fail, before furnishing copies of the "Notice of Cancellation" to the consumer, to complete both copies by entering the name of the seller, the address of the seller's place of business, the seller's telephone number, the date of the mailing, and the date, not earlier than the 45th business day following the date of the mailing, by which the consumer may give notice of cancellation; (3) include in any contract or receipt any confession of judgment or any waiver of any of the rights to which the consumer is entitled under this Section including specifically his right to cancel the sale in accordance with the provisions of this Section; (4) misrepresent in any manner the consumer's right to cancel; (5) use any undue influence, coercion, or any other wilful act or representation to interfere with the consumer's exercise of his rights under this Section; (6) fail or refuse to honor any valid notice of cancellation by a consumer and within 10 business days after the receipt of such notice, to (i) Refund all payments made under the contract or sale, (ii) return any goods or property traded in, in substantially as good condition as when received by the person, (iii) cancel and return any negotiable instrument executed by the consumer in connection with the contract or sale and take any action necessary or appropriate to terminate promptly any security interest created in the transaction; (7) negotiate, transfer, sell or assign any note or other evidence of indebtedness to a finance company or other third party prior to midnight of the 50th business day following the day of the mailing; or (8) fail, within 10 business days of receipt of the consumer's notice of cancellation, to notify him wherein

er the seller intends to repossess or to abandon any stopped or delivered goods.

(g) Each such organization employs only certified individuals in the dispensing of hearing aids and files annually, with the Department, a list of all certified hearing aid dispensers employed by it.

[1] Paragraph 7404 of this chapter.

[2] Paragraph 7403 of this chapter.

[3] Paragraph 7418 of this chapter.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7407. Exemptions

Paragraph effective July 1, 1984.

§ 7. The following are exempt from this Act:

(a) Persons who measure human hearing and who fit hearing aids for the sole purpose of audiological evaluations. Such persons shall not sell or dispense hearing aids or accessories thereto unless certified under this Act.

(b) Licensed physicians.

(c) Persons who only repair or manufacture hearing aids and their accessories.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7408. Examination of hearing aid dispensers—Requirements of applicants

Paragraph effective July 1, 1984.

§ 8. In order to protect the hearing-impaired individual, the Department shall authorize or shall conduct an appropriate examination for persons who dispense, fit or service hearing aids. The Department may use the test prepared by the National Institute for Hearing Instruments Studies. Those who successfully pass such an examination shall be issued a certificate as a hearing aid dispenser which shall be effective for a 3-year period. Applicants shall be:

(1) At least 18 years of age;

(2) Of good moral character;

(3) A high school graduate or the equivalent;

(4) Free of contagious or infectious disease; and

(5) A citizen or person who has the status as a legal alien.

An applicant for certification by examination shall, by means of written and practical tests, demonstrate that such person is qualified to practice the fitting, selling and servicing of hearing aids.

The renewal of a certificate shall be contingent upon compliance with the continuing education requirement as determined by the Board.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7409. Matters included in examination

Paragraph effective July 1, 1984.

§ 9. The examination required by Section 8 [1] shall demonstrate the applicant's technical qualifications by:

(a) Tests of knowledge in the following areas as they pertain to the fitting and selling of hearing aids:

(1) Characteristics of sound;

(2) The nature of the ear; and

(3) The function and maintenance of hearing aids.

(b) Practical tests of proficiency in the following techniques as they pertain to the fitting of hearing aids:

(1) Pure tone audiometry including air conduction testing and bone conduction testing;

(2) Live voice or recorded voice speech audiometry, including speech reception, threshold testing and speech discrimination testing;

(3) Masking;

(4) Proper selection and adaptation of a hearing aid in relation to the above procedure;

(5) Taking earmold impressions;

(6) Proper maintenance procedures; and

(7) A general knowledge of the medical and physical contra-indications to the use and fitting of a hearing aid.

(c) Knowledge of the general medical and hearing rehabilitation facilities in the area being served.

[1] Paragraph 7408 of this chapter.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7410. Provisional certificates

Paragraph effective July 1, 1984.

§ 10. For the period of 6 months immediately following the effective date of this Act, an applicant for certification shall be issued a certificate, provided the applicant:

(a) Has been engaged, at a place of business in Illinois, as a hearing aid dispenser for a total of at least 2 years within the 5-year period immediately prior to July 1, 1984;

(b) Is a person of good moral character;

(c) Is 18 years of age or older;

(d) Is free of contagious or infectious disease;

(e) Agrees, in writing, to comply with the provisions of this Act, the rules issued hereunder and the applicable regulations of the Federal Food and Drug Administration and the Federal Trade Commission;

(f) Pays the appropriate fee; and

(g) Is a citizen or has the status of a legal alien.

However, within 3 years of the effective date of this Act, all persons granted a certificate under this Section shall be required to pass the examination required by Section 8.[1] Those who do not pass the examination within this period shall immediately surrender their certificate to the Department and cease operating as a hearing aid dispenser. Upon failure to do so, the Department shall seize the certificate.

[1] Paragraph 7408 of this chapter.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7411. Temporary certificates

Paragraph effective July 1, 1984.

§ 11. An applicant who fulfills the requirements regarding age, character, education and health, as set forth in Section 8,[1] may obtain a temporary certificate upon application to the Department. Previous experience or a waiting period shall not be a requirement to obtain a temporary or qualifying certificate. Upon receiving such application, when accompanied by the appropriate fee, the Department shall issue a temporary certificate which entitles the applicant to engage in the fitting, dispensing and

...ising of hearing aids for a period not to exceed one ...r. A temporary certificate shall not be renewable and ...e applicant must take the examination within a year ...ter receiving the temporary certificate. All applicants ...r a temporary certificate shall be employed by a person ...o has a certificate as a hearing aid dispenser. Such ...rson shall be responsible for the supervision and train... of the applicant and shall maintain personal contact ...nd records.

The Department may issue a temporary certificate to an ...pplicant starting a hearing aid dealership as sole owner, ...rincipal of a firm, or employee-manager for a corporation ...f the applicant's training is provided by a manufacturer ...r by a person who holds a valid certificate issued under this Act, and if the new dealer, not later than 5 days prior to the commencement of operation under a temporary certificate, obtains and files with the Department a surety bond in the sum of at least $5,000, which shall be conditioned on the satisfactory performance, pursuant to and in accordance with this Act and the rules hereunder, during the period covered by the temporary certificate.

[1] Paragraph 7408 of this chapter.

For repeal of Act, see note preceding § 7401 of this chapter.

7412. Registration of person licensed or certified in another state

Paragraph effective July 1, 1984.

§ 12. The Department may register as a hearing aid dispenser without examination, but upon payment of the required fee, an applicant who has a certificate or license in good standing to practice in another state, if the requirements in such state are substantially equal to the requirements imposed by this Act. Applicants who meet such endorsement requirements may practice in this State pending action on their application. If the application is denied, their right to practice ceases on the date of denial.

For repeal of Act, see note preceding § 7401 of this chapter.

7413. Expiration and renewal of certificates

Paragraph effective July 1, 1984.

§ 13. The expiration date and renewal period for each certificate issued under this Act shall be set by rule. A hearing aid dispenser whose certificate has expired may have it reinstated within 3 years after the expiration thereof, by making a renewal application therefor and by paying the required fee. However, any hearing aid dispenser whose certificate expired while: (1) on active duty with the Armed Forces of the United States, or the State Militia called into service or training, or (2) in training or education under the supervision of the United States preliminary to induction into the military service, may have the certificate renewed, reinstated or restored without paying any lapsed renewal fees if, within 2 years after honorable termination of such service, training or education, except under conditions other than honorable, such person must furnish the Department with satisfactory evidence of being so engaged and that the service, training or education has been terminated.

If the hearing aid dispenser has not practiced for 5 years or more, the Board shall determine, by an evaluation program established by rule, such person's fitness to resume active status and may require the hearing aid dispenser to complete a period of evaluated experience and may require successful completion of the examination.

Any hearing aid dispenser whose certificate has expired for more than 5 years prior to July 1, 1984 may have it restored by making application, and filing acceptable proof, to the Department of his fitness to have such certificate restored, including sworn evidence certifying to active practice in another jurisdiction and by paying the required restoration fee.

For repeal of Act, see note preceding § 7401 of this chapter.

7414. Powers and duties of department

Paragraph effective July 1, 1984.

§ 14. The powers and duties of the Department are:

(a) To supervise issuance of certificates and to administer examinations to applicants. However, the Department may authorize a testing service to provide this function or it may use the test prepared by the National Institute for Hearing Instruments Studies.

(b) To certify persons who are qualified to engage in the fitting, selling and dispensing of hearing aids;

(c) To provide the equipment and facilities necessary for the examination;

(d) To issue and to renew certificates;

(e) To suspend or revoke certificates or to take such other disciplinary action as provided in this Act;

(f) To consider all recommendations of the Board and to inform it of all actions of the Department insofar as hearing aid dispensers are concerned, including any instances where the actions of the Department are contrary to the recommendations of the Board; and

(g) To promulgate rules necessary to implement this Act.

For repeal of Act, see note preceding § 7401 of this chapter.

7415. Fees—Disposition of fees

Paragraph effective July 1, 1984.

§ 15. (a) The following are fees to be charged and are not refundable:

(1) The fee for application for a certificate is $25.

(2) In addition to the application fee, applicants for any examination shall be required to pay, either to the Department or to the designated testing service, a fee covering the actual cost of the examination. Failure to appear for the examination on the scheduled date, at the time and place specified, after the applicant's application and fee for the examination has been received and acknowledged by the Department or the designated testing service, shall result in the forfeiture of the fee.

(3) The fee for the renewal of a certificate shall be $30 per year.

(4) The fee for the reinstatement of a certificate which has expired for not more than 5 years is $10, plus payment of all lapsed renewal fees.

(5) The fee for the restoration of a certificate which has expired for more than 5 years is $100.

(6) The fee for the issuance of a duplicate certificate, for the issuance of a replacement certificate which has been lost or destroyed or for the issuance of a certificate with a change of name or address, other than during the renewal

period, is $10. No fee is required for name and address changes on Department records when no duplicate certificate is issued.

(7) The fee for a certification of a registrant's record for any purpose is $10.

(8) The fee to have the scoring of an examination administered by the Department reviewed and verified is $10, plus any fee charged by the testing service.

(9) The fee for a wall certificate shall be the actual cost of such certificate.

(10) The fee for a roster of persons registered as hearing aid dispensers shall be the actual cost of such roster.

(b) The moneys received as license fees by the Department of Public Health under this Act shall be deposited in the Hearing Aid Dispenser Examining and Certification Fund, which is hereby created as a special fund in the State Treasury, and shall be used only for the administration of this Act, including: (1) costs directly related to certification of persons under this Act; and (2) by the Hearing Aid Consumer Protection Board in the exercise of its powers and performance of its duties, and such use shall be made by the Department of Public Health with full consideration of all recommendations of the Hearing Aid Consumer Protection Board.

For the fiscal year beginning July 1, 1984, the moneys deposited in the Hearing Aid Dispenser Examining and Certification Fund shall be appropriated to the Department for expenses of the Department and the Hearing Aid Consumer Protection Board in the administration of this Act.

Moneys in the Hearing Aid Dispenser Examining and Certification Fund may be invested and reinvested, with all earnings received from such investment to be deposited in the Hearing Aid Dispenser Examining and Certification Fund and used for the same purposes as fees deposited in such fund.

Upon the completion of any audit of the Department as prescribed by the Illinois State Auditing Act,[1] which audit includes an audit of the Hearing Aid Dispenser Examining and Certification Fund, the Department shall make a copy of the audit open to inspection by any interested person, which copy shall be submitted to the Department by the Auditor General, in addition to the copies of audit reports required to be submitted to other State officers and agencies by Section 3–14 of the Illinois State Auditing Act.[2]

[1] Chapter 15, ¶ 301–1 et seq.

[2] Chapter 15, ¶ 303–14.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7416. Hearing aid consumer protection board—Establishment—Members

Paragraph effective July 1, 1984.

§ 16. There shall be established a Hearing Aid Consumer Protection Board which shall assist, advise and make recommendations to the Department pursuant to this Act.

The Board shall consist of 5 members who shall be residents of Illinois. One shall be a licensed physician who specializes in otology or otolaryngology; one shall be a member of a consumer-oriented organization concerned with the hearing impaired; one shall be from the general public, preferably a senior citizen; and 2 shall be certified hearing aid dispensers. Each such certified hearing aid dispenser shall have at least 5 years of experience, excepting those appointed to the first Board. One of the certified hearing aid dispensers shall be a Certified Clinical Audiologist, the other shall be a Certified Hearing Aid Audiologist.

Members of the Board shall be appointed by the Director. The term of office of each shall be 4 years, except for those of the first Board, 2 shall be appointed for 2 year terms. Before a member's term expires, the Director shall appoint a successor to assume member's duties at the expiration of his predecessor's term. A vacancy shall be filled by appointment for the unexpired term. The members shall annually designate one member as chairman. No member of the Board who has served 2 or more successive and full terms may be reappointed. The Director may remove members for good cause.

Members of the Board shall receive reimbursement for actual and necessary travel and for other expenses, not to exceed the limit established by the Department.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7417. Duties of board

Paragraph effective July 1, 1984.

§ 17. The Board shall advise the Department in all matters relating to this Act and shall assist as requested by the Director.

The Board shall respond to issues and problems relating to the improvement of services to the hearing-impaired and shall make such recommendations as it considers advisable. It shall file an annual report with the Director and shall meet at least twice a year.

The Board shall recommend specialized education programs for persons wishing to become certified as hearing aid dispensers and shall, by rule, establish minimum standards of continuing education required for certificate renewal.

The Board shall hear charges brought against hearing aid dispensers and shall recommend disciplinary action to the Director.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7418. Disciplinary actions by department—Grounds

Paragraph effective July 1, 1984.

§ 18. The Department may refuse to issue or renew a certificate or it may revoke, suspend, place on probation, censure or reprimand a certificate holder for any of the following:

(a) Material misstatement in furnishing information to the Department;

(b) Violations of this Act, or the rules promulgated hereunder;

(c) Conviction of any crime under the laws of the United States or any state or territory thereof which is a felony or misdemeanor, an essential element of which is dishonesty, or of any crime which is directly related to the practice of the profession;

(d) Making any misrepresentation for the purpose of obtaining a certificate or renewing a certificate, including falsification of the continuing education requirement;

(e) Professional incompetence;

(f) Malpractice;

(g) Aiding or assisting another person in violating any provision of this Act or the rules promulgated hereunder;

(h) Failing, within 60 days, to provide information in response to a written request made by the Department;

(i) Engaging in dishonorable, unethical or unprofessional conduct which is likely to deceive, defraud or harm the public;

(j) Knowingly employing, directly or indirectly, any suspended or unregistered person to perform any services covered by this Act;

(k) Habitual intoxication or addiction to the use of drugs;

(l) Discipline by another state, the District of Columbia, territory, or a foreign nation, if at least one of the grounds for the discipline is the same or substantially equivalent to those set forth herein;

(m) Directly or indirectly giving to or receiving from any person, firm, corporation, partnership or association any fee, commission, rebate or other form of compensation for any professional services not actually rendered;

(n) A finding by the Board that the registrant, after having his certificate placed on probationary status has violated the terms of probation;

(o) Willfully making or filing false records or reports;

(p) Willfully failing to report an instance of suspected child abuse or neglect as required by the "Abused and Neglected Child Reporting Act", approved June 26, 1975, as amended; [1]

(q) Physical illness, including but not limited to, deterioration through the aging process, or loss of motor skill which results in the inability to practice the profession with reasonable judgment, skill or safety;

(r) Solicitation of professional services other than by permitted advertising;

(s) Participating in subterfuge or misrepresentation in the fitting and servicing of a hearing aid;

(t) Advertising a particular model or type of hearing aid for sale, when prospective purchasers cannot purchase the advertised model or type, where it is established that the purpose of the advertisement is to obtain prospects for the sale of a different model or type than that advertised;

(u) Representing that the services of a licensed physician will be used or made available in the fitting, adjustment, maintenance or repair of hearing aids when that is not true, or using the words "doctor", "audiologist", "clinic", "Clinical Audiologist", "Certified Hearing Aid Audiologist", "State Certified", "Certified Hearing Aid Dispenser" or any other term, abbreviation or symbol when it would give the impression that service is being provided by persons awarded that degree or title, or that the person's service who is holding the certificate has been recommended by a governmental agency, when such is not the case;

(v) Advertising a manufacturer's product or using a manufacturer's name or trademark implying a relationship which does not exist;

(w) Directly or indirectly giving or offering anything of value to any person who advises another in a professional capacity, as an inducement to influence the purchase of a product sold or offered for sale by a hearing aid dispenser or influencing persons to refrain from dealing in the products of competitors;

(x) Conducting business while suffering from a contagious disease;

(y) Engaging in the fitting and sale of hearing aids under a name with fraudulent intent;

(z) Dispensing a hearing aid to a person who has not been given tests utilizing appropriate established procedures and instrumentation in the fitting of hearing aids, except where there is the replacement of a hearing aid, of the same make and model;

(aa) Unavailability or unwillingness to adequately provide for service and repair of hearing aids fitted and sold by the dispenser;

(bb) Violating the regulations of the Federal Food and Drug Administration or the Federal Trade Commission as they affect hearing aids;

(cc) Violating any provision of the "Consumer Fraud and Deceptive Business Practices Act", approved July 24, 1961, as amended.[2]

[1] Chapter 23, ¶ 2051 et seq.

[2] Chapter 121½, ¶ 261 et seq.

For repeal of Act, see note preceding ¶ 7101 of this chapter.

7419. Dispensing of hearing aids without certificate—Injunction—Costs

Paragraph effective July 1, 1984.

§ 19. The practice of fitting, dispensing and servicing hearing aids by any person not at that time holding a valid and current certificate under this Act is hereby declared to be inimical to the public welfare and constitutes a public nuisance. The Director of the Department, through the Attorney General or the State's Attorney of any county, may maintain an action in the name of the people of the State of Illinois and may apply for an injunction in the circuit court to enjoin any such person from engaging in such practice. Upon the filing of a verified petition in such court, the court, if satisfied by affidavit, or otherwise, that such person has been engaged in such practice without a current certificate to do so, may issue a temporary injunction without notice or bond, enjoining the defendant from any such further practice. A copy of the verified complaint shall be served upon the defendant and the proceedings shall thereafter be conducted as other civil cases. If it is established that the defendant has been, or is engaged in any unlawful practice, the court may enter an order or judgment perpetually enjoining the defendant from further such practice. In all proceedings hereunder, the court, in its discretion, may apportion the costs among the parties interested in the suit, including cost of filing complaint, service of process, witness fees and expenses, court reporter charges and reasonable attorneys fees. In case of violation of any injunction issued pursuant to this Section, the court may try and punish the offender for contempt of court. Such injunction proceedings shall be in addition to all penalties and other remedies in this Act.

For repeal of Act, see note preceding ¶ 7101 of this chapter.

7420. Inactive status

Paragraph effective July 1, 1984.

§ 20. Any hearing aid dispenser who notifies the Department, on the prescribed forms, may place such certificate on inactive status and shall be exempt from payment of renewal fees until such person notifies the Department

cate to the Department and if such person fails to do so, the Department shall seize such certificate.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7427. Restoration of certificate

Paragraph effective July 1, 1984.

§ 27. At any time after the suspension or revocation of any certificate, the Department may restore it to the accused person, upon the written recommendation of the Board.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7428. Payment of costs—Filing or receipt

Paragraph effective July 1, 1984.

§ 28. The Department shall not be required to certify any record to the Court or to file any answer in court or otherwise appear in any court in a judicial review proceeding, unless there is filed in the court, with the complaint, a receipt from the Department acknowledging payment of the costs of furnishing and certifying the record, which costs shall be computed at the rate of 20 cents per page of such record. Failure on the part of the plaintiff to file such receipt in court shall be grounds for dismissal of the action.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7429. Certain orders as prima facie proof

Paragraph effective July 1, 1984.

§ 29. An order or a certified copy thereof, over the seal of the Department and purporting to be signed by the Director, shall be prima facie proof:

(a) That such signature is the signature of the Director;

(b) That the Director is duly appointed and qualified; and

(c) That the Board, and the members thereof, are qualified to act.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7430. Determination of mental illness—Automatic suspension of certificate

Paragraph effective July 1, 1984.

§ 30. The determination by a circuit court that a certificate holder is subject to involuntary admission or judicial admission, as provided in the "Mental Health and Developmental Disabilities Code", approved September 5, 1978, as amended,[1] operates as an automatic suspension of the holder's certificate. Such suspension will end upon a finding by a court that the patient is no longer subject to involuntary admission or judicial admission and the court issues an order so finding and discharging the patient and upon the recommendation of the Board to the Director that the registrant be allowed to resume his practice.

[1] Chapter 91½, ¶ 1-100 et seq.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7431. Applicability of Administrative Procedure Act—Review under Administrative Review Law

Paragraph effective July 1, 1984.

§ 31. The provisions of "The Illinois Administrative Procedure Act", approved September 22, 1975, as amended,[1] shall apply to this Act. All final administrative decisions of the Department are subject to judicial review pursuant to the provisions of Article 3 of the "Code of Civil Procedure", approved August 19, 1981, as amended.[2] Any circuit court, upon the application of the certificate holder or the Department, may order the attendance of witnesses and the production of relevant records in any Departmental hearing relative to the application for or refusal, recall, suspension or revocation of a certificate.

[1] Chapter 127, ¶ 1001 et seq.

[2] Chapter 110, ¶ 3-101 et seq.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7432. Public policy

Paragraph effective July 1, 1984.

§ 32. It is declared to be the public policy of this State, pursuant to paragraphs (h) and (i) of Section 6 of Article VII of the Illinois Constitution of 1970, that any power or function set forth in this Act to be exercised by the State is an exclusive State power or function. Such power or function shall not be exercised concurrently, either directly or indirectly, by any unit of local government, including home rule units, except as otherwise provided in this Act.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7433. Violations of act—Unlawful practice under Consumer Fraud and Deceptive Business Practices Act

Paragraph effective July 1, 1984.

§ 33. The advertising, offering for sale, sale or distribution of hearing aid goods and services to consumers by any person in violation of any of the provisions of this Act is an unlawful practice pursuant to Section 2S of the "Consumer Fraud and Deceptive Business Practices Act", approved July 24, 1961, as amended.[1]

[1] Chapter 121½, ¶ 262a.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7434. Powers of attorney general—Award of actual damages

Paragraph effective July 1, 1984.

§ 34. All remedies, penalties and authority granted to the Attorney General by the "Consumer Fraud and Deceptive Practices Act", approved July 24, 1961, as now or hereafter amended,[1] shall be available to him for the enforcement of this Act, and Sections 3, 4, 5, 6, 6.1, 7 and 10 of that Act[2] are hereby incorporated by reference into this Act. In addition, in any action brought by the Attorney General to enforce this Act, the court may order that persons who incurred actual damages be awarded the amount at which actual damages are assessed.

[1] Chapter 121½, ¶ 261 et seq.

[2] Chapter 121½, ¶¶ 263 to 267 and 270.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

in writing, of his intention to resume the practice of fitting, dispensing and servicing hearing aids and pays the current renewal fee. However, if such period of inactive status is more than 5 years, the hearing aid dispenser shall also provide the Department with sworn evidence certifying to active practice in another jurisdiction that is satisfactory to the Department. If such person has not practiced in any jurisdiction for 5 years or more, he shall be required to restore his certificate as provided in this Act. Any hearing aid dispenser whose certificate has an inactive status shall not practice in Illinois.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7421. Investigation by department—Notice of charges—Hearing

Paragraph effective July 1, 1984.

§ 21. The Department may investigate the actions of any applicant or any person holding or claiming to hold a certificate. The Department shall, before refusing to issue a certificate or disciplining a registrant, notify, in writing, at least 10 days prior to the date set for the hearing, the applicant for, or holder of, a certificate. The notification shall set forth the charges and the date of the hearing. The hearing shall determine whether the applicant or holder is entitled to hold such certificate, and shall afford such person an opportunity to be heard in person or by counsel. Such written notice may be served by certified or registered mail to the respondent at his last known address. At the time and place fixed in the notice, the Board shall hear the charges and the parties shall be accorded opportunity to present such statements, testimony and evidence as may be pertinent to the charges or defenses. The Board may continue such hearing from time to time. Pursuant to rule, the Director may conduct informal hearings, and shall so inform the Board.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7422. Findings and recommendation of board

Paragraph effective July 1, 1984.

§ 22. At the conclusion of the hearing, the Board shall present to the Director a written report of its finding and recommendation as to whether or not the accused person violated this Act or failed to comply with the conditions required in this Act or any rule promulgated pursuant hereto. The Board shall specify the nature of the violation or failure to comply and shall make its recommendations to the Director.

The report of findings and recommendation of the Board shall be the basis for the Department's action with respect to certificates or the imposition of any disciplinary action. The findings are not admissible in evidence against the person in a criminal prosecution brought for the violation of this Act, but the hearing and findings are not a bar to a criminal prosecution brought for violating this Act.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7423. Record of proceedings—Service upon respondent of copy of board's report—Motion for rehearing—Order

Paragraph effective July 1, 1984.

§ 23. The Department, at its expense, shall preserve a record of all proceedings at the formal hearing of any case involving the refusal to issue a certificate or to discipline a registrant. The notice of hearing, the complaint and all other documents in the nature of pleadings and written motions filed in the proceedings, the transcript of testimony, the report of the Board and the orders of the Department shall be the record of such proceeding.

In any case involving the refusal to issue a certificate or to discipline a registrant, a copy of the Board's report shall be served upon the respondent by the Department, as provided in this Act for the service of the notice of hearing. Within 20 days after such service, the respondent may present to the Department a motion in writing for a rehearing, which motion shall specify the particular grounds therefor. If no motion for rehearing is filed, then upon the expiration of the time specified for filing such a motion, or if a motion for rehearing is denied, then upon such denial, the Director may enter an order in accordance with recommendations of the Board. If the respondent orders and pays for a transcript of the record within the time for filing a motion for rehearing, the 20-day period within which such a motion may be filed shall commence upon the delivery of the transcript to the respondent.

Whenever the Director is satisfied that substantial justice has not been done either in an examination or in the revocation, suspension or refusal to issue a certificate, the Director may order a re-examination or rehearing.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7424. Violations of act—Injunctions

Paragraph effective July 1, 1984.

§ 24. If any registrant violates any provision of this Act, the Director may, through the Attorney General, petition, for an order enjoining such violation or for an order enforcing compliance with this Act or any rule issued pursuant hereto. Upon the filing of a verified petition in such court, the court may issue a temporary injunction, without notice or bond, enjoining such continued violation, and if it is established that such person has violated or is violating the injunction, the Court may punish the offender for contempt of court. Proceedings under this Section shall be in addition to all other remedies and penalties.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7425. Powers of circuit court

Paragraph effective July 1, 1984.

§ 25. Any circuit court may, upon application of the prosecutor or of the applicant or registrant against whom disciplinary proceedings are pending, enter an order requiring the attendance of witnesses and their testimony, and the production of documents, papers, files, books and records in connection with any hearing or investigation. The court may compel obedience to its order by proceedings for contempt.

For repeal of Act, see note preceding ¶ 7401 of this chapter.

7426. Surrender of certificate

Paragraph effective July 1, 1984.

§ 26. Upon the revocation or suspension of any certificate, the registrant shall forthwith surrender the certifi-

Board of Examiners for Speech Pathology and Audiology

November 15, 1982

TO: Oregon Licensed Audiologists

FROM: Duane Anderson, Executive Secretary, Board of Examiners for Speech Pathology and Audiology

SUBJECT: Law concerning use of the term "Audiologist"

On July 1, 1983 the Board mailed the attached memos to all Oregon registered hearing aid dealers. During their October 15, 1983 meeting the Board requested that we mail copies of this material to all licensed audiologists in Oregon. The Board plans to pursue legal action against any person in Oregon who uses the term "Audiologist" in any context and is not licensed as an audiologist under ORS 681.

attachment

228-6479

July 1, 1983

TO: Oregon Registered Hearing Aid Dealers

FROM: Board of Examiners for Speech Pathology and Audiology

SUBJECT: Use of the Term "Audiologist" and Related Words

During the last few years the Board of Examiners for Speech Pathology and Audiology has made numerous attempts to discourage hearing aid dealers from using the term "audiologist" and related terms in their telephone directory and newspaper advertising. In addition, several hearing aid dealers are displaying their NHAS certificate which identifies them as a "Certified Hearing Aid Audiologist".

Recently we requested an advisory statement on this matter from the Consumer Protection Section of the Department of Justice. The attached memo from their office should resolve any misunderstandings which may currently exist. If you have any questions, please feel free to contact our office or the Consumer Protection Section of the Department of Justice.

attachment

STATE OF OREGON INTEROFFICE MEMO

TO: Board of Examiners for Speech Pathology and Audiology DATE: June 15, 1983

FROM: Daryl Dodson Wilson
Assistant Attorney General

SUBJECT: Hearing Aid Dealer's Use of the Term "Audiology" and Related Words

A review of ORS Chapter 681 and ORS Chapter 694 shows that a hearing aid dealer who falsely represents that the services of an audiologist are available, or who claims to be giving "audiological testing" when no licensed audiologist is performing the test, may be in violation of several statutes. The penalties may be cumulative.

1. Hearing aid dealers are generally governed by ORS Chapter 694.

ORS 694.015(5) anticipates that hearing aid dealers will be conducting some hearing tests in conjunction with the provision of hearing aids. These tests include evaluation or measurement of the powers or range of human hearing. In offering these tests, a dealer may not advertise that the services of either an "audiologist" or "clinical audiologist" is available for selection, fitting, adjustment, maintenance or repair of hearing aids, when no properly licensed audiologist is performing the serivce. A dealer may have his or her license suspended or revoked or may be put on probation for these false representations. ORS 694.136(8).

A problem may arise when a dealer offers "audiological" testing without having a licensed audiologist performing the test. Even though "audiological" and related terms may have trade or common meaning, these words should only be used in advertisements in Oregon in accordance with the definition in ORS 681.205 (see 2. below). It would seem that the Oregon statutory scheme anticipates that only licensed audiologists may conduct "audiological" tests.

ORS Chapter 694 also provides criminal sanctions for some misrepresentations. A false claim that an audiologist's services will be used, are used, or made available may be punishable by up to a $500 fine and up to 90 days of imprisonment. ORS 694.911(1).

A hearing aid dealer should also be concerned that no false, misleading or deceptive name is used in his or her business. ORS 694.136(11). A dealer would also violate the

statutes by making a false, misleading or deceptive representation regarding any guarantee or services provided. ORS 694.136(2).

2. ORS Chapter 681 dealing with audiologists and speech pathologists may also be of concern to hearing aid dealers.

Both hearing aid dealers and audiologists measure the powers or range of human hearing. See ORS 694.015(5) and ORS 681.205(4). However, the focus and extent of the testing and evaluation are quite different. ORS Chapter 681 provides that only a licensed audiologist may represent that he or she is engaged in the practice of audiology.

Although many of the terms used in these statutes may have meanings in the hearing aid trade, the statutory definition takes precedence in Oregon. Thus, the terms "audiology" and "practice of audiology" carry a particular meaning, whether used by audiologists or by hearing aid dealers. See ORS 681.205(1) and (4). Any person holding him or herself out as a "hearing clinician", "hearing therapist" or "audiologist" or a similar title or description of service must be a licensed audiologist. ORS 681.250(2). Similar titles or descriptions of service might include "audiological testing" and "audiological service". Remember, the common meaning of these words must give way when the statute provides a definition.

It is a misdemeanor to falsely use any of these titles or descriptions of service. ORS 681.991. The District Attorney's office would prosecute the case. Class A misdemeanor carries a penalty of a maximum $2,500 fine and a maximum one year in prison. See ORS 161.555(3) and ORS 161.615 and 161.635.

3. The Oregon Unlawful Trade Practices Act (UTPA) ORS 646.605 to 646.638 governs some activities of hearing aid dealers.

A variety of unconscionable tactics and unlawful trade practices are prescribed by the UTPA. A hearing aid dealer might be in conflict with the Unlawful Trade Practices Act if he or she said that "audiological testing services" were available when no licensed audiologist actually performed the services. The unlawful business practice in that case might include causing a likelihood of confusion or misunderstanding as to the affiliation, connection or association with another; or representing that services have quantities or qualities that they do not have or that a person has a status or qualification or connection that he does not have. See ORS 646.608(1)(c) and (e).

A hearing aid dealer who said that audiological testing was performed, when no licensed audiologist performed those tests, might be found in violation of the Unlawful Trade Practices Act for that false advertising, as well as being in violation of ORS Chapter 681 and ORS Chapter 694. The penalties for violation of the Unlawful Trade Practices Act include injunction, restitution for actual damages, possible punitive damages, attorneys fees and other relief granted by the court. The statute provides for suit by the Attorney General, the District Attorney or by a private citizen. This is the area of concern to the Consumer Protection Division (Financial Fraud Unit) of the Department of Justice.

4. Other regulations are also pertinent to hearing aid dealers.

Oregon common law and statutes provide other remedies for a person who has been defrauded. Separate statutes cover home solicitations. See ORS 646.611 and 83.720. A dealer might want to take extra steps to check compliance with these laws before sales are made.

IF...

YOU PURCHASE WISELY

A consumer protection service provided through the Hearing Aid Consumer Protection Program

Illinois Department of Public Health

Remember these important facts:

1. **MEDICAL CLEARANCE** from a licensed physician should be obtained before buying a hearing aid. This identifies medically treatable conditions which affect your hearing.
2. Obtain a **HEARING EVALUATION** from a certified dispenser or clinical audiologist before purchasing a hearing aid.
3. Be sure the hearing aid dispenser is **CERTIFIED** by the Illinois Department of Public Health.
4. Ask if a **TRIAL PERIOD OR RETURN PRIVILEGE** is offered. If so, make sure that this and the cost of this trial period are stated in the contract.
5. Ask if the hearing aid has a **MANUFACTURER'S WARRANTY** and/or **SERVICE CONTRACT.** Find out what services each provide, what costs are involved and the time period they cover.
6. Illinois Law requires a dispenser who sells hearing aids door-to-door or in a customer's home to give a **NOTICE OF CANCELLATION** to the buyer. The Notice explains the legal right of the buyer to cancel the purchase within three days of the sale.
7. Make sure that the **DELIVERY DATE** of the hearing aid is written in the contract.
8. If possible, do not pay the full price of the hearing aid in advance. Make a **DEPOSIT** and pay the balance when the hearing aid is delivered.
9. If the hearing aid is uncomfortable, causing problems or not working properly, **CONTACT YOUR DISPENSER** immediately.
10. Ask about the dispenser's **REPAIR POLICY.** Can repairs be done at the office or must hearing aids be mailed to the manufacturer? How long will these repairs take and are "loaner" aids available?
11. Keep all information received as **RECORD OF PURCHASE,** such as receipts, warranties, etc., for future reference.
12. You may want to **BRING A FRIEND** along to assist you when you purchase a hearing aid.
13. A hearing aid is an important investment. Don't be afraid to **ASK QUESTIONS** or seek a second opinion.

There is a law to protect Illinois consumers from dishonest and incompetent hearing aid dispensing practices. The **ILLINOIS HEARING AID CONSUMER PROTECTION ACT,** administered by the Illinois Department of Public Health, requires that:

1. All dispensers must be **CERTIFIED** to dispense hearing aids, and
2. Should a consumer have an **INQUIRY** or **COMPLAINT** regarding a hearing aid and/or dispenser, the **ILLINOIS DEPARTMENT OF PUBLIC HEALTH** will investigate and offer assistance.

Illinois Department of Public Health
Division of Health Promotion and Screening
Hearing Aid Consumer Program

HEARING AID CONSUMER PROTECTION ACT

The Illinois "Hearing Aid Consumer Protection Act" was enacted into law by the 83rd General Assembly. The purpose of the Act is to protect the hearing impaired public from incompetent and dishonest dispensers of hearing aids who could endanger the health, safety and welfare of the people of this State.

ILLINOIS DEPARTMENT OF PUBLIC HEALTH

The Illinois Department of Public Health is mandated to supervise the issuance of certificates to hearing aid dispensers, administer examinations to applicants for the hearing aid dispenser certificate, suspend or revoke certificates or take such other disciplinary action, if the provisions of the Act are violated, and to promulgate rules necessary to implement this Act, which becomes effective July 1, 1984.

Under the direction of the Division of Health Promotion and Screening, Vision and Hearing Section, the Department will initiate a four point action plan to implement Public Act 83-0928:

1. Health Promotion - Consumer Education
2. Continuing Education for Dispenser of Hearing Aids
3. Certification of Dispensers of Hearing Aids
4. Follow-up and Investigation of Complaints

WHAT THE CONSUMER SHOULD KNOW ABOUT THE HEARING AID CONSUMER PROTECTION ACT

1. No person shall engage in the selling, practice of fitting, dispensing or servicing hearing aids, or display signs, advertise, or represent oneself as a person who practices the fitting and selling of hearing aids after January 1, 1985, unless such holds a current certificate issued by the Department as provided in this Act.

2. The certificate shall be conspicuously displayed in the place of business. A sign must be conspicuously displayed in the dispenser's business and a written statement must be given to each hearing aid purchaser indicating that complaints regarding hearing aids may be made to the Illinois Department of Public Health.

3. Every person fitted and sold a hearing aid shall be given, at no charge, the "User Instructional Brochure" supplied by the manufacturer.

4. The dispenser shall provide a receipt to each hearing aid purchaser with the seller's signature, phone number, the manufacturer's specifications, the make, model and serial number of the hearing aid furnished, the dispenser's certification number, and the full sales term clearly stated. The receipt and container for a used hearing aid shall be clearly marked as such.

5. A hearing aid dispenser shall not sell a hearing aid unless the prospective user presents to the dispenser a written statement signed by a licensed physician which states that the patient's hearing loss has been medically evaluated.

   The medical waiver requirement may only be waived by the patient when the patient is 18 years or older. The dispenser must inform the user that the exercise of the waiver is not in the user's best health interest; and the dispenser cannot in any way encourage the buyer to waive medical evaluation.

Re: State of Alaska
Alternative energy Loans

Dear Senator and Representatives:

We are soon providing an alternative to wood burning stoves in the Juneau area and I understand that this is presently available in Anchorage.

Our product is a pelletized wood and other fuel which burns in specially constructed stoves and burns smoke free.

I am enclosing a couple of articles for your further information.

To meet new ordinances in Juneau, many people will have to replace their wood burning stoves.

I understand that under present law, Alternative Energy Loans are available for catalytic equipped wood stoves, or catalytic converters.

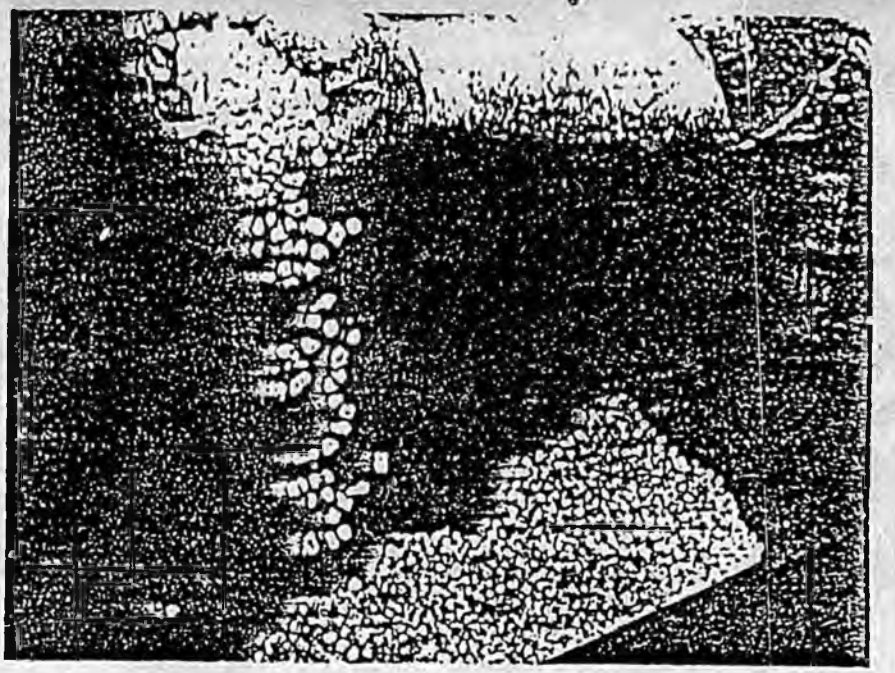
Therefore it would be appreciated if the present law could be amended to authorize loans for biomass pellet fuel burning stoves or furnaces.

Steve Gilbertson, Juneau's Air Quality Control Officer, advised me that he and D.E.C. officials are in favor of this amendment.

I believe the law in question is included in A.S.45.88.010:500.

If you would like further information regarding this, I will be happy to discuss what I have with you.

Thanking you in advance for your consideration.



Very truly yours,

Larry Traeger

BACK UP INFORMATION

Heating homes with pellets

Mount Angel manufacturer designs and sells innovative, affordable furnaces

By DALE STOWELL
Of the Independent

MOUNT ANGEL — Randy Traeger shrugs as he considers the complexity of his pelletized wood burning furnace designs.

"To me, it don't look like nothing super," he says. "Once you've horsed around with it for 15 years, it doesn't seem like that much."

But he seems to know he's on to something as he cites statistics that indicate his wood furnaces burn cleaner than do natural gas or oil furnaces for as little as half the cost for fuel.

Traeger, owner and president of Traeger Industries, has been designing woodstoves and furnaces for more than 20 years and is optimistic that his latest design will catch on.

The fuel source is the most novel aspect of the new furnaces, which have been on the market since fall. Biomass pellets, produced from waste products such as pine shavings or rye stubble, are what the newly designed heating devices consume.

One ton of pellets, which costs about $100, produces as much heat as two cords of wood but leaves substantially less waste. About .6 of one percent of the pellets remain as ash — approximately two gallons of ash per ton of fuel.

During cold weather, the average home requires about one 50 pound bag per day, Traeger estimated. Average yearly consumption would be in the neighborhood of four tons, he added.

Traeger's thermostatically-controlled stove and furnace designs also attempt to transfer all of the heat produced in the units to the space in the home to be heated.

And Traeger points out another advantage to the pellet-burning systems. "They burn clean. There isn't any smoke. You can stick your nose right in the (smoke)stack."

The major drawback is availability of fuel. Traeger has several hundred tons of it stockpiled to meet the needs of customers who have purchased pellet-burning equipment. It isn't readily available anywhere else in the area.

The fuel, which resembles rabbit food pellets, has existed for several decades, Traeger said. But companies producing it have come and gone due to a lack of demand.

Randy Traeger (above) has designed and is marketing heating systems which burn pine pellets (top photo). Traeger says the new heating units burn cleaner than gas or oil at nearly half the cost for fuel. (Photos by Dale Stowell)

"There's been several plants that have been around and gone broke," he said. "There's the concept of making pelletized fuel. That's fine. But you've got to have something to burn it in. Most of them are looking at commercial applications, but a commerical application can dry up on you very quickly — just a little change in price and they'll switch from one (fuel) to the other."

Before Traeger's design, availability of fuel wasn't the only problem in home-heating pellet applications. In earlier designs, the pellets didn't burn completely, and the furnace fire would sometimes burn back into the fuel hopper.

Traeger cured the problems without knowing what caused them in other furnaces. "I really didn't look at anybody's design," he said. "I never paid any attention to them. There's no use in reinventing the wheel over again. It was a matter of taking it apart and putting it together again, taking it apart and putting it together again."

After Traeger put it together again and it worked to his satisfaction, he began developing different home heating uses. His designs range from an indoor furnace that produces nothing but home heat, to an outdoor "pellet pump" that will provide heat for home, hot water and even clothes drying. All of the Traeger Industries products are built at the company's shop in Mount Angel.

The furnaces are also outside of Department of Environmental Quality regulations that apply to woodstoves. Traeger predicts that many wood stove manufacturers will be forced out of business by continued tightening of regulations for testing and emissions. However, he added, pellet-burning furnaces would pass even the most stringent DEQ requirements.

Traeger knows of only five other pelletized fuel furnace manufacturers in the country, but believes that the heat producing devices will increase in popularity in time.

He points to the state of Minnesota as an example of forward thinking about the new heating concept. Traeger as well as other pelletized-fuel furnace manufacturers recently donated equipment to the state as part of a Minnesota low-income heating assistance program. The state will pay for installation of the furnaces.

"The concept is, if they give people pelletized fuel, they can heat twice as many homes for the same cost as supplying them money to buy natural gas or oil," Traeger said.

According to Traeger, Minnesota also has state funds available for research and development of pelletized-fuel manufacturing and use. "They're just out after it," he said. "They're way ahead of everyone else."

Back home, Traeger said sales of the new furnaces have been good — almost better than he's wanted them to be. "I really want to go through the winter just testing it, getting a few out," he said. "It's kind of run away from us. It's been super good."

SUBJECT: Alternative energy loans for biomass fuel stoves (Work Order 14-1546)

TO: Representative Jim Duncan

FROM: George Utermohle
Legislative Counsel

I.

The draft bill that you requested is attached. The bill amends the definition of "alternative energy system" to expressly include stoves and furnaces that use biomass fuels. The effect of this amendment is to allow the Alternative Energy Revolving Loan Fund to make loans for the purchase of biomass fuel stoves and furnaces.

II.

You also asked whether the Alaska Industrial Development Authority (A.I.D.A.) can aid processors of biomass fuels.

In brief, A.I.D.A. does have the power to make loans, to insure loans, and to assist private lenders to make loans to processors of biomass fuels.

A.I.D.A. was created to provide means of financing and means of facilitating financing for

> the establishment, operation, and development of industrial, manufacturing, and business enterprises, including, without limitation, facilities for transportation, facilities for pollution control and waste disposal, facilities for the local furnishing of gas, facilities for water, facilities for industrial parks, mass commuting vehicles, facilities for local district heating or cooling, parking facilities, or a storage or training facility relating to a plant or facility. (AS 44.88.010(a)(5))

[redacted]
Drafter's Memorandum

The list of facilities eligible for assistance is only illustrative and in no way restricts the kinds of projects that A.I.D.A. can support.

Provided that a project is located in Alaska and will generate additional employment, A.I.D.A. has the authority to insure loans, to make loans, or to assist private lenders in making loans for the project (AS 44.88.080(12),(13), and (15)). A.I.D.A. defines "project" to include

> (A) a plant or facility used or intended for use
>
> (i) in connection with making, processing, preparing, or producing in any manner, goods, products or substances of any kind or nature or in connection with developing or utilizing a natural resource, or extracting, smelting, transporting, converting, assembling or producing in any manner, minerals, raw materials, chemicals, compounds, alloys, fibers, commodities and materials, products or substances of any kind or nature;
>
> (ii) as an industrial park; in connection with transportation; for the prevention, limitation or control of pollution; for the disposal of sewage or solid waste; for the local furnishing of gas; for the furnishing of water; as or in connection with mass commuting vehicles; for local district heating or cooling; as a parking facility; or as a storage or training facility directly related to a plant or facility described in this paragraph;
>
> (B) a plant or facility used or intended for use in connection with a business enterprise;
>
> (C) commercial activity by a small enterprise;
> (AS 44.88.220(8))

This definition is broad enough to cover the facilities and equipment necessary to manufacture or produce any form of biomass fuel.

Therefore, processors of biomass fuels are eligible to apply for loans from A.I.D.A. No amendment of the Alaska Industrial Development Authority statutes is necessary.

CS FOR HOUSE BILL NO. 479 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to biomass fuel systems."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.88.500(a) is amended to read:

(a) In this chapter, "alternative energy system"

(1) means a source of thermal, mechanical, or electrical energy which is not dependent on oil or gas or a nuclear fuel for the supply of energy for space heating and cooling, refrigeration and cold storage, electrical power, mechanical power, or the heating of water;

(2) includes

(A) an alternative energy property as defined by 26 U.S.C. 48 (1)(3)(A), (Sec. 301, P.L. 95-618, Internal Revenue Code);

(B) a method of architectural design and construction which provides for the collection, storage, and use of direct radiation from the sun;

(C) a woodstove with a catalytic converter, [OR] a catalytic converter for a wood stove, or a catalytic fireplace insert; [AND]

(D) a steam, hot water, or ducted hot air central heating system that uses wood or coal for fuel; and

(E) a stove or furnace that uses biomass fuel produced from any organic matter that is available on a renewable basis, including agricultural crops and agricultural waste and residue, wood waste residue, animal waste, municipal waste, and aquatic

plants;

(3) does not include, unless described in (2)(C) of this subsection,

(A) a stove that uses only firewood [WOOD], coal, or oil for fuel; or

(B) a fireplace or fireplace insert.

led police to several
sting caps and containers
dynamite stored in the
l Windred. Other explo-
sive material was found following a search of a suspect's bedroom, he said.

According to Windred, the stolen blasting caps may be linked to a series of unexplained explosions in recent months. On Dec. 29, a door at Floyd Dryden Middle School was blown open with blasting caps. Several area mail boxes may also have been blown up with the stolen material, he said.

Police are investigating possible violations of laws regulating storage of explosives at the suspect contractor's work site. Police will not release the name of the contractor under investigation until charges are filed, Windred said.

Meanwhile, two Juneau teenagers are expected to be charged with misconduct involving a weapon in the first degree following the investigation into last Friday's bomb threat at the high school.

According to police, a 14-year-old student allegedly brought the explosive materials to the school to sell or give to a 17-year-old male student. Police have not identified the person who made the threat.

"Quite a few kids knew this transaction was going to take place," said Windred.

The threat resulted in the closure of the high school and adjoining Marie Drake Middle School. Students were sent home after a search located a bag containing four blasting caps and a two-and-a-half pound container of gelatine dynamite in an unassigned high school locker.

The material was removed from the school without incident.

New law allows use of some wood stoves during air alert

Ordinance changes how burning bans are called

By BETSY LONGENBAUGH
THE JUNEAU EMPIRE

There's new hope on the horizon for local residents who want to keep their wood stoves burning all winter.

Beginning Wednesday, local residents who own stoves that meet Juneau City-Borough emission standards may keep their fires burning during wood smoke alerts.

In the belief that the approved stoves won't let smoke get in your eyes, the Juneau City-Borough Assembly recently approved an ordinance that allows the stoves to burn and sets up new criteria for declaring wood smoke bans.

That new criteria calls for two types of wood smoke bans – a wood smoke alert and a wood smoke emergency. Under an alert, owners of approved wood stoves who have municipal permits may continue to burn. Under an emergency, no wood stoves are allowed to burn.

Steve Gilbertson, the municipal lands and resources manager, is in charge of monitoring the air quality of Mendenhall Valley and enforcing the new ordinance. He said Friday he hopes that only air alerts will occur in the future, with air emergencies necessary in the event of extreme pollution in the valley.

"I think people have to realize this is at an experimental stage," he added.

Gilbertson also said his office now has applications for people who own approved wood stoves. In order to use those stoves during alerts, they must have permits

Please turn to Page 14

Lemon Creek vicinity to be monitored for wood smoke

THE JUNEAU EMPIRE

Lemon Creek residents may want to buy warm slippers for next winter, as their neighborhood will probably end up being subject to its own wood stove bans.

The Lemon Creek area is one place that will feel the impact of a comprehensive ordinance regulating wood stove use that was approved by the Juneau City-Borough Assembly several weeks ago.

At the urging of some assembly members, municipal staff agreed to begin monitoring the Lemon Creek area with an eye to regulating wood stove use. This winter, however, there isn't the necessary equipment in the area to effectively measure wood smoke pollution.

In next year's municipal budget, staff will be seeking $25,000 to buy a wood smoke monitor for the area. Once installed, the device will allow municipal officials to call for wood smoke bans in Lemon Creek, as well as the Mendenhall Valley.

Steve Gilbertson, lands and resources manager, said he expects the municipality may call separate wood smoke bans in each area, depending on weather conditions. He said it is now impossible to predict how often bans may be necessary in Lemon Creek.

"We do not have a lot of data for the area," said Gilbertson.

He added, however, that his office has received a lot of calls from Lemon Creek area residents who complained of wood smoke pollution.

The new proposed smoke alert area in Lemon Creek extends from the Juneau Christian School, including

from the city. The free permits are good for two years.

Gilbertson said the approved wood stoves have two things in common – very low emission standards and certification from Oregon.

Because the municipality is basing its new ordinance on a similar law in Oregon, it is accepting that state's testing procedures for wood stoves.

Many of the approved stoves – there are now 10 on the list – have catalytic converters. Others use pellet fuel to reach the low emission standards.

Gilbertson said at least four other stoves, some of which are for sale locally, have gone through the tests, but are not yet certified. He said he expects a new list from Oregon by the end of this month.

Until then, he said he can only recommend the 10 stoves on the approved list. They are:

- Blaze King "King," a catalytic converter stove.
- Earth Stove 1000-C, a catalytic converter stove.
- Turbo 10, a catalytic converter stove.
- Fisher Tech IV, a catalytic fireplace insert.
- Timber Eze 477, a catalytic wood stove.
- Vista 640, a non-catalytic wood stove.
- Pellefier FS-1, a non-catalytic stove that burns pellet fuel.
- Whitfield, a non-catalytic stove that burns pellet fuel.
- Collins Hopper, an add-on devise that burns pellet fuel.

Those wood stoves that are on this list and sell locally cost about $1,000, not including installation.

The assembly hopes to eventually have all stoves in the city-borough meet the emission standards. To meet this goal, the new ordinance calls for all wood stoves installed and sold in Juneau to meet the Oregon emission standards beginning Aug. 1.

Gilbertson expects the most successful enforcement of this new regulation to come from the building department, which issues permits for wood stove installations.

Steve Shows, who assigns building inspections, said a building permit is required for any new installation, including replacement of an existing stove. The permits and their accompanying inspections are free and are designed to make sure wood stoves are safely installed, he said.

"Home owners are sometimes not getting a building permit and installing a stove, sometimes properly, sometimes not," he said.

During the past year, the municipality has been aided in its inspection effort by some insurance companies who now require proof of wood stove inspections before offering insurance, said Shows.

"This is the greatest plus we have seen," he said.

Shows said that "nine times out of 10," wood stoves that are inspected were installed incorrectly.

He said that currently he is able to schedule inspections with a day's notice. Those who want inspections should call a 24-hour recording phone 586-1703, before 7:30 a.m. on the day they want an inspection.

To receive a permit, they should come into the municipal building department and fill out a form. They will also receive a brochure on proper stove installation.

Sunny Point, back to Lemon Creek basin and to Vanderbilt Hill.

Gilbertson also said many Juneau residents remain unclear about where the boundaries are for the Mendenhall Valley wood smoke alert area.

They could be described as having a southern boundary of the airport area, an north boundary of the glacier recreational area, an east boundary running along the base of Thunder Mountain and a west boundary that bisects the Mendenhall Peninsula.

Not included in the ban are the Auke Lake area and Fritz Cove Road.

Shuttle...

Continued from Page 1

The flight plan today was devoted mainly to astronomy, and Steve Hawley spent the morning pointing two ultraviolet telescopes at star targets in a search for luminous clouds of ultraviolet radiation.

Mission Control awakened the astronauts today with the theme song from the movie "Animal House." The control center said several of the astronauts were fans of the movie, and commander Robert Gibson responded, "It sounds like our secret is out."

Columbia shed its postponement jinx with a spectacular predawn liftoff Sunday, and 9½ hours later the crew launched the world's most powerful commercial communications satellite, RCA's $50 million Satcom KU-1.

"It's on its way," Mission Control radioed after a rocket engine ignited to propel the satellite toward stationary orbit 22,300 miles above the Earth.

RCA, which paid the National Aeronautics and Space Administration $14.2 million for the delivery, said Satcom will be capable of providing video and audio communications for all of the United States except Alaska, transmitting a signal powerful enough to be received by dish antennas as small as three feet.

Nelson and Hawley will have an exclusive view of the comet as it nears the sun on its once-every-76-years swing through this part of the solar system.

"You can't observe Halley's from the ground as it makes its closest approach to the sun in January because of the sun's brightness," explained S. Alan Stern of the University of Colorado, who is principal investigator for an experiment named CHAMP, or Comet Halley

Nelson, who will operate the CHAMP cameras, said in an interview before the flight, "We'll be taking some photographs and spectral measurements for the purpose of documenting the comet, and we'll be doing it from above the atmosphere where we can get a real clear look at it. We're going to use the apparatus over the course of three flights, so we should be able to get a good consistent set of data on Halley's."

Stern said the instruments "primarily will be looking at water. The comet is basically an ice ball, and when the sun melts the ice, it breaks the water down into constituents. We'll study these to learn about the comet's atmosphere."

Hawley will use two telescopes to search the universe for sources of luminous clouds of ultraviolet radiation.

"Only in the last 10 years have we begun to look at the universe in the ultraviolet wavelength," he said before the mission. "The reason for that is that the observatories on Earth being beneath the atmosphere are not able to observe these wavelengths because the atmosphere is opaque to UV radiation. So we'll be getting some very fundamental data and will be dealing with questions as to where the UV emission comes from."

He said the knowledge would help astronomers mask out the UV background and thus improve the data from the $1.2 billion Hubble Space Telescope, which will be launched from a shuttle next October.

One of the telescopes also will be trained on the comet.

Rep. Bill Nelson, a Florida Democrat riding as a congressional observer, planned several medical experi-

HB 494
An Act relating to liens for labor or material furnished

COMPARISON TO EXISTING LAW

Existing Law	HB 494
AS 34.35.062	
Stop-payment notice expires 30 days after being received.	Changes reference to stop-payment notice to stop-lending notice. Notice does the same thing.
Claimant must wait 20-30 days after payment is overdue to file a stop-payment notice.	Stop-lending notice expires 90 days after being received.
Claimant must put up a bond equal to the amount on the stop-payment notice when taking a case to court.	A stop-lending notice may be filed anytime after a payment is overdue.
A certification of job progress is required from the owner to the lender prior to the disbursal of funds. The lender may prescribe the form of the certificate.	Deletes the bond requirement.
	Job progress certification is still required and certain items are specified that must be included in the certificate.
	New section. Details the lenders liability when they disburse funds that are the subject of a stop-lending notice.
	New section. Requires draw to be applied to it's stated purpose.
	New section. Makes it at least a class A misdemeanor when an owner misdirects a construction financing draw.
	New section. A lender may not disburse funds to pay for any debts that were not incurred to finance the cost of the project.

Existing Law	HB 494
AS 34.35.064(a) Details the requirements for giving a notice of right to lien.	Adds language stating that if one properly files a notice of right to lien the burden of proof is on the owner to show he did not know of nor consent to labor or material furnished.
AS 34.35.067 A person may record a notice of right to lien after entering a contract to furnish labor or material.	A person may record a notice of right to lien after entering a contract or furnishing labor or material.
AS 34.35.071(a)	Technical change.
AS 34.35.074 New section.	New section. Provides for civil actions being brought by persons injured in their business or property by a violation of any provision of the lien act.
AS 34.35.080(a)	Technical change.
AS 34.35.080(c) New subsection.	New subsection. Requires a claimant to record that he has brought suit to keep the lien active. Unless it is recorded the claimant could lose the claim to a subsequent good faith purchaser who doesn't know of the claimants action.
AS 34.35.112 Ranks priority of lien claims in a court judgement and foreclosure.	Ranks priority of lien claims in a court judgement and foreclosure and gives subcontractors equal status with materialmen.

Existing Law	HB 494
AS 34.35.112(c)	
New subsection.	When there are sufficient funds provided by a foreclosure sale to pay off all lien claims the balance will be paid to the person who owned the property.
AS 34.35.114(c)	
When a lender receives a stop-payment notice on a project for which they are not a lender they must notify the sender within five days.	When a lender receives a stop-lending notice or notice of right to lien on a project for which they are not a lender they must notify the claimant within 10 days.
AS 34.35.114(d)	
A lender who receives a notice of right to lien on a project for which they are not a lender must notify the sender within five days.	A claimant shall provide a written statement of the amount due and unpaid within 10 days of being requested to by an owner or lender to whom the claimant has given a stop-lending notice.
AS 34.35.117(a)	Technical change.
AS 35.35.069	
Requires a claimant to have an acknowledgement of right to lien from an owner in order for their claim of lien to be valid.	Repealed.
AS 34.35.080(b)	
A lien may not be continued in force for more than one year from the date of the filing of the original lien notice.	Repealed. (Conflicts with other parts of the statute).
AS 34.35.114(e)	
Provides for penalties to an owner for failing to provide information.	Repealed. (Covered by new civil suit section).
AS 34.35.118	
Provides for penalties to a claimant for filing an unjust excessive or premature stop-payment notice.	Repealed. (Incorporated into civil suit section).

SECTIONAL ANALYSIS

SECTION 1

page 1, ln 10
(a) Revises 34.35.062 to more clearly and accurately state the present "stop-payment" rule. "Stop-payment" is changed to "stop-lending."

Eliminates the current requirement that a claimant wait 20-30 days after an account becomes delinquent before giving a stop payment notice to the lender.

page 1, ln 29
(b) Changes to 90 days (from 30) the time within which a claimant may bring suit after filing a stop-payment notice. Eliminates the present requirement that the claimant must provide a bond.

page 2, ln 10
(c) Addresses the lender's liabilities when they disburse funds that are the subject of a binding stop-lending notice.

page 2, ln 29
(d) Requires a lender to send a verified statement to the claimant showing all construction financing provided to the owner or owner's agent within ten days of receiving a certified copy of a judgment establishing the amount owed a claimant.

page 3, ln 9
(e) Allows a lender to bring an action requiring claimants to interplead their claims when there are two or more claimants and the lender is uncertain of the amount of its liability.

page 3, ln 14
(f) A lender may not provide a draw to the owner or an agent of the owner until the owner has provided a certification of job progress which must include the portion of the draw that the owner will pay to each listed prime contractor.

page 3, ln 27
(g) Requires draw to be applied pursuant to the required certificate. The lender is not required to verify the information and is not liable for any error in the certificate.

page 4, ln 2
(h) It is a class A misdemeanor for an owner to [illegible]tionally fail to apply construction financing draws in accor[illegible]e with the required certificate.

page 4, ln 7
(i) When requested a lender is required to provide a person who has given a notice of right to lien a copy of certificates submitted under subsection (f) and a verified certificate stating the undisbursed funds available for the project.

page 4, line 14
(j) A lender may not disburse funds to pay for any debts that were not incurred to finance the cost of the project.

Section 2

page 4, ln 17
(a) Notices of right to lien given to the owner shift the burden to the owner to prove that he was not aware of and did not consent to the improvements to his property. The notice may be given before furnishing labor or material.

Revises the required warning in the notice of Right to Lien to more correctly alert the owner of the significance of the notice.

Section 3

page 5, ln 24
Clarifies recording of notice of right to lien.

Section 4

page 6, ln 3
Technical change relating to section 3.

Section 5

page 6, ln 9
Technical change.

Section 6

page 6, ln 25
(a) Civil actions may be brought for actual damages and actual attorney fees by a person who is injured in its business or property by a violation of any provision of the lien act.

page 7, ln 5
(b) Penalizes a claimant who does not remove a lien or stop-lending notice once payment has been made in full or for not removing an erroneous, unjust, premature or excessive stop-lending notice or claim of lien.

Section 7

page 7, ln 13
Technical change.

Section 8

page 7, ln 24
Requires a claimant to record notice that he has brought suit to keep the lien alive. Unless it is recorded the claimant could lose his lien to a subsequent good faith purchaser who doesn't know of the claimant's action.

Section 9

page 8, ln 5
Subcontractors are given equal status with suppliers in sharing foreclosure sale proceeds.

Section 10

page 9, ln 9
When there are sufficient funds provided by a foreclosure sale to pay off all lien claims the balance will be payed to the person who owned the property.

Section 11

page 10, ln 15
Clarifies responsibility of a lender wrongly named in a stop-lending notice.

Section 12

page 9, ln 20
Clarifies claimants responsibility in providing information to an owner or lender who has been served a stop-lending notice.

Section 13

page 9, ln 25
Technical change.

Sections 14 - 17

page 10, ln 3
Definitions.

Section 18

page 11, ln 11
Repeals acknowledgement of right to lien.

Repeals penalty to owner for failing to provide information. (Is covered by Civil Suits, Section 6)

Repeals claimant liability for filing unjust or premature stop-payment notice. (Is incorporated into Civil Suits, Section 6(b))

ALASKANS

FOR

LIEN LAW REFORM

LIEN LAW HISTORY

In 1979 certain amendments were made to the Alaska Lien Laws which have caused large monetary losses to material suppliers and sub-contractors. The intent of these amendments was to expedite loan closings on the sale of real property and also to assure that no liens could be attached after the property was sold. In a joint meeting held between suppliers, sub-contractors, title companies, and lending institutions it was agreed that this new bill would allow the lending institutions to be secured by a first deed of trust on their interim construction financing which gave them priority over all liens or encumbrances which may be recorded by a material supplier or sub-contractor.

In exchange for giving up a historical priority position, suppliers and sub-contractors were to be provided a vehicle by which they could put the lending institution on notice that they were a supplier of record, and in so doing, protect the suppliers interest. The methods provided to material suppliers and sub-contractors under the new law were:

1. Notice of Right to Lien and
2. Stop Payment Notice

The intent of the "Notice of Right to Lien" was to inform the lending institution, and the property owner, that a supplier or sub-contractor had provided materials or services to a specific project and they may have a claim on the interim construction financing. The further intent of this notice was to guarantee that the lending institution would monitor the disbursing of interim construction funds to assure that persons who had given them a "Notice of Right to Lien" would be paid from each draw.

The "Stop Payment Notice" amendment was added as an additional method for securing a payment, when past due from interim construction financing. The intent of this ammendment was to cause the lending institution to withhold the amount claimed by the material supplier or sub-contractor from the next draw and to disburse the funds directly to the claimant.

Since there is no liability on the part of the lending institution for failing to disregard the intent of these amendments, they have been circumvented to a large degree. Interium construction draws are being disbursed directly to the contractor with no assurance that the material supplier or sub-contractor will be paid. In many instances the contractor will use these funds for purposes other than paying his suppliers or sub-contractors.

A "Stop Payment Notice" rarely accomplishes the purpose for which it was intended. The lending institutions in many instances interpret this notice as indication that the contractor is in financial trouble and they will call the loan; thereby stopping all draw requests until the liens are removed or the loan is satisfied. Or they may just hold the notice for a period of 30 days at which time the current law mandates that a law suit be instigated to collect the debt. In addition, the current law mandates that a claimant must provide a bond equal to the amount of the claim. With the current cost of bonding, legal fees and the length of time it takes to get a court date a claimant will rarely recover the amount owed to him. Interestingly enough the lending institutions continue making draws to satisfy their interest charges.

A "Claim of Lien" in many instances has no value. The lending institution has priority over all other encumbrances through their First Deed of Trust position. In the event of foreclosure the lending institutions First Deed of Trust must be paid in its entirety before any other claims can be satisfied, in spite of the fact that the lending institution may have disbursed construction funds directly to the contractor with no regard to a supplier, or sub-contractors "Notice of Right to Lien".

POSITION

The suppliers and sub-contractors position is really quite simple:

> We should have the right to reasonably expect to be compensated for the materials supplied and work performed that adds value to someone elses property, and in the event this does not occur we have equal opportunity for recovery under the law.

The trade off or "trust me legislation" of 1979 is simply not working.

Lending institutions are in the best position to review and determine a contractors financial capability. They have or can have complete access to a contractors financial information because they control the purse strings. However, loan officers have little or no incentive under existing law to control disbursements so as to assure that suppliers and sub-contractors are paid. At a minimum all they need do is assure that the materials are incorporated into the real estate before they disburse to the contractor. Whether the contractor pays the suppliers or the sub-contractors is really of little concern, because they (the lending institution) are always in first position. This enables them to foreclose and extinguish the liens of suppliers and sub-contractors in the event the contractor ultimately fails to perform. When an institution fails to exercise good control of funds, it is difficult to understand why their investment should be given priority at the expense of suppliers and sub-contractors.

There is no viable vehicle for a supplier or sub-contractor to compel a lending institution to disburse loan draws for materials purchased or work performed.

When the supplier or sub-contractor attempts to utilize a stop payment, or otherwise involve the loan officers, typically the lending institutions first reaction is to draw down available proceeds to cover interest and other charges or even to call the loan.

Conclusion. The make up of the lending institutions as well as the environment underwhich the legislation was drafted in 1979, differs from that of today and perhaps is one of the prime reasons requiring a change in this legislation.

It is evident that the current law is not working. The unusal large numbers of business failures, bankruptcy's, and foreclosures bear this out. If some form of protection for sub-contractors and material suppliers is not legislated, there will continue to be many bankruptcy's and foreclosures. In addition, the cost of construction will increase dramatically due to the increase in cost of materials and services to cover the loses sustained through the inequities in the existing law.

CASE HISTORY
EXAMPLE

PROJECT	Residential Units - Fairbanks
LENDER	Bank
ACCOUNT PROFILE	Customer for several years Slow payment record

HISTORY. Because of previous problems with this customer and before supplier would enter into an agreement to sell the project, the lending institution agreed to monitor the loan and disburse funds direct to the supplier. After the project was in process the account went 30 days past due and was closed. The supplier contacted the bank was told they (the bank) were working on the draws and payment would be sent in about 10 days. Additionally, the bank requested that the account be left open.

When the account was (45) days past due and no payment received, the supplier again called the bank and was told the loan officer was on vacation. Again the bank requested that the account remain open and that if the materials were allowed to go they would cover the purchases. The supplier was also told there were more than enough funds to cover the balance due. A check would be cut as soon as the loan officer returned.

When the account was (60) days past due the supplier closed the account. The bank was contacted. The loan officer met with supplier, who was again advised that they were working on draws that would bring the account current. The loan officer requested that the account still be left open. Supplier recorded claim of liens.

When the account was (70) days past due the bank filed foreclosure with no advance notice to supplier.

ACTION TAKEN. Timely recorded Notice of Right to Lien and notified lender. Filed Claim of Liens totaling $214,000.

RESULTS. Without notice bank filed foreclosure notices. Bank offered supplier $85,000 in settlement. Customer filed bankruptcy. Loan officer resigned from his position at the bank.

SUMMARY. Under the existing law supplier filed all proper documents, and additionally had the assurance of the lending institution that they would disburse directly to them. The supplier had no other recourse except to sue the lending institution or settle because of the first position given the bank under the present lien law.

1986 - PROPOSED AMENDMENTS TO THE LAW

- Abolishment of Acknowledgement of Right to Lien

- Adoption of a Direct-Payment Notice which requires the owner's construction lender to make a direct payment to the claimant from the next construction draw, unless the owner timely objects to the Notice, in which case the lender is required to make a joint payment to the claimant and owner and leave it up to them to work out their disputes.

- Claimants other than individual laborers are given equal priority with a prior-recorded deed of trust for constuction financing in cases of original construction. Individual laborers (excluding individual sub-contractors) and trustees of employment benefit trusts for such laborers continue to have priority over prior-recorded deeds of trust.

- The deadline is extended for recording a Notice of Right to Lien or Claim of Lien after a Notice of Completion is recorded to give the latter job trades more time to prepare their statements and determine if they have a payment problem.

TESTIMONY OF

ALASKA CHAPTER

THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA

TO

SENATE LABOR AND COMMERCE COMMITTEE

ON

LIEN LAW REFORM

CS HB494

MAY 6, 1986

AGC-Alaska on behalf of our over 700 member firms appreciates the opportunity to comment on CS HB494.

AGC-Alaska members represent probably the widest cross section of the commercial construction industry besides individual members who are exclusively engaged as suppliers, subcontractors, engineers or architects. Many of our general contractor members are engaged as subcontractors or material suppliers on some projects.

Today AGC-Alaska is in the position of testifying on a bill, which many individuals in the construction industry favor. With reservation, AGC-Alaska supports CS HB494 in its present form; however we are of the belief that the solutions proposed in CS HB494 are merely "band-aids on major wounds" and that the problems created in some instances may equal the problems solved. AGC-Alaska believes that the entire lien law system should be rewritten after a study by an interim committee.

Our comments, including a summary of provisions in existing law and HB 494 follow.

THE FIRST VERSION OF THIS LEGISLATION (SUPPORTED BY A COALITION OF SUPPLIERS AND SUBCONTRACTORS) ADDRESSED THREE AREAS OF THE EXISTING LIEN LAW --

1) WHO CAN CLAIM A LIEN
2) THE ABILITY TO IMPACT CONSTRUCTION DRAWS
3) PRIORITY OF LIENS.

WHO CAN CLAIM A LIEN

EXISTING LAW. A PERSON WITHOUT A DIRECT CONTRACT WITH AN OWNER (MOST SUBCONCTRACTORS AND SUPPLIERS) MAY NOT CLAIM A LIEN UNLESS AN "ACKNOWLEDGMENT OF RIGHT TO LIEN" SIGNED BY THE OWNER IS OBTAINED BY THE OWNER (AN EXCEPTION TO THIS REQUIREMENT IS AN INDIVIDUAL CLAIMING A LABOR LIEN FOR WORK HE PERSONALLY PERFORMED). WITHOUT THE EXISTENCE OF A LIEN LAW THERE IS NO RIGHT TO SUE AN OWNER BECAUSE NO CONTRACT EXISTS BETWEEN THE OWNER AND A SUBCONTRACTOR OR SUPPLIER.

ORIGINAL PROPOSAL (HB494). THE "ACKNOWLEDGMENT OF RIGHT TO LIEN" REQUIREMENT WAS ELIMINATED. THUS, ANYONE SUPPLYING LABOR, MATERIALS, SERVICES OR EQUIPMENT COULD FILE A LIEN. THERE WAS NO REQUIREMENT THAT THE OWNER EVEN KNOW THE CLAIMANT WAS ONE OF THE PERSONS SUPPLYING THE LABOR, MATERIALS, SERVICES OR EQUIPMENT. ALSO, THE ORIGINAL BILL ADDED AN OPTIONAL "NOTICE OF INTENT TO FURNISH LABOR, MATERIALS, SOURCES OR EQUIPMENT." THE PURPORTED

EFFECT IS TO SHIFT THE BURDEN OF PROOF IN ANY ACTION BASED ON A LIEN. HOWEVER, IT DID NOT LIMIT THE ABILITY OF ANYONE TO FILE A LIEN. FURTHER, THIS PROVISION DID NOT REQUIRE A LIEN CLAIMANT TO PROVE THAT THE OWNER KNEW OR CONSENTED TO THE CLAIMANT SUPPLYING THE MATERIALS, SERVICES OR EQUIPMENT.

CURRENT PROPOSAL (CSHB494). STILL ELIMINATES THE "ACKNOWLEDGMENT OF RIGHT TO LIEN" REQUIREMENT. THUS, ANYONE WHO SUPPLIED LABOR, MATERIALS, SERVICES OR EQUIPMENT MAY FILE A LIEN. THERE IS NO REQUIREMENT THAT THE OWNER EVEN KNOW THE CLAIMANT WAS ONE OF THE PERSONS SUPPLYING THE LABOR, MATERIALS, SERVICES OR EQUIPMENT. THE ORIGINALLY PROPOSED "NOTICE OF INTENT TO FURNISH LABOR, MATERIALS, SOURCES OR EQUIPMENT" IS DROPPED. INSTEAD THE PROPOSAL AMENDS THE "NOTICE OF RIGHT TO LIEN" SECTION TO ACCOMPLISH MUCH THE SAME PURPOSE. THE SAME PROBLEMS REMAIN -- THE CURRENT VERSION DOES NOT LIMIT THE ABILITY OF ANYONE TO FILE A LIEN. FURTHER, THIS PROVISION DOES NOT REQUIRE A LIEN CLAIMANT TO PROVE THAT THE OWNER KNOW OR CONSENTED TO THE CLAIMANT SUPPLYING THE MATERIALS, SERVICES OR EQUIPMENT.

EFFECT OF CURRENT PROPOSAL. THE CURRENT PROPOSAL ELIMINATES ONE OF THE MORE UNFAIR ASPECTS OF EXISTING LAW -- THE "ACKNOWLEDGMENT OF RIGHT TO LIEN." UNFORTUNATELY, IT DOES NOT PROPOSE A SUBSTITUTE TO ADDRESS THE CONCERNS WHICH SPAWNED THE "ACKNOWLEDGMENT" IN 1979.

UNDER THE FORMER LAW PROPOSAL LIENS WERE VERY PREVALENT, LITIGATION FLOURISHED AND UNCERTAINTY REIGNED.

A MAJOR CAUSE WAS THE FORMER LAW'S FAILURE TO IDENTIFY POTENTIAL LIEN CLAIMANTS. LIEN CLAIMANTS WOULD LITERALLY COME OUT OF THE "WOOD WORK" 90 DAYS AFTER A JOB WAS FINISHED AND ALL KNOWN SUBCONTRACTORS AND SUPPLIERS WERE PAID. THE "ACKNOWLEDGMENT OF RIGHT TO LIEN" WAS AN ATTEMPT TO SOLVE THIS PROBLEM. UNFORTUNATELY, IT WAS OVERREACTIVE LEGISLATION. UNDER THE "ACKNOWLEDGMENT OF RIGHT TO LIEN" LIENS ARE NOT PREVALENT FOR THE MAIN REASON THAT NOBODY CAN FILE ONE. BY THE TIME MOST SUBCONTRACTORS OR SUPPLIERS ARE INVOLVED IN A PROJECT THERE IS LITTLE REASON WHY AN OWNER WOULD SIGN AN "ACKNOWLEDGMENT OF RIGHT TO LIEN."

ALTERNATIVE PROPOSAL

ELIMINATING THE "ACKNOWLEDGMENT OF RIGHT TO LIEN" MERELY SWINGS THE PENDULUM BACK TO THE OTHER SIDE. AGC-ALASKA PROPOSES A SYSTEM WHICH MAY KEEP THE PENDULUM MORE CENTERED. AS A CONDITION OF FILING A LIEN, ANY SUBCONTRACTOR OR SUPPLIER MUST HAVE PROVIDED WRITTEN NOTICE TO THE OWNER WITHIN 10 DAYS OF FIRST STARTING WORK OR SUPPLYING MATERIALS. THIS NOTICE, SIMILAR TO THAT REQUIRED IN THE STATE OF WASHINGTON, WOULD BE BY CERTIFIED MAIL (SEE ATTACHED SAMPLE LETTER) AND RECORDING WOULD NOT BE REQUIRED. THE NOTICE WOULD FORM A CHECK LIST TO ENSURE THAT ALL POTENTIAL CLAIMANTS ARE PAID BEFORE FUNDS ARE DISBURSED. THE

SYSTEM IDENTIFIES ALL SUBCONTRACTORS AND SUPPLIERS AND ENCOURAGES PAYMENT TO AVOID THE LATTER FILING OF LIENS. THIS SYSTEM ADDRESSES SOME OF THE CONCERNS WHICH BROUGHT ABOUT THE "ACKNOWLEDGMENT OF RIGHT TO LIEN" BUT IT DOES NOT REQUIRE THE OWNER'S OR ANYONE ELSE'S CONSENT.

WHY SUCH A SYSTEM IS NOT CONTAINED IN THE CURRENT PROPOSAL IS UNCLEAR. THE FEBRUARY 26, 1986 TESTIMONY TO THE HOUSE LABOR AND COMMERCE COMMITTEE BY THE COALITION OF SUBCONTRACTORS AND SUPPLIERS SUGGESTD AMENDING THE BILL TO REQUIRE A MANDATORY RECORDING OF A NOTICE OF RIGHT TO LIEN; AND LATER AMENDMENTS CONSIDERED BY HOUSE JUDICIARY CONSIDERED SUCH AMENDMENTS.

FOR WHATEVER REASON THE FACT REMAINS THAT THE PROPOSED LEGISLATION MERELY RETURNS US TO THE DAYS OF YESTERDAYS PROBLEMS AND PROVIDES YET ANOTHER "LAWYERS RELIEF ACT."

THE ABILITY TO IMPACT CONSTRUCTION DRAWS

<u>EXISTING LAWS.</u> UNDER EXISTING LAW A "STOP PAYMENT NOTICE" CAN BE GIVEN BY A LIEN CLAIMANT TO THE LENDING INSTITUTION, IF PAYMENT IS MORE THAN 20 DAYS OVERDUE. HOWEVER, TO STOP PAYMENT FOR MORE THAN 30 DAYS THE CLAIMANT MUST FILE SUIT WITHIN THAT 30 DAY PERIOD.

ORIGINAL PROPOSAL (HB 494). THE ORIGINAL HB 494 SUBSTITUTED A "DIRECT PAYMENT NOTICE" FOR THE EXISTING "STOP PAYMENT NOTICE." UNDER THE PROPOSED "DIRECT PAYMENT NOTICE" THE LENDING INSTITUTION MUST PAY THE CLAIMANT DIRECTLY UNLESS AN OBJECTION IS RECEIVED BY THE OWNER WITHIN 10 DAYS. IF AN OBJECTION IS RECEIVED THE LENDER MUST DISTRIBUTE THE MONEY DIRECTLY TO THE CLAIMANT AND THE OWNER.

CURRENT PROPOSAL (CS HB494). THE CURRENT PROPOSAL SUBSTITUTES A "STOP LENDING NOTICE" FOR THE EXISTING "STOP PAYMENT NOTICE" AND THE FORMERLY PROPOSED "DIRECT PAYMENT NOTICE." THE "STOP LENDING NOTICE" WHILE SIMILAR TO THE EXISTING "STOP PAYMENT NOTICE" PROVIDES A MORE WORKABLE FORMAT FOR THE UNPAID SUBCONTRACTOR AND SUPPLIER. THE 30 DAYS TO FILE SUIT IS EXTENDED TO 90 DAYS AND A PROCEDURE IS ESTABLISHED FOR THE OWNER TO CERTIFY CONSTRUCTION DRAWS.

PRIORITY OF LIENS

EXISTING LAW. UNDER EXISTING LAW A PRIOR ENCUMBRANCE IS PREFERRED TO A LIEN (EXCEPT A LIEN BY AN INDIVIDUAL ACTUALLY PERFORMING LABOR).

ORIGINAL PROPOSAL (HB 494). AMENDMENTS WERE PROPOSED TO GIVE EQUAL PRIORITY TO ALL LIENS FOR "ORIGINAL" CONSTRUCTION WITH A PRIOR RECORDED ENCUMBRANCE.

Current Proposal (CS HB494). No change in the existing law is proposed.

Effect of Current Law. A lender may make disbursements to owners who are in trouble because of the security provided by their deeds of trust. A failed construction project usually results in no equity for liens filed by subcontractors, suppliers or general contractors.

SUMMARY

Devising a system to address the concerns of the owners, bankers, general contractors, subcontractors, suppliers, and individual laborers involved in construction projects is not simple. There is little argument that the present system suffers in many areas. AGC-Alaska suggests a look at the entire system with the objective of devising a system that encourages prompt payment to all factors of the construction industry.

NOTICE BY MATERIALMEN TO OWNER AND GENERAL CONTRACTOR

REGISTERED MAIL
RETURN RECEIPT REQUESTED

Date

ADDRESS (Owner)

RE: Materialmen's Notices to Owner on _____

Dear Mr. _____:

We are pleased to communicate that on DATE our firm commenced to furnish equipment for use upon your construction project known as PROJECT NAME which is located at the premises commonly described as STREET ADDRESS _____. Delivery was commenced at the request, and upon the order of, NAME OF SUBCONTRACTOR, a subcontractor on the project, whose address if ADDRESS OF SUBCONTRACTOR. Even though we do not have the opportunity of dealing with you directly, be assured that we are gratified to make a contribution to your project.

In order to preserve our lien rights, the laws of this state require that we advise you that we are furnishing materials for use upon your property, and that we may claim a lien for the value of those materials. We certainly have no reason to anticipate the necessity of making such a claim of lien, and trust that you will not construe this notification as any reflection upon either you or NAME OF SUBCONTRACTOR.

Our experience has been that everyone in the construction industry recognizes that it is simply good business practice to protect one's lien rights. We sincerely hope that you will be pleased with the materials we are furnishing, and trust that we may be of further services to you in the future.

Very truly yours,

REPRESENTATIVE

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES

MEMO

TO: Senator Fred Zharoff, Chairman
Senate Labor & Commerce Committee

FROM: Rep. Sam Cotten SC

DATE: April 28, 1986

RE: HB 494, An Act relating to liens for labor or materials furnished.

I would greatly appreciate it if you could schedule HB 494 for a hearing in your committee as soon as possible.

The purpose of the bill is to clarify and strengthen the existing lien law. It was introduced at the request of a coalition of suppliers and subcontractors because of increasing problems they are having with being paid for labor or material they provide.

The Judiciary substitute represents a compromise between the suppliers and subcontractors, lending institutions and the builders.

Main points of the bill are:

1. Clarifies the existing procedure available to suppliers and subcontractors. Changes the "stop-payment" notice to a "stop-lending" notice.

2. Eliminates the current requirement that a claimant wait 20-30 days after an account becomes delinquent before he can give a stop-lending notice to the lender.

3. Allows a claimant to bring suit within 90 days of filing a stop-lending notice rather than 30. Removes the requirement the claimant put up a bond when taking a case to court.

4. Before disbursing funds a lender must have a certificate from the owner involved with the project providing specific information on the project including where a draw is to be applied.

— SPONSOR'S INFORMATION —

5. An owner is guilty of class A misdeameanor for "intentionally" failing to apply financing draws to their stated purpose. This does not replace any other penalty that may be provided for by law for the same conduct.
6. Filing a notice of right to lien is optional.

   A notice may be given to the owner any time before furnishing labor, material, service or equipment for improvement of the property. If given properly the burden of proof is on the owner to show that he/she did not know of or consent to improvements on his/her property.

   A notice may be recorded anytime after the claimant enters into a contract or first furnishes labor, etc.

7. Civil actions may be brought for actual and consequential damages by a person who is injured in its business or property by a violation of any provision of the lien act.

   A claimant is liable for actual and consequential damages if they fail to remove a stop-lending notice or claim of lien when payment is made in full or an error is discovered.

8. Subcontractors are given equal status with suppliers in sharing foreclosure sale proceeds.

9. Clarifies definitions.

10. Repeals the acknowledgement of right to lien provision.

IN THE HOUSE

SENATE CS FOR CS FOR HOUSE BILL NO. 494 ( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to liens for labor or material furnished."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 34.35.062 is repealed and reenacted to read:

Sec. 34.35.062. CONSTRUCTION FINANCING. (a) A claimant to whom payment for the labor, material, service, or equipment furnished for a project is past due may give the lender a stop-lending notice. The claimant shall at the same time give a copy of the notice to the owner and to each prime contractor with whom or through whom the claimant or the claimant's debtor has contracted. A stop-lending notice shall

(1) instruct the lender to stop disbursing, advancing, or otherwise providing construction financing for the project;

(2) be verified by the claimant;

(3) state the claimant's name, address, and telephone number;

(4) describe the labor, material, service, or equipment furnished by the claimant and state the name of the person to whom furnished;

(5) describe the real property improved by the labor, material, service, or equipment and state the name of the person the claimant believes to be the owner of the real property;

(6) state the amount due and unpaid to the claimant for the labor, material, service, or equipment.

(b) A stop-lending notice is binding upon a lender from the time

the lender has received it and had a reasonable opportunity to act upon it until it expires or is revoked. A notice expires on the 91st day after it is received by the lender unless the claimant has commenced an action on the claim that is the subject of the notice before that day and the lender has received written notification of the action. A stop-lending notice may be revoked at any time in writing signed by the claimant. Expiration or revocation of a notice extinguishes the liability of the lender to the claimant under (c) of this subsection.

(c) A lender who disburses, advances, or otherwise provides construction financing for a project after it is the subject of a stop-lending notice is liable to the claimant in an amount equal to the lowest of the following amounts:

(1) the amount of construction financing disbursed, advanced, or otherwise provided by the lender after receipt of the claimant's stop-lending notice; if there are two or more stop-lending notices when the disbursement occurs, the lender's liability to each claimant is based on the claimant's ranking under AS 34.35.112;

(2) the amount owed to the claimant, including interest, costs, and attorney's fees, for labor, material, service, or equipment furnished for the project by the claimant as established by a written agreement signed on or after the date of the stop-lending notice by the claimant, the owner and the prime contractor with whom or through whom the claimant or the claimant's debtor has contracted or by a final judgment in an action in which the owner, the claimant and the claimant's debtor are named and, if necessary, served parties;

(3) 150 percent of the amount stated in the stop-lending notice.

(d) Within 10 days after receiving the written agreement or a

certified copy of the judgment under (c)(2) of this section establishing the amount owed to a claimant from whom it has a binding stop-lending notice, a lender shall send to the claimant a verified statement showing, by date and amount, all construction financing provided by the lender for the project. Except as provided in (e) of this section, the lender shall include with the statement payment in the amount of the lender's liability to the claimant under (c) of this section.

(e) If there are two or more claimants to whom a lender is or may be liable under (c) of this section and the lender is uncertain as to the amount of its liability or possible liability to each, the lender may bring an action to require the claimants to interplead their claims.

(f) A draw against construction financing may be made only after certification of job progress is delivered to the lender by the owner. The form of the certification may be prescribed by the lender and shall include

(1) a statement of the progress of the project, including the percentage of completion of the project;

(2) the name, address, and telephone number of each prime contractor who has furnished labor, material, service, or equipment for the project;

(3) the amount owed by the owner to each listed prime contractor; and

(4) the portion of the draw that the owner will pay to each listed prime contractor.

(g) The owner shall use each draw as indicated in the certificates given by the owner to the lender under (f) of this section. The lender may not be required to verify the information in a certificate

and is not liable for an error in a certificate.

(h) An owner who intentionally fails to apply construction financing proceeds as indicated by the certificate required under (f) of this section is guilty of a class A misdemeanor. The penalty provided under this subsection does not replace any other penalty that may be provided for by law for the same conduct.

(i) Within 10 days after being requested, a lender shall provide a person who has given the lender a stop-lending notice with a copy of

(1) each certificate received by the lender under (f) of this section; and

(2) a verified certificate stating the amount of construction financing proceeds committed by the lender for the project that have not been disbursed by the lender.

(j) The lender may not provide construction financing proceeds for payment of indebtedness of the owner that is not incurred for the project.

* Sec. 2. AS 34.35.064(a) is amended to read:

(a) Before furnishing labor, material, service, or equipment for a project, a person [AFTER ENTERING INTO A CONTRACT, A CLAIMANT] may give a notice of right to lien to the owner or owner's agent [AND THE LENDER]. If the notice is given in accordance with this section, the owner has the burden of proof to show that the owner did not know of or consent to the furnishing of the labor, material, service, or equipment by the claimant in an action to foreclose the claimant's lien on the property under AS 34.35.050 - 34.35.120. Otherwise the claimant has the burden of proof to show that the owner knew of and consented to the furnishing of the labor, material, service, or equipment. The notice of right to lien shall be in writing, state that it is a notice of a right to assert a lien against real property [A

OTHER IMPROVEMENT]. The notice shall be recorded in the same manner as specified for the recording of a claim of lien under AS 34.35.070.

* Sec. 4. AS 34.35.070(a) is amended to read:

(a) A [SUBJECT TO THE PROVISIONS OF AS 34.35.069(a), A] claimant may record a claim of lien after entering into a contract for a project [THE CONSTRUCTION, ALTERATION, OR REPAIR OF A BUILDING OR IMPROVEMENT]. A claim of lien may not be recorded later than the time specified under AS 34.35.068.

* Sec. 5. AS 34.35.071(a) is amended to read:

(a) The owner of real property that may be subject to a lien under AS 34.35.050 - 34.35.120 may announce the date of completion of the project [A BUILDING OR OTHER IMPROVEMENT ON THE PROPERTY] by

(1) recording a notice of completion after completion of the project [CONSTRUCTION, ALTERATION OR REPAIR OF THE BUILDING OR OTHER IMPROVEMENT] in the office of the recorder of the district in which the real property [BUILDING OR OTHER IMPROVEMENT] is situated; and

(2) giving notice at least five days before the recording of the notice of completion to all claimants who have given a notice of right to lien or a stop-lending [STOP-PAYMENT] notice to the owner and the lender prior to 10 days before recording a notice of completion; the notice must include a copy of the notice of completion and a statement advising claimants that a notice of completion will be recorded not earlier than five days after the date of the notice.

* Sec. 6. AS 34.35 is amended by adding a new section to read:

Sec. 34.35.074. CIVIL SUITS. (a) A person injured by a violation of AS 34.35.050 - 34.35.120 may bring a civil action

(1) except as provided in AS 34.35.062(c), for actual and consequential damages that are proximately caused by the violation

plus costs, including reasonable attorney's fees;

(2) to enjoin the violation, and if the person prevails, the person shall be awarded costs, including reasonable attorney's fees.

(b) A claimant who gives a stop-lending notice or has a claim of lien recorded under AS 34.35.075 and who fails to promptly revoke the stop-lending notice or remove the claim of lien from the record upon receiving payment in full on the claim or discovering that the stop-lending notice or claim of lien is in error, unjust, premature or excessive is liable for actual and consequential damages caused by giving the stop-lending notice or improperly recorded claim of lien plus costs, including reasonable attorney's fees.

* Sec. 7. AS 34.35.080(a) is amended to read:

(a) A lien provided for in AS 34.35.050 - 34.35.120 does not bind <u>real property</u> [A BUILDING, STRUCTURE, OR OTHER IMPROVEMENT] for more than six months after the <u>claim of</u> lien is <u>recorded</u> [FILED], unless <u>an action is commenced in</u> [SUIT IS BROUGHT BEFORE] the proper court to enforce the lien <u>within</u>

(1) [WITHIN] that time<u>;</u> [,] or

(2) [WITHIN] six months after recording of an extension notice in the same recording office within the original six-month period showing the recording date and the book and page or instrument number of the initial claim <u>of lien</u>, and the balance owing.

* Sec. 8. AS 34.35.080 is amended by adding a new subsection to read:

(c) A lien whose duration is extended by commencement of an action under (a) of this section is void as against a person who, after the commencement of the action and without knowledge or actual notice of its pendency, acquires an interest in the subject property in good faith for valuable consideration, unless a notice of the

pendency of the action has been duly filed for record before the time the person's conveyance is duly filed for record. Notice of the pendency of the action shall conform to the requirements of AS 09.45.-790.

* Sec. 9. AS 34.35.112 is amended to read:

Sec. 34.35.112. PAYMENT OF CLAIMANT'S LIENS. (a) If more than one lien created under AS 34.35.050 - 34.35.120 is claimed against property, the court in its judgment shall declare the rank of each lien or class of liens in the following order:

(1) all persons other than prime contractors or subcontractors with lien rights under AS 34.35.050(1);

(2) the trustees of employment benefit trusts for persons described in (1) of this subsection;

(3) all materialmen and subcontractors;

(4) persons described in AS 34.35.050(5) and [SUBCONTRACTORS, INCLUDING] prime contractors, other than the general contractor [AND PERSONS DESCRIBED IN AS 34.35.050(5)];

(5) the general contractor.

(b) For purposes of AS 34.35.050 - 34.35.120, if the proceeds of the foreclosure sale of the property are insufficient to pay the lien claims of all persons who have recorded claims [A CLAIM] of lien, the

(1) [THE] liens of all individuals with lien rights under AS 34.35.050(1) shall first be paid in full, or pro rata if the proceeds are insufficient to pay them in full;

(2) [THE] liens of trustees of employment benefit trusts for persons described in (1) of this subsection shall be paid in full or pro rata if the proceeds are insufficient to pay them in full;

(3) [THE] liens of materialmen and subcontractors shall be paid in full or pro rata if the proceeds are insufficient to pay them

in full;

(4) liens of persons described in AS 34.35.050(5) and [OUT OF THE REMAINDER THE SUBCONTRACTORS, INCLUDING] prime contractors, other than the general contractor, shall be paid in full [,] or pro rata if the remainder is insufficient to pay them in full; and

(5) lien of the general contractor [THE BALANCE] shall be paid out of [TO THE GENERAL CONTRACTOR; A GENERAL CONTRACTOR IS ENTITLED TO EXECUTION FOR] the balance [DUE AFTER DISTRIBUTION].

* Sec. 10. AS 34.35.112 is amended by adding a new subsection to read:

(c) For purposes of AS 34.35.050 - 34.35.120, if the proceeds of the foreclosure sale of the property are sufficient to pay the lien claims of all persons who have recorded claims of lien, the balance shall be paid to the person who owned the property before the foreclosure sale.

* Sec. 11. AS 34.35.114(c) is repealed and reenacted to read:

(c) A person who receives a stop-lending notice or notice of right to lien identifying a project for which the person is not the lender shall notify the claimant in writing within 10 days after receipt of the notice that the person is not the lender.

* Sec. 12. AS 34.35.114(d) is repealed and reenacted to read:

(d) A claimant shall, within 10 days after receipt of a request, provide an owner or lender to whom the claimant has given a stop-lending notice or notice of right to lien a written statement of the amount due to the claimant and unpaid.

* Sec. 13. AS 34.35.117(a) is amended to read:

(a) Except as provided under (b) of this section, a written waiver of lien or stop-lending [STOP-PAYMENT] notice of rights created under AS 34.35.050 - 34.35.120 signed by a claimant requires no consideration and is valid and binding. A waiver permitted under this

section may not relate to labor, materials, services, or equipment furnished after the date the waiver is signed by the claimant.

* Sec. 14. AS 34.35.120(4) is amended to read:

(4) "construction financing" means [THAT PORTION OF] money loaned or other credit extended to an owner secured by an encumbrance on real property to finance a project on that [ORIGINAL CONSTRUCTION OF A BUILDING OR OTHER IMPROVEMENT ON, OR DEVELOPMENT OF,] real property [, BUT DOES NOT INCLUDE

(A) FUNDS TO ACQUIRE REAL PROPERTY;

(B) FUNDS TO PAY PRINCIPAL AMORTIZATION OF ENCUMBRANCES WITH PRIORITY OVER THE ENCUMBRANCE SECURING THE CONSTRUCTION FINANCING;

(C) FUNDS TO PAY LOAN, COMMITMENT, TITLE, LEGAL, CLOSING, RECORDING OR APPRAISAL FEES ON THE CONSTRUCTION LOAN];

* Sec. 15. AS 34.35.120(9) is amended to read:

(9) "give notice" means to mail a notice required under AS 34.35.050 - 34.35.120 by first-class mail and by using a form of mail requiring a signed receipt, or to deliver the notice and obtain a receipt signed by the person to whom it is directed or an agent of that person; a notice is effective when given or delivered to

(A) [TO] a lender at the address designated in the encumbrance securing that lender;

(B) [TO] an owner at the last known address of the owner;

(C) [TO] a prime contractor at the last known address of the prime contractor;

(D) [TO] a potential lien claimant at the address specified in a stop-lending [STOP-PAYMENT] notice or notice of right to lien or claim of lien;

* Sec. 16. AS 34.35.120(13) is amended to read:

(13) "owner" means a person who owns real property or a possessory interest in real property [THE BUILDING OR OTHER IMPROVEMENT] and who enters into a contract, express or implied, for a project on that property [THE CONSTRUCTION, ALTERATION OR REPAIR OF A BUILDING OR IMPROVEMENT];

* Sec. 17. AS 34.35.120 is amended by adding a new paragraph to read:

(17) "project" means construction, alteration, or repair of an improvement on real property or work done to enhance the real property itself.

* Sec. 18. AS 34.35.069, 34.35.080(b), 34.35.114(e), and 34.35.118 are repealed.

IN THE HOUSE BY THE JUDICIARY COMMITTEE

CS FOR HOUSE BILL NO. 494 (Judiciary)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to liens for labor or material furnished."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 34.35.062 is repealed and reenacted to read:

Sec. 34.35.062. CONSTRUCTION FINANCING. (a) A claimant to whom payment for the labor, material, service, or equipment furnished for a project is past due may give the lender a stop-lending notice. The claimant shall at the same time give a copy of the notice to the owner and to each prime contractor with whom or through whom the claimant or the claimant's debtor has contracted. A stop-lending notice shall

(1) instruct the lender to stop disbursing, advancing, or otherwise providing construction financing for the project;

(2) be verified by the claimant;

(3) state the claimant's name, address, and telephone number;

(4) describe the labor, material, service, or equipment furnished by the claimant and state the name of the person to whom furnished;

(5) describe the real property improved by the labor, material, service, or equipment and state the name of the person the claimant believes to be the owner of the real property;

(6) state the amount due and unpaid to the claimant for the labor, material, service, or equipment.

(b) A stop-lending notice is binding upon a lender from the time

the lender has received it and had a reasonable opportunity to act upon it until it expires or is revoked. A notice expires on the 91st day after it is received by the lender unless the claimant has commenced an action on the claim that is the subject of the notice before that day and the lender has received written notification of the action. A stop-lending notice may be revoked at any time in writing signed by the claimant. Expiration or revocation of a notice extinguishes the liability of the lender to the claimant under (c) of this subsection.

(c) A lender who disburses, advances, or otherwise provides construction financing for a project after it is the subject of a stop-lending notice is liable to the claimant in an amount equal to the lowest of the following amounts:

(1) the amount of construction financing disbursed, advanced, or otherwise provided by the lender after receipt of the claimant's stop-lending notice; if there are two or more stop-lending notices when the disbursement occurs, the lender's liability to each claimant is based on the claimant's ranking under AS 34.35.112;

(2) the amount owed to the claimant, including interest, costs, and attorney's fees, for labor, material, service, or equipment furnished for the project by the claimant as established by a written agreement signed on or after the date of the stop-lending notice by the claimant, the owner and the prime contractor with whom or through whom the claimant or the claimant's debtor has contracted or by a final judgment in an action in which the owner, the claimant and the claimant's debtor are named and, if necessary, served parties;

(3) 150 percent of the amount stated in the stop-lending notice.

(d) Within 10 days after receiving the written agreement or a

certified copy of the judgment under (c)(2) of this section establishing the amount owed to a claimant from whom it has a binding stop-lending notice, a lender shall send to the claimant a verified statement showing, by date and amount, all construction financing provided by the lender for the project. Except as provided in (e) of this section, the lender shall include with the statement payment in the amount of the lender's liability to the claimant under (c) of this section.

(e) If there are two or more claimants to whom a lender is or may be liable under (c) of this section and the lender is uncertain as to the amount of its liability or possible liability to each, the lender may bring an action to require the claimants to interplead their claims.

(f) A draw against construction financing may be made only after certification of job progress is delivered to the lender by the owner. The form of the certification may be prescribed by the lender and shall include

(1) a statement of the progress of the project, including the percentage of completion of the project;

(2) the name, address, and telephone number of each prime contractor who has furnished labor, material, service, or equipment for the project;

(3) the amount owed by the owner to each listed prime contractor; and

(4) the portion of the draw that the owner will pay to each listed prime contractor.

(g) The owner shall use each draw as indicated in the certificates given by them to the lender under (f) of this section. The lender may not be required to verify the information in a certificate

and is not liable for an error in a certificate.

(h) An owner who intentionally fails to apply construction financing proceeds as indicated by the certificate required under (f) of this section is guilty of a class A misdemeanor. The penalty provided under this subsection does not replace any other penalty that may be provided for by law for the same conduct.

(i) Within 10 days after being requested, a lender shall provide a person who has given the lender a stop-lending notice with a copy of

(1) each certificate received by the lender under (f) of this section; and

(2) a verified certificate stating the amount of construction financing proceeds committed by the lender for the project that have not been disbursed by the lender.

(j) The lender may not provide construction financing proceeds for payment of indebtedness of the owner that is not incurred for the project.

* Sec. 2. AS 34.35.064(a) is amended to read:

(a) Before furnishing labor, material, service, or equipment for a project, a person [AFTER ENTERING INTO A CONTRACT, A CLAIMANT] may give a notice of right to lien to the owner or owner's agent [AND THE LENDER]. If the notice is given in accordance with this section, the owner has the burden of proof to show that the owner did not know of or consent to the furnishing of the labor, material, service, or equipment by the claimant in an action to foreclose the claimant's lien on the property under AS 34.35.050 - 34.35.120. Otherwise the claimant has the burden of proof to show that the owner knew of and consented to the furnishing of the labor, material, service, or equipment. The notice of right to lien shall be in writing, state that it is a notice of a right to assert a lien against real property [A

BUILDING OR OTHER IMPROVEMENT] for labor, materials, services, or equipment furnished in connection with a project [CONSTRUCTION, ALTERATION, OR REPAIR OF THE BUILDING OR OTHER IMPROVEMENT], and contain

(1) a legal description sufficient for identification of the real property [UPON WHICH THE BUILDING OR OTHER IMPROVEMENT IS LOCATED];

(2) the name of the owner;

(3) the name and address of the claimant;

(4) the name and address of the person with whom the claimant contracted;

(5) a general description of the labor, materials, services, or equipment provided or to be provided;

(6) a statement that the claimant may be entitled to record a claim of lien; and

(7) the following statement in type no smaller than that used in providing the information required by (1) - (6) of this subsection: WARNING: Unless provision is [HAS BEEN] made for payment of sums that may be due to the undersigned, your above property may be subject to foreclosure to satisfy those sums even though you may pay [THIS CLAIM, YOU MAY BE LIABLE FOR PAYMENT DIRECTLY TO THIS CLAIMANT, NOTWITHSTANDING THE FACT THAT PAYMENT HAS BEEN MADE TO] a prime contractor or other person for the labor, material, service, or equipment furnished by the undersigned [PARTY].

* Sec. 3. AS 34.35.067 is amended to read:

Sec. 34.35.067. RECORDING NOTICE OF RIGHT TO LIEN. A notice of right to lien may be recorded by a claimant at any time after the claimant enters [ENTERING] into a contract for or first furnishes labor, material, service, or equipment [FURNISHED] in connection with a project [THE CONSTRUCTION, ALTERATION OR REPAIR OF A BUILDING OR

OTHER IMPROVEMENT]. The notice shall be recorded in the same manner as specified for the recording of a claim of lien under AS 34.35.070.

* Sec. 4. AS 34.35.070(a) is amended to read:

(a) A [SUBJECT TO THE PROVISIONS OF AS 34.35.069(a), A] claimant may record a claim of lien after entering into a contract for a project [THE CONSTRUCTION, ALTERATION, OR REPAIR OF A BUILDING OR IMPROVEMENT]. A claim of lien may not be recorded later than the time specified under AS 34.35.068.

* Sec. 5. AS 34.35.071(a) is amended to read:

(a) The owner of real property that may be subject to a lien under AS 34.35.050 - 34.35.120 may announce the date of completion of the project [A BUILDING OR OTHER IMPROVEMENT ON THE PROPERTY] by

(1) recording a notice of completion after completion of the project [CONSTRUCTION, ALTERATION OR REPAIR OF THE BUILDING OR OTHER IMPROVEMENT] in the office of the recorder of the district in which the real property [BUILDING OR OTHER IMPROVEMENT] is situated; and

(2) giving notice at least five days before the recording of the notice of completion to all claimants who have given a notice of right to lien or a stop-lending [STOP-PAYMENT] notice to the owner and the lender prior to 10 days before recording a notice of completion; the notice must include a copy of the notice of completion and a statement advising claimants that a notice of completion will be recorded not earlier than five days after the date of the notice.

* Sec. 6. AS 34.35 is amended by adding a new section to read:

Sec. 34.35.074. CIVIL SUITS. (a) A person injured by a violation of AS 34.35.050 - 34.35.120 may bring a civil action

(1) except as provided in AS 34.35.062(c), for actual and consequential damages that are proximately caused by the violation

plus costs, including reasonable attorney's fees;

(2) to enjoin the violation, and if the person prevails, the person shall be awarded costs, including reasonable attorney's fees.

(b) A claimant who files a stop-lending notice or has a claim of lien recorded under AS 34.35.075 and who fails to promptly remove the stop-lending notice or claim of lien from the record upon receiving payment in full on the claim or discovering that the stop-lending notice or claim of lien is in error, unjust, premature or excessive is liable for actual and consequential damages caused by the filing of the stop-lending notice or improperly recorded claim of lien plus costs, including reasonable attorney's fees.

* Sec. 7. AS 34.35.080(a) is amended to read:

(a) A lien provided for in AS 34.35.050 - 34.35.120 does not bind real property [A BUILDING, STRUCTURE, OR OTHER IMPROVEMENT] for more than six months after the claim of lien is recorded [FILED], unless an action is commenced in [SUIT IS BROUGHT BEFORE] the proper court to enforce the lien within

(1) [WITHIN] that time; [,] or

(2) [WITHIN] six months after recording of an extension notice in the same recording office within the original six-month period showing the recording date and the book and page or instrument number of the initial claim of lien, and the balance owing.

* Sec. 8. AS 34.35.080 is amended by adding a new subsection to read:

(c) A lien whose duration is extended by commencement of an action under (a) of this section is void as against a person who, after the commencement of the action and without knowledge or actual notice of its pendency, acquires an interest in the subject property in good faith for valuable consideration, unless a notice of the

pendency of the action has been duly filed for record before the time the person's conveyance is duly filed for record. Notice of the pendency of the action shall conform to the requirements of AS 09.45.-790.

* Sec. 9. AS 34.35.112 is amended to read:

Sec. 34.35.112. PAYMENT OF CLAIMANT'S LIENS. (a) If more than one lien created under AS 34.35.050 - 34.35.120 is claimed against property, the court in its judgment shall declare the rank of each lien or class of liens in the following order:

(1) all persons other than prime contractors or subcontractors with lien rights under AS 34.35.050(1);

(2) the trustees of employment benefit trusts for persons described in (1) of this subsection;

(3) all materialmen and subcontractors;

(4) [SUBCONTRACTORS, INCLUDING] prime contractors other than the general contractor [AND PERSONS DESCRIBED IN AS 34.35.050-(5)];

(5) the general contractor.

(b) For purposes of AS 34.35.050 - 34.35.120, if the proceeds of the foreclosure sale of the property are insufficient to pay the lien claims of all persons who have recorded claims [A CLAIM] of lien, the

(1) [THE] liens of all individuals with lien rights under AS 34.35.050(1) shall first be paid in full, or pro rata if the proceeds are insufficient to pay them in full;

(2) [THE] liens of trustees of employment benefit trusts for persons described in (1) of this subsection shall be paid in full or pro rata if the proceeds are insufficient to pay them in full;

(3) [THE] liens of materialmen and subcontractors shall be paid in full or pro rata if the proceeds are insufficient to pay them

in full;

(4) liens of persons described in AS 34.35.050(5) and [OUT OF THE REMAINDER THE SUBCONTRACTORS, INCLUDING] prime contractors, other than the general contractor, shall be paid in full [,] or pro rata if the remainder is insufficient to pay them in full; and

(5) lien of the general contractor [THE BALANCE] shall be paid out of [TO THE GENERAL CONTRACTOR; A GENERAL CONTRACTOR IS ENTITLED TO EXECUTION FOR] the balance [DUE AFTER DISTRIBUTION].

* Sec. 10. AS 34.35.112 is amended by adding a new subsection to read:

(c) For purposes of AS 34.35.050 - 34.35.120, if the proceeds of the foreclosure sale of the property are sufficient to pay the lien claims of all persons who have recorded claims of lien, the balance shall be paid to the person who owned the property before the foreclosure sale.

* Sec. 11. AS 34.35.114(c) is repealed and reenacted to read:

(c) A person who receives a stop-lending notice or notice of right to lien identifying a project for which the person is not the lender shall notify the claimant in writing within 10 days after receipt of the notice that the person is not the lender.

* Sec. 12. AS 34.35.114(d) is repealed and reenacted to read:

(d) A claimant shall, within 10 days after receipt of a request, provide an owner or lender to whom the claimant has given a stop-lending notice or notice of right to lien a written statement of the amount due to the claimant and unpaid.

* Sec. 13. AS 34.35.117(a) is amended to read:

(a) Except as provided under (b) of this section, a written waiver of lien or stop-lending [STOP-PAYMENT] notice of rights created under AS 34.35.050 - 34.35.120 signed by a claimant requires no consideration and is valid and binding. A waiver permitted under this

section may not relate to labor, materials, services, or equipment furnished after the date the waiver is signed by the claimant.

* Sec. 14. AS 34.35.120(4) is amended to read:

(4) "construction financing" means [THAT PORTION OF] money loaned or other credit extended to an owner secured by an encumbrance on real property to finance a project on that [ORIGINAL CONSTRUCTION OF A BUILDING OR OTHER IMPROVEMENT ON, OR DEVELOPMENT OF,] real property [, BUT DOES NOT INCLUDE

(A) FUNDS TO ACQUIRE REAL PROPERTY;

(B) FUNDS TO PAY PRINCIPAL AMORTIZATION OF ENCUMBRANCES WITH PRIORITY OVER THE ENCUMBRANCE SECURING THE CONSTRUCTION FINANCING;

(C) FUNDS TO PAY LOAN, COMMITMENT, TITLE, LEGAL, CLOSING, RECORDING OR APPRAISAL FEES ON THE CONSTRUCTION LOAN];

* Sec. 15. AS 34.35.120(9) is amended to read:

(9) "give notice" means to mail a notice required under AS 34.35.050 - 34.35.120 by first-class mail and by using a form of mail requiring a signed receipt, or to deliver the notice and obtain a receipt signed by the person to whom it is directed or an agent of that person; a notice is effective when given or delivered to

(A) [TO] a lender at the address designated in the encumbrance securing that lender;

(B) [TO] an owner at the last known address of the owner;

(C) [TO] a prime contractor at the last known address of the prime contractor;

(D) [TO] a potential lien claimant at the address specified in a stop-lending [STOP-PAYMENT] notice or notice of right to lien or claim of lien;

* Sec. 16. AS 34.35.120(13) is amended to read:

(13) "owner" means a person who owns real property or a possessory interest in real property [THE BUILDING OR OTHER IMPROVEMENT] and who enters into a contract, express or implied, for a project on that property [THE CONSTRUCTION, ALTERATION OR REPAIR OF A BUILDING OR IMPROVEMENT];

* Sec. 17. AS 34.35.120 is amended by adding a new paragraph to read:

(17) "project" means construction, alteration, or repair of an improvement on real property or work done to enhance the real property itself.

* Sec. 18. AS 34.35.069, 34.35.080(b), 34.35.114(e), and 34.35.118 are repealed.

025. **Parties to foreclosure.** In an action to foreclose a by AS 34.35.005 — 34.35.425, all persons personally lien holders whose claims have been filed, and all other sted in the matter in controversy or the property sought with the lien may be made parties. Persons who are not bound by the proceedings. (§ 26-9-6 ACLA 1949)

rences. — 53 Am. Jur.
ns, §§ 359-373.

030. **Lien claim against different properties.** If a lien or the same labor against two separate kinds of property ned by different persons, the court shall determine the ch kind of property and designate which shall be sold ge the amount of the lien claim. (§ 26-9-7 ACLA 1949)

035. **Several judgment for each claimant.** In an ce a lien judgment shall be given in favor of each person or the amount due the person, and the court shall order et to the lien to be sold by the peace officer in the same roperty is sold on execution, or in any manner that the proper. The proceeds of the sale shall be apportioned to each judgment pro rata, if the amount is insufficient to l. (§ 26-9-8 ACLA 1949)

040. Order of priority and payment. [Repealed, § 19 ch For current law see AS 34.35.112.]

045. **Lienor's action on contract.** Except as otherwise ded, nothing in AS 34.35.005 — 34.35.425 may be event a lienor under a contract from maintaining an lienor has no lien for the security of the debt and the action does not prejudice rights under AS 34.35.005 — 6-9-11 ACLA 1949)

NOTES TO DECISIONS

by statute create a y, and a lienor has the way of his lien or by an hell v. Beaver Dredg- 6 (1935).

Where the lien fails, the claimant may nevertheless have a personal judgment against the defendant personally liable in the cause. Mitchell v. Beaver Dredging Co., 8 Alaska 566 (1935).

120. Definitions

Sec. 34.35.050. Lien for labor or materials furnished. A person has a lien, only to the extent provided under this chapter, to secure the payment of the contract price if the person

(1) performs labor upon real property at the request of the owner or the agent of the owner for the construction, alteration, or repair of a building or improvement;

(2) is a trustee of an employee benefit trust for the benefit of individuals performing labor on the building or improvement and has a direct contract with the owner or the agent of the owner for direct payments into the trust;

(3) furnishes materials that are delivered to real property under a contract with the owner or the agent of the owner that are incorporated in the construction, alteration or repair of a building or improvement;

(4) furnishes equipment that is delivered to and used upon real property under a contract with the owner or the agent of the owner for the construction, alteration or repair of a building or improvement;

(5) performs services under a contract with the owner or the agent of the owner in connection with the preparation of plans, surveys, or architectural or engineering plans or drawings for the construction, alteration or repair of a building or improvement, whether or not actually implemented on that property; or

(6) is a general contractor. (§ 26-1-1 ACLA 1949; am § 1 ch 20 SLA 1949; am § 1 ch 14 SLA 1953; am § 1 ch 57 SLA 1959; am § 1 ch 106 SLA 1967; am § 1 ch 175 SLA 1978)

NOTES TO DECISIONS

Editor's notes. — Many of the cases annotated below were decided under this section as it existed before the 1978 amendment.

Constitutionality of lien laws. — See Nordstrom v. Sivertsen-Johnsen Mining & Dredging Co., 5 Alaska 210 (1915).

The mechanic's lien law of Alaska was adopted originally from the lien law of Oregon. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914).

Alaska mechanic's lien laws were derived from those of Oregon. Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

The purpose of legislatures in enacting mechanic's and materialman's lien laws is for the protection of the mechanic, insuring to him the fruits of his labor and providing the materialman with a speedy and efficacious mode of collecting his pay for materials furnished. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

And to secure lien priority of payment. — It is the purpose of the lien law to secure priority of payment of the price and value of work performed and materials furnished in erecting and repairing a building or other structure. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

This article relating to mechanics' liens should be liberally construed. Russell v. Hayner, 130 F. 90 (9th Cir. 1904); Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914). But see Goldstein v. Noble, 6 Alaska 282 (1920).

The evident spirit and purpose of this article is to do substantial justice to all parties who may be affected by its provisions, and the courts should avoid unfriendly strictness and mere technicality. Russell v. Hayner, 130 F. 90 (9th Cir. 1904).

Mechanic's lien statutes are to be liberally construed, with a view to effect substantial justice, and the fact that the lien claimant includes in his claim an item of his services for which the law gives him no lien will not defeat the lien if due to an honest mistake, and his lien in such a case may be enforced pro tanto if the true amount for which he is entitled to a lien may be segregated from the remainder. Pioneer Mining Co. v. Delamotte, 185 F. 752 (9th Cir. 1911).

Except to protect against undue severity. — Where the particular enactment deals fairly and equitably with both the owner and the lienor, the liberal interpretation seems to be the rule adopted; but where the statute seems to be unnecessarily severe upon one, and in favor of the other, resulting in manifest injustice, the courts have endeavored to relieve the severity, holding the party favored to a strict compliance with the statute. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

And parts upon which existence of lien depends should be strictly construed. — The safe and proper rule of construction of mechanic's lien statutes is that, while the remedial portions of these statutes should be liberally construed, with a view to avoid defeating the purpose of the statute, yet those parts upon which the right to the existence of a lien depend, being in derogation of the common law, should be strictly construed. Morris v. Marsh, 3 Alaska 140 (1906).

They must be substantially complied with. — A mechanic's lien is purely of statutory creation, and can only be maintained by a substantial observance and compliance with the provisions of the statute. Whatever is made necessary to the existence of the lien must be performed, or the attempt to create it will be futile. A substantial adherence to the terms of the statute in the notice of the lien is indispensable. Russell v. Hayner, 130 F. 90 (9th Cir. 1904).

Thus, this section should be strictly construed. Rivers v. Pastro, 11 Alaska 491 (1948).

A strained construction to bring a person within this section is not permissible. Rivers v. Pastro, 11 Alaska 491 (1948).

Prior law construed. — This section as it existed prior to 1978 prohibited the creation of a valid mechanic's lien prior to the commencement of work on the site and the effectuation of visible improvements to the property. Torkko/Korman/Engineers v. Penland Ventures, Sup. Ct. Op. No. 2757 (File No. 6489), 673 P.2d 769 (1983). See now paragraph (5), which allows liens for work done in the preparation of plans "whether or not [they were] actually implemented."

This article is not, of its own terms, made applicable to public property. University of Alaska v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 1317 (1975).

As to immunity of real property of University of Alaska from lien attachment or foreclosure, see University of Alaska v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 1317 (1975).

The landowner must have actual knowledge of the construction before his interest can be subjected to a materialman's lien. Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

If the materialman relies on both the credit of the purchaser and the security of the building, the materialman can assert a lien. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

Materialperson must demonstrate that materials furnished were generally incorporated into the building or project. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

No requirement that materialman see that every piece used in structure. — In the foreclosure of a materialman's lien, the materialman should not be required to watch the progress of a structure to see that every piece of material supplied by him was used therein, and if some of the material has been used elsewhere, it rests with the defendant to show that fact. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

A materialperson has a burden to show by a preponderance that its materials were generally used in a project, but it need not show that each and every item was incorporated. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

A mechanic's lien will attach to property for an improvement not placed thereon if it has a physical or beneficial connection therewith and is essential to the convenient and comfortable use of the premises. Mitford v. Prior, 353 F.2d 550 (9th Cir. 1965).

Lots in a subdivision are liennable for an engineer's labor on the subdivision's water and sewerage system. Mitford v. Prior, 353 F.2d 550 (9th Cir. 1965).

Effect of agreement establishing partnership. — For the purposes of this section, an agreement establishing a partnership or joint venturership does not affect one party's standing to file a lien against the other party's land. Urban Dev. Co. v. Dekreon, Sup. Ct. Op. No. 1083 (File No. 2028), 526 P.2d 325 (1974).

The meaning properly attaching to the word "contractor" as used in this section is one who has charge of the construction of the building, alteration, or repair by direction of or contract with the owner or his agent duly authorized to contract for him. Morris v. Marsh, 3 Alaska 140 (1906).

A lien of a contractor may include an item for supervision and overhead. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), thru 369 P.2d 890 (1962).

Labor for which lien is claim must come within statute. — While mechanic's lien statutes are to be liberally construed, so that their purpose may not be frustrated, and with a view to effecting substantial justice, yet, unless the labor performed for which the lien is claimed is such as comes within the contemplation of the statute, there can be no valid lien. Noble v. Gustafson, 204 F. 69 (9th Cir. 1913).

This section and AS 34.35.070 must be read and construed together, and as applied to an original contractor, in computing the time from which he must file his claim of lien, they provide that he must file it within 90 days from the date of the completion of his contract or within 90 days from the date of the construction of the building, or any part of such construction, under the contract. Bloom v. McCluskey, 7 Alaska 349 (1925).

There must be employment by the owner of the building or his agent. — To authorize a lien under the provisions of this section, there must be an employment by the owner of the building, or his authorized agent, and the employment of contractors by one who was occupying the land under a contract of purchase, does not constitute the employment contemplated by this section. Russell v. Hayner, 130 F. 90 (9th Cir. 1904).

Or owner must know of and fail to disclaim improvement. — If the person in charge is not in fact the agent of the owner, the interest of the owner shall, nevertheless, be liable for the improvement if it is constructed with his knowledge and he fails to post the required notice disclaiming responsibility. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Person in charge is prima facie owner's agent. — This section, AS 34.35.055 and 34.35.065, construed together, mean that the person in charge of the work shall prima facie be deemed to be the agent of the owner, and the prop-

erty of the latter shall be charged with the lien under the express provisions of this section. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908). See AS 34.35.115.

Lessee is not owner's agent. — A lessee, contracting for improvements upon the demised premises, does not, merely by virtue of his relation as lessee, contract as the agent of the lessor, so as to subject the property to mechanics' liens therefor. Morris v. Marsh, 3 Alaska 140 (1906).

And lien is limited to leasehold unless owner fails to give notice of nonresponsibility. — If the work is done for a lessee of the property, liability is confined to the leasehold estate, if the owner had no knowledge of the construction of the improvement, or if, having such knowledge, he gave notice that he would not be responsible. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Or unless lease authorizes lessee to improve or improvements revert. — It is the general rule that where a lease contains a provision authorizing the lessee to make improvements by deducting the cost thereof from the rent, or where part of the consideration of the lease is the making by the lessee of improvements which become a part of the realty, or that the improvements made by the lessee shall revert to the lessor, a mechanic's lien may attach to the property for work done or materials furnished, pursuant to a contract with the lessee. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914).

It will attach to building erected by lessee that is to revert to lessor. — Where a lease provided that construction of a business building on the property by the lessee was a part of the consideration, but also provided that the building was to "attach to the said realty as a part thereof and become the property of lessor" upon the expiration or termination of the lease, as to a materialman's lien, the building had become an integral part of the leasehold estate, and was not an item of personal property to be considered separately from the realty upon which it was constructed and the lessee's interest in that realty. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962).

Breach of contract bars enforcement of lien for work performed. — Where a contractor fails to perform a considerable part of the work required by his contract, his failure, regardless of his intentions, constitutes a bar to his enforcement of a lien for the work performed. Gillis v. Gillette, 13 Alaska 55, 181 F.2d 872 (9th Cir. 1950).

As where contract is wilfully abandoned before completion. — See Gillis v. Gillette, 13 Alaska 55, 181 F.2d 872 (9th Cir. 1950).

Burden of proof on lien claimant to show compliance with statute. — Where the allegations of the complaint in regard to the work done upon a claim and the character thereof were put in issue by the answer, the burden of the proof is on the lien claimant to show by legally sufficient evidence the accrual of the lien under the terms of the statute which creates it, as well as under the terms of the contract under which the work was done. Pioneer Mining Co. v. Delamotte, 185 F. 752 (9th Cir. 1911).

Bare statement that other projects were being completed by a construction company at the same time that a particular project's modular units were being manufactured is insufficient, under the supreme court's precedents, to raise a triable issue of fact as to whether the material furnished to the construction company was actually incorporated into the particular project. University of Alaska v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 1317 (1975).

A house builder's employee cannot recover back wages directly against the home buyers under a theory that the employee was a third-party beneficiary to a contract between the builder and the buyer. State v. Osborne, Sup. Ct. Op. No. 2034 (File No. 4385), 607 P.2d 369 (1980).

Applied in Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 575 (D. Alaska 1954).

Sec. 34.35.055. Land subject to lien. (a) The land upon which a building or other improvement described in AS 34.35.050 is constructed, together with a convenient space about the building or other improvement or so much as is required for the convenient use and occupation of it (to be determined by the judgment of the court at the time of the foreclosure of the lien), and the mine on which the work is performed or for which the material is furnished is also subject to the lien created by AS 34.35.050 — 34.35.120 if, at the time the work is started or the materials for the building or other improvements are first furnished, the land belongs to the person who causes the building or other improvement to be constructed, altered, or repaired.

(b) If the person owns less than a fee simple estate in the land, then only the interest of the person in it is subject to the lien.

(c) If the interest is a leasehold interest, and the holder forfeits the rights of the holder to it, the purchaser of the building or improvement and leasehold term, or so much of it as remains unexpired at a sale under AS 34.35.050 — 34.35.120 is considered to be the assignee of the leasehold term, and may pay the lessor all arrears of rent or other money and costs due under the lease.

(d) If the lessor regains possession of the land and property, or obtains judgment for the possession of it before the commencement of the construction, alteration, or repair of the building or other improvement, the purchaser may only remove the building or other improvement within 30 days after the purchase, and the owner of the land shall receive the rent due payable out of the proceeds of the sale, according to the terms of the lease, down to the time of the removal. (§ 26-1-2 ACLA 1949)

NOTES TO DECISIONS

The object of this section is to declare to what land the lien shall extend. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

The legislature intended to confer the right of lien upon every laborer or mechanic whose work tends to improve lands or mines. Morris v. Marsh, 3 Alaska 140 (1906).

The purpose of extending a statutory lien to the land is because the value of the land is increased when a materialperson provides labor or material for a structure which is attached to the land. The lien should extend to the land, which is benefited by the materialperson. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

Complaint is defective unless it alleges labor went to improvement. — The absence of an allegation that the labor went to the improvement of the owner's lands or mines is of itself fatal to the complaint. Morris v. Marsh, 3 Alaska 140 (1906).

And so is lien notice. — A lien notice simply to the effect that materials were

furnished and labor was done "in connection with the work done upon the claims" does not comply with the statute. Goldstein v. Noble, 6 Alaska 282 (1920).

A lien on a building for materials furnished cannot include another structure against which a lien is not filed, and into the construction, alteration, and repairs of which some or all of the materials were employed or used. Burr v. House, 3 Alaska 641 (1909).

The general rule is that a lessee cannot impose any charge upon the reversion or estate of the lessor thereof. Morris v. Marsh, 3 Alaska 140 (1906).

Nor does the fact that the lessor acquiesces in the improvement by the lessee subject his reversion to the mechanics' liens therefor. Morris v. Marsh, 3 Alaska 140 (1906).

Unless lessor fails to give notice of nonresponsibility or his agent causes improvement. — This section, AS 34.35.050 and AS 34.35.065, construed together, mean that the person in charge of the work shall prima facie be deemed to be the agent of the owner, and the property of the latter shall be charged with the lien under the express provisions of AS 34.35.050; that, if the person in charge is not in fact such agent, the interest of the owner shall, nevertheless, be liable for the improvement if it is constructed with his knowledge, and he fails to post the required notice disclaiming responsibility; and that, if the work is done for a lessee of the property, liability is confined to the leasehold estate, if the owner had no knowledge of the construction of the improvement, or if, having such knowledge, he gave notice that he would not be responsible. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908). See AS 34.35.115.

To determine whether or not modular units are sufficiently attached to the land on which they are situated, the supreme court will look to the following elements: (1) physical annexation, (2) adaption to use with real property, (3) intention to annex to realty, (4) relationship of the claiming parties, (5) the relative difficulty of removal, (6) the nature of the article annexed, and (7) whether the fact of the annexation is open and apparent. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 615 (1977).

Applied in Torkko Korman Engineers v. Penland Ventures, Sup. Ct. Op. No. 2757 (File No. 6489), 673 P.2d 769 (1983).

Quoted in Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

Stated in Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Public property as subject to lien. 26 ALR 326.

Vendor's interest as subject to mechanic's lien. 58 ALR 911; 102 ALR 233.

Quantity or area of land around improvement which may be subject to lien. 84 ALR 123.

Sec. 34.35.060. Priorities. (a) Except as provided in (c) of this section, an encumbrance which is properly recorded shall be preferred to a lien created under AS 34.35.050 — 34.35.120 unless the claim of lien under AS 34.35.070 or notice of right to lien under AS 34.35.064 has been recorded before the encumbrance. The preference granted for a prior mortgage or deed of trust under this section applies without regard to when the sums are disbursed or whether the disbursements are required under the terms of a loan agreement.

(b) *[Repealed, § 19 ch 175 SLA 1978.]*

(c) A lien created by AS 34.35.050 — 34.35.120 in favor of an individual actually performing labor upon a building or other improvement in its original construction or of a trustee of an employee benefit trust for those individuals is preferred to a prior encumbrance upon the land on which the building or other improvement is constructed.

(d) In enforcing the lien, the building or other improvement may be sold separately from the land. When sold separately, the purchaser may remove the building or other improvement within a reasonable time after the sale, not to exceed 30 days, upon the payment to the owner of the land of a reasonable rent for its use from the date of its purchase to the time of removal. If removal is prevented by legal proceedings, the 30 days does not begin to run until the final determination of the proceedings in the court of first resort, or in the appellate court if appeal is taken. (§ 26-1-3 ACLA 1949; am § 1 ch 111 SLA 1953; am § 1 ch 7 SLA 1955; am §§ 2, 3, 19 ch 175 SLA 1978)

NOTES TO DECISIONS

Editor's notes. — The cases annotated below were decided under this section as it existed prior to the 1978 amendment, which, among other things, rewrote subsection (a) and repealed subsection (b), which provided when a lien created by AS 34.35.050 — 34.35.120 was preferred to a lien, mortgage, or other encumbrance which is unrecorded.

Legislative intent. — The legislative intent is to limit the priority granted generally to situations where the construction preceded all other construction in and upon a given area of vacant or cleared land. Lynch v. McCann, Sup. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970).

In the case of "original construction," the legislature intended to subordinate to some extent the principle of first in time, first in right, to a social interest in securing mechanics' lienors. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

For purposes of this section, a deed of trust and a mortgage are not differentiated. Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

This section protects the security of a mortgagee or beneficiary of a deed of trust against mechanics' liens so long as his encumbrance attaches and is recorded before the mechanics' lienor commences his labor or furnishes materials, except where "original construction" is performed. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

A beneficiary of a deed of trust whose interest attaches and who records before any alteration or repair begins or materials are furnished has priority over a mechanics' lienor, except in the case of original construction under this section. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Scheme of priorities not overcome by posting notices of nonresponsibility. — Mortgagees and beneficiaries of deeds of trust need not post notice of nonresponsibility, and if they do, the notices do not overcome the scheme of priorities established in this section. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

A mechanics' lienor has priority over the beneficiary of a deed of trust in the case of original construction under subsection (c), regardless of whether the beneficiary of the deed of trust posts a notice of nonresponsibility. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

The legislature, in subsection (c), provided that mechanics' lienors performing original construction should have priority over earlier security interests. The scheme of priorities ordered by the legislature in the circumstances of original construction would be defeated if beneficiaries of deeds of trust could attain priority over mechanics' lienors by posting notices of nonresponsibility. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Construction lenders can protect themselves from mechanics' liens in

several ways: They may require their contractors or borrowers to put up a cushion of perhaps a tenth of the loan to be disbursed by the construction lender before the loan funds are disbursed; they may make all payments directly to subcontractors and suppliers; they may make disbursements to the contractors only on production of receipts and lien waivers from the subcontractors and suppliers. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1151), 478 P.2d 829 (1970).

Prior encumbrancers who had loaned money on the security of bare land would not be substantially harmed if laborers and materialmen had priority when they made improvements, and construction lenders can protect themselves. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1151), 478 P.2d 829 (1970).

Priority under subsection (c). — Under subsection (c) a subsequent mechanic's lien is prior in right to a preexisting mortgage only if the work was "original construction." Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

A new addition to a building was not original construction within the intendment of subsection (c). Lynch v. McCann, Supp. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970).

Where the addition was an addition to a preexisting building, and was of relatively small size, and could not be removed without greatly damaging the premises as they were before the addition was added, the mechanics' liens were subordinate to the prior recorded deeds of trusts. Lynch v. McCann, Supp. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970).

Lynch v. McCann only case discussing "original construction". — Lynch v. McCann, Supp. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970) is the only case discussing "original construction," a term unique to Alaska's laws. Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

But it established no clear test. — Lynch v. McCann, Supp. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970) established no clear test for original construction, but stated such standard "must await decisional delineation." Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

Suggested guideline for "original construction". — The supreme court in Lynch v. McCann, Supp. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970) suggested as a guideline for determining "original construction" where the construction preceded all other construction in and upon a given area of vacant or cleared land. Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

Where a building was apparently a separate structure and not constructed as a part of a smaller existing building and on the building permit issued by the Greater Anchorage Area Borough, the construction was described as "new" as opposed to other boxes entitled "alteration," "addition," "repairs," and "other," although the building was designed architecturally to be connected to the existing peanut farm and to conform and blend with it architecturally, the federal district court concluded that the federal district building constituted "original construction." Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

The lien of a secured party was not treated as an "interest in the land" for purposes of AS 34.35.065, the nature of nonresponsibility section, since, if it were so treated, a secured party could attain priority over a mechanics' lienor on original construction. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1151), 478 P.2d 829 (1970).

Issue arising from a discrepancy in the amount of liens was not critical to determining the priority of such liens. Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

The fluctuation of the market values of mortgage securities cannot alter the priorities between a lienor and mortgagee. Copper River Lumber Co. v. Clark, 3 Alaska 635 (1909).

A mechanic's lien, not perfected at the time a federal tax lien attaches, is inferior to the government lien. Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 555 (D. Alaska 1954).

As against the United States, a mechanic's lien must be specific, and what is a specific lien is a federal question. Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 555 (D. Alaska 1954).

And a lien is not specific until the lienor reduces it to possession. Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 555 (D. Alaska 1954).

"Specificity" requires that the lien be attached to certain property by reducing it to possession, on the theory that the United States has no claim against property no longer in the possession of the debtor. Until such possession, it remains a general lien. Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 555 (D. Alaska 1954).

Federal law controls when a lien of the United States is involved. Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

Subsection (c) not adopted by federal district court. — In determining the content of federal common law in order to establish priority between a deed of trust assigned to and recorded by the Small Business Administration and a subsequent mechanic's lien by alleged actions of furnishing labor and materials for an improvement to the property in question, the federal district court would not adopt subsection (c) of this section, which is a distinctly minority codification of mechanic's lien laws and would grant nongovernment parties rights beyond the Federal Tax Lien Act. Thorpe Constr. Co. v. Irvin & Co., 367 F. Supp. 87 (D. Alaska 1973).

A mechanic has a lien upon the land paramount to all rights accruing after the commencement of his work. Copper River Lumber Co. v. Clark, 3 Alaska 635 (1909).

Formerly, a lien for alteration or repair, as well as original construction, took precedence even of a prior mortgage. Wagner v. Shaw, 6 Alaska 647 (1922). See First Nat'l Bank v. Vasey, 14 Alaska 414, 114 F. Supp. 913 (D. Alaska 1953).

Section is not intended to confiscate another's security. — Although the purpose of this section is to give a mechanic's lien to the full extent of the claim upon the property improved, the legislature did not intend in accomplishing that result to confiscate security already belonging to another. Wagner v. Shaw, 6 Alaska 647 (1922).

So prior recorded mortgage prevails as to land. — A mechanic's lien cannot attach to the land on which a prior mortgage, duly recorded, exists at the time the lumber was furnished for the building. Copper River Lumber Co. v. Clark, 3 Alaska 635 (1909).

But section dissevers building subject to lien from land subject to prior mortgage. — A lien is given, not on the materials as such, but on the buildings or improvements in the construction of which the materials are used. The operation of the statute, in case there is a prior mortgage of the land, is to dissever the improvements from the land or realty by giving a superior lien on such improvements and conferring on the purchaser the right to remove them. Copper River Lumber Co. v. Clark, 3 Alaska 635 (1909).

Where all parties seek sale, severability of building is immaterial. — Where all mortgagees and holders of materialmen's liens pray that the property be sold to satisfy their liens, the question of severability of the building is not material. First Nat'l Bank v. Vasey, 14 Alaska 414, 114 F. Supp. 913 (D. Alaska 1953).

Applied in Bank of Wrangell v. Alaska Asiatic Lumber Mills, Inc., 12 Alaska 338, 84 F. Supp. 1 (D. Alaska 1949).

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, §§ 263-283.

Sec. 34.35.062. Construction financing. (a) A lender providing construction financing where there is not a payment bond of at least 50 per cent of the amount of construction financing shall observe the following procedures:

(1) Draws against construction financing shall be made only after certification of job progress to the lender by the general contractor, if any, and the owner. The form of the certification may be prescribed by the lender.

(2) A claimant described in AS 34.35.050 who has not received payment within 20 days after the date for payment required by the contract or employee benefit trust agreement or, if no date for payment is specified, then 30 days after the labor, materials, services, or equipment are first furnished, may within 20 days thereafter give a stop-payment notice of the sums due for which the claimant may claim a lien under AS 34.35.095.

(3) The stop-payment notice shall be given to the lender and to the owner. The stop-payment notice shall state in substance

(A) the name of the person ordering the labor, materials, services, or equipment;

(B) a sufficient legal description of the real property being improved or developed;

(C) a description of the labor, materials, services or equipment furnished, or obligation owed to an employee benefit trust;

(D) the name, business address and telephone number of the claimant; and

(E) the sum due and not yet paid under the claimant's contract which may include an amount not to exceed 50 per cent of the principal amount of the claim for interest, reasonable costs, and attorney fees.

(4) After receipt of a stop-payment notice under this section, the lender shall withhold from the next and subsequent draws sufficient money to pay the amount claimed in the stop-payment notice.

(5) Sums withheld under a stop-payment notice may not be disbursed by the lender except under the terms of a written agreement signed by the claimant, owner and general contractor or by order of a court of competent jurisdiction.

(b) If a lender fails to comply with the provisions of (a)(4) or (5) of this section, the lender shall be liable to the claimant for an amount equal to the sum disbursed in violation of those subsections or the sum ultimately determined to be due the claimant by a court of competent jurisdiction, whichever is less.

(c) Within 30 days after filing a stop-payment notice the claimant may file an action in a court of competent jurisdiction to obtain the sums claimed in the stop-payment notice. The complaint shall be accompanied by a bond in an amount equal to the amount claimed with sufficient sureties as approved by the court. The claimant shall give notice to the lender that the action has been filed and include a copy of the bond filed with the action. If a claimant fails to file an action under this subsection and to serve notice of the filing and a copy of the bond upon the lender within 30 days after filing the stop notice, or to execute a written agreement under (a)(5) of this section, the lender may disburse the money withheld under the claimant's stop-payment notice without incurring liability to the claimant. (§ 4 ch 175 SLA 1978)

Sec. 34.35.064. Notice of right to lien. (a) After entering into a contract, a claimant may give a notice of right to lien to the owner and the lender. The notice of right to lien shall be in writing, state that it is a notice of a right to assert a lien against a building or other improvement for labor, materials, services, or equipment furnished in connection with construction, alteration, or repair of the building or other improvement, and contain

(1) a legal description sufficient for identification of the real property upon which the building or other improvement is located;

(2) the name of the owner;

(3) the name and address of the claimant;

(4) the name and address of the person with whom the claimant contracted;

(5) a general description of the labor, materials, services, or equipment provided or to be provided;

(6) a statement that the claimant may be entitled to record a claim of lien; and

(7) the following statement in type no smaller than that used in providing the information required by (1) — (6) of this subsection:

WARNING: Unless provision has been made for payment of this claim, you may be liable for payment directly to this claimant, notwithstanding the fact that payment has been made to a prime contractor or other party.

(b) Upon request from an owner, lender, or prime contractor, a claimant who has given a notice of right to lien under this section shall disclose to the requester within five days the most recent accounting of the amount due and unpaid to that claimant under the terms of the contract and a description of labor, materials, services, or equipment which the claimant reasonably anticipates furnishing. (§ 4 ch 175 SLA 1978; am § 1 ch 61 SLA 1979)

Sec. 34.35.065. Notice of nonresponsibility. (a) A building or improvement mentioned in AS 34.35.050 constructed with the knowledge of the owner of the land or the person having or claiming an interest in the land is considered to be constructed at the instance of the owner or person having or claiming the interest.

(b) The interest owned or claimed is subject to a lien filed in accordance with AS 34.35.050 — 34.35.120, unless (1) the owner or person having or claiming an interest in the land gives notice within three days after the owner or other person obtains knowledge of the construction, alteration or repair that the owner or other person will not be responsible for it, by posting a notice to that effect in writing in some conspicuous place upon the land or upon the building or other improvement located on the land; (2) the notice is signed by the owner

or person having or claiming an interest in the land in the presence of two attesting witnesses or acknowledged by the owner or other person before a notary public; (3) the posting of notice is attested to by a witness; and (4) an attested or notarized copy of the notice is recorded with the recorder of the recording district in which the land, building or other improvement is located within three days after the posting of the notice. (§ 26-1-4 ACLA 1949; am § 1 ch 71 SLA 1961)

NOTES TO DECISIONS

Editor's notes. — The cases annotated below were decided before revision of much of this chapter in 1978 and 1979.

Alaska mechanic's lien laws were derived from those of Oregon. Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

Section enacted for protection of owner. — The notice of nonresponsibility section is designed to protect owners who do not instigate work done on the land, such as lessors whose lessees independently instigate the furnishing of labor or materials. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

The landowner must have actual knowledge of the construction before his interest can be subjected to a materialman's lien. Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

As yet undetermined in this jurisdiction is whether knowledge of intended construction would be sufficient to bring into operation the provisions of subsections (a) and (b). Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

Owner is protected if work is not done at his instance. — The provisions of this section are for the benefit and protection of the owner in cases where the work is not done and the material is not furnished at his instance, or at the instance of his agent. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914).

But he may not post notice if work is so done. — It is not the intention of the law, nor is it the purport thereof, that when in fact the work is done, and the material is furnished at the owner's instance, he may prevent a lien upon his property by posting the notice referred to in this section. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914).

The words "at the instance" of the owner signify at the motion of, consent, at least, knowledge of Cribb v. Caskey, 4 Alaska 250 (1910).

Employment by owner of his agent is necessary. — To bind the building under a mechanic's lien for labor and materials furnished, there must be an employment by the owner of the building or his authorized agent. Cribb v. Caskey, 4 Alaska 250 (1910).

Person in charge of work must be employed by owner to be statutory agent. — To constitute the contractor, subcontractor, architect, builder, or other person having charge of the construction, alteration, or repair, in whole or in part, of any building, the statutory agent of the owner, such person must have been employed directly or indirectly at the instance of the owner, or his conventional agent. Cribb v. Caskey, 4 Alaska 250 (1910).

But such person is prima facie owner's agent. — This section, AS 34.35.050 and 34.35.055, construed together, mean that the person in charge of the work shall prima facie be deemed to be the agent of the owner, and the property of the latter shall be charged with the lien under the express provisions of AS 34.35.050. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908). See AS 34.35.115.

And if he is not, knowledge and failure to post notice made owner liable. — If the person in charge is not in fact such agent, the interest of the owner shall, nevertheless, be liable for the improvement if it is constructed with his knowledge and he fails to post notice disclaiming responsibility. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Complaint must allege such knowledge. — Allegation of a complaint fails to meet the requirement of this section that does not impute knowledge of the construction of any building or improvement. Morris v. Marsh, 3 Alaska 140 (1905).

Knowledge of the contract of employment and consent to its terms is not tantamount to knowledge of the actual construction of the improvement, even though the terms of the agreement may have contemplated its construction. Morris v. Marsh, 3 Alaska 140 (1905).

However, actual or positive knowledge is not required by this section. Lalay v. Northern Mining & Trading Co., 5 Alaska 134 (1914).

Since knowledge may be implied. Knowledge in a legal sense may be positive or implied. The implication of knowledge arises when the party to be charged is shown to have had knowledge of such facts and circumstances as would lead him by the exercise of due diligence to a knowledge of the principal fact. Lalay v. Northern Mining & Trading Co., 5 Alaska 134 (1914).

Lien attaches to building constructed by lessee as part of leasehold. — Where a lease provided that construction of a business building on the property by the lessee was a part of the consideration, but also provided that the building was to "attach to the said realty as a part thereof and become the property of lessor" upon the expiration or termination of the lease, as to a materialman's lien, the building had become an integral part of the leasehold estate, and was not an item of personal property to be considered separately from the realty upon which it was constructed and the lessee's interest in that realty. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962).

But is confined to leasehold if owner posts notice. — If the work is done for a lessee of the property, liability is confined to the leasehold estate, if the owner had no knowledge of the construction of the improvement, or if, having such knowledge, he gave notice that he would not be responsible. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Mortgagees and beneficiaries of deeds of trust are not required to post notices of nonresponsibility in order to protect a given statutory priority. Lynch v. McCann, Sup. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970).

A beneficiary of a deed of trust is not a "person having or claiming an interest in the land" within the intend-

ment of this section. Lynch v. McCann, Sup. Ct. Op. No. 659 (File No. 1142), 478 P.2d 835 (1970).

The beneficiary of a deed of trust is not a "person having or claiming an interest in the land" for purposes of this section, so is not protected against superior mechanics' liens by posting and recording notices of nonresponsibility. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Scheme of priorities not overcome by posting notices of nonresponsibility. — Mortgagee and beneficiaries of deeds of trust need not post notices of nonresponsibility, and if they do, the notices do not overcome the scheme of priorities established in AS 34.35.060. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

A mechanics' lienor has priority over the beneficiary of a deed of trust in the case of original construction under AS 34.35.060 (a) regardless of whether the beneficiary of the deed of trust posts a notice of nonresponsibility. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

The legislature, in AS 34.35.060 (a), provided that mechanics' lienors performing original construction should have priority over earlier security interests. The scheme of priorities ordered by the legislature in the circumstances of original construction would be defeated if beneficiaries of deeds of trust could attain priority over mechanics' lienors by posting notices of nonresponsibility. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

The lien of a secured party was not treated as an "interest in the land" for purposes of this section, the notice of nonresponsibility section, since if it were so treated a secured party could attain priority over a mechanics' lienor on original construction. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Sufficiency of posting of notice. — See Turner v. Enstrom, 5 Alaska 118 (1914).

Applied in Russell v. Hayner, 130 F. 90 (9th Cir. 1904); Stephenson v. Ketchikan Spruce Mills, Inc., Sup. Ct. Op. No. 332 (File No. 586), 412 P.2d 496 (1966).

Quoted in Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

Stated in Donaldson v. Henning, 4 Alaska 642 (1913).

Cited in Spalding v. Martin, 241 F. 372 (9th Cir. 1917).

Collateral references. — Notice of nonresponsibility, 123 ALR 7.

Sufficiency of notice under statute making notice by owner of nonresponsibility necessary to prevent mechanic's lien, 85 ALR2d 949.

Sec. 34.35.067. Recording notice of right to lien. A notice of right to lien may be recorded by a claimant at any time after entering into a contract for labor, material, service or equipment furnished in connection with the construction, alteration or repair of a building or other improvement. The notice shall be recorded in the same manner as specified for the recording of a claim of lien under AS 34.35.070. (§ 4 ch 175 SLA 1978)

Sec. 34.35.068. Time periods for claiming liens. (a) If a notice of completion is not recorded by the owner as provided in AS 34.35.071, a claim of lien shall be recorded not later than 90 days after the claimant

(1) completes the construction contract; or

(2) ceases to furnish labor, material, services or equipment for the construction, alteration or repair of the owner's property.

(b) If a notice of completion is recorded by the owner as provided in AS 34.35.071,

(1) the following shall record a claim of lien or a notice of right to lien not later than 15 days after the notice of completion is recorded:

(A) a claimant who has received advance notification of the date that the notice of completion is recorded as provided in AS 34.35.071(a)(2);

(B) a claimant who has not given a notice of right to lien as permitted in AS 34.35.064;

(2) the following shall record a claim of lien not later than the time specified in (a) of this section:

(A) a claimant who records a notice of right to lien before or within the period specified in (1) of this subsection;

(B) a claimant who has given a notice of right to lien but who has not received advance notice of the date that the notice of completion is recorded by the owner as provided in AS 34.35.071(a)(2).

(c) A claim of lien is enforceable only if recorded by a claimant within the time specified in (a) or (b) of this section. (§ 2 ch 61 SLA 1979)

NOTES TO DECISIONS

Editor's notes. — The cases annotated below were decided under AS 34.35.070 as it existed prior to the 1978 amendment. Former subsection (b) of that section concerned the time period for claiming liens.

Time for filing is mandatory. — No liberal construction is permitted to be applied to the mandatory requirement that the claim of lien must be filed within the specified time, in order that it may become an actual lien, instead of a claim, and may charge the property with a special statutory liability. Irvine v. McDougall, 5 Alaska 300 (1915), rev'd on other grounds, 4 Alaska Fed. 430, 245 F. 888 (9th Cir. 1916).

A notice of lien must show that it was filed within the time prescribed by statute. Bloom v. McCluskey, 7 Alaska 349 (1925).

A lien is not effective or valid until a written claim of lien has been filed for record with the recorder of the recording district in which the property is situated, within 90 days from completion of the service or delivery of supplies. Brooks v. R & M Consultants, Inc., Sup. Ct. Op. No. 2107 (File No. 4922), 613 P.2d 268 (1980).

Time for filing contractor's lien may run from construction of part of building. — This section and AS 34.35.050 must be read and construed together, and as applied to an original contractor, in computing the time from which he must file his claim of lien, they provide that he must file it within 90 days from the date of the completion of his contract or within 90 days from the date the construction of the building, or any part of such construction, under the contract. Bloom v. McCluskey, 7 Alaska 349 (1925).

And lien for materials may be filed before building is completed. — There is no prejudice to any substantial right of the owner of the building in the filing of a lien at any time after the material is furnished, and before the completion of the building, and a lien filed before the completion of the building is not filed prematurely. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 701, 35 S. Ct. 209, 59 L. Ed. 431 (1914).

The fact that the cost of the last items furnished is small in comparison with the overall cost of a building does not defeat a lien, where it appears that the furnishing of the materials was done in good faith and in the normal course of business, and not for the purpose of extending the time to file a claim of lien. Stephenson v. Ketchikan Spruce Mills, Inc., Sup. Ct. Op. No. 332 (File No. 586), 412 P.2d 496 (1966).

Lien for extra labor and materials must be filed 90 days after furnishing.

A lien for extra labor and materials supplied under an agreement separate from the original contract is required to be filed within 90 days after cessation of the labor and the furnishing of the materials described in the claim of lien. Gillis v. Gillette, 13 Alaska 55, 184 F.2d 872 (9th Cir. 1950).

After filing, lien dates back to commencement of work. — Although the exact time the lien arises is not spelled out, the clear import of this section is that after the mechanic's claim is filed a lien arises which dates back to the commencement of the work and is to be given preference over any encumbrance or lien attaching after work commences. Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 555 (D. Alaska 1954).

Initial recordation of mechanic's lien claim constitutes inquiry notice of the lien to a subsequent purchaser; a mechanic's lien claimant, in order to protect his lien, does not have to record a notice of lis pendens when he later files suit to foreclose the lien. First Nat'l Bank v. Dent, Sup. Ct. Op. No. 2839 (File No. 7728), 683 P.2d 722 (1984).

Lien claim held to have been timely filed. — See Mitford v. Prior, 353 F.2d 550 (9th Cir. 1965).

Sec. 34.35.069. Acknowledgment of right to lien. (a) A person other than an individual as defined in AS 34.35.120 may not claim a lien under AS 34.35.050 — 34.35.120 for furnishing labor, materials, services, or equipment to a person other than the owner of the real property being improved unless at the time the person records a claim of lien as provided in AS 34.35.070 or a notice of right to lien as provided in AS 34.35.067, the person also records an authenticated

copy of an acknowledgment of right to lien received from the owner.

(b) An acknowledgment of right to lien must be signed by the owner, be denominated "acknowledgment of right to lien," and state:

(1) the effective date of the acknowledgment;

(2) the name of the person to whom the acknowledgment is directed;

(3) the name and address of the owner;

(4) the name and address of the lender providing construction financing;

(5) the name and address of the person who is to furnish labor, materials, services, or equipment;

(6) the real property being or intended to be improved or directly benefited, with a legal description sufficient for identification;

(7) a brief description of the labor, materials, services, or equipment to be furnished to the person named in (5) of this subsection;

(8) that the owner acknowledges the right of the person to claim a lien to secure payment for the cost of labor, materials, services, or equipment furnished by the person named in (5) of this subsection for the construction, alteration, or repair of improvements on the owner's real property.

(c) An acknowledgment of right to lien may state its duration. If no duration is stated, the duration of an acknowledgment of right to lien is one year from the effective date stated in the acknowledgment.

(d) Unless an acknowledgment of right to lien states that the owner will acknowledge lien rights only for certain types or quantities of labor, materials, services, or equipment, the acknowledgment applies to all labor, services, materials, or equipment furnished to the person named in the acknowledgment and used in the construction, alteration or repair of the owner's real property. (§ 2 ch 61 SLA 1979)

Sec. 34.35.070. Claim of lien. (a) Subject to the provisions of AS 34.35.069(a), a claimant may record a claim of lien after entering into a contract for the construction, alteration, or repair of a building or improvement. A claim of lien may not be recorded later than the time specified under AS 34.35.068.

(b) *[Repealed, § 9 ch 61 SLA 1979.]*

(c) The lien shall be verified by the oath of the claimant or another person having knowledge of the facts and state

(1) the real property subject to the lien, with a legal description sufficient for identification;

(2) the name of the owner;

(3) the name and address of the claimant;

(4) the name and address of the person with whom the claimant contracted;

(5) a general description of the labor, materials, services, or equipment furnished for the construction, alteration, or repair, and the contract price of the labor, materials, services, or equipment;

(6) the amount due to the claimant for the labor, materials, services, or equipment; and

(7) the date the last labor, materials, services, or equipment were furnished.

(d) *[Repealed, § 19 ch 175 SLA 1978.]*

(e) *[Repealed, § 19 ch 175 SLA 1978.]*

(f) A violation of the provisions of this section places the violator in the position of guarantor regarding another person who suffers damages which are proximately caused by the violation. (§ 26-1-5 ACLA 1949; am § 1 ch 89 SLA 1974; am §§ 1, 2 ch 123 SLA 1977; am §§ 5, 6, 19 ch 175 SLA 1978; am §§ 3, 9 ch 61 SLA 1979)

NOTES TO DECISIONS

Editor's notes. — Many of the cases annotated in the notes below were decided under this section as it existed prior to the 1978 amendment.

No lien exists until the claim of lien is filed as prescribed by this section. Irvine v. McDougall, 5 Alaska 300 (1915), rev'd on other grounds, 4 Alaska Fed. 430, 245 F. 888 (9th Cir. 1916).

Construction of introductory language of subsection (c) mandated. — A construction of subsection (c)(5) as it existed prior to the 1978 amendment [now the introductory language of subsection (c)] which requires that the claim of lien be verified by the oath of the claimant or another person having knowledge of the facts as essential to the existence of the lien, is mandated. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

Policy considerations underlying verification requirement. — The requirement of verification is reflective of the legislature's awareness that a claim of lien adversely affects the title to the property and its alienability; that the claim of lien can have an injurious impact on the credit of the owner of the property which is subjected to the lien; and that the claim of lien can be used as a vehicle to coerce settlement from the owner of the property. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977); Brooks v. R & M Consultants, Inc., Sup. Ct. Op. No. 2107 (File No. 4922), 613 P.2d 268 (1980).

Reasonable basis exists for verification requirement. — In light of the important policy considerations underlying the verification requirement, there exists a reasonable basis for the legislature's determination that the significance of filing a lien claim be made clear to the lien claimant through the requirement of verification and the possibility of perjury prosecution for verifying a false lien claim. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977); Brooks v. R & M Consultants, Inc., Sup. Ct. Op. No. 2107 (File No. 4922), 613 P.2d 268 (1980).

And no latitude is permitted concerning such requirement. — Generally, some latitude is permitted by statutes as to the form in which the oath or affirmation as to the truth of the contents of the lien claim may be administered, and substantial compliance with such form is often sufficient. However, there is a significant distinction between those portions of Alaska mechanics' liens statutes which are remedial in nature, and those portions which articulate mandatory conditions precedent to the very creation and existence of the lien. It is the latter aspect of Alaska's mechanics' and materialmen's lien statutory provisions which is at issue in a case concerning whether an affiant or claimant must swear to the truth of the contents of the

claim. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

The operative, substantive requirement of subsection (c) is that the claim be verified; that the verification be "by oath of the claimant" simply describes the means or procedure to be followed in verifying the claim. Therefore, substantial compliance with the formal requirement of an oath is sufficient. Anchorage Sand & Gravel Co. v. Wooldridge, Sup. Ct. Op. No. 2213 (File No. 4765), 619 P.2d 1014 (1980).

Verification requirement substantially unchanged. — Although Alaska's mechanics' and materialmen's statutes have been substantially revised in recent years, the verification requirement of subsection (c) of this section has remained substantially unchanged. Anchorage Sand & Gravel Co. v. Wooldridge, Sup. Ct. Op. No. 2213 (File No. 4765), 619 P.2d 1014 (1980).

Claims of lien are not valid liens where there is failure to meet the verification requirements — of subsection (c)(5) as it existed prior to the 1978 amendment (now the introductory language of subsection (c)). H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

No particular form of oath or affirmation is required — by Alaska law, other than that when a notary certifies an oath or affirmation, the oath or affirmation must be made in the notary's presence. Anchorage Sand & Gravel Co. v. Wooldridge, Sup. Ct. Op. No. 2213 (File No. 4765), 619 P.2d 1014 (1980).

What is verification. — A verification is a sworn statement of the truth of the facts stated in the instrument which is verified. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

When a lien claimant, in the presence of a notary, affixes his signature to a written statement incorporating the necessary elements of a claim of lien, and the notary certifies this act, claimant has substantially complied with the requirement of an "oath." Anchorage Sand & Gravel Co. v. Wooldridge, Sup. Ct. Op. No. 2213 (File No. 4765), 619 P.2d 1014 (1980).

A verification differs from an acknowledgment —in that the latter is a method of authenticating an instrument by showing that it was the act of the person executing it. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

An acknowledgment is not sufficient to satisfy a mechanics' lien statute which requires verification of the claim of lien by the claimant. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

Corporate acknowledgments affixed to the claims of lien do not constitute substantial compliance with the verification requirement of subsection (c)(5) of this section as it existed prior to the 1978 amendment (now the introductory language of subsection (c)) under AS 34.35.020. H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258, modified on other grounds, 566 P.2d 1012 (1977).

Lien claim need not contain a statement that the labor and materials were furnished at the request of the owner. Cutting v. Bullerdick, 13 Alaska 269, 188 F.2d 837 (9th Cir. 1951).

Statement of demand must be true. — It is necessary that the statement of the lienors' demand contained in the notices should be the true amount due, after making deductions for all just credits and offsets, but it is not necessary that such shall be expressly stated in the notices filed. Irvine v. McDougall, 4 Alaska 702 (1913).

Inclusion of improper item voids lien. — Where a lien claimant includes in his lien statement an item not embraced in the statutory lien, for labor, such as for expenses of transportation, he loses his lien. Bloom v. McCluskey, 7 Alaska 349 (1925).

Unless mistake is honest and items may be separated. — The fact that a lien claimant includes in his claim, through an honest mistake, a claim for services for which the statute gives him no lien, will not defeat the lien for other services within the statute also claimed, if the two can be separated. Irvine v. McDougall, 5 Alaska 220 (1915), citing Pioneer Mining Co. v. Delamotte, 185 F. 752 (9th Cir. 1911).

Failure to include names of all owners does not invalidate notice. — While this section requires that the notice of lien recorded shall contain the names of the owners, or reputed owners, of the ground upon which the lien is claimed, it is well established that failure to include all of the owners does not render the notice invalid, but that it may be enforced against the owners named. Turner v. Enstrom, 5 Alaska 118 (1914).

The only effect of the omission of the name of any owner is to exempt his interest from the operation of the lien. Turner v. Enstrom, 5 Alaska 118 (1914).

Nor does failure to include district where property is located void notice. — It must appear somewhere in the complaint that the property sought to be charged with the lien is situated within the jurisdiction of the court, but it does not necessarily follow that the notices of lien are absolutely void, simply because they do not contain the name of the mining district or political division in which the mining claim is situated. Irvine v. McDougall, 4 Alaska 702 (1913).

To hold that notices of lien are absolutely void for the reason that they do not contain the name of the precinct in which a quartz mining claim is located, when the precinct is named in the complaint to which the several notices are attached as exhibits, would be a fail[illegible]'g give to the notices of lien the liberal [illegible]nstruction to which they are entitled in order that the very purpose of the statute may not be defeated. Irvine v. McDougall, 5 Alaska 220 (1915).

If description is otherwise sufficient. — It is not absolutely necessary that the name of the state or territory, or of the legal subdivision thereof, wherein the premises to be charged are situated, be contained in the notice of lien, provided there is sufficient in the notice, taken in connection with all the circumstances and the place where the notice is filed or recorded, to apprise parties dealing with the property that a lien is claimed thereon. Irvine v. McDougall, 4 Alaska 702 (1913).

Description of property sought to be charged with lien held sufficient. — See Peca v. Huddleston, 5 Alaska 241 (1915).

Complaint must show notice complies with this section. — Since this section requires that the notice of lien filed with the recorder set up certain facts, where the plaintiff's allegation as to the notice of the lien fails to show that the notice filed contains these statements, such statements would not even substantially comply with the statute, and hence the lien would not be created. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

Or notice should be pleaded verbatim. — Not only should plaintiffs state the essential facts, as required by this section, but the better practice would be to plead the notice verbatim, or attach a copy thereof and make it a part of the complaint. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

Substantial compliance with the verification requirement is sufficient. Stephenson v. Ketchikan Spruce Mills, Inc., Sup. Ct. Op. No. 332 (File No. 586), 412 P.2d 496 (1966).

The form of oath followed by the words "subscribed and sworn to before me," and the notary public's signature, amounts in substance to a certificate by the notary that the claim of lien was verified by the oath of the claimant. Stephenson v. Ketchikan Spruce Mills, Inc., Sup. Ct. Op. No. 332 (File No. 586), 412 P.2d 496 (1966).

Lack of claimant's signature on line following form of oath held not to invalidate lien. — See Stephenson v. Ketchikan Spruce Mills, Inc., Sup. Ct. Op. No. 332 (File No. 586), 412 P.2d 496 (1966).

Rule for testing sufficiency of complaint is stricter than for testing notice itself. — While mechanic's lien statutes are to be liberally construed, with a view to effecting substantial justice, a different rule should be followed in determining the effect of the pleading in an action to foreclose a lien, especially where the pleading is questioned at an early stage of the action, from the rule to be followed in determining the sufficiency of a notice of lien, which the lienor cannot correct or amend after the time limited for filing has expired. The complaint in an action of this kind should state all the ultimate facts necessary to be established upon the trial. Irvine v. McDougall, 4 Alaska 702 (1913).

Burden is on lien claimant to prove compliance with section. — The claimant of a mechanic's or laborer's lien has the burden of proof to show by legally sufficient evidence the accrual of the lien under the terms of the statute which creates it as well as under the terms of the contract under which the work was done. Irvine v. McDougall, 5 Alaska 220 (1915), citing Pioneer Mining Co. v. Delamotte, 185 F. 752 (9th Cir. 1911).

Cases to which verification requirement applicable. — The decision in H.A.M.S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1415 (File No. 2871), 563 P.2d 258 (1977), requiring verification

that the facts stated in lien claims are true, will be otherwise applicable only to the following cases: 1. Cases in which trial was commenced prior to May 6, 1977, but which have not been submitted to the trier of fact for decision; 2. Cases in which prior to submission to the trier of fact for decision there has been an express objection that the verification attached to a lien claim fails to meet the requirements of subsection (e)(5) as it existed prior to the 1978 amendment [now the introductory language of subsection (e)]. 3. Cases in which the trial commences after the date of our opinion; and 4. Cases pending on direct appeal on the date of our opinion, in which objection was made in the trial court and thereafter asserted as an issue on appeal that the verification attached to a lien claim fails to meet the requirements of subsection (e)(5) as it existed prior to the 1978 amendment. H A M S. Co. v. Electrical Contractors, Sup. Ct. Op. No. 1115 (File No. 2871), 566 P.2d 1012 (1977).

Subsection (f) contains only the language of guarantee, not of [illegible] liability. Industrial Power & Lighting Corp. v. Western Modular Corp., Sup. Ct. Op. No. 2259 (File Nos. 4163, 4176), 623 P.2d 291 (1981).

Intent of subsection (f). — If the legislature had meant subsection (f) to encompass claims in the nature of disparagement of title free from the defense of privilege, that intention would have been more directly expressed and language of guaranty would not have been utilized. Industrial Power & Lighting Corp. v. Western Modular Corp., Sup. Ct. Op. No. 2259 (File Nos. 4163, 4176), 623 P.2d 291 (1981).

The term "guarantor" as used in the statute does not express the liability of a wrongdoer to his victim except in the special case where the victim is prevented from collecting a debt owed by another because of the wrongdoer's act. Industrial Power & Lighting Corp. v. Western Modular Corp., Sup. Ct. Op. No. 2259 (File Nos. 4163, 4176), 623 P.2d 291 (1981).

Applicability of subsection (f). — With the repeal in 1978 of subsections (d) and (e) of this section, the supreme court of Alaska recognizes that it is difficult, though perhaps not impossible, to imagine a situation to which subsection (f) would apply. Industrial Power & Lighting Corp. v. Western Modular Corp., Sup. Ct. Op. No. 2259 (File Nos. 4163, 4176), 623 P.2d 291 (1981).

Construction of former subsections (b) and (d). — See Frontier Rock & Sand, Inc. v. Heritage Ventures, Inc., Sup. Ct. Op. No. 2029 (File No. 1000), 607 P.2d 361 (1980).

Quoted in Johnson v. State, Sup. Ct. Op. No. 1609 (File No. 3235), 577 P.2d 706 (1978).

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, §§ 167-247.

Sec. 34.35.071. Notice of completion. (a) The owner of real property that may be subject to a lien under AS 34.35.050 — 34.35.120 may announce the date of completion of a building or other improvement on the property by

(1) recording a notice of completion after completion of the construction, alteration or repair of the building or other improvement in the office of the recorder of the district in which the building or other improvement is situated; and

(2) giving notice at least five days before the recording of the notice of completion to all claimants who have given a notice of right to lien or a stop-payment notice to the owner and the lender prior to 10 days before recording a notice of completion; the notice must include a copy of the notice of completion and a statement advising claimants that a notice of completion will be recorded not earlier than five days after the date of the notice.

(b) The notice of completion shall be signed and verified by the owner, and must state

(1) the date of completion of the building or other improvement;

(2) the name and address of the owner;

(3) the nature of the interest or estate of the owner;

(4) the legal description of the property sufficient for identification; and

(5) the name of the general contractor.

(c) *[Repealed, § 9 ch 61 SLA 1979.]*

(d) A notice of completion is not effective if recorded before completion.

(e) Labor, materials, services, or equipment furnished after a notice of completion is recorded to satisfy warranty obligations or to remedy defective or unsatisfactory construction, alterations or repairs for which no additional consideration is owed to the person furnishing the additional labor, materials, services, or equipment does not result in lien liability under AS 34.35.050 — 34.35.120.

(f) [Effective January 1, 1986] After recording a common interest community declaration under AS 34.08, an owner may record a notice of completion under this section as to each unit after completion of the original construction of each unit of the common interest community. (§ 7 ch 175 SLA 1978; am § 9 ch 61 SLA 1979; am § 2 ch 95 SLA 1985)

Effect of amendments. — The 1985 amendment, effective January 1, 1986, in subsection (f) substituted "common interest community" for "condominium," "under AS 34.08" for "as provided in AS 34.07.010 — 34.07.460 (Horizontal Property Regimes Act)," "unit" for "apartment," and "unit of the common interest community" for "condominium apartment."

Editor's notes. — Prior to January 1, 1986, subsection (f) reads: "After recording a condominium declaration as provided in AS 34.07 (Horizontal Property Regimes Act), an owner may record a notice of completion under this section as to each apartment after completion of the original construction of each condominium apartment."

Sec. 34.35.072. Bond. If the owner of the property sought to be charged with a claim of lien under AS 34.35.050 — 34.35.120, or a prime contractor or subcontractor disputes the correctness or validity of the claim of lien brought under AS 34.35.050 — 34.35.120, the owner or contractor may record either before or after the commencement of an action to enforce the claim of lien, in the office of the recorder in which district the claim of lien was recorded, a bond executed by a person authorized to issue surety bonds in this state under AS 21, a financial institution licensed under AS 06, or a national bank authorized under the federal banking laws, in the penal sum equal to one and one-half times the amount of the claim of lien, which bond shall guarantee the payment of the sum which the lien claimant has claimed, together with the lien claimant's reasonable cost of suit in the action, if the claimant recovers on the claim of lien.

If the owner records a bond under this section, the property described in the bond is freed from the effect of a claim of lien under AS 34.35.050 — 34.35.120 and an action brought to foreclose the claim of lien. The principal on the bond may be the owner of the property, the prime contractor or a subcontractor who is affected by the claim of lien. (§ 2 ch 89 SLA 1974; am § 8 ch 175 SLA 1978)

Sec. 34.35.075. Record and index of claim. The recorder shall record the claim in a book kept for that purpose. The records shall be indexed as deeds and other conveyances are required by law to be indexed. The recorder is entitled to the same fees allowed by law for recording deeds and other instruments. (§ 26-16 ACLA 1949)

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, § 186.

Sec. 34.35.080. Duration of lien. (a) A lien provided for in AS 34.35.050 — 34.35.120 does not bind a building, structure, or other improvement for more than six months after the lien is filed, unless suit is brought before the proper court to enforce the lien

(1) within that time, or

(2) within six months after recording of an extension notice in the same recording office within the original six-month period showing the recording date and the book and page or instrument number of the initial claim, and the balance owing.

(b) A lien may not be continued in force for more than one year from the date of the filing of the original lien notice. (§ 26-1-7 ACLA 1949; am § 1 ch 50 SLA 1955; am § 3 ch 123 SLA 1977)

NOTES TO DECISIONS

Protection of lien. — A mechanic's lien claimant, in order to protect his lien, does not have to record a notice of lis pendens when he later files suit to foreclose the lien; the initial recordation of the mechanic's lien claim constitutes inquiry notice of the lien to a subsequent purchaser; and the lien claimant may amend his complaint to add, as a defendant in the action, the subsequent purchaser of the burdened real property under Civ. R. 25(c). First Nat'l Bank v. Dent, Sup. Ct. Op. No. 2839 (File No. 7729), 683 P.2d 722 (1984).

Applied in Frontier Rock & Sand, Inc. v. Heritage Ventures, Inc., Sup. Ct. Op. No. 2029 (File No. 4000), 607 P.2d 361 (1980).

Quoted in State v. Osborne, Sup. Ct. Op. No. 2034 (File No. 4385), 607 P.2d 369 (1980).

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, § 251.

Sec. 34.35.085. Lien for improving lot or street. A person who, at the request of the owner of a lot in the state, grades, fills in, or improves the lot or the street in front of or adjoining the lot has a lien upon the lot for work done and materials furnished. The provisions of AS 34.35.050 — 34.35.120 for securing and enforcing the mechanic's lien apply to the lien provided by this section. (§ 26-1-8 ACLA 1949)

NOTES TO DECISIONS

A municipal corporation is a person under the provisions of this section. Town of Nome v. Lang, 1 Alaska 593 (1902).

Sec. 34.35.090. Payment to contractor. A payment by the owner of a building or structure to a prime contractor or subcontractor, made before 90 days from the completion of the building, is not valid to defeat or discharge a lien created by AS 34.35.050 — 34.35.120 in favor of other claimants, unless the payment is distributed among the other claimants. If a payment is distributed in part only, then the payment is valid only to the extent it is distributed. (§ 26-1-9 ACLA 1949; am § 9 ch 175 SLA 1978)

NOTES TO DECISIONS

Applied in Frontier Rock & Sand, Inc. v. Heritage Ventures, Inc., Sup. Ct. Op. No. 2029 (File No. 4000), 607 P.2d 361 (1980).

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, § 325 et seq.

Sec. 34.35.095. Amount of lien. (a) Except as provided in (c) of this section, a claimant may recover upon a lien recorded by the claimant only the amount due to the claimant according to the terms of the contract, after deducting all claims of other persons claiming through the claimant for work done and materials furnished.

(b) *[Repealed, § 9 ch 61 SLA 1979.]*

(c) An individual described in AS 34.35.120(10) may recover upon a lien recorded by the individual only the amount due according to the terms of the employment. (§ 26-1-10 ACLA 1949; am § 10 ch 175 SLA 1978; am §§ 4, 9 ch 61 SLA 1979)

NOTES TO DECISIONS

Insurance during working period may be lienable item. — Cost of fire insurance to cover the premises during the working period was properly a lienable item where by the terms of the construction contract the contractor was to furnish all labor and materials, including subcontractor's services, with the exception of plumbing and heating. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962).

As may subcontractor's services if contractor is bound to furnish them. — Provision of this section that a contractor is entitled to recover upon a lien filed by him only such amount as may be due to him according to the terms of his contract limits a contractor's lien recovery to the amount called for by his contract, but would include subcontractor's services if, by the terms of his contract, the contractor was responsible for the furnishing of such services. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962).

In absence of contract, limit of recovery is reasonable value of labor and material. — By this section the maximum a contractor may establish as a lien cannot exceed the amount due to him under the terms of his contract, but there must be a contract with the person from whom the contractor's recovery is sought or someone privy to him, otherwise the contractor's lien recovery may be limited to the reasonable value of the labor and material furnished. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962); Meares v. Alaska Metal Bldgs., Inc., Sup. Ct. Op. No. 515 (File No. 962), 448 P.2d 581 (1968).

Collateral references. — Contractor as party to suit to enforce mechanic's lien. 100 ALR 128.

Sec. 34.35.100. Action against contractor on lien. (a) Where a lien is recorded under AS 34.35.050 — 34.35.120 for work done or materials furnished to a prime contractor, the prime contractor shall defend an action at the expense of the prime contractor, and during the pendency of the action the owner may withhold from the prime contractor the amount of money for which the lien is recorded.

(b) If judgment is given against the owner or the property of the owner upon the liens, the owner may deduct from the amount due or to become due by the owner to the prime contractor the amount of the judgment and costs.

(c) If the amount of the judgment and costs exceeds the amount due by the owner to the prime contractor, or the owner settles with that contractor in full, the owner may recover back from the prime contractor an amount paid by the owner in excess of the contract price, and for which the prime contractor was originally liable. (§ 26-1-10 ACLA 1949; am §§ 11 — 13 ch 175 SLA 1978)

Sec. 34.35.105. Materials not subject to process. When a mechanic, artisan, machinist, builder, lumber merchant, contractor, laborer, or other person furnishes or procures materials for use in the construction, alteration, or repair of a building or other improvement, the materials are not subject to attachment, execution, or other legal process to enforce a debt due by the purchaser of the materials except a debt due for the purchase money thereof, so long as the materials have been or are about to be applied in good faith to the construction,

alteration, or repair of the building, or other improvement. (§ 26-1-11 ACLA 1949)

Sec. 34.35.110. Actions to enforce liens. (a) An action to enforce a lien created by AS 34.35.050 — 34.35.120 shall be brought in the superior court. The pleadings, process, practice, and procedure are the same as in other cases. Each claimant is entitled to execution for the balance due after distribution. The clerk of the superior court, upon demand, shall issue the execution after the return of the officer making the execution showing the balance due.

(b) In an action under AS 34.35.050 — 34.35.120 the court shall, upon entering judgment for the plaintiff, allow as a part of the costs all money paid for the filing and recording of the lien and a reasonable amount as attorney fees. An action to enforce a lien created by AS 34.35.050 — 34.35.120 has preference upon the calendar of civil actions of the court and shall be tried without unnecessary delay.

(c) In an action to enforce a lien created by AS 34.35.050 — 34.35.120 all persons personally liable and all lienholders whose claims have been filed for record under AS 34.35.070 shall be made parties; all other persons interested in the matter in controversy or in the property sought to be charged with the lien may be made parties. However, those persons who are not made parties are not bound by the proceedings. The proceedings upon the foreclosure of a lien created by AS 34.35.050 — 34.35.120 shall, as nearly as possible, conform to the proceedings of a foreclosure of a mortgage lien upon real property. (§ 26-1-13 ACLA 1949; am § 14 ch 175 SLA 1978)

NOTES TO DECISIONS

Constitutionality. — The Ninth Circuit has held that provision for the award of costs and attorney's fees only to lien claimants was constitutionally permissible. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

There is no ground for saying that the allowance of reasonable attorney fees in the lien law is unconstitutional. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Origin. — This section was taken, without significant change, from the laws of Oregon. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

At the time this section was adopted for the Territory of Alaska, and subsequent thereto, the courts of Oregon had consistently held that the lien claimant carried the burden of both alleging and proving the reasonable amount of attorney's fees he was entitled to on foreclosure. Absent these prerequisites, it was held that the claimant was not entitled to an award of attorney's fees. It further appears that the statutes were construed as granting some discretion in the courts in regard to the determination of a reasonable attorney's fee. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

The apparent purpose of this section is to facilitate enforcement by mechanics' lienors of their rights by giving them an assurance of costs and attorney's fees if they prevail in their foreclosure actions. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

AS 34.35.005 (b) applies to liens provided for in AS 34.35.050 — 34.35.425. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

While subsection (b) of this section applies only to mechanics' liens provided for in AS 34.35.050 — 34.35.120, Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Constructive notice of lien. — A bank given a deed of trust on property against which a mechanic's lien is claimed does not have constructive notice of the lien unless the claimant has recorded a notice of lis pendens. First Nat'l Bank v. Dent, Sup. Ct. Op. No. 2839 (File No. 7720), 683 P.2d 722 (1984).

Provisions as to parties; state law generally applicable. — The provisions of this section as to parties seem to be only a statement of the law applicable to all actions. Donaldson v. Henning, 4 Alaska 642 (1913).

Grantee of deed recorded after foreclosure suit is commenced is not indispensable party. — Where, when suit to foreclose a mechanic's lien was commenced, the trial court had before it the record owner and the reputed owner, and had jurisdiction to proceed to hear and determine the questions presented as to the rights and obligations of the parties properly before it, the subsequent recording of a deed of the property to a minor, not served with process, could not divest the court of such jurisdiction as had already attached. Cutting v. Bullerdick, 13 Alaska 269, 188 F.2d 837 (9th Cir. 1951).

Proper parties. — All persons personally liable, all lienholders whose claims have been duly filed, and all other persons interested in the matter in controversy or in the property sought to be charged with the lien, may, under this section, be made parties. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

Set off. — In an action to enforce a mechanic's lien, the plaintiff was not entitled to costs and an attorney's fee because he only prevailed on one count of his complaint, and costs and attorney's fees for his successful count were set off against those costs and attorney's fees to which the defendant was entitled under AS 09.60.010 because of its successful defense against the other counts of the complaint. Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Quoted in Nordstrom v. Sivertsen-Johnsen Mining & Dredging Co., 5 Alaska 210 (1915); Mitchell v. Beaver Dredging Co., 8 Alaska 566 (1935).

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, § 3.39 et seq.

Sec. 34.35.112. Payment of claimant's liens. (a) If more than one lien created under AS 34.35.050 — 34.35.120 is claimed against property, the court in its judgment shall declare the rank of each lien or class of liens in the following order:

(1) all persons other than prime contractors or subcontractors with lien rights under AS 34.35.050(1);

(2) the trustees of employment benefit trusts for persons described in (1) of this subsection;

(3) all materialmen;

(4) subcontractors, including prime contractors other than the general contractor and persons described in AS 34.35.050(5);

(5) the general contractor.

(b) For purposes of AS 34.35.050 — 34.35.120, if the proceeds of sale of the property are insufficient to pay the lien claims of all persons who have recorded a claim of lien,

(1) the liens of all individuals with lien rights under AS 34.35.050(1) shall first be paid in full, or pro rata if the proceeds are insufficient to pay them in full;

(2) the liens of trustees of employment benefit trusts for persons described in (1) of this subsection shall be paid in full or pro rata if the proceeds are insufficient to pay them in full;

(3) the liens of materialmen shall be paid in full or pro rata if the proceeds are insufficient to pay them in full;

(4) out of the remainder the subcontractors, including prime contractors other than the general contractor, shall be paid in full, or pro rata if the remainder is insufficient to pay them in full; and

(5) the balance shall be paid to the general contractor; a general contractor is entitled to execution for the balance due after distribution. (§ 15 ch 175 SLA 1978; am § 5 ch 61 SLA 1979)

Sec. 34.35.114. Obligation of claimant and lender to provide information. (a) A prime contractor, on request, shall provide the following information within five days to any person entitled to claim a lien through the prime contractor:

(1) a description of the real property being improved sufficient to identify the property;

(2) the name and address of the owner with whom the prime contractor contracted;

(3) the name and address of the lender providing construction financing; and

(4) whether there is a payment bond and, if so, the name of the surety.

(b) At the request of any person who may claim a lien through a claimant other than a prime contractor, the claimant shall provide, within five days, the name of the person who contracted for the furnishing by the claimant of the labor, materials, services or equipment from which a lien claim may arise.

(c) A lender who receives a notice of right to lien which contains a legal description of the owner's real property different from that on file with the lender shall, within five working days after receiving the notice, advise the sender in writing of the deficiencies in the notice of right to lien.

(d) A lender who receives a notice of right to lien which designates a person as an owner who is not receiving construction financing from the lender shall, within five working days after receiving the notice, advise the sender in writing that the lender is not providing construction financing to the owner named in the notice of right to lien.

(e) An owner or an agent of the owner who fails to provide information as required by this section or who furnishes incorrect information which causes a claimant to fail to realize on a lien is liable to the requesting party for actual damages or $200, whichever is greater. (§ 6 ch 61 SLA 1979)

Sec. 34.35.115. Persons considered agent of owner. Every contractor, subcontractor, architect, builder, or other person having charge of the construction, alteration or repair, in whole or in part, of a building or other improvement as provided in AS 34.35.050 and 34.35.085, is considered to be the agent of the owner for the purposes of AS 34.35.050 — 34.35.120. (§ 26-1-14 ACLA 1949)

NOTES TO DECISIONS

Applied in Mallard v. Proce, 353 F.2d 550 (9th Cir. 1965).

Sec. 34.35.117. Waiver of lien rights. (a) Except as provided under (b) of this section, a written waiver of lien or stop-payment notice rights created under AS 34.35.050 -- 34.35.120 signed by a claimant requires no consideration and is valid and binding. A waiver permitted under this section may not relate to labor, materials, services or equipment furnished after the date the waiver is signed by the claimant.

(b) An individual described in AS 34.35.120(10) may not waive right to claim a lien under AS 34.35.050 — 34.35.120. A waiver which purports to waive the lien rights of that individual or class of individuals is void. (§ 15 ch 175 SLA 1978)

Sec. 34.35.118. Claimant liability. A claimant shall be liable for any loss, cost or expense, including reasonable attorney fees, to any persons injured by an unjust, excessive or premature stop-payment notice or claim of lien. (§ 15 ch 175 SLA 1978)

Sec. 34.35.119. Waiver of liens on unsold common interest community units [Effective January 1, 1986]. (a) A lien created under AS 34.35.050 — 34.35.120 arising out of original construction that becomes subject to AS 34.07 or AS 34.08 before the first sale of a unit within a common interest community after commencement of construction shall be subject to the provisions of this section.

(b) Subject to (c) of this section, a claimant who claims a lien against an entire common interest community shall release that portion of the lien claim that relates to a particular unit within a common interest community selected by the owner of the unsold common interest community units after the claimant receives a partial payment of the lien claim that is equal to 115 percent of the amount determined

(1) if the common interest community has been established under AS 34.07 by

(A) dividing the surface area of the common areas and facilities attendant to the common interest community unit by the surface area of all common areas and facilities of the common interest community building; and

(B) multiplying the result obtained in (A) of this subsection by the total amount of the claimant's lien claim;

(2) by the allocated interest in the common expenses if the common interest community has been established under AS 34.08.

(c) A lien claimant is not required to waive a portion of the lien claim under this section unless the amount of indebtedness secured by a prior encumbrance against the common interest community building held by a construction lender is also reduced by an amount calculated in the same manner as provided in (b) of this section. (§ 15 ch 175 SLA 1978; am § 3 ch 95 SLA 1985)

Effect of amendments. — The 1985 amendment, effective January 1, 1986, rewrote this section.

Editor's notes. — Prior to January 1, 1986, this section reads: "(a) Liens created under AS 34.35.050 — 34.35.120 arising out of original construction which becomes subject to the Horizontal Property Regimes Act (AS 34.07) before the first sale of any portion of the property after commencement of construction shall be subject to the provisions of this section.

(b) Subject to (c) of this section, a claimant who claims a lien against the entire building shall release that portion of his lien claim which relates to a particular condominium apartment selected by the owner of the unsold condominium apartments after the claimant receives a partial payment of his lien claim which is equal to 115 per cent of the amount determined by

(1) dividing the surface area of the common areas and facilities attendant to the condominium apartment by the surface area of all common areas and facilities of the building; and

(2) multiplying the result obtained in (1) of this subsection by the total amount of the claimant's lien claim.

(c) A lien claimant is not required to waive a portion of his lien claim under this section unless the amount of indebtedness secured by a prior encumbrance against the building held by a construction lender is also reduced by an amount calculated in the same manner as provided in (b) of this section."

Sec. 34.35.120. Definitions. In AS 34.35.050 — 34.35.120

(1) "building or other improvement," includes a wharf, bridge, ditch, flume, tunnel, fence, well, land clearing, machinery, aqueduct to create hydraulic power, or for mining or other purposes, and all other structures and superstructures;

(2) "completion" means the cessation of the performance of labor or services or the furnishing of material or equipment on the building or other improvement to be constructed, altered or repaired and includes, but is not limited to, the following:

(A) the occupation or use by the owner or an agent of the owner of the building or other improvement constructed, altered or repaired accompanied by cessation of the furnishing of labor, services, material, or equipment on the building or improvement;

(B) the acceptance by the owner or an agent of the owner of the construction, alteration or repair after labor, service, material, or equipment is furnished; or

(C) the issuance of a certificate of occupancy for a building by a general law or home rule municipality empowered to issue that certificate accompanied by cessation of the furnishing of labor, services, material, or equipment on the building or improvement;

(3) "construction, alteration, or repair", includes partial construction, and all repairs done in and upon a building or other improvement;

(4) "construction financing" means that portion of money secured by an encumbrance to finance original construction of a building or other improvement on, or development of, real property, but does not include

(A) funds to acquire real property;

(B) funds to pay principal amortization of encumbrances with priority over the encumbrance securing the construction financing;

(C) funds to pay loan, commitment, title, legal, closing, recording or appraisal fees on the construction loan;

(5) "contract price" means the amount agreed upon by the contracting parties for furnishing services, labor, materials or equipment covered by the contract, increased or diminished by the price of change orders, extras, or amounts attributable to altered specifications; if no price is agreed upon by the contracting parties, "contract price" means the reasonable value of all services, labor, materials, or equipment covered by the contract;

(6) "Draws" means periodic disbursements of construction financing by a lender;

(7) "encumbrance" means a mortgage, deed of trust, or lien arising other than under AS 34.35.050 — 34.35.120;

(8) "general contractor" means a person who is a prime contractor and who has the responsibility for supervising all other contractors furnishing labor, materials, services or equipment in connection with the construction, alteration or repair of a building or other improvement;

(9) "give notice" means to mail a notice required under AS 34.35.050 — 34.35.120 by first-class mail and by using a form of mail requiring a signed receipt, or to deliver the notice and obtain a receipt signed by the person to whom it is directed or an agent of that person; a notice is effective when given or delivered

(A) to a lender at the address designated in the encumbrance securing that lender;

(B) to an owner at the last known address of the owner;

(C) to a prime contractor at the last known address of the prime contractor;

(D) to a potential lien claimant at the address specified in a stop-payment notice or notice of right to lien or claim of lien;

(10) "individual" means a natural person who actually performs labor upon a building or other improvement as an employee of the owner or any contractor furnishing labor, materials, services, or equipment for the construction, alteration or repair of a building or other improvement;

(11) "lender" means any person providing construction financing;

(12) "materialman" means a person who furnishes materials used in the construction, alteration or repair of the owner's real property;

(13) "owner" means a person who owns the building or other improvement and who enters into a contract, express or implied, for the construction, alteration or repair of a building or improvement;

(14) "potential lien claimant" or "claimant" means any person entitled to assert lien rights under AS 34.35.050 — 34.35.120;

(15) "prime contractor" means a person who enters into a contract directly with an owner to furnish labor, materials, services, or equipment for the construction, alteration or repair of a building or other improvement on the owner's real property;

(16) "subcontractor" means a person who enters into a contract with a prime contractor to furnish labor, services, or equipment for the construction, alteration or repair of a building or other improvement on the owner's real property and does not include a materialman. (§ 26-1-12 ACLA 1949; am § 2 ch 57 SLA 1959; am § 16 ch 175 SLA 1978; am §§ 7, 8 ch 61 SLA 1979)

Memorandum

From: Representative Max F. Gruenberg, Jr.

Re: CSHB 517 (JUD), relating to the private sale and consignment of works of art

Date; April 17, 1986

This bill is modeled after two New York statutes passed in 1966, and is designed to offer protections to Alaskan artists in their business relationships with art dealers and their rights to reproduction.

SECTION 1 Provides that works of art on consignment are not subject to the claims of an art dealer's creditors, and that a sign must be posted in a gallery where art is sold on consignmnet stating that works of art for sale are on consignment.

SECTION 2 Provides that works of art delivered to an art dealer are trust property in the hands of the art dealer for the benefit of the artist.

Provides that subsection (a)(3) of 45.67.020 may be waived if the agreement is clear and agreed to in writing, however, under a waiver the proceeds of a sale are still not subject to a lien against an art dealer.

Provides that unsold artwork must be returned to the artist on demand consistent with any written agreement.

Also provides that the provisions of 45.67.010 - 020 may not be construed to effect an existing contract. Subsection (b) provides that this law will apply to all future dealings between an artist and art dealer

SECTIONAL ANALYSIS

Protection of Ownership Rights of Artists Act

Artists often find themselves in a complicated and disadvantageous business situation when conveying rights to a work of art. An artist will frequently make an agreement for reproduction rights to an artwork, but is unable to reacquire the original artwork after it has been reproduced if the agreement was oral or the contract was complex and signed without benefit of counsel. This 1983 New York law overcomes these problems and protects the interests of the individual artists involved.

Under this bill, even if an artist or owner sells reproduction rights for a work of art, the ownership of the actual work remains with the creator or owner unless the ownership is transferred in writing and signed by the artist or owner. In addition, any contracts selling reproduction rights must be in plain language. If a purchaser does not comply with this requirement the contract could be unenforceable and any right not conveyed would remain with the artist or owner.

(Title, enacting clause, etc.)

Section 1. [*Short Title.*] This act may be cited as the Protection of Ownership Rights of Artists Act.

Section 2. [*Definitions.*] As used in this act:

(1) "Work of Art" means any visual or graphic art of any medium.

(2) "Artist" means the creator or creators of a work of art.

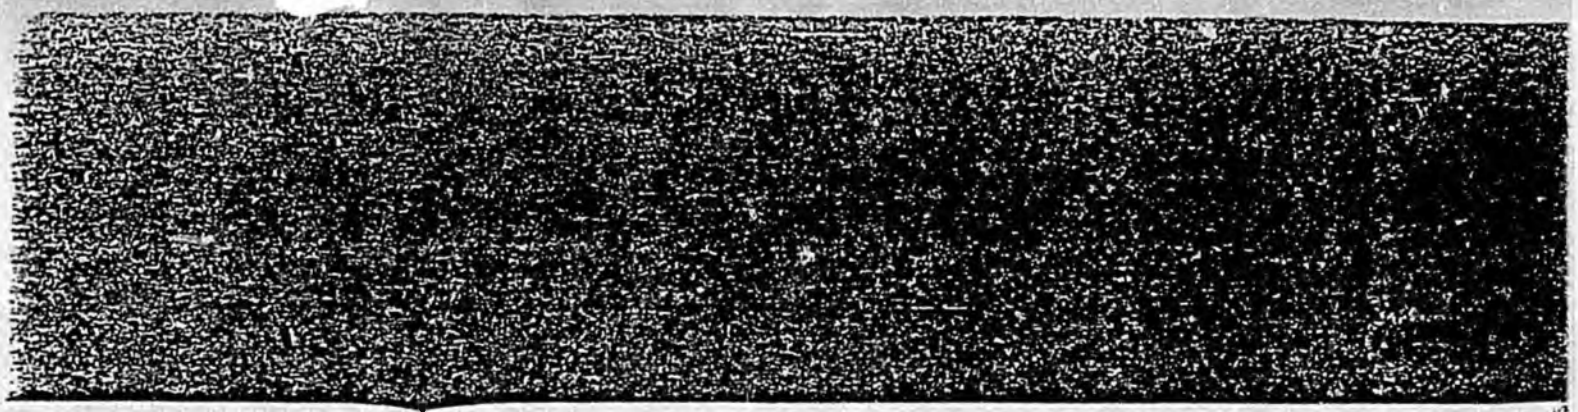
(3) "Reproduction Right" means a right to reproduce, prepare derivative works of, distribute copies of, publicly perform or publicly display a work of art.

Section 3. [*Right to Reproduce Works of Art.*]

(a) Whenever a work of art is sold or otherwise transferred by or on behalf of the artist who created it, or his heirs or personal representatives, the right of reproduction thereof is reserved to the grantor until it passes into the public domain by act or operation of law unless such right is sooner expressly transferred by an instrument, note or memorandum in writing, signed by the owner of the rights conveyed or his duly authorized agent.

(b) Whenever an exclusive or non-exclusive conveyance of any reproduction right is made by the holder of such right, or his duly authorized agent, ownership of the physical art work shall be presumed to remain with and be reserved to the grantor unless expressly transferred in writing by an instrument, note, memorandum or by other written means, signed by the grantor or his duly authorized agent.

(c) Nothing herein contained, however, shall be construed to prohibit the fair use of such work of art.



(d) Nothing in this article shall operate or be construed to conflict with any rights or liabilities under federal copyright law.

Section 4 . [*Severability.*] [Insert severability clause.]

Section 5 . [*Repealer.*] [Insert repealer clause.]

Section 6. [*Effective Date.*] [Insert effective date.]

Protection of Artists Whose Work Has Been Altered Act

Several well-known cases of mutilated, altered or defaced artwork have led to a drive to balance the property rights of owners against the creative rights of the artists and the general rights of society. The following legislation was enacted by New York in 1983 to protect the reputation of an artist after an artwork has been sold.

The bill gives a legal cause of action if a work which an artist created was defaced, altered or mutilated (without the artist's consent) and damage to the artist's reputation could result. The artist could also claim or disclaim authorship of work. Exceptions are made when: an artist consents to changes in writing; the nature of the materials used causes a change in the work; a change occurs because of the reproduction process or when work is professionally framed or restored. An aggrieved artist is afforded a cause of action for damages, exemplary damages where appropriate, equitable relief, and reasonable attorney and witness fees.

(Title, enacting clause, etc.)

Section 1. [*Short Title.*] This act may be cited as the Protection of Artists Act.

Section 2. [*Definitions.*] As used in this act:

(1) "Artist" means the creator of a work of fine art.

(2) "Conservation" means acts taken to correct deterioration and alteration and acts taken to prevent, stop or retard deterioration.

(3) "Person" means an individual, partnership, corporation, association or other group, however organized.

(4) "Reproduction" means a copy, in any medium, of a work of fine art that is displayed or published under circumstances that, reasonably construed, evinces an intent that it be taken as a representation of a work of fine art as created by the artist.

(5) "Work of Fine Art" means any original work of visual or graphic art of any medium which includes, but is not limited to, the following: painting; drawing; print; photographic print or sculpture of a limited edition of not more than 300 copies; provided however, that "work of fine art" shall not include sequential imagery such as that in motion pictures.

Section 3. [*Public Display, Publication and Reproduction of Works of Fine Art.*] Except as limited by Section 5 of this act, no person other than the artist or a person acting with the artist's consent shall knowingly publicly display or publish a work of fine art of that artist or a reproduction thereof in an altered, defaced, mutilated or modified form if the work is displayed, published or reproduced as being the work of the artist, or under circumstances under which it would reasonably be regarded as being the work of the artist, and damage to the artist's reputation could result therefrom.

Section 4. [*Artists' Authorship Rights.*]

(a) Except as limited by Section 5 of this act, the artist shall retain at all times the right to claim authorship, or, for just and valid reason, to disclaim

authorship of his or her work of fine art. The right to claim authorship shall include the right of the artist to have his of her name appear on or in connection with the work of fine art as the artist. The right to disclaim authorship shall include the right of the artist to prevent his or her name from appearing on or in connection with the work of fine art as the artist. Just and valid reasons for disclaiming authorship shall include that the work of fine art has been altered, defaced, mutilated or modified other than by the artist, without the artist's consent, and damage to the artist's reputation could result or has resulted therefrom.

(b) The rights created by this section shall exist in addition to any other rights and duties which may now or in the future be applicable.

Section 5. [*Limitations of Applicability.*]

(a) Alteration, defacement, mutilation or modification of a work of fine art resulting from the passage of time or the inherent nature of the materials will not by itself create a violation of Section 3 or a right to disclaim authorship under Section 4(a), provided such alteration, defacement, mutilation or modification was not the result of gross negligence in maintaining or protecting the work of fine art.

(b) In the case of a reproduction, a change that is an ordinary result of the medium of reproduction does not by itself create a violation of Section 3 or a right to disclaim authorship under Section 4(a).

(c) Conservation shall not constitute an alteration, defacement, mutilation or modification within the meaning of this act, unless the conservation work can be shown to be negligent.

(d) In the case of work prepared under contract for advertising or trade use, the rights granted by this article may be waived contractually or otherwise at any time.

(e) The provisions of this article shall apply only to works of fine art knowingly publicly displayed, published or reproduced in this state.

Section 6. [*Relief.*]

(a) An artist aggrieved under Sections 3 or 4 shall have a cause of action for damages, exemplary damages where appropriate, equitable relief and reasonable attorney's and expert witness's fees, provided, the court may, in its discretion, award attorney's and expert witness's fees to the defendant upon dismissal of any action on the grounds such action was frivolous and malicious.

(b) No action may be maintained to enforce any liability under this article unless brought within three years of the act complained of or one year after the constructive discovery of such act, whichever is longer.

Section 7. [*Severability.*] [Insert severability clause.]

Section 8. [*Repealer.*] [Insert repealer clause.]

Section 9. [*Effective Date.*] [Insert effective date.]

Alaska Arts Southeast INC

February 7th, 1986

Representative Peter Goll
Box 581
Haines, AK 99827

Dear Peter:

I would like to express my support of House Bill No. 517, which you co-sponsored in the State Legislature. I believe that this bill would be fair to all parties concerned, and codifies honest and prudent practice between artists and those who maintain galleries.

Thank you for returning my call this week concerning the possibility of a teleconference this spring. As I stated in our conversation I conducted a survey of Arts Organizations in Southeast in an attempt to gauge interest in a consortium of presentors in our region. Such a consortium could save money for all organizations and increase the range of choices for many of the smaller communities. A by product would be the facilitation of planning an entire season of events for Southeast.

I have enclosed copies of Presenter Survey forms from those who responded favorably. Five communities from District two are represented: Skagway, Haines, Metlakatla, Hoonah, and Angoon. A sixth organization has since expressed interest in Gustavus. Keep in mind that the interest has been expressed by organizations which ultimately represent and impact hundreds of individuals. Ten other organizations have also expressed an interest within the following communities: Juneau, Sitka, Ketchikan, Port Alexander, Pelican, and Petersburg. It would appear then, that at least half of the communities expressing an interest in talking further about a consortium are in District 2.

If we are to be effective in our efforts to begin planning and discussing booking for next year we should begin our dialogue soon. I don't know what your schedule will allow but I would suggest sometime between the last week in March and mid May. Early May would be ideal for me since I am on the road in Southeast recruiting for Camp during most of April.

I realize, however, that teleconferences are difficult to schedule. I would appreciate any efforts that you could make in securing one for the arts communities in our region.

Sincerely,

Gordon M. Bolar

R. T. Wallen
P. O. Box 1063
Juneau, Alaska, 99802

Rep. Max Gruenberg
Pouch V
State Capitol
Juneau, Alaska, 99811

February 9, 1986

Dear Max,

I very much appreciate the efforts of the sponsors of this arts bill. I think it is going to clarify some rather vague areas concerning the rights and responsibilities of artists, art dealers and art patrons. The section of the bill in which I am most interested is 45. 67. 020, the section dealing with the right to reproduce works of art.

Whenever an artist creates a series of original prints, from a stone or metal plate, for example, or when he reproduces a painting with a series of prints, or makes a series of castings from a mold, the artist may elect to mark these original prints, or reproductions, or castings with the letter "c" enclosed in a circle, followed by his intitials and the year date. This copyright symbol and initials and date proclaim his "intent to copyright" and proclaim his rights under Federal Copyright Law. The system functions well with works of art which appear as multiple images or forms since everyone, artist, dealer and buyer understand, by the fact of the copyright signal appearing on the art that certain rights to the reproduction of that work have been established.

Original works, however, one of a kind works, whether they be paintings, or drawings or sculptures, often do not bear the copyright symbol because the artist has not reproduced them, and does not intend that they be reproduced. In fact, the artist, although he has the option of marking the work with the copyright symbol, often will not do so because the appearance of the copyright symbol on an original work implies that it has been reproduced, or might be reproduced in the future, and the mark might thus affect the value of the work both aesthetically and commercially. As I understand Federal Copyright Law, the artist has sole rights to reproduction of an original work of his own art regardless of whether he has marked it with the copyright symbol. However, the lack of such a symbol on a work of art can create an area of uncertainty in the mind of a buyer or art dealer.

For this and other reasons I think that there is value in a state law which addresses the problem and spells out the legal rights of artists in regards to the reproduction of their works of art. I think the fairness of the theory of this section of of the bill is reflected in Federal Copyright Law, in the legal rights of authors to their printed works, and in the legal rights that pertain to many kinds of design work, such as achitecture, boat design and so on.

As a state law, this is close to home, and every person seriously involved in the art world here in the state will be familiar with it. As an artist who has had to deal with copyright related issues a number of times in my career, and who has business with many different art dealers, and who is often asked by patrons about their rights in regard to a work of art, I see great value in this bill and benefits to artist, dealer and buyer alike. It goes a long way in clearly establishing the ground rules.

Sincerely,

R T Wallen

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 517 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the private sale and consignment of works of art."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.02.326(e) is repealed and reenacted to read:

(e) When an artist delivers a work of art to an art dealer as described in AS 45.67.010, the art dealer shall prominently display a sign stating substantially, "Works of art for sale are on consignment." Works of art on consignment are not subject to the claims of the art dealer's creditors.

* Sec. 2. AS 45 is amended by adding a new chapter to read:

CHAPTER 67. ARTISTS AND WORKS OF ART.

Sec. 45.67.010. ARTISTS AND ART DEALER RELATIONSHIPS. (a) When an artist delivers or causes to be delivered a work of art of the artist's own creation to an art dealer for the purpose of sale, or exhibition and sale, on a commission, fee, or other basis of compensation, the acceptance of the work of art by the art dealer is a consignment, and

(1) the art dealer is, with respect to the work of art, the agent of the artist;

(2) the work of art is trust property in the hands of the art dealer for the benefit of the artist; and

(3) proceeds from the sale of the work of art are trust funds in the hands of the art dealer for the benefit of the artist, and the dealer shall transmit the proceeds to the artist within 30

days of the sale of the work of art.

(b) A work of art initially received as a consignment remains trust property notwithstanding the subsequent purchase of the artwork by the art dealer directly or indirectly for the art dealer's own account until the consignment price due to the artist is paid in full. If the work of art is resold to a bona fide third party before the artist has been paid in full, the proceeds of the resale are trust funds in the hands of the art dealer for the benefit of the artist to the extent necessary to pay any balance still due to the artist. The trusteeship continues until the fiduciary obligation of the art dealer with respect to the transaction is discharged in full.

Sec. 45.67.020. WAIVER. (a) A provision of a contract or agreement whereby the artist waives a provision of AS 45.67.010 is void except as provided in this subsection. An artist may waive the provisions of AS 45.67.010(a)(3) if the waiver is clear, conspicuous, and agreed to in writing by the artist. A waiver under this subsection is not valid with respect to the proceeds of a work of art initially received as a consignment but subsequently purchased by the art dealer directly or indirectly for the art dealer's own account.

(b) A waiver under (a) of this section may not inure to the benefit of the art dealer's creditors in a manner that is inconsistent with the artist's rights under AS 45.67.010.

Sec. 45.67.030. RETURN TO ARTIST. Unless the artist and art dealer have otherwise agreed in writing, the art dealer shall return an unsold work of art on demand of the artist.

Sec. 45.67.040. APPLICABILITY. (a) The provisions of AS 45.67.010, 45.67.020, and 45.67.030 may not be construed to have an effect upon a written or oral contract or arrangement in existence on the effective date of this section, except by the mutual written

consent of the parties.

(b) The provisions of AS 45.67.010 and 45.67.020 apply notwithstanding the absence of, or a conflict with, a written agreement between the artist and the art dealer concerning any matter covered by AS 45.67.010 and 45.67.020. In the event of a conflict between AS 45.67.010, 45.67.020, or 45.67.030 and AS 45.01 - AS 45.09 (Uniform Commercial Code) or other provision of law, the provisions of AS 45.67.010, 45.67.020, and 45.67.030 govern.

Sec. 45.67.050. RIGHT TO REPRODUCE WORKS OF ART. (a) When a work of art is sold or otherwise transferred by or on behalf of the artist who created it, or the heirs or personal representatives of the artist, the right of reproduction is reserved to the grantor until it passes into the public domain by act or operation of law, unless the right is sooner expressly transferred by an instrument, note, or memorandum in writing signed by the owner of the right or an authorized agent of the owner.

(b) When an exclusive or nonexclusive conveyance of a right of reproduction is made by the holder of the right, or the holder's authorized agent, ownership of the physical art work is presumed to remain with and be reserved to the grantor unless expressly transferred in writing signed by the grantor or the grantor's authorized agent.

(c) This section may not be construed to prohibit the fair use of a work of art or to conflict with federal copyright law.

Sec. 45.67.100. DEFINITIONS. In this chapter, unless the context otherwise requires,

(1) "artist" means the creator of a work of art or, if deceased, the heirs or personal representatives of the creator;

(2) "art dealer" means a person engaged in the business of

selling works of art, other than a person exclusively engaged in the business of selling goods at public auction;

(3) "consignment" means that no title to or estate in the goods or right to possession superior to that of the consignor vests in the consignee, notwithstanding the consignee's power or authority to transfer and convey, to third person, all of the right, title and interest of the consignor, in and to the goods;

(4) "creditor" has the meaning given in AS 45.01.201;

(5) "right of reproduction" means a right to reproduce, prepare derivative works of, distribute copies of, or publicly display a work of art;

(6) "work of art" means a painting, sculpture, drawing, work of graphic art, photograph, or craft work, in any medium.

ANALYSIS :

This bill sets out some of the property rights of artists, providing for the sale and consignment of works of art under Title 45. The bill, which adds a new Chapter to this Title, does not contain penalty provisions. Any disputes arising from the provisions of the bill would be civil matters between private parties and would not involve the Department of Law.

CHAIRMAN'S INFORMATION: SCS CSHB 522(L&C)

1) BILL TITLE: "An act relating to an insurance broker's receipt of premium payments, the cancellation or nonrenewal of insurance policies, and provision of medical malpractice insurance for nurses and nurse midwives."

a) Introduced: Rep Sund

b) Co-sponsors:

2) INTENT: This measure contains portions of various insurance "reform" proposals which have been heard in committee this year. Among these are payments to brokers, cancellation notifications, and notification for nonrenewal of insurance policies. It also expands MICA provisions to offer insurance to nurses and nurse midwives. The version which passed the House contained language which would provide for a nurse or nurse midwife to hold a seat on the MICA Board, and I have deleted that provision in the SCS.

FISCAL NOTE: 0

3) ADDITIONAL REFERRALS: Judiciary and Rules

4) PUBLIC HEARINGS:

a) Sponsor:

b) Public Witnesses:

5) BILL ACTION:

a) Hold in committee?
b) Assign to sub committee for further review?
c) Move from committee?
d) Close public hearings?

6) COMMITTEE ACTION?

a) amendments?
b) CS adoption? Need to adopt the L&C SCS, plus the title change; An SCR was introduced this morning to effect that change.

CS HB 522 (Judiciary)

OVERVIEW

Prepared by Rep. John Sund's office.
April 27, 1986

OBJECTIVE OF THE BILL

The purpose of House Bill 522 is to approach the effects of the insurance crisis through tightening various insurance regulations and expanding the Medical Indemnity Corporation of Alaska.

WHAT THIS BILL DOES

1. Regards premium payments to insurance brokers as payments directly to the insurance company. This will prevent alleged nonpayment of premium cancellations because a broker walked off with the payment.

2. Clarifies accepted reasons for canceling a personal line (auto and homeowner's) insurance policy and increases the time requirement for notification of cancellation from 20 days to 60 days with certain exceptions. It also requires a stated reason for the cancellation.

3. Establishes criteria for canceling a business or commercial insurance policy and requires 60 days notice of cancellation with certain exceptions. It also requires a stated reason for the cancellation.

4. Establishes a 45 day notice of nonrenewal for business and commercial policies.

5. Expands the Medical Indemnity Corporation of Alaska (MICA) to offer insurance to nurses and nurse midwives and adds a nurse or nurse midwife to the MICA board of directors.

WHY THIS BILL IS NEEDED

While we have been attacking the insurance crisis primarily from the tort reform angle and the pooling concept, we can also help the situation through insurance regulation reform.

Not only is it traumatic to have your insurance canceled, it is worse to have it canceled without adequate notice so that other coverage can be sought. We now have no law that requires advance notice of cancellation of business or commercial insurance. This bill would give the insured 60 days to find alternate coverage.

This bill also helps those nurses who are working in high-risk fields, such as childbirth, and cannot find insurance coverage. MICA would now be available to them.

The bill carries a zero fiscal note and is supported by the Division of Insurance.

CS HB 522 (Judiciary)

SECTIONAL ANALYSIS
Prepared by Rep. John Sund's office.

Section 1; Page 1, line 13: amends AS 21.27.200 (a) by stating that a broker is not an agent for the insurer, except as provided in (c) (see Section 2 below). Nothing in this section is intended to change common law on agency.

Section 2; Page 1, line 22: adds the new subsection (c) referred to above. This makes the broker the agent of the insurer for the purpose of collecting premiums.

This is important to the Division of Insurance and gives the insured more latitude in premium payments. When the broker receives a premium payment, it is treated as if the insurance company has received it. This protects the insured and prevents policy cancellation due to nonpayment of premiums because an unscrupulous broker walked off with the cash. According to the division, this section could save many thousands of dollars per year for the consumer.

Section 3; Page 1, line 28: amends present statute on limits on cancellation by clarifying that insurers cannot cancel a personal automobile insurance policy unless premiums aren't paid or the insured's license is revoked or suspended.

Section 4; Page 2, line 11: amends the reasons for which limits on cancellation in this section don't apply:

1) failure to renew a policy unless it was in force for less than 12 months. (This is already in statute.)
2) a policy that is less than 60 days old, unless it is a renewal.
3) an automobile assigned risk or automobile insurance plan.
4) a policy insuring more than four vehicles.
5) a policy covering a business related to automobiles.

Section 5; Page 2, line 28: amends present statute on limits on cancellation by specifying that the following limits apply only to personal insurance other than personal auto insurance:

1) nonpayment of premiums.
2) conviction of a crime that increases insured's risk.
3) discovery of fraud or misrepresentation by insured.
4) discovery of negligent act or omission that increases insured's risk.
5) physical change in insured's property making it

uninsurable.

Section 6; Page 3, line 18: places limits on cancellation of a business or commercial policy. No provisions now exist in law to limit commercial insurance cancellation. The limits are the same as in Section 6 (personal insurance), but additional reasons specific to commercial insurance are added.

This section also provides in (b), Page 4, line 23, for the director of the Division of Insurance to determine on a case by case basis whether a reason for cancellation not listed in this section is justified.

Section 7; Page 4, line 25: increases the notice of cancellation of a personal insurance policy from 20 days to 60 days before the cancellation date. If nonpayment of premium is the reason for cancellation, however, notice must be served within 10 days, which is present law.

This section also requires that the notice include a statement of the reason for cancellation.

Section 8; Page 5, line 9: requires the same time frame for cancellation of business or commercial insurance as that for personal lines as cited above.

Unearned premium must be returned or credited before the cancellation effective date unless the cancellation is for nonpayment. In that case, the unearned premium must be returned or credited within 45 days after the cancellation date.

Policy premiums subject to audit are also exempt from the above refund requirement. The audit must be done within 30 days of the cancellation date and the unearned premium must be returned or credited within 30 days of the audit completion.

Section 9; Page 6, line 2: clarifies that the present law requiring renewal of policies that are in force less than 12 months pertains only to personal lines.

This section also adds business and commercial lines to the requirements for notice of nonrenewal with a 45 day notice period. Personal lines require only 20 days notice of nonrenewal.

This section doesn't apply if the insurer in good faith was willing to renew, if premiums weren't paid on the expiring

policy, or if premiums weren't paid as required for renewal.

Section 10; Page 6, line 19: is housekeeping on the requirement to notify those denied auto liability insurance of the auto assigned risk plan.

Section 11; Page 6, line 29: Definitions.

Section 12; Page 8, line 24: amends the makeup of the Medical Indemnity Corporation of Alaska (MICA) board of directors by reducing the number of physicians from four to three and adding a licensed nurse or nurse midwife to the board. The reason for the change is that under this bill, nurses would be eligible for coverage through MICA (see section 14).

Section 13; Page 9, line 15: amends MICA statute by allowing nurses and nurse midwives to be a separate entity for coverage.

Section 14; Page 12, line 10: Definitions.

Section 15; Page 12, line 16: repeals statutes the intent of which are covered elsewhere in this bill.

Department of Commerce & Economic Development / POSITION PAPER

CSHB 522(L&C): "An Act relating to payment of insurance premiums, cancellation of insurance policies, and the provision of medical malpractice insurance for nurse midwives; and providing for an effective date."

The Department favors passage of this proposed legislation.

Sections 1 & 2 of this bill would provide that, for purposes of receiving payment of an insurance premium, a broker is legally considered an agent of the insurance company. This legislation does not give the broker the ability to bind coverage with an insurance company that has not given him that authority. The insurance agent has a direct contractual relationship with the insurance company in which it places business. The effect of this is that when an agent receives premium from an insured, it is the same as though the insurance company had received the funds, even if the insurance company never receives the money.

The situation with a broker is not as clear. The broker by definition represents the insured, not the insurance company. While it is possible that a legal argument could be made to attempt to treat the broker as an agent of the insurer, this must be done in court on a case by case basis.

During the past two years, it has become clear that a similar law is needed for brokers. Two large broker insolvencies have occurred where insureds have paid the broker who in turn has failed to remit those funds to the insurer resulting in cancellation of coverage for nonpayment of premium. The insured then suffers a loss of coverage and monies. In most cases, the insured person did not know in which capacity the producer was acting, let alone understand and appreciate the distinction.

Sections 3 - 10 and 14 address cancellation of commercial insurance policies. Under existing law, there is a limitation on cancellation of personal lines policies such as automobile insurance policies and homeowners insurance policies. A part of this law also establishes minimum amounts of time when a cancellation is issued and requires a reason for any cancellation or nonrenewal of coverage. These minimums and reasons do not currently apply to business or commercial policies.

This proposal will provide for a 60 day notice time that a company must give when it cancels an insurance policy, other than personal lines of insurance. It also requires that any unearned premium shall be returned prior to the effective date of cancellation unless cancellation is for nonpayment of premium.

The need for this request arises from the tightening insurance markets. As companies are reducing the amount of insurance they are writing, they are eliminating entire classes of insurance from their book of business and they are often cancelling policies of those insureds who have suffered losses. The Alaskan consumer needs adequate notice in order to be able to find an alternate insurer in the event that his policy is cancelled.

To accomplish this, it is necessary to substantially rearrange AS 21.36.210 - AS 21.36.310. The changes do not revise the impact of those sections of law on personal lines. It does make some of those provisions applicable to business or commercial insurance.

We recommend that the notice period for a nonpayment cancellation remain unchanged. This means removing the change made on page 3, line 24. and changing the 20 days on page 4, line 4 to read 10 days. The logic for this is that a person about to receive notice for nonpayment generally knows that payment has not been made. 10 days is adequate.

Sections 11 - 13 provide that nurse midwives can purchase medical malpractice insurance from the Medical Indemnity Corporation of Alaska (MICA). This will provide an additional market that the nurse midwife would have available if required. We would recommend that Section 11 on page 7, lines 9 - 29 be omitted. There are 1200 physicians licensed by the state who are conceivably eligible for coverage from MICA while there are only 21 licensed nurse midwives who might be eligible for coverage from MICA with passage of this bill. That is not a reasonable basis for changing the makeup of the governing board of MICA. This feature should remain unchanged.

AMERICAN COLLEGE OF NURSE-MIDWIVES,
ALASKA CHAPTER

April 30, 1986

Senator Bettye Fahrenkamp
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch U (MS 3100)
Juneau, Alaska 99811

MAY 7 1986

Dear Senator Fahrenkamp:

As a follow-up of my March letter, I am writing to inform you that an amendment for the MICA statute has been incorporated into House Bill 522, Judiciary version and is now on its way to the Senate. This bill would make it possible for certified nurse-midwives (CNM's) to obtain liability insurance from the Medical Indemnity Corporation of Alaska (MICA). Thank you for referring my request to the appropriate House committee.

I am now requesting that you spearhead a campaign to move it through the necessary channels in the Senate prior to the end of this legislative session.

As you know, certified nurse-midwives lost their liability insurance nationwide as of July 1985. (See enclosed congressional testimony entitled "Professional Liability Insurance for Certified Nurse-Midwives - Cost and Availability.") The national organization, the American College of Nurse-Midwives (ACNM) is trying to form its own insurance company but faces many obstacles. It is clearly going to take many months before a new program is in place. The certified nurse-midwives in Alaska do not have 'many months' before current policies expire.

Of the 29 certified nurse-midwives in Alaska, 13 are in clinical practices that include deliveries. Eight percent (1,048) of Alaskan births were attended by CNM's in 1985. Practices vary with one CNM attending 28% of the births at the Alaska Native Medical Center and four CNM's attending 20% of the births at Humana Hospital in Anchorage.

BACK UP INFORMATION

Three of the four CNM's with privileges at Humana face an uncertain future as their temporary liability policies will expire by September 30th. Their collaborative physicians do not carry liability insurance so these nurse-midwives do not have the option of being covered under the physician's 'umbrella' policy.

Two CNM's in Homer and a new CNM in Kenai are 'going bare' because they have no other options.

The Juneau CNM plans to close her practice this July unless an alternative liability policy becomes available.

Certified nurse-midwives did not lose their master policy due to high lawsuit rates among the membership. As I am sure you are aware, there is a general crisis in the entire liability insurance industry and we have simply become one of its victims. In the last 10 years, only six percent of the national membership has been sued. In contrast, 60% of the nations's obstetricians have had suits brought against them.

Insurance companies view us as a risk because we deliver babies and the long statute of limitations (21 years) makes it impossible for a company to predict its losses. In our favor is the fact that we are the experts of 'normal' childbirth. We have stringent criteria upon which we base our selection of clients and we consult and refer to collaborative physicians as needed. We are held to the highest medical standards or face de-certification if we do not meet them.

I find it ironic that certified nurse-midwives are being 'penalized' for their expertise in obstetrics and midwifery while the State passes legislation sanctioning lay midwifery that essentially allows lay midwives to practice with little interference or supervision.

Certified nurse-midwives have been providing Alaskan consumers a valuable, safe service for over 10 years. We want to continue to serve Alaskan women and infants but are facing our greatest professional challenge as the lack of liability insurance threatens our very existance. We find it practical and in the best interest of clients to cover ourselves with liability insurance. Please give your support to HB 522, Judiciary version when it reaches the Senate and prouide for an immediate effective date. Our clients will thank you!

Sincerely,

Marilyn Pierce-Bulger

cc: Members, Alaska State Senate

Professional Liability Insurance for Certified Nurse-Midwives: Cost and Availability

United States Senate
Committee on Commerce, Science
and Transportation
March 4, 1986

Good morning. My name is Karen Ehrnman and I represent the American College of Nurse-Midwives (ACNM). I have been invited to share with you the difficulties which certified nurse-midwives have in obtaining professional liability insurance coverage.

This testimony will chronicle the extensive yet unsuccessful steps the College has taken on behalf of its members to obtain professional liability insurance. Additionally, I shall describe the obstacles resulting from the decision made by the College to study our options to assist nurse-midwives in establishing an independent mutual insurance company.

The impact of this situation on America's small business community is twofold: approximately one-third of our members are in private practice; another segment of our membership either owns or provides most of the health care in the nation's 140 birth centers. Until now, accredited birth centers have been a success story in the small business world. During the first three years of their operation, only eight to ten percent of these centers fail. By contrast, twelve centers have closed in 1985 -- largely as a result of an inability to obtain professional liability insurance.

As a result of the unavailability of insurance from the private sector, the establishment of an insurance company providing professional liability coverage is the only option available to nurse-midwives. Without this company, nurse-midwives will be forced to end their services to mothers and children across the United States. Birth centers will close and private practitioners will seek other livelihoods.

Background on ACNM

The American College of Nurse-Midwives (ACNM) is the professional organization for nationally certified nurse-midwives (CNMs) in the United States. There are approximately 2,500 members of the ACNM, representing close to 85% of the profession. A full 95% of the members carry some type of professional liability insurance coverage.

Certified nurse-midwives are highly trained health professionals. Educated in both nursing and midwifery, they are specialists in maternal and child health care. They are licensed in all fifty states and provide care to the healthy woman before, during and after childbirth. They are experts in normal gynecologic and family planning care. Each member of the College has been officially certified through a national written examination.

The nurse-midwives work in a variety of settings -- such as private practices, university teaching hospitals, city hospitals, rural outreach centers, group health maintenance organizations, and health departments. Nurse-midwives deliver about three percent of the births in the United States. Approximately 75% of the births attended by certified nurse-midwives occur in hospitals, and another 15% occur in accredited birth centers.

Certified nurse-midwives work in clinical collaboration with physicians. ACNM standards require members to have an alliance agreement and health care protocols with a physician in order to practice. These agreements and protocols establish mechanisms for consultation and referral when complications arise.

ACNM also has reached a formal agreement outlining acceptable guidelines for working relationships with the American College of Obstetricians and Gynecologists.

Details of the Current Insurance Crisis

Since July, 1984, about 1400 CNMs have had professional liability insurance under a blanket ACNM policy written by the Mutual Fire, Marine and Inland Insurance Company. The remaining 1100 members of the College are

insured by their employers -- hospitals, health maintenance organizations, etc.

Mutual Fire notified ACNM in May, 1985 that the policy would not be renewed on July 1, 1985. ACNM's insurance was not renewed because of general conditions in the insurance industry -- the unavailability of reinsurance -- and not because of its members' professional performance. Suits have been filed against only six percent of all nurse-midwives -- a number not considered high among medical professionals. By comparison, 66.9 percent of obstetricians have been sued at least once according to the American College of Obstetricians and Gynecologists. In addition to the non-renewal of the blanket policy, over 300 individual certificates of insurance were cancelled this past July. These cancellations accounted for all of the individual certificates of insurance written after December 31, 1984; the remaining 1100 policies expired by December, 1985.

History of Insurance Coverage

Since the early 1970's, the American College of Nurse-Midwives has been able to obtain for its members a group policy that would pay up to one million dollars per claim. This one million dollar amount of insurance is the

amount which many hospitals require nurse-midwives to purchase in order to qualify for hospital privileges. It is this amount of insurance we want to make available to our members today.

Mutual Fire Marine and Inland Insurance was the third insurance carrier the ACNM has worked with in the past three years. The change in companies has been the result of three separate situations: 1) the inadequacy of the premium rate charged by one company; 2) the second company's withdrawal from the medical malpractice market; and 3) the nonrenewal of the reinsurance treaties for our most recent policy.

Steps Taken to Obtain New Insurance Policy

Early this year when ACNM received word that obtaining the master insurance policy might be difficult, we selected a "seasoned" broker with an excellent history of obtaining professional medical liability insurance. We believed that our broker understood what nurse-midwives are and that he would "market" us appropriately to the insurance industry. In search of a replacement for Mutual Fire we contacted 17 insurance companies in the United States. We were told that this represented most carriers in the U.S. who write professional liability

d down by all of these companies.

large numbers of claims and skyrocketing awards. What was never actually said -- but implied -- was that the premium levels necessary to cover CNMs would be beyond the reach of professionals making an annual salary of $25,000. Therefore, they offered no coverage at all.

But consumer groups, such as the National Insurance Consumer Organization (NICO), have accused the insurance industry of using misleading statistics in claiming a loss in 1985. Instead, NICO suggests the insurers have earned $6.6 billion. The ACNM is not an insurance analyst; we do know that nurse-midwives are not part of the malpractice insurance problem because of our very low rate of suits. We believe that it would have been possible for an insurance company to write a policy for nurse-midwives at a reasonable rate and based upon sound actuarial data. In fact, as I shall discuss later in this testimony, our plan is to do just that -- to establish an independent mutual insurance company which will underwrite CNMs at a reasonable rate.

State Level Initiatives

Our next course of action was to send nurse-midwives to talk with professional liability insurance companies in their states. The response was still "no". Nurse-

midwives talked to governors, state legislators, and state insurance commissioners. To date only one state out of fifty -- New Jersey -- has been able to offer insurance from a private carrier.

Still focusing at the state level, nurse-midwives investigated joint underwriting authority (JUA) and lobbied state legislators to extend joint underwriting authority to include nurse-midwives. We have been successful in implementing this in a number of states. However, for the most part, either the premiums for this coverage have been excessive or the amount of insurance offered has been less than required.

Other Considerations

As we evaluated the situation, nurse-midwives had little hope of obtaining affordable insurance from either the traditional insurers or the state JUAs. While these two options had been under consideration, the College's Board of Directors also commissioned a feasibility study on various options for self-insuring. Although this study indicated that it would be "feasible" for nurse-midwives to form an insurance company, the Board of Directors decided last summer that the insurance business

was beyond the limited resources of nurse-midwives. The Board directed the staff of ACNM to look into working with other groups to self-insure or to join another group's self-insure program. The response to these inquiries was also "no", although ACNM continues to communicate with the American Nurses' Association (ANA) about forming a company for all nurses.

Another option involved asking Congress to consider establishing a nurse-midwife sponsored insurance program. At that time we had interested a primary insurer in writing the first layer of insurance coverage. That company would have written the first $100,000 of coverage and the federal government would have provided the excess coverage from $100,000 to one million dollars. Even as we discussed this with members of Congress, however, the primary insurer had a change of heart.

The Re-examination of Self-Insure

Consideration of all of the options discussed up to this point utilized an enormous amount of resources. The process also strengthened the resolve of the leaders of the profession that searching for insurance could not become an annual event. Therefore the College's Board of

Directors sought a second opinion on the self-insure options. This second evaluation confirmed the earlier one. In December, 1985, the Board of Directors decided to further study this option.

Forming an Insurance Company

The emotion which accompanied the decision to study helping certified nurse-midwives form an independent mutual insurance company was short-lived. Even after hiring consultants and attorneys, the road blocks before us are enormous.

Disregarding the very difficult financial problems, the following are some of the legal and technical complications which hinder the establishment of a company.

The Claims-Made Policy

One technical problem is the type of policy currently being written -- a claims-made policy. In the past professionals have been able to purchase occurrence policies. There is a very important distinction between these two types of policies -- a distinction which is critical to nurse-midwives as well as physicians.

An occurrence policy insures for all claims arising out of events which occurred during the covered

period regardless of when the claim is filed. A claims-made policy insures only those claims which are filed during the policy year no matter when the event occurred. Does it matter? Yes.

For example, under an occurrence policy issued in February 1986 - February 1987, the nurse-midwife would be covered for any claim related to a delivery during this calendar year, even if the family did not file the claim until the child entered elementary school or even college. A claims-made policy, on the other hand, would only cover those claims filed during the February 86 - February 87 calendar year. To be covered for claims filed after this time period the professional must purchase "tail coverage".
What further complicates all of this is that in this insurance market it is impossible to buy a "tail" for 21 years -- the coverage that nurse-midwives and obstetricians need. In addition, insurance companies will not quote a price on a "tail" until it is needed, but we have been told it is likely to be two to three times the cost of a one year premium -- and can be more. We have been told by the insurance industry that primary insurers are switching to claims-made policies be-

cause reinsurers will not write occurrence policies. Reinsurers argue that it is easier to anticipate costs with a claims-made policy.

Regulatory Roadblocks in Forming an Insurance Company

Simply stated, we have been informed by our legal counsel that under the insurance laws of virtually all of the states, a new insurance company could not write insurance unless it became licensed in each of these states. This is a costly and time-consuming process that takes several years -- time we simply do not have. Also, the capital requirements of a few of the states exceed even our collective resources. Our legal counsel has reviewed the situation to see if exemptions from this licensing process exist, but none is available to us due to the number, size and geographic spread of our membership.

In 1981, Congress realized that this almost identical problem existed for small businessmen affected by the lack of product liability insurance, when it enacted the Risk Retention Act. This Act allowed groups of business to form risk retention groups to collectively insure the product liability risks of the members of the group without first becoming licensed as an insurer in any

jurisdiction other than that of the domicile of the risk retention group itself. In 1985, Congress again realized that a similar problem existed when the House and the Senate passed an almost identical bill (which is part of the Super Fund legislation now before Congress) to provide for risk retention groups for environmental impairment liability insurance.

We ask you to provide us with the same type of legislation to permit formation of a risk retention group for professional liability insurance for nurse-midwives and birthing centers.

Nurse-midwives Current Status: Temporary Insurance Coverage

In considering practicing without insurance, most CNMs, as well as most physicians, feel both a moral and practical obligation to protect their patients and themselves from any unintentional human error. In addition, many CNMs must carry professional liability insurance to retain their employment and/or hospital privileges.

In an attempt to keep practicing, most of our members purchased insurance during this past year from one of two

nursing groups whose policies did not include an exclusion of nurse-midwives. These organizations are the American Nurses' Association (ANA) and the Nurses' Association of the American College of Obstetricians and Gynecologists (NAACOG). The insurers of both of the groups have subsequently written into the policies exclusions of nurse-midwives. An informal survey of our membership indicates that this temporary coverage will begin to run out this spring and by next December no CNMs will have insurance if not provided by their employers or state JUA.

Requested Actions

I am certain you will agree with us that the formation of the insurance company over the next few months is critical. Congress can help. We urge Congress to: amend the 1981 Risk Retention Act; address the problem of the unavailability of reinsurance; and establish the availability of occurrence-type policies.

1) Amend the 1981 Risk Retention Act:

An expansion of this law to allow groups such as ours to establish an insurance company is essential. The idea we seek to implement is after meeting the requirements in a selected state for establishing the company, the company would be able to write insurance in all fifty states. This is the

only way that we will be able to offer insurance to our members in all fifty states.

2) Address the problem of reinsurance unavailability:

Our problem began when Mutual Fire's reinsurance treaties were not renewed. Since then we have heard many insurers state that their capacity to write insurance is limited by the unavailability of reinsurance. A new company also cannot get reinsurance and this substantially increases both short and long term financial risks.

In this regard, the American College of Nurse-Midwives urges you to make reinsurance available. This could be done by legislating the plan for federally-based reinsurance which has been drafted by the National Insurance Consumers Organization, investigating U.S. business practices and legislating changes to encourage the establishment of U.S. owned reinsurance companies.

3) Make occurrence policies available.

Nurse-midwives cannot purchase an occurrence policy. Additionally, in studying the possible formation of a new company, we have been advised that

this company would also have to write a claims-made policy. The reason is that reinsurers will only reinsure the claim-made type policy. This situation must be changed.

Lastly, we need this assistance quickly. Although some private practices and birthing centers have already gone out of business, by spring the vast majority of these small businesses will be vulnerable. Thank you for your support and interest in this problem.

BY THE LABOR AND COMMERCE COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 522 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to an insurance broker's receipt of premium payments, the cancellation or nonrenewal of insurance policies, and the provision of medical malpractice insurance for nurses and nurse midwives."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.27.200(a) is amended read:

(a) Except as provided in (c) of this section,

(1) a [A] broker, as such, is not an agent or other representative of an insurer, and does not have power as a broker to bind the insurer upon any risk or with reference to any insurance contract; and

(2) nothing [. NOTHING] in this section is intended to alter the common law of agency as applied to transactions under this title.

* Sec. 2. AS 21.27.200 is amended by adding a new subsection to read:

(c) For purposes of determining an insured's entitlement to coverage, a premium paid to the broker is considered to be received by the insurer, if the payment to the broker is designated for specific coverage from a specifically named insurer and is supported by competent evidence.

* Sec. 3. AS 21.36.210(a) is amended to read:

(a) An insurer may not exercise its right to cancel a policy of personal [AN] automobile insurance [POLICY] except for the following reasons:

(1) nonpayment of premium; or

(2) the driver's license or motor vehicle registration of either the named insured or of an operator who resides in the same household as the named insured or who customarily operates a motor vehicle insured under the policy has been under suspension or revocation during the policy period or, if the policy is a renewal, during its policy period or the 180 days immediately preceding its effective date.

* Sec. 4. AS 21.36.210(d) is amended to read:

(d) This section does not apply to

(1) the failure to renew a policy, except as to coverage in force for less than 12 months;

(2) a policy that has been in effect less than 60 days at the time notice of cancellation is mailed or delivered by the insurer, unless it is a renewal policy;

(3) a policy issued under an automobile assigned risk plan or automobile insurance plan;

(4) a policy insuring more than four motor vehicles;

(5) a policy covering the operation of a garage; automobile sales agency, repair shop, or service station; or public parking place;

(6) a policy providing insurance only on an excess basis;

(7) any other contract providing insurance to the named insured, even though the contract may incidentally provide insurance with respect to motor vehicles.

* Sec. 5. AS 21.36.210(f) is amended to read:

(f) An [NOTWITHSTANDING (e) OF THIS SECTION, AN] insurer may not exercise its right to cancel a policy of personal insurance other than personal automobile insurance, except for the following reasons [THE

TYPE DESCRIBED IN (e) OF THIS SECTION IF ONE OF THE FOLLOWING CONDITIONS OR CIRCUMSTANCES ARISES]:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against; or

(5) physical changes in the insured property that result in the property becoming uninsurable.

* Sec. 6. AS 21.36 is amended by adding a new section to read:

Sec. 21.36.215. LIMITS ON THE CANCELLATION OF BUSINESS OR COMMERCIAL INSURANCE POLICES. (a) Except as allowed by the director under (b) of this section, an insurer may exercise its right to cancel a policy of business or commercial insurance only for the following reasons:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the

insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against;

(5) physical changes in the insured property that result in the property becoming uninsurable;

(6) physical changes in the operations of the insured that result in the property becoming uninsurable;

(7) changes in the reinsurance program of the insurer that results in an increase of the insurer's retention of risk on a subject of insurance;

(8) changes in the financial condition of the insurer resulting in a violation of AS 21.12.010;

(9) a material change in the law that affects the coverage provided under the policy; or

(10) an excessive number of claims by the insured.

(b) Before issuing a notice of cancellation, an insurer may request the director to determine in a particular case whether a reason for cancellation not specified in (a) of this section is a valid reason for cancellation. The director may allow the insurer to exercise its right to cancel if the director finds that the cancellation is justified. The insurer may not implement the requested cancellation before receiving the approval of the director.

* Sec. 7. AS 21.36.220 is amended to read:

Sec. 21.36.220. NOTICE OF CANCELLATION. An insurer may not exercise its right to cancel a <u>personal insurance</u> policy unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, at least <u>60</u> [20] days before the effective date of cancellation. <u>However, if</u> [, EXCEPT THAT WHEN] cancellation is for nonpayment of premium, the notice <u>must</u>

[SHALL] be mailed or delivered to the named insured at the address shown in the policy at least 10 days before the effective date of cancellation, and must [SHALL] include or be accompanied by a statement of the reason for the cancellation. [THIS SECTION DOES NOT APPLY TO THE FAILURE TO RENEW A POLICY, EXCEPT AS TO COVERAGE IN FORCE FOR LESS THAN 12 MONTHS.]

* Sec. 8. AS 21.36.220 is amended by adding new subsections to read:

(b) An insurer may not exercise its right to cancel a policy of business or commercial insurance unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, and to the agent or broker of record, at least ~~(60)~~ 45 days before the effective date of cancellation. However, if cancellation is for nonpayment of premium, the notice must be mailed or delivered to the named insured at the address shown in the policy and to the agent or broker of record at least 10 days before the effective date of cancellation, and must include or be accompanied by a statement of the reason for the cancellation.

(c) If an insurer cancels a policy under (b) of this section, it shall return or credit any unearned premium to the agent or broker of record or directly to the insured or premium finance company, if applicable, before the effective date of cancellation, except that

(1) if cancellation is for nonpayment of premium, any unearned premium must be returned or credited within 45 days after the notice of cancellation is given;

(2) if the policy premium is subject to audit the insurer shall perform an audit within 30 days of the effective date of the cancellation and return or credit any unearned premium within 30 days of the completion of the audit.

* Sec. 9. AS 21.36.240 is amended to read:

Sec. 21.36.240. FAILURE TO RENEW. An insurer may not fail to renew a personal insurance policy in force for less than 12 months. An insurer may not fail to renew a policy [IN FORCE FOR 12 MONTHS OR MORE] unless a written notice of nonrenewal is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days for a personal insurance policy, and at least 45 days for a business or commercial insurance policy, before the expiration date of the policy [,] or of the anniversary date of a policy written for a term longer than one year or with no fixed expiration date. This section does not apply

(1) if the insurer has in good faith manifested in any way its willingness to renew;

(2) in case of nonpayment of premium for the expiring policy; or

(3) if the insured fails to pay the premium as required by the insurer for renewal.

* Sec. 10. AS 21.36.250 is amended to read:

Sec. 21.36.250. NOTICE OF ELIGIBILITY. When a policy of automobile liability insurance is cancelled, other than for nonpayment of premium, or is not renewed in accordance with [FOR FAILURE TO RENEW A POLICY OF AUTOMOBILE LIABILITY INSURANCE TO WHICH] AS 21.36.240 [APPLIES], the insurer shall notify the named insured of possible eligibility for automobile insurance through the automobile assigned risk plan, or automobile insurance plan. The notification must [SHALL] accompany or be included in the notice of cancellation or nonrenewal required by AS 21.36.220 [AS 21.36.230] and 21.36.240.

* Sec. 11. AS 21.36.310 is amended to read:

Sec. 21.36.310. DEFINITIONS. In AS 21.36.210 - 21.36.310

(1) "business or commercial insurance" means insurance

other than personal insurance, life insurance, disability insurance, fidelity and surety insurance, title insurance, or an annuity contract;

(2) "nonpayment of premium" means failure of the named insured to discharge when due any obligations of the named insured in connection with the payment of premium on a policy, or any installment of the premium, whether the premium is payable directly to the insurer or its agent or indirectly under any premium finance plan or extension of credit;

(3) "personal automobile insurance" means insurance not related to business or commercial activities, covering [(2) "POLICY" MEANS AN INSURANCE POLICY COVERING THE RISKS AND EXPOSURES LISTED IN AS 21.36.210(e) OR AN AUTOMOBILE POLICY THAT INCLUDES] automobile liability, uninsured/underinsured motorists [COVERAGE, UNINSURED MOTORIST COVERAGE], automobile medical payments [COVERAGE], or automobile physical damage [COVERAGE], that is delivered or issued for delivery in this state [INSURING AS THE NAMED INSURED, ONE INDIVIDUAL OR HUSBAND AND WIFE RESIDENT OF THE SAME HOUSEHOLD], and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others; or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less that is not used in the occupation, profession, or business of the insured, nor used as a public or livery conveyance, nor rented to others;

(4) "personal insurance" does not include an annuity contract or a policy of life insurance, disability insurance, or title insurance; the term means personal automobile insurance, or insurance

covering

(A) loss of or damage to real property that is used predominantly for residential purposes and that does not consist of more than four dwelling units;

(B) loss of or damage to personal property, including personal effects, household furniture, fixtures and equipment located in not more than four dwelling units; or

(C) legal liability of natural persons for loss of, damage to or injury to persons or property if the insurance does not cover liability arising from or in connection with business or commercial activities;

(5) [(3)] "renewal" or "renew" means

(A) the issuance and delivery by an insurer of a policy replacing at the end of the policy period a policy previously issued and delivered by the same insurer,

(B) the issuance and delivery of a certificate or notice extending the term of a policy beyond its policy period or term, or

(C) the extension of the term of a policy beyond its policy period or term under a provision for extending the policy by payment of a continuation premium.

* Sec. 12. AS 21.88.050 is amended to read:

Sec. 21.88.050. POWERS AND DUTIES OF THE CORPORATION. (a) The corporation shall

(1) in the form approved by the director, issue to all physicians, nurses, nurse midwives, and hospitals who are found to be acceptable risks under standards developed under (5) of this subsection, and who pay the premiums for it, a contract or contracts indemnifying physicians, nurses, nurse midwives, and hospitals and their

employees who are health care providers against loss by reason of liability for covered claims for an act or omission in the delivery of professional health care in this state, and agreeing to tender on behalf of the physicians, nurses, nurse midwives, and hospitals and their employees who are health care providers a defense to a covered claim in a proceeding brought under AS 09.55.530 - 09.55.560; the limits of liability for policies issued by the corporation shall be approved by the director; the contract shall cover the defense against but need not indemnify liability for punitive damages arising from a covered claim; at the option of the corporation, if approved by the director, and for an additional premium the contract may cover claims against the physician, nurse, nurse midwife, or hospital that arise out of professional services performed by the physician, nurse, nurse midwife, or hospital for any period before the contract is issued, except that coverage will not be provided for a claim already filed or of which the physician, nurse, nurse midwife, or hospital had or reasonably should have had notice at the time the retroactive insurance was purchased;

(2) charge a premium for the protection provided by the contracts issued by the corporation which shall be determined by the board of governors in accordance with AS 21.86.080 and subject to the approval of the director;

(3) comply with or be subject to AS 21.06.090, 21.06.120, 21.06.140, 21.06.160, 21.06.250, AS 21.09.180 - 21.09.200, 21.09.250, 21.09.280, AS 21.12.020(b)-(c), AS 21.18, AS 21.21, AS 21.24 and AS 21.36; and shall be exempt from participation as a member insurer in the Alaska Insurance Guaranty Corporation;

(4) carry out the obligations of the contracts issued by the corporation by defending all covered claims made against insured

health care providers and by paying all liabilities that [WHICH] are finally adjudicated against the insured health care provider or that [WHICH] may in the opinion of the corporation reasonably be expected to be finally adjudicated against the health care provider to the extent of the contract obligation;

(5) establish standards for the acceptability of risks; in establishing these standards the corporation may exclude an applicant for insurance based on individual risk selection factors, but may not exclude an applicant based only on the classification of the applicant.

(b) The corporation may

(1) employ or retain persons, individual or corporate, to discharge its obligations and pay reasonable compensation for these services; employees of the corporation are not considered state employees;

(2) negotiate for and procure reinsurance from private casualty insurers or reinsurers for any and all liability incurred by contracts issued by it;

(3) provide coverage to insureds for other hazards customarily included in medical malpractice insurance policies when there is a finding by the director that this coverage is not available to insureds of the Medical Indemnity Corporation of Alaska in the private insurance market at a competitive price;

(4) borrow or advance funds necessary to carry out the purposes of the corporation;

(5) negotiate and become a party to those contracts as are necessary to carry out the purposes of the corporation;

(6) sue or be sued in the name of the corporation;

(7) provide risk management advice and services to

hospitals;

(8) negotiate and become a party to contracts for management services for the corporation;

(9) perform all other acts necessary and proper to carry out the duties of the corporation;

(10) in a form approved by the director and for an additional premium determined under AS 21.88.080, issue endorsements which provide indemnity for claims not yet reported which arise out of professional services rendered during a period of continuous coverage under the originally issued contract, to physicians, nurses, nurse midwives, and hospitals who pay the premium for it and who are terminating their original covered claims contract with the corporation for a period of not less than one year;

(11) subject to approval by the director, extend coverage to a person, entity, or facility that renders health care services in the state under the supervision of a physician.

* Sec. 13. AS 21.88.900 is amended by adding new paragraphs to read:

(17) "nurse" means a nurse licensed under AS 08.68;

(18) "nurse midwife" means a registered professional nurse who is certified as an advanced nurse practitioner under AS 08.68.-410(1) and authorized to practice as a nurse midwife under regulations adopted under AS 08.68.

* Sec. 14. AS 21.36.210(c), 21.36.230, and 21.36.300 are repealed.

IN THE HOUSE BY THE JUDICIARY COMMITTEE

CS FOR HOUSE BILL NO. 522 (Judiciary)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to an insurance broker's receipt of premium payments, the cancellation or nonrenewal of insurance policies, the composition of the board of the Medical Indemnity Corporation of Alaska, and the provision of medical malpractice insurance for nurses and nurse midwives."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.27.200(a) is amended read:

(a) Except as provided in (c) of this section,

(1) a [A] broker, as such, is not an agent or other representative of an insurer, and does not have power as a broker to bind the insurer upon any risk or with reference to any insurance contract; and

(2) nothing [. NOTHING] in this section is intended to alter the common law of agency as applied to transactions under this title.

* Sec. 2. AS 21.27.200 is amended by adding a new subsection to read:

(c) For purposes of determining an insured's entitlement to coverage, a premium paid to the broker is considered to be received by the insurer, if the payment to the broker is designated for specific coverage from a specifically named insurer and is supported by competent evidence.

* Sec. 3. AS 21.36.210(a) is amended to read:

(a) An insurer may not exercise its right to cancel a policy of

personal [AN] automobile insurance [POLICY] except for the following reasons:

(1) nonpayment of premium; or

(2) the driver's license or motor vehicle registration of either the named insured or of an operator who resides in the same household as the named insured or who customarily operates a motor vehicle insured under the policy has been under suspension or revocation during the policy period or, if the policy is a renewal, during its policy period or the 180 days immediately preceding its effective date.

* Sec. 4. AS 21.36.210(d) is amended to read:

(d) This section does not apply to

(1) the failure to renew a policy, except as to coverage in force for less than 12 months;

(2) a policy that has been in effect less than 60 days at the time notice of cancellation is mailed or delivered by the insurer, unless it is a renewal policy;

(3) a policy issued under an automobile assigned risk plan or automobile insurance plan;

(4) a policy insuring more than four motor vehicles;

(5) a policy covering the operation of a garage; automobile sales agency, repair shop, or service station; or public parking place;

(6) a policy providing insurance only on an excess basis;

(7) any other contract providing insurance to the named insured, even though the contract may incidentally provide insurance with respect to motor vehicles.

* Sec. 5. AS 21.36.210(f) is amended to read:

(f) An [NOTWITHSTANDING (e) OF THIS SECTION, AN] insurer may not

exercise its right to cancel a policy of personal insurance other than personal automobile insurance, except for the following reasons [THE TYPE DESCRIBED IN (e) OF THIS SECTION IF ONE OF THE FOLLOWING CONDITIONS OR CIRCUMSTANCES ARISES]:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against; or

(5) physical changes in the insured property that result in the property becoming uninsurable.

* Sec. 6. AS 21.36 is amended by adding a new section to read:

Sec. 21.36.215. LIMITS ON THE CANCELLATION OF BUSINESS OR COMMERCIAL INSURANCE POLICES. (a) Except as allowed by the director under (b) of this section, an insurer may exercise its right to cancel a policy of business or commercial insurance only for the following reasons:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against;

(5) physical changes in the insured property that result in the property becoming uninsurable;

(6) physical changes in the operations of the insured that result in the property becoming uninsurable;

(7) changes in the reinsurance program of the insurer that results in an increase of the insurer's retention of risk on a subject of insurance;

(8) changes in the financial condition of the insurer resulting in a violation of AS 21.12.010;

(9) a material change in the law that affects the coverage provided under the policy; or

(10) an excessive number of claims by the insured.

(b) Before issuing a notice of cancellation, an insurer may request the director to determine in a particular case whether a reason for cancellation not specified in (a) of this section is a valid reason for cancellation. The director may allow the insurer to exercise its right to cancel if the director finds that the cancellation is justified. The insurer may not implement the requested cancellation before receiving the approval of the director.

* Sec. 7. AS 21.36.220 is amended to read:

Sec. 21.36.220. NOTICE OF CANCELLATION. An insurer may not exercise its right to cancel a <u>personal insurance</u> policy unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, at least <u>60</u> [20] days

before the effective date of cancellation. However, if [, EXCEPT THAT WHEN] cancellation is for nonpayment of premium, the notice must [SHALL] be mailed or delivered to the named insured at the address shown in the policy at least 10 days before the effective date of cancellation, and must [SHALL] include or be accompanied by a statement of the reason for the cancellation. [THIS SECTION DOES NOT APPLY TO THE FAILURE TO RENEW A POLICY, EXCEPT AS TO COVERAGE IN FORCE FOR LESS THAN 12 MONTHS.]

* Sec. 8. AS 21.36.220 is amended by adding new subsections to read:

(b) An insurer may not exercise its right to cancel a policy of business or commercial insurance unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, and to the agent or broker of record, at least 60 days before the effective date of cancellation. However, if cancellation is for nonpayment of premium, the notice must be mailed or delivered to the named insured at the address shown in the policy and to the agent or broker of record at least 10 days before the effective date of cancellation, and must include or be accompanied by a statement of the reason for the cancellation.

(c) If an insurer cancels a policy under (b) of this section, it shall return or credit any unearned premium to the agent or broker of record or directly to the insured or premium finance company, if applicable, before the effective date of cancellation, except that

(1) if cancellation is for nonpayment of premium, any unearned premium must be returned or credited within 45 days after the notice of cancellation is given;

(2) if the policy premium is subject to audit the insurer shall perform an audit within 30 days of the effective date of the cancellation and return or credit any unearned premium within 30 days

of the completion of the audit.

* Sec. 9. AS 21.36.240 is amended to read:

Sec. 21.36.240. FAILURE TO RENEW. An insurer may not fail to renew a personal insurance policy in force for less than 12 months. An insurer may not fail to renew a policy [IN FORCE FOR 12 MONTHS OR MORE] unless a written notice of nonrenewal is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days for a personal insurance policy, and at least 45 days for a business or commercial insurance policy, before the expiration date of the policy [,] or of the anniversary date of a policy written for a term longer than one year or with no fixed expiration date. This section does not apply

(1) if the insurer has in good faith manifested in any way its willingness to renew;

(2) in case of nonpayment of premium for the expiring policy; or

(3) if the insured fails to pay the premium as required by the insurer for renewal.

* Sec. 10. AS 21.36.250 is amended to read:

Sec. 21.36.250. NOTICE OF ELIGIBILITY. When a policy of automobile liability insurance is cancelled, other than for nonpayment of premium, or is not renewed in accordance with [FOR FAILURE TO RENEW A POLICY OF AUTOMOBILE LIABILITY INSURANCE TO WHICH] AS 21.36.240 [APPLIES], the insurer shall notify the named insured of possible eligibility for automobile insurance through the automobile assigned risk plan, or automobile insurance plan. The notification must [SHALL] accompany or be included in the notice of cancellation or nonrenewal required by AS 21.36.220 [AS 21.36.230] and 21.36.240.

* Sec. 11. AS 21.36.310 is amended to read:

Sec. 21.36.310. DEFINITIONS. In AS 21.36.210 - 21.36.310

(1) "business or commercial insurance" means insurance other than personal insurance, life insurance, disability insurance, fidelity and surety insurance, title insurance, or an annuity contract;

(2) "nonpayment of premium" means failure of the named insured to discharge when due any obligations of the named insured in connection with the payment of premium on a policy, or any installment of the premium, whether the premium is payable directly to the insurer or its agent or indirectly under any premium finance plan or extension of credit;

(3) "personal automobile insurance" means insurance not related to business or commercial activities, covering [(2) "POLICY" MEANS AN INSURANCE POLICY COVERING THE RISKS AND EXPOSURES LISTED IN AS 21.36.210(e) OR AN AUTOMOBILE POLICY THAT INCLUDES] automobile liability, uninsured/underinsured motorists [COVERAGE, UNINSURED MOTORIST COVERAGE], automobile medical payments [COVERAGE], or automobile physical damage [COVERAGE], that is delivered or issued for delivery in this state [INSURING AS THE NAMED INSURED, ONE INDIVIDUAL OR HUSBAND AND WIFE RESIDENT OF THE SAME HOUSEHOLD], and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others; or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less that is not used in the occupation, profession, or business of the insured, nor used as a public or livery conveyance, nor rented to others;

(4) "personal insurance" does not include an annuity con-

tract or a policy of life insurance, disability insurance, or title insurance; the term means personal automobile insurance, or insurance covering

(A) loss of or damage to real property that is used predominantly for residential purposes and that does not consist of more than four dwelling units;

(B) loss of or damage to personal property, including personal effects, household furniture, fixtures and equipment located in not more than four dwelling units; or

(C) legal liability of natural persons for loss of, damage to or injury to persons or property if the insurance does not cover liability arising from or in connection with business or commercial activities;

(5) [(3)] "renewal" or "renew" means

(A) the issuance and delivery by an insurer of a policy replacing at the end of the policy period a policy previously issued and delivered by the same insurer,

(B) the issuance and delivery of a certificate or notice extending the term of a policy beyond its policy period or term, or

(C) the extension of the term of a policy beyond its policy period or term under a provision for extending the policy by payment of a continuation premium.

* Sec. 12. AS 21.88.030(a) is amended to read:

(a) The corporation shall exercise its powers through a board of governors that [WHICH] is appointed by the governor of the state and confirmed by the legislature. Members of the board of governors shall be Alaska residents as follows:

(1) three [FOUR] physicians licensed in the state and

engaged in private practice in the state; no more than two of the physicians shall practice or live in a municipality having a population of more than 100,000, and two of the physicians must be indemnified against loss by reason of liability for an act or omission in the delivery of professional health care by the Medical Indemnity Corporation of Alaska;

(2) one nurse or nurse midwife;

(3) an administrator or senior executive officer employed by a hospital licensed in the state;

(4) [(3)] two professionals from the insurance industry who are authorized or licensed to do business in the state;

(5) [(4)] two persons who are not health care providers or financially interested in the field of health care or representatives of the insurance industry.

* Sec. 13. AS 21.88.050 is amended to read:

Sec. 21.88.050. POWERS AND DUTIES OF THE CORPORATION. (a) The corporation shall

(1) in the form approved by the director, issue to all physicians, nurses, nurse midwives, and hospitals who are found to be acceptable risks under standards developed under (5) of this subsection, and who pay the premiums for it, a contract or contracts indemnifying physicians, nurses, nurse midwives, and hospitals and their employees who are health care providers against loss by reason of liability for covered claims for an act or omission in the delivery of professional health care in this state, and agreeing to tender on behalf of the physicians, nurses, nurse midwives, and hospitals and their employees who are health care providers a defense to a covered claim in a proceeding brought under AS 09.55.530 - 09.55.560; the limits of liability for policies issued by the corporation shall be

approved by the director; the contract shall cover the defense against but need not indemnify liability for punitive damages arising from a covered claim; at the option of the corporation, if approved by the director, and for an additional premium the contract may cover claims against the physician, nurse, nurse midwife, or hospital that arise out of professional services performed by the physician, nurse, nurse midwife, or hospital for any period before the contract is issued, except that coverage will not be provided for a claim already filed or of which the physician, nurse, nurse midwife, or hospital had or reasonably should have had notice at the time the retroactive insurance was purchased;

(2) charge a premium for the protection provided by the contracts issued by the corporation which shall be determined by the board of governors in accordance with AS 21.88.080 and subject to the approval of the director;

(3) comply with or be subject to AS 21.06.090, 21.06.120, 21.06.140, 21.06.160, 21.06.250, AS 21.09.180 - 21.09.200, 21.09.250, 21.09.280, AS 21.12.020(b)-(e), AS 21.18, AS 21.21, AS 21.24 and AS 21.36; and shall be exempt from participation as a member insurer in the Alaska Insurance Guaranty Corporation;

(4) carry out the obligations of the contracts issued by the corporation by defending all covered claims made against insured health care providers and by paying all liabilities that [WHICH] are finally adjudicated against the insured health care provider or that [WHICH] may in the opinion of the corporation reasonably be expected to be finally adjudicated against the health care provider to the extent of the contract obligation;

(5) establish standards for the acceptability of risks; in establishing these standards the corporation may exclude an applicant

for insurance based on individual risk selection factors, but may not exclude an applicant based only on the classification of the applicant.

(b) The corporation may

(1) employ or retain persons, individual or corporate, to discharge its obligations and pay reasonable compensation for these services; employees of the corporation are not considered state employees;

(2) negotiate for and procure reinsurance from private casualty insurers or reinsurers for any and all liability incurred by contracts issued by it;

(3) provide coverage to insureds for other hazards customarily included in medical malpractice insurance policies when there is a finding by the director that this coverage is not available to insureds of the Medical Indemnity Corporation of Alaska in the private insurance market at a competitive price;

(4) borrow or advance funds necessary to carry out the purposes of the corporation;

(5) negotiate and become a party to those contracts as are necessary to carry out the purposes of the corporation;

(6) sue or be sued in the name of the corporation;

(7) provide risk management advice and services to hospitals;

(8) negotiate and become a party to contracts for management services for the corporation;

(9) perform all other acts necessary and proper to carry out the duties of the corporation;

(10) in a form approved by the director and for an additional premium determined under AS 21.88.080, issue endorsements which

provide indemnity for claims not yet reported which arise out of professional services rendered during a period of continuous coverage under the originally issued contract, to physicians, nurses, nurse midwives, and hospitals who pay the premium for it and who are terminating their original covered claims contract with the corporation for a period of not less than one year;

(11) subject to approval by the director, extend coverage to a person, entity, or facility that renders health care services in the state under the supervision of a physician.

* Sec. 14. AS 21.88.900 is amended by adding new paragraphs to read:

(17) "nurse" means a nurse licensed under AS 08.68;

(18) "nurse midwife" means a registered professional nurse who is certified as an advanced nurse practitioner under AS 08.68.-410(1) and authorized to practice as a nurse midwife under regulations adopted under AS 08.68.

* Sec. 15. AS 21.36.210(c), 21.36.230, and 21.36.300 are repealed.

Dick

February 4, 1986

Representative Richard Shultz
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Dick:

Pursuant to your request in our telephone conversation today, I would submit the proposed statutory amendment below. This amendment would permit cooperatives like Alaska Village Electric Cooperative or Middle Kuskokwim Electric Cooperative which are scattered over areas not connected by a road system to continue acting on their bylaws through delegates while requiring cooperatives which are connected by roads to act on their bylaws through a vote of their members as you indicated is your desire.

AS 10.25.070 Bylaws. The board of directors shall adopt the first bylaws of a cooperative to be adopted following an incorporation, conversion, merger or consolidation. Thereafter the [MEMBERS OR] district delegates in cooperatives having three or more districts which are not connected by a road system [SHALL] may adopt, amend or repeal the bylaws by the affirmative vote of a majority of those [MEMBERS OR] district delegates voting on the adoption, amendment or repeal at a meeting of the [MEMBERS OR] district delegates. In all other cooperatives, the members shall adopt, amend or repeal the bylaws by the affirmative vote of a majority of those members voting on the adoption, amendment or repeal at a meeting of the members. The bylaws shall set forth the rights and duties of members, district delegates and directors and may contain other provisions for the regulation and management of the affairs of the cooperative not inconsistant with this chapter or with its articles of incorporation.

Sincerely,

Dave

Re: House Bill 562

Dear Mr. Chairman:

This letter which is written at the request of this firm's client Copper Valley Electric Association, Inc. (CVEA), will explain the background that led in part to the introduction of House Bill No. 562.

CVEA is divided into two (2) districts: the Copper River Basin and the Valdez Districts. The cooperative uses a delegate system for amending its Bylaws. Pursuant to the existing Bylaws, three out of 18 delegates can call a special meeting. Recently, three delegates attempted to call a special meeting. One of the items on the agenda was a possible move of the headquarters of CVEA from Glennallen to Valdez. No member notice was given. A great deal of concern arose from some of the residents of Glennallen that Glennallen would lose a major employer in the area. CVEA's staff was also concerned because of commitments made by them for housing in Glennallen and family considerations. Further, some CVEA Board members were concerned that it would not be economically wise for the move to be made. Finally, there was a general concern that the members were not even notified of the proposed move.

CVEA has 1755 voting members. Because of the way the delegate system works, ten members, as delegates, could vote to move the headquarters without membership notice or approval or input and consideration by the Board.

The purpose of House Bill 562 is to leave that kind of decisionmaking up to a majority of the members. The advantage to membership voting is that ballot propositions would be placed before the membership, an opportunity would be given for the membership to hear the pros and cons of the propositions, and a considered vote could be made by the membership.

The district delegate method of voting does not seem appropriate when only three out of 1755 members could call for such a proposition and, with the concurrence of seven other delegate members, make such a decision for the cooperative.

The proposed law will still allow basic majority control by the membership for changes; in this manner, all members will have the opportunity to vote and not just a select few delegates.

Very truly yours,

HOGE and LEKISCH

CSHB 562(L&C) Summary

This measure requires cooperatives which encompass 3 or more districts, and are not connected by the road system, to retain the delegate system of representation. These cooperatives may change bylaws by an affirmative vote of the delegates attending a meeting of the district delegates.

All other cooperatives may change bylaws by an affirmative vote of the majority of those members voting. This provision extends to voting at a meeting of the members or votes cast by mail ballot without a meeting.

May 7, 1986

Senator Fred F. Zharoff, Chairman
Senate Labor and Commerce Committee
Room 121, Capital Building
Juneau, Alaska 99801

RE: CSHB 589 (Finance) am; An Act relating to disability insurance; and providing for an effective date.

Dear Senator Zharoff:

I am the registered lobbyist for the Alaska Nurses Association. The Association has some concerns about the impact of HB 589 on the practice of nursing. Nurses constitute the largest group of health care providers in the State and are deeply involved in all aspects of health care delivery. Nurses do not practice medicine, they practice nursing. Insurance coverage should be provided for nursing services without regard to whether those services are provided under the continued direction of a physician. Specifically, the Association recommends:

1. Page 4, line 28, delete "at the physician's direction";
2. Page 16, line 29, delete "upon recommendation of a licensed physician";
3. Page 17, lines 4-5, delete "under the continued direction of the person's physician and".

Additionally, we believe that Section 21.55.140 (13) found on page 10, lines 3-5, should be deleted. We believe it is poor policy to exclude services of a registered nurse from coverage simply because she resides in the covered individual's home - this makes no more sense than excluding the services of a physician who treats a member of his family.

Please do not hesitate to contact me if you have a question about the Association's position on this bill,

nurses, the practice of nursing, or any other matter.

Very truly yours,

David T. Walker

CS HB 589 (Finance)

An Act relating to disability insurance;
and providing for an effective date.

OVERVIEW
Prepared by Rep. John Sund's office; May 3, 1986

Objective

The primary purpose of HB 589 is to ensure medical insurance availability to those Alaskan residents who are considered too high of a health risk for standard insurance in the open marketplace.

What This Bill Does

HB 589 would establish a nonprofit, statewide association of all disability insurers in the state. Participation in the association would be mandatory in order to do business in the state.

The association would offer major medical insurance and medicare supplement insurance as described in the bill to any Alaskan who cannot get standard coverage or has excessive restrictions placed on his or her insurance. Certain eligibility requirements would be set.

If the association's claim payments exceed the premiums collected, the association members would be assessed to make up the differences. Any premiums that exceed losses would be held at interest to offset future losses. The association would administer the plan under the monitoring of the director of the Division of Insurance.

For the first year of the plan, premium rates would be capped at 150% of the average rate of the plan if it were offered to standard risk people by the five largest disability insurers in the state. Based on that year's experience, the association will set actuarially sound rates but the rates cannot exceed 250% of standard rates for a comparable plan.

Why This Bill Is Needed

Standard disability insurance is often denied people who are considered high risks, such as older individuals and those who are suffering or have suffered from serious illnesses. Comprehensive insurance should be available to these people. Moreover, providing them insurance should eventually decrease costs to society.

CS HB 589 (Judiciary)

An Act relating to disability insurance; and providing for an effective date.

SECTIONAL ANALYSIS

Prepared by Rep. John Sund's office; May 3, 1986

Section 1
ARTICLE 1
Sec. 21.55.010. Page 1, line 12: creates the Comprehensive Disability Insurance Association, a nonprofit corporation with membership consisting of all licensed disability insurers and licensed hospital or medical service corporations in the state that write on an expense incurred basis. Insurers must be members of the association in order to do business in the state.

Sec. 21.55.020. Page 1, line 22: sets a seven-member board of directors selected by association members and approved by the director of the state Division of Insurance. The director or a designee will be a nonvoting, ex officio member of the board.

Sec. 21.55.030. Page 2, line 12: describes the association's general powers.

Sec. 21.55.040. Page 2, line 21: subjects association articles, bylaws and operating rules to the approval of the director of the Division of Insurance.

Sec. 21.55.050. Page 3, line 26: exempts the association from the Administrative Procedure Act.

Sec. 21.55.060. Page 3, line 28: exempts the association from taxes.

ARTICLE 2
Sec. 21.55.100. Page 4, line 4: offers the state plan, including the medicare supplement plan, on an individual basis to high-risk residents. The association may not deny coverage to any eligible resident.

Sec. 21.55.110. Page 4, line 16: explains the minimum benefits of the state plan, which is a basic major medical plan. Lifetime maximum benefit is $1 million.

Sec. 21.55.120. Page 6, line 26: offers deductibles of $200, $500 or $1,000 per person. The maximum copayment by enrollees would be 20% once the deductible is met for all health care and 50% for mental health care. Maximum annual payments of

deductible and copayments cannot exceed $2,000 per insured. The plan would pay 100% once that limit is reached.

Sec. 21.55.130. Page 7, line 27: excludes coverage for preexisting conditions if the condition began within the three months just preceding the effective date of coverage. Preexisting conditions would not be covered for the first six months of a plan. The limitation can be waived if the insured's previous insurance was terminated and the state plan application is made within 31 days following termination.

Sec. 21.55.140. Page 8, line 22: describes care and services that are not covered by the plan.

Sec. 21.55.150. Page 10, line 9: sets separate scales of premium rates based on age and geographic location of the insured.

Premium rates for the first year of the plan are capped at 150% of the average rate of the plan if it were offered to standard risk people as determined by the five largest disability insurers in the state. Thereafter, the rates will be determined using sound actuarial methods based on plan experience. But the rates may never exceed 250% of standard rates for a comparable plan.

ARTICLE 3

Sec. 21.55.200. Page 10, line 29: sets guidelines for the association's selection of a writing carrier through a bidding process.

Sec. 21.55.210. Page 11, line 7: explains the duties of the writing carrier who will be contracted for three-year terms unless earlier termination is approved by the director.

The carrier will perform the administrative and claims payment functions of the plan and report quarterly to the association. The carrier will be reimbursed for direct and indirect expenses of administering the plan.

Sec. 21.55.220. Page 12, line 17: requires that association members be assessed to share the claim losses and administrative expenses that exceed premium payments. Each member will contribute to the association an amount based on that member's share of all disability insurance premiums paid in the state. Assessments will be made yearly, unless interim assessments are desired.

A member's failure to pay an assessment within 30 days could cease that member's certification to operate in the state.

Net gains will be held at interest to offset future losses.

ARTICLE 4

Sec. 21.55.300. Page 14, line 5: states that all high-risk residents are eligible for the state plan unless covered by another disability insurance policy. A person loses eligibility upon ceasing residency.

Sec. 21.55.310. Page 14, line 16: explains the enrollment procedure.

Sec. 21.55.320. Page 14, line 25: requires the state plan writer to respond to the applicant within 30 days of receiving the application.

Sec. 21.55.330. Page 15, line 1: sets the policy effective date at the day of application once the first premium is paid. It also permits 60 day retroactive coverage for those individuals whose previous insurance terminated, if premiums are paid for the retroactive period.

Sec. 21.55.340. Page 15, line 15: requires that the association advertise the state plan to the public. An insurer who rejects or restricts a policy must tell the applicant about the state plan.

ARTICLE 5

Sec. 21.55.400. Page 16, line 5: explains the duties of the director of the Division of Insurance in regard to the state plan.

Sec. 21.55.410. Page 16, line 16: states the state is not liable for association actions.

Sec. 21.55.500. Page 16, line 20: offers chapter definitions.

Resident is defined as a person who has lived in the state at least six consecutive months prior to application and intends to remain. Absence from the state is permitted for medical and educational reasons.

A high risk resident is defined as someone who has been rejected for disability coverage by at least two association members or has had a restrictive rider placed on a policy.

Section 2. Page 19, line 20: requires that the state plan be available by July 1, 1987.

Section 3. Page 19, line 23: sets an immediate effective date.

RECORDS CERTIFICATION

CSHB 603(L&C) Sectional Analysis

Section 1) Extends the Board of Dispensing Opticians until 6/30/89.

Section 2) Expands the qualifications required of applicants for examinations as follows:

Adds 4 years of attendance, or the equivalent, at a high school;

Provides that graduation with an associate degree, from a recognized school of opticianry, may be substituted for 4,000 of the 6,000 hours of experience in the profession.

Section 3) Prior to license renewal, licensee shall submit evidence to the board of 30 hours of continued competence in the profession, as prescribed by board regs.

Section 4) Immediate effective date

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 14, 1986

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
P.O. Box V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to extend the Board of Dispensing Opticians until June 30, 1988 and to make minor changes in two sections of AS 08.71, concerning opticians' eligibility for examination for licensure and renewal of licensure.

Although the June 30, 1985 termination date for the Board of Dispensing Opticians has passed, the board continues in existence until June 30, 1986 under the wind-down provisions of AS 08.03.020.

Last spring, I vetoed CSSB 167(L&C) which would have continued the board until 1989 and made the same change as does sec. 3 of this bill regarding optician license renewal, along with several other changes to AS 08.71, concerning licensing of opticians. After that veto, I appointed a working group identical to that which would have been required by the vetoed bill. That working group recommended, by unanimous vote, all of the provisions of the attached bill.

I believe that the best way to solve the inefficiencies, controversies, and sometimes bitter contention, that pervades the sometimes overlapping and deeply interrelated professions of optometry and opticianry is to pursue combining the two separate boards and statutes now regulating each. I agree with the working group that this somewhat radical change from the status quo can be most productively pursued as part of simultaneous sunset review of both

boards. That is why this bill extends the Board of Dispensing Opticians until the June 30, 1988 sunset date for the Board of Examiners in Optometry.

Meanwhile, the working group, also by unanimous vote, recommended other changes to AS 08.71, the dispensing optician statutes, which are also part of the bill. I agree with these changes, including the doubling of the number of continuing education hours in sec. 3 of the bill. In 1980 the license renewal date was changed from every two years to every four years, but a corresponding doubling of the continuing education hour requirement was overlooked. Now that all the 66 dispensing optician licenses were renewed last summer, for four years, the licensees will have ample notice and time to comply with the doubled requirement. The changes made by sec. 2 of the bill affect the qualifications that must be met by an applicant for examination.

I urge your prompt action to pass this bill so that we can continue to work with the opticians and the optometrists to pursue a better, more efficient way to regulate these two interrelated professions in truly the best interests of the consuming public.

Sincerely,

Bill Sheffield
Governor

PURPOSE AND SCOPE OF THE REPORT

Purpose

In accordance with the intent of Titles 24 and 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Dispensing Opticians for the past three fiscal years to determine if the Board has been operating in an efficient and effective manner.

Legislative intent requires consideration of this report during legislative oversight hearings to determine whether the Board of Dispensing Opticians should be reestablished. The law now specifies that the Board will terminate June 30, 1985, and have one year from that date to conclude its affairs.

Scope

The major areas of our examination were the licensing, examination, administration, complaint, and affirmative action functions of the Board. We reviewed and evaluated the following:

1. Applicable statutes and regulations.

2. Tests of files and documents of licensees.

3. Interviews with the license examiners.

4. Complaints filed with the Division of Occupational Licensing, Human Rights Commission, Equal Employment Opportunity Office, Attorney General's Office, and the Ombudsman's Office.

5. Discussions with Board members.

6. Minutes of Board meetings and Division correspondence files.

7. Attorney General's Opinions applicable to professional boards.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Board of Dispensing Opticians was established by the 1973 Session Laws of Alaska. This regulatory board consists of five persons; four dispensing opticians and one public member, appointed by the Governor. Board members serve staggered terms of four years.

The Board is organized under the Department of Commerce and Economic Development, Division of Occupational Licensing (OL). OL provides the Board with licensing and investigative support. The licensing section processes applications, maintains license files, answers inquiries, and provides other administrative help to the Board.

The Board sets the minimum standards to practice in Alaska by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing, amending, or eliminating regulations necessary and desirable to enforce statutes.

3. Revoking, annulling, or suspending licenses in accordance with the Administrative Procedures Act when a person has violated dispensing optician statutes or regulations.

(Intentionally left blank)

REPORT CONCLUSION

Policy Issues

This report contains policy issues raised as a result of our evaluation of Board practices. The final policy decisions affecting these practices are not within the scope of this report but require legislative consideration. In debating these issues, the oversight committee should take into consideration the Findings and Recommendations presented in this report so the potential impact of policy changes can be evaluated.

Report Conclusion

The primary purpose of a regulatory board with a licensing function is to protect the public. The questions that have to be evaluated to determine if licensing is needed are:

1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well-being?

2. Can the potential users be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services?

3. Do the benefits to the public clearly outweigh any potential harmful effects, such as a decrease in the availability of practitioners, higher costs of services, and restriction on optimum utilization of personnel?

During our review to determine if the Board's licensing function is required and meets the previously mentioned criteria, we examined existing statutes, complaints, and various Board functions. As a result of our examination we found:

1. The Board performs only minimal functions. The majority of their duties, as outlined by AS 08.71.070, are handled by the Division of Occupational Licensing. Those duties that are executed by the Board include conducting meetings, reviewing applications for licensure, reviewing results of investigations and hearings and determining proper disciplinary actions, and preparing and grading the State examination. These duties are not substantial enough to continue the Board. Conducting meetings is only necessary to the extent that it is easier to take care of business at a meeting as opposed to by mail.

The bulk of the work on reviewing applications for licensure is done by the license examiner. He/she gathers the proper documentation and makes sure it is complete. The applications are then presented to the Board, who then votes whether to approve or disapprove licensure. This review tends to be cursory as the majority of it has already been done by the license examiner.

Reviewing results of investigations and hearings and determining proper disciplinary actions also tends to be cursory. This is due to the up-front work that is done by the investigations unit in Occupational Licensing and the hearing officers. The Board is kept informed of the status of complaints but are not involved in the investigations. The determination of proper disciplinary actions has usually been done by the hearing officer. It is then a formality for the Board to approve them.

The only duty requiring the expertise of the Board is the preparation and grading of the State examination. A license examiner does not have the background to formulate those exams. However, it is not necessary to give an exam because the potential physical harm caused by unlicensed dispensing opticians is minimal to nonexistent, and the administering of an exam is not essential.

Consequently, there are not enough duties for the Board to justify its existence. The expenses to maintain a Board of 5 members to regulate approximately 60 dispensing opticians is not economical.

2. An optician cannot cause great physical harm to an individual. Spectacles can cause double vision, distorted vision, and trouble with perception. Yet with these types of troubles, most patients will return to their optometrist or ophthalmologist for verification of the prescription. Improper fitting of contact lenses can result in physical harm. However, AS 08.71.200 requires a licensed physician (ophthalmologist) or optometrist to supervise the fitting of contact lenses and requires the patient to return to the prescribing physician or optometrist. In addition, AS 08.72.275 is adequate to protect the public from harm due to improperly hardened lenses because it requires each lens to be impact resistant under specified test conditions.

3. Approximately 12 complaints were received by the Division of Occupational Licensing and 2 complaints were received by Consumer Protection over the last few years.

Most of the complaints were instigated by licensed practitioners, not consumers, and related to unlicensed individuals dispensing. Of these, none resulted in physical harm. In one case, the Attorney General's Office refused to prosecute a violation because there was no evidence of physical harm.

4. In addition, several cases were noted where individuals were licensed without adequate documentation of statutory and regulatory requirements. These individuals were potentially "unqualified," yet no evidence of physical harm has resulted from their practices.

5. Contact lenses cost approximately $500 and spectacles cost much less. Therefore, if for some reason the consumer received poor quality or useless contacts or spectacles, the loss to the consumer would not be severe. Also, if a consumer is dissatisfied, he/she has recourses available whether a business or individual is licensed or not. The Consumer Protection Unit as well as the court system are there to provide remedies for injured parties.

Thus, we found the Board's existence to be superfluous, especially in light of the scope of the dispensing optician's work. The dispensing optician prepares and dispenses original or duplicate lenses, eyeglasses, contact lenses, and appurtenances to them on written prescription from a licensed physician or optometrist. They also interpret, measure, adapt, and fit the above mentioned. This restricts their scope to a small sphere of duties and limits that amount of harm that could result if they were not licensed.

Therefore, we recommend the Board of Dispensing Opticians be allowed to terminate on June 30, 1985.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Dispensing Opticians should be allowed to terminate on June 30, 1985.

The primary purpose of a regulatory board with a licensing function is to protect the public. The questions that have to be evaluated to determine if licensing is needed are:

1. Does the unlicensed practice pose a serious risk to the consumers' life, health, safety, or economic well-being?

2. Can the potential users be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services?

3. Do the benefits to the public clearly outweigh the potential harmful effects, such as a decrease in the availability of practitioners, higher costs of services, and restriction on optimum utilization of personnel?

During our review to determine if the Board's licensing function is required and meets the previously mentioned criteria, we examined existing statutes, complaints, and various Board functions. As a result of our examination we found:

A. The Board performs only minimal functions. The majority of their duties as outlined by AS 08.71.070 are handled by the Division of Occupational Licensing. Those duties that are executed by the Board include conducting meetings, reviewing applications for licensure, reviewing results of investigations and hearings, and determining proper disciplinary actions, and preparing and grading the State examination. These duties are not substantial enough to continue the Board. Conducting meetings is only necessary to the extent that it is easier to take care of business at a meeting as opposed to by mail. The bulk of the work on reviewing applications for licensure is done by the license examiner. He/she gathers the proper documentation and makes sure it is complete. The applications are then presented to the Board, who then votes whether to approve or disapprove licensure. This review tends to be cursory as the majority of it has already been done by the license examiner.

Reviewing results of investigations and hearings and determining proper disciplinary actions also tends to be cursory. This is due to the up-front work that is done by the investigations unit in Occupational Licensing and the hearing officers. The Board is kept informed of the status of complaints but are not involved in the investigations. The determination of proper disciplinary actions has usually been done by the hearing officer. It is then a formality for the Board to approve them.

The only duty requiring the expertise of the Board is the preparation and grading of the State examination. A license examiner does not have the background to formulate those exams. However, it is not necessary to give an exam because the potential physical harm caused by unlicensed dispensing opticians is minimal to nonexistent, and the administering of an exam is not essential.

Consequently, there are not enough duties for the Board to justify its existence. The expenses to maintain a Board of 5 members to regulate approximately 60 dispensing opticians is not economical.

B. An optician cannot cause great physical harm to an individual. Spectacles can cause double vision, distorted vision, and trouble with perception. Yet with these types of troubles, most patients will return to their optometrist or ophthalmologist for verification of the prescription. Improper fitting of contact lenses can result in physical harm. However, AS 08.71.200 requires a licensed physician (ophthalmologist) or optometrist to supervise the fitting of contact lenses and requires the patient to return to the prescribing physician or optometrist. In addition, AS 08.72.275 is adequate to protect the public from harm due to improperly hardened lenses because it requires each lens to be impact resistant under specified test conditions.

C. Approximately 12 complaints were received by the Division of Occupational Licensing and 2 complaints were received by Consumer Protection over the last few years. Most of the complaints were instigated by licensed practitioners, not consumers, and related to unlicensed individuals dispensing. Of these, none resulted in physical harm. In one case, the Attorney General's Office refused to prosecute a violation because there was no evidence of physical harm.

D. Several cases were noted where individuals were licensed without adequate documentation of statutory and regulatory requirements (See Recommendation No. 4). These individuals were potentially "unqualified," yet no evidence of physical harm has resulted from their practices.

E. Only 20 out of the 49 other states deem it necessary to license dispensing opticians. The rest recognize that potential users can evaluate a dispensing optician's qualifications. Free enterprise will take care of those unlicensed practitioners who are not able to provide quality services and competitive prices. Consumers will not continue to patronize a business or individual if they are not satisfied.

F. Contact lenses cost approximately $500 and spectacles cost much less. Therefore, if for some reason the consumer received poor quality or useless contacts or spectacles, the loss to the consumer would not be severe. Also, if a consumer is dissatisfied, he/she has recourses available whether a business or individual is licensed or not. The Consumer Protection Unit as well as the court system are there to provide remedies for injured parties.

If the Board is not terminated and some control over the occupation is desired, the dispensing opticians should be combined with the Board of Optometry. The optometrists can and do dispense spectacles and contact lenses like the dispensing opticians as well as refracting eyes and diagnosing eye diseases. Thus, the Board of Optometry has experience in the same areas and is an appropriate Board with which to combine the Board of Dispensing Opticians.

However, in the event that the Board is reestablished, we recommend the following changes be made in their operations.

Recommendation No. 2

The Board of Dispensing Opticians and the Office of the Governor should work together to ensure that vacant Board positions are filled.

The Board is responsible for making recommendations to the Office of the Governor, Special Staff Assistant, Boards and Commissions for vacant Board positions. The Office of the Governor is then responsible for following up on those recommendations as well as those from any other interested parties.

There are conflicting stories from the staff of the Office of the Governor and the Board members regarding the lack of recommendations and follow up. There is some dispute as to whether any recommendations have been made in the past several years as there has been no acknowledgement of receipt by the Office of the Governor, except within the last month. Regardless of who has been at fault, there are still vacant Board positions to be filled.

This is particularly crucial since two of the five positions have members who are serving past the expiration dates of their terms. One member has served two years beyond his original term because no one has been appointed to fill his slot. This extension of terms defeats the purpose in setting a specified term length. In addition, the public member slot has been vacant since June 1982. The public member brings a different perspective. They help keep the purpose in mind which is to protect the public, not the economic interest of an occupational group. Therefore, it is crucial that the Board and the Office of the Governor work together to fill these three slots.

Recommendation No. 3

The Board should review existing statutes and regulations and seek appropriate revision where necessary.

During our examination, we reviewed the Board's statutes and regulations to determine if any were obsolete, vague, or unduly restrictive. Examples of what we found are as follows:

A. AS 08.71.130(d) and 12 AAC 30.050 set out continuing competency requirements. These requirements were based on biennial licensing. Since then, the profession has changed to quadrennial licensing without a compensating change in the continuing competency requirements.

B. AS 08.71.150 allows the State to license by reciprocity. However, none of the 20 other states will grant Alaska these rights. And since licensure by credentials accomplishes the same purpose, this Statute is not necessary.

C. AS 08.71.200 sets out dispensing opticians' constraints for issuing contact lenses. The language used is not specific enough and needs to be further defined as to what is meant by "contact lenses shall be fitted in conjunction with and under the supervision of a licensed physician or an optometrist." The optometrists and dispensing opticians are currently debating changes to this Statute, and a caution should be noted. The Attorney General's Office has found a potential

antitrust issue with regards to where contact lens prescriptions can be filled. Any changes to this Statute should not be to make it more restrictive (i.e., requiring the prescriptions be filled at specified places instead of where the consumer chooses).

D. The Board still has not received statutory authority to issue temporary permits. These temporary permits would allow a greater influx of qualified individuals to practice while awaiting formal Board approval.

AS 08.71.055 provides that the Board shall exercise general control over dispensing opticians. This cannot be done effectively without clear and concise statutes and regulations. And although the Board has had various obsolete or vague statutory and regulatory requirements repealed or amended, the Board should continue to review them for obsolescence, vagueness, and restrictiveness, and propose appropriate changes where necessary.

Recommendation No. 4

The Board should ensure that requirements are being met and adequately documented prior to licensure.

Statutory and regulatory requirements have been set up to ensure that competent individuals are being licensed. Documentation of these requirements is necessary to show that they have indeed been met.

During our examination, we reviewed several licensing files to determine if statutory and regulatory requirements were being met. Examples of what we found are as follows:

A. Out of 12 tested, 4 did not have adequate documentation of training hours. Either the hours listed were not signed by the instructor on the application or there weren't enough hours (AS 08.71.110 and 12 AAC 30.070).

B. For those 2 tested that were licensed by credentials, apprentice hours were not listed at all or those listed were not enough. Also there was no evidence that the applicants had ever taken the national exam either in Alaska or in another state (AS 08.71.145 and 12 AAC 30.100).

C. One licensee's file did not have any indication of the Board's approval (AS 08.71.055).

D. Much of the documentation consisted of photocopies and not originals. Photocopies are acceptable but they should be notarized or certified copies and not copies of notarized or certified originals since copies of notarized or certified originals are easy to falsify.

The Board has some flexibility in assuring the requirements are met. They can waive them in order to let a candidate take the exam. However, there should be no exceptions when licensing. All requirements must be met including those that may have been initially waived for the exam. The follow up on those items lacking is the Board's responsibility, and the Board should ensure requirements are being met and adequately documented prior to licensure.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative factors as they relate to the public need as defined in the "sunset" law. These analyses are not intended to be comprehensive, but to address those areas we were able to cover during our examination.

I. The extent to which the board, commission, or program has operated in the public interest.

A. The Board has held meetings and exams at least two times a year.

B. The Board has passed regulations regarding apprentices, continuing competency, and licensure by credentials.

C. The Board has not had a public member since June 1982 (see Recommendation No. 2).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. The Board has had two vacant Board positions for two years (see Recommendation No. 2).

III. The extent to which the board, commission, or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The Board succeeded in having various obsolete or vague statutory requirements repealed or amended.

B. No statutory changes have been made since 1980.

IV. The extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. The Board has published public notices of all examinations, meetings, and regulation changes. The Board has not actively solicited comments on its effectiveness.

V. The extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board has published notices of its meetings in Anchorage, Fairbanks, and Juneau. However, no public participation appears to have resulted.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the Office of the Ombudsman have been processed and resolved.

A. According to the Division of Occupational Licensing's files, there have been approximately twelve investigation cases in the past four years. Two complaints have been filed with the Consumer Protection Unit and none with the Office of the Ombudsman.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. In the last six years, the number of currently licensed dispensing opticians has increased from 45 to 63.

B. The Board has not established reciprocal agreements with other states or established statutory authority to issue temporary permits. They have established licensure by credentials which tries to address the same situation.

VIII. The extent to which State personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

A. Applications for licensure require information and photographs which the Division of Equal Employment Opportunity (EEO) believes may not be necessary to determine the qualifications of the applicant.

IX. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendations.

APPENDIX

(Intentionally left blank)

APPENDIX A

BOARD OF DISPENSING OPTICIANS
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended 1983
(UNAUDITED)
(Note 1)

Average Revenues (Note 2)	$ 3,853
Expenditures (Note 3)	4,258
Excess of Expenditures over Revenues	$ (405)

Schedule 1
Types of Revenues

Revenues	Amount	Collection Time
Examination Fee	$ 50	With application
Reexamination Fee	$ 50	With application
Initial License Fee	$ 50	Before licensure
Renewal Fee	$ 200	Every four years
Late Renewal Fee	$ 10	If over 60 days after renewal date

Note 1

This revenue/expenditure comparison was prepared from available records and discussions with Occupational Licensing personnel. The records were not audited by us and, accordingly, we do not express an opinion on the Board's Revenues Compared with Expenditures.

Note 2

The majority of the revenues collected are composed of license renewal fees. These fees are collected by most boards once every two or four years and causes revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average for the revenues collected from 1981 to the present in order to obtain a more accurate representation of collected revenues.

Note 3

Expenditures include those made by board members, such as travel, per diem, and direct administrative expenses of the Division of Occupational Licensing. They do not include indirect administrative expenses of the Division or expenditures for efforts of other departments such as the Department of Law, assisting the boards and the Division.

LEGISLATIVE AUDIT

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

We have reviewed your preliminary audit report on the Board of Dispensing Opticians, covering the period July 1, 1981 to June 30, 1984.

The position we expressed in response to your interim letter has not changed. We, at that time, concluded the assessment of allowing the board to terminate was accurate and would not subject the public to harm. We concurred in part to your recommendations.

Having now reviewed your preliminary audit report, we continue to maintain our position. We do not know of any reason to change.

For clarification, we will respond to each of your recommendations.

Recommendation 1

The Board of Dispensing Opticians should be allowed to terminate on June 30, 1985.

We concur with your report and endorse allowing the board to terminate on June 30, 1985. Since establishment (Chapter 45 SLA 1973), the board has licensed 60 practitioners.

We would also suggest the licensing functions by the Division of Occupational Licensing should also terminate. Citizens have other means of redress for harm, and the practitioners would still be required to have a State business license from the Department of Revenue.

08-H2LH

Recommendation 2

The Board of Dispensing Opticians and the Office of the Governor should work together to ensure that vacant board positions are filled. Currently, the Office of the Governor is making efforts to increase communication with the boards. The staff has solicited from boards, professional associations and the general public, candidates for board appointments. Vacancy lists are published in the Administrative Journal.

We would not endorse appointing a person to a board when we are suggesting termination of the function. Although the board has not had its full membership, licenses have been issued.

Recommendation 3

The board should review existing statutes and regulations and seek appropriate revisions where necessary.

We concur with your assessment in part. The board has made efforts to change regulations and, in doing so, has developed a better working relationship with the Board of Optometry in subjects of mutual consideration.

We disagree that the board is responsible for statutes that are unnecessary. Their input is necessary, however, they have no control over forcing repeal.

Our position on temporary permits remains unchanged. We disagree that a temporary permit allows for a greater influx of qualified practitioners. Applying for licensure should be a scheduled pursuit, not when an applicant wants immediate licensure by a different set of standards. To protect the public, verification of all documentation should be made. This does take time.

Recommendation 4

The Board should ensure that requirements are being met and adequately documented prior to licensure.

We concur in this recommendation and, if the board is continued, will work with them to ensure your suggestions and the laws are followed. Our position, expressed in response to your interim letter, is still accurate.

Be assured your recommendations will be endorsed to the board pending the determination of the legislative committee. We appreciate your evaluation and thank you for your cooperation.

Sincerely,

Richard A. Lyon
Commissioner

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 603 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to dispensing opticians; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.03.010(c)(5) is amended to read:

(5) Board of Dispensing Opticians (AS 08.71.010) -- June 30, 1988 [1985].

* Sec. 2. AS 08.71.110 is amended to read:

Sec. 08.71.110. QUALIFICATIONS OF APPLICANTS FOR EXAMINATION. (a) A person is entitled to take the examination who

(1) has had education equivalent to four years attendance at a high school;

(2) [(1)] has either

(A) completed at least 6,000 hours of training as an apprentice, or

(B) been engaged for at least 6,000 hours as a practicing optician in good standing in a state, territory, district or possession of the United States; and

(3) [(2)] has paid the required examination fee.

(b) Graduation from an associate degree program in a recognized school or college of opticianry may be substituted for 4,000 of the 6,000 hours of experience required by (a)(2) of this section.

* Sec. 3. AS 08.71.130(d) is amended to read:

(d) Before a license may be renewed the licensee shall submit to the board evidence of 30 [15] hours of continuing competence in

optical dispensing as prescribed by regulations of the board.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Alaska State Legislature
House of Representatives
COMMITTEE ON HEALTH, EDUCATION
AND SOCIAL SERVICES

OFFICIAL BUSINESS

POUCH
JUNEAU, AK 998
465-375

March 25, 1986

Representative Ben Grussendorf
Speaker of the House
P.O Box V
Juneau, Alaska 99811

Dear Mr. Speaker:

The House Committee on Health, Education and Social Services has considered the Sunset Review of the Board of Pharmacy, and recommends that the board be continued. Representative Max Gruenberg, Co-Chair of the committee, has introduced HB 641, to fulfill some of the findings of the Division of Legislative Audit.

As required by AS 44.60.050 (c), the Committee submits the following findings:

(1) the extent to which the board, commission or program has operated in the public interest.

The board has held three public meeetings a year, administers a yearly licensing examination and has passed regulations concerning dangerous drugs, continuing education as proof of continued comptency, false or misleading advertising of drugs and prepackaging of drugs in hospital drug rooms.

(2) the extent to which the operation of the board, commission or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

Prior audit recommendation (1983) was that continuing competency regulations are too stringent and should be changed. The regulations require nonacademic programs to have an examination or another method of assuring satisfactory completion of the program before credit will be given. Continued competency regulations may also be waived for chronic illness, retirement, military service or hardship.

The 1985 audit states that the board believes the regulations to be arbitrary or unreasonable and should be changed since the board has deviated from their written policy in accepting nonregulation credits. Legislative Audit also believes it is more reasonable to require

individuals who have been chronically ill, retired or in the military to demonstrate continued compentency than those who have not interrupted their practice. These recommendations were accomplished by the board in August of 1985.

(3) the extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

The board succeeded in having various obsolete or vague statutory requirements repealed which provided for smoother operation of the board. The board also was instrumental in passage of the controlled substances registration and the Marijuana Therapeutic Research Program which are currently recommended, by Legislative Audit, for repeal.

(4) the extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

Board meetings are announced to the public. Comments on regulation changes are solicited by announcement in public newspapers. The board does not actively solicit comments on its effectiveness.

(5) the extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

The board announces proposed regulation changes or additions in newspapers according to the Administrative Procedures Act.

(6) the efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which the board or commission is administratively assigned, or with the office of the ombudsman have been processed or resolved.

No problems were found by Legislative Audit.

(7) the extent to which the board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

The board has licensed 83 pharmacists in the last three years, all but eight were licensed by credentials. Legislative Audit found no instances where the board licensed unqualified practitioners.

(8) the extent to which state personnel practices, including affirmative action practices, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

Applications for licensure as a pharmacist require information and photographs which the Division of Equal Employment Opportunity believes may not be necessary to determine the qualifications of the applicant.

(9) the extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the

interests of the public and to comply with the factors enumerated in this subsection.

Legislative Audit found that state registration under the Controlled Substances Act is duplicative of the Federal Drug Enforcement Agency, unnecessary for litigation and costly for the state and that the board should recommend legislation to eliminate state registration.

The 1983 Audit recommendation that legislation be introduced to clarify the investigatory powers of the board and the Division was never accomplished, but has been incorporated into CSHB 641 (HESS)

The Audit also recommends repeal of the Marijuana Therapeutic Research Program since it was not accomplished in a timely fashion. The repeal is included in CSHB 641.

As required by AS 44.60.050 (d), the Committee submits the following findings:

(1) an identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address.

The board should recommend legislation to regulate pharmacy technicians. Although the Legislative Audit recommended the repeal of controlled substances registration, the committee has not addressed that issue, feeling that it will require further study.

(2) a statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments.

The purpose of the board is to license qualified applicants, inspect pharmacies and adopt needed regulations.

(3) an identification of any other programs having similar, conflicting or duplicate objectives.

There are no other agencies which license pharmacists. The Department of Public Safety is the lead agency in enforcement of the Controlled Substances Act, and should be given the responsibilities currently assigned to the Board of Pharmacy which are necessary and do not duplicate federal DEA activity.

(4) an assessment of alternative methods of achieving the purposes of the program.

The Committee did not consider any alternatives for licensure. The Committee did consider the recommendations of the Departments of Law, Public Safety and Commerce and Economic Development for rewriting aspects of the Controlled Substances Act, but did not adopt these provisions because of opposition from members of the board, reserving the issue for possible future legislation.

(5) an assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level.

Eliminating the board would remove licensing mechanisms, which are designed to assure that practitioners are competent to practice. The Committee did not consider funding for the board since legislation was passed last year to require licensing boards to alter fees in order to support board expenses.

(6) a justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts.

The board should be continued because the regulation and licensing of qualified professional pharmacists is necessary to protect the public's health, safety and welfare. There are no other agencies which regulate pharmacists.

(7) any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest.

The Committee has no further recommendations.

HCR 9: Summary

This resolution commends DOT/PF for its investigation of ways to improve transportation access to Whittier and urges the department to establish, as a priority, the planning of improved access to Whittier, and improved access between Whittier and Shotgun Cove. Departmental priority for the improved access plan would allow the 14th Legislature to review recommendations of DOT/PF and take action.

Further, the resolution requests that the Alaska Railroad increase its summer shuttle service between Portage and Whittier until the State makes a permanent decision on the access problem.

BY THE LABOR AND COMMERCE COMMITTEE

SENATE CS FOR HOUSE CONCURRENT RESOLUTION NO. 9 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to the Whittier-Shotgun Cove Access.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Whittier is becoming an important destination for tourists visiting Alaska, as shown by the increase of tour ships stopping at Whittier and of recreational businesses operating out of Whittier; and

WHEREAS Whittier is also growing in recreational importance to many Alaska residents who travel to Whittier each summer for water-related recreation, and who depend for this purpose upon access to Whittier; and

WHEREAS demand for Whittier harbor berths by recreational boaters far exceeds the available harbor space; and

WHEREAS the Thirteenth Alaska State Legislature created the Alaska Marine Park system to protect areas within Prince William Sound for public recreation; and

WHEREAS the planned disposal of municipal land between Whittier and Shotgun Cove for community expansion and recreation will increase the interest in the Whittier area for recreational homes or permanent residences; and

WHEREAS in 1984, over 200,000 persons visited Whittier, including travelers on the Alaska marine highway system; and

WHEREAS the summer shuttle service between Portage and Whittier during the summer of 1984 was too infrequent to meet the needs of Anchorage visitors to Whittier; and

WHEREAS the Alaska Railroad has been acquired by the state, and transportation planning can go forward at the state level on a comprehensive

basis; and

WHEREAS the Department of Transportation and Public Facilities is examining alternatives for improving access to Whittier;

BE IT RESOLVED that the Alaska State Legislature commends the Department of Transportation and Public Facilities for its investigation of ways to improve transportation to Whittier, including the possibility of paving one or both of the railroad tunnels between Portage and Whittier, and of increasing shuttle service by the Alaska Railroad; and be it

FURTHER RESOLVED that the Alaska State Legislature urges the governor to direct the Department of Transportation and Public Facilities to establish as a priority the planning of improved access to Whittier and between Whittier and Shotgun Cove so that the Fourteenth Alaska State Legislature can consider the department's recommendations and take action on this matter; and be it

FURTHER RESOLVED that the Alaska State Legislature requests that the Alaska Railroad Corporation initiate increased summer shuttle service between Portage and Whittier until the state makes a permanent decision on this access problem.

SUBCHAPTER E—VISAS

PART 41—VISAS; DOCUMENTATION OF NONIMMIGRANTS UNDER THE IMMIGRATION AND NATIONALITY ACT, AS AMENDED

Sec.

41.1 Definitions.

Documentation of Nationals, Claimant Nationals, and Former Nationals

41.3 Nationals, claimant nationals, and former nationals of the United States.

Passports and Visas Not Required for Certain Nonimmigrants

41.5 Nonimmigrants exempted by law or treaty from the requirement of passports, visas, and border-crossing identification cards.
41.6 Nonimmigrants not required to present passports, visas, or border-crossing identification cards.
41.7 Waiver of visa and/or passport requirements by joint action of consular and immigration officers.

Classification of Nonimmigrants

41.10 Presumption of immigrant status and burden of proof.
41.12 Classification symbols.
41.13 More than one person included in nonimmigrant visa.
41.14 Significance of visa in A, G, or NATO cases.

Foreign Government Officials

41.20 Officials of foreign governments.
41.21 Officials or representatives of foreign governments not recognized by the United States.
41.22 Couriers and acting couriers on official business.

Temporary Visitors

41.25 Temporary visitors for business or pleasure.

Transit Aliens

41.30 Transit aliens.
41.31 Certain aliens in transit to United Nations.
41.32 Accredited officials in transit through the United States.

Crewmen

41.35 Crewmen.
41.36 Foreign government official crewmen.

Treaty Traders and Investors

41.40 Treaty traders.
41.41 Treaty investors.

Students—Academic, Language Training Programs

41.45 Students in colleges, universities, seminaries, conservatories, academic high schools, elementary schools, other academic institutions, and in language training programs.

International Organization Aliens

41.50 Aliens coming to international organizations.

Temporary Workers and Trainees

41.55 Temporary workers and trainees.

Information Media Representatives

41.60 Representatives of foreign press, radio, film, or other information media.

Exchange Visitors

41.65 Exchange visitors.

Fiancée or Fiancé

41.68 Fiancée or fiancé of a United States citizen.

Executives, Managers, and Specialists

41.67 Executives, managers, and specialists (intracompany transferees).

Students—Vocational

41.68 Students in established vocational or other recognized nonacademic institutions, other than in language training programs.

NATO Aliens

41.70 NATO representatives, officials and employees.

Ineligible Classes of Nonimmigrants

41.90 Basis for refusal.
41.91 Aliens ineligible to receive visas.

Temporary Admission of Ineligible Aliens

41.95 Procedure in recommending temporary admission of ineligible aliens.

Types of Nonimmigrant Visas

41.100 Regular, diplomatic and official visas.
41.102 Classes of aliens eligible to receive diplomatic visas.

Sec.
41.104 Classes of aliens eligible to receive official visas.

Application for Nonimmigrant Visas

41.110 Place of application.
41.111 Supporting documents.
41.112 Passports.
41.113 Medical examination.
41.114 Personal appearance.
41.115 Application forms.
41.116 Registration and fingerprinting.
41.117 Signature.

Issuance of Nonimmigrant Visas

41.120 Authority to issue visas.
41.121 Visa fees.
41.122 Validity, termination and replacement of visas.
41.123 More than one alien included in visa.
41.124 Procedures in issuing visas.
41.125 Revalidation of visas.
41.126 Transfer of visas.
41.127 Crew list visas.
41.128 Nonresident alien Mexican border crossing identification cards.
41.129 Nonresident alien Canadian border crossing identification cards.

Refusal and Revocation of Nonimmigrant Visas

41.130 Procedure in refusing individual visas.
41.132 Exclusion from and refusal of crew-list visas.
41.134 Revocation of visas.

Entry Into Areas Under United States Administration

41.145 Aliens entering areas under United States administration not included in section 101(a)(38) of the Act.

Furnishing Visa Records for Court Proceedings

41.150 Furnishing visa records for court proceedings.

Authority: Sec. 104, 66 Stat. 174; 8 U.S.C. 1104, unless otherwise noted.

§ 41.1 Definitions.

In addition to the pertinent definitions contained in the Immigration and Nationality Act, the following definitions shall be applicable to this part:

Accredited. "Accredited", as used in sections 101(a)(15)(A), 101(a)(15)(G) and 212(d)(8) of the Act, refers to an alien who holds an official position, other than an honorary official position, with the government or international organization he represents, and who is in possession of a travel document or other evidence showing that he seeks to enter, or pass in transit through, the United States for the purpose of transacting official business for that government or international organization.

Act. "Act" means the Immigration and Nationality Act, as amended.

Attendants. "Attendants" as used in sections 101(a)(15)(A)(ii), 101(a)(15)(G)(iv), and [illegible] of the Act, shall include [illegible] is paid from the public funds of a foreign government or from the funds of an international organization and who is accompanying or following to join the principal alien to whom he owes a duty or service.

Competent officer. "Competent officer", as used in section 101(a)(26) of the Act, shall refer to a "consular officer" as defined in section 101(a)(9) of the Act and this section.

"Consular officer," as defined in section 101(a)(9) of the Act, shall include commissioned consular officers, the District Administrators of the Trust Territory of the Pacific Islands, the Director of the Visa Office of the Department and such other officers of the Department as he shall designate for the purpose of issuing nonimmigrant visas, but shall not include a consular agent, an attache, or an assistant attache. The assignment by the Department of any Foreign Service Officer or Foreign Service Reserve Officer to a diplomatic or consular office of the United States abroad in a position administratively designated as requiring, solely, principally, or partially, the performance of consular functions, and the initiation of a request for a consular commission, shall constitute designation of such officer as a "consular officer" within the meaning of section 101(a)(9) of the Act.

Department. "Department" means the Department of State of the United States of America.

Diplomatic passport. "Diplomatic passport" means a national passport bearing that title and issued by a competent authority of a foreign government. "Equivalent of a diplomatic passport" means a national passport, other than a specifically described diplomatic passport, which is issued by a

—Federal Law: Dept. of State/ visas

competent authority of a foreign government and which indicates the career diplomatic or consular status of the bearer, the issuing government being one which does not issue diplomatic passports to its career diplomatic and consular officers.

Diplomatic visa. "Diplomatic visa" means a nonimmigrant visa of any classification bearing that title and issued to an alien in accordance with the regulations contained in this part.

Government vessel or aircraft. "Government vessel or aircraft" means a vessel or aircraft operated directly by the Government of the United States with government personnel in connection with public business of a non-commercial and non-profit character, or a foreign-flag vessel or aircraft operated directly by a foreign government recognized de jure by the United States, with foreign government personnel in connection with public business of a non-commercial and non-profit character. The term "government vessel or aircraft" shall not include a vessel or aircraft which is merely controlled or subsized by a government, or one which is engaged in what would ordinarily be regarded as commercial shipping or commercial transportation.

Immediate family. "Immediate family", as used in sections 101(a)(15)(A), 101(a)(15)(G), and 212(d)(8) of the Act and with reference to classification under the symbols NATO-1, NATO-2, NATO-3, NATO-4, and NATO-5, includes the spouse and unmarried sons and daughters, whether by blood or adoption, who are not members of some other household, and who will reside regularly in the household of the principal alien. "Immediate Family" also includes, upon individual authorization by the Department, other close relatives who are members of the immediate family by blood, marriage, or adoption, who are not members of some other household, who will reside regularly in the household of the principal alien, and who are recognized as dependents by the sending Government as demonstrated by their eligibility for all rights and benefits, such as the issuance of a diplomatic or official passport and travel and other allowances, which would be granted to the spouse and children of the principal alien.

International organization. "International organization" means any public international organization which has been designated by the President by Executive Order as being entitled to enjoy the privileges, exemptions, and immunities provided for in the International Organizations Immunities Act.

Official visa. "Official visa" means a nonimmigrant visa of any classification bearing that title and issued to an alien in accordance with the regulations contained in this part.

Passport. "Passport", as defined in section 101(a)(30) of the Act, shall not be considered as limited to a national passport and shall not be considered as limited to a single document but may consist of two or more documents which, when considered together, fulfill the requirements of a passport as defined in section 101(a)(30) of the Act: *Provided*, That permission to enter a foreign country must be issued by a competent authority and must be clearly valid for such purpose in order to meet the requirements of section 101(a)(30). A nonimmigrant unable to obtain a document issued by a competent authority which indicates his origin, identity, and nationality if any, may furnish the missing information to the best of his knowledge and belief, by presenting an affidavit which, when combined with the documentary evidence of admissibility into a foreign country, will suffice to meet the requirements of section 101(a)(30) of the Act.

Port of entry. "Port of entry" means a port or place designated by the Commissioner of Immigration and Naturalization at which an alien may apply for admission into the United States.

Principal alien. "Principal alien" means an alien from whom another alien derives a privilege or status under the law or regulations.

Regular visa. "Regular visa" means a nonimmigrant visa of any classification issued in accordance with the regulations contained in this part, which does not bear the title "Diplomatic" or "Official."

Regulation. "Regulation" means a rule established pursuant to the provisions of section 104(a) of the Act which has been duly published in the FEDERAL REGISTER.

Servants and personal employees. "Servants" and "personal employees," as used in sections 101(a)(15)(A)(ii), 101(a)(15)(G)(v) and 212(d)(8) of the Act, include an alien who is employed in a domestic or personal capacity by a principal alien, who is paid from the private funds of such principal alien, and who seeks to enter the United States solely for the purpose of such employment.

Western Hemisphere. "Western Hemisphere" means North America (including Central America), South America and the islands immediately adjacent thereto including the places named in section 101(b)(5) of the Act.

[Dept. Reg. 108.411, 24 FR 6679, Aug. 18, 1959]

EDITORIAL NOTE: For Federal Register citations affecting § 41.1, see the List of CFR Sections Affected in the Finding Aids section of this volume.

DOCUMENTATION OF NATIONALS, CLAIMANT NATIONALS, AND FORMER NATIONALS

§ 41.3 Nationals, claimant nationals, and former nationals of the United States.

(a) A national of the United States shall not be issued a visa or other documentation as an alien for entry into the United States.

(b) A person whose case fulfills the conditions of section 360(b) of the Act and who continues to claim that he is a national of the United States may apply for a certificate of identity as provided in section 360(h) of the Act.

(c) A former national of the United States who seeks to enter the United States shall be required to comply with the documentary requirements applicable to aliens under the Act.

[Dept. Reg. 108.411, 24 FR 6680, Aug. 18, 1959]

PASSPORTS AND VISAS NOT REQUIRED FOR CERTAIN NONIMMIGRANTS

§ 41.5 Nonimmigrants exempted by law or treaty from the requirement of passports, visas, and border-crossing identification cards.

The provisions of section 212(a)(26) of the Act relating to the requirement of passports, visas, and border-crossing identification cards for nonimmigrants do not apply in the cases of aliens who fall within any of the following described categories:

(a) *Alien members of United States Armed Forces.* An alien member of the armed forces of the United States who (1) is in the uniform of, or who bears documents identifying him as a member of, such armed forces, (2) has not been lawfully admitted for permanent residence, and (3) is making application for admission to the United States under official orders or permit of such armed forces. (Sec. 284, 66 Stat. 232; 8 U.S.C. 1354.)

(b) *American Indians born in Canada.* An American Indian born in Canada, having at least fifty per centum of blood of the American Indian race. (Sec. 289, 66 Stat. 234; 8 U.S.C. 1359.)

(c) *Aliens entering from Guam, Puerto Rico, or Virgin Islands.* An alien who shall leave Guam, Puerto Rico, or the Virgin Islands of the United States, and who seeks to enter the continental United States or any other place under the jurisdiction of the United States. (Sec. 212, 66 Stat. 188; 8 U.S.C. 1182.)

(d) *Armed Services personnel entering under NATO Status of Forces Agreement.* Personnel belonging to the land, sea or air armed services of a government which is a Party to the North Atlantic Treaty and which has ratified the Agreement between the Parties to the North Atlantic Treaty regarding the Status of their Forces, signed at London on June 19, 1951, and entering the United States under the provisions of Article III of such Agreement pursuant to an individual or collective movement order issued by an appropriate agency of the sending State or of the North Atlantic Treaty Organization. (TIAS 2846; 4 U.S.T. 1792.)

(e) *Armed Services personnel attached to NATO Allied Headquarters in the United States.* Personnel attached to an Allied Headquarters in the United States set up pursuant to the North Atlantic Treaty signed in Washington, D.C., on April 4, 1949, who belong to the land, sea or air armed services of a government which

is a Party to the North Atlantic Treaty, and who are entering the United States in connection with their official duties under the provisions of the Protocol on the Status of International Military Headquarters set up pursuant to the North Atlantic Treaty. (TIAS 2978; 5 U.S.T. 877.)

(f) *Aliens entering pursuant to International Boundary and Water Commission Treaty.* All personnel employed either directly or indirectly on the construction, operation, or maintenance of works in the United States undertaken in accordance with the treaty concluded on February 3, 1944, between the United States and Mexico regarding the functions of the International Boundary and Water Commission, and entering the United States temporarily in connection with such employment. (59 Stat. 1252; TS 994.)

[Dept. Reg. 108.411, 24 FR 6680, Aug. 18, 1959, as amended by Dept. Reg. 108.433, 25 FR 4577, May 26, 1960]

§ 41.6 Nonimmigrants not required to present passports, visas, or border-crossing identification cards.

The provisions of section 212(a)(26) of the Act relating to the requirements of valid passports and visas for nonimmigrants are waived by the Secretary of State and the Attorney General, acting jointly, in pursuance of the authority contained in section 212(d)(4) of the Act under the conditions specified for the following classes:

(a) *Canadian nationals, and aliens having a common nationality with nationals of Canada or with British subjects in Bermuda, Bahamian nationals or British subjects resident in The Bahamas, Cayman Islands, and Turks and Caicos Islands.* A visa shall not in any case be required of a Canadian national, and a passport shall not be required of such a national except after a visit outside of the Western Hemisphere. A visa shall not be required of an alien having a common nationality with Canadian nationals or with British subjects in Bermuda, who has his residence in Canada or Bermuda, and a passport shall not be required of such an alien except after a visit outside of the Western Hemisphere. A Bahamian national or a British subject who has his residence in The Bahamas shall require a passport and a visa for admission to the United States except that a visa shall not be required of such an alien who, prior to or at the time of embarkation for the United States on a vessel or aircraft, satisfies the examining United States immigration officer at either Freeport or Nassau, The Bahamas that he is clearly and beyond a doubt entitled to admission in all other respects. A British subject who has his residence in the Bahamas shall require a passport and a visa for admission to the United States except that a visa shall not be required of such an alien who, prior to or at the time of embarkation for the United States on a vessel or aircraft, satisfies the examining United States immigration officer at Nassau, Bahamas, that he is clearly and beyond a doubt entitled to admission in all other respects. A visa shall not be required of a British subject who has his residence in, and arrives directly from, the Cayman Islands or the Turks and Caicos Islands and who presents a current certificate from the Clerk of Court of the Cayman Islands or the Turks and Caicos Islands indicating no criminal record.

(b) *British, French, and Netherlands nationals, and nationals of certain adjacent Islands of the Caribbean which are independent countries.* A visa shall not be required of a British, French, or Netherlands national, or of a national of Barbados, Grenada, Jamaica, or Trinidad and Tobago, who has his residence in British, French, or Netherlands territory located in the adjacent islands of the Caribbean area, or in Barbados, Grenada, Jamaica, or Trinidad and Tobago, who:

(1) Is proceeding to the United States as an agricultural worker; or

(2) Is the beneficiary of a valid, unexpired indefinite certification granted by the Department of Labor for employment in the Virgin Islands of the United States and is proceeding to the Virgin Islands of the United States for such purpose, or is the spouse or child of such an alien accompanying or following to join him.

A visa shall not be required of a national of the British Virgin Islands who has his residence in the British Virgin Islands, and who is proceeding to the Virgin Islands of the United States.

(c) *Mexican nationals.* A visa and a passport shall not be required of a Mexican national who is in possession of a border crossing card on Form I-186 and is applying for admission as a temporary visitor for business or pleasure from contiguous territory or is entering solely for the purpose of applying for a Mexican passport or other official Mexican document at a Mexican consular office on the United States side of the border. A visa shall not be required of a Mexican national who is in possession of a border crossing card and is applying for admission to the United States as a temporary visitor for business or pleasure from other than contiguous territory nor of a Mexican national who is a crewman employed on an aircraft belonging to a Mexican company authorized to engage in commercial transportation into the United States. A visa shall not be required of a Mexican national bearing a Mexican diplomatic or official passport who is a military or civilian official of the Federal Government of Mexico entering the United States for a stay of up to six months for any purpose other than on assignment as a permanent employee to an office of the Mexican Federal Government in the United States. A visa shall also not be required of the official's spouse or any of the official's dependent family members under 19 years of age, bearing diplomatic or official passports, who are in the actual company of such official at the time of entry into the United States. This waiver does not apply to the spouse or any of the official's family members classifiable under sections 101(a)(15)(F) or (M) of the Act.

(d) *Natives and residents of the Trust Territory of the Pacific Islands.* A visa and a passport shall not be required of a native and resident of the Trust Territory of the Pacific Islands who has proceeded in direct and continuous transit from the Trust Territory to the United States.

(e) *Aliens in immediate transit.* (1) *Aliens in bonded transit.* A passport and visa are not required of an alien who is being transported in immediate and continuous transit through the United States in accordance with the terms of an agreement entered into between the transportation line and the Immigration and Naturalization Service under the provisions of section 238(d) of the Act on Form I-426 to insure such immediate and continuous transit through and departure from the United States en route to a specifically designated foreign country: *Provided,* That such alien is in possession of a travel document or documents establishing his identity and nationality and ability to enter some country other than the United States. This waiver of visa and passport requirements is not available to an alien who is a citizen of Afghanistan, Cuba, Iran, or Iraq. This waiver of visa and passport requirements is not available to an alien who is a citizen of North Korea ("Democratic Peoples' Republic of Korea") or North Viet-Nam ("Democratic Republic of Viet-Nam"), and is a resident of one of the said countries, and is on a basis of reciprocity, available to a national of Albania, Bulgaria, Czechoslovakia, Estonia, the German Democratic Republic, Hungary, Latvia, Lithuania, Mongolian People's Republic, People's Republic of China, Poland, Rumania, or the Union of Soviet Socialist Republics resident in one of said countries, only if he is transiting the United States by aircraft of a transportation line signatory to an agreement with the Immigration and Naturalization Service on Form I-426 on a direct through flight which will depart directly to a foreign place from the port of arrival.

(2) *Foreign government officials in transit.* If an alien is of the class described in section 212 (d)(8) of the Act only a valid unexpired visa and a travel document which is valid for entry into a foreign country for at least 30 days from the date of his application for admission into the United States shall be required.

(f) *Individual cases of unforeseen emergencies.* A visa and a passport shall not be required of a nonimmigrant who, either prior to his embar-

kation at a foreign port or place or at the time of arrival at a port of entry in the United States, satisfies the district director of the Immigration and Naturalization Service in charge of the port of entry, after consultation with and concurrence by the Director of the Visa Office of the Department, that, because of an unforeseen emergency, he was unable to obtain the required documents. Any waiver of the visa requirement heretofore or hereafter granted pursuant to section 212(d)(4)(A) of the Act in the case of a national or resident of Cuba who embarks for the United States on or after November 10, 1963, shall not be valid unless such national or resident proceeds directly from Cuba to the United States and has been inspected in Cuba by officials of the United States Immigration and Naturalization Service and of the United States Public Health Service immediately prior to his departure for the United States, irrespective of whether such national or resident had prior notice of these conditions.

(g) *Fiance or fiancee of a United States citizen.* Notwithstanding the provisions of paragraphs (a), (b), (c), and (d) of this section, a visa shall be required of an alien described in such paragraphs who is classified, or who seeks classification, under section 101(a)(15)(K) of the Act.

(Sec. 101, 84 Stat. 1, 5, 8 U.S.C. 1101; 109(b), 91 Stat. 847; sec. 104, 66 Stat. 174; 8 U.S.C. 1104; sec. 109(b)(1), 91 Stat. 847)

[Dept. Reg. 108.411, 24 FR 6080, Aug. 18, 1959]

EDITORIAL NOTE: For Federal Register citations affecting § 41.6, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§ 41.7 Waiver of visa and/or passport requirements by joint action of consular and immigration officers.

The provisions of sections 212(a)(26) of the Act prescribing the documentary requirements for nonimmigrants may be waived by joint action of consular officers abroad and immigration officers pursuant to the authority contained in section 212(d)(4) of the Act in individual cases of aliens who satisfy the consular officer serving the port or place of embarkation, after consultation with and concurrence by the appropriate immigration officer, that their cases come within any of the following categories:

(a) An alien having his residence in foreign contiguous territory who does not qualify for the benefits of any waiver provided in § 41.6, and who is a member of a visiting group or excursion proceeding to the United States under circumstances which make the timely procurement of a passport and visa impracticable.

(b) *Passport waiver; aliens for whom passport extension facilities are unavailable.* An alien whose passport is not valid for the period prescribed in section 212(a)(26) of the Act and who is embarking for the United States at a port or place remote from any foreign diplomatic or consular establishment at which the passport could be revalidated.

(c) *Passport waiver; aliens precluded from obtaining passport extensions by foreign government restrictions.* An alien whose passport is not valid for the period prescribed in section 212(a)(26) of the Act and whose government as a matter of policy does not revalidate passports more than six months in advance of their expiration or until they actually expire.

(d) *Visa waiver; certain aliens proceeding to the United States under emergent circumstances.* An alien who is well and favorably known at the consular office, who has previously been issued a nonimmigrant visa which has since expired, and who is embarking on a direct journey to the United States under emergent circumstances which preclude the timely issuance of a visa.

(e) *Visa and passport waiver; members of armed forces of foreign countries making friendly visits to the United States.* An alien who is on active duty as a member of the armed forces of a foreign country and who is a member of a group of such force which is making a friendly call in the United States, whether courtesy or operational and whether in behalf of his own government or in behalf of the United Nations, under advance arrangements made with the military, naval, or air force authorities of the United States, other than an alien who is a citizen or resident of Albania, Bulgaria, Cuba, Czechoslovakia, Estonia, German Democratic Republic, Hungary, Latvia, Lithuania, Mongolian People's Republic, North Korea (Democratic Peoples' Republic of Korea), North Vietnam (Democratic Republic of Vietnam), People's Republic of China, Poland, Romania, or the Union of Soviet Socialist Republics.

(f) *Passport waiver; landed immigrants in Canada.* An alien applying for a visa at a consular office in Canada (1) who is a landed immigrant in Canada, (2) whose port and date of expected arrival in the United States are known, and (3) who is proceeding to the United States under emergent circumstances which preclude the timely procurement of a passport or Canadian certificate of identity.

(g) *Visa and/or passport waiver; authorization to individual consular offices.* An alien within the district of a consular office which has been individually authorized by the Department, because of unusual circumstances prevailing in that district, to join with immigration officers abroad in waivers of documentary requirements in specifically described categories of cases, and whose case falls within one of those categories.

[Dept. Reg. 108.416, 24 FR 8548, Oct. 22, 1959, as amended by Dept. Reg. 108.422, 24 FR 11030, Dec. 31, 1959; Dept. Reg. 108.433, 25 FR 4578, May 25, 1960; Dept. Reg. 108.441, 25 FR 7018, July 23, 1960; Dept. Reg. 108.494, 28 FR 5258, May 28, 1963; Dept. Reg. 108.684, 38 FR 4576, F. b. 16, 1973]

CLASSIFICATION OF NONIMMIGRANTS

§ 41.10 Presumption of immigrant status and burden of proof.

An applicant for a nonimmigrant visa shall be presumed to be an immigrant until he establishes to the satisfaction of the consular officer that he is entitled to a nonimmigrant status described in section 101(a)(15) of the Act or otherwise established by law or treaty. The burden of proof is upon the applicant to establish that he is entitled to the nonimmigrant classification and type of nonimmigrant visa for which he is an applicant.

(Secs. 214, 291, 66 Stat. 189, 234, 8 U.S.C. 1184, 1361)

[Dept. Reg. 108.422, 24 FR 11080, Dec. 31, 1959]

§ 41.12 Classification symbols.

A visa issued to a nonimmigrant alien within one of the classes described in this section shall bear an appropriate symbol to be inserted by the consular officer in the space provided in the visa stamp to show the classification of the alien. The following symbols shall be used:

Class	Citation	Symbol to be inserted in visa
Ambassador, public minister, career diplomatic or consular officer, and members of immediate family	101(a)(15)(A)(i), 66 Stat. 167	A-1
Other foreign government official or employee, and members of immediate family	101(a)(15)(A)(ii), 66 Stat. 167	A-2
Attendant, servant, or personal employee and A-1 and A-2 classes and members of immediate family	101(a)(15)(A)(iii), 66 Stat. 167	A-3
Temporary visitor for business	101(a)(15)(B), 66 Stat. 167	B-1
Temporary visitor for pleasure	101(a)(15)(B), 66 Stat. 167	B-2
Temporary visitor for business and pleasure	101(a)(15)(B), 66 Stat. 167	B-1 and B-2
Alien in transit	101(a)(15)(C), 66 Stat. 167	C-1
Alien in transit to United Nations Headquarters District under § 11 (3), (4), or (5) of the Headquarters Agreement	101(a)(15)(C), 66 Stat. 167	C-2
Foreign government official, members of immediate family, attendant, servant, or personal employee, in transit	212(d)(8), 66 Stat. 188	C-3 and G
Crewman (seaman or airman)	101(a)(15)(D), 66 Stat. 167	D
Treaty trader, spouse and children	101(a)(15)(E)(i), 66 Stat. 168	E-1
Treaty investor, spouse and children	101(a)(15)(E)(ii), 66 Stat. 168	E-2
Student—Academic or language training Program	101(a)(15)(F)(i), 66 Stat. 168, 75 Stat. 527	F-1
Spouse or child of student	101(a)(15)(F)(ii), 75 Stat. 527	F-2
Foreign accredited representative or recognized foreign member government to international organization, his staff, and members of immediate family	101(a)(15)(G)(i), 66 Stat. 168	G-1
Other representative of recognized foreign member government to international organization, and members of immediate family	101(a)(15)(G)(ii), 66 Stat. 168	G-2

33-065 O—74—11

Class	Citation	Symbol to be inserted in visa
Representative of nonrecognized or nonmember foreign government to international organization, and members of immediate family	101(a)(15)(G)(ii), 66 Stat 168	G-3
International organization officer or employee, and members of immediate family	101(a)(15)(G)(iii), 66 Stat 168	G-4
Attendant, servant, or personal employee, of G-1, G-2, G-3, and G-4 classes, and members of immediate family	101(a)(15)(G)(iv), 66 Stat 168	G-5
Temporary worker of distinguished merit and ability	101(a)(15)(H)(i), 66 Stat 168	H-1
Trainee	101(a)(15)(H)(ii), 66 Stat 168, 24 Stat 116	H-3
Spouse or child of alien classified H-1, H-2, or H-3	101(a)(15)(H), 64 Stat 116	H-4
Representative of foreign information media, spouse, and children	101(a)(15)(I), 66 Stat 168	I
Exchange visitor	101(a)(15)(J), 66 Stat 167, 75 Stat 527	J-1
Spouse or child of exchange visitor	101(a)(15)(J), 75 Stat 527	J-2
Fiancé or fiancée of U.S. citizen	101(a)(15)(K), 64 Stat 116	K-1
Minor child of fiancé or fiancée of U.S. citizen	101(a)(15)(K), 64 Stat 116	K-2
International company transferee (Executive, managerial, and specialized personnel continuing employment with international firm or corporation)	101(a)(15)(L), 64 Stat 116	L-1
Spouse or minor child of alien classified L-1	101(a)(15)(L), 64 Stat 116	L-2
Vocational or other recognized nonacademic student	101(a)(15)(M), 95 Stat 1611	M-1
Spouse or minor child of alien classified M-1	95 Stat 1611	M-2
Principal permanent representative of Member State to NAIO (including any of its subsidiary bodies) resident in the United States and resident members of the official staff, Secretary General, Deputy Secretary General, Assistant Secretaries General and Executive Secretary of NAIO, other permanent NAIO officials of senior rank, and members of immediate family	Art 12, 5 UST 1094, Art 20, 5 UST 1098	NATO-1
Other representatives of Member State to NAIO (including any of its subsidiary bodies) including representatives, advisers and technical experts of delegations, and members of immediate family; dependents of member of a force entering in accordance with the provisions of the NAIO Status of Forces Agreement or in accordance with the provisions of the Protocol on the Status of International Military Headquarters; members of such a force if issued visas	Art 13, 5 UST 1094, Art 1, 4 UST 1794, Art 3, 4 UST 1796	NATO-2
Official clerical staff accompanying a representative of Member State to NAIO (including any of its subsidiary bodies) and members of immediate family	Art 14, 5 UST 1096	NATO-3
Officials of NAIO (other than those classifiable under NAIO-1) and members of immediate family	Art 18, 5 UST 1098	NATO-4
Experts, other than NAIO officials classifiable under the symbol NATO-4, employed on missions on behalf of NAIO and their dependents	Art 21, 5 UST 1100	NATO-5
Members of a civilian component accompanying a force entering in accordance with the provisions of the NAIO Status of Forces Agreement, members of a civilian component attached to or employed by an NAIO headquarters under the Protocol on the Status of International Military Headquarters set up pursuant to the North Atlantic Treaty, and their dependents	Art 1, 4 UST 1794, Art 3, 5 UST 877	NATO-6
Attendant, servant, or personal employee of NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, and NATO-6 classes, and members of immediate families	Arts 12-20, 5 UST 1094-1098	NATO-7

(Sec. 212(e), 75 Stat. 535; 8 U.S.C. 1182; sec. 104, 66 Stat. 174 (8 U.S.C. 1104); sec. 109(b)(1), 91 Stat. 847)

[Dept. Reg. 108.471, 20 FR 9518, Oct. 10, 1981, as amended by Dept. Reg. 108.502, 28 FR 13934, Dec. 21, 1963; Dept. Reg. 108.618, 35 FR 6124, Apr. 15, 1970; Dept. Reg. 108.820, 47 FR 21776, May 20, 1982; 47 FR 24203, June 4, 1982]

§ 41.13 More than one person included in nonimmigrant visa.

A single nonimmigrant visa may be issued to include more than one eligible alien if each alien to be included in the visa executes a separate application. When several members of a family are to be included in the same visa, the name of each family member, in addition to the name of the principal applicant, shall be written in the space provided in the visa stamp. The visa fee to be collected shall be equal to the total of the fees prescribed by the Secretary of State in accordance with the provisions of section 281 of the Act for each alien included in the visa, unless upon a basis of reciprocity a lesser fee is chargeable in such a case.

[Dept. Reg. 108.416, 24 FR 8548, Oct. 22, 1959]

§ 41.11 Significance of visa in A, G, or NATO cases.

A visa issued pursuant to the provisions of section 101(a)(15)(A) or 101(a)(15)(G) of the Act or to an alien classifiable under the symbols NATO-1 through NATO-7 shall be prima facie evidence of the proper classification of the alien when presented to the immigration authorities at a port of entry.

[Dept. Reg. 108.422, 24 FR 11080, Dec. 31, 1959]

FOREIGN GOVERNMENT OFFICIALS

§ 41.20 Officials of foreign governments.

(a) *Criteria for classification of foreign government officials.* An alien shall be classifiable under section 101(a)(15)(A) (i) or (ii) of the Act if, in the case of the principal alien, (1) he has been accredited by a foreign government recognized de jure by the United States, (2) he intends to engage solely in official activities for said foreign government while in the United States, and (3) he has been accepted by the President, or by the Secretary of State, or by a consular officer acting on behalf of the Secretary of State. A member of the immediate family of a principal alien shall be classifiable under section 101(a)(15)(A) (i) or (ii) if the principal alien is classifiable under section 101(a)(15)(A) (i) or (ii).

(b) *Classification of status under section 101(a)(15)(A).* If an alien is entitled to classification under section 101(a)(15)(A) of the Act he shall be classified under this section even if he is eligible for another nonimmigrant classification.

(c) *Classification of attendants, servants, and personal employees.* An alien shall be classifiable as a nonimmigrant under the provisions of section 101(a)(15)(A)(iii) of the Act if he establishes to the satisfaction of the consular officer that he qualifies under that section of the Act.

(d) *Referral of certain cases to the Department.* In any case in which there is uncertainty about the applicability of these regulations to a principal alien applicant requesting nonimmigrant status, the matter shall immediately be referred to the Department for consideration as to whether acceptance of accreditation shall or shall not be granted.

(e) *Change of nonimmigrant status to that of a foreign government official.* In the case of an alien in the United States seeking a change of nonimmigrant classification pursuant to section 248 of the Act to a classification under section 101(a)(15)(A) (i) or (ii), the question of acceptance of accreditation shall be determined by the Department.

(f) *Termination of status.* The Department may, in its discretion, cease to recognize as entitled to nonimmigrant status under section 101(a)(15)(A) (i) or (ii) any alien who has such status.

(g) *Classification of foreign government officials for entry other than diplomatic.* A foreign government official or employee who seeks to enter the United States temporarily in a status other than that of a representative or employee of a foreign government shall not be classifiable under the provisions of section 101(a)(15)(A).

[Dept. Reg. 108.807, 46 FR 28637, May 28, 1981]

§ 41.21 Officials or representatives of foreign governments not recognized by the United States.

An official of a foreign government, which is not recognized de jure by the United States, who is proceeding to or through the United States on an official mission for his government or to an international organization shall be classified as a nonimmigrant under the provisions of section 101(a)(15) (i), (G), or (G) (iii) of the Act.

[Dept. Reg. 108.411, 24 FR 6082, Aug. 18, 1959]

§ 41.22 Couriers and acting couriers on official business.

(a) *Couriers of current.* An alien who is regularly and professionally employed as a courier by the government

of the country to which he owes allegiance shall be classified as a nonimmigrant under the provisions of section 101(a)(15)(A)(i) of the Act if he is proceeding to the United States on official business for his government.

(b) *Officials acting in capacity of courier.* An alien who is not regularly and professionally employed as a courier by the government of the country to which he owes allegiance shall be classified as a nonimmigrant under the provisions of section 101(a)(15)(A)(ii) of the Act if he holds an official position with that government and is proceeding to the United States as a courier on official business for his government.

(c) *Nonofficials serving in capacity of courier.* An alien who is serving in the capacity of courier but who is not regularly and professionally employed as such and who holds no official position with, or is not a national of, the country whose government he is so serving, shall be classified as a nonimmigrant under the provisions of section 101 (a)(15)(B) of the Act.

[Dept. Reg. 108.411, 24 FR 6082, Aug. 18, 1959]

Temporary Visitors

§ 41.25 Temporary visitors for business or pleasure.

(a) An alien shall be classifiable as a nonimmigrant visitor for business or pleasure if he establishes to the satisfaction of the consular officer that he qualifies under the provisions of section 101(a)(15)(B) of the Act and that: (1) He intends to depart from the United States at the expiration of his temporary stay (consular officers are authorized in borderline cases to require the posting of a bond with the Attorney General in a sufficient sum to insure that upon the conclusion of his temporary visit, or upon his failure to maintain temporary visitor status, or any status subsequently acquired under section 248 of the Act, the alien will depart from the United States); (2) he has permission to enter some foreign country upon the termination of his temporary stay; and (3) adequate financial arrangements have been made to enable him to carry out the purpose of his visit and to travel to, sojourn in, and depart from the United States.

(b) The term "business", as used in section 101(a)(15)(B) of the Act, refers to legitimate activities of a commercial or professional character. It does not include purely local employment or labor for hire. An alien seeking to enter as a nonimmigrant for employment or labor pursuant to a contract or other prearrangement shall be required to qualify under the provisions of § 41.55. An alien of distinguished merit and ability seeking to enter the United States temporarily with the idea of performing temporary services of an exceptional nature, requiring such merit and ability, but having no contract or other prearranged employment, may be classified as a nonimmigrant temporary visitor for business.

(c) The term "pleasure", as used in section 101(a) (15) (B) of the Act, refers to legitimate activities of a recreational character, including tourism, amusement, visits with friends or relatives and rest; medical treatment, or activities of a fraternal, social, or service nature.

[Sec. 101, 66 Stat. 166, 70 Stat. 919, 8 U.S.C. 1101]

[Dept. Reg. 108.422, 24 FR 11080, Dec. 31, 1959, as amended by Dept. Reg. 108.502, 28 FR 13934, Dec. 21, 1963; Dept. Reg. 108.527, 30 FR 14782, Nov. 30, 1965]

Transit Aliens

§ 41.30 Transit aliens.

An alien shall be classifiable as a nonimmigrant transit alien under the provisions of section 101(a)(15)(C) of the Act if he establishes to the satisfaction of the consular officer that: (a) He is passing in immediate and continuous transit through the United States, (b) he is in possession of a ticket or other assurance of transportation to his destination; (c) he is in possession of sufficient funds to enable him to carry out the purpose of his transit journey, or has sufficient funds otherwise available for that purpose; and (d) he has permission to enter some country other than the United States following his transit journey through the United States unless the alien submits evidence that such advance permission is not required.

[Sec. 101, 66 Stat. 166, 8 U.S.C. 1101]

[Dept. Reg. 108.411, 24 FR 6082, Aug. 18, 1959]

§ 41.31 Certain aliens in transit to United Nations.

An alien within the provisions of paragraph (3), (4), or (5) of section 11 of the Headquarters Agreement with the United Nations, to whom a visa is to be issued for the purpose of applying for admission solely in transit to the United Nations Headquarters District, may at his own request or at the direction of the Secretary of State be issued a nonimmigrant visa bearing the symbol C-2. If such a visa is issued, the recipient will be subject to such restrictions in his travel within the United States as may be provided in regulations prescribed by the Attorney General.

[Dept. Reg. 108.411, 24 FR 6082, Aug. 18, 1959]

§ 41.32 Accredited officials in transit through the United States.

An accredited official of a foreign government who intends to proceed in immediate and continuous transit through the United States on official business for his government shall be entitled to the benefits of section 212(d)(8) of the Act if his government grants similar privileges to officials of the United States, and shall be classified under the provisions of section 101(a)(15)(C) of the Act. Members of the immediate family, attendants, servants, or personal employees of such an official shall be accorded the same classification as the principal alien.

[Sec. 212(d)(8), 66 Stat. 188; 8 U.S.C. 1182]

[Dept. Reg. 108.411, 24 FR 6082, Aug. 18, 1959]

Crewmen

§ 41.35 Crewmen.

(a) An alien shall be classifiable as a nonimmigrant crewman if he establishes to the satisfaction of the consular officer that he qualifies under the provisions of section 101(a)(15)(D) of the Act and that he has permission to enter some foreign country after a temporary landing in the United States.

(b) An alien employed on board a vessel or aircraft in a capacity not required for normal operation and service on the particular vessel or aircraft, or an alien employed or listed as a regular member of the crew in excess of the number normally required shall not be classified as a crewman.

[Sec. 101, 66 Stat. 166, 8 U.S.C. 1101]

[Dept. Reg. 108.411, 24 FR 6082, Aug. 18, 1959]

Cross Reference: For documentary requirements for crewmen see § 41.91(a)(26) and for instructions regarding the procedure to be followed in issuing crew list visas see § 41.127.

§ 41.36 Foreign government official crewmen.

Alien crewmen serving on board a foreign warship or other vessel of war, or military, naval or other aircraft of the armed forces of a foreign country, when making a friendly call at a United States port under advance arrangements made with the military authorities of the United States, or any other government vessel or aircraft shall not be subject to the provisions of § 41.91(a)(26) if the documentary requirements have been waived by the Secretary of State and the Attorney General pursuant to section 212(d)(4) of the Act.

[Dept. Reg. 108.433, 25 FR 4576, May 25, 1960]

Treaty Traders and Investors

§ 41.40 Treaty traders.

(a) An alien shall be classifiable as a nonimmigrant treaty trader if he establishes to the satisfaction of the consular officer that he qualifies under the provisions of section 101(a)(15)(E)(i) of the Act and that: (1) He intends to depart from the United States upon the termination of his status; and (2) if he is employed by a foreign person or organization having the nationality of the treaty country which is engaged in substantial trade as contemplated by section 101(a)(15)(E)(i), he will be engaged in duties of a supervisory or executive

character, or, if he is or will be employed in a minor capacity, he has the specific qualifications that will make his services essential to the efficient operation of the employer's enterprise and will not be employed solely in an unskilled manual capacity. The employment must be by an individual employer having the nationality of the treaty country who is maintaining the status of a nonimmigrant treaty trader, or by an organization which is principally owned by a person or persons having the nationality of the treaty country and, if not residing abroad, maintaining nonimmigrant treaty trader status.

(b) The term "trade," as used in this section, means trade of a substantial nature which is international in scope, carried on by the alien in his own behalf or as an agent of a foreign person or organization engaged in trade, and is principally between the United States and the foreign state of which such alien is a national. Consideration shall be given to any conditions in the country of which the alien is a national which may affect the alien's ability to carry on substantial trade principally between the United States and such country.

(c) The nationality of a spouse or child of a treaty trader shall not be material to the classification of such spouse or child under the provisions of section 101(a)(15)(E)(i) of the Act.

(d) Representatives of foreign information media shall first be considered for possible classification as nonimmigrants under the provisions of section 101(a)(15)(I) of the Act and § 41.60, before consideration is given to their possible classification as nonimmigrants under the provisions of section 101(a)(15)(E) of the Act and of this section.

(Sec. 101, 66 Stat. 166; 8 U.S.C. 1101)

[Dept. Reg. 108.411, 24 FR 6683, Aug. 18, 1959, as amended by Dept. Reg. 108.507, 29 FR 4770, Apr. 3, 1964; Dept. Reg. 108.702, 39 FR 26154, July 17, 1974]

§ 41.41 Treaty investors.

(a) An alien shall be classifiable as a nonimmigrant treaty investor if he establishes to the satisfaction of the consular officer that he qualifies under the provisions of section 101(a)(15)(E)(ii) of the Act and that: (1) He intends to depart from the United States upon the termination of his status; and (2) he is an alien who has invested or is investing capital in a bona fide enterprise and is not seeking to proceed to the United States in connection with the investment of a small amount of capital in a marginal enterprise solely for the purpose of earning a living; or that (3) he is employed by a treaty investor in a responsible capacity and the employer is a foreign person having the nationality of the treaty country who is maintaining the status of a nonimmigrant treaty investor, or an organization which is principally owned by a person or persons having the nationality of the treaty country and, if not residing abroad, maintaining nonimmigrant treaty investor status.

(b) The nationality of a spouse or child of a treaty investor shall not be material to the classification of such spouse or child under the provisions of section 101(a)(15)(E)(ii) of the Act.

(Sec. 101, 66 Stat. 166; 8 U.S.C. 1101)

[Dept. Reg. 108.411, 24 FR 6683, Aug. 18, 1959, as amended by Dept. Reg. 108.702, 39 FR 26154, July 17, 1974]

Students—Academic, Language Training Programs

§ 41.45 Students in colleges, universities, seminaries, conservatories, academic high schools, elementary schools, other academic institutions, and in language training programs.

(a) An alien shall be classifiable as a nonimmigrant student under section 101(a)(15)(F)(i) of the Act upon establishing to the satisfaction of the consular officer that the provisions of that section have been met and that the alien:

(1) Will attend, and has been accepted for attendance by, a college, university, seminary, conservatory, academic high school, elementary school, or other academic institution or in a language training program in the United States which has been approved by the Attorney General for the purposes of section 101(a)(15)(F)(i) of the Act, as evidenced by the presentation of Form I-20A-B (Certificate of Eligibility) properly and completely filled out and signed by the alien and by a designated school official (the Form I-20A, when properly executed and presented by an alien in support of an application for a student visa under this section, shall be accepted by the consular officer as prima facie evidence that the designated college, university, seminary, conservatory, academic high school, elementary school, or other academic institution or institution providing language training has been approved by the Attorney General for the attendance of nonimmigrant students, and that the visa applicant has been accepted for attendance at such institution);

(2) Is in possession of sufficient funds to cover expenses while in the United States or other arrangements have been made to provide those expenses;

(3) Has sufficient scholastic preparation and knowledge of the English language (unless the alien is going to an institution exclusively to participate in an English language training program) to enable the undertaking of a full course of study given in the English language which the accepting institution is equipped to offer, or the institution (i) has accepted the alien expressly for a full course of study in a language with which the alien is sufficiently familiar, or

(ii) Will enroll the alien in a combination of academic courses and English instruction which will constitute a full course of study; and

(4) Intends in good faith and will be able to depart from the United States upon the termination of the student status (consular officers are authorized in borderline cases to require the posting of a bond with the Attorney General in a sufficient sum to insure that upon the alien's conclusion of studies, or upon the alien's failure to maintain student status, or any status subsequently acquired under section 248 of the Act, the alien will depart from the United States). If the alien is otherwise qualified for classification as a nonimmigrant student under this section, but intends to study the English language exclusively while in the United States, such alien may be classified as a nonimmigrant student under the provisions of section 101(a)(15)(F)(i) of the Act even though no credits are given by the institution for such study. The approved school must be equipped to offer a full course of study in the English language and must have accepted the applicant expressly for that course.

(b) An alien shall also be classifiable as a nonimmigrant under section 101(a)(15)(F)(ii) of the Act if it is established to the satisfaction of the consular officer that such alien qualifies under the provisions of that section and that the alien:

(1) Is in possession of sufficient funds to cover expenses while in the United States, or that other arrangements have been made to provide for such expenses; and

(2) Intends in good faith and will be able to depart from the United States upon the termination of the status of the principal alien.

(Sec. 104, 66 Stat. 174; 8 U.S.C. 1104; sec. 109(b)(1), 91 Stat. 847)

[Dept. Reg. 108.820, 47 FR 21777, May 20, 1982, 47 FR 24293, June 4, 1982]

International Organization Aliens

§ 41.50 Aliens coming to international organizations.

(a) An alien shall be classifiable under the provisions of section 101(a)(15)(G) of the Act if he establishes to the satisfaction of the consular officer that he is within one of the classes described in that section and that he seeks to enter, or pass in transit through, the United States in pursuance of his official duties. Such alien who seeks to enter, or pass in transit through, the United States other than in pursuance of his official duties shall not be classified under section 101(a)(15)(G) of the Act.

(b) An alien who applies for a visa as a nonimmigrant under the provisions of section 101(a)(15)(G) of the Act shall not be refused such visa solely on the grounds that he is not a national of the country whose government he represents.

(c) An alien who seeks to enter the United States as a foreign government representative to an international organization and who, at the same time,

is proceeding to the United States on official business as a foreign government official within the meaning of section 101(a)(15)(A) of the Act, shall, if otherwise qualified, be issued a visa as a non-immigrant under the provisions of section 101(a)(15)(A) of the Act.

(d) An alien not classifiable under section 101(a)(15)(A) of the Act who is entitled to classification under section 101(a)(15)(G), the Act shall be classified under this section although he may also be eligible for another nonimmigrant classification.

(Sec. 101, 66 Stat. 166, 8 U.S.C. 1101)

[Dept. Reg. 108.411, 24 FR 6083, Aug. 18, 1959]

Temporary Workers and Trainees

§ 41.55 Temporary workers and trainees.

(a) An alien shall be classifiable under the provisions of section 101(a)(15)(H) of the Act if—

(1) (i) He establishes to the satisfaction of the consular officer that he qualifies under the provision of that section; and (ii) the consular officer shall have received a petition approved by the Immigration and Naturalization Service to accord such classification to the alien, or official notification of the approval thereof; or (iii) the alien shall have presented to the consular officer official confirmation of the approval of the petition to accord him such classification or of the extension of his period of authorized stay in such classification; or

(2) He establishes to the satisfaction of the consular officer that he is the spouse or child of an alien so classified.

The period of validity of a visa issued on the basis of such an approved petition or official notification or confirmation shall not exceed the period of validity or of authorized stay set forth therein. The approval of such a petition shall not, of itself, establish that the alien is eligible to receive a nonimmigrant visa.

(b) If a consular officer knows or has reason to believe that an alien applying for a visa under section 101(a)(15)(H) of the Act is not qualified to perform the services, or to undertake the training, specified in the employer's petition approved by the Attorney General he shall suspend action on the alien's application and submit a report to the approving office of the Immigration and Naturalization Service for whatever action appears to be warranted.

(c) The term "Trainee", as used in section 101(a)(15)(H)(iii) of the Act, means a nonimmigrant alien who seeks to enter the United States at the invitation of an individual, organization, firm, or other trainer for the purpose of receiving instruction in any field of endeavor, including agriculture, commerce, communication, finance, government, transportation, and the professions as well as in a purely industrial establishment. (For provisions relating to the ineligibility of former exchange visitors to receive visas under section 101(a)(15)(H) of the Act see § 41.91(d)).

(Sec. 101, 66 Stat. 166 8 U.S.C. 1101)

[Dept. Reg. 108.411, 24 FR 6083, Aug. 18, 1959; 24 FR 6943, Aug. 27, 1959, as amended by Dept. Reg. 108.618, 35 FR 6124, Apr. 15, 1970. Dept. Reg. 108.644, 36 FR 19301, Oct. 2, 1971; 36 FR 19907, Oct. 13, 1971; Dept. Reg. 108.678, 37 FR 21027, Oct. 14, 1972]

Cross Reference: For provisions relating to the ineligibility of former exchange visitors to receive visas under section 101(a)(15)(H) of the Act, see § 41.91(d).

Information Media Representatives

§ 41.60 Representatives of foreign press, radio, film, or other information media.

(a) An alien shall be classifiable as a nonimmigrant information media representative if he establishes to the satisfaction of the consular officer that he qualifies under the provisions of section 101(a)(15)(I) of the Act and that he is a bona fide representative of a foreign press, radio, film, or other information medium having its home office in a foreign country, the government of which grants upon a basis of reciprocity similar privileges to representatives of such a medium having home offices in the United States.

(b) An alien who will be engaged in the United States in newsgathering activities between the United States and the country of which he is a national shall, if otherwise qualified, be classified as a nonimmigrant under the provisions of section 101(a)(15)(I) of the Act, notwithstanding the fact that such alien may also be classifiable as a nonimmigrant under the provisions of section 101(a)(15)(E) of the Act.

(Sec. 101, 66 Stat. 166; 8 U.S.C. 1101)

[Dept. Reg. 108.411, 24 FR 6084, Aug. 18, 1959]

Exchange Visitors

§ 41.65 Exchange visitors.

(a) *Classification.* An alien shall be classifiable as an exchange visitor if he qualifies under the provisions of section 101(a)(15)(J) of the Act and establishes to the satisfaction of the consular officer that:

(1) He has been accepted to participate, and intends to participate, in an exchange visitor program designated by the International Communication Agency as evidenced by the presentation of a properly executed Form IAP-66 (Certificate of Eligibility for Exchange Visitor (J-1) status);

(2) He has sufficient funds to cover his expenses or other arrangements have been made to provide for his expenses;

(3) He has sufficient knowledge of the English language to enable him to undertake the program for which he has been selected, or, except for an alien coming to participate in a program under which he will receive graduate medical education or training, the organization sponsoring him is aware of his deficiency in this respect and has indicated its willingness to accept him regardless of that deficiency;

(4) He meets the requirements of section 212(j) of the Immigration and Nationality Act, as amended, if coming to participate in a program under which he will receive graduate medical education or training; or that,

(5) The alien is the spouse or minor child of such an exchange-visitor program participant.

(b) *Applicability of section 212(e) of the Act.* (1) An alien is subject to the 2-year foreign residence requirement of section 212(e) of the Act if—

(i) His participation in one or more exchange programs was wholly or partially financed, directly or indirectly, by the Government of the United States or by the government of his country of nationality or last residence; or

(ii) At the time of the issuance to him of an exchange visitor visa and admission to the United States, or, if not required to obtain a nonimmigrant visa, at the time of his acquisition of such status after admission, he is a national and resident, or if not a national he is a lawful permanent resident (or has status equivalent thereto), of a country which the Director of the International Communication Agency had designated, through publication by public notice in the Federal Register, as clearly requiring the services of persons engaged in the field of specialized knowledge or skill in which the alien will engage in his exchange visitor program; or

(iii) He acquires exchange visitor status in order to receive graduate medical education or training in the United States.

(2) For the purposes of this paragraph the terms "financed directly" and "financed indirectly" shall be defined as set forth in § 514.1 of Chapter V.

(3) The country in which 2 years' residence and physical presence will satisfy the requirements of sections 212(e) of the Act in the case of an alien determined to be subject to such requirements shall be the country of which the alien is, at the time of such determination, a national and resident, or, if not a national, a lawful permanent resident (or has status equivalent thereto).

(4) If an alien is subject to the 2 year foreign residence requirement of section 212(e) of the Act, the spouse or child of such alien shall also be subject to such requirement if such spouse or child is admitted to the United States pursuant to section 101(a)(15)(J) of the Act, or acquires status pursuant to such section after admission, for the purpose of accompanying or following to join such alien.

(c) *Notification to alien.* The consular officer to whom an alien applies for

an exchange visitor visa shall, prior to the issuance of such visa, determine whether the alien will be subject to the 2-year foreign residence requirement of section 212(e) of the Act if admitted to the United States under section 101(a)(15)(J) of the Act and, if so, the country in which 2 years' residence and physical presence will satisfy such requirement with respect to the alien, and shall inform the alien of such determinations.

(Sec. 104, 66 Stat. 174; (8 U.S.C. 1104, 1182(e), 1258); Reorganization Plan No. 2 of 1977; E.O. 12048 of March 27, 1978)

[Dept. Reg. 108.057, 37 FR 7156, Apr. 11, 1972, as amended by Dept. Reg. 108.673, 37 FR 17471, Aug. 29, 1972; Dept. Reg. 108.691, 38 FR 20219, July 31, 1973; Dept. Reg. 108.766, 44 FR 17659, Mar. 23, 1979, 45 FR 81560, Dec. 11, 1980]

Fiancée or Fiancé

§ 41.66 Fiancee or fiance of a United States citizen.

(a) An alien shall be classifiable as a nonimmigrant fiancee or fiance if he submits evidence that he qualifies under the provisions of section 101(a)(15)(K) of the Act and if the consular officer shall have received from the Immigration and Naturalization Service a petition filed by the alien's U.S. citizen fiance or fiancee and approved in accordance with the provisions of section 214(d) of the Act.

(b) Upon receipt of such a petition, and upon submission by the alien of a sworn statement of ability and intent to conclude a valid marriage with the petitioner within 90 days of arrival in the United States, the consular officer shall grant the status accorded in the petition and shall determine the eligibility of the alien to receive a visa.

(c) Determination of the eligibility of an alien to receive a visa under section 101 (a)(15)(K) of the Act shall be made, insofar as practicable, as if the alien were an applicant to receive an immigrant visa.

(d) If it is determined that the alien would be eligible in all respects to receive an immigrant visa, the consular officer may issue a nonimmigrant visa under the provisions of this section to the alien.

(Sec. 101, 84 Stat. 116; 8 U.S.C. 1101)

[Dept. Reg. 108.618, 35 FR 6124, Apr. 15, 1970, as amended by Dept. Reg. 108.670, 37 FR 14873, July 26, 1972]

Executives, Managers, and Specialists

§ 41.67 Executives, managers, and specialists (intracompany transferees).

(a) An alien shall be classifiable under the provisions of section 101(a)(15)(L) of the Act if –

(1) (i) He establishes to the satisfaction of the consular officer that he qualifies under the provisions of that section; and (ii) the consular officer shall have received a petition approved by the Immigration and Naturalization Service to accord such classification to the alien, or official notification of the approval thereof; or (iii) the alien shall have presented to the consular officer official confirmation of the approval of the petition to accord him such classification or of the extension of his period of authorized stay in such classification; or

(2) He establishes to the satisfaction of the consular officer that he is the spouse of child of an alien is so classified. The period of validity of a visa issued on the basis of such an approved petition or official notification or confirmation shall not exceed the period of validity or of authorized stay set forth therein. The approval of such a petition shall not, of itself, establish that the alien is eligible to receive a nonimmigrant visa.

(b) If a consular officer knows or has reason to believe that an alien applying for a visa under section 101(a)(15)(L) of the Act has not been continuously employed for 1 year by the same employer or an affiliate or subsidiary thereof, or has not been employed in a managerial or executive capacity, or does not posses specialized knowledge, as specified in the employer's petition approved by the Attorney General, he shall suspend action on the alien's application and submit a report to the approving office of the Immigration and Naturalization Service for whatever action appears to be warranted.

(Sec. 101, 84 Stat. 116; 8 U.S.C. 1101)

[Dept. Reg. 108.618, 35 FR 6125, Apr. 15, 1970, as amended by Dept. Reg. 108.644, 36 FR 19304, Oct. 2, 1971; 36 FR 20907, Oct. 13, 1971; Dept. Reg. 108.678, 37 FR 21637, Oct. 14, 1972]

Students—Vocational

§ 41.68 Students in established vocational or other recognized nonacademic institutions, other than in language training programs.

(a) An alien shall be classifiable as a nonimmigrant student under section 101(a)(15)(M)(i) of the Act upon establishing to the satisfaction of the consular officer that the provisions of that section have been met and that the alien:

(1) Will attend and has been accepted for attendance solely for the purpose of pursuing a full course of study (other than a language training program) by an established vocational or other recognized nonacademic institution in the United States which has been approved by the Attorney General for the purposes of section 101(a)(15)(M)(i) of the Act, as evidenced by the presentation of Form I-20M-N (Certificate of Eligibility) properly and completely filled out and signed by the alien and by a designated school official (the form I-20M, when properly executed and presented by an alien in support of an application for a student visa under this section, shall be accepted by the consular officer as prima facie evidence that the designated vocational or other recognized nonacademic institution which has issued the document has been approved by the Attorney General for the attendance of nonimmigrant students pursuant to section 101(a)(15)(M)(i) of the Act and that the visa applicant has been accepted for attendance at such institution);

(2) Is in possession of sufficient funds to cover expenses while in the United States or other arrangements have been made to provide for those expenses;

(3) Has sufficient knowledge of the English language to enable such an alien to undertake a full course of study in the accepting institution, or, if knowledge of the English language is inadequate to enable such alien to pursue a full course of study given in the English language, the accepting institution is equipped to offer, and (i) has accepted the alien expressly for a full course of study in a language with which the alien is sufficiently familiar, or (ii) will enroll the alien in courses of instruction in English incidental to principal instruction in vocational courses which, when taken together, will constitute a full course of study; and

(4) Intends in good faith and will be able to depart from the United States upon the termination of student status.

(b) An alien shall also be classifiable as a nonimmigrant under section 101(a)(15)(M)(ii) of the Act if it is established to the satisfaction of the consular officer that such alien qualifies under the provisions of that section and that the alien: (1) Is in possession of sufficient funds to cover expenses while in the United States, or that other arrangements have been made to provide for such expenses; and (2) intends in good faith and will be able to depart from the United States upon the termination of the status of the principal alien.

(Sec. 104, 66 Stat. 174 (8 U.S.C. 1104); sec. 1091(b)(1), 91 Stat. 847)

[Dept. Reg. 108.820, 47 FR 21777, May 20, 1982; 47 FR 24293, June 4, 1982]

NATO Aliens

§ 41.70 NATO representatives, officials and employees.

(a) (1) An alien shall be classifiable under the symbol NATO-1, NATO-2, NATO-3, NATO-4, or NATO-5 (see § 41.12 for classes of aliens entitled to classification under each symbol) if he establishes to the satisfaction of the consular officer that he is seeking admission to the United States under the applicable provision of the Agreement on the Status of the North Atlantic Treaty Organization, National Representatives and International Staff, or that he is a member of the immediate family of an alien classified under the symbol NATO-1, NATO-2, NATO-3, NATO-4, or NATO-5.

(2) Armed services personnel entering the United States in accordance with the provisions of the NATO Status-of-Forces Agreement or in accordance with the provisions of the

Protocol on the Status of International Military Headquarters may enter the United States under the appropriate treaty waiver of documentary requirements contained in § 41.5(d) or (e), but if issued visas shall be classifiable under the symbol NATO 3.

(3) Dependents of armed services personnel referred to in paragraph (a)(2) of this section shall be classifiable under the symbol NATO-2.

(b) An alien member of a civilian component accompanying a force entering in accordance with the provisions of the NATO Status-of-Forces Agreement, and his dependents, or an alien member of a civilian component attached to or employed by an Allied Headquarters under the Protocol on the Status of International Military Headquarters set up pursuant to the North Atlantic Treaty, and his dependents, shall be classified under the symbol NATO-6.

(c) An alien attendant, servant, or personal employee of an alien classified under the symbol NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, or NATO-6, and the members of the immediate family of such attendant, servant, or personal employee, shall be classifiable under the symbol NATO-7.

(5 U.S.C. 877, 1094)

[Dept. Reg. 108.433, 25 FR 4579, May 25, 1960]

CROSS REFERENCE: 1. For exemption from certain grounds for refusal of visas to NATO aliens, see § 41.91(c).

2. For exemption from passport validity requirement for certain NATO aliens, see § 41.91(f).

INELIGIBLE CLASSES OF NONIMMIGRANTS

§ 41.90 Basis for refusal.

A visa shall be refused only upon a ground specifically set out in the law or regulations issued thereunder. The term "reason to believe", as used in section 221(g) of the Act, shall be considered to require a determination based upon facts or circumstances which would lead a reasonable person to conclude that the applicant is ineligible to receive a nonimmigrant visa as provided in the Act and as implemented by the regulations contained in this part. Consideration shall be given to any evidence submitted indicating that the ground for a prior refusal of a nonimmigrant visa may no longer exist. The burden of proof is upon the applicant to establish that he is not ineligible to receive a visa as a nonimmigrant under the provisions of section 212 of the Act, or any other provision of law and § 41.91.

(Sec. 221, 66 Stat. 192, 8 U.S.C. 1201)

[Dept. Reg. 108.422, 24 FR 11081, Dec. 31, 1959]

§ 41.91 Aliens ineligible to receive visas.

(a) *Aliens ineligible under the provisions of section 212(a) of the Act.* Determinations relating to the ineligibility of aliens to receive nonimmigrant visas under section 212(a) of the Act shall be governed by the following provisions:

(1-6) *Medical grounds of ineligibility.* A finding of a medical examiner of the United States Public Health Service, a contract location physician, or of a panel physician designated by the Foreign Service establishment in whose jurisdiction examination is performed, with respect to the applicability of section 212(a) (1) through (6) of the Act shall be binding on the consular officer, except that the consular officer may refer for review to the appropriate office of the United States Public Health Service the finding of a contract location or panel physician in an individual case. In such case he may hold in abeyance his decision on the visa application pending the receipt of the review finding of the Public Health Service.

(7) *Physical defect affecting alien's ability to earn a living.* An alien within the purview of section 212(a)(7) of the Act may be issued a nonimmigrant visa, if otherwise qualified therefor, upon receipt by the consular officer of notice from the Immigration and Naturalization Service of the giving of a bond or undertaking as provided in section 221 (g) of the Act, if the consular officer is satisfied that the giving of such bond or undertaking removes the likelihood that the alien might become a public charge within the meaning of section 212(a)(15) of the Act.

(8) *Paupers, professional beggars, or vagrants.* The provisions of section

212(a) (8) shall be applicable only in the case of an alien who is at the time of visa application a pauper, professional beggar, or vagrant.

(9) *Crime involving moral turpitude.*

(i) A determination that a crime involves moral turpitude shall be based upon the moral standards generally prevailing in the United States. Before a finding of ineligibility under section 212 (a)(9) of the Act may be made because of an admission of the commission of acts which constitute the essential elements of a crime involving moral turpitude, it must first be established that the acts constitute a crime under the criminal law of the jurisdiction where they occurred.

(ii) An alien who has been convicted of a crime involving moral turpitude or who admits the commission of acts which constitute the essential elements of such a crime and who has committed an additional crime involving moral turpitude is ineligible to receive a visa under the provisions of section 212(a)(9) of the Act although the crimes were committed while the alien was under the age of eighteen years.

(iii) An alien shall not be ineligible to receive a visa under section 212(a)(9) of the Act by reason of having been tried and treated as a juvenile by a juvenile court for the commission of an offense involving moral turpitude provided the alien was under the age of eighteen years at the time the offense was committed. An alien convicted as an adult of a crime involving moral turpitude shall be subject to the provisions of section 212(a)(9) of the Act regardless of whether juvenile courts existed within the jurisdiction at the time of the conviction and regardless of whether he was under the age of eighteen years at the time the offense was committed.

(iv) A conviction *in absentia* of a crime involving moral turpitude shall not constitute a conviction within the meaning of section 212(a)(9) of the Act.

(v) An alien shall not be considered ineligible to receive a visa under section 212(a) (9) of the Act by reason of a conviction of a crime involving moral turpitude for which a full and unconditional pardon has been granted by the President of the United States, by the Governor of a State of the United States, by the former High Commissioner for Germany acting pursuant to Executive Order 10062, or by the United States Ambassador to the Federal Republic of Germany acting pursuant to Executive Order 10608. A legislative pardon or a pardon, amnesty, expungement of penal record or any other act of clemency granted by a foreign state shall not serve to remove a ground of ineligibility under section 212(a)(9) of the Act.

(vi) The term "purely political offense" as used in section 212(a)(9) of the Act shall include offenses which resulted in convictions obviously based on trumped-up charges or predicated upon repressive measures against racial, religious or political minorities.

(10) *Conviction of two or more offenses.* (i) An alien shall not be ineligible to receive a visa under section 212(a)(10) of the Act by reason of having been tried and treated as a juvenile by a juvenile court for the commission of two or more offenses regardless of the period of confinement imposed by the sentence provided the alien was under the age of eighteen years at the time the offenses were committed. An alien convicted as an adult of two or more offenses for which the aggregate sentences to confinement actually imposed were five years or more shall be subject to the provisions of section 212(a)(10) of the Act regardless of whether juvenile courts existed within the jurisdiction at the time of conviction and regardless of whether he was under the age of eighteen years at the time the offenses were committed.

(ii) A conviction or convictions in absentia of two or more offenses for which the aggregate sentences to confinement imposed were five years or more shall not constitute a conviction within the meaning of section 212(a)(10) of the Act.

(iii) An alien shall not be considered ineligible to receive a visa under section 212 (a)(10) of the Act by reason of having been convicted of two or more offenses for which the aggregate sentences to confinement actually imposed were five years or more if a full and unconditional pardon or pardons

for the offenses have been granted by the President of the United States, by the Governor of a State of the United States, by the former High Commissioner for Germany acting pursuant to Executive Order 10062, or by the United States Ambassador to the Federal Republic of Germany acting pursuant to Executive Order 10608. A legislative pardon or a pardon, amnesty, expungement of penal record or any other act of clemency granted by a foreign state shall not serve to remove a ground of ineligibility under section 212(a)(10) of the Act.

(iv) The term "purely political offense" as used in section 212(a)(10) of the Act shall include offenses which resulted in convictions obviously based on repressive measures against racial, religious or political minorities.

(v) A sentence to confinement which has been suspended by a court of competent jurisdiction is not one which has been "actually imposed" within the meaning of section 212(a)(10) of the Act.

(11) *Polygamy.* (Section 212(a)(11) of the Act inapplicable; Section 212 (d)(1)).

(12) *Prostitution, procuring and related activities.* (i) The term "prostitute" means a woman given to promiscuous sexual intercourse for hire. A finding that an alien has "engaged" in prostitution must be based on elements of continuity and regularity which would indicate a pattern of behavior or deliberate course of conduct entered into primarily for financial gain or for other considerations of material value as distinguished from the commission of casual or isolated acts.

(ii) The fact that an alien may have ceased to engage in prostitution shall not serve to remove the existing ground of ineligibility to receive a visa under the provisions of section 212(a)(12) of the Act.

(iii) A prostitute or a person who has engaged in prostitution shall be ineligible to receive a visa under section 212 (a)(12) of the Act notwithstanding the fact that prostitution may not be prohibited under the laws of the foreign country where the acts occurred.

(13) *Immoral sexual act.* An alien shall not be ineligible to receive a visa under section 212(a)(13) of the Act unless his primary purpose in coming to the United States is to engage in an immoral sexual act.

(14) *Aliens entering to perform skilled or unskilled labor.* (Section 212(a)(14) of the Act inapplicable).

(15) *Public charge.* (i) Any conclusion that an alien is ineligible to receive a nonimmigrant visa under the provisions of section 212(a)(15) of the Act shall be predicated upon circumstances which indicate that the alien will probably become a charge upon the public after entry into the United States.

(ii) An alien within the purview of section 212(a)(15) of the Act may be issued a nonimmigrant visa upon receipt of notice by the consular officer of the giving of a bond or undertaking, as provided in section 221(g) of the Act, if the consular officer is satisfied that the giving of such bond or undertaking removes the alien's ineligibility to receive a visa under this section of the law.

(16) *Aliens excluded and deported.* An alien who was excluded and deported from the United States within the meaning of section 212(a)(16) of the Act shall not be issued a visa within one year from the date of his deportation unless he has obtained permission from the Immigration and Naturalization Service to reapply for admission.

(17) *Aliens arrested and deported or removed from the United States.* An alien who was arrested and deported from the United States, or who was removed from the United States within the meaning of section 212(a)(17) of the Act shall be required to obtain permission from the Immigration and Naturalization Service to reapply for admission into the United States before a visa may be issued, regardless of the period of time which may have elapsed since his deportation or removal.

(18) *Stowaways.* (Section 212(a)(18) of the Act inapplicable at time of visa application.)

(19) *Fraud and misrepresentation.* (i) An alien who seeks to procure, or has sought to procure, or has procured a visa or other documentation for entry into the United States by fraud or by willfully misrepresenting a material fact, regardless of whether such fraud or misrepresentation occurred before or after December 24, 1952, shall be ineligible to receive a visa under the provisions of section 212(a)(19) of the Act: *Provided,* That the provisions of this subdivision shall not be applicable if the fraud or misrepresentation was committed by an alien at the time he sought entry into a country other than the United States or obtained travel documents as a bona fide refugee and the refugee was in fear of being repatriated to his former homeland if he had disclosed the facts in his case in connection with his application for a visa to enter the United States: *Provided further,* That the fraud or misrepresentation was not committed by such refugee for the purpose of evading the quota or numerical restrictions of the U.S. immigration laws, or investigation of the alien's record at the place of his former residence or elsewhere in connection with an application for a visa.

(ii) Subject to the conditions stated in paragraph (a)(19)(i) of this section, an alien who is found by the consular officer to have made a willful misrepresentation within the meaning of section 10 of the Displaced Persons Act of 1948, as amended, for the purpose of gaining admission into the United States as an eligible displaced person, or to have made a material misrepresentation within the meaning of section 11(e) of the Refugee Relief Act of 1953, as amended, for the purpose of gaining admission into the United States as an alien eligible thereunder, shall be considered ineligible to receive a visa under the provisions of section 212(a)(19) of the Act.

(iii) The commission of fraud or the willful misrepresentation of a material fact in seeking to enter the United States as distinguished from fraud or misrepresentation in connection with the procurement, or attempt to procure, documents for entry, shall not render an alien ineligible to receive a visa under the provisions of section 212(a)(19) of the Act. (6 I. & N. Dec. 140, approved by the Attorney General 9-13-54.)

(20) *Immigrant documentary requirements.* (Section 212(a)(20) of the Act inapplicable.)

(21) *Non-compliance with section 203 of the Act.* (Section 212(a)(21) of the Act inapplicable.)

(22) *Aliens ineligible to citizenship, or who departed to avoid service in the Armed Forces.* An alien shall be refused a nonimmigrant visa under the provisions of section 212(a)(22) of the Act if, having other than nonimmigrant status, he departed from or remained outside of the United States on or after September 8, 1939 to avoid or evade training or service in the United States Armed Forces.

(23) *Narcotics traffickers.* Any alien shall be ineligible to receive a nonimmigrant visa under the provisions of section 212(a)(23) of the Act, as amended, irrespective of whether the conviction for illegal possession of narcotic drugs or marijuana or for conspiracy to violate any law or regulation within the contemplation of the Narcotic Control Act of 1956 occurred before or after July 18, 1956.

(24) *Aliens arriving in foreign contiguous territory or adjacent islands on nonsignatory transportation lines.* The provisions of section 212(a)(24) of the Act shall not render an alien ineligible to receive a nonimmigrant visa inasmuch as the Attorney General upon the recommendation of the Secretary of State has waived this ground of ineligibility for nonimmigrants under the authority contained in section 212(d)(3)(A) of the Act.

(25) *Illiterates.* (Section 212(a)(25) of the Act inapplicable: Section 212(d)(1).)

(26) *Nonimmigrant documentary requirements.* (i) A passport which is valid indefinitely for the return of the bearer to the country whose government issued such passport shall be deemed to have the required minimum period of validity as specified in section 212(a)(26) of the Act.

(ii) A crew-list visa issued in accordance with § 41.127 is considered to constitute a valid nonimmigrant visa within the meaning of section 212(a)(26)(ii) of the Act.

Cross Reference: For waivers of and exemptions from documentary requirements see §§ 41.5, 41.6, and 41.91(d).

(27) *Prejudicial activities.* (Reserved)

(28) *Members or affiliates of proscribed organizations.* (i) The term "affiliate", as used in sections 212(a)(28)(C) and (I) of the Act, shall mean an organization which is related to, or identified with, a proscribed association or party, including any section, subsidiary, branch, or subdivision thereof, in such close association as to evidence an adherence to or a furtherance of the purposes and objectives of such association or party, or as to indicate a working alliance to bring to fruition the purposes and objectives of the proscribed association or party. An organization which gives, loans, or promises support, money, or other things of value for any purpose to any proscribed association or party shall be presumed to be an "affiliate" of such association or party, but nothing contained in this subdivision shall be construed as an exclusive definition of the term "affiliate."

(ii) Service, whether voluntary or not, in the armed forces of any country shall not be regarded, of itself, as constituting or establishing an alien's membership in, or affiliation with, any proscribed party or organization, and shall not, of itself, constitute a ground of ineligibility to receive a visa.

(iii) Voluntary service in a political capacity shall constitute affiliation with the political party or organization in power at the time of such service.

(iv) If an alien continues or continued his membership in or affiliation with a proscribed organization on or after reaching sixteen years of age, only his activities after reaching that age shall be pertinent to a determination whether the continuation of his membership or affiliation is or was voluntary.

(v) The term "operation of law", as used in section 212(a)(28)(I) of the Act, shall include any case wherein the alien without his acquiescence automatically became a member of or affiliated with a proscribed party or organization by official act, proclamation, order, edict, or decree.

(vi) In accordance with the definition of "totalitarian party" contained in section 101(a)(37) of the Act, a former or present voluntary member of, or an alien who was, or is, voluntarily affiliated with a nonCommunist party, organization, or group, or of any section, subsidiary, branch, affiliate or subdivision thereof, which during the time of its existence did not or does not advocate the establishment in the United States of a totalitarian dictatorship, shall not be considered ineligible under the provisions of section 212(a)(28)(C) of the Act to receive a visa, unless the alien is known or believed by the consular officer to advocate, or to have advocated, personally, the establishment in the United States of a totalitarian dictatorship, within the meaning of section 212(a)(28)(D) of the Act.

(vii) The words "actively opposed", as used in section 212(a)(28)(I)(ii) of the Act, shall be considered as embracing speeches, writings, and other overt or covert activities in opposition to the doctrine, program, principles, and ideology of the party or organization, or the section, subsidiary, branch, or affiliate or subdivision thereof, of which the alien was formerly a voluntary member.

(29) *Espionage, sabotage, or other subversive activities.* [Reserved]

(30) *Alien accompanying excludable alien.* (Section 212(a)(30) of the Act inapplicable.)

(31) *Alien aiding illegal entrant.* [Reserved]

(b) *Aliens unable to establish nonimmigrant status.* (1) A nonimmigrant visa shall not be issued to an alien who has failed to overcome the presumption of immigrant status established by section 214(b) of the Act. An alien shall be considered to have established bona fide nonimmigrant status only if the consular officer is satisfied that his case falls within one of the nonimmigrant categories described in section 101(a)(15) of the Act or otherwise established by law or treaty.

(2) Consular officers are authorized in borderline cases under sections 101(a)(15) (D) and (P) to require the posting of a bond with the Attorney General. (See §§ 41.25 (a)(1) and 41.45(a)(4).)

(c) *Failure of application to comply with Act.* (1) An alien's visa application shall be considered as failing to comply with the provisions of the act or the regulations issued thereunder if: (i) The applicant fails to furnish the information to be included in such application as required by the Act or the regulations contained in this part;

(ii) The application contains a false or incorrect statement other than one which would constitute a ground of ineligibility under section 212(a)(19) or (19) of the Act;

(iii) The application is not supported by the documents required under the provisions of the Act or the regulations contained in this part;

(iv) The applicant refuses to be fingerprinted if required by the Act or the regulations contained in this part;

(v) The necessary fee is not paid for the issuance of a nonimmigrant visa; or

(vi) The application otherwise fails to meet the specific requirements of the Act for reasons for which the applicant is responsible.

(2) The grounds of refusal described in paragraph (c)(1) of this section shall not constitute a bar to the reconsideration of the application upon compliance with statutory or regulatory requirements, or to the consideration of a subsequent application submitted by the same applicant.

(d) *Former exchange visitors.* An alien who was admitted into the United States as an exchange visitor or who acquired such status after admission, who is within the purview of section 212(e) of the Immigration and Nationality Act as amended by the Act of April 7, 1970 (84 Stat. 116), shall not be eligible to apply for and receive a nonimmigrant visa under section 101(a)(15) (H) or (L) of the Act, notwithstanding the approval of a petition as provided in section 214(c) of the Act, unless

(1) It has been established that the alien has resided and has been physically present abroad in the country his nationality or last residence for an aggregate of at least 2 years following the termination of his exchange visitor status as required by section 212(e) of the Act, or

(2) The foreign residence requirement of section 212(e) of the Act has been waived by the Attorney General in his behalf.

(e) *Grounds for refusal of visas applicable to certain nonimmigrant classes.* (1) No visa may be issued in the A 1 or A 2 category to an alien who is considered by the Department to be persona non grata.

(2) Only those provisions of section 212(a) of the Act which are stated specifically with reference to each class apply to the following classes of nonimmigrants: (i) Class A 1: Section 212(a)(27) upon the direction of the President and the issuance of appropriate rules and regulations; (ii) Class A 2: Section 212(a) (27) and (29); (iii) Class C 2: Section 212(a)(26)(A), (27), (28) and (29); (iv) Class C 3: Section 212(a)(26)(A), (27) and (29); (v) Class G 1: Section 212(a)(27); (vi) Classes G 2, G 3, and G 4: Section 212(a) (27) and (29); (vii) Class B TO 1: Section 212(a)(27); (viii) Classes NATO 2, NATO 3, NATO 4 and NATO 6: Section 212(a) (27) and (29).

(3) An alien within class A 3 or G 5 shall be subject to all grounds of refusal specified in section 212 of the Act which are applicable to nonimmigrants in general except paragraph (28) of subsection (a) of that section.

(f) *Exception from passport validity requirement for certain nonimmigrants.* A nonimmigrant alien in whose case the passport requirement of section 212(a)(26) has not been waived and

(1) Who is within one of the classes of nonimmigrants described in section 101(a)(15)(A) (i) and (ii) of the Act, or

(2) Who is within one of the classes of nonimmigrants described in section 101(a)(15) (G)(i), (ii), (iii), and (iv) of the Act, or

(3) Who is within a class of nonimmigrants classifiable under the visa symbol NATO 1, NATO 2, NATO 3, NATO 4, or NATO 6, shall present a passport which is valid for a sufficient period to enable the alien to apply for admission at a port of entry prior to its expiration.

(Sec. 17, 79 Stat. 919; 8 U.S.C. 1201)

[Dept. Reg. 108.411, 24 FR 6670, Aug. 18, 1959]

Editorial Note: For Federal Register citations affecting § 41.91, see the List of CFR Sections Affected in the Finding Aids section of this volume.

Cross Reference: For validity period of passport for alien classifiable under section 212(d)(8) of the Act, see § 41.64(c)(2).

Temporary Admission of Ineligible Aliens

§ 41.95 Procedure in recommending temporary admission of ineligible aliens.

(a) Except as provided in paragraph (b) of this section, a consular officer may, upon his own initiative, and shall, upon the request of the Secretary of State or upon the request of the alien, submit a report to the Department for possible transmission to the Attorney General pursuant to the provisions of section 212(d)(3)(A) of the Act in the case of an alien who is classifiable as a nonimmigrant but who is known or believed by the consular officer to be ineligible to receive a nonimmigrant visa under the provisions of section 212(a) of the Act, other than paragraph (27) or (29).

(b) A consular officer may, in certain categories defined by the Secretary of State, recommend directly to designated immigration officers that an alien's temporary admission be authorized under the provisions of section 212(d)(3)(A) of the Act.

(c) When the Attorney General authorizes the temporary admission of an ineligible alien as a nonimmigrant and the consular officer is so informed, the consular officer may proceed with the issuance of a nonimmigrant visa to the alien, subject to the conditions imposed by the Attorney General.

(Sec. 212, 66 Stat. 182; 8 U.S.C. 1182)

[Dept. Reg. 108.48, 28 FR 274, Jan. 10, 1963]

Types of Nonimmigrant Visas

§ 41.100 Regular, diplomatic and official visas.

A nonimmigrant visa of any classification shall be issued as a regular nonimmigrant visa unless the alien falls within one of the classes entitled to a diplomatic or official visa as described in §§ 41.102 and 41.104.

[Dept. Reg. 108.411, 24 FR 6687, Aug. 18, 1959]

§ 41.102 Classes of aliens eligible to receive diplomatic visas.

(a) A nonimmigrant alien who is in possession of a diplomatic passport or its equivalent shall, if otherwise qualified, be eligible to receive a diplomatic visa irrespective of his classification under § 41.12 if he is within one of the following classes:

(1) Heads of States and their alternates;

(2) Members of a reigning royal family;

(3) Governors-general, governors, high commissioners, and similar high administrative or executive officers of a territorial unit, and their alternates;

(4) Cabinet ministers and their assistants holding executive or administrative positions not inferior to that of the head of a departmental division, and their alternates;

(5) Presiding officers of chambers of national legislative bodies;

(6) Justices of the highest national court of a foreign country;

(7) Ambassadors, public ministers, other officers of the diplomatic service and consular officers of career;

(8) Military officers holding a rank not inferior to that of a brigadier general in the U.S. Army or Air Force and Naval officers holding a rank not inferior to that of a rear admiral in the U.S. Navy;

(9) Military, naval, air and other attaches and assistant attaches assigned to a foreign diplomatic mission;

(10) Officers of foreign-government delegations to international organizations so designated by executive order;

(11) Officers of foreign-government delegations to, and officers of, international bodies of an official nature, other than international organizations so designated by executive order;

(12) Officers of a diplomatic mission of a temporary character proceeding to or through the United States in the performance of their official duties;

(13) Officers of foreign-government delegations proceeding to or from a specific international conference of an official nature;

(14) Members of the immediate family of a principal alien who is within one of the classes described in paragraphs (a) (1) to (11) inclusive, of this section;

(15) Members of the immediate family accompanying or following to join the principal alien who is within one of the classes described in paragraphs (a) (12) and (13) of this section;

(16) Diplomatic couriers proceeding to or through the United States in the performance of their official duties.

(b) A nonimmigrant alien who is classifiable under section 101(a)(15)(G)(iv) shall, if otherwise qualified, be eligible to receive a diplomatic visa if he is—

(1) The Secretary General of the United Nations;

(2) An Under Secretary General of the United Nations;

(3) An Assistant Secretary General of the United Nations;

(4) The Administrator or the Deputy Administrator of the United Nations Development Program;

(5) An Assistant Administrator of the United Nations Development Program;

(6) The Executive Director of the—

(i) United Nations Children's Fund;

(ii) United Nations Institute for Training and Research;

(iii) United Nations Industrial Development Organization.

(7) The Executive Secretary of the—

(i) United Nations Economic Commission for Africa;

(ii) United Nations Economic Commission for Asia and the Far East;

(iii) United Nations Economic Commission for Latin America;

(v) United Nations Economic Commission for Europe.

(8) The Secretary General of the United Nations Conference on Trade and Development;

(9) The Director General of the Latin American Institute for Economic and Social Planning;

(10) The United Nations High Commissioner for Refugees;

(11) The United Nations Commissioner for Technical Co-operation;

(12) The Commissioner General of the United Nations Relief and Works Agency for Palestine Refugees in the Near East.

(13) The spouse or child of any nonimmigrant alien listed in paragraphs (b) (1) through (12) of this section.

(c) Any other individual alien or class of aliens shall, if otherwise qualified, be eligible to receive a diplomatic visa upon the authorization of the Department, the Chief of a United States Diplomatic Mission, the Deputy Chief of Mission, the Counselor for Consular Affairs or the principal officer of a consular post not under the jurisdiction of a diplomatic mission.

[Dept. Reg. 108.633, 36 FR 4097, Mar. 11, 1971, as amended by Dept. Reg. 108.653, 37 FR 2139, Feb. 1, 1972; 37 FR 3051, Feb. 11, 1972]

§ 41.104 Classes of aliens eligible to receive official visas.

A nonimmigrant within one of the following categories shall, if otherwise qualified, be eligible to receive an official visa irrespective of his classification under § 41.12:

(a) An alien within one of the following classes who is not eligible to receive a diplomatic visa:

(1) Aliens within a class described in § 41.102(a) who are ineligible to receive a diplomatic visa because they are not in possession of a diplomatic passport or its equivalent.

(2) Aliens classifiable under section 101(a)(15)(A) of the Act;

(3) Aliens, other than those described in § 41.102(b), who are classifiable under section 101(a)(15)(C) of the Act, except those classifiable under section 101(a)(15)(C)(iii) of the Act unless the government of which the alien is an accredited representative is recognized de jure by the United States;

(4) Aliens classifiable under section 101(a)(15)(C) of the Act as nonimmigrants described in section 212(d)(8) of the Act;

(5) Members and members-elect of national legislative bodies.

(6) Justices of the lesser national and the highest state courts of a foreign country;

(7) Officers and employees of national legislative bodies proceeding to or through the United States in the performance of their official duties;

(8) Clerical and custodial employees attached to foreign-government delegations to, and employees of, international bodies of an official nature,

other than international organizations so designated by executive order, proceeding to or through the United States in the performance of their official duties;

(9) Clerical and custodial employees attached to a diplomatic mission of a temporary character proceeding to or through the United States in the performance of their official duties;

(10) Clerical and custodial employees attached to foreign government delegations proceeding to or from a specific international conference of an official nature;

(11) Officers and employees of foreign governments recognized de jure by the United States who are stationed in foreign contiguous territories or adjacent islands;

(12) Members of the immediate family, attendants, servants and personal employees of, when accompanying or following to join, a principal alien who is within one of the classes referred to or described in paragraphs (a) (1) to (11) inclusive of this section;

(13) Attendants, servants and personal employees accompanying or following to join a principal alien who is within one of the classes referred to or described in § 41.102(a) (1) to (13) inclusive;

(b) Any other individual alien or class of aliens for whom the acceptance of an application for an official visa has been authorized by the Department or by the Chief of a United States Diplomatic Mission, the Deputy Chief of Mission, the Counselor for Consular Affairs, or the principal officer at a consular post not under the jurisdiction of a diplomatic mission.

(Dept. Reg. 108.411, 24 FR 6687, Aug. 18, 1959, as amended by Dept. Reg. 108.433, 25 FR 4579, May 25, 1960; Dept. Reg. 108.633, 36 FR 4698, Mar. 11, 1971, 36 FR 5040, Mar. 17, 1971)

Application for Nonimmigrant Visas

§ 41.110 Place of application.

(a) *Applications for regular and official visas.* With the exception of certain aliens who are in the United States who may be issued nonimmigrant visas under the provisions of § 41.120, every alien applying for a regular or official visa shall make application to the consular officer in the consular district in which he has as his residence, except that a consular officer shall at the direction of the Department, or may in his discretion, accept an application for a nonimmigrant visa from an alien having no residence in the consular district if the alien is physically present therein.

(b) *Applications for diplomatic visas.* Application for a diplomatic visa shall be made at a diplomatic mission or at a consular office authorized to issue diplomatic visas, regardless of the nationality or residence of the applicant.

(Dept. Reg. 108.411, 24 FR 6687, Aug. 18, 1959, as amended by Dept. Reg. 108.422, 24 FR 11082, Dec. 31, 1959)

Cross Reference: For applications for crew-list visas see § 41.127(b).

§ 41.111 Supporting documents.

(a) *Authority to require documents and consideration accorded.* The consular officer shall have authority to require such documents as he may consider necessary to establish the alien's eligibility to receive a nonimmigrant visa. All such documents submitted and any other evidence adduced by the alien shall be given consideration by the consular officer, including briefs submitted by attorneys or other representatives.

(b) *Unobtainable documents.* In the event an alien establishes to the satisfaction of the consular officer that any document or record required under the authority of this section is unobtainable, the consular officer may accept in lieu of such document or record, other satisfactory evidence of the fact to which the document or record would, if obtainable, pertain. A document or other record shall be considered "unobtainable" if it cannot be procured without causing the applicant or a member of his family actual hardship other than normal delay and inconvenience.

(c) *Photographs.* Except as otherwise provided in this paragraph, every alien shall furnish with his application identical photographs of himself in such number as may be required in the discretion of the consular officer. The photographs shall reflect a reasonable likeness of the alien as of the time they are furnished, and shall be 1½ by 1½ inches in size, unmounted, without head covering, have a light background, and clearly show a full front view of the facial features of the alien. The reverse of each copy of the photograph shall be signed by the person executing the application (see § 41.115(a)) with the full name of the applicant. The photograph requirement may be waived, in the discretion of the consular officer, in the case of any alien who is (1) within a class of nonimmigrants described in sections 101(a)(15)(A), 101(a)(15)(G) or 212(d)(8) of the Act, (2) within a class of nonimmigrants classifiable under the visa symbol NATO-1 through NATO-7, (3) an applicant for a diplomatic visa, (4) an applicant for an official visa, or (5) under sixteen years of age. A notation of any such waiver shall be made in the space provided in the application form for the alien's photograph. A new photograph need not be required, in the discretion of the consular officer, if there is on file at the consular office a photograph which was submitted in connection with a prior nonimmigrant visa application and which still reflects a reasonable likeness of the applicant.

(d) *Police certificates.* (1) An alien shall be required to present a police certificate if the consular officer has reason to believe that he may have a police or criminal record, except that no police certificate shall be required in the case of an alien who is (i) within a class of nonimmigrants described in section 101(a)(15)(A) (i) or (ii), or section 101(a)(15)(G) (i), (ii), (iii), or (iv), or section 212(d)(8), of the Act, or (ii) within a class of nonimmigrants classifiable under the visa symbol NATO-1, NATO-2, NATO-3, NATO-4, or NATO-6.

(2) A police certificate is a certification by the police or other appropriate authorities stating what, if anything, their records show concerning the alie

(Sec. 2.2, 60 Stat. 193; 8 U.S.C. 1202)

(Dept. Reg. 108.411, 24 FR 6687, Aug. 18, 1959, 24 FR 6943, Aug. 27, 1959, as amended by Dept. Reg. 108.433, 25 FR 4579, May 25, 1960; Dept. Reg. 108.495, 28 FR 5375, May 30, 1963)

§ 41.112 Passports.

(a) *Passport requirement.* Except for certain persons in the A, C 3, G and NATO categories and persons for whom the passport requirement has been waived pursuant to the provisions of section 212(d)(4) of the Act, every applicant for a nonimmigrant visa shall present a passport as defined in section 101(a)(30) of the Act and § 41.1 which is valid for the period required by section 212(a)(26) of the Act.

(b) *Aliens included in a single passport.* The passport requirement referred to under paragraph (a) of this section may be met by the presentation of a passport including more than one person if such inclusion is authorized under the laws or regulations of the issuing authority and if a photograph of each person sixteen years of age or over to whom a visa is to be issued shall have been attached to the passport by the issuing authority.

(c) *Applicants for diplomatic visas.* Every applicant for a diplomatic visa shall be required to present a diplomatic passport, or the equivalent thereof, having the period of validity indicated in paragraph (a) of this section, unless such requirement has been waived pursuant to the authority contained in section 212(d)(4) of the Act or unless the case falls within the provisions of § 41.91(f).

(Dept. Reg. 108.422, 24 FR 11082, Dec. 31, 1959, Dept. Reg. 108.433, 25 FR 4579, May 25, 1960; Dept. Reg. 108.441, 25 FR 7019, July 23, 1960)

§ 41.113 Medical examination.

(a) An alien shall be required to be medically examined if (1) he is an applicant for a nonimmigrant visa as a fiancee or fiance of a U.S. citizen, or as the child of such applicant, or (2) the consular officer has reason to believe that a medical examination is advisable or that it would disclose that the alien is medically ineligible to receive a visa.

(b) At consular offices where medical officers of the United States Public Health Service are on duty, the alien's examination shall be conducted by such officers. If a medical officer of the United States Public Health Service is not available, the required exam

lination shall be conducted by a contract location physician or by a physician selected by the alien from a panel of physicians approved by the consular officer.

(c) A consular officer shall not include the name of a physician on the panel of physicians referred to in paragraph (b) of this section unless such physician has facilities to perform required serological and X-ray tests or is in a position to refer applicants to a qualified laboratory for such tests.

(Sec. 221, 66 Stat. 191, 8 U.S.C. 1201)

[Dept. Reg. 108.504, 29 FR 2763, Feb. 26, 1964, as amended by Dept. Reg. 108.670, 37 FR 14873, July 26, 1972; Dept. Reg. 108.684, 38 FR 4577, Feb. 16, 1973]

§ 41.111 Personal appearance.

(a) Except as otherwise provided in this section, every alien seeking a nonimmigrant visa shall be required to apply in person before a consular officer. The requirement of personal appearance may be waived in the discretion of the consular officer in the case of any alien who is:

(1) A child under 14 years of age,

(2) Within a class of nonimmigrants classifiable under the visa symbols A-1, A-2, A-3, C-2, C-3, G-1, G-2, G-3, G-4, G-5, NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, NATO-6, or NATO-7,

(3) An applicant for a diplomatic or official visa,

(4) An applicant for a nonimmigrant visa under the provisions of section 101(a)(15)(I) of the Act,

(5) Within a class of nonimmigrants classifiable under the visa symbols C-1, E-1, or I,

(6) Within a class of nonimmigrants classifiable under the visa symbol J-1, who qualifies as a leader in a field of specialized knowledge or skill and who is the recipient of a U.S. Government grant, and the spouse and children of such an alien who qualify for J-2 classification,

(7) An airman applying for a nonimmigrant visa under the provisions of section 101(a)(15)(D) of the Act if the application is supported by a letter from the employing carrier certifying that the applicant is employed as an airman and the consular officer is satisfied in the individual case that the personal appearance of the alien is not necessary to a determination of his eligibility to receive a visa, or,

(8) A nonimmigrant in any category in whose case the responsible consular officer determines that a waiver of personal appearance in the individual case is warranted in the national interest or because of unusual circumstances, including hardship to the visa applicant.

(b) In the categories described in paragraphs (a) (2) and (3) of this section the filing of a visa application by the applicant may be waived in the discretion of the consular officer. In cases in which personal appearance is waived pursuant to paragraph (a)(8) of this section the filing of a visa application by the applicant may be waived in the discretion of the consular officer in hardship, emergency or national interest cases. In any case in which personal appearance is waived pursuant to any other subparagraph of paragraph (a) of this section, application for a visa shall be made on Form OF-156 as determined to be appropriate by the consular officer.

[Dept. Reg. 108.540, 31 FR 13080, Oct. 6, 1966, as amended by Dept. Reg. 108.506, 33 FR 7369, May 24, 1968; Dept. Reg. 108-739, 42 FR 32535, June 27, 1977]

§ 41.115 Application forms.

(a) *Aliens required to execute applications.* Every alien applying for a nonimmigrant visa shall make application therefor on Form OF-156, unless personal appearance is waived and submission of the application form by the applicant is not required pursuant to 22 CFR 41.114(b) or unless there is a Form OF-156 available at the consular office which can be appropriately amended to bring the application up to date. In cases in which the filing of the visa application is waived, the consular officer shall prepare a Form OF-156 on behalf of the applicant from the data available in the passport or other documents submitted. In the case of an alien under 16 years of age, or one physically incapable of making an application, the application may be made by the alien's parent or guardian, or, if the alien has no parent or guardian, by any person having legal custody of, or a legitimate interest in, the alien.

(b) *Additional information as part of application.* In any case in which the consular officer believes that the information provided in Form OF-156 is inadequate to determine the alien's eligibility to receive a nonimmigrant visa he may require the submission of such additional information as may be necessary or interrogate the alien on any matter which is deemed material. Any additional statements made by the alien shall become a part of the visa application. All documents required under the authority of § 41.111(a) shall be considered papers submitted with the alien's application within the meaning of section 221(g)(1) of the Act.

[Dept. Reg. 108.472, 26 FR 10051, Oct. 26, 1961, as amended by Dept. Reg. 108.540, 31 FR 13080, Oct. 6, 1966; Dept. Reg. 108.739, 42 FR 32535, June 27, 1977]

§ 41.116 Registration and fingerprinting.

(a) *Registration.* Form OF-156, when properly completed, shall constitute the alien's registration record for the purposes of section 221(b) of the Act.

(b) *Fingerprinting.* (1) The provisions of section 221(b) of the Act which require the fingerprinting of aliens in connection with their applications for visas are waived in pursuance of the authority contained therein for the nonimmigrant classes specified in paragraph (b)(1)(i) of this section, and in pursuance of the authority contained in section 8 of the Act of September 11, 1957 (71 Stat. 641; U.S.C. 1201(a) for the nonimmigrant classes specified in paragraph (b)(1)(ii) of this section: (i) an alien who is within a class of nonimmigrants enumerated in section 101(a)(15)(A) and section 101(a)(15)(G) of the Act, or an alien who is granted a diplomatic visa on a diplomatic passport or on the equivalent thereof (see § 41.1); (ii) an alien who is a national of a country whose government does not require fingerprinting in connection with an application for, or the issuance of, a visa to a national of the United States who intends to proceed to such country for a similar purpose, and who is classifiable as a nonimmigrant under the provisions of section 101(a)(15)(B), (C), (D), (E), (F), (H), (I), (J), (K), or (L) of the Act, including a nonimmigrant alien who is classifiable under the visa symbol NATO 1, NATO 2, NATO 3, NATO 4, NATO 5, NATO 6, or NATO 7.

(2) In the case of any nonimmigrant alien who is not exempted from the fingerprinting requirement under the provisions of this section, the fingerprints of such alien shall be taken in connection with his application for a nonimmigrant visa on Form AR 4 (Alien Registration Fingerprint Card) or in such other manner as may be authorized by the Department.

(3) An alien may be required by the consular officer, when he makes preliminary or informal application for a visa, to have a set of his fingerprints taken on Form AR-4 in the event such procedure is considered necessary for the purpose of identification, or investigation. Consular officers may, where necessary, use the fingerprint card in order to ascertain from the appropriate local or any other authorities whether they have any pertinent information concerning the applicant's eligibility to receive a visa.

[Dept. Reg. 108.411, 24 FR 6648, Aug. 18, 1959, 24 FR 6943, Aug. 27, 1959, as amended by Dept. Reg. 108.488, 28 FR 275, Jan. 10, 1963; Dept. Reg. 108.616, 35 FR 6125, Apr. 4, 1970; Dept. Reg. 108.739, 42 FR 32536, June 27, 1977]

§ 41.117 Signature.

When personal appearance is required, Form OF-156 shall be signed and verified by or on behalf of the applicant in the presence of the consular officer. If personal appearance is waived, and the submission of an application form by the alien is required, the form shall be signed by the applicant. If the filing of an application form is also waived, the consular officer shall so indicate on the Form OF-156 prepared on behalf of the applicant. The consular officer shall, in every instance, write his initials over or adjacent to his name and title stamp on the Form OF-156.

[Dept. Reg. 108.571, 32 FR 16098, Nov. 23, 1967, as amended by Dept. Reg. 108.739, 42 FR 32536, June 27, 1977]

Issuance of Nonimmigrant Visas

§ 41.120 Authority to issue visas.

(a) *Issuance outside the United States.* Any consular officer is authorized to issue regular and official visas. Diplomatic visas may be issued only by—

(1) A consular officer attached to a United States Diplomatic Mission, if he is authorized to do so by the Chief of the Mission, or

(2) A consular officer assigned to a consular office, if so authorized by the Department or by the Chief, the Deputy Chief, or the Counselor for Consular Affairs of the United States Diplomatic Mission in the country in which such consular office is located or, at a consular post not under the jurisdiction of a diplomatic mission, by the principal officer.

(b) *Issuance in the United States in certain cases.* The Director of the Visa Office of the Department and such other officers of the Department as he may designate are authorized, in their discretion, to issue nonimmigrant visas to—

(1) Qualified aliens classifiable under the visa symbol C-2 or C-3;

(2) Other qualified aliens who—

(i) Are properly classifiable under sub-paragraph (A) or (G) of section 101(a)(15) of the Act or under the visa symbols NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, NATO-6, or NATO-7;

(ii) Present appropriate evidence that—

(a) They have been lawfully admitted to the United States in such status or have, after admission, had their status changed to such status;

(b) Their period of authorized stay in such status has not expired; and

(c) They are currently maintaining such status; and

(iii) Intend, after a temporary absence, to reenter the United States in such status.

[Dept. Reg. 108.638, 36 FR 12160, June 26, 1971, as amended by Dept. Reg. 108.695, 39 FR 2480, Jan. 22, 1974]

§ 41.121 Visa fees.

(a) Unless on a basis of reciprocity no fee is chargeable, the fees for the issuance of visas, including official visas, to nonimmigrant nationals or stateless residents of each foreign country shall be collected in the amounts prescribed by the Secretary of State. If practicable, fees will correspond to the total of all visa, entry, residence, or other similar fees, taxes or charges assessed or levied against nationals of the United States by the foreign countries of which such nonimmigrants are nationals or stateless residents.

(b) *Aliens exempted from fees.* Upon a basis of reciprocity, or as provided in section 13(a) of the Headquarters Agreement with the United Nations (61 Stat. 756; 22 U.S.C. 287, Note), no fee shall be collected for the issuance of a nonimmigrant visa to an alien of any of the following classes: (1) Nonimmigrants described in section 101(a)(15)(A) of the Act; (2) nonimmigrants described in section 101(a)(15)(G) of the Act; (3) nonimmigrants described in section 212(d)(8) of the Act; (4) persons entitled to pass in transit to the United Nations Headquarters District under the provisions of paragraph (3), (4) or (5) of section 11 of the Headquarters Agreement and who are issued C-2 visas as nonimmigrants under the provisions of section 101(a)(15)(C) of the Act; (5) nonimmigrants who are classifiable under the visa symbol NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, NATO-6, and NATO-7; and (6) nonimmigrants who are issued diplomatic visas.

(c) *Refund of fees.* A fee collected for the issuance or revalidation of a nonimmigrant visa is refundable only when the principal officer at a post or the officer in charge of a consular section determines that the visa was issued in error or could not be used as a result of action by the United States Government over which the alien had no control and for which he was not responsible.

(Sec. 281, 60 Stat. 230, 8 U.S.C. 1351)

[Dept. Reg. 108.411, 24 FR 6689, Aug. 18, 1959; 24 FR 6943, Aug. 27, 1959, as amended by Dept. Reg. 108.402, 28 FR 3261, Apr. 4, 1963 Reg. 108.507, 33 FR 16445, Nov. 9, 1968]

Cross References: For fee to be collected when more than one alien included in single visa see § 41.123.

For fee for revalidated or transferred visa see §§ 41.125(f) and 41.126(d).

For fee for crew-list visa see § 41.127(e).

§ 41.122 Validity, termination and replacement of visas.

(a) *Validity of visa not related to period of stay in the United States.* The period of validity of a nonimmigrant visa shall have no relation to the period of time the alien may be authorized by the immigration authorities to stay in the United States if, upon his arrival at a port of entry, he is admitted by those authorities.

(b) *Validity of visa pertains to period within which alien may apply for admission.* The period of validity of a nonimmigrant visa shall relate only to the period during which the alien to whom the visa was issued may use it in making application for admission into the United States.

(c) *Validity of visa and number of applications for admission.* Except as provided in paragraph (d) of this section a nonimmigrant visa shall have the validity prescribed in schedules made available to consular officers by the Department, which reflect, as nearly as practicable, the reciprocal treatment accorded U.S. nationals by the government of the country of which the alien is a national or stateless resident. Nonimmigrant visas issued pursuant to section 101(a)(15)(B) of the Immigration and Nationality Act may, in the discretion of the consular officer, be made valid indefinitely and for an unlimited number of applications for admission for aliens who: (1) Are nationals of countries which offer reciprocal treatment to U.S. citizens, as determined by the Department of State; (2) are in possession of a valid passport in which the visa may be stamped; and (3) have satisfied the consular officer that they are bona fide visitors and will continue to maintain that status for an indefinite period of time. An indefinite validity visa shall be valid for application for admission into the United States if the passport in which the visa is stamped has expired, provided the alien is also in possession of a valid passport issued by the appropriate authorities of the country of which the alien is a national as required by section 212(a)(26) of the Act and § 41.112.

(d) *Limitation on validity.* If warranted in an individual case, a consular officer may issue a nonimmigrant visa for (1) a period of validity which is less than that prescribed on a basis of reciprocity, (2) a number of applications for admission within the period of the validity of the visa which is less than that prescribed on a basis of reciprocity, (3) application for admission at a specified port or specified ports of entry in the United States, or (4) for use on and after a given date subsequent to the date of issuance.

(e) *Termination of validity by consular or immigration officer.* Notwithstanding any period of validity specified on the face of a nonimmigrant visa issued to an alien, a consular or immigration officer is authorized to terminate the validity thereof by physically cancelling such visa if –

(1) The alien obtains an immigrant visa or has his status adjusted to that of permanent resident;

(2) The alien is ordered excluded from the United States pursuant to section 235(c) or 236 of the Act;

(3) The alien is notified pursuant to section 235(b) of the Act by an immigration officer at a port of entry that he appears to be inadmissible to the United States and the alien requests and is granted permission to withdraw his application for admission;

(4) A final order of deportation or a final order granting voluntary departure with an alternate order of deportation is entered pursuant to 8 CFR Part 3, or 8 CFR Part 242;

(5) The alien has been permitted by the Immigration and Naturalization Service to depart voluntarily from the United States pursuant to 8 CFR 242.5;

(6) A waiver of ineligibility pursuant to section 212(d)(3)(A) of the Act on the basis of which the visa was issued to the alien is revoked by the Immigration and Naturalization Service;

(7) The visa is presented in connection with an application for admission to the United States by a person other

than the alien to whom it was issued; or

(B) The visa has been physically removed from the passport in which it was originally issued.

(f) *Termination of validity prior to alien's journey to the United States.* (1) Notwithstanding any period of validity specified on the face thereof, the validity of a nonimmigrant visa issued to an alien shall terminate if, prior to the embarkation of the alien upon a continuous voyage to the United States, the visa has been physically removed from the passport in which it was originally issued, or a consular officer finds that the alien has, subsequent to the issuance of such visa, become ineligible under section 212(a) of the Act to receive such visa or has ceased to be entitled to the nonimmigrant classification under section 101(a)(15) of the Act specified in such visa. Before making such a finding in an individual case, the consular officer shall, if practicable notify the alien and give him an opportunity to rebut and overcome the information on the basis of which the consular officer proposes to find that he has become ineligible to receive a nonimmigrant visa.

(2) Upon learning that a visa has been physically removed from the passport in which it was originally issued or upon a finding of ineligibility pursuant to paragraph (f)(1) of this section, the consular officer shall, if possible, physically cancel such visa. If the consular officer is unable to physically cancel the visa he shall give notice of the termination of validity to the master, commanding officer, agent, owner, charterer, or consignee of the carrier or transportation line on which it is believed that the alien intends to travel to the United States and shall promptly submit to the Department a full report of the facts of any case in which a finding of ineligibility to receive a visa has been made pursuant to paragraph (f)(1) of this section.

(g) *Replacement of visa.* A nonimmigrant visa the validity of which has been terminated pursuant to paragraph (e) or (f) of this section may be replaced, without fee, by a consular officer if it is determined that the basis for termination has been overcome and if the validity specified on the face thereof has not at that time expired.

(Sec. 221, 66 Stat. 191; 8 U.S.C. 1201; 8 U.S.C. 1104; sec. 104, 66 Stat. 174; 8 U.S.C. 1104; sec. 109(b)(1), 91 Stat. 847)

[Dept. Reg. 108.411, 24 FR 6689, Aug. 18, 1959]

EDITORIAL NOTE: For Federal Register citations affecting § 41.122, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§ 41.123 More than one alien included in visa.

If the spouse and unmarried minor children of a principal alien are included in one passport (see § 41.112(b)) a single nonimmigrant visa may be issued to include all eligible family members. Each alien must execute a separate application. The name of each family member shall be written in the space provided in the visa stamp. The visa fee to be collected shall be equal to the total of the fees prescribed by the Secretary of State, in accordance with the provisions of section 281 of the Act, for each alien included in the visa unless upon a basis of reciprocity a lesser fee is chargeable in such a case.

[Dept. Reg. 108.411, 24 FR 6689, Aug. 18, 1959]

§ 41.121 Procedures in issuing visas.

(a) *Visa evidenced by a properly identifiable insert in the passport.* Except as provided in paragraph (b) of this section the issuance of a nonimmigrant visa shall be evidenced by a properly identifiable insert placed in the alien's passport. The appropriate symbol, as prescribed in § 41.12, showing the classification of the alien, shall be included in the visa insert.

(b) *Cases in which visa may not be placed in passport.* In the following cases the visa shall be placed on the prescribed Form OF-232, to which a photograph of the alien shall be attached under seal:

(1) The alien's passport was issued by a government with which the United States does not have formal diplomatic relations, unless the Department has specifically authorized the placing of the visa insert in such passport;

(2) The alien's passport does not provide sufficient space for the visa insert;

(3) The passport requirement has been waived; or

(4) In other cases as authorized by the Department. In issuing a visa in such cases a notation shall be made on the Form OF-232 on which the visa is placed specifying the pertinent subparagraph of this paragraph under which the action is taken.

(c) *Indefinite Validity Visa.* In no instance may a visa issued pursuant to section 101(a)(15)(B) of the Act and having indefinite validity as provided in § 41.122(c) be placed in any document other than a valid passport.

(d) *Visa Insert.* (1) The nonimmigrant visa insert shall be in the format designated by the Department and contain the following data:

(i) The number of the visa;

(ii) The location of the issuing office;

(iii) The classification of the visa;

(iv) The date of issuance;

(v) The expiration date or, if an indefinite validity visa is issued on the basis of reciprocity, the word "indefinitely";

(vi) The number of applications for admission for which it is valid or, the word "multiple";

(vii) The name(s) of the person(s) to whom issued, unless the entry authorized by paragraph (e)(1) of this section is used;

(viii) The signature or facsimile signature of the issuing officer.

(2) The format of a diplomatic visa shall be the same as a regular nonimmigrant visa, except that it shall bear the title "DIPLOMATIC".

(3) The format of an official visa shall be the same as a regular nonimmigrant visa, except that it shall bear the title "OFFICIAL".

(4) All of the data required by paragraph (d)(1) shall be contained in a nonimmigrant visa issued pursuant to the Automated Nonimmigrant Visa Issuance System (ANVIS) except that the signature or facsimile signature of the issuing officer shall not be contained in such a visa. In addition, the ANVIS visa shall contain the date and place of birth of the person the whom the visa is issued with the country of birth being indicated by a three digit numeric code. The location of the issuing office will also be shown by a three digit numeric code.

(e) *Insertion of name; petition and derivative status notation.*

(1) Except as otherwise provided in this paragraph, the name or names of the alien or aliens to whom a nonimmigrant visa is issued shall be shown on the visa insert just after the word "to". Consular officers may, in their discretion, show the word "Bearer(s)" in lieu of the name of the alien and in lieu of the names of accompanying family members, if any, who are included in the alien's passport, in visas issued in passports or other travel documents meeting the requirements of section 101(a)(30) of the Immigration and Nationality Act, which have been designated by the Department as approved for this purpose. This procedure may not be applied in the case of aliens who are the beneficiaries of waivers granted under section 212(d)(3) of the Act.

(2) If the visa is being issued upon the basis of a petition approved by the Attorney General, the number of the petition, if any, the period for which the alien's admission has been authorized and the name of the petitioner shall be noted immediately below the visa insert.

(3) In the case of an alien who derived status from a principal alien, the name and position of the principal alien shall be written below the lower margin of the visa insert.

(f) *Period of validity.* If a nonimmigrant visa is issued for an unlimited number of applications for admission within the period of validity, the word "multiple" shall be appropriately placed in the visa insert. Otherwise the number of permitted applications for admission shall be shown in word form. The date of issuance and the date of expiration of the visa shall be shown in the appropriate places in the visa insert and shall indicate the day, month and year in that order. The standard three letter abbreviation for the month shall be used in all cases. If a visitor visa is to be made valid for an indefinite period the word "indefinite-

ly" shall be inserted in the space provided for the expiration date of the visa.

(g) *Restriction to specified port of entry.* If a nonimmigrant visa is to be valid for admission only at a specified port or ports of entry the name or names of such port or ports shall be entered immediately below the expiration date of the visa and shall be preceded by the word "at".

(h) *Signature.* Except in the case of a nonimmigrant visa issued pursuant to § 41.124(d)(4), the signature or facsimile signature of the consular officer issuing the visa shall appear in the visa insert.

(i) *Delivery of visa and disposition of Form OF-156.* In issuing a nonimmigrant visa the consular officer shall deliver the visaed passport, or the prescribed Form OF 232 which bears the visa, to the alien or, in any cases in which personal appearance has been waived, to the authorized representative. The executed Form OF-156 and any additional statements furnished by the alien in accordance with § 41.115(b) shall be retained in the consular files.

(j) *Disposition of supporting documents.* Original supporting documents furnished by the alien shall be returned to the alien for presentation, if necessary, to immigration authorities at the port of entry and a notation to that effect shall be made on the Form OF-156. Duplicates of the documents may be retained at the consular office in the discretion of the consular officer.

(k) *Replacement of erroneously issued visas.* A nonimmigrant visa, once issued and signed may not be amended or altered except as provided in § 41.120(c). A visa erroneously issued in relation to any item appearing in the visa insert shall be cancelled and replaced by a corrected visa. No fee shall be charged for a visa so replaced unless an incorrect fee was originally charged. The procedure prescribed by § 41.126(b) shall be followed except that the word "Corrected" shall be placed on the upper margin of the visa insert in place of the word "Transferred". The procedure described in this paragraph may not be used to include additional persons in the visa. (For regulations regarding the revocation or invalidation of a visa see § 41.134.)

(l) *Olympic Games, Pan American Games or other Regional Games.* Notwithstanding the provisions of paragraph (c) of this section, in the case of an alien who:

(1) Is a participant in the Summer or Winter Olympic Games, the Pan American Games or other Regional Games under the auspices of the International Olympic Committee, held in the United States; and

(2) Is the holder of an official identity card which has been issued for participation in such Games under the Olympic Rules Bylaws, which includes the signature of a competent authority of the participating government and the assurance of that government's recognition of the card for reentry by the bearer for an additional period of six months beyond the expiration date of the card, and which otherwise meets the requirements of sections 101(a)(30) and 212(a)(26) of the Immigration and Nationality Act,

a stamp consisting of:

(i) The imprint of the issuing post's rubber stamp seal; and

(ii) The signature of a consular officer affixed on the identity card

shall constitute a multiple entry B-1/B-2 visa valid for the duration of the card, or, in the case of a representative of foreign press, radio, film or other foreign information media, a multiple entry I visa valid for the duration of the card.

§ 41.125 Revalidation of visas.

(a) *Conditions for revalidation.* A nonimmigrant visa may, in the discretion of the consular officer, be revalidated for the period or periods specified under paragraphs (c) and (d) of this section in the same classification at any visa-issuing office if (1) the alien's nationality is the same, (2) the visa is about to expire or has expired, or has become invalid by reason of having been used for the number of applications for admission specified therein, (3) the application for revalidation is made within one year of the date of expiration of the original visa or any revalidation thereof, and (4) the consular officer is satisfied that the alien is a bona fide nonimmigrant and is otherwise eligible to receive a nonimmigrant visa.

(b) *Waiver of personal appearance.* Except as indicated in paragraph (d) of this section, the consular officer may, in his discretion, waive the personal appearance of an alien who is an applicant for revalidation of his visa.

(c) *Period for which visa may be revalidated.* A nonimmigrant visa issued under the provisions of any paragraph of section 101(a)(15) of the Act may, in the discretion of the consular officer, be revalidated any number of times for the period and number of applications for admission prescribed by the Secretary of State.

(d) *Revalidation of visas for crewmen—(1) Airmen.* If the requirements of paragraph (a) of this section are met, a nonimmigrant visa issued under the provisions of section 101(a)(15)(D) of the Act to an airman may be revalidated any number of times for the period and number of applications for admission prescribed by the Secretary of State provided that (i) the application for revalidation is supported by a letter from the employing carrier certifying that the applicant is employed as an airman, or (ii) if the applicant is not employed at the time of application for revalidation, he appears in person in connection with his application and presents satisfactory evidence the he continues to be a bona fide airman.

(2) *Seamen.* If the requirements of paragraph (a) of this section are met, a nonimmigrant visa issued under the provisions of section 101(a)(15)(D) of the Act to a seaman may be revalidated any number of times for the period and number of applications for admission prescribed by the Secretary of State provided that (i) the application for revalidation is supported by a letter from the employing carrier certifying that the applicant is employed as a seaman and that he is in possession of a valid alien crewman landing permit and identification card (Form I-184) issued by the Immigration and Naturalization Service, or (ii) if the applicant is not employed at the time of application for revalidation, he appears in person in connection with his application and submits satisfactory evidence that he continues to be a bona fide seaman.

(3) *Crewmen in transit.* A nonimmigrant visa issued under the provisions of section 101(a)(15)(C) of the Act to an airman or seaman who is being issued, or is in possession of, an individual D visa, may be revalidated any number of times for the period and number of applications for admission prescribed by the Secretary of State if the conditions set out in paragraph (a) of this section and in paragraphs (d)(1) and (2) of this section are met.

(e) *Procedure for revalidation.* In revalidating a nonimmigrant visa, the consular officer shall follow the procedure prescribed in § 41.124. An alien seeking revalidation of a nonimmigrant visa shall make application therefor as prescribed in § 41.115. A photograph of the alien shall not be required unless it appears to the consular officer that the alien has not previously submitted a photograph in connection with an application for a visa and that the alien does not come within any of the excepted classes described in § 41.111(c). The visa stamp shall be placed in the alien's passport and all pertinent data contained in the original visa shall be transferred to the revalidated visa. The word "REVALIDATED" shall be inserted on the upper margin of the visa stamp.

(f) *Automatic revalidation of visas in certain cases.* (1) An expired nonimmigrant visa issued pursuant to the provisions of section 101(a)(15) (F) or (J) of the Act, or an expired or unexpired nonimmigrant visa issued pursuant to the provisions of another paragraph of section 101(a)(15) if the nonimmigrant status has been changed by the Immigration and Naturalization Service to that of a nonimmigrant as defined in paragraph (F) or (J), may be considered to be automatically revalidated to the date of application for

readmission to the United States and converted, if necessary, to classification under paragraph (F) or (J), in the case of a nonimmigrant alien who:

(i) Is applying for readmission into the United States after an absence not exceeding 30 days solely in contiguous territory or adjacent islands other than Cuba;

(ii) Has maintained and intends to resume his status under paragraph (F) or (J) in the United States;

(iii) Presents, or is the accompanying spouse or child of an alien who presents, a current Form I-20 (in the case of student) or Form DSP 66 (in the case of an exchange visitor) issued by the school the student has been authorized to attend by the Immigration and Naturalization Service, or by the sponsor of the exchange program in which he has been authorized to participate by the Immigration and Naturalization Service, and endorsed by the issuing school official or program sponsor to indicate the period of initial admission or extension of stay authorized by the Immigration and Naturalization Service;

(iv) Is applying for readmission within the authorized period of initial admission or extension of stay;

(v) Is in possession of a valid passport; and

(vi) Does not require the authorization of his temporary admission into the United States under section 212(d)(3) of the Act.

(2) An expired nonimmigrant visa issued pursuant to the provisions of any paragraph of section 101(a)(15) of the Act may be considered to be revalidated to the date of application for readmission to the United States and an expired or unexpired nonimmigrant visa issued pursuant to the provisions of any paragraph of section 101(a)(15) of the Act may, if the original nonimmigrant status has been changed by the Immigration and Naturalization Service to another nonimmigrant status, be considered to be revalidated to the date of application for readmission to the United States and converted to that changed status in the case of a nonimmigrant alien who:

(i) Has maintained nonimmigrant status in the United States and is in possession of an Arrival-Departure Card (Form I-94) endorsed by the Immigration and Naturalization Service to show an unexpired period of initial admission or extension of stay;

(ii) Is applying for readmission into the United States after an absence not exceeding 30 days solely in contiguous territory;

(iii) Intends to resume nonimmigrant status in the United States;

(iv) Is applying for readmission within the authorized period of initial admission or extension of stay;

(v) Is in possession of a valid passport; and

(vi) Does not require the authorization of his temporary admission into the United States under section 212(d)(3) of the Act.

(g) *Revalidation in the United States in certain cases.* The Director of the Visa Office of the Department and such other officers of the Department as he may designate are authorized, in their discretion, to revalidate nonimmigrant visas, including diplomatic visas, for—

(1) Qualified aliens classifiable under the visa symbol C-2 or C-3;

(2) Other qualified aliens who—

(i) Are properly classifiable under subparagraph (A), (E), (G), (H), (I), or (L) of section 101(a)(15) of the Act or under the visa symbols NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, NATO-6, or NATO-7;

(ii) Present appropriate evidence that—

(a) Their period of authorized admission in such status has not expired; and

(b) They are currently maintaining such status; and

(iii) Intend, after a temporary absence, to reenter the United States in such status.

(h) *Fee for revalidation.* The fee for the revalidation of a nonimmigrant visa shall be that prescribed for the issuance of such a visa, if any: *Provided, however,* That

(1) When the visa was issued valid for a lesser number of applications for admission or for a period of validity less than the maximum permitted by reciprocity, it may be revalidated for the remaining number of applications for admission and validity permitted without the payment of an additional fee, and

(2) No fee shall be charged in the case of a visa considered to be automatically revalidated pursuant to the provisions of paragraph (f) of this section.

EDITORIAL NOTE: For Federal Register citations affecting § 41.125, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§ 41.126 Transfer of visas.

(a) *Conditions for transfer.* Upon the request of the bearer a valid nonimmigrant visa shall be transferred from one travel document to a different travel document which is valid for the required period if he is found eligible to receive such a visa, except in a case in which the travel document containing the original visa has been lost or stolen. A visa may be transferred only if the new passport indicates that the alien has the same nationality he had when the visa was issued.

(b) *Procedure for transfer.* Application for the transfer of a nonimmigrant visa from one passport to another shall be made on an appropriate form. The consular officer may, in his discretion, waive the personal appearance of the alien. The issuance of a transferred visa shall be evidenced by placing the visa stamp with all of the original data in the alien's passport. The validity of the transferred visa shall be the same as that of the original visa. The transferred visa shall be valid for the number of applications for admission remaining as of the date of the transfer. The word "Transferred" shall be inserted on the upper margin of the visa stamp.

(c) *Cancellation of visa in old passport.* Upon transfer of a visa to a new travel document the visa issued in the original passport shall be canceled, unless the passport has been surrendered to the issuing authority, except that where the visa is being transferred for only one of several persons included in it, only the name of that person shall be stricken from the visa originally issued.

(d) *Fee for transfer.* No fee shall be charged for the transfer of a valid nonimmigrant visa.

[Dept. Reg. 108.411, 24 FR 6690, Aug. 18, 1959, as amended by Dept. Reg. 108.684, 38 FR 4577, Feb. 10, 1973]

§ 41.127 Crew-list visas.

(a) *Definition.* A crew-list visa is a nonimmigrant visa issued on a manifest of crewmembers of a vessel or aircraft which includes all aliens listed in the manifest unless otherwise stated.

(b) *Application.* (1) A list of all alien crewmen who are serving on board a vessel or aircraft which is proceeding to the United States and who are not in possession of valid individual entry documents shall be submitted, in duplicate, to a consular officer on Immigration and Naturalization Service Form I-418 (Crew List) or such other forms as may be prescribed. In lieu of a manifest on Form I-418, the manifest of alien crewmen serving on board an aircraft may be submitted on the International Civil Aviation Organization (ICAO) manifest, or on Customs Form 7507 (General Declaration) whenever the number of crewmen does not exceed the number which can be listed on the form. In cases of alien seamen serving on vessels, the duplicate copy of Form I-418, shall contain in column (4) the date, city and country of birth of each alien seaman listed who does not have in his possession a valid individual visa or an Immigration and Naturalization Service Form I-551 and, in column (5), the place of issuance and the authority issuing the passport held by such alien seaman. The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(2) The submission of the crew list together with such other information as the consular officer may deem necessary to determine the eligibility of an individual crewman to be included in the crew-list visa shall be considered the formal application for a crew-list visa. No other application form shall be required.

(3) The manifest should list separately, in alphabetical order, those alien crewmen who are to be consid-

because of entry without inspection or lack of required documents.

(d) *Validity.* A nonresident alien Mexican border crossing identification card issued solely or in combination with a B-1/B-2 visitor visa pursuant to the provisions of this section shall be valid until invalidated under the same conditions as provided in § 41.122(e) for the termination of nonimmigrant visas or revoked under the same conditions and procedures as provided in § 41.134 for the revocation of nonimmigrant visas. A nonresident alien Mexican border crossing identification card previously issued by a consular officer in Mexico on Form I-100 or Form I-586 shall be valid until revoked or voided regardless of any expiration date on the card.

(e) *Invalidation or revocation.* A nonresident alien Mexican border crossing identification card issued solely or in combination with a B-1/B-2 visitor visa pursuant to the provisions of paragraph (a) or (b) of this section may be invalidated pursuant to the provisions of § 41.122(e) or revoked pursuant to the provisions of § 41.134. Upon invalidation or revocation of such a card, the consular or immigration officer shall cancel the card by writing or stamping the word "canceled" plainly across the face of the card and indicating the location of the consular or immigration office at which the card was invalidated or revoked.

(f) *Voidance of Mexican border crossing cards issued in Mexico on Form I-186 or Form I-586.* A consular officer in Mexico may declare void, without notice, a nonresident alien Mexican border crossing card previously issued in Mexico on Form I-186 or Form I-586, upon a finding that the holder is ineligible to receive a nonimmigrant visa. The card shall be surrendered immediately upon voidance.

(g) *Replacement.* When a nonresident alien Mexican border crossing identification card issued solely or in combination with a B-1/B-2 visitor visa under the provisions of this section has been lost, mutilated or destroyed, the person to whom such card was issued may apply for a new card under the applicable provisions of this section. A nonresident alien whose border crossing identification card previously issued on Form I-186 or Form I-586 by a consular officer in Mexico has been lost, mutilated or destroyed, may apply for a combined border crossing identification card and B-1/B-2 visitor visa at any consular office in Mexico, provided the alien qualifies under the provisions of paragraph (b) of this section.

(Sec. 101, 66 Stat. 170, 8 U.S.C. 1101; sec. 109(b), 91 Stat. 847)

[Dept. Reg. 108.835, 48 FR 48080, Oct. 20, 1983]

§ 41.129 Nonresident alien Canadian border crossing identification cards.

(a) *Aliens eligible to apply.* Under the conditions prescribed in this section a consular officer assigned to a consular office in Canada may issue a nonresident alien border crossing identification card, as that term is defined in section 101(a)(6) of the Act, to a nonimmigrant alien who satisfactorily establishes that he:

(1) Has been admitted to Canada for permanent residence as a "Landed Immigrant";

(2) Seeks to enter the United States from Canada, or from Mexico if he has visited no countries other than Mexico and the United States since departing Canada, and only as a bona fide temporary visitor for business or pleasure as defined in section 101(a)(15)(B) of the Act for periods of stay not exceeding 6 months; and

(3) Is otherwise eligible to receive a temporary visitor visa or is the beneficiary of a waiver under section 212(d)(3)(A) of the Act of a ground of ineligibility which is valid for multiple applications for admission into the United States and for an indefinite period of time and which contains no restrictions as to extensions of temporary stay or itinerary.

(b) *Application for Canadian border crossing identification cards.* Application for a nonresident alien Canadian border crossing identification card shall be made on Form OF-156, accompanied by evidence of the applicant's "Landed Immigrant" status in Canada; a valid or expired passport or other travel document showing his origin, identity, and nationality, if any, and containing a photograph of the bearer if over the age of 14; and a photograph 1½ inches square if the applicant is over the age of 14. Personal appearance of the applicant may be waived at the discretion of the consular officer.

(c) *Issuance and format of border crossing cards.* A nonresident alien Canadian border crossing identification card shall consist of a stamp placed in the alien's passport or other travel document by a consular officer in Canada. Such stamps shall be numbered serially by each consular office beginning with the number 1 on each July 1, shall be in the format prescribed by the Department, and shall contain the following data:

(1) The post symbol;

(2) The number of the card;

(3) The title and location of the issuing office;

(4) The date of issuance;

(5) The name(s) of the person(s) to whom issued; and

(6) The signature and title of the issuing officer.

(d) *Signature of border crossing identification cards.* The consular officer who issues a nonresident alien Canadian border crossing identification card shall affix his signature to, and indicate his title in, the border crossing card stamp.

(e) *Validity of border crossing identification cards.* A nonresident alien Canadian border crossing identification card issued pursuant to the provisions of this section shall be valid until canceled.

(f) *Cancellation of border crossing identification cards.* (1) A nonresident alien border crossing identification card shall be canceled by a consular officer if information is developed indicating that the holder of such a card is ineligible to receive a nonimmigrant visa or by a District Director of the Immigration and Naturalization Service if he finds that the alien has violated the conditions of his admission into the United States.

(2) In canceling such a card the consular officer shall write or stamp the word "Canceled" plainly across the face of the border crossing card stamp, shall show the location of the consular office concerned and shall follow the procedures set forth in § 41.130.

(3) In canceling such a card the District Director shall write or stamp the word "Canceled" plainly across the face of the border crossing card stamp and shall show the location of the District Office of the Immigration and Naturalization Service concerned.

[Dept. Reg. 108.611, 36 FR 15745, Aug. 18, 1971, as amended by Dept. Reg. 108.719, 42 FR 32536, June 27, 1977]

REFUSAL AND REVOCATION OF NONIMMIGRANT VISAS

§ 41.130 Procedure in refusing individual visas.

(a) *Refusal procedure.* If a consular officer knows or has reason to believe that an alien is ineligible to receive a visa on grounds of ineligibility which cannot be overcome by the presentation of additional evidence, Form OF-156, if practicable, shall be executed before the refusal is recorded. If the alien fails to execute a visa application after being informed of a ground of ineligibility to receive a nonimmigrant visa, the visa shall be considered refused. The consular officer shall then insert the pertinent data on Form OF-156 with the reasons for the refusal and the form shall be filed in the consular office. In all cases the applicant shall be informed of the provision of law, or regulations issued thereunder, upon which the refusal is based. When refusing a nonimmigrant visa the consular officer may return the original of all supporting documents furnished by the alien with his application. The duplicate of each document upon which the refusal is based and the duplicate of each document which indicates a possible ground of ineligibility to receive a visa, whether or not related to the ground of refusal, shall be retained at the consular office with the memorandum of refusal. Duplicates of other documents may be returned to the alien in the consular officer's discretion.

(b) *Review of refusals at consular offices.* If the grounds of ineligibility upon which the visa was refused cannot be overcome by the presentation of additional evidence, the provi-

1. INTRODUCTION

The Anchorage economy would benefit substantially if the gap between summer and winter capacity utilization could be narrowed by increasing off-season business. One potential market consists of international travelers who fly through Anchorage en route to other final destinations and who are able to allocate several days to a stopover "vacation" in Anchorage. Thus, ACVB commissioned Alaska Pacific University to survey passengers during their "one hour" stops at the Anchorage airport international terminal. The fundamental purpose of this study was to perform exploratory market research to determine if this untapped market potential actually exists, and to obtain basic data about its characteristics.

As part of the contract, the consultants have provided ACVB with a computer printout of data tables as well as a computer tape of data and programs. The most significant information is summarized in the tables of this report and briefly discussed here.

The main conclusions are summarized below:

- There is a market!

  - 84% indicated an interest in visiting Anchorage
  - 80% vacation at least once a year between September and May
  - 62% like winter oriented vacations
  - 50% could have planned a stop THIS trip
  - half would stop for 4 to 7 days

  and

  - 76% have landed in Anchorage before

- "Alaskan" activities are the most significant attraction for those interested in visiting Anchorage

  - 70% would like to visit a glacier/mountain
  - 40% would like to take a dog sled ride
  - 1/3 are interested in each of the following: downhill skiing, city sightseeing, and ice fishing.

- How to influence passengers interested in visiting Anchorage:

  - Highly important factors in deciding:
    75% selected uniqueness of Alaska
    55% selected cost of food and lodging
    53% selected desirability of activities
  - Only 1/4 of the Asian, and 1/2 of the non-Asian passengers knew that airlines allowed stopovers.
  - Prior commitments and/or no vacation time were the main reasons why passengers could not have stopped this trip.

Based on this research, the consultant team concludes that a large, virtually untapped market exists. While developing a marketing strategy was not part of this assignment, we believe that travelers can be efficiently reached while they are "captive" in the terminal during the "one-hour" stopovers. We also believe that the large number of of "repeat" passengers - 86% of business travelers - represents the most promising market for these increased efforts.

Organization of the Report

The balance of this report briefly explains the project methodology (section 2) and then presents a summary of the significant results in a series of tables:

- Table 3.1 focuses on evidence for market feasibility by providing the percentages of the total sample, and of several major sub-samples, that had landed in Anchorage before, understood stopover privileges, liked and took winter-oriented vacations, and had an interest in visiting Anchorage.

- Tables 4.1 through 4.4 are based only on the 84% of the passengers who indicated they <u>are</u> interested in visiting Anchorage. The tables indicate what these potential visitors <u>want</u> to do on a stopover, by providing the percentage of each group that is interested in each activity.

- Tables 5.1 through 5.8 are based on the same 84% of the passengers who indicated they are interested in visiting Anchorage. The tables provide data useful in developing strategies for increasing the number of stopovers by indicating the reasons why a stop could not be made, and the importance of various factors in deciding on an Anchorage visit.

- Table 6.1 summarizes responses for those questions not included in the other tables, including demographic information on the sample. Tables 6.2 and 6.3 are the English and Japanese versions of the questionnaire.

2. METHODOLOGY

This section briefly describes the steps and procedures that were followed in conducting this survey.*

A stratified sample of 707 passengers was gathered between January 28 and May 13, 1983, with additional pretests during October and December of 1982. Because of language difficulties during the pretest, an even split of English and Japanese questionnaires was used for the main sample. The survey was conducted at the international terminal of the Anchorage airport by asking passengers in the hallways, seating areas, and customs area to respond to questions read from a survey form. To ensure that the questions were properly understood and answered, passengers did not complete the questionnaire on their own, although they could read the questionnaire from the English or Japanese versions of the form. The sample was designed so that all the days of the week, all flights, and all months during the survey period were sampled. English and Japanese speaking surveyors of various ages and both sexes were used to eliminate a potential source of bias. Although a completely random sample could not be achieved, no serious bias seems to have occured.

The survey forms were coded and keypunched on a continuous basis so that interim checks on the survey procedures and results could be conducted. Coded results were analyzed using the Statistical Package for the Social Sciences (SPSS) and the resulting 1800 pages of tables were winnowed down into those that are presented in this Executive Summary. The complete computer runs were annotated and delivered to the Anchorage Convention and Visitors Bureau, along with a computer tape of the data and the programs so that further analysis can be conducted by ACVB.

* Any questions regarding specific statistical procedures used in this study should be addressed to Dr. Ted Eschenbach, School of Engineering, University of Alaska, Anchorage - 3221 Providence Drive, Anchorage, Alaska 99508 or call (907) 786-1862.

In interpreting the percentages presented here, the following guidelines should be used:

If the sample had been totally random, the overall results would be accurate within plus or minus 3%. Due to the stratification and selection process, the sample was not totally random and thus the results are accurate to approximately plus or minus 5%. In comparing results, differences of less than 5% cannot be assumed to be significant. This rough estimate should be increased for smaller sub-groups; for example, 10% for sub-groups of 100.

While the stratification process produced sub-groups large enough to examine as sub-groups for meaningful results, the overall percentages are sometimes affected by differences between the sub-groups. Thus, some tables include a "weighted" column in addition to the "all" column This weighted column adjusts the sample based on a sex/race stratification.

Table Interpretation

All tables in this report are constructed by combining individual sub-sample columns into master tables. Each column is individually tied to the row labels without reference to any other column. For example, Table 3.1 actually consists of 12 "individual" tables. As indicated by the column headings, many of these "individual" columns can also be usefully compared. Unless otherwise noted, table entries in a column indicate what percentage of the column's sub-sample met the row label characteristic or condition. The actual number of persons in each sub-sample is given in the bottom row. Using Table 3.1 as an example, the "Asian Male" column can be interpreted as showing that for this sub-group:

- 83% had landed in Anchorage before with an average of 7.4 landings.
- 27% knew airlines allowed stopovers and 48% could have planned a stopover this trip.
- There were 277 Asian males in the sub-sample.

3. THERE IS A MARKET

Stopover Questionnaire

ENGLISH VERSION

ALASKA PACIFIC UNIVERSITY

for

THE ANCHORAGE CONVENTION &
VISITORS BUREAU

1. Airline and flight number? _____

2. How many times have you landed in Anchorage before? _____

   If more than 3, how often in the last year? _____

   Have you visited Anchorage on any of these trips?

   Yes ____ No _____

3. Did you know airlines allow you to stop over here? Yes ____ No ____

4. Could you have planned a stop, if you had wanted to? Yes ____ No ___

   If not, Why?
   _____ Company Policy
   _____ Traveling with a group
   _____ No vacation time to use for such a stop
   _____ Prior committments/schedule too tight
   _____ Other (please note)

   _____

5. Have you used stopover privileges on other routes? Yes ____ No ____

6. Have you visited the United States before? Yes ____ No ____

7. Are you traveling alone? Yes ____ No ____

   If no, number in group:_____ Type of Group:

   ____Business (corporate) group
   ____Family/friends
   ____Packaged tour group

8. Why are you traveling? _____ Business
   _____ Business & Pleasure
   Did you add days to your trip for pleasure activities? Yes ___ No ____
   _____ Vacation

9. How often do you vacation during the months September to May? (not including June, July, or August)

   ____Several times each year
   ____Once a year
   ____Every other year
   ____Once in five years
   ____Never
   ____

10. Do you like winter oriented vacations? Yes ____ No ___

FOLD

11. If you had time, would you be interested in visiting Anchorage? Yes ____ No ____

    If yes, which activities would interest you? Check all that apply:

    ____ City sightseeing
    ____ Shopping
    ____ Visit to a glacier/mountain
    ____ Hot air ballooning
    ____ Visit to a gold mine
    ____ Concert, theatre, or ballet
    ____ Museum visit
    ____ Ice fishing
    ____ Dog sled ride
    ____ Snowmobiling
    ____ Downhill skiing
    ____ Cross country skiing
    ____

    In deciding, how important would the following be?

	Importance	
	High	Low
Cost of Food & lodging	____	____
Chance to break up trip	____	____
Chance to stop in U.S.	____	____
Desirability of activities	____	____
Uniqueness of Alaska	____	____
Weather & temperature	____	____

    For how long would you stop over? _____

12. How far in advance did you plan this trip? _____

13. How did you book/arrange this trip?

ストップオーバー（一時滞在）　質問書

アンカレッジ観光局ではアンカレッジにてストップオーバーされる皆様に簡単な質問書を用意しお答えいただいております。皆様のご協力をお願い申し上げます。

1．ご利用の航空会社およびその便名：＿＿＿＿＿＿航空、＿＿＿＿＿便。

2．以前に、数時間のトランジット滞在も含めて、何回アンカレッジにて搭機されましたか。＿＿＿回。3回以上とお答の方、昨年は何回お来しになりましたか。＿＿＿回。
それらの旅行でアンカレッジに（一泊以上）滞在されましたか。
はい＿＿＿　いいえ＿＿＿

3．航空会社がここでのストップオーバー（一時滞在）を許しているのをご存知でしたか。
はい＿＿＿　いいえ＿＿＿

4．もしあなた自身が希望されれば、ここに滞在できたとお考えになりますか。
はい＿＿＿　いいえ＿＿＿

なぜ（いいえ）なのでしょうか。＿会社の規則だから
＿グループで旅行中だから
＿一時滞在にあてるような休暇時間がないため
＿事前に予定が確定／余裕のないスケジュール
＿その他＿＿＿＿＿＿＿＿＿＿＿＿＿＿

5．他のルート（航空路）でストップオーバーの特権・特典を使用されたことがありますか。
はい＿＿＿　いいえ＿＿＿

6．以前にアメリカ合衆国を訪問されたことがありますか。
はい＿＿＿　いいえ＿＿＿

7．おひとりでご旅行中ですか。　はい＿＿＿　いいえ＿＿＿
おひとりでなければ何名のグループですか。＿＿＿名。
グループの種類：＿＿＿ビジネス（会社関係）のグループ
＿＿＿家族・友人
＿＿＿パッケージツアー　グループ

8．旅行目的は何でしょうか。＿＿＿商用
＿＿＿商用兼観光、観光の為に特に時間をさきますか。
はい＿＿＿　いいえ＿＿＿
＿＿＿休暇／観光

9．9月から翌年5月までの間で、どれ程休暇がとれますか。
数回
一回
二年に一回
五年に一回
なし

10．冬に組む休暇はお好きですか。　はい＿＿＿　いいえ＿＿＿

11．もし時間があればアンカレッジを訪ずれてみたい、とお考えですか，はい___いいえ_____
はいとお答えの方、どの様なことに興味をお持ちでしょうか。

___市内観光
___ショッピング
___氷河／峡谷ツアー
___熱気球乗り（ホットエアー　バルーン）
___金鉱探訪
___コンサート、映画、バレー
___博物館
___アイス　フィッシング
___犬ソリ乗り
___スノーモービル
___ダウンヒル　スキー
___クロスカントリー　スキー

決定要素として、次の事項はどの程度重要でしょうか。

	重要性	
	高	低
食事と宿泊料金	___	___
旅行中の時間（ストップオーバー）の機会	___	___
アメリカに入国するかの機会	___	___
アラスカでの活動の好み	___	___
アラスカのユニークさ	___	___
気候および気温	___	___

どの程度の期間滞在したいとお考えですか，_____日間。

12．今回のご旅行は、どれくらい以前からご計画でしたか，_____

13．どのように予約／手配なさいましたか。

_____旅行代理店あるいは旅行業者　___航空会社あるいは事務所を通じて
_____直接会社から　___その他

14．どこにお住いですか．_____市／区_____州／府／道／県

15．この質問をお答えください．

英　語　　日本語
フランス語　　韓国語
中国語　　その他アジア
イタリア語　　その他ヨーロッパ

16．あなたのご専門あるいはご職業は何ですか，_____

17．最後に、あなたの年齢をお聞かせ下さい，_____

ご協力ありがとうございました。

アンカレッジでストップオーバーされるあるいはされた皆様

18．何回アンカレッジでストップオーバーされましたか，___春　___夏
___秋　___冬

19．なぜストップオーバーすることになさいましたか。

VISA WAIVERS FOR CERTAIN VISITORS

What are the current guidelines for nonimmigrant visitors in this country?

Current law requires almost all nonimmigrant visitors to this country to have a valid nonimmigrant visa before being admitted into the United States -- that is, most nonimmigrant visitors must obtain a visa in their home country before beginning their trip. The present process of applying for a visa is time consuming and involves considerable pre-planning. (For more detail, please see federal regulations.)

What is a "visa waiver"?

A visa waiver, as defined in S. 529, is special permission to a nonimmigrant visitor from any eligible foreign country to remain in the United States for up to 90 days without having obtained the customary nonimmigrant visa, subject to the provisions of Section 213 of S. 529.

What is S. 529?

S. 529, the Immigration Reform and Control Act of 1983, was a bill introduced in the United States Senate by Senator Alan K. Simpson of Wyoming. Different versions of the bill passed the U.S. Senate and the U.S. House of Representatives, but the bill ultimately died in Conference Committee when Conferees became bogged down in details of the bill. The visa waiver portion of the bill was never controversial and had broad support in both houses.

S. 529 is similar to H.R. 1510 by Representative Romano L. Mazzoli. The legislation is often cited as the Simpson-Mazzoli bill.

(For more information, please see "Immigration Reform Bill Dies As Compromise Efforts Fail". Congressional Quarterly. October 13, 1984. p. 2623.)

[redacted]

— Backup

What was Section 213 of S. 529?

Section 213 was the section of S. 529 which outlined the pilot visa waiver program. (Please see reprint of this section of the bill from the Congressional Record.)

Who could have received a visa waiver under the pilot program?

S. 529 would have allowed the Secretary of State and the Attorney General, acting in conjunction, to establish a pilot program to grant visa waivers to aliens who

(1) are visiting in the United States for no more than 90 days;

(2) are nationals of countries which extend reciprocal privileges to U.S. citizens and which are designated as pilot countries under the visa waiver program;

(3) complete a form requesting a visa waiver and execute a waiver of repeal and review;

(4) have round trip, nonrefundable, nontransferable, open-dated transportation tickets with eligible carriers; and

(5) have been determined not to represent a threat to the welfare, safety or security of the United States.

What were the other provisions of Section 213?

This section of the bill also required

(1) establishment of an automated monitoring system for nonimmigrant visitors who receive visa waivers;

(2) designation of countries to participate in the pilot program;

(3) establishment and enforcement of guidelines regarding acceptable standards of compliance of visitors who receive visa waivers; and

(4) establishment of agreements with foreign carriers to allow patrons of their services to participate in the visa waiver program.

Who in Alaska supports the creation of a visa waiver program?

The Alaska Visitors' Association, the Anchorage Convention and Visitors' Bureau and the state's Division of Tourism support creation of a visa waiver program.

What benefits would a visa waiver program offer to Alaska?

A visa waiver program would help the state to gain access to the 1.5 million travellers who annually transit the state. A study by the Anchorage Convention and Visitors' Bureau showed that among those passengers interviewed, all of whom were passing through the state during transpolar flights, 83% were interested

in visiting Alaska. Subsequent questions revealed that one main obstacle to such a stopover was the requirement of a nonimmigrant visa.

What are the prospects for passage of a bill creating a visa waiver program?

According to informed sources in Washington, the visa waiver proposal has broad support from the tourist industry and other interest groups, from both Houses of Congress, and from the Reagan Administration. With such interest, chances for passage of a bill which creates a visa waiver program similar to that outlined in Section 213 of S. 529 are very good.

What does HJR 20 do to help?

One representative of the tourist industry who was involved in the effort to gain passage of this specific provision in the Senate said that the main obstacle to passage of the visa waiver program this year was the low level of awareness among the general public. Strong vocal support could get a bill like this through the Congress.

HJR 20 is an opportunity for the legislature to make a strong statement of support for the creation of a visa waiver program, and to broaden public awareness of the issue and the program's potential benefits to Alaskans.

Testimony for: House Labor & Commerce Committee
in support of HJR20

Chairman: Mike Navarre, members of the Labor & Commerce Committee

My name is Reyn Bowman. I am president of the Anchorage Convention & Visitors Bureau. I apologize for not being able to present this testimony in person today due to a Board of Directors meeting.

The ACVB is Anchorage's way to attract and serve visitors. We are a non-profit vehicle for public/private cooperation combining the resources of 600 members with half of the visitor paid bed tax.

ACVB is also pleased along with the AVA trade association and 124 other partners to be a part of statewide cooperative marketing with the Alaska Division of Tourism.

For more than two decades Alaska has been a fuel stop on the trans-polar air route between Europe and Asia. This year more than 1.3 million passengers will transit the route.

In 1983, ACVB conducted the first research to define the potential of stopover visitors. The survey showed tremendous market potential for Alaska and helped us enlist the moral support of the Alaska Visitors Association and the marketing participation of the Division of Tourism and its other cooperative marketing partners. We have provided copies of this research and we hope you find it helpful.

There are a number of very significant barriers to development of this market. Many are being very rapidly addressed.

* ACVB is working with DOT/PF and the Department of Commerce & Economic Development to upgrade the information center we operate in the Overseas Terminal of the Anchorage International Airport. This project should be complete later this year.

* ACVB and the Division of Tourism are putting increased promotional dollars into brochures and advertising to enlist future stopovers and to educate passengers on the requirements.

* We hope to join with a high level representative of the State later this year in meetings with each of the International Air Carriers to enlist their cooperation with assurances that stopover visitors will be encouraged in the time periods most beneficial to the carriers and the State...September-May. This is, fortunately, the same period of interests to a great number of potential stopover visitors.

But there remain a number of political obstacles to stopover visitors. While the bilateral treaties all permit stopovers, they are inhibited by:

* IATA (International Air Transport Association) refusal to permit stopovers on discount or special fares.

* the requirement of a U.S. Visa and

ACVB and many other organizations have worked for several years in support of a bill to grant visa waiver to citizens traveling to the U.S. from countries with a low incidence of Customs/Immigration violations and which grant reciprocal priviledges to U.S. citizens travelling abroad. The waiver would apply to many other U.S. ports in addition to Alaska.

Unfortunately, the widely popular visa waiver legislation has been fatally caught up in other immigration reform controversies a la the ill fated Simpson Mazzoli bill last year.

We strongly support the resolution HJR20 before the Alaska State Legislature in support of visa waiver and encouraging Alaska's congressional delegation to continue to work to eliminate this and other political barriers to stopover visits on the transpolar route.

The benefits are very dramatic. Stopover visitors will not only add directly to the economy. Through stopover promotions, transpolar passengers will develope interest in Alaska as a destination. This interest will help us retain transpolar air service long after the carriers will be able to over-fly Alaska. The resultant revenues will continue to provide 50% of the funds that go to subsidize Alaska's airport system.

Thank you for this opportunity to testify.

M E M O R A N D U M

To: All Members, House Labor and Commerce Committee

From: Roger Poppe, Committee Staff

Date: March 13, 1985 Wednesday

Subject: Overview, HJR 20

On March 13 the Committee met in Room 102 Capitol Building at 1:15-2:45 pm on HJR 20: An Act relating to Tourism and International Airline Travelers Visa Waivers, by Rieger.

This resolution would encourage our Congressional delegation to push for federal legislation that would ease the visa restrictions for non-immigrant visitors on a nation-wide basis, either through separate legislation or as part of some renewed effort to revive the Immigration Bill during the current session of Congress.

This resolution was not brought up in the legislature last year nor is there a companion piece in the Senate this year. The resolution grew out of a piece of federal legislation, S 529, The Immigration Reform and Control Act of 1983, otherwise referred to as the Simpson-Mazzolli Bill. This bill died in Congress last year after differences over its funding, as well as disagreements over many of the bill's points by different lobby groups.

However, one of the subject areas of the bill that was non-controversial dealt with visa waivers for certain types of visitors. That particular section of the bill is reproduced from the Congressional Record in your file (the House and Senate versions were identical).

For your reference, the federal law for Admission Qualifications for non-immigrants is spelled out in detail in 3 USC, 1182, and the particular part of federal law this resolution deals with is found in your file on page 187, Chp. 12 of the federal statutes, (26). Further, the federal regulations on this matter can be found in Title 22, paragraph 41.110: Application for Non-imigrant visas (see page 170 in your file on Subchapter E- Visas).

Finally, there is a survey that was conducted by Alaska Pacific University in June of 1983 for the Anchorage Convention and Visitor's Bureau that demonstrates that a potential market is available among the international travelers who fly through Anchorage year-around. These travelers could provide additional money for the local economy if they were allowed to stop off for a few days without having to go through the hassles of obtaining visas in advance from their home country.

People testifying on this bill will include representatives from the Anchorage Convention and Visitor's Bureau, and the AVA.

Sponsors Assessing 1985 Outlook:

Immigration Reform Bill Dies As Compromise Efforts Fail

For the third year in a row, a sweeping immigration reform measure died in Congress, the victim of swirling interest-group pressures and election-year political qualms.

The legislation (S 529) had been on its deathbed for two weeks. But supporters worked into the final days of the 98th Congress, hoping for agreement on a House-Senate conference report in time for approval by both chambers. The effort failed Oct. 11, two days after conferees deadlocked on a money issue. The dispute was over the amount of federal funds states should get to defray social-service costs anticipated from a proposal to grant amnesty to millions of illegal aliens. *(Weekly Report p. 2473)*

In 1982, an immigration bill passed the Senate but died on the House floor in the last days of a lame-duck session. Last year, S 529 passed the Senate but a companion bill was blocked in the House by Speaker Thomas P. O'Neill Jr., D-Mass. This year, that measure (HR 1510) passed June 20 by a 216-211 margin. *(1982 Almanac p. 405; 1983 Almanac p. 287)*

Try Again Next Year?

Sen. Alan K. Simpson, R-Wyo., and Rep. Romano L. Mazzoli, D-Ky., chief sponsors of the legislation, offered differing assessments about the prospects for action next year.

Simpson said he was ready to "crank up" a new bill early in 1985. Mazzoli said he was going back to Kentucky to think about the matter.

Several members, including Simpson and Mazzoli, said a great deal will depend on who is in the White House in 1985. They said that leadership from the president is critical to getting a bill through Congress.

President Reagan generally supported S 529, particularly a section that would penalize employers who knowingly hire illegal aliens. But he did not make it a priority issue.

Democratic presidential nominee Walter F. Mondale has strongly opposed employer sanctions and has said that he would never support such a program. Hispanic lobbyists contended that the penalties would result in discrimination against anyone who looked or sounded foreign, and they pressed their cause at the Democratic National Convention this summer.

Funding Snag

Conferees met 10 times over four weeks and resolved a number of thorny issues, including the sanctions provisions, the scope of the legalization program, and an expansion of an existing program that allows employers to bring in foreign workers temporarily for agricultural work.

That the cap on federal aid proved the bill's undoing surprised many conferees. On Sept. 20, members had agreed to an informal $1 billion yearly cap over four years for the legalization program. The cap was to be part of a statement of managers to accompany the conference report.

Simpson had said that some kind of cap was required or Reagan would veto the bill. He believed that the Sept. 20 action would be satisfactory, but he subsequently reported to conferees that the administration would not accept the informal cap.

Rescue Efforts Fail

During the week of Oct. 1, Rep. Charles E. Schumer, D-N.Y., who had not previously been a key player, tried to put together a compromise on the funding issue and another dispute involving anti-discrimination provisions designed to reduce bias that might result from the sanctions.

Schumer acted as mediator for Simpson and Rep. Barney Frank, D-Mass., the chief advocate of the anti-bias provision, and produced a compromise that commanded a majority of the conferees.

The compromise dropped House language barring discrimination based on "alienage." Simpson and others said this would subject employers to lawsuits if they chose a U.S. citizen over a legal alien. Conferees agreed to allow aliens who signed a document affirming their intent to become U.S. citizens to seek administrative remedies for employment discrimination.

Part of the deal, Schumer said, was making the $1 billion cap part of the legislation, as the administration had wanted.

When conferees convened Oct. 9 to ratify the agreement, the anti-bias provision was accepted. But House conferees voted 13-15 to reject the $1 billion yearly cap as part of the bill. Seven members who had voted for the cap in the statement of managers switched their votes and voted against the cap as part of the bill.

Conferees from states with large illegal alien populations contended that the $1 billion would be insufficient to cover the anticipated costs of legalization, leaving the states with a heavy financial burden.

Judiciary Chairman Peter W. Rodino Jr., D-N.J., who ran the conference, recessed the meeting and said he would reconvene members only if some new agreement were reached.

Schumer started a new round of negotiations with Reps. Larry Smith, D-Fla., and Leon E. Panetta, D-Calif., who had voted against the cap. By the evening of Oct. 10, Schumer had worked out a new compromise with Simpson that drew Panetta's support. But Schumer was unable to convince any other House conferee to switch.

"We exhausted our potential for compromise," Mazzoli said Oct. 11. "Pretty soon you don't have any tools to split hairs any finer."

Even if time had not run out, the bill faced problems on a final vote. Sens. John Tower, R-Texas, and Alan Cranston, D-Calif., had threatened a filibuster, and 40 or so House members had pledged to try to block passage in that chamber.

Simpson conceded that opposition to S 529 was strong and well-organized. "They formed coalitions for 'immigration reform' and then lobbed bombs from the balcony," he said.

"Next year," he added, "we'll have more time to pull their molars." ■

this Act or who otherwise acquire such status after such date.

(2) The amendments made by subsection (b) apply to aliens without regard to the date the aliens enter the United States.

(3) The amendments made by subsection (c) apply to periods occurring on or after the date of the enactment of this Act and shall not have the effect of excluding (in the determination of a period of continuous physical presence in the United States) any period before the date of the enactment of this Act.

VISA WAIVER FOR CERTAIN VISITORS

SEC. 213. (a) Section 212 (8 U.S.C. 1182) is amended by adding at the end thereof the following new subsections:

"(l)(1) The Attorney General and the Secretary of State are authorized to establish a pilot program (hereinafter in this subsection referred to as the 'program') under which the requirement of paragraph (26)(B) of subsection (a) may be waived by the Attorney General and the Secretary of State, acting jointly and in accordance with this subsection, in the case of an alien who—

"(A) is applying for admission during the pilot program period (as defined in paragraph (5)) as a nonimmigrant visitor (described in section 101(a)(15)(B)) for a period not exceeding ninety days;

"(B) is a national of a country which—

"(i) extends or agrees to extend reciprocal privileges to citizens and nationals of the United States, and

"(ii) is designated as a pilot country under paragraph (3);

"(C) before such admission completes such immigration form as the Attorney General shall establish under paragraph (2)(C) and executes a waiver of review and appeal described in paragraph (2)(D);

"(D) has a round trip, nonrefundable, nontransferable, open-dated transportation ticket which—

"(i) is issued by a carrier which has entered into an agreement described in paragraph (4), and

"(ii) guarantees transport of the alien out of the United States at the end of the alien's visit; and

"(E) has been determined not to represent a threat to the welfare, safety, or security of the United States;

except that no such alien may be admitted without a visa pursuant to this subsection if the alien failed to comply with the conditions of any previous admission as a nonimmigrant.

"(2)(A) The program may not be put into operation until the end of the thirty-day period beginning on the date that the Attorney General submits to the Congress a certification that the screening and monitoring system described in subparagraph (B) is operational and that the form described in subparagraph (C) has been produced.

"(B) The Attorney General in cooperation with the Secretary of State shall develop and establish an automated data arrival and departure control system to screen and monitor the arrival and departure into the United States of nonimmigrant visitors receiving a visa waiver under the program.

"(C) The Attorney General shall develop a form for use under the program. Such form shall be consistent and compatible with the control system developed under subparagraph (B). Such form shall provide for, among other items—

"(i) a summary description of the conditions for excluding nonimmigrant visitors from the United States under subsection (a) and this subsection,

"(ii) a description of the conditions of entry with a waiver under this subsection, including the limitation of such entry to ninety days and the consequences of failure to abide by such conditions, and

"(iii) questions for the alien to answer concerning any previous denial of the alien's application for a visa.

"(D) An alien may not be provided a waiver under this subsection unless the alien has waived any right (i) to review or appeal under the Act of an immigration officer's determination as to the admissibility of the alien at the port of entry into the United States or (ii) to contest, other than on the basis of an application for asylum, any action for deportation against the alien.

"(3)(A) The Attorney General and the Secretary of State acting jointly may designate up to eight countries as pilot countries for purposes of this subsection.

"(B) For the period beginning after the thirty-day period described in paragraph (2)(A) and ending on the last day of the first fiscal year which begins after such thirty-day period, a country may not be designated as a pilot country unless—

"(i) the average number of refusals of nonimmigrant visitor visas for nationals of that country during the two previous full fiscal years was less than 2 per centum of the total number of nonimmigrant visitor visas for nationals of that country which were granted or refused during those years, and

"(ii) the average number of refusals of nonimmigrant visitor visas for nationals of that country during either of such two previous full fiscal years was less than 2.5 per centum of the total number of nonimmigrant visitor visas for nationals of that country which were granted or refused during that year.

"(C) For each fiscal year (within the pilot program period) after the period specified in subparagraph (B)—

"(i) in the case of a country which was a pilot country in the previous fiscal year, a country may not be designated as a pilot country unless the sum of—

"(I) the total of the number of nationals of that country who were excluded from admission or withdrew their application for admission during such previous fiscal year as a nonimmigrant visitor, and

"(II) the total number of nationals of that country who were admitted as nonimmigrant visitors during previous fiscal year and who violated the terms of such admission,

was less than 2 per centum of the total number of nationals of that country who applied for admission as nonimmigrant visitors during such previous fiscal year, or

"(ii) in the case of another country, the country may not be designated as a pilot country unless—

"(I) the average number of refusals of nonimmigrant visitor visas for national of that country during the two previous full fiscal years was less than 2 per centum of the total number of nonimmigrant visitor visas for nationals of that country which were granted or refused during those years, and

"(II) the average number of refusals of nonimmigrant visitor visas for nationals of that country during either of such two previous full fiscal years was less than 2.5 per centum of the total number of nonimmigrant visitor visas for nationals of that country which were granted or refused during that year.

"(4) The agreement referred to in paragraph (1)(D)(i) is an agreement between a carrier and the Attorney General under which the carrier agrees, in consideration of the waiver of the visa requirement with respect to a nonimmigrant visitor under this subsection—

"(A) to indemnify the United States against any costs for the transportation of the alien from the United States if the visitor is refused admission to the United States or remains in the United States unlawfully after the ninety-day period described in paragraph (1)(A)(i), and

"(B) to submit daily to immigration officers any immigration forms received with respect to nonimmigrant visitors provided a waiver under this subsection.

The Attorney General may terminate such an agreement with five days' notice to the carrier for the carrier's failure to meet the terms of such agreement.

"(5) For purposes of this subsection, the term 'pilot program period' means the period beginning at the end of the thirty-day period referred to in paragraph (2)(A) and ending on the last day of the third fiscal year which begins after such thirty-day period.

"(6) The Attorney General and the Secretary of State shall jointly monitor the program and shall report to the Congress not later than two years after the beginning of the pilot program, and shall include in such report recommendations respecting extension of the pilot program period and of the number of countries that may be designated under paragraph (3)(A).

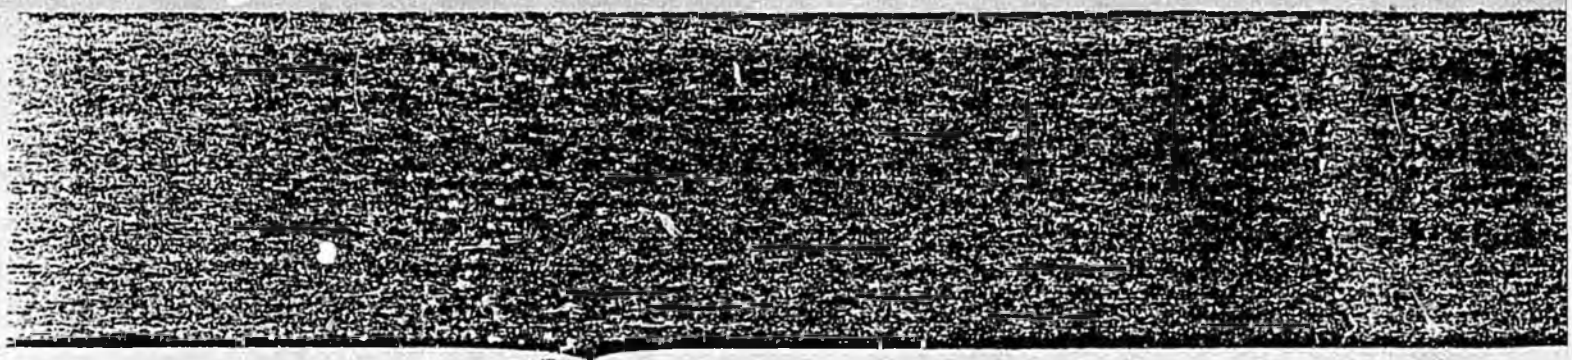
"(m) The requirement of paragraph (26)(B) of subsection (a) may be waived by the Attorney General, the Secretary of State, and the Secretary of the Interior, acting jointly, in the case of an alien applying for admission as a nonimmigrant visitor for business or pleasure and solely for entry into and stay on Guam for a period not to exceed fifteen days, if the Attorney General, the Secretary of State, and the Secretary of the Interior jointly determine that—

"(1) the territory of Guam has developed an adequate arrival and departure control system, and

"(2) such a waiver does not present a threat to the welfare, safety, or security of the United States.".

(b) Section 214(a) (8 U.S.C. 1184(a)) is amended by adding at the end the following new sentence: "No alien admitted to the United States without a visa pursuant to subsection (l) or (m) of section 212 may be authorized to remain in the United States as a nonimmigrant visitor for a period exceeding ninety days or fifteen days, respectively, from the date of admission.".

(c) For amendment prohibiting nonimmigrant visitors entering under visa waivers from adjusting their status to immigrants, see section 212(b) of this Act.



(d) Section 248 (8 U.S.C. 1258) is amended by striking out "and" at the end of paragraph (2), by striking out the period at the end of paragraph (3) and inserting in lieu thereof ", and" and by adding at the end thereof the following new paragraph:

"(4) an alien classified as a nonimmigrant under section 101(a)(15)(O) or admitted as a nonimmigrant visitor without a visa under subsection (l) or (m) of section 212.".

NONIMMIGRANT SEASONAL AGRICULTURAL PROGRAM

SEC. 214. (a) Section 101(a)(15) (8 U.S.C. 1101(a)(15)), as amended by sections 204(b) and 211(a)(2) of this Act, is further amended by striking out "or" at the end of subparagraph (N), by striking out the period at the end of subparagraph (O) and inserting in lieu thereof "; or", and by adding at the end the following new subparagraph:

"(P) an alien having a residence in a foreign country which he has no intention of abandoning who is coming to the United States for a period of not longer than 11 consecutive months to perform services or

om foreign contiguous territory the Attor-
l to their applying or reapplying for ad-

RE: HJR 20 (Visa Waivers)

I suggest that we present the attached draft SCS to the Senate Labor and Commerce Committee for their consideration for adoption in lieu of the House Labor and Commerce CS for CSHJR 20.

I make this suggestion for the following reason:

The House Labor and Commerce Committee amendments changed the perspective of the resolution. As you know HJR 20 was originally drafted to be directed to Senators Stevens and Murkowski. The L & C CS added that copies were to be sent to various national leaders also and changed the resolution clause to include references to them.

However the CS did not change any of the language in the resolution's "whereas" clauses -- language which was also originally intended to be directed to Senators Stevens and Murkowski, "two of our own," so to speak.

The amendments I recommend do not change the basic arguments in favor of the bill, do not delete any of the specifically Alaskan issues mentioned, and do not detract from the House's position on the original bill; however, the amendments do broaden the resolution's message and would serve, I think, to lessen the provincial "sound" of the Labor and Commerce CS.

BY THE LABOR AND COMMERCE COMMITTEE

SCS FOR CS FOR HOUSE JOINT RESOLUTION NO. 20 (L & C)
IN THE LEGISLATURE OF E STATE OF ALASKA
FOURTEENTH LEGISLATU.. FIRST SESSION

Re ng to visa waivers for ... national airline passengers.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS visa waivers would encourage eligible international airline passengers and other eligible nonimmigrants to visit the United States thereby benefiting the nation's tourism industry; and

WHEREAS all the states of the nation would benefit by granting visa waivers to eligible nonimmigrants; and

WHEREAS the state of Alaska is particularly interested in securing a visa waiver program because tourism is an important element in the state's immediate future and a vital part of ensuring stable and continuing economic growth; and

WHEREAS 1.5 million international airline passengers annually transit the Anchorage International Airport on the transpolar route between Europe and Asia; and

WHEREAS research by the Anchorage Convention and Visitors Bureau reveals that among the annual airport transpolar passengers, 84 percent indicated an interest in the state, 80 percent vacation at least once a year in the period from September to May when the state needs more visitors, 62 percent like winter-oriented vacations, 50 percent could have planned a stopover in Anchorage, 50 percent would stop for four to seven days, and 76 percent are frequent transpolar route passengers and previously have landed in Anchorage; and

WHEREAS state revenue from transpolar passengers constitutes more than 50 percent of the revenue necessary to operate all international airports in the state; and

WHEREAS there is the strong likelihood that carriers on the transpolar route will no longer need this state as a refueling stop in the foreseeable future and passenger interest in visits or stopovers in the state will be the only incentive for transpolar air carriers to continue to stop in the state; and

WHEREAS one of several obstacles to a stopover in Alaska or any other state [THE STATE] is the present requirement of a

DRAFT

United States visa; and

WHEREAS last year Congress considered but failed to pass legislation providing for the granting of visa waivers;

BE IT RESOLVED that the Alaska State Legislature requests the President and the Congress of the United States to support the renewed effort to secure the waiver of visa requirements for eligible international airline [TRANSPOLAR] passengers and other eligible nonimmigrants wishing to exercise stopover privileges in Alaska and other states [THE STATE].

COPIES of this resolution shall be sent to the Honorable Ronald Reagan, President of the United States, the Honorable Robert Dole, Majority Leader of the Senate, the Honorable Thomas P. "Tip" O'Neill, Jr., Speaker of the House of Representatives; the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

TO: Senator Fred Zharoff, Chairman, Senate Labor and Commerce
FROM: Representative Steve Rieger

RE: CSHJR 20 (Labor and Commerce), Relating to visa waivers for international airlines passengers.

Attached please find back-up information on CSHJR 20 (Labor and Commerce).

This resolution offers the opportunity for the state legislature to express support for an idea which will benefit all Alaskans -- a federal visa waiver program for eligible nonimmigrants. As you may know, a visa waiver program was proposed during the last Congress and was defeated only after it became embroiled in another, unrelated controversy.

CSHJR 20 (Labor and Commerce) encourages our Congressional delegation in their continuing efforts to secure passage of a visa waiver bill. Copies of the resolution, if passed, will be sent to other Congressional leaders to make our position known with them as well.

Senator, I would sincerely appreciate your timely consideration of this resolution. A prompt hearing by your Committee will help make it possible for Alaska to get on record in support of this important program.

Thank you.

CHAIRMAN SHOULD MOVE FOR THE ADOPTION OF THE L&C SCS;

Trans Polar route

THIS RESOLUTION ENCOURAGES THE US CONGRESS IN THEIR EFFORT TO PASS A FEDERAL "VISA WAIVER" BILL. PASSAGE OF A VISA WAIVER BILL WILL ENHANCE TOURISM BY ALLOWING ELIGIBLE INTERNATIONAL AIRLINE PASSENGERS AND ELIGIBLE NONIMMIGRANTS TO VISIT IN THE UNITED STATES.

A VISA WAIVER AS DEFINED IN FEDERAL LEGISLATION IS SPECIAL PERMISSION FOR A NONIMMIGRANT VISITOR, FROM AN ELIGIBLE FOREIGN COUNTRY, TO REMAIN IN THE U.S. FOR UP TO 90 DAYS WITHOUT HAVING OBTAINED THE CUSTOMARY NON-IMMIGRANT VISA.

THE LABOR AND COMMERCE CS MADE MINOR CHANGES AT THE SUGGESTION OF THE SPONSOR, AND IT EXPANDED THE LANGUAGE TO REFLECT THE BENEFITS TO ALL STATES AS WELL AS ALASKA.

THE ALASKA VISITORS ASSOCIATION, THE ANCHORAGE CONVENTION AND VISITORS BUREAU, AND THE DIVISION OF TOURISM SUPPORT SUPPORT SUCH A PROGRAM.

Currently law requires nonimmigrant visitors to have a valid nonimmigrant visa before being admitted into the US. Most nonimmigrant visitors must obtain a visa in their home country before beginning a trip. The current process of applying for a visa is time consuming and involves considerable pre planning.

HJR 23: "Relating to US Customs Service Offices on the West Coast"

Urges the US Customs Service to maintain its current uniform jurisdiction over all west coast ports, and also to increase the number of customs inspectors to expedite trade thru west coast ports.

Discussions are being held on a federal level to separate Alaska, Washington, and Oregon into a jurisdiction headquartered in Chicago Illinois, and there is a concern that the proposed separation would be interuptive to uniform customs operations and detrimental to international trade activities.

HJR 23 "RELATING TO U.S. CUSTOMS SERVICE OFFICES ON THE WEST COAST"

CURRENTLY, DISCUSSIONS ARE BEING HELD AT THE FEDERAL LEVEL TO SEPARATE ALASKA, WASHINGTON, AND OREGON INTO THE JURISDICTION OF A CUSTOMS OFFICE HEADQUARTERED IN CHICAGO, ILLINOIS.

THIS RESOLUTION URGES THE U.S. CUSTOMS SERVICE TO MAINTAIN ITS CURRENT UNIFORM JURISDICTION OVER ALL WEST COAST PORTS, AND TO INCREASE THE NUMBER OF CUSTOMS INSPECTORS TO EXPEDITE TRADE THRU WEST COAST PORTS.
